GENERAL

This report presents statistics on housing and household characteristics from the 1983 Annual Housing Survey conducted in 13 selected standard metropolitan statistical areas (SMSA's). For a list of these SMSA's, see page XVI. The Annual Housing Survey (AHS) was designed to provide a current series of information on the size and composition of the housing inventory, the characteristics of its occupants, the changes in the inventory resulting from new construction and from losses, the indicators of housing and neighborhood quality, and the characteristics of recent movers. The survey, performed for the Department of Housing and Urban Development, is authorized under sections 501 and 502(d), 502(e), and 502(f) of the Housing and Urban Development Act of 1970, Title 12, United States Code 1701z-1 and 1701z-2. The Bureau of the Census is authorized under Title 31, United States Code, section 686, to perform special work or services for Federal agencies.

The statistics presented in this report are based on information from a sample of housing units. The information for the 1983 AHS-SMSA sample was collected by personal interview from April 1983 through December 1983. (See paragraph "Sample size" below.)

A separate report is issued jointly by the Department of Housing and Urban Development and the Bureau of the Census for each of the 13 SMSA's in the 1983 survey. Each report consists of five parts. Part A presents statistics on general housing characteristics, part B on indicators of housing and neighborhood quality, part C on financial characteristics, part D on recent mover households, and part F on financial characteristics cross-classified by indicators of housing and neighborhood quality. (Part E is published only for the national sample.)

The content and procedures of the Annual Housing Survey were determined after consultation with a variety of users of housing data and through field pretesting. The data for many of the subjects covered in this report are the same as those collected in the 1970 Census of Housing; in general, these data are comparable to those shown in the 1970 census reports. In addition, a number of new items were introduced in this survey on subjects such as breakdowns in equipment, the physical condition of the structure, neighborhood conditions and services, and distance and travel time from home to work for the householder.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233.

Sample size—The statistics presented in this report are based on a sample of housing units and are, therefore, subject to sampling variability. Two different sample sizes were employed in the 1983 survey. Two of the larger SMSA's were represented by a sample of about 8,500 designated housing units. These SMSA's were Chicago, IL and New York, NY. All remaining SMSA's were represented by a sample of about 4,250 designated housing units. Both samples were divided between the central city or cities and the balance of the respective SMSA based on the proportionate distribution of all housing units in the entire SMSA.

The sample was selected from units enumerated in the 1970 census and updated to include units constructed since 1970. Detailed information on the sample design, size of sample, estimation procedure, and sampling variability associated with these data is given in appendix B.

Organization of the text—The text consists of this introduction and appendixes A and B, which appear after the data tables. Appendix A describes the geographic area classifications, provides definitions and explanations of the subjects covered in this report, and contains a facsimile of the questionnaire. Appendix B presents information on sample design, estimation, and accuracy of the data.

Content of the tables—A series of standard tables presents data for housing units for each area shown in this report. Separate data are shown for "in central city" and "not in central city," as well as for the SMSA as a whole. In parts A, B, C, and F, the prefix letter "A" has been assigned to tables for the SMSA as a whole, "B" to tables for "in central city," and "C" to tables for "not in central city." The numbers presented in these tables are rounded to the nearest hundred. Characteristics for some items may not add to the total due to rounding.

In part A on general housing characteristics, tables 1 and 2 present selected housing characteristics for 1983, 1979, 1976, and 1970; table 3, characteristics of new construction units; table 4, 1979 characteristics of housing units removed from the housing inventory; and table 5, characteristics of vacant—year-round housing units. The same general subject content presented in tables 1 and 2 is also presented for housing units with Black householder in tables 6 and 7 and for housing units with householder of Spanish origin in tables 8 and 9.

In part B on indicators of housing and neighborhood quality, tables 1 to 4 present characteristics for owner- and renter-occupied housing units, tables 5 to 8 present characteristics for owner- and renter-occupied housing units with Black householder, and tables 9 to 12 present characteristics for owner- and renter-occupied housing units with householder of Spanish origin.

In part C on financial characteristics, table 1 presents characteristics of owner- and renter-occupied housing units by income of the family or primary individual; table 2 presents characteristics for owner-occupied, one-unit structures by value of property; and table 3 presents characteristics of renter-occupied housing units by gross rent. The same subject content as shown in tables 1 to 3 is presented for housing units with Black householder in tables 4 to 6 and for housing units with householder of Spanish origin in tables 7 to 9.

