# ABSTRACT

*The Survey of Program Dynamics (SPD) 1999 Cross-Sectional File [machine-readable data file]/conducted by the U.S. Census Bureau. -Washington: U.S. Census Bureau [producer and distributor], 2005*

## **Type of File:**

Micro data; unit of observation is an individual.

## **Universe Description:**

The Survey of Program Dynamics (SPD) 1999 cross-sectional universe consists of the civilian non-institutionalized population living in the United States in March 1999. The institutionalized population, which is excluded from the population universe, is composed primarily of the population in the correctional institution and nursing homes (91 percent of the 4.1 million institutionalized people in Census 2000). The population universe also includes people living in group quarters, such as dormitories, rooming houses, and religious group dwellings. Crew members of merchant vessels, armed forces personnel living in military barracks, and institutionalized people such as correctional facility inmates and nursing home residents, were not eligible to be in the survey. Also, United States citizens residing abroad were not eligible to be in the survey. Foreign visitors who work or attend school in this country and their families were eligible, but all other foreign visitors were not eligible to be in the survey. With the exceptions noted above, people who were at least 15 years of age (adults) at the time of the interview were eligible to provide self and/or proxy interviews for the survey; while the data of people who were less than 15 years of age (children) at the time of the interview were collected from proxy interviews provided by the adults. The population universe is represented by a subset of the original sample people from the 1992 and 1993 Survey of Income and Program Participation (SIPP) panels and the people who joined their households or group quarters later as a resident. Namely, the sample people who lived in the SPD 2000 sample households which consisted of the SPD Bridge sample households that survived the SPD 1998 sample cut.

## **Introduction:**

The 1999 SPD Cross-Sectional file is a minimally edited file that provides socio-economic data for calendar year 1998. It is intended for analyses of effects of welfare reform on individuals, families and households. The file can be linked to the SPD Third Longitudinal, the SPD Second Longitudinal, the SPD First Longitudinal, the SPD 1998, the SPD 1997 Bridge and the 1992 and 1993 SIPP Panel files.

## **Subject-Matter Description:**

The file contains basic demographic, economic, and social characteristics data for each member of the households for 1999. The subject matter is described as follows:

### **Demographic:**

Data on age, sex, race, ethnic origin, marital status, household relationship, education attainment, and veteran status. Demographic data refer to the time of the interview in 1999 for 1998 data year.

### **Economic:**

- **Work Experience** - Comprehensive work experience information is given on the employment status, occupation, industry, weeks worked and hours per week worked, total income, and income components for people 15 years old and older. The data on employment refer to the preceding year.
- **Income** - Data covering income sources such as income from jobs, net income from businesses, farm or rent, pensions, dividends, interest, and social security payments. Data on income refer to the preceding year.
- **Noncash benefits** - Data covering noncash income sources such as food stamps, the school lunch program, employer-provided group health insurance plan, employer-provided pension plans, personal health insurance, Medicaid, Medicare, CHAMPUS/Tricare or military health care, and energy assistance. Most data on noncash benefits refer to the preceding year. However, some questions refer to the week before the interview.

## **Geographic Coverage:**

The geographic coverage area is the United States. The file contains codes for 41 individual states, plus the District of Columbia. *However, the sample is not designed to produce state estimates.* The SPD sample in the nine remaining states is identified in three groups for confidentiality reasons. The three groups are as follows: Maine and Vermont; Iowa, North Dakota, and South Dakota; and Alaska, Idaho, Montana, and Wyoming.

## **Technical Description:**

**File Structure:** The file is a rectangular person-level file. Household and Family level variables are included on the record for every person in the household.

**File Size:** 57,393 Records

**File Sort Sequence**

**of Sample Units:** SIPP panel number, Sample unit identification number, person number and entry ID.

**Reference Materials:**

*Survey of Program Dynamics (SPD) 1999 Cross-Sectional File Technical Documentation.* The documentation includes this abstract, the data dictionary, an index to the data dictionary, relevant code list, questionnaire facsimiles, and general information on the SPD.

*Survey of Program Dynamics (SPD) 2002 Cross-Sectional File Technical Documentation.* The documentation includes an abstract, the data dictionary, an index to the data dictionary, relevant code list, questionnaire facsimiles, and general information on the SPD.

*Survey of Program Dynamics (SPD) 2001 Cross-Sectional File Technical Documentation.* The documentation includes an abstract, the data dictionary, an index to the data dictionary, relevant code lists, questionnaire facsimiles, and general information on the SPD.

*Survey of Program Dynamics (SPD) Third Longitudinal File Technical Documentation.* The documentation includes an abstract, the data dictionary, an index to the data dictionary, relevant code lists, and general information on the SPD.

*Survey of Program Dynamics (SPD) Second Longitudinal File Technical Documentation.* The documentation includes an abstract, the data dictionary, an index to the data dictionary, relevant code lists, and general information on the SPD.

*Survey of Program Dynamics (SPD) First Longitudinal File Technical Documentation.* The documentation includes an abstract, the data dictionary, an index to the data dictionary, relevant code lists, and general information on the SPD.

*Survey of Program Dynamics (SPD) 1998 Technical Documentation.* The documentation includes an abstract, the data dictionary, an index to the data dictionary, relevant code lists, questionnaire facsimiles, and general information on the SPD.

*Survey of Program Dynamics (SPD) 1997 Technical Documentation.* The documentation includes an abstract, the data dictionary, an index to the data dictionary, relevant code lists, questionnaire facsimiles, and general information on the SPD.

Note: The technical documentation is also available on the U. S. Census Bureau's SPD Internet site at <http://www.sipp.census.gov/spd> under "SPD Publications".

*Survey of Program Dynamics (SPD) Users' Guide.* The Users' Guide contains a general overview of the SPD file as well as chapters on the SPD survey design and content, editing and imputation, weighting and error estimation, and linking files. Copies are available from Marketing Services Office, Customer Services Center, U.S. Census Bureau, Washington, D.C. 20233. The SPD Users' Guide is available at the U.S. Census Bureau's SPD internet site at <http://www.sipp.census.gov/spd> under "SPD Publications" and "SPD Users' Guide."

*Survey of Income and Program Participation (SIPP) Users' Guide.* The Users' Guide contains a general overview of the SIPP files as well as chapters on the SIPP survey design and content, structure and use of cross-sectional, topical module and longitudinal files, linking waves and reliability of the data. Copies are available from Marketing Services Office, Customer Services Center, U.S. Census Bureau, Washington, DC 20233. The SIPP Users' Guide was revised and updated to include information on the original SIPP data products from the 1984 through 1993 Panels, as well as the new data products coming from the 1996 Panel. An updated version of the SIPP Users' Guide is also available at the U.S. Census Bureau's SIPP Internet site at <http://www.sipp.census.gov/sipp> under "SIPP Publications" and "SIPP Users' Guide."

*Survey of Income and Program Participation Quality Profile.* The Quality Profile summarizes the SIPP sample design, sample selection, and data collection procedures. More importantly, the report also summarizes, in convenient form, what is known about the sources and magnitude of errors in estimates from the SIPP. Without such summaries, users seeking information about the quality of the SIPP estimates would need to search through a large body of literature, some of which is not easily accessible. The report covers both sampling and nonsampling error; however, the primary emphasis is on the latter. Copies of this report are available from Marketing Services Office, Customer Services Center, U.S. Census Bureau, Washington, DC 20233. An updated version of the SIPP Quality Profile is also available at the SIPP Internet site at <http://www.sipp.census.gov/sipp> under "Source & Accuracy Quality Profile."

Additional information (that is, methodology, overview and data access) may also be obtained by visiting the SPD Internet site at <http://www.sipp.census.gov/spd> and the SIPP Internet site at <http://www.sipp.census.gov/sipp>.

### **Related Printed Reports:**

Related printed reports include working papers, compilations of papers presented at annual meetings of the American Statistical Association (*Proceedings of the American Statistical Association*), articles appearing in the *Journal of Economic and Social*

*Measurement*, and reports in the P-70 series of the Current Population Reports. Some of these reports are available on the U.S. Census Bureau Internet site at <http://www.census.gov>, the SIPP Internet site at <http://www.sipp.census.gov/sipp>, and the SPD Internet site at <http://www.sipp.census.gov/spd>.

### **Related Electronic Data Files:**

The SIPP 1992 and 1993 Longitudinal files, the 1997 SPD Bridge file, the 1998 SPD file, the SPD First, Second and Third Longitudinal files, and the SPD 2001 and 2002 Cross-Sectional files, are available from Marketing Services Office, Customer Services Center, U. S. Census Bureau, Washington, D.C. 20233. Extract files of the SIPP 1992 and 1993 Longitudinal files are available for download from the SIPP Internet site at <http://www.sipp.census.gov/sipp> under "Access SIPP Data" using DATAFERRET. Extract files of the 1997 SPD Bridge file are available for download from the SPD Internet site at <http://www.sipp.census.gov/spd> under "Access Tools" using DATAFERRET.

### **File Availability:**

Files are available on CD-ROM (compact disc-readable) in ASCII; they may be ordered from Marketing Services Office, Customer Services Center using the order form at the end of this section. Call Customer Services at 301-763-INFO (4636) for price information. Information on the SPD and some SIPP files may be accessed on the Internet at <http://www.census.gov/ftp/pub/mp/www/tape/mstap17c.html>. The SPD 97 file, the Third Longitudinal file, and the SPD 1999, 2001 and 2002 Cross-Sectional files are accessible on the SPD Internet site at <http://www.sipp.census.gov/spd> under "Access Tools" using the FERRET extraction system.

Note: The SPD 1998 data file is only available on CD-ROM because of confidentiality. To order the data file on CD-ROM call Customer Services at 301-763-4636.

### **Additional Information:**

Additional information on particular subjects can be obtained by contacting an office listed below.

	Division	Branch	Phone Number
Weighting	Demographic Statistical Methods	Survey of Income and Program Participation	301-763-6445

**Interim Unedited Calendar Year Files:**

So that the research community can assess the quality of the SPD sample and make some assessment of the effect of welfare reform, we are issuing this minimally edited calendar year file from the 1999 SPD survey. Only the demographic variables have been longitudinally edited and the dollar amounts have been recoded and top-coded to protect confidentiality. This file includes match keys to merge SPD and SIPP data. These match keys link data for each person between the SIPP and the SPD files, for people who were interviewed in SIPP.

Use the following variables to match back to the SIPP at the person level:

SIPP Panel Number	SIPP_PNL
Sample Unit Identification Number	PP_ID
Entry Address ID	PP_ENTRY
Person Number	PP_PNUM

Use the following variables to match at the household level:

SIPP Panel Number	SIPP_PNL
Sample Unit Identification Number	PP_ID
Address ID	ADDIDU(2,3,4,7,8,9)
Person Number	PP_PNUM

**CAUTION STATEMENT:**

*A note of caution about this file.* The weights on this file are cross-sectional, therefore, they are only valid for estimates of the characteristics of the cohorts of people in 1999 who were represented by both the original and non-original sample people in the SPD 1999 sample. An original sample person is a sample person who was a self or proxy respondent in Wave 1 of the SIPP 1992 or 1993 panel. A non-original sample person is a sample person who became part of the sample after the SIPP Wave 1 and beyond (including the SPD samples). The SIPP 1992 and 1993 Panel samples, from which the SPD sample originated, were designed to produce only national estimates of the characteristics of interest to the user. Although this 1999 cross-sectional file includes state identifiers and is weighted to current state (as well as national) controls, deriving sub-national estimates from this 7-year old sample that has experienced severe attrition (household and person nonresponse) and other sample loss (through death, being institutionalized, etc.) as well as the 1998 SPD sample cut dictated by budgetary constraints, results in inadequate representativeness and poor coverage in some of the smaller geographic areas. Even for the national estimates, inadequate representativeness and poor coverage occur in black children aged 13 and below and black adults aged 18 to 57.

# OVERVIEW

## Why the Survey of Program Dynamics is Needed

On August 22, 1996, President Clinton signed legislation passed by Congress, and the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 became Public Law 104-193. The legislation directed the U.S. Census Bureau to collect data necessary to evaluate the impact of the law from households previously interviewed in the 1992 and 1993 Survey of Income and Program Participation (SIPP) panels. Households were followed annually from 1997 to 2002, thus providing data for ten years. This survey, the Survey of Program Dynamics (SPD), will simultaneously describe the full range of state welfare programs along with social, economic, demographic and family changes that will help or limit the effectiveness of the reforms.

The goals of the welfare reform legislation are to end welfare dependence by promoting job preparation and work, encouraging the formation and maintenance of two-parent families, and providing states increased flexibility to achieve these goals. States are moving away from a welfare system based on entitlement toward one focused on assistance in finding employment and self-sufficiency. Thus, the primary goals of the SPD are to provide information on spells (occurrences) of actual and potential program participation over a ten-year period, 1992 to 2001, and to examine the causes of program participation and its long-term effects on the well-being of recipients, their families, and their children. The SPD is required by law to pay special attention to the issues of out-of-wedlock births, welfare dependency, the beginning and end of welfare spells, and the causes of repeat welfare spells. The SPD must also obtain information about the status of children. Researchers analyzing these data will use pre-reform characteristics of the population to control for preexisting differences among households in order to evaluate post-reform outcomes for the same people.

The SPD instrument has a core that essentially remains the same over the 1998-2002 period. Core data are collected on employment, income, program participation, health insurance and utilization, child

well-being, marital relationships, and parents' depression. The SPD also has topical modules that vary by year. An adolescent self-administered questionnaire (SAQ) was asked in 1998 and 2001. Additional child-related questions were asked in 1999 and 2002. Residential histories of children were collected in 2000.

Note: Because of confidentiality, the marital relationship and conflict, depression scale, and SAQ are not part of the public release file. To obtain the data, special arrangements are required. See section titled "Obtaining Access to Self-Administered Questionnaire Data" on page 3-8.

## Background of the Survey of Program Dynamics

Several years before the passage of the actual legislation, the U.S. Department of Health and Human Services and the U.S. Department of Agriculture (USDA is responsible for the food stamp program) invested substantial resources in having the U.S. Census Bureau develop a longitudinal survey to provide the data necessary to understand the effects of anticipated public policy changes on the population. Ideally, such a survey should be in place before reforms are effective to allow adequate assessment of baseline circumstances.

The data already collected in the 1992 and the 1993 SIPP panels provide extensive baseline (background) information from which to determine the effects of welfare reform. The SIPP is a longitudinal survey of households, interviewed at least nine times at four-month intervals, and followed if they have moved. The SIPP collects more detailed data than any other national survey on program eligibility, access and participation, transfer income, and in-kind benefits. Coupled with an extensive array of economic and demographic data (for example, employment and job transitions, income, and family composition), the 1992 and 1993 SIPP panels represent the pre-reform situation of households quite well.

By interviewing the same households as SIPP in the SPD, analysts will then have data for the baseline pre-reform period, the reform implementation period, and the medium-term post-reform period. Researchers require these data to assess short-term and medium-term consequences and outcomes for families and individuals. The use of the 1992 and 1993 SIPP panels doubles the sample size for certain groups of interest.

The topics that the retrospective SPD covers are an extension of those covered by the SIPP, but placed in an annual survey questionnaire, using guidance from such annual surveys as the March supplement to the Current Population Survey (CPS), the Panel Study of Income Dynamics, and the National Longitudinal Surveys.

## SPD Status and Plans

*Current plans.* SPD collected data for six calendar years, from 1996 through 2002. This will provide panel data for 9 years (1992-2001) when combined with the 1992 and the 1993 SIPP panel data. The U.S. Census Bureau's original plans were to have an instrument ready to test in the field concurrently with welfare reform. Because of legislation that was vetoed twice in 1995, the Census Bureau put its plans on hold. However, we were able to revive the project with funding received late in 1996. In its revived form, the SPD has 3 main components:

- (1) the 1992 and 1993 SIPP panels that cover the 1992-94 time period and part of 1995;
- (2) the 1997 Bridge survey covering 1996, provides the link between the 1992 and 1993 panels of the SIPP and the SPD, and includes "gap" questions to collect program participation data for 1995 for the 1992 SIPP panel; and
- (3) the core SPD starting in 1998, which includes topical modules that vary by year, and covers the 1997-2001 time period.

*SPD "Bridge" Survey.* Because the Census Bureau received funding for the SPD late in 1996, there was little time to develop a full-scale instrument. It was critical to collect income and program participation data in spring 1997 for calendar year 1996 from as many of the 1992 and 1993 SIPP households as the

Census Bureau could find. The SPD was first conducted between April and June of 1997. Data was collected for 1996 by administering a modified version of the annual March 1997 CPS demographic supplement, with a few new questions designed to collect 1995 program participation data for the 1992 SIPP panel (households and individuals were last interviewed in January 1995). All of the SIPP people interviewed in the first wave of the 1992 and 1993 SIPP panels and still being interviewed at the end of the panel (9 or 10 waves) were eligible for the SPD Bridge sample. The Census Bureau decided not to try to find people in the 1992 and 1993 panels who left the survey (attrited) because they felt that most analysts would need as much baseline data as possible. We reweighted the remaining sample to compensate for this loss.

Finding people who move is critical to the success of the SPD survey, particularly because we focus on the low-income population. The SIPP staff have developed many procedures that help find movers. Fortunately, the CPS staff implemented a "mover module" in January 1997 to track people leaving formerly-interviewed CPS households. This also was crucial to the SPD. The Census Bureau was able to track most movers.

*1998 SPD.* During the first half of 1997, the University of California at Berkeley created the first SPD instrument. The instrument was programmed in the CASES authoring language used for computer-assisted Census Bureau surveys. The Census Bureau carried out a pretest in October 1997 using 400 retired (no longer in use) 1996 CPS households in 4 of its regions. After this test, the Census Bureau modified the questionnaire to correct questionnaire and instrument problems. The 1998 SPD also used a self-administered, audio cassette, adolescent questionnaire (SAQ). The SAQs were broken up into two separate cassettes--one for youths 12 to 13 years old and the other for youths 14 to 17 years old.

Using the fully-developed computer-assisted interview instrument, annual data collection occurs once each year in May through mid-July, with annual recall for the preceding calendar year. The 1998 survey included a set of retrospective questions covering 1997 for all people aged 15 and older in the household. The topics covered were:

- Basic demographic and social characteristics, including educational enrollment and work training, functional limitations and disability, and health care use and health insurance;
- Basic economic characteristics, including employment and earnings, income sources and amounts, assets, liabilities, and program eligibility information, and food security;
- Information about children, including their school enrollment and enrichment activities, disability and health care use, contact with absent parent, care arrangements, and payment of child support on their behalf; and,
- Two SAQs: a few questions for adults focusing on marital relationship and conflict and a depression scale, and a lengthy questionnaire for adolescents aged 12 to 17 focusing on such issues as family conflict, educational aspirations, crime-related violence, substance abuse, and sexual activity. The adolescent SAQ was developed in collaboration with the Child and Family Research Network.

*1999 SPD.* The extended measures of child well-being questions were asked in 1999. In addition, five other new sections of questions were included: substance abuse, health care utilization while uninsured, food expenditures, positive behavior/social competence, and family routines.

*2000 SPD.* In the 2000 SPD, we collected the core SPD data and the Residential History topical module that collected data on with whom children have lived and the reasons for changes in living arrangements. We added 3,500 non-interviewed households from the 1997 Bridge to the sample for SPD 2000 - 2002 data collections.

*2001 SPD.* In the 2001 SPD, we again collected the adolescent SAQ. We also added back approximately 5,540 non-interviewed households from the 1992 and 1993 SIPP panels (in addition to the 3,500 from the 1997 Bridge) for the 2001 and 2002 data collections.

*2002 SPD.* In the 2002 SPD, we asked the extended child well-being questions again. Due to budget constraints, we reduced the sample by one-third evenly across the entire sample and household interview statuses (approximately 10,000 households).

## SPD Content

The SPD has two core components in addition to topical modules. The two components consist of adult questions and child-related questions. The topical modules include the adolescent SAQ, the children's residential history, and children's extended measure of well-being questions.

### The Adult Questions cover:

*Employment and earnings, income, and program eligibility.* For each person age 15 or over in the household, the SPD collects a detailed account of work-related activities in the past calendar year, including weeks they worked, weeks on layoff, and weeks spent looking for work. In addition, the SPD collects information for up to four jobs in the previous calendar year including annual earnings from each job.

Next, the SPD collects income data, including data on cash and non-cash transfer programs. In addition to measuring economic well-being, these questions help examine changes in the characteristics of transfer programs resulting from welfare reform. These questions are similar to those in the SIPP. First an inventory is completed of all the types of income received in the previous calendar year for all household members age 15 or over at the person level. For example, we ask, "Did anyone in this household receive unemployment compensation?" If they answer "yes," we ask who received it. After collecting this inventory, the SPD moves on to the "Amounts" section. In this section, the months during the previous calendar year in which the person received the income as well as the amount the person received are collected. It is important to track the number of months the person received the income so that researchers can examine the impact of time limits associated with welfare reform.

In addition to income, information about assets and debts are collected. These include items such as the value of homes, cars, stocks, bonds, mutual funds, and payments made to support children living outside the household. These questions are included because assets and debts are key components in economic well-being and are also critical to measuring program eligibility.

*Educational enrollment and work training.* Questions on educational enrollment are asked of people 18 and over about the current academic year. People 15 to 17 are included in the childrens' school enrollment questions since the childrens' series of questions are more appropriate for that age group. The adult questions on educational enrollment track the progress of adults toward receiving high school or high school equivalency degrees as well as college, graduate and professional degrees. The work training questions focus on whether adults received any work training designed to help them look for a job or to train them for a new job.

*Disability, health care utilization, and health insurance.* Questions on disability, health care utilization and health insurance are condensed versions of a similar series included as topical modules in the SIPP. The health care utilization and health insurance questions are included to measure changes in the health care system and how the changes affect accessibility to government health insurance such as Medicaid and Medicare as well as private and employer-provided insurance, utilization of health services, and outcomes.

*Food security.* This series of questions is taken from the USDA-sponsored Food Security Supplement to the CPS and is intended to measure the subjective experience of hunger. The questions are used as a scale to measure the severity of hunger in a household. Direct changes in the food stamp program account for nearly half the total federal cost savings under the legislation. Additionally, the food stamp benefits of legal immigrants and able-bodied people ages 18-50 years old without dependents are affected by changes in the legislation. Measuring the food security status of a household provides a direct indicator of well-being.

*Family stability.* Another objective of welfare reform is to encourage marital and family stability. Answers to questions on these subjects provide indicators of marital happiness and of overall stress, both of which can contribute to marital and family harmony or instability. Changes in program participation and employment can have a large effect on marital and family stability.

### **The Child questions cover:**

We attempt to interview the mother or designated parent when asking questions about children.

*Children's school enrollment and enrichment activities.*

The SPD asks questions about school enrollment and enrichment activities, including extracurricular enrichment activities, which add to the overall portrait of the child's development. The extent to which parents have the financial resources or the time to devote to such activities may be strongly influenced by their program participation and employment in the labor market. These questions provide the basis to study the effects of welfare reforms on key outcomes through its influence on children's exposure to enrichment activities.

*Disability, health care utilization, and child care.* These questions are similar to those asked about adults. Additionally, a key objective of welfare reform is to encourage single mothers to enter or re-enter the labor force, so child care is an important issue to measure. The amount of time children spend in child care and the type of care they receive, as well as the stability of care arrangements, has been linked with child well-being.

*Child support and contact with an absent parent.* Enforcement of child support and contact with an absent parent has been highlighted as a cornerstone of welfare reform. The answers to these questions will allow researchers to examine the nature of the awards and whether the awards are being followed or enforced. Child support payments are also an important factor in determining the economic status of children living in single-parent families.

*The adolescent SAQ* is designed to provide information which can be used to evaluate several provisions of the TANF program. Included among these provisions are: states may not give benefits to unwed teenage parents who are not living with an adult and attending school; states receive bonuses for reducing illegitimate births, funding to develop abstinence education programs, and funds to devote to family planning. Questions in the SAQ which may be used to evaluate the success of these programs focus on dating histories, sexual initiation, contraception, and childbearing, and knowledge of welfare rules.

*Parental employment.* Employment of all able-bodied parents is a goal of the 1996 welfare reform law. However, parental employment may reduce the amount of monitoring and support parents can give their children, leading to increased rates of delinquency or poor school achievement. In order to measure these potential consequences, the SAQ includes indicators of

adolescents' behaviors and relationships. The indicators focus on adolescents' housework and chores, substance use and problem behaviors, family routines, relationships between children and parents (both co-resident and non-resident parents), and parents' monitoring of adolescents' social and school behavior.

## Technical Issues

This section deals with technical issues that affect the administration and usefulness of the survey.

*Subsampling.* The response rate for the 1997 SPD Bridge survey was 81.7 percent. This yielded a base sample of 29,619 households interviewed. However, the budget for the survey is \$10 million per year, which only allowed us to select a subsample of 19,139 households in 1998. The households were subsampled from interviewed households from the 1997 Bridge survey based upon the following household characteristics:

- all households with income less than 150 percent of poverty, and all households with incomes between 150 percent and 200 percent of poverty with children were selected for the sample with certainty;
- households with incomes above 200 percent of poverty with children were subsampled at a 90 percent rate;
- households with incomes between 150 percent and 200 percent of poverty without children were subsampled at an 82 percent rate; and households with incomes above 200 percent of poverty without children were subsampled at a 27 percent rate.

Later, in order to increase the degree of representativeness of the SPD sample after the 1998 sample cut, we added approximately 3,500 non-interviewed households from the SPD Bridge to the sample for the SPD 2000-2002 data collections, and approximately 5,500 non-interviewed households from the SIPP 1992 and 1993 panels to the SPD 2001 and 2002 data collections. However, due to budget constraints, we reduced the sample size for the SPD 2002 data collection by one-third evenly across the sample and household interview statuses. Since the SPD 2002 sample cut is evenly across the sample and household non-interview statuses, the degree of representativeness of the sample remains the same but its reliability level for producing estimates decreases due to

its sample size reduction.

*Weighting and database development.* The SPD is designed exclusively to support longitudinal analysis of the impact of welfare reform. It represents the behavior and characteristics of people in two fixed cohorts over a period up to ten years. One cohort represents the population as it existed in March 1992 from the 1992 panel of the SIPP and the other is the population as of March 1993 from the 1993 panel. This is not a traditional longitudinal survey in that it does not repeat the same measure throughout the period. Furthermore, the sample is divided into two parts, each with a different reference period. As a result of adding the SPD Bridge and the SIPP 1992/1993 panels non-interviewed households to the SPD sample, the SPD sample becomes more similar to the traditional longitudinal survey sample and more conducive for producing cross-sectional estimates for 2001 and 2002.

## Data Products

Given the design and our budget constraints, we have designed a series of data products to focus scarce resources on just the data products the users need most. These are:

- A 1998 interim, unedited calendar year file. This file is designed to support preliminary analysis of income and program participation among the original cohort.
- Three longitudinal files. The longitudinal files will contain fully edited, consistently-formatted, and longitudinally-processed core variables derived from the information collected over periods of time. The three longitudinal files will contain data for the following years:
  - First file - 1992 - 1994, 1996 - 1997
  - Second file - 1992 - 1994, 1996 - 1999
  - Third file - 1992 - 1994, 1996 - 2001
- Minimally edited cross-sectional files, 1999-2002. These files will contain all remaining SPD variables not contained on the longitudinal files. Depending on funding, fully edited cross-sectional files for 1998-2002 will be released.

*Longitudinal Data.* The core information common throughout the data collection (although with varying

reference periods and question phrasing) consists of basic demographics, labor force activity, income, and program participation. The three longitudinal files will reflect these data, and maintain consistency and similar variable names across time when possible. The longitudinal variables can be supplemented by matching information collected from the calendar year SPD files and from topical modules in the SIPP.

The longitudinal files will be based on people in the original sample, as with SIPP longitudinal files. They will reflect the original cohort plus people with whom these people resided over the length of the SPD survey. On the longitudinal files, the variables are replicated to reflect the number of years of data collection from the SIPP and the SPD. The information repeated across several SPD data collections will appear in the person record following the data common across the SIPP panels, the 1997 Bridge Survey, and the SPD.

For the SPD longitudinal data, person weights will be developed for people belonging to the initial cohorts who continued to be interviewed for as long as they remain with the SIPP/SPD universe as defined by the 1992/1993 SIPP panels (see section 9, Source and Accuracy Statement). We refer to this group of people as the longitudinal sample. Other people to be included in the data file will have zero weights. Their presence in the data file is to facilitate development of household and family characteristics of the people in the longitudinal sample. This will permit the user to construct contextual information on the cohort sample member's household and economic circumstances.

Children born to original sample members after the two cohorts were defined, will be included in the longitudinal file and assigned a nonzero person-based longitudinal weight, so they will appear to be members of the longitudinal sample (even though technically they are not). Thus, the data files will reflect a dynamic population over the ten-year period rather than two fixed cohorts of the population.

The first longitudinal file contains data covering the 1992/1993 through 1997 time frame except for 1995, because the SIPP does not have a complete data set for 1995. Data from the 1992 and 1993 SIPP panels, the 1997 Bridge survey, and the 1998 SPD survey are used for this first longitudinal file.

The second longitudinal file repeats the first and extends the reference period to 1999 (adding in the 1999 and the 2000 SPD data collections). The third longitudinal file will add the data for 2000 and 2001 reference periods collected in the 2001 and the 2002 SPD. The second longitudinal file was expanded to include variables on eligibility. The third longitudinal file also includes variables on eligibility.

The third longitudinal file will contain basic sample persons (1992-1994, 1996-2001) plus the 1997 Bridge Non-interview sample persons (1992-1994, 1999, 2000, 2001) and the SIPP 1992/1993 Non-interview sample persons (1992-1994, 2000, 2001).

*Cross-sectional Files.* The 2001 cross-sectional file contains primarily unedited data for most questions asked in the 2001 SPD survey. The 2002 cross-sectional file also contains primarily unedited data for most questions asked in the 2002 SPD survey.

*The Two Interim Calendar Year Files.* So that the research community can make some preliminary assessment of the immediate impact of welfare reform, we have issued two interim files. The 1997 SPD Bridge survey interim file is identical to the March CPS in format (hierarchical record file), however, the 1998 interim file is in person year format. They contain special weights corresponding to the cohort, and the link-variables needed to merge with the 1997 SPD Bridge and earlier SIPP data. The 1998 SPD interim file contains primarily unedited data for all questions asked in the SPD survey. These are intended to be used for research purposes only and not to be used for cross-sectional analysis.

# FILE INFORMATION

## Geographic Coverage

State codes are shown except for nine states which are collapsed into three groups. The three state groupings are as follows: Maine and Vermont; Iowa, North Dakota and South Dakota; and Alaska, Idaho, Montana, and Wyoming. The sample was not designed to produce state level estimates. State codes are primarily useful in relating a respondent's reciprocity of benefits to welfare reform thresholds and policies which may vary from state to state.

## Identification Number System/Match Key Variables

The SPD identification scheme uses match key variables designed to uniquely identify individuals, provide a means of linking data for the same individuals across files, and grouping individuals into households and families across files over time. The various components of the identification scheme are listed below:

SIPP Panel Number	SIPP_PNL
Sample Unit Identification Number	PP_ID
Entry ID	PP_ENTRY
Person Number	PP_PNUM
Address ID	ADDIDU9
SIPP_PNL, PP_ID, ADDID	IHHKEY99

## File Match Keys

This file includes match keys to merge with SPD and 1992/1993 SIPP data. These match keys link data for each person between the 1992 and 1993 SIPP Panels, the 1997 SPD Bridge, the 1998 SPD file, the first, second and third SPD longitudinal files and the 2001 and 2002 Cross-sectional files.

Use the following variables to match back at the person level:

SIPP Panel Number	SIPP_PNL
Sample Unit Identification Number	PP_ID
Person Number	PP_PNUM
Entry ID	PP_ENTRY

Use the following variables to match back at the household level:

SIPP Panel Number	SIPP_PNL
Sample Unit Identification Number	PP_ID
Address ID	ADDIDU9

The SIPP panel number identifies the panel in which the respondent participated. The sample person should either have an entry of 1992 or 1993 for their panel number.

The sample unit identification number was created by scrambling together the Primary Sampling Unit, segment, and serial numbers used for Census Bureau administrative purposes. These identifiers are constructed in the same manner as the 1992 and 1993 SIPP panel files, to enable matching to these files. To uniquely identify a household, you must use the sample unit identification (ID) number, the address ID, and the SIPP panel number. The sample unit identification number, the address ID, and the SIPP panel number can be used to link all households back to the original household.

The entry ID represents the address of the person at the time he/she was first interviewed and does not change even if the person moves. It is used in conjunction with the person number to uniquely identify people within the sample unit. This variable is the number 011 for all original sample people. For additional sample people, this variable can be 011 or greater than 011 depending on the current address ID of the unit which the new sample person joined. For example, a person who moves into a household with an ADDIDU9 of 011 will receive an PP\_ENTRY of 011. Whereas, a person who enters a household spawned in 1999 (ADDIDU9=131) will have a PP\_ENTRY of 131.

The person numbers represent the wave the person entered the sample. Person numbers such as 0101 and 0102 are assigned in Wave 1 of the SIPP. Person numbers such as 0201 and 0202 are assigned to people added to the roster in Wave 2 of the SIPP. People added to the roster in the 2002 SPD have person numbers 1601 and 1602 and following sequentially as needed. People added to the roster in the 2001 SPD have person numbers 1501 and 1502 and following sequentially as needed. People added to the roster in the 2000 SPD have person numbers 1401 and 1402 and following sequentially as needed. People added to the roster in the 1999 SPD have person numbers 1301 and 1302 and following sequentially as needed. People added to the roster in the 1998 SPD have person numbers 1201 and 1202 and following sequentially as needed. People added to the roster in the 1997 SPD Bridge have person numbers 1101 and 1102 and following sequentially as needed.

The address ID is a three digit code that identifies the various household addresses associated with the same sample unit identification number. The first two digits of the address ID code indicate the wave or year in which that address was first interviewed. The third digit sequentially numbers that split into multiple households and have the same address ID. The address ID code is 011 for all sample addresses that are the same as in Wave 1 of the 1992 and 1993 SIPP panels. As the SIPP sample people move to new addresses, new address ID codes are assigned. For example, any new address to which sample unit members moved during the 1999 SPD is numbered from 131 to 139.

If you would like to look at the household configuration in 1999 use IHHKEY99. The IHHKEY variable is a concatenation of SIPP\_PNL; PP\_ID and ADDID for a specific year. For example, IHHKEY99 is SIPP\_PNL; PP\_ID and ADDIDE9.

The unique household identifier is a 15 digit code which can be matched to the longitudinal files. The first three digits identify the SIPP Panel (B12 for the 1992 SIPP Panel or B13 for the 1993

SIPP Panel). The next nine digits identify the sample unit identification number, and the last three digits identify the current address ID.

## **File Structure**

The file is a rectangular person-level file. Household and Family level variables are included on the record for every person in the household.

## **Edits**

The 1999 Cross-sectional file is minimally edited. Demographics are longitudinally fully edited and topcodes assigned for amounts.

## **Topcoding of Variables**

To protect against the possibility that a user may recognize the identity of a SPD respondent with a very high income, income from every source is topcoded so that no individual amounts above \$100,000 are revealed. This topcode amount is consistent with the topcoding for the 1992 and 1993 SIPP panels. Other economic variables are topcoded at the 97 percentile level, meaning the top 3 percent of values are not disclosed. Variables that have been topcoded will have a "T" in the second to the right position.

We topcode age by bottom coding year of birth. For the 1999 Cross-sectional SPD file no age will be older than 89.

## **Weighting**

The SPD samples were fielded once a year between the months of May and July from 1997 through 2002. The first SPD sample was fielded in 1997 and is referred to as the SPD Bridge. It consisted of the sample households that were interviewed in the last waves of the SIPP Panels 1992 and 1993 and their spawned households up to the time of SPD Bridge data collection. The last interview waves for SIPP Panel 1992 were wave 9 for rotation 1 and wave 10 for rotations 2, 3, and 4. The last interview wave for SIPP Panel 1993 is wave 9 for all four rotations. This resulted in a SPD Bridge sample of approximately 38,300 designated households, 36,900 eligible households, and 30,100 interviewed households.

Each SPD sample collected annual socioeconomic and health insurance data from the previous year from the sample households but collected demographic data for the current year similar to the March supplement of the Current Population Survey (CPS). Therefore, the March CPS instrument (questionnaire) was used directly for collecting data from the SPD Bridge sample. For the data collection of other SPD samples (SPD 1998 through SPD 2002), the March CPS instrument was used with necessary modifications, mainly to accommodate additional topics included in the data collection.

