2011 Characteristics of New Housing

Single-family Houses Completed, Units in Multifamily Buildings Completed, Units in Multifamily Buildings Started, Multifamily Buildings Completed, Single-Family Houses Sold, Contractor-Built Houses Started

Index of Housing Characteristic Tables

Characteristics of New Single-Family Houses Completed

| Table | Page |
|---|-------------|
| Presence of Air Conditioning | 5 |
| Number of Bathrooms | 33 |
| Number of Bedrooms | 61 |
| Number of Bathrooms by Number of Bedrooms | 89 |
| Type of Construction Method | 113 |
| Principal Type of Exterior Wall Material | 129 |
| Secondary Type of Exterior Wall Material | 157 |
| Secondary Wall Material by Brick Primary Wall Material | 169 |
| Secondary Wall Material by Wood Primary Wall Material | 181 |
| Secondary Wall Material by Stucco Primary Wall Material | 193 |
| Secondary Wall Material by Vinyl Siding Primary Wall Material | 205 |
| Secondary Wall Material by Fiber Cement Primary Wall Material | 217 |
| Secondary Wall Material by 'Other' Primary Wall Material | 225 |
| Number of Fireplaces | 233 |
| Type of Financing | 261 |
| Type of Foundation | 273 |
| Type of Heating Fuel | 301 |
| Heating Fuel by Type of Heating System | 329 |
| Type of Heating System | 361 |
| Median and Average Square Feet by Location | 389 |
| Median and Average Square Feet by Type of Financing | 393 |
| Presence of Outdoor Features | 397 |
| Type of Parking Facility | 413 |
| Square Feet of Floor Area | 441 |
| Number of Stories | 453 |

Characteristics of Units in New Multifamily Buildings Started

| Table | Page |
|----------------|-------------|
| Age-Restricted | 481 |

Characteristics of Units in New Multifamily Buildings Completed

| Table | Page |
|--|-------------|
| Number of Floors | 484 |
| Units per Building | 493 |
| Presence of Air Conditioning | 502 |
| Type of Heating Fuel | 511 |
| Presence of Heat Pump | 520 |
| Number of Bathrooms | 529 |
| Number of Bedrooms | 538 |
| Square Foot Ranges | 547 |
| Median and Average Square Feet of Floor Area | 553 |
| Design Type | 555 |
| Presence of Fireplace | 561 |
| Age-Restricted | 567 |

Characteristics of New Multifamily Buildings Completed

| Table | Page |
|------------------------------|-------------|
| Number of Floors | 570 |
| Units per Building | 579 |
| Presence of Air Conditioning | 588 |
| Type of Heating Fuel | 597 |
| Presence of Heat Pump | 606 |
| Presence of Fireplace | 615 |
| Construction Method | 621 |

Characteristics of New Single-Family Houses Sold

| Table | Page |
|---|-------------|
| Presence of Air Conditioning | 627 |
| Number of Bathrooms | 636 |
| Number of Bedrooms | 645 |
| Number of Bathrooms by Number of Bedrooms | 654 |
| Principal Type of Exterior Wall Material | 672 |
| Secondary Type of Exterior Wall Material | 685 |
| Secondary Wall Material by Brick Primary Wall Material | 694 |
| Secondary Wall Material by Wood Primary Wall Material | 700 |
| Secondary Wall Material by Stucco Primary Wall Material | 706 |
| Secondary Wall Material by Vinyl Siding Primary Wall Material | 712 |

| | |
|---|-----|
| Secondary Wall Material by Fiber Cement Primary Wall Material | 718 |
| Secondary Wall Material by 'Other' Primary Wall Material | 724 |
| Number of Fireplaces | 730 |
| Type of Financing | 739 |
| Type of Foundation | 750 |
| Type of Heating Fuel | 759 |
| Heating Fuel by Type of Heating System | 768 |
| Type of Heating System | 792 |
| Lot Size | 801 |
| Design Type | 814 |
| Type of Parking Facility | 818 |
| Price per Square Foot | 827 |
| Median and Average Price Per Square Foot | 836 |
| Sales Price Range | 839 |
| Median and Average Sales Price | 845 |
| Square Feet of Floor Area and Geographic Area | 851 |
| Median and Average Square Feet | 861 |
| Number of Stories | 864 |

Characteristics of New Contractor-Built Houses Started

| Table | Page |
|---|------|
| Contract Price Range | 873 |
| Median and Average Contract Price | 875 |
| Contract Price per Square Foot Range | 876 |
| Median and Average Contract Price per Square Foot | 878 |

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses built for rent (not shown separately).

