Duane T. McGough,
Director, Housing and Demographic Analysis Division

This report presents data from the Annual Housing Survey, which was sponsored by the U.S. Department of Housing and Urban Development and conducted by the U.S. Bureau of the Census. It was prepared primarily under the direction of Duane T. McGough, Director, Housing and Demographic Analysis Division, Department of Housing and Urban Development, and Arthur F. Young, Chief, Housing Division, Bureau of the Census.

Duane T. McGough, assisted by Paul Burke, Connie Casey, Kathryn Nelson, Iredia Irby, and David Crowe, was responsible for overseeing the Annual Housing Survey and resultant report on behalf of the Department of Housing and Urban Development.

Within the Bureau of the Census, this report was developed in the Housing Division. It was prepared under the supervision of Leonard J. Norry, Assistant Division Chief, by Edward D. Montfort, Chief, Current Surveys Branch, assisted by Jane S. Maynard and Paul P. Harple, Jr. Specific activities related to data collection procedures, statistical presentation, organization of the report, and preparation of text materials were performed by Edward Cary Bean, Jr., Walter L. Busse, Mary C. Carroll, Wallace Fraser, Sheryl H. Stein, Stuart M. Kaufman, Richard G. Kreinsen, Gregg Lindner, Watson Pryor, Josephine J. Ruffin, Georgina Torres, Barbara Williams, and Elizabeth Williams. Important contributions were made by Elmo E. Beach in the planning and coordination of the survey.

The operational aspects of the Annual Housing Survey were coordinated by the Demographic Surveys Division under the direction of Thomas C. Walsh, Chief, by B. Gregory Russell, Assistant Division Chief and John C. Cannon, assisted by Maria A. Mochulski, Gregory Wells, and Steve Ciccarelli. Systems and processing procedures were performed under the direction of Robert G. Munsey, Assistant Division Chief. The computer programming and processing were performed under the supervision of D. Richard Bartlett, assisted by Merritt P. Woodard, Nathan P. Call, Sharon Williams, and Velma Banks. Angel Marshall, assisted by Larry Beasley, Robert Smith, Jr., Carl Jablin, Patricia Lauria, Pauline Toth, and David Montgomery was responsible for the clerical and keying procedures and scheduling.

The planning of the sample design, weighting, and computation of sampling variances and standard errors was developed in the Statistical Methods Division under the supervision of Charles Jones, Chief, and Gary Shapiro, Assistant Division Chief, by Dennis Schwanz, Carol Mylet, Robert Abramson, and Hertz Huang. Implementation of the sample selection and preparation of sample controls were performed under the supervision of Robert T. O'Reagan, Assistant Division Chief, by Leonard Baer, Florence Abramson, Diane Barrett, David Diskin, Carlton Pruden, and Juanita Jones (Data Preparation Division, Jeffersonville, Ind.). The preparation of field sample control and reinterview procedures was performed under the supervision of Robert T. O'Reagan, by John Paletta, Fay Nash, Anne Jean, and Richard Frazier. Reinterview design and analysis were conducted under the supervision of Irwin Schreiner, by Janet St. Clair. Coverage improvement procedures were developed by Dennis Schwanz, Donald Luery, and Carol Mylet under the supervision of Robert T. O'Reagan, by John Paletta, Richard Frazier, Leonard Baer, Florence Abramson, David Diskin, David Kriegman, and Kathleen Walsh (Data Preparation Division, Jeffersonville, Ind.).

Data collection, clerical processing, and data entry activities were administered by the Field Division, under the supervision of Lawrence T. Love, Chief, by George T. Reiner, Assistant Division Chief, Howard C. Beattie, Vaugh Paddock, Hugh O'Connor, William J. Phalen, and Kenneth A. Stump, as well as the directors of the Bureau's 12 regional offices.

Within the Publications Services Division, many individuals made significant contributions in the areas of publication planning and design, editorial review, composition, and printing procurement.

GENERAL

This report presents statistics on housing and household characteristics from the 1981 Annual Housing Survey conducted in 15 selected standard metropolitan statistical areas (SMSA's). For a list of these SMSA's, see page XVI. The Annual Housing Survey (AHS) was designed to provide a current series of information on the size and composition of the housing inventory, the characteristics of its occupants, the changes in the inventory resulting from new construction and from losses, the indicators of housing and neighborhood quality, and the characteristics of recent movers. The survey, performed for the Department of Housing and Urban Development, is authorized under sections 501 and 502(d), 502(e), and 502(f) of the Housing and Urban Development Act of 1970, Title 12, United States Code 1701z-1 and 1701z-2. The Bureau of the Census is authorized under Title 31, United States Code, section 686, to perform special work or services for Federal agencies.

The statistics presented in this report are based on information from a sample of housing units. The information for the 1981 AHS-SMSA sample was collected by personal interview from June 1981 through November 1981 for large sample size SMSA's and April 1981 through December 1981 for small sample size SMSA's. (See paragraph "Sample size" below.)

A separate report is issued jointly by the Department of Housing and Urban Development and the Bureau of the Census for each of the 15 SMSA's in the 1981 survey. Each report consists of five parts. Part A presents statistics on general housing characteristics, part B on indicators of housing and neighborhood quality, part C on financial characteristics, part D on recent mover households, and part F on financial characteristics cross-classified by indicators of housing and neighborhood quality. (Part E is published only for the national sample.)

The content and procedures of the Annual Housing Survey were determined after consultation with a variety of users of housing data and through field pretesting. The data for many of the subjects covered in this report are the same as those collected in the 1970 Census of Housing; in general, these data are comparable to those shown in the 1970 census reports. In addition, a number of new items were introduced in this survey on subjects such as breakdowns in equipment, the physical condition of the structure, neighborhood conditions and services, distance and travel time from home to work for the householder, storm windows and doors, and insulation.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233.

Sample size—The statistics presented in this report are based on a sample of housing units and are, therefore, subject to sampling variability. Two different sample sizes were employed in the 1981 survey. Three of the larger SMSA's were represented by a sample of about 5,000 designated housing units which was evenly divided between the central city or cities and the balance of the respective SMSA; i.e., the area not in central cities. These SMSA's were Boston, Mass.; Detroit, Mich.; and Washington, D.C. All remaining SMSA's were each represented by a sample of about 3,750 designated housing units which was divided between the central city or cities and the balance of the respective SMSA based on the proportionate distribution of all housing units in the entire SMSA.

The sample was selected from units enumerated in the 1970 census and updated to include units constructed since 1970. Detailed information on the sample design, size of sample, estimation procedure, and sampling variability associated with these data is given in appendix B.

Organization of the text—The text consists of this introduction and appendixes A and B, which appear after the data tables. Appendix A describes the geographic area classifications, provides definitions and explanations of the subjects covered in this report, and contains a facsimile of the questionnaire. Appendix B presents information on sample design, estimation, and accuracy of the data.

Content of the tables—A series of standard tables presents data for housing units for each area shown in this report. Separate data are shown for "in central cities" and "not in central cities," as well as for the SMSA as a whole. In parts A, B, C, and F, the prefix letter "A" has been assigned to tables for the SMSA as a whole, "B" to tables for "in central cities," and "C" to tables for "not in central cities." The numbers presented in these tables are rounded to the nearest hundred. Characteristics for some items may not add to the total due to rounding.

In part A on general housing characteristics, tables 1 and 2 present selected housing characteristics for 1981, 1977, 1974, and 1970; table 3, characteristics of new construction units; table 4, 1977 characteristics of housing units removed from the housing inventory; and table 5, characteristics of vacant—year-round housing units. The same general subject content presented in tables 1 and 2 is also presented for housing units with Black householder in tables 6 and 7 and for housing units with Spanish-origin householder in tables 8 and 9.

In part B on indicators of housing and neighborhood quality, tables 1 to 4 present characteristics for owner- and renter-occupied housing units, tables 5 to 8 present characteristics for owner- and renter-occupied housing units with Black householder, and tables 9 to 12 present characteristics for owner- and renter-occupied housing units with Spanish-origin householder.

In part C on financial characteristics, table 1 presents characteristics of owner- and renter-occupied housing units by income of the family or primary individual; table 2 presents characteristics for owner-occupied, one-unit structures by value of property; and table 3 presents characteristics of renter-occupied housing units by gross rent. The same subject content as shown in tables 1 to 3 is presented for housing units with Black householder in tables 4 to 6 and for housing units with Spanish-origin householder in tables 7 to 9.

In part D on recent mover households, table 1 presents characteristics of all occupied housing units and units occupied by recent movers (households that moved into their units during the 12 months prior to the interview). Table 2 presents income of families and primary individuals by purchase price and amount of mortgage. Tables 3 to 10 present characteristics of the present unit for recent mover households cross-classified by characteristics of the previous unit. The same subject content as shown in tables 1 to 10 is presented for housing units with Black householder in tables 11 to 20 and for housing units with Spanish-origin householder in tables 21 to 30.

In part F, the tables show cross-tabulations of the indicators of housing and neighborhood quality by income, value, and gross rent. Tables 1 to 4 present characteristics of owner- and renter-occupied housing units by income of the family or primary individual; tables 5 to 8 present characteristics of owner-occupied, one-unit structures by value of property; and tables 9 to 12 present characteristics of renter-occupied housing units by gross rent. The same subject content as shown in tables 1 to 12 is presented for housing units with Black householder in tables 13 to 24 and for housing units with Spanish-origin householder in tables 25 to 36.

1970 data in this report—The source of the 1970 data shown in part A is both published and unpublished tabulations from the 1970 Census of Population and Housing. For some items, 1970 data are not shown because they are not available. Prior to 1980 the concept "head" was used instead of "householder," see appendix A for further discussion. Data for 1970 for all housing units and for units with Black household head are from the 20-, 15-, and 5-percent samples. Data for housing units with household head of Spanish origin are limited to the 1970 census 5-percent sample. The totals for individual items in some tables may differ when the characteristics are derived from different samples. Information for the 1970 census was collected as of April 1, 1970.

1974 and 1977 data in this report—The source of the 1974 and 1977 data shown in part A, including characteristics of housing units removed from the inventory, is published tabulations from the 1974 and 1977 Annual Housing Surveys. Prior to 1980 the concept "head" was used instead of "householder" (see appendix A for further discussion). For some items, 1974 and 1977 data are not available. Information for the 1974 and 1977 Annual Housing Survey was collected by personal interview from April 1974 through March 1975, and from April 1977 through February 1978, respectively.

Derived figures (medians, etc.)—Shown in this report are percents, means, medians, and ratios. The median, which is a type of average, is the middle value in a distribution; i.e., the median divides the distribution into two equal parts—one-half the cases fall below the median and one-half the cases exceed the median. Derived figures are not presented (but indicated by three dots . . .) if there are less than 25 sample cases in the distribution or the base.

Medians for rooms, persons, and years of school completed by householder are rounded to the nearest tenth; selected monthly housing costs as percentage of income to the nearest percent. Travel time is rounded to the nearest minute and distance from home to work is rounded to the nearest tenth of a mile. Medians for value and income are rounded to the nearest hundred dollars; rent, real estate taxes last year, monthly mortgage payment, and selected monthly housing costs are rounded to the nearest dollar.

In computing medians for rooms and persons per housing unit, the whole number is used as the midpoint of the interval, for example, the category "4 rooms" is treated as an interval

ranging from 3.5 to 4.5 rooms. When medians for distance and travel time to work are computed, householders reporting "no fixed place of work" are excluded. Units reporting "no cash rent" are excluded from the computation of median rent; for selected monthly housing costs as percentage of income, units in the category "not computed" are excluded. "Not reported" categories are excluded from the computation of medians.

The median number of school years completed by the householder was computed after the statistics on years of school completed had been converted to a continuous series of numbers (e.g., completion of the 1st year of high school was treated as completion of the 9th year and completion of the 1st year of college as completion of the 13th year). Householders completing a given school year were assumed to be distributed evenly within the interval from 0.0 to 0.9 of the year. Because of the inexact assumption as to the distribution within an interval, the median school years completed is more appropriately used for comparing different groups and the same group at different dates than as an absolute measure of educational attainment.

The medians presented for 1981 are generally computed on the basis of the distributions as shown in the tables. As a result, a median or percent for the same characteristic and universe may vary somewhat between tables. The medians for 1974 and 1977 are also computed on the basis of the distributions as shown in the tables in this report. In addition to variations between tables, many of the 1974 and 1977 medians differ from those previously published for small universes where the published distribution has changed between 1974, 1977, and 1981. The medians presented for 1970 are computed on the basis of the distributions as tabulated in 1970, which are sometimes more detailed than the distributions shown in this report.

When the median falls in the lower terminal category of an open-ended distribution, the method of presentation is to show the initial value of the next category followed by a minus sign; for example, if the median falls in the category "Less than $10,000," it is shown as "$10,000–." When the median falls in the upper terminal category of an open-ended distribution, the method of presentation is to show the initial value of the terminal category followed by a plus sign; for example, if the median falls in the category "$300,000 or more," it is shown as "$300,000+."

Symbols—A dash (—) signifies zero or a number which rounds to zero. Three dots (. . .) in a data column mean not applicable or that the base for a derived figure is too small for it to be shown. The symbol "NA" means not available.

Boundaries—The data shown in this report relate to the areas as defined for the 1970 census. See appendix A for a discussion of these areas. Additional information and definitions of the 1970 boundaries are given in the 1970 Population Census PC(1)-A reports.

List of SMSA reports from the Annual Housing Survey—The SMSA surveys are conducted in 60 selected SMSA's originally divided into groups of approximately 20 each, with a group to be interviewed every 3 years on a rotating basis. The SMSA's are no longer surveyed according to the original three groups. A listing of the SMSA's by the original three groups is included in this introduction. The years for which reports are currently available for individual SMSA's are provided on this listing.

Reports from the Annual Housing Survey—Reports from the AHS metropolitan area samples are published under Series H-170. Any supplemental SMSA reports are published under Series H-171.

Reports from the AHS national sample are published under Series H-150. Any supplemental national reports are published under Series H-151. Data for the national reports are collected once a year from a sample of housing units that is independent of the sample of housing units used to produce the SMSA reports. The national reports present statistics for the United States by inside and outside SMSA's and for each of four census regions. The first national AHS was conducted from August to December 1973. The Series H-150 reports are currently produced in six volumes (parts A through F). Much of the data in the national report series is similar to that found in this and other SMSA reports. Content of the reports does vary however, between the Series H-150 and H-170 reports and between survey years within each series due to changing data requirements.

ADDITIONAL DATA

Unpublished tabulations—A large number of tabulations, not included in the published reports, have been prepared to meet special needs of both national (Series H-150 and H-151) and SMSA (Series H-170 and H-171) data users. These unpublished data are available in two forms. Paper photocopies are available for specific tables at the cost of reproduction. Microfilm/microfiche copies of these unpublished data are also available on a cost-per-reel basis. An index of the data available can be obtained free of charge. These data may be obtained by contacting the Housing Division, Bureau of the Census, Washington, D.C. 20233.

Public-use microdata files—For the data users whose needs are not met by the available tabulations, the Census Bureau also has made available computerized microdata (individual respondent records) from both the SMSA and national samples. Except for names and addresses, the AHS microdata provide essentially all the information obtained from each household or vacant unit. The Census Bureau's confidentiality guidelines prescribe that individuals and specific addresses remain anonymous.

Confidentiality guidelines further prescribe that individual records cannot be associated with areas having fewer than 250,000 people based on 1970 census results. The national files identify the four census regions, each SMSA of 250,000 or more population (central city residence is also identified where possible), metropolitan/nonmetropolitan residence, and urban/rural residence. The SMSA data files contain all SMSA samples except Saginaw, Mich., which contained less than the 250,000 required 1970 population. Central cities are identified for 42 of the 59 SMSA's.

Microdata computer tapes from the Annual Housing Survey are available on a cost-per-reel basis from Data User Services Division, Customer Services (Tapes), Bureau of the Census, Washington, D.C. 20233.

Microfiche of published reports—Microfiche copies for national and SMSA published reports are available from Data User Services Division, Customer Services (Microfiche), Bureau of the Census, Washington, D.C. 20233.

DATA COLLECTION PROCEDURES

The 1981 Annual Housing Survey was conducted by interviewers who made personal visits to each sample unit and obtained the information from the occupants, or if the unit was vacant, from informed persons (landlords, rental agents, or knowledgeable neighbors). The information reported by the interviewer reflected the situation at the time of the survey, which began in June 1981 through November 1981 for large sample size SMSA's and April 1981 through December 1981 for small sample size SMSA's (see paragraph "Sample Size").

Data were collected for sample housing units located in the counties and independent cities that make up the 15 SMSA's interviewed for the 1981 AHS. A sample of housing units was selected in these areas from the 1970 census and updated, by a sample of addresses from building permits, to include housing units added since 1970. Estimates of the counts and characteristics of the 1981 inventory were obtained for these sample units.

For the estimates of losses (housing units removed) from the 1977 housing inventory, the interviewer located the address of the 1977 sample unit. If this sample unit no longer existed or no longer was a separate housing unit, the disposition of the unit was determined; e.g., lost through means such as demolition, disaster, merger, or conversion to nonresidential use.

A more detailed description of the Survey design and sampling procedures can be found in appendix B.

PROCESSING PROCEDURES

The questionnaires used for the 1981 Annual Housing Survey were of the conventional type on which the interviewer

*Included with Group B for the first interview.

recorded the information by marking a precoded check box or by writing in the entries. Census clerks edited and coded the questionnaires. The information from the questionnaires was data keyed directly to magnetic tape which was processed on the Census Bureau's computers through a number of editing and tabulating steps. A facsimile of the questionnaire appears at the end of appendix A.

The 1977 characteristics of housing units removed from the inventory (losses) were obtained by matching those housing units to the 1977 Annual Housing Survey records. The 1977 data for the losses were then extracted from the 1977 Annual Housing Survey tapes. Data on losses are shown in part A of this report.

QUALIFICATIONS OF THE DATA

Since the estimates in this report are based on a sample, they may differ somewhat from the figures that would have been obtained from a complete census using the same questionnaires, instructions, and interviewers. Particular care should be exercised, therefore, in the interpretation of figures based on relatively small numbers of sample cases as well as small differences between figures. As in any survey work, the results are subject to errors of response and nonreporting and to sampling variability. For a further discussion of the accuracy of the data, see appendix B.

The concepts and definitions are essentially the same for those items which appear both in this report and in the 1970 census reports. The SMSA boundaries are the same as those in the 1970 census. For historical comparisons and boundary changes, refer to the census reports of 1960 and earlier.

In making comparisons between the 1981 survey and 1970 Census of Housing results, differences in the data may reflect such factors as the use of direct interview for 1981 contrasted with the extensive use of self-enumeration in 1970, the sample design, the estimation procedure used, the sampling variability of the estimates, and the processing procedures. See the section on comparability with 1970 Census of Housing data in appendix A for further discussion.

Statistics on income relate to the income of the family or primary individual. Therefore, no data are provided on household income; i.e., income of persons unrelated to the householder of the housing unit is excluded.

Statistics for some of the characteristics shown are based on restricted universes and, therefore, care should be exercised in relating the statistics for one characteristic to another. For example, value is restricted to owner-occupied, one-unit structures on less than 10 acres and no business on property. Therefore, the totals for owner-occupied units in the value universe do not agree with the totals for owner-occupied units for some of the other universes such as rooms or persons. In addition, data for some of the items are not comparable because of the different universes used. For example, the statistics on sewage disposal in parts B and F are limited to units occupied 3 months or longer, whereas decennial census data and data in parts A and D on sewage disposal are shown for all units, including units which were occupied less than 3 months.

The data in parts B and F are intended to serve as broad indicators of housing quality and not as precise measurements. A housing unit, for example, that is reported as having signs of a leaking roof or a breakdown or failure in plumbing facilities is not necessarily inadequate or poor housing. Conversely, a housing unit that is reported as not having such defects is not necessarily a house of good quality. The data presented for items such as neighborhood conditions and neighborhood services are based on the individual respondent's opinion of conditions in the neighborhood. The respondent's opinion may or may not reflect the actual situation. Furthermore, two respondents in the same neighborhood may view the same condition differently; for example, one respondent may indicate that the streets need repair while the other does not.

Care should be exercised in making comparisons between both the 1981 Annual Housing Survey national (Series H-150) and SMSA (Series H-170) and the 1970 and 1980 Censuses of Housing results. Differences in the data may reflect such factors as the use of direct interview in the Annual Housing Survey contrasted with the extensive use of self-enumeration in the censuses, the time periods during which the data were collected (possible seasonal effects), sample designs, estimation procedures used, sampling variability of the estimates, and the processing procedures.

Research shows that the national Annual Housing Survey and the 1980 Census of Housing produced significant differences for several key characteristics. For example, the April 1980 census had a homeownership rate for the United States of 64.4 percent; the October 1979 AHS national, 65.4 percent; and the October 1980 AHS national, 65.6 percent. The 1980 census showed that 18 percent of the housing units were in multiunit structures (5-or-more housing units); both the 1979 and 1980 surveys, 15 percent. In the 1980 census, 26 percent of the housing inventory was built since January 1970; the October 1979 AHS, 21 percent since March 1970; and the 1980 AHS, 23 percent since March 1970.

Data for these characteristics, as well as others, should be used with caution when making comparisons between the 1970 and 1980 Censuses of Housing results; and both the Annual Housing Survey national (Series H-150) and SMSA (Series H-170) results.

See the sections on "Comparability with the 1970 Census of Housing data," and "Comparability with the 1980 Census of Housing data," in appendix A for further discussions.

Care should be exercised in the interpretation of differences in the estimated counts of Spanish-origin households between the 1970 census and the Annual Housing Survey. Differences between the two sets of data may reflect factors such as: (1) The use of direct interview in the Annual Housing Survey contrasted with the extensive use of self-enumeration in the 1970 census; (2) differences in the Spanish-origin classifications utilized in the two enumerations; (3) the sampling variability of both the 1970 5-percent census sample estimates and the AHS sample estimates; and (4) the specific estimation and processing procedures used in the 1970 census and the Annual Housing Survey.

See appendix A for a more detailed discussion of the definitions and qualifications of all items in this report.

TABLES FOR MINORITY HOUSEHOLDS

All simple distribution tables for housing units with Black householder or householder of Spanish origin are shown except when that group consists of less than 25 sample cases. All cross-tabulations are shown except when the minority group consists of less than 75 sample cases.

For this SMSA, all tables for housing units with Black householder are shown except tables 11 and 13 of part D for "not in central city" and 12 and 14 to 20 of part D. These tables are not shown because the number of sample cases of Black recent mover households "in central city" is 30 and "not in central city" is 16.

All tables for householder of Spanish origin are suppressed. These tables are not shown because the number of sample cases of Spanish-origin households is 16.

ESTIMATES OF CHANGE, 1977 TO 1981

Results from the third survey conducted for the Pittsburgh, Pa., SMSA, as defined in 1970, indicate that the October 1981 estimate of total housing units is 881,300, a net gain of 44,800 housing units over the 1977 AHS estimate of 836,500.

The net increase of 44,800 housing units reflects 27,500 housing units added to the inventory through new construction, minus 21,100 housing units lost (removed from the inventory) through demolition, disaster, or other means, plus 38,400 unspecified housing units that entered the inventory.

Approximately 3 percent of the total housing stock in the Pittsburgh metropolitan area was constructed since the last survey in 1977. Most of the new construction in the metropolitan area occurred in the suburbs; the counties of Beaver, Washington, Westmoreland, and that portion of Alleghany County outside the central city. Approximately 25,700 housing units, or about 4 percent of all housing in these areas, were built since 1977, compared with 1,800 housing units, or about 1 percent of all housing in the city of Pittsburgh.

Offsetting these additions to the housing stock, 21,100 housing units were lost through demolition, disaster, or other means between 1977 and 1981. Within the metropolitan area, the proportion of the 1977 housing inventory which was lost during this 4-year period was 5 percent for the central city and 2 percent for the suburbs. Removals from the housing stock resulting through means other than demolition and disaster include housing units which were changed to nonresidential use; condemned because of violation of local ordinances or housing codes; some mergers resulting from combining two or more housing units into fewer units; and mobile homes, occupied in 1977 which were vacant at the time of the survey in 1981, etc. Certain losses, however, are not included in this 4-year measurement; i.e., housing units which existed as part of the housing stock during both surveys but which were lost for a time during the period between the surveys, and housing units which came into the inventory for the first time after the 1977 survey, which were classified as losses in the 1981 survey.

