Director, Housing and Demographic Analysis Division

This report presents data from the Annual Housing Survey, which was sponsored by the U.S. Department of Housing and Urban Development and conducted by the U.S. Bureau of the Census. It was prepared primarily under the direction of Duane T. McGough, Director, Housing and Demographic Analysis Division, Department of Housing and Urban Development, and Arthur F. Young, Chief, Housing Division, Bureau of the Census.

Duane T. McGough, assisted by David Yentis, Connie Casey, John Sneed, and Ken Wieand, was responsible for overseeing the Annual Housing Survey and the resultant report on behalf of the Department of Housing and Urban Development.

Within the Bureau of the Census, this report was developed in the Housing Division. It was prepared, under the supervision of Leonard J. Norry, Assistant Division Chief, by Edward D. Montfort, Chief, Current Surveys Branch, assisted by Jane S. Maynard and Paul P. Harple, Jr. Specific activities related to data collection procedures, statistical presentation, organization of the report, and preparation of text materials were performed by Edward Cary Bean, Jr., Susan Bush, Mary C. Carroll, Margaret W. Harper, Stuart M. Kaufman, Richard G. Kreinsen, Katherine L. Marshall, Josephine Ruffin, Georgina Torres, Barbara Williams, and Jeanne M. Woodward. Important contributions were made by Elmo E. Beach in the planning and coordination of the survey.

The operational aspects of the Annual Housing Survey were coordinated by the Demographic Surveys Division, under the direction of Earle J. Gerson, Chief, by Stanley Greene, Assistant Division Chief, and Edward F. Knowles, assisted by Carrol B. Kindel, Maria A. Mochulski, Al Episcopo, Gregory Wells, and Fabian Sanchez. Systems and processing procedures were performed under the direction of Barry M. Cohen, Assistant Division Chief. The computer programming and processing were performed under the supervision of D. Richard Bartlett, assisted by Merritt P. Woodard. Stephen T. Phillips, Nathan P. Call, Linda D. Burgess, and James E. Dallmann. Leonard Goldberg, assisted by David B. Lipscomb, Mary L. Campbell, Robert Smith, Jr., and Eleanor H. Cooper, was responsible for the clerical and keying procedures and scheduling.

The planning of sample design, weighting, and computation of sampling variances and standard errors was developed in the Statistical Methods Division, under the supervision of Charles Jones, Chief, and Gary Shapiro, Assistant Division Chief, by Dennis Schwanz, Carol Mylet, Deborah Lorah, and Charles Wolters. Implementation of the sample selection and preparation of sample controls were performed under the supervision of Robert T. O'Reagan, Assistant Division Chief, by Leonard Baer, Jerome Roth, Florence Hochstadter, David Diskin, Susan Dellinger, Christine Jorgensen, Duane Hybertson, David Kriegman, and Patricia Clark (Data Preparation Division, Jeffersonville, Ind.). The preparation of field sample control and reinterview procedures was performed, under the supervision of Robert T. O'Reagan, by Irene Montie, John Paletta, Edison Gore, and Richard Frazier. Reinterview design and analysis were conducted under the supervision of Irwin Schreiner. Coverage improvement procedures were developed by David Bateman and implemented, under the supervision of Robert T. O'Reagan, by Irene Montie, Michael Tenebaum, Jay Casselberry, Leonard Baer, Jerome Roth, David Diskin, David Kriegman, Duane Hybertson, and Susan Heskamp (Data Preparation Division, Jeffersonville, Ind.).

Data collection activities were administered by the Field Division, under the supervision of Curtis T. Hill, Chief, by Forrest P. Cawley, Jr., Assistant Division Chief, Darren F. Althouse, and Kenneth A. Frail, as well as John E. Tharaldson, Director of the Bureau's Seattle Regional Office.

Clerical processing of the questionnaires was performed in the Data Preparation Division, under the direction of Don L. Adams, Chief, by Patricia Clark and Kurt Legait.

Within the Publications Services Division, many individuals made significant contributions in the areas of publication planning and design, editorial review, composition, and printing procurement.

GENERAL

This report presents statistics on housing and household characteristics from the 1977-1978 Annual Housing Survey conducted in 20 selected standard metropolitan statistical areas (SMSA's). For a list of these SMSA's, see page XVIII. The Annual Housing Survey was designed to provide a current series of information on the size and composition of the housing inventory, the characteristics of its occupants, the changes in the inventory resulting from new construction and from losses, the indicators of housing and neighborhood quality, and the characteristics of recent movers. The survey, performed for the Department of Housing and Urban Development, is authorized under sections 501 and 502(d), 502(e), and 502(f) of the Housing and Urban Development Act of 1970, Title 12, United States Code 1701z-1 and 1701z-2. The Bureau of the Census is authorized under Title 31, United States Code, section 686, to perform special work or services for Federal agencies.

The statistics presented in this report are based on information from a sample of housing units. The information for the survey was collected by personal interview from April 1977 through February 1978.

A separate report is issued jointly by the Department of Housing and Urban Development and the Bureau of the Census for each of the 20 SMSA's in the 1977-1978 survey. Each report consists of five parts. Part A presents statistics on general housing characteristics, part B on indicators of housing and neighborhood quality, part C on financial characteristics, part D on recent mover households, and part F on financial characteristics cross-classified by indicators of housing and neighborhood quality. (Part E is published only for the national sample.)

The content and procedures of the Annual Housing Survey were determined after consultation with a variety of users of housing data and through field pretesting. The data for many of the subjects covered in this report are the same as those collected in the 1970 Census of Housing; in general, these data are comparable to those shown in the 1970 census reports. In addition, a number of new items were introduced in this survey on subjects such as breakdowns in equipment, the physical condition of the structure, neighborhood conditions and services, distance and travel time from home to work for the household head, storm windows and doors, and insulation.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233.

Sample size.—The statistics presented in this report are based on a sample of housing units and are, therefore, subject to sampling variability. Two different sample sizes were employed in the 1977-1978 survey. The largest SMSA from each of the 4 geographic regions was represented by a sample of about 15,000 designated housing units which was evenly divided between the central city or cities and the balance of the respective SMSA; i.e., the area not in central cities. These SMSA's were Boston, Mass., Detroit, Mich., Los Angeles-Long Beach, Calif., and Washington, D.C.-Md.-Va. All remaining SMSA's were each represented by a sample of about 5,000 designated housing units which was divided between the central city or cities and the balance of the respective SMSA based on the proportionate distribution of all housing units in the entire SMSA.

The sample was selected from units enumerated in the 1970 census and updated to include units constructed since 1970. Detailed information on the sample design, size of sample, estimation procedure, and sampling variability

associated with these data is given in appendix B.

Organization of the text. The text consists of this introduction and appendixes A and B, which appear after the data tables. Appendix A describes the geographic area classifications and provides definitions and explanations of the subjects covered in this report. The subject location (parts A, B, C, D or F) precedes the subject definitions in appendix A. Appendix B presents information on sample design, estimation, and accuracy of the data.

Content of the tables.—A series of standard tables presents data for housing units for each area shown in the report. In this group of SMSA's, separate data are shown for "in central cities" and "not in central cities," as well as for the SMSA as a whole. In parts A, B, C, and F, the prefix letter "A" has been assigned to the tables for the SMSA as a whole, "B" to tables for "in central cities," and "C" to tables for "not in central cities." The numbers presented in the tables are published in whole numbers but rounded to the nearest hundred. Characteristics for some items may not add to the total due to rounding.

In part A on general housing characteristics, tables 1 and 2 present selected housing characteristics for 1977, 1974, and 1970; table 3, characteristics of new construction units, and table 4, 1974 characteristics of housing units removed from the housing inventory. The same general subject content presented in tables 1 and 2 is also presented for households with Black household head in tables 5 and 6 and for households with head of Spanish origin in tables 7 and 8.

In part B on indicators of housing and neighborhood quality, tables 1 to 4 present characteristics for owner- and renter-occupied housing units, tables 5 to 8 present characteristics for owner- and renter-occupied housing units with Black household head, tables 9 to 12 present characteristics for owner- and renter-occupied housing units with household head of Spanish origin, and table 13 presents characteristics for vacant year-round housing units.

In part C on financial characteristics, table 1 presents characteristics of owner- and renter-occupied housing units by income of the family or primary individual; table 2 presents characteristics for owner-occupied, one-family homes by value of property; and table 3 presents characteristics of renter-occupied housing units by gross rent. The same subject content as shown in tables 1 to 3 is presented for housing units with Black household head in tables 4 to 6 and for housing units with household head of Spanish origin in tables 7 to 9.

In part D on recent mover households, table 1 presents characteristics of all occupied housing units and units occupied by recent movers (households that moved into their units during the 12 months prior to the interview). Tables 2 to 9 present characteristics of the present unit for recent mover households cross-classified by characteristics of the previous unit. The same subject content as shown in tables 1 to 9 is presented for housing units with Black household head in tables 10 to 18 and for housing units with household head of Spanish origin in tables 19 to 27.

In part F, the tables show cross-tabulations of the indicators of housing and neighborhood quality by income, value, and gross rent. Tables 1 to 4 present characteristics of owner- and renter-occupied housing units by income of the family or primary individual; tables 5 to 8 present characteristics of owner-occupied, one-family homes by value of property; and tables 9 to 12 present characteristics of renter-occupied housing units by gross rent. The same subject content as shown in tables 1 to 12 is presented for households with Black household head in tables 13 to 24 and for households with head of Spanish origin in tables 25 to 36.

1970 data in this report.—The source of the 1970 data shown in part A is both published and unpublished tabulations from the 1970 Census of Population and Housing. For some items, 1970 data are not shown because they are not available. Data for 1970 for all housing units and for units with Black household head are from the 20-, 15-, and 5-percent samples. Data for housing units with household head of Spanish origin are limited to the 1970 census 5-percent sample. The totals for individual items in some tables may differ when the characteristics are derived from different samples. Information for the 1970 census was collected as of April 1, 1970.

1974 data in this report.—The source of the 1974 data shown in part A, including characteristics of units lost from the inventory, is published tabulations from the 1974 Annual Housing Survey. For some items, 1974 data are not available. Information for the 1974 Annual Housing Survey was collected by personal interviews from April 1974 through March 1975.

Derived figures (medians, etc.).—Shown in this report are percents, means, medians, and ratios. The median, which is a type of average, is the middle value in a distribution; i.e., the median divides the distribution into two equal parts—one-half the cases fall below the median and one-half the cases exceed the median. Derived figures are not presented (but indicated by three dots . . .) if there are less than 25 sample cases in the distribution or the base.

Medians for rooms, persons, and years of school completed by head are rounded to the nearest tenth; selected monthly housing costs as precentage of income to the nearest percent. Travel time is rounded to the nearest minute and distance from home to work is rounded to the nearest tenth mile. Medians for value and income are rounded to the nearest hundred dollars; rent, real estate taxes last year, and selected monthly housing costs are rounded to the nearest dollar.

In computing medians for rooms and persons per housing unit, the whole number is used as the midpoint of the interval; for example, the category "4 rooms" is treated as an interval ranging from 3.5 up to 4.5 rooms. When computing medians for distance and travel time to work, household heads reporting "no fixed place of work" are excluded. Units reporting "no cash rent" are excluded from the computation of median rent; for selected monthly housing costs

as percentage of income, units in the category "not computed" are excluded. "Not reported" categories are excluded from the computation of medians.

The median number of school years completed by the head of the household was computed after the statistics on years of school completed had been converted to a continuous series of numbers (e.g., completion of the 1st year of high school was treated as completion of the 9th year and completion of the 1st year of college as completion of the 13th year). Heads completing a given school year were assumed to be distributed evenly within the interval from 0.0 to 0.9 of the year. Because of the inexact assumption as to the distribution within an interval, the median school years completed is more appropriately used for comparing different groups and the same group at different dates than as an absolute measure of educational attainment.

The medians presented for 1977 and 1974 are generally computed on the basis of the distributions as shown in this report. The medians presented for 1970 are computed on the basis of the distributions as tabulated in 1970, which are sometimes more detailed than the distributions shown in this report.

When the median falls in the lower terminal category of an open-ended distribution, the method of presentation is to show the initial value of the next category followed by a minus sign; for example, if the median falls in the category "Less than $5,000," it is shown as "$5,000–." When the median falls in the upper terminal category of an open-ended distribution, the method of presentation is to show the initial value of the terminal category followed by a plus sign; for example, if the median falls in the category "$75,000 or more," it is shown as "$75,000+."

Symbols.—A dash (—) signifies zero or a number which rounds to zero. Three dots (. . .) in a data column mean not applicable or that the base for a derived figure is too small for it to be shown. The symbol "NA" means not available.

Boundaries.—The data shown in this report relate to the areas as defined for the 1970 census. See appendix A for a discussion of these areas. Additional information and definitions of the 1970 boundaries are given in the 1970 Population Census PC(1)-A reports.

List of SMSA reports from the Annual Housing Survey.—The SMSA surveys are conducted in 60 selected SMSA's originally divided into 3 groups of approximately 20 each, with 1 group to be interviewed every 3 years on a rotating basis. Interviewing for the second visit to the group A SMSA's (which includes this SMSA) began April 1977 and continued through February 1978.

In 1978 these 3 groups were revised into 4 groups of 15 each, designated as groups I, II, III, and IV. A list of the original groups follows. The number beside each SMSA indicates the revised groupings. Reports have been published for the first visit for Group A (1974), Group B (1975), and Group C (1976). The survey for Group I SMSA's was conducted from April 1978 to March 1979.

Other reports from the Annual Housing Survey.—For the Group B SMSA's, part F, on financial characteristics cross-classified by indicators of housing and neighborhood quality, was published in a separate report. (Part F is not available for the first visit of the Group A SMSA's.) In addition to the basic reports for each SMSA in Series H-170, one or more supplementary reports (Series H-171) may be published for the SMSA's.

A series of reports (H-150) similar to Series H-170 is being published for the United States. The data for the national reports are collected once a year from an independent sample of housing units. Statistics are shown for the United States by inside and outside SMSA's and for each of the four regions. The first national survey was conducted in August to December 1973. From the 1973 survey, four reports (parts A-D) and a supplementary report (Series H-151, No. 1) were published. The publication program for the 1974, 1975, 1976, and 1977 surveys included six final reports, parts A-F; each part is published as a separate report. Part E, published only for the national sample, presents housing characteristics of urban and rural units.

ADDITIONAL DATA

Unpublished tabulations.—A large number of tabulations, not included in the published reports, have been prepared to meet special needs of both national (Series H-150 and H-151) and SMSA (Series H-170 and H-171) data users. These unpublished data are available in two forms. Paper photocopies are available for specific tables at the cost of reproduction. Microfilm copies of these unpublished data are also available on a cost per reel basis. An index of the data available can be obtained free of charge. Also available on microfilm are cross tabulations of data for units with Black household heads and heads of Spanish origin which were suppressed in the SMSA reports due to a lack of sufficient numbers of sample cases. This data may be obtained by contacting the Housing Division, Bureau of the Census, Washington, D.C. 20233.

Public-use microdata files.—For the data users whose needs are not met by the available tabulations, the Census Bureau also has made available computerized microdata (individual respondent records) from both the SMSA and national samples. Except for names and addresses, the AHS microdata provide essentially all the information obtained from each household or vacant unit. The Census Bureau's confidentiality guidelines prescribe that individuals and specific addresses remain anonymous.

Confidentiality guidelines further prescribe that individual records cannot be associated with areas having fewer than 250,000 people based on 1970 census results. The national files identify the 4 census regions, each SMSA of 250,000 or more population (central city residence is also identified where possible), metropolitan/nonmetropolitan residence, and urban/rural residence. The SMSA data files contain all SMSA samples except Saginaw, Mich., which contained less than the 250,000 required 1970 population.

*The regrouping of the SMSA's into 4 groups of 15 each began in 1978 and is shown in the revised columns.

**Included with Group B for the first interview.

Central cities are identified for 42 of the 59 SMSA's.

Microdata computer tapes from the Annual Housing Survey are available on a cost per reel basis from the Data User Services Division, Bureau of the Census, Washington, D.C. 20233.

Microfiche of published reports.—Microfiche copies for national and SMSA published reports are available from Customer Services, Data User Services Division, Bureau of the Census, Washington, D.C. 20233.

DATA COLLECTION PROCEDURES

The 1977 Annual Housing Survey was conducted by interviewers who made personal visits to each sample unit and obtained the information from the occupants or, if the unit was vacant, from informed persons (landlords, rental agents, or knowledgeable neighbors). The information reported by the interviewer reflected the situation at the time of the survey, which began in April 1977 and extended through February 1978 with one-eleventh of the sample units being visited each month.

Data were collected for sample housing units located in the counties and independent cities comprising the 20 Group A SMSA's. A sample of housing units was selected in these areas from the 1970 census and updated, by a sample of addresses from building permits, to include housing units added since 1970. Estimates of the counts and characteristics of the 1977 inventory were obtained for these sample units.

For the estimates of losses from the 1974 housing inventory, the interviewer located the address of the 1974 sample unit. If the 1974 sample unit no longer existed or no longer was a separate housing unit, the disposition of the unit was determined; i.e., lost through means such as demolition, disaster, merger, or conversion to nonresidential use.

A more detailed description of the survey design and sampling procedures can be found in appendix B.

PROCESSING PROCEDURES

The questionnaires used for the 1977 Annual Housing Survey were of the conventional type on which the interviewer recorded the information by marking a precoded check box or by writing in the entries. Census clerks edited and coded the schedules. The information from the questionnaires was data keyed directly to magnetic tape which was processed on the Census Bureau's computers through a number of editing and tabulating steps. A

facsimile of the questionnaire appears at the end of appendix A.

The 1974 characteristics of units lost from the housing inventory were obtained by matching those units to the 1974 Annual Housing Survey records. The 1974 data for the losses were then extracted from the 1974 Annual Housing Survey tapes. Data on losses are shown in part A of this report.

QUALIFICATIONS OF THE DATA

Since the estimates in this report are based on a sample, they may differ somewhat from the figures that would have been obtained from a complete census using the same schedules, instructions, and interviewers. Particular care should be exercised, therefore, in the interpretation of figures based on relatively small numbers of sample cases as well as small differences between figures. As in any survey work, the results are subject to errors of response and nonreporting and to sampling variability. For a further discussion of accuracy of the data, see appendix B.

The concepts and definitions are essentially the same for those items which appear both in this report and in the 1970 census reports. The SMSA boundaries are the same as those in the 1970 census. For historical comparisons and boundary changes, refer to the census reports of 1960 and earlier.

In making comparisons between the 1977 survey and 1970 Census of Housing results, differences in the data may reflect such factors as the use of direct interview for 1977 contrasted with the extensive use of self-enumeration in 1970, the sample design, the estimation procedure used, the sampling variability of the estimates, and the processing procedures. See the section on "Comparability with 1970 Census of Housing data" in appendix A for further discussion.

Statistics on income relate to the income of the family or primary individual. Therefore, no data are provided on household income; i.e., income of persons unrelated to the head of the household is excluded.

Statistics for some of the characteristics shown are based on restricted universes and, therefore, care should be exercised in relating the statistics for one characteristic to another. For example, value is restricted to owner-occupied, one-family homes on less than 10 acres and no business on property. Therefore, the totals for owner-occupied units in the "value" universe do not agree with the totals for owner-occupied units for some of the other universes such as "rooms" or "persons." In addition, data for some of the items are not comparable because of the different universes used. For example, the statistics on sewage disposal in parts B, C, and F are limited to "units occupied 3 months or longer," whereas decennial census data and data in parts A and D on sewage disposal are shown for "all units," including units which were occupied less than 3 months.

The data in parts B and F are intended to serve as broad "indicators" of housing quality and not as precise measurements. A housing unit, for example, that is reported to have signs of a leaking roof or a breakdown or failure in plumbing facilities is not necessarily "inadequate" or "poor" housing. Conversely, a housing unit that is reported as not having such defects is not necessarily a house of "good quality." The data presented for items such as "neighborhood conditions" and "neighborhood services" are based on the individual respondent's opinion of conditions in the neighborhood. The respondent's opinion may or may not reflect the "actual" situation. Furthermore, two respondents in the same neighborhood may view the same condition differently; for example, one respondent may indicate that the streets need repair while the other does not.

Care should be exercised in the interpretation of differences in the estimated counts of Spanish-origin households between the 1970 census and the Annual Housing Survey. Differences between the two sets of data may reflect factors such as: (1) The use of direct interview in the Annual Housing Survey contrasted with the extensive use of self-enumeration in the 1970 census; (2) differences in the Spanish-origin classifications utilized in the two enumerations; (3) the sampling variability of both the 1970 5-percent census sample estimates and the AHS sample estimates; and (4) the specific estimation and processing procedures used in the 1970 census and the Annual Housing Survey.

See appendix A for a more detailed discussion of the definitions and qualifications of all items in this report.

TABLES FOR MINORITY HOUSEHOLDS

All simple distribution tables for housing units with Black household head or Spanish-origin household head are shown except when that group consists of less than 25 sample cases. All cross-tabulations are shown except when the minority group consists of less than 75 sample cases.

For this SMSA, all tables for housing units with Black household head are shown except tables 12 to 18 of part D for "in central city" and for "not in central city." These tables are not shown because the AHS estimate of Black recent mover households for "in central city" is 900 and for "not in central city," 1,700, constituting 28 and 54 sample cases, respectively.

All tables for Spanish-origin households are shown except tables B-7 to B-8 of part A; B-9 to B-12 of part B; B-7 to B-9, and C-7 to C-9 of part C; 19 to 20 of part D for "in central city" and 21 to 27 of part D; and B-25 to B-36 and C-25 to C-36 of part F. The tables are not shown because the AHS estimate of Spanish-origin households for "in central city" is 400 and for "not in central city," 1,800, constituting 14 and 62 sample cases, respectively. The AHS estimate of Spanish-origin recent mover households for the SMSA "total" is 1,300, for "in central city," 200, and for "not in central city," 1,100, constituting 45, 7, and 38 sample cases, respectively.

