Acknowledgments

The staff of the Governments Division's Recurring Programs Area, headed by **Karl K. Kindel**, is responsible for the preparation of this report. **Henry Wulf** and **Meredith L. DeHart** supervised the data collection and editing activities. **Betty S. Curry** reviewed data tabulations and evaluated final publication copy. **Gerard Keffer** and **Thomas Manning** coordinated publication preparation activities.

Victoria Campbell carried out all electronic data processing operations, under the supervision of **Kathleen Chamberlain**, Chief, Information Systems Branch.

Governments Division's Census of Governments Branch staff reviewed and assembled data for the states and largest local governments covered by this report. The staff of the Data Preparation Division, **Judith N. Petty**, Chief, reviewed and assembled data for all other local governments.

The staff of the Administrative and Customer Services Division, **Walter C. Odom**, Chief, performed publication planning, editorial review, design, composition, and printing planning and procurement. **Frances B. Scott** provided publication coordination and editing.

Carma Hogue of the Economic Statistical Methods and Programming Division, **Charles P. Pautler, Jr.**, Chief, supplied advice and assistance in statistical methodologies.

The U.S. Bureau of the Census offers special thanks for the cooperation and assistance of the thousands of state and local government officials in providing information for this report.

For information regarding data in this report, contact the Chief, Governments Division, Bureau of the Census, Washington, DC 20233-6800 or phone toll free 1-800-642-4901

Census of Governments

INTRODUCTION

A census of governments is taken at 5-year intervals as required by law under title 13, United States Code, Section 161. This 1992 census, similar to those taken since 1957, covers four major subject fields—government organization, taxable property values, public employment, and government finances.

Volume 3, Public Employment, contains two reports: No. 1, *Employment of Major Local Governments*; and No. 2, *Compendium of Public Employment*.

This report, No. 2, provides a comprehensive summary of census findings on government employment and payrolls for October 1992. National and State-by-State data are shown for the Federal Government, State governments, and local governments by type of government. Additional data are provided on local governments by county area and by size groups.

ORGANIZATION OF THIS REPORT

This introduction provides a brief overview of major findings from the 1992 Census of Governments, Survey of Government Employment; an explanation of the sources of data; a description of the limitations of data; and the availability of additional data and sources related to this report. Appendix A at the back of this publication provides important definitions of terms used in this report.

The statistical tables in this report are grouped by five general categories:

- Tables 1 through 8 provide National summaries of government employment, payrolls, and full-time employee average earnings by type of government and by government function;
- Tables 9 through 14 present similar data for each State and the District of Columbia with additional detail on the ratios of employment and payroll to population and on full-time employee average earnings;
- Table 15 presents data on employment and payroll of county areas by State and by population-size group;
- Tables 16 and 21 present data on employment and payroll by State and by employment-size group for special districts.
- Table 17 presents employment and payroll by State and enrollment-size group for school systems.
- Table 18 shows aggregates of local government employment and payroll data by county areas;
- Tables 19 and 20 provide National and State distributions of local governments by employment size, by type of government, or by selected government functions.

Table A. Public Employment and Payrolls by Level of Government: 1957 to 1992

Item	Employment (thousands)				Payroll (million dollars)			
	Total	Federal	State	Local	Total	Federal	State	Local
October 1992.....	18,164	3,047	4,587	10,531	(NA)	(NA)	9,750	22,687
October 1987.....	17,212	3,091	4,116	10,005	32,669	7,924	7,263	17,482
October 1982.....	15,841	2,848	3,744	9,249	23,173	5,959	5,022	12,192
October 1977.....	15,459	2,848	3,491	9,120	15,338	3,918	3,195	8,225
October 1972.....	13,759	2,795	2,957	8,007	9,950	2,710	1,937	5,303
October 1967.....	11,867	2,993	2,335	6,539	6,056	1,842	1,106	3,108
October 1962.....	9,388	2,539	1,680	5,169	3,966	1,347	635	1,985
April 1957.....	8,047	2,439	1,300	4,307	2,533	919	373	1,242
Percent change, 1987 to 1992.....	5.5	-1.4	11.4	5.3	(NA)	(NA)	34.2	29.8
Percent change, 1982 to 1992.....	14.7	7.0	22.5	13.9	(NA)	(NA)	94.1	86.1
Average annual rate of change:								
1987 to 1992.....	1.1	-0.3	2.2	1.0	(NA)	(NA)	6.1	5.4
1982 to 1992.....	1.4	0.7	2.1	1.3	(NA)	(NA)	6.9	6.4
1957 to 1992.....	2.4	0.6	3.7	2.6	(NA)	(NA)	9.8	8.7

SCOPE

Governmental Units

The Census Bureau classifies local governments by five major types as described below. Additional information on the classification of local governments is presented in Volume 1, Number 1, *Government Organization*, 1992 Census of Governments.

County Governments

Organized county governments are found throughout the Nation except in Connecticut, Rhode Island, the District of Columbia, and limited portions of other States where certain county areas lack a distinct county government (see appendix D for a listing of county-type areas without county government). In Louisiana, the county governments are officially designated as “parish” governments, and the “borough” governments in Alaska resemble county governments in other States. Both are classified as county governments for census statistics on governments.

Not all geographic areas known as counties have county governments. Where municipal and county governments have been consolidated, or substantially merged, the composite units are counted as municipal governments in census statistics on governments. Moreover, the cities of Baltimore and St. Louis are outside the areas of adjacent counties, and a similar situation exists among 41 independent cities in Virginia.

Municipal and Township Governments

The 35,935 subcounty general-purpose governments enumerated in 1992 include 19,279 municipal governments and 16,656 town or township governments. A breakdown by State between municipal and township governments appears in table 10. These two types of governments are distinguished primarily by the historical circumstances surrounding their incorporation. In many States, most notably in the Northeast, municipal and township governments have similar powers and perform similar functions. The scope of governmental services provided by these two types of governments varies widely from one State to another, and even within the same State.