In part D on recent mover households, table 1 presents characteristics of all occupied housing units and units occupied by recent movers (households that moved into their units during the 12 months prior to the interview). Table 2 presents income of families and primary individuals by purchase price, source of down payment, and amount of mortgage. Tables 3 to 10 present characteristics of the present unit for recent mover households cross-classified by characteristics of the previous unit. The same subject content as shown in tables 1 to 10 is presented for housing units with Black householder in tables 11 to 20 and for housing units with householder of Spanish origin in tables 21 to 30.

In part F, the tables show cross-tabulations of the indicators of housing and neighborhood quality by income, value, and gross rent. Tables 1 to 4 present characteristics of owner- and renter-occupied housing units by income of the family or primary individual; tables 5 to 8 present characteristics of owner-occupied, one-unit structures by value of property; and tables 9 to 12 present characteristics of renter-occupied housing units by gross rent. The same subject content as shown in tables 1 to 12 is presented for housing units with Black householder in tables 13 to 24 and for housing units with householder of Spanish origin in tables 25 to 36.

1970 data in this report—The source of the 1970 data shown in part A is both published and unpublished tabulations from the 1970 Census of Population and Housing. For some items, 1970 data are not shown because they are not available. Prior to 1980 the concept "head" was used instead of "householder" (see appendix A for further discussion). Data for 1970 for all housing units and for units with Black household head are from the 20-, 15-, and 5-percent samples. Data for housing units with household head of Spanish origin are limited to the 1970 census 5-percent sample. The totals for individual items in some tables may differ when the characteristics are derived from different samples. Information for the 1970 census was collected as of April 1, 1970.

1976 and 1979 data in this report—The source of the 1976 and 1979 data shown in part A, including characteristics of housing units removed from the inventory, is published tabulations from the 1976 and 1979 Annual Housing Surveys. Prior to 1980 the concept "head" was used instead of "householder" (see appendix A for further discussion). For some items, 1976 and 1979 data are not available. Information for the 1976 and 1979 Annual Housing Surveys was collected by personal interview from April 1976 through March 1977, and from April 1979 through March 1980, respectively.

Derived figures (medians, etc.)—Shown in this report are percents, means, medians, and ratios. The median, which is a type of average, is the middle value in a distribution; i.e., the median divides the distribution into two equal parts—one-half of the cases fall below the median and one-half of the cases exceed the median. Derived figures are not presented (but indicated by three dots. . .) if there are less than 25 sample cases in the distribution or the base.

Medians for rooms, persons, and years of school completed by householder are rounded to the nearest tenth; selected monthly housing costs as percentage of income to the nearest percent. Travel time is rounded to the nearest minute and distance from home to work is rounded to the nearest tenth of a mile. Medians for value and income are rounded to the nearest hundred dollars; rent, real estate taxes last year, monthly mortgage payment, and selected monthly housing costs are rounded to the nearest dollar.

In computing medians for rooms and persons per housing unit, the whole number is used as the midpoint of the interval, for example, the category "4 rooms" is treated as an interval ranging from 3.5 to 4.5 rooms. When medians for distance and travel time to work are computed, householders reporting "no fixed place of work" are excluded. Units reporting "no cash rent" are

excluded from the computation of median rent; for selected monthly housing costs as percentage of income, units in the category "not computed" are excluded. "Not reported" categories are excluded from the computation of medians.

The median number of school years completed by the householder was computed after the statistics on years of school completed had been converted to a continuous series of numbers (e.g., completion of the 1st year of high school was treated as completion of the 9th year and completion of the 1st year of college as completion of the 13th year). Householders completing a given school year were assumed to be distributed evenly within the interval from 0.0 to 0.9 of the year. Because of the inexact assumption as to the distribution within an interval, the median school years completed is more appropriately used for comparing different groups and the same group at different dates than as an absolute measure of educational attainment.

The medians presented for 1983 are generally computed on the basis of the distributions as shown in the tables. As a result, a median or percent for the same characteristic and universe may vary somewhat between tables. The medians for 1976 and 1979 are also computed on the basis of the distributions as shown in the tables in this report. In addition to variations between tables, many of the 1976 and 1979 medians differ from those previously published for small universes where the published distribution has changed between 1976, 1979, and 1983. The medians presented for 1970 are computed on the basis of the distributions as tabulated in 1970, which are sometimes more detailed than the distributions shown in this report.