The net addition of 38,400 unspecified housing units between 1977 and 1981 is partially represented by a variety of additions not specifically measured by the survey. Examples of such additions are conversions from fewer units to more units, changes from nonresidential use or group quarters, housing units moved to site, and housing units returned to the inventory in 1981 that had been temporarily lost in 1977. Examples of this last category are 1981 housing units which, in 1977, were condemned for occupany because of violation of local ordinances or housing codes; vacant units damaged by fire, flood, or vandalism which had been rehabilitated in 1981; and mobile homes which were vacant in 1977 but were occupied as primary residences in 1981. It is estimated the 35 percent of the unspecified units are a reflection of these other additions.

Although no precise measures are available, it is estimated that the remaining unspecified units are made up of the following categories. About 5 percent of the unspecified units may reflect an underestimation of the 1977 inventory (the 1977 inventory may have significantly underestimated 1970 to 1977 other additions). In addition, the net addition of 38,400 unspecified units may be misstated by 20 percent simply due to sampling error. The remaining 40 percent of the unspecified units may be due to a variety of unknown nonsampling errors, including errors in the collection and processing procedures. The percentages stated above are estimates of possible error, but are not absolute measures of any individual errors. The 1981 AHS reflects the ratio estimation of the housing inventory to independent estimates which are consistent with the 1980 Census of Housing results. These ratio-estimation techniques were not available in 1977, which may offer partial explanation for the possible underestimation of the 1977 inventory.

Source of the 1981 Housing Inventory

Subject	Total	In central cities	Not in central cities
All housing units, October 1981	881,300	179,800	701,500
All housing units, October 1977	836,500	189,600	646,900
Change:			
Number	44,800	−9,800	54,600
Percent	5.4	−5.2	8.4
Housing units added by new construction	27,500	1,800	25,700
Housing units lost through demolition, disaster, or other means	21,100	8,800	12,300
Unspecified housing units	38,400	−2,800	41,200

General Housing Characteristics

[1]Income of families and primary individuals in 12 months preceding date of interview; see text.
[2]Limited to one-unit structures on less than 10 acres and no business on property.
[3]Includes principal and interest only.
[4]Sum of payments for real estate taxes, property insurance, utilities, fuel, water, garbage collection, and mortgage at time of interview.
[5]Components may not add to total because more than one improvement was made.
[6]Excludes one-unit structures on 10 acres or more.
[7]Excludes one-unit structures on 10 acres or more, housing units in public housing projects, housing units with government rent subsidies, and mobile homes or trailers in 1977 and 1974; includes units where the subsidized/nonsubsidized status was not reported.

Table A-3. Selected Housing Characteristics of New Construction Units: 1981

No cash rent	1 100	700	900	600
Median	144	95	80-	80-

[1]Income of families and primary individuals in 12 months preceding date of interview; see text.
[2]Limited to one-unit structures on less than 10 acres and no business on property.
[3]Includes principal and interest only.
[4]Sum of payments for real estate taxes, property insurance, utilities, fuel, water, garbage collection, and mortgage at time of interview.
[5]Components may not add to total because more than one improvement was made.
[6]Excludes one-unit structures on 10 acres or more.
[7]Excludes one-unit structures on 10 acres or more, housing units in public housing projects, housing units with government rent subsidies, and mobile homes or trailers in 1977 and 1974; includes units where the subsidized/nonsubsidized status was not reported.

[1]Income of families and primary individuals in 12 months preceding date of interview; see text.
[2]Limited to one-unit structures on less than 10 acres and no business on property.
[3]Includes principal and interest only.
[4]Sum of payments for real estate taxes, property insurance, utilities, fuel, water, garbage collection, and mortgage at time of interview.
[5]Components may not add to total because more than one improvement was made.
[6]Excludes one-unit structures on 10 acres or more.
[7]Excludes one-unit structures on 10 acres or more, housing units in public housing projects, housing units with government rent subsidies, and mobile homes or trailers in 1977 and 1974; includes units where the subsidized/nonsubsidized status was not reported.

Table C-1. Characteristics of the Housing Inventory: 1981, 1977, 1974, and 1970

[1]Income of families and primary individuals in 12 months preceding date of interview; see text.
[2]Limited to one-unit structures on less than 10 acres and no business on property.
[3]Includes principal and interest only.
[4]Sum of payments for real estate taxes, property insurance, utilities, fuel, water, garbage collection, and mortgage at time of interview.
[5]Components may not add to total because more than one improvement was made.
[6]Excludes one-unit structures on 10 acres or more.
[7]Excludes one-unit structures on 10 acres or more, housing units in public housing projects, housing units with government rent subsidies, and mobile homes or trailers in 1977 and 1974; includes units where the subsidized/nonsubsidized status was not reported.

[1]Limited to one-unit structures on less than 10 acres and no business on property.
[2]Includes principal and interest only.
[3]Sum of payments for real estate taxes, property insurance, utilities, fuel, water, garbage collection, and mortgage at time of interview.
[4]Components may not add to total because more than one improvement was made.

Table A-3. Gross Rent of Renter-Occupied Housing Units: 1981

[Data based on sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Characteristics	Total	Less than $100	$100 to $149	$150 to $199	$200 to $249	$250 to $299	$300 to $349	$350 to $399	$400 to $499	$500 or more	No cash rent	Median (dollars)

[1]Limited to one-unit structures on less than 10 acres and no business on property.
[2]Includes principal and interest only.
[3]Sum of payments for real estate taxes, property insurance, utilities, fuel, water, garbage collection, and mortgage at time of interview.
[4]Components may not add to total because more than one improvement was made.

Table B-3. Gross Rent of Renter-Occupied Housing Units: 1981

[1]Limited to breakdowns lasting 6 consecutive hours or longer.
[2]Must have occurred during the last 3 months.
[3]Figures may not add to total because more than one type of additional heating equipment could be reported for the same housing unit.
[4]Excludes room heaters without flue or vent, fireplaces, stoves, and portable heaters.

Table A-4. Income of Families and Primary Individuals by Selected Neighborhood Characteristics: 1981

[Data based on sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Characteristics	Total	Less than $3,000	$3,000 to $6,999	$7,000 to $9,999	$10,000 to $14,999	$15,000 to $19,999	$20,000 to $24,999	$25,000 to $34,999	$35,000 to $49,999	$50,000 to $74,999	$75,000 or more	Median (dollars)

[1]Limited to one-unit structures on less than 10 acres and no business on property.
[2]Limited to breakdowns lasting 6 consecutive hours or longer.
[3]Must have occurred during the last 3 months.
[4]Figures may not add to total because more than one type of additional heating equipment could be reported for the same housing unit.
[5]Excludes room heaters without flue or vent, fireplaces, stoves, and portable heaters.

Table A-8. Value of Owner-Occupied Housing Units by Selected Neighborhood Characteristics: 1981

3 rooms or more	3 400	500	900	500	700	200	-	200	-	-	400	...
Not reported	200	-	-	-	-	-	-	200	-	-	-	...
Lacking specified heating equipment or none	1 700	-	500	500	200	-	-	-	-	-	500	...

[1]Excludes one-unit structures on 10 acres or more.
[2]Limited to breakdowns lasting 6 consecutive hours or longer.
[3]Must have occurred during the last 3 months.
[4]Figures may not add to total because more than one type of additional heating equipment could be reported for the same housing unit.
[5]Excludes room heaters without flue or vent, fireplaces, stoves, and portable heaters.

[1]Limited to breakdowns lasting 6 consecutive hours or longer.
[2]Must have occurred during the last 3 months.
[3]Figures may not add to total because more than one type of additional heating equipment could be reported for the same housing unit.
[4]Excludes room heaters without flue or vent, fireplaces, stoves, and portable heaters.

Table A-16. Income of Families and Primary Individuals by Selected Neighborhood Characteristics for Housing Units With Black Householder: 1981

[1]Excludes one-unit structures on 10 acres or more.
[2]Limited to breakdowns lasting 6 consecutive hours or longer.
[3]Must have occurred during the last 3 months.
[4]Figures may not add to total because more than one type of additional heating equipment could be reported for the same housing unit.
[5]Excludes room heaters without flue or vent, fireplaces, stoves, and portable heaters.

[1]Limited to breakdowns lasting 6 consecutive hours or longer.
[2]Must have occurred during the last 3 months.
[3]Figures may not add to total because more than one type of additional heating equipment could be reported for the same housing unit.
[4]Excludes room heaters without flue or vent, fireplaces, stoves, and portable heaters.

[1]Limited to breakdowns lasting 6 consecutive hours or longer.
[2]Must have occurred during the last 3 months.
[3]Figures may not add to total because more than one type of additional heating equipment could be reported for the same housing unit.
[4]Excludes room heaters without flue or vent, fireplaces, stoves, and portable heaters.

Table B-16. Income of Families and Primary Individuals by Selected Neighborhood Characteristics for Housing Units With Black Householder: 1981

[1]Limited to one-unit structures on less than 10 acres and no business on property.
[2]Limited to breakdowns lasting 6 consecutive hours or longer.
[3]Must have occurred during the last 3 months.
[4]Figures may not add to total because more than one type of additional heating equipment could be reported for the same housing unit.
[5]Excludes room heaters without flue or vent, fireplaces, stoves, and portable heaters.

[1]Limited to breakdowns lasting 6 consecutive hours or longer.
[2]Must have occurred during the last 3 months.
[3]Figures may not add to total because more than one type of additional heating equipment could be reported for the same housing unit.
[4]Excludes room heaters without flue or vent, fireplaces, stoves, and portable heaters.

Table C-4. Income of Families and Primary Individuals by Selected Neighborhood Characteristics: 1981

[1]Limited to one-unit structures on less than 10 acres and no business on property.
[2]Limited to breakdowns lasting 6 consecutive hours or longer.
[3]Must have occurred during the last 3 months.
[4]Figures may not add to total because more than one type of additional heating equipment could be reported for the same housing unit.
[5]Excludes room heaters without flue or vent, fireplaces, stoves, and portable heaters.

Table C-8. Value of Owner-Occupied Housing Units by Selected Neighborhood Characteristics: 1981

[Data based on sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Characteristics	Total	Less than $10,000	$10,000 to $19,999	$20,000 to $29,999	$30,000 to $39,999	$40,000 to $49,999	$50,000 to $59,999	$60,000 to $74,999	$75,000 to $99,999	$100,000 to $199,999	$200,000 or more	Median (dollars)

Lacking specified heating equipment or none	700	-	500	200	-	-	-	-	-	-	-	...

[1]Excludes one-unit structures on 10 acres or more.
[2]Limited to breakdowns lasting 6 consecutive hours or longer.
[3]Must have occurred during the last 3 months.
[4]Figures may not add to total because more than one type of additional heating equipment could be reported for the same housing unit.
[5]Excludes room heaters without flue or vent, fireplaces, stoves, and portable heaters.

[1]Limited to breakdowns lasting 6 consecutive hours or longer.
[2]Must have occurred during the last 3 months.
[3]Figures may not add to total because more than one type of additional heating equipment could be reported for the same housing unit.
[4]Excludes room heaters without flue or vent, fireplaces, stoves, and portable heaters.

[1]Limited to one-unit structures on less than 10 acres and no business on property.
[2]Limited to breakdowns lasting 6 consecutive hours or longer.
[3]Must have occurred during the last 3 months.
[4]Figures may not add to total because more than one type of additional heating equipment could be reported for the same housing unit.
[5]Excludes room heaters without flue or vent, fireplaces, stoves, and portable heaters.

Table C-20. Value of Owner-Occupied Housing Units by Selected Neighborhood Characteristics for Housing Units With Black Householder: 1981

[Data based on sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Characteristics	Total	Less than $10,000	$10,000 to $19,999	$20,000 to $29,999	$30,000 to $39,999	$40,000 to $49,999	$50,000 to $59,999	$60,000 to $74,999	$75,000 to $99,999	$100,000 to $199,999	$200,000 or more	Median (dollars)

Lacking specified heating equipment or none	200	–	200	–	–	–	–	–	–	–	–	...

[1]Excludes one-unit structures on 10 acres or more.
[2]Limited to breakdowns lasting 6 consecutive hours or longer.
[3]Must have occurred during the last 3 months.
[4]Figures may not add to total because more than one type of additional heating equipment could be reported for the same housing unit.
[5]Excludes room heaters without flue or vent, fireplaces, stoves, and portable heaters.

FACSIMILE OF THE ANNUAL HOUSING SURVEY QUESTIONNAIRE: 1981 . . . . . App-20

AREA CLASSIFICATIONS

Counties—The primary divisions of most of the States are termed counties; in Louisiana, the corresponding areas are termed parishes. Alaska has no counties; in this State, areas designated as census divisions have been defined for general statistical purposes by the State in cooperation with the Census Bureau and are treated as county equivalents. Four States (Maryland, Missouri, Nevada, and Virginia) contain one or more cities that are independent of any county; for statistical purposes these independent cities are treated as county equivalents.

Standard metropolitan statistical areas—The definitions of standard metropolitan statistical areas (SMSA's) used in the Annual Housing Survey correspond to the 243 SMSA's used in the 1970 census. These include the 228 SMSA's as defined and named in the Bureau of the Budget publication, *Standard Metropolitan Statistical Areas: 1967,* U.S. Government Printing Office, Washington, D.C. 20402. After 1967, 15 SMSA's were added, of which 2 were defined in January 1968, and an additional 13 were defined in February 1971 as a result of the 1970 census. Changes in SMSA definition criteria, boundaries, and titles made after February 1971 are not reflected in this series of reports. SMSA's are defined by the Office of Management and Budget (formerly Bureau of the Budget).

Except in the New England States, an SMSA is a county or group of contiguous counties which contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are socially and economically integrated with the central city. In the New England States, SMSA's consist of towns and cities instead of counties. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities. For a detailed description of the criteria used in defining SMSA's, see the Bureau of the Budget publication cited in the preceding paragraph.

In this report, figures for "in central cities" refer to all housing units within the legal city boundaries.

DEFINITIONS AND EXPLANATIONS OF SUBJECT CHARACTERISTICS

General

As stated in the introduction, the 1981 Annual Housing Survey was conducted by personal interview. The survey interviewers were instructed to read the questions directly from the questionnaire. The definitions and explanations given for each subject are, to a considerable extent, drawn from various technical and procedural materials used in the collection of the data. This material helped the field interviewers to understand more fully the intent of each question and thus to resolve problems or unusual cases. Additional explanatory information has been added to this portion of the text to assist the user in understanding the statistics.

Comparability with 1974 and 1977 SMSA Annual Housing Survey data—Most of the concepts and definitions used in the 1974, 1977, and 1981 reports are essentially the same. However, there are some differences in the measurement of losses. In the 1974 report, losses are measured from 1970, while in the 1981 report, losses are measured from 1977. In the 1977 report, losses are measured from 1974. Also, in 1974, housing units in nonpermit-issuing areas (mainly rural areas) were counted as losses only when the whole structure in which the unit was located was lost from the inventory. In the 1981 and 1977 reports, the data refer to losses of individual housing units regardless of whether the entire structure was lost from the inventory. The source of the data for lost units in the 1974 reports is the 1970 Census of Housing; the source of the data for lost units in the 1977 and 1981 reports are the 1974 and 1977 Annual Housing Surveys.

Additional differences, if any, are discussed under the particular subject. Because of the relatively small sample size, particular care should be taken in making comparisons between the three surveys, especially where there are small differences between the figures (see appendix B).

Comparability with 1970 Census of Housing data—The concepts and definitions are essentially the same for items that appear in both the 1970 census and the 1981 survey reports.

There is a major difference, however, in the time period of the recent mover classification. In the Annual Housing Survey, recent movers are households that moved into their unit during the 12 months prior to the interview, a time period of 1 year or less. In the 1970 Census of Housing reports, different time periods were used. In Volume II, *Metropolitan Housing Characteristics,* the shortest time period for "year moved into unit," is 1969 to March 1970 (1¼ years); in Volume IV, *Components of Inventory Change,* the time period is 1969 to December 1970 (approximately 2 years); and in Volume VII, No. 5, *Mover Households,* the time period is April 1965 to March 1970 (approximately 5 years). Volume IV is the only 1970 census

report which shows cross-tabulations of data on characteristics of present units by characteristics of previous units for recent movers.

Other definitional differences, if any, are discussed under the particular subject. Additional differences between the 1981 Annual Housing Survey data and the 1970 census data may be attributed to several factors. These include the extensive use of self-enumeration in the census in contrast to personal interview in the Annual Housing Survey; differences in processing procedures; the estimation procedures and sample designs; the sampling variability of the estimates from the Annual Housing Survey; to a smaller extent, the sampling variability associated with the sample data from the census; the nonsampling errors associated with the Annual Housing Survey estimates; and the nonsampling errors associated with the census data.

Statistics on counts and characteristics of changes in the housing inventory between the 1960 and 1970 censuses are given for the United States and for 15 selected SMSA's in the 1970 Census of Housing, Volume IV, *Components of Inventory Change.* In volume IV, the data are based on information for a sample of housing units enumerated in late 1970 as part of the 1970 census. Data are provided for such components of change between 1960 and 1970 as new construction, conversions, other additions, demolitions, mergers, other losses, and housing units that were the same in 1960 and in 1970.

In part A of this report, some of the data for components of inventory change are shown, i.e., new construction and housing unit losses (units removed from the inventory) through demolition, disaster, or some other means. The 1981 data on new construction were obtained primarily from a sample of units selected from building permits. The 1970 *Components of Inventory Change* data were obtained from the 1970 census tabulations of the year structure built item; i.e., housing units built in 1960 or later were classified as added by new construction.

Data as of 1970 for mortgage insurance, real estate taxes last year, selected monthly housing costs, and acquisition of property are presented in the 1970 Census of Housing, Volume V, *Residential Finance.* In volume V, the data are based on information collected for a sample of housing units in the Residential Finance Survey which was conducted in 1971 as part of the 1970 census. The 1971 report provided data on the financing of homeowner and rental properties, including characteristics of the mortgages, properties, and homeowners.

Differences in the concepts and definitions between the data in this report and volume V include the following. The basic unit of tabulation in this report is the housing unit; in volume V, it is the property. Data on mortgage insurance are based on the occupant's answer; in volume V, mortgage insurance was verified by the lender. In this report, real estate taxes and selected monthly housing costs reflect the total amount of real estate taxes and housing costs, excluding special assessments. In volume V, real estate taxes and selected monthly housing costs *include* special assessments.

Comparability with 1980 Census of Housing data–Most of the concepts and definitions are the same for items that appear in both the 1980 census and the 1981 Annual Housing Survey (AHS).

There are two significant differences, however, in the housing unit definition. First, in the 1981 AHS, the housing unit definition requires a unit to be separate living quarters, having either direct access or complete kitchen facilities. For the 1980 census, the complete kitchen facilities alternative was dropped with direct access required of all units. Second, in the 1980 census, vacant mobile homes are included in the housing inventory provided they are intended for occupancy on the site where they stand. In the 1981 AHS, all vacant mobile homes are excluded from the housing inventory.

There are several other major differences between the 1980 census and the 1981 AHS. In the 1981 AHS, living arrangements containing five or more persons, not related to the person in charge, were classified as group quarters. In the 1980 census, the requirement was raised to nine or more persons not related to the person in charge.

Owner-occupied cooperatives were identified in the 1981 AHS. These units were not identified separately in the 1980 census, but were included in the overall count of owner-occupied units. The 1980 census will provide data on vacant-for-rent and renter-occupied condominium units.

In addition, in the 1981 AHS, complete plumbing facilities and telephone available need only to be located in the structure in which the housing unit is located. In the 1980 census, these items must be inside the specific housing unit. Other definitional differences are discussed under the particular subject.

Additional differences between the 1981 Annual Housing Survey data and the 1980 census data may be attributed to several factors. These include the extensive use of self-enumeration in the census in contrast to direct interview in the AHS; differences in processing procedures; the estimation procedures and sample designs; the sampling variability of the estimates from the AHS; to a smaller extent, the sampling variability associated with the sample data from the census; the nonsampling errors associated with the AHS estimates; and the nonsampling errors associated with the census data.

Comparability with 1970 and 1980 Censuses of Population data–In the 1970 and 1980 censuses, data for years of school completed were based on responses to two questions: the highest grade or year of regular school each household member attended, and whether or not that grade or year was completed. In the 1981 AHS, data for years of school completed were based on responses to a single question; the highest grade or year of regular school completed by the householder. Therefore, the 1981 AHS may overstate the education level of the householder; that is, respondents may have reported the grade or year the householder was currently enrolled in or had last been enrolled in whether or not the grade or year was completed.

Comparability with Current Construction Reports from the Survey of Construction–The Census Bureau issues several publications under the general title, "Current Construction Reports." The data for these reports are primarily from the Survey of Construction.

The Survey of Construction consists of approximately 14,000 permit-issuing places throughout the United States. The reports from the survey contain current data on housing starts and completions, construction authorized by building permits, housing units authorized for demolition in permit-issuing places for selected areas, new one-unit structures sold and for sale, characteristics of new housing, and value of new construction put in place. The concepts and definitions used in this report differ from some of those used in the Survey of Construction. The major difference is that the Survey of Construction shows counts and characteristics of housing units in various stages of construction through completion. The Annual Housing Survey shows counts and characteristics of the existing housing inventory. Additional differences between the 1981 Annual Housing Survey and the Survey of Construction may be attributed to factors such as the sampling variability and nonsampling errors of the data from the two surveys, survey procedures and techniques, and processing procedures.

Comparability with other Bureau of the Census data—Statistics in this report refer, for the most part, to the housing unit, household, or householder. Data on the individual household members such as "Population in housing units" and "Own children under 18 years old" may differ from other similar data compiled by the Bureau of the Census. For these types of data, write to Chief, Population Division, Bureau of the Census, Washington, D.C. 20233.

Comparability with housing vacancy surveys—There may be differences between this survey and Federal, State, local, and other surveys which present vacancy rates. The differences may be attributed to such factors as differing interview periods, survey designs, survey techniques, and processing procedures, as well as differences in concepts and definitions. In addition, there are sampling and nonsampling errors.

Living Quarters

Living quarters are classified as either housing units or group quarters. Usually, living quarters are in structures intended for residential use (e.g., a one-unit structure, apartment house, hotel or motel, boarding house, or mobile home or trailer). Living quarters may also be in structures intended for nonresidential use (e.g., the rooms in a warehouse where a watchman lives), as well as in places such as tents, caves, and old railroad cars.

Housing units—A housing unit is a house, an apartment, a group of rooms, or a single room occupied or intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants do not live and eat with any other persons in the structure and which have either (1) direct access from the outside of the building or through a common hall which is used or intended to be used by the occupants of another unit or by the general public or (2) complete kitchen facilities for the exclusive use of the occupants. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except as described in the section on group quarters). For vacant units, the criteria of separateness, direct access, and complete kitchen facilities for exclusive use are applied to the intended occupants whenever possible. If the information cannot be obtained, the criteria are applied to the previous occupants. Both occupied and vacant housing units are included in the housing inventory, except that mobile homes, trailers, tents, caves, boats, railroad cars, and the like, are included only if they are occupied.

Group quarters—Group quarters are living arrangements for institutional inmates or for other groups containing five or more persons not related to the person in charge. Group quarters are located most frequently in institutions, boarding houses, military barracks, college dormitories, fraternity and sorority houses, hospitals, monasteries, convents, and ships. A house or apartment is considered group quarters if it is shared by the person in charge and five or more persons unrelated or, if there is no person in charge, by six or more unrelated persons. Information on the housing characteristics of group quarters was not collected.

Mobile homes, trailers, hotels, rooming houses, etc.—Mobile homes or trailers, tents, boats, or railroad cars are not considered housing units if vacant, used only for business, or used only for vacations.

Occupied rooms or suites of rooms in hotels, motels, and similar places are classified as housing units only when occupied by permanent residents; i.e., persons who consider the hotel as their usual place of residence or have no usual place of residence elsewhere. Vacant rooms or suites of rooms are classified as housing units only in those hotels, motels, and similar places in which 75 percent or more of the accommodations are occupied by permanent residents.