As defined for census statistics on governments, the term “municipal governments” refers to political subdivisions within which a municipal corporation has been established to provide general local government for a specific population concentration in a defined area, and includes all active government units officially designated as cities, boroughs (except in Alaska), towns (except in the six New England States, and in Minnesota, New York, and Wisconsin), and villages. This concept corresponds generally to the “incorporated places” that are recognized in Census Bureau reporting of population and housing statistics, subject to an important qualification—the count of municipal governments in this report excludes places that are currently governmentally inactive.

The term “town or township governments” is applied here to 16,656 organized governments located in the following 20 States in the Northeast and the Midwest:

Connecticut	New Hampshire
Illinois	New Jersey
Indiana	New York
Kansas	North Dakota
Maine	Ohio
Massachusetts	Pennsylvania
Michigan	Rhode Island
Minnesota	South Dakota
Missouri	Vermont
Nebraska	Wisconsin

This category includes governmental units officially designated as “towns” in six New England States, New York, and Wisconsin and some “plantations” in Maine and “locations” in New Hampshire, as well as townships in other areas. In Minnesota, the terms “town” and “township” are used interchangeably with regard to township governments. Although towns in the six New England States and New York, and townships in New Jersey and Pennsylvania, are legally termed “municipal corporations,” perform municipal-type functions, and frequently serve densely populated urban areas, they have no necessary relation to concentration of population, and are thus counted for census purposes as town or township governments.

Excluded from this count of town or township governments are unorganized township areas, townships coextensive with cities where the city governments have absorbed the township functions, and townships known to have ceased to perform governmental functions. Also excluded are the townships in Iowa, which are not counted as separate governments, but are classified as subordinate agencies of county governments.

Only one State, Indiana, has township governments covering all its area and population. In six States (Massachusetts, New Hampshire, New Jersey, Pennsylvania, Rhode Island, and Wisconsin), operating towns or townships comprise all territory other than that served by municipalities. The same is true for Maine, except for “unorganized territory” that lacks any local government. Of the remaining 12 town or township States, there are 10 where this type of government occurs only in certain county or county-type geographic areas as of early 1992: Illinois, in 85 of the 102 county-type areas; Kansas, in 97 of 105; Minnesota, in 85 of 87; Missouri, in 23 of 115; Nebraska, in 28 of 93; North Dakota, in 48 of 53; Pennsylvania, in 66 of 67; South Dakota, in 52 of 66; and Wisconsin, in 71 of 72. In New York, town governments exist in each county outside New York City.

The area served by municipal and town or township governments may overlap in 11 States. All municipal governments in Indiana, and some but not all municipalities in 10 other town or township States (Connecticut, Illinois, Kansas, Michigan, Minnesota, Missouri, Nebraska, New York, Ohio, and Vermont) operate within territory that is

served also by town or township governments. In the remaining 9 of the 20 town or township States (Maine, Massachusetts, New Hampshire, New Jersey, North Dakota, Pennsylvania, Rhode Island, South Dakota, and Wisconsin), there is no geographic overlapping of these two kinds of units.

Special District Governments

Special district governments are independent, special purpose governmental units (other than school district governments) that exist as separate entities with substantial administrative and fiscal independence from general purpose local governments. As defined for census purposes, the term “special district governments” excludes school district governments.

Special district governments provide specific services that are not being supplied by existing general purpose governments. Most perform a single function, but, in some instances, their enabling legislation allows them to provide several, usually related, types of services. The services provided by these districts range from such basic social needs as hospitals and fire protection to the less conspicuous tasks of mosquito abatement and upkeep of cemeteries.

School District Governments and Public School Systems

Of the 15,834 public school systems in the United States in 1992, only the 14,422 that are independent school districts are included in the count of governments. The other 1,412 “dependent” public school systems are classified as agencies of other governments—State, county, municipal, or town or township and are not counted as separate governments.

Because of the variety of State legislative provisions for the administration and operation of public schools, marked diversity is found in school organization throughout the United States. The number of States providing for public

schools solely through independent school districts numbered 33 in 1992. This independent district arrangement, which prevails in most parts of the country, is practically universal in the West.

A “mixed” situation is found in 12 States, with the public schools that provide elementary and secondary education operated in some areas by independent school districts and elsewhere by a county, municipal, town or township, or State government. In the District of Columbia and in five States (Alaska, Hawaii, Maryland, North Carolina, and Virginia), there are no independent school districts; all public schools in those jurisdictions are administered by systems that are agencies of the county, municipal, or State government.

Alaska, Hawaii, Maine, and New Jersey have State-dependent public school systems. The 21 State-dependent public school systems in Alaska serve sparsely-populated areas not served by borough or city school systems. All public schools in Hawaii are administered directly as part of the State government, but, in Maine, this arrangement applies only to four sparsely-populated areas. In New Jersey, two public school systems that are undergoing reorganization are State operated.

Public school systems operating as dependent agencies of county governments appear mostly in North Carolina, Tennessee, and Virginia, which contain nearly two-thirds of all county dependent systems. However, California has 54 county-dependent systems and New Jersey 47. Other States with public school systems operating as dependent agencies of county governments are Alaska (11), Arizona (12), Maryland (39), Massachusetts (3), Mississippi (4), New York (27), and Wisconsin (6). Systems dependent on town or township governments are found only in Connecticut, Maine, Massachusetts, New Jersey, and Rhode Island. There are public school systems operated by municipal governments in each of 11 States and the District of Columbia, but in most of these States, some other pattern predominates, and only in the District of Columbia are all public schools operated by a municipally dependent system.

