ABSTRACT

Survey of Income and Program Participation (SIPP) 1996 Panel, Wave 5 Topical Module Microdata File [machine-readable data file] / conducted by the U.S. Bureau of the Census. -Washington: The Bureau [producer and distributor], 2001.

Type of File:

Microdata; unit of observation is an individual.

Universe Description:

The universe is the resident population of the United States, excluding persons living in institutions and military barracks.

Subject-Matter Description:

The file contains data primarily from the topical module portion of the questionnaire. However, for purposes of matching persons to the core file, which was released separately, the beginning of the file contains identifying information as well as some basic demographic and social characteristics that are also contained in the core file. The identifying information includes sample unit, household address, and entry address identification. Demographic and social characteristics include age, sex, race (White; Black; American Indian, Eskimo, and Aleut; Asian or Pacific Islander), ethnic origin (34 categories including 9 Spanish origin categories), marital status, and education. Data in this topical module file include school enrollment and financing, child support agreements, support for non-household members, adult and child disability, and employer provided health benefits.

The sample consists of 4 rotation groups, each interviewed in a different month from August 1997 to November 1997. For each group the reference period for reporting labor force activity and income is the four calendar months preceding the interview month.

SIPP is a longitudinal survey where each sampled household and each descendent house/old is reinterviewed at 4-month intervals for 12 interviews or "waves." This file contains the results of the **fifth** interview. Unique codes are included on each record to allow linking together the same persons from the preceding and subsequent waves.

Geographic Coverage:

United States. Codes are included for 45 individual States and the District of Columbia, **although the sample was not designed to produce State estimates**. Areas in the SIPP sample in five States are identified in two groups for confidentiality reasons. The file identifies a subsample of metropolitan residents, along with codes for selected metropolitan statistical areas (MSA's) and consolidated metropolitan statistical areas (CMSA's).

Technical Description:

File Structure: Rectangular. Each logical record for a sampled person includes information on the household and family of which the person was a part during each month of the reference period, as well as characteristics of the person.

File Size: 82,829 logical records; 2,044 character logical record length.

File Sort Sequence of Sample Units: Sampling unit identification number by entry address ID and person number within sampling unit.

Reference Materials:

Survey of Income and Program Participation (SIPP) 1996 Panel, Wave 5 Topical Module Microdata File Technical Documentation. The documentation includes this abstract, the data dictionary, an index to the data dictionary, relevant code lists, questionnaire facsimiles, and general information on SIPP.

Survey of Income and Program Participation Users' Guide. *The Users' Guide* contains a general overview of the file as well as chapters on survey design and content, structure and use of cross-sectional files, linking waves and reliability of the data. Additional copies are available from Marketing Services Office, Customer Services Center, Bureau of the Census, Washington, DC 20233.

Related Printed Reports:

Related printed reports include working papers, compilations of papers presented at annual meetings of the American Statistical Association, articles appearing in the *Journal of Economic and Social Measurement*, and reports in the P-70 series of the Current Population Reports.

Related Machine-Readable Data Files:

SIPP files from all Waves of the 1984 through 1993 Panels, and 1996 Panel, Waves 1 through 6 are available from Customer Services Center, Marketing Services Office, Bureau of the Census, Washington, D.C. 20233. Some files (1990 - 1993) may be downloaded in ASCII from the Data Extraction System (DES) SURVEY-ON-CALL at <http://www.census.gov/DES/www/welcome.html> Files (1996 forward) may be downloaded from the Federal Electronic Research and Review Extraction Tool (FERRET) at <http://www.ferret.bls.census.gov/cgi-bin/ferret>

File Availability:

Files are available on CD-ROM. Pricing information is available from Customer Services (301) 457-4100 ([order form](#) attached). This file also may be downloaded from the Federal Electronic Research and Review Extraction Tool (FERRET) at <http://www.ferret.bls.census.gov/cgi-bin/ferret>

Census Bureau Order Form

Use this form to order CD-ROM's, tape-to-CD-ROM, customer products, technical documentation, computer tapes and cartridges, diskettes, and publications sold by Customer Services.

Charge your order: It's easy! MasterCard - VISA
To fax your order: 888-249-7295
Phone orders and special handling: 301-457-4100

Please Type or Print. Prices include regular domestic postage and handling. **International customers, please add 33%.**

FILE INFORMATION

Matching Topical Module File with Core File

Since the core and topical module data are released as separate files, it may be necessary to match the two files. The two files contain the following information for linking purposes.

SSUID	Scrambled sample unit identifier
SPANEL	Panel year
SWAVE	Wave of data collection
SROTATION	Rotation of data collection
TFIPSST - FIPS	State code for the fifth month
EOUTCOME	Interview status code for the fifth month
SHHADID	Household address ID in the fourth reference month
SINTHHID	Household address ID of person in interview month
RFID	Family ID number in month four
RFID2	Family ID excluding related subfamily members
EPPIDX	Person index
EENTAID	Address ID of household where person entered sample
EPPNUM	Person number
EPOPSTAT	Population status based on age in fourth reference month
EPPINTVW	Person's interview status at time of interview
EPPMIS4	Person's fourth month interview status
ESEX	Sex of this person
ERACE	Race of this person
EORIGIN	Origin of this person
EFINWGT	Person weight
ERRP	Household relationship
EMS	Marital status
EPNMON	Person number of mother
EPNDAD	Person number of father
EPNGUARD	Person number of guardian
EPNSPOUS	Person number of spouse
RDESGPNT	Designated parent or guardian flag
TAGE	Age as of last birthday at the end of the fourth month
EEDUCATE	Highest degree received or grade completed

Geographic Coverage

State codes are shown except for five States which are identified in two groups. A subsample of metropolitan residents is identified along with codes for selected metropolitan statistical areas (MSA's) and consolidated metropolitan statistical areas (CMSA's). **The sample was not designed to produce State or MSA/CMSA level estimates.** State codes are primarily useful in relating a respondent's reciprocity of benefits to thresholds which may vary from State to State. MSA/CMSA codes may be used in relating respondent characteristics with contextual variables.

Identification Number System

The SIPP identification scheme is designed to uniquely identify individuals in each wave, provide a means of linking the same individuals over time, and group individuals into households and families over time.

SIPP 1996 WAVE 5 TOPICAL MODULE

The various components of the identification scheme are listed below:

SSUID	Sample Unit Identification Number
SINTHHID	Address ID
EENTAID	Entry Address ID
EPPPNUM	Person Number

The sample unit identification number was created by scrambling together the PSU, segment, and serial numbers used for Census Bureau administrative purposes. This identifier is constructed the same way on each wave regardless of moves, to enable matching from wave to wave.

The two-digit address ID code identifies each household associated with the same sample unit identification number. The first digit of the address ID code indicates the wave in which that address was first assigned for interview. The second digit sequentially numbers multiple households that have the same serial number. The address ID code is 11 for all sample addresses that are the same as in Wave 1. As SIPP sample persons move to new addresses, new address ID codes are assigned. Any new address to which sample unit members moved during Wave 4 is numbered in the 40's.

The person ID is a five-digit number consisting of the two-digit entry address ID and a three-digit person number. Person numbers 101, 102, etc., are assigned in Wave 1; 201, 202, etc., are assigned to persons added to the roster in Wave 2, and so forth. This five-digit number is not changed or updated, regardless of moves.

The sampling unit serial number and address ID code uniquely identifies each household in any given wave. The sampling unit serial number can link all households in subsequent waves back to the original Wave 1 household.

Topcoding of Income Variables

To protect against the possibility that a user might recognize the identity of a SIPP respondent with very high income, income from every source is "topcoded" so that no individual income amounts above \$150,000 are revealed. While the data dictionary indicates a topcode of 50,000 for monthly income, this topcode will rarely be used. In most cases the monthly income is shown as an individual dollar amount of \$12,500, with \$12,500 actually representing "\$12,500 or more." (the \$150,000 annual income topcode is \$12,500 multiplied by 12 months). Individual monthly amounts above \$12,500 may occasionally be shown if the respondent's income varied considerably from month to month, as long as the average does not exceed \$12,500. For example, if a respondent's income from a single job were concentrated in only one of the four reference months, a figure as high as \$50,000 could be shown. (Income from interest or property have lower topcodes).

Summary income figures on the person, family, and household records are simple sums of the components shown on the file after topcoding, and are not independently topcoded. Thus, a person with high income from several sources (jobs, businesses, property) could have aggregate monthly income well over the topcode for each source. Families and households with a number of high income members could theoretically have aggregate income shown well over \$150,000, though well below the \$1.5 million shown as the highest allowable value in the data dictionary.

The user is cautioned against trying to make much use of the occasional monthly figures above \$12,500, except in calculating aggregates or observing patterns across the 4-month period for a single individual, family, or household. Those units with higher monthly amounts shown are a biased sample of high income units, more likely to include units with income from multiple sources than other units with equally high aggregate income which comes from a single source.

INDEX TO 1996 WAVE 5 TOPICAL MODULE FILES

Key to Concept Labels

ADQ - Adult Disability Variables
 CDQ - Child Disability Variables
 CS - Child Support Paid Variables
 ED - Education Variables
 FA - Family Variables
 HB - Employer Provided Health Benefits Variables
 HH - Household Variables
 PE - Person, Demographic, and Coverage Variables
 SE - School Enrolment and Finance Variables
 SU - Sample Unit Variables
 SUP - Support for Non-Household Variables
 WR - Welfare Reform Variables
 WW - Weighting Variables

<u>Description</u>	<u>Variable</u>	<u>Position</u>

HOW TO USE THE DATA DICTIONARY

The Data Dictionary describes the file contents and provides locations for each variable (record layout of the public-use computer tape file.) The first line ("D" Line) of each data item description gives the variable name, size of the data field, and the begin position of that field. The components include a short mnemonic or field name for use with software packages; field size; starting position; and a description of field contents with possible values.

The next few lines contain descriptive text and any applicable notes. Categorical value codes and labels are given where needed. Comment notes marked by an (*) are provided throughout for the rest of the dictionary components. Comments should be removed from the machine-readable version of the data dictionary before using it to help access the data file.

The first line of each data item description begins with the character "D" (left-justified, two characters). The "D" flag indicates lines in the data dictionary containing the name, size and begin position of each data item. The second line of each data item description begins with the character "T" (left-justified, two characters). The "T" flag indicates lines in the data dictionary containing the category code and short description of the variable. The line beginning with the character "U" describes the universe for that item. Lines containing categorical value codes and labels follow next and begin with the character "V". The special character (.) denotes the start of the value labels. Two examples of data item descriptions follow:

```
D RNOTAKE      2      813
T LF: Reason couldn't start job
  Why couldn't ... have started a job?
U All persons 15+ at the end of the reference
  period who were unable to start a job during
  weeks on layoff or looking for work.
  EPOPSTAT = 1 and RTAKJOB = 2
V      -1 .Not in universe
V      1 .Waiting for a new job to begin
V      2 .Own temporary illness
V      3 .School
V      4 .Other
```

```
D RRRSN        2     1218
T GI: Reason for receipt of Railroad
  Retirement pay
  For what reason or reasons did ...
  receive Railroad Retirement pay during
  the reference period? ISS Code 2
U All persons 15 to 69 who receive disability
  income and/or persons 15+ at the end of the
  reference period who receive retirement
  income and/or survivor benefits.
V      -1 .Not in universe
V      1 .Disability
V      2 .Retirement
V      3 .Survivor
V      4 .Disability and retirement
V      5 .Disability and survivor
V      6 .Retirement and survivor
V      7 .Disability, retirement, and
  .survivor
V      8 .No payment received
```

D RFID 3 36
T FA: Family ID Number in month four
Family ID number may be used to identify
all persons in the same family in the
fourth reference month of a given wave.
This ID is used for primary families,
unrelated subfamilies, primary and
secondary individuals. Persons related
subfamilies have the primary family ID in
this field.
U All persons
V 1:120 .Family ID number

D RFID2 3 39
T FA: Family ID excluding related subfamily
members
Family ID number excluding members of
related subfamilies. Defined as of the
fourth reference month of a given wave.
This ID is used for all persons except
related subfamily members.
U All persons except those in related
subfamilies (excludes persons with ESFTYPE =
2)
V 0 .Member of related subfamily
V 1:120 .Family ID number

D EPPIDX 3 42
T PE: Person index
Person index. This field differentiates
persons within the sample unit. Person
index is unique within the sample unit
and wave.