If any of the occupants in a rooming or boarding house live and eat separately from everyone else in the building and have either direct access or complete kitchen facilities for exclusive use, their quarters are classified as separate housing units. The remaining quarters are combined. If the combined quarters contain four or fewer roomers unrelated to the householder, they are classified as one housing unit; if the combined quarters contain five or more roomers unrelated to the householder or person in charge, they are classified as group quarters. In a dormitory, residence hall, or similar place, living quarters of the supervisory staff and other employees are separate housing units if they satisfy the housing unit criteria; other living quarters are considered group quarters.

Institutions—Living quarters of staff personnel are separate housing units if they satisfy the housing unit criteria. Other living quarters are considered group quarters.

Year-round housing units—Data on housing characteristics are limited to year-round housing units, i.e., all occupied units plus vacant units which are intended for year-round use. Vacant units intended for seasonal occupancy and vacant units held for migratory labor are excluded because it is difficult to obtain

reliable information for them. However, this report does present counts of the total housing inventory which includes all vacant seasonal and vacant migratory housing units.

Changes in the Housing Inventory

Housing units added by new construction—Conventional (nonmobile home or trailer) housing units which were not in existence at the time of the 1977 survey are classifed as new construction units. Mobile homes and trailers are considered as new construction if the model year is 1978 or later. Information was collected on vacant units under construction at the time of interview only if construction had proceeded to a point that all exterior windows and doors were installed and final usable floors were in place. Housing units built since the 1977 survey but removed from the inventory before the time of interview are not reflected in the new construction counts.

In the 1977 survey, a housing unit built since the 1974 survey was classified as a unit added by new construction. In the Annual Housing Survey, data on new construction were obtained primarily from a sample of units selected from building permits; in the 1970 Census of Housing, Volume IV, *Components of Inventory Change,* new construction data were obtained from the 1970 sample records of units built in 1960 or later.

Housing units lost from the inventory—In table 4 of part A of this report, characteristics are presented for all housing units removed from the inventory through demolition or disaster and through other means.

Housing units lost through demolition or disaster—A housing unit which existed during the 1977 survey period and was torn down on the initiative of a public agency or as a result of action on the part of the owner is classified as a unit lost through demolition. Housing units destroyed by fire, flood, or other natural causes are classified as units lost through disaster.

In the 1970 Census of Housing, Volume IV, *Components of Inventory Change,* the data on losses refer to all housing unit losses, including losses of units in structures which still contained one or more housing units. In addition, units lost through disaster were counted, in 1970, as units lost through other means.

Housing units lost through other means—Any housing unit which existed during the 1977 survey period is counted as lost through other means when it is lost from the housing inventory through means other than demolition or disaster. This component includes the following types of losses:

1. Housing units lost by change to group quarters; for example, a housing unit that was occupied by a family in 1970 and by a family and five lodgers at the time of the interview.
2. Housing units lost from the inventory because they are vacant and either the roof, walls, doors, or windows no longer protect the interior from the elements or the unit is severely damaged by fire.
3. Vacant housing units lost from the inventory because there is positive evidence (sign, notice, mark on the house or block) that the units are scheduled for demolition or rehabilitation or that they are condemned for reasons of health or safety so that further occupancy is prohibited.
4. Housing units lost by change to entirely nonresidential use.
5. Housing units moved from site since the 1977 survey. Such moves in the same area do not necessarily result in a net loss from the total inventory since they presumably represent units added in the place to which they were moved.

In the 1970 Census of Housing, Volume IV, *Components of Inventory Change,* housing units lost through disaster (fire, flood, or other such causes) were counted in 1970 as units lost through other means.

Unspecified housing units—There are other components of change in the housing inventory for which the Annual Housing Survey provides no specific measures. The survey procedures do not include a measure of conversions and mergers and units added from other sources such as nonresidential structures. The net effect of these omissions on the change in the total housing inventory is not known.

Housing units changed by conversion—Conversion refers to the creation of two or more housing units out of a smaller number of housing units through structural alteration or change in use. Structural alteration includes such changes as adding a room or installing partitions to form another housing unit. Change in use is a simple rearrangement in the use of space without structural alteration, such as locking a door which closes off one or more rooms to form a separate housing unit.

Housing units changed by merger—A merger is the result of combining two or more housing units to form a smaller number of housing units through structural alteration or change in use. Structural alteration includes such changes as the removal of partitions or dismantling of kitchen facilities. Change in use may result from a simple rearrangement of space without structural alteration, such as unlocking a door which formerly separated two housing units. A change in use also occurs, for example, when a family occupies both floors of a house which formerly contained a separate housing unit on each floor.

Housing units added through other sources—Any housing unit added to the inventory through sources other than new construction or conversion is classified as a unit added through other sources. This component of inventory change includes housing units created from living quarters previously classified as group quarters and units created from nonresidential space such as a store, garage, or barn. Also included are housing units built at one site and moved to another. Such housing units, if moved within the same area, do not necessarily result in a net addition to the total inventory, since they presumably represent units lost in the place from

which they were moved. A previously vacant mobile home or trailer, whether on a different site or the same site, is a net addition if currently occupied as a housing unit.

These unspecified housing units are *not* identified in the survey.

Occupancy and Vacancy Characteristics

Occupied housing units—A housing unit is classified as occupied if a person or group of persons is living in it at the time of the interview or if the occupants are only temporarily absent—for example, on vacation. However, if the unit was occupied entirely by persons with a usual place of residence elsewhere, the unit is classified as vacant. By definition, the count of occupied housing units is the same as the count of households.

Population in housing units—Population in housing units is the total population excluding those persons in group quarters and those persons occupying housing units but whose usual residence is elsewhere.

Race—The classification of "race" refers to the race of the householder occupying the housing unit. The concept of race as used by the Census Bureau does not denote clear-cut scientific definitions of biological stock. The interviewer was to report the race of the householder in three categories: White, Black (Negro), and other. The last category includes American Indian, Chinese, Eskimo, Japanese, Korean, and any other race except White and Black. Figures on tenure are given separately for White and Black householders; housing units with householders of other races are included in the total in table 1 of part A and may be derived by subtracting the sum of White and Black from the total. More detailed characteristics of units with Black householders are presented in separate tables. The classification of race in the Annual Housing Survey was made by the interviewer's own observation. The 1970 data on race was based on self-classification by respondents.

Spanish origin—The classification "Spanish origin" refers to the origin of the householder occupying the housing unit. Detailed characteristics of housing units with householder of Spanish origin are presented in separate tables. Spanish origin was determined on the basis of a question that asked for self-identification of a person's origin or descent. Respondents were asked to select their origins from a flash card. Persons of Spanish origin were those who indicated that their origin was either Mexican-American, Chicano, Mexican, Mexicano, Puerto Rican, Cuban, Central or South American, or other Spanish. Persons of Spanish origin may be of any race.

In the 1970 and 1980 censuses, and current surveys' reports, Spanish persons are identified according to various criteria: Birthplace, birthplace of parents, language, surname, and origin or descent. For this reason, care should be taken in making comparisons of Spanish-origin estimates from the Annual Housing Survey and other surveys.

Tenure—A housing unit is owner occupied if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. A cooperative or condominium unit is owner occupied only if the owner or co-owner lives in it. All other occupied housing units are classified as renter occupied, including housing units rented for cash rent and those occupied without payment of cash rent.

Previous occupancy—The classification of previous occupancy is divided into two categories: "previously occupied" and "not previously occupied." Previously occupied indicates that some person or persons *not* related to the householder by blood, marriage, or adoption occupied the housing unit prior to the householder or other related household member's occupancy. Not previously occupied indicates that either the householder or some other current household member related to the householder by blood, marriage, or adoption was the *first* occupant of the housing unit.

Cooperatives and condominiums—A cooperative is a type of ownership whereby a group of housing units are owned by a corporation of member-owners. Each individual member is entitled to occupy an individual housing unit and is a shareholder in the corporation which owns the property.

A condominium is a type of ownership that enables a person to own an apartment or house in a project of similarly owned units. The owner has the deed and very likely the mortgage on the unit occupied. The owner may also hold common or joint ownership in some or all common areas such as grounds, hallways, entrances, elevators, etc.

Cooperative or condominium ownership may apply to various types of structures including single-family houses, rowhouses, townhouses, etc., as well as apartment units.

Duration of occupancy—Data on duration of occupancy are based on information for the householder; the data refer to the period when present occupancy began. Statistics are shown on whether the householder lived in the housing unit less than 3 months or 3 months or longer. To qualify as having lived here last winter, the householder must have moved into the unit prior to February 1981.

Year householder moved into unit—The data are based on the information reported for the householder and refer to the year of latest move. Thus, if the householder moved back into a housing unit previously occupied, the year of the latest move was to be reported; if the householder moved from one apartment to another in the same building, the year the householder moved into the present unit was to be reported. The intent is to establish the year the present occupancy by the householder began. The year the householder moves is not necessarily the same year other members of the household move; although, in the great majority of cases, the entire household moves at the same time.

Vacant housing units—A housing unit is vacant if no one is living in it at the time of the interview, unless its occupants

are only temporarily absent. In addition, a vacant housing unit may be one which is occupied entirely by persons who have a usual residence elsewhere.

New housing units not yet occupied are classified as vacant housing units if construction has reached a point where all exterior windows and doors are installed and final usable floors are in place. Vacant units are excluded if unfit for human habitation; that is, if the roof, walls, windows, or doors no longer protect the interior from the elements, or if there is positive evidence (such as a sign on the house or block) that the unit is to be demolished or is condemned. Also excluded are quarters being used entirely for nonresidential purposes, such as a store or an office; or quarters used for storing business supplies or inventory, machinery, or agricultural products.

Vacancy status—Vacant housing units are classified as either "seasonal and migratory" or "year-round." Seasonal housing units are intended for occupancy during only certain seasons of the year. Included are housing units intended for recreational use, such as beach cottages and hunting cabins, and vacant units held for herders and loggers. Migratory units are vacant units held for occupancy by migratory labor employed in farm work during the crop season.

Year-round vacant housing units are available or intended for occupancy at any time of the year. A housing unit in a resort area which is usually occupied on a year-round basis is considered year-round. A housing unit used only occasionally throughout the year is also considered year-round. Year-round vacant housing units are subdivided as follows:

For sale only—Vacant year-round units "for sale only" also include vacant units in a cooperative or condominium building if the individual units are offered for sale only.

For rent—Vacant year-round units "for rent" also include vacant units offered either for rent or for sale.

Rented or sold, not occupied—If any money rent has been paid or agreed upon, but the new renter has not moved in as of the date of the interview, or if the unit has recently been sold, but the new owner has not yet moved in, the year-round vacant unit is classified as "rented or sold, not occupied."

Held for occasional use—This category consists of vacant year-round units which are held for weekend or other occasional use throughout the year. The intent of this question is to identify homes reserved by their owners as second homes. Because of the difficulty of distinguishing between this category and seasonal vacancies, it is possible that some second homes are classified as seasonal and vice versa.

Temporarily occupied by persons with usual residence elsewhere (URE)—If all the persons in a housing unit usually live elsewhere, that unit is classified as vacant, provided the usual place of residence is held for the household and is not offered for rent or for sale. For example, a beach cottage occupied at the time of the interview by a family which has a usual place of residence in the city is included in the count of vacant units. If the house in the city was in the survey sample, the house would be reported "occupied" and would be included in the count of occupied units, since the occupants are only temporarily absent.

Held for other reasons—If a vacant year-round unit does not fall into any of the classifications specified, it is classified as "held for other reasons." For example, this category includes units held for settlement of an estate, units held for occupancy by a caretaker or janitor, and units held for personal reasons of the owner.

In part A, the "other vacant" category includes all housing units temporarily occupied by persons with usual residence elsewhere and units held for other reasons.

Characteristics of vacant housing are limited to year-round vacant units. Vacant units intended for seasonal occupancy and vacant units held for migratory labor are excluded because it is difficult to obtain reliable information for them. However, counts of seasonal units are given in part A.

Duration of vacancy—The statistics on duration of vacancy refer to the length of time (in months) from the date the last occupants moved from the housing unit to the date of the interview. The data, therefore, do not provide a direct measure of the total length of time that units remain vacant. For newly constructed units which have never been occupied, the duration of vacancy is counted from the date construction was completed. For recently converted or merged units, the time is reported from the date that conversion or merger was completed. Housing units occupied entirely by persons with usual place of residence elsewhere are excluded from the data.

Homeowner vacancy rate—The homeowner vacancy rate is the number of year-round units for sale as a percent of the total homeowner inventory; i.e., all owner-occupied housing units and year-round vacant housing units for sale or sold, not occupied.

Rental vacancy rate—The rental vacancy rate is the number of year-round vacant units for rent as a percent of the total rental inventory; i.e., all renter-occupied housing units and all year-round vacant housing units for rent or rented, not occupied.

Housing Units Occupied by Recent Movers

Recent movers—Households that moved into their present housing units within 12 months prior to the date of the interview are termed "recent movers." The household is classified by year moved into unit on the basis of information reported for the householder.

Present and previous units of recent movers—The present unit is the housing unit occupied by the recent mover at the time of the interview. The previous unit is the housing unit from which that person moved. If the household moved more than once during the 12 months prior to the date of the interview, the previous unit is the one from which the household last moved.

Same or different householder—Characteristics of the present and previous units occupied by recent movers are largely restricted to households that were essentially the same in the two units. The definitions of the characteristics for the previous unit are generally the same as those for the present unit.

A household for which the householder in the present housing unit is the same person as the householder in the previous housing unit (identified in the table as "same householder") is considered essentially the same even though there may have been some changes in the composition of the household. Conversely, a household in which there was no change except for a new householder was considered with "different householder."

Main reason for move from previous residence—The statistics presented are restricted to housing units occupied by recent movers in which the present householder was also the householder at the previously occupied unit. The classification categories refer to the principal reason the householder moved from the previous residence. The category "job related reasons" refers to reasons such as job transfer, entered or left U.S. Armed Forces, retirement, new job or looking for work, commuting reasons, school attendance, and other job related reasons.

The category "family status" refers to reasons such as needed larger house or apartment, widowed, separated, divorced, moved to be closer to relatives, newly married, family increased in size, family decreased in size, wanted to establish own household, schools, and other family related reasons.

The category "housing needs" refers to reasons such as wanted to own residence, neighborhood overcrowded, change in racial or ethnic composition of neighborhood, wanted better neighborhood, lower rent or less expensive house, wanted better house, displaced by urban renewal, highway construction, or other public activity, displaced by private action, wanted to rent residence, wanted residence with more conveniences, and occurrence of natural disaster.

The category "other reasons" includes wanted a change of climate and any other reasons for moving which do not fall into the above classifications.

Homeownership—Data are shown for householders who, during the 12 months prior to interview, moved into their housing unit. These data are restricted to owner-occupied housing units and show the number of previously owned units which the householder occupied as his/her usual place of residence. Excluded from the count of previously owned units are vacation homes purchased for rental or commercial purposes.

Utilization Characteristics

Persons—All persons occupying the housing unit are counted. These persons include not only occupants related to the householder but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters of the householder. The data on persons show categories of the number of one-person through seven-or-more-person households by the number of housing units.

A person is counted at the usual place of residence for that person. This refers to the place where the person lives and sleeps most of the time. This place is not necessarily the same as a legal residence, voting residence, or domicile.

Rooms—The statistics on rooms are for the number of housing units with a specified number of rooms. Rooms counted include whole rooms used for living purposes, such as living rooms, dining rooms, kitchens, finished attic or basement rooms, recreation rooms, permanently enclosed porches that are suitable for year-round use, and lodgers' rooms. Also included are rooms used for offices by a person living in the unit.

A partially divided room, such as a dinette next to a kitchen or living room, is a separate room only if there is a partition from floor to ceiling, but not if the partition consists only of shelves or cabinets.

Not included in the count of rooms are bathrooms, halls, foyers or vestibules, balconies, closets, alcoves, pantries, strip or pullman kitchens, laundry or furnace rooms, unfinished attics or basements, other unfinished space used for storage, open porches, trailers used only as bedrooms, and offices used only by persons not living in the unit.

If a room is used by occupants of more than one housing unit, the room is included with the unit from which it is most easily reached.

Persons per room—Persons per room is computed for each occupied housing unit by dividing the number of persons in the unit by the number of rooms in the unit. The figures shown refer, therefore, to the number of housing units having the specified ratio of persons per room.

Bedrooms—The number of bedrooms in the housing unit is the count of rooms used mainly for sleeping, even if also used for other purposes. Rooms reserved for sleeping, such as guest rooms, even though used infrequently, are counted as bedrooms. On the other hand, rooms used mainly for other purposes, even though used also for sleeping, such as a living room with a hide-away bed, are not considered bedrooms. A housing unit consisting of only one room, such as a one-room efficiency apartment, is classified by definition as having no bedroom.

Data on bedrooms lacking privacy are shown for housing units with two or more bedrooms. Housing units have bedrooms lacking privacy when it is necessary to pass through a bedroom to get to another room, such as a den, and/or to get to the bathroom. The bathroom access criterion is applied only to housing units with one complete bathroom or one bathroom plus half bath in which the half bath lacks a flush toilet.

Structural Characteristics

Complete kitchen facilities—A housing unit has complete kitchen facilities when it has all three of the following for the exclusive use of the occupants of the unit: (1) An installed sink with piped water, (2) a range or cookstove, and (3) a mechanical refrigerator. All kitchen facilities must be located in the structure. They need not be in the same room. Quarters with only portable cooking equipment are not considered as having a range or cookstove. An icebox is not included as a mechanical refrigerator.

The kitchen facilities are for the exclusive use of the occupants when they are used only by the occupants of one housing unit, including lodgers or other unrelated persons living in the unit. When a structure consists of only one housing unit, all equipment located inside the structure is classified, by definition, for exclusive use.

For vacant housing units from which one or all of the kitchen facilities had been removed, the kitchen facilities used by the last occupant were to be reported.

Condition of kitchen facilities–Housing units with complete kitchen facilities were classified as to whether all the kitchen facilities were in usable condition. If one or more of the kitchen facilities (sink, range or cookstove, and refrigerator) could not be used for its intended purpose, the housing unit was classified as having "one or more not usable." Kitchen facilities that normally function properly, but which were temporarily out of use (two weeks or less) because of a breakdown, were classified as usable.

Basement–Statistics on basements are based on the number of housing units located in structures built with a basement. A structure has a basement if there is enclosed space in which persons can walk upright under all or part of the building. In Parts B and F, basements in structures with occupied units are further classified by signs of water leakage. The category "with signs of water leakage" consists of housing units in which the basement shows signs of water having leaked in from the outside during the last 90 days, even if the signs only appear when it rains. No signs of water leakage means that the basement shows no signs of water leakage, or that the signs of water leakage are caused by a problem inside the structure such as faulty plumbing. If the basement shows signs of water having leaked in from the outside but the problem causing the leakage has been corrected, the unit was classified as having no signs of water leakage.

Year structure built–Year structure built refers to when the building was first constructed, not when it was remodeled, added to, or converted. The figures refer to the number of housing units in structures built during the specified periods and in existence at the time of the interview. For mobile homes and trailers, the manufacturer's model year was assumed to be the year built.

Units in structure–In determining the number of housing units in a structure, all units, both occupied and vacant, were counted. The statistics are presented for the number of housing units in structures of specified type and size, not for the number of residential structures.

A structure is a separate building if it has either open space on all sides or is separated from other structures by dividing walls that extend from ground to roof. In part A, structures containing only one housing unit are further classified as detached or attached.

A one-unit structure is detached if it has open space on all four sides even though it has an adjoining shed or garage. A one-unit structure is attached if it has one or more walls extending from ground to roof which divide it from other adjoining structures, such as in rowhouses, townhouses, etc.

Mobile homes and trailers are shown as a separate category (see parts A, C, and D). When one or more rooms have been added to a mobile home or trailer, it is classified as a one-unit structure. If, however, only a porch or shed has been added, it is still counted as a mobile home or trailer.

Elevator in structure–Statistics on elevator in structure refer to the number of housing units in structures with four floors or more which have a passenger elevator. Housing units are without elevator in a structure of four floors or more if the structure has no passenger elevator or if the only elevator service is for freight.

Stories between main and apartment entrances–This item is restricted to two-or-more-unit structures and is concerned with the number of floors from the main entrance of the apartment building to the main entrance of the apartment. The number of stories is determined from ground level if there is no main building entrance and the apartment has its own private entrance, either from the ground level of the building or from an area that is *not located inside* the building, or if there is a main building entrance, but the entrance to the apartment cannot be reached by using the main building entrance.

Storm windows, storm doors, and attic or roof insulation–The purpose of these three items is to determine if a housing unit has some form of insulation which helps to reduce heat loss during the winter and heat gain during the summer. The statistics are shown only for occupied, one-unit structures and occupied, mobile homes and trailers.

Storm windows or other protective window covering–This category refers to protective window covering, such as storm windows, double-glazed glass, closeable shutters, or plastic. Housing units with some windows covered have protective covering over some, but not all windows.

Storm doors–This category refers to additional doors hung in exterior doorways. Doors on attached garages are not included. Housing units with some doors covered have storm doors on some, but not all exterior door openings.

Attic or roof insulation–This category includes roll or blanket insulation encased in a paper covering, fiberglass batting, and loose insulation which is poured or blown between the attic floor joists.

Roof–Housing units with signs of water leakage are those in which the roof shows signs of water having leaked in from the outside during the last 90 days. No signs of water leakage means that the roof shows no signs of water leakage from the outside, or that the roof shows signs of water leakage, but the problem causing the leakage has been corrected. If the signs of water leakage are caused by a problem inside the structure, such as faulty plumbing, the housing unit was classified as having no signs of water leakage.

Interior walls and ceilings–Statistics are presented on whether or not there are open cracks or holes and broken plaster or peeling paint on the interior walls or ceilings of a housing unit. Included are cracks or holes that do not go all the way through to the next room or to the outdoors. Hairline cracks or cracks that appear in the walls or ceilings but are not large enough for a fingernail file to be inserted and very small holes caused by nails or other similar objects are not considered to be open cracks or holes.

Broken plaster or peeling paint must be on the inside walls or ceilings, and at least one area of the broken plaster or peeling paint must be approximately one square foot or larger.

Interior floors—Data are shown on whether there are holes in the interior floors of a housing unit. The holes do not have to go through the floor. Excluded are very small holes caused by nails or other similar objects.

Selected structural deficiencies and wish to move—The category "household would like to move" consists of housing units in which the respondent considers one or more of the following structural deficiencies so objectionable that the respondent would like to move from the unit: (1) A basement with signs of water leakage, (2) roof leakage, (3) open cracks or holes in the interior walls or ceiling, (4) holes in the floor, and (5) broken plaster or peeling paint on the ceiling or inside walls.

Overall opinion of structure—The data presented are based on the respondent's overall opinion of the house or building as a place to live. The respondent was asked to rate the structure as excellent, good, fair, or poor.

Common stairways—The statistics on common stairways are presented for housing units in structures of two or more units with common stairways. The figures for loose steps and loose railings reflect the physical condition of the stairway; i.e., whether there are loose, broken, or missing steps or stair railings. Common stairways are stairways which are usually used by the occupants of more than one housing unit or by the general public. They may be either inside the structure or attached to the outside of the building.

Light fixtures in public halls—These statistics are presented for housing units in two-or-more-unit structures with public halls which have light fixtures. Data include whether or not the light fixtures are in working order. Light fixtures include wall lights, ceiling lights, or table lamps in the public halls of the building. Public halls are used by the occupants of more than one housing unit or by the general public.

Electric wiring—A housing unit is classified as having exposed electric wiring if the unit has any wiring that is not enclosed, either in the walls or in metal coverings, or if the unit has any wiring outside the walls enclosed in some material other than metal. Extension cords and other types of wiring that extend from a wall outlet to an appliance or lamp are not considered as exposed wiring.

Electric wall outlets—A housing unit is classified as having electric wall outlets in each room if there is at least one working electric wall outlet or wall plug in each room of the unit. A working electric wall outlet or wall plug is one that is in operating condition; i.e., can be used when needed. If a room does not have an electric wall outlet, an extension cord used in place of a wall outlet is not considered to be an electric wall outlet.

Electric fuses and circuit breakers—These statistics are presented for occupied housing units which had an electrical circuit fuse blown or breaker switch tripped during the 3 months prior to interview. The data are restricted to households whose householder has been at the present address for at least 90 days prior to the date of the interview. A blown fuse or tripped breaker switch results in the temporary loss of electricity until the fuse is replaced or the breaker switch reset. Blown fuses inside certain appliances or equipment (such as some large air conditioners) are counted as blown fuses or tripped breaker switches.