ESTIMATES OF CHANGE, 1974 TO 1977

Results from the second survey conducted for this SMSA indicate that the October 1977 estimate of total housing units is 168,100, a net gain of 16,100 units over the revised 1974 AHS survey estimate of 152,000.

The net increase of 16,100 units reflects 16,700 units added to the inventory through new construction, minus 3,200 units lost through demolition, disaster, or other means, plus 2,600 unspecified units that entered the inventory.

Approximately 10 percent of the total housing stock in the Tacoma metropolitan area was constructed since the last survey in 1974. Most of the new construction in the metropolitan area occurred in the suburbs; i.e., the noncentral city portion of Pierce County. Approximately 14,200 units, or about 14 percent of all housing in these areas, were built since 1974, compared with 2,500 units, or about 4 percent of all housing in the city of Tacoma.

Offsetting these additions to the housing stock were 3,200 units lost through demolition, disaster, or other means between 1974 and 1977. Removals from the housing stock resulting through means other than demolition and disaster include: Units which were changed to nonresidential use; units condemned because of violation of local ordinances or housing codes; some mergers resulting from combining two or more units into fewer units; and mobile homes, occupied in 1974, which were vacant at the time of the survey in 1977, etc. Certain losses, however, are not included in this 3-year measurement; i.e., units which existed as part of the housing stock during both surveys, but which were removed for a time during the period between the surveys, and units, either constructed or added to the housing stock through other sources since the 1974 survey, which were classified as losses in the 1977 survey.

The net addition of 2,600 unspecified units between 1974 and 1977 represents a variety of additions, not specifically measured by the survey, offset by certain losses. Examples of such additions are: Conversions from fewer units to more units, changes of nonresidential units to residential use, changes of group quarters to housing units, housing units moved to site, and housing units returned to the inventory in 1977 that had been temporarily lost in 1974. Examples of this last category are: 1977 housing units which, in 1974, were condemned for occupancy because of violation of local ordinances or housing codes; vacant units damaged by fire, flood, or vandalism to the extent that the interiors were exposed to the elements but which had been rehabilitated in 1977; and mobile homes which were vacant in 1974, but were occupied in 1977 as primary residences. Also included in the unspecified category are some losses resulting from combining two or more units into fewer units. The unspecified category also reflects sampling and nonsampling errors in the various components of both the 1974 and 1977 surveys.

Source of the 1977 Housing Inventory

Area and subject	Total	In central cities	Not in central cities
All housing units, October 1977	168,100	63,900	104,200
All housing units, October 1974 (revised)	152,000	NA	NA
Change:			
Number	16,100	NA	NA
Percent	10.6	NA	NA
Units added by new construction	16,700	2,500	14,200
Units lost through demolition, or disaster or other means	3,200	1,400	1,800
Unspecified units	2,600	NA	NA

REVISED 1974 ESTIMATES

The revised estimate of the housing stock given in the table was developed using the results of the 1977 coverage improvement program which was conducted to correct certain deficiences in the AHS-SMSA sample. The Census Bureau recognized these sampling and procedural deficiencies when the estimates provided in the Current Housing Reports, Series H-170, (1974 SMSA report for the Tacoma, Wash., SMSA) were initially released. Consequently, the raw survey results were adjusted upward by 5,600 units through the use of ratio estimation procedures employed to adjust the AHS sample estimates of conventional new construction, new mobile homes, and units added to the housing stock through sources other than new construction to independently derived estimates which were available for these types of units at the time the 1974 survey results were being processed. These adjustments were made for the metropolitan area in its entirety. Since no attempt was made to adjust the counts of the housing inventory by inside and outside the central city of Tacoma, a revised estimate was provided for the metropolitan area only.

Results from the coverage improvement program initiated in 1977 indicated that approximately 9,400 units which were built in 1974 or before should have been included in both the 1974 and 1977 inventory estimates. (The 1977 housing inventory estimate also reflects 900 units which were constructed during 1974 through 1977 and added to the inventory as the result of these coverage improvement programs.) See discussion in appendix B, for a description of the types of units added to the survey through the coverage improvement program. The revised 1974 estimate of the housing inven-

tory, 152,000, differs from the previously published total of 148,200 by 3,800 units. This net difference results from the total number of units added to the 1974 housing stock through the coverage improvement program (9,400 units) reduced by the estimate (5,600 units) accounted for in 1974 by using ratio estimation to independent estimates.

The tables in this report detailing the selected characteristics of units surveyed in 1974 will not be revised since the coverage improvement program was not implemented until 1977. Consequently, there is no way of determining the characteristics of these units as they existed at the time of the 1974 survey. The 1977 characteristics of units provided in the tables, however, do reflect those units added to the inventory through the coverage improvement program which were assumed to exist in both 1974 and 1977.

The estimates developed from the results of the coverage improvement program as well as the regular survey procedures were based on a sample and are subject to sampling and nonsampling errors. See discussion in appendix B for an explanation of the types of possible errors associated with estimates based on data from sample surveys.

The data shown in this report relate to the areas as defined for the 1970 census.

General Housing Characteristics

FACSIMILE OF THE ANNUAL HOUSING SURVEY QUESTIONNAIRE: 1977 ..... App-20

AREA CLASSIFICATIONS

Counties

The primary divisions of most of the States are termed counties; in Louisiana the corresponding areas are termed parishes. Alaska has no counties; in this State, areas designated census divisions have been defined for general statistical purposes by the State in cooperation with the Census Bureau and are treated as county equivalents. Four States (Maryland, Missouri, Nevada, and Virginia) contain one or more cities that are independent of any county; for statistical purposes these independent cities are treated as county equivalents.

Standard Metropolitan Statistical Areas

The definitions of standard metropolitan statistical areas used in the Annual Housing Survey correspond to the 243 SMSA's used in the 1970 census. These include the 228 SMSA's as defined and named in the Bureau of the Budget publication, **Standard Metropolitan Statistical Areas: 1967**, U.S. Government Printing Office, Washington, D.C. 20402. After 1967, 15 SMSA's were added, of which 2 were defined in January 1968 and an additional 13 were defined in February 1971 on the basis of the results of the 1970 census. Changes in SMSA definition criteria, boundaries, and titles made after February 1971 are not reflected in this series of reports. SMSA's are defined by the Office of Management and Budget (formerly Bureau of the Budget).

Except in the New England States, a standard metropolitan statistical area is a county or group of contiguous counties which contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are socially and economically integrated with the central city. In the New England States, SMSA's consist of towns and cities instead of counties. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities. For a detailed description of the criteria used in defining SMSA's, see the Bureau of the Budget publication cited in the previous paragraph.

In this report, figures for "in central cities" refer to all housing units within the legal city boundaries.

DEFINITIONS AND EXPLANATIONS OF SUBJECT CHARACTERISTICS

General

As stated in the introductory text of this report, the 1977-1978 Annual Housing Survey was conducted by personal interview. The survey interviewers were instructed to read the questions directly from the questionnaire. The definitions and explanations given for each subject are, to a considerable extent, drawn from various technical and procedural materials used in the collection of the data. This material helped the field interviewers to understand more fully the intent of each question and thus to resolve problem or unusual cases. Additional explanatory information has been added to this portion of the text to assist the user in understanding the statistics.

Comparability with 1974 SMSA Annual Housing Survey data.—Most of the concepts and definitions used in the 1974 and 1977 reports are essentially the same. However, there are some differences in the measurement of losses. In the 1974 report, losses are measured from 1970, while in the 1977 report, losses are measured from 1974. Also, in 1974, housing units in nonpermit-issuing areas (mainly rural areas) were counted as losses only when the whole structure in which the unit was located was lost from the inventory. In the 1977 report, the data refer to losses of individual housing units regardless of whether the entire structure was lost from the inventory. The source of the data for lost units in the 1974 report is the 1970 Census of Housing; the source of the data for lost units in the 1977 report is the 1974 Annual Housing Survey.

Additional differences, if any, are discussed under the particular subject. Because of the relatively small sample size, particular care should be taken in making comparisons between the two surveys, especially where there are small differences between the figures (see appendix B).

Comparability with 1970 Census of Housing data.—The concepts and definitions are essentially the same for items that appear in both the 1970 census and the 1977 survey.

There is a major difference, however, in the time period of the "recent mover" classification. In the Annual Housing Survey, recent movers are households that moved into their unit during the 12 months prior to the interview, a time period of 1 year or less. In the 1970 Census of Housing reports, different time periods were used. In Volume II, **Metropolitan Housing Characteristics**, the shortest time period for "year moved into unit," is "1969 to March 1970" (1¼ years); in Volume IV, **Components of Inventory Change**, the period is 1969 to December 1970 (approximately 2 years); and in Volume VII, No. 5, **Mover Households**, the time period is April 1965 to March 1970 (approximately 5 years). Volume IV is the only 1970 census report which shows cross-tabulations of data on characteristics of present units by characteristics of previous units for recent movers.

Other definitional differences, if any, are discussed under the particular subject. Additional differences between the 1977 Annual Housing Survey data and the 1970 census data may be attributed to several factors. These include the extensive use of self-enumeration in the census in contrast to personal interview in the Annual Housing Survey; differences in processing procedures; the estimation procedures and sample designs; the sampling variability of the estimates from the Annual Housing Survey; to a smaller extent, the sampling variability associated

with the sample data from the census; the nonsampling errors associated with the Annual Housing Survey estimates; and the nonsampling errors associated with the census data.

Statistics on counts and characteristics of changes in the housing inventory between the 1960 and 1970 censuses are given for the United States and for 15 selected SMSA's in the 1970 Census of Housing, Volume IV, **Components of Inventory Change.** In volume IV, the data are based on information for a sample of housing units enumerated in late 1970 as part of the 1970 census. Data are provided for such components of change between 1960 and 1970 as new construction, conversions, other additions, demolitions, mergers, other losses, and housing units that were the same in 1960 and in 1970.

In part A of this report, data for three of these components are shown; i.e., new construction, demolition (or disaster), and other losses (some other means). The 1977 data on new construction were obtained primarily from a sample of units selected from building permits. The 1970 **Components of Inventory Change** data were obtained from the 1970 census tabulations of the "year structure built" item; i.e., housing units built in 1960 or later were classified as added by "new construction."

Data as of 1970 for "mortgage status," "mortgage insurance," "real estate taxes last year," "selected monthly housing costs," and "acquisition of property" are presented in the 1970 Census of Housing, Volume V, **Residential Finance.** In volume V, the data are based on information collected for a sample of housing units in the Residential Finance Survey which was conducted in 1971 as part of the 1970 census. The 1971 report provided data on the financing of homeowner and rental properties, including characteristics of the mortgages, properties, and homeowners.

Differences in the concepts and definitions between the data in this report and volume V include the following. The basic unit of tabulation in this report is the housing unit; in volume V, it is the property. Data on mortgage status and mortgage insurance in this report are based on the occupant's answer; in volume V, mortgage status and mortgage insurance were verified by the lender. In this report, real estate taxes and selected monthly housing costs reflect the total amount of real estate taxes and housing costs, excluding special assessments. In volume V, real estate taxes and selected monthly housing costs *include* special assessments.

Comparability with 1970 Census of Population data.—In the 1970 census, data for "years of school completed" were based on responses to two questions—the highest grade or year of regular school each household member attended, and whether or not that grade or year was completed. In the 1977 Annual Housing Survey, data for "years of school completed" were based on responses to a single question—the highest grade or year of regular school completed by the head. Therefore, the 1977 Annual Housing Survey may overstate the education level of the head of the household; that is, respondents may have reported the grade or year the head was currently enrolled in or had last been enrolled in whether or not the grade or year was completed.

Comparability with Current Construction Reports from the Survey of Construction.—The Census Bureau issues several publications under the general title, Current Construction Reports. The data for these reports are primarily from the Survey of Construction.

The Survey of Construction consists of approximately 14,000 permit-issuing places throughout the United States. The reports from the survey contain current data on housing starts and completions, construction authorized by building permits, housing units authorized for demolition in permit-issuing places for selected areas, new one-family homes sold and for sale, characteristics of new housing, and value of new construction put in place. The concepts and definitions used in this report differ from some of those used in the Survey of Construction. The major difference is that the Survey of Construction shows counts and characteristics of housing units in various stages of construction through completion. The Annual Housing Survey shows counts and characteristics of the existing housing inventory. Additional differences between the 1977 Annual Housing Survey and the Survey of Construction may be attributed to factors such as the sampling variability and nonsampling errors of the figures from the two surveys, survey procedures and techniques, and processing procedures.

Comparability with other Bureau of the Census data.—Statistics in this report refer, for the most part, to the housing unit, household, or head of household. Data on the individual household members such as "Population in housing units" and "Own children under 18 years old" may differ from other similar data compiled by the Bureau of the Census. For these types of data, write to Chief, Population Division, Bureau of the Census, Washington, D.C. 20233.

Comparability with housing vacancy surveys.—There may be differences between this survey and federal, State, local, and other surveys which present vacancy rates. The differences may be attributed to such factors as differing interview periods, survey designs, survey techniques, and processing procedures, as well as differences in concepts and definitions. In addition, there are sampling and nonsampling errors.

Living Quarters (Parts A, B, C, D, F)

Living quarters are classified as either housing units or group quarters. Usually, living quarters are in structures intended for residential use (e.g., a one-family home, apartment house, hotel or motel, boarding house, or mobile home or trailer). Living quarters may also be in structures intended for nonresidential use (e.g., the rooms in a warehouse where a watchman lives), as well as in places such as tents, caves, and old railroad cars.

Housing units (Parts A, B, C, D, F).—A housing unit is a house, an apartment, a group of rooms, or a single room occupied or intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants

do not live and eat with any other persons in the structure and which have either (1) direct access from the outside of the building or through a common hall which is used or intended to be used by the occupants of another unit or by the general public or (2) complete kitchen facilities for the exclusive use of the occupants. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except as described in the section on group quarters). For vacant units the criteria of separateness, direct access, and complete kitchen facilities for exclusive use are applied to the intended occupants whenever possible. If the information cannot be obtained, the criteria are applied to the previous occupants. Both occupied and vacant housing units are included in the housing inventory, except that mobile homes, trailers, tents, caves, boats, railroad cars, and the like, are included only if they are occupied.

Group quarters (Parts A, B, C, D, F).—Group quarters are living arrangements for institutional inmates or for other groups containing five or more persons not related to the person in charge. Group quarters are located most frequently in institutions, boarding houses, military barracks, college dormitories, fraternity and sorority houses, hospitals, monasteries, convents, and ships. A house or apartment is considered group quarters if it is shared by the person in charge and five or more persons unrelated to him or, if there is no person in charge, by six or more unrelated persons. Information on the housing characteristics of group quarters was not collected.

Rules for mobile homes, hotels, rooming houses, etc. (Parts A, B, C, D, F).—Mobile homes or trailers, tents, boats, or railroad cars are not considered housing units if vacant, used only for business, or used only for vacations.

Occupied rooms or suites of rooms in hotels, motels, and similar places are classified as housing units only when occupied by permanent residents; i.e., persons who consider the hotel as their usual place of residence or have no usual place of residence elsewhere. Vacant rooms or suites of rooms are classified as housing units only in those hotels, motels, and similar places in which 75 percent or more of the accommodations are occupied by permanent residents.

If any of the occupants in a rooming or boarding house live and eat separately from everyone else in the building and have either direct access or complete kitchen facilities for exclusive use, their quarters are classified as separate housing units. The remaining quarters are combined. If the combined quarters contain four or fewer roomers unrelated to the head, they are classified as one housing unit; if the combined quarters contain five or more roomers unrelated to the head or person in charge, they are classified as group quarters. In a dormitory, residence hall, or similar place, living quarters of the supervisory staff and other employees are separate housing units if they satisfy the housing unit criteria; other living quarters are considered group quarters.

Institutions (Parts A, B, C, D, F).—Living quarters of staff personnel are separate housing units if they satisfy the housing unit criteria. Other living quarters are considered group quarters.

Year-round housing units (Part A).—Data on housing characteristics are limited to year-round housing units; i.e., all occupied units plus vacant units which are intended for year-round use. Vacant units intended for seasonal occupancy and vacant units held for migratory labor are excluded because it is difficult to obtain reliable information for them. However, this report does present counts of the total housing inventory which includes all vacant housing units, including seasonal and migratory housing units.

Changes in the Housing Inventory

Units added by new construction (Part A).—Conventional housing units which were not in existence at the time of the 1974-1975 survey are classified new construction units. Mobile homes are considered as "new construction" if the model year is 1975 or later. Information was collected on vacant units under construction at the time of interview only if construction had proceeded to a point that all exterior windows and doors were installed and final usable floors were in place. Housing units built since the 1974-1975 survey but removed from the inventory before the interview are not reflected in the new construction counts.

In the 1974-1975 survey, a housing unit built in April 1970 or later was classified as a unit added by new construction. In the Annual Housing Survey, data on new construction were obtained primarily from a sample of units selected from building permits; in the 1970 Census of Housing, Volume IV, **Components of Inventory Change**, new construction data were obtained from the 1970 sample records of units built 1960 or later.

Units lost from the inventory (Part A).—In table 4 of part A of this report, characteristics are presented for all units removed from the inventory through demolition or disaster and through other means.

Units lost through demolition or disaster (Part A).—A housing unit which existed during the 1974 survey period and was torn down on the initiative of a public agency or as a result of action on the part of the owner is classified as a unit lost through demolition. Units destroyed by fire, flood, or other natural causes are classified as units lost through disaster.

In the 1970 Census of Housing, Volume IV, **Components of Inventory Change**, the data on losses refer to all housing unit losses, including losses of units in structures which still contained one or more housing units. In addition, units lost through disaster were counted in 1970 as "units lost through other means."

Units lost through other means (Part A).—Any housing unit which existed during the 1974 survey period is counted as lost through other means when it is lost to the housing inventory through means other than demolition or disaster.

This component includes the following types of losses:

1. Units lost by change to group quarters; for example, a housing unit that was occupied by a family in 1970 and by a family and five lodgers at the time of the interview.
2. Units lost from the inventory because they are vacant and unfit for human habitation. A unit is unfit for human habitation if the roof, walls, doors, and windows no longer protect the interior from the elements.
3. Vacant units lost from the inventory because there is positive evidence (sign, notice, mark on the house or block) that the units are scheduled for demolition or rehabilitation or that they are condemned for reasons of health or safety so that further occupancy is prohibited.
4. Units lost by change to nonresidential use.
5. Units moved from site since the 1974 survey. Such moves in the same area do not necessarily result in a net loss from the total inventory since they presumably represent units added in the place to which they were moved.

In the 1970 Census of Housing, Volume IV, **Components of Inventory Change**, units lost through disaster (fire, flood, or other such causes) were counted in 1970 as "units lost through other means."

Unspecified units (Part A).—There are other components of change in the housing inventory for which the Annual Housing Survey provides no specific measures. The survey procedures do not include a measure of conversions and mergers and units added from other sources such as nonresidential structures. The net effect of these omissions on the change in the total housing inventory is not known.

Units changed by conversion.—Conversion refers to the creation of two or more housing units from fewer units through structural alteration or change in use. Structural alteration includes such changes as adding a room or installing partitions to form another housing unit. Change in use is a simple rearrangement in the use of space without structural alteration, such as locking a door which closes off one or more rooms to form a separate housing unit.

Units changed by merger.—A merger is the result of combining two or more housing units into fewer units through structural alteration or change in use. Structural alteration includes such changes as the removal of partitions or dismantling of kitchen facilities. Change in use may result from a simple rearrangement of space without structural alteration, such as unlocking a door which formerly separated two housing units. A change in use also occurs, for example, when a family occupied both floors of a house which formerly contained a separate housing unit on each floor.

Units added through other sources.—Any housing unit added to the inventory through sources other than new construction or conversion is classified as a unit added through other sources. This component includes units created from living quarters previously classified as group quarters and units created from nonresidential space such as a store, garage, or barn. Also included are units built at one site and moved to another. Such units, if moved within the same area, do not necessarily result in a net addition to the total inventory, since they presumably represent units lost in the place from which they were moved. A previously vacant mobile home or trailer, whether on a different site or the same site, is a net addition if currently occupied as a housing unit.

These unspecified units are *not* identified in the survey.

Occupancy and Vacancy Characteristics

Occupied housing units (Parts A, B, C, D, F).—A housing unit is classified as occupied if a person or group of persons is living in it at the time of the interview or if the occupants are only temporarily absent—for example, on vacation. However, if the unit was occupied entirely by persons with a usual place of residence elsewhere, the unit is classified as vacant. By definition, the count of occupied housing units is the same as the count of households.

Population in housing units (Part A).—"Population in housing units" is the total population excluding those persons in group quarters and those persons occupying housing units but whose usual residence is elsewhere.

Race (Parts A, B, C, D, F).—The classification by race shown here refers to the race of the head of the household occupying the housing unit. The concept of race as used by the Census Bureau does not denote clear-cut scientific definitions of biological stock. The interviewer was to report the race of the head of the household in three categories: White, Black (Negro), and other. The last category includes American Indian, Chinese, Eskimo, Japanese, Korean, and any other race except White and Black. Figures on tenure are given separately for White and Black household heads; units with household heads of other races are included in the total in table 1 of part A and may be derived by subtracting the sum of White and Black from the total. More detailed characteristics of units with Black household head are presented in separate tables. The classification of race in the Annual Housing Survey was made by the interviewer's own observation. In the 1970 census, race was essentially a self-classification by people according to the race with which they identified themselves.

Spanish origin (Parts A, B, C, D, F).—The classification by Spanish origin here refers to the origin of the head of the household occupying the housing unit. Detailed characteristics of units with head of Spanish origin are presented in separate tables. Spanish origin was determined on the basis of a question that asked for self-identification of a person's origin or descent. Respondents were asked to select their origins from a "flash card." Persons of Spanish origin were those who indicated that their origin was either Mexican-American, Chicano, Mexican, Mexicano, Puerto Rican, Cuban, Central or South American, or other Spanish.

Persons of Spanish origin may be of any race.