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Presence of Air-Conditioning in New Single-Family Houses Completed: Owner-Built¹

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses built for rent (not shown separately).

²Includes 2 1/2 bathrooms or more for years 1986 and earlier.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Number of Bathrooms in New Single-Family Houses Completed: Built For Sale¹

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

²Includes 2 1/2 bathrooms or more for years 1986 and earlier.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

²Includes 2 1/2 bathrooms or more for years 1986 and earlier.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Number of Bathrooms in New Single-Family Houses Completed: Owner-Built¹

(Components may not add to total due to rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

²Includes 2 1/2 bathrooms or more for years 1986 and earlier.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Number of Bedrooms in New Single-Family Houses Completed¹

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses built for rent (not shown separately).

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses built for rent (not shown separately).

Number of Bathrooms in New Single-Family Houses Completed

by Number of Bedrooms: Built For Sale¹

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

Number of Bathrooms in New Single-Family Houses Completed

by Number of Bedrooms: Contractor-Built¹

(Components may not add to total due to rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

Number of Bathrooms in New Single-Family Houses Completed

by Number of Bedrooms: Owner-Built¹

(Components may not add to total due to rounding. Percents computed from unrounded figures.)

| Year | Number of houses (in thousands) | | | | | Percent distribution | | | | |

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses built for rent (not shown separately).

²Includes panelized and precut units.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

²Includes panelized and precut units.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

²Includes panelized and precut units.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

²Includes panelized and precut units.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses built for rent (not shown separately).

²Includes concrete block, stone, aluminum siding, and other types.
Data prior to 2005 include fiber cement. Data prior to 1992 include vinyl siding.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Principal Type of Exterior Wall Material of New Single-Family Houses Completed: Built for Sale¹

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

²Includes concrete block, stone, aluminum siding, and other types.
Data prior to 2005 include fiber cement. Data prior to 1992 include vinyl siding.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Principal Type of Exterior Wall Material of New Single-Family Houses Completed: Contractor-Built¹

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

² Includes concrete block, stone, aluminum siding, and other types.
Data prior to 2005 include fiber cement. Data prior to 1992 include vinyl siding.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

² Includes concrete block, stone, aluminum siding, and other types. Data prior to 2005 include fiber cement. Data prior to 1992 include vinyl siding.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Secondary Type of Exterior Wall Material of New Single-Family Houses Completed¹

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses built for rent (not shown separately).

² Includes concrete block, stone, aluminum siding, and other types.
Data prior to 2005 include fiber cement.

Secondary Type of Exterior Wall Material of New Single-Family Houses Completed: Built for Sale¹

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

² Includes concrete block, stone, aluminum siding, and other types.
Data prior to 2005 include fiber cement.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

² Includes concrete block, stone, aluminum siding, and other types.
Data prior to 2005 include fiber cement.

Secondary Type of Exterior Wall Material of New Single-Family Houses Completed

With Primary Exterior Wall Material of Brick¹

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes houses built for rent (not shown separately).

² Includes concrete block, stone, aluminum siding, and other types. Data prior to 2005 include fiber cement.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

² Includes concrete block, stone, aluminum siding, and other types. Data prior to 2005 include fiber cement.

**Secondary Type of Exterior Wall Material of New Single-Family Houses Completed
With Primary Exterior Wall Material of Brick: Contractor-Built¹**

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

² Includes concrete block, stone, aluminum siding, and other types. Data prior to 2005 include fiber cement.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

² Includes concrete block, stone, aluminum siding, and other types. Data prior to 2005 include fiber cement.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

² Includes concrete block, stone, aluminum siding, and other types. Data prior to 2005 include fiber cement.

**Secondary Type of Exterior Wall Material of New Single-Family Houses Completed
With Primary Exterior Wall Material of Wood: Contractor-Built¹**

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

² Includes concrete block, stone, aluminum siding, and other types. Data prior to 2005 include fiber cement.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

² Includes concrete block, stone, aluminum siding, and other types. Data prior to 2005 include fiber cement.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes houses built for rent (not shown separately).

² Includes concrete block, stone, aluminum siding, and other types. Data prior to 2005 include fiber cement.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

² Includes concrete block, stone, aluminum siding, and other types. Data prior to 2005 include fiber cement.

Secondary Type of Exterior Wall Material of New Single-Family Houses Completed

With Primary Exterior Wall Material of Stucco: Contractor-Built¹

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

² Includes concrete block, stone, aluminum siding, and other types. Data prior to 2005 include fiber cement.

Secondary Type of Exterior Wall Material of New Single-Family Houses Completed

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes houses built for rent (not shown separately).

