

Births, Marriages, Divorces, and Deaths: Provisional Data for April 1999

Table 1. Provisional Vital Statistics for the United States

[Rates for infant deaths are deaths under 1 year per 1,000 live births; fertility rates are live births per 1,000 women aged 15–44 years; all other rates are per 1,000 total population. Data are subject to monthly reporting variation; see Technical notes]

Item	April				January–April				12 months ending with April				
	Number		Rate		Number		Rate		Number		Rate		
	1999	1998	1999	1998	1999	1998	1999	1998	1999	1998	1999	1998	1997
Live births	318,000	337,000	14.2	15.2	1,287,000	1,288,000	14.4	14.5	3,942,000	3,920,000	14.6	14.6	14.6
Fertility rate	64.4	68.6	65.1	65.6	66.0	65.6	65.3
Deaths	203,000	191,000	9.1	8.6	865,000	845,000	9.7	9.5	2,351,000	2,342,000	8.7	8.7	8.6
Infant deaths	2,300	2,300	7.1	6.9	9,200	9,400	7.1	7.3	27,500	27,400	7.0	7.0	7.1
Natural increase	115,000	146,000	5.1	6.6	422,000	443,000	4.7	5.0	1,591,000	1,578,000	5.9	5.9	6.0
Marriages	163,000	157,000	7.8	7.5	592,000	582,000	7.1	6.9	2,265,000	2,315,000	8.4	8.6	9.1
Divorces ¹	---	---	---	---	---	---	---	---	---	---	4.2	4.2	4.4
Population ² base (in millions)	272.2	269.4	270.9	268.6	266.1

... Category not applicable.

--- Data not available.

¹Divorce rates exclude data for California, Colorado, Indiana, and Louisiana. Populations for these rates also exclude these States.

Notes: Figures include revisions received from the States. Twelve-month figures for the current year reflect revisions received for previous months, and figures for earlier years may differ from those previously published.

Technical notes

Effective with Volume 47, Number 1, the *Monthly Vital Statistics Report* (MVSR) has been renamed the *National Vital Statistics Reports* (NVSR). The monthly issue includes [Technical notes](#) and two tables that show provisional vital statistics for the United States. Tables previously published in the MVSR that show provisional data by State are now available on the NCHS home page on the Internet at <http://www.cdc.gov/nchs/datawh/statab/unpubd/hvstab48.htm>

Data shown here are provisional and include only events occurring within the United States (50 States and the District of Columbia). Mortality data exclude fetal deaths. Delay in the receipt of certificates in a registration office may result in a low figure for a given month followed by a high figure for the month(s) in which the delayed records were received. Totals for births, deaths, and infant deaths are based on the State estimates by State of residence and, therefore, in effect, exclude events to nonresidents of the United States. Events to nonresidents of the United States are included in all marriage and divorce figures. The effect of excluding events to nonresidents from the U.S. totals is small. Divorce figures include reported annulments.

Until 1998 provisional totals for births, marriages, and divorces for the entire United States included corrections for observed differences between provisional and final figures. These corrections served to compensate for delays in reporting. Beginning with data for January 1998, these monthly corrections for births, marriages, and divorces have been dropped. Further information on

these changes has been provided in the NVSR's presenting provisional data for January, February, and March 1999 (Volume 48, Numbers 1, 2, and 4, respectively; these reports are available at <http://www.cdc.gov/nchs/products/pubs/pubd/nvsr/nvsr.htm>).

Moreover, the National Center for Health Statistics (NCHS) is ceasing to publish aggregated divorce counts and rates based on provisional data from all 50 States, because it is no longer statistically feasible to supply estimates of monthly divorce counts for four nonreporting States (California, Colorado, Indiana, and Louisiana). Instead, NCHS is publishing only the 12-month divorce rates shown in [table 1](#), based solely on the combined counts and populations for the 46 reporting States and the District of Columbia. Aggregated one-month and cumulative divorce numbers and rates as well as the 12-month number have been dropped because of their very limited usefulness when based on less than the full complement of States. Monthly marriage and divorce counts as reported by the States will continue to be provided on the NCHS Internet home page cited previously.

The populations used for computing rates are furnished by the U.S. Bureau of the Census. Monthly rates are based on populations estimated for the specific month. Year-to-date rates are averages of monthly rates that have been weighted by the number of days in the corresponding months. Rates for 12-month periods are the sum of events for the period per population estimated at the midpoint of the period. Populations have been estimated by NCHS for the 12-month divorce rates based on the 46 reporting States and the District

Table 2. Provisional number of live births, marriages, deaths, and infant deaths and rates, by month: United States, January 1998–April 1999

[Data are provisional and are subject to monthly reporting variation; see Technical notes]

Period	Live births				Marriages		Deaths		Infant deaths	
	Number	Rate per 1,000 population	Rate per 1,000 women aged 15–44 years		Number	Rate per 1,000 population	Number	Rate per 1,000 population	Number	Rate per 1,000 live births
			Unadjusted	Seasonally adjusted ¹						
1998:										
January	308,000	13.5	60.8	64.0	135,000	6.2	225,000	9.8	2,400	7.4
February	310,000	15.0	67.8	68.8	135,000	6.9	209,000	10.1	2,300	7.5
March	332,000	14.5	65.4	66.0	155,000	7.2	219,000	9.6	2,400	7.3
April	337,000	15.2	68.6	70.0	157,000	7.5	191,000	8.6	2,300	6.9

June	326,000	14.7	66.4	65.2	229,000	10.3	184,000	8.3	2,300	7.1
July	357,000	15.6	70.4	68.0	239,000	10.4	187,000	8.2	2,400	6.9
August	337,000	14.7	66.4	63.3	226,000	9.8	191,000	8.3	2,300	6.7
September	330,000	14.8	67.1	63.7	221,000	9.9	175,000	7.9	2,300	6.9
October	356,000	15.5	70.1	70.7	209,000	9.1	189,000	8.2	2,300	6.7
November	311,000	14.0	63.3	65.0	186,000	8.3	178,000	8.0	2,100	6.7
December	321,000	13.9	62.8	64.2	172,000	7.5	194,000	8.4	2,400	7.2
1999:										
January	335,000	14.5	65.7	68.9	130,000	6.0	219,000	9.5	2,300	6.7
February	303,000	14.6	65.8	67.1	141,000	7.2	208,000	10.0	2,300	7.4
March	330,000	14.3	64.5	65.8	159,000	7.3	235,000	10.2	2,400	7.2
April	318,000	14.2	64.4	65.6	163,000	7.8	203,000	9.1	2,300	7.1

¹The method of seasonal adjustment, developed by the U.S. Bureau of the Census, is described in *The X-11 Variant of the Census Method II Seasonal Adjustment Program*, Technical Paper No. 15 (1967 revision).

NOTE: Figures include all revisions received from the States and, therefore, may differ from those previously published.

of Columbia. Because monthly infant mortality rates are based on relatively few events, they are highly variable, and comparisons of monthly infant mortality rates should be interpreted cautiously.