Due to budget constraints, a sample cut was made for SPD 1998. All SPD Bridge non-interviewed sample households were excluded from the SPD 1998 sample, except for the entirely institutionalized sample households (which were included in the SPD 1998 sample). In

addition, the SPD Bridge interviewed households were classified into six strata based on the primary family income level and the presence of children under age 18 in the household as described in the source and accuracy (S&A) statement. Households were randomly selected from each of the six strata at a sampling rate specified in the S&A statement. The sampling rate is also referred to as the “sample cut factor (SCF).” This resulted in a SPD 1998 sample of approximately 19,700 designated households, 19,300 eligible households, and 16,400 interviewed households. The SPD 1998 sample and their subsequently spawned households are referred to as the “SPD basic sample component” or the “SPD core sample component.”

The SPD 1999 sample was a direct carryover from the SPD basic sample component and the spawned households. This resulted in a SPD 1999 sample of approximately 20,000 designated households, 19,600 eligible households, and 16,700 interviewed households.

The SPD Bridge Type A and Type D non-interviewed households were partially brought back and added to the SPD 2000 sample in order to increase its degree of representativeness. The SPD Bridge Type A and Type D non-interviewed households were classified into five strata based on the primary family income level and the presence of children under age 18 in the household as described in the Source & Accuracy statement. Households were randomly selected from each of the five strata at a sample rate specified in the Source & Accuracy statement to be included in the SPD 2000 sample. This sampling rate is also referred to as the sample cut factor. These added sample households and their subsequently spawned sample households are referred to as the “SPD Bridge non-interviewed sample component.” Thus, the SPD 2000 sample consisted of the SPD basic sample component and the SPD Bridge non-interviewed sample component. This resulted in a SPD 2000 sample of approximately 24,100 designated households, 23,500 eligible households, and 18,700 interviewed households.

The SIPP panel 1992 and 1993 (wave 2 and beyond) Type A and Type D non-interviewed households were partially brought back and added to the SPD 2001 sample in order to increase further its degree of representativeness. The SIPP Type A and Type D non-interviewed households were classified into five strata based on the primary family income level and the presence of children under age 18 in the household in wave 1 as described in the Source & Accuracy statement. Households were randomly selected from each of the five strata at a sampling rate specified in the Source & Accuracy statement to be included in the SPD 2001 sample. Approximately 3,000 households were selected for inclusion from each of the SIPP Panels 1992 and 1993. This sampling rate is also referred to as the sample cut factor. These added sample households and their subsequently spawned sample households are referred to as the “SIPP 1992/1993 non-interviewed sample component.” Thus, the SPD 2001 sample consisted of the SPD basic sample component, the SPD Bridge non-interviewed sample component, and the SIPP 1992/1993 non-interviewed sample component. This resulted in a SPD 2001 sample of approximately 31,000 designated households, 30,100 eligible households, and 22,300 interviewed households.

Due to budget constraints, a sample cut was made for the SPD 2002. The SPD 2001 interviewed and Type A, Type B, and Type D non-interviewed households were classified into six strata based on the primary family income level and the presence of children under age 18 in the household. Households were randomly selected from each of the six strata at a sampling rate specified in the S&A statement. The sampling rate is also referred to as the “2002 sample cut

factor” (SCF2). This resulted in a SPD 2002 sample of approximately 22,700 designated households, 19,300 eligible households, and 12,500 interviewed households.

As described earlier, the SPD 1999 sample consisted only of the SPD core sample component, but the SPD 2001 sample and the SPD 2002 sample consisted of all the sample components (the SPD core sample component, the SPD Bridge sample component, and the SIPP 1992/1993 non-interviewed sample component). Therefore, analytically, the SPD 1999 cross-sectional universe could be jointly represented by *either* the SPD 1999 sample, and the SPD Bridge non-interviewed sample component and the SIPP 1992/1993 non-interviewed sample component of the SPD 2001 sample *or* the SPD 1999 sample, and the SPD Bridge non-interviewed sample component and the SIPP 1992/1993 non-interviewed sample component of the SPD 2002 sample. Due to the SPD 2002 sample cut, the effective sample sizes of the SPD Bridge non-interviewed sample component and the SIPP 1992/1993 non-interviewed sample component of the SPD 2001 sample were larger than the effective sample sizes of the SPD Bridge non-interviewed sample component and the SIPP 1992/1993 non-interviewed sample component of the SPD 2002 sample. On this basis, for the SPD 1999 cross-sectional weighting, the SPD 1999 cross-sectional universe was jointly represented by the SPD 1999 sample, and the SPD Bridge non-interviewed sample component and the SIPP 1992/1993 non-interviewed sample component of the SPD 2001 sample, along with their sample cut/sub-sampling factors.

As discussed earlier, the data collection instrument (questionnaire) for the SPD 1999 sample was similar to the March CPS instrument. Therefore, the SPD 1999 cross-sectional weighting was based on the March CPS weighting procedure in the same manner as the SPD Bridge cross-sectional weighting. A few changes in the procedure were made to account for the difference in the sample design between the SPD and the basic CPS from which the March CPS supplement originated, the longitudinal nature of the SIPP Panels 1992 and 1993 from which the SPD originated, and the added Hispanic households in the March CPS samples. On this basis, the SPD 1999 cross-sectional weighting process was conducted in four parts as summarized below.

### **Part 1 — Calculation of the Household Initial Weight and Mover’s Weight**

As described earlier, the SPD 1999 cross-sectional universe was jointly represented by the SPD 1999 sample (consisting only of the SPD core sample component), and the SPD Bridge non-interviewed sample component and the SIPP 1992/1993 non-interviewed sample component of the SPD 2001 sample. Therefore, for the SPD 1999 cross-sectional weighting, the household initial weight of each of the sample households in the SPD 1999 sample, and the SPD Bridge non-interviewed sample component and the SIPP 1992/1993 non-interviewed sample component of the SPD 2001 sample was defined in the same manner as the cross-sectional weighting for wave 2 and beyond of the SIPP panels 1992 and the SIPP panel 1993. Namely, it was equal to the product of the base weight, the duplication control factor, and the wave 1 non-interview weight adjustment factor of the SIPP wave 1 sample household from which the SPD sample household originated or spawned. Each of these SPD sample households was originated or spawned from either the SIPP panel 1992 or the SIPP panel 1993, and was subjected to a sample cut or sub-sampling as described earlier. Thus, the household initial weight was adjusted to account for the effect of combining the SIPP Panels 1992 and 1993 as well as the

effect of the sample cut or sub-sampling.

The combined panel effect was accounted for by multiplying the initial weight of each sample household in the SPD 1999 sample, and the SPD Bridge non-interviewed sample component and the SIPP 1992/1993 non-interviewed sample component of the SPD 2001 sample with a combined panel factor (CPF) of 0.5. This value of CPF was appropriate for the following reasons. The SIPP panel 1992 and the SIPP panel 1993 started in Wave 1 and ended in their last wave with approximately the same sample sizes. The wave-by-wave sample sizes (total eligible sample households), household response rates, and Type A and Type D household non-response rates were approximately the same for these two SIPP panels. Based on the sample selection procedure described earlier, (a) the SPD Bridge sample (from which the SPD core sample component and the SPD Bridge non-interview sample component were sub-sampled) consisted of an approximately equal number of sample households from each of the SIPP panel 1992 and the SIPP panel 1993, and (b) the SIPP 1992/1993 non-interviewed sample component consisted of an approximately equal number of Type A and Type D non-interviewed households sub-sampled from each of the SIPP panel 1992 and the SIPP panel 1993.

For each sample household in the SPD 1999 sample, and the SPD Bridge non-interviewed sample component and the SIPP 1992/1993 non-interviewed sample component of the SPD 2001 sample, the effect of the sample cut or sub-sampling was accounted for by multiplying its combined panel adjusted initial weight with the sample cut or sub-sampling factor for the strata of the sample component to which it belonged. The household initial weight adjusted for both the combined panel effect and the sample cut effect was referred to as the “SCF-CPF adjusted household initial weight.”

The SPD is a longitudinal panel survey (a continuation of the SIPP Panels 1992 and 1993). Therefore, after the first cycle of data collection (after wave 1 of the SIPP panel 1992 and the SIPP panel 1993), the initial weight had to be adjusted to account for the additional resident members (non-original sample persons) in an original sample household or its spawned households. The weight obtained after applying this adjustment was referred to as the “mover’s weight.” The SCF-CPF adjusted household initial weight was adjusted for the mover’s effect to obtain the mover’s weight in the same manner as those of the SIPP panel 1992 and the SIPP panel 1993.

## **Part 2 — Household Non-interview Weight Adjustment**

The household non-interview weight adjustment procedure for the SPD 1999 cross-sectional file was based on the March CPS procedure as follows. As described earlier, the SPD 1999 cross-sectional universe was jointly represented by the SPD 1999 sample, and the SPD Bridge non-interviewed sample component and the SIPP 1992/1993 non-interviewed sample component of the SPD 2001 sample. Therefore, the sample households in the SPD 1999 sample (consisting only of the core sample component), and the SPD Bridge non-interviewed sample component and the SIPP 1992/1993 non-interviewed sample component of the SPD 2001 sample were classified into a number of groups based principally on the metropolitan statistical area status, metropolitan status, and urban/rural status. Each of these household groups was called a “non-interview

weight adjustment cell.” The SPD Bridge non-interviewed sample component and the SIPP 1992/1993 non-interviewed sample component of the SPD 2001 sample were not fielded in 1999 (not included in the SPD 1999 sample). Therefore, for the SPD 1999 cross-sectional weighting, all eligible sample households in the SPD Bridge non-interviewed sample component and the SIPP 1992/1993 non-interviewed sample component of the SPD 2001 sample could be analytically or computationally classified as Type A or Type D non-interviewed households for the weighting of the SPD 1999 cross-sectional weighting. On this basis, all eligible sample households in the SPD Bridge non-interviewed sample component and the SIPP 1992/1993 non-interviewed sample component of the SPD 2001 sample were arbitrarily classified as Type D non-interviewed households for the SPD 1999 cross-sectional weighting. The mover’s weights of the Type A and Type D non-interviewed sample households in the SPD 1999 sample, and the SPD Bridge non-interviewed sample component and the SIPP 1992/1993 non-interviewed sample component of the SPD 2001 sample in each non-interview weight adjustment cell were transferred to the interviewed households (in the SPD 1999 sample) within the same non-interview weight adjustment cell through a non-interview weight adjustment factor. The household non-interview weight adjustment factor for each non-interview weight adjustment cell was defined as the ratio of the sum of the mover’s weights of its interviewed, Type A non-interviewed, and Type D non-interviewed sample households to the sum of the mover’s weights of its interviewed sample households. The household non-interview adjusted weight of each interviewed sample household (in the SPD 2000 sample) is then the product of its household mover’s weight and its household non-interview weight adjustment factor. The non-interviewed adjusted weight of each resident member in each interviewed sample household of the SPD 2000 sample was then assigned as his/her household non-interview adjusted weight. All other sample people were assigned a final SPD 1999 cross-sectional weight of zero and were excluded from further weighting process in parts 3 and 4 below.

### **Part 3 — Second Stage Weight Adjustment**

Similar to the March CPS, the second stage weight adjustment for the SPD 2001 and 2002 cross-section weighting (produced prior to the SPD 1999 cross-sectional weighting) was conducted using the basic CPS second stage weight adjustment procedure with the following minor modification: the entire SPD 1999 sample was treated as a single rotation in the second stage weight adjustment instead of eight separate rotations like the basic or March CPS sample. The objective of the second stage weight adjustment was to improve the population coverage and the variance estimation accuracy for various key demographic estimates. Namely, the SPD 1999 person non-interview adjusted weights were further adjusted to match a set of benchmark demographic estimates associated with age, sex, race, and Hispanic ethnicity of the civilian non-institutional population at the national level, and each individual state population size at the state level. These benchmark estimates are typically referred to as the “population controls.” These population controls for the SPD 1999 cross-sectional weighting were the corresponding benchmark estimates for the month of March 1999 (like the 1999 March CPS).

## **Part 4 — Family Equalization Adjustment**

A person's second stage adjusted weight was further adjusted, in order to produce consistent family-level estimates based on the family reference person weight, using the March CPS family equalization weight adjustment procedure provided in the March CPS weighting specifications. This adjustment ensured that the final weight of each person in a married or unmarried couple in a sample household was equal, and that the estimate of the total number of males using their final weights was the same as its corresponding population control. Unlike the March CPS, a military sample household was excluded as a sample household in the SPD sample (a Type C non-interviewed household). Therefore, that portion of the March CPS family equalization weight adjustment procedure was ignored for the SPD's family equalization weight adjustment. The result of applying the family equalization weight adjustment to the person second stage adjusted weight was the person final cross-sectional weight. Consequently, the person final cross-sectional weight of the reference person of a sample household was the household final cross-sectional weight. Likewise, the person final cross-sectional weight of the reference person of a primary family or subfamily in a sample household was the final primary family or subfamily cross-sectional weight.

### **Estimation of Person Characteristics**

Some basic types of the 1999 SPD cross-sectional estimates that can be constructed using the 1999 cross-sectional weight are described below in terms of estimated numbers. Of course, more complex estimates, such as percents, averages, and ratios can be constructed from the estimated numbers. The 1999 SPD cross-sectional weights can be used to construct the following types of cross-sectional estimates:

1. The number of people who have ever experienced a characteristic or situation during a given time. (For example, the number of people who experience unemployment during 1998.) To construct such an estimate, sum the weights over all people who possessed the characteristic of interest at some point during the time period of interest.
2. The amount of a characteristic accumulated by people during a given time. (For example, the amount of unemployment compensation received by unemployed people during 1998.) To construct such an estimate, compute the product of the weight times the amount of the characteristic and sum this product over all appropriate people.

### **Obtaining Access to Self-Administered Questionnaire Data**

The marital relationship and conflict and depression scale data will only be available through the Census Bureau's Research Data Centers. Contact the Research Data Center staff for the requirements for reviewing this data.

# GLOSSARY

This glossary includes definitions of terms that apply to the Survey of Program Dynamics (SPD).

- 401K Plan*** A 401K plan is a retirement qualified profit sharing or stock bonus plan that contains a cash-or-deferred arrangement. Elective contributions are excluded from the employee's gross income for the year in which they are made and are not subject to taxation until distributed. Retirement payments from 401K's should be considered as "regular retirement income".
- Additional People*** People who join original sample households, as well as anyone else who lives with them in that or any future household. An additional person remains in the survey until he or she no longer shares a household with the original sample person.
- Address ID*** The three-digit address ID code identifies each household associated with the same sample unit identification number. The first two digits of the address ID code indicate the wave or year in which that address was first assigned for interview. The third digit sequentially numbers multiple households that have the same serial number. The address ID code is 011 for all sample addresses that are the same as in Wave 1 of the 1992 and the 1993 SIPP panels. As the SIPP sample people move to new addresses, new address ID codes are assigned. For example, any new address to which sample unit members moved during the 1999 SPD is numbered from 131 to 139.
- Address Unit*** Often referred to as "household", this collection unit is a person or group of persons living at the same address at the time of an interview. The address unit may consist of one person living alone, a group of unrelated individuals, or one or more families.
- Adult*** Household members 15 years old or older. Information is collected for each adult.
- AFDC or ADC*** The Aid to Families with Dependent Children (AFDC) or Aid for Dependent Children (ADC) program has been abolished as a result of the 1996 Welfare Reform Act. Each state now has its own welfare program. Some states use the generic name, Temporary Assistance to Needy Families (TANF). Most states have a unique name. All references to AFDC/ADC in the instrument have been

changed to "public assistance". *See public assistance for more information.*

***Age***

Date of birth is recorded to compute the age for subsequent interviews or reference months.

The public use microdata files include year of birth. For the SIPP 1992 panel, year of birth is bottom coded at 1910 to maintain confidentiality. For the SIPP 1993 panel, year of birth is bottom coded at 1911 to maintain confidentiality. Similarly, the top code for age is 89.

***Aid to Families With Dependent Children***

See AFDC

***Alimony Payments***

Support payments received from a former spouse. These payments may be received directly from the former spouse or through the courts.

***Annuity***

Annuities are purchased by people at retirement or during the person's working years to guarantee a regular income after retirement. Include all such annuities purchased by the person, except any already reported as part of the person's employee pension.

***Armed Forces***

People in the Armed Forces include any members of the United States:

- Army, Navy, Air Force, Marines
- Coast Guard
- Reserve component of any of the above organizations on active duty status for several months. This includes the 4-6 month period served in connection with the provisions of the Reserve Forces Act of 1955.
- Commissioned officers of U. S. Public Health Service who are attached to any branch of the Armed Forces (Army, Navy, Air Force).
- National Guard in Federal Service (when all or part of their service was during a period when their unit was blanketed into the regular forces by Presidential Order). This includes the 6 month active duty served by National Guardsmen.

- Cadets in the United States military academies (West Point, Naval Academy, Air Force Academy, and the Coast Guard Academy).

Exclusions:

- People who have served in the Armed Forces of foreign countries.
- People whose only service was in the Coast Guard Temporary Reserve.
- Employees of the Merchant Marines, Maritime Commission, American Field Service, and civilian employees of the Department of Defense.
- People whose only service was in a National Guard unit blanketed into the regular forces by Presidential Order and who did not serve the 4-6 months of active duty in connection with the provisions of the Reserve Forces Act of 1955.
- People in short periods of active reserve training or who attended weekly reserve meetings.
- Reserve Officer's Training Corps (R. O. T. C).
- VISTA or Peace Corps

***Armed Forces Vocational Rehabilitation Program***

This program provides for veterans who are in need of vocational rehabilitation to overcome a handicap resulting from a service-connected disability. Veterans may receive up to 48 months of education or training to restore their employability "unless a longer period is prescribed by a VA Administrator."

The full cost of their training is paid by the Department of Veterans Affairs (VA). In addition, they receive a subsistence allowance while in training and for 2 months after rehabilitation. These disabled veterans are provided counseling assistance in selecting a suitable objective and planning a program of rehabilitative training. While in training they are provided continuing help by vocational rehabilitation specialists. Necessary employment assistance is provided following completion of training.

***Asset Income***

Asset income for the SPD is collected on an annual basis. The focus is on income earned from each asset during the reference period, not on the value of the asset.

***Asset and Asset  
Ownership***

The SPD collects ownership information for a variety of asset types. These include savings and interest-earning checking accounts, certificates of deposit (CD), money market and mutual funds, stocks, rental property, and other such assets. The value of home and information about automobile ownership is also collected.

If assets are owned jointly by two household members (for example, a husband and wife), the SPD collects this information from one spouse. This prevents double-counting of joint assets. Respondents report income from assets on an annual basis, or select from a range that represents the amount of interest earned.

***Assets and Liabilities***

Assets and Liabilities are included to broaden our understanding of resources available to households and individuals. These data allow an examination of economic well-being beyond that which can be observed through the study of current income. Participation in many federal programs is contingent upon not just the basic income level, but upon the assets and liabilities of the individual or household as well.

Some information on assets and liabilities is gathered in the "Amounts" sections. The questions ask for the value of certain assets such as the balance in checking accounts, ownership of and value of stocks and bonds, receipt of interest dividends and royalties and rental income. Respondents are also asked about outstanding debts and obligations, such as unpaid bank loans or credit card bills.

***Below Market  
Interest Rate***

Under the Federal Housing Authority's "below market-interest rate" programs, the amount of interest paid on the mortgage by the project owner is reduced so that the owner can charge rents that can be afforded by families and individuals of low and moderate income. The FHA pays the mortgage lender the difference between the interest payment required at the market rate and the lower interest payment made by the owner.

***Bonuses, non-  
military***

Payments made by employers to employees as supplements to wages and salaries; for example, bonuses based on a percentage of the profits and cash from employers to employees.

***Business***

A business exists when one of the following conditions is met:

- the person has invested substantial capital in machinery or equipment used by him/her in conducting the business
- an office, store, or other place of business is maintained, or
- some public advertising of the business or profession exists

***Computer Assisted Interviewing (CAI)***

A collection of methods for using computers to assist with data collection.

***Certificates of Deposit or Other Savings Certificates***

A certificate of deposit or other savings certificate is an investment in which people invest money for a fixed period of time usually at a fixed interest rate. These accounts are available at banks, savings and loans, and credit unions.

***Child Care or Day Care Center***

A child care center provides adult supervision and care for children under the age of 14.

***CHAMPUS/Tricare***

“CHAMPUS” (Civilian Health and Medical Program of the Uniformed Services) has been replaced by Tricare. It is a health benefit program for all seven uniformed services. The following is a list of people covered by TRICARE:

- Active duty service members
- Spouses and unmarried children of active duty service members
- Uniformed service retirees, their spouses, and unmarried children
- Not remarried former spouse and unmarried children of active duty or retired service members who have died
- Spouses and unmarried children of reservists and National Guard who are ordered to active duty for more than 30 consecutive days (they are covered only during the reservist’s active duty tour) or of reservists and National Guard who die on active duty.
- Spouses and unmarried children of reservists and National Guard who die as a result of a line of duty condition may be eligible for health care.
- Persons who have received the Congressional Medal of Honor, and their family members, who are not otherwise TRICARE eligible. These persons will be able to obtain health care benefits under TRICARE in the same manner as if they were entitled to retired pay.
- Unmarried children up to age 21 (including stepchildren

*who are adopted by the sponsor*) are still covered by TRICARE even if the spouse gets divorced or remarried. But in the case of a stepchild who was not adopted by the sponsor and the marriage ends in divorce, the stepchild loses eligibility on the date the divorce decree is final

- A child aged 21 or over may be covered if he or she is severely disabled and the condition existed prior to the child's 21st birthday—or, if the condition occurred between the ages of 21 and 23 while the child was enrolled in school full-time and is, or was at the time of the sponsor's death, dependent on the sponsor for more than one-half of his or her support. A child may also be covered up to age 23 if he or she is in school full-time.
- Children placed in the custody of a service member or former member, by a court of law; or by a recognized adoption agency in anticipation of legal adoption by the member.
- Children of current or former service members or their spouses born out of wedlock may be eligible for TRICARE benefits under certain conditions.
- Certain family members of active duty service members who were court-martialed and separated for spouse or child abuse. The victims of the abuse within the family are eligible for health benefits for the period that the abused family member is receiving "transitional compensation" under Section 1059 of Title 10, U.S. Code. Cost sharing will be the same as for other active duty families.
- Certain abused spouses, former spouses, and dependent children of service members who were eligible for retirement, but had that eligibility taken away as a result of abuse of the spouse or child. This benefit is effective for medically necessary services and supplies provided under TRICARE Standard (CHAMPUS) on or after October 23, 1992.
- Spouses and children of North Atlantic Treaty Organization (NATO) and "Partners for Peace" (PFP) nation representatives who are officially accompanying the NATO or PFP nation representatives while stationed in, or passing through, the United States on official business. These family members are eligible for outpatient benefits only (including ambulatory surgery). (NATO and PFP family members cannot enroll in TRICARE Prime.)
- Former spouses of active or retired military who were married to a service member or former member who had

performed for at least 20 years of creditable service for retirement purposes at the time the divorce or annulment occurred. The former spouse must also meet the following requirements:

1. Must not have remarried.
  2. Must not be covered by an employer-sponsored health plan.
  3. Must not be the former spouse of a NATO (or "Partners for Peace" nation) member. And—
  4. Must meet the requirements of one (not all) of three situations provided by TRICARE
- Military, retired members and their families who are 65 years old and over, eligible for Medicare Part A and maintain Medicare Part B (enacted October 2001)

## ***CHAMPVA***

CHAMPVA (Civilian Health and Medical Program of the Department of Veterans Affairs) is a medical program through which the VA helps pay for medical services obtained from civilian sources by eligible dependents and survivors of veterans. To be eligible for CHAMPVA you cannot be eligible for Tricare/CHAMPUS. The following is a list of people covered by CHAMPVA:

- The spouse or child of a veteran who has a permanent, total disability, resulting from a service-connected disability
- The surviving spouse or child of a veteran who died as the result of a service-connected disability, or who at the time of death had a total disability, permanent in nature, resulting from a service-connected disability
- The surviving spouse or child of a military member who died in the line of duty, not due to misconduct

The term "child" refers to an unmarried child who is:

- A legitimate child, a legally adopted child, a stepchild who is a member of the veteran's household or who was a household member at the time of the veteran's death, or an illegitimate child
- A child who is 18 years of age or older, but incapable of self-support because of a mental or physical incapacity that existed before the age of 18, or

- A child who is under the age of 23 and is in school

***Child Support Payments***

Child support is money paid to the custodial parent (that is, for example, the respondent) by the non-custodial parent for the support of their child(ren). The payment may be made directly to the respondent or indirectly through the court system or other public agency, sometimes called "pass-through payments."

When a public agency is involved with child support collection, it is particularly important that it not be confused with any government-administered programs such as other public assistance (formerly known as AFDC), food stamps, general assistance, WIC, school lunches, or breakfasts.

***Children's Health Insurance Program (CHIP)***

See State Children's Health Insurance Program (SCHIP)

***Chronic Condition***

A condition marked by long duration of frequent occurrence. One that is always present or constantly vexing, weakening, or troubling.

***Citizens of Foreign Countries Temporarily in the United States***

Citizens of foreign countries staying at the sample unit are interviewed if:

- They are not living on the premises of an embassy, ministry, legation, chancellery, or consulate or
- They are not merely visiting or traveling in the United States

***COBRA***

COBRA makes it possible for certain workers and their families to retain for either 18, 29 or 36 months the health insurance benefits they had when they were covered under an employer's group health insurance plan. Named for the Consolidated Omnibus Budget Reconciliation Act, which contains the key provisions, COBRA provides for continuation of health insurance benefits available to the employee or conversion to an individual or individual family health insurance policy. After reaching a certain age, a dependent can be covered for a period of up to 36 months. A worker terminated from employment can be covered for up to 18 months.

***College/School Educational***

Colleges offer many types of aid to students, and also act as "pass through" agents for public and private aid.

*Assistance*

**College Work-Study** - This program provides financial assistance to students by placing them in on-campus jobs that pay at least the minimum wage. Part of the wage is often paid by the employer, which may be the college or another organization. The rest of the wage is subsidized through funding provided by the federal government and administered by the college or university financial aid office.

**Tuition Remission** - Many private schools offer lowered tuition to students from families with income and assets below a certain threshold. Some students pay less than the "full" tuition.

**Teaching or Research Assistantship** - Teaching or research assistantship are usually offered to graduate students or, sometimes, advanced undergraduates as a form of support. Paid work in laboratories or teaching by students pursuing a degree fall under this category.

*Combined Panel Factor*

The combined panel factor is a factor accounting for the difference in the effective sample sizes (the number of interviewed sample households) of the SIPP panels 1992 and 1993 when they were combined to create the SPD samples (SPD Bridge through SPD 2002). Since the effective sample sizes of the SIPP panels 1992 and 1993 are essentially the same in every wave, the combined panel factor of 0.5 is used. Thus, the Wave 1 non-interview adjusted weights of the sample households in the SIPP panels 1992 and 1993 were adjusted by multiplying them with a combined panel factor of 0.5 when they were combined as an SPD sample (SPD Bridge through SPD 2002).

*Commissions*

Money received by a person for transacting business for another person or corporation. In some occupations, such as sales clerks, truck drivers, and launderers, commissions may constitute a large portion of wages or salary.

*Condominium and Association Fees*

Payments made by the residents of most condominium buildings and some residential communities for property management. The fees are sometimes included in the rent or mortgage payment.

*Confidentiality*

The SPD is authorized and protected by Title 13, Section 182, of the U.S. Code. This means that the Census Bureau is responsible for protecting the confidentiality of all individual information collected. The term confidentiality refers to the guarantee that is made to individuals who provide survey information regarding

disclosure of that information to others, as well as the uses of that information. No other government agencies such as the FBI, IRS, and CIA have access to identifiable information collected by the Census Bureau.

Information is made available to the public and other data users only in the form of statistical summaries, tables, and microdata files, with no individuals identified. The Census Bureau does not publish data if the number of contributors is small enough to identify individuals from the data. Unauthorized disclosure of individual information by a sworn Census Bureau employee is punishable by a fine of up to \$5,000 or imprisonment of up to 5 years, or both. A notice of confidentiality is contained on the Advance Letter to respondents.

***Coverage Unit***

See Housing Unit.

***Cross-sectional Survey***

Data collected for a single time period from a single sample.

***Cross-sectional Weighting***

See Weighting.

***Data Suppression***

Data are suppressed to protect the confidentiality of survey respondents and to ensure that respondents cannot be identified. Confidentiality is accomplished by blanking, imputing, recoding, top coding and swapping data items.

***Day Care or Child Care Center***

A child care center is a center providing adult supervision and care for a number of children under the age of 14.

***Dependents' and Survivors Educational Assistance Program***

See Veterans' Educational Assistance.

***Designated Parent***

In married couple families, the mother is the designated parent and normally responds for all children related questions. If the mother is not available for interview, a proxy response from the father is acceptable. In single parent families, the resident parent is the designated parent. If neither parent is resident in the household, the guardian is the respondent. If the designated parent is unavailable, a callback is scheduled.

***Direct Access***

A living quarters has direct access when the occupant can either enter his/her living quarters directly from the outside of the structure, or enter his/her living quarters from a common hall or lobby that is used by occupants of more than one unit. The hall or lobby must not be part of any unit and must be clearly separate from all units in the structure. If the only entrance to a living quarters is through a room or a hall of another living quarters, then the living quarters does not have direct access.

***Disability***

For a person 15 years or older a disability is a physical or mental impairment that substantially limits one or more of life's major activities. In this survey we assess a person's functional limitations in a series of questions concerning the following:

- functional activities such as seeing, hearing and walking
- activities of daily living such as getting in and out of bed and bathing, and
- instrumental activities of daily living such as going outside the home

The SPD also identifies people with a work disability. A work disability is a physical, mental or other health condition which limits the kind or amount of work a person can perform. A work limitation may affect only the kind or amount of work the respondent can do, or it may prevent him/her from working altogether. Short-term illnesses or conditions are not work limiting. For example, a broken bone may keep a person from working for several weeks, but this would not constitute a work limitation. Pregnancy is not considered a work-limiting condition.

For children under 15 years old, the SPD assesses functional limitation in activities such as seeing, hearing, and walking as well as the following:

- presence of a developmental or learning disability.
- ability to perform age appropriate tasks (children under 6), and
- presence of behavioral or emotional problems (children 6-14).

***Disability Income***

Income that a household member received due to a health condition or other disability during the reference period (other than Social Security, SSI, or Veteran's compensation).

***Domestic Workers***

Workers in occupations concerned with tasks in and around a private household. They perform duties such as cleaning, washing, and ironing clothes, making beds, caring for children, planning meals, going to the market, and cooking.

***Educational Assistance***

Many students in 2-and 4-year colleges, universities, and various types of vocational and training institutions receive financial assistance in paying both tuition and living expenses. Assistance may be in the form of scholarships, grants, loans, college work-study, employer assistance (for example, employer-paid tuition payments), veterans' benefits, and other forms of aid from sources other than from students or their families to help students finance post-secondary education.

(For more information about specific programs, see entries under (1) College/School Educational Assistance, (2) Federal Educational Assistance, (3) Other Educational Assistance, and (4) Veterans' Educational Assistance.)

The following are specific examples of educational assistance:

- GI Bill
- Other Veterans Administration Educational Assistance Programs
- Survivors' and Dependents' Educational Assistance Program
- Armed Forces Vocational Rehabilitation Program
- Post-Vietnam Vocational Educational Assistance Program
- College Work-Study
- Pell Grant
- Supplementary Educational Opportunity Grants
- National Direct Student Loan
- Guaranteed Student Loan
- Job Training Partnership Act Training
- Employer Assistance
- Fellowship/Scholarship
- Other Financial Aid

***Educational Attainment***

Educational attainment codes are entered for each household member 15 years of age or older. They are as follows:

- (31) Less than 1st grade
- (32) 1st, 2nd, 3rd or 4th grade
- (33) 5th or 6th grade

- (34) 7th or 8th grade
- (35) 9th grade
- (36) 10th grade
- (37) 11th grade
- (38) 12th grade, no diploma
- (39) HIGH SCHOOL GRADUATE - high school DIPLOMA or equivalent (for example, GED)
- (40) Some college, but no degree
- (41) Diploma or certificate from a vocational, technical, trade or business school beyond the high school level
- (42) Associate degree in college Occupational/vocational program
- (43) Associate degree in college - Academic program
- (44) Bachelor's degree (For example, BA, AB, BS)
- (45) Master's degree (For example, MA, MS, MEng, MEd, MSW, MBA)
- (46) Professional School Degree (For example, MD, DDS, DVM, LLB, JD)
- (47) Doctorate degree (For example, PhD, EdD)

The following special situations also apply:

**Junior high** - If the person's highest grade was in "junior high," a determination of the equivalent in elementary grades (1-8) or high school grades (9-12) is made by the field representative (FR).

**"Post-graduate" high school** - For people who have attended "post-graduate" high school courses after completing high school, but have not attended college, a code of "39" is entered.

**Equivalency tests** - For people who pass a high school equivalency test (GED) or finished high school while in the Armed Forces, but did not attend college, a code of "39" is entered.

**Miscellaneous school system** - The entry represents the equivalent grade in the regular school system for a person who obtained a formal education through any of the following methods:

- Foreign schools
- Ungraded schools
- Home schools (children who are taught at home by their parents or by a paid tutor)

- Night schools or instruction by tutors (if such instruction was counted toward promotion in the regular school system).

**People still in school** - For people still attending school, educational attainment is the highest grade or level the individual completed (usually the grade attended the previous year), or the highest degree attained.

**Summer status** - For people who are on summer vacation or in school, the entry represents the grade or year they were enrolled in the previous school year, provided they completed that grade (not the grade or year they will attend in the fall or an uncompleted year).

**The following situations are excluded:**

**Vocational or other trade schools** - Education obtained at vocational schools, business schools or colleges, and other trade and specialized schools are not included unless a certificate has been awarded. The training must also take place after high school is completed, or at a level beyond high school.

**Correspondence schools** - Training received by mail from "correspondence" schools is not included unless the correspondence course counted toward promotion in a regular school.

**"On-the-Job" training** - Training received as "on-the-job" training is not included.

**Adult Education Classes** - Adult education classes are not included unless such schooling is being counted for credit in a regular school system. If a person is taking adult education classes but not for credit, he/she is not regarded as enrolled in a "regular" school. Which category the person fits into depends on whether or not the schooling can advance a person toward an elementary school certificate, a high school diploma, or college degree.

**Training** under the Manpower and Training Act of 1962, Comprehensive Employment and Training Act (CETA), Job Training Partnership Act of 1983, or the Poverty Program - Most of the training under these acts consisted of courses at private vocational or trade schools or on-the-job training and was not in

regular schools. However, if the training gave credit toward regular school, it is included. See further definition under "regular school."

## ***Employer***

**Wage and salary workers:** The employer is the person, company, corporation, or agency, who paid them. A change of occupation under the same payroll is not considered a different employer.

**Self-employed workers:** People who were self-employed the whole year, even though they may have changed their type of business, had one employer. If a person was self-employed, but closed his/her business and took a job with someone else, or if a wage and salary worker became self-employed, this person is recorded as having two employers.

**Domestic workers:** Individuals who work in and take care of people's homes.

- a person who was employed exclusively as a domestic worker or was an odd-job worker, such as gardeners, babysitters, and housekeeper is considered having one employer regardless of the number of different households the person worked (see below).
- a domestic or odd-job worker who moved between this type of job and something entirely different had two or three employers depending on the number of jobs employed at during the year.

**Number of employers:** People employed as domestics or odd-job workers, such as gardeners, babysitters, and housekeepers may regularly work for a number of people throughout the year. For these people, consider their type of work as their employer.

- one employer for a person who did housework for five different families all in 1996, even if each of the five families paid him/her for doing different tasks.
- two employers for a person who switched from doing housework the first part of the year to painting houses the second part of the year.
- only one employer in the following type of case: a field representative who, during 1996, did CPS interviewing for 3 months, did not work at all for 6 months, and then did CPS interviewing again for another 3 months (example of only one job).

***Employer or Union  
Temporary Sickness  
Program***

This privately run program (usually established by an employer or union) pays benefits to people with temporary sickness or disability. This program is not connected with any government program.

***Enrollment***

See School Enrollment

***Entry ID***

The entry ID represents the address of the person at the time he/she was first interviewed and does not change even if the person moves. It is used in conjunction with the person number to uniquely identify people within the sample unit. This variable is the number 011 for all original sample people. For additional sample people, this variable can be 011 or greater than 011 depending on the current address ID of the unit which the new sample person joined. For example, a person who moves into a household with an ADDIDE9 of 011 will receive an PP\_ENTRY of 011. Whereas, a person who enters a household spawned in 1999 (ADDIDE9 = 131) will have a PP\_ENTRY of 131.