² Includes concrete block, stone, aluminum siding, and other types. Data prior to 2005 include fiber cement.

Secondary Type of Exterior Wall Material of New Single-Family Houses Completed

With Primary Exterior Wall Material of Vinyl Siding: Built for Sale¹

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

² Includes concrete block, stone, aluminum siding, and other types. Data prior to 2005 include fiber cement.

**Secondary Type of Exterior Wall Material of New Single-Family Houses Completed
With Primary Exterior Wall Material of Vinyl Siding: Contractor-Built¹**

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

² Includes concrete block, stone, aluminum siding, and other types. Data prior to 2005 include fiber cement.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

² Includes concrete block, stone, aluminum siding, and other types. Data prior to 2005 include fiber cement.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes concrete block, stone, aluminum siding, and other types.

²"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

³Includes concrete block, stone, aluminum siding, and other types that are different from the primary type of "other" material.

| RSE | 2 | 6 | 7 | 10 | (NA) | (NA) | (NA) | (NA) |

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses built for rent (not shown separately).

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Number of Fireplaces in New Single-Family Houses Completed: Built For Sale¹

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Number of Fireplaces in New Single-Family Houses Completed: Owner-Built¹
 (Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses built for rent (not shown separately).

²Includes other types of financing (not shown separately).

Note: In 2008, collection of the type of financing was discontinued for houses built for rent.

The type of financing is assumed to be in proportion to that of completed houses for which the financing is collected.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

²Includes other types of financing (not shown separately).

| RSE | 2 | 39 | 11 | 22 | (NA) | (NA) | (NA) | (NA) |

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses built for rent (not shown separately).

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Type of Foundation in New Single-Family Houses Completed: Built For Sale¹
 (Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Type of Heating Fuel Used in New Single-Family Houses Completed¹

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses built for rent (not shown separately).

²Includes natural gas and bottled or liquified petroleum gas (including propane).

³Includes heating oil and kerosene.

⁴Includes wood, coal, solar, and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Type of Heating Fuel Used in New Single-Family Houses Completed: Built For Sale¹

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

²Includes natural gas and bottled or liquified petroleum gas (including propane).

³Includes heating oil and kerosene.

⁴Includes wood, coal, solar, and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

²Includes natural gas and bottled or liquified petroleum gas (including propane).

³Includes heating oil and kerosene.

⁴Includes wood, coal, solar, and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Type of Heating Fuel Used in New Single-Family Houses Completed: Owner-Built¹

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

²Includes natural gas and bottled or liquified petroleum gas (including propane).

³Includes heating oil and kerosene.

⁴Includes wood, coal, solar, and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses built for rent (not shown separately).

²Includes natural gas and bottled or liquefied petroleum gas (including propane).

³Includes heating oil, kerosene, wood, coal, solar, and other types (not shown separately).

⁴Includes both air source and geothermal (ground source) versions.

⁵Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar, and other types.

Type of Heating Fuel Used in New Single-Family Houses Completed

By Type of Heating System: Built For Sale¹

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

²Includes natural gas and bottled or liquified petroleum gas (including propane).

³Includes heating oil, kerosene, wood, coal, solar, and other types (not shown separately).

⁴Includes both air source and geothermal (ground source) versions.

⁵Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar, and other types.

Type of Heating Fuel Used in New Single-Family Houses Completed

By Type of Heating System: Contractor-Built¹

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

²Includes natural gas and bottled or liquified petroleum gas (including propane).

³Includes heating oil, kerosene, wood, coal, solar, and other types (not shown separately).

⁴Includes both air source and geothermal (ground source) versions.

⁵Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar, and other types.

Type of Heating Fuel Used in New Single-Family Houses Completed

By Type of Heating System: Owner-Built¹

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

²Includes natural gas and bottled or liquified petroleum gas (including propane).

³Includes heating oil, kerosene, wood, coal, solar, and other types (not shown separately).

⁴Includes both air source and geothermal (ground source) versions.

⁵Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar, and other types.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses built for rent (not shown separately).

²Includes both air source and geothermal (ground source) versions.

³Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar, and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Note: Estimates of the type of heating system for 2008 have been revised.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

²Includes both air source and geothermal (ground source) versions.

³Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar, and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Note: Estimates of the type of heating system for 2008 have been revised.

Type of Heating System Used in New Single-Family Houses Completed: Contractor-Built¹

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

²Includes both air source and geothermal (ground source) versions.

³Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar, and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Note: Estimates of the type of heating system for 2008 have been revised.

Type of Heating System Used in New Single-Family Houses Completed: Owner-Built¹

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

²Includes both air source and geothermal (ground source) versions.

³Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar, and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Note: Estimates of the type of heating system for 2008 have been revised.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

Median and Average Square Feet of Floor Area in New Single-Family Houses Completed by Location: Owner-Built¹
(Medians and averages computed from unrounded figures)

| Year | Median square feet | | | | | | | Average square feet | | | | | | |

or a consistency review

¹Includes houses built for rent (not shown separately). Starting in 2008, the type of financing is no longer collected for houses built for rent; the type of financing is assumed to be in proportion to that of completed houses for all other purposes.

²Includes other types of financing (not shown separately).

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses built for rent (not shown separately).

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Presence of Outdoor Features in New Single-Family Houses Completed: Built For Sale¹

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Type of Parking Facility of New Single-Family Houses Completed¹

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses built for rent (not shown separately).

²Data prior to 1992 include garages for 3 cars or more.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

²Data prior to 1992 include garages for 3 cars or more.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

²Data prior to 1992 include garages for 3 cars or more.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

²Data prior to 1992 include garages for 3 cars or more.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Square Feet of Floor Area in New Single-Family Houses Completed¹

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

| Year | Number of houses (in thousands) by square feet | | | | | | | Percent distribution | | | | | | |
|---|--|-------------|----------------|----------------|----------------|----------------|---------------|----------------------|-------------|----------------|----------------|----------------|----------------|---------------|

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes houses built for rent (not shown separately).

Square Feet of Floor Area in New Single-Family Houses Completed: Built For Sale¹

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

| Year | Number of houses (in thousands) by square feet | | | | | | | Percent distribution | | | | | | |

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ "Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ "Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes houses for rent (not shown separately).

²Includes houses with 1 1/2, 2 1/2, and 3 stories.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

²Includes houses with 1 1/2, 2 1/2, and 3 stories.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Number of Stories in New Single-Family Houses Completed: Contractor-Built¹

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

²Includes houses with 1 1/2, 2 1/2, and 3 stories.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

²Includes houses with 1 1/2, 2 1/2, and 3 stories.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Number of Multifamily Units Completed by Number of Units Per Building

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Data prior to 1999 include 3 to 4 units.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Number of Multifamily Units Completed by Type of Heating Fuel

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes both air source and geothermal (ground source) versions.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes both air source and geothermal (ground source) versions.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹All units in building are included in one size category based on average number of square feet per housing unit. The average was calculated using total square feet of all floors based on exterior dimensions divided by number of housing units in the building.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹All units in building are included in one size category based on average number of square feet per housing unit. The average was calculated using total square feet of all floors based on exterior dimensions divided by number of housing units in the building.

Number of Multifamily Units Completed by Design Type

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Data prior to 1999 include buildings with 3 to 4 units.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes wood, coal, solar, and other types.

²Includes natural gas and bottled or liquified petroleum gas (including propane).

³Includes heating oil and kerosene.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes both air source and geothermal (ground source) versions.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes concrete block, stone, aluminum siding, and other types.

Data prior to 2005 include fiber cement.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes concrete block, stone, aluminum siding, and other types.

Data prior to 2005 include fiber cement.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes concrete block, stone, aluminum siding, and other types.
Data prior to 2005 include fiber cement.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes concrete block, stone, aluminum siding, and other types.

Data prior to 2005 include fiber cement.

Secondary Type of Exterior Wall Material of Attached New Single-Family Houses Sold

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes concrete block, stone, aluminum siding, and other types.

Data prior to 2005 include fiber cement.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes concrete block, stone, aluminum siding, and other types.

Data prior to 2005 include fiber cement.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes concrete block, stone, aluminum siding, and other types.

Data prior to 2005 include fiber cement.

**Secondary Type of Exterior Wall Material of Attached New Single-Family Houses Sold
With Primary Exterior Wall Material of Brick**

(Components may not add to totals because of rounding. Percents computed from unrounded figures)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes concrete block, stone, aluminum siding, and other types.

Data prior to 2005 include fiber cement.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes concrete block, stone, aluminum siding, and other types.

Data prior to 2005 include fiber cement.

**Secondary Type of Exterior Wall Material of New Single-Family Houses Sold
With Primary Exterior Wall Material of Stucco**

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes concrete block, stone, aluminum siding, and other types.

Data prior to 2005 include fiber cement.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹ Includes concrete block, stone, aluminum siding, and other types.

Data prior to 2005 include fiber cement.

**Secondary Type of Exterior Wall Material of Detached New Single-Family Houses Sold
With Primary Exterior Wall Material of Vinyl Siding**

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes concrete block, stone, aluminum siding, and other types.