Parking facilities—The statistics on parking facilities presented in this report are restricted to renter-occupied housing units for which cash rent is paid and exclude one-unit structures on 10 acres or more. The data refer to off-street parking facilities which are available in connection with the building. The facilities are provided by the landlord or management and must be available without an additional cost to the renter. The parking facility may be a garage, carport, driveway, or open lot where the occupant may park a car off the street.

Plumbing Characteristics

Plumbing facilities—The category "with all plumbing facilities" consists of housing units which have hot and cold piped water inside the structure as well as a flush toilet and a bathtub or shower inside the structure for the exclusive use of the occupants of the unit. All plumbing facilities must be located in the structure but they need not be in the same room. Lacking some or all plumbing facilities means that the housing unit does not have all three specified plumbing facilities (hot and cold piped water, flush toilet, and bathtub or shower) inside the structure, or that the toilet or bathing facilities are also for the use of the occupants of other housing units.

Complete bathrooms—A housing unit is classified as having a complete bathroom if it has a room with a flush toilet, bathtub or shower, and a washbasin, as well as piped hot water in the structure for the exclusive use of the occupants of the unit. A half bathroom has either a flush toilet or a bathtub or shower for exclusive use, but does not have all the facilities for a complete bathroom.

The category "also used by another household" consists of housing units with bathroom facilities which are also for the use of the occupants of other housing units. The category "none" consists of units with no bathroom facilities, units with only a half bathroom, and units with all bathroom facilities but not in one room.

Source of water or water supply—A public system or private company refers to a common source supplying running water to six or more housing units. The water may be supplied by a city, county, water district, or private water company, or it may be obtained from a well which supplies six or more housing units. If a well provides water for five or fewer housing units, it is classified as an "individual well." Water sources such as springs, creeks, rivers, cisterns, ponds, or lakes are included in the "other" category.

For housing units that had piped water inside the structure, respondents were asked to provide information on breakdowns or failure in the water supply. The water may be available from sources such as a sink, washbasin, bathtub, or shower. A housing unit is classified as having "no piped water inside structure" if the unit has no piped water or if the only piped water available is outside the structure; for example, on an open porch or in

another building. Data on breakdowns or failures of water supply are shown if the housing unit was occupied by the householder at least 90 days prior to interview and if the breakdown or failure lasted 6 consecutive hours or longer during the 90 days prior to the interview.

Breakdowns or failures in the water supply means that the housing unit was completely without running water from its regular source. A housing unit was considered to be completely without running water if (1) the water system serving the unit supplied no water at all, (2) no water was available in the unit due to a breakdown or failure in the water supply inside the structure, or (3) the equipment and facilities (i. e., faucets in the kitchen and the bathroom sinks, faucet and shower in the bathtub, flush toilet, etc.) were all inoperable. If the faucet in the kitchen was broken, but the one in the bathtub was working, the unit was not classified as being completely without water.

Housing units with a breakdown or failure in the water supply are also classified according to the number of breakdowns or failures and to the most common source of the problem. Problems inside the building refer to such problems as broken pipes in the housing unit (or building) or turning the water off in the housing unit (or building) for maintenance and repairs. Problems outside the building refer to such problems as power failures, breaks in the main water line, or shutdown by the water company for maintenance and repairs.

Sewage disposal—A public sewer is connected to a city, county, sanitary district, neighborhood, or subdivision sewer system. It may be operated by a governmental body or private organization. A septic tank or cesspool is an underground tank or pit used for disposal of sewage. Small sewage treatment plants, which in some localities are called neighborhood septic tanks, are classified as public sewers. A chemical toilet uses chemicals to break down or dissolve sewage; a privy refers to an outhouse or other small shelter outside the unit which contains a toilet. Housing units for which sewage is disposed of in some other way are included in the "other" category.

The data on breakdowns or failures in the means of sewage disposal are limited to housing units in which the means of sewage disposal was a public sewer, septic tank, or cesspool. The breakdown or failure may have been the result of an overloaded sewage disposal system, lack of running water, a broken or cracked tank, etc. Data on breakdowns are shown if the housing unit was occupied by the householder at least 90 days prior to the interview and if the breakdown or failure lasted 6 consecutive hours or longer during the 90 days prior to the interview.

Flush toilet—The statistics on breakdowns or failures of flush toilet are limited to housing units that had all plumbing facilities with only one flush toilet; that is, one complete bathroom or one complete bathroom plus a half bath without flush toilet. The flush toilet may be completely unusable because of broken pipes, stopped up soil pipe, lack of water supplied to the flush toilet, or some other reason.

Housing units with breakdown or failure in flush toilet are classified by the number of breakdowns or failures and to the most common source of the problem. Problems inside the building refer to such breakdowns or failures as broken pipes in the unit (or building); a cracked or broken bowl, or faulty flushing mechanism. Problems outside the building refer to such breakdowns or failures as breaks in the main water or sewer line or shutdowns by the water company for maintenance or repairs.

Data on breakdowns or failures of flush toilet are shown if the housing unit was occupied by the householder at least 90 days prior to the interview, and if the breakdown or failure lasted 6 consecutive hours or more during the 90 days prior to the interview.

Equipment and Fuels

Telephone available—A housing unit is classified as having a telephone if there is a telephone for receiving calls available to the occupants of the unit. The telephone may be located outside or inside the housing unit, and one telephone may serve the occupants of several units. The number of housing units with a telephone available, therefore, does not indicate the number of telephones installed in homes.

Heating equipment—Warm-air furnace refers to a central system which provides warm air through ducts leading to various rooms. A heat pump refers to an electric heating-cooling system which utilizes indoor and outdoor coils, a compressor, and a refrigerant to pump hot air in during the winter and cooled air in during the summer. Only heat pumps that are centrally installed with ducts to the rooms are included in this category. Steam or hot water refers to a central heating system in which heat from steam or hot water is delivered through radiators or other outlets. Built-in electric units are permanently installed in floors, walls, ceilings, or baseboards. A floor, wall, or pipeless furnace delivers warm air to the room right above the furnace or to the room(s) on one or both sides of the wall in which the furnace is installed.

Room heaters with flue include circulating heaters, convectors, radiant gas heaters, and other nonportable heaters that burn gas, oil, kerosene, or other liquid fuels, and which are connected to a flue, vent, or chimney to remove smoke and fumes. Room heaters without flue include any room heater (not portable) that burns gas, oil, or kerosene which does not connect to a flue, vent, or chimney. Fireplaces, stoves, or portable heaters include room heaters that burn coal, coke, charcoal, wood, or other solids. It also includes portable room heaters that burn kerosene, gasoline, fuel oil, or other liquid fuel, as well as portable electric heaters that get current from an electrical wall outlet.

For vacant housing units from which the heating equipment had been removed, the equipment used by the last occupants was to be reported.

For breakdowns or failures of heating equipment, data are shown for housing units occupied by the householder during the winter prior to the interview if the equipment was unusable for 6 consecutive hours or longer during that

time. To qualify as having lived here last winter, the householder must have moved into the housing unit prior to February 1981.

Heating equipment is considered unusable if it cannot be used for the purposes intended; the breakdown or failure may be caused by broken pipes, electrical or gas parts out of order, or downed power lines.

Insufficient heat—The statistics presented refer to housing units in which the householder occupied the unit during the winter prior to the date of the interview. To qualify as having lived here last winter, the householder must have moved into the unit prior to February 1981.

Separate data are shown for housing units with additional heat source, rooms which lacked specified heat source, and housing units with closed rooms. The term "specified heating equipment" includes warm-air furnace; heat pump; steam or hot water system; built-in electric units; floor, wall, or pipeless furnace; and room heaters with flue. Excluded are room heaters without flue or vent, fireplaces, stoves, and portable heaters.

The data on additional heat source refer to housing units with specified heating equipment which *had* to use additional sources of heat to supplement the regular heating system because the regular system did not provide enough heat. Additional sources of heat, such as kitchen stoves, fireplaces, or portable heaters, may have been used only in the mornings or on very cold evenings. Electric blankets, heating pads, or hot water bottles are not considered additional sources of heat.

Rooms lacking specified heat source include rooms lacking hot air ducts, registers, radiators, and room heaters. The intent of this item was to identify rooms in housing units with specified heating equipment which did not contain the means of conveying the heat to the room. The kitchen was not considered to be a room for this item.

Separate data are also shown for rooms which were closed because they could not be kept warm. The rooms must have been closed for 7 consecutive days or longer during the previous winter, and the unit must have heating equipment. For this item also, the kitchen was not considered a room.

Air conditioning—Air conditioning is defined as the cooling of air by a refrigeration unit; excluded are evaporative coolers, fans, or blowers which are not connected to a refrigeration unit. A room air-conditioning unit is an individual air conditioner which is installed in a window or an outside wall and is generally intended to cool one room, although it may sometimes be used to cool several rooms. A central system is a central installation which air conditions the entire housing unit. In an apartment building, a central system may cool all apartments in the building; each apartment may have its own central system; or there may be several systems, each providing central air conditioning for a group of apartments. A central installation with individual room controls is a central air-conditioning system.

Cars and trucks available—Statistics on cars and trucks available represent the number of passenger cars, station wagons, vans, pickups, and small panel trucks of one-ton capacity or less, which are owned or regularly used by any member of the household and which are ordinarily kept at home. Police cars or larger trucks were not to be counted. Trucks used for business purposes were included only if also used for personal activities of household members.

The statistics do not reflect the number of privately owned cars and trucks or the number of households owning such vehicles.

Fuels used for house heating and cooking—Utility gas is gas that is piped through underground pipes from a central system and serves the neighborhood. Bottled, tank, or LP gas is stored in tanks which are refilled or exchanged when empty. Fuel oil, kerosene, etc., includes fuel oil, kerosene, gasoline, alcohol, and other combustible liquids. Other fuel includes any other fuel such as briquettes made of pitch and sawdust, corncobs, or purchased steam.

Services and Neighborhood Conditions

Garbage collection service—A housing unit is classified as having garbage collection service if either a private or public company collects the trash or garbage on a regular basis and carries it to public disposal areas. Housing units with garbage collection service are classified by the frequency of the service. In some areas where the garbage (food waste) is collected by one company and the trash (paper, cans, etc.) by another, data are obtained only for the garbage collection service.

If the household does not have garbage collection service, the means of garbage disposal is classified as follows:

Incinerator, trash chute, or compactor—An incinerator is a large unit on the property designed to burn all trash and garbage. Trash chutes and compactors were marked as the means of garbage disposal when the final means of disposal was not known; i.e., if the respondent knew only that the garbage was put down a trash chute or that the garbage goes into a compactor. A compactor is a machine which packs trash and garbage into smaller bundles for disposal.

Garbage disposal—A garbage disposal is connected to the kitchen sink and grinds up garbage which is disposed of through the sewage system.

Other means—If the method of disposal does not fall into any of the classifications specified above, it is classified as "other means."

The statistics on garbage collection service presented in part D are restricted to renter-occupied units for which cash rent is paid and exclude one-unit structures on 10 acres or more. The data refer to whether or not the cost of garbage collection service is paid by the renter.

Extermination service—The statistics on extermination service refer to households that have been at their present address for

at least 3 months prior to the date of interview and that reported they had seen mice or rats or signs or traces of their presence *inside* the house or building during the last 3 months. Signs of mice and rats or traces of their presence include droppings, holes in the wall, or ripped or torn food containers. Regular extermination service refers to periodic visits by a licensed company or individual who uses chemicals and sprays to control or kill rodents. The regular service interval may be once a month, four times a year, or any other such interval. Irregular extermination service includes visits by an exterminator who is called by the household or building manager only when needed, or where it is known that a building is serviced but it is not known whether the service is regular or irregular. No extermination service includes housing units in a house or building that has not been serviced during the 12 months prior to the interview and where it is not known if there is any extermination service.

Neighborhood conditions and neighborhood services—The statistics presented are based on the respondent's opinion and attitude toward the neighborhood. Thus, the respondent's answer may or may not reflect the actual description of the neighborhood. Furthermore, the respondent may not have the same opinion as a neighbor about the neighborhood conditions and/or neighborhood services; for example, the respondent may feel that the street lighting or neighborhood shopping facilities are satisfactory while a neighbor may not.

Neighborhood conditions, and neighborhood conditions and wish to move—Data on neighborhood conditions are based on the respondent's answers to a three-part question concerning specific neighborhood conditions listed below. The respondent was asked: (1) If the condition was present in the neighborhood, (2) if present, was the condition bothersome and, (3) if bothersome, was it so objectionable that the respondent "would like to move" from the neighborhood.

1. Airplane noise—This category refers to the respondent's opinion concerning noise made by airplanes in landing, taking off, or sonic booms from nearby airports or military bases.
2. Street noise—Street noise refers to noise made by children playing outdoors, noise from a factory or business, or any other sounds that the respondent considers street noise.
3. Heavy traffic—This category refers to the presence of cars and/or trucks which the respondent classifies as heavy traffic.
4. Streets need repair—The data based on the respondent's opinion that the streets, either paved or unpaved, are continually in need of repair or are bordered by open ditches used for water or sewage drainage.
5. Roads impassable—This category refers to roads that the respondent reported to be neglected by State, county, or city crews during snowstorms, heavy rainstorms, or other such conditions that make a road impassable.
6. Poor street lighting—Poor street lighting includes areas, in the opinion of the respondent, that have no street lighting, streets with insufficient lighting, and streets where the lighting does not work adequately.
7. Crime—This category refers to all forms of street and neighborhood crime such as petty theft, assaults against the person, burglary, etc., or any related activities that the respondent judges to be a crime.
8. Litter—Included are all types of trash, debris, or junk such as paper, cans, or abandoned cars in the street, on empty lots, or on properties on the street which the respondent considers as litter.
9. Abandoned buildings—Abandoned buildings refer to both single and multiunit buildings which the respondent reported to be abandoned or boarded up. Included in this category are remains of previous buildings.
10. Housing in rundown condition—This category refers to occupied housing units which, in the respondent's opinion, are in rundown condition.
11. Commercial or industrial—This category refers to commercial, industrial, or other activities, including both large and small industries as well as businesses and stores, that the respondent considers to be nonresidential.
12. Odors—This category refers to the respondent's opinion concerning fumes, smoke, or gas coming from cars, trucks, nearby industries, factories, businesses, etc.

Neighborhood services—Data on neighborhood services are based on the respondent's answers to a two-part question concerning neighborhood services. The respondent was asked: (1) If a particular neighborhood service was satisfactory, and (2) if not satisfactory, was it so unsatisfactory that the respondent would like to move from the neighborhood.

1. Public transportation—These data reflect the respondent's opinion of the availability of public transportation, such as bus, subway, or taxicab service.
2. Schools—These statistics reflect the respondent's opinion about the schools in the neighborhood, such as the proximity of the school, population of the student body, etc.
3. Neighborhood shopping—This category refers to the respondent's opinion regarding stores, such as grocery or drug stores in the vicinity, and their merchandise, prices, or services.
4. Police protection—This category refers to the respondent's opinion about the presence, quality, quantity, and response time of services that should be provided by the police.
5. Outdoor recreation facilities, such as parks, playgrounds, or swimming pools—This category refers to the respondent's assessment of neighborhood outdoor recreation facilities.
6. Hospitals and health clinics—This category refers to the quality and proximity of health facilities, etc., serving the local community in the opinion of the respondent.

Neighborhood services and wish to move—The category "household would like to move" consists of housing units in which the respondent considers one or more of the specified neighborhood services (such as public transportation) so inadequate or unsatisfactory that the respondent would like to move from the neighborhood.

The figures shown for the categories under "household would like to move" may not add to the total because more than one inadequate service may have been reported for the same unit.

Overall opinion of neighborhood—The data presented are based on the respondent's overall opinion of the neighborhood according to the street conditions and the neighborhood services available (described in preceding paragraphs). The respondent was asked to rate the street or neighborhood as excellent, good, fair, or poor. Data are also shown for wish to move because of undesirable street conditions cross-classified by the respondent's overall opinion of the neighborhood.

Financial Characteristics

Value—Value is the respondent's estimate of how much the property (house and lot) would sell for if it were for sale. The statistics on value are shown only for one-unit structures on less than 10 acres without a commercial establishment or medical or dental office on the property. Owner-occupied cooperatives, condominiums, mobile homes and trailers are excluded from the value tabulations.

Income—The statistics on income in the Annual Housing Survey are based on the respondent's reply to questions on income for the 12 months prior to the interview and are the sum of the amounts reported for wage and salary income, net self-employment income, Social Security or railroad retirement income, public assistance or welfare payments, and all other money income. The figure represents the amount of income received before deductions for personal income taxes, Social Security, union dues, bond purchases, health insurance premiums, Medicare deductions, etc.

In this report, the statistics relate to the money income of the family or primary individual occupying the housing unit; i.e., the sum of the income of the householder and all other members of the family 15 years old and over, or the income of the primary individual. Incomes of persons living in the unit but not related to the householder are not included in this sum.

Wage or salary income is defined as the total money earnings received for work performed as an employee at any time during the 12-month period prior to the interview. It includes wages, salary, piece-rate payments, commissions, tips, cash bonuses, and Armed Forces pay. Net self-employment income is defined as net money income (gross receipts minus operating expenses) received from a business, professional practice, partnership, or farm in which the person was self-employed.

Social Security or railroad retirement income includes cash receipts of Social Security pensions; survivors' benefits, disability insurance programs for retired persons, dependents of deceased insured workers, or disabled workers; and deductions for Medicare and health insurance premiums. Cash receipts of retirement, disability, and survivors' benefit payments made by the U.S. Government under the Railroad Retirement Act are also included. Separate payments received for hospital or other medical care are not included.

Income from all other sources includes money income received from sources such as periodic payments from estates and trust funds; dividends; interest; net rental income (or loss) from property rentals; net receipts from roomers or boarders; net royalties; public assistance or welfare payments which include cash receipts received from public assistance programs, such as old age assistance, aid to families with dependent children, and aid to the blind or totally disabled; unemployment insurance benefits; money received for transportation and/or subsistence by persons participating in special governmental training programs, such as the Area Redevelopment Act and the Manpower Development and Training Act; workmen's compensation cash benefits; periodic payments by the Veterans' Administration to disabled members of the Armed Forces or to survivors of deceased veterans; public or private pensions; periodic receipts from insurance policies or annuities; alimony or child support from persons who are not members of the household; net gambling gains; and nonservice scholarships and fellowships.

Receipts from the following sources were not included as income: Value of income "in kind," such as, free living quarters, housing subsidies, food stamps, or food produced and consumed in the home; money received from the sale of property (unless the recipient was engaged in the business of selling such property); money borrowed; tax refund; withdrawal of bank deposits; accrued interest on uncashed savings bonds; exchange of money between relatives living in the same household; and gifts and lump-sum insurance payments, inheritances, and other types of lump-sum receipts.

The income statistics and the characteristics of the household refer to different periods in time. For 1981, the income data refer to the 12 months prior to the interview, whereas the household characteristics refer to the date of interview. For 1970, income data refer to the calendar year 1969, whereas the household characteristics refer to April 1, 1970. Thus, family income does not include amounts received by persons who were members of the family during all or part of the income period if these persons no longer resided with the family at the time of the interview. On the other hand, family income includes amounts reported by related persons who did not reside with the family during the income period but who were members of the family at the time of the interview. For most families, however, the income reported was received by persons who were members of the family throughout the income period.

There may be significant differences in the income data between the Annual Housing Survey and other Bureau surveys and censuses. For example, the time period for income data in the Annual Housing Survey refers to the 12 months prior to the interview while other income data generally refer

to the calendar year prior to the date of the interview. Additional differences in the income data may be attributed to factors such as the various ways income questions are asked, the sampling variability and nonsampling errors between the Annual Housing Survey and other Bureau surveys and censuses, survey procedures and techniques, and processing procedures.

Value-income ratio—The value-income ratio is computed by dividing the value of the housing unit by the total money income of the family or primary individual. The data are presented for the same owner-occupied units for which "value" was tabulated (see "Value" for exclusions). The ratio was computed separately for each housing unit and was rounded to the nearest tenth. In reporting value, respondents were asked to select an appropriate class interval. The midpoints of the value intervals were used in the computation of the value-income ratio, except that a mean of $3,500 was assigned for values less than $5,000 and a mean of $350,000 was assigned for values of $300,000 or more. For income, the dollar amounts were used. Units occupied by families or primary individuals who reported no income or a net loss comprise the category "not computed."

The 1981 income statistics are for the 12 months prior to the date of the interview. For 1970, the income statistics cover the calendar year 1969.

Mortgage insurance—The data are restricted to owner-occupied units with a mortgage or similar debt. In addition, the units must be one-unit structures on less than 10 acres without a commercial establishment or medical or dental office on the property. Owner-occupied cooperatives, condominiums, mobile homes and trailers are excluded from the tabulations on mortgage insurance.

A mortgage or similar debt refers to all forms of debt where the property is pledged as security for payment of the debt. It includes such debt instruments as deeds of trust, trust deeds, mortgage bonds, and vendor liens. In the first three arrangements, usually a third party, known as the trustee, holds the title to the property until the debt is paid. In the vendor lien arrangement, the title is kept by the buyer but the seller (vendor) reserves, in the deed to the buyer, a lien on the property to secure payment of the balance of the purchase price. Also included as a mortgage or similar debt are contracts to purchase, land contracts, and lease-purchase agreements where the title to the property remains with the seller until the agreed upon payments have been made by the buyer.

Mortgage insurance is financial protection provided to the lender in case the borrower fails to keep up the required mortgage payments and defaults on the loan. Such insurance protection is offered by both the Government, acting as an insurance agent, and by private mortgage insurance companies. The Federal government agencies that currently insure or guarantee mortgages or similar debts include the Federal Housing Administration (FHA), the Veterans' Administration (VA), and the Farmers Home Administration. Mortgages or loans that are not insured or guaranteed by FHA, VA, or the Farmers Home Administration are referred to as "conventional" mortgages. Mortgage debts insured or guaranteed by State or local government agencies are not included in the category "insured by FHA, VA, or Farmers Home Administration."

The Federal Housing Administration insures loans on homes. The Veterans' Administration guarantees or insures loans under the Serviceman's Readjustment Act (GI Bill). The Farmers Home Administration provides much the same service as FHA, but confines its assistance to rural areas.

Private mortgage insurance companies provide insurance protection to lenders so that borrowers may obtain conventional loans with higher loan-to-value ratios than noninsured loans. Downpayment and monthly payment are often less for noninsured loans but terms are generally longer and the borrower pays an insurance premium as part of the monthly mortgage payment. The data on private mortgage insurance is not separable from data on other conventional loans and is therefore included in the category "not insured or insured by private mortgage insurance."

Monthly mortgage payment—The data are limited to owner-occupied, one-unit structures on less than 10 acres having no commercial establishment or medical or dental office on the property. The data present the monthly dollar amount paid for the mortgage, principal and interest only. Real estate taxes and fire and hazard insurance costs are excluded from the data even if they are included in the regular payment to the lender.

Real estate taxes last year—The data are restricted to owner-occupied, one-unit structures on less than 10 acres without a commercial establishment or medical or dental office on the property. The data exclude owner-occupied cooperatives, condominiums, mobile homes, and trailers. Real estate taxes last year refers to the total amount of all real estate taxes payable on the entire property during the last billing period. It includes State and local real estate taxes. Not included are payments on delinquent taxes due from prior years or payments for special assessments, facilities, or services. When the real estate taxes are included with the mortgage, a separate amount for the taxes is obtained.

In part C, the mean real estate taxes for last year per $1,000 value of the property (house and lot) are presented. Housing units for which no taxes are paid are excluded from the computation of the mean.

Property insurance—This refers to fire and hazard insurance; that is, policies which protect the unit and its contents against loss due to damage by fire, lightning, wind, hail, explosion, etc. Homeowners' policies are also included since this type of insurance has fire and hazard insurance together with other types of homeowner protection such as liability. If the cost of the insurance was included as part of the mortgage payment, a separate amount for the insurance was obtained. The amount of the insurance premium reported was the amount paid for an entire 12-month period even if made in two or more installments.

Property insurance is shown only as a component of selected monthly housing costs and selected monthly housing costs as percentage of income. (See parts A and C.) The data are restricted to owner-occupied, one-unit structures on less than 10 acres without a commercial establishment or medical or dental office on the property. The data exclude owner-occupied cooperatives, condominiums, and mobile homes and trailers.