***Estates and Trusts***

Money received from the property or possessions of a deceased person. This money can be received on a regular basis (monthly, yearly) or may be received all at one time; for example, upon reaching a specific age. If the money is received all at once, it should be considered as a "lump sum payment."

***Ethnic Origin***

See Origin.

***Family***

The family is defined by the Census Bureau as two or more people living together who are related by blood, marriage, or adoption. On this file, it is possible to distinguish primary families (the family containing the household reference person) from related subfamilies and unrelated subfamilies. A related subfamily is either a parent-child(ren) group or married couple who are related to the household reference person. An unrelated subfamily is a parent-child(ren) group or married couple that does not contain the household reference person or anyone related to the household reference person.

***Family Business (or  
Farm)***

A business (or farm) run by a member of the household who is related to the respondent by marriage, blood, or adoption.

***Family Day Care  
Home***

A family day care home is an arrangement in which a provider takes care of two or more children *of different parents* in the *provider's home*. This does *not* include day care centers. It also

excludes arrangements in which a sitter or nanny only takes care of one or more of this parent's children.

***Family Final  
Cross-sectional  
Weight***

A family final cross-sectional weight is the person final cross-sectional weight of the reference person of a family in a SPD 1999 sample household. The family final cross-sectional weight can be used for the family-level estimates of characteristics of the SPD 1999 cross-sectional universe.

***Family With Two or  
More Homes***

Some families have two or more homes and may spend part of the time in each. For such cases, the "usual residence" is the place in which the person spends the largest part of the calendar year. Only one unit can be the "usual residence."

***Farmers' Home  
Administration  
Rental Program***

In rural areas and towns with a population under 20,000 outside metropolitan areas, or 10,000 inside metropolitan areas, the Department of Agriculture program offers rental assistance to tenants of rental units built under this direct loan program. The tenants pay 30 percent of their income and the FHA pays the remainder of the rent (up to a flexible ceiling determined by the difference between operating cost of the project and the cost of repaying the loan on the project).

***Federal Civil Service  
or Other Federal  
Civilian Employee  
Pension***

Federal employee retirement pensions are payments by the federal government to its retired and/or disabled civilian employees and their survivors. Civilian federal government employees usually worked in the U.S. Civil Service, but may also have been postal workers or former employees of other civilian branches of the federal government, such as the Federal Reserve Bank System, Foreign Service, Tennessee Valley Authority, and the Public Health Service.

Payments are made by U.S. Treasury checks or direct deposit to the person's bank account. Currently, most payments are made by check. Payments are monthly and usually arrive in the first few days of the month. Military retirement pensions are not included.

***Federal Educational  
Assistance***

The federal government is a major provider of financial aid to college and university students. There are two major categories of aid — grants and loans.

**1. Federal Grant Programs:**

**College Work-Study** - This program provides financial

assistance to students by placing them in on-campus jobs which pay at least the minimum wage. Part of the wage is often paid by the employer, which may be the college or may be another organization. The rest of the wage is subsidized through funding provided by the federal government and administered by the college or university financial aid office.

**Pell Grant** - Pell Grants, formerly known as Basic Educational Opportunity Grants (BEOG), are available to undergraduates enrolled in college at least half time. A student applies when entering college and the federal government notifies the student and the educational institution if awarded.

**Supplemental Educational Opportunity Grants (SEOG's)** - The Supplemental Educational Opportunity Grants (SEOGs) are awarded to students on the basis of exceptional financial need. Like the Pell Grants, SEOGs are entirely federally funded, but they are awarded through the financial aid offices of approved educational institutions. The criteria for awarding them are, therefore, not nationally standardized. Students who receive SEOGs may receive Pell Grants as well.

**National Science Foundation (NSF) Grants** - These are competitively-awarded grants for advanced undergraduate and graduate study.

## **2. Federal Loan Programs:**

**Perkins National Direct Students Loans (NDSL)** - The National Direct Student Loan Program (NDSL), now called the Perkins NDSL, differs from the Guaranteed Student Loan program in that funds are allocated to post-secondary institutions for the purpose of making long-term, low-interest loans to students with financial need. They are fully underwritten by the federal government. Repayment begins nine months after leaving school.

**Parent Loan for Undergraduate Students (PLUS) and Supplemental Loan for Students (SLS)** - The Parent Loan for Undergraduate Students (PLUS) and the Supplemental Loan for Students (SLS) programs provide educational loans either to parents for payment of their children's educational expenses, or directly to the student for his/her school expenses. The

entire cost of the loan is underwritten by banking institutions. The main difference between PLUS/SLS loans and Stafford and Perkins Loans is that PLUS/SLS loan recipients must begin the repayment of their loan 60 days after final disbursement. Stafford loans are partially underwritten by the government.

**Stafford Loan or Guaranteed Student Loan (GSL) -** The Guaranteed Student Loan Program (GSL) provides low-interest loans to students attending institutions of higher learning and certain vocational, technical, business and trade schools. The principal of the loan is provided by participating lending institutions such as, banks and savings and loans; repayment of the loan currently begins 6 months after leaving school (although in the past this has been different), and is guaranteed by a state or private non-profit agency or it is insured directly by the U.S. Department of Education.

***Federal Supplemental Security Income (SSI)***

See Supplemental Security Income.

***FHA Rent Supplement Program***

Under this program the Federal Housing Authority (FHA) pays part of the rent for low-income families and individuals occupying certain types of HUD-assisted rental housing projects. To be eligible for assistance under the program, the family or individual must have an income below a certain maximum set for the area.

The family or individual is required to spend at least 25 percent of their income for rent. The difference between this amount and the rent charged for the unit occupied by the family or individual, is paid by the FHA to the project owner. This FHA payment is known as the rent supplement payment.

***Food Stamps***

The food stamp program provides coupons or ATM cards for low-income households to purchase food. The food stamp program is a federal program, which is administered by state and local governments.

***Foster Child Care Payments***

Money paid by a state or local welfare office to a person in return for his/her providing care to children placed in his/her home by the local welfare department. Expenses incurred by the person caring for the children are included.

<b><i>Full-time (school)</i></b>	School enrollment is considered full-time when the course load meets a school's definition of "full time" or when the course load is the same as that of a student who pursues his or her studies as his or her only activity. If all students in a school combine studies with other activities generally recognized standards from other schools were used to make a decision as to what constitutes "full time."
<b><i>Full-time (work)</i></b>	A position is considered full time when the person works 35 hours or more per week at that position. A person who is regularly scheduled for under 35 hours may be considered full time in certain cases (for example, airline pilots and certain unionized jobs).
<b><i>General Assistance or General Relief</i></b>	State and local programs provide cash assistance to people not eligible for cash assistance, (formerly AFDC/ADC) or Supplemental Security Income (SSI), and to people awaiting enrollment in SSI. These programs are also available to people out of work who cannot qualify for unemployment insurance or whose benefits under that program are inadequate or have been exhausted. General assistance or general relief programs are often called by other names. Check with state or local welfare offices to be sure of the correct title of the program in your locality.
<b><i>General Income</i></b>	General income information is collected for all people 15 years old and over and for children under 15 years of age if the income is received by an adult on their behalf. It includes any type of income except earnings and assets income. Examples include food stamps, all types of public assistance, pension and retirement income, social security, and gifts from friends.
<b><i>G.I. Bill/VEAP Education Benefits</i></b>	See Veterans' Educational Assistance.
<b><i>Group Quarters</i></b>	Group quarters are non-institutional housing units occupied by nine or more persons unrelated to the head and having shared kitchen facilities or common entrance. By definition, group quarters generally include rooming and boarding houses, college dormitories, convents, monasteries, and dwellings and family-type housing (excluding barracks) on military bases.
<b><i>Gross Pay</i></b>	Total earnings before deductions such as, income tax and health insurance.

***Head Start***

Head Start is a federally-funded preschool program organized to provide educational experiences for preschool children. The child care center receives Federal Head Start funding to pay for the cost of the child care; parents of the children do not pay anything.

***Health Insurance***

A respondent is covered by health insurance if the person has a health insurance policy or is covered by a policy in his/her spouse's or parent's name. A private health insurance plan is obtained through the place of employment (an employer, union, or former employer) or from a private health insurance provider or company. This does not include plans that provide only dental care. The respondent can be covered by a government health insurance program, such as Medicare, Medicaid, or CHAMPUS/Tricare.

***Hispanic Persons***

A Hispanic (Spanish) person is a person who has one of the following ethnicities: Mexican American, Chicano, Mexican (Mexicano), Puerto Rican, Cuban, Central or South American, and other Spanish.

Note that, in accordance with the weighting specifications, Spanish population estimates do not include the Spanish sample persons in the military not living in barracks. Instead, they are treated as if they were non-Spanish.

***Household Final Cross-sectional Weight***

A household final cross-sectional weight is the person final cross-sectional weight of the reference person of a SPD 1999 sample household. The household final cross-sectional weight can be for the household-level estimates of characteristics of the SPD 1999 cross-sectional universe.

***Household Initial Weight***

The initial weight of a SPD 1999 sample household is the weight resulted from adjusting its Wave 1 SIPP 1992/1993 non-interview adjusted weight to account for the combined panel effect and the sample cut (sub-sampling) effect on the SPD 1999 sample.

***Household Mover's Weight***

The household initial weight of a SPD 1999 sample household is the weight resulted from adjusting its household change between the SIPP 1992/1993 Wave 1 and the SPD 1999 due to sample persons moved into the household after Wave 1. By definition, if a sample household consists only of original sample person then the household mover's weight is the same as the household initial weight.

***Hot Deck***

A hot deck is a tool used to impute missing data (see Imputation). The hot deck is usually a multi-dimensional array of values used in imputation. For example, if we want to create a hot deck to impute marital status we might define an array "MS" on three dimensions, where those dimensions are defined by the variables sex, age, and race.

Each person on the data set who has an unreported marital status is assigned a marital status from the array.

MS (missing)=MS (Sex, Age, Race)

Each person on the data set who has a reported marital status is used to update or refresh the hot deck, that is, the reported value replaces the value stored in the hot deck.

MS (Sex, Age, Race)=MS (reported)

This keeps the values in the hot deck current and relevant to the data set. This means that people receiving an imputed value for a data item, in this case marital status, will be assigned the same value as someone else with some similar characteristics, in this case someone of the same sex, age group, and race.

***Householder***

Householder is also known as the "reference person." The reference person is the person in whose name the home is owned or rented. If the house is owned jointly by a married couple, either the husband or the wife may be listed as the "reference person."

***Household Members***

Individuals whose usual place of residence at the time of interview, is the sample unit and those people staying in the sample unit who have no usual place of residence elsewhere (URE).

***Households***

Households, defined each interview period based on people sharing an address, are synonymous with address units. However, household composition is not explicitly collected. Instead, it is inferred from the interviews conducted at each address, based on information obtained regarding people entering and leaving the address.

***Housing for Elderly -  
- Direct Loan  
Program***

Under this program (also known as the "Section 202" program), HUD makes 100 percent loans for a maximum term of 50 years to nonprofit organizations. This housing is for older people with incomes too high for public housing, but too low to pay rent in the

private housing market.

The low-interest payments permit nonprofit organizations to charge lower rents. Churches, labor unions, fraternal organizations, and civic clubs are generally the owners of these projects.

***Housing Unit***

A group of rooms or a single room occupied as separate living quarters or intended for occupancy as separate living quarters. A housing unit may be occupied by a family or one person. A housing unit may also be occupied by two or more unrelated people who share the living quarters.

***Housing Unit  
Classification Items***

The following items are used to determine housing unit classification.

- What is your exact address?
- Is this also the mailing address?
- What is the housing unit's geographic location (movers only)?
- Classification of living quarters.
- How many housing units, both occupied and vacant, are there in the structure?
- Tenure of the unit.
- Characteristics of the unit (in subsidized housing).

***Housing Units Not  
Within Structures***

Possible housing units not located within structures include trailers, tents, boats, cars, buses and caves. Before a unit is listed, it must meet the housing unit definition. If a trailer or tent, houseboat or yacht, converted car, bus, or railroad boxcar is either occupied or intended for occupancy as a separate living quarters on a site, it is a housing unit. Houseboats and yachts used only for vacations or overflow sleeping quarters are not housing units.

***Housing Units  
Within Structures***

Double or duplex houses, row houses, townhouses, multi-unit structures, and housing units that occupy the top portion of nonresidential structures.

***Imputation***

The process of determining a missing characteristic based on an individual's social, economic, and demographic characteristics. In general, an imputation procedure enhances the usefulness of the data. It simplifies processing for the microdata user by eliminating "not reported" categories. It gives a user the ability to work with a more complete data set. Statistically, there are advantages and

disadvantages to the use of imputed data.

***Incidental or Casual Earnings***

Earnings not received on a regular basis, for example, mowing a person's yard or babysitting weekly. These earnings are usually unplanned and sporadic.

***Income Assistance From a Charitable Group***

Includes cash assistance given by a church, synagogue, social welfare group, or some other charitable non-profit organization. Excluded are items such as meals, clothing, or a place to sleep, which are "in-kind" types of charity.

***Income From Roomers or Boarders***

Includes all money received from any roomers or boarders. Expenses incurred by the respondent (landlord) are not deducted.

***Incorporated business***

A business that has undergone the legal process of incorporating, according to the laws of the state in which the incorporation took place. Such businesses have the abbreviation "Inc." or "Ltd." after the company name.

***Indian Assistance Program***

There are a number of income-assistance programs for Native American Indians, which are administered by the Bureau of Indian Affairs. To be eligible for these programs a person must be a registered member of a tribe and live on or near an Indian reservation, and be ineligible for both state cash assistance (formerly AFDC/ADC) and SSI. There are some minor exceptions to this rule in Oklahoma and Alaska. A program thru which the Department of Health and Human Services provides medical assistance to eligible American Indians at IHS facilities.

***Indian Health Services (IHS)***

A health care program through which the Department of Health and Human Services provides medical assistance to eligible American Indians at IHS facilities. In addition, the IHS helps pay the cost of selected health care services provided at non-IHS facilities.

***Inmates of Specified Institutions***

Inmates of certain types of institutions at the time of interview are not household members of the sample unit. Usually, these are places that offer full custodial care and the people are expected to remain there for periods exceeding 6 months, for example, prisons or state mental health facilities. They are considered usual residents at the institution

## *Instrument Design*

The SPD is an automated instrument using CAI.

### 1) Household Roster and Demographics Section

Household relationships help determine eligibility for many assistance and transfer programs. In order to assure that the SPD data can be used for projecting the effects of changes to such programs, as well as other family-based analyses, relationships of all household members to the householder, or reference person, are collected and edited in the instrument. Information on parental and sub-family relationships within the household are also collected.

Age checks are incorporated into a number of questions, such as the Armed Forces questions, to prevent inconsistent responses (that is, 18-year-olds who served in World War II).

Information on age, sex, marital status, parental relationships, Armed Forces status (for people 18 and older), educational attainment, race, origin, and Social Security number for all people in the household are collected. Information collected in the first interview is provided in subsequent interviews, and specific items such as marital status, education level and armed forces status are verified in each succeeding interview.

Finally, the instrument uses the age, sex, and other demographic information collected to determine which questions are asked of each individual in the household during the balance of the interview.

### 2) Employment and Earnings

Employment and earnings information is collected for up to four jobs and/or businesses by SPD for all people 15 years or older living in the household. Individuals are asked only questions that pertain to their situation. The instrument collects precise information about work experience for the reference period, such as weeks worked, looking for work or on layoff, average hours employed per week, and other job-specific characteristics. Respondents not employed during the reference period are asked to furnish data on weeks looking for work or on layoff. The survey also collects detailed information on gross wages earned and fringe benefits from those jobs and/or businesses during the interview. Questions are asked also of respondents about their current employment status.

### 3) General Income and Amounts Sections

General income information is collected for all people 15 years old and over and for children under 15 years old if income was received by an adult on their behalf. Data on reciprocity and amount are collected for income sources received during the reference period (the prior year).

Reciprocity alone is collected for sources received during the reference period as a way of partially correcting for seam bias. Maximum parameters are used in real time edits to help validate amounts being recorded. Demographic characteristics of each household member are used to target questions within the instrument. Also, questions are asked about joint income receipt among household members to prevent double-counting income in the instrument. Reciprocity questions for government programs are augmented with questions to establish why reciprocity was begun or terminated as well as who in the household the program covered. In subsequent interviews, previous data are used to establish the flow of questions in the interview.

### 4) Eligibility and Assets Section

The SPD survey collects data on assets and liabilities necessary for measuring program eligibility. Assets include the primary residence, ownership of other property, and vehicles owned by household members. Data is also collected for expenditures critical to eligibility determination, including mortgage and rent, utilities, medical expenses, and child or other support payments. The survey asks about other financial obligations, such as those related to property tax or homeowner insurance and individual debts outstanding. In general, asset ownership and expenditure payments are collected for each household member in the survey.

### 5) Health Insurance Section

The SPD collects information on several different types of health insurance coverage, such as medicaid, medicare, and private health insurance. The questions determine whether the person was covered on his/her own policy, or on someone else's policy.

Additionally, the SPD asks

- how the person obtained the private health insurance,
- which months in the preceding year the person was covered by private health insurance,
- whether a person's employer or union is paying all, part or none of the person's insurance premium,
- for people not covered by insurance, why they are not covered.
- how much the person is paying for private health insurance, if applicable.

The instrument uses demographic information and data reported by other household members, which determines the questions to be asked for specific household members.

6) Program Questions

The SPD collects information on specific government programs, such as subsidized housing or rent, energy assistance (including federal, state and local energy assistance), and the Federal School Lunch and School Breakfast programs. The instrument controls the conditions under which these questions are asked, for example, if there are no school-age children in the household, the questions for school lunches and breakfasts are not asked. If there are school-aged children in the household, the questions display the names of the eligible children.

7) Other Adult Questions

The adult questions on educational enrollment track the progress of adults toward receiving high school or high school equivalency degrees as well as college and graduate degrees. The work training questions focus on whether adults received any work training designed to help them look for a job or to train them for a new job. Participation in these activities is tied to eligibility for receiving welfare benefits in some states. Questions on disability, health care utilization and health insurance are condensed versions of similar series included as topical modules in the SIPP. The food security series is a shortened version of the United States Department of Agriculture-sponsored food security supplement to the CPS and is intended to measure the subjective experience of hunger. The questions are used as a scale to measure the severity of hunger

in a household.

Direct changes in the food stamp program account for nearly half the total federal cost savings under the legislation. Additionally, the food stamp benefits of legal immigrants and able-bodied people ages 18-50 years old without dependents are affected almost immediately by changes in the legislation.

8) Child-related questions

School enrollment and enrichment activities questions track a child's progress through and out of school over time. As household and family conditions change, student progress may be impeded or facilitated. Questions on extracurricular enrichment activities add to the overall portrait of the child's development. The extent to which parents have the financial resources or the time to devote to such activities may be strongly influenced by their program participation and employment in the labor market. Disability and health care utilization questions are similar to those asked about adults.

In the area of child care, a key objective of welfare reform is to encourage single mothers to enter or re-enter the labor force. If the demand of child care outstrips the supply, or if child care is too costly, there is the possibility that greater numbers of children will be left to care for themselves. Analysts want to match child care arrangements to the employment data for the previous calendar year. We will know the type of arrangement used as well as the months it was used.

Questions about child support and contact with an absent parent allow researchers to examine the nature of the awards and whether the awards are being followed or enforced. Child support payments are also a factor in determining the economic status of children living in single-parent families. Contact with absent parents measure the amount of time absent parents spend with their children.

9) Marital Relationships, Conflict and Depression

Marital and family stability questions provide indicators of marital happiness and of overall stress that can contribute to marital and family harmony or instability. These questions are asked of the respondent only.

10) Adolescent Self-Administered Questionnaire (SAQ)

The SAQ contains questions about housework and chores, family routines, parent-child relationships, participation in the labor force, parental monitoring, dating, and contact with absent parents. These contact with absent parent questions are similar to the series administered to the mother or designated parent. The SAQ also includes questions on substance abuse, early sexual initiation, contraception, and childbearing. The behavior of adolescents is of particular interest because adolescents can engage in behavior that is intrinsically problematic and because adolescence is a time when children develop the skills and characteristics that increase or reduce the risk of intergenerational dependency. The adolescents either listened to the questions through headphones and marked their responses on an answer sheet in order to prevent others from hearing the questions and answers; or completed the SAQ by answering questions via telephone.

***Interest-Earning  
Checking Account***

Primary checking accounts that pay interest on monthly deposits. Some other names used for interest-earning checking accounts are: money market checking, investor checking, high-interest checking or NOW II. These accounts should not be confused with money market deposit accounts, which typically pay a higher rate of interest and limit the number of free checks that can be written.

***IRA***

A personal retirement plan, which allows employees, self-employed individuals, and certain other individuals, to set aside an amount of money each year for retirement in a tax-deferred account. Earnings on all amounts contributed to any IRA accumulate on a tax-deferred basis. The two kinds of IRAs are the traditional IRA and the Roth IRA.

***Job***

A definite arrangement for regular (full or part time) work every week or month for pay. Also, definite arrangement to work a specified amount of time, but on an irregular schedule during the week or month is also considered a job.

***Job Training***

Job training has one of two objectives:

- (1) to teach the trainee how to look for a job, or
- (2) to teach specific skills needed for a job or career.

A person can participate in some kinds of job training at home (for

example, by taking a correspondence course), while other sorts of job training require the trainee to attend classes at a training center.

***Joint Custody***

This may be joint physical or joint legal custody.

Joint Physical Custody : Gives each parent the right to have the child/children live with each parent part of the time.

Joint Legal Custody: Gives both parents the right to help make decisions about the child/children.

***Keogh Plan***

A qualified retirement plan maintained by a self-employed individual, either a sole proprietor or a partner. The self-employed individual may take a tax deduction for annual contributions to the plan made on behalf of the individual and on behalf of any eligible employees.

***Labor Force***

Employment status (with or without a job, on layoff, looking for work) and weeks with a job and/or without pay are indicated for each week of the reference period as are average hours of work, including part-time status (less than 35 hours per week). Adult respondents who work less than 52 weeks or without a job are asked their main reason for not working during those weeks and whether they looked for a job.

***Layoff***

People are on layoff if they are waiting to be recalled to a job from which they were temporarily separated for business-related reasons, such as temporary drops in demand, business downturns, plant remodeling, material shortages, or taking inventory. Any person forced to leave a job due to slack work conditions, shortages, or other economic conditions of the business (rather than personal misconduct) is considered "on layoff."

***Legal Custody***

Legal custody is a child custody arrangement that gives parents the right to make decisions about the child.

***Line Number of Parent***

Parents must be a household member to have a parent's line number. Parents include and exclude the following:

Include:

- Natural parents.
- Adopted parents, and
- Step-parents.

Exclude:

- Foster parents.
- In-laws, and
- Grandparents.

### ***Living Quarters Classification***

The following three concepts are used to classify living quarters.

- 1) **Direct Access:** Living quarters that have direct access, that is, an occupant can either enter his/her living quarters directly from the outside of the structure or enter his/her living quarters from a common hall or lobby that is used by occupants of more than one unit. The hall or lobby must not be part of any other unit and must be clearly separate from all units in the structure.
- 2) **Housing Unit (HU):**
  - a) House, apartment, flat - This category is for a sample unit that is a house or apartment. It includes such housing units as an apartment over a garage, in an office building, and housing units in such places as converted barns or sheds.
  - b) HU in nontransient hotel, motel - This category is for separate living quarters such as in a hotel, motel or motor court that reserves 75 percent or more of its rooms for people who stay a month or longer. By definition, all separate living quarters in a nontransient hotel, motel or motor court are housing units.
  - c) HU, permanent in transient hotel or motel - This category is for separate living quarters, occupied or intended for occupancy by permanent guests or resident employees, in a hotel, motel or motor court which has more than 25 percent of the rooms designated for people who stay less than a month.
  - d) HU in rooming house - This category is for sample units that meet the housing unit definition in rooming houses or combination rooming and boarding houses.
  - e) Mobile home or trailer with *no* permanent room added - This category is for a mobile home or trailer (even if it is on a permanent foundation). If a permanent room (or rooms) has been added, classify it as "Mobile home or trailer with one or more permanent rooms added." Open or unheated porches or sheds built onto trailers are not considered rooms.

- f) Mobile home or trailer with one or more permanent rooms added - This category is for a mobile home or trailer to which a permanent room (or rooms) has been added. Sheds and open or unheated porches built onto trailers are not considered rooms.
- g) HU not specified above - Included in this category are living quarters, which meet the housing unit definition, but cannot be described by the specific categories listed above. Tents, houseboats and railroad cars are included here if they meet the housing unit definition. If this category is marked, the instrument notes space contains a description of the unit.

### 3) **Group Quarters Units**

Group quarters units are *not* housing units. They are located in certain special places such as institutions, dormitories, and boarding houses where the residents have their own rooms, groups of rooms or beds, and also have some common facilities such as a dining hall, lobby or living rooms, or recreational areas.

- a) Group quarters, not HU in rooming or boarding house - If a unit is located in a boarding house, or is occupied by a boarder in a combination rooming and boarding house, or otherwise does not meet the housing unit definition in a rooming house or combination rooming and boarding house.
- b) Unit not permanent (for example, in transient hotel or motel) - If a unit is located in a transient hotel, motel, or motor court and is occupied or intended for occupancy by transient guests or does not meet the housing unit definition.
- c) Unoccupied tent site in a carnival or campground - If the group quarters unit is an unoccupied site for a tent.
- d) Group quarters unit not specified above - This category is for a group quarters unit not described above. Examples include rooms in student dormitories, quarters for nurses and quarters in bunkhouses. The notes space of the instrument contains a description of this type of group quarters unit.

#### ***Local Government Retirement Pension***

Paid to retired people who were former employees of city, county or other local government agencies, such as police and fire departments, libraries, public schools, and hospitals, and to employees who retired early because of disability.

People with a sufficient number of years of service may retire with a pension before reaching age 65. Individuals employed in hazardous occupations, such as law enforcement, may be eligible to retire with a pension as early as age 40, if they have completed 20 or more years of service.

Most payments are made monthly by check through the mail. It is possible, however, that payments are made by direct deposit to the person's bank account. Since there are more than 2,000 state and local government pension plans, the source and appearance of the payments made by check are varied.

Some of the state retirement systems have provisions for cost-of-living increases.

***Longitudinal survey***

A longitudinal survey captures changes in household and family composition over an extended period. The SPD provides data for the following types of analysis:

- What factors affect change in household and family structure and living arrangements?
- What are the interactions between changes in the structure of households and families and the distribution of income?
- What effects do changes in household composition have on economic status and program eligibility?
- What are the primary determinants of turnover in programs such as food stamps and public assistance?

***Looking For Work***

The person must have been conducting an active search for a job to be considered “looking for work”. An active search may include registering at employment offices, meeting prospective employers, placing or answering advertisements, and/or writing letters of application.

***Low Income Home Energy Assistance Program (LIHEAP)***

The Low-Income Home Energy Assistance Program (LIHEAP) provides financial assistance to eligible households to help them pay their home energy costs. Each state has great flexibility in deciding how to distribute the money to poor households. The federal government provides the funds for this program to the states and have made over \$1 billion available for the last several winters. In addition to federal funds, some states provided their own money for energy assistance.

### ***Lump Sum Payments***

Lump sum payments include lottery/bingo winnings, cash awards, bonuses and inheritances. Lump sum payments received from an estate or trust should be listed as a lump sum payment, not under "estates and trusts." Lump sums can also be received from a retirement plan and be invested in other assets.

### ***Marital Status***

This question is asked for people 15 years of age or older. The question includes the following codes/categories:

- 1) Married spouse present: both spouses live in the sample unit; includes people who state they have a common-law marriage; excludes "separated" people as defined below.
- 2) Married spouse absent: only one spouse currently resides in the sample unit; includes people who state they have a common-law marriage, but where one spouse is currently living elsewhere; excludes "separated" people as defined below. In this category spouse is not listed in the household membership.
- 3) Widowed: a person who has lost their spouse by death and has not remarried.
- 4) Divorced: a person whose marriage is legally terminated.
- 5) Separated: includes married people who have a legal separation or who have parted because of marital discord, but have not yet obtained a divorce. Those who have parted temporarily for other reasons (such as employment or Armed Forces) are classified as married-spouse absent).
- 6) Never married: includes people whose only marriage has been annulled or people living together who make no mention of a common-law marriage.

### ***Medicaid***

Medicaid is a jointly funded federal and state health insurance program for needy or low-income individuals and families. It also includes coverage for the aged, blind, and permanently or totally disabled individuals whose incomes and resources are insufficient to cover the cost of needed medical services. This program is administered at the state-level and may be known by different names in different states.

### ***Medicare***

Medicare is the federal program that helps pay health care costs for people 65 and older and for people under 65 with certain types of

long-term disability and people with End-Stage Renal Disease . Most social security recipients are covered by medicare. Medicare consists of two parts:

**Part A** is called the Hospital Insurance Program. It helps pay for inpatient hospital care and is available to anyone age 65 and older, for people under 65 with certain types of long-term disability or with End-Stage Renal Disease. People who are eligible for either social security or railroad retirement benefits are not required to pay a monthly premium. However, anyone who is age 65 or older and does not qualify for social security or railroad retirement benefits may pay premiums directly to social security to obtain coverage for Part A.

**Part B** is called the Supplementary Medical Insurance Program. It is a voluntary plan, which builds upon the hospital insurance protection provided by the basic plan. It provides insurance protection covering physicians and surgeons services and a variety of medical and other health services received either in hospitals or on an ambulatory basis. It is financed through monthly premium payments by those enrolled and subsidized by federal general revenue funds.

***Members of the Armed Forces***

Members of the Armed Forces (either men or women) are considered as household members if they are stationed in the locality and usually sleep in the sample unit.

***Merger***

A merger is when a sample household containing original sample persons combines with another household containing original sample persons.

***Military Disability Retirement Pay***

Military disability retirement pay is received by former members of the U.S. Armed Forces, including active duty, national guard, or reserve forces, for service related disabilities. While there are no length of service or age requirements, servicemen must have a U.S. Department of Defense (DOD) disability rating of 30 percent or greater at the time of retirement to be eligible. (This rating may differ from the VA disability rating.) Payments are based on active duty basic pay and the DOD disability rating. Former servicemen are also eligible to receive VA disability pensions

***Military Households***

A military household is a household in which all adults are in the military or armed forces. Unlike SIPP, the military households are excluded from the SPD 1999 cross-sectional weighting process,

namely, assign their 1999 cross-sectional final weights of zero.

Note that a military household was determined in Wave 1 of the SIPP Panels 1992 and 1993 and was not updated in later waves. Thus, if a sample person belonged to a military household in Wave 1 of the SIPP Panels 1992 and 1993, he/she is assumed to remain in the military household throughout the SIPP Panels 1992 and 1993 and SPD surveys in the weighting process.

***Mobile Homes***

A mobile home is a type of living quarters, originally constructed to be towed on its own chassis. It may also have permanent rooms or other structural modifications.

***Mobile Home Parks***

A mobile home park can consist of five or more mobile home sites under a single ownership or management; or a group of mobile homes parked on a common property that is operated under a single management or a homeowners' association.

A group of mobile homes or sites, regardless of the number, is not a mobile home park if the group does not have a single management or association, and the group does not have common properties or facilities.

***Mobile Homes for Migratory Workers***

A group of mobile homes with living quarters for five or more migratory workers is considered a migratory workers' camp.

***Money Market Deposit Accounts***

Money market deposit accounts pay a higher rate of interest than regular or passbook savings accounts. These accounts are only available at banks, savings and loans, and credit unions. The actual rate of interest is variable and is determined by the bank, savings and loans, or credit union. There is no fixed term of investment; money can be withdrawn at any time without penalty. The accounts are federally insured.

***Money Market Funds***

Money market funds are organized to invest in various types of short-term securities. There is no fixed rate of interest and money can be invested or withdrawn at any time. These funds are not the same as money market deposit accounts at a bank, savings and loan, or credit union.

Major money market funds are listed periodically in the financial section of major newspapers. Some of these funds are sponsored by brokerage or investment firms. The interest paid on these accounts may sometimes be called "dividends"; this should be considered as

interest income.

***Money Received From Relatives or Friends***

Cash assistance given by relatives (by blood or marriage) or by personal acquaintances. These people do not live in the same household as the respondent. This does not include money received as a gift, such as for birthdays or weddings.

***Mortgage***

A mortgage is any type of loan secured by real estate. Trust deeds, mortgages, mortgage bonds, and vendors' liens are terms used in some parts of the country for type of debts that are considered mortgages or deeds of trust. There may be a security agreement or installment loan in which the lender, usually a bank, holds the title to the unit until the loan is paid. A purchaser who is buying a property with a contract to purchase may not consider himself/herself the owner, because the seller has title to the property; however, for the purpose of this survey, he/she is considered the owner.

If the house has been paid for and then used as security for a new loan, the new loan is considered a mortgage. Home equity loans are considered mortgages if the property was used as security for the loan.

***Mover***

All original sample people who move during the life of the panel. The SPD follows all original sample people if they move from the original housing unit (with certain exceptions). The SPD also collects data on all other people, including children under 15, who live with or move into households with any of the original sample people. These individuals, however, are not followed when they no longer live with an original sample person.

***Municipal or Corporate Bonds***

This includes marketable securities other than stocks, such as bills, certificates, notes, bonds, or debentures, issued by state or local governments or domestic corporations.

***Mutual Fund Shares***

A mutual fund is a company that pools the money of many investors (its shareholders) to invest in a variety of asset types, including stocks, bonds, real estate, and gold. Such assets are professionally managed on behalf of the shareholders, and each investor holds a pro rata share of the overall fund portfolio, entitling them to any profits obtained from assets sales, but also subjecting them to any losses in value.

***National Guard or Reserve Forces Retirement Pay***

National Guard or Reserve Forces retirement pay is received by former members of these military organizations. In general, 20 years of qualifying service is required to be eligible, although pensions may be received by a former employee who retired early because of disability. Payments are not made until the former members reach 60 years of age. This does not include payments from other U.S. military retirement pensions or payments from the U.S. Department of Veterans Affairs.

***National Guard or Reserve Pay***

Any pay received while on active or temporary duty as a member of the National Guard or the Guard Reserve of any branch of the Armed Forces.

***National School Lunch or Breakfast Program***

The National School Lunch Program is sponsored by the U.S. Department of Agriculture and Food and Consumer Service, which subsidizes the cost of all school lunches in the country. In addition to these standard subsidies, students whose household income falls below a certain level are eligible to receive their lunches free or at a reduced price. In order to qualify, the household must apply to the local school district. The district determines who qualifies for this additional aid.

***Noninterview Household or Person***

A sample household for which information is not obtained because:

- a sample household is located, but an interview was not obtained - Type A;
- a sample household moves and is not located - Type D;
- a sample household in which all original sample persons are institutionalized - Type B; or
- a sample household in which all household members are deceased, moved out of the country, armed forces members or occupied by people not eligible for interview - Type C.

***No Usual Place of Residence Elsewhere***

People with no usual place of residence elsewhere are considered as sample household members. They include recent migrants, people trying to find permanent living quarters, and people staying temporarily in the unit who have no other home of their own. Entire households with no usual place of residence elsewhere include people who have rented or lent their usual living quarters to others and are traveling or are temporarily staying in another unit. Often such people offer their usual living quarters for rent or sale, sometimes as furnished units, during their absence.

***Origin, Ethnicity, or  
Descent***

National or cultural group from which a person is descended. It is determined by the nationality or lineage of a person's ancestors. There is no set rule as to how many generations are to be taken into account in determining origin. A respondent may report origin based on the origin of a parent, grandparent, or some ancient ancestor. Ethnic origin or descent is not necessarily related to race. That is, origin or descent and race may be considered as two independent characteristics of a person. Respondents are asked to report their origin based on the following listing:

**European Origin**

Canadian  
Dutch  
English  
French  
French-Canadian  
German  
Hungarian  
Irish  
Italian  
Polish  
Russian  
Scandinavian  
Scotch/Irish  
Scottish  
Slovak  
Welsh  
Other European

**Hispanic Origin**

Mexican  
Mexican-American  
Chicano  
Puerto Rican  
Cuban  
Central American  
South American  
Dominican Republic  
Other Hispanic

**Other Origins**

African-American  
or Afro-American  
American Indian,  
Eskimo or Aleut  
Arab  
Asian  
Pacific Islander  
West Indian

Another group not listed

If they cannot select from the list, the field representative (FR) uses the following guidelines to determine and record origin and descent.

- 1) The response is not listed, the FR assigns the code for "Another group not listed", unless the response can be considered as one of Spanish origin.