Table B. Local Government Employment and Payrolls by Type of Government: 1987 to 1992

Type of government	Employment (thousands)			Payroll (million dollars)		
	October 1992	October 1987	Average annual rate of change, 1987 to 1992 (percent)	October 1992	October 1987	Average annual rate of change, 1987 to 1992 (percent)
Local governments	10,531	10,005	1.0	22,687	17,482	5.4
County	2,251	1,963	2.8	4,722	3,270	7.6
Municipal	2,638	2,493	1.1	6,238	4,770	5.5
Township	410	393	0.9	704	522	6.2
Special district	648	529	4.1	1,414	959	8.1
School district	4,583	4,627	-0.2	9,609	7,961	3.8

BASIC CONCEPTS

Employment and employees

Employment, as used in this report, refers to all persons gainfully employed by and performing services for a government. Employees include all persons paid for personal services performed, including persons paid from federally funded programs, paid elected officials, persons in paid leave status, and persons paid on a per meeting, annual, semiannual, or quarterly basis. Unpaid officials, pensioners, persons whose work is performed on a fee basis, and contractors and their employees are excluded from the count of employees. Full-time employees are defined to include those persons whose hours of work represent full-time employment in their employer government; part-time employees are those persons who work less than the standard number of hours for full-time work in their employer government.

Full-time equivalent employment The term “full-time equivalent employment” refers to a computed statistic representing the number of full-time employees that could have been employed if the reported number of hours worked by part-time employees had been worked by full-time employees. This statistic is calculated separately for each function of a government by dividing the “part-time hours paid” by the standard number of hours for full-time employees in the particular government and then adding the resulting quotient to the number of full-time employees.

October payroll

Payroll amounts shown in this report represent gross payrolls for the 1-month period of October 1992. The gross payroll includes all salaries, wages, fees, or commissions paid to employees during the pay period which included the date of October 12, 1992. Payroll amounts reported for a period other than 1 month were converted to represent an amount for the month of October by multiplying the reported payroll by an appropriate factor. For example, a 2-week payroll was multiplied by 2.214, a 1-week payroll was multiplied by 4.429, and a half month payroll was multiplied by 2.

Average October earnings

Average October earnings shown are for full-time employees only and represent the quotient of full-time employee payroll divided by the number of full-time employees.

INTERCOUNTY LOCAL GOVERNMENTS

Most local governments in the United States operate entirely within a single county area, but there are some units whose territory extends into two or more county areas. Each of these intercounty governments is counted only once in this report and has been assigned for purposes of enumeration to the county area where its headquarters is located, or in the case of municipal governments to the county area having the largest share of its population.

VIII CENSUS OF GOVERNMENTS

Table C. **Average Earnings of Full-Time State and Local Government Employees Ranked by State: October 1992**

Rank	State	Full-time employees average earning, October 1992 (dollars)
	U.S. Average	2,585
1	Alaska	3,509
2	California	3,381
3	Connecticut	3,261
4	New Jersey	3,191
5	DC	3,175
6	New York	3,175
7	Michigan	3,062
8	Maryland	2,860
9	Rhode Island	2,826
10	Minnesota	2,801
11	Wisconsin	2,791
12	Massachusetts	2,784
13	Nevada	2,765
14	Washington	2,725
15	Illinois	2,709
16	Hawaii	2,661
17	Colorado	2,657
18	Oregon	2,651
19	Pennsylvania	2,644
20	Delaware	2,634
	US Average	2,585
21	Ohio	2,533
22	Arizona	2,522
23	New Hampshire	2,496
24	Iowa	2,405
25	Vermont	2,390
26	Indiana	2,318
27	Virginia	2,281
28	Florida	2,276
29	Maine	2,244
30	North Dakota	2,235
31	Nebraska	2,210
32	Kansas	2,200
33	North Carolina	2,186
34	Texas	2,171
35	Utah	2,168
36	Wyoming	2,167
37	Montana	2,164
38	Kentucky	2,145
39	Missouri	2,135
40	Tennessee	2,063
41	Idaho	2,046
42	West Virginia	2,036
43	Georgia	2,030
44	South Carolina	2,025
45	New Mexico	2,023
46	Alabama	1,989
47	South Dakota	1,978
48	Louisiana	1,968
49	Oklahoma	1,951
50	Arkansas	1,912
51	Mississippi	1,720

The organization phase of the 1992 Census of Governments counted 9,018 intercounty governments; 873 municipalities, 3,767 special districts, and 4,378 school districts.¹ About 68 percent involved only two county areas, but 520 involved governments that provided services in five or more county areas.

¹See Volume 1, No. 1, *Government Organization* (1992 Census of Governments), table 27 for compilation of intercounty governments by State.

Knowledge about intercounty governments and the assignments of data is very important in making interarea comparisons from table 18. For example, the Washington Metropolitan Area Transit Authority (WMATA) is a special district government operating in eight county areas in the proximity of Washington, D.C. Its employees and payrolls are assigned to the District of Columbia area, site of its principal offices. The Washington, D.C. data in table 18, therefore, are increased in their employment and payroll totals. In fact, however, a portion of these data belongs in the seven other county areas served by this special district.

Though the Census Bureau acknowledges the advisability of allocating these intercounty governments, we have made no attempt to do this because there was no standard

Table D. Full-Time Equivalent Employment per 10,000 Population by Level of Government and Function: October 1987