In the 1970 census and current surveys' reports, Spanish persons are identified according to various criteria: Birthplace, birthplace of parents, language, surname, and origin or descent. For this reason, care should be taken in making comparisons of Spanish-origin estimates from the Annual Housing Survey and other surveys.

Tenure (Parts A, B, C, D, F).—A housing unit is "owner occupied" if the owner or coowner lives in the unit, even if it is mortgaged or not fully paid for. A cooperative or condominium unit is "owner occupied" only if the owner or coowner lives in it. All other occupied units are classified as "renter occupied," including units rented for cash rent and those occupied without payment of cash rent.

Cooperatives and condominiums (Part A).—A cooperative is a type of ownership whereby a group of housing units are owned by a corporation of member-owners. Each individual member is entitled to occupy an individual housing unit and is a shareholder in the corporation which owns the property.

A condominium is a type of ownership that enables a person to own an apartment or house in a project of similarly owned units. The owner has the deed and very likely the mortgage on the unit occupied. The owner may also hold common or joint ownership in some or all common areas such as grounds, hallways, entrances, elevators, etc.

Cooperative or condominium ownership may apply to various types of structures including single-family houses, rowhouses, townhouses, etc., as well as apartment units.

Duration of occupancy (Parts B, F).—Data on duration of occupancy are based on information for the head of household; the data refer to the period when present occupancy began. Statistics are shown on whether the head lived in the unit "less than 3 months" or "3 months or longer." To qualify as having lived here "last winter," the household head must have moved into the unit prior to February 1977; however, if the interview took place in February 1978, the household head must have moved in to the unit prior to February 1978.

Year head moved into unit (Parts A, C, D).—The data are based on the information reported for the head of the household and refer to the year of latest move. Thus, if the head moved back into a unit previously occupied, the year of the latest move was to be reported; if the head moved from one apartment to another in the same building, the year the head moved into the present unit was to be reported. The intent is to establish the year the present occupancy by the head began. The year the head moves is not necessarily the same year other members of the household move; although, in the great majority of cases, the entire household moves at the same time.

Owner or manager on property (Parts B, C).—These statistics are based on the number of housing units in structures of two or more units with the owner or the resident manager or superintendent living on the property. The category "with owner on property" refers to the owner and not his agent, resident manager, or superintendent, "With resident manager or superintendent on property" refers to a resident manager, superintendent, janitor, or other representative of the owner.

Vacant housing units (Parts A, B).—Unless its occupants are only temporarily absent, a housing unit is vacant if no one is living in it at the time of the interview. In addition, a vacant unit may be one which is occupied entirely by persons who have a usual residence elsewhere.

New units not yet occupied are classified as vacant housing units if construction has reached a point where all exterior windows and doors are installed and final usable floors are in place. Vacant units are excluded if unfit for human habitation; that is, if the roof, walls, windows, or doors no longer protect the interior from the elements, or if there is positive evidence (such as a sign on the house or in the block) that the unit is to be demolished or is condemned. Also excluded are quarters being used entirely for nonresidential purposes, such as a store or an office, or quarters used for storing business supplies or inventory, machinery or agricultural products.

The concepts and definitions of vacant housing units used in this report are the same as those used in the 1970 Census of Housing reports.

Vacancy status (Parts A, B).—Vacant housing units are classified as either "seasonal and migratory" or "year-round." "Seasonal" units are intended for occupancy during only certain seasons of the year. Included are units intended for recreational use, such as beach cottages and hunting cabins, and vacant units held for herders and loggers. "Migratory" units are vacant units held for occupancy by migratory labor employed in farm work during the crop season.

"Year-round" vacant housing units are available or intended for occupancy at any time of the year. A unit in a resort area which is usually occupied on a year-round basis is considered year-round. A unit used only occasionally throughout the year is also considered year-round.

"Year-round" vacant units are subdivided as follows:

For sale only.—Vacant year-round units "for sale only" also include vacant units in a cooperative or condominium building if the individual units are offered for sale only.

For rent.—Vacant year-round units "for rent" also include vacant units offered both for rent or for sale.

Rented or sold, not occupied.—If any money rent has been paid or agreed upon, but the new renter has not moved in as of the date of the interview, or if the unit has recently been sold, but the new owner has not yet moved in, the year-round vacant unit is classified as "rented or sold, not occupied."

Held for occasional use.—This category consists of vacant year-round units which are held for weekend or other occasional use throughout the year. The intent of this question is to identify homes reserved by their

owners as second homes. Because of the difficulty of distinguishing between this category and seasonal vacancies, it is possible that some "second homes" are classified as "seasonal" and vice versa. (See also discussion of "Owned second home" in section on "Equipment and Fuels.")

Temporarily occupied by persons with usual residence elsewhere (URE).—If all the persons in a housing unit usually live elsewhere, that unit is classified as vacant, provided the usual place of residence is held for the household and is not offered for rent or for sale. For example, a beach cottage occupied at the time of the interview by a family which has a usual place of residence in the city is included in the count of vacant units. If their house in the city was in the survey sample, the house would be reported "occupied" and would be included in the count of occupied units, since the occupants are only temporarily absent.

Held for other reasons.—If a vacant year-round unit does not fall into any of the classifications specified, it is classified as "held for other reasons." For example, this category includes units held for settlement of an estate, units held for occupancy by a caretaker or janitor, and units held for personal reasons of the owner.

In part A of this report, the "other vacant" category includes all units temporarily occupied by persons with usual residence elsewhere and units held for other reasons.

Characteristics of vacant housing are limited to year-round vacant units. Vacant units intended for seasonal occupancy and vacant units held for migratory labor are excluded because it is difficult to obtain reliable information for them. However, counts of seasonal units are given in part A.

Duration of vacancy (Part B).—The statistics on duration of vacancy refer to the length of time (in months) from the date the last occupants moved from the unit to the date of the interview. The data, therefore, do not provide a direct measure of the total length of time that units remain vacant. For newly constructed units which have never been occupied, the duration of vacancy is counted from the date construction was completed. For recently converted or merged units, the time is reported from the date that conversion or merger was completed. Units occupied entirely by persons with usual place of residence elsewhere are excluded from the data.

Homeowner vacancy rate (Part A).—The 1977 homeowner vacancy rate is the number of year-round vacant units for sale as a percent of the total homeowner inventory; i.e., all owner-occupied units and year-round vacant units for sale or sold, not occupied. The homeowner vacancy rate for 1970 excludes vacant units sold but not occupied.

Rental vacancy rate (Part A).—The 1977 rental vacancy rate is the number of year-round vacant units for rent as a percent of the total rental inventory; i.e., all renter-occupied units and all year-round vacant units for rent or rented, not occupied. The rental vacancy rate for 1970 excludes vacant units rented but not occupied.

Units Occupied by Recent Movers

Recent movers (Part D).—Households that moved into their present units within 12 months prior to the date of the interview are termed "recent movers." The household is classified by year moved into unit on the basis of information reported for the head of the household.

Present and previous units of recent movers (Part D).—The "present" unit is the unit occupied by the recent mover at the time of the interview. The "previous" unit is the unit from which that person moved. If the household moved more than once during the 12 months prior to the date of the interview, the "previous" unit is the one from which the household last moved.

Same or different head (Part D).—Characteristics of the present and previous units occupied by recent movers are largely restricted to households that were essentially the same in the two units. The definitions of the characteristics for the previous unit are generally the same as those for the present unit.

A household for which the head in the present unit is the same person as the head in the previous unit (identified in the tables as "same head"), is considered essentially the same even though there may have been some changes in the composition of the household. Conversely, a household in which there was no change except for a new household head was considered a household with "different head."

Main reason for move into present unit (Part D).—The statistics presented are restricted to units occupied by recent movers in which the present head of household was also the head at the previously occupied unit. The classification categories refer to the principal reason the head of the household moved into the present unit. The category "job related reasons" refers to reasons such as job transfer, entered or left U.S. Armed Forces, retirement, new job or looking for work, commuting problems, school attendance, and other job related reasons.

The category "family status" refers to reasons such as needed larger house or apartment, widowed, separated, divorced, moved to be closer to relatives, newly married, family increased in size, family decreased in size, wanted to establish own household, schools, and other family related reasons.

The category "housing needs" refers to reasons such as wanted to own residence, neighborhood overcrowded, change in racial or ethnic composition of neighborhood, wanted better neighborhood, lower rent or less expensive house, wanted better house, displaced by urban renewal, highway construction, or other public activity, displaced by private action, wanted to rent residence, wanted residence with more conveniences, and occurrence of natural disaster.

The category "other reasons" includes wanted a change of climate and any other reasons for moving which do not fall into the above classifications.

Utilization Characteristics

Persons (Parts A, C, D).—All persons occupying the housing unit are counted. These persons include not only occupants related to the head of the household but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters of the household head. The data on "persons" show categories of the number of one-person through seven-or-more-person households by the number of housing units.

A person is counted at the usual place of residence for that person. This refers to the place where the person lives and sleeps most of the time. This place is not necessarily the same as a legal residence, voting residence, or domicile.

Rooms (Parts A, B, C, D).—The statistics on "rooms" are for the number of housing units with specified number of rooms. Rooms counted include whole rooms used for living purposes, such as living rooms, dining rooms, kitchens, finished attic or basement rooms, recreation rooms, permanently enclosed porches that are suitable for year-round use, and lodger's rooms. Also included are rooms used for offices by a person living in the unit.

A partially divided room, such as a dinette next to a kitchen or living room, is a separate room only if there is a partition from floor to ceiling, but not if the partition consists only of shelves or cabinets.

Not included in the count of rooms are bathrooms, halls, foyers or vestibules, balconies, closets, alcoves, pantries, strip or pullman kitchens, laundry or furnace rooms, unfinished attics or basements, other unfinished space used for storage, open porches, trailers used only as bedrooms, and offices used only by persons not living in the unit.

If a room is used by occupants of more than one unit, the room is included with the unit from which it is most easily reached.

Persons per room (Parts A, C, D).—"Persons per room" is computed for each occupied unit by dividing the number of persons in the unit by the number of rooms in the unit. The figures shown refer, therefore, to the number of housing units having the specified ratio of persons per room.

Bedrooms (Parts A, B, C, D, F).—The number of bedrooms in the unit is the count of rooms used mainly for sleeping, even if also used for other purposes. Rooms reserved for sleeping, such as guest rooms, even though used infrequently, are counted as bedrooms. On the other hand, rooms used mainly for other purposes, even though used also for sleeping, such as a living room with a hideaway bed, are not considered bedrooms. A housing unit consisting of only one room, such as a one-room efficiency apartment, is classified by definition as having no bedroom.

Data on bedrooms lacking privacy are shown for housing units with two or more bedrooms. Units have bedrooms lacking privacy when it is necessary to pass through a bedroom to get to another room, such as a den, and/or to get to the bathroom. The bathroom access criterion is applied only to units with one complete bathroom or one bathroom plus half bath in which the half bath lacks a flush toilet.

In addition, statistics are shown for households with bedrooms used by three or more persons of all ages, but are shown separately for such households when one or more of these persons is 13 years of age or older. Not included are bedrooms used for sleeping by three or more persons only on an occasional basis such as by visitors.

Structural Characteristics

Complete kitchen facilities (Parts A, B).—A unit has complete kitchen facilities when it has all three of the following for the exclusive use of the occupants of the unit: (1) An installed sink with piped water, (2) a range or cookstove, and (3) a mechanical refrigerator. All kitchen facilities must be located in the structure. They need not be in the same room. Quarters with only portable cooking equipment are not considered as having a range or cookstove. An icebox is not included as a mechanical refrigerator.

The kitchen facilities are for the exclusive use of the occupants when they are used only by the occupants of one housing unit, including lodgers or other unrelated persons living in the unit. When a structure consists of only one housing unit, all equipment located inside the structure is classified by definition for exclusive use.

For vacant units from which one or all of the kitchen facilities had been removed, the kitchen facilities used by the last occupant were to be reported.

Condition of kitchen facilities (Parts B, F).—Units with complete kitchen facilities were classified as to whether all the kitchen facilities were in usable condition. If one or more of the kitchen facilities (sink, range or cookstove, and refrigerator) could not be used for its intended purpose, the unit was classified as having "1 or more not usable." Kitchen facilities that normally function properly, but which were temporarily out of use (two weeks or less) because of a breakdown, were classified as usable.

Basement (Parts A, B, C, D, F).—Statistics on basements are based on the number of housing units located in structures built with a basement. A structure has a basement if there is enclosed space in which persons can walk upright under all or part of the building. In parts B and F, basements in structures with occupied units are further classified by signs of water leakage. The category "with signs of water leakage" consists of units in which the basement shows signs of water having leaked in from the outside during the last 90 days, even if the signs only appear when it rains. "No signs of water leakage" means that the basement shows no signs of water leakage, or that the signs of water leakage are caused by a problem inside the structure such as faulty plumbing. If the basement shows signs of water having leaked in from the outside but the problem causing the leakage has been corrected, the unit was classified as having no signs of water leakage.

The 1977 data on basements are for "all year-round housing units"; the 1970 data on basements are restricted to "all occupied housing units."

Year structure built (Parts A, B, C, D).—"Year structure built" refers to when the building was first constructed, not when it was remodeled, added to, or converted. The figures relate to the number of units in structures built during the specified periods and in existence at the time of the interview. For mobile homes and trailers, the manufacturer's model year was assumed to be the year built.

Units in structure (Parts A, B, C, D).—In determining the number of units in a structure, all housing units, both occupied and vacant, were counted. The statistics are presented for the number of housing units in structures of specified type and size, not for the number of residential structures.

A structure is a separate building that either has open space on all sides or is separated from other structures by dividing walls that extend from ground to roof. In part A, structures containing only one housing unit are further classified as detached or attached.

A one-family house is detached if it has open space on all four sides even though it has an adjoining shed or garage. A one-family house is attached if it has one or more walls extending from ground to roof which divide it from other adjoining structures, such as in row houses, townhouses, etc.

Mobile homes and trailers are shown as a separate category (see parts A, C, and D). When one or more rooms have been added to a mobile home or trailer, it is classified as a one-family house. If, however, only a porch or shed has been added, it is still counted as a mobile home or trailer.

Elevator in structure (Parts A, B, C).—Statistics on elevator in structure refer to the number of housing units in structures with four floors or more which have a passenger elevator. Units are in a "walk-up" structure of four floors or more if the structure has no passenger elevator or if the only elevator service is for freight.

Stories between main and apartment entrances (Parts B, F).—This item is restricted to two-or-more-unit structures and is concerned with the number of floors from the main entrance of the apartment building to the main entrance of the apartment. The number of stories is determined from ground level if there is no main building entrance and the apartment has its own private entrance, either from the ground level of the building or from an area that is *not located inside* the building, or if there is a main building entrance, but the entrance to the apartment cannot be reached by using the main building entrance.

Storm windows, storm doors, and attic or roof insulation (Part A).—The purpose of these three items is to determine if a housing unit has some form of insulation which helps to reduce heat loss during the winter and heat gain during the summer. The statistics are shown only for occupied, one-family homes and occupied, mobile homes and trailers.

Storm windows or other protective window covering.—This category refers to protective window covering, such as storm windows, double-glazed glass, closeable shutters, or plastic. Housing units with "some windows covered" have protective coverings over some, but not all windows.

Storm doors.—This category refers to additional doors hung in exterior doorways. Doors on attached garages are not included. Housing units with "some doors covered" have storm doors on some, but not all, exterior door openings.

Attic or roof insulation.—This category includes roll or blanket insulation encased in a paper covering, fiberglass batting, and loose insulation which is poured or blown between the attic floor joists.

Roof (Parts B, F).—Units "with signs of water leakage" are those in which the roof shows signs of water having leaked in from the outside during the last 90 days. "No signs of water leakage" means that the roof shows no signs of water leakage from the outside, or that the roof shows signs of water leakage, but the problem causing the leakage has been corrected. If the signs of water leakage are caused by a problem inside the structure, such as faulty plumbing, the unit was classified as having no signs of water leakage.

Interior ceilings and walls (Parts B, F).—Statistics are presented on whether or not there are open cracks or holes and broken plaster or peeling paint on the interior ceilings or walls of a housing unit. Included are cracks or holes that do not go all the way through to the next room or to the outdoors. "Hairline cracks," or cracks that appear in the walls or ceilings but are not large enough for a fingernail file to be inserted in, and very small holes caused by nails or other similar objects are not considered to be open cracks or holes.

Broken plaster or peeling paint must be on the inside walls or ceilings, and at least one area of the broken plaster or peeling paint must be approximately one square foot or larger.

Interior floors (Parts B, F).—Data are shown on whether there are holes in the interior floors of a housing unit. The holes do not have to go through the floor. Excluded are very small holes caused by nails or other similar objects.

Selected structural deficiencies and wish to move (Parts B, F).—The category "household would like to move" consists of housing units in which the respondent considers one or more of the following structural deficiencies so objectionable that the respondent would like to move from the unit: (1) A basement with signs of water leakage, (2) roof leakage, (3) open cracks or holes in the interior walls or ceiling, (4) holes in the floor, and (5) broken plaster or peeling paint on the ceiling or inside walls.

Overall opinion of structure (Parts B, F).—The data presented are based on the respondent's overall opinion of the house or building as a place to live. The respondent was asked to rate the structure as excellent, good, fair, or poor.

Common stairways (Parts B, F).—The statistics on common stairways are presented for housing units in structures of two or more units with common stairways. The figures for "loose steps" and "loose railings" reflect the physical condition of the stairway; i.e., whether there are loose, broken, or missing steps or stair railings. Common stairways are stairways which are usaully used by the occupants of more than one unit or by the general public. They may be either inside the structure or attached to the outside of the building.

Light fixtures in public halls (Parts B, F).—These statistics are presented for housing units in structures of two or more units with public halls which have light fixtures. Data include whether or not the light fixtures are in working order. Light fixtures include wall lights, ceiling lights, or table lamps in the public halls of the building. Public halls are used by the occupants of more than one unit or by the general public.

Electric wiring (Parts B, F).—A housing unit is classified as having exposed electric wiring if the unit has any wiring that is not enclosed, either in the walls or in metal coverings, or if the unit has any wiring outside the walls enclosed in some material other than metal. Extension cords and other types of wiring that extend from a wall outlet to an appliance or lamp are not considered as exposed wiring.

Electric wall outlets (Parts B, F).—A housing unit is classified as having electric wall outlets in each room if there is at least one working electric wall outlet or wall plug in each room of the unit. A working electric wall outlet or wall plug is one that is in operating condition; i.e., can be used when needed. If a room does not have an electric wall outlet, an extension cord used in place of a wall outlet is not considered to be an electric wall outlet.

Electric fuse blowouts (Parts B,F).—These statistics are presented for occupied housing units which have had an electrical circuit fuse blown or breaker switch tripped during the 3 months prior to the interview. The data are restricted to households whose head has been at his present address for at least 90 days prior to the date of the interview. A blown fuse or tripped breaker switch results in the temporary loss of electricity until the fuse is replaced or the breaker switch reset. Blown fuses inside certain appliances or equipment (such as some large air conditioners) are counted as "fuse or switch blowouts."

Parking facilities (Part D).—The statistics on parking facilities presented in this report are restricted to renter-occupied units for which cash rent is paid and exclude one-family homes on 10 acres or more. The data refer to off-street parking facilities which are available in connection with the building. The facilities are provided by the landlord or management and must be available without an additional cost to the renter. The parking facility may be a garage, carport, driveway, or open lot where the occupant may park his car off the street.

Plumbing Characteristics

Plumbing facilities (Parts A, B, C, D, F).—The category "with all plumbing facilities" consists of units which have hot and cold piped water inside the structure as well as a flush toilet and a bathtub or shower inside the structure for the exclusive use of the occupants of the unit. All plumbing facilities must be located in the structure but they need not be in the same room. "Lacking some or all plumbing facilities" means that the unit does not have all three specified plumbing facilities (hot and cold piped water, flush toilet, and bathtub or shower) inside the structure, or that the toilet or bathing facilities are also for the use of the occupants of other housing units.

Complete bathrooms (Parts A, B, C, D).—A housing unit is classified as having a complete bathroom if it has a room with a flush toilet and bathtub or shower and a washbasin, as well as piped hot water in the structure for the exclusive use of the occupants of the unit. A half bathroom has either a flush toilet or a bathtub or shower for exclusive use, but does not have all the facilities for a complete bathroom.

The category "also used by another household" consists of units with bathroom facilities which are also for the use of the occupants of other housing units. The category "none" consists of units with no bathroom facilities, units with only a half bathroom, and units with all bathroom facilities but not in one room.

Source of water or water supply (Parts A, B, C, F).—"A public system or private company" refers to a common source supplying running water to six or more housing units. The water may be supplied by a city, county, water district, or private water company, or it may be obtained from a well which supplies six or more housing units. If a well provides water for five or fewer housing units, it is classified as an "individual well." Individual wells are further classified by whether they were originally "drilled" or "dug." Drilled wells are machine dug. Water sources such as springs, creeks, rivers, cisterns, ponds, or lakes are included in the "other" category.

Breakdowns or failures in the water supply were asked when the unit had piped water inside the structure. The water may be available from sources such as a sink, washbasin, bathtub, or shower. In the 1974 Annual Housing Survey (SMSA sample) statistics on breakdowns or failures in water supply were presented for units when the source of water was from a public system, private company, or individual well. A unit is classified as having "no piped water inside structure" if the unit has no piped water or if the only piped water available is outside the structure—for example, on an open porch or in another building. Data on breakdowns or failures of water supply are shown if the housing unit was occupied by the head of the household at least 90 days prior to the interview and if the breakdown or failure lasted 6 consecutive hours or longer during the 90 days prior to the interview. Breakdowns or failures in the water supply mean that the unit was completely without running water from its regular source. A unit was

considered to be completely without running water if (1) the water system serving the unit supplied no water at all, or (2) no water was available in the unit due to a breakdown or failure in the water supply inside the structure, or (3) the equipment and facilities (i.e., faucets in the kitchen and the bathroom sinks, faucet and shower in the bathtub, flush toilet, etc.) were all inoperable. If the faucet in the kitchen was broken, but the one in the bathtub was working, the unit was not classified as being completely without water.