SOURCE AND ACCURACY STATEMENT
for the 1996 Public Use Files from the
Survey of Income and Program Participation¹

SOURCE OF DATA

The data was collected in the 1996 Panel of the Survey of Income and Program Participation (SIPP). The SIPP universe is the noninstitutionalized resident population living in the United States. The population includes persons living in group quarters, such as dormitories, rooming houses, and religious group dwellings. Crew members of merchant vessels, Armed Forces personnel living in military barracks, and institutionalized persons, such as correctional facility inmates and nursing home residents, were not eligible to be in the survey. Also, United States citizens residing abroad were not eligible to be in the survey. Foreign visitors who work or attend school in this country and their families were eligible; all others were not eligible to be in the survey. With the exceptions noted above, persons who were at least 15 years of age at the time of the interview were eligible to be in the survey.

The 1996 Panel of the SIPP sample is located in 322 Primary Sampling Units (PSUs), each consisting of a county or a group of contiguous counties. Within these PSUs, living quarters (LQs) were systematically selected from lists of addresses prepared for the 1990 decennial census to form the bulk of the sample. To account for LQs built within each of the sample areas after the 1990 census, a sample containing clusters of four LQs was drawn of permits issued for construction of residential LQs up until shortly before the beginning of the panel.

In jurisdictions that don't issue building permits or have incomplete addresses, we systematically sampled expected clusters of four LQs which were listed by field personnel and then subsampled in the field. In addition, we selected sample LQs from a supplemental frame that included LQs identified as missed in the 1990 census.

For the first interview of the panel, Wave 1, we obtained interviews from occupants of about 36,700 of the 49,200 designated living quarters. We found most of the remaining 12,500 living quarters in the panel to be vacant, demolished, converted to nonresidential use, or otherwise ineligible for the survey. However, we did not interview approximately 3,400 of the 12,500 living quarters in the panel because the occupants, (1) refused to be interviewed, (2) could not be found at home, (3) were temporarily absent, or (4) were otherwise unavailable. Thus, occupants of about 92 percent of all eligible living quarters participated in the first interview of the panel.

For subsequent interviews, only original sample persons (those in Wave 1 sample households and interviewed in Wave 1) and persons living with them were eligible to be interviewed. We followed original sample persons if they moved to a new address, unless the new address was more than 100 miles from a

SIPP sample area. Then, we attempted telephone interviews.

Sample households within a given panel are divided into four random subsamples of nearly equal size. These subsamples are called rotation groups and one rotation group is interviewed each month. Each household in the sample was scheduled to be interviewed at 4 month intervals over a period of roughly 4 years beginning in April 1996. The reference period for the questions is the 4-month period preceding the interview month. In general, one cycle of four interviews covering the entire sample, using the same questionnaire, is called a wave.

The public use files include core and supplemental (**topical module**) data. Core questions are repeated at each interview over the life of the panel. Topical modules include questions which are asked only in certain waves. The 1996 Panel topical modules are given in Table 1.

Table 2 indicates the reference months and interview months for the collection of data from each rotation group for the 1996 Panel. For example, Wave 1 rotation group 1 of the 1996 Panel was interviewed in April 1996 and data for the reference months December 1995 through March 1996 were collected.

Estimation. We used several stages of weight adjustments in the estimation procedure to derive the SIPP cross-sectional person level weights. We gave each person a base weight (**BW**) equal to the inverse of probability of selection of a person's household. We applied two noninterview adjustment factors. One adjusted the weights of interviewed persons in interviewed households to account for households which were eligible for the sample but which field representatives could not interview at the first interview (F_{NI}). The second compensated for person noninterviews occurring in subsequent interviews (F_{N2}). We used a Duplication Control Factor (**DCF**) which adjusts for subsampling done in the field when the number of sample units is much larger than expected. We applied a Mover's Weight (**MW**), which adjusts for persons in the SIPP universe who move into sample households after Wave 1. The last weight applied is the Second Stage Adjustment Factor (F_{2S}). This weight adjusts estimates to population controls and causes husbands' and wives' weights to be equal.

The final cross-sectional weight is $FW_c = BW(DCF(F_{NI}(F_{2S}$ for Wave 1 and is $FW_c = IW(F_{N2}(F_{2S}$ for Waves 2+, where **IW** is either **BW(DCF(F_{NI} or **MW**. James (1995) and Siegel (1995a) describe SIPP cross-sectional weighting in greater detail.**

Researchers both inside and outside the Census Bureau conducted evaluations of SIPP weighting methodology and researched alternative methodologies. We are making several improvements to SIPP weighting methods beginning with this panel. They are described below.

- We dropped the first stage factor (F_{1S}) from cross-sectional weighting. This factor adjusted for differences between the Census count of population and an estimate of that count based on Census data for sample PSUs. James (1994) found that it did not reduce variance as was previously believed. Jabine, et al (1990) describe the first stage factor used in earlier panels.
- We are using additional variables in nonresponse adjustment. We added high/low poverty stratum code to the Wave 1 nonresponse adjustment, and we added household income, geographic division,

and number of imputations for selected income and asset items to the nonresponse adjustment for Waves 2+. Research by Rizzo, et al (1994) and by Folsom and Witt (1994) pointed out the potential of the latter three variables in reducing nonresponse bias.

- We redefined nonresponse adjustment cells for Waves 2+ weighting. We formed the nonresponse cells by successively partitioning data from five panels by whichever variable most reduced the bias of the household income to poverty threshold ratio. We used data from a sixth panel to evaluate the results. We calculated the nonresponse bias of six variables at Waves two and seven for both the new cells and the original cells using initial weights and data from the most recent interview in the calculations. The new cells had lower bias for five of the six variables (Siegel, 1995b).

Research was conducted on a number of promising weighting improvements. Allen and Petroni (1994) reported on an adjustment for mover attrition. Folsom and Witt (1994) and Rizzo, et al (1994) studied alternative nonresponse adjustments using response propensity models. Each study computed weights using an alternative methodology. The researchers then compared estimates of various items to benchmarks. The benchmarks came from administrative records and survey data with less nonresponse than the SIPP. The comparisons did not provide strong evidence of lower bias using the alternative weighting methods.

Additional Methodology

Use of Weights. Each household and each person within each household on each wave tape has four weights. These four weights are reference month specific and therefore can be used only to form reference month estimates. Reference month estimates can be averaged to form estimates of monthly averages over some period of time.

Example, using the proper weights, one can estimate the monthly average number of households in a specified income range over November and December 1996. To estimate monthly averages of a given measure (such as, total, mean) over a number of consecutive months, sum the monthly estimates and divide by the number of months.

To form an estimate for a particular month, use the reference month weight for the month of interest, summing over all persons or households with the characteristic of interest whose reference period includes the month of interest. Multiply the sum by a factor to account for the number of rotations contributing data for the month. This factor equals four divided by the number of rotations contributing data for the month. For example, December 1995 data is only available from rotation 1 for Wave 1 of the 1996 Panel (See Table 2), so a factor of 4/1 must be applied.

When estimates for months with less than four rotations worth of data are constructed from a wave file, factors greater than 1 must be applied. However, when core data from consecutive waves are used together, data from all four rotations may be available, in which case the factors are equal to 1.

These tapes contain no weight for characteristics that involve a persons's or household's status over two or more months (such as, number of households with a 50 percent increase in income between November and December 1995).

Producing Estimates for Census Regions and States. The total estimate for a region is the sum of the state estimates in that region. Using this sample, estimates for individual states are subject to very high variance and are not recommended. The state codes on the file are primarily of use in linking respondent characteristics with appropriate contextual variables (for example, state-specific welfare criteria) and for tabulating data by user-defined groupings of states.

Producing Estimates for the Metropolitan Population. For Washington, DC and 14 other states, metropolitan or non-metropolitan residence is identified (variable H*-METRO). In 28 additional states, where the non-metropolitan population in the sample was small enough to present a disclosure risk, a fraction of the metropolitan sample was recoded to be indistinguishable from non-metropolitan cases (H*-METRO=2). In these states, therefore, the cases coded as metropolitan (H*-METRO=1) represent only a subsample of that population.

In producing state estimates for a metropolitan characteristic, multiply the individual, family, or household weights by the metropolitan inflation factor for that state, presented in Table 3. (This inflation factor compensates for the subsampling of the metropolitan population and is 1.0 for the states with complete identification of the metropolitan population.)

The same procedure applies when creating estimates for particular identified MSA's or CMSA's--apply the factor appropriate to the state. For multi-state MSA's, use the factor appropriate to each state part. For example, to tabulate data for the Maine, ME-VT, apply the Vermont factor of 1.57953 to weights for residents of the Vermont part of the MSA; Maine residents require the same modification to the weight (i.e., their factors also equal 1.57953).

In producing regional or national estimates of the metropolitan population, it is also necessary to compensate for the fact that no metropolitan subsample is identified within two states (Mississippi and West Virginia). Thus, factors in the right-hand column of Table 3 should be used for regional and national estimates. The results of regional and national tabulations of the metropolitan population will be biased slightly. However, less than one-half of one percent of the metropolitan population is not represented.

Producing Estimates for the Non-Metropolitan Population. State, regional, and national estimates of the non-metropolitan population cannot be computed directly, except for Washington, DC and the 14 states where the factor for state tabulations in Table 3 is 1.0. In all other states, the cases identified as not in the metropolitan subsample (METRO=2) are a mixture of non-metropolitan and metropolitan households. Only an indirect method of estimation is available: first compute an estimate for the total population, then subtract the estimates for the metropolitan population. The results of these tabulations will be slightly biased.

ACCURACY OF ESTIMATES

SIPP estimates are based on a sample; they may differ somewhat from the figures that would have been obtained if a complete census had been taken using the same questionnaire, instructions, and enumerators. There are two types of errors possible in an estimate based on a sample survey: nonsampling and sampling. We are able to provide estimates of the magnitude of SIPP sampling error, but this is not true of

nonsampling error. Found in the next sections are descriptions of sources of SIPP nonsampling error, followed by a discussion of sampling error, its estimation, and its effect in data analyses.

Nonsampling Error. Nonsampling errors can be attributed to many sources:

- C inability to obtain information about all cases in the sample
- C definitional difficulties
- C differences in the interpretation of questions
- C inability or unwillingness on the part of the respondents to provide correct information
- C inability to recall information, errors made in the following: collection such as in recording or coding the data, processing the data, estimating values for missing data
- C biases resulting from the differing recall periods caused by the interviewing pattern used
- C and undercoverage.