Function	State and local	State	Local
All functions	530.0	154.2	375.8
Education services:			
Education	258.5	56.1	202.5
Higher education	59.3	50.9	8.4
Elementary and secondary education	195.3	1.2	194.1
Other education	4.0	4.0	-
Libraries	3.9	-	3.9
Social Services and income maintenance:			
Public welfare	18.9	8.5	10.4
Hospitals	43.0	21.0	21.9
Health	13.9	6.5	7.5
Social insurance administration	4.6	4.6	-
Transportation:			
Highways	21.1	10.3	10.8
Air transportation	1.4	0.1	1.3
Water transport and terminals	0.5	0.2	0.3
Public safety:			
Police protection	28.0	3.5	24.6
Fire protection	10.4	-	10.4
Correction	21.4	13.9	7.5
Environment and housing:			
Natural resources	7.3	5.9	1.3
Parks and recreation	9.2	1.4	7.7
Housing and community development	4.2	-	4.2
Sewerage	4.8	0.1	4.8
Solid waste management	4.4	0.1	4.3
Government administration:			
Financial administration	12.8	5.9	6.9
Judicial and legal	12.1	4.5	7.6
Other government administration	8.8	1.9	7.0
Utilities:			
Water supply	5.7	(Z)	5.7
Electric power	3.3	0.3	3.0
Gas supply	0.4	-	0.4
Transit	8.1	0.8	7.3
State liquor stores	0.4	0.4	-
All other and unallocable	22.9	8.4	14.4

criterion or methodology available that could be applied practically in the majority of cases. The listings in appendix B and C provide some details in those cases where there might be the most severe data dislocations. Further information regarding intercounty governments may be requested from the Chief, Governments Division, U.S. Bureau of the Census, Washington, D.C. 20233.

COUNTY AREA DATA

All county area information pertains only to local government data—that is counties, municipalities, townships, special districts, and school districts. Table 18 provides information about county area. Individual local governments county area data are presented in table 18.

When comparing county areas, remember that the data are unadjusted for any differences in cost of living. Further, these data can be influenced heavily by the presence of intercounty governments and unique local circumstances such as difficult geography or very small populations.

RELATION TO OTHER CENSUS REPORTS

Findings from the 1992 Census of Governments shown in this report supplant the October 1992 data that appeared in the Bureau of the Census annual publication, *Public Employment: 1992* (GE/92-1 published in September 1994).

Number 1 in Volume 3 of the 1992 Census of Governments supplies detailed information on the employment and payroll of school systems, special districts, county governments, municipalities, and townships. Except in a very few instances, where limited revisions may have been applied, amounts appearing in that report agree with corresponding items shown here.

The counts of local governments as of January 1992 in Volume 1, Number 1, *Government Organization*, may differ slightly from the counts in table 10 of this report, which reflects data as of October 1992.

SOURCES OF DATA

Data in this publication are based on information obtained in the 1992 Census of Governments. Federal Government data were compiled by Census Bureau staff from records of the U.S. Office of Personnel Management. Twenty-six State governments provided data from central payroll records for all or most of their agencies/institutions. Data for agencies and institutions for the remaining 24 State governments, and any not included in the central payroll systems of the above referenced 26 State governments, were obtained by mail canvass questionnaires.

Local government data were generally requested by mail canvass questionnaires except for the following cases:

- Elementary and secondary school system data in Florida, North Carolina, North Dakota, and Washington were supplied by special arrangements with the State education agency in each of these States,

- Independent school districts having less than 250 enrollment and not on the sample panel for the Census Bureau's annual sample survey of government employment provided: (1) they supplied usable totals of full-time and part-time gross payrolls in the Government Directory Survey of this 1992 Census of Governments, and (2) their total full-time employment and total part-time employment reported in the Local Government Directory Survey were both 25 or fewer employees,
- Municipal and township governments having less than 2,500 population and not on the sample panel for the Census Bureau's annual sample survey of government employment were not canvassed for this phase of the 1992 Census of Governments provided: (1) They supplied usable totals of full-time and part-time employment and full-time and part-time gross payrolls in the Government Directory Survey of this 1992 Census of Governments, and (2) their total employment reported in the Local Government Directory Survey was 35 or fewer employees,

Eight different mail canvass questionnaires were used in the 1992 Census of Governments, Survey of Government Employment. Each of these reporting documents was tailored to specific types of reporting entities:

- State government agencies and institutions except higher education institutions, State operated elementary/secondary school systems, and State police protection agencies,
- State institutions of higher education,
- State and local government police protection agencies (local police agencies were canvassed only when data were not available from the government's primary reporting office),
- All county governments plus municipal and township governments having 5,000 or more population.
- Municipal and township governments having less than 5,000 population,
- Elementary and secondary school systems and local institutions of higher education.
- Single function special districts (except fire protection districts) and single function agencies (except police protection agencies) of county, municipal, and township governments (these individual local agencies were canvassed only when data were not available from the government's primary reporting office),
- Multiple function and fire protection special districts plus multiple function agencies of county, municipal, and township governments (these individual local agencies were canvassed only when data were not available from the government's primary reporting office).

Each type of questionnaire requested information on:

- Number of paid full-time and part-time employees for the pay interval that included the date of October 12, 1992,
- Gross pay of full-time and part-time employees for the pay interval that included the date of October 12, 1992,
- Number of paid hours of work for part-time employees during the reported pay interval,
- The length of the reported pay interval, and
- The standard number of weekly hours of work for the majority of full-time employees.

General reporting instructions and definitions were modified for each questionnaire type to take into account the nature of the applicable reporting entities. Further, the section requesting data on employees, pay, and part-time employee hours worked was modified on each questionnaire type for the appropriate government function detail required for this census.

Information provided on mail canvass questionnaires and by special collection arrangements was electronically recorded and edited for consistency and reasonableness. Incomplete returns and replies containing information that failed consistency or reasonableness tests were referred to trained Census Bureau personnel for review, possible followup, and any necessary corrections. Additional or corrected information obtained in the review of these "failed edit" cases were then entered into electronic data records for corrective processing.

LIMITATIONS OF DATA

Nonresponse

The Census Bureau mailed an original request, and as needed, one nonresponse follow-up request to local governments for employment and payroll data. Due to budgetary constraints, additional telephone and on-site field nonresponse follow-up were very limited.

Some local governments did not provide data requested in the Census of Governments, Survey of Government Employment. For such cases, this census contains data derived from:

- The government's own data reported in previous annual surveys of government employment adjusted by the average growth rate of governments of similar type and size in the state.
- Summary information provided in the 1992 Census of Governments, Directory Survey of Local Governments, or
- Imputation procedures that use data reported by like types of local governments of similar size in the same State, or use data derived from secondary sources.
- For this publication, we did not publish the imputations for the individual governments. The data are marked NA. The nonresponse rate for all State and local governments covered by the 1992 Census of Governments was 16.6 percent.