Units with a breakdown or failure in the water supply are also classified according to the number of breakdowns or failures and to the most common source of the problem. "Problems inside the building" refer to such problems as broken pipes in the unit (or building) or turning the water off in the unit (or building) for maintenance and repairs. "Problems outside the building" refer to such problems as power failures, breaks in the main water line, or shutdown by the water company for maintenance and repairs.

Sewage disposal (Parts A, B, C, D, F).—A "public sewer" is connected to a city, county, sanitary district, neighborhood, or subdivision sewer system. It may be operated by a governmental body or private organization. A "septic tank or cesspool" is an underground tank or pit used for disposal of sewage. Small sewage treatment plants which in some localities are called neighborhood septic tanks are classified as public sewers. A chemical toilet uses chemicals to break down or dissolve sewage; a privy refers to an "outhouse" or other small shelter outside the unit which contains a toilet. Units for which sewage is disposed of in some other way are included in the "other" category.

The data on breakdowns or failures in the means of sewage disposal are limited to units in which the means of sewage disposal was a public sewer, septic tank, or cesspool. The breakdown or failure may have been the result of an overloaded sewage disposal system, lack of running water, a broken or cracked tank, etc. Data on breakdowns are shown if the housing unit was occupied by the head of the household at least 90 days prior to the interview and if the breakdown or failure lasted 6 consecutive hours or longer during the 90 days prior to the interview.

Flush toilet (Parts B, C, F).—The statistics on breakdowns or failures of flush toilet are limited to units that had all plumbing facilities with only one flush toilet; that is, one complete bathroom or one complete bathroom plus a half bath without flush toilet. The flush toilet may be completely unusable because of broken pipes, stopped up soil pipe, lack of water supplied to the flush toilet, or some other reason.

Units with breakdown or failure in flush toilet are classified by the number of breakdowns or failures and to the most common source of the problem. "Problems inside the building" refer to such breakdowns or failures as broken pipes in the unit (or building), a cracked or broken bowl, or faulty flushing mechanism. "Problems outside the building" refer to such breakdowns or failures as breaks in the main water or sewer line or shutdowns by the water company for maintenance or repairs.

Data on breakdowns or failures of flush toilet are shown if the housing unit was occupied by the head of household at least 90 days prior to the interview, and if the breakdown or failure lasted 6 consecutive hours or more during the 90 days prior to the interview.

Equipment and Fuels

Telephone available (Part A).—A unit is classified as having a telephone if there is a telephone for receiving calls available to the occupants of the unit. The telephone may be located outside or inside the housing unit, and one telephone may serve the occupants or several units. The number of housing units with a telephone available, therefore, does not indicate the number of telephones installed in homes.

Heating equipment (Parts A, B, C, F).—"Warm-air furnace" refers to a central system which provides warm air through ducts leading to various rooms. A "heat pump" refers to an electric heating-cooling system which utilizes indoor and outdoor coils, a compressor, and a refrigerant to pump hot air in during the winter and cooled air in during the summer. Only heat pumps that are centrally installed with ducts to the rooms are included in this category. "Steam or hot water" refers to a central heating system in which heat from steam or hot water is delivered through radiators or other outlets. "Built-in electric units" are permanently installed in floors, walls, ceilings, or baseboards. A "floor, wall, or pipeless furnace" delivers warm air to the room right above the furnace or to the room(s) on one or both sides of the wall in which the furnace is installed.

"Room heaters with flue" include circulating heaters, convectors, radiant gas heaters, and other nonportable heaters that burn gas, oil, kerosene, or other liquid fuels, and which are connected to a flue, vent, or chimney to remove smoke and fumes. "Room heaters without flue" include any room heater (not portable) that burns gas, oil, or kerosene which is not connected to a flue, vent, or chimney. "Fireplaces, stoves, or portable heaters" also include room heaters that burn coal, coke, charcoal, wood, or other solids. It also includes portable room heaters that burn kerosene, gasoline, fuel oil, or other liquid fuel, as well as portable electric heaters that get current from an electrical wall outlet.

For vacant units from which the heating equipment had been removed, the equipment used by the last occupants was to be reported.

For breakdowns or failures of heating equipment, data are shown for units occupied by the household head during the winter prior to the interview if the equipment was unusable for 6 consecutive hours or longer during that time. To qualify as having lived here "last winter," the household head must have moved into the unit prior to February 1977; however, if the interview took place in February 1978, the household head must have moved into the unit prior to February 1978.

Heating equipment is considered unusable if it cannot be used for the

purposes intended; the breakdown or failure may be caused by broken pipes, electrical or gas parts out of order, or downed power lines.

Insufficient heat (Parts B, F).—The statistics presented refer to housing units in which the household head occupied the unit during the winter prior to the date of the interview. To qualify as having lived here "last winter," the household head must have moved into the unit prior to February 1977; however, if the interview took place in February 1978, the household head must have moved into the unit prior to February 1978.

Separate data are shown for units with additional heat source, rooms which lacked specified heat source, and units with closed rooms. The term "specified heating equipment" includes warm-air furnace; heat pump; steam or hot water system; built-in electric units; floor, wall, or pipeless furnace; and room heaters with flue. Excluded are room heaters without flue or vent, fireplaces, stoves, and portable heaters.

The data on additional heat source refer to units with "specified heating equipment" which *had* to use additional sources of heat to supplement the regular heating system because the regular system did not provide enough heat. Additional sources of heat such as kitchen stoves, fireplaces, or portable heaters, may have been used only in the mornings or on very cold evenings. Electric blankets, heating pads, or hot water bottles are not considered additional sources of heat.

"Rooms lacking specified heat source" include rooms lacking hot air ducts, registers, radiators, and room heaters. The intent of this item was to identify rooms in units with "specified heating equipment" which did not contain the means of conveying the heat to the room. The kitchen was not considered to be a room for this item.

Separate data are also shown for rooms which were closed because they could not be kept warm. The rooms must have been closed for 7 consecutive days or longer during the previous winter, and the unit must have "heating equipment." For this item, also, the kitchen was not considered a room.

Air conditioning (Parts A, B, C, D).—Air conditioning is defined as the cooling of air by a refrigeration unit; excluded are evaporative coolers, fans, or blowers which are not connected to a refrigeration unit. A room unit is an individual air conditioner which is installed in a window or an outside wall and is generally intended to cool one room, although it may sometimes be used to cool several rooms. A central system is a central installation which air conditions the entire housing unit. In an apartment building, a central system may cool all apartments in the building, each apartment may have its own central system, or there may be several systems, each providing central air conditioning for a group of apartments. A central installation with individual room controls is a central air-conditioning system.

Automobiles and trucks available (Parts A, C, D).—Statistics on "automobiles available" represent the number of passenger automobiles, including station wagons and vans, which are owned or regularly used by any member of the household and which are ordinarily kept at home. The figures include leased automobiles, taxicabs, and company-owned automobiles kept at home. Police cars, pickups, or larger trucks were not to be counted. In the 1974 Annual Housing Survey (SMSA sample), taxicabs kept at home were not included in the count of "automobiles available."

The data on trucks available represent the number of pickups and small panel trucks of one-ton capacity or less which are owned or regularly used by any member of the household and which are ordinarily kept at home. Trucks used for business purposes were included only if also used for personal activities of household members.

The statistics do not reflect the number of privately owned automobiles or trucks or the number of households owning such vehicles.

Fuels used for house heating and cooking (Parts A, C).—"Utility gas" is gas that is piped through underground pipes from a central system and serves the neighborhood. "Bottled, tank, or LP gas" is stored in tanks which are refilled or exchanged when empty. "Fuel oil, kerosene, etc." includes fuel oil, kerosene, gasoline, alcohol, and other combustible liquids. "Other fuel" includes any other fuel such as briquettes made of pitch and sawdust, coal dust, corncobs, or purchased steam.

Owned second home (Parts A, C).—A second home may be a single-family house, vacation cottage, hunting cabin, ski lodge, etc., which is owned and held for use sometime during the year by the owner or members of the household. Second homes may also be owned in partnership or on a shared basis with members of a different household. The figures include second homes which are sometimes rented or leased on a short-term basis to other persons but are principally held for the owner's occasional use during the year.

The statistics refer to the number of households that own (one or more) second homes. The data, therefore, do not reflect the number of owned second homes. (See also discussion of vacant units "Held for occasional use" in the section on "Occupancy and Vacancy Characteristics.")

Services and Neighborhood Conditions

Garbage collection service (Parts B, D, F).—A housing unit is classified as having garbage collection service if either a private or public company collects the trash or garbage on a regular basis and carries it to public disposal areas. Units with garbage collection service are classified by the frequency of the service. In some areas where the garbage (food waste) is collected by one company and the trash (paper, cans, etc.) by another, data are obtained only for the garbage collection service.

If the household does not have garbage collection service, the means of garbage disposal is classified as follows:

Incinerator, trash chute, or compactor.—An incinerator is a large unit on the property designed to burn all trash and garbage. Trash chutes and compactors were marked as the means of garbage disposal when the final

means of disposal was not known; i.e., if the respondent knew only that the garbage was put down a trash chute or that the garbage goes into a compactor. A compactor is a unit which packs trash and garbage into smaller units for disposal.

Garbage disposal unit.—A garbage disposal unit is connected to the kitchen sink and grinds up the garbage which is disposed of though the sewage system.

Other means.—If the method of disposal does not fall into any of the classifications specified above, it is classified as "other means."

The statistics on garbage and trash collection service presented in part D are restricted to renter-occupied units for which cash rent is paid and exclude one-family homes on 10 acres or more. The data refer to whether or not the cost of garbage and trash collection service is paid by the renter.

Exterminator service (Parts B, F).—The statistics on exterminator service refer to households that have been at their present address for at least 3 months prior to the date of the interview and that reported they had seen mice or rats or signs or traces of their presence *inside* the house or building during the last 3 months. Signs of mice and rats or traces of their presence include droppings, holes in the wall, or ripped or torn food containers. "Regular extermination service" refers to periodic visits by a licensed company or individual who uses chemicals and sprays to control or kill rodents. The regular service interval may be once a month, four times a year, or any other such interval. "Irregular extermination service" includes visits by an exterminator who is called by the household or building manager only when needed, or where it is known that a building is serviced but it is not known whether the service is regular or irregular. "No extermination service" includes units in a house or building that has not been serviced during the 12 months prior to the interview and where it is not known if there is any exterminator service.

Neighborhood conditions and neighborhood services (Parts B, F).—The statistics presented are based on the respondent's opinion and attitude toward the neighborhood. Thus, the respondent's answer may or may not reflect the "actual" description of the negihborhood. Furthermore, the respondent may not have the same opinion as a neighbor about the neighborhood conditions and/or neighborhood services; for example, the respondent may feel that the street lighting or neighborhood shopping facilities are inadequate while the neighbor may not.

Neighborhood conditions, and neighborhood conditions and wish to move.—Data on neighborhood conditions are based on the respondent's answers to a three-part question concerning specific neighborhood conditions listed below. The respondent was asked: (1) If the condition was present in the neighborhood, (2) if present, was the condition bothersome and, (3) if bothersome, was it so objectionable that the respondent "would like to move" from the neighborhood.

1. Street or highway noise.—Street noise refers to noise made by children playing outdoors, noise from a factory or business, or any other sound that the respondent considers street noise.
2. Airplane traffic noise.—This category refers to the respondent's opinion concerning noise made by airplanes in landing or taking off or sonic booms from nearby airports or military bases.
3. Heavy traffic.—This category refers to the presence of cars and/or trucks which the respondent classifies as heavy traffic.
4. Streets in need of repair.—The data are based on the respondent's opinion that the streets, either paved or unpaved, are continually in need of repair or are bordered by open ditches used for water or sewage drainage.
5. Roads impassable.—This category refers to roads that the respondent reported to be neglected by State, county, or city crews during snowstorms, heavy rainstorms, or other such conditions that make a road impassable.
6. Occupied housing in rundown condition.—This category refers to occupied housing units which, in the respondent's opinion, are in rundown condition.
7. Commercial or nonresidential activities.—This category refers to commercial, industrial, or other activities, including both large and small industries as well as businesses and stores that the respondent considers to be nonresidential.
8. Odors, smoke, or gas.—This category refers to the respondent's opinion concerning fumes, smoke, or gas coming from cars, trucks, nearby industries, factories, businesses, etc.
9. Inadequate street lights.—Inadequate street lights include areas that, in the opinion of the respondent, have no street lighting, streets with insufficient lighting, and streets where the lighting does not work adequately.
10. Neighborhood crime.—This category refers to all forms of neighborhood crime such as petty theft, assaults against the person, burglary, etc., or any related activities that the respondent judges to be a crime.
11. Trash, litter, or junk.—Included are all types of trash, debris, or junk such as paper, cans, or abandoned cars in the street, on emply lots, or on properties on the street which the respondent considers litter.
12. Boarded up or abandoned structures.—Abandoned buildings refer to both single and multiunit buildings which the respondent reported to be abandoned or boarded up. Included in this category are remains of previous buildings.

Neighborhood services.—Data on neighborhood services are based on the respondent's answer to a two-part question concerning neighborhood services. The respondent was asked:

(1) If a particular neighborhood service was satisfactory, and (2) if not satisfactory, was it so unsatisfactory that the respondent would like to move from the neighborhood.

1. Public transportation.—These data reflect the respondent's opinion of the availability of public transportation, such as bus, subway, or taxicab service.
2. Schools.—The statistics reflect the respondent's opinion about the schools in the neighborhood, such as the proximity of the school, population of the student body, etc.
3. Neighborhood shopping.—This category refers to the respondent's opinion regarding stores such as grocery or drug stores in this vicinity, and their merchandise, prices, or services.
4. Police protection.—This category refers to the respondent's opinion about the presence, quality, quantity, and response time of services that should be provided by the police.
5. Outdoor recreation facilities.—This category refers to the respondent's opnion regarding the recreation facilities in the neighborhood, such as public parks, athletic fields, playgrounds, and outdoor skating rinks.
6. Hospitals or health clinics.—This category refers to the quality and proximity of health facilities, etc. serving the local community in the opinion of the respondent.

Neighborhood services and wish to move.—The category "household would like to move" consists of housing units in which the respondent considers one or more of the specified neighborhood services (such as public transportation) so inadequate or unsatisfactory that the respondent would like to move from the neighborhood.

Overall opinion of neighborhood.—The data presented are based on the respondent's overall opinion of the neighborhood, according to the neighborhood conditions and services available (described in preceding paragraphs). The respondent was asked to rate the neighborhood as excellent, good, fair, or poor. Data are also shown for wish to move because of undesirable neighborhood conditions cross-classified by the respondent's overall opinion of the neighborhood.

Financial Characteristics

Value (Parts A, C, D, F).—Value is the respondent's estimate of how much the property (house and lot) would sell for if it were for sale. The statistics on value are shown only for one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property. Owner-occupied cooperatives, condominiums, mobile homes, and trailers are excluded from the value tabulations.

Value-income ratio (Parts A, C).—The value-income ratio is computed by dividing the value of the housing unit by the total money income of the family or primary individual. The data are presented for the same owner-occupied units for which "value" was tabulated (see "Value" for exclusions). The ratio was computed separately for each unit and was rounded to the nearest tenth. In reporting value, respondents were asked to select an appropriate class interval. The midpoints of the value intervals were used in the computation of the value-income ratio, except that a mean of $3,500 was assigned for values less than $5,000 and a mean of $90,000 was assigned for values of $75,000 or more. For income, the dollar amounts were used. Units occupied by families or primary individuals who reported no income or a net loss comprise the category, "not computed."

The 1977 income statistics are for the 12 months prior to the date of the interview (April 1977 through February 1978. For 1970, the income statistics cover the calendar year 1969.

Mortgage status (Parts, A, C).—Mortgage status refers to one-family homes. Units with no mortgage or similar debt outstanding on the property comprise the category "owned free and clear." Also included in this category are housing units in which the owner has no mortgage but pays a "ground rent"; that is, the occupant owns the unit but leases, rents, or pays a fee for the use of the land.

The data are restricted to owner-occupied, one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property. The data exclude owner-occupied cooperative condominium units. A mortgage or similar debt refers to all forms of debt where the property is pledged as security for payment of the debt. It includes such debt instruments as deeds of trust, trust deeds, mortgage bonds, and vendor liens. In the first three arrangements, usually a third party, known as the trustee, holds the title to the property until the debt is paid. In the vendor lien arrangement, the title is kept by the buyer but the seller (vendor) reserves, in the deed to the buyer, a lien on the property to secure payment of the balance of the purchase price. Also included as a mortgage or similar debt are contracts to purchase, land contracts, and lease-purchase agreements where the title to the property remains with the seller until the agreed upon payments have been made by the buyer.

Mortgage insurance (Parts A, C, D).—The data are restricted to owner-occupied units with a mortgage or similar debt. In addition, the units must be one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property. Owner-occupied cooperatives, condominiums, mobile homes, and trailers are excluded from the tabulations on mortgage insurance.

Mortgage insurance is financial protection provided to the lender in case the borrower fails to keep up the required mortgage payments and defaults on the loan. Such insurance protection is offered by both the Government, acting as an insurance agent, and by private mortgage insurance companies. The Federal government agencies that currently insure or guarantee mortgages or similar debts include the Federal Housing Administration (FHA), the Veterans' Administration

(VA), and the Farmers Home Administration. Mortgages or loans that are not insured or guaranteed by FHA, VA, or the Farmers Home Administration are referred to as "conventional" mortgages. Mortgage debts insured or guaranteed by State or local government agencies are not included in the category "insured by FHA, VA, or Farmers Home Administration."

The Federal Housing Administration insures loans on homes. The Veterans' Administration guarantees or insures loans under the Serviceman's Readjustment Act (G.I. Bill). The Farmers Home Administration provides much the same service as FHA, but confines its assistance to rural areas.

Private mortgage insurance companies provide insurance protection to lenders so that borrowers may obtain conventional loans with higher loan-to-value ratios than noninsured loans. Downpayment and monthly payment are often less than for noninsured loans but terms are generally longer and the borrower pays an insurance premium as part of the monthly mortgage payment. The data on private mortgage insurance is not separable from data on other conventional loans and is therefore included in the category "not insured or insured by private mortgage insurance."

Real estate taxes last year (Parts A, C).—The data are restricted to owner-occupied, one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property. The data exclude owner-occupied cooperatives, condominiums, mobile homes, and trailers. "Real estate taxes last year" refers to the total amount of all real estate taxes payable on the entire property during the last billing period. It includes State and local real estate taxes. Not included are payments on delinquent taxes due from prior years or payments for special assessments, facilities, or services. When the real estate taxes are included with the mortgage, a separate amount for the taxes is obtained.

In part C, the mean real estate taxes for last year per $1,000 value of the property (house and lot) are presented. Housing units for which no taxes are paid are excluded from the computation of the mean.

Property insurance (Parts A, C).—This refers to fire and hazard insurance; that is, policies which protect the unit and its contents against loss due to damage by fire, lightning, wind, hail, explosion, etc. Homeowners' policies are also included since this type of insurance has fire and hazard insurance together with other types of homeowner protection such as liability. If the cost of the insurance was included as part of the mortgage payment, a separate amount for the insurance was obtained. The amount of the insurance premium reported was the amount paid for an entire 12-month period even if made in two or more installments. Property insurance is shown only as a component of "selected monthly housing costs" and "selected monthly housing costs as percentage of income." (See parts A and C.) The data are restricted to owner-occupied, one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property. The data exclude owner-occupied cooperatives, condominiums and mobile homes and trailers.

Selected monthly housing costs (Parts A, C).—The data are presented for owner-occupied, one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property. Separate distributions are shown for units with a mortgage and for units owned free and clear. "Selected monthly housing costs" is the sum of payments for mortgage, real estate taxes, property insurance, utilities (electricity, gas, water, and sewage disposal), fuel (oil, coal, kerosene, wood, etc.), and garbage and trash collection.

Households that did not report the amount of mortgage and/or real estate taxes were included in the "not reported" category.

Selected monthly housing costs as percentage of income (Parts A, C).—The yearly housing costs (selected monthly housing costs multiplied by 12) are expressed as a percentage of the total income of the family or primary individual. This percentage is presented for the same owner-occupied units for which "selected monthly housing costs" were tabulated (for exclusions, see "Selected monthly housing costs"). The percentage was computed separately for each unit and was rounded to the nearest tenth. For income and "selected monthly housing costs," the dollar amounts were used, Units occupied by families or primary individuals who reported no income or a net loss comprise the category "not computed."

Units that did not report the amount of mortgage and/or real estate taxes were included in the "not reported" category.

Acquisition of property (Parts A, C).—This item indicates how the current owner acquired the property; i.e., whether by purchase or by means other than purchase. Data are presented for one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property.

Placed or assumed a mortgage.—This includes units where the present owner had to place one or more new mortgages in order to obtain the property or assume an existing mortgage on the property. The intent was to determine whether the property was ever mortgaged by the present occupants even though there was no mortgage at the time of the interview.

Acquired through inheritance or gift.—This includes property acquired as a beneficiary of an estate and property acquired through a gift.

Paid all cash.—In these cases, the owner paid cash for the total cost of the property and no mortgage or other similar debt was involved.

Acquired in other manner.—This category includes acquisitions of properties through foreclosure, delinquent tax sale, corporate reorganization, or trade for another property. Also included are those cases in which the owner acquired the property with borrowed funds (for all or part of the purchase price or cost of construction) and this loan was not secured by the

property; i.e., a mortgage, deed of trust, land contract, etc.

Alterations and repairs during the last 12 months (Parts A, C).—The statistics refer to the 12 months prior to the interview and are restricted to owner-occupied, one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property.

The data are presented according to whether the alterations and repairs cost less than $200 or $200 or more. The total cost of the labor and materials was to be reported. However, if the labor was performed by the occupants or provided without charge, only the cost of the materials was obtained. The cost pertains to a single job; for example, if several jobs were done, each costing less than $200 but the sum total was over $200; it was reported as costing less than $200 since none of the jobs by themselves cost $200 or more.