Quality control and edit procedures were used to reduce errors made by respondents, coders and interviewers. More detailed discussions of the existence and control of nonsampling errors in the SIPP can be found in the *SIPP Quality Profile, 1998 SIPP Working Paper Number 230, issued May 1999*.

Undercoverage in SIPP results from missed living quarters and missed persons within sample households. It is known that undercoverage varies with age, race, and sex. Generally, undercoverage is larger for males than for females and larger for Blacks than for non-Blacks. Ratio estimation to independent age-race-sex population controls partially corrects for the bias due to survey undercoverage. However, biases exist in the estimates to the extent that persons in missed households or missed persons in interviewed households have characteristics different from those of interviewed persons in the same age-race-sex group. Further, the independent population controls used have been adjusted for undercoverage in the Census.

A common measure of survey coverage is the coverage ratio, the estimated population before ratio adjustment divided by the independent population control. The Table below shows SIPP coverage ratios for age-sex-race groups for one month-April 1996 prior to the weighting adjustment. The SIPP coverage ratios exhibit some variability from month to month, but these are a typical set of coverage ratios. Other Census Bureau household surveys [like the Current Population Survey] experience similar coverage.

**SIPP Average Coverage Ratios for Reference Month 4 of

85+	1.07703	0.95228	0.00000	0.00000

Comparability with Other Estimates. Caution should be exercised when comparing data from this with data from other SIPP products or with data from other surveys. The comparability problems are caused by such sources as the seasonal patterns for many characteristics, different nonsampling errors, and different concepts and procedures. Refer to the *SIPP Quality Profile* for known differences with data from other sources and further discussions.

Sampling Variability. Standard errors indicate the magnitude of the sampling error. They also partially measure the effect of some nonsampling errors in response and enumeration, but do not measure any systematic biases in the data. The standard errors for the most part measure the variations that occurred by chance because a sample rather than the entire population was surveyed.

USES AND COMPUTATION OF STANDARD ERRORS

Confidence Intervals. The sample estimate and its standard error enable one to construct confidence intervals, ranges that would include the average result of all possible samples with a known probability. For example, if all possible samples were selected, each of these being surveyed under essentially the same conditions and using the same sample design, and if an estimate and its standard error were calculated from each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average result of all possible samples.
2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.
3. Approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average result of all possible samples.

The average estimate derived from all possible samples is or is not contained in any particular computed interval. However, for a particular sample, one can say with a specified confidence that the average estimate derived from all possible samples is included in the confidence interval.

Hypothesis Testing. Standard errors may also be used for hypothesis testing, a procedure for distinguishing between population characteristics using sample estimates. The most common types of hypotheses tested are 1) the population characteristics are identical versus 2) they are different. Tests may be performed at various levels of significance, where a level of significance is the probability of concluding that the characteristics are different when, in fact, they are identical.

To perform the most common test, compute the difference $X_A & X_B$, where X_A and X_B are sample estimates of the characteristics of interest. A later section explains how to derive an estimate of the standard error of the difference $X_A & X_B$. Let that standard error be S_{DIFF} . If $X_A & X_B$ is between -1.6 times S_{DIFF} and +1.6 times S_{DIFF} , no conclusion about the characteristics is justified at the 10 percent significance level. If, on the other hand, $X_A & X_B$ is smaller than -1.6 times S_{DIFF} or larger than +1.6 times S_{DIFF} , the

observed difference is significant at the 10 percent level. In this event, it is commonly accepted practice to say that the characteristics are different. Of course, sometimes this conclusion will be wrong. When the characteristics are the same, there is a 10 percent chance of concluding that they are different.

Note that as more tests are performed, more erroneous significant differences will occur. For example, at the 10 percent significance level, if 100 independent hypothesis tests are performed in which there are no real differences, it is likely that about 10 erroneous differences will occur. Therefore, the significance of any single test should be interpreted cautiously.

Note Concerning Small Estimates and Small Differences. Because of the large standard errors involved, there is little chance that estimates will reveal useful information when computed on a base smaller than 200,000. Care must be taken in the interpretation of small differences since even a small amount of nonsampling error can cause a borderline difference to appear significant or not, thus distorting a seemingly valid hypothesis test.

Calculating Standard Errors for SIPP Estimates. There are three main ways we calculate the Standard Errors for SIPP Estimates. They are as follows:

- C Replicate Weighting Methods,
- C Generalized Variance parameters (denoted as a and b),
- C Simplified tables using the a and b parameters.

The most reliable method is the Replicate Weighting Method. SIPP uses the Replicate Weighting Method to produce Generalized Variance parameters. Using the Generalized Variance parameters, we create simplified tables.

Standard Error Parameters and Tables and Their Use. Most SIPP estimates have greater standard errors than those obtained through a simple random sample because PSUs are sampled and clusters of living quarters are sampled for the SIPP in the area and new construction frames. To derive standard errors that would be applicable to a wide variety of estimates and could be prepared at a moderate cost, a number of approximations were required. Estimates with similar standard error behavior were grouped together and two parameters (denoted a and b) were developed to approximate the standard error behavior of each group of estimates. Because the actual standard error behavior was not identical for all estimates within a group, the standard errors computed from these parameters provide an indication of the order of magnitude of the standard error for any specific estimate. These a and b parameters vary by characteristic and by demographic subgroup to which the estimate applies. Table 4 provides base a and b parameters to be used for the 1996 Panel estimates. Table 10 provides parameters for calculating 1996 topical module variances.

The factors provided in Table 5 when multiplied by the base parameters of Table 4 for a given subgroup and type of estimate give the a and b parameters for that subgroup and estimate type for the specified reference period. For example, the base a and b parameters for total number of households are -0.00002495 and 2,484, respectively. For Wave 1 the factor for March 1996 is 1 since 4 rotation months of data is available. So, the a and b parameters for total household income in March 1996 based on Wave 1 are -0.00002495 and 2,484, respectively. Also for Wave 1, the factor for the first quarter of 1996 is 1.2222

since 9 rotation months of data are available (rotations 1 and 2 provide 3 rotations months each, while rotations 3 and 4 provide 2 and 1 rotation months, respectively). So the a and b parameters for total number of households in the first quarter of 1992 are -0.00003049 and 3,036, respectively for Wave 1.

The a and b parameters may be used to calculate the standard error for estimated numbers and percentages. Because the actual standard error behavior was not identical for all estimates within a group, the standard errors computed from these parameters provide an indication of the order of magnitude of the standard error for any specific estimate. Methods for using these parameter for computation of approximate standard errors are given in the following sections.

For those users who wish further simplification, we have also provided general standard errors in Tables 6 through 9. Note that these standard errors only apply when data from all four rotations are used and must be adjusted by a factor from Table 4. The standard errors resulting from this simplified approach are less accurate. Methods for using these parameters and tables for computation of standard errors are given in the following sections.

The procedures described below apply only to reference month estimates or averages of reference month estimates. Refer to the section "Use of Weights" for a more detailed discussion of the construction of estimates.

Variance stratum codes and half sample codes are included on the tapes to enable the user to compute the variances directly and more accurately by methods such as balanced repeated replications (BRR). William G. Cochran provides a list of references discussing the application of this technique. (See Sampling Techniques, 3rd Ed., New York: John Wiley and Sons, 1977, p. 321.)

Standard Errors of Estimated Numbers. The approximate standard error, s_x , of an estimated number of persons, households, families, unrelated individuals and so forth, can be obtained in two ways. Both apply when data from all four rotations are used to make the estimate. However, only the second method should be used when less than four rotations of data are available for the estimate. Note that neither method should be applied to dollar values.

The standard error may be obtained by the use of the formula

$$s_x = fs \tag{1}$$

where f is the appropriate f factor from Table 4, and s is the standard error on the estimate obtained by interpolation from Table 6 or 7. Alternatively, s_x may be approximated by the formula

$$s_x = \sqrt{ax^2 + bx} \tag{2}$$

from which the standard errors in Tables 8 and 9 were calculated. Here x is the size of the estimate and a and b are the parameters associated with the particular type of characteristic being estimated. Use of Formula 2 will provide more accurate results than the use of Formula 1.

Illustration.

Suppose SIPP estimates for Wave 1 of the 1996 Panel show that there were 1,700,000 black households with monthly household income above \$4,000. The appropriate parameters and factor from Table 4 and the appropriate general standard error from Table 6 are

$$a = 0.00018621, \quad b = 2,140, \quad f = 0.61, \quad s = 97,000.$$

Using Formula 1, the approximate standard error is

$$s_x = (0.61)(97000) = 59,170.$$

Using Formula 2, the approximate standard error is

$$\sqrt{(0.00018621)(1,700,000)^2 + (2,140)(1,700,000)} = 55,676.$$

Using the standard error based on Formula 2, the approximate 90-percent confidence interval as shown by the data is from 1,608,412 to 1,791,588. Therefore, a conclusion that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 90% of all samples.

Standard Error of a Mean. A mean is defined here to be the average quantity of some item (other than persons, families, or households) per person, family or household. For example, it could be the average monthly household income of females age 25 to 34. The standard error of a mean can be approximated by Formula 3 below. Because of the approximations used in developing Formula 3, an estimate of the standard error of the mean obtained from this formula will generally underestimate the true standard error. The formula used to estimate the standard error of a mean \bar{x} is

$$s_{\bar{x}} = \sqrt{\left(\frac{b}{y}\right) s^2} \tag{3}$$

where y is the size of the base, s^2 is the estimated population variance of the item and b is the parameter associated with the particular type of item.

The population variance s^2 may be estimated by one of two methods. In both methods, we assume x_i is the value of the item for unit "I." (Unit may be person, family, or household). To use the first method, the range of values for the item is divided into "c" intervals. The upper and lower boundaries of interval j are Z_{j+1} and Z_j , respectively. Each unit is placed into one of "c" groups such that $Z_{j+1} < x_i < Z_j$.

The estimated population mean, \bar{x} , and variance, s^2 , are given by the formulas:

$$\begin{aligned}\bar{x} &= \sum_{j=1}^c p_j m_j \\ s^2 &= \sum_{j=1}^c p_j m_j^2 - \bar{x}^2,\end{aligned}\tag{4}$$

where p_j is the estimated proportion of units in group j , and $m_j = (Z_{j\&1} + Z_j)/2$. The most representative value of the item in group j is assumed to be m_j . If group “c” is open-ended, or there exists no upper interval boundary, then an approximate value for m_c is

$$m_c = \frac{3}{2} Z_{c\&1}.$$

In the second method, the estimated population mean, \bar{x} , and variance, s^2 , are given by the formulas

$$\begin{aligned}\bar{x} &= \frac{\sum_{i=1}^n w_i x_i}{\sum_{i=1}^n w_i} \\ s^2 &= \frac{\sum_{i=1}^n w_i x_i^2}{\sum_{i=1}^n w_i} - \bar{x}^2,\end{aligned}\tag{5}$$

where there are n units with the item of interest and w_i is the final weight for unit “I” (note that $\sum_{i=1}^n w_i = Y$).

Illustration.

Suppose that based on Wave 1 data, the distribution of monthly cash income for persons age 25 to 34 during the month of January 1996 is given in Table 11.