Review Procedures

The mail canvass questionnaires and special data collection arrangements used in this phase of the 1992 Census of Governments contained detailed definitions and reporting instructions to assist State and local government officials in their preparation of replies and to facilitate uniform interpretation and reporting procedures. Each questionnaire and special collection request also contained a Census Bureau telephone number that reporting officials could call to obtain additional clarification and assistance from subject matter specialists. Quality control of reported data was aided also by reference to information collected by the Bureau in its annually conducted sample surveys of government employment and payrolls; these annual surveys request similar employment and payroll data, include the same general definitions and reporting procedures, and include all State governments and a sample of approximately 22,000 local governments. However, human and mechanical errors occur in any mass statistical operation such as the census of governments, including omissions, misinterpretations, errors in reporting, errors in the electronic recording of data, errors in the clerical review and adjustment of electronically identified problem data, and at other stages of data processing. Procedures were applied at each stage of processing this phase of the 1992 Census of Governments to keep human and mechanical errors an acceptable low level.

Although an effort is made in each census to maintain congruity of the definitions, concepts, and terms applied in data collection, historical and interarea comparisons should be made with care. Changes in the level or type of government providing particular services occur over time. Thus, a decrease in employment for a particular function of a government does not, in and of itself, signify a diminution of services the population receives. Moreover, certain services may be "contracted out" and the contractor's employees are not counted as employees of the contracting government. Also, annexation, other boundary changes, consolidations of governmental entities, and changes in the demographic makeup of the area served may affect not only the number of persons for whom services must be provided, but also the nature and scope of the necessary services.

Interarea Comparisons

Use caution in attempting to draw conclusions from direct interstate or intergovernmental comparisons of employment and payroll data. Such comparisons should take into account the diversity of responsibilities for various functions among different governments. Some State governments, for example, directly administer certain activities which elsewhere are undertaken by local governments, with or without State fiscal aid.

Even within individual States, one may observe marked diversity in the scope of functions performed by individual governments or governments of a particular type. It is not unusual, for example, for one or a few large county

governments to provide services that are normally handled by municipalities. As an example showing a different perspective, there are certain sizable "contract cities" in California that operate mainly through county agencies rather than by direct employment of personnel for the entire range of common city functions.

Some individual governments reported here as municipalities operate in effect as composite city-county units. See appendix D for a listing of the largest of these city-county governments classed as municipalities.

One variable that affects the scope and scale of government employment significantly is the placement of responsibility for administration of local public schools. In most States, this function is assigned to independent school districts. In many instances, however, including several of the largest cities, the school system is part of the municipal, county, or township governments. Of similar nature are differences in State versus city, county, or township administration of public assistance programs, or of public hospital facilities and services.

Similarly, certain potential limitations need to be recognized with regard to direct interarea comparisons based upon the local government aggregates for individual county areas in table 18. These data represent a summation of amounts for all local governments located entirely or mainly within each particular county. Refer to the previous discussion on intercounty governments for an explanation of how data for these units were assigned. Appendices B and C provide a listing of the largest intercounty municipalities and special districts.

Beyond this, the residents of a particular governmental jurisdiction or even an entire county might not be the only beneficiaries of local government operations in the area. One might find, for example, that a scattered minority of individual county areas exhibit a relatively high level of employment for Health and Hospitals. This phenomenon, which occurs most frequently in sparsely populated States, is due to arrangements by which public hospitals in one county actually serve a group of counties. Another circumstance occurring with increasing frequency in urban areas is the establishment of solid waste processing facilities, operated by a single county or municipality but providing service to a wide area.

AVAILABILITY OF DATA

Copies of this and other reports of the 1992 Census of Governments are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20302 and U.S. Department of Commerce District Offices.

Published data on the employment and payrolls of individual major local governments (all counties, municipalities and townships in selected States having 25,000 or more population, local school systems enrolling 5,000 or more pupils, and special districts employing 100 or more full-time workers) are presented in Volume 3, Number 1, *Employment of Major Local Governments*.

In addition to the printed reports in Volume 3, Public Employment, of the 1992 Census of Governments, data from this phase of the census are also available in electronic format. For details, contact the Chief, Governments Division, Bureau of the Census, Washington, DC 20233-6800, or telephone 1-800-457-4901.

MEANINGS OF ABBREVIATIONS AND SYMBOLS

Symbols in statistical tables have the following meanings:

- Represents zero or rounds to zero.
- NA Not available.
- (Z) Less than one-half of the unit of measurement shown.

¹Population data are from the 1990 Census of Housing and Population, April 1, 1990.

²There have been organizational changes since 1987 that affect the data in this table compared with those found in the 1987 Census Report. Three occurred in Alaska and one in Georgia. They were: Alaska, Aleutians East Borough was organized from a portion of the Aleutians Census Area effective October, 1987. Lake and Peninsula Borough was organized from a portion of the Dillingham Census area effective July, 1988. Denali Borough was organized from a portion of the Yukon-Koyuk Census Area effective December, 1990. Georgia, Clarke County and Athens City governments were consolidated effective January, 1991, and it is counted as a municipality in Census statistics.

³County-type area without any county government, see appendix D.

⁴Does not include Kalawao County, which had no local governments as of Jan. 1992.

⁵Does not include the Montana portion of Yellowstone National Park, which is a county equivalent area that had no local governments as of Jan. 1992.

⁶Includes the five county areas comprising the city of New York—Bronx County, Kings County, New York County, Queens County, and Richmond County.