Additions.—Additions refer to floor space built onto, above, or below an existing unit in order to increase the enclosed space within the house, such as a bedroom or basement added onto a house. It may also be construction of other buildings on the property. The building, such as a garage, may not necessarily be attached.

Alterations.—These are permanent changes made either to the inside or outside of a structure including the surrounding grounds. Alterations inside the structure include any type of remodeling resulting in permanent modification of space; for example, construction of a breakfast nook in a kitchen. It may involve completely remodeling a room, such as a kitchen or bathroom, or a structural change such as separation of living and dining areas by a permanent room divider. It may also include attached equipment installed in the house for the first time; e.g., built-in dishwasher. Alterations outside the structure consist of installing walks, driveways, fences, storm windows or doors, planting trees or shrubbery, or swimming pools built into the ground.

Replacements.—This refers to the *complete* substitution of a new piece of fixed equipment, surfacing, or fixed appliances for an old item that was previously there; for example, a new gas furnace or central air-conditioning system for one that no longer functioned properly. Excluded are appliances such as clothes washers, refrigerators, or window air-conditioners.

Repairs.—This refers to jobs necessary for maintenance and preventive care of the structure, property, or fixed equipment; for example, painting, papering, floor sanding, mending water pipes, and replacing parts of large equipment such as a furnace valve.

Plans for improvements during the next 12 months. (Parts A, C).—This item is restricted to owner-occupied, one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property. This item refers to the respondent's plans, if any, to make improvements on the property (additions, alterations, replacements, or repairs) during the 12-month period following the interview and whether the labor and/or materials cost more or less than $200.

Sales price asked (Part B).—For vacant units, the sales price is the amount asked for the property at the time of the interview and may differ from the price at which the property is sold. The statistics on sales price asked are shown only for vacant for sale one-family homes on less than 10 acres without a commercial establishment or medical or dental office on the property.

Garage or carport on property (Parts B, C, D).—Data on units with a garage or carport on the property are shown only for one-family homes on less than 10 acres without a commercial establishment or medical or dental office or the property. The garage or carport must be currently available for use by the occupants or the intended occupants of the unit; i.e., the members of the household can use it for parking even if it is currently used as a storage area for items such as lawn equipment or furniture. It may be attached to the house or it may be completely unattached, but it must be on the property. Excluded are garages or carports that have been converted to other uses such as living quarters, an extra room for business purposes, rented to someone else, or for some reason cannot be used for parking.

Contract rent (Part A).—Contract rent is the monthly rent agreed to, or contracted for, even if the furnishings, utilities, or services are included. The statistics on rent exclude one-family homes on 10 acres or more. Renter units occupied without payment of cash rent are shown separately as "no cash rent" in the rent tabulations.

Gross rent (Parts A, C, D, F).—The computed rent termed "gross rent" is the contract rent plus the estimated average monthly cost of utilities (electricity, gas, water) and fuels (oil, coal, kerosene, wood, etc.) if these items are paid by the renter (or paid by someone else, such as a relative, welfare agency, or friend) in addition to rent. Contract rent is the monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included. Thus, gross rent is intended to eliminate differentials which result from varying practices with respect to the inclusion of utilities and fuel as part of the rental payment. The estimated costs of water and fuels are reported on a yearly basis but they are converted to monthly figures in the computation process.

The statistics on rent exclude one-family houses on 10 acres or more. Renter units occupied without payment of cash rent are shown separately as "no cash rent" in the rent tabulations.

Gross rent in nonsubsidized housing (Part A).—The gross rent for nonsubsidized housing units excludes units reported in public housing projects, units with Federal, State, or local government rent subsidies, as well as one-family homes on 10 acres or more. Data on nonsubsidized units in this report are not based on government or local records; the figures are, therefore, subject to the ability of a

respondent to properly classify the unit as subsidized or nonsubsidized housing.

Gross rent as percentage of income (Parts A, C).—The yearly gross rent (monthly gross rent multiplied by 12) is expressed as a percentage of the total income of the family or primary individual. The percentage is presented for the same renter-occupied units for which gross rent was tabulated; thus, the statistics on gross rent as percentage of income reflect the exclusion of certain renter-occupied units. The percentage was computed separately for each unit and was rounded to the nearest whole number. For gross rent and income, the dollar amounts were used in the computation. Units for which no cash rent is paid and units occupied by families or primary individuals who reported no income or a net loss comprise the category "not computed."

The 1977 income statistics are for the 12 months prior to the date of the interview (April 1977 through February 1978). For 1970, the income statistics cover the calendar year 1969.

Gross rent in nonsubsidized housing as percentage of income. (Part A).—This item was computed in the same manner as "gross rent as percentage of income" except that rents and incomes for public and subsidized housing units were excluded. Data on nonsubsidized units in this report are not based on government or local records; they are, therefore, subject to the ability of a respondent to properly classify the unit as subsidized or nonsubsidized housing.

Inclusion in rent (parking facilities, garbage collection, and furniture) (Part C).—Counts are shown separately for units in which parking facilities, garbage and trash collection, and furniture are included in the rent. The data exclude one-family homes on 10 acres or more.

Parking facilities.—The statistics refer to off-street parking facilities which are available in connection with the building. The facilities are provided by the landlord or management and must be available without additional cost to the renter. The parking facility may be a garage, carport, driveway, or open lot where the occupant may park a car off the street.

Garbage and trash collection.—Included are units which have garbage and trash collection service available in connection with the building. The service may be public or private and must be available without additional cost to the renter. If the garbage (food waste) is collected by one company and the trash (paper, cans, etc.) by another, the data refer to the garbage collection service. In tables 3, 6, and 9, separate counts are also shown for renter-occupied units reporting additional amounts paid for garbage and trash collection service.

Furniture.—The statistics refer to furnished apartments or houses in which the management supplied major pieces of furniture such as a bed, sofa, chest of drawers, and table and chairs for the use of the occupant. Refrigerator, cooking range or stove, lamps, and rugs are not considered furniture. Units in which the occupants rent furniture from some source other than the management are not classified as furnished units.

Rent asked (Part B).—For vacant units, the rent is the amount asked for the unit at the time of the interview and may differ from the rent contracted for when the unit was occupied. The data are for vacant, year-round units for rent, excluding one-family homes on 10 acres or more. The median rent asked is shown separately for units in which the rent includes payment for all utilities (electricity, gas, and water) and fuels (oil, coal, kerosene, wood, etc.). Median rent asked is also shown for units in which the rent includes payment for utilities and fuels, as well as garbage and trash collection service.

Public, private, or subsidized housing (Parts, B, C, D).—A housing unit is classified as being in a "public housing project" if the structure in which the unit is located is owned by a local housing authority or other public agency, such as a housing and redevelopment authority or a housing development agency, and operated as public housing. These organizations may receive subsidies from the Federal or State government but the local agency owns the property. All other housing units are classified as "private housing."

Private housing units are further classified by whether the unit is subsidized; that is, the respondent pays a lower rent because a Federal, State, or local government program pays part of the cost of construction, building mortgage, or operating expenses. These programs include (1) the interest subsidy programs of the Department of Housing and Urban Development (HUD) for rental and cooperative housing for moderate-income families, (2) the rent supplement program where part of the rent for low-income families occupying certain types of rental housing projects is paid by HUD, and (3) the direct loan program of HUD for housing the elderly.

The statistics on public or subsidized housing exclude one-family homes on 10 acres or more and mobile homes. In addition, the data are not based on government or local records; the figures are, therefore, subject to the ability of a respondent to properly classify the unit as public or private and, if private, as subsidized or nonsubsidized housing.

Household Characteristics

Household (Parts A, B, C, D, F).—A household consists of all the persons who occupy a housing unit. By definition, the count of households is the same as the count of occupied housing units.

Head of household (Parts A, B, C, D, F).—One person in each household is designated as the "head"; that is, the person who is regarded as the head by the members of the household. However, if a married woman living with her husband is reported as the head, her husband was considered the head for the purpose of simplifying the tabulations.

Household composition (Parts A, C, D).—Statistics by age of head are presented separately for two-or-more-person households and for one-person households. Households having two or more persons are further subdivided as follows:

Male head, wife present, no nonrelatives.—Each household in this group consists of the head and his wife, and other persons, if any, all of whom are related to him.

Other male head.—This category includes households with male head, wife present, with nonrelatives living with them; male heads who are married, but with wife absent because of separation or other reason where husband and wife maintain separate residences; and male heads who are widowed, divorced, or single.

Female head.—This group comprises households with female heads regardless ot their marital status. Included are female heads with no spouse and female heads whose husbands are living away from their families; for example, husbands in the Armed Forces living on military installations.

Households consisting of only one person are shown separately as "one-person households" and are further subdivided as "male head" and "female head."

Family or primary individual (Parts A, C, D).—Housing units are occupied by either "families" or "primary individuals." The term "family" refers to the head of a household and all (one or more) other persons living in the same household who are related to the head by blood, marriage, or adoption. If the head lives alone or with nonrelatives only, then the head is considered a "primary individual."

Married couples related to the head of a family are included in the family and are not considered as separate families. A lodger, servant, or other person unrelated to the head is considered a member of the household but not of the family.

In the statistics on household composition, families are always included in one of the three major groups of two-or-more-person households. Primary individuals with nonrelatives living with them are tabulated as "2-or-more-person households" and further subdivided as "other male head" or "female head." Primary individuals living alone are always tabulated as "one-person households."

Subfamily (Parts A, C).—A subfamily is a married couple with or without children, or one parent with one or more own single (never married) children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. The most common example of a subfamily is a young married couple sharing the home of the husband's or wife's parents.

Age of head (Parts A, C, D).—The age classification refers to the age reported for the head of the household as of that person's last birthday.

Persons 65 years old and over (Parts A, D).—All persons, including the head, who are members of the household and are 65 years and over are included in the count of persons 65 years old and over.

Own children (Parts A, C, D).—Statistics on presence of "own" children of household heads are shown in this report. A child under 18 years old is defined as an "own" child if he or she is a single (never married) son, daughter, stepchild, or adopted child of a household head. Own children of subfamilies are excluded from the total count of own children.

Other relative of head (Part A).—This category includes all persons related to the head by blood, marriage, or adoption except wife or child of head and members of subfamilies.

Nonrelative (Parts A, C).—A nonrelative of the head is any person in the household who is not related to the head by blood, marriage, or adoption. Roomers, boarders, lodgers, partners, resident employees, wards, and foster children are included in this category.

Years of school completed by head (Parts A, C).—The statistics refer to the highest grade of regular school completed, not to the highest grade attended. For persons still attending school, the highest grade completed is one less than the one in which they are currently enrolled. "Regular" school refers to formal education obtained in graded public, private, or parochial schools, colleges, universities, or professional schools, whether day or night school, and whether attendance was full or part time. That is, "regular schooling" is formal education which may advance a person toward an elementary or high school diploma, or college, university, or professional school degree. Schooling or tutoring in other than regular schools is counted only if the credits obtained are regarded as transferable to a school in the regular school system. Household heads whose highest grade completed was in a foreign school system or in an ungraded school were instructed to report the approximate equivalent grade (or years) in the regular United States school system. Household heads were not reported as having completed a given grade if they dropped out or failed to pass the last grade attended. Education received in the following types of schools is not counted as "regular schooling": Vocational schools, trade schools, business schools, and noncredit adult education classes.

Means of transportation and distance and travel time to work (Part A).—The statistics are restricted to household heads who had a job the week prior to the interview. A job is defined as a definite arrangement for regular part-time or full-time work for pay every week or every month. Heads who do not report to the same place of work every day comprise the "no fixed place of work" category.

Head's principal means of transportation to work.—If different means of transportation are used on different days, the means used most often is recorded. If more than one means of transportation is used each day, the means covering the greatest distance is recorded. A "carpool" is where one or more persons regularly ride in the car with the head; the head may share driving, drive others, or ride with someone else. The category "mass transportation" includes railroad, subway, elevated transportation system, bus, and streetcar.

Distance from home to work.—The statistics refer to the one-way distance the head of household travels from home to work.

Travel time from home to work.—The data refer to the average time it takes the household head to travel one way from home to work.

Income (Parts A, C, D, F).—The statistics on income in the Annual Housing Survey are based on the respondent's reply to questions on income for the 12 months prior to the interview and are the sum of the amounts reported for wage and salary income, net self-employment income, Social Security or railroad retirement income, public assistance or welfare payments, and all other money income. The figures represent the amount of income received before deductions for personal income taxes, Social Security, union dues, bond purchases, health insurance premiums, Medicare deductions, etc.

In this report, the statistics relate to the money income of the family or primary individual occupying the housing unit; i.e., the sum of the income of the head of the family and all other members of the family 14 years old and over, or the income of the primary individual. Incomes of persons living in the unit but not related to the head of the household are not included in this sum.

Wage or salary income is defined as the total money earnings received for work performed as an employee at any time during the 12-month period prior to the interview. It includes wages, salary, piecerate payments, commissions, tips, cash bonuses, and Armed Forces pay. Net self-employment income is defined as net money income (gross receipts minus operating expenses) received from a business, professional practice, partnership or farm in which the person was self-employed.

Social Security or railroad retirement income includes cash receipts of Social Security pensions; survivors' benefits, disability insurance programs for retired persons, dependents of deceased insured workers, or disabled workers; and deductions for Medicare and health insurance premiums. Cash receipt of retirement, disability, and survivors' benefit payments made by the U.S. Government under the Railroad Retirement Act are also included. Separate payments received for hospital or other medical care are not included.

Income from all other sources includes money income received from sources such as periodic payments from estates and trust funds; dividends; interest; net rental income (or loss) from property rentals; net receipts from roomers or boarders; net royalties; public assistance or welfare payments which include cash receipts received from public assistance programs, such as old age assistance, aid to families with dependent children, and aid to the blind or totally disabled; unemployment insurance benefits; money received for transportation and/or subsistence by persons participating in special governmental training programs, such as the Area Redevelopment Act and the Manpower Development and Training Act; workmen's compensation cash benefits; periodic payments by the Veterans Administration to disabled members of the Armed Forces or to survivors of deceased veterans; public or private pensions; periodic receipts from insurance policies or annuities; alimony or child support from persons who are not members of the household; net gambling gains; and nonservice scholarships and fellowships.

Receipts from the following sources were not included as income: Value of income "in kind," such as, free living quarters, housing subsidies, food stamps, or food produced and consumed in the home; money received from the sale of property (unless the recipient was engaged in the business of selling such property); money borrowed; tax refund; withdrawal of bank deposits; accrued interest on "uncashed" savings bonds; exchange of money between relatives living in the same household; and gifts and lump-sum insurance payments, inheritances, and other types of lump-sum receipts.

The income statistics and the characteristics of the household refer to different periods in time. For 1977, the income data refer to the 12 months prior to the interview (April 1977 through February 1978), whereas the household characteristics refer to the date of interview. For 1970, income data refer to the calendar year 1969, whereas the household characteristics refer to April 1, 1970. Thus, family income does not include amounts received by persons who were members of the family during all or part of the income period if these persons no longer resided with the family at the time of the interview. On the other hand, family income includes amounts reported by related persons who did not reside with the family during the income period but who were members of the family at the time of the interview. For most families, however, the income reported was received by persons who were members of the family throughout the income period.

There may be significant differences in the income data between the Annual Housing Survey and other Bureau of the Census' surveys and censuses. For example, the time period for income data in the Annual Housing Survey refers to the 12 months prior to the interview while other income data generally refer to the calendar year prior to the date of the interview. Additional differences in the income data may be attributed to factors such as the various ways income questions are asked, the sampling variability and nonsampling errors between the Annual Housing Survey and other Bureau surveys and censuses, survey procedures and techniques, and processing procedures.

0 ☐ None – *Skip to 38*

36a. Is it necessary to go through anyone's bedroom to get to any bathroom?

(059) 1 ☐ Yes 2 ☐ No

b. Is it necessary to go through anyone's bedroom to get to any other room?

(060) 1 ☐ Yes 2 ☐ No

CHECK ITEM B

(See cc 11c) Do not count persons with usual residence elsewhere unless entire household is URE.

☐ Household has 1 or 2 persons – *Skip to 38*

☐ Household has 3 or more persons – *Ask 37a*

37a. Are any bedrooms used for sleeping by 3 or more persons?

☐ Yes

How many bedrooms are used for sleeping by 3 or more persons?

(061) 1 ☐ 1 bedroom 2 ☐ 2 or more bedrooms 3 ☐ No – *Skip to 38*

b. Are any of the persons who use this bedroom (these bedrooms) 13 years of age or older?

(062) 1 ☐ Yes 2 ☐ No

38. Do you have complete kitchen facilities in this house (building); that is, a kitchen sink with piped water, a refrigerator and a range or a cookstove?

(063) 1 ☐ Yes – For this household only 2 ☐ Yes – Also used by another household 3 ☐ No – *Skip to 40*

39a. Are the kitchen sink, refrigerator, and range or cookstove all in usable condition?

(064) 1 ☐ Yes – *Skip to Check Item C* 2 ☐ No

b. Which of the items are not in usable condition? *(Mark all that apply)*

(065) 1 ☐ Kitchen sink . . . . 2 ☐ Refrigerator . . . . . 3 ☐ Range or cookstove } *Skip to Check Item C*

40. Do you have piped water –

a. In this building?

(066) 1 ☐ Yes – *Skip to Check Item C* 2 ☐ No

b. Available within 1/4 mile?

(067) 1 ☐ Yes 2 ☐ No } *Skip to 45b*

Section IIIB – OCCUPIED UNITS (Include URE) – Continued

CHECK ITEM C

Household head lived here last 90 days *(See Check Item A(1), page 13)*

☐ Yes – *Ask 41a*

☐ No – *Skip to 42*

41a. At any time in the last 90 days were you COMPLETELY without running water?

(068) 1 ☐ Yes 2 ☐ No – *Skip to 42*

b. Were you completely without running water for 6 consecutive hours or more?

(069) 1 ☐ Yes 2 ☐ No . . . . . 3 ☐ Don't know } *Skip to 42*

c. How many times?

(070) 1 ☐ 1 2 ☐ 2 3 ☐ 3 or more

d. What was the (most common) reason you were completely without water for 6 consecutive hours or more – was it because of problems inside the building or problems outside the building?

(071) 1 ☐ Inside – *Specify problem* _____

2 ☐ Outside – *Specify problem* _____

42. Do you have complete plumbing facilities in this house (building); that is, hot and cold piped water, a flush toilet and a bathtub or shower?

(072) 1 ☐ Yes – For this household only 2 ☐ Yes – Also used by another household 3 ☐ No . . . . . } *Skip to 45a*

43. How many complete bathrooms and half bathrooms do you have?

A complete bathroom is a room with a flush toilet, bathtub or shower, and a washbasin with piped water. A half bathroom has at least a flush toilet or a bathtub or shower, but does not have all the facilities for a complete bathroom.

(Mark only one box)

(073) 1 ☐ Complete plumbing facilities but not in one room 2 ☐ 1 complete bathroom 3 ☐ 1 complete bathroom plus half bath with no flush toilet 4 ☐ 1 complete bathroom plus half bath with flush toilet 5 ☐ 2 complete bathrooms 6 ☐ More than 2 complete bathrooms } *Skip to 45a*

CHECK ITEM D

Household head lived here last 90 days *(See Check Item A(1), page 13)*

☐ Yes – *Ask 44a*

☐ No – *Skip to 45a*

44a. At any time in the last 90 days was there a breakdown in your flush toilet; that is, was it completely unusable?

(074) 1 ☐ Yes 2 ☐ No – *Skip to 45a*

b. Did any of these breakdowns last 6 consecutive hours or more?

(075) 1 ☐ Yes 2 ☐ No – *Skip to 45a*

c. How many of these breakdowns were there?

(076) 1 ☐ 1 2 ☐ 2 3 ☐ 3 4 ☐ 4 or more

d. What was the (most common) reason you were completely without the use of your flush toilet for 6 consecutive hours or more – was it because of problems inside the building or problems outside the building?

(077) 1 ☐ Inside – *Specify problem* _____

2 ☐ Outside – *Specify problem* _____

Facsimile of the Annual Housing Survey Questionnaire: 1977—Continued

CHECK ITEM H

Household head lived here last 90 days (See Check Item A(1), page 13)
- ☐ Yes – Ask 54a
- ☐ No – Skip to 55a

54a. Have any electric fuses or breaker switches blown in your house (apartment) in the last 90 days? (094)
1 ☐ Yes
2 ☐ No . . . . . } Skip to 55a
3 ☐ Don't know

b. How many times did this happen? (095)
1 ☐ 1
2 ☐ 2
3 ☐ 3 or more

55a. Does your house (apartment) have garbage collection service (either public or private)? (096)
1 ☐ Yes
2 ☐ No . . . . . } Skip to 55c
3 ☐ Don't know

b. How often is the garbage collected? (097)
1 ☐ Less than once a week
2 ☐ Once a week . . . . . } Skip to 56a
3 ☐ Twice a week . . . . . }
4 ☐ Three or more times a week }
5 ☐ Don't know . . . . . }

c. How do you dispose of your garbage? (098)
(If more than one method used, mark the one used most.)
1 ☐ Incinerator
2 ☐ Trash chute or compactor
3 ☐ Garbage disposal
4 ☐ Carry out to be picked up
5 ☐ Other – Specify ↓

56a. Is there a basement in this house (building)? (099)
(A basement is an enclosed space in which persons can walk upright under all or part of the building.)
1 ☐ Yes
2 ☐ No – Skip to 57

b. During the last 90 days did the basement show any signs of water having leaked in from the outside? (100)
1 ☐ Yes
2 ☐ No
3 ☐ Don't know

57. During the last 90 days did the roof of this house (building) leak? (101)
1 ☐ Yes
2 ☐ No
3 ☐ Don't know

58a. Does this house (apartment) have open cracks or holes in the interior walls or ceiling? (102)
(Do not include hairline cracks)
1 ☐ Yes
2 ☐ No

b. Does this house (apartment) have holes in the floors? (103)
1 ☐ Yes
2 ☐ No

59a. Is there any area of broken plaster on the ceiling or inside walls which is larger than this piece of paper? (104)
(SHOW CLOSED INTERVIEWER INFORMATION CARD BOOKLET)
1 ☐ Yes
2 ☐ No

b. Is there any area of peeling paint on the ceiling or inside walls which is larger than this piece of paper? (105)
(SHOW CLOSED INTERVIEWER INFORMATION CARD BOOKLET)
1 ☐ Yes
2 ☐ No

Section IIIB – OCCUPIED UNITS – Continued

85a. Was . . . (head) the head of the household in his previous residence at the time he moved?