Using Formula 4 and the mean monthly cash income of \$2,527 the approximate population variance, s^2 , is

$$s^2 = \left(\frac{1,371}{39,851} \right) (150)^2 + \left(\frac{1,651}{39,851} \right) (450)^2 + \dots + \left(\frac{1,493}{39,851} \right) (9,000)^2 + (2,527)^2 = 3,175,058.$$

Using Formula 3 and the appropriate base b parameter from Table 4, the estimated standard error of a mean \bar{x} is

$$s_{\bar{x}} = \sqrt{\left(\frac{3,501}{39,851,000} \right) (3,175,058)} = \$16.70.$$

Standard error of an aggregate. An aggregate is defined to be the total quantity of an item summed over all the units in a group. The standard error of an aggregate can be approximated using Formula 6.

As with the estimate of the standard error of a mean, the estimate of the standard error of an aggregate will generally underestimate the true standard error. Let y be the size of the base, s^2 be the estimated population variance of the item obtained using Formula 4 or Formula 5 and b be the parameter associated with the particular type of item. The standard error of an aggregate is:

$$s_x = \sqrt{(b)(y)s^2} \quad (6)$$

Standard Errors of Estimated Percentages. The reliability of an estimated percentage, computed using sample data for both numerator and denominator, depends upon both the size of the percentage and the size of the total upon which the percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more, e.g., the percent of people employed is more reliable than the estimated number of people employed. When the numerator and denominator of the percentage have different parameters, use the parameter (and appropriate factor) of the numerator. If proportions are presented instead of percentages, note that the standard error of a proportion is equal to the standard error of the corresponding percentage divided by 100.

There are two types of percentages commonly estimated. The first is the percentage of persons, families or households sharing a particular characteristic such as the percent of persons owning their own home. The second type is the percentage of money or some similar concept held by a particular group of persons or held in a particular form. Examples are the percent of total wealth held by persons with high income and the percent of total income received by persons on welfare.

For the percentage of persons, families, or households, the approximate standard error, $s_{(x,p)}$, of the estimated percentage p can be obtained by the formula

$$s_{(x,p)} = fs \quad (7)$$

when data from all four rotations are used to estimate p .

In this formula, f is the appropriate f factor from Table 6 and s is the standard error of the estimate from Table 10 or 11.

Alternatively, it may be approximated by the formula

$$s_{(x,p)} = \sqrt{\frac{b}{x} (p)(100-p)} \quad (8)$$

from which the standard errors in Tables 10 and 11 were calculated. Here x is the size of the subclass of social units which is the base of the percentage, p is the percentage ($0 < p < 100$), and b is the parameter associated with the characteristic in the numerator. Use of this formula will give more accurate results than use of Formula 7 above and should be used when data from less than four rotations are used to estimate p .

Illustration.

Suppose that, in the month of January 1996, 6.7 percent of the 16,812,000 persons in nonfarm households with a mean monthly household cash income of \$4,000 to \$4,999, were black. Using Formula 8 and the b parameter of 4,610 from Table 4 and a factor of 2 for the month of January 1996 from Table 5, the approximate standard error is

$$\sqrt{\frac{4,610(2)}{(16,812,000)} (6.7) (100-6.7)} = 0.59 \text{ percent.}$$

Consequently, the 90 percent confidence interval as shown by these data is from 5.74 to 7.66 percent.

For percentages of money, a more complicated formula is required. A percentage of money will usually be estimated in one of two ways. It may be the ratio of two aggregates:

$$p_I = 100 (X_A / X_N)$$

or it may be the ratio of two means with an adjustment for different bases:

$$p_I = 100 (\hat{p}_A \bar{X}_A / \bar{X}_N)$$

where x_A and x_N are aggregate money figures, \bar{x}_A and \bar{x}_N are mean money figures, and \hat{p}_A is the estimated number in group A divided by the estimated number in group N. In either case, we estimate the standard error as

$$s_I = \sqrt{\left(\frac{\hat{p}_A \bar{x}_A}{\bar{x}_N}\right)^2 \left[\left(\frac{s_p}{\hat{p}_A}\right)^2 \% \left(\frac{s_A}{\bar{x}_A}\right)^2 \% \left(\frac{s_B}{\bar{x}_N}\right)^2 \right]}, \quad (9)$$

where s_p is the standard error of \hat{p}_A , s_A is the standard error of \bar{x}_A and s_B is the standard error of \bar{x}_N . To calculate s_p , use Formula 8. The standard errors of \bar{x}_N and \bar{x}_A may be calculated using Formula 3.

It should be noted that there is frequently some correlation between \hat{p}_A , \bar{x}_N and \bar{x}_A . Depending on the magnitude and sign of the correlations, the standard error will be over or underestimated.

Illustration.

Suppose that in January 1996, 9.8% of the households own rental property, the mean value of rental property is \$72,121, the mean value of assets is \$78,734, and the corresponding standard errors are 0.31%, \$5799, and \$2867. In total there are 86,790,000 households. Then, the percent of all household assets held in rental property is

$$= 100 \left((0.098) \frac{72121}{78734} \right) = 9.0\%$$

Using Formula 9, the appropriate standard error is

$$\begin{aligned} s_I &= \sqrt{\left(\frac{(0.098)(72121)}{78734}\right)^2 \left[\left(\frac{0.0031}{0.098}\right)^2 \% \left(\frac{5799}{72121}\right)^2 \% \left(\frac{2867}{78734}\right)^2 \right]} \\ &= 0.008 \\ &= 0.8\% \end{aligned}$$

Standard Error of a Difference. The standard error of a difference between two sample estimates is approximately equal to

$$s_{(x\&y)} = \sqrt{s_x^2 \% s_y^2} \quad (10)$$

where s_x and s_y are the standard errors of the estimates x and y . The estimates can be numbers, percents, ratios, etc. The above formula assumes that the correlation coefficient between the characteristics estimated by x and y is zero. If the correlation is really positive (negative), then this assumption will tend to cause overestimates (underestimates) of the true standard error.

Illustration.

Suppose that SIPP estimates show the number of persons age 35-44 years with monthly cash income of \$4,000 to \$4,999 was 3,186,000 in the month of January 1996 and the number of persons age 25-34 years with monthly cash income of \$4,000 to \$4,999 in the same time period was 2,619,000. Then, using parameters from Table 4 and Formula 2, the standard errors of these numbers are approximately 104,787 and 95,140, respectively. The difference in sample estimates is 567,000 and using Formula 10, the approximate standard error of the difference is

$$\sqrt{(104,787)^2 + (95,140)^2} = 141,534 .$$

Suppose that it is desired to test at the 10 percent significance level whether the number of persons with monthly cash income of \$4,000 to \$4,999 was different for persons age 35-44 years than for persons age 25-34 years. To perform the test, compare the difference of 567,000 to the product $1.6 (141,534) = 226,455$. Since the difference is larger than 1.6 times the standard error of the difference, the data show that the two age groups are significantly different at the 10 percent significance level.

Standard Error of a Median. The median quantity of some item such as income for a given group of persons, families, or households is that quantity such that at least half the group have as much or more and at least half the group have as much or less. The sampling variability of an estimated median depends upon the form of the distribution of the item as well as the size of the group. To calculate standard errors on medians, the procedure described below may be used.

An approximate method for measuring the reliability of an estimated median is to determine a confidence interval about it. (See the section on sampling variability for a general discussion of confidence intervals.) The following procedure may be used to estimate the 68-percent confidence limits and hence the standard error of a median based on sample data.

1. Determine, using either Formula 7 or Formula 8, the standard error of an estimate of 50 percent of the group.
2. Add to and subtract from 50 percent the standard error determined in step 1.
3. Using the distribution of the item within the group, calculate the quantity of the item such that the percent of the group with more of the item is equal to the smaller percentage found in step 2. This quantity will be the upper limit for the 68-percent confidence interval. In a similar fashion, calculate the quantity of the item such that the percent of the group with more of the item is equal to the larger percentage found in step 2. This quantity will be the lower limit for the 68-percent confidence interval.
4. Divide the difference between the two quantities determined in step 3 by two to obtain the standard error of the median.

To perform step 3, it will be necessary to interpolate. Different methods of interpolation may be used. The most common are simple linear interpolation and Pareto interpolation. The appropriateness of the method depends on the form of the distribution around the median. If density is declining in the area, then we recommend Pareto interpolation. If density is fairly constant in the area, then we recommend linear interpolation. Note, however, that Pareto interpolation can never be used if the interval contains zero or negative measures of the item of interest. Interpolation is used as follows. The quantity of the item such that p percent have more of the item is

$$X_{pN} = \exp \left[\left(\frac{\ln \left(\frac{pN}{N_1} \right)}{\ln \left(\frac{N_2}{N_1} \right)} \right) \ln \left(\frac{A_2}{A_1} \right) \right] A_1 \quad (11)$$

if Pareto Interpolation is indicated and

$$X_{pN} = \left[\frac{pN \& N_1}{N_2 \& N_1} (A_2 \& A_1) \% A_1 \right] \quad (12)$$

if linear interpolation is indicated, where

N is the size of the group,

A_1 and A_2 are the lower and upper bounds, respectively, of the interval in which X_{pN} falls,

N_1 and N_2 are the estimated number of group members owning more than A_1 and A_2 , respectively,

exp refers to the exponential function and

Ln refers to the natural logarithm function

Illustration.

To illustrate the calculations for the sampling error on a median, we return to Table 11. The median monthly income for this group is \$2,158. The size of the group is 39,851,000.

1. Using Formula 8, the standard error of 50 percent on a base of 39,851,000 is about 0.5 percentage points.
2. Following step 2, the two percentages of interest are 49.5 and 50.5.
3. By examining Table 11, we see that the percentage 49.5 falls in the income interval from 2000 to 2499. (Since 55.5% receive more than \$2,000 per month, the dollar value corresponding to 49.5 must be between \$2,000 and \$2,500). Thus, $A_1 = \$2,000$, $A_2 = \$2,500$, $N_1 = 22,106,000$, and $N_2 = 16,307,000$.

In this case, we decided to use Pareto interpolation. Therefore, the upper bound of a 68% confidence interval for the median is

$$\$2,000 \exp \left[\left(\frac{\ln \left(\frac{(.495)(39,851,000)}{22,106,000} \right)}{\ln \left(\frac{16,307,000}{22,106,000} \right)} \right) \ln \left(\frac{2,500}{2,000} \right) \right] \cdot \$2174 .$$

Also by examining Table 11, we see that 50.5 falls in the same income interval. Thus, A_1 , A_2 , N_1 , and N_2 are the same. We also use Pareto interpolation for this case. So the lower bound of a 68% confidence interval for the median is

$$\$2,000 \exp \left[\left(\frac{\ln \left(\frac{(.505)(39,851,000)}{22,106,000} \right)}{\ln \left(\frac{16,307,000}{22,106,000} \right)} \right) \ln \left(\frac{2,500}{2,000} \right) \right] \cdot \$2142 .$$

Thus, the 68-percent confidence interval on the estimated median is from \$2142 to \$2174. An approximate standard error is

$$\frac{\$2174 \text{ \& } \$2142}{2} \cdot \$16 .$$

Standard Errors of Ratios of Means and Medians. The standard error for a ratio of means or medians is approximated by:

$$s_{\left(\frac{x}{y}\right)} = \sqrt{\left(\frac{x}{y}\right)^2 \left[\left(\frac{s_y}{y}\right)^2 + \left(\frac{s_x}{x}\right)^2 \right]} \quad (13)$$

where x and y are the means or medians, and s_x and s_y are their associated standard errors. Formula 13 assumes that the means are not correlated. If the correlation between the population means estimated by x and y are actually positive (negative), then this procedure will tend to produce overestimates (underestimates) of the true standard error for the ratio of means.

