

Powder River Basin, North Half (Panel 1 of 2) Oil & Gas Fields by 2001 Liquids Reserve Class

The mapped oil and gas field boundary outlines were created by the Reserves and Production Division, Office of Oil and Gas, Energy Information Administration pursuant to studies required by Section 504 of the Energy Policy and Conservation Act Amendments of 2000 (P.L. 106-469). The boundaries are not informed by subsurface structural information. The data and methods used in their creation are detailed in a report, "Scientific Inventory of Onshore Federal Lands' Oil and Gas Resources and Reserves and the Extent and Nature of Restrictions to Their Development", prepared by the US Departments of Interior, Agriculture and Energy.

Unnamed fields and fields generically named "wildcat" were renamed to a concatenation of their basin and state of occurrence, e.g. UP_UT (Uinta-Piñon Basin and Utah).

Map created June 2005; projection is UTM-13, NAD-27