(179) 1 ☐ Yes
- ☐ Respondent is the head – Skip to INTERVIEWER INSTRUCTION
- ☐ Respondent is not the head – Ask 85b

2 ☐ No – Skip to 102a, page 29

b. Were you also a member of . . .'s (head) household in the previous residence?

(180) 1 ☐ Yes
2 ☐ No

INTERVIEWER INSTRUCTION ➡ If the respondent is the head, or "Yes" was marked in 85b – Ask questions 86–101 in terms of "your" previous residence. If "No" was marked in 85b – Ask questions 86–101 in terms of "head's" previous residence.

86. How many rooms were in . . .'s (your) (head) previous residence? Do not count bathrooms, porches, balconies, halls, foyers, or half-rooms.

(181) _____ Number

87. How many bedrooms were in . . .'s (your) (head) previous residence? Count rooms used mainly for sleeping, even if used for other purposes.

(182) _____ Number
0 ☐ None

88. How many persons were in . . .'s (your) (head) previous residence at the time . . . (you) (head) moved?

(183) _____ Number

89. Did . . . (you) (head) have complete plumbing facilities in . . .'s (your) (head) previous residence (building); that is, hot and cold piped water, a flush toilet, and a bathtub or shower?

☐ Yes
- Were these facilities used by . . .'s (your) (head) household only?
  (184) 1 ☐ Yes – Used for that household only
  2 ☐ No – Also used by another household

3 ☐ No

90. How many living quarters, both occupied and [illegible] in the building where . . .'s (your) (head) previous residence was located?

(185) 1 ☐ Mobile home or trailer (no permanent room attached)
2 ☐ One, detached from any other building
3 ☐ One, attached to one or more buildings
4 ☐ 2
5 ☐ 3 or 4
6 ☐ 5 to 9
7 ☐ 10 to 19
8 ☐ 20 to 49
9 ☐ 50 or more

91a. Was . . .'s (your) (head) previous residence owned or being bought by someone in the household?

☐ Yes
- Was it owned as a cooperative or condominium?
  (186) 1 ☐ No – Skip to Check Item R
  2 ☐ Yes, a cooperative – Skip to 102a, page 29
  3 ☐ Yes, a condominium – Skip to 93

☐ No – Ask 91b

b. Was it rented for cash rent or occupied without payment of cash rent?

(186) 4 ☐ Rented for cash
5 ☐ Occupied without payment of cash rent

FORM AHS-52 (9-1-76)

CHECK ITEM R

TENURE OF PREVIOUS RESIDENCE (See item 91, page 26)

OWNED OR BEING BOUGHT

(See item 90, page 26)
- ☐ One-unit structure – Ask 92a
- ☐ Two-or-more-unit structure, or a mobile home or trailer – Skip to 102a, page 29

RENTED FOR CASH OR OCCUPIED WITHOUT PAYMENT OF CASH RENT

(See item 90, page 26)
- ☐ One-unit structure – Skip to 94
- ☐ Two-or-more-unit structure, or a mobile home or trailer – Skip to Check Item S

92a. Was that house on a place of 10 acres or more?
(187) 1 ☐ Yes – Skip to 102a, page 29
2 ☐ No

b. Was there a commercial establishment or medical or dental office on the property?
(188) 1 ☐ Yes – Skip to 102a, page 29
2 ☐ No

93. What was the value of that property when . . . (you) (head) moved; that is, about how much did that property (house and lot)(condominium unit), sell for, or would it have sold for, had it been for sale?

SHOW FLASHCARD B

(189)
1 ☐ Less than $5,000
2 ☐ $ 5,000 – $ 7,499
3 ☐ 7,500 – 9,999
4 ☐ 10,000 – 12,499
5 ☐ 12,500 – 14,999
6 ☐ 15,000 – 17,499
7 ☐ 17,500 – 19,999
8 ☐ 20,000 – 24,999
9 ☐ 25,000 – 29,999
10 ☐ 30,000 – 34,999
11 ☐ 35,000 – 39,999
12 ☐ 40,000 – 49,999
13 ☐ 50,000 – 59,999
14 ☐ 60,000 – 74,999
15 ☐ 75,000 or more

Skip to 102a, page 29

94. Was that house on a place of 10 acres or more?
(190) 1 ☐ Yes – Skip to 102a, page 29
2 ☐ No

CHECK ITEM S

(See item 91b, page 26)
- ☐ Rented for cash – Ask 95
- ☐ Occupied without payment of cash rent – Skip to 96

95. What was the MONTHLY rent for . . .'s (your) (head) previous apartment (house)?
(If rent was not paid by the month, write the amount and the time period covered in the "Notes" space, then compute MONTHLY rent and enter on the line provided.)
(Include site rent for mobile homes if it was paid separately.)

(191) $_____.00 Per month

NOTES

96. Was that house (apartment) in a public housing project; that is, was it owned by a local housing authority or other public agency?
(192) 1 ☐ Yes – Skip to 98
2 ☐ No

97. Did . . . (you) (head) pay a lower rent because the Federal, State, or local Government was paying part of the cost?
(193) 1 ☐ Yes
2 ☐ No

FORM AHS.52 (9-1-76)

Section IIIB – OCCUPIED UNITS – Continued

98. (In addition to rent), did . . . (you) (head) pay for –

a. (1) Electricity?
(194) 1 ☐ Yes
2 ☐ No, included in rent or supplied free
3 ☐ No, electricity not used
Skip to b(1)

(2) What was the average MONTHLY cost?
(195) $_____.00

b. (1) Gas?
(196) 1 ☐ Yes
2 ☐ No, included in rent or supplied free
3 ☐ No, gas not used
Skip to c(1)

(2) What was the average MONTHLY cost?
(197) $_____.00

c. (1) Water?
(198) 1 ☐ Yes
2 ☐ No, included in rent or no charge – Skip to d(1)

(2) What was the YEARLY cost?
(199) $_____.00

d. (1) Oil, coal, kerosene, wood, etc.?
(200) 1 ☐ Yes
2 ☐ No, included in rent
3 ☐ No, these fuels not used or obtained free
Skip to 99a

(2) What was the YEARLY cost?
(201) $_____.00

99a. (In addition to rent), did . . . (you) (head) pay for garbage and trash collection?
(202) 1 ☐ Yes
2 ☐ No – Skip to Check Item T

b. What was the YEARLY cost?
(203) $_____.00

CHECK ITEM T

(See item 91b, page 26)
- ☐ Rented for cash – Ask 100a
- ☐ Occupied without payment of cash rent – Skip to 102a, page 29

100a. Did . . . (you) (head) rent the apartment (house) furnished or unfurnished?
(204) 1 ☐ Furnished
2 ☐ Unfurnished – Ask 100c

b. Was the cost of the furniture included in the rent or did . . . (you) (head) pay for it separately?
(205) 1 ☐ Included in rent – Skip to 101a
2 ☐ Separately – Ask 100d

c. Did . . . (you) (head) rent furniture from some other source?
(206) 1 ☐ Yes
2 ☐ No – Skip to 101a

d. What was the MONTHLY cost?
(207) $_____.00

FORM AHS.52 (9-1-76)

Facsimile of the Annual Housing Survey Questionnaire: 1977 — Continued

Section IIIB – OCCUPIED UNITS – Continued

101a. Were offstreet parking facilities available in connection with the building? (208) 1 ☐ Yes 2 ☐ No – *Skip to 101e*

b. Did . . . (you) (head) rent such a space? (209) 1 ☐ Yes 2 ☐ No or available at no extra charge – *Skip to 101e*

c. Was the cost of the parking space included in the $ . . . (rent entered in 95), or did . . . (you) (head) pay for it separately? (210) 1 ☐ Included in rent – *Skip to 102a* 2 ☐ Separately

d. What was the MONTHLY cost for that parking space? (211) $_____ .00 – *Skip to 102a*

e. Did . . . (you) (head) rent a parking space in the neighborhood other than that connected with the building? (212) 1 ☐ Yes 2 ☐ No

NOTE – Ask all categories in 102a before proceeding to 102b.

NOTE – Ask 102b only for those categories in 102a which were answered "Yes."

102a. The following questions are concerned with different aspects of your PRESENT neighborhood. Here is a list of conditions which many people have in their neighborhoods. Which, if any, do you have?		b. Does the (condition) bother you?	c. Is it so objectionable that you would like to move from the neighborhood?
(1) Street (highway) noise?	(213) 1 ☐ Yes 2 ☐ No *	(1) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(2) Heavy traffic?	(214) 1 ☐ Yes 2 ☐ No *	(2) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(3) Streets or roads continually in need of repair, or open ditches?	(215) 1 ☐ Yes 2 ☐ No *	(3) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(4) Roads impassable due to snow, water, etc.?	(216) 1 ☐ Yes 2 ☐ No *	(4) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(5) Poor street lighting?	(217) 1 ☐ Yes 2 ☐ No *	(5) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(6) Neighborhood crime?	(218) 1 ☐ Yes 2 ☐ No *	(6) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(7) Trash, litter, or junk in the streets (roads), or on empty lots, or on properties in this neighborhood?	(219) 1 ☐ Yes 2 ☐ No *	(7) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(8) Boarded-up or abandoned structures?	(220) 1 ☐ Yes 2 ☐ No *	(8) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(9) Occupied housing in rundown condition?	(221) 1 ☐ Yes 2 ☐ No *	(9) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(10) Industries, businesses, stores, or other nonresidential activities?	(222) 1 ☐ Yes 2 ☐ No *	(10) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(11) Odors, smoke, or gas?	(223) 1 ☐ Yes 2 ☐ No *	(11) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(12) Noise from airplane traffic?	(224) 1 ☐ Yes 2 ☐ No *	(12) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No

NOTE – If "Yes" was answered for one or more of the categories in 102a, ask 102b.

FORM AHS-52 (9-1-76)

Section IIIB – OCCUPIED UNITS (*Include URE*) – Continued

NOTE – Ask ALL categories in 103a before proceeding to 103b.

NOTE – Ask 103b only for those categories in 103a which were answered "No."

103. The following questions are concerned with neighborhood services. a. Do you have satisfactory –		b. Is the (service) so unsatisfactory that you would like to move from the neighborhood?
(1) Public transportation?	(225) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know	(226) 1 ☐ Yes 2 ☐ No
(2) Schools?	(227) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know	(228) 1 ☐ Yes 2 ☐ No
(3) Neighborhood shopping such as grocery stores or drug stores?	(229) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know	(230) 1 ☐ Yes 2 ☐ No
(4) Police protection?	(231) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know	(232) 1 ☐ Yes 2 ☐ No
(5) Outdoor recreation facilities such as parks, playgrounds or swimming pools?	(233) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know	(234) 1 ☐ Yes 2 ☐ No
(6) Hospitals or health clinics?	(235) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know	(236) 1 ☐ Yes 2 ☐ No

NOTE – If "No" was answered for one or more categories in 103a, ask 103b.

104a. In view of all the things we have talked about, how would you rate this NEIGHBORHOOD as a place to live – would you say it is excellent, good, fair or poor? (237) 1 ☐ Excellent 2 ☐ Good 3 ☐ Fair 4 ☐ Poor

b. How would you rate this HOUSE (building) as a place to live – would you say it is excellent, good, fair or poor? (238) 1 ☐ Excellent 2 ☐ Good 3 ☐ Fair 4 ☐ Poor

OBSERVATION

105. Are there any buildings that appear to be abandoned and/or are there any buildings with windows broken or boarded-up on this street? (240) 1 ☐ Yes 2 ☐ No

CHECK ITEM U

☐ URE Household (*See item 7, page 1*) – *Ask 106*
(*See Control Card item 27a*)
☐ A one-unit structure, or a mobile home or trailer – *Skip to 109*
☐ Two-or-more-unit structure – *Skip to 107a*

FORM AHS-52 (9-1-76)

Facsimile of the Annual Housing Survey Questionnaire: 1977—Continued

Section IIIB – OCCUPIED UNITS (Include URE) – Continued

(Ask for URE Households only)

106. Is this UNIT intended for year-round use, for occupancy only on a seasonal basis or for use by migrant workers?

(241) 6 ☐ YEAR ROUND (occupied temporarily at time of interview)
Seasonal
8 ☐ Summers only
9 ☐ Winters only
10 ☐ Other seasonal – *Specify in notes*
7 ☐ Migratory
} *Skip to 112*

OBSERVATION

107a. Do the public halls in this building have light fixtures?

(242) 1 ☐ Yes
2 ☐ No
3 ☐ No public halls
} *Skip to 108a*

b. Are the light fixtures in working order?

(243) 1 ☐ All in working order
2 ☐ Some in working order
3 ☐ None in working order

108a. Are there loose, broken, or missing steps on any common stairways inside this building or attached to this building?

(244) 1 ☐ Yes
2 ☐ No
3 ☐ No common stairways – *Skip to 109*

b. Are all stair railings firmly attached?

(245) 1 ☐ Yes
2 ☐ No
3 ☐ No stair railings

109. In the last 12 months, how much did . . . earn in wages, salaries, tips and commissions (before taxes and deductions)?
(Obtain family income for head and all persons 14+ in household related to head by blood, marriage, or adoption. If the family has more than six members 14+, enter in Notes, page 33 and combine the amounts for all other persons on the last "Amount" line.)

Line No.	Amount (Dollars only)
(246) ____	(247) $____.00
(248) ____	(249) $____.00
(250) ____	(251) $____.00
(252) ____	(253) $____.00
(254) ____	(255) $____.00
(256) ____	(257) $____.00

110a. In the past 12 months, how much did this family (you) earn in net income from its (your) own business, professional practice or partnership?
(Exclude income previously reported in item 109.)

(258) $____.00
(259) 1 ☐ None
2 ☐ Lost money *(Enter amount LOST on line above)*

b. In the past 12 months, how much did this family (you) earn in net income from its (your) own farm or ranch?
(Exclude income previously reported in items 109 and 110a.)

(260) $____.00
(261) 1 ☐ None
2 ☐ Lost money *(Enter amount LOST on line above)*

Section IIIB – OCCUPIED UNITS (Include URE) – Continued

NOTE – Ask all categories in 111a before asking 111b.

NOTE – Ask 111b only for those categories in 111a which were answered "Yes."

(Obtain family income for head and all persons 14+ in household related to head by blood, marriage, or adoption.)

111a. In the past 12 months, did any member of this family (you) receive any money from –

111b. How much was received from (source of income) in the past 12 months?

			111b.
(1) Social Security or Railroad Retirement payments?	(262) 1 ☐ Yes	2 ☐ No	(263) $____.00
(2) Estates, trusts or dividends?	(264) 1 ☐ Yes	2 ☐ No	(265) $____.00

Section IIIB – OCCUPIED UNITS – Continued

CHECK ITEM W

(See Control Card item 25a)

☐ OWNED or BEING BOUGHT (Regular, condominium, or cooperative ownership) – Ask 117a

☐ Rented for cash or occupied without payment of cash rent – Skip to 117b

117a. Do you have insurance on your home and its contents for any of the following?

(1) Theft	(380) 1 ☐ Yes	2 ☐ No	3 ☐ Don't know
(2) Floods	(381) 1 ☐ Yes	2 ☐ No	3 ☐ Don't know
(3) Earthquakes	(382) 1 ☐ Yes	2 ☐ No	3 ☐ Don't know

Skip to 118a after filling 117a

b. Do you have insurance on your household contents (furniture and belongings) for any of the following?

(1) Fire	(383) 1 ☐ Yes	2 ☐ No	3 ☐ Don't know
(2) Theft	(384) 1 ☐ Yes	2 ☐ No	3 ☐ Don't know
(3) Hazards (such as flood, windstorm, earthquake)	(385) 1 ☐ Yes	2 ☐ No	3 ☐ Don't know

118a. At your present address have you ever applied for and been refused fire or theft insurance or hazard insurance such as flood, windstorm, earthquake, etc., BECAUSE OF WHERE YOU LIVE?

(386) 1 ☐ Yes
2 ☐ No
3 ☐ Don't know
} Skip to Check Item X

b. What type of insurance coverage have you been refused because of where you live?

(387)
1 ☐ Fire only
2 ☐ Theft only
3 ☐ Hazard only
4 ☐ Fire and theft
5 ☐ Fire and hazard
6 ☐ Theft and hazard
7 ☐ Fire, theft and hazard

Section IIIB – OCCUPIED UNITS (Include URE) – Continued

CHECK ITEM X

(1) *(See Check Item W, page 36)*

☐ Owned or being bought – *Go to Check Item X(2)*

☐ Rented for cash or occupied without payment of cash rent – *Skip to Check Item Y*

(2) *(See Check Item A(3), page 13)*

☐ Head moved here during the last 12 months – *Go to Check Item X(3)*

☐ Head did not move here in last 12 months – *Skip to Check Item Y*

(3) *(See item 66a, page 19)*

☐ Amount, "DK," "NA" or "Refused" entered in item 66a – *Ask 119a*

☐ Item 66a is blank – *Skip to Check Item Y*

119a. Earlier you told me that this property is mortgaged. When you acquired this property did you originate (place) a new mortgage or assume an existing mortgage? (428)

1 ☐ Originated mortgage

2 ☐ Assumed mortgage – *Skip to Check Item Y*

b. At the time you acquired this property, what was the amount of the mortgage? Do not include second trusts, or any other loan associated with the property. (429) $_____ . 00

CHECK ITEM Y

☐ "Urban" box marked in Control Card item 37a – *Skip to Check Item Z*

BOTH "Rural" box marked in Control Card item 37a AND

☐ "Yes" in Control Card item 37c or 37d – *Ask 120*

☐ "No," "NA" or "DK" in Control Card item 37c or 37d – *Skip to Check Item Z*

120. During the past 12 months did sales of crops, livestock and other farm products from this place amount to $1,000 or more? (425)

1 ☐ Yes

2 ☐ No

CHECK ITEM Z

(See item 7, page 1)

☐ URE Household – *Go to Control Card item 38a*

☐ Regular Interview – *Go to Section IV*

Notes

FORM AHS-92 (9-1-76)

PGM 5

Section IV – TRAVEL TO WORK

1. Section IV – Interview status

NOTE: *Fill item 1, after completing Section IV*

1 ☐ Interview

NONINTERVIEW

2 ☐ Refusal

3 ☐ Other

} *Go to Control Card item 38a*

INTERVIEWER INSTRUCTION

In item 2a enter the line number of each household member 14+.

DO NOT LIST URE'S

Ask item 2b for each person listed in item 2a.

2a. Line number (cc item 10)	2b. Did . . . have a job last week? (Include if temporarily absent from work due to illness, vacation, layoff, etc.) (Mark one box for each line number)	
	Yes[1]	No[2]
	1 ☐	2 ☐
	1 ☐	2 ☐
	1 ☐	2 ☐
	1 ☐	2 ☐
	1 ☐	2 ☐
	1 ☐	2 ☐
	1 ☐	2 ☐
	1 ☐	2 ☐
	1 ☐	2 ☐
	1 ☐	2 ☐
	1 ☐	2 ☐
	1 ☐	2 ☐
	1 ☐	2 ☐
	1 ☐	2 ☐
	1 ☐	2 ☐

[1] *Read the introduction below. Transcribe the line number for each "Yes" answer in question 2b above to the top of a separate page and ask the appropriate questions.*

[2] *All "No" in item 2b go to item 1.*

INTRODUCTION The following questions are concerned with how persons in your household usually get to work.

FORM AHS-92 (9-1-76)

Facsimile of the Annual Housing Survey Questionnaire: 1977 — Continued

← PGM 6

Line number of worker (386) | Line number of respondent (389)

If last worker in this household, mark this box →

3a. What is . . .'s principal means of transportation to work?

(390) 1 Truck . . . . . 2 Car or carpool → ↓

(391) 1 Drives alone – *Skip to 4a*
2 Shares driving . . . . . 3 Drives others . . . . . 4 Rides with someone else } *Skip to 3c*
5 Walks only – *Skip to 4a*
6 Works at home – *Skip to 8a*
7 Railroad
8 Subway or elevated
9 Bus or streetcar
10 Taxicab
11 Motorcycle
13 Bicycle
12 Other means – *Specify* _____

b. Does . . . usually ALSO use a car for part of the trip to work?

(392) 1 Yes. 2 No – *Skip to 4a*

c. How many people, including . . . , usually ride in the car to work?

(393) _____ Number

4a. Does . . . usually WORK at the same location each day?

(394) 1 Yes – *Skip to 4c* 2 No

b. Does . . . usually REPORT to the same location to begin work each day?

(395) 3 Yes 4 No – *Skip to 8a*

c. (1) What is the street address of that location?
Note – If address (number and street name) are not known, enter building name, shopping center name, or other physical location description.

(2) What are the nearest intersecting streets?

(3) In what city, town, village, borough, is this located?
Place type →

(4) What is the county, State, and ZIP code?
County
State | ZIP code

(5) For whom does . . . work?
Company or business establishment name

4d. Is . . .'s place of work inside the incorporated (legal) limits of (name of city, town, village, etc., listed in 4c(3))?

(396) 1 Yes 2 No 3 Don't know

5. What time does . . . usually leave for work?

(397) _____ Time

(398) 1 a.m. 2 p.m.

6. How many minutes does it usually take . . . to get from home to work?

(399) _____ Minutes

7. How many miles does . . . usually travel from home to work?

(400) _____ Miles OR 0 Less than 1 mile

8a. In the last year, has . . . changed his principal means of transportation to work?

