Healthy **People** in Healthy **Communities**

What Is *Healthy People*?

***Healthy People* is a set of goals and objectives with 10-year targets designed to guide national health promotion and disease prevention efforts to improve the health of all people in the United States.**

Released by the U.S. Department of Health and Human Services each decade, *Healthy People* reflects the idea that setting objectives and providing science-based benchmarks to track and monitor progress can motivate and focus action. *Healthy People 2020* represents the fourth generation of this initiative, building on a foundation of three decades of work.

Healthy People is used as a tool for strategic management by the federal government, states, communities, and many other public- and private-sector partners. Its comprehensive set of objectives and targets is used to measure progress for health issues in specific populations, and serves as (1) a foundation for prevention and wellness activities across various sectors and within the federal government, and (2) a model for measurement at the state and local levels.

What's New in *Healthy People 2020*?

Healthy People 2020 is committed to the vision of a society in which all people live long, healthy lives. This decade, several new features will help make this vision a reality:

- Emphasizing ideas of health equity that address social determinants of health and promote health across all stages of life
- Replacing the traditional print publication with an interactive Web site as the main vehicle for dissemination
- Maintaining a Web site that allows users to tailor information to their needs and explore evidence-based resources for implementation

The **Mission, Vision, and Goals** of *Healthy People 2020*

Vision—A society in which all people live long, healthy lives.

Mission—*Healthy People 2020* strives to:

- Identify nationwide health improvement priorities
- Increase public awareness and understanding of the determinants of health, disease, and disability, and the opportunities for progress
- Provide measurable objectives and goals that are applicable at the national, state, and local levels
- Engage multiple sectors to take actions to strengthen policies and improve practices that are driven by the best available evidence and knowledge
- Identify critical research, evaluation, and data collection needs

Overarching Goals

- Attain high quality, longer lives free of preventable disease, disability, injury, and premature death
- Achieve health equity, eliminate disparities, and improve the health of all groups
- Create social and physical environments that promote good health for all
- Promote quality of life, healthy development, and healthy behaviors across all life stages

Foundation **Health Measures**

Healthy People 2020 includes broad, cross-cutting measures without targets that will be used to assess progress toward achieving the four overarching goals.

Overarching Goals of <i>Healthy People 2020</i>	Foundation Measures Category	Measures of Progress
Attain high quality, longer lives free of preventable disease, disability, injury, and premature death	General Health Status	<ul style="list-style-type: none"> • Life expectancy • Healthy life expectancy • Physical and mental unhealthy days • Self-assessed health status • Limitation of activity • Chronic disease prevalence • International comparisons (where available)
