

# ***Surface Safety Alert:*** **North Las Vegas Airport (VGT)**

## **Runway 7 at Taxiway Golf:**

**\*\*DO NOT CROSS RUNWAY 7 HOLD BARS\*\*  
WITHOUT ATC AUTHORIZATION**

On a number of occasions, pilots operating at VGT have taxied beyond the holding position markings for Runway 7 without ATC authorization. This somewhat complex area is a major **Hot Spot** on the airport and extreme caution should be taken when operating near this intersection (photo above). The Runway 7 hold bars are located at the Taxiway Alpha edge line, and above-ground guard lights may partially block the red and white Runway 7 sign (photo below).

- Always review airport diagrams before taxiing or landing.
- Never cross a Runway hold line (hold bar) without *explicit* ATC instructions.  
⇒ ]b`doubt **ASK!**