(401) 1 Yes 2 No – *Skip to 9*

b. What was . . .'s principal means of transportation to work (prior to the change)?

(402) 1 Truck . . . . . 2 Car or carpool → ↓

(403) 1 Drove alone
2 Shared driving
3 Drove others
4 Rode with someone else
5 Walked only
6 Worked at home
7 Railroad
8 Subway or elevated
9 Bus or streetcar
10 Taxicab
11 Motorcycle
13 Bicycle
12 Other means – *Specify* _____

9. If "Yes" marked in 8a – *ASK* Compared to . . .'s previous means of transportation to work (Given in 8b), how satisfied is . . . with his present means of transportation to work – much more, more, about the same, less or much less satisfied?

If "No" marked in 8a – *ASK* Compared to a year ago, how satisfied is . . . now with his principal means of transportation to work – much more, more, about the same, less or much less satisfied?

(404) 1 Much more satisfied
2 More satisfied
3 About the same satisfaction
4 Less satisfied
5 Much less satisfied
6 Don't know
7 Did not work last year

INTERVIEWER → Go to Check Item A, page 40 for the HEAD.

↓ ~ PGM 7

CHECK ITEM A (Mark both parts)

(1) Head reports to same location each day. ("Yes" *in item 4a or 4b*) ☐ Yes* ☐ No
(2) Head works 5 miles or more from home. *(Item 7 is 5 miles or more. If item 7 is blank, mark the "No" box.)* ☐ Yes* ☐ No

** All "Yes," go to item 10a. Any other combination, go to the next worker, or if last worker, go to item I, Section IV.*

10a. Does . . . (head) have any objections to the distance (he/she) travels to get to work? (405) 1 Yes → *Skip to c* 2 No → *Ask b*

b. What would you say your reasons are for living 5 or more miles from . . .'s (head) place of work?

Is it because –

(1) You like the neighbors in your present neighborhood? (406) 3 Yes 4 No
(2) You like your house (apartment)? (407) 1 Yes 2 No
(3) Your present home is close to good schools, or church? (408) 3 Yes 4 No
(4) Your present home is convenient to shops, recreation, and similar facilities? (409) 1 Yes 2 No
(5) Your present home is close to the jobs of others (besides the head) in your family? (410) 3 Yes 4 No
(6) You can afford your present home? (411) 1 Yes 2 No
(7) You're used to your present home, or you're comfortable, or you've always lived here? (412) 3 Yes 4 No
(8) Some other reason I have not already mentioned? (413) 1 Yes → 2 No →
If "Yes," specify reason(s) – _____ (Skip to Note above item 11)

c. What are the reasons you don't live closer to . . .'s (head) place of work?

Is it because –

(9) You don't like any houses which are closer to work? (414) 3 Yes 4 No
(10) You would not like to live among the type of people in the neighborhoods which are closer to work? (415) 1 Yes 2 No
(11) The neighborhoods closer to work have poor schools or lack churches? (416) 3 Yes 4 No
(12) The neighborhoods closer to work are inconvenient to shops, recreation, or other similar facilities? (417) 1 Yes 2 No
(13) The neighborhoods closer to . . .'s (head) work are too far from other family members' jobs? (418) 3 Yes 4 No
(14) You cannot afford housing in neighborhoods closer to work? (419) 1 Yes 2 No
(15) There is no closer housing available? (420) 3 Yes 4 No
(16) You don't like change; it's trouble to move? (421) 1 Yes 2 No
(17) . . . (head's) present job is temporary, or . . . (head) expects to change jobs? (422) 3 Yes 4 No
(18) Some other reason I have not already mentioned? (423) 1 Yes 2 No
If "Yes," specify reason(s) – _____

NOTE ▶ *If 2 or more "Yes" answers in categories (1)–(18), ask item 11. All others, go to Check Item B.*

11. In view of all of the reasons we have talked about, *(Specify "Yes" answers mentioned in (1)–(18) above.)* Which reason would you say is the most important reason you live 5 or more miles from . . .'s (head) work? (424) _____ Reason number

Facsimile of the Annual Housing Survey Questionnaire: 1977—Continued

Section IV – TRAVEL TO WORK – Continued

CHECK ITEM B

☐ "Yes" in item 10c(14) – *Ask 12*

☐ All others – *Go to next worker or if last worker, go to item 1, Section IV*

12. Does . . . (head) live in the same city, town, borough or village that he/she works in?

(426) 1 ☐ Yes – *Go to next worker, or if last worker go to item 1, Section IV*
2 ☐ No

13. You said you cannot afford housing in neighborhoods closer to work – Would . . . (head) move to the place where he/she works if housing were available which he/she could afford?

(427) 1 ☐ Yes
2 ☐ No
3 ☐ Don't know

Go to next worker, or if last worker go to item 1, Section IV

SAMPLE DESIGN

Annual Housing Survey.—The estimates for each of the 20 SMSA's are based on data collected from the 1977 Annual Housing Survey (AHS) which was conducted by the Bureau of the Census acting as collection agent for the Department of Housing and Urban Development. In each of the 20 SMSA's, the data were collected for the 11-month period from April 1977 through February 1978 with one-eleventh of the sample units visited each month.

Each group of SMSA's is interviewed for the AHS on a rotating basis, and this group (A-2 SMSA's) was the first to be revisited. Nineteen of the 20 SMSA's were interviewed for the first time in 1974, while the Madison, Wis., SMSA was interviewed for the first time in 1975.

In each group of SMSA's, the largest SMSA from each of the 4 geographic regions is represented by a sample of about 15,000 designated housing units evenly divided between the central city and the balance of the respective SMSA. All remaining SMSA's are each represented by a sample of about 5,000 designated housing units distributed proportionately between the central city and the balance of the respective SMSA based on the distribution of total housing units in each sector.

The largest SMSA's in the A-2 group (1977-1978) are: Boston, Mass.; Detroit, Mich.; Los Angeles-Long Beach, Calif.; and Washington, D.C.-Md.-Va.

The remaining SMSA's in the A-2 group are: Albany-Schenectady-Troy, N.Y.; Anaheim-Santa Ana-Garden Grove, Calif.; Dallas, Tex.; Fort Worth, Tex.; Madison, Wis.; Memphis, Tenn.-Ark; Minneapolis-St. Paul, Minn., Newark, N.J.; Orlando, Fla.; Phoenix, Ariz.; Pittsburgh, Pa.; Saginaw, Mich.; Salt Lake City, Utah; Spokane, Wash., Tacoma, Wash.; and Wichita, Kans.

In this SMSA, 5,061 housing units were eligible for interview. Of these sample units, 247 interviews were not obtained because, for occupied sample units, the occupants refused to be interviewed, were not at home after repeated visits or were unavailable for some other reason; or, for vacant units, no informed respondent could be found after repeated visits. In addition to units eligible for interview, 328 units were visited but were not eligible for interview because they were condemned, unfit, demolished, converted to group quarters use, etc.

Designation of sample housing units for the 1977 survey.—The sample housing units designated for interview in the 1977 survey consisted of the following categories which are described in detail in the succeeding sections.

1. All sample housing units that were interviewed in the 1974 survey which were not part of the 1977 reduction.
2. All sample housing units that were type A noninterviews (i.e., units eligible to be interviewed) or type B noninterviews (i.e., units not eligible for interview at the time of the survey but which could become eligible in the future) in the 1974 survey which were not part of the 1977 reduction. (For a list of reasons for type A and type B noninterviews, see the facsimile of the 1977 AHS questionnaire, page App-20.)
3. All sample housing units that were selected from the list of new construction building permits issued since the 1974 survey. (This sample represented the housing units built in permit-issuing areas, since the 1974 survey.)
4. All sample housing units that were added to sample segments in the nonpermit universe since the 1974 survey. (This sample represented additions to the housing inventory in nonpermit-issuing areas since the 1974 survey.)
5. All sample housing units that were selected as part of the 1977 Coverage Improvement Program. (This sample represented most of the housing units which, until 1977, did not have a chance of selection.)

Selection of the 1974 sample.—The sample for the SMSA's which are 100-percent permit-issuing was selected from two sample frames—units enumerated in the 1970 Census of Population and Housing in areas under the jurisdiction of permit-issuing offices (the permit-issuing universe) and units constructed in permit-issuing areas since the 1970 census (the new construction universe). In addition, the sample for those SMSA's which are not 100-percent permit-issuing included

a sample selected from a third frame—those units located in areas not under the jurisdiction of permit-issuing offices (the nonpermit universe). The following SMSA's are 100-percent permit-issuing: Anaheim-Santa Ana-Garden Grove, Calif.; Boston, Mass.; Los Angeles-Long Beach, Calif.; Newark, N.J.; Phoenix, Ariz.; and Washington, D.C.-Md.-Va. The remaining 14 SMSA's contain a sample from the nonpermit universe.

Sampling operations, described in the following paragraphs, were performed separately within the central city and the balance of the SMSA for each of the sample frames. The overall sampling rate used to select the sample for each SMSA was determined by the size of the sample. Thus, for the four largest SMSA's, the overall sampling rate differed by central city and balance of the SMSA, since the sample was divided equally between the central city and the balance of the SMSA. The remaining SMSA's had an overall sampling rate about the same for the sample selected from both the central city and balance of the SMSA, since the sample was distributed proportionately between the central city and the balance of the SMSA according to the distribution of the total housing units in each sector.

The major portion of the sample in each SMSA was selected from a file which represented the 20-percent sample of units enumerated in permit-issuing areas of the SMSA during the 1970 Census of Population and Housing. This file contained records for occupied housing units, vacant housing units, and units in certain special places or group quarters. Sampling operations were done separately for the special place and group quarters records and for the occupied and vacant housing unit records. Before the sample was selected from the occupied and vacant housing unit records, the occupied housing unit records were stratified by race of head (non-Black/Black) and the vacant records were stratified into four categories pertaining to the value or rent associated with the vacant housing units. The occupied housing unit records were further stratified so that each unit was assigned to 1 of 50 strata according to its tenure, family size, and household income category as illustrated by the following table:

Household income	Tenure	
	Owner—Family size	Renter—Family size
	1 2 3 4 5+	1 2 3 4 5+
Under $3,000 . . .		
$3,000-$5,999. . .		
$6,000-$9,999. . .		
$10,000-$14,999 .		
$15,000 and over .		

Thus, for this SMSA, the occupied housing unit records from this universe were assigned to 1 of 100 strata for either the central city or for the balance, and the vacant housing unit records were assigned to 1 of the 4 vacant strata for either the central city or for the balance of the SMSA. A sample selection procedure was then instituted that would produce one-half of the desired sample size. However, whenever a record was selected to be in sample, the housing unit record adjacent to it on the file was also selected to be in sample, thereby insuring the necessary designated sample size.

Before the sample was selected from the group quarters and special place records, the records were stratified by census tract and census enumeration district (ED) within the central city and within the balance of the SMSA. A sample of special place records was then selected by a procedure that produced one-quarter of the desired sample size. However, at the time of the survey, the units at each of the special places were listed and subsampled at a rate which produced an expected four sample units, thereby insuring the necessary designated sample size.

The second frame from which this SMSA sample was selected was a list of new construction building permits issued since 1970 (i.e., the new construction universe). The sample selection from the list of new construction building permits was an independent operation within this SMSA. Prior to sample selection, the list of permits was chronologically stratified by the date the permits were issued, and clusters of an expected four (usually adjacent) housing units were formed. These clusters were then sampled for inclusion at the overall sampling rate.

For those SMSA's which are not 100-percent permit-issuing, the remainder of the AHS sample was selected from a frame consisting of areas not under the jurisdiction of permit-issuing offices (i.e., the nonpermit universe). The first step in the sampling operation for the universe was the selection (using the overall sampling rate) of a sample of census enumeration districts within these areas. Prior to this sample selection, the ED's were stratified by census tract within the central city and within the balance of the SMSA. The probability of selection of an ED was proportionate to the following measure of size:

$$\frac{\text{Number of housing units in 1970 census ED} + \frac{\text{Group quarters population in 1970 census ED}}{3}}{4}$$

The sample ED's were then divided into segments; i.e., small land areas with well-defined boundaries having an expected size of four, or a multiple of four, housing units. At the time of the survey, those segments that did not have an expected size of four were further subdivided to produce an expected four sample housing units.

The next step was the selection of one of these segments within each sample ED. All units in existence at the time of interview in these selected segments are in sample. Thus, units enumerated in the 1970 census as well as units built since the 1970 census are included.

1977 sample reduction.—In previous years, AHS sample units have been divided among 12 panels which were interviewed each month. Due to budget limitations, it became necessary to drop one of these panels from the 1977 survey. The designated sample size for 1977 was thus reduced by one-twelfth.

1974-1977 additions to the housing inventory.—In the permit-issuing universe, a sample of new construction building permits, issued since the 1974 survey, was selected to represent housing units built

in permit-issuing areas since the 1974 survey. Sampling procedures were identical to those used in selecting the 1970-1974 new construction sample. In the nonpermit universe, sample segments were dependently recanvassed, using listing sheets from 1974, to identify any units missed in the 1974 survey or any units added since the 1974 survey.

Coverage improvement sample selection.—The Coverage Improvement Program was undertaken to correct certain deficiencies in the AHS-SMSA sample from the permit-issuing and new construction universes. The coverage deficiencies included the following units:

1. New construction from building permits issued prior to January 1970, but completed after April 1, 1970.
2. Mobile homes placed in parks either missed during the 1970 census or established since the census.
3. Units missed in the 1970 census.
4. Units converted to residential use that were nonresidential at the time of the 1970 census.
5. Houses that have been moved onto their present site since the 1970 census.
6. Mobile homes placed outside parks since the 1970 census or vacant at the time of the 1970 census.

Coverage improvement for deficiency 1.—A sample of new construction units, whose permits were issued before January 1970, but completed after April 1970, was selected for each of the A-2 SMSA's. Two different procedures were used. For the first procedure, the sampling was carried out in two stages for one-and-two-unit structures and in three stages for three-or-more-unit structures. Sample units selected from one-and-two-unit structures were sampled at one-fourth the rate of units originally selected for the AHS-SMSA sample (regular AHS units), while sample units selected from three-or-more-unit structures were sampled at one-half the rate of regular AHS units.

The first stage was a sample of permit offices, and the second stage was a sample of the 1969 permits within each of the selected permit offices. In the Fort Worth, Tex., SMSA, an additional sample of 1968 permits for three-or-more-unit structures was included in the second stage sampling. For the third stage, structures of size three or more were divided into clusters of an expected size of two units and a sample of clusters was selected. This procedure was employed in the following SMSA's: Albany-Schenectady-Troy, N.Y.; Anaheim-Santa Ana-Garden Grove, Calif.; Fort Worth, Tex.; Madison, Wis.; Memphis, Tenn.-Ark.; Orlando, Fla.; Saginaw, Mich.; Salt Lake City, Utah; Spokane, Wash.; and Wichita, Kans.

In the remaining 10 SMSA's, units whose permits were issued before January 1970, but which were completed after April 1970, were identified from the Survey of Construction (SOC), a survey of building permits conducted monthly by the Bureau of the Census. These units were then sampled at one-third the rate of regular AHS units. Since permits were not available for all sampled offices, this procedure was also used in parts of the Anaheim-Santa Ana-Garden Grove, Calif., SMSA and the Memphis, Tenn.-Ark., SMSA to supplement the sample described above. These procedures added an estimated 2,502 new construction units to the coverage of the housing inventory of this SMSA.

Coverage improvement for deficiency 2.—In permit-issuing areas, a sample of mobile homes placed in a park that was missed by the census or established after the census was selected in two stages. First, for each 1977-1978 SMSA, a sample of tracts was selected and canvassed. All parks were listed and then matched back to the 1970 census to identify parks missed by the census and parks established after the census. Second, the parks were divided into clusters of an expected size of four sites and a sample of clusters was selected and interviewed. Each of the sample units represented the same number of units that the regular AHS sample units represented. This procedure added an estimated 520 units to the coverage of the housing inventory of this SMSA.

Coverage improvement for deficiencies 3-6.—The remaining missed units were sampled by one of two procedures. The first procedure was designed to represent units from the following types of missed structures (structures that had no chance of selection for the AHS):

1. Structures missed in the 1970 census.
2. Structures that were completely nonresidential in the 1970 census but now contain units converted to residential use.
3. Mobile homes that had been placed outside parks since the 1970 census and have a utility hookup, or were on the site during the present survey but not occupied on April 1, 1970, or had no utility hookup but were occupied by persons with no usual residence elsewhere.
4. Houses that had been moved onto their present site since the 1970 census.

Initially, a subsample of AHS sample units was selected from the permit-issuing universe at a rate of 1 in 24. Then, succeeding structures in a defined path of travel to the right of the structure containing the sample unit were listed until eight structures (excluding the sample unit structure) were found that had been eligible to be selected for the AHS. Finally, the intervening structures that did not have a chance of selection in the AHS were identified and units within these structures were interviewed. In cases where the interviewer workload would have been too great, a representative subsample of units within these structures was selected.

The second procedure was designed to represent missed units from structures represented in the AHS. These missed units were:

1. Units missed in the 1970 census.
2. Units converted to residential use since the 1970 census in structures that contained some residential units in 1970.

First, a subsample of AHS units in multi-unit structures of less than 10 units was selected from the permit-issuing universe. Second, for the multi-unit structures selected, all units were listed and matched

to the 1970 census. Any missed units were then assigned for interview.

Based on a cost-benefit analysis, a decision was made not to apply these two procedures in all 20 A-2 SMSA's. A partial application of the first procedure, which did not include structures missed in the 1970 census, was instituted in three SMSA's. In these SMSA's, a string of 10 structures (instead of 8) that were eligible to be selected for the AHS, were listed. The full application of this technique was employed in 12 SMSA's, with 5 SMSA's not receiving any application of the first procedure. The second procedure was instituted in 13 SMSA's. The following table shows which of these two techniques were applied to the A-2 SMSA's.

The first procedure added an estimated 7,084 units to the coverage of the housing inventory of this SMSA, while the second procedure added an estimated 220 units.

1970 Census of Population and Housing.—The estimates pertaining to the 1970 housing inventory (i.e., the housing inventory that existed at the time of the 1970 census) are based on either 20-, 15-, or 5-percent sample data collected in April 1970 for the Decennial Census of Population and Housing. A detailed description of the sample design employed for the 1970 census can be obtained in the 1970 Census of Housing report, Volume I, **Housing Characteristics for States, Cities, and Counties,** Part 1.

ESTIMATION

The AHS sample produced two types of estimates for each SMSA: Estimates pertaining to characteristics of the housing inventory at the time of the interview (i.e., the 1977 housing inventory) and estimates pertaining to characteristics of units removed from the housing inventory since 1974 (i.e., 1974-1977 lost units). Each type of estimate employed separate, although similar, estimation procedures.

1977 housing inventory.—The AHS estimates of characteristics of the 1977 housing inventory employed a 1-stage ratio estimation procedure in 19 SMSA's, with a second-stage ratio estimation procedure being employed in 1 SMSA. Prior to the implementation of the ratio estimation procedure, the basic weight (i.e., the inverse of the probability of selection) for each interviewed sample housing unit was adjusted to account for the noninterviews previously mentioned. This noninterview adjustment was done separately for occupied and vacant housing units. The noninterview adjustment factor was equal to the following ratio:

$$\frac{\text{Weighted count of interviewed housing units} + \text{Weighted count of noninterviewed housing units}}{\text{Weighted count of interviewed housing units}}$$

Within each sector of each SMSA, a noninterview factor was computed separately for 50 noninterview cells for sample housing units from the permit-issuing universe (where the cells consisted of 1 or more of the different strata used in the stratification of the universe as previously described). In addition, within each sector, separate noninterview factors were computed for one noninterview cell for conventional new construction sample housing units from both the permit-issuing universe and the coverage improvement universe, one noninterview cell for mobile homes from both the nonpermit universe and the coverage improvement universe, and one noninterview cell for other sample units from both the nonpermit universe and the coverage improvement universe, (if units were not included in any of the previous cells).

The following ratio estimation procedure was employed for all sample housing units from the permit-issuing universe. This factor was computed separately for all sample housing units within each permit-issuing universe noninterview cell mentioned previously. The ratio esti-

SMSA	Coverage improvement technique employed			
	First		Second	Neither

Spokane, Wash	X			
Tacoma, Wash		X	X	
Washington, D.C.-Md.-Va		X	X	
Wichita, Kans		X	X	

mation factor for each cell was equal to the following:

$$\frac{\text{1970 census count of housing units from permit-issuing universe in a cell}}{\text{AHS sample estimate of 1970 housing units from the cell}}$$

For each SMSA, the numerators of the ratios were obtained from the 1970 Census of Population and Housing 20-percent file of units enumerated in areas under the jurisdiction of permit-issuing offices. The denominators of the ratios were obtained from weighted estimates of all the AHS sample units within the corresponding ratio estimation categories using the existing weight (i.e., the basic weight times the noninterview factor). The computed ratio estimation factor was then applied to the existing weight for each sample unit within the corresponding ratio estimation category.

The effect of this ratio estimation procedure was to somewhat reduce the variance due to the variation in sample size of strata used in the sample selection of the permit-issuing universe, thereby reducing the sampling error below what would have been obtained by simply weighting the results of the sample by the inverse of the probability of selection. Ordinarily, this would have been controlled by sampling within the strata during the sample selection process. However, prior to the AHS sample selection within each SMSA, units already selected for other Census Bureau surveys were deleted from the permit-issuing universe. Thus, some variation in sample size was introduced during the AHS sample selection process.