Full-time equivalent employment in selected functions—Con.								October payrolls (thousand dollars)		Average October earnings, full-time employees (dollars)			
Environment and housing				Government administration		Utilities	Other and unallocable	Total	Education only	All	Instructional employees only	All other employees	
Parks and recreation	Housing and community development	Sewerage	Sanitation other than sewerage	Judicial and legal	Financial and other government administration

Appendix A.

Definition of Selected Terms

An understanding of the terms used in this report is necessary to interpret the statistical findings properly. These terms are grouped in the following categories: Government Units and Types of Governments and Government Functions.

GOVERNMENT UNITS AND TYPES OF GOVERNMENTS

Government Units. A government is an organized entity whose governmental character is evidenced by popular election of the officials or their appointment by public officials, a high degree of public accountability, and the power to raise revenue to provide authorized services. In addition, a governmental unit must have sufficient discretion in the management of its own affairs to distinguish it from the administrative structure of any other government unit.¹

Federal Government. The term Federal, as used in this report, encompasses all civilian employees and payrolls of the U.S. Government, but excludes the uniformed employees and payrolls of the armed forces. District of Columbia data are excluded from this category and included with data for municipal governments.

State Governments. Refers to the governments of the 50 States which constitute the United States.

TYPES OF GOVERNMENTS

The Bureau of the Census recognizes five basic types of local governments. Of these five types, three are general purpose governments—county and subcounty general purpose (municipal and township) governments. The other two types are special purpose governments—school district governments and special district governments. These types of governments are briefly described as follows:

1. **County governments**—Organized local governments authorized in State constitutions and statutes and

established to provide general government; includes those governments designated as boroughs in Alaska, as parishes in Louisiana, and as counties in other States.

2. **Subcounty general purpose governments**—This category include municipal and township governments. Municipal and township governments are distinguished primarily by the historical circumstances surrounding their incorporation.

- a. **Municipal governments**—Organized local governments authorized in State constitutions and statutes and established to provide general government for a defined area; includes those governments designated as cities, boroughs (except in Alaska), towns (except in the six New England States, Minnesota, New York, and Wisconsin), and villages. This concept corresponds generally to the “incorporated places” that are recognized in Census Bureau reporting of population and housing statistics, subject to an important qualification—the count of municipal governments in this report excludes places that are currently governmentally inactive.

- b. **Township governments**—Organized local governments authorized in State constitutions and statutes and established to provide general government for a defined area; includes those governments designated as towns in Connecticut, Maine (including organized plantations), Massachusetts, Minnesota, New Hampshire (including organized locations), New York, Rhode Island, Vermont, and Wisconsin, and townships in other States.

3. **School district governments**—Organized local entities providing public elementary, secondary, and/or higher education which, under State law, have sufficient administrative and fiscal autonomy to qualify as separate governments. Excludes “dependent public school systems” of county, municipal, township, or State governments.

4. **Special district governments**—All organized local entities other than the four categories listed above, authorized by State law to provide only one or a limited number of designated functions, and with sufficient administrative and fiscal autonomy to qualify as separate governments; known by a variety of titles, including districts, authorities, boards, commissions, etc., as specified in the enabling State legislation.

¹For more detailed information concerning the identification and classification of governments, see Volume 1, No. 1, *Government Organization*, of the 1992 Census of Governments.

Government Functions

Employment and payrolls of governments are classified according to the major function or activity of the agency, office, or other organizational entity in which the individual is employed. Following is a brief description of each functional category used in this report:

Air transportation. Operation and support of publicly operated airport facilities.

All other and unallowable. The use of this classification varies from table to table in this report; in each tabulation, however, this classification represents all activities not individually specified.

Correction. Activities pertaining to the confinement and correction of adults and minors convicted of criminal offenses. Pardon, probation, and parole activities are also included here.

Electric power. Activities associated with the production or acquisition and distribution of electric power.

Elementary and secondary education. All activities associated with the operation of public elementary and secondary schools and locally operated vocational-technical schools. Special education programs operated by elementary and secondary school systems are also included as are all ancillary services associated with the operation of schools, such as pupil transportation and food service. Instructional employees includes not only classroom teachers, but also principals, supervisors of instruction, librarians, teacher aides, library aides, and guidance and psychological personnel. Other employees includes all persons not included as instructional employees (e.g., school superintendents and other administrative personnel, clerical and secretarial staffs, plant operation and maintenance personnel, health and recreation employees, transportation and food service personnel, and any student employees).

Financial administration. Includes activities concerned with tax assessment and collection, custody and disbursement of funds, debt management, administration of trust funds, budgeting, and other government wide financial management activities. This function is not applied to school district or special district governments.

Fire protection. Applies to local government fire protection and prevention activities plus any ambulance, rescue, or other auxiliary services provided by a fire protection agency. Volunteer firefighters, if remunerated for their services on a "per fire" or some other basis, are included as part-time employees. The subcategory of firefighters shown in this report includes personnel trained and/or engaged in fire suppression and prevention.

Gas supply. Local government activities associated with the acquisition of gas supplies and distribution to individual consumers.

Health. Administration of public health programs, community and visiting nurse services, immunization programs, drug abuse rehabilitation programs, health and food inspection activities, operation of outpatient clinics, and environmental pollution control activities are included in this classification.

Higher education. Includes local government degree granting institutions which provide academic training above grade 12. Instructional employees includes persons engaged in teaching and related academic research.

Highways. Activities associated with the maintenance and operation of streets, roads, sidewalks, bridges, tunnels, toll roads, and ferries are included at this function. Snow and ice removal, street lighting, and highway and traffic engineering activities are also included here.

Hospitals. Includes only government operated medical care facilities which provide inpatient care. Employees and payrolls of private corporations which lease and operate government-owned hospital facilities are excluded.

Housing and community development. The operation of housing and redevelopment projects and other activities to promote or aid housing and community development.

Judicial and legal. Includes all court and court related activities (except probation and parole activities which are included at the "Correction" function), court activities of sheriff's offices, prosecuting attorneys' and public defender's offices, legal departments, and attorneys providing governmentwide legal service.