Selected monthly housing costs—The data are presented for owner-occupied, one-unit structures on less than 10 acres without a commercial establishment or medical or dental office on the property. Separate distributions are shown for housing units with a mortgage and for housing units with no mortgage. Selected monthly housing costs is the sum of payments for mortgage, real estate taxes, property insurance, utilities (electricity, gas, water, and sewage disposal), fuels (oil, coal, kerosene, wood, etc.), and garbage collection.

Households that did not report the amount of mortgage and/or real estate taxes were included in the "not reported" category.

Selected monthly housing costs as percentage of income—The yearly housing costs (selected monthly housing costs multiplied by 12) are expressed as a percentage of the total income of the family or primary individual. This percentage is presented for the same owner-occupied units for which selected monthly housing costs were tabulated (for exclusions, see "Selected monthly housing costs"). The percentage was computed separately for each housing unit and was rounded to the nearest tenth. For income and selected monthly housing costs, the dollar amounts were used. Housing units occupied by families or primary individuals who reported no income or a net loss comprise the category "not computed."

Housing units that did not report the amount of mortgage and/or real estate taxes were included in the "not reported" category.

Acquisition of property—This item indicates how the current owner acquired the property, i.e., whether by purchase or by means other than purchase. Data are presented for one-unit structures on less than 10 acres without a commercial establishment or medical or dental office on the property.

Placed or assumed a mortgage—This includes housing units where the present owner had to place one or more new mortgages in order to obtain the property or assume an existing mortgage on the property. The intent was to determine whether the property was ever mortgaged by the present occupants even though there was no mortgage at the time of the interview.

Acquired through inheritance or gift—This includes property acquired as a beneficiary of an estate and property acquired through a gift.

Paid all cash—In these cases, the owner paid cash for the total cost of the property and no mortgage or other similar debt was involved.

Acquired in other manner—This category includes acquisitions of properties through foreclosure, delinquent tax sale, corporate reorganization, or trade for another property. Also included are those cases in which the owner acquired the property with borrowed funds (for all or part of the purchase price or cost of construction) and this loan was not secured by the property; i.e., a mortgage, deed of trust, land contract, etc.

Alterations and repairs during the last 12 months—The statistics refer to the 12 months prior to the interview and are restricted to owner-occupied, one-unit structures on less than 10 acres without a commercial establishment or medical or dental office on the property.

The data are presented according to whether the alterations and repairs cost less than $500 or $500 or more. The total cost of the labor and materials was to be reported. However, if the labor was performed by the occupants or provided without charge, only the cost of the materials was obtained. The cost pertains to a single job; for example, if several jobs were done, each costing less than $500 but the sum total was over $500; it was reported as costing less than $500 since none of the jobs by themselves cost $500 or more.

Additions—Additions refer to floor space built onto, above, or below an existing housing unit in order to increase the enclosed space within the house, such as a bedroom or basement added onto a house. It may also be construction of other buildings on the property. The building, such as a garage, may not necessarily be attached.

Alterations—These are permanent changes made either to the inside or outside of a structure including the surrounding grounds. Alterations inside the structure include any type of remodeling resulting in permanent modification of space, for example, construction of a breakfast nook in a kitchen. It may involve completely remodeling a room, such as a kitchen or bathroom, or a structural change such as separation of living and dining areas by a permanent room divider. It may also include attached equipment installed in the house for the first time, e.g., built-in dishwasher. Alterations outside the structure consist of installing walks, driveways, fences, storm windows or doors, planting trees or shrubbery, or swimming pools built into the ground.

Replacements—This refers to the *complete* substitution of a new piece of fixed equipment, surfacing, or fixed appliances for an old item that was previously there; for example, a new gas furnace or central air-conditioning system for one that no longer functioned properly. Excluded are appliances such as clothes washers, refrigerators, or window air-conditioners.

Repairs—This refers to jobs necessary for maintenance and preventive care of the structure, property, or fixed equipment; for example, painting, papering, floor sanding, mending water pipes, and replacing parts of large equipment such as a furnace valve.

Plans for improvements during the next 12 months—This item is restricted to owner-occupied, one-unit structures on less than 10

acres without a commercial establishment or medical or dental office on the property. This item refers to the respondent's plans, if any, to make improvements on the property (additions, alterations, replacements, or repairs) during the 12-month period following the interview and whether the labor and/or materials cost more or less than $500.

Sales price asked—For vacant housing units, the sales price is the amount asked for the property at the time of the interview and may differ from the price at which the property is sold. The statistics on sales price asked are shown only for vacant for sale one-unit structures on less than 10 acres without a commercial establishment or medical or dental office on the property.

Garage or carport on property—Data on housing units with a garage or carport on the property are shown only for one-unit structures on less than 10 acres without a commercial establishment or medical or dental office on the property. The garage or carport must be currently available for use by the occupants or the intended occupants of the unit, i.e., the members of the household can use it for parking even if it is currently used as a storage area for items such as lawn equipment or furniture. It may be attached to the house or it may be completely unattached, but it must be on the property. Excluded are garages or carports that have been converted to other uses such as living quarters, an extra room for business purposes, rented to someone else, or for some reason cannot be used for parking.

Contract rent—Contract rent is the monthly rent agreed to, or contracted for, even if the furnishings, utilities, or services are included. The statistics on rent exclude one-unit structures on 10 acres or more. Renter units occupied without payment of cash rent are shown separately as no cash rent in the rent tabulations.

Gross rent—The computed rent termed "gross rent" is the contract rent plus the estimated average monthly cost of utilities (electricity, gas, water) and fuels (oil, coal, kerosene, wood, etc.) if these items are paid by the renter (or paid by someone else, such as a relative, welfare agency, or friend) in addition to rent. Contract rent is the monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included. Thus, gross rent is intended to eliminate differentials which result from varying practices with respect to the inclusion of utilities and fuels as part of the rental payment. The estimated costs of water and fuels are reported on a yearly basis but they are converted to monthly figures in the computation process.

The statistics on rent exclude one-unit structures on 10 acres or more. Renter housing units occupied without payment of cash rent are shown separately as no cash rent in the rent tabulations.

Gross rent in nonsubsidized housing—The gross rent for nonsubsidized housing units excludes units reported in public housing projects, units with Federal, State, or local government rent subsidies, as well as one-unit structures on 10 acres or more. Data on nonsubsidized units, in this report, are not based on government or local records; the figures are, therefore, subject to the ability of a respondent to properly classify the unit as subsidized or nonsubsidized housing.

Gross rent as percentage of income—The yearly gross rent (monthly gross rent multiplied by 12) is expressed as a percentage of the total income of the family or primary individual. The percentage is presented for the same renter-occupied housing units for which gross rent was tabulated; thus, the statistics on gross rent as percentage of income reflect the exclusion of certain renter-occupied units. The percentage was computed separately for each housing unit and was rounded to the nearest whole number. For gross rent and income, the dollar amounts were used in the computation. Housing units for which no cash rent is paid and units occupied by families or primary individuals who reported no income or a net loss comprise the category "not computed."

The 1981 income statistics are for the 12 months prior to the date of the interview. For 1970, the income statistics cover the calendar year 1969.

Gross rent in nonsubsidized housing as percentage of income—This item is computed in the same manner as "gross rent as percentage of income" except that rents and incomes for public and subsidized housing units are excluded. Data on nonsubsidized units in this report are not based on government or local records; they are, therefore, subject to the ability of a respondent to properly classify the unit as subsidized or nonsublidized housing.

Inclusion in rent (parking facilities, garbage collection, and furniture)—Counts are shown separately for housing units in which parking facilities, garbage collection, and furniture are included in the rent. The data exclude one-unit structures on 10 acres or more.

Parking facilities—The statistics refer to off-street parking facilities which are available in connection with the building. The facilities are provided by the landlord or management and must be available without additional cost to the renter. The parking facility may be a garage, carport, driveway, or open lot where the occupant may park a car off the street.

Garbage collection—Included are housing units which have garbage collection service available in connection with the building. The service may be public or private and must be available without additional cost to the renter. If the garbage (food waste) is collected by one company and the trash (paper, cans, etc.) by another, the data refer to the garbage collection service. In tables 3, 6, and 9 of part C, separate counts are also shown for renter-occupied units reporting additional amounts paid for garbage collection service.

Furniture—The statistics refer to furnished apartments or houses in which the management supplied major pieces of furniture such as a bed, sofa, chest of drawers, and table and

chairs for the use of the occupant. Refrigerator, cooking range or stove, lamps, and rugs are not considered furniture. Housing units in which the occupants rent furniture from some source other than the management are not classified as furnished units.

Rent asked—For vacant housing units, the rent is the amount asked for the unit at the time of the interview and may differ from the rent contracted for when the unit was occupied. The data are for vacant, year-round units for rent, excluding one-unit structures on 10 acres or more. The median rent asked is shown separately for housing units in which the rent includes payment for all utilities (electricity, gas, and water) and fuels (oil, coal, kerosene, wood, etc.). Median rent asked is also shown for housing units in which the rent includes payment for utilities and fuels, as well as garbage collection service.

Public, private, or subsidized housing—A housing unit is classified as being in a public housing project if the structure in which the unit is located is owned by a local housing authority or other public agency, such as a housing and redevelopment authority or a housing development agency, and operated as public housing. These organizations may receive subsidies from the Federal or State government but the local agency owns the property. All other housing units are classified as private housing.

Private housing units are further classified by whether the unit is subsidized; that is, the respondent pays a lower rent because a Federal, State, or local government program pays part of the cost of construction, building mortgage, or operating expenses. These programs include (1) the interest subsidy programs of the Department of Housing and Urban Development (HUD) for rental and cooperative housing for moderate-income families, (2) the rent supplement program where part of the rent for low-income families occupying certain types of rental housing projects is paid by HUD, and (3) the direct loan program of HUD for housing the elderly.

The statistics on public or subsidized housing exclude one-unit structures on 10 acres or more and mobile homes. In addition, the data are not based on government or local records; the figures are, therefore, subject to the ability of a respondent to properly classify the unit as public or private and, if private, as subsidized or nonsubsidized housing.

Household Characteristics

Household—A household consists of all the persons who occupy a housing unit. By definition, the count of households is the same as the count of occupied housing units.

Householder—The householder is the first household member 18 years old and over who is the owner or renter of the sample unit. If no household member occupying the sample unit owns or rents the unit, the householder is the first household member listed who is 18 years old or older. Prior to 1980, the concept "head of household" was used. One person in each household was designated as the head, that is the person who was regarded as the head by the respondent. However, if a married woman living with her husband was reported as the head, her husband was considered the head for the purpose of simplifying the tabulations.

Household composition by age of householder—Statistics by age of householder are presented separately for two-or-more-person households and for one-person households. Households having two or more persons are further subdivided as follows:

Married-couple families, no nonrelatives—Each household in this group consists of the householder and spouse, and other persons, if any, all of whom are related to the householder.

Other male householder—This category includes households with male householders who are married, but with wife absent because of separation or other reason where husband and wife maintain separate residences; and male householders who are widowed, divorced, or single. Also included are households with male householder, wife present and nonrelatives living with them.

Other female householder—This category includes households with female householders who are married, but with husband absent because of separation or other reason where husband and wife maintain separate residences; and female householders who are widowed, divorced, or single. Also included are households with female householder, husband present, and nonrelatives living with them.

Households consisting of only one person are shown separately for male householder and female householder under the category "one-person households."

Family or primary individual—Housing units are occupied by either families or primary individuals. The term "family" refers to the householder and all (one or more) other persons living in the same household who are related to the householder by blood, marriage, or adoption. If the householder lives alone or with nonrelatives only, then the householder is considered a primary individual.

Married couples related to the householder of a family are included in the family and are not considered as separate families. A lodger, servant, or other person unrelated to the householder is considered a member of the household but not of the family.

In the statistics on household composition, families are always included in one of the three major groups of two-or-more-person households. Primary individuals with nonrelatives living with them are tabulated as two-or-more-person households and further subdivided as other male householder or female householder. Primary individuals living alone are always tabulated as one-person households.

Subfamily—A subfamily is a married couple with or without children or one parent with one or more own single (never married) children under 18 years old living in a household and related to, but not including, the householder or spouse. The most common example of a subfamily is a young married couple sharing the home of the husband's or wife's parents.

Age of householder—The age classification refers to the age reported for the householder as of that person's last birthday.

Persons 65 years old and over—All persons, including the householder, who are members of the household and are 65 years old and over are included in the count of housing units with persons 65 years old and over.

Own children—Statistics on presence of own children of householders are shown in this report. A child under 18 years old is defined as an own child if he or she is a single (never married) son, daughter, stepchild, or adopted child of a householder. Own children of subfamilies are excluded from the total count of own children.

Other relative of householder—This category includes all persons related to the householder by blood, marriage, or adoption except spouse or child of householder and members of subfamilies.

Nonrelative—A nonrelative of the householder is any person in the household who is not related to the householder by blood, marriage, or adoption. Roomers, boarders, lodgers, partners, resident employees, wards, and foster children are included in this category.

Years of school completed by householder—The statistics refer to the highest grade of regular school completed, not to the highest grade attended. For persons still attending school, the highest grade completed is one less than the one in which they are currently enrolled. Regular school refers to formal education obtained in graded public, private, or parochial schools, colleges, universities, or professional schools, whether day or night school, and whether attendance was full or part time. That is, regular schooling is formal education which may advance a person toward an elementary or high school diploma, college, university, or professional school degree. Schooling or tutoring in other than regular schools is counted only if the credits obtained are regarded as transferable to a school in the regular school system. Householders whose highest grade completed was in a foreign school system or in an ungraded school were instructed to report the approximate equivalent grade (or years) in the regular United States school system. Householders were not reported as having completed a given grade if they dropped out or failed to pass the last grade attended. Education received in the following types of schools is not counted as regular schooling: Vocational schools, trade schools, business schools, and noncredit adult education classes.

Means of transportation and distance and travel time to work—The statistics are restricted to householders who had a job the week prior to the interview. A job is defined as a definite arrangement for regular part-time or full-time work for pay every week or every month. Householders who do not report to the same place of work every day comprise the "no fixed place of work" category.

Householder's principal means of transportation to work—If different means of transportation are used on different days, the means used most often is recorded. If more than one means of transportation is used each day, the means covering the greatest distance is recorded. A carpool is where one or more persons regularly ride in the car with the householder; the householder may share driving, drive others, or ride with someone else. The category "mass transportation" includes railroad, subway, elevated transportation system, bus, and streetcar.

Distance from home to work—The statistics refer to the one-way distance the householder travels from home to work.

Travel time from home to work—The data refer to the average time it takes the householder to travel one way from home to work.

FORM AHS-92 (7-2-80) Page 3

Section IIB – VACANT UNITS

6a. Is this unit intended for year-round use, for occupancy only on a seasonal basis or for use by migrant workers?

(241)
☐ YEAR ROUND – Ask b
Seasonal
10 ☐ Summers only . . . . . } Skip to 7
11 ☐ Winters only . . . . . }
12 ☐ Other seasonal – *Specify in Notes on page 2* . . . . }
9 ☐ Migratory – *Skip to 7*

b. Is this house (apartment) for rent, for sale only, rented not occupied, sold not occupied, held for occasional use, or something else?

(Probe to be asked only for cooperatives)
To the Census Bureau, a cooperative is property which is owned by a corporation. Each shareholder is entitled to occupy an individual unit. Is this what you mean when you say this is a cooperative?

(241)
1 ☐ Vacant – for rent OR (for rent OR for sale)
Vacant – for sale ONLY ↓
2 ☐ Regular ownership
3 ☐ Condominium ownership
4 ☐ Cooperative ownership – *Ask probe*
5 ☐ Rented, not occupied
6 ☐ Sold, not occupied
7 ☐ Held for occasional use
8 ☐ Other vacant – *Specify* _____

7. How many months has this house (apartment) been vacant?

(039)
1 ☐ Less than 1 month
2 ☐ 1 month up to 2 months
3 ☐ 2 months up to 6 months
4 ☐ 6 months up to 12 months
5 ☐ 1 year up to 2 years
6 ☐ 2 years or more

8. How many bedrooms are in this house (apartment)?

(058) _____ Bedrooms
OR
0 ☐ None – *Skip to 10*

9a. Is it necessary to go through any bedroom to get to any bathroom?

(059) 1 ☐ Yes 2 ☐ No

b. Is it necessary to go through any bedroom to get to any other room?

(060) 1 ☐ Yes 2 ☐ No

10. Does this house (building) have complete kitchen facilities; that is, a kitchen sink with piped water, a refrigerator, and range or cookstove, which are available for the use of the intended occupants of this house (apartment)?

(063)
☐ Yes ↓ **Are these facilities ONLY for the use of the intended occupants?**
1 ☐ Yes – Used for this household only
2 ☐ No – Also used by another household
3 ☐ No

11. Does this house (building) have complete plumbing facilities; that is, hot and cold piped water, a flush toilet and a bathtub or shower, which are available for the use of the intended occupants of this house (apartment)?

(072)
☐ Yes ↓ **Are these facilities ONLY for the use of the intended occupants?**
1 ☐ Yes – Used for this household only – *Ask 12*
2 ☐ No – Also used by another household – *Skip to 13a*
3 ☐ No – *Skip to 13a*

12. A complete bathroom is a room with a flush toilet, bathtub or shower, and a washbasin with piped water. A half bathroom has at least a flush toilet or a bathtub or shower, but does not have all the facilities for a complete bathroom.

How many complete bathrooms and half bathrooms does this house (apartment) have?

(073) *(Mark only one box)*
1 ☐ Complete plumbing facilities but not in one room
2 ☐ 1 complete bathroom
3 ☐ 1 complete bathroom plus a half bath with no flush toilet
4 ☐ 1 complete bathroom plus a half bath with flush toilet
5 ☐ 2 complete bathrooms
6 ☐ More than 2 complete bathrooms

Section IIB – VACANT UNITS – Continued

13a. Is this house (building) connected to a public sewer? (078)
1 ☐ Yes – *Skip to 14*
2 ☐ No

b. What means of sewage disposal does it have? (079)
1 ☐ Septic tank or cesspool
2 ☐ Chemical toilet
3 ☐ Privy
4 ☐ Use facilities in another structure
5 ☐ Other – *Specify* _____

14. What type of heating equipment does this house (apartment) have?
(Mark heating equipment used most)
SHOW FLASHCARD B
(084)
1 ☐ A central warm-air furnace with ducts in individual rooms
2 ☐ A heat pump
3 ☐ Steam or hot water system
4 ☐ Built-in electric units (permanently installed in wall, ceiling, or baseboard)
5 ☐ A floor, wall, or pipeless furnace
6 ☐ Room heater(s) WITH flue or vent burning gas, oil, or kerosene
7 ☐ Room heater(s) WITHOUT flue or vent burning gas, oil, or kerosene
8 ☐ Fireplaces, stoves, or portable room heaters
9 ☐ Unit has no heating equipment
Skip to 16a

15. How many rooms does this house (apartment) have without hot air ducts or registers, radiators, or room heaters? Do not count the kitchen or bathroom(s). (086)
1 ☐ None
2 ☐ 1 room
3 ☐ 2 rooms
4 ☐ 3 rooms or more

16a. Does this house (apartment) have air conditioning, either individual room units or a central system? (091)
1 ☐ Yes
2 ☐ No – *Skip to 17*

b. Which does it have? (092)
1 ☐ Central – *Skip to 17*
2 ☐ Room units

c. How many room units? (093)
_____ Room units

17. Is there a basement in this house (building)? (099)
(A basement is an enclosed space in which persons can walk upright under all or part of the building.)
1 ☐ Yes
2 ☐ No

CHECK ITEM A

VACANCY STATUS *(See item 6b, page 4)*

- **FOR RENT OR (FOR RENT OR FOR SALE)**
  (See Control Card, item 27a)
  ☐ One-unit structure – *Ask 18*
  ☐ Two-or-more-unit structure, or a mobile home or trailer *Skip to 21*
- **FOR SALE ONLY**
  (See Control Card, item 27a)
  Regular ownership
  ☐ One-unit structure – *Ask 18*
  ☐ Mobile home or trailer – *Skip to 20*
  ☐ Two-or-more-unit structure – *Skip to 26a*
  ☐ A condominium – *Skip to 19*
  ☐ A cooperative – *Skip to 20*
- **ALL OTHERS** *(See items 6a and 6b)*
  ☐ Other vacants, units rented or sold, units held for occasional use, seasonal and similar units – *Skip to 25*

OBSERVATION – If rural transcribe from CC item 37b.
18. Does this place have 10 acres or more? (109)
1 ☐ Yes, 10 acres or more
2 ☐ No, less than 10 acres

15 ☐	45,000–49,999		

20. What type of offstreet parking facilities are available on this property for the use of the intended occupants? *(Read all answer categories)* (043)
1 ☐ Offstreet but not covered
2 ☐ Carport
3 ☐ One car garage
4 ☐ Two car garage
5 ☐ Three or more car garage
6 ☐ None
(Skip to 26a)

21. What is the MONTHLY rent?
(Mark the frequency of payment box and enter the MONTHLY rent. If rent is not to be paid by the month, compute the MONTHLY rent in the "Notes" space, and enter the MONTHLY rent on the line provided.)
(Include site rent for mobile homes if it is to be paid separately.)
(146) $ _____ . 00 Per month
(147)
1 ☐ More frequently than once a month
2 ☐ Less frequently than once a month
3 ☐ Once a month
Notes

22. Is this house (apartment) in a public housing project; that is, is it owned by a local housing authority or other local public agency? (151)
1 ☐ Yes
2 ☐ No

23a. In addition to rent, does the renter also pay for electricity? (153)
1 ☐ Yes
2 ☐ No, included in rent
3 ☐ No, electricity not used

b. In addition to rent, does the renter also pay for gas? (155)
1 ☐ Yes
2 ☐ No, included in rent
3 ☐ No, gas not used

c. In addition to rent, does the renter also pay for water? (157)
1 ☐ Yes
2 ☐ No, included in rent or no charge

d. In addition to rent, does the renter also pay for oil, coal, kerosene, wood, or any other fuel? (159)
1 ☐ Yes
2 ☐ No, included in rent
3 ☐ No, these fuels not used or obtained free

FORM AHS-82 (7-2-80) Page 6

Section IIB – VACANT UNITS – Continued

24. In addition to rent, does the renter also pay for garbage (food waste) collection? (161) 1 ☐ Yes 2 ☐ No

25. Is this house (apartment) part of a condominium? (065) 1 ☐ Yes, part of a condominium 2 ☐ No

OBSERVATION

26a. Is the unit boarded-up? (239) 1 ☐ Yes 2 ☐ No

OBSERVATION

b. Are there any buildings (other than this building) that appear to be abandoned or are there any buildings with windows broken or boarded-up on this street? (240) 1 ☐ Yes 2 ☐ No

27a. How many stories (floors) are in this house (building)? Do NOT count the basement.
(Mark mobile homes by observation.)
(031) 1 ☐ One 2 ☐ Two 3 ☐ Three } *Skip to Check Item C*
4 ☐ Four to six
5 ☐ Seven to twelve
6 ☐ Thirteen or more

OBSERVATION

b. Is there a passenger elevator in this building? (032) 1 ☐ Yes 2 ☐ No

CHECK ITEM C
(See Control Card item 27a)
☐ One-unit structure, or a mobile home or trailer – *Skip to Check Item D*
☐ Two-or-more-unit structure – *Ask 28a*

OBSERVATION

28a. Do the public halls in this building have light fixtures? (242) 1 ☐ Yes 2 ☐ No ..... 3 ☐ No public halls } *Skip to 29a*

b. Are the light fixtures in working order? (243) 1 ☐ All in working order 2 ☐ Some in working order 3 ☐ None in working order

29a. Are there loose, broken, or missing steps on any common stairways inside this building or attached to this building? (244) 1 ☐ Yes 2 ☐ No 3 ☐ No common stairways – *Skip to 30*

b. Are all stair railings firmly attached? (245) 1 ☐ Yes 2 ☐ No 3 ☐ No stair railings

OBSERVATION

30. How many stories (floors) are there from the main entrance of the building to the main entrance of the apartment? (289) 1 ☐ None, on same floor 2 ☐ One (up or down) 3 ☐ Two or more (up or down)