Examples of responses classified as "Other Spanish" are listed below:

Balearic Islands	Iberian
Basque	Majorcan
California	Spanish
Canary Islands	Spaniard
Catalonian	Spanish-American
Hispanic	Spanish-speaking

Central or South American Spanish countries are as follows:

Argentina	Guatemala
Bolivia	Nicaragua
Chile	Panama
Honduras	Paraguay
Columbia	Peru
Costa Rica	Uruguay
Ecuador	Venezuela
El Salvador	

A response such as "LaRaza" is classified as "Mexican" and "Boricura" is classified as "Puerto Rican."

- 2) If the respondent reports more than one origin and no parts are Spanish, the code for "Another group not listed" is assigned. We do not consider responses such as German-American or Italian-American as multiple origins. For cases such as these, their origin is considered as German or Italian.
- 3) If the respondent reports more than one origin and the respondent cannot give a single origin, the field representative asks for the origin of their mother and proceeds as follows:
  - If the person's mother is Spanish, the appropriate Spanish code is entered as the origin of that person.
  - If the origin of the person's mother is not Spanish, the mother's origin is entered as the origin of that person.
- 4) If the respondent is unable to report a single origin for the mother or the origin of the mother is unknown, the first origin originally mentioned for the person is entered.
- 5) Some respondents may not identify with the foreign birthplace of their ancestors or with their nationality group and may report the category "American." Those individuals are categorized as

"Another group not listed."

- 6) A code D, "Don't Know" is used only if the respondent absolutely does not know his/her own or another person's origin or cannot understand the concept of origin or ancestry.
- 7) A code R, " Refusal" is used if the respondent refuses to answer the origin question.

***Original Sample  
(100 Level) Persons***

The original sample persons of the combined SIPP Panels 1992 and 1993 or the SPD Bridge (1997) panel or the SPD 1998 panel or the SPD 1999 panel comprise the sample persons (including children) of those that belong to the SPD longitudinal sample. Namely, an original sample person was a resident of an interviewed sample household or group quarter at the time of the Wave 1 interview of the SIPP Panel 1992 or 1993. The person number of an original sample person is in the range of 100-199. Therefore, an original sample person will be occasionally referred to as "a 100 level person."

***Other/Miscellaneous  
Cash Income Not  
Included Elsewhere***

This includes any cash income that does not fall into any specific category. This income type is intended only as a catch-all for any income that does not qualify for any other income types.

***Other Educational  
Assistance***

Includes any educational benefits that do not fit into one of the following categories.

**Federal PELL Grant** (see Federal Education Assistance)

**Department of Veterans Affairs (VA) assistance** (see Veterans' Educational Assistance)

**College (or Federal) Work Study** (see College/School Educational Assistance)

**Other Federal grant** (see Federal Education Assistance)

**State Grants and Scholarships** – Many state governments operate grant and scholarship programs. These vary in nature by state. Many are concentrated on state-run colleges and universities; others may allow attendance at private universities at rates comparable to public university tuition. Examples include Douglas Scholarships and State Student Incentive Grant Program (SSIGP). Loan programs should be counted as loans, not scholarships. NOTE:

The SSIGP is now called the Leveraging Educational Assistance Program (LEAP).

**Grant, scholarship, or tuition remission** – includes any educational benefits (fellowships, grants, subsidies, scholarships, or stipends) provided to an individual by the school, the state, or a private organization for which no service or work was required (also see College/School Educational Assistance).

**Teaching or research assistantship from the school attended** (see College/School Educational Assistance)

**Employer assistance** – When a person holds a job during the school year (excluding work-study jobs) or prior to attending school, and the employer is paying any of the person’s educational expenses.

**Loan that has to be repaid** (see Federal Educational Assistance)

**Assistance from a welfare or social service office**

Other educational assistance does NOT include help from any family members, including trusts and estates.

***Other Financial Investments***

Other financial investments include investments in a non-corporate business venture managed by others, investments in a corporation, and other investments not reported elsewhere (for example, part-ownership of a race horse).

***Other Interest-Earning Assets***

This includes all other investments from which the person receives interest income.

***Other Payments for Retirement, Disability or Survivor***

This category is used if the person received a retirement pension of a type other than those described in the instrument. Also included in this category is any other income received because of a disability and not marked elsewhere in the instrument.

***Other Unemployment Compensation***

This category includes:

- Trade Adjustment Act allowance programs, which provide financial assistance to people who lost jobs because of importation of competitive durable goods.

- Federally financed programs (administered by the states) for certain groups of people, including federal employees, former Armed Forces members, and people who lost jobs due to natural disaster.

***Other Welfare***

Cash public assistance that cannot be included under one of the other answer categories listed. This category excludes food, food stamps, clothing, or other nonmonetary receipts.

Note: Since welfare programs such as AFDC and ADC no longer exist each state has its own welfare program. Some states use the generic name, Temporary Assistance to Needy Families (TANF). However, most states have a unique name.

***Panel***

A panel is a full sample of households that are brought online in the same year. The SPD is a longitudinal survey of adults from two different SIPP panels: 1992 and 1993.

***Parent Loan for Undergraduate Students (PLUS) and Supplemental Loan for Students (SLS)***

See Federal Educational Assistance.

***Pass-Through Child Support Payment***

Pass-through or bonus child-support payments are made to the respondent through a public assistance (formerly AFDC/ADC) agency. These types of payments are independent concepts and are not considered to be child support payments in this context.

***Payments From a Sickness, Accidents or Disability Policy***

An individual who is sick or disabled may receive income from private disability insurance, which they purchased. These policies may cover cases where either a short-term or long-term illness has forced an individual to stop working.

***Pell Grant***

See Federal Educational Assistance.

***Pension From Company or Union***

Included here are retirement pensions from a private company, local union, or from a profit-sharing plan received by people who become disabled.

A private retirement pension is received by a retired or disabled person from a former employer or labor union, either directly or through an insurance company. The respondent may identify the pension as an annuity.

Payments are likely to be made monthly by check through the mail. However, there are so many different private pension plans that it is impossible to provide details such as the method of payment or appearance of the checks. Some private pensions have cost-of-living clauses.

***Perkins National  
Direct Students Loans  
(NDSL)***

See Federal Educational Assistance.

***People in Vacation  
Homes, Tourist  
Cabins, and Trailers***

People living in vacation homes, or tourist cabins and trailers are interviewed if they have no usual residence anywhere else.

***Person Final  
Cross-sectional  
Weight***

The person final cross-sectional weight is the weight of a sample person in the SPD 1999 sample obtained from the cross-sectional weighting process. Only the SPD 1999 interviewed (self or proxy or imputed) sample persons have a positive (larger than zero) weight, and all of the SPD 1999 non-interviewed persons have a zero weight. The person final cross-sectional weight can be used for the person-level estimates of characteristics of the SPD 1999 cross-sectional universe.

***Person Number***

The person number represents the wave the person entered the sample. Person numbers such as 0101 and 0102 are assigned in Wave 1 of the SIPP. Person numbers such as 0201 and 0202 are assigned to people added to the roster in Wave 2 of the SIPP. People added to the roster in the 2002 SPD have person numbers beginning with 1601 and 1602 and following sequentially as needed. People added to the roster in the 2001 SPD have person numbers beginning with 1501 and 1502 and following sequentially as needed. People added to the roster in the 2000 SPD have person numbers beginning with 1401 and 1402 and following sequentially as needed. People added to the roster in the 1999 SPD have person numbers beginning with 1301 and 1302 and following sequentially as needed. People added to the roster in the 1998 SPD have person numbers beginning with 1201 and 1202 and following sequentially as needed. People added to the roster in the 1997 SPD Bridge have person numbers beginning with 1101 and 1102 and following sequentially as needed.

***Person With Two  
Concurrent  
Residences***

When a person has two concurrent residences, the residence in which he/she has spent the greater number of nights during the period is considered the person's usual place of residence.

For children under a shared custody arrangement, spending equal amounts of time with each parent:

- The child is listed as a household member only if living at the unit at the time of the first interview. In later interviews the child is not considered a mover while living at the other parent's address, unless the move is permanent.
- If the child is NOT living at the sample unit at the time of the first visit, they are not included as a household member. In later interview periods, if the child is living at the sample unit, they are not included as a household member, unless the child has moved in permanently.

***Preschool***

Preschool is defined as a center providing a *structured program of educational or school-readiness* activities for a number of children under the age of 6. It is organized to provide educational experiences for children during the years preceding kindergarten. These programs are called various things in addition to “preschool,” such as pre-kindergarten, nursery school, or Head Start. Day care is a child care arrangement with the purpose of providing adult supervision and custodial care for children. Many day care programs include school readiness activities such as learning the letters of the alphabet, numbers and colors. If a day care arrangement includes a significant educational component, it is considered to be a preschool.

***Primary Family***

A primary family is the family containing the household reference person and those related to them. An unrelated subfamily is a family that does not contain the reference person nor anyone related to the reference person.

***Primary Sampling Unit (PSU)***

Divisions of the country, usually along county boundaries (along Minor Civil Divisions in New England). Primary Sampling Units are assigned a 5-digit code.

***Principal***

Principal is the amount of the mortgage(s) or home equity that is still owed, excluding any interest owed.

***Private School***

A private school is controlled or supported *primarily* by a church or religious organization or by private people or organizations.

***Program Participation***

The SPD provides information on how people participate in government programs designed to transfer portions of the national

product to individuals needing assistance. These programs include Social Security, unemployment insurance, and public assistance (formerly AFDC/ADC).

Another set of programs aims mostly at eliminating poverty and its surrounding conditions. These originated during the 1960s and 1970s and included the expansion of public assistance, food stamps, subsidized school lunches, medicaid, medicare, and housing subsidies.

Private transfer programs also have a long history. Aside from company pension plans, families share resources to help support elderly and child members as well as others who are unable to work. Private charities also provide cash and noncash assistance, though on a much smaller scale than the federal government.

***Property***

Property includes the following: the entire structure (or other type of living quarters) such as a mobile home or trailer, which contains the sample unit, the land on which it stands, and any additional structures (or other types of living quarters) on the same plot of land owned by the person who owns the structure containing the sample unit.

For cooperative and condominium units, property includes only the structure (or other type of living quarters) in which the sample unit is located and the ground on which it stands.

***Public Assistance or Welfare***

Since passage of the 1996 Personal Responsibility and Work Opportunity Reconciliation Act, programs such as AFDC and ADC no longer exist. Each state has its own welfare program. Some states use the generic name for the new type of aid -- Temporary Assistance to Needy Families (TANF). Most states have a unique name for the program, which makes it difficult to identify in a national survey. In some states, public assistance is provided at the county level and each county may have their own name for the program.

Many of these programs are variations of the old AFDC/ADC program. AFDC/ADC was a means-tested program that was state or locally administered. Eligibility for AFDC (or ADC) was based upon:

- (1) income
- (2) the incapacity or death of a parent

- (3) a parent's continued absence from the home; or
- (4) the unemployment of a parent

NOTE: Reciprocity questions for bonus or pass-through child support payments are asked only if respondents receive AFDC payments.

People applying for Public Assistance (AFDC) are required to cooperate with the public agency in securing the child support award and its collection. The agency became the collector and disbursing agent of the child support which, when received through the agency, was called a *pass-through or bonus payment*. The first designated dollar amount (the amount differs by state) per month of child support collected from the non-custodial parent is "passed through" to the AFDC recipient; the balance is retained by the agency. Information on the amounts of AFDC, pass-through payments and child support collected by the agency are obtained individually in the CAI instrument.

Because of different state accounting practices, the amount of pass-through payments reported in a given month may exceed \$50. The amount collected by the agency should never be less than the amount received by the respondent.

***Public Housing***

Public housing implies public ownership and means that the owner is a local or state government agency. A public housing project may also be known as a housing and redevelopment authority or a housing development agency. These organizations may receive subsidies from the federal or state government, but the local agency owns the property.

***Public School***

A public school is controlled or supported *primarily* by a local, state, or federal government agency.

***Race***

The concept of race as used by the Census Bureau does not reflect clear-cut definitions of biological stock or conform to any scientific definition. Rather, it reflects self-identification by respondents. Therefore, individuals are asked to report the race with which they most closely identify.

Race is provided for four major race groups: 1) White, 2) Black, 3) American Indian, Eskimo, and Aleut, and 4) Asian and Pacific Islander.

If the respondent replies with a response such as Japanese, Chinese, Filipino, Korean, Asian Indian, Vietnamese, Hawaiian, Guamanian, Samoan, or other Asian, the field representative enters code 4 for the appropriate person. The respondent may give two or more races, such as White and American Indian, White and Black, Chinese and Hawaiian, and so forth. In instances such as these, the field representative asks the respondent to select the one single race category that they most closely identify with; if the respondent cannot do this, they use the race of the person's mother.

### ***Railroad Retirement Benefits***

Railroad retirement benefits are based on a person's long-term employment (10 years or more) in the railroad industry. They do not include payment from pensions established by railroad companies or unions to supplement Federal Railroad Retirements. Railroad Retirement checks are U.S. Treasury checks and may bear the letters "RR" in combination with other letters beneath the payment amount.

Railroad Retirement disability payments are received by severely disabled workers who worked long enough in "covered employment" before their disability to be entitled to payments. The worker's disability must have lasted for at least 6 months and be expected to last for at least an additional year for him/her to qualify for benefits. In addition, the worker's physical or mental condition must prevent him/her from earning substantial income from working. Payments are drawn from the U.S. Treasury.

### ***Recoding of Variables***

The following information is recoded (categories collapsed) to protect against the possibility that a user might recognize the identity of a respondent on the public use microdata files:

1. Employment:
  - number of employees at all locations.
  - self-employment industry code, and
  - occupational categories.
2. Geography:
  - states with small population are collapsed together.
3. Age:
  - age is topcoded at 89

4. Family Income
5. Household Income

***Reference Period  
for the Interview***

At each interview, respondents are asked to provide information covering different reference periods. For the SPD, the reference period is last calendar year, unless otherwise noted.

***Regular or Passbook  
Savings Account in a  
Bank, Savings and  
Loan or Credit Union***

This category includes "passbook" or "statement" savings accounts, which pay interest at market value subject to a ceiling. Checks cannot be written against the savings account. Money can usually be drawn at anytime without penalty. These accounts are only available at banks, savings and loans, and credit unions. At credit unions, interest paid on balances may sometimes be called "dividends." These earnings are treated as interest income in the Amounts sections of the instrument.

***Regular School***

Regular schools are part of a recognized regular school system--whether public or private (including parochial). They include kindergarten, elementary school, junior or senior high school, colleges, universities, or professional school (for example, medical, law, dentistry, veterinary). Regular school advances a person toward an elementary school certificate, high school diploma, or a college, university, or professional school degree. Schools for the mentally retarded or physically disabled are regular school if they meet the above criteria. A school does not have to have class levels or be graded to be a regular school. Attendance may be day or night, full-time or part-time.

Training can be differentiated from regular school by the nature of the credential awarded. Any award or certificate for completion of a training program is purely incidental to the purpose of training for employment. Only in rare instances would training count towards a broadly-recognized degree. If a training program does count for credit in regular school, few of those taking the program would be expected to use it in pursuit of a regular school degree.

***Related Subfamily***

A married couple and dependents related to the reference person, but not including him/her, such as the householder's daughter and son-in-law, or a single parent-child group where the child is under 18 and the group is related to the householder.

***Rental Property***

Income from residential, commercial, industrial and/or land rental property as well as equipment that is rented out, such as tractors,

computers. There are three types of rental properties:

- 1) Residential property: Houses, apartments, or condominiums other than the person's own house, owned individually or jointly with someone else
- 2) Commercial/industrial property: A store, factory or warehouse other than the person's own business is owned individually or jointly with someone else, and
- 3) Land rental property: Land that is rented out to others for the farming or ranching

***Retainer Pay***

A military pension in which the recipient is subject to active duty recall under the Uniform Code of Military Justice. Payments begin upon the receipt of orders transferring the military member of retired/retainer status and continue until his/her death. If the recipient is recalled to active duty, the retainer pay is terminated and he/she instead receives the appropriate active duty pay.

***Retirement Income***

Includes U.S. government railroad retirement, pension from company or union, Federal Civil Service or other federal civilian employee pension, U.S. military retirement pay, retainer pay, National Guard or Reserve Forces retirement, state government pension, local government pension, and other types of pension other than Social Security.

***Royalties***

Include income from oil, gas and other mineral rights, income from patents, copyrights on literary works, trademarks and formulas. Royalties can be earned primarily from a person's major occupational activity. For example, a professional self-employed writer may receive royalties as his/her primary income. In these cases, royalties are considered as self-employment income and reported in the Earnings and Employment section of the instrument.

***Sample***

The housing units selected for interviewing. The SPD sample respondents were originally selected from 2 retired SIPP panels (1992 and 1993).

***Sample Cut Factor***

A sample cut factor is the sub-sampling rate for a cohort or group of households in a SPD sample associated with a sample cut or a partial bringing back of the SIPP 1992/1993 or SPD Bridge (1997) non-interviewed household into a SPD sample due to budget constraint or limitation. In the entire SPD, there are the SPD 1998

sample cut, the SPD 2000 partial bringing back of the SPD Bridge non-interviewed households, the SPD 2001 partial bringing back of the SIPP 1992/1993 non-interviewed households, and the SPD 2002 sample cut.

***Sample Unit***

A sample unit is the ADDRESS selected into the sample.

***Sample Unit Identification Number***

Was created by scrambling together the PSU, segment, and serial numbers used for Census Bureau administrative purposes. These identifiers are constructed in the same manner as the 1992 and 1993 SIPP panel files, to enable matching to these files. The sample unit identification number and address ID code uniquely identifies each household in any given wave. The sample unit identification number can link all households in subsequent waves back to the original Wave 1 household.

***Scholarships***

See Other Educational Assistance.

***School Enrollment Level***

The school enrollment codes for adults in the SPD are based on a three part question to people who say they were enrolled in school during the reference period. The codes do not match those asked of children, nor do they match the questions in the SIPP.

The question sequence is as follows:

- Was it a high school, college, vocational school or something else?
- [If in high school] In what grade are you enrolled?
- [If in vocational, technical, business school or college] At what level were you enrolled?

The answer codes start with (1) for each question.

There is a single school enrollment question for children 17 and under in the SPD:

- In what grade was ... enrolled?

Answers are (K) for kindergarten, (1) - (12) for first grade through 12th grade, and (P) for postsecondary enrollment.

College enrollment level is determined by completion of course work that counts toward the current degree goal. If the school has a set number of credits for counting a person such as a freshman or

sophomore that classification scheme should be used. Otherwise, if a person has completed the course work a full-time student would typically complete in one year, he or she should be counted as a sophomore, and so on for further years. If a person has completed courses at another institution, then only those that count at the current institution should be included. For instance, a person who transferred to a four-year college from a community college after attending for two years might still be considered a sophomore if some of the credits earned at the community college did not transfer.

***Seamen***

Crew members of a vessel. They are considered to be household members at their homes rather than on the vessel, regardless of the length of their trips and regardless of whether they are at home or on the vessel at the time of the interview (assuming they have a usual place of residence).

***Section 8 Rental Assistance Program***

Rental assistance payments are made to the private owners of newly constructed or existing housing units on behalf of low-income tenants who applied to the local housing authority. The local government program for assistance to tenants pays 30 percent of household income for rent, with the federal assistance payment making up the difference between the tenant's payment and a fair market rental, based on the rents for equivalent units in the area.

***Section 236 Housing***

The Federal Housing Administration (FHA) finances the construction or rehabilitation of rental or cooperative detached, semi-detached, row, walkup, or elevator type structures primarily for lower-income families or individuals 62 years or older or handicapped, with priority in occupancy going to those displaced by urban renewal or other governmental actions; up to 10 percent of the units may be occupied by lower-income individuals under age 62 who are not handicapped.

Assistance for mortgages insured under Section 236 is provided in the form of periodic interest-reduction payments to the mortgagee on behalf of the mortgagor, which serve to reduce interest costs on a market-rate project mortgage.

These payments enable rentals to be reduced to a basic rental charge, determined for each unit on the basis of operating the project with such payments. A tenant or cooperative member pays either the basic charge or a greater amount, which represents 35 percent of his/her income, but does not exceed the fair market

rental charge. This is determined on the basis of operating the project without any interest-reduction payments.

***Segment Number***

All surveys use a four-digit segment number. Each segment number is unique within the survey and field PSU.

***Self-Employed***

Someone working for profit at his/her OWN business, shop, office, or farm. The business may be incorporated or unincorporated.

***Separate Living Quarters***

A separate living quarters is one in which the quarter's occupants:

- Live and eat separately from all other people on the property
- Have direct access to their living quarters from the outside or through a common hall or lobby (for example, apartment buildings)

***Serial Number***

The first time an address is in a current sample a two-digit serial number is assigned on the first cluster of lines designated for that sample. After the address has been listed, a serial number is assigned to units in the current sample only which have a unit that has been listed. Serial numbers are assigned consecutively within segment, within sample.

***Sex***

The appropriate responses are "male" or "female" for each person in the household. The answer to the question is usually determined from the name and relationship questions. However, if there is any doubt, then the question is asked as worded.

***SIPP Panel Number***

The SIPP panel number identifies the panel in which the respondent participated. The sample person should either have an entry of 1992 or 1993 for their panel number.

***Social Security Benefits***

Social Security payments are received by people who have worked long enough in "covered" employment (that is, employment in which Social Security deductions were made from a person's salary). Social Security payments may also be made to the spouse or dependent children of covered workers.

The Social Security Administration also pays benefits to student dependents (under age 19) of eligible Social Security annuitants who are disabled or deceased. Benefits are paid by the federal government directly to the student.

Social Security checks are U.S. Treasury checks, which bear the letters "SOC SEC" beneath the payment amount.

***Social Security  
Number and Railroad  
Retirement Number***

Social Security or Federal Railroad Retirement number is asked the first time an individual is interviewed. It is also collected on sequential interviews if it is not obtained during a previous interview.

***Spawning***

The process of creating a new household on the laptop computer, because an original sample person moved is called "spawning". Spawning allows additional cases for the newly formed mover household to be created.

***SPD 1999  
Interviewed Persons***

The SPD 1999 interviewed persons consist of the original and non-original sample persons who were a self or proxy or imputed respondent in the SPD 1999 data collection.

***SPD 1999 Cross-  
sectional Sample***

The SPD 1999 cross-sectional sample (a.k.a. the SPD 1999 sample) consists of the sample persons (including children) who are a resident of a sample household or group quarter with at least one adult (aged 15 or older) resident being an original sample person of the SIPP panel 1992 or 1993. An original sample person of the SIPP panel 1992 or 1993 is a sample person who resided in an interviewed sample household or group quarter at the time of Wave 1 interview of the SIPP Panel 1992 or 1993.

***SPD 1999 Cross-  
sectional Universe***

The SPD 1999 cross-sectional universe consists of persons (including children) resident in the United States civilian households and persons living in group quarters in March 1999. Persons living in military barracks and institutions, such as prisons and nursing homes, are excluded. Namely, the 1999 cross-sectional (snapshot) effect of the Welfare Reform can be assessed based on this group of persons, and March 1999 will be referred to as the control date (reference point in time) of the SPD 1999 cross-sectional universe.

***SPD Panel Universe***

SPD panel universe consists of persons (including children) resident in the United States civilian and military households and persons living in group quarters in March 1993. (Note that persons living in military barracks and institutions, such as prisons and nursing homes, are excluded.) Namely, the effect of the Welfare Reform will be assessed based on this group of persons, and March 1993 will be referred to as the control date (reference point in time) of the SPD panel universe.

***Stafford Loan or  
Guaranteed Student  
Loan (GSL)***

See Federal Educational Assistance.

***State Children's  
Health Insurance  
Program (SCHIP)***

Program administered at the state-level to provide health-care coverage to low-income children (18 and under) whose parents do not qualify for medicaid. SCHIP may be known by different names in different states.

***State Government  
Retirement Pension***

State government retirement pensions include payments by state government agencies, such as colleges, universities or state hospitals, to their retired former employees, including employees who retired early because of disability.

***State Supplemental  
Security Income  
(State Administered  
SSI Only)***

The SSI program is administered by the Social Security Administration. Each state may add to the federal payment from its own funds. This additional money may be included in the federal payment or it may be received as a separate check. If it is combined with the federal payment, the words "STATE PAYMENT INCLUDED" will appear on the federal check. Some states make SSI payments to individuals who do not receive a federal payment.

Respondents may have difficulty distinguishing between federal and state or local SSI payments. If the check is a U.S. Treasury check, one may assume it is a federal check. The phrase "Supplemental Security Income Payment" is printed on the federal check. Checks received directly from the state or local welfare office will vary in color and wording from state to state, or even county to county.

***State Temporary  
Sickness or Disability  
Benefits***

This is available in several states, and it provides benefits to people with nonwork-connected temporary sickness or disability.

***State Unemployment  
Compensation***

Money received from state government unemployment insurance funds to help replace wages lost during times of layoff or unemployment.

***Stocks***

This includes both common and preferred stock in private corporations, generally purchased through a broker. Shares of stock in any "closely-held" corporations are not included.

### ***Structure***

A structure is a separate building that either:

- Has open space on all sides (no other building attached to it), or
- Is separated from other structures by dividing walls that extend from ground to roof

Residential buildings are considered to be separate structures if the common wall between them goes from ground to roof; for example, double houses, duplex houses, row houses, and houses attached to nonresidential structures.

Note: Sheds and private garages attached to houses are not considered separate structures because they are not intended for occupancy as separate living quarters.

### ***Students (Not Student Nurses)***

Unmarried students living away from home while attending school, college, trade or commercial school in another locality, are members of the household back at their home and should not be interviewed in the locality where they are attending school. Conversely, if the student reports having left home permanently, consider the student to be a household member at the school address. A married student who is living with a spouse and family is interviewed in the locality where he/she is attending school. Such people do not consider their parent's home their usual place of residence after they are married.

Unmarried students who are working away from their parent's home during summer school vacation are considered as household members of the sample unit if the living quarters are being held in the sample unit for them.

Students who attend school outside of the United States at the time of interview are not considered household members. However, if the student is in the household at the time of interview (for example, home on summer vacation) and has no other place of residence in the United States, they are counted as a household member.

### ***Student Nurses***

Student nurses are not students in the usual sense because they generally live year round at their place of training and the rules applicable to other students do not apply. Student nurses are considered residents of the hospital, nurse's home, or other place in which they live while receiving training, even though they may

have a home elsewhere and visit it occasionally. Similarly, if the student nurse is living in a nurse's home, he/she would be interviewed as a resident there. If the student nurse is living at home while in training he/she is interviewed at home.

***Supplemental  
Educational  
Opportunity Grants  
(SEOG's)***

See Federal Educational Assistance.

***Supplemental Security  
Income (SSI)***

A federally administered program that pays monthly benefits to aged, disabled, and blind people who have limited income and assets. SSI payments can also be paid to disabled and/or blind people regardless of age. Further, a person may be eligible for SSI payments even if they have never worked.

Even though the Social Security Administration administers the basic SSI program, income from SSI is NOT the same as Social Security. The money for these programs comes from two distinct sources, and if eligible, people can get SSI in addition to Social Security. People in this program will receive a U.S. Treasury Check, or direct deposit.

***Supplemental  
Unemployment  
Benefits (SUB)***

Money received from a fund set up by private employers and negotiated by labor unions (mainly auto and steel worker unions). These benefits are paid in addition to state unemployment. SUB's are taxable, and people receiving them will receive a separate W-2 form showing the amount of SUB's paid to them.

***Survey Purpose***

The purposes of the survey:

- Assess the effects of welfare reform on the well being of individuals, families, and their children.
- Measure changes in program eligibility and participation, employment, income, in-kind benefits, services received from programs, and the impact of welfare reform on families and children, and
- Contribute to the development of measures of the economic and social well-being of the nation.

*Survivor Benefits*

These include any pensions or annuities that the respondent received as a widow(er) other than Social Security, IRAs, and Keogh accounts during the reference period.

*Tips*

Payments received, as supplements to wages, for services rendered to the customer. For some occupations such as waiters and waitresses, bellhops, barbers and taxicab drivers tips may constitute a large part of the person's income.

*Topcoding of Variables*

To protect against the possibility that a user might recognize the identity of an SPD respondent on the public use microdata files with very high income, income from every source is topcoded so that no individual income amounts above \$100,000 are revealed. This top-code amount is consistent with the topcoding for the 1992 and 1993 SIPP panels. Other economic variables are topcoded at the 97 percentile level. All variables that are topcoded have a "T" designation in the character which is the second from the right of the variable name.

*Topical Module*

Some topics are not asked every year for the SPD. The listing below shows when the topical modules are included in the instrument:

- 1998-Adolescent SAQ
- 1999-Extended Child Well-Being
- 2000-Children's Residential History
- 2001-Adolescent SAQ
- 2002-Extended Child Well-Being

*Tricare*

A health care program for members of the uniformed services and their families, and survivors and retired members and their families. It offers three choices to eligible beneficiaries:

- **Tricare Standard** - a fee-for-service option that is also known as CHAMPUS.
- **Tricare Extra** - similar to Tricare Standard, but offers discounts to patients when they use Tricare network providers (in other words, a PPO provider.)
- **Tricare Prime** - the primary health care option offered by military hospitals and clinics, supported by contracted civilian health care companies (Generally civilian HMOs). For this option, an enrollment process is necessary. Enrollees choose a primary care manager (PCM) to provide or arrange for their health care needs. Prime offers wellness

and preventive care services, but enrollees must get their care through Prime only. Active duty members are automatically enrolled in Prime. Beneficiaries choose to enroll in Prime.

<b><i>Type A Noninterview</i></b>	Households occupied by people eligible for interview, but an interview is not obtained.
<b><i>Type B Noninterview</i></b>	Type B noninterviews for the SPD are households or people who are temporarily ineligible for interview (for example, institutionalized people). We continue to follow up on Type B noninterviews.
<b><i>Type C Noninterview</i></b>	Units or people that are permanently ineligible for interview. These are households or people who can no longer participate in sample because they are deceased, moved out of the country or the entire household is in the military or the household dropped because of sample adjustments.
<b><i>Type D Noninterview</i></b>	Households or people who have moved to an unknown address or who have moved more than 100 miles from the nearest SPD PSU and a telephone interview could not be conducted.
<b><i>Type Z Noninterview</i></b>	An eligible person in an interviewed household who the field representative could not interview or for whom the field representative could not conduct a proxy interview.
<b><i>Unemployment Compensation</i></b>	Money received from state government unemployment insurance funds to help replace wages lost during times of layoff or unemployment.
<b><i>Unrelated Subfamily</i></b>	An unrelated subfamily is a family that does not contain the reference person or anyone related to the reference person.
<b><i>U.S. Government Railroad Retirement Benefits/Pensions</i></b>	Federal Railroad Retirement Benefits are based on a person's long-term employment (10 years or more) in the railroad industry. Payment from pensions established by railroad companies or unions to supplement Federal Railroad Retirement are not included as railroad retirement.
<b><i>U.S. Government Securities</i></b>	Includes U.S. Treasury bills, Treasury notes and Treasury bonds. It also includes Series H and HH U.S. Savings Bonds, which are bought at full value and interest payments are received semi-annually. Further, it includes credit instruments of agencies

such as the Federal National Mortgage Association (Fannie Mae).

***U. S. Military  
Retirement Disability***

Received by previous members of the Armed Forces who have a disability of at least 30 percent (under a standard schedule of rating disability by the VA) and either:

- the member has 8 years of service
- the disability results from active duty, or
- the disability occurred in the line of duty during a time of war or national emergency or certain other time periods

***U.S. Military  
Retirement Pay***

Military retirement pay is received by people as former career members of the U.S. Armed Forces. Payments are based on a percentage of the active duty basic pay, which is adjusted by semiannual cost of living changes. Payments from the U.S. Department of Veterans Affairs for disabled or aged veterans are not included. The key to avoiding this mistake is knowing that 20 years of service are generally required to receive retirement pay. Draftees and other former members of the Armed Forces with relatively short periods of service are not eligible for military retirement pay.

Since career military people are eligible for retirement pay after only 20 years of service, it is not uncommon for people receiving military retirement pay to be in their forties and fifties. Furthermore, they may be reemployed full time as civilian employees of the federal, state or local governments, or in the private sector.

***U.S. Savings Bonds  
(E, EE)***

Series E and EE U.S. Savings Bonds are purchased at 50 to 75 percent of the bond's face value, and can be cashed in from 6 months after purchase until the bond's maturity. When the holder cashes in the bond, he/she will receive the amount paid for the bond, plus the interest calculated for the time the bond was held.

***Uses of the SPD Data***

The SPD core data can be used to create statistics to evaluate the survey, profile the participants in various government programs, examine the characteristics of the low income population, and examine how the economy is changing.

These statistics would include average monthly estimates of:

- Median household income.
- Number of workers and their median earnings.

- People with labor force activities.
- People who spent time looking for work or on layoff.
- Participants in government programs, such as:
  - 1) Public assistance payments (formerly known as AFDC).
  - 2) Social Security and SSI.
  - 3) Food stamps.
  - 4) Medicare and medicaid.
  - 5) Public or subsidized housing.
  - 6) Unemployment and workers' compensation.

These statistics (crossed by race, age, and other characteristics) are the basis for reports (or fact sheets) on the economic situation of Americans and their families.

***Usual Place of Residence***

The place where a person usually lives and sleeps. A usual place of residence must be specific living quarters held by the person to which he/she is free to return at any time. Living quarters that a person rents or lends to someone else cannot be considered her/his usual place of residence during the time these quarters are occupied by someone else. Likewise, vacant living quarters that a person offers for rent or sale during his/her absence should not be considered her/his usual place of residence while he/she is away.

A mailing address does not constitute a usual place of residence. Usual residents not only include members of the family, but may also include lodgers, servants, farm hands, and other employees who live in the unit and consider it their usual place of residence. In addition, a usual resident includes a person who lives in the sample unit but is temporarily absent, such as an unmarried child away at school (provided he/she has not left home permanently), a person traveling on business, a railroad worker, bus driver, and someone away visiting, on vacation, or temporarily in general hospitals (non-institutional).

***Veterans Compensation/Pension***

There are two types of veterans disability pensions:

- 1) Compensation payments for service-connected disability:
 

These payments are made to veterans with a disability that was caused or aggravated by military service. Payment amounts are related to the extent of the disability, which may range from 0 to 100 percent. Veterans with ratings of 50 percent or more may receive additional compensation for dependent wives, children under age 18, or under 22 if attending school full time, and

dependent parents; and

- 2) Nonservice-connected disability pensions: The second type are VA pensions made to veterans whose disability is not service-connected, but who served on active duty in wartime and are in financial need. Veterans who are under age 65 must be permanently and totally disabled. Veterans who are 65 and over and not working are also eligible for VA pensions.

Payments vary depending on such factors as income, number of dependents, and need for regular aid and attendance of another person, whether the veteran is permanently housebound, and whether or not time is spent in a VA medical facility. When the pension is originally awarded, and in January during each year that the pension is received, the veteran receives a letter from the U.S. Department of Veterans Affairs indicating the amount of the monthly payment and which people in his immediate family besides himself are covered. In certain instances, the dollar amount for each person is also indicated in the letter.

In either case, payments are made monthly from the U.S. Treasury. Recipients may have their payment deposited directly in their own bank account.

### ***Veterans' Educational Assistance***

Veterans' educational assistance includes the following programs:

#### **Dependents' and Survivors Educational Assistance Program -**

This program serves dependents and survivors of veterans who died from service-connected causes, or whose service-connected disability is rated permanent and total, or who died while a disability so evaluated was in existence. Spouses and children of service personnel who are missing in action or interned by a hostile foreign government for more than 90 days are also eligible under this program. Up to 45 months of full-time training is provided in approved schools and on-the-job training programs.

**G.I. Bill/VEAP Education Benefits -** Also known as the Veterans Educational Assistance Program (VEAP), provides educational or vocational opportunities to veterans whose education may have been impeded by service in the Armed Forces since January 31, 1955. An honorable-discharge veteran with at least 180 days of active service is eligible for up to 45 months of full-time schooling, on-the-job training toward obtaining a regular undergraduate degree or any post-secondary education. These benefit payments are made

directly to the veteran for any post secondary educational, vocational, or professional objective.

**Post-Vietnam Era Veterans Educational Assistance Program -**

Provides educational assistance to those people who entered the U.S. Armed Forces after December 31, 1976. Its goal is to assist young men and women in obtaining an education they might not otherwise be able to afford, and to promote and assist the all-volunteer military program of the United States by attracting qualified people to serve in the Armed Forces. To be eligible for training under this program, the person must:

- have served more than 180 days.
- have been released under conditions other than dishonorable, and
- have participated in a payroll deduction plan whereby the participant sets aside from \$25 to \$100 a month to a maximum of \$2,700, which the government will match on a 2 for 1 basis when the person elects to enter training. Individuals may make a lump sum contribution if they wish.