Libraries. Applies only to libraries operated by local governments for use by the general public. School and law libraries are included in the "Elementary and secondary education" or "Higher education," and "judicial and legal" categories respectively.

National defense and international relations. Includes activities of the Federal Government associated with national defense and international relations, including primarily the Departments of Army, Navy, and Air Force; Department of State; U.S. Information Agency; and the Defense Logistics Agency. Defense related activities of State and local governments, including National Guard and civil defense, are classified at the "All other and unallocable" category.

Natural resources. Activities primarily concerned with the conservation and development of natural resources—forest fire prevention and control, flood control, irrigation, drainage, land and forest reclamation, fish and game preservation and control, soil conservation, forestry, agricultural aids and research, agricultural development and inspection, and mineral resources activities.

Other education. State government activities relating to the supervision and regulation of public and private elementary and secondary schools; programs and institutions for training of blind, deaf, and other handicapped persons; and vocational rehabilitation programs.

Other government administration. Applies to the legislative and governmentwide administrative agencies of governments. Included here are overall planning and zoning activities, and central personnel and administrative activities. This function is not applied to school district or special district governments.

Parks and recreation. Government activities that include the operation and maintenance of parks, playgrounds, swimming pools, public beaches, auditoriums, public golf courses, museums, marinas, botanical gardens, and zoological parks.

Police protection. All activities concerned, with the enforcement of law and order, including coroner's offices, police training academies, investigation bureaus, and local jails, "lockups," or other detention facilities not intended to serve as correctional facilities. The subcategory of police officers includes only persons with the power of arrest.

Postal service. The United States Postal Service.

Public welfare. Included in this category are such activities as the administration of various public assistance programs for the needy, operation of homes for the elderly, indigent care institutions, and programs which provide payments for medical care and other services for the needy. Health care and hospital services provided directly by a government, however, are included in the "Health" and "Hospital" functions rather than here.

Sanitation other than sewerage. Refuse collection and disposal, operation of sanitary landfills, and street cleaning activities.

Sewerage. The provision, maintenance, and operation of sanitary and storm sewer systems and sewage disposal and treatment facilities.

Social insurance administration. The administration and conduct of social insurance programs. For State governments, these activities include unemployment compensation and worker compensation programs, work/study programs, and determination of eligibility for Federal Old Age, Survivors, Disability, and Health Insurance (Social Security). Federal activities in this category are primarily those performed by the Social Security Administration and the Pension Benefit Guarantee Corporation.

Space research and technology. Federal space activities are primarily programs of the National Aeronautics and Space Administration.

State liquor stores. The administration and operation of liquor stores by State governments.

Transit. Activities relating to the operation and maintenance of public mass transit systems (e.g., bus, subway, surface rail, and street railroad systems). Elementary and secondary school transportation systems are included in the "Elementary and secondary education" function.

Water supply. Local government activities associated with the production or acquisition of water and distribution to the public.

Water transport and terminals. Activities which are connected with the operation and support of canals and other waterways, harbors, docks, wharves, and other related marine terminal facilities.

Appendix B.

Multicounty Municipalities With Population of 50,000 or More: 1991

This list excludes multicounties where more than 99 percent of the population is in the major county area

State and municipality	1990 population	Major county area	Percent of municipal population in the major county area	Number of county areas served
Alabama				
Birmingham	265,968	Jefferson	99.7	2

Appendix D.

County-Type Areas Without County Governments

Areas with governments legally designated as city-counties and operating primarily as cities (8):

Alaska.....	City and borough of Anchorage, city and borough of Juneau, and city and borough of Sitka.
California.....	City and county of San Francisco.
Colorado.....	City and county of Denver.
Hawaii.....	City and county of Honolulu.
Montana	Anaconda-Deer Lodge County and Butte- Silver Bow.

Areas designated as metropolitan governments and operating primarily as cities (2):

Tennessee	Metropolitan government of Nashville and Davidson County, and metropolitan government of Lynchburg and Moore County.
-----------------	--

Areas having certain types of county offices, but as part of another government (city, township, State) (17):

Florida	County of Duval (city of Jacksonville).
Georgia	County of Clarke (city of Athens) and County of Muscogee (city of Columbus).
Hawaii.....	County of Kalawao (State of Hawaii).
Indiana	County of Marion (city of Indianapolis).
Kentucky.....	Lexington-Fayette Urban County.
Louisiana	Parish of East Baton Rouge (city of Baton Rouge), parish of Orleans (city of New Orleans), and Terrebonne Parish Consolidated Government.
Massachusetts	County of Nantucket (town of Nantucket) and county of Suffolk, (city of Boston).
New York	Counties of Bronx, Kings, New York, Queens, and Richmond (all part of the city of New York).
Pennsylvania	County of Philadelphia (city of Philadelphia).Area classified as separate county area and as a separate State area in population statistics, but counted as a municipal government in census statistics in governments (1):
District of Columbia	Washington city.

Cities located outside of any “county” area and administering functions elsewhere commonly performed by counties (44):

Maryland.....	Baltimore city (distinct from Baltimore County).
Missouri.....	St. Louis city (distinct from St. Louis County).
Nevada	Carson City.
Virginia (41 cities)	Alexandria, Bedford, Bristol, BuenaVista, Charlottesville, Chesapeake, Clifton Forge, Colonial Heights, Covington, Danville, Emporia, Fairfax, Falls Church, Franklin, Fredericksburg, Galax, Hampton, Harrisonburg, Hopewell, Lexington, Lynchburg, Manassas, Manassas Park, Martinsville, Newport News, Norfolk, Norton, Petersburg, Poquoson, Portsmouth, Radford, Richmond, Roanoke, Salem, South Boston, Staunton, Suffolk, Virginia Beach, Waynesboro, Williamsburg, and Winchester.