Standard Errors Using SAS or SPSS. Standard errors and their associated variance, calculated by SAS or SPSS statistical software package, do not accurately reflect the SIPP's complex sample design. Erroneous conclusions will result if these standard errors are used directly. We provide adjustment factors by characteristics that should be used to correctly compensate for likely under-estimates. The factors called DEFF available in Table 4, must be applied to SAS or SPSS generated variances. The square root of DEFF can be directly applied to similarly generated standard errors. These factors approximate design effects which adjust statistical measures for sample designs more complex than simple random sample.

Table 5: Factors to be Applied to Table 4 Base Parameters to Obtain Parameters for Various Reference Periods

# of available rotation months³	Factor
Monthly estimate	
1	4.0000
2	2.0000
3	1.3333
4	1.0000
Quarterly estimate	
6	1.8519
8	1.4074
9	1.2222
10	1.0494
11	1.0370

³ The number of available rotation months for a given estimate is the sum of the number of rotations available for each month of the estimate.

Table 6: Standard Errors of Estimated Numbers of Households, Families, or Unrelated People (Numbers in Thousands)

Size of Estimate	Standard Error	Size of Estimate	Standard Error
200	34	25,000	329
300	42	30,000	348
500	54	40,000	372
750	66	50,000	380
1,000	76	60,000	372
2,000	106	70,000	347
3,000	130	75,000	328
5,000	166	80,000	303
7,500	200	90,000	225
10,000	228	95,000	162
15,000	271	99,500	37

- To account for sample attrition, multiply the standard error of the estimate by 1.16 for estimates which include data from Wave 4 to Wave 6, 1.30 for Wave 7 to Wave 9, and 1.38 for Wave 10 to Wave 12.

Table 7: Standard Errors of Estimated Numbers of People (Numbers in Thousands)

Size of Estimate	Standard Error	Size of Estimate	Standard Error
200	40	90,000	697
300	50	100,000	714
500	64	110,000	725
750	78	120,000	732
1,000	90	130,000	735
2,000	128	140,000	734
3,000	156	150,000	729
5,000	200	160,000	719
7,500	244	170,000	705
10,000	281	180,000	686
15,000	340	190,000	661
25,000	431	200,000	631
30,000	467	210,000	594
40,000	527	220,000	549
50,000	576	230,000	494
60,000	616	240,000	425
70,000	649	250,000	332
75,000	663	260,000	185
80,000	676	264,000	43

C To account for sample attrition, multiply the standard error of the estimate by 1.16 for estimates which include data from Wave 4 to Wave 6, 1.30 for Wave 7 to Wave 9, and 1.38 for Wave 10 to Wave 12.

Table 8: Standard Errors of Estimated Percentages of Households, Families, or Unrelated People (Numbers in Thousands).

Base of Estimated Percentage (Thousands)	Estimated Percentages					
	#1 or \$99	2 or 98	5 or 95	10 or 90	25 or 75	50
200	1.69	2.38	3.71	5.10	7.36	8.50
300	1.38	1.94	3.03	4.17	6.01	6.94
500	1.07	1.51	2.34	3.23	4.66	5.38
750	0.87	1.23	1.91	2.63	3.80	4.39
1,000	0.76	1.06	1.66	2.28	3.29	3.80
2,000	0.54	0.75	1.17	1.61	2.33	2.69
3,000	0.44	0.61	0.96	1.32	1.90	2.20
5,000	0.34	0.48	0.74	1.02	1.47	1.70
7,500	0.28	0.39	0.61	0.83	1.20	1.39
10,000	0.24	0.34	0.52	0.72	1.04	1.20
15,000	0.20	0.27	0.43	0.59	0.85	0.98
25,000	0.15	0.21	0.33	0.46	0.66	0.76
30,000	0.14	0.19	0.30	0.42	0.60	0.69
40,000	0.12	0.17	0.26	0.36	0.52	0.60
50,000	0.11	0.15	0.23	0.32	0.47	0.54
60,000	0.10	0.14	0.21	0.29	0.43	0.49
70,000	0.09	0.13	0.20	0.27	0.39	0.45
75,000	0.09	0.12	0.19	0.26	0.38	0.44
80,000	0.08	0.12	0.19	0.26	0.37	0.43
90,000	0.08	0.11	0.17	0.24	0.35	0.40
95,000	0.08	0.11	0.17	0.23	0.34	0.39
99,500	0.08	0.11	0.17	0.23	0.33	0.38

C To account for sample attrition, multiply the standard error of the estimate by 1.16 for estimates which include data from Wave 4 to Wave 6, 1.30 for Wave 7 to Wave 9, and 1.38 for Wave 10 to Wave 12.

Table 9: Standard Errors of Estimated Percentages of People (Numbers in Thousands).

Base of Estimated Percentage (Thousands)	Estimated Percentages					
	#1 or \$99	2 or 98	5 or 95	10 or 90	25 or 75	50
200	2.01	2.83	4.41	6.07	8.76	10.12
300	1.64	2.31	3.60	4.96	7.15	8.26

APPENDIX A

Wave 5 Questionnaire

1996 Panel - Wave 5 Topical Modules

Child Support Topical Module

-CS03-

Earlier we recorded that (read above for names of all children) did not have their other parent staying in the household.

ENTER (P) TO PROCEED

-CS04-

Does (child's name) have a parent living elsewhere?

- (1) Yes
 - (2) No
-

-CS05-

There are many reasons why children may not live with both of their biological or adoptive parents. Why doesn't (child's name) have a biological or adoptive parent living outside the household?

- (1) other parent has died
- (2) both parents live in the household
- (3) parents are separated/divorced
- (4) don't want contact with child's other parent
- (5) don't know where child's other parent is
- (6) other parent lives elsewhere
- (7) other parent legally terminated their parental rights
- (8) other parent is no longer recognized as a parent by this household
- (9) child was adopted by a single parent
- (10) other

-CS08-

Earlier we recorded that you had a child support agreement. These next few questions concern child support. Child support payments can be specified in written or verbal child support agreements. Have child support payments ever been agreed to or awarded for (child/children's names)?

- (1) Yes
- (2) No

-CS10-

Which children are covered by a written or verbal child support agreement?

ENTER LINE NUMBER OF EACH CHILD

(N) No more

-CS13-

Were any of these children covered by different child support agreements? By that we mean separate agreements involving different absent parents?

- (1) Yes
- (2) No

-CS14-

How many different child support agreements cover these children?

_____ (number of agreements)

-CS15-

Which of these children were covered by the MOST RECENT child support agreement?

ENTER LINE NUMBERS OF EACH CHILD COVERED BY THE MOST RECENT AGREEMENT

(N) No more

-CS17-

The following questions refer to the MOST RECENT CHILD SUPPORT AGREEMENT. This is the agreement covering (READ CHILD NAME(S) ABOVE).

Was this a voluntary written agreement ratified by the court, a court-ordered agreement, some other type of written agreement, or a non-written verbal agreement?

- (1) Voluntary written agreement ratified by the court
- (2) Court-ordered agreement
- (3) Other type of written agreement
- (4) A non-written verbal agreement

-CS18-

In what year was this agreement FIRST reached ?

_____ Year

-CS19-

What was the dollar amount of that agreement? You may report this as a weekly, biweekly, monthly, or an annual amount.

\$_____ AMT per

- (1) Per week
- (2) Biweekly
- (3) Per month
- (4) Per year

-CS21-

NOTE TO FR: THE AMOUNT YOU HAVE ENTERED IS UNUSUALLY LARGE.

- (1) BACKUP AND CORRECT
- (P) Proceed

-CS22-

Has the dollar amount ever changed?

- (1) Yes
- (2) No

-CS23-

In what year was the amount LAST changed?

_____ Year

-CS24-

What was the dollar amount for the agreement after the last change?

\$ _____ AMT per

- (1) Per week
- (2) Biweekly
- (3) Per month
- (4) Per year

-CS26-

NOTE TO FR:THE AMOUNT YOU HAVE ENTERED IS UNUSUALLY LARGE.

- (1) BACKUP AND CORRECT
- (P) Proceed

-CS27-

Was that change made or agreed to by a government agency such as a court or child support agency?

- (1) Yes
- (2) No

-CS28-

Were any payments due from (reference month 1) to (reference month 4)?

- (1) Yes
- (2) No

-CS29-

Why weren't any payments due during that period?

- (1) Child(ren) over the age limit
- (2) Other parent not working
- (3) Other parent in jail or institution
- (4) Payment suspended by court or child support agency
- (5) Other reason

-CS30-

What is the total amount of child support payments from the most recent agreement that you were supposed to receive during that period?

\$ _____ AMT

-CS32-

NOTE TO FR: THE AMOUNT YOU HAVE ENTERED IS UNUSUALLY LARGE.

- (1) BACKUP AND CORRECT
- (P) Proceed

-CS33-

How are these payments supposed to be received? Are they received...
(READ RESPONSES)

- (1) Directly from the other parent
- (2) Through the court?
- (3) Through the welfare or child support agency?
- (4) Some other method

-CS34-

What is the total amount that you actually received in child support payments under that agreement, during that period?

ENTER "N" FOR NONE

\$_____ AMT

-CS36-

NOTE TO FR: THE AMOUNT YOU HAVE ENTERED IS UNUSUALLY LARGE.

(1) BACKUP AND CORRECT

(P) Proceed

-CS37-

How regularly were these payments received? Are they received.....

(READ RESPONSES)

(1) All of the time

(2) Most of the time

(3) Some of the time

(4) None of the time

-CS38-

Under the terms of the agreement with the other parent, are you due any back payments for child support owed prior to the last 12 months?

(1) Yes

(2) No

-CS39-

What would you say the amount of back payments due you is (read responses)?

(1) Less than \$500

(2) Between \$500 and \$5,000

(3) More than \$5,000

-CS40-

What kinds of provisions for health care costs are included in the child support agreement? Read all responses, Enter all yes responses.

(ENTER "N" AFTER LAST REPLY)

- (1) Non-custodial parent to provide health insurance
- (3) Non-custodial parent to pay actual medical costs directly
- (4) Child support payments to include cash medical support
- (5) No provisions for health insurance were included in agreement
- (6) Other provisions

-CS41-

What child custody arrangements does the child support agreement for (READ NAMES OF CHILDREN ABOVE) specify?

- (1) Joint legal and physical custody
- (2) Joint legal with mother physical custody
- (3) Joint legal with father physical custody
- (4) Mother legal and physical custody
- (5) Father legal and physical custody
- (6) Split custody
- (7) Other custody arrangement

-CS42-

Does the child support agreement specify the amount of time that the (child/children) will spend with the other parent?

- (1) Yes
- (2) No

-CS44-

Did all the children spend about the same number of days with the other parent in the last 12 months?

- (1) Yes
- (2) No

-CS45-

What is the total amount of time (READ NAMES OF CHILDREN ABOVE) spent with the other parent from (reference month 1) to (reference month 4)?