CHECK ITEM D
☐ Urban box marked in Control Card item 37a – *Skip to Check Item EE, page 44*
Rural box marked in Control Card item 37a AND
☐ "Yes" in Control Card item 37c or 37d – *Ask 31*
☐ "No," "NA" or "DK" in Control Card item 37c or 37d – *Skip to Check Item EE, page 44*

31. During the past 12 months did sales of crops, livestock and other farm products from this place amount to $1,000 or more? (425) 1 ☐ Yes 2 ☐ No } *Skip to Check Item EE, page 44*

CHECK ITEM C
Reference person lived here last 90 days *(See Check Item A(1), page 13)*
☐ Yes – *Ask 40a*
☐ No – *Skip to 41*

40a. At any time in the last 90 days were you COMPLETELY without running water?
(068) 1 ☐ Yes 2 ☐ No – *Skip to 41*

b. Were you completely without running water for 6 consecutive hours or more?
(069) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know } *Skip to 41*

c. How many times?
(070) 1 ☐ 1 2 ☐ 2 3 ☐ 3 or more

d. What was the reason (most common reason) you were completely without water for 6 consecutive hours or more – was it because of problems inside the building or problems outside the building?
(071) 1 ☐ Inside – *Specify problem* ↙ _____
2 ☐ Outside – *Specify problem* ↙ _____

41. Do you have complete plumbing facilities in this house (building); that is, hot and cold piped water, a flush toilet and a bathtub or shower which are available for your use?
(072) 1 ☐ Yes – For this household only 2 ☐ Yes – Also used by another household 3 ☐ No } *Skip to 44a*

42. A complete bathroom is a room with a flush toilet, bathtub or shower, and a washbasin with piped water. A half bathroom has at least a flush toilet or a bathtub or shower, but does not have all the facilities for a complete bathroom. How many complete bathrooms and half bathrooms do you have?
(Mark only one box)
(073) 1 ☐ Complete plumbing facilities but not in one room
2 ☐ 1 complete bathroom
3 ☐ 1 complete bathroom plus half bath with no flush toilet
4 ☐ 1 complete bathroom plus half bath with flush toilet
5 ☐ 2 complete bathrooms
6 ☐ More than 2 complete bathrooms } *Skip to 44a*

CHECK ITEM D
Reference person lived here last 90 days *(See Check Item A(1), page 13)*
☐ Yes – *Ask 43a*
☐ No – *Skip to 44a*

43a. At any time in the last 90 days was there a breakdown in your flush toilet; that is, was it COMPLETELY unusable?
(074) 1 ☐ Yes 2 ☐ No – *Skip to 44a*

b. Did any of these breakdowns last 6 consecutive hours or more?
(075) 1 ☐ Yes 2 ☐ No – *Skip to 44a*

c. How many of these breakdowns were there?
(076) 1 ☐ 1 2 ☐ 2 3 ☐ 3 4 ☐ 4 or more

d. What was the reason (most common reason) you were completely without the use of your flush toilet for 6 consecutive hours or more – was it because of problems inside the building or problems outside the building?
(077) 1 ☐ Inside – *Specify problem* ↙ _____
2 ☐ Outside – *Specify problem* ↙ _____

Section IIIB – OCCUPIED UNITS *(Include URE)* – Continued

44a. Is this house (building) connected to a public sewer?
(078) 1 ☐ Yes – *Skip to Check Item E* 2 ☐ No

b. What means of sewage disposal do you use?
(079) 1 ☐ Septic tank or cesspool
2 ☐ Chemical toilet
3 ☐ Privy
4 ☐ Use facilities in another structure
5 ☐ Other – *Specify* ↙ _____ } *Skip to 46*

CHECK ITEM E
Reference person lived here last 90 days *(See Check Item A(1), page 13)*
☐ Yes – *Ask 45a*
☐ No – *Skip to 46*

45a. At any time in the last 90 days was there a breakdown in your public sewer (septic tank or cesspool); that is, was it COMPLETELY unusable?
(080) 1 ☐ Yes 2 ☐ No – *Skip to 46*

b. Did any of these breakdowns last 6 consecutive hours or more?
(081) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know } *Skip to 46*

c. How many of these breakdowns were there?
(082) 1 ☐ 1 2 ☐ 2 3 ☐ 3 or more

46. How is your house (apartment) heated – by gas, oil, electricity, or with some other fuel?
Gas →
(083) 1 ☐ From underground pipes serving the neighborhood
2 ☐ Bottled, tank, or LP
3 ☐ Fuel oil, kerosene, etc.
4 ☐ Electricity
5 ☐ Coal or coke
6 ☐ Wood
7 ☐ Other fuel
8 ☐ No fuel used

47. What type of heating equipment does your house (apartment) have?
(Mark heating equipment used most)
SHOW FLASHCARD B
(084) 1 ☐ A central warm-air furnace with ducts in individual rooms
2 ☐ A heat pump
3 ☐ Steam or hot water system
4 ☐ Built-in electric units (permanently installed in wall, ceiling, or baseboard)
5 ☐ A floor, wall, or pipeless furnace
6 ☐ Room heater(s) WITH flue or vent burning gas, oil, or kerosene
7 ☐ Room heater(s) WITHOUT flue or vent burning gas, oil, or kerosene
8 ☐ Fireplaces, stoves, or portable room heaters } *Skip to Check Item G*
9 ☐ Unit has no heating equipment – *Skip to 52a*

CHECK ITEM I
☐ If "Yes" was marked in any of the six previous questions 55b, 56, 57a, 57b, 58a, and/or 58b – Ask 59
☐ All others – Skip to Check Item J

59. Is . . . (Specify the condition(s) mentioned in any of the six previous questions) so objectionable that you would like to move from this house (apartment)? (106) 1 ☐ Yes 2 ☐ No

CHECK ITEM J
Reference person lived here last 90 days (See Check Item A(1), page 13)
☐ Yes – Ask 60a
☐ No – Skip to Check Item K

60a. At any time in the last 90 days have you seen any mice or rats, or signs of mice or rats in this house (building)? (107) 1 ☐ Yes 2 ☐ No – Skip to Check Item K

b. Do you know whether they were mice or rats? (433) 1 ☐ Yes, mice 2 ☐ Yes, rats 3 ☐ Yes, mice and rats 4 ☐ Don't know

c. Is this house (building) serviced by an exterminator for mice or rats regularly, only when needed, irregularly, or not at all? (108) 1 ☐ Regularly 2 ☐ Only when needed 3 ☐ Irregularly 4 ☐ Not at all

CHECK ITEM K
TENURE (cc item 25a)
☐ OWNED AS A COOPERATIVE – Skip to 79, page 24
☐ OWNED AS A CONDOMINIUM – Skip to 62
OWNED OR BEING BOUGHT (Regular ownership)
(See cc item 27a) ☐ One-unit structure, or a mobile home or trailer – Go to 61 ☐ Two-or-more-unit structure – Skip to 79, page 24
RENTED FOR CASH
(See cc item 27a) ☐ One-unit structure – Go to 61 ☐ Two-or-more-unit structure, or a mobile home or trailer – Skip to 70, page 22
OCCUPIED WITHOUT PAYMENT OF CASH RENT
(See cc item 27a) ☐ One-unit structure – Go to 61 ☐ Two-or-more-unit structure, or a mobile home or trailer – Skip to Check Item N, page 23

OBSERVATION – If rural transcribe from cc item 37b.
61. Does this place have 10 acres or more? (109) 1 ☐ Yes 2 ☐ No

CHECK ITEM L
(See Check Item K)
OWNED OR BEING BOUGHT
If this is a –
☐ One-unit structure on less than 10 acres and there is no commercial establishment or medical or dental office on the property ("No" in Control Card items 27e and 27f) – Ask 62
☐ Mobile home or trailer on less than 10 acres – Skip to 63a
☐ All others – Skip to 79, page 24
RENTED FOR CASH
If this is a –
☐ One-unit structure on less than 10 acres – Skip to 70, page 22
☐ One-unit structure on 10 acres or more – Skip to 79, page 24
OCCUPIED WITHOUT PAYMENT OF CASH RENT
If this is a –
☐ One-unit structure on less than 10 acres – Skip to Check Item N, page 23
☐ One-unit structure on 10 acres or more – Skip to 79, page 24

Section IIIB – OCCUPIED UNITS (Include URE) – Continued

62. How much do you think this property, that is house and lot, (condominium unit) would sell for on today's market?
SHOW FLASHCARD C

(110)
1 ☐ Less than $5,000
2 ☐ $5,000–$7,499
3 ☐ 7,500– 9,999
4 ☐ 10,000–12,499
5 ☐ 12,500–14,999
6 ☐ 15,000–17,499
7 ☐ 17,500–19,999
8 ☐ 20,000–22,499
9 ☐ 22,500–24,999
10 ☐ 25,000–27,499
11 ☐ 27,500–29,999
12 ☐ 30,000–34,999
13 ☐ 35,000–39,999
14 ☐ 40,000–44,999
15 ☐ 45,000–49,999
16 ☐ 50,000– 54,999
17 ☐ 55,000– 59,999
18 ☐ 60,000– 64,999
19 ☐ 65,000– 69,999
20 ☐ 70,000– 74,999
21 ☐ 75,000– 79,999
22 ☐ 80,000– 89,999
23 ☐ 90,000– 99,999
24 ☐ 100,000–124,999
25 ☐ 125,000–149,999
26 ☐ 150,000–199,999
27 ☐ 200,000–249,999
28 ☐ 250,000–299,999
29 ☐ 300,000 or more

CHECK ITEM M
(See Control Card item 25a)
☐ OWNED AS A CONDOMINIUM – Skip to 79, page 24
☐ All others – Skip to 64

63a. Do you own the mobile home (trailer) SITE or is it rented? (111) 1 ☐ Owned – Skip to c 2 ☐ Rented – Ask b

b. What is the MONTHLY rent for the site? 0 ☐ Occupied without payment of cash rent (112) $_____.00

c. Do you have an installment loan or contract on this mobile home (trailer) or do you own it free and clear? (113) 1 ☐ Installment loan or contract – Skip to 65a 2 ☐ Owned free and clear – Skip to 66a

64. Do you have a mortgage, deed of trust, or land contract on this property; that is house and lot, or do you own it free and clear? (114) 1 ☐ Mortgage, deed of trust, or land contract 2 ☐ Owned free and clear – Skip to 66a

65a. In regard to the mortgage (loan), what are the required payments to the lender? If more than one mortgage (loan) on this property (mobile home) give total amount of payments.
(If there are separate loans on the mobile home and its site, combine amounts.)
(115) $_____.00 PER
(116) 1 ☐ Month 2 ☐ Year ☐ Other – Specify_____

b. Is regard to the mortgage (loan), do the required payments include –
(1) Real estate taxes on this property? (117) 1 ☐ Yes 2 ☐ No
(2) Fire and hazard insurance? (118) 1 ☐ Yes 2 ☐ No

c. What kind of mortgage (loan) do you have?
SHOW FLASHCARD D
(119) 1 ☐ Federal Housing Administration 2 ☐ Veterans Administration 3 ☐ Farmers Home Administration 4 ☐ None of the above } Skip to 67a

Facsimile of the Annual Housing Survey Questionnaire: 1981—Continued

Section IIIB – OCCUPIED UNITS (*Include URE*) – Continued

66a. Did you place or assume a mortgage (loan) when you acquired this property (mobile home)? (120) 1 ☐ Yes – *Skip to 67a* 2 ☐ No

b. How did you acquire this property (mobile home)? (121) 1 ☐ Inheritance or gift 2 ☐ Paid all cash 3 ☐ Other manner – *Specify* _____

NOTE – *Ask all categories in 67a before asking 67b.*

67a.	67b.
(1) Do you pay for electricity? (122) 1 ☐ Yes 2 ☐ No	(1) In the past 12 months, what was the average MONTHLY cost for electricity? (123) $_____.00
(2) Do you pay for gas? (124) 1 ☐ Yes 2 ☐ No	(2) In the past 12 months, what was the average MONTHLY cost for gas? (125) $_____.00
(3) Do you pay for oil, coal, kerosene, wood, OR any other fuel? (126) 1 ☐ Yes 2 ☐ No, these fuels not used or obtained free	(3) What is the YEARLY cost for oil, coal, kerosene, wood and any other fuel? (127) $_____.00
(4) Do you pay for fire and hazard insurance? *(Also include if part of mortgage payments.)* (128) 1 ☐ Yes 2 ☐ No	(4) What is the YEARLY cost for fire and hazard insurance? (129) $_____.00

Section IIIB – OCCUPIED UNITS (Include URE) – Continued

CHECK ITEM N (See Control Card item 27a)
- ☐ Mobile home or trailer – Ask 71a
- ☐ All others – Skip to 72

71a. Do you own the mobile home site or is it rented? (148) 1 ☐ Owned – Skip to 74a; 2 ☐ Rented

b. What is the MONTHLY rent for the site? (149) $ _____ .00; 0 ☐ Occupied without payment of cash rent – Skip to 72

c. Is the site rent included with the rent for the mobile home? (150) 1 ☐ Yes; 2 ☐ No

72. Is this house (apartment) in a public housing project; that is, is it owned by a local housing authority or other local public agency? (151) 1 ☐ Yes – Skip to 74a; 2 ☐ No

73. Are you paying a lower rent because the Federal, State, or local Government is paying part of the cost? (152) 1 ☐ Yes; 2 ☐ No

NOTE – Ask 74a for all categories before asking 74b. Exclude phrase "In addition to rent" for sample units OCCUPIED WITHOUT PAYMENT OF CASH RENT.

NOTE – Ask 74b only for those categories in 74a which were answered "Yes"

74a. (1) In addition to rent, do you pay for electricity? (153) 1 ☐ Yes; 2 ☐ No, included in rent or supplied free; 3 ☐ No, electricity not used

74b. (1) In the past 12 months, what was the average MONTHLY cost for electricity? (154) $ _____ .00

(2) In addition to rent, do you pay for gas? (155) 1 ☐ Yes; 2 ☐ No, included in rent or supplied free; 3 ☐ No, gas not used

(2) In the past 12 months, what was the average MONTHLY cost for gas? (156) $ _____ .00

(3) In addition to rent, do you pay for water? (157) 1 ☐ Yes; 2 ☐ No, included in rent or no charge

(3) What is the YEARLY cost for water? (158) $ _____ .00

(4) In addition to rent, do you pay for oil, coal, kerosene, wood, OR any other fuel? (159) 1 ☐ Yes; 2 ☐ No, included in rent; 3 ☐ No, these fuels not used or obtained free

(4) What is the YEARLY cost for oil, coal, kerosene, wood, and any other fuel? (160) $ _____ .00

Notes

Section IIIB – OCCUPIED UNITS (Include URE) – Continued

75a. (In addition to your rent) do you pay for garbage (food waste) collection? (161) 1 ☐ Yes; 2 ☐ No – Skip to 76

b. What is the YEARLY cost? (162) $ _____ .00

76. Is this house (apartment) part of a condominium? (065) 1 ☐ Yes, part of a condominium; 2 ☐ No

CHECK ITEM O (See Check Item K, page 19)
- ☐ Rented for cash – Ask 77a
- ☐ Occupied without payment of cash rent – Skip to 79

77a. Do you rent this apartment (house) furnished or unfurnished? (163) 1 ☐ Furnished; 2 ☐ Unfurnished – Skip to 78a

b. Is the cost of this furniture included in the rent, or do you pay for it separately? (164) 1 ☐ Included in rent – Skip to 78a; 2 ☐ Separately

c. What is the MONTHLY cost? (166) $ _____ .00

78a. Are offstreet parking facilities available in connection with this building? (167) 1 ☐ Yes; 2 ☐ No – Skip to 80

b. Do you rent such a space? (168) 1 ☐ Yes; 2 ☐ No or available at no extra charge – Skip to 79

c. Is the cost of the parking space included in the $ . . . (rent entered in 70) or do you pay for it separately? (169) 1 ☐ Included in rent – Skip to 79; 2 ☐ Separately

d. What is the MONTHLY cost for this parking space? (170) $ _____ .00

79. What type of offstreet parking facilities are currently available on this property for your use? (Read all answer categories) (043) 1 ☐ Offstreet but not covered; 2 ☐ Carport; 3 ☐ One car garage; 4 ☐ Two car garage; 5 ☐ Three or more car garage; 6 ☐ None

80. How many cars and trucks are available for regular use by members of your household? Exclude trucks of more than one-ton capacity. (Count company cars and trucks kept at home.) (175) 1 ☐ None; 2 ☐ One; 3 ☐ Two; 4 ☐ Three; 5 ☐ Four or more

Facsimile of the Annual Housing Survey Questionnaire: 1981—Continued

CHECK ITEM P

☐ URE interview *(See item 7, page 1)* – *Skip to 103, page 31*
(See Check Item A(3), page 13)
☐ Reference person moved here during the last 12 months – *Ask 81*
☐ Reference person has lived here 12 months or longer – *Skip to 100a, page 30*

81. The following questions are about the place where . . . (reference person) lived before moving here. What was the address of . . .'s (reference person) previous residence?

Address *(Number and street)*

City or town

County | State | ZIP code

OR

(177) 1 ☐ Outside the United States – *Skip to 100a, page 30*

Notes

82a. Please look at this card.

SHOW FLASHCARD F

What are the reasons . . . (reference person) moved FROM that residence?

(Mark all answers given)

EMPLOYMENT
(401) * 1 ☐ Job transfer
2 ☐ To look for work
3 ☐ To take a new job
4 ☐ Entered or left U.S. Armed Forces
5 ☐ Retirement
6 ☐ Commuting reasons
(402) * 7 ☐ To attend school
8 ☐ Other employment reasons – *Specify*

FAMILY
(403) * 9 ☐ Needed larger house or apartment
10 ☐ Divorced or separated
11 ☐ Widowed
(404) * 12 ☐ To be closer to relatives
13 ☐ Newly married
14 ☐ Family increased
(405) * 15 ☐ Family decreased
16 ☐ To establish own household
17 ☐ Other family reasons – *Specify*

OTHER
(406) * 18 ☐ Neighborhood overcrowded
19 ☐ Change in racial or ethnic composition of neighborhood
20 ☐ Crime
(407) * 21 ☐ Wanted neighborhood with children
22 ☐ Wanted neighborhood without children
23 ☐ Wanted better neighborhood
(408) * 24 ☐ Wanted more expensive place or better investment
25 ☐ Wanted to own residence
26 ☐ Wanted better house
(409) * 27 ☐ Wanted to rent residence
28 ☐ Wanted residence with more conveniences
29 ☐ Lower rent or less expensive house
(410) * 30 ☐ Wanted change of climate
31 ☐ Displaced by urban renewal, highway construction or other public activity
32 ☐ Displaced by private action
(411) * 33 ☐ Schools
34 ☐ Natural disaster
35 ☐ Other – *Specify*

CHECK ITEM Q

☐ Two or more boxes marked in item 82a – *Ask 82b*
☐ If only ONE box is marked in item 82a – *Transcribe code to Item 82b and go to 83a*

82b. Of the reasons you just mentioned, what was the MAIN reason . . . (reference person) moved from that residence?

(178) * ☐☐ Box number of MAIN reason

Facsimile of the Annual Housing Survey Questionnaire: 1981—Continued

Section IIIB – OCCUPIED UNITS – Continued

83a. Was . . . *(reference person)* the person or one of the persons who owned or rented the previous residence at the time he(she) moved?

(179) ☐ Yes
- 1 ☐ Respondent is the reference person – *Skip to INTERVIEWER INSTRUCTION*
- 2 ☐ Respondent is not the reference person – *Ask 83b*

3 ☐ No – *Skip to 100a, page 30*

b. Were you also a member of . . .'s *(reference person)* household in the previous residence?

(180) 1 ☐ Yes
2 ☐ No

INTERVIEWER INSTRUCTION If the respondent is the reference person, or "Yes" was marked in 83b – *Ask questions 84–99 in terms of "your" previous residence.* If "No" was marked in 83b – *Ask questions 84–99 in terms of reference person's previous residence.*

84. How many rooms were in . . .'s (your) *(reference person)* previous residence? Do not count bathrooms, porches, balconies, halls, foyers, or half-rooms.

(181) _____ Number

85. How many bedrooms were in . . .'s (your) *(reference person)* previous residence? Count rooms used mainly for sleeping, even if used for other purposes.

(182) _____ Number
0 ☐ None

86. How many persons were living in . . .'s (your) *(reference person)* previous residence at the time . . . (you) *(reference person)* moved?

(183) _____ Number

87. Were there complete plumbing facilities in the building where . . . (you) *(reference person)* lived before; that is, hot and cold piped water, a flush toilet, and a bathtub or shower?

☐ Yes
Were these facilities used by . . .'s (your) *(reference person)* household ONLY?
(184) 1 ☐ Yes – Used for that household only
2 ☐ No – Also used by another household
3 ☐ No

88. How many living quarters, both occupied and vacant, were in the building where . . .'s (your) *(reference person)* previous residence was located?

(185) 1 ☐ Mobile home or trailer (no permanent room attached)
2 ☐ One, detached from any other building
3 ☐ One, attached to one or more buildings
4 ☐ 2
5 ☐ 3 or 4
6 ☐ 5 to 9
7 ☐ 10 to 19
8 ☐ 20 to 49
9 ☐ 50 or more

89a. Was . . .'s (your) *(reference person)* previous residence owned or being bought by someone in the household?

(Probe to be asked only for cooperatives) To the Census Bureau, a cooperative is property which is owned by a corporation. Each shareholder is entitled to occupy an individual unit. Is this what you mean when you say this is a cooperative?

☐ Yes
Was it owned as a cooperative or condominium?
(186) 1 ☐ No – *Skip to Check Item R*
2 ☐ Yes, a cooperative – *Ask probe and skip to 100a, page 30*
3 ☐ Yes, a condominium – *Skip to 91*
☐ No – *Ask 89b*

b. Was it rented for cash rent or occupied without payment of cash rent?

(186) 4 ☐ Rented for cash
5 ☐ Occupied without payment of cash rent

Section IIIB – OCCUPIED UNITS – Continued

CHECK ITEM R

TENURE OF PREVIOUS RESIDENCE *(See item 89, page 27)*

OWNED OR BEING BOUGHT *(See item 88, page 27)*
☐ One-unit structure – *Ask 90a*
☐ Two-or-more-unit structure, or a mobile home or trailer – *Skip to 100a, page 30*

RENTED FOR CASH OR OCCUPIED WITHOUT PAYMENT OF CASH RENT *(See item 88, page 27)*
☐ One-unit structure – *Skip to 92*
☐ Two-or-more-unit structure, or a mobile home or trailer – *Skip to Check Item S*

90a. Was that house on a place of 10 acres or more?

(187) 1 ☐ Yes – *Skip to 100a, page 30*
2 ☐ No

b. Was there a commercial establishment or medical or dental office on the property?

(188) 1 ☐ Yes – *Skip to 100a, page 30*
2 ☐ No

91. What was the value of that property when . . . (you) *(reference person)* moved; that is, about how much did that property (house and lot) (condominium unit), sell for, or would it have sold for, had it been for sale?

SHOW FLASHCARD C

99a. Were offstreet parking facilities available in connection with the building? (208) 1 ☐ Yes 2 ☐ No – Skip to 100a

b. Did . . . (you) (reference person) rent such a space? (209) 1 ☐ Yes 2 ☐ No or available at no extra charge – Skip to 100a

c. Was the cost of the parking space included in the $ . . . (rent entered in 93), or did . . . (you) (reference person) pay for it separately? (210) 1 ☐ Included in rent 2 ☐ Separately

Section IIIB – OCCUPIED UNITS – Continued

NOTE – Ask all categories in 100a before proceeding to 100b

NOTE – Ask 100b only for those categories in 100a which were answered "Yes."