When the median falls in the lower terminal category of an open-ended distribution, the method of presentation is to show the initial value of the next category followed by a minus sign; for example, if the median falls in the category "Less than $10,000," it is shown as "$10,000—." When the median falls in the upper terminal category of an open-ended distribution, the method of presentation is to show the initial value of the terminal category followed by a plus sign; for example, if the median falls in the category "$300,000 or more," it is shown as "$300,000+."

Symbols—A dash (—) signifies zero or a number which rounds to zero. Three dots (. . .) in a data column mean not applicable or that the base for a derived figure is too small for it to be shown. The symbol "NA" means not available.

Boundaries—The data shown in this report relate to the areas as defined for the 1970 census. See appendix A for a discussion of these areas. Additional information and definitions of the 1970 boundaries are given in the 1970 Population Census PC(1)-A reports.

List of SMSA reports from the Annual Housing Survey—The SMSA surveys are conducted in 60 selected SMSA's originally divided into groups of approximately 20 each, with a group to be interviewed every 3 years on a rotating basis. The SMSA's are no longer surveyed according to the original three groups. A listing of the SMSA's by the original three groups is included in this introduction. The years for which reports are currently available for individual SMSA's are provided on this listing.

Reports from the Annual Housing Survey—Reports from the AHS metropolitan area samples are published under Series H-170. Any supplemental SMSA reports are published under Series H-171.

Reports from the AHS national sample are published under Series H-150. Any supplemental national reports are published under Series H-151. Data for the national reports are collected every other year from a sample of housing units that is independent of the sample of housing units used to produce the SMSA reports. The national reports present statistics for the United States by inside and outside SMSA's and for each of four census regions. The first national AHS was conducted from August to December 1973. The Series H-150 reports are currently produced in six volumes (parts A through F). Much of the data in the national report series is similar to that found in this and other SMSA reports. Content of the reports does vary however, between the Series H-150 and H-170 reports and between survey years within each series due to changing data requirements.

ADDITIONAL DATA

Unpublished tabulations—A large number of tabulations, not included in the published reports, have been prepared to meet special needs of both national (Series H-150 and H-151) and SMSA (Series H-170 and H-171) data users. These unpublished data are available in two forms. Paper photocopies are available for specific tables at the cost of reproduction. Microfilm/microfiche copies of these unpublished data are also available on a cost-per-reel basis. An index of the data available can be obtained free of charge. These data may be obtained by contacting the Housing Division, Bureau of the Census, Washington, D.C. 20233.

Public-use microdata files—For the data users whose needs are not met by the available tabulations, the Census Bureau also has made available computerized microdata (individual respondent records) from both the SMSA and national samples. Except for names and addresses, the AHS microdata provide essentially all the information obtained from each household or vacant unit. The Census Bureau's confidentiality guidelines prescribe that individuals and specific addresses remain anonymous.

Confidentiality guidelines further prescribe that individual records cannot be associated with areas having fewer than 250,000 people based on 1970 census results. The national files identify the four census regions, each SMSA of 250,000 or more population (central city residence is also identified where possible), metropolitan/nonmetropolitan residence, and urban/rural residence. The SMSA data files contain all SMSA samples except Saginaw, MI, which contained less than the 250,000 required 1970 population. Central cities are identified for 42 of the 59 SMSA's.

Microdata computer tapes from the Annual Housing Survey are available on a cost-per-reel basis from Data User Services Division, Customer Services (Tapes), Bureau of the Census, Washington, D.C. 20233.

Microfiche of published reports—Microfiche copies for national and SMSA published reports are available from Data User Services Division, Customer Services (Microfiche), Bureau of the Census, Washington, D.C. 20233.

DATA COLLECTION PROCEDURES

The 1983 Annual Housing Survey was conducted by interviewers who made personal visits to each sample unit and obtained the information from the occupants, or if the unit was vacant, from informed persons (landlords, rental agents, or knowledgeable neighbors). The information reported by the interviewer reflected the situation at the time of the survey, which began in April 1983 through December 1983 (see paragraph "Sample size").