ENTER ONE RESPONSE

ENTER "N" FOR NO TIME

_____ Number of days

_____ Number of weeks

_____ Number of Months

-CS46-

Where does the other parent of (READ NAMES OF CHILDREN ABOVE) now live?

- (1) Same county or city
 - (2) Same State (different county or city)
 - (3) Different State
 - (4) Other parent now deceased
 - (5) Other
 - (6) Unknown
-

-CS47-

Do you and the other parent still live in the same State or States where the initial child support agreement was reached?

- (1) Yes
 - (2) No
-

-CS48-

Who moved?

- (1) Subject person
- (2) Other parent
- (3) Both subject person and other parent

-CS49-

Now I would like to ask a few questions specifically about the MOST RECENT NON-WRITTEN CHILD SUPPORT AGREEMENT OR UNDERSTANDING.

In what year was this agreement first reached?

_____ Year

-CS50-

What was the dollar amount of that agreement? You may report this as a weekly, biweekly, monthly, or an annual amount.

\$_____ AMT per

- (1) Per week
 - (2) Biweekly
 - (3) Per month
 - (4) Per year
-

-CS52-

NOTE TO FR: THE AMOUNT YOU HAVE ENTERED IS UNUSUALLY LARGE.

- (1) BACKUP AND CORRECT
 - (P) Proceed
-

-CS53-

Has the dollar amount ever changed?

- (1) Yes
 - (2) No
-

-CS54-

In what year was the amount LAST changed?

_____ Year

-CS55-

What was the dollar amount for the agreement after the last change?

\$_____ AMT per

- (1) Per week
- (2) Biweekly
- (3) Per month
- (4) Per year

-CS57-

NOTE TO FR: THE AMOUNT YOU HAVE ENTERED IS UNUSUALLY LARGE.

- (1) BACKUP AND CORRECT
- (P) Proceed

-CS58-

Were any payments to be received from (reference month 1) to (reference month 4)?

- (1) Yes
- (2) No

-CS59-

Why weren't any payments due during that period?

- (1) Child(ren) over the age limit
- (2) Other parent not working
- (3) Other parent in jail or institution
- (4) Other reason

-CS60-

What is the total amount of child support payments from the most recent agreement that you were supposed to receive during that period?

\$_____ AMT

-CS62-

NOTE TO FR: THE AMOUNT YOU HAVE ENTERED IS UNUSUALLY LARGE

- (1) BACKUP AND CORRECT
- (P) Proceed

-CS63-

What was the total amount that you actually received under that agreement, during that period ?

ENTER "N" FOR NONE

\$_____ AMT

-CS65-

NOTE TO FR: THE AMOUNT YOU HAVE ENTERED IS UNUSUALLY LARGE.

- (1) BACKUP AND CORRECT
- (P) Proceed

-CS66-

How regularly are child support payments received? Are they received.....
(READ RESPONSES)

- (1) All of the time
- (2) Most of the time
- (3) Some of the time
- (4) None of the time

-CS67-

Under the terms of the agreement with the other parent, are you due any back payments for child support owed prior to the last 12 months?

- (1) Yes
- (2) No

-CS68-

What would you say the amount of back payments due you is (read responses)?

- (1) Less than \$500
- (2) Between \$500 and \$5,000
- (3) More than \$5,000

-CS69-

What kinds of provisions for health care costs are included in the child support agreement? Read all responses, Enter all yes responses.

(ENTER "N" AFTER LAST REPLY)

- (1) Non-custodial parent to provide health insurance
- (2) Custodial parent to provide health insurance
- (3) Non-custodial parent to pay actual medical costs directly
- (4) Child support payments include cash medical support
- (5) No provisions for health insurance were included in agreement
- (6) Other provisions

-CS70-

What child custody arrangements does the child support agreement for (READ NAMES OF CHILDREN ABOVE) specify?

- (1) Child(ren) live with mother
- (2) Child(ren) live with father
- (3) Child(ren) live with mother and with father
- (4) None
- (5) Other

-CS71-

Does the child support agreement specify the amount of time that the (child/children) will spend with the other parent?

- (1) Yes
- (2) No

-CS73-

Did all the children spend about the same number of days with the other parent in the last 12 months?

- (1) Yes
- (2) No

-CS74-

What is the total amount of time (READ NAMES OF CHILDREN ABOVE) spent with the other parent from (reference month 1) to (reference month 4)?

ENTER ONE RESPONSE

ENTER "N" FOR NO TIME

- _____ Number of days
- _____ Number of weeks
- _____ Number of Months

-CS77-

One reason a parent might not have a written agreement about child support payments is because the child's father was never LEGALLY IDENTIFIED.

Was (child's name)'s father ever legally identified by a court ruling?

- (1) Yes
- (2) No

-CS78-

Was (child's name)'s father ever legally identified by a blood test or other genetic test?

- (1) Yes
- (2) No

-CS79-

Did (child's name)'s father ever write his OWN signature on the application for (child's name)'s birth certificate?

- (1) Yes
- (2) No

-CS80-

Other than the application for a birth certificate, did (child's name)'s father ever sign a statement that legally specifies that he is (child's name)'s father?

- (1) Yes
- (2) No

-CS81-

Did (child's name)'s father ever sign any other papers, such as insurance forms, a personal letter or a card, that could identify him as (child's name)'s father?

- (1) Yes
- (2) No

-CS83-

One reason a parent might not have a written agreement about child support payments is because the child's father was never LEGALLY IDENTIFIED. One way to legally identify the child's father is through marriage.

Were you ever married to (child's name)'s father?

- (1) Yes
- (2) No

-CS84-

Was (child's name)'s father ever legally identified by a court ruling?

- (1) Yes
- (2) No

-CS85-

Was (child's name)'s father ever legally identified by a blood test or other genetic test?

- (1) Yes
- (2) No

-CS86-

Did (child's name)'s father ever write his OWN signature on the application for (child's name)'s birth certificate?

- (1) Yes
- (2) No

-CS87-

Other than the application for a birth certificate, did (child's name)'s father ever sign a statement that legally specifies that he is (child's name)'s father?

- (1) Yes
- (2) No

-CS88-

Did (child's name)'s father ever sign any other papers, such as insurance forms, a personal letter or a card, that could identify him as (child's name)'s father?

- (1) Yes
- (2) No

-CS89-

Why was this agreement for (READ NAMES OF CHILDREN ABOVE) never put in writing? (Enter all yes responses. ENTER "N" AFTER LAST REPLY)

- (1) Legal paternity was not established
- (2) Unable to locate parent
- (3) Other parent unable to pay
- (4) Final agreement pending
- (5) Accepted property settlement in lieu of child support
- (6) Do not want a legal child support award
- (7) Did not try to get child support
- (8) Other reason

-CS90-

Where does the other parent for this agreement now live?

- (1) Same county or city
- (2) Same State (different county or city)
- (3) Different State
- (4) Other parent now deceased
- (5) Other
- (6) Unknown

-CS91-

Do you and the other parent still live in the same States(s) where the initial child support agreement was reached?

- (1) Yes
- (2) No

-CS92-

Who moved?

- (1) Subject person
- (2) Other parent
- (3) Both subject person and other parent

-CS94-

Now I would like to ask a few questions about the OTHER CHILD SUPPORT AGREEMENTS you had for (READ NAMES OF CHILDREN ABOVE).

What was the dollar amount of that agreement? You may report this as a weekly, biweekly, monthly, or an annual amount.

\$_____ AMT per

- (1) Per week
- (2) Biweekly
- (3) Per month
- (4) Per year

-CS96-

NOTE TO FR: THE AMOUNT YOU HAVE ENTERED IS UNUSUALLY LARGE.

(1) BACKUP AND CORRECT

(P) Proceed

-CS97-

What is the total amount that you actually received in child support payments under that agreement during that period ?

ENTER "N" IF NOTHING RECEIVED

\$_____ AMT

-CS99-

NOTE TO FR: THE AMOUNT YOU HAVE ENTERED IS UNUSUALLY LARGE.

(1) BACKUP AND CORRECT

(P) Proceed

-CS100-

For, (READ NAMES ABOVE), have you ever asked a public agency, such as the child support enforcement office or welfare agency, for help in obtaining child support?

(1) Yes

(2) No

-CS101-

In what year did you LAST ASK for help?

_____ Year

-CS102-

What type of help did you ask for in your last contact? Enter all yes responses.
(ENTER "N" AFTER LAST REPLY)

- (1) Locate the other parent
- (2) Establish paternity
- (3) Establish support obligation
- (4) Establish medical support
- (5) Enforce support order
- (6) Modify an order
- (7) Other

-CS103-

Did you receive any help from the agency as a result of your last contact?

- (1) Yes
- (2) No

-CS104-

What kind of help did you receive as a result of your last contact? Enter all yes responses. (ENTER "N" AFTER LAST REPLY)

- (1) Locate the other parent
- (2) Establish paternity
- (3) Establish support obligation
- (4) Establish medical support
- (5) Enforce support order
- (6) Modify an order
- (7) Other

-CS107-

One reason a parent might not have a written agreement about child support payments is because the child's father was never LEGALLY IDENTIFIED.

Was (child's name)'s father ever legally identified by a court ruling?

- (1) Yes
- (2) No

-CS108-

Was (child's name)'s father ever legally identified by a blood test or other genetic test?

- (1) Yes
- (2) No

-CS109-

Did (child's name)'s father ever write his OWN signature on the application for (child's name)'s birth certificate?

- (1) Yes
- (2) No

-CS110-

Other than the application for a birth certificate, did (child's name)'s father ever sign a statement that legally specifies that he is (child's name)'s father?

- (1) Yes
- (2) No

-CS111-

Did (child's name)'s father ever sign any other papers, such as insurance forms, a personal letter or a card, that could identify him as (child's name)'s father?

- (1) Yes
- (2) No

-CS113-

One reason a parent might not have a written agreement about child support payments is because the child's father was never LEGALLY IDENTIFIED. One way to legally identify the child's father is through marriage.

Were you ever married to (child's name)'s father?

- (1) Yes
- (2) No

-CS115-

Do (READ NAMES ABOVE) all have the same father?

- (1) Yes
- (2) No

-CS116-

Was (child's name)'s father ever legally identified by a court ruling?

- (1) Yes
- (2) No

-CS117-

Was (child's name)'s father ever legally identified by a blood test or other genetic test?

- (1) Yes
- (2) No

-CS118-

Did (child's name)'s father ever write his OWN signature on the application for (child's name) birth certificate?

- (1) Yes
- (2) No

-CS119-

Other than the application for a birth certificate, did (child's name)'s father ever sign a statement that legally specifies that he is (child's name)'s father?

- (1) Yes
- (2) No

-CS120-

Did (child's name)'s father ever sign any other papers, such as insurance forms, a personal letter or a card, that could identify him as (child's name)'s father?

- (1) Yes
- (2) No

-CS123-

Do (READ NAMES ABOVE) all have the same mother or father?

- (1) Yes
- (2) No

-CS124-

Why were child support payments not agreed to or awarded for (child's name)?
(Enter all yes responses, ENTER "N" AFTER LAST REPLY)

- (1) Legal paternity was not established
- (2) Unable to locate parent
- (3) Other parent unable to pay
- (4) Final agreement pending
- (5) Accepted property or cash settlement in lieu of child support
- (6) Do not want a legal child support award
- (7) Did not try to get child support
- (8) Other reason

-CS125-

Where does the other parent for (child's name) now live?