Unorganized areas bearing county designations (15):

Connecticut (8 county areas with no county government) Fairfield, Hartford, Litchfield, Middlesex, New Haven, NewLondon, Tolland, and Windham.

Rhode Island (5 county areas with no county government) Bristol, Kent, Newport, Providence, and Washington.

South Dakota (2 county areas attached to other counties for governmental purposes) Shannon and Todd.

Other unorganized county-type areas (12):

Alaska..... 11 census areas.

Montana Area of Yellowstone NationalPark (areas of the park located in Idaho and Wyoming areincluded in county areas in those States).

Publication Program

1992 CENSUS OF GOVERNMENTS

The Bureau of the Census has conducted a Census of Governments every 5 years since 1957 covering four major subject fields relating to State and local governments—organization, taxable property values, employment, and finances. The results of the 1992 Census of Governments are being issued in both printed and electronic formats. The printed material includes two preliminary reports and five volumes, which are described individually below. The electronic dissemination will encompass a variety of media—tapes, diskettes, CD-ROM, and electronic networks—described in a separate section following the report descriptions.

PRELIMINARY REPORTS

No. 1. *Government Units* National and State figures on number of governments by type.

No. 2. *Popularly Elected Officials* National and State counts of popularly elected officials by type of government and type of office.

FINAL REPORTS

Volume 1. Government Organization

No. 1. *Government Organization* Data for the Nation and by States on county, municipal, and township governments by population size; on public school systems by size of enrollment, grades provided, and number of schools; and on special district governments by function and amount of outstanding debt. Also shown is the number of local governments, by type, in each county area in the Nation. A description of local government structure in each State is a major feature of this report.

No. 2. *Popularly Elected Officials* Data for the Nation and by States on the number of officials directly elected by the voters, by type of office and by type of government. Also included is the number of officials that are elected directly by the voters in each county area in the Nation. This report includes also a tabular presentation describing elective offices authorized by State constitutions and general laws, with information for each office on length of term, geographic area, and method of compensation.

Volume 2. Taxable Property Values

No. 1. *Assessed Valuations for Local General Property Taxation* Figures for the Nation, States, counties, and cities having a population of 50,000 or more on assessed values (gross and net) of taxable property.

No. 2. *Taxable Real Property Assessment/Sales Price Ratios* Data on assessment levels—including assessment/sales price ratios and dispersion coefficients—that provide important statistical measures relating to real property taxation. Report provides information for selected State and county areas.

Volume 3. Public Employment

No. 1. *Employment of Major Local Governments* Statistics on October 1992 employment and payrolls for: all county governments; subcounty general purpose governments (municipalities and townships) having 25,000 or more population; school systems having 5,000 or more enrollment; and special district governments having 100 or more full-time employees.

No. 2. *Compendium of Public Employment* Employment and payroll data for the month of October 1992 by government function for the Nation, by States, and by type of government. Report also displays data summarized by county area for local government employment and payrolls.

Volume 4. Government Finances

No. 1. *Public Education Finances* Statistics on revenue, expenditure, debt, and financial assets of school systems, presented for the Nation, for States, and for school systems having 5,000 or more enrollment. Data describe financial activity in fiscal year 1992.

No. 2. *Finances of Special Districts* Fiscal year 1992 statistics on finances of special district governments, by States, and for selected large districts.

No. 3. *Finances of County Governments* Statistics on revenue, expenditure, debt, and financial assets of county governments in fiscal year 1992. Report provides national summaries, population size-group information, State area data, and displays of all individual county governments.

No. 4. *Finances of Municipal and Township Governments* Fiscal year 1992 statistics on revenue, expenditure, debt, and financial assets of municipalities and townships. There are national summaries and aggregations by population size-group and State. Report provides data for all individual municipalities and townships with a population of 25,000 or more.

No. 5. *Compendium of Government Finances* A summary of census findings on fiscal year 1992 government finances for Federal, State, and local governments. In addition to financial amounts, report includes derivative calculations of percentage distributions, per capita amounts, and amounts per \$1,000 of personal income. Data are presented for the Nation, for State areas by type of government, and for local governments in each individual county area.

No. 6. *Employee Retirement Systems of State and Local Governments* Membership, receipts, expenditure, number of beneficiaries, and financial assets of State and local government employee retirement systems. Data are shown for the Nation, for States, and for individual retirement systems having assets of \$50 million or more.

Volume 5. Guide to the 1992 Census of Governments

A compilation of table samples from the 1992 Census of Governments report series.

ELECTRONIC MEDIA

The census data will be available in the following electronic formats—diskettes or computer tapes; CD-ROM disks; and electronic network. The *diskettes or computer tapes* will be data files generally compatible with previous annual survey and census of government versions. In general, these files contain: State area data by type of government; local government county area totals; and individual government detail. The *CD-ROM disks* will provide information found in the diskettes or computer tapes, plus an electronic version of each report. *Electronic networks*, such as INTERNET and possibly others, will carry the data described as being available on diskettes or computer tapes.

HOW TO PURCHASE PRINTED REPORTS

When the printed reports described above become available, they will be sold by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20401.

Telephone or fax orders may be used to reduce processing time if your order is to be charged to VISA, MasterCard, or prepaid Superintendent of Documents Deposit Account. Customers will be able to call the Order Desk in Washington, DC, at 202-783-3238, between 7:30 a.m. and 4:00 p.m., eastern time, Monday through Friday, except holidays.

HOW TO PURCHASE DATA ON ELECTRONIC MEDIA

The Data User Services Division of the Bureau of the Census will market all electronic media described above. The telephone and fax numbers for ordering are: telephone, 301-763-4100; fax, 301-763-5198. To expedite processing, you can charge your order to VISA, MasterCard, or a prepaid Bureau of the Census account. You will also be able to order this service by mail from the Data User Services Division, U.S. Bureau of the Census, Washington, DC 20233-8300.