Data were collected for sample housing units located in the counties and independent cities that make up the 13 SMSA's interviewed for the 1983 AHS. A sample of housing units was selected in these areas from the 1970 census and updated, by a sample of addresses from building permits, to include housing units added since 1970. Estimates of the counts and characteristics of the 1983 inventory were obtained for these sample units.

For the estimates of losses (housing units removed) from the 1979 housing inventory, the interviewer located the address of the 1979 sample unit. If this sample unit no longer existed or no longer was a separate housing unit, the disposition of the unit was determined; e.g., lost through means such as demolition, disaster, merger, or conversion to nonresidential use.

A more detailed description of the survey design and sampling procedures can be found in appendix B.

PROCESSING PROCEDURES

The questionnaires used for the 1983 Annual Housing Survey were of the conventional type on which the interviewer recorded the information by marking a precoded check box or by writing in the entries. Census clerks edited and coded the questionnaires. The information from the questionnaires was data keyed directly to magnetic tape which was processed on the Census Bureau's computers through a number of editing and tabulating steps. A facsimile of the questionnaire appears at the end of appendix A.

The 1979 characteristics of housing units removed from the inventory (losses) were obtained by matching those housing units to the 1979 Annual Housing Survey records. The 1979

ata for the losses were then extracted from the 1979 Annual lousing Survey tapes. Data on losses are shown in part A of his report.

QUALIFICATIONS OF THE DATA

Since the estimates in this report are based on a sample, they ay differ somewhat from the figures that would have been ob-ained from a complete census using the same questionnaires, structions, and interviewers. Particular care should be exer-ised, therefore, in the interpretation of figures based on rela-vely small numbers of sample cases as well as small differences etween figures. As in any survey work, the results are subject errors of response and nonreporting, and to sampling vari-bility. For a further discussion of the accuracy of the data, see ppendix B.

The concepts and definitions are essentially the same for those ems which appear both in this report and in the 1970 census eports. The SMSA boundaries are the same as those in the 1970 ensus. For historical comparisons and boundary changes, refer the census reports of 1960 and earlier.

In making comparisons between the 1983 survey and 1970 ensus of Housing results, differences in the data may reflect uch factors as the use of direct interview for 1983 contrasted ith the extensive use of self-enumeration in 1970, the sample esign, the estimation procedure used, the sampling variability f the estimates, and the processing procedures. See the sec-on on comparability with 1970 Census of Housing data in ppendix A for further discussion.

Statistics on income relate to the income of the family or rimary individual. Therefore, no data are provided on household come; i.e., income of persons unrelated to the householder of e housing unit is excluded.

Statistics for some of the characteristics shown are based on stricted universes and, therefore, care should be exercised in lating the statistics for one characteristic to another. For ex-mple, value is restricted to owner-occupied, one-unit structures less than 10 acres and no business on property. Therefore, e totals for owner-occupied units in the value universe do not gree with the totals for owner-occupied units for some of the her universes such as rooms or persons. In addition, data for me of the items are not comparable because of the different niverses used. For example, the statistics on sewage disposal parts B and F are limited to units occupied 3 months or longer, hereas decennial census data and data in parts A and D on ewage disposal are shown for all units, including units which ere occupied less than 3 months.

The data in parts B and F are intended to serve as broad in-cators of housing quality and not as precise measurements. housing unit, for example, that is reported as having signs of eaking roof or a breakdown or failure in plumbing facilities is t necessarily inadequate or poor housing. Conversely, a hous-g unit that is reported as not having such defects is not cessarily a house of good quality. The data presented for items ch as neighborhood conditions and neighborhood services are sed on the individual respondent's opinion of conditions in the ighborhood. The respondent's opinion may or may not reflect the actual situation. Furthermore, two respondents in the same neighborhood may view the same condition differently; for example, one respondent may indicate that the streets need repair while the other does not.

Care should be exercised in making comparisons between both the 1983 Annual Housing Survey national (Series H-150) and SMSA (Series H-170) and the 1970 and 1980 Censuses of Housing results. Differences in the data may reflect such factors as the use of direct interview in the Annual Housing Survey contrasted with the extensive use of self-enumeration in the censuses, the time periods during which the data were collected (possible seasonal effects), sample designs, estimation procedures used, sampling variability of the estimates, and the processing procedures.