²Includes concrete block, stone, aluminum siding, and other types that are different from the primary type of "other" material.

**Secondary Type of Exterior Wall Material of Attached New Single-Family Houses Sold
With Primary Exterior Wall Material of Other¹**

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

¹Prior to 1999, includes 1 or more fireplaces.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes other types of financing (not shown separately).

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Type of Foundation in Attached New Single-Family Houses Sold

(Components may not add to total due to rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

¹Includes natural gas and bottled or liquified petroleum gas (including propane).

²Includes heating oil and kerosene.

³Includes wood, coal, solar, and other types.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

¹Includes natural gas and bottled or liquified petroleum gas (including propane).

²Includes heating oil and kerosene.

³Includes wood, coal, solar, and other types.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes natural gas and bottled or liquified petroleum gas (including propane).

²Includes heating oil and kerosene.

³Includes wood, coal, solar, and other types.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes natural gas and bottled or liquified petroleum gas (including propane).

²Includes heating oil, kerosene, wood, coal, solar, and other types.

³Includes both air source and geothermal (ground source) versions.

⁴Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar, and other types.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes natural gas and bottled or liquified petroleum gas (including propane).

²Includes heating oil, kerosene, wood, coal, solar, and other types.

³Includes both air source and geothermal (ground source) versions.

⁴Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar, and other types.

**Type of Heating Fuel Used in Detached New Single-Family Houses Sold

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes natural gas and bottled or liquified petroleum gas (including propane).

²Includes heating oil, kerosene, wood, coal, solar, and other types.

³Includes both air source and geothermal (ground source) versions.

⁴Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar, and other types.

Type of Heating System Used in New Single-Family Houses Sold

(Components may not add to total due to rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

¹Includes both air source and geothermal (ground source) versions.

²Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar, and other types.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

¹Includes both air source and geothermal (ground source) versions.

²Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar, and other types.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

¹Includes both air source and geothermal (ground source) versions.

²Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar, and other types.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Beginning in 1992, lot sizes greater than 25 acres are tabulated as 25 acres. Prior to 1992, lot sizes greater than 2.5 acres were tabulated as 2.5 acres. Prior to 1999, data included condominiums, but totals included only those houses reporting size of lot.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Lot sizes greater than 25 acres were tabulated as 25 acres.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Lot sizes greater than 25 acres were tabulated as 25 acres.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Lot sizes greater than 25 acres were tabulated as 25 acres.

Prior to 1999, data included condominiums.

**Lot Size of New Detached Single-Family Houses Sold
Excluding Condominiums**

(Medians and averages computed from unrounded figures)

| RSE | 7 | 23 | 7 | (NA) | (NA) | (NA) |

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Type of Parking Facility of Attached New Single-Family Houses Sold
 (Components may not add to total due to rounding. Percents computed from unrounded figures.)

| Year | Number of houses (in thousands) | | | | | | Percent distribution | | | | | |

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

New Single-Family Housing Units Sold by Price per Square Foot

(Price per square foot of floor area excludes value of improved lot. Components may not add to totals because of rounding. Percents computed from unrounded figures.)

| Year | Number of houses (in thousands) by price per square foot | | | | | | | | | | Percent distribution | | | | | | | | |

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

New Attached Single-Family Housing Units Sold by Price per Square Foot

(Price per square foot of floor area excludes value of improved lot. Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

New Single-Family Housing Units Sold by Price per Square Foot

(Price per square foot of floor area excludes value of improved lot. Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Median and Average Price per Square Foot of Floor Area in New Single-Family Houses Sold by Location

(Price per square foot of floor area excludes value of improved lot. Medians and averages computed from unrounded figures)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Median and Average Sales Prices of New Single-Family Houses Sold

[Medians and averages computed from unrounded figures]

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Number of New Single-Family Contractor-Built Houses Started by Contract Price and Location

(Contract price excludes value of improved lot. Components may not add to totals because of rounding.)

Footnotes:

RSE - Relative Standard Error (percent)

NA - Not available

A - Represents an RSE that is greater or equal to 100 percent or could not be computed

Z - Less than 500 units or less than 0.5 percent

S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review

Median and Average Contract Price per Square Foot of New Contractor-Built Single-Family Houses Started by Location

(Contract price excludes value of improved lot. Medians and averages computed from unrounded figures.)

Footnotes:

- RSE - Relative Standard Error (percent)
- NA - Not available
- A - Represents an RSE that is greater or equal to 100 percent or could not be computed
- Z - Less than 500 units or less than 0.5 percent
- S - Withheld because estimate did not meet publication standards on the basis of response rate or a consistency review