For the Pittsburgh, Pa., SMSA, a second-stage ratio estimation procedure was also employed. This procedure involved the ratio estimation of the AHS weighted sample estimate of the October 1977 housing inventory to an independent estimate of the SMSA's October 1977 housing inventory. This ratio estimate factor equaled the following:

$$\frac{\text{SMSA independent estimate of October 1977 housing inventory}}{\text{AHS sample estimate of the housing inventory}}$$

The numerator of the ratio was derived by using the 1970 census estimate of total housing units for the SMSA in conjunction with the estimate of the change in the housing inventory since the census. The estimate of change was based on administrative records from utility companies. The denominator of that ratio was obtained from the weighted estimate of AHS sample units, using the existing weight after the first-stage ratio estimation procedure. The computed second-stage ratio estimation factor was then applied to the existing weight for each sample unit and the resulting product was used as the final weight for tabulation purposes.

The effect of the second-stage ratio estimation procedure, as well as the overall estimation procedure, was to reduce the sampling error for most statistics below what would have been obtained by simply weighting the results of the sample by the inverse of the probability of selection. Since the housing population of the sample differed somewhat by chance from the SMSA as a whole, it can be expected that the sample estimates will be improved when the sample housing population, or different portions of it, are brought into agreement with known good estimates of the SMSA housing population.

The second-stage ratio estimation procedure was not employed in all A-2 SMSA's, since it was felt that coverage improvement procedures adequately corrected known deficiencies in the sample where full coverage improvement procedures were employed. The independent estimates were only employed in SMSA's where full coverage improvements were not used and the estimated relative bias of the independent estimate was thought to be low enough (i.e., 2 percent or less over a 10-year period) to preclude the possibility of doing more harm than good to the survey results. A measure of the relative bias of the independent estimate was available based on a comparison between the 1970 census estimate of the April 1970 housing inventory and the independent estimate of the April 1970 housing inventory which was projected over a 10-year period from the 1960 census using the same procedure that produced the October 1977 independent estimates.

1974-1977 lost units.—The 1974-1977 lost unit estimates employed the three-stage ratio estimation procedure used to produce the AHS-SMSA estimates of the 1974 housing inventory, as was described in the 1974 Current Housing Report, Series H-170, **Housing Characteristics for Selected Metropolitan Areas.** Since the 1974-1977 lost units existed, by definition, in the 1974 housing inventory, there was a 1974 housing inventory weight associated with each 1974-1977 lost unit. This weight was used to tabulate the estimates of the characteristics of the 1974-1977 lost units.

1974 estimation procedure.—This report presents data on the housing characteristics of the 1974 housing inventory from the 1974 Annual Housing Survey SMSA sample. The AHS-SMSA estimation procedure employed a three-stage ratio estimation process. A detailed description of this ratio estimation procedure can be found in the AHS Series H-170 reports for 1974.

Ratio estimation procedure of the 1970 Census of Population and Housing.—This report presents data on the housing characteristics of the 1970 housing inventory from the 1970 Census of Population and Housing. The statistics based on 1970 census sample data employed a ratio estimation procedure which was applied separately for each of the three census samples. A detailed description of this ratio estimation procedure can be found in the 1970 Census of Housing report, Volume I, **Housing Characteristics for States, Cities, and Counties,** Part 1.

RELIABILITY OF THE ESTIMATES

There are two types of possible errors associated with estimates based on data from sample surveys—sampling and nonsampling errors. The following is a description of the sampling and nonsampling errors associated with the AHS-SMSA sample and of the nonsampling errors associated with the 1970 census estimates. A description of the sampling errors associated with the sample estimates from the 1970 census can be found in the 1970 Census of Housing report,

Volume I, **Housing Characteristics for States, Cities, and Counties**, Part 1.

Nonsampling errors.—In general, nonsampling errors can be attributed to many sources: Inability to obtain information about all cases, definitional difficulties, differences in the interpretation of questions, inability or unwillingness to provide correct information on the part of respondents, mistakes in recording or coding the data, and other errors of collection, response, processing, coverage, and estimation for missing data. Nonsampling errors are not unique to sample surveys since they can, and do, occur in complete censuses as well.

Obtaining a measurement of the total nonsampling error associated with the estimates from a survey is very difficult, considering the number of possible sources of error. However, an attempt was made to measure some of the nonsampling errors associated with the estimates for the 1970 Census of Population and Housing, the 1977 AHS-SMSA sample, and the 1974 AHS-SMSA sample.

1970 census.—A number of studies were conducted to measure two types of general errors associated with 1970 census estimates—"coverage" and "content" errors. The "coverage" errors determined how completely housing units were counted in the census and included space errors, definitional errors, and occupancy errors. The "content" errors measured the accuracy of the data collected for surveyed housing units. These errors were measured by reinterviews, record checks, and other surveys.

The detailed results of these studies, as well as the methodology employed, are presented in the 1970 Census of Population and Housing Evaluation and Research Program Reports, Series PHC(E)-5, **The Coverage of Housing in the 1970 Census**, and PHC(E)-10, **Accuracy of Data for Selected Housing Characteristics as Measured by Reinterviews.**

AHS-SMSA.—For the 1977 AHS-SMSA sample, a reinterview program was conducted to obtain a measurement of some of the components of the nonsampling error associated with the AHS estimates. A sample of households was revisited and answers to some of the questions on the AHS questionnaire were obtained again. The original interview and the reinterview were assumed to be two independent readings and, thus, were the basis for the measurement of the accuracy of the AHS data collected from interviewed households.

As part of the reinterview, a check was made at each of these households to determine if the following was done during the original interview:

1. The correct unit was visited.
2. The correct number of housing units were interviewed at that address.
3. The correct information on "Year Built" was obtained.
4. The correct information on "Tenure" was obtained.
5. The correct information on "Household Composition" was obtained.
6. The correct information on "Type of Housing Unit" was obtained.
7. The correct information on "Occupancy Status" was obtained.

This check was made for interviewer evaluation and control. That is, tolerance limits were derived to determine which interviewers passed or failed this reinterview check. The results of this study are available and are presented in the following Census Bureau memorandum, "Response Error in the Annual Housing Survey as Measured by Reinterviews—Year IV, 1977-1978 SMSA Sample."

For the A-2 reinterview program, measures of response inconsistency were taken on two subsamples—reconciled and unreconciled. After the question is answered in the reconciled subsample, the interviewer presented the original response and then asked the respondent to decide upon the best answer. Past experience has shown that the level of inconsistency is lower when the interviewer has the response available, and thus, it is believed that there is a downward bias in these estimates. In the unreconciled sample, the interviewer did not have access to previous responses. For the reconciled items, three-fourths showed low levels of response inconsistency while the remaining one-fourth were in the moderate range. For the unreconciled items, approximately one-half showed low levels of response disagreement, with the remaining one-half of the categories in the moderate and high inconsistency range. Although attitudinal items were excluded from the A-2 reinterview program, other reinterview programs have shown that, in general, attitudinal items such as items 102-104 (see facsimile of the 1977 AHS questionnaire, page App-34) have moderate to high levels of inconsistency. Moderate levels of inconsistency indicate that there is some problem with inconsistent reporting, and high levels indicate that improvements are needed in the method used to collect data or that the category concepts themselves are ambiguous.

A second measure of response error, the net difference rate, which is a measure of net error (or bias) in a particular category, was also provided by this reinterview program. None of the categories tested showed any significant evidence of bias.

The results of this study were based on sample data, so there is a sampling error associated with these estimates of nonsampling error. Therefore, the possibility of such errors should be taken into account when considering the results of this study.

A similar study was conducted for the 1974 AHS-SMSA sample. The results of which are presented in the following Census Bureau memorandum, "Reinterview Results for Annual Housing Survey—SMSA Sample: 1974."

Coverage errors.—With respect to errors of coverage and estimation for missing data, the AHS new construction sample had deficiencies in the representation of conventional new construction. Due to time constraints, only those building permits issued more than 5 months before the survey ended were eligible to be sampled to represent conventional new construction in permit-issuing areas for this SMSA. However, these permits issued during the last 5 months of the survey do not necessarily represent missed housing units, since, due to the relatively short

time span involved, it is possible that construction of these units was not completed at the time the survey was conducted. In which case, they would not have been eligible for interview. In addition to these deficiencies, new construction in special places that do not require building permits, such as military bases, are also not adequately represented.

The Coverage Improvement Program also had certain deficiencies. It appears that the listing procedure used to correct deficiencies 3-6 (see the coverage improvement section of this appendix) was not very effective in finding nonresidential conversions. Such conversions were primarily in business districts, whereas the listing procedure started from a residential unit. Also, additional coverage errors may exist in SMSA's where the complete Coverage Improvement Program was not applied (see the table on page App-45 of this appendix).

Deficiencies also exist in ED's where area sampling methods are used. It had been assumed that all units located inside these ED's would be represented in the sample. However, it has been estimated that the 1974 AHS sample missed as much as 2 percent of all housing units in these ED's because they were not listed during the canvassing. Since these ED's were recanvassed for the 1977 survey, the number of missed housing units may be considerably less for 1977.

Rounding errors.—For errors associated with processing, the rounding of estimates introduces another source of error in the data, the severity of which depends on the statistics being measured. The effect of rounding is significant relative to the sampling error only for small percentages or small medians, when these figures are derived from relatively large bases (e.g., median number of persons per household). This means that confidence intervals formed from the standard errors given may be distorted, and this should be taken into account when considering the results of the survey.

Sampling errors for the AHS-SMSA sample.—The particular sample used for this survey is one of a large number of possible samples of the same size, that could have been selected using the same sample design. Even if the same schedules, instructions, and interviewers were used, estimates from each of the different samples would differ from each other. The sampling error of a survey estimate provides a measure of the variation among the estimates from all possible samples and thus, is a measure of the precision with which an estimate from a sample approximates the average result of all possible samples.

One common measure of the sampling error is the standard error. As calculated for this report, the standard error reflects the variation in the estimates due to sampling and nonsampling errors, but it does not measure, as such, any systematic biases in the data. Therefore, the accuracy of the estimates depends on both the sampling and nonsampling errors measured by the standard error, biases, and any additional nonsampling errors not measured by the standard error. The sample estimate and its estimated standard error enable one to construct interval estimates in which the interval includes the average result of all possible samples with a known probability. For example, if all possible samples were selected, each of these surveyed under essentially the same general conditions, and an estimate and its estimated standard error were calculated from each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average result of all possible samples.

2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.

3. Approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average result of all possible samples.

The average result of all possible samples either is or is not contained in any particular computed interval. However, for a particular sample, one can say with specified confidence that the average result of all possible samples is included in the constructed interval.

The figures presented in the following tables are approximations to the standard errors of various estimates shown in this report for this SMSA. In order to derive standard errors that would be applicable to a wide variety of items and also could be prepared at a moderate cost, a number of approximations were required. As a result, the tables of standard errors provide an indication of the order of magnitude of the standard errors rather than precise standard errors for any specific item. Standard errors applicable to estimates of characteristics of the 1974 housing inventory can be found in the AHS Series H-170 reports for 1974.

Table I presents the standard errors applicable to estimates of characteristics of the 1977 housing inventory as well as estimates of characteristics of the 1974-1977 lost units. Linear interpolation should be used to determine the standard errors for estimates not specifically shown in this table. The standard errors on the AHS estimates of the population in housing units shown in tables A-1, B-1, and C-1 of part A of this report are 5,300 for the total SMSA, 3,520 for the central city of the SMSA, and 3,910 for the balance of the SMSA.

The reliability of an estimated percentage, computed by using the sample data for both numerator and denominator, depends upon both the size of the percentage and the size of the total upon which the percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more.

Table II presents the standard errors of estimated percentages of the 1977 housing inventory as well as estimated percentages of the 1974-1977 lost units. Two-way interpolation should be used to determine standard errors for estimated percentages not specifically shown in table II.

Included in tables I and II are estimates of standard errors for estimates of zero and zero percent. These estimates of standard errors are considered as over-

estimates of the true standard errors and should be used primarily for construction of confidence intervals for characteristics when an estimate of zero is obtained.

For ratios, 100 (x/y), where x is not a subclass of y, table II underestimates the standard error of the ratio when there is little or no correlation between x and y. For this type of ratio, a better approximation of the standard error may be obtained by letting the standard error of the ratio be approximately equal to:

$$100\left(\frac{x}{y}\right)\sqrt{\left(\frac{\sigma_x}{x}\right)^2+\left(\frac{\sigma_y}{y}\right)^2}$$

where: x = the numerator of the ratio
y = the denominator of the ratio
σ_x = the standard error of the numerator
σ_y = the standard error of the denominator

Illustration of the use of the standard error tables.—Table A-1 of part A of this report shows that in 1977 there were 99,300 owner-occupied housing units in this SMSA. Interpolation in table I of this appendix shows that the standard error of an estimate of this size is approximately 1,610. The following interpolation procedure was used:

The information presented in the following table was extracted from table I. The entry for "x" is the one sought.

Size of estimate	Standard error
75,000	1,470
99,300	x
100,000	1,610

The entry for x is determined as follows by vertically interpolating between 1,470 and 1,610:

$$99{,}300-75{,}000 = 24{,}300$$
$$100{,}000-75{,}000 = 25{,}000$$
$$1{,}470+\frac{24{,}300}{25{,}000}(1{,}610-1{,}470) = 1{,}610$$

TABLE I. Standard Errors for Estimated Number of Housing Units in the 1977 Housing Inventory and for Estimated Number of 1974-1977 Lost Units for the Tacoma, Wash., SMSA, for the Central City of the SMSA, and for the Balance (Not in Central City) of the SMSA

(68 chances out of 100)

Size of estimate	Standard error[1]	
	SMSA and central city	Not in central city
0	40	40
100	60	60
200	90	90
500	140	140
700	160	160
1,000	190	190
2,500	310	300
5,000	430	420
10,000	600	590
25,000	930	890
50,000	1,260	1,150
75,000	1,470	1,250
100,000	1,610	1,240
150,000	1,740	840
200,000	1,690	—

[1] For estimates pertaining to new construction, the standard errors shown in the table should be multiplied by a factor of 1.2 for the total SMSA, for the central city, and for the balance (not in central city) estimates.

Consequently, the 68-percent confidence interval, as shown by these data, is from 97,690 to 100,910 housing units. Therefore, a conclusion that the average estimate, derived from all possible samples, of 1977 owner-occupied housing units lies within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, we could conclude that the average estimate derived from all possible samples, lies within the interval from 96,724 to 101,876 housing units with 90 percent confidence; and that the average estimate lies within the interval from 96,080 to 102,520 housing units with 95 percent confidence.

Table A-1 of part A also shows that of the 99,300 owner-occupied housing units, 27,600, or 27.8 percent, had two bedrooms. Interpolation in table II of the appendix (i.e., interpolation on both the base and percent) shows that the standard error of the 27.8 percent is approximately 0.8 percentage points. The following interpolation procedure was used:

The information presented in the following table was extracted from table II. The entry for "p" is the one sought.

Base of percentage	Estimated percentage		
	25 or 75	27.8	50
75,000	1.0	a	1.1
99,300		p	
100,000	0.8	b	1.0

1. The entry for cell "a" is determined by horizontal interpolation between 1.0 and 1.1.

$$27.8-25.0 = 2.8$$
$$50.0-25.0 = 25.0$$
$$1.0+\frac{2.8}{25.0}(1.1-1.0) = 1.0$$

2. The entry for cell "b" is determined by horizontal interpolation between 0.8 and 1.0.

$$27.8-25.0 = 2.8$$
$$50.0-25.0 = 25.0$$
$$0.8+\frac{2.8}{25.0}(1.0-0.8) = .82$$

3. The entry for "p" was then determined by vertical interpolation between 1.0 and 0.82.

$$99{,}300-75{,}000 = 24{,}300$$
$$100{,}000-75{,}000 = 25{,}000$$
$$1.0+\frac{24{,}300}{25{,}000}(0.82-1.0) = 0.8$$

Consequently, the 68-percent confidence interval, as shown by these data, is from 27.0 to 28.6 percent; the 90-percent confidence interval is from 26.5 to 29.1 percent; and the 95-percent confidence interval is from 26.2 to 29.4 percent.

TABLE II. Standard Errors for Estimated Percentages of Housing Units in the 1977 Housing Inventory and for Estimated Percentages of 1974-1977 Lost Units for the Tacoma, Wash., SMSA, for the Central City of the SMSA, and for the Balance (Not in Central City) of the SMSA

(68 chances out of 100)

Base of percentage	Estimated percentage[1]					
	0 or 100	1 or 99	5 or 95	10 or 90	25 or 75	50
100	27.4	27.4	27.4	27.4	27.4	30.7
200	15.9	15.9	15.9	15.9	18.8	21.7
500	7.0	7.0	7.0	8.2	11.9	13.7
700	5.1	5.1	5.1	7.0	10.1	11.6
1,000	3.6	3.6	4.2	5.8	8.4	9.7
2,500	1.5	1.5	2.7	3.7	5.3	6.1
5,000	0.7	0.9	1.9	2.6	3.8	4.3
10,000	0.4	0.6	1.3	1.8	2.7	3.1
25,000	0.15	0.4	0.8	1.2	1.7	1.9
50,000	0.08	0.3	0.6	0.8	1.2	1.4
75,000	0.05	0.2	0.5	0.7	1.0	1.1
100,000 . . .	0.04	0.2	0.4	0.6	0.8	1.0
150,000 . . .	0.03	0.2	0.3	0.5	0.7	0.8
200,000 . . .	0.02	0.14	0.3	0.4	0.6	0.7

[1] Standard errors are presented to the nearest one-tenth of one percentage point except when the standard error is less than fifteen-hundredths of one percentage point; in those cases, the standard error is shown to the nearest one-hundredth of one percentage point. For estimates pertaining to new construction, the standard errors shown in the table should be multiplied by a factor of 1.2 for the total SMSA, for the central city, and for the balance (not in central city) estimates.

Differences.—The standard errors shown are not directly applicable to differences between two sample estimates. The standard error of a difference between estimates is approximately equal to the square root of the sum of the squares of the standard error of each estimate considered separately. This formula is quite accurate for the difference between estimates of the same characteristics in two different SMSA's or the difference between separate and uncorrelated characteristics in the same SMSA. However, if there is a high positive correlation between the two characteristics, the formula will overestimate the true standard error; but if there is a high negative correlation, the formula will underestimate the true standard error. Due to the overlap of the 1974 and 1977 AHS-SMSA samples, a positive correlation should be expected when making comparisons between 1974 and 1977 characteristics.

Illustration of the computation of the standard error of a difference.—Table A-1 of part A of this report shows that in 1977 there were 46,600 owner-occupied units with three bedrooms in this SMSA, Thus, the apparent difference, as shown by these data, between owner-occupied units with two bedrooms and owner-occupied units with three bedrooms is 19,000. Table I shows the standard error of 46,600 is approximately 1,220 and the standard error of 27,600 is approximately 960. Therefore, the standard error of the estimated difference of 19,000 is about:

$$1{,}550 = \sqrt{(1{,}220)^2 + (960)^2}$$

Consequently, the 68-percent confidence interval for the 19,000 difference is from 17,450 to 20,550 housing units. Therefore, a conclusion that the average estimate, derived from all possible samples, of this difference lies within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, the 90-percent confidence interval is from 16,520 to 21,480 housing units, and the 95-percent confidence interval is from 15,900 to 22,100. Thus, we can conclude with 95 percent confidence that the number of 1977 owner-occupied units with three bedrooms is greater than the number of owner-occupied units with two bedrooms since the 95-percent confidence interval does not include zero or negative values.

Medians.—For medians presented in certain tables, the sampling error depends on the size of the base and on the distribution upon which the median is based. An approximate method for measuring the reliability of the estimated median is to determine an interval about the estimated median so that there is a stated degree of confidence that the average median from all possible samples lies within the interval. The following procedure may be used to estimate confidence limits of a median based on sample data:

1. From table II, determine the standard error of a 50-percent characteristic on the base of the median.
2. Add to and subtract from 50 percent the standard error determined in step 1.
3. Using the distribution of the characteristics, read off the confidence interval corresponding to the two points established in step 2.

For about 68 out of 100 possible samples, the average median from all possible samples would lie between these two values.

A two-standard error confidence interval may be determined by finding the values corresponding to 50 percent plus and minus twice the standard error determined in step 1. For about 95 out of 100 possible samples, the average median from all possible samples would lie between these two values.

Illustration of the computation of the 95-percent confidence interval of a

median.—Table A-1 of part A of this report shows the median number of persons for owner-occupied housing units is 2.7. The base of the distribution from which this median was determined is 99,300 housing units.

1. Interpolation in table II shows that the standard error of 50 percent on a base of 99,300 is approximately 1.0 percentage points.

2. To obtain a 95-percent confidence interval on the estimated median, initially add to and subtract from 50 percent twice the standard error determined in step 1. This yields percentage limits of 48.0 and 52.0.

3. From table A-1 of part A, it can be seen by cumulating the frequencies for the first two categories that 46,200 owner-occupied housing units, or 46.5 percent, had one or two persons (for purposes of calculating the median, the category of two persons is considered to be from 1.5 to 2.5 persons) and that an additional 17,800 owner-occupied housing units, or 17.9 percent, had three persons (i.e., 2.5 to 3.5 persons).

By linear interpolation, the lower limit of the 95-percent confidence interval is found to be about:

$$2.5 + (3.5-2.5)\left(\frac{48.0-46.5}{17.9}\right) = 2.6$$

Similarly, the upper limit of the 95-percent confidence interval is found to be about:

$$2.5 + (3.5-2.5)\left(\frac{52.0-46.5}{17.9}\right) = 2.8$$

Thus, the 95-percent confidence interval ranges from 2.6 to 2.8 persons.

Table Finding Guide, Part A

Subjects, by Type of Area and Table Number

This guide lists all subjects covered in this part but does not indicate all cross-classifications; for example, by owner- and renter-occupied units (tenure).

In the tables, the prefix letter "A" indicates data for the total SMSA, prefix letter "B" indicates data for inside central cities, and prefix letter "C" indicates data for not inside central cities.

Table Finding Guide, Part C

Subjects, by Type of Area and Table Number

This guide lists all subjects covered in this part but does not indicate all cross-classifications; for example, by owner- and renter-occupied units (tenure).

In the tables, the prefix letter "A" indicates data for the total SMSA, prefix letter "B" indicates data for inside central cities, and prefix letter "C" indicates data for not inside central cities.