Research shows that the national Annual Housing Survey and the 1980 Census of Housing produced significant differences for several key characteristics. For example, the April 1980 census had a homeownership rate for the United States of 64.4 percent; the October 1979 AHS national, 65.4 percent; and the October 1980 AHS national, 65.6 percent. The 1980 census showed that 18 percent of the housing units were in multiunit structures (5-or-more housing units); both the 1979 and 1980 surveys, 15 percent. In the 1980 census, 26 percent of the housing inventory was built since January 1970; the October 1979 AHS, 21 percent since March 1970; and the 1980 AHS, 23 percent since March 1970.

Data for these characteristics, as well as others, should be used with caution when making comparisons between the 1970 and 1980 Censuses of Housing results, and both the Annual Housing Survey national (Series H-150) and SMSA (Series H-170) results.

See the sections on "Comparability with the 1970 Census of Housing data," and "Comparability with the 1980 Census of Housing data," in appendix A for further discussions.

Care should be exercised in the interpretation of differences in the estimated counts of Spanish-origin households between the 1970 census and the Annual Housing Survey. Research indicates that 1970 estimates of Spanish-origin households may be significantly over-stated in this SMSA, as some respondents in the 1970 census apparently misinterpreted the Spanish-origin category, "Central or South American" to mean the central or southern part of the United States. The method of data collection used in the AHS; i.e., personal interviews conducted by trained interviewers, would tend to prevent the reoccurrence of this 1970 census classification error. In addition, differences between the two sets of data may reflect factors such as the sampling variability of both the 1970 estimates from the 5-percent census sample and the estimates from the AHS sample, as well as the estimation and processing procedures used.

See appendix A for a more detailed discussion of the definitions and qualifications of all items in this report.

TABLES FOR MINORITY HOUSEHOLDS

All simple distribution tables for housing units with Black householder or householder of Spanish origin are shown except

when that group consists of less than 25 sample cases. All cross-tabulations are shown except when the minority group consists of less than 75 sample cases.

For this SMSA, all tables for housing units with Black householder are shown except tables 11 to 20 of part D for "not in central city." These tables are not shown because the number of sample cases of Black recent mover households "not in central city" is 16.

All tables for householder of Spanish origin are shown except tables 22 and 24 to 30 of part D for "not in central city." These tables are not shown because the number of sample cases of Spanish-origin recent mover households "not in central city" is 28.

ESTIMATES OF CHANGE, 1979 TO 1983

Results from the third survey conducted for the Houston, TX, SMSA, as defined in 1970, indicate that the August 1983 estimate of total housing units is 1,329,300 a net gain of 195,900 housing units over the 1979 AHS estimate of 1,133,400.

The net increase of 195,900 housing units reflects 201,900 housing units added to the inventory through new construction, minus 53,900 housing units lost (removed from the inventory) through demolition, disaster, or other means, plus 47,900 unspecified housing units that entered the inventory.

Approximately 15 percent of the total housing stock in the Houston metropolitan area was constructed since the last survey in 1979. Most of the new construction in the metropolitan area occurred in the suburbs; i.e., Brazoria, Fort Bend, Liberty, and Montgomery Counties, and that portion of Harris County outside the central city of Houston. Approximately 172,600 housing units, or about 25 percent of all housing in these areas, were built since 1979, compared with 29,300 housing units, or about 5 percent of all housing in the city of Houston.

Offsetting these additions to the housing stock, 53,900 housing units were lost through demolition, disaster, or other means between 1979 and 1983. Within the metropolitan area, the proportion of the 1979 housing inventory which was lost during this 4-year period was 4 percent for the central city and 6 percent for the suburbs. Removals from the housing stock resulting through means other than demolition and disaster include housing units which were changed to nonresidential use; condemned because of violation of local ordinances or housing codes; some mergers resulting from combining two or more housing units into fewer units; and mobile homes, occupied in 1979 which were vacant at the time of the survey in 1983, etc. Certain losses, however, are not included in this 4-year measurement; i.e., housing units which existed as part of the housing stock during both surveys but which were lost for a time during the period between the surveys, and housing units which came into the inventory for the first time after the 1979 survey, which were classifie as losses in the 1983 survey.