- (1) Same county or city
- (2) Same State (different county or city)
- (3) Different State
- (4) Other parent now deceased
- (5) Other
- (6) Unknown

-CS134-

NOTE TO FR: THE AMOUNT YOU HAVE ENTERED IS UNUSUALLY LARGE.

(1) BACKUP AND CORRECT

(P) Proceed

-CS135-

For ANY of the children we have discussed, did the child's other parent or parents provide any non-cash items during the last 12 months? Such items would include things such as diapers or clothing, or services such as child care.

(1) Yes

(2) No

SCHOOL ENROLLMENT AND FINANCING TOPICAL MODULE

-SE_02-

Next I'll ask questions about school enrollment over the PAST 12 MONTHS.

While I recorded that you were NOT enrolled in school in the last 4 months, I also recorded that you were enrolled in school since [month 5] 1996.

Is this correct?

- (1) Yes
- (2) No

-SE_03-

Next I'll ask questions about school enrollment over the PAST 12 MONTHS.

I recorded that you were NEVER enrolled in school during the PAST 12 MONTHS.

Is this correct?

- (1) Yes
- (2) No

-SE_04A-

During the period(s) of enrollment in the PAST 12 MONTHS, were you enrolled MOSTLY full-time or part-time?

- (1) Full-time
- (2) Part-time

-SE_04B-

I recorded that you were enrolled [full-time/part-time] in school sometime during the last 4 months.

However, we are also interested in your school enrollment over the PAST 12 MONTHS.

During the period(s) of enrollment in the PAST 12 MONTHS, were you enrolled MOSTLY full-time or part-time?

- (1) Full-time
- (2) Part-time

-SE05-

At what level or grade were you enrolled for MOST of the past 12 months?

- (1) Elementary grades 1-8
- (2) High School grades 9-12
- (3) College year 1 (Freshman)
- (4) College year 2 (Sophomore)
- (5) College year 3 (Junior)
- (6) College year 4 (Senior)
- (7) College year 5 (First year graduate or professional school)
- (8) College year 6+ (Second year or higher in graduate or professional school)
- (9) Vocational, technical, or business school beyond high school level
- (10) Enrolled in college, but not working towards degree

-SE07-

In what STATE were you going to school for MOST of the past 12 months?

[List of U.S. State Codes]

-SE08-

What is the NAME of the school that you were enrolled in for MOST of the time in the past 12 months?

PROBE: If necessary, ask: "What city or town is that in?", "Does your school go by any other name?"

STATE = [state code]

[List of Colleges and Universities]

-SE09-

FR NOTE: DO NOT READ TO RESPONDENT

You entered the following school information.

STATE = [state code]

[Reported college or university]

Is that correct?

- (1) Yes
 - (2) No
-

-SE10-

What was the name of the school?

-SE11-

What city or town is that in?

-SE12-

Was your school a public or private school?

- (1) Public
- (2) Private

-SE14-

What degree or certificate were you working toward for MOST of the time enrolled?

- (1) Associate degree - Occupational
- (2) Associate degree - General Arts and Sciences
- (3) Bachelor's
- (4) Master's
- (5) Doctorate
- (6) Professional (MD,DDS,DVM,Law,etc)
- (7) Other License, Diploma, or Certificate
- (8) Enrolled in college, but not working towards a degree

-SE15-

What was your major field of study?

FR NOTES: If necessary, show FLASHCARD AA.

- | | |
|--|-----------------------------------|
| (1) Agriculture or forestry | (15) Vocational-technical studies |
| (2) Biological science (law enforcement, drafting, etc) | |
| (3) Business, commerce, accounting management | |

| (5) Education | (17) No major |
| (6) Engineering | |
| (7) English or journalism | |
| (8) Health, nursing, medical | |
| (9) Home economics | |
| (10) Law | |
| (11) Liberal arts or humanities (arts, religion, music, languages, philosophy, etc) | (12) Mathematics or Statistics |
| (13) Physical or earth science | |
| (14) Social sciences (history, economics, sociology, psychology, political science, etc) | |

-SE16-

During the PAST 12 MONTHS, what was the total cost of your tuition and fees?

(N) None

\$ _____

-SE17-

Was this the FULL cost for tuition and fees, or was it a reduced amount because you received some kind of a tuition reduction, scholarship, or other assistance?

- (1) Yes, full costs
- (2) No, lowered costs

-SE18-

Did you pay no tuition or fees because the school is free, or because you received a tuition waiver, scholarship, or other assistance?

- (1) No tuition is required
- (2) Received a tuition waiver, scholarship, or other assistance

-SE19-

What would have been the total cost of tuition and fees if you had NOT received assistance?

\$ _____

-SE20-

During the PAST 12 MONTHS, what was the total cost of your books, supplies and other equipment before any discounts or waivers?

(N) None

\$ _____

-SE21-

While you were attending school during the PAST 12 MONTHS, did you live with your parents or guardians?

- (1) Yes
- (2) No

-SE23-

During the PAST 12 MONTHS, what was the total cost of your room and board before any discounts or waivers?

(N) None

\$ _____

-SE24-

During the PAST 12 MONTHS, how much was spent on your transportation to your permanent home?

(N) None

\$ _____

-SE26-

I have recorded that during the PAST 12 MONTHS you received the following types of educational assistance:

[List of educational assistance reported]

Is this correct?

(1) Yes

(2) No

-SE27-

Did you receive any other kind of educational assistance during the PAST 12 MONTHS?

(1) Yes

(2) No

-SE28-

Were any of your educational expenses during the PAST 12 MONTHS paid for by any type of educational assistance or financial aid such as loans, grants, scholarships, employer assistance, veteran's benefits, or any other types of financial aid?

- (1) Yes
- (2) No

-SE29-

What type of educational assistance did you receive during the PAST 12 MONTHS? Anything else? (ENTER "N" AFTER LAST ENTRY.)

FR NOTES: If necessary, show FLASHCARD J.

- (1) Federal PELL Grant
- (2) Assistance from the Department of Veteran's affairs (VA), such as GI or Montgomery Bill, Survivors and Dependents, other Veterans Administration Educational Assistance Programs
- (3) College (or Federal) Work Study Program
- (4) Any other Federal Grant or program: for example, SEOG, Health or Nursing Grant, ROTC, NSF Grant
- (5) A loan that has to be repaid, for example, Stafford, Perkins, or SLS
- (6) A grant, scholarship, or tuition remission from the school attended
- (7) A teaching or research assistantship from the school attended
- (8) A grant or scholarship from the state, such as SSIGP, Douglas Scholarships
- (9) A grant or scholarship from some other source, such as a foundation, corporation, or community group, National Merit Scholarship, etc
- (10) Assistance provided by [fill hisher] employer
- (11) Aid from some other source (EXCLUDE all direct aid from parents including trusts or college savings funds)

-SE30-

How much did you receive in the PAST 12 MONTHS from the following?

[List of assistance]

\$ _____

-SE32-

I recorded that you received money from a student loan. Did you sign for this loan, did someone else sign the loan, or did you cosign with someone else?

- (1) You only signed
- (2) Someone else signed
- (3) Both you and someone else signed

-SE33-

What is the relationship of the signer to you?

- (1) Parent or guardian
- (2) Spouse
- (3) Someone else

-SE34-

What is the relationship of the cosigner to you?

- (1) Parent or guardian
- (2) Spouse
- (3) Someone else

-SE35-

Aside from student aid, loans, and family support, how much did you contribute to your education costs over the PAST 12 MONTHS?

(N) None

\$ _____

-SE50-

Were you claimed as a dependent on your parent's or guardian's tax form for 1996 (filed in April, 1997)?

- (1) Yes
- (2) No

-SE38-

I recorded that you received financial assistance from your employer. Does your employer require you to attend school to maintain skills at your current job, to retrain for another job, for a promotion or higher salary, or for some other reason? (Choose only one.)

- (1) Yes, requirement for MAINTAINING skills in current job
- (2) Yes, requirement for RETRAINING for another job
- (3) Yes, requirement for PROMOTION/HIGHER SALARY
- (4) No, some other reason or not required by employer

-SE39-

Are you required to receive a minimum grade or higher in your coursework to receive tuition assistance from your employer?

- (1) Yes
- (2) No

-SE40-

Are you required to continue working with your employer after completion of coursework in order to receive your employer's tuition assistance?

- (1) Yes
- (2) No

-SE41-

For how many months are you required to stay after completing the coursework?

- (1-60) Months
- (N) Less than 1 month

-SE42-

Does the coursework have to be related to your current work in order to receive your employer's tuition assistance?

- (1) Yes
- (2) No

-SE43-

Are you allowed to take classes during work hours?

- (1) Yes
- (2) No

-SE44-

Are you paid by your employer for time spent in class?

- (1) Yes
 - (2) No
-

SUPPORT FOR NON-HOUSEHOLD MEMBERS

-SUP01-

During the past 12 months, did you make payments for the support of your child or children under 21 years of age who live outside the household?

FR NOTE: Do not include payments for a child who is away at school but who is considered part of the household. Do not include payments already reported by another household member.

- (1) Yes
- (2) No

-SUP02-

Did you make regular payments, lump-sum payments, or some other kind of payment?

FR NOTE: CHECK ALL THAT APPLY
Enter "N" for no more.

- (1) Regular payments
- (2) Lump sum payments

How much did you pay for the support of other persons that we have not talked about during the past 12 months?

Amount: \$ _____

ADULT DISABILITY TOPICAL MODULE

-ADQ1-

These next few questions are about your health. Would you say your health in general is excellent, very good, good, fair, or poor?

- (1) Excellent
- (2) Very Good
- (3) Good
- (4) Fair
- (5) Poor

-ADQ2-

MARK BY OBSERVATION IF APPARENT.

Do you use any of the following aids?

(1) Yes (2) No

a. A cane, crutches, or a walker?

b. A wheelchair or an electric scooter?

c. A hearing aid?

-ADQ3-

Have you used a cane, crutches, or a walker for six months or longer?

- (1) Yes
- (2) No

-ADQ4-

Do you have difficulty seeing the words and letters in ordinary newspaper print even when wearing glasses or contact lenses if you usually wear(s) them?

- (1) Yes
- (2) No
- (3) Person is Blind

-ADQ5-

Are you able to see the words and letters in ordinary newspaper print at all?

- (1) Yes
- (2) No

-ADQ6-

Do you have difficulty hearing what is said in a normal conversation with another person even when wearing your hearing aid? Do you have difficulty hearing what is said in a normal conversation with another person?

- (1) Yes
- (2) No
- (3) Person is deaf

-ADQ7-

Are you able to hear what is said in a normal conversation at all?

- (1) Yes
- (2) No

-ADQ8-

Do you have difficulty having your speech understood?

FR NOTE: DO NOT enter "1" for "Yes" if the person has trouble simply because they speak a language other than English.

- (1) Yes
- (2) No

-ADQ9-

In general, are people able to understand your speech at all?

- (1) Yes
- (2) No

-ADQ10-

Do you have any difficulty lifting and carrying something as heavy as 10 pounds - such as a bag of groceries?

- (1) Yes
- (2) No

-ADQ11-

Are you able to lift and carry this much weight at all?

- (1) Yes
- (2) No

-ADQ12-

Would you have any difficulty lifting and carrying something heavier - say a 25 pound bag of pet food?

