## Preliminary: U.S. Imports for Consumption of Steel Products August 2012

The U.S. Census Bureau announced today that preliminary August steel imports were **\$2.6 billion** (**2.2 million** metric tons) compared to the preliminary July totals of \$2.7 billion (2.3 million metric tons).

The August change in steel imports based on metric tonnage reflected decreases primarily in line pipes and hot rolled sheets. Decreases occurred primarily with Korea; increases occurred primarily with Turkey.

The year to date final statistics through July 2012 showed steel imports of 18.5 million metric tons compared with 15.7 million metric tons through July 2011. The largest commodity increases occurred primarily in oil country goods and blooms, billets, and slabs. The largest country increases occurred primarily with Brazil, Russia, and Turkey; decreases occurred primarily with Australia and Mexico.

**Notes:**

**The data in this report are preliminary and subject to revisions.**

*Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details, visit the Foreign Trade Division web site at [www.census.gov/trade](http://www.census.gov/trade). On the website, you can access product by country and country by product tables.*

*The next release is October 23, 2012.*