The net addition of 47,900 unspecified housing units betwee 1979 and 1983 is partially represented by a variety of addition not specifically measured by the survey. Examples of such add tions are conversions from fewer units to more units, change from nonresidential use or group quarters, housing units move to site, and housing units returned to the inventory in 1983 tha had been temporarily lost in 1979. Examples of this last categor are 1983 housing units which, in 1979, were condemned fo occupancy because of violation of local ordinances or housin codes; vacant units damaged by fire, flood, or vandalism whic had been rehabilitated in 1983; and mobile homes which wer vacant in 1979 but were occupied as primary residences i 1983. It is estimated that 90 percent of the unspecified unit are a reflection of these other additions.

Although no precise measures are available, it is estimate that the remaining unspecified units are made up of the follov ing categories. About 5 percent of the unspecified units ma reflect an overestimation of the 1983 inventory. The remainin 5 percent of the unspecified units may be due to a variety unknown nonsampling errors, including errors in the collectio and processing procedures. The percentages stated above a estimates of possible error, but are not absolute measures any individual errors. The 1983 AHS reflects the ratio estim tion of the housing inventory to independent estimates whic are consistent with the 1980 Census of Housing results.

Source of the 1983 Housing Inventory

Subject	Total	In central city	Not in central city
All housing units, August 1983	1,329,300	628,200	701,1(
All housing units, October 1979	1,133,400	568,800	564,6(
Change:			
Number	195,900	59,400	136,5(
Percent	17.3	10.4	24
Housing units added by new construction	201,900	29,300	172,6(
Housing units lost through demolition, disaster, or other means	53,900	20,800	33,1(
Unspecified housing units	47,900	50,900	−3,0(

Table B-8. Characteristics of Housing Units With Householder of Spanish Origin: 1983, 1979, 1976, and 1970—Con.

[Data based on sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Characteristics	1983	1979	1976	1970
ALL OCCUPIED HOUSING UNITS—Con.				
Presence of Subfamilies				
Owner occupied	**29 600**	**NA**	**NA**	**NA**
No subfamilies	29 000	NA	NA	NA
With 1 subfamily	600	NA	NA	NA
Subfamily head under 30 years	300	NA	NA	NA
Subfamily head 30 to 64 years	300	NA	NA	NA
Subfamily head 65 years and over	–	NA	NA	NA
With 2 subfamilies or more	–	NA	NA	NA
Renter occupied	**49 900**	**NA**	**NA**	**NA**
No subfamilies	47 500	NA	NA	NA
With 1 subfamily	2 100	NA	NA	NA
Subfamily head under 30 years	1 400	NA	NA	NA
Subfamily head 30 to 64 years	600	NA	NA	NA
Subfamily head 65 years and over	–	NA	NA	NA
With 2 subfamilies or more	300	NA	NA	NA
Presence of Other Relatives or Nonrelatives				
Owner occupied	**29 600**	**NA**	**NA**	**NA**
No other relatives or nonrelatives	24 600	NA	NA	NA
With other relatives and nonrelatives	–	NA	NA	NA
With other relatives, no nonrelatives	4 700	NA	NA	NA
With nonrelatives, no other relatives	300	NA	NA	NA
Renter occupied	**49 900**	**NA**	**NA**	**NA**
No other relatives or nonrelatives	33 600	NA	NA	NA
With other relatives and nonrelatives	600	NA	NA	NA
With other relatives, no nonrelatives	11 000	NA	NA	NA
With nonrelatives, no other relatives	4 600	NA	NA	NA
Years of School Completed by Householder				
Owner occupied	**29 600**	**NA**	**NA**	**NA**
No school years completed	2 300	NA	NA	NA
Elementary:				
Less than 8 years	8 700	NA	NA	NA
8 years	1 600	NA	NA	NA
High school:				
1 to 3 years	5 900	NA	NA	NA
4 years	6 400	NA	NA	NA
College:				
1 to 3 years	2 800	NA	NA	NA
4 years or more	1 900	NA	NA	NA
Median	9.8	NA	NA	NA
Renter occupied	**49 900**	**NA**	**NA**	**NA**
No school years completed	4 100	NA	NA	NA
Elementary:				
Less than 8 years	17 800	NA	NA	NA
8 years	3 600	NA	NA	NA
High school:				
1 to 3 years	6 800	NA	NA	NA
4 years	8 800	NA	NA	NA
College:				
1 to 3 years	6 300	NA	NA	NA
4 years or more	2 400	NA	NA	NA
Median	8.8	NA	NA	NA
Year Householder Moved Into Unit				
Owner occupied	**29 600**	**NA**	**NA**	**NA**
1980 or later	6 100	NA	NA	NA
Moved in within past 12 months	2 600	NA	NA	NA
April 1970 to 1979	13 900	NA	NA	NA
1965 to March 1970	4 300	NA	NA	NA
1960 to 1964	2 800	NA	NA	NA
1950 to 1959	1 700	NA	NA	NA
1949 or earlier	900	NA	NA	NA
Renter occupied	**49 900**	**NA**	**NA**	**NA**
1980 or later	38 400	NA	NA	NA
Moved in within past 12 months	21 500	NA	NA	NA
April 1970 to 1979	10 300	NA	NA	NA
1965 to March 1970	300	NA	NA	NA
1960 to 1964	300	NA	NA	NA
1950 to 1959	600	NA	NA	NA
1949 or earlier	–	NA	NA	NA
Heating Equipment				
Owner occupied	**29 600**	**21 000**	**18 400**	**NA**
Warm-air furnace	10 800	8 600	6 100	NA
Heat pump	300	–	–	NA
Steam or hot water	–	–	–	NA