***Veterans' Financial Aid Programs***

Provides aid to veterans, the dependents and survivors of deceased or disabled military personnel, or military personnel participating in an educational assistance plan sponsored by the federal government. These programs include:

- GI Bill, Montgomery Bill.
- Post-Vietnam Vocational Educational Assistance (or Veterans' Educational Assistance Programs).
- Survivors' and Dependents' Educational Assistance, and
- the Armed Forces Vocational Rehabilitation Program.

***Weighting***

A calculation procedure designed to minimize the biases resulting from differences between the sample units (households and persons) that do respond and those that do not respond. As a result of the weighting, a set of final weights is produced for use in computing estimates of the characteristics of the survey universe (the universe of the population that the survey sample represents). For a panel survey such as SPD, two types of weighting are generally produced, namely, cross-sectional weighting and longitudinal weighting which are defined below.

- **Cross-sectional weighting** - A calculation procedure designed to minimize the biases resulting from differences

between the respondent and nonrespondent sample units (households and persons) at a point in time, for examples, August 1997, Year 1998 etc. By definition, a cross-sectional weighting procedure produces a set of final weights for using in computing estimates of characteristics of the survey universe at a given point in time; for example, an estimate of the total number of low income households in 1997.

A description of the cross-sectional weighting procedure for the calculation of the final weight for the SPD 1999 cross-sectional file is provided on pages 3-3 through 3-8.

- **Longitudinal weighting** - A calculation procedure designed to minimize the biases resulting from differences between the respondent and nonrespondent sample units (persons) at a period spanning between two points in time, for example, a period between 1994 and 1999. By definition, a longitudinal-sectional weighting procedure produces a set of final weights for using in computing estimates of characteristics of the survey universe at a period between two points in time. For example, an estimate of the total number of adults who continuously received any kinds of welfare assistance between 1993 and 1999.

### **WIC**

The Special Supplemental Nutrition Program for Women, Infants and Children (WIC) provides supplemental food either in the form of food or, more commonly, as vouchers valid for specific prescribed food items in stores. These supplemental foods include milk, cheese, eggs, instant formula, cereals, fruit and vegetable juices. Lower-income mothers, infants, and children judged to be at "nutritional risk" are eligible for WIC benefits. These include infants up to age one, children up to five years old, pregnant women, non-nursing mothers up to six months after childbirth, and nursing mothers up to one year after childbirth.

In addition to meeting the nutritional risk criterion, WIC enrollees must have annual family income below state-established limits, and public assistance recipients may be judged to be automatically eligible because of income.

### **Work**

Work includes any activity for wages or salaries, for profit or fees, or for payment in-kind. One hour or more of such activity constitutes work. Work also includes unpaid activity of at least 15

hours a week on a family farm or business.

***Workers'  
Compensation***

Workers' Compensation payments are generally made under state laws set up to compensate workers for loss of pay because of accidents or illnesses caused by or happening on the job. Employees of the federal government, longshoremen, and harbor workers are also covered under special federal programs. Payments may be one-time compensation awards or may be made for longer periods for long-term disability. In cases of permanent and total disability, about three out of four states make payments for life. The great majority of cases involve cash payments in situations where a worker is unable to work for a temporary period after which the employee will be able to return to work. Payment amounts are calculated as a fraction of the workers' usual wage – most commonly about two-thirds. One-third of the states provide additional benefits for dependents.

Administration of workers' compensation payments is not uniform across states or even within each state. Payments may come directly from the employer, from an insurance company retained by the employer or from a state workers' compensation fund.

# HOW TO USE THE DATA DICTIONARY

The Data Dictionary describes the file contents and record layout of the public-use computer tape (or compact disc-readable) file.

The first line of each data item description gives the name of the variable (also referred to as data item, item name, or data field name). The variable name will be no longer than 8 characters. The first 6 characters provide a descriptive name, character 7 (or 2nd from right if the variable name is less than 8 characters) is the variable type code [unedited (U), edited (E), recoded (R), weights (W), imputation flag (I), or topcoded (T)]; and character 8 (or the last character if the variable name is less than 8 characters) will reflect the year in which the question was asked (for example, 1999 = 9).

The variable name uses alphabetic characters, numeric characters, and the special character (\_). No other special characters are used. It may be a mnemonic such as "OUTCOMR9" or "PP\_ID", or a sequential identifier such as "J2WK11U9" or "AFWHN1U9". Variable names are unique throughout the entire file. Following the variable name on the first line is information on the size of the data field, and the begin position of the field. This information can be used with software packages in order to read data values.

Below is an example of a variable in the 1999 Cross-sectional file, and a description of the information that follows the variable name.

```
D V1YEARE9    4    360
T HEL: Year of 1st Vehicle
      What is the model year of this vehicle?
      (Q634) Universe=Households who reported a
      household member owning a car, van, or
      truck (VEHOWNU9 = 1).
V 1983: 1999 . Model year of vehicle
V      9998 . Year unknown
V      9999 . Blank or missing
V      D . Don't know
V      R . Refused
```

D The first line contains the variable name (V1YEARE9), the variable length (4), and its position on the file (360).

T The second line of each data item description begins with the character "T". The "T" flag indicates lines in the data dictionary containing the category code and a short description of the variable.

The next lines contain the long description and where possible, the screen variable name. Usually the long description directly quotes the question from the instrument. For recoded variables a fuller description of the variables is given in this location since there is no question in the instrument. The universe statement for that item (for example, the conditions under which a question should have been asked) is included at the end of the long description.

V Line(s) containing categorical value codes and labels.

# DATA DICTIONARY INDEX

Survey of Program Dynamics

# **SOURCE AND ACCURACY STATEMENT FOR THE SURVEY OF PROGRAM DYNAMICS 1999 CROSS-SECTIONAL FILE**

## **DATA COLLECTION AND ESTIMATION**

### **Source of Data**

The data were collected in the Survey of Program Dynamics (SPD) for a period between 1992 and 2002. The population represented (the population universe) in the SPD is the civilian noninstitutionalized population living in the United States. The institutionalized population, which is excluded from the population universe, is composed primarily of the population in the correctional institutions and nursing homes (91 percent of the 4.1 million institutionalized people in Census 2000). The population includes people living in group quarters, such as dormitories, rooming houses, and religious group dwellings. Crew members of merchant vessels, armed forces personnel living in military barracks, and institutionalized people, such as correctional facility inmates and nursing home residents, were not eligible to be in the survey. Also, United States citizens residing abroad were not eligible to be in the survey. Foreign visitors who work or attend school in this country and their families were eligible, but all other foreign visitors were not eligible to be in the survey. With the exceptions noted above, people who were at least 15 years of age (adults) at the time of the interview were eligible to provide self and/or proxy interviews for the survey; while the data of people who were less than 15 years of age (children) at the time of the interview were collected from proxy interviews provided by the adults.

The goal of the SPD program is to provide policy makers with data to assess the effects of the welfare reforms enacted by the U.S. Congress in 1996 and how these reforms interact with each other, and with employment, income, and family circumstances. The SPD program spans from the pre-reform through the post-reform period, 1992-2002. In order to obtain information about past economic history, employment, income, and program participation prior to the welfare reforms, two retired SIPP panels 1992 and 1993 were chosen as the SPD samples fielded between 1997 and 2002. Each of these SPD samples consisted of sample households selected from SIPP Panels 1992 and 1993 as described later.

The SPD samples were fielded once a year either between the months of April and June or between the months of May and July from 1997 through 2002. The first SPD sample was fielded in 1997 and is referred to as the SPD Bridge. Each SPD sample collected annual socioeconomic and health insurance data from the previous year from the sample households but collected demographic data for the current year similar to the March supplement of the Current Population Survey (CPS). Therefore, the March CPS instrument (questionnaire) was used directly for collecting data from the SPD Bridge sample. For the data collection of later SPD samples (SPD 1998 to SPD 2002), the March CPS instrument was used with necessary modifications, mainly to accommodate additional topics included in the data collection. The combined data from SIPP Panels 1992 and 1993, SPD Bridge sample, and SPD 1998 to 2002 samples should yield the necessary pre- and post-welfare reform information for assessing the effects of welfare

reform on the socioeconomic well-being of the U.S. non-institutionalized population. The full potential of the SPD data is generally achieved when using the SPD cross-sectional and longitudinal files. The current source and accuracy statement is provided for the SPD 2002 cross-sectional file.

### **Background of the SIPP 1992 and 1993 Panels and the SPD Bridge Survey**

The 1992 and 1993 SIPP panel samples were located in 284 Primary Sampling Units (PSUs), each consisting of a county or a group of contiguous counties. Within these PSUs, expected clusters of two or four living quarters were systematically selected from lists of addresses prepared for the 1980 decennial census to form the bulk of the sample. To account for living quarters built within each of the sample areas after the 1980 census, a sample was drawn of permits issued for construction of residential living quarters up until shortly before the beginning of the panel. In jurisdictions that do not issue building permits, small land areas were sampled and the living quarters within were listed by field personnel and then subsampled. In addition, sample living quarters were selected from supplemental frames that included living quarters identified as missed in the 1980 census and group quarters.

At the time of the initial visit of the SIPP panels, the occupants of about 19,600 living quarters were interviewed for the 1992 panel and 19,900 were interviewed for the 1993 panel. This accounts for approximately 72% (1992) and 73% (1993) of the living quarters originally designated for the SIPP samples. Approximately 21% (1992) and 20% (1993) of the designated living quarters were found to be vacant, demolished, converted to nonresidential use, or otherwise ineligible for the survey. The remainder, approximately 2,000 living quarters, were not interviewed because the occupants refused to be interviewed, could not be found at home, were temporarily absent, or otherwise unavailable. Thus, occupants of about 91% of all eligible living quarters participated in the first interview of the 1992 and 1993 SIPP panels.

For the remaining nine interviews, only original sample people (those in Wave 1 sample households and interviewed in Wave 1) and people living with them were eligible to be interviewed. With certain restrictions, original sample people were to be followed even if they moved to a new address. When original sample people moved without leaving a forwarding address or moved to extremely remote parts of the country with no telephone number available for contact, additional non-interviews resulted.

The ten-wave cross-sectional and longitudinal files from SIPP Panel 1992 consist of data collected from February 1992 to April 1995. Data for up to 39 reference months are available for people on these files. The nine-wave cross-sectional and longitudinal files from SIPP Panel 1993 consist of data collected from February 1993 to January 1996. Data for up to 36 reference months are available for people on these files.

Table 1 indicates the interview and reference months for the collection of data from SIPP Panel 1992 (ten waves), SIPP Panel 1993 (nine waves), and SPD 1997 to 2002. For the SIPP, a person was classified as interviewed or non-interviewed based on the following definitions (note: a person may be classified differently for calculating different weights). Interviewed sample people (including children) were defined to be: “those for whom self or proxy responses were obtained for the month or months (e.g., a

longitudinal period) under consideration". The month or months under consideration for which people were deceased or residing in an ineligible address were identified on both the cross-sectional and longitudinal files. Non-interviewed people were defined to be those for whom neither self nor proxy responses were obtained for the month or months under consideration. However, for the weighting purpose, non-interviewed sample people whose responses were obtained by imputation for the month or months under consideration were reclassified as interviewed.

It is estimated that roughly 21,600 households (56,300 people) for SIPP Panel 1992 and 21,800 households (57,200 people) for SIPP Panel 1993 were initially designated in the sample for the SIPP interview. Approximately 19,600 households (51,100 people) for SIPP Panel 1992 and 19,900 households (51,900 people) for SIPP Panel 1993 were interviewed in Wave 1. The balance, residing in approximately 4,000 (SIPP Panels 1992 and 1993 combined) living quarters not interviewed at Wave 1, remained anonymous and became the initial source of the household (and person) non-response in the weighting procedures. For Wave 2 and beyond, household non-response was due to *Type A non-interview* (direct or indirect refusal for interview), *Type B non-interview* (entire household institutionalized), *Type C non-interview* (entire household deceased or moved out of the SPD universe, e.g., out of the country), and *Type D non-interview* (unlocated mover's household). By the end of the panel, with sample growth due to household spawning outpacing the household non-response, roughly 23,600 households for SIPP Panel 1992 (Waves 9 and 10) and 23,700 households for SIPP Panel 1993 (Wave 9) were eligible for interview, and approximately 17,800 households for SIPP Panel 1992 and 17,600 households for SIPP Panel 1993 were interviewed. In an interviewed household, some household members refused to be interviewed which is referred to as *Type Z non-response*. For SIPP Panels 1992 and 1993, Type Z non-response rates varied from 1.3% to 8.0% among Wave 2 and later waves, and the rates increased as the panels aged. In addition, some respondents did not respond to all of the questions. Therefore, item non-response rates, especially for sensitive income and money related items, are higher than the person non-response rates given above.

We define the SPD Bridge sample cohort as people that were in an interviewed household (or in a household that was spawned from an interviewed household) in the last waves of SIPP Panels 1992 and 1993. This amounted to approximately 38,300 designated sample households for the SPD Bridge sample among which 30,125 households were interviewed. Among the non-interviewed households, 4,335 were Type A, 302 were Type B, 1,181 were Type C, and 2,402 were Type D non-interviewed households.

### **SPD 1998 Survey**

Due to budget constraints, the SPD 1998 Survey did not visit all of the households eligible for interview (approximately 39,200 interviewed, Type A, Type B, and Type D non-interviewed households in the SPD Bridge plus their spawned households). The budget only allowed for SPD to visit 21,000 households. Thus, a sample cut was carried out in the following manner. Roughly 19,100 were sampled in this operation, since we needed to account for an expected 12.5 percent non-response and a growth of 10 percent of the total sample size due to household spawning. Only the interviewed and Type B non-interviewed households in the SPD Bridge sample were eligible for selection for the SPD 1998 sample. In the subsampling (sample selection), these sample households were demographically divided into six

strata as shown in the table at the end of this section. The stratification was performed using the household information collected from the SPD Bridge. In each stratum, the households were randomly selected with the sampling rate as provided in the table below. As indicated among sampling rates in this table, the low income sample households were generally not subjected to the sample cut at all.

As a result of the sample cut, the number of the households selected for the SPD 1998 sample plus their spawned households was approximately 19,700, among which 16,395 households were interviewed. Among the non-interviewed households, 2,211 were Type A, 201 were Type B, 212 were Type C, and 673 were Type D non-interviewed households.

Stratum	Description	Sampling Rate	Designated Number	Projected Interviews
1	Households where the primary family or the primary individual has a total family income below 150% of the poverty threshold	1-in-1	6,182	5,950
2	Households where the primary family or the primary individual has a total family income between 150% and 200% of the poverty threshold and there are children under 18	1-in-1	1,075	1,035
3	Households where the primary family or the primary individual has a total family income above 200% of the poverty threshold and there are children under 18	1-in-1.11	6,623	6,375
4	Households where the primary family or the primary individual has a total family income between 150% and 200% of the poverty threshold and there are no children under 18	1-in-1.22	1,461	1,406
5	Households in the balance	1-in-3.70	3,707	3,568
6	Households entirely institutionalized (Outcome code = 228)	1-in-3.70	81	DK
Total			19,129	18,334

### SPD 1999 Survey

The sample for the SPD 1999 survey is simply a direct continuation of the SPD 1998 sample. In this survey, there are approximately 20,000 designated sample households (including spawned households), among which 16,659 households were interviewed. Among the non-interviewed households, 2,174 were Type A, 232 were Type B, 212 were Type C, and 718 were Type D non-interviewed households.

## SPD 2000 Survey

The sample for the SPD 2000 survey consists of two components. Part 1 of the SPD 2000 sample is simply a direct continuation of the SPD 1999 sample which will be hereinafter referred to as *the SPD core component* or *the SPD basic component*. Part 2 is composed of a subsample of the SPD Bridge Type A and Type D non-interviewed households which will be hereinafter referred to as *the SPD Bridge non-interview component*.

The SPD Bridge non-interview component of the sample was selected by classifying the Type A and Type D SPD Bridge non-interviewed households into six strata similar to those prescribed for the 1998 SPD sample cut as shown in the table below. The non-interviewed households in each stratum were then randomly selected at the sampling rate specified in the table below (which is the same sampling rate used for the 1998 SPD sample cut).

Stratum	Description <sup>1</sup>	Number of Households	Percent	Sampling Rate	Subsample Size
1	Households where the primary family or the primary individual has a total family income below 150% of the poverty threshold	1,444	22.5	1-in-1	1,444
2	Households where the primary family or the primary individual has a total family income between 150% and 200% of the poverty threshold and there are children under 18	156	2.4	1-in-1	156
3	Households where the primary family or the primary individual has a total family income above 200% of the poverty threshold and there are children under 18	736	11.5	1-in-1.11	663
4	Households where the primary family or the primary individual has a total family income between 150% and 200% of the poverty threshold and there are no children under 18	476	7.4	1-in-1.22	390
5	Households in the balance	3,605	56.2	1-in-3.70	974
6	Households institutionalized (outcome code = 228)	0	0.0	1-in-3.70	0
Total		6,417	100.0	N/A	3,627

<sup>1</sup> The characteristics of these households were determined based on Reference Month 4 of Wave 1 of either the SIPP Panel 1992 or 1993, depending on which panel they were originated from.

In the SPD core component of the sample, there are approximately 20,400 designated sample households (including the spawned households), among which 16,845 households were interviewed. Among the non-interviewed households in the SPD core component, 2,172 were Type A, 283 were Type B, 243 were Type C, and 873 were Type D non-interviewed households. In the SPD Bridge non-interview component

of the sample, there are approximately 3,700 designated sample households (including the spawned households), among which 1,871 households were interviewed. Among the non-interviewed households in the SPD Bridge non-interview component, 806 were Type A, 32 were Type B, 98 were Type C, and 907 were Type D non-interviewed households. Thus, for the whole SPD 2000, there are approximately 24,100 designated sample households (including the spawned households), among which 18,716 households were interviewed. Among the non-interviewed households in the whole SPD 2000 sample, 2,978 were Type A, 315 were Type B, 341 were Type C, and 1,780 were Type D non-interviewed households.

## **SPD 2001 Survey**

The sample for the SPD 2001 survey consists of three components. Part 1 of the SPD 2000 sample is simply a direct continuation of the SPD core component of the SPD 2000 sample. Part 2 is also simply a direct continuation of the SPD Bridge non-interview component of the SPD 2000 sample. Part 3 is composed of SIPP Panel 1992 and 1993 Type A and Type D non-interviewed households between Wave 2 and the last wave. Part 3 of the SPD 2001 sample will be referred to as *the SIPP 92/93 non-interviewed component*.

The SIPP 92/93 non-interview component of the sample was selected by classifying the SIPP Panel 1992 and 1993 Type A and Type D non-interviewed households (between Wave 2 and the last wave) into five strata (similar to those prescribed for the 1998 SPD sample cut) as shown in the table below. The non-interviewed households in each stratum were then randomly selected at the sampling rate specified in the table below.

In the SPD core component of the sample, there are approximately 20,900 designated sample households (including the spawned households), among which 16,964 households were interviewed. Among the non-interviewed households in the SPD core component, 2,351 were Type A, 314 were Type B, 257 were Type C, and 1,023 were Type D non-interviewed households. In the SPD Bridge non-interview component of the sample, there are approximately 3,800 designated sample households (including the spawned households), among which 2,272 households were interviewed. Among the non-interviewed households in the SPD Bridge non-interview component, 816 were Type A, 42 were Type B, 50 were Type C, and 655 were Type D non-interviewed households. In the SIPP 92/93 non-interview component, there are approximately 6,400 designated sample household (including the spawned households), among which 3,104 households were interviewed. Among the non-interviewed households in the SIPP 92/93 non-interview component, 1,056 were Type A, 85 were Type B, 240 were Type C, and 1907 were Type D non-interviewed households. Thus, for the whole SPD 2001, there are approximately 31,100 designated sample households (including the spawned households), among which 22,340 households were interviewed. Among the non-interviewed households in the whole SPD 2001 sample, 4,223 were Type A, 441 were Type B, 547 were Type C, and 3,585 were Type D non-interviewed households.

Stratum	Description <sup>1</sup>	Number of Households		Percent		Sampling Rate		Subsample Size	
		1992	1993	1992	1993	1992	1993	1992	1993
1	Households where the primary family or the primary individual has a total family income below 150% of the poverty threshold	1317	1463	31.1	32.2	1 in 1	1 in 1	1317	1463
2	Households where the primary family or the primary individual has a total family income between 150% and 200% of the poverty threshold and there are children under 18	182	254	4.3	5.6	1 in 1	1 in 1	182	254
3	Households where the primary family or the primary individual has a total family income above 200% of the poverty threshold and there are children under 18	723	807	17.0	17.7	1 in 1	1 in 1	723	807
4	Households where the primary family or the primary individual has a total family income between 150% and 200% of the poverty threshold and there are no children under 18	270	293	6.4	6.4	1 in 1	1 in 1	270	293
5	Households in the balance	1746	1733	41.2	38.1	1 in 3.44	1 in 9.47	508	183
Total by Panel		4238	4550	100.0	100.0	N/A	N/A	3000	3000
Grand Total (1992 & 1993 Panels)		8788		N/A		N/A		6000	

<sup>1</sup> The characteristics of these households were determined based on Reference Month 4 of Wave 1 of either the SIPP Panel 1992 or 1993, depending on which panel they originally belonged.

## SPD 2002 Survey

Due to budget constraints, the SPD 2002 Survey did not visit all of the households eligible for interview (approximately 30,588 interviewed, Type A, Type B, and Type D non-interviewed households in the SPD 2001 sample and their spawned households). The budget only allowed for SPD to visit 20,000 households. Thus, a sample cut was carried out similar to the 1998 sample cut. Roughly 19,100 households were sampled in this operation, since we needed to account for an expected net 5 percent growth rate due to household spawning. Interviewed and Type A, Type B, and Type D non-interviewed households were eligible to be selected. The eligible households were classified into six strata and then randomly selected for the SPD 2002 sample such that each stratum took an approximately equal proportional cut to reduce the total sample size to approximately 19,100 as shown in the table below.

Stratum	Description	SPD 2001 Stratum Size	Subsampled Stratum Size for SPD 2002 Sample
1	Households where the primary family or the primary individual has a total family income below 150% of the poverty threshold	10,338	6,456
2	Households where the primary family or the primary individual has a total family income between 150% and 200% of the poverty threshold and there are children under 18	1,935	1,209
3	Households where the primary family or the primary individual has a total family income above 200% of the poverty threshold and there are children under 18	10,490	6,551
4	Households where the primary family or the primary individual has a total family income between 150% and 200% of the poverty threshold and there are no children under 18	2,211	1,381
5	Households in the balance	5,583	3,487
6	Households institutionalized (Type B non-interviews)	31	20
Total		30,588	19,104

The SPD 2002 survey consists of three components as did the SPD 2001 survey. In the SPD core component of the sample, there were approximately 18,200 designated sample households (including spawned households), among which 10,765 households were interviewed. Among the non-interviewed households in the SPD core component, 4,266 were Type A, 246 were Type B, 2,405 were Type C, and 468 were Type D non-interviewed households. In the SPD Bridge non-interview component of the sample, there are approximately 2,000 designated sample households (including spawned households), among which 928 households were interviewed. Among the non-interviewed households in the SPD Bridge non-interview component, 662 were Type A, 16 were Type B, 273 were Type C, and 132 were Type D non-interviewed households. In the SIPP 92/93 non-interview component, there are approximately 2,500 designated sample households (including spawned households), among which 803 were interviewed. Among the non-interviewed households in the SIPP 92/93 non-interviewed component, 818 were Type A, 43 were Type B, 508 were Type C, and 361 were Type D non-interviewed households. Thus, for the whole SPD 2002, there are approximately 22,700 designated sample households (including spawned households), among which 12,496 were interviewed. Among the non-interviewed households in the whole SPD 2002 sample, 5,746 were Type A, 305 were Type B, 3,186 were Type C, and 961 were Type D non-interviewed households.

## **ESTIMATION**

For estimation of the characteristics of a cohort of people in the SPD 1999 universe, use the final cross-sectional weights (SPDCSW99) of the sample persons in the cohort provided on the SPD 1999 cross-sectional file. The procedure for calculating the final cross-sectional weights for the sample persons was described earlier in the Weighting section. All sample persons classified as interviewed persons in the SPD 1999 were assigned a positive SPD 1999 final cross-sectional weight ( $SPDCSW99 > 0$ ), while all those classified otherwise were assigned a zero SPD 1999 final cross-sectional weight ( $SPDCSW99 = 0$ ). A sample person is classified as an interviewed person in the SPD 1999 if he/she is a self, proxy, or imputed respondent in the SPD 1999. As mentioned earlier, on the SPD 1999 cross-sectional file, the annual socioeconomic and health insurance data of the sample people was from the previous year (1998) but the demographic data of the sample people was from the current year (1999). Namely, the SPD 1999 cross-sectional file provides the micro-data for estimations of the socioeconomic characteristics in 1998 and demographic characteristics in 1999 for the noninstitutionalized people who are resident in the United States in 1999.

For estimation of the characteristics of a cohort of households in the SPD 1999 universe, use the final cross-sectional weights (SPDCSW99) of the reference persons of the sample households in the cohort on the SPD 1999 cross-sectional file. Like the SPD 2000, 2001, and 2002 cross-sectional files, on the SPD 1999 cross-sectional file, the annual socioeconomic and health insurance data of the sample households were from the previous year (1998) but the demographic data of the sample households were from the current year (1999).

For estimation of the characteristics of a cohort of families (primary family and/or subfamily in a household) in the SPD 1999 universe, use the final cross-sectional weights (SPDCSW99) of the reference persons of the sample families (primary families and/or subfamilies in the sample households) in the cohort on the SPD 1999 cross-sectional file. In the same token as the person level data, on the SPD 1999 cross-sectional file, the annual socioeconomic and health insurance data of the sample families were from the previous year (1998) but the demographic data of the sample families were from the current year (1999).

## **ACCURACY OF ESTIMATES**

SPD estimates are based on a sample. They may differ somewhat from the figures that would have been obtained if a complete census had been taken using the same questionnaire, instructions, and enumerators. There are two types of errors possible in an estimate based on a sample survey: sampling and non-sampling. We are able to provide estimates of the magnitude of SPD sampling error, but this is not true of non-sampling error. The next sections describe sources of SPD non-sampling error, followed by a discussion of sampling error, its estimation, and its use in data analysis.

A note of caution: even though the SPD 1999 cross-sectional file (sample) includes state codes (identifiers) and was weighted to current state (as well as national) controls, estimates from this sample for individual states are not necessarily state-representative because it was derived from the SIPP panel

1992 and 1993 samples which were designed to be national-representative but not state-representative. In addition, estimates from this sample for individual states are also subject to high sampling errors due to small sample size for each individual state. Therefore, state estimates produced using this sample must be further justified by the user for their adequacy. The state codes on the file are primarily provided for linking respondent characteristics with appropriate contextual variables (e.g., state-specific welfare criteria) and for tabulating data by user-defined groupings of states.

## **Non-sampling Errors**

Non-sampling errors can be attributed to many sources: for example, inability to obtain information about all cases in the sample, difficulties in precisely stating some definitions, differences in the interpretation of questions, inability or unwillingness on the part of the respondents to provide correct information, inability to recall information, and errors of collection such as in recording or coding the data, processing the data, estimating values for missing data, biases resulting from the differing recall periods caused by the rotation pattern used, and undercoverage. Quality control and edit procedures were used to reduce errors made by respondents, coders, and interviewers.

Undercoverage in SPD results from missed living quarters and missed people within sample households. It is known that undercoverage varies with age, race, and gender. Generally, undercoverage is larger for males than for females and larger for Blacks than for non-Blacks. Ratio estimation to independent age-race-gender population controls (benchmark estimates) partially corrects for the bias due to survey undercoverage. However, biases exist in the estimates to the extent that people in missed households or missed people in interviewed households have characteristics different from those of interviewed people in the same age-race-gender group. In addition, the independent population controls used have not been adjusted for undercoverage in the decennial census. The Census Bureau has used complex techniques to adjust the weights for non-response. For an explanation of the techniques used, see the "Non-response Adjustment Methods for Demographic Surveys at the U.S. Bureau of the Census," November 1988, Working Paper 8823, by R. Singh and R. Petroni. An example of successfully avoiding bias can be found in "Current Non-response Research for the Survey of Income and Program Participation" (paper by Petroni, presented at the Second International Workshop on Household Survey Non-response, October 1991). The procedure for calculating the person cross-sectional weights on the SPD 2000 cross-sectional file was derived based on such complex techniques.

The SPD 1999 cross-sectional sample may not perform as well as the CPS March 1999 sample and SIPP Panel 1996 sample in representing the noninstitutionalized national population in 1999. This is principally attributable to the fact that, as the SPD sample aged more, it became less representative of the current population (such as the 1999 national population). In addition, the high sample loss (attrition) rate (roughly 50% percent) in the whole SPD 1999 sample may reduce the degree of the effectiveness of the non-interview adjustment process to fully compensate for the differential attrition. Note that the sample loss rate for SPD 2000 has two components: 27 percent sample loss inherited from the SIPP Panels 1992 and 1993, and additional net sample loss of 23 percent occurred from the SPD 1997 (Bridge) to the SPD 1999.

## **Comparability with Other Estimates**

Caution should be exercised when comparing data from this file with data from SIPP publications or with data from other surveys, such as the Current Population Survey (CPS). The comparability problems are caused by such sources as the seasonal patterns for many characteristics, different non-sampling errors, and different concepts and procedures. Refer to the *SIPP Quality Profile* for known differences with data from other sources and further discussion.

## **Sampling Variability**

Standard errors indicate the magnitude of the sampling error. They also partially measure the effect of some non-sampling errors in response and enumeration, but do not measure any systematic biases in the data. The standard errors for the most part measure the variations that occurred by chance because a sample rather than the entire population was surveyed.

## **USES AND COMPUTATION OF STANDARD ERRORS**

### **Confidence Intervals**

The sample estimate and its standard error enable one to construct confidence intervals (ranges that would include the average result of all possible samples with a known probability). For example, if all possible samples were selected, each of these being surveyed under essentially the same conditions and using the same sample design, and if an estimate and its standard error were calculated from each sample, then:

1. Approximately 90 percent of the intervals from 1.645 standard errors below the estimate to 1.645 standard errors above the estimate would include the average result of all possible samples.
2. Approximately 95 percent of the intervals from 1.960 standard errors below the estimate to 1.960 standard errors above the estimate would include the average result of all possible samples.

The average estimate derived from all possible samples is or is not contained in any particular computed interval. However, for a particular sample, one can say with a specified confidence that the average estimate derived from all possible samples is included in the confidence interval.

### **Hypothesis Testing**

Standard errors may also be used for hypothesis testing, a procedure for distinguishing between population characteristics using sample estimates. The most common types of hypotheses tested are "the population characteristics are identical" versus "they are different." Tests may be performed at various levels of significance, where a level of significance is the probability of concluding that the characteristics are different when, in fact, they are identical.

To perform the most common test, compute the difference  $X_A - X_B$ , where  $X_A$  and  $X_B$  are sample estimates of the characteristics of interest. A later section explains how to derive an estimate of the standard error of the difference  $X_A - X_B$ . Let that standard error be  $s_{DIFF}$ . If  $X_A - X_B$  is between  $-1.645$  times  $s_{DIFF}$  and  $+1.645$  times  $s_{DIFF}$ , no conclusion about the difference in characteristics is justified at the 10 percent significance level. If, on the other hand,  $X_A - X_B$  is smaller than  $-1.645$  times  $s_{DIFF}$  or larger than  $+1.645$  times  $s_{DIFF}$ , the observed difference is significant at the 10 percent level. In this event, it is a commonly accepted practice to say that the characteristics are different. We recommend that users report only those differences that are significant at the 10 percent level or better. Of course, sometimes this conclusion will be wrong. When the characteristics are, in fact, the same, there is a 10 percent chance of concluding that they are different.

Note that as more tests are performed, more erroneous significant differences will occur. For example, at the 10 percent significance level, if 100 independent hypothesis tests are performed in which there are no real differences, it is likely that about 10 erroneous differences will occur. Therefore, the significance of any single test should be interpreted cautiously. However, we can generally increase the power of the test by using a multiple significance test (multiple comparison procedure) in lieu of a series of independent pair tests. For a number of simultaneous tests of five or less, we recommend Bonferroni's procedure which generally provides a simple and acceptable answer to multiple tests. It is, however, highly conservative and not recommended if the number of tests are higher than five because many other available multiple comparison procedures (such as least significant difference test, Newman-Keuls test, Scheffe's test, etc.) are generally preferable.

### **Caution Concerning Small Estimates and Small Differences**

Because of the large standard errors involved, there is little chance that estimates will reveal useful information when computed on a base smaller than 200,000. Furthermore, non-sampling error in one or more of the smaller number of sample units on which an estimate is based can be relatively large (unacceptably large) in the estimate (because the non-sampling error will be generally self-cancelled in an estimate if the number of sample units used for the estimate is large). In addition, care must be taken in the interpretation of small differences since even a small amount of non-sampling error can cause a borderline difference to appear significant or not, thus distorting a seemingly valid hypothesis test.

### **Standard Error Parameters**

Most SPD 1999 estimates have greater standard errors than those obtained through a simple random sample because clusters of living quarters are sampled for the SIPP, SPD Bridge, and SPD 1998 to SPD 2002. To derive standard errors that would be applicable to a wide variety of estimates and could be prepared at a moderate cost, a number of approximations were required. Estimates with similar standard error behavior were grouped together and two parameters (denoted  $a$  and  $b$ ) were developed to approximate the standard error behavior of each group of estimates. Because the actual standard error behavior was not identical for all estimates within a group, the standard errors computed from these parameters provide an indication of the order of magnitude of the standard error for any specific estimate.

These  $a$  and  $b$  parameters vary by characteristic and by demographic subgroup to which the estimate applies. The  $a$  and  $b$  parameters are also known as “generalized variance parameters.”

For the SPD 1999 cross-sectional file, the  $a$  and  $b$  parameters for various groups of the populations and households are provided in Table 3.

### Standard Errors of Estimated Numbers

The approximate standard error  $s_x$  of an estimated number  $x$  of people, families and so forth, can be obtained by using Formula 1 provided below.

$$s_x = \sqrt{ax^2 + bx} \tag{1}$$

Here  $a$  and  $b$  are the standard error parameters associated with the particular type of characteristic in a given point or period of time. For the analysis using the data on the SPD 1999 cross-sectional file, the  $a$  and  $b$  parameters are provided in Table 3 for estimation of socioeconomic characteristics in 1998 and demographic characteristic in 1999.

An illustration would be to suppose that using the SPD 1999 cross-sectional file data, the estimate of the number of people in 1999 ever receiving Social Security in 1998 is 34,122,000 which was derived using the SPD 1999 final cross-sectional weight (SPDCSW1999). The appropriate  $a$  and  $b$  parameters to use in calculating a standard error for the estimate are obtained from Table 3. They are  $a = -0.0000824$ ,  $b = 16,102$ . Using Formula (1), the approximate standard error  $s_x$  is

$$s_x = \sqrt{(-0.0000824)(34,122,000)^2 + (16,102)(34,122,000)} = 673,419 \text{ people}$$

The 90-percent confidence interval as shown by the data is from 33,014,226 to 35,229,774. Therefore, a conclusion that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 90 percent of all samples. Similarly, the 95-percent confidence interval as shown by the data is from 32,802,099 to 35,441,901 and we could conclude that the average estimate derived from all possible samples lies within this interval with 95% confidence.

### Standard Error of a Mean and an Aggregate

A mean  $\bar{x}$  is defined here to be the average quantity of some characteristic (other than the number of people, families, or households) per person, family, or household. An aggregate  $k$  is defined to be the

total quantity of some characteristic summed over all units in a sub-population. For example, a mean could be the average annual income of females age 25 to 34. The standard error  $s_{\bar{x}}$  of a mean can be approximated by Formula 2 and the standard error  $s_k$  of an aggregate can be approximated by Formula 3. Because of the approximations used in developing Formulas 2 and 3, an estimate of the standard error of the mean or aggregate obtained from these formulas will generally underestimate the true standard error. The formula used to estimate the standard error  $s_{\bar{x}}$  of a mean  $\bar{x}$  is

$$s_{\bar{x}} = \sqrt{\left(\frac{b}{y}\right) s^2} \quad (2)$$

where  $y$  is the base,  $s^2$  is the estimated population variance of the characteristic, and  $b$  is the standard error parameter associated with the type of the characteristic.

By defining an aggregate ( $k$ ) as the total quantity of an item summed over all the units in a group, an approximate standard error ( $s_k$ ) of the aggregate  $k$  can be expressed as Formula 3 below.

$$s_k = \sqrt{by s^2} \quad (3)$$

Because of the approximations used in developing Formulas 3 and 4, an estimate of the standard error of the mean using Formula 2 and an estimate of standard error of the aggregate using Formula 3 will generally underestimate their corresponding true standard errors.