100a. The following questions are concerned with different aspects of your PRESENT neighborhood. Here is a list of conditions which many people have in their neighborhoods. Which, if any, do you have?		**b.** Does the (condition) bother you?	**c.** Is it so objectionable that you would like to move from the neighborhood?
(1) Street (highway) noise? . . .	(213) 1 ☐ Yes 2 ☐ No	(1) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(2) Heavy traffic?	(214) 1 ☐ Yes 2 ☐ No	(2) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(3) Streets or roads continually in need of repair, or open ditches?	(215) 1 ☐ Yes 2 ☐ No	(3) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(4) Roads impassable due to snow, water, etc.?	(216) 1 ☐ Yes 2 ☐ No	(4) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(5) Poor street lighting?	(217) 1 ☐ Yes 2 ☐ No	(5) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(6) Neighborhood crime?	(218) 1 ☐ Yes 2 ☐ No	(6) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(7) Trash, litter, or junk in the streets (roads), or on empty lots, or on properties in this neighborhood?	(219) 1 ☐ Yes 2 ☐ No	(7) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(8) Boarded-up or abandoned structures?	(220) 1 ☐ Yes 2 ☐ No	(8) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(9) Occupied housing in rundown condition?	(221) 1 ☐ Yes 2 ☐ No	(9) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(10) Industries, businesses, stores, or other nonresidential activities? . . 6	(222) 1 ☐ Yes 2 ☐ No	(10) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(11) Odors, smoke, or gas?	(223) 1 ☐ Yes 2 ☐ No	(11) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(12) Noise from airplane traffic?	(224) 1 ☐ Yes 2 ☐ No	(12) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No

NOTE – If "Yes" was answered for one or more of the categories in 100a, ask 100b.

NOTES

Facsimile of the Annual Housing Survey Questionnaire: 1981—Continued

Section IIIB – OCCUPIED UNITS (Include URE) – Continued

NOTE – Ask ALL categories in 101a before proceeding to 101b.

101. The following questions are concerned with neighborhood services.

a. Do you have –

NOTE – Ask 101b only for those categories in 101a which were answered "No."

	101a	101b. Is the (service) so unsatisfactory that you would like to move from the neighborhood?
(1) Satisfactory public transportation?	(225) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know	(226) 1 ☐ Yes 2 ☐ No
(2) Satisfactory schools?	(227) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know	(228) 1 ☐ Yes 2 ☐ No
(3) Satisfactory neighborhood shopping such as grocery stores or drug stores?	(229) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know	(230) 1 ☐ Yes 2 ☐ No
(4) Satisfactory police protection?	(231) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know	(232) 1 ☐ Yes 2 ☐ No
(5) Satisfactory outdoor recreation facilities such as parks, playgrounds or swimming pools?	(233) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know	(234) 1 ☐ Yes 2 ☐ No
(6) Satisfactory hospitals or health clinics?	(235) 1 ☐ Yes 2 ☐ No 3 ☐ Don't know	(236) 1 ☐ Yes 2 ☐ No

NOTE – If "No" was answered for one or more categories in 101a, ask 101b.

102a. In view of all the things we have talked about, how would you rate this NEIGHBORHOOD as a place to live – would you say it is excellent, good, fair or poor? (237) 1 ☐ Excellent 2 ☐ Good 3 ☐ Fair 4 ☐ Poor

b. How would you rate this HOUSE (building) as a place to live – would you say it is excellent, good, fair or poor? (238) 1 ☐ Excellent 2 ☐ Good 3 ☐ Fair 4 ☐ Poor

OBSERVATION

103. Are there any buildings that appear to be abandoned or are there any buildings with windows broken or boarded-up on this street? (240) 1 ☐ Yes 2 ☐ No

CHECK ITEM U

☐ URE Interview (See item 7, page 1) – Ask 104
(See Control Card item 27a)
☐ A one-unit structure, or a mobile home or trailer – Skip to 107
☐ Two-or-more-unit structure – Skip to 105a

Section IIIB – OCCUPIED UNITS (Include URE) – Continued

(Ask for URE interviews only)

104. Is this UNIT intended for year-round use, for occupancy only on a seasonal basis or for use by migrant workers? (241) 8 ☐ YEAR ROUND (occupied temporarily at time of interview) Seasonal 10 ☐ Summers only 11 ☐ Winters only 12 ☐ Other seasonal – Specify in notes 9 ☐ Migratory } Skip to 110

OBSERVATION

105a. Do the public halls in this building have light fixtures? (242) 1 ☐ Yes 2 ☐ No 3 ☐ No public halls } Skip to 106a

b. Are the light fixtures in working order? (243) 1 ☐ All in working order 2 ☐ Some in working order 3 ☐ None in working order

106a. Are there loose, broken, or missing steps on any common stairways inside this building or attached to this building? (244) 1 ☐ Yes 2 ☐ No 3 ☐ No common stairways – Skip to 107

b. Are all stair railings firmly attached? (245) 1 ☐ Yes 2 ☐ No 3 ☐ No stair railings

107. In the last 12 months, how much did . . . . earn in wages, salaries, tips and commissions before taxes and deductions?
(Obtain income for reference person and all household members 15+ RELATED TO REFERENCE PERSON by blood, marriage, or adoption. If the family has more than six members 15+ enter in the "Notes," beginning with the sixth person and then combine the amounts for all these persons on the last "Amount" line.)

Line No.	Amount (Dollars only)
(246) ____	(247) $ ____ .00
(248) ____	(249) $ ____ .00
(250) ____	(251) $ ____ .00
(252) ____	(253) $ ____ .00
(254) ____	(255) $ ____ .00
(256) ____	(257) $ ____ .00

Notes

108a. In the past 12 months, how much did this family (you) earn in net income from its (your) own business, professional practice or partnership?
(Exclude income previously reported in item 107. Probe if identical amounts are reported. Indicate that identical amounts are correct by marking this box ☐).
(258) $ ____ .00
(259) 1 ☐ None 2 ☐ Lost money (Enter amount LOST on line above)

b. In the past 12 months, how much did this family (you) earn in net income from its (your) own farm or ranch?
(Exclude income previously reported in items 107 and 108a. Probe if identical amounts are reported. Indicate that identical amounts are correct by marking this box ☐).
(260) $ ____ .00
(261) 1 ☐ None 2 ☐ Lost money (Enter amount LOST on line above)

Facsimile of the Annual Housing Survey Questionnaire: 1981—Continued

Section IIIB – OCCUPIED UNITS (Include URE) – Continued

NOTE – Ask all categories in 109a before asking 109b.

(Obtain income for reference person and all household members 15+ RELATED TO REFERENCE PERSON by blood, marriage, or adoption.)

109a. In the past 12 months, did any member of this family (you) receive any money from –		*NOTE – Ask 109b only for those categories in 109a. which were answered "Yes."* 109b. How much was received from (source of income) in the past 12 months?
(1) Social Security or Railroad Retirement payments?	(262) 1 ☐ Yes 2 ☐ No	(263) $ ____.00
(2) Estates, trusts or dividends?	(264) 1 ☐ Yes 2 ☐ No	(265) $ ____.00
(3) Interest on savings accounts or bonds?	(266) 1 ☐ Yes 2 ☐ No	(267) $ ____.00
(4) Net rental income?	(268) 1 ☐ Yes 2 ☐ No	(269) $ ____.00
(5) Welfare payments or other public assistance such as SSI?	(270) 1 ☐ Yes 2 ☐ No	(271) $ ____.00
(6) Unemployment compensation?	(272) 1 ☐ Yes 2 ☐ No	(273) $ ____.00
(7) Worker's compensation?	(274) 1 ☐ Yes 2 ☐ No	(275) $ ____.00
(8) Government employee pensions?	(276) 1 ☐ Yes 2 ☐ No	(277) $ ____.00
(9) Veterans payments?	(278) 1 ☐ Yes 2 ☐ No	(279) $ ____.00
(10) Private pensions or annuities?	(280) 1 ☐ Yes 2 ☐ No	(281) $ ____.00
(11) Alimony or child support?	(282) 1 ☐ Yes 2 ☐ No	(283) $ ____.00
(12) Regular contributions from persons not living in this household?	(284) 1 ☐ Yes 2 ☐ No	(285) $ ____.00
(13) Anything else?	(286) 1 ☐ Yes 2 ☐ No	(287) $ ____.00

NOTE – If "Yes" was answered for one or more of the categories in 109a, ask 109b. Exclude income previously reported in items 107 and 108. Probe if identical amounts are reported. Indicate that identical amounts are correct by marking this box ☐.

OBSERVATION – Fill for mobile home in group of 6 or more.

110. How many mobile homes are in this group? (288) 1 ☐ 6–99 2 ☐ 100 or more

OBSERVATION – Fill for 2 or more unit structures

111. How many stories (floors) are there from the main entrance of the building to the main entrance of the apartment? (289) 1 ☐ None, on same floor 2 ☐ One (up or down) 3 ☐ Two or more (up or down)

CHECK ITEM Y

☐ URE interview (See item 7, page 1) – *Skip to Check Item Y, page 37*
(See Control Card item IIb)
☐ Household contains household members 15+ NOT RELATED TO THE REFERENCE PERSON by blood, marriage or adoption – *Ask 112, page 34*
☐ All others – *Skip to Check Item W, page 36*

SAMPLE DESIGN

Annual Housing Survey—The estimates for each of the 15 SMSA's in this report series (H-170-81) are based on data collected from the 1981 Annual Housing Survey (AHS) which was conducted by the Bureau of the Census acting as collection agent for the Department of Housing and Urban Development.

The SMSA's selected for the AHS are interviewed on a rotating basis. The group of 15 SMSA's selected for interview during 1981 were interviewed previously in 1974 (1975 for Madison, Wis.) and 1977 (see the list of SMSA reports from the AHS in the introduction of this report).

The three largest SMSA's (Boston, Mass.; Detroit, Mich.; and Washington, D.C.-Md.-Va.) in the 1981 group of SMSA's were represented by a sample size of 15,000 designated housing units in the 1974 and 1977 surveys evenly divided between the central city and the balance of the respective SMSA. The 12 remaining SMSA's (Anaheim-Santa Ana-Garden Grove, Calif.; Dallas, Tex.; Fort Worth, Tex.; Madison, Wis.; Minneapolis-St. Paul, Minn.; Newark, N.J.; Orlando, Fla.; Phoenix, Ariz.; Pittsburgh, Pa.; Spokane, Wash.; Tacoma, Wash.; and Wichita, Kans.) in the 1981 group were represented by a sample of 5,000 designated housing units in the 1974 (1975 for Madison, Wis.) and 1977 surveys distributed proportionately between the central city and balance of the respective SMSA based on the distribution of total housing units in each sector.

In the 1974 survey, AHS sample units were divided among 12 panels with one-twelfth of the sample housing units being interviewed each month. Due to budget limitations, panel 3 was dropped from all SMSA's for the 1977 survey. Due to additional budget limitations for the 1981 survey, it also became necessary to drop panels 1, 2, 4, 5, 9, 11, and 12 from the Boston, Mass.; Detroit, Mich.; and Washington, D.C.-Md.-Va., SMSA's and panels 1 and 2 from the other 12 SMSA's. The designated sample size was reduced by two-thirds for the three largest SMSA's and by one-fourth for the other 12 SMSA's.

The interviewing was done for the three largest SMSA's during the period June 1981 through November 1981 with one-sixth of the sample housing units being visited each month. The interviewing was done for the remaining 12 SMSA's during the period April 1981 through December 1981 with one-ninth of the designated housing units visited each month.

In this SMSA, 3,885 housing units were eligible for interview. Of these sample housing units, 100 interviews were not obtained because, for occupied sample units, the occupants refused to be interviewed, were not at home after repeated visits, or were unavailable for some other reason; or, for vacant units, no informed respondent could be found after repeated visits. In addition to the 3,885 housing units eligible for interview, 258 units were visited but were not eligible for interview because they were condemned, unfit, demolished, converted to group quarters use, etc.

Designation of sample housing units for the 1981 survey—The sample housing units designated to be interviewed in the 1981

survey consisted of the following categories which are described in detail in the succeeding sections.

1. All sample housing units that were interviewed in the 1977 survey and remained in sample after the 1981 panel reduction.
2. All sample housing units that were type A noninterviews (i.e., units eligible to be interviewed) or type B noninterviews (i.e., units not eligible for interview at the time of the survey but which could become eligible in the future) in the 1977 survey and remained in sample after the 1981 panel reduction. (For a list of reasons for type A and type B noninterviews, see the facsimile of the 1981 AHS questionnaire, page App-20.)
3. All sample housing units that were selected from a listing of new residential construction building permits issued since the 1977 survey and remained in sample after the 1981 panel reduction. (This sample represented the housing units built in permit-issuing areas since the 1977 survey.)
4. All sample housing units that were added to sample segments in the nonpermit universe since the 1977 survey and remained in sample after the 1981 panel reduction. (This sample represented additions to the housing inventory in nonpermit-issuing areas since the 1977 survey.)
5. All sample housing units that were selected as part of the 1977 and 1981 Coverage Improvement Programs. (This sample represented most of the housing units which, until 1977, did not have a chance of selection.)

Selection of the original AHS-SMSA sample—The sample for the SMSA's which, in 1970, were 100-percent permit-issuing was selected from two sample frames—housing units enumerated in the 1970 Census of Population and Housing in areas under the jurisdiction of permit-issuing offices (the permit-issuing universe) and housing units constructed in permit-issuing areas since the 1970 census (the new construction universe). In addition, the sample for those SMSA's which were not 100-percent permit-issuing in 1970 included a sample selected from a third frame—those housing units located in areas not under the jurisdiction of permit-issuing offices (the nonpermit universe). In 1970, the following five SMSA's were 100-percent permit-issuing: Anaheim-Santa Ana-Garden Grove, Calif.; Boston, Mass.; Newark, N.J.; Phoenix, Ariz.; and Washington, D.C.-Md.-Va. The remaining 10 SMSA's contain a sample from the nonpermit universe.

Sampling operations, described in the following paragraphs, were performed separately within the central city and the balance of the SMSA for each of the sample frames. The overall sampling rate used to select the sample for each SMSA was determined by the size of the sample. Thus, for the three largest SMSA's, the overall sampling rate differed for the central city and the balance of the SMSA, since the sample was divided equally between the central city and the balance of the SMSA. The remaining SMSA's had an overall sampling rate about the same for the sample selected from both the central city and the balance of the SMSA, since the sample was distributed proportionately between the central city and the balance of the SMSA according to the distribution of the total housing units in each sector.

The major portion of the sample in each SMSA was selected from a file which represented the 20-percent sample of housing units enumerated in permit-issuing areas of the SMSA during the 1970 Census of Population and Housing. This file contained records for occupied housing units, vacant housing units, and housing units in certain special places or group quarters. Sampling operations were done separately for the special place and group quarters records, and for the occupied and vacant housing unit records. Before the sample was selected from the occupied and vacant housing unit records, the occupied housing unit records were stratified by race of head (non-Black/Black) and the vacant records were stratified into four categories pertaining to the value or rent associated with the vacant housing units. The occupied housing unit records were further stratified so that each unit was assigned to 1 of 50 strata according to its tenure, family size, and household income category as illustrated by the following table:

Household income	Tenure	
	Owner—Family size	Renter—Family size
	1 2 3 4 5+	1 2 3 4 5+
Under $3,000		
$3,000 to $5,999 . . .		
$6,000 to $9,999 . . .		
$10,000 to $14,999 .		
$15,000 and over . . .		

Thus, for this SMSA, the occupied housing unit records from the permit-issuing universe were assigned to 1 of 100 strata for either the central city or for the balance, and the vacant housing unit records were assigned to 1 of the 4 vacant strata for either the central city or for the balance of the SMSA. A sample selection procedure was then instituted that would produce one-half of the desired sample size. However, whenever a record was selected to be in sample, the housing unit record adjacent to it on the file was also selected to be in sample, thereby insuring the necessary designated sample size.

Before the sample was selected from the group quarters and special place records, the records were stratified by census tract and census enumeration district (ED) within the central city and within the balance of the SMSA. A sample of special place records was then selected by a procedure that produced one-quarter of the desired sample size. However, at the time of the survey, the housing units at each of the special places were listed and subsampled at a rate which produced an expected four sample units, thereby insuring the necessary designated sample size.

The second frame from which this SMSA sample was selected was a list of new construction building permits issued since 1970 (i.e., the new construction universe). The sample selection from

the list of new construction building permits was an independent operation within this SMSA. Prior to sample selection, the list of permits was chronologically stratified by the date the permits were issued, and clusters of an expected four (usually adjacent) housing units were formed. These clusters were then sampled for inclusion at the overall sampling rate.

For those SMSA's which were not 100-percent permit-issuing, the remainder of the AHS sample was selected from a frame consisting of areas not under the jurisdiction of permit-issuing offices (i.e., the nonpermit universe). The first step in the sampling operation for the nonpermit universe was the selection (using the overall sampling rate) of a sample of census enumeration districts within these areas. Prior to this sample selection, the ED's were stratified by census tract within the central city and within the balance of the SMSA. The probability of selection of an ED was proportionate to the following measure of size.

$$\frac{\text{Number of housing units in 1970 census ED} + \frac{\text{Group quarters population in 1970 census ED}}{3}}{4}$$

The sample ED's were then divided into segments; i.e., small land areas with well-defined boundaries having an expected size of four, or a multiple of four, housing units. At the time of the survey, those segments that did not have an expected size of four were further subdivided to produce an expected four sample housing units.

The next step was the selection of one of these segments within each sample ED. All housing units in existence at the time of interview in these selected segments were eligible for sample. Thus, housing units enumerated in the 1970 census as well as housing units built since the 1970 census are included.

1977-1981 additions to the housing inventory—In the permit-issuing universe, a sample of new construction building permits, issued since the 1977 survey, was selected to represent housing units built in permit-issuing areas since the 1977 survey. Sampling procedures were identical to those used in selecting the 1970-1977 new construction sample, which were described previously. In the nonpermit universe, sample segments were dependently recanvassed, using listing sheets from 1977, to identify any housing units missed in the 1977 survey or any housing units added since the 1977 survey.

Sample selection for the 1977 Coverage Improvement Program—The Coverage Improvement Program was undertaken to correct certain deficiencies in the AHS-SMSA sample from the permit-issuing and new construction universes. The coverage deficiencies included the following units:

1. New construction from building permits issued prior to January 1970, but completed after April 1, 1970.
2. Mobile homes placed in parks either missed during the 1970 census or established since the 1970 census.
3. Housing units missed in the 1970 census.
4. Housing units converted to residential use that were nonresidential at the time of the 1970 census.
5. Houses that have been moved onto their present site since the 1970 census.
6. Mobile homes placed outside parks since the 1970 census or vacant at the time of the 1970 census.

Each of the 15 SMSA's was previously interviewed in 1974 (1975 for Madison, Wis.) and 1977. The Coverage Improvement Program was conducted as part of the 1977 AHS with the Anaheim-Santa Ana-Garden Grove, Calif.; Dallas, Tex.; Minneapolis-St. Paul, Minn.; Pittsburgh, Pa.; and Spokane, Wash., SMSA's receiving some updating and refining as part of the 1981 AHS. The following discussion applies to both the prior year 1977 and the 1981 coverage improvement procedures. For the Anaheim-Santa Ana-Garden Grove, Calif.; Dallas, Tex.; Minneapolis-St. Paul, Minn.; Pittsburgh, Pa.; and Spokane, Wash., SMSA's, estimates of housing units added by a specific procedure reflect units added in the prior year as well as any additions that resulted from the updating and refining in 1981.

Coverage improvement for deficiency 1—A sample of new construction units, whose permits were issued before January 1970, but completed after April 1970, was selected for each of the 15 SMSA's. Two different procedures were used. For the first procedure, the sampling was carried out in two stages for one- and two-unit structures and in three stages for three-or-more-unit structures. Sample units selected from one- and two-unit structures were sampled at one-fourth the rate of units originally selected for the AHS-SMSA sample (regular AHS units), while sample units selected from three-or-more-unit structures were sampled at one-half the rate of regular AHS units.

The first stage was a sample of permit offices, and the second stage was a sample of the 1969 permits within each of the selected permit offices. In the Fort Worth, Tex., SMSA, an additional sample of 1968 permits for three-or-more-unit structures was included in the second-stage sampling. For the third stage, structures of size three or more units were divided into clusters of an expected size of two units and a sample of clusters was selected. This procedure was employed in the following SMSA's: Anaheim-Santa Ana-Garden Grove, Calif.; Fort Worth, Tex.; Madison, Wis.; Orlando, Fla.; Spokane, Wash.; and Wichita, Kans.

In the remaining 9 SMSA's, units whose permits were issued before January 1970, but which were completed after April 1970, were identified from the Survey of Construction (SOC), a survey of building permits conducted monthly by the Bureau of the Census. These units were then sampled at one-third the rate of regular AHS units. Since permits were not available for all sampled offices, this procedure was also used in parts of the Anaheim-Santa Ana-Garden Grove, Calif., SMSA to supplement the sample described above. These procedures added an estimated 2,056 new construction units to the coverage of the housing inventory of this SMSA.

Coverage improvement for deficiency 2—In permit-issuing areas, a sample of mobile homes placed in a park that was missed by the census or established after the census was selected in two stages. First, a sample of tracts was selected and canvassed.

All parks were listed and then matched back to the 1970 census to identify parks missed by the census and parks established after the census. Second, the parks were divided into clusters of an expected size of four sites and a sample of clusters was selected and interviewed. Each of the sample units represented the same number of units that the regular AHS sample units represented. This procedure added an estimated 3,236 units to the coverage of the housing inventory of this SMSA.

Coverage improvement for deficiencies 3-6—The remaining missed units were sampled by one of two procedures. The first procedure was designed to represent units from the following types of missed structures (structures that had no chance of selection for the AHS):

1. Structures missed in the 1970 census.
2. Structures that were completely nonresidential in the 1970 census but now contain units converted to residential use.
3. Mobile homes that had been placed outside parks since the 1970 census and have a utility hookup, or were on the site during the present survey but not occupied on April 1, 1970, or had no utility hookup but were occupied by persons with a usual residence elsewhere.
4. Houses that had been moved onto their present site since the 1970 census.

Initially, a subsample of AHS sample units was selected from the permit-issuing universe at a rate of 1 in 24. Then, succeeding structures in a defined path of travel to the right of the structure containing the sample unit were listed until eight structures (excluding the sample unit structure) were found that had been eligible to be selected for the AHS. Finally, the intervening structures that did not have a chance of selection in the AHS were identified and units within these structures were interviewed. In cases where the interviewer workload would have been too great, a representative subsample of units within these structures was selected.

The second procedure was designed to represent missed units from structures represented in the AHS. These missed units were:

1. Units missed in the 1970 census.
2. Units converted to residential use since the 1970 census in structures that contained some residential units in 1970.

First, a subsample of AHS housing units in multiunit structures of less than 10 units was selected from the permit-issuing universe. Second, for the multiunit structure selected above, all housing units were listed and matched to the 1970 census. Any missed housing units were then assigned for interview.

Based on a cost-benefit analysis, a decision was made not to apply both procedures during the 1977 Coverage Improvement Program to all SMSA's. A partial application of the first procedure, which did not include structures missed in the 1970 census, was instituted in the Anaheim-Santa Ana-Garden Grove, Calif.; and Spokane, Wash., SMSA's. These SMSA's did not receive application of the second procedure. The Dallas, Tex.; Minneapolis-St. Paul, Minn.; and Pittsburgh, Pa., SMSA's did not receive application of either procedure during the 1977 Coverage Improvement Program. The Anaheim-Santa Ana-Garden Grove, Calif.; Dallas, Tex.; Minneapolis-St. Paul, Minn.; Pittsburgh, Pa.; and the Spokane, Wash., SMSA's had the first procedure completed as part of the 1981 Coverage Improvement Program. The remaining 10 1981 SMSA's received the full application of both procedures as part of the 1977 Coverage Improvement Program.

The first procedure added an estimated 18,896 housing units to the coverage of the housing inventory of this SMSA, while the second procedure added an estimated 488 housing units.

1970 Census of Population and Housing—The estimates pertaining to the 1970 housing inventory (i.e., the housing inventory that existed at the time of the 1970 census) are based on either 20-, 15-, or 5-percent sample data collected in April 1970 for the Decennial Census of Population and Housing. A detailed description of the sample design employed for the 1970 census can be obtained in the 1970 Census of Housing report, Volume I, *Housing Characteristics for States, Cities, and Counties*, Part 1.

ESTIMATION

The 1981 AHS sample produced two types of estimates for each SMSA: Estimates pertaining to characteristics of the housing inventory at the time of the interview (i.e., the 1981 housing inventory) and estimates pertaining to characteristics of housing units removed from the housing inventory since 1977 (i.e., 1977-1981 lost units). Each type of estimate employed separate, although similar, estimation procedures.

1981 housing inventory—The AHS estimates of characteristics of the 1981 housing inventory were produced using a one-stage ratio estimation procedure for the Anaheim-Santa Ana-Garden Grove, Calif.; Dallas, Tex.; Fort Worth, Tex.; and Madison. Wis., SMSA's, a two-stage ratio estimation procedure for the Detroit, Mich.; Orlando, Fla.; Phoenix, Ariz.; and Wichita, Kans., SMSA's, and a three-stage ratio estimation procedure for the remaining seven SMSA's.