- (1) Yes
- (2) No

-ADQ13-

Would you be able to lift and carry a 25 pound bag of pet food at all?

- (1) Yes
- (2) No

-ADQ14-

Do you have any difficulty pushing or pulling large objects such as a living room chair?

- (1) Yes
- (2) No

-ADQ15-

Are you able to push or pull such large objects at all?

- (1) Yes
- (2) No

-ADQ16-

Do you have any difficulty -

(1) Yes (2) No

a. Standing or being on your feet for one hour?

b. Sitting for one hour?

c. Stooping, crouching, or kneeling?

d. Reaching over head?

-ADQ17-

Do you have difficulty using your hands and fingers to do things such as picking up a glass or grasping a pencil?

(1) Yes

(2) No

-ADQ18-

Are you able to use your hands and fingers to grasp and handle at all?

(1) Yes

(2) No

-ADQ19-

Do you have any difficulty walking up a flight of 10 stairs?

(1) Yes

(2) No

-ADQ20-

Are you able to walk up a flight of 10 stairs at all?

(1) Yes

(2) No

-ADQ21-

Do you have any difficulty walking a quarter of a mile - about 3 city blocks?

- (1) Yes
- (2) No

-ADQ22-

Are you able to walk a quarter of a mile at all?

- (1) Yes
- (2) No

-ADQ23-

Do you have any difficulty using an ordinary telephone?

- (1) Yes
- (2) No

-ADQ24-

Are you able to use an ordinary telephone at all?

- (1) Yes
- (2) No

Because of a physical or mental health condition, do you have difficulty doing any of the following by yourself?

FR NOTE: EXCLUDE THE EFFECTS OF TEMPORARY CONDITIONS - IF AN AID IS USED, ASK WHETHER THE PERSON HAS DIFFICULTY WHEN USING THE AID.

(1) Yes (2) No

Who may obtain coverage under this plan?

MARK ALL THAT APPLY

ENTER (N) FOR NONE OR NO MORE

- (1) Spouse
- (2) Children
- (3) Grandchildren
- (4) Other family members
- (5) Non-family members

-HB24-

Why did you choose NOT to obtain coverage for (child's name)?

**MARK THE MAIN REASON

**CATEGORY 4 WAS CHANGED AND CATEGORY 9 WAS ADDED

- (1) Child is covered by Medicaid
- (2) Child is covered by Medicare
- (3) Child is covered by other private policy
- (4) Child is covered by the group policy of someone not living in this household
- (5) Too costly to obtain coverage for child
- (6) Plan did not cover pre-existing conditions of child
- (7) Child is in good health
- (8) Other reason
- (9) Child is covered by the group policy of someone else living in this household

-HB25-

Specify the exact "OTHER" reason you chose not to obtain coverage for your children who are eligible under this plan.

-HB27-

How much do you pay for your health plan?

\$ _____ AMT

-HB28-

NOTE TO FR ---- The amount entered is unusually large.

- (1) Backup and correct
- (P) Proceed

-HB29-

How often do you pay this amount?

- (1) Weekly
- (2) Every two weeks
- (3) Twice monthly
- (4) Monthly
- (5) Semi-annually
- (6) Annually
- (7) Other

-HB30-

Specify the exact "OTHER" amount of time that you pay.

-HB32-

Do your contributions for your health plan receive special tax treatment? For example, are your contributions through a premium reimbursement account, often called a premium conversion plan?

- (1) Yes
- (2) No

-HB34-

When you left that employer did your share of the premium increase?

- (1) Yes
- (2) No

-HB36-

How long after you left that employer can this health plan continue to be in effect?

- (1) Until age 65 or Medicare eligibility
- (2) Less than 1 month
- (3) 1 to 18 months
- (4) 19 to 36 months
- (5) More than 36 months
- (6) For life

-HB38-

Does your health plan cover Medicare coinsurance and deductibles?

- (1) Yes
- (2) No

-HB39-

In offering health insurance, did your employer offer you the opportunity to choose:

READ EACH CATEGORY

MARK ALL THAT APPLY

ENTER (N) FOR NONE OR NO MORE

- (1) Cash deposited in a 401(k) plan instead of health benefits?
- (2) Cash or a salary bonus instead of health benefits?
- (3) A high deductible health insurance plan combined with a Medical Savings Account (MSA)
- (4) Tax-free employee contributions to a Flexible Spending Account (FSA)
- (5) Other benefits (e.g. life insurance, day care, vacation) in place of health benefits

-HB40-

The next few questions are about the characteristics of your health insurance. We are interested in knowing if your current plan is an HMO, that is, a Health Maintenance Organization.

- (P) Proceed
- (H) Help

-HB42-

Is your plan an HMO?

- (1) Yes
- (2) No

-HB43-

Does your insurance plan require you to sign up with a certain primary care doctor, group of doctors, or with a certain clinic to which you must go for all of your routine care?

- (1) Yes
- (2) No

-HB44-

Is there a book or list of doctors associated with the plan?

- (1) Yes
- (2) No

-HB45-

If you DO NOT have a referral, will your plan pay for any of the costs of visits to doctors who are NOT associated with your plan?

- (1) Yes
- (2) No

-HB47-

Did your employer offer more than one health insurance plan from which to choose, or was your plan the only choice?

- (1) Employer offers more than one plan to choose from
- (2) Respondent's plan is the only one

-HB49-

In addition to the kind of plan you chose, did your employer offer any traditional health insurance plans that let you choose your own doctor and that reimburse you or pay the doctor directly following submission of medical bills?

- (1) Yes
- (2) No

-HB50-

In addition to the kind of plan you chose, did your employer offer any health insurance plans through Health Maintenance Organizations, HMOs?

- (1) Yes
- (2) No
- (H) Help

-HB51-

Does your employer provide any educational materials to help you make your choice?

- (1) Yes
- (2) No

-HB52-

Did the educational materials provide an easy way to compare the costs, benefits, quality or any differences between the plans?

- (1) Yes
- (2) No

-HB53-

Do you or a family member have a pre-existing medical condition that is not covered by this plan?

- (1) Yes
- (2) No

-HB55-

Now I would like to ask you a few questions about long term care insurance that may be offered by your employer.

PRESS "ENTER" TO CONTINUE.

-HB56-

Does your employer offer a plan to any of its employees that provides nursing home or home care coverage for long-term care needs to employees or family members?

- (1) Yes
 - (2) No
-

-HB57-

Are you covered under this long term care plan?

- (1) Yes
 - (2) No
-

-HB58-

Does your employer pay for all, part, or none of the costs of the plan?

- (1) All
 - (2) Part
 - (3) None
-

-HB59-

How much do you pay for your long term care plan?

\$ _____ AMT

-HB60-

NOTE TO FR ----The amount entered is unusually large.

- (1) Backup and correct
- (P) Proceed

-HB61-

How often do you pay this amount?

- (1) Weekly
- (2) Every two weeks
- (3) Twice monthly
- (4) Monthly
- (5) Semi-annually
- (6) Annually
- (7) Other

-HB62-

Specify the exact "OTHER" amount of time that you pay.

-HB64-

Now I want to ask you a few questions about your employer's health insurance plan(s).

PRESS "ENTER" TO CONTINUE.

-HB65-

If you were to retire from this job, would you be able to obtain health insurance from your current employer at your employer's group rate throughout your retirement years?

- (1) Yes
- (2) No

-HB66-

If you were to retire, could you continue the health insurance plan at your employer's group rate until age 65?

- (1) Yes
- (2) No

-HB67-

Do you expect that your employer would pay for all, part, or none of the cost of this health plan after retirement?

- (1) All
- (2) Part
- (3) None

-HB68-

Can retirees obtain coverage under this plan for spouses and other family or non-family members?

- (1) Yes
- (2) No

-HB69-

Who may obtain coverage under this plan?

MARK ALL THAT APPLY
ENTER (N) FOR NO MORE

- (1) Spouse
- (2) Children
- (3) Grandchildren
- (4) Other family members
- (5) Non-family members

-HB72-

Now I have some additional questions about any prior job you had which may have provided health insurance benefits.

PRESS "ENTER" TO CONTINUE.

-HB73-

Have you ever worked at a paid job for one year or more?

- (1) Yes
- (2) No

-HB75-

Please answer the following questions about the job or business you retired from.

PRESS "ENTER" TO CONTINUE.

-HB76-

Please answer the following questions about your most recent job.

PRESS "ENTER" TO CONTINUE.

-HB77-

These next few questions are about the availability of health insurance from your former employer.

Did your former employer offer health insurance coverage to its employees?

- (1) Yes
 - (2) No
-

-HB78-

Were you covered by the employer health plan on the last day you worked for that employer?

- (1) Yes
 - (2) No
-

-HB79-

Did you continue this coverage after you left that employer?

- (1) Yes
 - (2) No
-

-HB80-

Did you continue your coverage through COBRA or as a retiree health benefit?

- (1) COBRA
- (2) Retiree health benefit
- (H) Help

-HB81-

What are the main reason(s) you are no longer covered by this plan?

SHOW FLASHCARD FF

Note to FR: If respondent appears to have difficulty reading the flashcard, then read categories to the respondent.

MARK ALL THAT APPLY
ENTER (N) FOR NO MORE

- (1) Eligibility period expired
- (2) Too expensive
- (3) Covered by another plan
- (4) Did not want or need coverage
- (5) Medicare coverage
- (6) Had to be eligible for a pension
- (7) Retirement requirement not met
- (8) Retirees not covered
- (9) Age or service eligibility requirement not met
- (10) Became ineligible after employer amended plan
- (11) Employer dropped plan
- (12) Employer canceled plan for retirees
- (13) Other

-HB83-

Now I have some questions about your former job.

PRESS "ENTER" TO CONTINUE.

-HB84-

In what year did you leave that job?

_____ Year

-HB85-

For how many years did you work for that employer?

ENTER ONE RESPONSE
ENTER "N" FOR NO TIME

Number of Years _____
Number of Months _____

-HB87-

When you worked for that employer, were you covered under a union or employee association contract?

- (1) Yes
 - (2) No
-

-HB88-

Were you employed by government, by a private company, a non-profit organization, or were you self employed or working in a family business?

- (1) Government
 - (2) Private for profit company
 - (3) Non-profit organization including tax-exempt
 - (4) Self-employed, incorporated
 - (5) Self-employed, unincorporated
 - (6) Working in a family business
-

-HB89-

Was that Federal Government, State Government, or Local Government or active-duty Armed Forces?

- (1) Federal (civilian only)
- (2) State
- (3) Local (County, City, Township)
- (4) Armed Forces (active duty only)

-HB90-

Was this business or organization mainly:

- (1) Manufacturing
- (2) Retail trade
- (3) Wholesale trade
- (4) Something else

-HB91-

What kind of work did you do, that is what was your occupation?

-HB92-

What were your usual activities or duties at this job?

-HB93-

When you left that job, how much did you usually earn per week before deductions? Include any overtime pay, commissions, or tips usually received.

\$_____ AMT

-HB94-

NOTE TO FR ----The amount entered is unusually large.

- (1) Backup and correct
- (P) Proceed

-HB95-

About how many people were employed at all locations?

SHOW FLASHCARD GG

Note to FR: If respondent appears to have difficulty reading the flashcard, then read the categories to the respondent.

- (1) Less than 10
- (2) 10 - 24