The population variance  $s^2$  may be estimated by one of two methods: the first method uses data that has been grouped into intervals, the second method uses ungrouped data. The second method is recommended because it is more precise. However, the first method will be easier to implement if grouped data are already being used as part of the analysis. In both methods, let  $x_i$  denote the value of the characteristic for the  $i^{\text{th}}$  person.

To use the first method, the range of values for the characteristic is divided into  $c$  intervals, where the lower and upper boundaries of interval  $j$  are  $Z_{j-1}$  and  $Z_j$ , respectively. Each person is placed into one of the  $c$  groups such that the value of the characteristic,  $x_i$  is between  $Z_{j-1}$  and  $Z_j$ . The estimated population variance,  $s^2$  is then given by Formula 4 below.

$$s^2 = \sum_{j=1}^c p_j m_j^2 - \bar{x}^2 \quad (4)$$

where  $p_j$  is the estimated proportion of people in group  $j$  (based on weighted data), and  $m_j$  is given by Formula 5a below.

$$m_j = \frac{Z_{j-1} + Z_j}{2}, \text{ for } j = 1, 2, \dots, c \quad (5a)$$

The most representative value of the characteristic in group  $j$  is assumed to be  $m_j$ . If group  $c$  is open-ended, that is, no upper interval boundary exists, then an approximate value for  $m_c$  is given by Formula 5b below.

$$m_c = \left(\frac{3}{2}\right)Z_{c-1} \quad (5b)$$

The mean  $\bar{x}$  can be obtained using Formula 6 below.

$$\bar{x} = \sum_{j=1}^c p_j m_j \quad (6)$$

In the second method, the estimated population variance  $s^2$  is given by Formula 7 below.

$$s^2 = \frac{\sum_{i=1}^n w_i x_i^2}{\sum_{i=1}^n w_i} - \bar{x}^2 \quad (7)$$

where there are  $n$  sample people with the characteristic of interest and  $w_i$  is the final weight for person  $i$ . The mean  $\bar{x}$  can be obtained from Formula 8 below.

$$\bar{x} = \frac{\sum_{i=1}^n w_i x_i}{\sum_{i=1}^n w_i} \quad (8)$$

Note that, by definition,  $y$  (the size of the base) in Formulas 2 and 3 can be obtained from the equation below.

$$y = \sum_{i=1}^n w_i$$

An illustration of Method 1 would be to suppose that, based on the SPD 1999 final cross-sectional weight (SPDCSW99), the 1998 distribution of annual incomes of the people in 1999 is given in Table 2 for people aged 25 to 34 who were employed for all 12 months of 1998. The mean annual cash income from Formula 6 is

$$\bar{x} = \frac{1,371}{39,923}(2,500) + \frac{1,651}{39,923}(6,250) + \dots + \frac{1,493}{39,923}(105,000) = \$26,749$$

Using Formula 4 and the mean annual cash income of \$26,749 the estimated population variance,  $s^2$  is

$$s^2 = \frac{1,371}{39,923}(2,500)^2 + \frac{1,651}{39,923}(6,250)^2 + \dots + \frac{1,493}{39,923}(105,000)^2 - 26,749^2 = 468,092,251$$

The appropriate  $b$  parameter from Table 3 is 8,792. Now, using Formula 2, the estimated standard error of the mean is

$$s_{\bar{x}} = \sqrt{\frac{8,792}{39,923,000}(468,092,251)} = \$321$$

### Standard Errors of Estimated Percentages

This section refers to the percentages of a group of people, families, or households possessing a particular attribute and to percentages of money or related concepts. The reliability of an estimated percentage, computed using sample data for both numerator and denominator, depends upon both the size of the percentage and the size of the total upon which the percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are more than 50 percent. For example, the percent estimate of employed people is more reliable than the estimated number of employed people. When the numerator and denominator of the percentage have different parameters, use the parameter of the numerator. If proportions are presented instead of percentages, note that the standard error of a proportion is equal to the standard error of the corresponding percentage divided by 100.

There are two types of percentages commonly estimated. The first type is the percentage of people sharing a particular characteristic such as the percentage of people owning their own home in 1999 or the percentage of food stamp recipients in 1998 among all the people in 1999. The second type is the percentage of money or some similar concept held by a particular group of people or held in a particular form. Examples are the percentage of wealth held by people with high income and the percentage of annual income received by females.

For the percentage of people, the approximate standard error,  $s_{x,p}$ , of the estimated percentage,  $p$ , can be obtained by Formula 9 below.

$$s_{x,p} = \sqrt{\frac{b}{x} p(100 - p)} \quad (9)$$

Here,  $x$  is the base of the percentage,  $p$  is the percentage ( $0 < p < 100$ ), and  $b$  is parameter for the numerator of the percentage calculation. For the analysis using the SPD 1999 cross-sectional file data, the  $b$  parameters are provided in Table 3.

An illustration would be to suppose that, based on the final cross-sectional weight on the SPD 1999 cross-sectional file, an estimate of number of males aged 22 to 55 was 46,023,000. Among all the males in this age group, an estimate of 2.40 percent were unemployed. The  $b$  parameter associated with the numerator (the number of unemployed male) is 8,792 (from Table 3). Using Formula 9, the approximate standard error  $s_{x,p}$  is

$$s_{x,p} = \sqrt{\frac{8,792}{46,023,000} (2.40)(100 - 2.40)} = 0.212\%$$

Consequently, the 90-percent confidence interval for the unemployment estimate is 2.05% to 2.75%.

To calculate the percentages of money, the formula is more complicated. A percentage of money will usually be estimated in one of two ways. It may be the ratio,  $p_M$ , of two aggregates as defined in Formula 10 below.

$$p_M = 100 \times \left( \frac{X_A}{X_N} \right) \quad (10)$$

or it may be the ratio,  $p_M$ , of two means with an adjustment,  $\hat{p}_A$ , for different bases as defined in Formula 11 below.

$$p_M = 100 \times \left( \frac{\bar{X}_A}{\bar{X}_N} \right) \hat{p}_A \quad (11)$$

where  $X_A$  and  $X_N$  in Formula 10 are aggregate money figures,  $\bar{X}_A$  and  $\bar{X}_N$  in Formula 11 are mean money figures, and  $\hat{p}_A$  is the estimated number in Group A divided by the estimated number in Group N (i.e., the ratio of Group A to Group N). In either way of estimating  $p_M$  (Formula 10 or 11), we estimate the standard error  $s_{p_M}$  of  $p_M$  using Formula 12 provided below (since  $p_M$  is expressed in percent,  $s_{p_M}$  is consistently expressed in percent as well).

$$s_{p_M} = 100 \times \sqrt{\left(\frac{\hat{p}_A \bar{X}_A}{\bar{X}_N}\right)^2 \left[ \left(\frac{s_{\hat{p}_A} \div 100}{\hat{p}_A}\right)^2 + \left(\frac{s_{\bar{X}_A}}{\bar{X}_A}\right)^2 + \left(\frac{s_{\bar{X}_N}}{\bar{X}_N}\right)^2 \right]} \quad (12)$$

where  $s_{\hat{p}_A}$  is the standard error of  $\hat{p}_A$ ,  $s_{\bar{X}_A}$  is the standard error of  $\bar{X}_A$  and  $s_{\bar{X}_N}$  is the standard error of  $\bar{X}_N$ . To calculate  $s_{\hat{p}_A}$ , use Formula 9 (which produces  $s_{\hat{p}_A}$  in percent instead of in ratio like  $\hat{p}_A$ ). The standard errors  $s_{\bar{X}_A}$  and  $s_{\bar{X}_N}$  are calculated using Formula 2.

Note that there is frequently some correlation among the characteristics estimated by  $\hat{p}_A$ ,  $\bar{X}_A$ , and  $\bar{X}_N$ . These correlations, if present, will cause a tendency toward overestimates or underestimates, depending on the relative sizes of the correlations and whether they are positive or negative, respectively.

An illustration would be to suppose that, based on the data and the final cross-sectional weight on the SPD 1999 cross-sectional file, an estimated 8.8% of males aged 17 and over were Black in 1999, the mean annual earning of these Black males was \$15,456 in 1998, the mean annual earning of all males aged 17 and over in 1999 was \$22,932 in 1998, and the corresponding standard errors are 0.37 percent, \$432, and \$324, respectively. Then, the percent ( $p_M$ ) of male earnings made by Blacks in 1999 per Formula 11 is

$$p_M = 100 \left( \frac{15,456}{22,932} \right) (0.088) = 5.9\%$$

Using Formula 12, the approximate standard error,  $s_{p_M}$  is

$$s_{p_M} = 100 \times \sqrt{\left(\frac{(0.088)(15,456)}{22,932}\right)^2 \left[ \left(\frac{0.0037}{0.088}\right)^2 + \left(\frac{432}{15,456}\right)^2 + \left(\frac{324}{22,932}\right)^2 \right]} = 0.31\%$$

### Standard Error of a Difference

The standard error  $s_{x-y}$  of a difference between two sample estimates  $x$  and  $y$  is equal to

$$s_{x-y} = \sqrt{s_x^2 + s_y^2 - 2rs_x s_y} \quad (13)$$

where  $s_x$  and  $s_y$  are the standard errors of the estimates  $x$  and  $y$ . The estimates can be numbers, averages,

percents, ratios, etc. The correlation between  $x$  and  $y$  is represented by  $r$  ( $-1 \leq r \leq 1$ ). If  $r$  is assumed to be zero and the true correlation is really positive (negative), then this assumption will result in a tendency toward overestimates (underestimates) of the true standard error.

An illustration would be to suppose that we are interested in the difference in the average annual number of adult males (aged 17 and above in 1999) versus the corresponding adult females with annual cash income above \$17,000 in 1998. An estimate of the number of adult people in this income bracket has been obtained for both males and females. For females, the estimate is 1,619,000. A similar estimate for males is 2,198,000. The difference in estimates is 579,000.

The standard error of the adult female estimate is computed next. The  $a$  and  $b$  parameters from Table 3 for females are -0.0000869 and 8,792, respectively. Based on Formula 2, the standard error,  $s_x$  of the female estimate is

$$s_x = \sqrt{(-0.0000938)(1,619,000)^2 + (8,792)(1,619,000)} = 118,349$$

Similarly, the  $a$  and  $b$  parameters from Table 3 for males are -0.0000938 and 8,792, respectively. Based on Formula 2, the standard error,  $s_y$  of the male estimate is

$$s_y = \sqrt{(-0.0000938)(2,198,000)^2 + (8,792)(2,198,000)} = 137,374$$

Now, the standard error of the difference is computed using the above two standard errors. The correlation  $r$  for this example is assumed to be zero. The standard error,  $s_{x-y}$  of the difference is computed by Formula 13 as shown below.

$$s_{x-y} = \sqrt{(118,349)^2 + (137,374)^2} = 181,323$$

Suppose that it is desired to test at the 10 percent significance level whether the number of 1999 adult males and females with 1998 annual cash income above \$17,000 were different, one can compare the difference of 579,000 to the product  $1.645 \times 181,323 = 298,276$ . Since the difference is larger than 1.645 times the standard error ( $s_{x-y}$ ) of the difference, the data allow us to conclude that the number of adult males with annual cash income above \$17,000 is significantly higher than the number of the adult females at the 10 percent significance level.

### Standard Error of a Median

The median quantity,  $X_{med}$ , of some item (characteristic),  $X$ , such as income for a given group of people, families, or households, is that quantity such that at least half the group has as much or more and at least half the group has as much or less. The sampling variability of an estimated median  $\hat{X}_{med}$  depends upon

the form of the distribution of the item as well as the size of the group. To estimate the median ( $X_{med}$ ) and the standard error of the median ( $s_{X_{med}}$ ) the procedure described below may be used.

The median ( $X_{med}$ ), like the mean, can be estimated using either data which has been grouped into intervals (e.g., income intervals) or ungrouped data. If grouped data are used, the median ( $X_{med}$ ) is estimated using either Formula 15 or 16 with  $p = 0.5$ . If ungrouped data are used, the data records are ordered based on the value of the item (e.g., income level), then the estimated median is the value of the item such that the weighted estimate of 50 percent of the sub-population falls at or below that value and 50 percent is at or above that value. The method of standard error computation presented here requires the use of grouped data, because it is deemed easier to compute the median by grouping the data and then using Formula 15 or 16.

An approximate method for measuring the reliability of an estimated median ( $\hat{X}_{med}$ ) is to determine a confidence interval about it. (See the section on "Confidence Intervals.") The following procedure (four steps) may be used to estimate the 68-percent confidence limits (i.e., approximately  $\pm$  one standard error from the median) and hence the standard error (of a median) based on sample data.

Step 1 - Determine, using Formula 9, the standard error ( $s_{x,p=50}$ ) of an estimate of 50 percent of the group (sub-population).

Step 2 - Subtract from and add to 50 percent the standard error determined in Step 1 to obtain the percentages associated with the lower and upper limits of the 68-percent confidence interval of the item. Namely, the smaller percentage is  $50 - s_{x,p=50}$  percent, and the larger percentage is  $50 + s_{x,p=50}$  percent.

Step 3 - Using the distribution of the item within the group, calculate the quantity,  $X_{UCL}$ , of the item such that the percent of the group owning more of the item is equal to the smaller percentage ( $50 - s_{x,p=50}$ ) found in Step 2. This quantity ( $X_{UCL}$ ) will be the upper limit for the 68-percent confidence interval (assuming that the interval with higher item value is ranked at lower percentile as illustrated in Table 2.) In a similar fashion, calculate the quantity,  $X_{LCL}$ , of the item such that the percent of the group owning more of the item is equal to the larger percentage ( $50 + s_{x,p=50}$ ) found in Step 2. This quantity ( $X_{LCL}$ ) will be the lower limit for the 68-percent confidence interval. (Note that a median computed from ungrouped data may or may not fall in this confidence interval).

Step 4 - Divide the difference between the two quantities ( $X_{UCL}$  and  $X_{LCL}$ ) determined in Step 3 by two to obtain the standard error estimate ( $s_{\hat{X}_{med}}$ ) of the median estimate ( $\hat{X}_{med}$ ). Namely,

$$\hat{s}_{\hat{X}_{med}} = \frac{X_{UCL} - X_{LCL}}{2} \tag{14}$$

To perform Step 3, it will be necessary to interpolate, which may be done using different methods.

The most common are simple linear interpolation (Formula 15) and Pareto interpolation (Formula 16). The appropriateness of the method depends on the form of the distribution around the median. We recommend Pareto interpolation in most instances. Interpolation is used as follows. The quantity of the item,  $X_{pN}$  such that  $p$  percent own more of the item is

$$X_{pN} = A_1 \exp \left[ \frac{\ln \left( \frac{pN}{N_1} \right)}{\ln \left( \frac{N_2}{N_1} \right)} \ln \left( \frac{A_2}{A_1} \right) \right] \quad (15)$$

if Pareto Interpolation is indicated and

$$X_{pN} = \left[ \frac{pN - N_1}{N_2 - N_1} (A_2 - A_1) + A_1 \right] \quad (16)$$

if linear interpolation is indicated, where  $N$  is the size of the group;  $A_1$  and  $A_2$  are the lower and upper bounds, respectively, of the interval in which  $X_{pN}$  falls;  $N_1$  and  $N_2$  are the estimated numbers of group members owning more than  $A_1$  and  $A_2$ , respectively; *exp* refers to the exponential function; and *ln* refers to the natural logarithm function. One should note that a mathematically equivalent result is obtained by using common logarithms (base 10) and antilogarithms.

An illustration would be in order to calculate the standard error of a median, we return to the first example used to illustrate the standard error of a mean. As indicated in Table 2, the size ( $N$ ) of the group is 39,923,000 and the median annual income estimate ( $\hat{X}_{med}$ ) for the group falls in between \$17,500 and \$19,999. With  $p = 0.5$ ,  $A_1 = \$1$ ,  $s_{\hat{X}_{med}} = 7,500$ ,  $A_2 = \$19,999$ ;  $N_1 = 5,799,000 + 4,730,000 + \dots + 1,493,000 = 22,178,000$ , and  $N_2 = 4,730,000 + 3,723,000 + \dots + 1,493 = 16,379,000$ ; the median annual income estimate,  $\hat{X}_{med}$  for this group is computed using Formula 15 (with  $p = 0.5$ ) to be \$18,331. The standard error estimate ( $s_{\hat{X}_{med}}$ ) of the median annual income estimate is calculated using the above four step procedure as follows.

Step 1 - Using Formula 9 and the appropriate  $b$  parameter of 8,792, the standard error estimate of 50 percent on a base of 39,923,000 is about 0.70 percentage points, (i.e.,  $s_{x,p=50} = 0.74\%$ ).

Step 2 - Obtain the two percentages associated with the lower and upper limits of the 68-percent confidence: the smaller percentage =  $50 - s_{x,p=50} = 49.26$  and the larger percentage =  $50 + s_{x,p=50} = 50.74$ .

Step 3 - By examining Table 2, we see that the percentage 49.26 falls in the income interval from \$17,500 to \$19,999. Thus as determined previously,  $A_1 = \$17,500$ ,  $A_2 = \$19,999$ ,  $N_1 = 22,178,000$ ,  $N_2 = 16,379,000$ , and  $N = 39,923,000$  and  $p = 0.4926$ . Based on Formula 15, the upper bound ( $X_{UCL}$ ) of a 68-percent confidence interval for the median estimate ( $\hat{X}_{med}$ ) is

$$X_{UCL} = 17,500 \exp \left[ \frac{\ln \left( \frac{0.4926 \times 39,923,000}{22,178,000} \right)}{\ln \left( \frac{16,379,000}{22,178,000} \right)} \ln \left( \frac{19,999}{17,500} \right) \right] = \$18,451$$

Also by examining Table 2, the 50.74 percent fall in the same income interval. Thus,  $A_1, A_2, N_1,$  and  $N_2$  are the same as above, but  $p = 0.5074$ . The lower bound ( $X_{LCL}$ ) of a 68-percent confidence interval for the median ( $\hat{X}_{med}$ ) is

$$X_{LCL} = 17,500 \exp \left[ \frac{\ln \left( \frac{0.5074 \times 39,923,000}{22,178,000} \right)}{\ln \left( \frac{16,379,000}{22,178,000} \right)} \ln \left( \frac{19,999}{17,500} \right) \right] = \$18,212$$

Step 4 - Based on Formula 14, the standard error estimate ( $s_{\hat{X}_{med}}$ ) of the median annual income estimate ( $\hat{X}_{med}$ ) is

$$s_{\hat{X}_{med}} = \frac{\$18,451 - \$18,212}{2} = \$120$$

If the linear interpolation is used, the median is then estimated using Formula 16 to be \$18,455 and the 68-percent confidence interval of the estimated median is from \$18,582 to \$18,329. The standard error estimate is \$127.

### Standard Error of Ratio of Means or Medians

The standard error for a ratio of means or medians is approximated by Formula 17 provided below.

$$s_{\frac{X}{Y}} = \sqrt{\left( \frac{X}{Y} \right)^2 \left[ \left( \frac{s_X}{X} \right)^2 + \left( \frac{s_Y}{Y} \right)^2 \right]} \quad (17)$$

where  $X$  and  $Y$  are the means or medians, and  $s_X$  and  $s_Y$  are their associated standard errors. Formula 17 assumes that the means or medians are not correlated. If the correlation between the population means or medians estimated by  $X$  and  $Y$  are actually positive (negative), then this procedure will tend to produce overestimates (underestimates) of the true standard error for the ratio of means or medians.

Table 1 - Reference months and interview months of the SIPP 1992 Panel, SIPP 1993 Panel, SPD Bridge (1997), and SPD 1998 to SPD 2002 survey samples.

Survey Sample	Months of Interview	Reference Months
SIPP Panel 1992	February 1992 - April 1995	October 1991 - March 1995
SIPP Panel 1993	February 1993 - January 1996	October 1992 - December 1995
SPD Bridge (1997)	April 1997 - June 1997	January 1996 - December 1996: rolled-up as 1996 yearly data
SPD 1998	May 1998 - July 1998	January 1997 - December 1997: rolled up as 1997 yearly data
SPD 1999	May 1999 - July 1999	January 1998 - December 1998: rolled up as 1998 yearly data
SPD 2000	May 2000 - July 2000	January 1999 - December 1999: rolled up as 1999 yearly data
SPD 2001	May 2001 - July 2001	January 2000 - December 2000: rolled up as 2000 yearly data
SPD 2002	May 2002 - July 2002	January 2001 - December 2001: rolled up as 2001 yearly data

Table 2 - Illustrative example: distribution of annual income among people 25 to 34 years old.

	Total Number of People	Number of People in Annual Income Interval												
		Under \$5000	\$5,000 to \$7,499	\$7,500 to \$9,999	\$10,000 to \$12,499	\$12,500 to \$14,999	\$15,000 to \$17,499	\$17,500 to \$19,999	\$20,000 to \$29,999	\$30,000 to \$39,999	\$40,000 to \$49,999	\$50,000 to \$59,999	\$60,000 to \$69,999	\$70,000 and Over
Number of People (in Thousands)	39,923	1,371	1,651	2,259	2,734	3,452	6,278	5,799	4,730	3,723	2,591	2,619	1,223	1,493
Number of People (in Thousands) with at Least as Much as Lower Bound of Interval	N/A	39,923	38,552	36,901	34,642	31,908	28,456	22,178	16,379	11,649	7,926	5,335	2,716	1,493
Percent with at Least as Much as Lower Bound of Interval	N/A	100.0	96.6	92.4	86.8	79.9	71.3	55.6	41.0	29.2	19.9	13.4	6.8	3.7
Cumulative Number of People (in Thousands)	N/A	1,371	3,022	5,281	8,015	11,467	17,745	23,544	28,274	31,997	34,588	37,207	38,430	39,923
Cumulative Percent	N/A	3.4	7.6	13.2	20.1	28.7	44.4	59.0	70.8	80.1	86.6	93.2	96.3	100.0

Note: This table contains a fictitious distribution of annual income and is used only to illustrate standard error calculations.

Table 3 - SPD generalized variance parameters for estimates of various characteristics using the final cross-sectional weight (SPDCSW99) on the SPD 1999 cross-sectional file and the corresponding design effects (deff).

\* For cross-tabulations, use the *a* and *b* parameters of the characteristic with the smaller number within the parentheses.

\*\* Use the "16+ Pension Plan" parameters for pension plan tabulations of people aged 16+ in the labor force. Use the "All Others" parameters for retirement tabulations, 0+ program participation, 0+ benefits, 0+ income, and 0+ labor force tabulations, in addition to any other types of tabulations not specifically covered by another characteristic in this table.

\*\*\* Use the "All Others" parameters for any type of tabulation not specifically covered by another characteristic in this table.

# APPENDIX A

## Industry Classification Codes for Detailed Industry (3-digit)

There are 236 categories for the employed, with one additional category for the experienced unemployed. To assist you in your coding the categories listed below are aggregated into 15 major self-employment recodes (see page A-10). (Numbers in parentheses are the 1987 SIC code equivalent; see Executive Office of the President, Office of Management and Budget, Standard Industrial Classification Manual, 1987. "Pt" means part, "n.e.c." means not elsewhere classified.)

<b>Code</b>	<b>Industry</b>
000-009	Not used
010-030	AGRICULTURE
010	Agricultural production, crops (01)
011	Agricultural production, livestock (02)
012	Veterinary services (074)
013-019	Not used
020	Landscape and horticultural services (078)
021-029	Not used
030	Agricultural services, n.e.c. (071, 072, 075, 076)
031-032	FORESTRY AND FISHERIES
031	Forestry (08)
032	Fishing, hunting, and trapping (09)
033-039	Not used
040-050	MINING
040	Metal mining (10)
041	Coal mining (12)
042	Oil and gas extraction (13)
043-049	Not used
050	Nonmetallic mining and quarrying, except fuel (14)
051-059	Not used
060	CONSTRUCTION (15, 16, 17)
061-099	Not used
100-392	MANUFACTURING
100-222	NONDURABLE GOODS
100-122	Food and kindred products
100	Meat products (201)
101	Dairy products (202)

<b>Code</b>	<b>Industry</b>
102	Canned, frozen and preserved fruits and vegetables (203)
103-109	Not used
110	Grain mill products (204)
111	Bakery products (205)
112	Sugar and confectionery products (206)
113-119	Not used
120	Beverage industries (208)
121	Miscellaneous food preparations and kindred products (207, 209)
122	Not specified food industries
123-129	Not used
130	Tobacco manufactures (21)
131	Not used
132-150	Textile mill products
132	Knitting mills (225)
133-139	Not used
140	Dyeing and finishing textiles, except wool and knit goods (226)
141	Carpets and rugs (227)
142	Yarn, thread, and fabric mills (221-224, 228)
143-149	Not used
150	Miscellaneous textile mill products (229)
151-152	Apparel and other finished textile products
151	Apparel and accessories, except knit (231-238)
152	Miscellaneous fabricated textile products (239)
153-159	Not used
160-162	Paper and allied products
160	Pulp, paper, and paperboard mills (261-263)
161	Miscellaneous paper and pulp products (267)
162	Paperboard containers and boxes (265)
163-170	Not used
171-172	Printing, publishing, and allied industries
171	Newspaper publishing and printing (271)
172	Printing, publishing, and allied industries, except newspapers (272-279)
173-179	Not used
180-192	Chemicals and allied products
180	Plastics, synthetics, and resins (282)
181	Drugs (283)
182	Soaps and cosmetics (284)
183-189	Not used
190	Paints, varnishes, and related products (285)
191	Agricultural chemicals (287)
192	Industrial and miscellaneous chemicals (281, 286, 289)
193-199	Not used
200-201	Petroleum and coal products
200	Petroleum refining (291)
201	Miscellaneous petroleum and coal products (295, 299)

<b>Code</b>	<b>Industry</b>
202-209	Not used
210-212	Rubber and miscellaneous plastics products
210	Tires and inner tubes (301)
211	Other rubber products, and plastics footwear and belting (302-306)
212	Miscellaneous plastics products (308)
213-219	Not used
220-222	Leather and leather products
220	Leather tanning and finishing (311)
221	Footwear, except rubber and plastic (313, 314)
222	Leather products, except footwear (315-317, 319)
223-229	Not used
230-392	<b>DURABLE GOODS</b>
230-241	Lumber and wood products, except furniture
230	Logging (241)
231	Sawmills, planing mills, and millwork (242, 243)
232	Wood buildings and mobile homes (245)
233-240	Not used
241	Miscellaneous wood products (244, 249)
242	Furniture and fixtures (25)
243-249	Not used
250-262	Stone, clay, glass, and concrete products
250	Glass and glass products (321-323)
251	Cement, concrete, gypsum, and plaster products (324, 327)
252	Structural clay products (325)
253-260	Not used
261	Pottery and related products (326)
262	Miscellaneous nonmetallic mineral and stone products (328, 329)
263-269	Not used
270-301	Metal industries
270	Blast furnaces, steelworks, rolling and finishing mills (331)
271	Iron and steel foundries (332)
272	Primary aluminum industries (3334, part 334, 3353-3355, 3363, 3365)
273-279	Not used
280	Other primary metal industries (3331, 3339, part 334, 3351, 3356, 3357, 3364, 3366, 3369, 339)
281	Cutlery, hand tools, and general hardware (342)
282	Fabricated structural metal products (344)
283-289	Not used
290	Screw machine products (345)
291	Metal forgings and stampings (346)
292	Ordnance (348)
293-299	Not used
300	Miscellaneous fabricated metal products (341, 343, 347, 349)
301	Not specified metal industries

<b>Code</b>	<b>Industry</b>
302-309	Not used
310-332	Machinery and computing equipment
310	Engines and turbines (351)
311	Farm machinery and equipment (352)
312	Construction and material handling machines (353)
313-319	Not used
320	Metalworking machinery (354)
321	Office and accounting machines (3578, 3579)
322	Computers and related equipment (3571-3577)
323-330	Not used
331	Machinery, except electrical, n.e.c. (355, 356, 358, 359)
332	Not specified machinery
333-339	Not used
340-350	Electrical machinery, equipment, and supplies
340	Household appliances (363)
341	Radio, TV, and communication equipment (365, 366)
342	Electrical machinery, equipment, and supplies, n.e.c. (361, 362, 364, 367, 369)
343-349	Not used
350	Not specified electrical machinery, equipment, and supplies
351-370	Transportation equipment
351	Motor vehicles and motor vehicle equipment (371)
352	Aircraft and parts (372)
353-359	Not used
360	Ship and boat building and repairing (373)
361	Railroad locomotives and equipment (374)
362	Guided missiles, space vehicles, and parts (376)
363-369	Not used
370	Cycles and miscellaneous transportation equipment (375, 379)
371-381	Professional and photographic equipment, and watches
371	Scientific and controlling instruments (381, 382 except 3827)
372	Medical, dental, and optical instruments and supplies (3827, 384, 385)
373-379	Not used
380	Photographic equipment and supplies (386)
381	Watches, clocks, and clockwork operated devices (387)
382-389	Not used
390	Toys, amusement, and sporting goods (394)
391	Miscellaneous manufacturing industries (39 except 394)
392	Not specified manufacturing industries
393-399	Not used
400-472	TRANSPORTATION, COMMUNICATIONS, AND OTHER PUBLIC UTILITIES
400-432	TRANSPORTATION
400	Railroads (40)

<b>Code</b>	<b>Industry</b>
401	Bus service and urban transit (41, except 412)
402	Taxicab service (412)
403-409	Not used
410	Trucking service (421, 423)
411	Warehousing and storage (422)
412	U.S. Postal Service (43)
413-419	Not used
420	Water transportation (44)
421	Air transportation (45)
422	Pipelines, except natural gas (46)
423-431	Not used
432	Services incidental to transportation (47)
433-439	Not used
440-442	<b>COMMUNICATIONS</b>
440	Radio and television broadcasting and cable (483, 484)
441	Telephone communications (481)
442	Telegraph and miscellaneous communications services (482, 489)
443-449	Not used
450-472	<b>UTILITIES AND SANITARY SERVICES</b>
450	Electric light and power (491)
451	Gas and steam supply systems (492, 496)
452	Electric and gas, and other combinations (493)
453-469	Not used
470	Water supply and irrigation (494, 497)
471	Sanitary services (495)
472	Not specified utilities
473-499	Not used
500-571	<b>WHOLESALE TRADE</b>
500-532	<b>DURABLE GOODS</b>
500	Motor vehicles and equipment (501)
501	Furniture and home furnishings (502)
502	Lumber and construction materials (503)
503-509	Not used
510	Professional and commercial equipment and supplies (504)
511	Metals and minerals, except petroleum (505)
512	Electrical goods (506)
513-520	Not used
521	Hardware, plumbing and heating supplies (507)
522-529	Not used
530	Machinery, equipment, and supplies (508)
531	Scrap and waste materials (5093)
532	Miscellaneous wholesale, durable goods (509 except 5093)

<b>Code</b>	<b>Industry</b>
533-539	Not used
540-571	<b>NONDURABLE GOODS</b>
540	Paper and paper products (511)
541	Drugs, chemicals and allied products (512, 516)
542	Apparel, fabrics, and notions (513)
543-549	Not used
550	Groceries and related products (514)
551	Farm-product raw materials (515)
552	Petroleum products (517)
553-559	Not used
560	Alcoholic beverages (518)
561	Farm supplies (5191)
562	Miscellaneous wholesale, nondurable goods (5192-5199)
563-570	Not used
571	Not specified wholesale trade
572-579	Not used
580-691	<b>RETAIL TRADE</b>
580	Lumber and building material retailing (521, 523)
581	Hardware stores (525)
582	Retail nurseries and garden stores (526)
583-589	Not used
590	Mobile home dealers (527)
591	Department stores (531)
592	Variety stores (533)
593-599	Not used
600	Miscellaneous general merchandise stores (539)
601	Grocery stores (541)
602	Dairy products stores (545)
603-609	Not used
610	Retail bakeries (546)
611	Food stores, n.e.c. (542, 543, 544, 549)
612	Motor vehicle dealers (551, 552)
613-619	Not used
620	Auto and home supply stores (553)
621	Gasoline service stations (554)
622	Miscellaneous vehicle dealers (555, 556, 557, 559)
623	Apparel and accessory stores, except shoe (56, except 566)
624-629	Not used
630	Shoe stores (566)
631	Furniture and home furnishings stores (571)
632	Household appliance stores (572)
633	Radio, TV, and computer stores (5731, 5734)
634-639	Not used

<b>Code</b>	<b>Industry</b>
640	Music stores (5735, 5736)
641	Eating and drinking places (58)
642	Drug stores (591)
643-649	Not used
650	Liquor stores (592)
651	Sporting goods, bicycles, and hobby stores (5941, 5945, 5946)
652	Book and stationery stores (5942, 5943)
653-659	Not used
660	Jewelry stores (5944)
661	Gift, novelty, and souvenir shops (5947)
662	Sewing, needlework and piece goods stores (5949)
663	Catalog and mail order houses (5961)
664-669	Not used
670	Vending machine operators (5962)
671	Direct selling establishments (5963)
672	Fuel dealers (598)
673-680	Not used
681	Retail florists (5992)
682	Miscellaneous retail stores (593, 5948, 5993-5995, 5999)
683-690	Not used
691	Not specified retail trade
692-699	Not used
700-712	<b>FINANCE, INSURANCE, AND REAL ESTATE</b>
700	Banking (60 except 603 and 606)
701	Savings institutions, including credit unions (603, 606)
702	Credit agencies, n.e.c. (61)

# APPENDIX B

## OCCUPATIONAL CLASSIFICATION

### Occupational Classification Codes for Detailed Occupational Categories (3-digit)

There are 500 categories for the employed with 1 additional category for the experienced unemployed. The classification is developed from the 1980 Standard Occupational Classification. “n.e.c.” is the abbreviation for not elsewhere classified.