[1]Income of families and primary individuals in 12 months preceding date of interview; see text.
[2]Limited to one-unit structures on less than 10 acres and no business on property.
[3]Includes principal and interest only.
[4]Sum of payments for real estate taxes, property insurance, utilities, fuel, water, garbage collection, and mortgage at time of interview.
[5]Excludes one-unit structures on 10 acres or more.
[6]Excludes one-unit structures on 10 acres or more, housing units in public housing projects, housing units with government rent subsidies, and mobile homes or trailers in 1979 and 1976; includes units where the subsidized/nonsubsidized status was not reported.

Annual Housing Survey: 1983

Indicators of Housing and Neighborhood Quality

B

Table A-1. Occupancy and Utilization Characteristics and Services Available for Occupied Housing Units: 1983

[Data based on sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Characteristics	Total
Duration of Occupancy	
Owner occupied	**709 900**
Householder lived here:	
Less than 3 months	14 400
3 months or longer	695 500
Last winter	669 600
Renter occupied	**455 500**
Householder lived here:	
Less than 3 months	74 500
3 months or longer	381 000
Last winter	315 100
Bedroom Privacy	
Owner occupied	**709 900**
Bedrooms:	
None and 1	22 000
2 or more	687 900
None lacking privacy	625 500
1 or more lacking privacy[1]	58 300
Bathroom accessed through bedroom[2]	34 300
Other room accessed through bedroom	32 800
Not reported	4 200
Renter occupied	**455 500**
Bedrooms:	
None and 1	159 500
2 or more	295 900
None lacking privacy	260 300
Bedroom Privacy—Con.	
Renter occupied—Con.	
Bedrooms—Con.	
2 or more—Con.	
1 or more lacking privacy[1]	34 800
Bathroom accessed through bedroom[2]	28 500
Other room accessed through bedroom	16 400
Not reported	900
Extermination Service	
Owner occupied	**709 900**
Occupied 3 months or longer	695 500
No signs of mice or rats	606 200
With signs of mice or rats	84 000
With regular extermination service	11 400
With irregular extermination service	26 400
No extermination service	44 300
Not reported	1 900
Not reported	5 200
Occupied less than 3 months	14 400
Renter occupied	**455 500**
Occupied 3 months or longer	381 000
No signs of mice or rats	314 200
With signs of mice or rats	65 000
With regular extermination service	7 100
With irregular extermination service	13 700
No extermination service	42 100
Not reported	2 100
Not reported	1 900
Occupied less than 3 months	74 500

[1]Figures may not add to total because more than one condition may be reported for the same housing unit.
[2]Limited to housing units with only one flush toilet.