Prior to the implementation of the ratio estimation procedures, the basic weight (i.e., the inverse of the probability of selection) for each interviewed sample housing unit was adjusted to account for the noninterviews previously mentioned. This noninterview adjustment was done separately for occupied and vacant housing units. The noninterview adjustment factor was equal to the following ratio:

$$\frac{\text{Weighted count of interviewed housing units} + \text{Weighted count of noninterviewed housing units}}{\text{Weighted count of interviewed housing units}}$$

Within each sector of each SMSA, a noninterview factor was computed separately for 50 noninterview cells for sample housing units from the permit-issuing universe (where the cells consisted of one or more of the different strata used in the stratification of the universe as previously described). In addition, within each sector, separate noninterview factors were computed for one noninterview cell for conventional new construction sample housing units from both the nonpermit universe and the

coverage improvement universe, one noninterview cell for mobile homes and trailers from both the nonpermit universe and the coverage improvement universe, and one noninterview cell for other sample housing units from both the nonpermit universe and the coverage improvement universe (if units were not included in any of the previous cells).

The following ratio estimation procedure was employed for all sample housing units from the permit-issuing universe. This factor was computed separately for all sample housing units within each permit-issuing universe noninterview cell mentioned previously. The ratio estimation factor for each cell was equal to the following:

$$\frac{\text{1970 census count of housing units from the permit-issuing universe in the corresponding cell}}{\text{AHS sample estimate of 1970 housing units from the permit-issuing universe in the corresponding cell}}$$

For each SMSA, the numerators of the ratios were obtained from the 1970 Census of Population and Housing 20-percent file of housing units enumerated in areas under the jurisdiction of permit-issuing offices. The denominators of the ratios were obtained from weighted estimates of all the AHS sample housing units within the corresponding ratio estimation categories using the existing weight (i.e., the basic weight times the noninterview factor). The computed ratio estimation factor was then applied to the existing weight for each sample housing unit within the corresponding ratio estimation category.

This ratio estimation procedure was introduced to correct the probabilities of selection for samples in each of the strata used in the sample selection of the permit-issuing universe. Prior to the AHS sample selection within each SMSA, housing units already selected for other Census Bureau surveys were deleted from the permit-issuing universe. The same probability of selection was then applied to the remaining units to select the AHS sample. Since the number of housing units deleted from the AHS universe frame was not necessarily proportional among all strata, some variation in the actual probability of selection between strata were introduced during the AHS sample selection process.

The next ratio estimation procedure was applied in the Boston, Mass.; Detroit, Mich.; Minneapolis-St. Paul, Minn.; Newark, N.J.; Pittsburgh, Pa.; Spokane, Wash.; Tacoma, Wash.; and Washington, D.C.-Md.-Va., SMSA's. This procedure was utilized to adjust the central city/balance distribution of the weighted sample estimate of new construction housing units built since the last survey in permit-issuing areas to an independently derived estimate of this distribution.

This ratio estimation factor was calculated separately for the central city and balance of each SMSA and was applied to all new construction housing units from permit-issuing areas within the corresponding sector (central city or balance of the SMSA). This ratio estimation factor equaled the following:

$$\frac{\text{Independent estimate of the proportion of new construction housing units from permit-issuing areas built since the last survey in the corresponding sector of the SMSA}}{\text{Sample estimate of the proportion of new construction housing units from permit-issuing areas built since the last survey in the corresponding sector of the SMSA}}$$

The independent estimates of new construction were based upon the number of authorized building permits which were determined from the Survey of Construction (SOC). The sample estimates were obtained from the weighted estimate of the AHS-SMSA sample housing units after the first-stage ratio estimation procedure. The computed ratio estimation factor was then applied to the existing weight for all sample housing units classified within the corresponding ratio estimation cell.

The next ratio estimation procedure was applied in 10 SMSA's. This procedure involved the ratio estimation of the AHS-SMSA weighted sample estimate of the August 1981 housing inventory in each sector (central city and balance) for each SMSA to an independent estimate of total housing units for the corresponding sector. This ratio estimation factor equaled the following:

$$\frac{\text{Independent estimate of the August 1981 housing unit inventory for the corresponding sector of the SMSA}}{\text{AHS-SMSA sample estimate of the housing inventory for the corresponding sector of the SMSA}}$$

The independent estimates of total housing units that were used as the numerator of this ratio are described below. The denominator of this ratio was obtained from the weighted estimate of the AHS-SMSA sample housing units using the existing weight.

Independent estimates of total housing units were derived for the central city, balance, and the total SMSA for each of the 15 1981 SMSA's. These estimates were derived by using 1980 census counts in conjunction with estimates of change in the housing inventory between the 1980 census and the 1981 survey. These estimates of change were based on estimates of new construction permit authorizations and post-census demolition permits.

The sample estimates of total housing units after the permit new construction ratio estimation (i.e., the existing sample estimate) were compared to the corresponding independent estimates for the central city, balance, and total SMSA for each of the 15 SMSA's and the estimate which showed the most likely level of net growth since the 1980 census in both the central city and balance as well as the total SMSA were used in this ratio estimation. As a result of this analysis, these independent estimates were used in the Newark, N.J.; Pittsburgh, Pa.; Spokane, Wash.; Tacoma, Wash.; and Washington, D.C.-Md.-Va., SMSA's.

The remaining five SMSA's used a combination of these independent estimates and sample estimates. For the Boston, Mass.; and Minneapolis-St. Paul, Minn., SMSA's, the sample estimate was used for the total SMSA. For the sectors, the sample estimate of the total SMSA was proportioned between the central city and balance according to the central city/balance distribution of total housing units given by the independent estimates.

For the Orlando Fla.; Phoenix, Ariz.; and Wichita, Kans., SMSA's, the independent estimate of units was used for the total SMSA. For the sectors, the independent estimate of the total SMSA was proportioned between the central city and balance according to the central city/balance distribution of total housing units given by the sample estimates. Due to the central city

boundary definitional changes and central city permit office annexations since 1970 in these SMSA's, the independent estimate did not reflect the 1970 central city/balance SMSA definition. Since the design of the AHS-SMSA sample is based on the 1970 SMSA definition, independent estimates which best reflected the 1970 central city/balance SMSA definition were used.

The computed ratio estimation factors for the central city and balance of the SMSA's were then applied to the existing weight for all corresponding sample units in these 10 SMSA's, and the resulting product was used as the final weight for tabulation purposes. For the other five SMSA's, the sample estimates were used as the final weight for tabulation purposes. These SMSA's included Anaheim-Santa Ana-Garden Grove, Calif.; Dallas, Tex.; Detroit, Mich.; Fort Worth, Tex.; and Madison, Wis., SMSA's.

The effect of the total housing unit ratio estimation procedure, as well as the overall estimation procedures, was to reduce the sampling error for most statistics below what would have been obtained by simply weighting the results of the sample by the inverse of the probability of selection. Since the housing population of the sample differed somewhat, by chance, from the SMSA as a whole, it can be expected that the sample estimates will be improved when the sample housing population, or different portions of it, are brought into agreement with known good estimates of the SMSA housing population.

1977-1981 lost housing units—The 1977-1981 lost housing units (housing units removed from the inventory) estimates employed the one-stage ratio estimation procedure used to produce the AHS-SMSA estimates of the 1977 housing inventory for 14 of the SMSA's and the corresponding two-stage ratio estimation procedure used for the Pittsburgh, Pa., SMSA as was described in the 1977 Current Housing Report, Series H-170, *Housing Characteristics for Selected Metropolitan Areas*. Since the 1977-1981 lost housing units existed, by definition, in the 1977 housing inventory, there was a 1977 housing inventory weight associated with each 1977-1981 lost unit. This weight was used to tabulate the estimates of the characteristics of the 1977-1981 lost housing units.

1977 estimation procedure—This report presents data on the housing characteristics of the 1977 housing inventory from the 1977 Annual Housing Survey SMSA sample. The AHS-SMSA estimation procedure employed a two-stage ratio estimation process for the Pittsburgh, Pa., SMSA and a one-stage ratio estimation process for the remaining SMSA's. A detailed description of this ratio estimation procedure can be found in the AHS Series H-170 reports for 1977.

Ratio estimation procedure of the 1970 Census of Population and Housing—This report presents data on the housing characteristics of the 1970 housing inventory from the 1970 Census of Population and Housing. The statistics based on 1970 census sample data employed a ratio estimation procedure which was applied separately for each of the three census samples. A detailed description of this ratio estimation procedure can be found in the 1970 Census of Housing report, Volume I, *Housing Characteristics for States, Cities, and Counties*, Part 1.

RELIABILITY OF THE ESTIMATES

There are two types of possible errors associated with estimates based on data from sample surveys—sampling and nonsampling errors. The following is a description of the sampling and nonsampling errors associated with the AHS-SMSA sample and of the nonsampling errors associated with the 1970 census estimates. A description of the sampling errors associated with the sample estimates from the 1970 census can be found in the 1970 Census of Housing report, Volume I, *Housing Characteristics for States, Cities, and Counties*, Part 1.

Nonsampling errors—In general, nonsampling errors can be attributed to many sources: Inability to obtain information about all cases, definitional difficulties; differences in the interpretation of questions; inability or unwillingness of respondents to provide correct information; mistakes in recording or coding the data; other errors of collection, response, processing, coverage; and estimation for missing data. Nonsampling errors are not unique to sample surveys since they can, and do, occur in complete censuses as well.

Obtaining a measurement of the total nonsampling error associated with the estimates from a survey is very difficult, considering the number of possible sources of error. However, an attempt was made to measure some of the nonsampling errors associated with the estimates for the 1970 Census of Population and Housing and the 1977 AHS-SMSA sample.

1970 census—A number of studies were conducted to measure two types of general errors associated with 1970 census estimates—"coverage" and "content" errors. The "coverage" errors determined how completely housing units were counted in the census and the extent to which occupancy status was erroneously reported. The "content" errors measured the accuracy of the data collected for enumerated housing units. These errors were measured by reinterviews, record checks, and other surveys.

The detailed results of these studies, as well as the methodology employed, are presented in the 1970 Census of Population and Housing Evaluation and Research Program Reports, Series PHC(E)-5, *The Coverage of Housing in the 1970 Census*, and PHC(E)-10, *Accuracy of Data for Selected Housing Characteristics as Measured by Reinterviews*.

AHS-SMSA—Results from the 1981 AHS-SMSA sample reinterview program were not available at the time this report was being prepared. However, a study was conducted for the 1977 AHS-SMSA sample, and the results are presented in the Census Bureau memorandum, "Reinterview Results for Annual Housing Survey—SMSA Sample: 1977."

Coverage errors—In errors of coverage and estimation for missing data, the AHS new construction sample had deficiencies in the representation of conventional (non-mobile home) new construction. Due to time constraints, only those building permits issued more than 5 months before the survey ended were eligible to be sampled to represent conventional new construction in permit-issuing areas for this SMSA. However, the permits

issued during the last 5 months of the survey do not necessarily represent missed housing units. Due to the relatively short time span involved, it is possible that construction of these housing units was not completed at the time the survey was conducted, in which case, they would not have been eligible for interview. In addition to these deficiencies, new construction in special places that do not require building permits, such as military bases, are also not adequately presented.

The Coverage Improvement Program also had certain deficiencies. It appears that the listing procedure used to correct deficiencies 3-6 (see the coverage improvement section of this appendix) was not very effective in finding nonresidential conversions. Such conversions were primarily in business districts, whereas the listing procedure started from a residential unit.

Deficiencies also exist in ED's where area sampling methods are used. It had been assumed that all housing units located inside these ED's would be represented in the sample. However, it has been estimated that the 1977 AHS sample missed as much as 2 percent of all housing units in these ED's because they were not listed during the canvassing. It should be noted that since these ED's were recanvassed for the 1981 survey, the number of missed housing units may be considerably less for 1981.

The final ratio estimation procedure corrects for these deficiencies as far as the count of total housing is concerned; i.e., it adjusts to the best available estimate. However, biases of subtotals would still remain.

Rounding errors—For errors associated with processing, the rounding of estimates introduces another source of error in the data, the severity of which depends on the statistics being measured. The effect of rounding is significant relative to the sampling error only for small percentages or small medians when these figures are derived from relatively large bases (e.g., median number of persons per household). This means that confidence intervals formed from the standard errors given may be distorted, and this should be taken into account when considering the results of the survey.

Sampling errors for the AHS-SMSA sample—The particular sample used for this survey is one of a large number of possible samples of the same size that could have been selected using the same sample design. Even if the same questionnaires, instructions, and interviewers were used, estimates from each of the different samples would differ from each other. The sampling error of a survey estimate provides a measure of the variation among the estimates from all possible samples and thus, is a measure of the precision with which an estimate from a sample approximates the average result of all possible samples.

One common measure of the sampling error is the standard error. As calculated for this report, the standard error reflects the variation in the estimates due to sampling and nonsampling errors, but it does not measure as such, any systematic biases in the data. Therefore, the accuracy of the estimates depends on both the standard error, biases, and any additional nonsampling errors not measured by the standard error. The sample estimate and its estimated standard error enable one to construct interval estimates in which the interval includes the average result of all possible samples with a known probability. For example, if all possible samples were selected, each of these surveyed under essentially the same general conditions, and an estimate and its estimated standard error were calculated from each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average result of all possible samples.
2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.
3. Approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average result of all possible samples.

The average result of all possible samples either is or is not contained in any particular computed interval. However, for a particular sample, one can say with specified confidence that the average result of all possible samples is included in the constructed interval.

The figures presented in the tables that follow (page App-51) are approximations to the standard errors of various estimates shown in this report for this SMSA. In order to derive standard errors that would be applicable to a wide variety of items and also could be prepared at a moderate cost, a number of approximations were required. As a result, the tables of standard errors provide an indication of the order of magnitude of the standard errors rather than precise standard errors for any specific item. Standard errors applicable to estimates of characteristics of the 1977 housing inventory can be found in the AHS Series H-170 reports for 1977.

Table I (page App-51) presents the standard errors applicable to estimates of characteristics of the 1981 housing inventory as well as estimates of characteristics of the 1977-1981 lost housing units (housing units removed from the inventory). Linear interpolation should be used to determine the standard errors for estimates not specifically shown in this table. The standard errors on the AHS estimates of the population in housing units shown in tables A-1, B-1, and C-1 of part A of this report are 32,009 for the total SMSA, 14,659 for the central city of the SMSA, and 28,390 for the balance of the SMSA.

The reliability of an estimated percentage, computed by using the sample data for both numerator and denominator, depends upon both the size of the percentage and the size of the total upon which the percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more.

Table II (page App-51) presents the standard errors of estimated percentages for the 1981 housing inventory as well as estimated percentages of the 1977-1981 lost housing units (housing units removed from the inventory). Two-way interpolation should be used to determine standard errors for estimated percentages not specifically shown in table II.

Included in tables I and II are estimates of standard errors for estimates of zero and zero percent. These estimates of standard errors are considered as overestimates of the true standard errors and should be used primarily for construction of confidence intervals for characteristics when an estimate of zero is obtained.

For ratios, 100 (x/y), where x is not a subclass of y, table II underestimates the standard error of the ratio when there is little or no correlation between x and y. For this type of ratio, a better approximation of the standard error may be obtained by letting the standard error of the ratio be approximately equal to:

$$(100)\left(\frac{x}{y}\right)\sqrt{\left(\frac{\sigma_x}{x}\right)^2 + \left(\frac{\sigma_y}{y}\right)^2}$$

where: x = the numerator of the ratio
y = the denominator of the ratio
σ_x = the standard error of the numerator
σ_y = the standard error of the denominator

Illustration of the use of the standard error tables—Table A-1 of part A of this report shows that in 1981 there were 580,800 owner-occupied housing units in this SMSA. Interpolation using table I of this appendix shows that the standard error of an estimate of this size is approximately 6,930. The following interpolation procedure was used.

The information presented in the following table was extracted from table I. The entry for "x" is the one sought.

Size of estimate	Standard error
500,000	7,280
580,800	x
600,000	6,850

The entry of "x" is determined as follows by vertically interpolating between 7,280 and 6,850.

$$580{,}800 - 500{,}000 = 80{,}800$$
$$600{,}000 - 500{,}000 = 100{,}000$$

$$7{,}280 + \frac{80{,}800}{100{,}000}(6{,}850 - 7{,}280) = 6{,}930$$

Consequently, the 68-percent confidence interval, as shown by these data, is from 573,870 to 587,730 housing units. Therefore, a conclusion that the average estimate of 1981 owner-occupied housing units (derived from all possible samples) lies within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, we could conclude that the average estimate derived from all possible samples, lies within the interval from 569,710 to 591,890 housing units with 90 percent confidence; and that the average estimate lies within the interval from 566,940 to 594,660 housing units with 95 percent confidence.

Table A-1 of part A also shows that of the 580,800 owner-occupied housing units, 169,800, or 29.2 percent, had two bedrooms. Interpolation using table II of this appendix (i.e., interpolation on both the base and percent) shows that the standard error of the 29.2 percent is approximately 0.9 percentage points. The following interpolation procedure was used.

The information presented in the following table was extracted from table II. The entry for "p" is the one sought.

Base of percentage	Estimated percentage		
	25 or 75	29.2	50
500,000	1.0	a	1.1
580,000		p	
600,000	0.9	b	1.0

1. The entry for cell "a" is determined by horizontal interpolation between 1.0 and 1.1.

$$29.2 - 25.0 = 4.2$$
$$50.0 - 25.0 = 25.0$$

$$1.0 + \frac{4.2}{25.0}(1.1 - 1.0) = 1.0$$

2. The entry for cell "b" is determined by horizontal interpolation between 0.9 and 1.0.

$$29.2 - 25.0 = 4.2$$
$$50.0 - 25.0 = 25.0$$

$$0.9 + \frac{4.2}{25.0}(1.0 - 0.9) = 0.9$$

3. The entry for "p" is then determined by vertical interpolation between 1.0 and 0.9.

$$580{,}800 - 500{,}000 = 80{,}800$$
$$600{,}000 - 500{,}000 = 100{,}000$$

$$1.0 + \frac{80{,}800}{100{,}000}(0.9 - 1.0) = 0.9$$

Consequently, the 68-percent confidence interval, as shown by these data, is from 28.3 to 30.1 percent; the 90-percent confidence interval is from 27.8 to 30.6 percent; and the 95-percent confidence interval is from 27.4 to 31.0 percent.

Differences—The standard errors shown are not directly applicable to differences between two sample estimates. The

standard error of a difference between estimates is approximately equal to the square root of the sum of the squares of the standard error of each estimate considered separately. This formula is quite accurate for the difference between estimates of the same characteristics in two different SMSA's or the difference between separate and uncorrelated characteristics in the same SMSA. If there is a high positive correlation between the two characteristics, the formula will overestimate the true standard error; but if there is a high negative correlation, the formula will underestimate the true standard error. Due to the overlap of the 1977 and 1981 AHS-SMSA samples a positive correlation should be expected when making comparisons between 1977 and 1981 characteristics.

Illustration of the computation of the standard error of a difference—Table A-1 of part A of this report shows that in 1981 there were 291,400 owner-occupied housing units with three bedrooms in this SMSA. Thus, the apparent difference, as shown by these data, between owner-occupied housing units with two bedrooms and owner-occupied housing units with three bedrooms is 121,600. Table I shows the standard error of 169,800 is approximately 5,790, and the standard error of 291,400 is approximately 6,900. Therefore, the standard error of the estimated difference of 121,600 is about 9,010.

$$9{,}010 = \sqrt{(5{,}790)^2 + (6{,}900)^2}$$

Consequently, the 68-percent confidence interval for the 121,600 difference is from 112,590 to 130,610 housing units. Therefore, a conclusion that the average estimate derived from all possible samples, of this difference, lies within a range computed in this way, would be correct for roughly 68 percent of all possible samples. Similarly, the 90-percent confidence interval is from 107,180 to 136,020 housing units, and the 95-percent confidence interval is from 103,580 to 139,620 housing units. Thus, we can conclude with 95 percent confidence that the number of 1981 owner-occupied housing units with three bedrooms is greater than the number of owner-occupied units with two bedrooms since the 95-percent confidence interval does not include zero or negative values.

Medians—For medians presented in certain tables, the sampling error depends on the size of the base and on the distribution upon which the median is based. An approximate method for measuring the reliability of the estimated median is to determine an interval about the estimated median so that there is a stated degree of confidence that the average median from all possible samples lies within the interval. The following procedure may be used to estimate confidence limits of a median based on sample data:

1. From table II, determine the standard error of a 50-percent characteristic on the base of the median.
2. Add to and subtract from 50 percent, the standard error determined in step 1.
3. Using the distribution of the characteristics, determine the confidence interval corresponding to the two points established in step 2. To find the lower endpoint of the confidence interval, it is necessary to know into which interval of the distribution the lower percentage limit falls. Similarly, to find the upper endpoint to the confidence interval, it is necessary to know into which interval of the distribution the upper percentage limit falls. Note that these two distribution intervals could be different, although this will not happen very often.

For about 68 out of 100 possible samples, the average median from all possible samples would lie between these two values.

A two-standard-error confidence interval may be determined by finding the values corresponding to 50 percent plus and minus twice the standard error determined in step 1. For about 95 out of 100 possible samples, the average median from all possible samples would lie between these two values.

Illustration of the computation of the 95-percent confidence interval of a median—Table A-1 of part A of this report shows the median number of persons for owner-occupied housing units is 2.6. The base of the distribution from which this median was determined is 580,800 housing units.

1. Interpolation using table II shows that the standard error of 50 percent on a base of 580,800 is approximately 1.0 percentage points.
2. To obtain a 95-percent confidence interval on the estimated median, initially add to and subtract from 50 percent twice the standard error determined in step 1. This yields percentage limits of 48.0 and 52.0
3. From the distribution for "persons" in table A-1 of part A, the interval for owner-occupied housing units with three persons (for purposes of calculating the median, the category of three persons is considered to be from 2.5 to 3.5 persons) contains the 48.0 percent derived in step 2. About 274,400 housing units or 47.2 percent fall below this interval, and 116,000 housing units or 20.0 percent fall within this interval. By linear interpolation, the lower limit of the 95-percent confidence interval is found to be about:

$$2.5 + (3.5-2.5)\ \frac{(48.0-47.2)}{20.0} = 2.5$$

Similarly, the interval for owner-occupied housing units with three persons contains the 52.0 percent derived in step 2. About 274,400 housing units or 47.2 percent fall below this interval, and 116,000 housing units or 20.0 percent fall within this interval. The upper limit of the 95-percent confidence interval is found to be about:

$$2.5 + (3.5-2.5)\ \frac{(52.0-47.2)}{20.0} = 2.7$$

Thus, the 95-percent confidence interval ranges from 2.5 to 2.7 persons. Although it appears that this confidence interval has the same estimate as the lower limit it actually is a reflection of the rounding error associated with this median (see the paragraph on rounding error in the nonsampling error section of this appendix).

TABLE I. **Standard Errors for Estimated Number of Housing Units in the 1981 Housing Inventory and for Estimated Number of 1977-1981 Lost Units for the Pittsburgh, Pa., SMSA, for the Central City of the SMSA and for the Balance (Not in Central City) of the SMSA**

(68 chances out of 100)

Size of estimate	Standard error[1]			Size of estimate	Standard error[1]		
	SMSA	In central city	Not in central city		SMSA	In central city	Not in central city
0	240	230	240	150,000	5,520	2,400	5,370

50,000	3,400	2,890	3,370	800,000	4,280	—	—
75,000	4,100	3,180	4,050	881,300	—	—	—
100,000	4,660	3,210	4,580				

[1]For estimates pertaining to new construction, the standard errors shown in the table should be multiplied by a factor of 1.2. Standard errors of estimates pertaining to total housing units for the central city, balance, and total SMSA are assumed to be equal to zero where the estimate for the total SMSA was derived from an independent estimate.

TABLE II. **Standard Errors for Estimated Percentages of Housing Units in the 1981 Housing Inventory and for Estimated Percentages of 1977-1981 Lost Housing Units for the Pittsburgh, Pa., SMSA, for the Central City and for the Balance (Not in Central City) of the SMSA**