<b>Code</b>	<b>Occupation</b>
000-199	MANAGERIAL AND PROFESSIONAL SPECIALTY OCCUPATIONS
000-037	EXECUTIVE, ADMINISTRATIVE, AND MANAGERIAL OCCUPATIONS
000-003	Not used
004	Chief executives and general administrators, public administration (112)
005	Administrators and officials, public administration (1132-1139)
006	Administrators, protective services (1131)
007	Financial managers (122)
008	Personnel and labor relations managers (123)
009	Purchasing managers (124)
010-012	Not used
013	Managers, marketing, advertising, and public relations (125)
014	Administrators, education and related fields (128)
015	Managers, medicine and health (131)
016	Not used
017	Managers, food serving and lodging establishments (1351)
018	Managers, properties and real estate (1353)
019	Funeral directors (part 1359)
020	Not used
021	Managers, service organizations, n.e.c. (127, 1352, 1354, part 1359)
022	Managers and administrators, n.e.c. (121, 126, 132-1343, 136-139)
023-037	Management Related Occupations
023	Accountants and auditors (1412)
024	Underwriters (1414)
025	Other financial officers (1415, 1419)
026	Management analysts (142)
027	Personnel, training, and labor relations specialists (143)
028	Purchasing agents and buyers, farm products (1443)
029	Buyers, wholesale and retail trade except farm products (1442)
030-032	Not used
033	Purchasing agents and buyers, n.e.c. (1449)
034	Business and promotion agents (145)

<b>Code</b>	<b>Occupation</b>
035	Construction inspectors (1472)
036	Inspectors and compliance officers, except construction (1473)
037	Management related occupations, n.e.c. (149)
038-042	Not used
043-199	<b>PROFESSIONAL SPECIALTY OCCUPATIONS</b>
043-063	Engineers, Architects, and Surveyors
043	Architects (161)
044-059	Engineers
044	Aerospace (1622)
045	Metallurgical and materials (1623)
046	Mining (1624)
047	Petroleum (1625)
048	Chemical (1626)
049	Nuclear (1627)
050-052	Not used
053	Civil (1628)
054	Agricultural (1632)
055	Electrical and electronic (1633, 1636)
056	Industrial (1634)
057	Mechanical (1635)
058	Marine and naval architects (1637)
059	Engineers, n.e.c. (1639)
060-062	Not used
063	Surveyors and mapping scientists (164)
064-068	Mathematical and Computer Scientists
064	Computer systems analysts and scientists (171)
065	Operations and systems researchers and analysts (172)
066	Actuaries (1732)
067	Statisticians (1733)
068	Mathematical scientists, n.e.c. (1739)
069-083	Natural Scientists
069	Physicists and astronomers (1842, 1843)
070-072	Not used
073	Chemists, except biochemists (1845)
074	Atmospheric and space scientists (1846)
075	Geologists and geodesists (1847)
076	Physical scientists, n.e.c. (1849)
077	Agricultural and food scientists (1853)
078	Biological and life scientists (1854)
079	Forestry and conservation scientists (1852)
080-082	Not used
083	Medical scientists (1855)
084-089	Health Diagnosing Occupations
084	Physicians (261)

<b>Code</b>	<b>Occupation</b>
085	Dentists (262)
086	Veterinarians (27)
087	Optometrists (281)
088	Podiatrists (283)
089	Health diagnosing practitioners, n.e.c. (289)
090-094	Not used
095-106	Health Assessment and Treating Occupations
095	Registered nurses (29)
096	Pharmacists (301)
097	Dietitians (302)
098-105	Therapists
098	Respiratory therapists (3031)
099	Occupational therapists (3032)
100-102	Not used
103	Physical therapists (3033)
104	Speech therapists (3034)
105	Therapists, n.e.c. (3039)
106	Physicians' assistants (304)
107-112	Not used
113-154	Teachers, Postsecondary
113	Earth, environmental, and marine science teachers (2212)
114	Biological science teachers (2213)
115	Chemistry teachers (2214)
116	Physics teachers (2215)
117	Natural science teachers, n.e.c. (2216)
118	Psychology teachers (2217)
119	Economics teachers (2218)
120-122	Not used
123	History teachers (2222)
124	Political science teachers (2223)
125	Sociology teachers (2224)
126	Social science teachers, n.e.c. (2225)
127	Engineering teachers (2226)
128	Mathematical science teachers (2227)
129	Computer science teachers (2228)
130-132	Not used
133	Medical science teachers (2231)
134	Health specialties teachers (2232)
135	Business, commerce, and marketing teachers (2233)
136	Agriculture and forestry teachers (2234)
137	Art, drama, and music teachers (2235)
138	Physical education teachers (2236)
139	Education teachers (2237)
140-142	Not used
143	English teachers (2238)

<b>Code</b>	<b>Occupation</b>
144	Foreign language teachers (2242)
145	Law teachers (2243)
146	Social work teachers (2244)
147	Theology teachers (2245)
148	Trade and industrial teachers (2246)
149	Home economics teachers (2247)
150-152	Not used
153	Teachers, postsecondary, n.e.c. (2249)
154	Postsecondary teachers, subject not specified
155-159	Teachers, Except Postsecondary
155	Teachers, prekindergarten and kindergarten (231)
156	Teachers, elementary school (232)
157	Teachers, secondary school (233)
158	Teachers, special education (235)
159	Teachers, n.e.c. (236, 239)
160-162	Not used
163	Counselors, Educational and Vocational (24)
164-165	Librarians, Archivists, and Curators
164	Librarians (251)
165	Archivists and curators (252)
166-173	Social Scientists and Urban Planners
166	Economists (1912)
167	Psychologists (1915)
168	Sociologists (1916)
169	Social scientists, n.e.c. (1913, 1914, 1919)
170-172	Not used
173	Urban planners (192)
174-177	Social, Recreation, and Religious Workers
174	Social workers (2032)
175	Recreation workers (2033)
176	Clergy (2042)
177	Religious workers, n.e.c. (2049)
178	Lawyers and Judges (211-212)
178-182	Not used
183-199	Writers, Artists, Entertainers, and Athletes
183	Authors (321)
184	Technical writers (398)
185	Designers (322)
186	Musicians and composers (323)
187	Actors and directors (324)
188	Painters, sculptors, craft-artists, and artist printmakers (325)
189	Photographers (326)
190-192	Not used
193	Dancers (327)
194	Artists, performers, and related workers, n.e.c. (328, 329)

<b>Code</b>	<b>Occupation</b>
195	Editors and reporters (331)
196	Not used
197	Public relations specialists (332)
198	Announcers (333)
199	Athletes (34)
200-202	Not used

445-447	<b>Health Service Occupations</b>
445	Dental assistants (5232)
446	Health aides, except nursing (5233)
447	Nursing aides, orderlies, and attendants (5236)
448-455	<b>Cleaning and Building Service Occupations, Except Household</b>
448	Supervisors, cleaning and building service workers (5241)
449	Maids and housemen (5242, 5249)
450-452	Not used
453	Janitors and cleaners (5244)
454	Elevator operators (5245)
455	Pest control occupations (5246)
456-469	<b>Personal Service Occupations</b>
456	Supervisors, personal service occupations (5251)
457	Barbers (5252)
458	Hairdressers and cosmetologists (5253)
459	Attendants, amusement and recreation facilities (5254)
460	Not used
461	Guides (5255)
462	Ushers (5256)
463	Public transportation attendants (5257)
464	Baggage porters and bellhops (5262)
465	Welfare service aides (5263)
466	Family child care providers (part 5264)
467	Early childhood teacher's assistants (part 5264)
468	Child care workers, n.e.c. (part 5264)
469	Personal service occupations, n.e.c. (5258, 5269)
470-472	Not used

<b>Code</b>	<b>Occupation</b>
473-499	<b>FARMING, FORESTRY, AND FISHING OCCUPATIONS</b>
473-476	Farm Operators and Managers
473	Farmers, except horticultural (5512-5514)
474	Horticultural specialty farmers (5515)
475	Managers, farms, except horticultural (5522-5524)
476	Managers, horticultural specialty farms (5525)
477-489	Other Agricultural and Related Occupations
477-484	Farm Occupations, Except Managerial
477	Supervisors, farm workers (5611)
478	Not used
479	Farm workers (5612-5617)
480-482	Not used
483	Marine life cultivation workers (5618)
484	Nursery workers (5619)
485-489	Related Agricultural Occupations
485	Supervisors, related agricultural occupations (5621)
486	Grounds keepers and gardeners, except farm (5622)
487	Animal caretakers, except farm (5624)
488	Graders and sorters, agricultural products (5625)
489	Inspectors, agricultural products (5627)
490-493	Not used
494-496	Forestry and Logging Occupations
494	Supervisors, forestry and logging workers (571)
495	Forestry workers, except logging (572)
496	Timber cutting and logging occupations (573, 579)
497-499	Fishers, Hunters, and Trappers
497	Captains and other officers, fishing vessels (part 8241)
498	Fishers (583)
499	Hunters and trappers (584)
500-502	Not used
503-699	<b>PRECISION PRODUCTION, CRAFT, AND REPAIR OCCUPATIONS</b>
503-552	Mechanics and Repairers
503	Supervisors, mechanics and repairers (60)
504	Not used
505-549	Mechanics and Repairers, Except Supervisors
505-517	Vehicle and Mobile Equipment Mechanics and Repairers
505	Automobile mechanics (part 6111)
506	Automobile mechanic apprentices (part 6111)
507	Bus, truck, and stationary engine mechanics (6112)
508	Aircraft engine mechanics (6113)
509	Small engine repairers (6114)
510-513	Not used
514	Automobile body and related repairers (6115)
515	Aircraft mechanics, except engine (6116)

<b>Code</b>	<b>Occupation</b>
516	Heavy equipment mechanics (6117)
517	Farm equipment mechanics (6118)
518	Industrial machinery repairers (613)
519	Machinery maintenance occupations (614)
520-522	Not used
523-533	Electrical and Electronic Equipment Repairers
523	Electronic repairers, communications and industrial equipment (6151, 6153, 6155)
524	Not used
525	Data processing equipment repairers (6154)
526	Household appliance and power tool repairers (6156)
527	Telephone line installers and repairers (6157)
528	Not used
529	Telephone installers and repairers (6158)
530-532	Not used
533	Miscellaneous electrical and electronic equipment repairers (6152, 6159)
534	Heating, air conditioning, and refrigeration mechanics (616)
535-549	Miscellaneous Mechanics and Repairers
535	Camera, watch, and musical instrument repairers (6171, 6172)
536	Locksmiths and safe repairers (6173)
537	Not used
538	Office machine repairers (6174)
539	Mechanical controls and valve repairers (6175)
540-542	Not used
543	Elevator installers and repairers (6176)
544	Millwrights (6178)
545-546	Not used
547	Specified mechanics and repairers, n.e.c. (6177, 6179)
548	Not used
549	Not specified mechanics and repairers
550-552	Not used
553-599	Construction Trades
553-558	Supervisors, Construction Occupations
553	Supervisors, brick masons, stonemasons, and tile setters (6312)
554	Supervisors, carpenters and related workers (6313)
555	Supervisors, electricians and power transmission installers (6314)
556	Supervisors, painters, paperhangers, and plasterers (6315)
557	Supervisors, plumbers, pipefitters, and steam fitters (6316)
558	Supervisors, construction, n.e.c. (6311, 6318)
559-562	Not used
563-599	Construction Trades, Except Supervisors
563	Brickmasons and stonemasons (part 6412, part 6413)
564	Brick mason and stonemason apprentices (part 6412, part 6413)
565	Tile setters, hard and soft (part 6414, part 6462)
566	Carpet installers (part 6462)

<b>Code</b>	<b>Occupation</b>
567	Carpenters (part 6422)
568	Not used
569	Carpenter apprentices (part 6422)
570-572	Not used
573	Drywall installers (6424)
574	Not used
575	Electricians (part 6432)
576	Electrician apprentices (part 6432)
577	Electrical power installers and repairers (6433)
578	Not used
579	Painters, construction and maintenance (6442)
582	Not used
583	Paperhangers (6443)
584	Plasterers (6444)
585	Plumbers, pipefitters, and steamfitters (part 645)
586	Not used
587	Plumber, pipefitter, and steamfitter apprentices (part 645)
588	Concrete and terrazzo finishers (6463)
589	Glaziers (6464)
590-592	Not used
593	Insulation workers (6465)
594	Paving, surfacing, and tamping equipment operators (6466)
595	Roofers (6468)
596	Sheetmetal duct installers (6472)
597	Structural metal workers (6473)
598	Drillers, earth (6474)
599	Construction trades, n.e.c. (6467, 6475, 6476, 6479)
600-612	Not used
613-617	Extractive Occupations
613	Supervisors, extractive occupations (632)
614	Drillers, oil well (652)
615	Explosives workers (653)
616	Mining machine operators (654)
617	Mining occupations, n.e.c. (656)
618-627	Not used
628-699	Precision Production Occupations
628	Supervisors, production occupations (67, 71)
629-633	Not used
634-655	Precision Metal Working Occupations
634	Tool and die makers (part 6811)
635	Tool and die maker apprentices (part 6811)
636	Precision assemblers, metal (6812)
637	Machinists (part 6813)
638	Not used
639	Machinist apprentices (part 6813)

<b>Code</b>	<b>Occupation</b>
640-642	Not used
643	Boilermakers (6814)
644	Precision grinders, filers, and tool sharpeners (6816)
645	Pattern makers and model makers, metal (6817)
646	Lay-out workers (6821)
647	Precious stones and metals workers (Jewelers) (6822, 6866)
648	Not used
649	Engravers, metal (6823)
650-652	Not used
653	Sheet metal workers (part 6824)
654	Sheet metal worker apprentices (part 6824)
655	Miscellaneous precision metal workers (6829)
656-659	Precision Woodworking Occupations
656	Patternmakers and model makers, wood (6831)
657	Cabinet makers and bench carpenters (6832)
658	Furniture and wood finishers (6835)
659	Miscellaneous precision woodworkers (6839)
660-665	Not used
666-674	Precision Textile, Apparel, and Furnishings Machine Workers
666	Dressmakers (part 6852, part 7752)
667	Tailors (part 6852)
668	Upholsterers (6853)
669	Shoe repairers (6854)
670-673	Not used
674	Miscellaneous precision apparel and fabric workers (6856, 6859, part 7752)
675-684	Precision Workers, Assorted Materials
675	Hand molders and shapers, except jewelers (6861)
676	Patternmakers, lay-out workers, and cutters (6862)
677	Optical goods workers (6864, part 7477, part 7677)
678	Dental laboratory and medical appliance technicians (6865)
679	Bookbinders (6844)
680-682	Not used
683	Electrical and electronic equipment assemblers (6867)
684	Miscellaneous precision workers, n.e.c. (6869)
685	Not used
686-688	Precision Food Production Occupations
686	Butchers and meat cutters (6871)
687	Bakers (6872)
688	Food batch makers (6873, 6879)
689-693	Precision Inspectors, Testers, and Related Workers
689	Inspectors, testers, and graders (6881, 828)
690-692	Not used
693	Adjusters and calibrators (6882)
694-699	Plant and System Operators

<b>Code</b>	<b>Occupation</b>
694	Water and sewage treatment plant operators (691)
695	Power plant operators (part 693)
696	Stationary engineers (part 693, 7668)
697-698	Not used
699	Miscellaneous plant and system operators (692, 694, 695, 696)
700-702	Not used
703-889	<b>OPERATORS, FABRICATORS, AND LABORERS</b>
703-799	<b>MACHINE OPERATORS, ASSEMBLERS, AND INSPECTORS</b>
703-779	Machine Operators and Tenders, Except Precision
703-715	Metal Working and Plastic Working Machine Operators
703	Lathe and turning machine set-up operators (7312)
704	Lathe and turning machine operators (7512)
705	Milling and planing machine operators (7313, 7513)
706	Punching and stamping press machine operators (7314, 7317, 7514, 7517)
707	Rolling machine operators (7316, 7516)
708	Drilling and boring machine operators (7318, 7518)
709	Grinding, abrading, buffing, and polishing machine operators (7322, 7324, 7522)
710-712	Not used
713	Forging machine operators (7319, 7519)
714	Numerical control machine operators (7326)
715	Miscellaneous metal, plastic, stone, and glass working machine operators (7329, 7529)
716	Not used
717	Fabricating machine operators, n.e.c. (7339, 7539)
718	Not used
719-725	Metal and Plastic Processing Machine Operators
719	Molding and casting machine operators (7315, 7342, 7515, 7542)
720-722	Not used
723	Metal plating machine operators (7343, 7543)
724	Heat treating equipment operators (7344, 7544)
725	Miscellaneous metal and plastic processing machine operators (7349, 7549)
726-733	Woodworking Machine Operators
726	Wood lathe, routing, and planing machine operators (7431, 7432, 7631, 7632)
727	Sawing machine operators (7433, 7633)
728	Shaping and joining machine operators (7435, 7635)
729	Nailing and tacking machine operators (7636)
730-732	Not used
733	Miscellaneous woodworking machine operators (7434, 7439, 7634, 7639)
734-737	Printing Machine Operators
734	Printing press operators (7443, 7643)
735	Photoengravers and lithographers (6842, 7444, 7644)

<b>Code</b>	<b>Occupation</b>
736	Typesetters and compositors (6841, 7642)
737	Miscellaneous printing machine operators (6849, 7449, 7649)
738-749	Textile, Apparel, and Furnishings Machine Operators
738	Winding and twisting machine operators (7451, 7651)
739	Knitting, looping, taping, and weaving machine operators (7452, 7652)
740-742	Not used
743	Textile cutting machine operators (7654)
744	Textile sewing machine operators (7655)
745	Shoe machine operators (7656)
746	Not used
747	Pressing machine operators (7657)
748	Laundering and dry cleaning machine operators (6855, 7658)
749	Miscellaneous textile machine operators (7459, 7659)
750-752	Not used
753-779	Machine Operators, Assorted Materials
753	Cementing and gluing machine operators (7661)
754	Packaging and filling machine operators (7462, 7662)
755	Extruding and forming machine operators (7463, 7663)
756	Mixing and blending machine operators (7664)
757	Separating, filtering, and clarifying machine operators (7476, 7666, 7676)
758	Compressing and compacting machine operators (7467, 7667)
759	Painting and paint spraying machine operators (7669)
760-762	Not used
763	Roasting and baking machine operators, food (7472, 7672)
764	Washing, cleaning, and pickling machine operators (7673)
765	Folding machine operators (7474, 7674)
766	Furnace, kiln, and oven operators, except food (7675)
767	Not used
768	Crushing and grinding machine operators (part 7477, part 7677)
769	Slicing and cutting machine operators (7478, 7678)
770-772	Not used
773	Motion picture projectionists (part 7479)
774	Photographic process machine operators (6863, 6868, 7671)
775-776	Not used
777	Miscellaneous machine operators, n.e.c. (part 7479, 7665, 7679)
778	Not used
779	Machine operators, not specified
780-782	Not used
783-795	Fabricators, Assemblers, and Hand Working Occupations
783	Welders and cutters (7332, 7532, 7714)
784	Solderers and brazers (7333, 7533, 7717)
785	Assemblers (772, 774)
786	Hand cutting and trimming occupations (7753)
787	Hand molding, casting, and forming occupations (7754, 7755)
788	Not used

<b>Code</b>	<b>Occupation</b>
789	Hand painting, coating, and decorating occupations (7756)
790-792	Not used
793	Hand engraving and printing occupations (7757)
794	Not used
795	Miscellaneous hand working occupations (7758, 7759)
796-799	Production Inspectors, Testers, Samplers, and Weighers
796	Production inspectors, checkers, and examiners (782, 787)
797	Production testers (783)
798	Production samplers and weighers (784)
799	Graders and sorters, except agricultural (785)
800-802	Not used
803-859	<b>TRANSPORTATION AND MATERIAL MOVING OCCUPATIONS</b>
803-814	Motor Vehicle Operators
803	Supervisors, motor vehicle operators (8111)
804	Truck drivers (8212-8214)
805	Not used
806	Driver-sales workers (8218)
807	Not used
808	Bus drivers (8215)
809	Taxicab drivers and chauffeurs (8216)
810-812	Not used
813	Parking lot attendants (874)
814	Motor transportation occupations, n.e.c. (8219)
815-822	Not used
823-834	Transportation Occupations, Except Motor Vehicles
823-826	Rail Transportation Occupations
823	Railroad conductors and yardmasters (8113)
824	Locomotive operating occupations (8232)
825	Railroad brake, signal, and switch operators (8233)
826	Rail vehicle operators, n.e.c. (8239)
827	Not used
828-834	Water Transportation Occupations
828	Ship captains and mates, except fishing boats (part 8241, 8242)
829	Sailors and deckhands (8243)
830-832	Not used
833	Marine engineers (8244)
834	Bridge, lock, and lighthouse tenders (8245)
835-842	Not used
843-859	Material Moving Equipment Operators
843	Supervisors, material moving equipment operators (812)
844	Operating engineers (8312)
845	Long shore equipment operators (8313)
846-847	Not used

<b>Code</b>	<b>Occupation</b>
848	Hoist and winch operators (8314)
849	Crane and tower operators (8315)
850-852	Not used
853	Excavating and loading machine operators (8316)
854	Not used
855	Grader, dozer, and scraper operators (8317)
856	Industrial truck and tractor equipment operators (8318)
857-858	Not used
859	Miscellaneous material moving equipment operators (8319)
860-863	Not used
864-889	<b>HANDLERS, EQUIPMENT CLEANERS, HELPERS, AND LABORERS</b>
864	Supervisors, handlers, equipment cleaners, and laborers, n.e.c. (85)
865	Helpers, mechanics, and repairers (863)
866-868	Helpers, Construction, and Extractive Occupations
866	Helpers, construction trades (8641-8645, 8648)
867	Helpers, surveyor (8646)
868	Helpers, extractive occupations (865)
869	Construction laborers (871)
870-873	Not used
874	Production helpers (861, 862)
875-883	<b>Freight, Stock, and Material Handlers</b>
875	Garbage collectors (8722)
876	Stevedores (8723)
877	Stock handlers and baggers (8724)
878	Machine feeders and off bearers (8725)
879-882	Not used
883	Freight, stock, and material handlers, n.e.c. (8726)
884	Not used
885	Garage and service station related occupations (873)
886	Not used
887	Vehicle washers and equipment cleaners (875)
888	Hand packers and packagers (8761)
889	Laborers, except construction (8769)
890-904	Not used
905	Assigned to people whose current labor force status is unemployed and whose last job was Armed Forces.
997	Refused, Classified, etc
998	Blank, NA, DK

\_\_\_\_\_

---

H\_MSNGPRSN

This question is intended to verify that there are no other persons in the household. Studies have shown that persons will occasionally forget to mention certain persons in the household who would qualify for SPD interviews, such as temporary roomers, persons who live or stay in that unit part of the month, etc.

**PRESS "ENTER" TO EXIT HELP** \_\_\_\_\_

---

H\_LIVEAT

Part of the housing unit definition includes the idea that people living in a unit will either live together OR eat together.

**PRESS "ENTER" TO EXIT HELP** \_\_\_\_\_

---

H\_OTHLIV

Part of the housing unit definition includes the idea that people living in a unit will either live together or eat together, and that no other persons in the structure (i.e., in another unit or room) live or eat with this household.

**PRESS "ENTER" TO EXIT HELP** \_\_\_\_\_

---

H\_XACCESS

If the people who do not live or eat with the household members have direct access to a separate living arrangement, from the outside or through a common hallway, mark "Yes".

**PRESS "ENTER" TO EXIT HELP** \_\_\_\_\_

---

H\_USUAL

This is the usual place of residence if this address is the household member's sole address, or if the household member has 2 addresses but lives at this address most days in a given month.

**PRESS "ENTER" TO EXIT HELP** \_\_\_\_\_

---

H\_NXTLIV

The household member usually lives here if this address is the his/her sole address, or if the household member has 2 addresses but lives at this address most days in a given month.

**PRESS "ENTER" TO EXIT HELP** \_\_\_\_\_

---

H\_TRRP2

- o The CHILD response includes natural, step, and adoptive children. Foster children are classified as code 27.
- o The PARENT response does NOT include in-laws; they are classified as code 26.
- o UNMARRIED PARTNERS live together in a housing unit as if they were married partners.
- o HOUSEMATE/ROOMMATES share a housing unit and living expenses for economic reasons.
- o ROOMER/BOARDERS pay rent to live in the reference person's home.

**PRESS "ENTER" TO EXIT HELP** \_\_\_\_\_

---

H\_AGEAGES

If the respondent does not know a person's age, enter the best estimate of the person's age in this screen.  
Age is important to the CAPI questionnaire's ability to skip correctly for specific questions.

**PRESS "ENTER" TO EXIT HELP** \_\_\_\_\_

---

H\_VERAGE

Age is calculated as of the last day of the interview month.  
If calculated age is not correct, answering "No" will permit you to correct the date of birth entries from the previous screen.

---

H\_MS

- o If the person's spouse is NOT a household member but he/she reports being married, mark "Married, spouse ABSENT"
- o If the person is separated from his/her spouse because of mutual agreement or by a legal decree but he/she is not yet divorced, mark "Separated".
- o If the person reports having been married but the marriage was annulled, mark the "never married" category.

**PRESS "ENTER" TO EXIT HELP \_\_\_\_\_**

---

H\_AFWHEN

The CAPI instrument will display only those service periods that are appropriate to the age of the person. Note that you may record up to 4 time periods of active duty service.

**PRESS "ENTER" TO EXIT HELP \_\_\_\_\_**

This item provides information on the current educational level of persons. Be sure the level marked was completed. For example, persons may have attended college but not completed a degree; in this case, code 40 should be marked. For persons who have completed elementary, junior high, or high school as the highest level of education, determine the highest grade or year completed. Do not assume "junior high" falls in the 7th or 8th grade category. Some junior highs begin with the 6th grade and some end with the 10th grade.

(31) Enter this code for persons who have not completed at least the 1st grade. They may have no schooling or completed only nursery school or kindergarten.

(38) Enter only those who have completed the 12th grade or year but DO NOT have a high school diploma or the equivalent.

**PRESS "SHIFT-F6" TO EXIT HELP**

(39) High school graduate indicates the person has received a high school diploma or the equivalent such as a GED. Include any persons who have completed less than 12 years of school but who have obtained a diploma.

(40) Enter this category for those who have attended some college and have not yet received a degree. "College" indicates a school that grants college or university degrees, it does not include vocational, technical, business or trade school certificates or diplomas.

**PRESS "SHIFT-F6" TO EXIT HELP**

(41) Vocational, technical, trade or business schools include things such as beauty schools, schools for dental assistants, secretarial schools, nursing schools which do not award college degrees, and electrician certification. Schools such as these may award a diploma, certification or license as their final degree.

If uncertain, ask if the school granted the individual a college degree. If the program lasted 2 years or more and the degree awarded was an Associate, Bachelor's, Master's, or Doctorate, do not check code 41.

- (42) Associate's degrees are generally granted from 2-year institutions. If the major field of study followed an occupational or vocational track preparing one for a specific technical job or career upon completion of the program, mark this category.

**PRESS "SHIFT-F6" TO EXIT HELP**

- (43) An academic program of an Associate's degree includes fields in the humanities/liberal arts, social sciences, and general sciences and is often used as preparation for a 4-year (Bachelor's) degree.

- (44) Mark this entry if the degree completed is a Bachelor's degree (generally granted by four-year institutions). This includes Bachelor's of Arts and Bachelor's of Science.

- (45) Mark this if a Master's degree was granted from a university or college program. These include Master of Science, Arts, Social Work, Business Administration.

- (46) A professional degree is granted from a graduate or professional school, post-baccalaureate. This includes medical (MD), law (JD), dental (DDS), theological, or veterinarian (DVM) degrees.

**PRESS "SHIFT-F6" TO EXIT HELP**

- (47) Mark this entry for persons who have completed a Doctor of Philosophy (PhD), Doctor of Education (EdD), or other doctoral degree.

**PRESS "ENTER" TO EXIT HELP \_\_\_\_\_**

---

**H\_RACE**

Enter the race as reported by the respondent. If the person reports a race not listed, select "other race" and enter the reported race in the next screen provided.

If more than one race is reported, or the respondent is uncertain, ask "Which race does ... most closely identify with?" and record the race reported. If the respondent is unable to provide a single response, ask the race of the person's mother (if not already reported) and record the race of the person's mother. If the respondent is unable to report a single race for the mother, record the first race originally mentioned for the same person.

**PRESS "ENTER" TO EXIT HELP \_\_\_\_\_**

---

**H\_ORIGIN**

Enter the origin as reported by the respondent. If the person reports more than one origin, ask him/her to select only one choice. If the person has difficulty selecting only one, determine the origin of the person's mother, and enter that code in the space provided.

**PRESS "ENTER" TO EXIT HELP \_\_\_\_\_**

---

H\_SSN

**WHY DOES THE CENSUS BUREAU WANT TO KNOW MY SOCIAL SECURITY NUMBER?**

"The Survey of Income and Program Participation collects social security numbers so we can obtain information that was provided to other government agencies. This helps us avoid asking questions for which information is already available and helps ensure the accuracy and completeness of the survey results. We protect administrative records information that we obtain from these agencies from unauthorized use just as the survey responses are protected. Providing your social security number is voluntary."

---

(Ask 659 and 660 for each person listed in 658.)

659 For how many persons did (you/name) make support payments (not including child support/not including alimony/not including child support or alimony)?

\_\_\_\_\_

---

660 How much did (you/name) pay for the support of (this person/these persons) during 1998?

AMOUNT: \$ \_\_\_\_\_ .00  
(VERIFY IF DOLLAR AMOUNT IS OVER \$30,000)

660\_VER  
Support payments reported as (amount). Is this entry correct?

- (1) Yes
- (2) No

\_\_\_\_\_

---

***VEHICLE OPERATING EXPENSES***

---

670. Is there public transportation for this area?

- (1) Yes
- (2) No

—

---

671. Does anyone in the household use public transportation at least once a week?

- (1) Yes
- (2) No

—

---

672. What type of transportation (do/does) (you/name) usually use to get to work?

- (1) car, truck, van
- (2) bus or street car
- (3) subway or elevated
- (4) railroad
- (5) taxicab
- (6) motorcycle
- (7) bicycle
- (8) other vehicle
- (9) walked only
- (10) works at home

—

---

673. How much (do/does) (you/name) usually spend, per week, on transportation to and from (your/his/her) job. Do not include expenses paid or reimbursed by someone else?

\$ \_\_\_\_\_

---

674 At any time between January and December 1998, did (you/name) have to do any of the following because of transportation problems:

- (1)Yes (2)No
1. Quit a job \_\_\_\_\_
  2. Quit a training activity or school \_\_\_\_\_

---

675 At any time between January and December 1998, were (you/name) unable to do any of the following because of transportation problems:

- (1)Yes (2)No
1. Unable to start or take a job \_\_\_\_\_
  2. Unable to start a training activity  
or start school \_\_\_\_\_

---

## ***EDUCATIONAL ENROLLMENT***

---

**(Questions 701-924 are asked person-by-person for all persons 15 and over, with the exception that persons 15-17 are skipped over the educational enrollment questions. Persons 15-17 will be included in the children's school enrollment questions.)**

---

### **INSCHOOL**

The next few questions are about school enrollment from JUNE, 1998 through MAY, 1999.

At any time between June 1998 and May, 1999 (were you/was name) enrolled in school, either full or part time?

**READ IF NECESSARY:** Include any regular school, such as elementary, high school or college; or any vocational, technical, or business school beyond high school.

- (1) Yes
- (2) No
- (H) Help

—

---

INMONTH

During which months (were/was) (you/he/she) enrolled in school?

---

***SUBSTANCE ABUSE***

---

850 The next questions are about how frequently (you/name) drink alcoholic beverages. By a “drink” we mean a bottle of beer, a wine cooler, a glass of wine, a shot of liquor, or a mixed drink.

With these definitions in mind, what is the LARGEST number of drinks (you/name) had in any SINGLE day during the past 12 months--none, between one and three, four to ten, eleven to twenty, or more than twenty drinks in a single day?

IF RESPONDENT VOLUNTEERS “I NEVER DRINK (HE/SHE) NEVER DRINKS,” MARK “NONE”

- (1) None
  - (2) 1-3
  - (3) 4-10,
  - (4) 11-20
  - (5) More than 20
- 

---

851a THE NEXT QUESTIONS ARE AWKWARDLY WORDED. READ SLOWLY.

In the past 12 months, was there ever a time when (your/name's) drinking or being hung over interfered with (your/his/her) work at school, or a job, or at home?

- (1) Yes
  - (2) No
  - (3) casual/social drinker (VOLUNTEERED)
-

---

851b FLASHCARD Q1

How often--once or twice, between 3 and 5 times, 6 to 10 times, 11 to 20 times, or more than 20 times in the past year?

(refer to: (your/name's) drinking or being hung over interfered with (your/his/her) work at school, or a job, or at home)

- (1) Once or Twice
  - (2) Between 3 and 5 times
  - (3) Between 6 and 10 times
  - (4) Between 11 and 20 times
  - (5) More than 20 times
- 

---

**DO NOT ASK THESE QUESTIONS OF PROXIES**

---

852a

During the past 12 months, were you ever under the influence of alcohol in a situation where you could get hurt--like when driving a car or boat, using knives or guns or machinery, or anything else?

- (1) Yes
  - (2) No
  - (3) casual/social drinker (VOLUNTEERED)
- 

---

852b

During the past 12 months, did you have any emotional or psychological problems from using alcohol--such as feeling uninterested in things, feeling depressed, suspicious of people, paranoid, or having strange ideas?

- (1) Yes
  - (2) No
  - (3) casual/social drinker (VOLUNTEERED)
-

---

852c

During the past 12 months, did you have such a strong desire or urge to drink that you could not keep from drinking?

- (1) Yes
- (2) No
- (3) casual/social drinker (VOLUNTEERED)

—

---

852d

During the past 12 months, did you have a period of a month or more when you spent a great deal of time drinking or getting over the effects of alcohol?

- (1) Yes
- (2) No
- (3) casual/social drinker (VOLUNTEERED)

—

---

852e

During the past 12 months, did you ever have more to drink than you intended to, or did you drink much longer than you intended to?

- (1) Yes
- (2) No
- (3) casual/social drinker (VOLUNTEERED)

—

---

852f

**FLASHCARD Q1**

How often--once or twice, between 3 and 5 times, 6 to 10 times, 11 to 20 times, or more than 20 times in the past year?

(refer: did you ever have more to drink than you intended to, or did you drink much longer than you intended to)

- (1) Once or Twice
  - (2) Between 3 and 5 times
  - (3) Between 6 and 10 times
  - (4) Between 11 and 20 times
  - (5) More than 20 times
- 

---

853

During the past 12 months, was there ever a time when you had to drink much more than you used to get the same effect you wanted?

- (1) Yes
  - (2) No
- 

---

855a **FLASHCARD Q2**

The next questions are about (your/name's) use of drugs on (your/his/her) own. By "on (your/his/her) own" we mean either without a doctor's prescription, in larger amounts than prescribed, or for a longer period than prescribed.

With this definition in mind, did (you/name) ever use any of the following drugs **ON (your/his/her) OWN** during the past 12 months?

sedatives, including either barbiturates or sleeping pills on (your/his/her) own? (e.g. Seconal, Halcion, Methaqualone)

- (1) Yes
  - (2) No
-

---

855b

(How about/During the past 12 months, did (you/name) use) tranquilizers or “nerve pills” on (your/his/her) own? (e.g. Librium, Valium, Ativan, Meprobamate, Xanax)

(1) Yes

(2) No

—

---

855c

(How about/During the past 12 months, did (you/name) use) amphetamines or other stimulants on (your/his/her) own? (e.g. Methamphetamine, Preludin, Dexedrine, Ritalin, “Speed”)

(1) Yes

(2) No

—

---

855d

(How about/During the past 12 months, did (you/name) use) analgesics or other prescription painkillers on (your/his/her) own?  
(NOTE: this does not include normal use of aspirin, tylenol without codeine, etc, but does include use of tylenol with codeine and other Rx painkillers like Demerol, Darvon, Percodan, Codeine, Morphine, and Methadone)

IF NECESSARY, CLARIFY: “BY’ ON (YOUR/HIS/HER) OWN’ WE MEAN EITHER WITHOUT A DOCTOR’S PRESCRIPTION, IN LARGER AMOUNTS THAN PRESCRIBED, OR FOR A LONGER PERIOD THAN PRESCRIBED.”

(1) Yes

(2) No

—

---

855e

(How about/During the past 12 months, did (you/name) use inhalants that (you/name) sniff or breathe to get high or to feel good? (e.g. Amylnitrate, Freon, Nitrous Oxide (“Whippets”), Gasoline, Spray paint)

(1) Yes

(2) No

—

---

855f

(How about/During the past 12 months, did (you/name) use marijuana or hashish?

(1) Yes

(2) No

—

---

855g

(How about/During the past 12 months, did (you/name) use cocaine or crack or free base?

(1) Yes

(2) No

—

---

855h

(How about/During the past 12 months, did (you/name) use LSD or other hallucinogens (e.g. PCP, angel dust, peyote, ecstasy (MDMA), mescaline)

(1) Yes

(2) No

—

---

855i

(How about/During the past 12 months, did (you/name) use heroin?)

(1) Yes

(2) No

—

---

856a

THE NEXT QUESTIONS ARE AWKWARDLY WORDED. READ SLOWLY.

In the past 12 months, did (your/name's) use of (DRUG/any of these substances) ever interfere with your work at school, or a job, or at home?

(1) Yes

(2) No

—

---

856b **FLASHCARD Q1**

How often--once or twice, between 3 and 5 times, 6 to 10 times, 11 to 20 times, or more than 20 times in the past year?

(1) Once or Twice

(2) Between 3 and 5 times

(3) Between 6 and 10 times

(4) Between 11 and 20 times

(5) More than 20 times

—

---

**DO NOT ASK THESE QUESTIONS OF PROXIES**

---

857a

During the past 12 months, were you ever under the influence of (name of drug mentioned in 855 series/any of these substances) in a situation where you could get hurt - like when driving a car or boat, using knives or guns or machinery, or anything else?

(1) Yes

(2) No

—

---

857b

During the past 12 months, did you have any emotional or psychological problems from using (name of drug mentioned in 855 series/any of these substances) -- such as feeling uninterested in things, feeling depressed, suspicious of people, paranoid, or having strange ideas?

(1) Yes

(2) No

—

---

857c

During the past 12 months, did you have such a strong desire or urge to use (name of drug mentioned in 855 series/any of these substances) that you could not keep from using it?

(1) Yes

(2) No

—

---

857d

During the past 12 months, did you have a period of a month or more when you spent a great deal of time using (name of drug mentioned in 855 series/any of these substances) or getting over (its/their) effects?

- (1) Yes
- (2) No

—

---

857e

During the past 12 months, did you ever use much larger amounts of (name of drug mentioned in 855 series/any of these substances) than you intended to or did you use (it/them) for a longer period of time than you intended to?

- (1) Yes
- (2) No

—

---

857f

**FLASHCARD Q1**

How often -- once or twice, between 3 and 5 times, 6 to 10 times, 11 to 20 times, or more than 20 times in the past year?

- (1) Once or Twice
- (2) Between 3 and 5 times
- (3) Between 6 and 10 times
- (4) Between 11 and 20 times
- (5) More than 20 times

—

---

858

During the past 12 months, was there ever a time when you had to use more (name of drug mentioned in 855 series/any of these substances) than you used to get the same effect you wanted?

(1) Yes

(2) No

—

---

## ***FUNCTIONAL LIMITATION AND DISABILITY***

---

### **NHLTH**

These next few questions are about (your/name's) health.

Would you say (your/his/her) health in general is excellent, very good, good, fair, or poor?

- (1) Excellent
  - (2) Very good
  - (3) Good
  - (4) Fair
  - (5) Poor
- 

---

### **LMTSCHL**

Because of a physical, learning, or mental health condition, (do/does) (you/name) currently have any limitation in (your/his/her) ability to do regular school work?

- (1) Yes
  - (2) No
- 

---

### **SPECED**

During the past 12 months, that is, since (month, year), did (you/name) receive any special education services?

- (1) Yes
  - (2) No
-

---

DIFSEE

(Do/Does) (you/name) have difficulty seeing the words and letters in ordinary newspaper print even wearing glasses or contact lenses?

- (1) Yes
- (2) No

—

---

PAYRX

Did you or anyone in this household have any expenses for prescription medicines for (yourself/name) last month?

(1) Yes

(2) No

—

---

WHTPARX

Not counting amounts that will be reimbursed by insurance, how much was paid for (your/name's) prescription medicines last month?

\$\_\_\_\_\_.00

---

REDFRERX

Did (you/name) receive any of these prescription medicines at a reduced rate or for free because (your/his/her) income was low?

(1) Yes

(2) No

—

---

## *HEALTH INSURANCE*

---

950 **FLASHCARD R**

This is a list of different types of health insurance coverage. Which type of health insurance, if any, (were you/was name) covered by at any time between January and December 1998?

ENTER EACH TYPE MENTIONED OR "N" FOR "NO MORE" \_\_\_\_\_  
TO "UNMARK" AN ENTRY, RE-ENTER THE NUMBER

- 1. Employer-Provided Plan
- 2. Union-Provided Plan
- 3. A plan purchased directly from an insurance company not related to current or past employer (including "Medigap")
- 4. (fill Medicaid)
- 5. Medicare, or another health plan paid for by Medicare
- 6. TRICARE/CHAMPUS/CHAMPVA or military health
- 7. Indian Health Service
- 8. (Stateplan)
- 9. Another government program
- 10. A plan of someone **not living** in this household
- 11. **Not covered** by any kind of health insurance **for the entire year**

976 **FLASHCARD S**

Which answer on this card best describes the reason why (you/name) (weren't/wasn't) covered by health insurance in 1998?

- (1) Too expensive; can't afford health insurance.
  - (2) No health insurance offered by employer of self, spouse, or parent
  - (3) Not working at a job long enough to qualify
  - (4) Job layoff, job loss, or any reason related to unemployment
  - (5) Not eligible because working part time or temporary job
  - (6) Can't obtain insurance because of poor health, illness, age, or pre-existing condition
  - (7) Dissatisfied with previous insurance OR don't believe in insurance
  - (8) Have been healthy; not much sickness in family; haven't needed health insurance
  - (9) Able to go to VA or military hospital for medical care
  - (10) Covered by some other health plan, such as Medicaid
  - (11) No longer covered by parents' policy
  - (12) Other
- 

---

977

(Do you/Does name) CURRENTLY have any type of health insurance?

- (1) Yes
  - (2) No
-

---

978 **FLASHCARD R**

What type of insurance (are you/is name) currently covered by?

**MARK ALL THAT APPLY ENTER "N" WHEN NO MORE \_\_\_\_\_  
TO "UNMARK" AN ENTRY, RE-ENTER THE NUMBER**

- 1. Employer-Provided Plan
- 2. Union-Provided Plan
- 3. A plan purchased directly from an insurance company not related to current or past employer (including "Medigap")
- 4. (Medicaid/or state name)
- 5. Medicare, or another health plan paid for by Medicare
- 6. TRICARE/CHAMPUS/CHAMPVA or military health
- 7. Indian Health Service
- 8. (STATE PLAN)
- 9. Another government health plan
- 10. A plan of someone not living in this household

---

***HEALTH CARE UTILIZATION WHILE UNINSURED***

---

980

I have recorded that (you/name) did not have health insurance for (number of uninsured months) months of 1998. Is that correct?

(1) Yes

(2) No

—

---

981

The next set of questions deal with when (you/name) (were/was) uninsured. Did (you/name) go to a doctor, nurse, or other health care provider at all while not insured in 1998?

(1) Yes

(2) No

—

---

982

Did (you/name) receive treatment for an illness or injury while uninsured in 1998?

(1) Yes

(2) No

—

---

983

Did (you/name) receive any routine or preventive care, such as a checkup, (prenatal care,) immunizations, or family planning while uninsured in 1998?

(1) Yes

(2) No

—

---

984

Did (you/name) receive treatment for a drug or alcohol problem while uninsured in 1998?

- (1) Yes
- (2) No

—

---

985

Where did (you/name) go to get those health care services?

MARK ALL THAT APPLY. ENTER "N" WHEN NO MORE \_\_\_\_\_

- \_\_\_ (1) Clinic, or Public Health Department
- \_\_\_ (2) Emergency room
- \_\_\_ (3) Doctor's office or an office at the hospital
- \_\_\_ (4) Someplace else

---

986

Were these services free, or did (you/name) have to pay for them?

- (1) Free
- (2) Paid
- (3) Both, some free, some paid for

—

---

987. Do you think (you/name) paid the full price for these services or do you think (you/name) paid a reduce price?

- (1) Full price
- (2) Reduced price
- (3) Both

—

Did someone at the (location) ask what your income was before the cost of the services was determined?

- (1) Yes
- (2) No
- (3) Sometimes

—

---

## ***FOOD EXPENDITURES***

---

990a These next questions are about the food eaten in your household in the last 12 months, since (current month) 1998, and whether you were able to afford the food you need.

Thinking about all the places (you shop/your household shops) for food – for example, the supermarket, warehouse clubs, convenience stores, bakeries, produce stands – about how much does your household usually spend per week on groceries? Please include any purchases made with food stamps.

ENTER “X” IF RANGE GIVEN \$\_\_\_\_\_ (ENTER RANGE \$\_\_\_ to \$\_\_\_)

READ IF NECESSARY: Is that per week, every two weeks or every month?

- <1> week
  - <2> every two weeks
  - <3> every month
- \_\_\_\_\_

---

991 How much of the (\$ amount/\$ amount to \$ amount) was for non-food items, such as pet food, paper products, detergents, or cleaning supplies?

ENTER “X” IF RANGE GIVEN \$\_\_\_\_\_ (ENTER RANGE \$\_\_\_ to \$\_\_\_)

---

992a About how much (do you/does your household) usually spend for meals or snacks at restaurants, fast food places, cafeterias, and vending machines? Please provide either a weekly or monthly amount.

ENTER “X” IF RANGE GIVEN \$\_\_\_\_\_ (ENTER RANGE \$\_\_\_ to \$\_\_\_)

Is that per week or per month?

- <1> week
  - <2> month
- \_\_\_\_\_

---

***FOOD SECURITY***

---

**1000 FLASHCARD T**

Which of these statements best describes the food eaten in your household in the last 12 months:

**IF NECESSARY: READ CATEGORIES**

- (1) (I/We) have enough to eat and the kinds of food (I/we) want
  - (2) (I/We) have enough to eat but not always the kinds of food (I/we) want
  - (3) Sometimes (I/we) don't have enough to eat, or
  - (4) Often (I/we) don't have enough to eat
  - (H) Help
- 

---

**1001** Here are some reasons why people don't always have enough to eat. For each one, please tell me if that is a reason why YOU don't always have enough to eat.

**READ LIST**

(H) help

Not enough money for food	(1) Yes	(2) No	—
Too hard to get to the store	(1) Yes	(2) No	—
Not able to cook or eat because of health problems	(1) Yes	(2) No	—
No working stove or refrigerator	(1) Yes	(2) No	—

---

1003. Now I'm going to read you several statements that people have made about their food situation. For these statements, please tell me whether the statement was OFTEN, SOMETIMES, or NEVER true for (you/your household) in the last 12 months.

The first statement is "(I/We) worried whether (my/our) food would run out before (I/we) got money to buy more." Was that often, sometimes, or never true for (you/your household) in the last 12 months?

- (1) Often true
  - (2) Sometimes true
  - (3) Never true
- 

---

1004 "The food that (I/we) bought just didn't last, and (I/we) didn't have money to get more." Was that often, sometimes, or never true for (you/your household) in the last 12 months?

- (1) Often true
  - (2) Sometimes true
  - (3) Never true
- 

---

1005 "(I/we) couldn't afford to eat balanced meals." Was that often, sometimes, or never true for (you/your household) in the last 12 months?

- (1) Often true
  - (2) Sometimes true
  - (3) Never true
-

---

1007 "(I/we) relied on only a few kinds of low-cost food to feed (name/the children) because (I was/we were) running out of money to buy food." Was that often, sometimes, or never true for (you/your household)in the last 12 months?

- (1) Often true
- (2) Sometimes true
- (3) Never true

—

---

1008 "(I/We) couldn't feed (name/the children) a balanced meal, because (I/we)couldn't afford that." Was that often, sometimes, or never true for (you/your household)in the last 12 months?

- (1) Often true
- (2) Sometimes true
- (3) Never true

—

---

1009 "(Name was/The children were) not eating enough because (I/we) just couldn't afford enough food." Was that often, sometimes, or never true for(you/your household) in the last 12 months?

- (1) Often true
- (2) Sometimes true
- (3) Never true

—

---

1010 In the last 12 months, since (MONTH YEAR) 1998 did (you/you or other adults in your household) ever cut the size of your meals or skip meals because there wasn't enough money for food?

- (1) Yes
- (2) No
- (H) Help

—

---

1011 How often did this happen---almost every month, some months but not every month, or in only 1 or 2 months?

- (1) Almost every month
- (2) Some months but not every month
- (3) Only 1 or 2 months

—

---

1012 In the last 12 months, did you ever eat less than you felt you should because there wasn't enough money to buy food?

- (1) Yes
- (2) No

—

---

1013 In the last 12 months, were you ever hungry but didn't eat because you couldn't afford enough food?

- (1) Yes
- (2) No

—

---

1014 In the last 12 months, did you lose weight because you didn't have enough money for food?

- (1) Yes
- (2) No

—

---

1015 In the last 12 months, did (you/you or other adults in your household) ever not eat for a whole day because there wasn't enough money for food?

(1) Yes

(2) No

—

---

1016 How often did this happen---almost every month, some months but not every month, or in only 1 or 2 months?

(1) Almost every month

(2) Some months but not every month

(3) Only 1 or 2 months

—

---

1018 The next questions are about children living in the household who are under 18 years old.

In the last 12 months, since (MONTH YEAR) 1998, did you ever cut the size of (child's first name/any of the children's) meals because there wasn't enough money for food?

(1) Yes

(2) No

—

---

1019 In the last 12 months, did (child's first name/any of the children) ever skip a meal because there wasn't enough money for food?

(1) Yes

(2) No

—

---

1020 How often did this happen---almost every month, some months but not every month, or in only 1 or 2 months?

- (1) Almost every month
- (2) Some months but not every month
- (3) Only 1 or 2 months

—

---

1021 In the last 12 months, (was child's first name/were any of the children) ever hungry but you just couldn't afford more food?

- (1) Yes
- (2) No

—

---

1022 In the last 12 months, did (child's first name/any of the children) ever not eat for a whole day because there wasn't enough money for food?

- (1) Yes
- (2) No
- (H) Help

—

---

1023 In the last 12 months did (you/you or other adults in your household) ever get emergency food from a church, a food pantry, or food bank?

- (1) Yes
- (2) No

—

---

1024 How often did this happen - almost every month, some months but not every month, or in only 1 or 2 months?

- (1) Almost every month
- (2) Some months but not every month
- (3) Only 1 or 2 months

—

1025 In the last 12 months, did (you/you or other adults in your household) ever eat any meals at a soup kitchen?

(1) Yes

(2) No

—

---

---

## *CHILD-RELATED QUESTIONS*

---

**(Ask questions about children under 18 first. Then ask appropriate questions about children 18-20 years old.)**

---

PICK\_SUBJECT

FR: WHICH OF THE DESIGNATED PARENTS(OR SPOUSE) IN THIS HOUSEHOLD DO YOU WANT TO INTERVIEW? (ENTER LINE NUMBER OR "N" FOR NO MORE)

LINE NO: \_\_

---

PICK\_RESP

Is (name) available to answer a few questions now?

- (1) Yes
- (2) No

—

---

EXP

FR: Since the designated person is not available, you can either back up and pick another person, or skip to the next section of the questionnaire at this time.

If you skip ahead, you can return to the "Pick Subject" screen at any time, by going to the jump menu (press F4), and entering the number for "Pick Subject."

- (1) Go back to "Pick Subject" screen
- (2) Skip to next section of questionnaire

---

## *CHILDREN'S SCHOOL ENROLLMENT*

---

### PRESCHOL

At any time between June 1998 and May, 1999 was (name) enrolled in preschool?

INCLUDE PRE-KINDERGARTEN AS WELL AS PRESCHOOL.

(1) Yes

(2) No

—

---

### PREMONTH

Since June 1998, which months was (name) enrolled in preschool?

  - (4) About once a week
  - (5) Everyday or almost everyday
- 

---

1512B How often does (child) visit a museum, such as a scientific, art, historical, or children's museum?

READ RESPONSES

- (1) Never
  - (2) Several times a year
  - (3) About once a month
  - (4) About once a week
  - (5) Everyday or almost everyday
-

---

1512C About how often does (child) read for enjoyment?

READ RESPONSES

- (1) Never
  - (2) Several times a year
  - (3) About once a month
  - (4) About once a week
  - (5) Everyday or almost everyday
- 

---

1512D About how often does (child) go to the library to read or check out books?

READ RESPONSES

- (1) Never
  - (2) Several times a year
  - (3) About once a month
  - (4) About once a week
  - (5) Everyday or almost everyday
- 

---

1512E During the past year, did (child) go on an overnight trip or retreat with you, with family or friends, or attend an overnight camp?

- <1> Yes
  - <2> No
-

---

1512H How often do you or any family member go with (child) somewhere -- like out to the movies, or the park, to a sports event, or to a shopping mall?

READ RESPONSES

- (1) Never
  - (2) Several times a year
  - (3) About once a month
  - (4) About once a week
  - (5) Everyday or almost everyday
- 

---

1512I How often does (child) visit a museum, such as a scientific, art, or historical museum?

READ RESPONSES

- (1) Never
  - (2) Several times a year
  - (3) About once a month
  - (4) About once a week
  - (5) Everyday or almost everyday
- 

---

1512J About how often does (child) read?

READ RESPONSES

- (1) Never
  - (2) Several times a year
  - (3) About once a month
  - (4) About once a week
  - (5) Everyday or almost everyday
-

---

1512K About how often does (child) go to the library to read or check out books?

READ RESPONSES

- (1) Never
  - (2) Several times a year
  - (3) About once a month
  - (4) About once a week
  - (5) Everyday or almost everyday
- 

---

1512L During the past year, did (child) go on an overnight trip or retreat with you, with family or friends, or attend an overnight camp?

- <1> Yes
  - <2> No
- 

---

1514 The next few questions ask about your child's progress in school.

Based on your knowledge of (child)'s schoolwork, including (his/her) report cards, how has (he/she) been doing in school, overall? Would you say very well, well, average, below average, or not well at all?

- <1> Very well
  - <2> Well
  - <3> Average
  - <4> Below average
  - <5> Not well at all
  - <6> Child not attending school
-

---

1515a For each of the following statements, please tell me if you think it is often true, sometimes true, or not true. Would you say (child):

Cares about doing well in school?

READ RESPONSES

- <1> Often true
- <2> Sometimes true
- <3> Not true

—

---

1515b Only works on schoolwork when forced to?

READ RESPONSES

- <1> Often true
- <2> Sometimes true
- <3> Not true

—

---

1515c Does just enough schoolwork to get by?

READ RESPONSES

- <1> Often true
- <2> Sometimes true
- <3> Not true

—

---

1515d Always does homework?

READ RESPONSES

- <1> Often true
- <2> Sometimes true
- <3> Not true

—

---

1515e During the school year, how many times a week does (child) usually get (his/her) homework done on time?

READ RESPONSES

- (1) Never
  - (2) Less than once a week
  - (3) 1-2 times a week
  - (4) 3-4 times a week
  - (5) Everyday or almost every day
- 

---

1515f During the school year, how often is ( child's name) usual late for school?

READ RESPONSES

- (1) Never
  - (2) Less than once a week
  - (3) 1-2 times a week
  - (4) 3-4 times a week
  - (5) Everyday or almost every day
- 

---

1516a I'm going to read some statements about things that may occur in your family. In a typical week, please tell me the number of days.

(Child's) bedtime routine is the same -- never, once or twice a week, three to six times a week, or every day?

- <1> Never
  - <2> Once or twice a week
  - <3> Three to six times a week
  - <4> Every day
-

---

1516b (Child) has breakfast at a regular time?

READ RESPONSES

- <1> Never
  - <2> Once or twice a week
  - <3> Three to six times a week
  - <4> Every day
- 

---

1516c (Child) goes to bed at a regular time.

READ RESPONSES

- <1> Never
  - <2> Once or twice a week
  - <3> Three to six times a week
  - <4> Every day
- 

---

1520a Now I am going to read some statements that describe behavior problems many children have. Please tell me whether each statement has been OFTEN true, SOMETIMES true or NOT true of (child) during the past 3 months.

Has been uncooperative. Has that been OFTEN true, SOMETIMES true, or NOT true of (child) in the past 3 months?

- <1> OFTEN true
  - <2> SOMETIMES true
  - <3> NOT true
-

---

1520b Has trouble getting to sleep.

READ RESPONSES

- <1> OFTEN true
- <2> SOMETIMES true
- <3> NOT true

—

---

1520c Has speech problems.

READ RESPONSES

- <1> OFTEN true
- <2> SOMETIMES true
- <3> NOT true

—

---

1520d Is unhappy, sad, or depressed.

READ RESPONSES

- <1> OFTEN true
- <2> SOMETIMES true
- <3> NOT true

—

---

1520e Has temper tantrums or a hot temper.

READ RESPONSES

- <1> OFTEN true
- <2> SOMETIMES true
- <3> NOT true

—

---

1520f Has been nervous or high strung?

READ RESPONSES

- <1> OFTEN true
  - <2> SOMETIMES true
  - <3> NOT true
- 

---

1521a Now I am going to read some statements that describe behavior problems many children have. Please tell me whether each statement has been OFTEN true, SOMETIMES true or NOT true of (child) during the past 3 months.

Has been nervous, high strung, or tense.

- <1> OFTEN true
  - <2> SOMETIMES true
  - <3> NOT true
- 

---

## ***MARITAL RELATIONSHIP AND CONFLICT***

---

### **BEGIN SELF ADMINISTERED**

---

1599

I am going to turn the computer around and let you enter your answers to these last few questions yourself. After typing the number of your answer, press ENTER to proceed to the next question.

PRESS ENTER TO PROCEED AND THEN TURN THE COMPUTER  
TOWARD THE RESPONDENT.

---

Q1600

Taking things all together, how happy are you with your relationship with your (spouse/partner) -- are you completely happy, mostly happy, somewhat happy, or not too happy?

- (1) Completely happy
  - (2) Mostly happy
  - (3) Somewhat happy
  - (4) Not too happy
- 
- 

Q1601

How often have you and your (spouse/partner) discussed or considered separating during the past few months -- often, sometimes, hardly ever, or never?

- (1) Often
  - (2) Sometimes
  - (3) Hardly ever
  - (4) Never
-

---

1601B

Sometimes arguments between partners become physical. During the last year, has this happened in arguments between you and your (spouse/partner)?

(1) Yes

(2) No

—

---

## *PARENTAL DEPRESSION SCALE*

---

Q1602

The following questions are asked to find out about feelings you may have experienced over the past 30 days. There are no right or wrong answers. Choose the answer that best describes how often you felt or behaved this way for each statement during the past 30 days.

During the past 30 days, how often did you feel so sad that nothing could cheer you up? Would you say:

- (1) All of the time
- (2) Most of the time
- (3) Some of the time
- (4) A little of the time
- (5) None of the time

—

---

Q1604

During the past 30 days, how often did you feel nervous? Would you say:

- (1) All of the time
- (2) Most of the time
- (3) Some of the time
- (4) A little of the time
- (5) None of the time

—

---

Q1605

During the past 30 days, how often did you feel restless or fidgety? Would you say:

- (1) All of the time
  - (2) Most of the time
  - (3) Some of the time
  - (4) A little of the time
  - (5) None of the time
- 

---

Q1606

During the past 30 days, how often did you feel hopeless? Would you say:

- (1) All of the time
  - (2) Most of the time
  - (3) Some of the time
  - (4) A little of the time
  - (5) None of the time
- 

---

Q1607

During the past 30 days, how often did you feel that everything was an effort? Would you say:

- (1) All of the time
  - (2) Most of the time
  - (3) Some of the time
  - (4) A little of the time
  - (5) None of the time
-

---

Q1608

During the past 30 days, how often did you feel worthless? Would you say:

- (1) All of the time
  - (2) Most of the time
  - (3) Some of the time
  - (4) A little of the time
  - (5) None of the time
- 

---

Q1609

You just answered questions about a number of feelings you may have had during the past 30 days. Altogether, how **much** did these feelings interfere with your life or activities: a lot, some, a little, or not at all?

- (1) A lot
  - (2) Some
  - (3) A little
  - (4) Not at all
- 

---

1609b

You have completed these questions. Please turn the computer back to the interviewer.

# APPENDIX D

## Countries and Areas of the World Variable NATVTY

### List A -- Alphabetical List of Areas of the World and Countries

If the specific country reported was not on the interviewer's list, or if the respondent did not know the specific country, the following codes for broad areas of the world were available for coding:

<b>Code</b>	<b>Name</b>
468	Africa: North
462	Africa: Other
245	Asia
353	Caribbean
318	Central America
148	Europe
252	Middle East
304	North America
527	Pacific Islands
389	South America
555	Elsewhere (includes country not known)

The countries (or areas) shown below were coded separately, if reported.

<b>Code</b>	<b>Name</b>	<b>Code</b>	<b>Name</b>
200	Afghanistan	213	Iraq
60	American Samoa	119	Ireland/Eire
375	Argentina	214	Israel
185	Armenia	120	Italy
501	Australia	343	Jamaica
102	Austria	215	Japan
130	Azores	216	Jordan
333	Bahamas	427	Kenya
202	Bangladesh	217/218	Korea/South Korea
334	Barbados	221	Laos
103	Belgium	183	Latvia
310	Belize	222	Lebanon
300	Bermuda	184	Lithuania
376	Bolivia	224	Malaysia
377	Brazil	315	Mexico
205	Burma	436	Morocco
206	Cambodia	126	Netherlands

<b>Code</b>	<b>Name</b>	<b>Code</b>	<b>Name</b>
301	Canada	514	New Zealand
378	Chile	316	Nicaragua
207	China	440	Nigeria
379	Colombia	142	Northern Ireland
311	Costa Rica	127	Norway
337	Cuba	229	Pakistan
155	Czech Republic	253	Palestine
105	Czechoslovakia	317	Panama
106	Denmark	385	Peru
339	Dominican Republic	231	Philippines
338	Dominica	128	Poland
380	Ecuador	129	Portugal
415	Egypt	72	Puerto Rico
312	El Salvador	132	Romania
139	England	192	Russia
417	Ethiopia	233	Saudi Arabia
507	Fiji	140	Scotland
108	Finland	234	Singapore
109	France	156	Slovakia/Slovak Republic
110	Germany	449	South Africa
421	Ghana	134	Spain
138	Great Britain	136	Sweden
116	Greece	137	Switzerland
340	Grenada	237	Syria
66	Guam	238	Taiwan
313	Guatemala	239	Thailand
383	Guyana	351	Trinidad & Tobago
342	Haiti	240	Turkey
126	Holland	57	United States
314	Honduras	78	U.S. Virgin Islands
209	Hong Kong	180	USSR
117	Hungary	195	Ukraine
210	India	387	Uruguay
211	Indonesia	388	Venezuela
212	Iran	242	Vietnam
		147	Yugoslavia

## List B. Numeric List of Countries and Areas of the World

The following list of countries/areas is in numeric order by code.

Code	Name	Code	Name
57	United States	231	Philippines
60	American Samoa	233	Saudi Arabia
66	Guam	234	Singapore
72	Puerto Rico	237	Syria
78	U.S. Virgin Islands	238	Taiwan
96	Outlying areas of U.S. (Guam, USVI, PR etc.)	239	Thailand
102	Austria	240	Turkey
103	Belgium	242	Vietnam
105	Czechoslovakia	245	Asia
106	Denmark	252	Middle East
108	Finland	253	Palestine
109	France	300	Bermuda
110	Germany	301	Canada
116	Greece	304	North America
117	Hungary	310	Belize
119	Ireland/Eire	311	Costa Rica
120	Italy	312	El Salvador
126	Holland	313	Guatemala
126	Netherlands	314	Honduras
127	Norway	315	Mexico
128	Poland	316	Nicaragua
129	Portugal	317	Panama
130	Azores	318	Central America
132	Romania	333	Bahamas
134	Spain	334	Barbados
136	Sweden	337	Cuba
137	Switzerland	338	Dominica
138	Great Britain	339	Dominican Republic
139	England	340	Grenada
140	Scotland	342	Haiti
142	Northern Ireland	343	Jamaica

- SPD2003-2: Hisnanick, J. and K. Walker. 2003. "Assessing Employment Outcomes from the Survey of Program Dynamics Second Longitudinal File: What type of jobs do welfare leavers get?." Presented at the 2003 Joint Statistical Meetings, American Statistical Association, San Francisco, CA, August 2-5, 2003

### **SIPP Working Papers**

The SIPP working papers are available on the Census Bureau's Internet site <<http://www.census.gov>>. A subset of the SIPP working papers can also be found on the SIPP Internet site <<http://www.sipp.census.gov/sipp>>.

# APPENDIX F

## User Notes for the SPD 1999 Minimally Edited Cross-sectional File

This section contains information relevant to the Survey of Program Dynamics 1999 minimally edited Cross-sectional File. For an updated list of user notes always refer to the U.S. Census Bureau's SPD Internet site at <http://www.sipp.census.gov/spd>. The user notes are part of the technical documentation which is found under "SPD Publications". In addition, some user notes are found under "SPD News User Notes". The Internet site will be updated as additional user notes become available.

### User Notes for the SPD 1999 Minimally Edited Cross-sectional File

#### *1. General Notes*

The data on the SPD 1999 Cross-sectional public use file is only minimally edited. The demographic variables are longitudinally edited and are indicated with an 'E' or an 'R' in the second right character of the variable name. Additionally, the income amount variables are edited only to the extent that multiple items are used as input to create the recoded amount on the file. All other variables are unedited and are indicated with an "U" in the second right character of the variable name. Variables that are topcoded for confidentiality reasons are indicated with an "T" in the second right character of the variable name.

Blank or missing values for numeric variables are 9-filled (9, 99, 999, 9999, 99999, 999999, 9999999) in the 1999 Cross-sectional Data File. Consequently, during any tabulations/calculations the 9-filled values will be treated as any other numeric data. Prior to calculating univariates or any other tabulations for variables defined as numeric, remove all 9-filled values from the universe to prevent calculation skewing which would produce inaccurate results.

Data users must define the appropriate universe definition for each variable.

#### *2. Demographic Variables - Technical Notes*

The specific notes below address standards for editing relationship to reference person and cases that switch values in the unedited data for sex, vet, and race status. Note that in 1997, using the CPS instrument, Field Representatives could change demographic data that was input since the data provided was from SIPP paper control cards. If the information was incorrect during SIPP, they got a chance to change it in 1997, yet because demographic variables are edited forward from 1994, the edits force the responses to be consistent with the original SIPP data. That is why there is a higher number of imputations for 1997 than for other years.

##### *a. Relationship to Reference Person (RRP)*

An adult must be at least 12 years older than a child who points to them as their designated biological parent.

Same sex partners who report they are married are made unmarried partners if they report being spouses.

People less than 15 years old must be 'never married.'

A person to whom a child points as their designated parent must be at least 15 years old.

A person under 18 years of age cannot be the reference person if their parent is present in the household.

In 1999 through 2002, we edited and output the designated parent pointer for people of all ages, so checks for the age gap between parents and children were done for people of all ages. For 1999, we also used the TYPMOM and TYPDAD variables which indicate whether a parent is a biological, step or adoptive parent. If the parent was identified as a step or adoptive parent, we allowed an otherwise illogical age gap between parent and child since remarriage sometimes creates situations where step parents are not old enough to be the biological parent of their spouse's biological children. Users should note that the edit for RRP, MARITL, SPOUSE, and DESPAR is not truly longitudinal, but checks for consistency in each year cross sectionally. So the RRP values of two people shift over time, even though they are the same people. This happens at times when a later interview gives us more information and we are able to specify the relationship in greater detail—for example, making someone a grandchild rather than other relative.

#### ***b. Age***

We have not filled in DOBYRT for all cases, although users could easily create it using the year and the age. At this point it is filled in for interviews in 1998 and 1999 and 2000.

#### ***c. Sex***

Demographic variables are edited forward in the SPD. So the earliest value for SEX is carried through the entire time the person is interviewed. The imputation variable SEXI (if it =4) will let you know which cases contained contradictory reports over time in the unedited data. Cases which have a record in the 2<sup>nd</sup> longitudinal file were kept the same sex as they were in that file if they reported being a different sex in the 3<sup>rd</sup> longitudinal file unedited data.

#### ***d. Race***

Each person receives one value for RACE, since this is not allowed to change over time. We take the earliest valid value and hold it constant. So for people who changed their reported RACE, we keep the earliest reported race regardless. Note that since we do not allow a value of "other" in the output file, new people who reported "other" are imputed into one of the listed race groups. For people who were already on the file previously, and so have a RACE value, but who report a value different from the one which they have on the SPD 1<sup>st</sup> longitudinal file, we note this by making the value of RACEI=4 for these cases.

#### ***e. NATVTY***

We have added a value of 4 for the imputation flag so that we can indicate cases whose value on the first longitudinal file differs from the value they reported in an earlier year.

## *f. Family*

The family is defined by the Census Bureau as two or more people living together who are related by blood, marriage, or adoption. On this file, it is possible to distinguish primary families (the family containing the household reference person) from related subfamilies and unrelated subfamilies. A related subfamily is either a parent-child(ren) group or married couple who are related to the household reference person. An unrelated subfamily is a parent-child(ren) group or married couple that does not contain the household reference person or anyone related to the household reference person.

## *g. Origin*

Although ORIGIN has been weighted, these data will provide very different estimates of some specific Hispanic subgroups than CPS 1999 data. So these data should probably not be used for analysis of particular Hispanic groups.

## *3. Income Variables*

### *a. Creating spells from the minimally edited data*

Data users must create spells in order to define universes for several income source variables. A spell is the length of time a respondent received an income source. Since some income sources can stop and start throughout the year, the survey allows for up to six individual spells over the course of a year. In reviewing the unedited data at most three spells were consistently reported for all income sources and, hence, only data for up to three spells are provided.

There are four questions for each spell:

- Part A:** What set of circumstances led you to apply?;
- Part B:** Why did you stop receiving the income source?;
- Part C:** What reasons were given for your benefits being cut off?;
- Part D:** What did you do to get by when your family lost benefits?

These questions, Parts A through D, are in reference to when there are distinct starting and stopping points for a time period of interest during a calendar year, rather than to the length or duration of a spell of participation. The following examples provide insight into how spells can be created using the minimally edited 1999 SPD cross-sectional data, as well as when the above questions, Parts A through D, would have been asked in the survey.

It is the convention in longitudinal analysis to construct a spell when there are distinct stopping and starting points, that is you have both right and left censoring. In using the minimally edited 1999 SPD cross-sectional data, to define the first spell, you will need to review the monthly receipt of each income source. For example, if someone said they received Supplemental Security Income (SSI) from February to March (SSIM02, SSIM03 = X) and from October to November (SSIM10, SSIM11=X) and all other months are equal to a blank, then spell one is February to March and spell two is October to November. In this example there is no third spell. For each of these time periods there are distinct starting and stopping points and therefore questions from Parts A through D would have been asked for each spell. However, if someone reported receiving SSI for all months, SSIM01-SSIM12 = X then Parts A through D are not asked, since there is no spell, just a continuing program participation.

Next, consider the situation where there is not a distinct starting point, but a distinct stopping point. Suppose the respondent said they received a source of income, such as SSI in January,

February and March (SSIM01, SSIM02, SSIM03 = X) of the year. Similarly, suppose they reported receiving SSI from October to November (SSIM10, SSIM11 = X). In this situation, the user will need to make further clarification for the universe of respondents to Parts A through D. The first time period, January through March, does not have a distinct starting point and therefore can not be considered a spell. It is unclear when they started to receive this source of income, but it is clear when they stopped receiving it. They could have started receiving it some time in the prior year or years. We don't know when they started to receive, only that they were receiving this income in January. On the other hand, for the second time period, October to November, there is a distinct starting and stopping time, so we have a defined spell. For the first time period, January through March, Part A is not asked because there is not a distinct starting point. However, questions from Parts B, C and D are asked, since there is a distinct stopping time. For the time period October to November, there is a distinct starting and stopping point, which would count as a spell for the calendar year, therefore questions from Parts A through D would be asked for this spell.

Finally, consider the situation when the respondent said they received the source of income in January and December of the same year. If someone received SSI from January to March (SSIM01, SSIM02, SSIM03 = X) and from November to December (SSIM11, SSIM12= X), Part A questions would apply only to the time period covering November to December. Why? Because there is a distinct starting time, November, but not a distinct ending time. Since there was no distinct stopping time for this time period, Part B through D would not apply. On the other hand, for the January to March time period, since there is no distinct starting time, but a distinct stopping time, Part A questions would not apply, but Parts B through D questions would be applicable.

***b. Unemployment Compensation (V201) and Social Security payment on behalf of a child (V209) variables***

UCYNU9 - Did you receive unemployment compensation payments at any time during 1998?, Yes/No (V201)

SSCHYNU9 -Did you receive any separate Social Security payment on behalf of a child?  
Yes/No (V209)

In the process of preparing the 1999 minimally edited cross-sectional data, an error in the data collection instrument was uncovered. In the process of collecting the data, if a respondent said "No" to question V209, 'Did they receive Social Security payments on behalf of a minor or dependent child in the household', the value for V201 was set to a "2" rather than the value of V209 being set to a "2". Hence, the minimally edited cross-sectional data for 1999 will be more negatively biased in regard to responses for V201 and be more positively biased in the responses reported for V209. The reported values for UCYNU9 and SSCHYNU9 should be used with caution and other minimally edited variables should be used, whenever possible, to investigate issues related to receipt of unemployment compensation and receipt of social security payments on behalf of a minor or dependent child.

***c. Spells of Program Participation - Variables with "No Values" reported.***

For the 1999 SPD, the data instrument only collected data on the total amount of cash assistance received for the calendar year. This also holds true for questions dealing with the duration of receipt of the cash assistance, as well as other questions dealing with applying for assistance, the reasons they are currently not receiving cash assistance, loss of cash assistance and how they got

by after losing cash assistance. Because of this error the following variables in the minimally edited 1999 SPD cross-sectional file have “no values” reported.

OA1A03U9-OA1A05U9, & OA1A07U9 - OA1A09U9 -- why applied for other assistance, spell 1  
OA2A01U9-OA2A06U9, OA2A08U9 & OA2A09U9 -- why applied for other assistance, spell 2  
OA3A01U9-OA3A10U9 -- why applied for other assistance, spell 3  
OA3STPU9 -- Reason stopped other assistance, spell 3  
OA1C02U9, OA1C04U9, & OA1C06U9 - OA1C13U9 -- Reason cut-off other assistance, spell 1  
OA2C01U9-OA2C13U9 -- Reason cut-off other assistance, spell 2  
OA3C01U9-OA3C13U9 -- Reason cut-off other assistance, spell 3  
OA1D03U9, OA1D04U9, & OA1D06U9 - OA1D12U9 -- How got by when cut-off other assistance, spell 1  
OA2D01U9-OA2D13U9 -- How got by when cut-off other assistance, spell 2  
OA3D01U9-OA3D13U9-- How got by when cut-off other assistance, spell 3

The following variables in the minimally edited 1999 cross-sectional file have “no values” reported. This is due to the nature of the question, but more importantly, the nature of the program, WIC, and any spells of program participation in calendar year 1998. No one reported three spells of WIC participation during the year.

WC3D01U9-WC3D13U9 -- How got by when cut-off from WIC, spell 3

#### ***4. General note - Child and Family Well-Being Variables***

The SPD 1999 Cross-sectional File is minimally edited. The child and family well-being sections are not edited. Users should take caution to properly define the universe for each item when using the data.

# **APPENDIX G**

## Control Counts

The control counts are a set of frequency distributions for each variable which is included in the documentation.