[1]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[2]Figures may not add to total because household members may be included in more than one group.
[3]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table A-5. Value of Owner-Occupied Housing Units by Occupancy and Utilization Characteristics and Services Available: 1983

[1]Limited to one-unit structures on less than 10 acres and no business on property.
[2]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[3]Figures may not add to total because household members may be included in more than one group.
[4]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

[1]Excludes one-unit structures on 10 acres or more.
[2]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[3]Figures may not add to total because household members may be included in more than one group.
[4]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

[1]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[2]Figures may not add to total because household members may be included in more than one group.
[3]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table A-17. Value of Owner-Occupied Housing Units by Occupancy and Utilization Characteristics and Services Available for Housing Units With Black Householder: 1983

[1]Limited to one-unit structures on less than 10 acres and no business on property.
[2]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[3]Figures may not add to total because household members may be included in more than one group.
[4]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

[1]Excludes one-unit structures on 10 acres or more.
[2]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[3]Figures may not add to total because household members may be included in more than one group.
[4]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table A-25. Income of Families and Primary Individuals by Occupancy and Utilization Characteristics and Services Available for Housing Units With Householder of Spanish Origin: 1983

[Data based on sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Characteristics	Total	Less than $3,000	$3,000 to $6,999	$7,000 to $9,999	$10,000 to $14,999	$15,000 to $19,999	$20,000 to $24,999	$25,000 to $34,999	$35,000 to $49,999	$50,000 to $74,999	$75,000 or more	Median (dollars)

[1]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[2]Figures may not add to total because household members may be included in more than one group.
[3]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table A-29. Value of Owner-Occupied Housing Units by Occupancy and Utilization Characteristics and Services Available for Housing Units With Householder of Spanish Origin: 1983

[Data based on sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Characteristics	Total	Less than $10,000	$10,000 to $19,999	$20,000 to $29,999	$30,000 to $39,999	$40,000 to $49,999	$50,000 to $59,999	$60,000 to $74,999	$75,000 to $99,999	$100,000 to $199,999	$200,000 or more	Median (dollars)

[1]Limited to one-unit structures on less than 10 acres and no business on property.
[2]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[3]Figures may not add to total because household members may be included in more than one group.
[4]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table A-33. Gross Rent of Renter-Occupied Housing Units by Occupancy and Utilization Characteristics and Services Available for Housing Units With Householder of Spanish Origin: 1983

[1]Excludes one-unit structures on 10 acres or more.
[2]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[3]Figures may not add to total because household members may be included in more than one group.
[4]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table B-1. Income of Families and Primary Individuals by Occupancy and Utilization Characteristics and Services Available: 1983

[Data based on sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Characteristics	Total	Less than $3,000	$3,000 to $6,999	$7,000 to $9,999	$10,000 to $14,999	$15,000 to $19,999	$20,000 to $24,999	$25,000 to $34,999	$35,000 to $49,999	$50,000 to $74,999	$75,000 or more	Median (dollars)

[1]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[2]Figures may not add to total because household members may be included in more than one group.
[3]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table B-5. Value of Owner-Occupied Housing Units by Occupancy and Utilization Characteristics and Services Available: 1983

[Data based on sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Characteristics	Total	Less than $10,000	$10,000 to $19,999	$20,000 to $29,999	$30,000 to $39,999	$40,000 to $49,999	$50,000 to $59,999	$60,000 to $74,999	$75,000 to $99,999	$100,000 to $199,999	$200,000 or more	Median (dollars)

[1]Limited to one-unit structures on less than 10 acres and no business on property.
[2]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[3]Figures may not add to total because household members may be included in more than one group.
[4]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

[1]Excludes one-unit structures on 10 acres or more.
[2]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[3]Figures may not add to total because household members may be included in more than one group.
[4]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table B-13. Income of Families and Primary Individuals by Occupancy and Utilization Characteristics and Services Available for Housing Units With Black Householder: 1983

[Data based on sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Characteristics	Total	Less than $3,000	$3,000 to $6,999	$7,000 to $9,999	$10,000 to $14,999	$15,000 to $19,999	$20,000 to $24,999	$25,000 to $34,999	$35,000 to $49,999	$50,000 to $74,999	$75,000 or more	Median (dollars)

[1]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[2]Figures may not add to total because household members may be included in more than one group.
[3]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table B-17. Value of Owner-Occupied Housing Units by Occupancy and Utilization Characteristics and Services Available for Housing Units With Black Householder: 1983

[Data based on sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Characteristics	Total	Less than $10,000	$10,000 to $19,999	$20,000 to $29,999	$30,000 to $39,999	$40,000 to $49,999	$50,000 to $59,999	$60,000 to $74,999	$75,000 to $99,999	$100,000 to $199,999	$200,000 or more	Median (dollars)

[1]Excludes one-unit structures on 10 acres or more.
[2]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[3]Figures may not add to total because household members may be included in more than one group.
[4]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

[1]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[2]Figures may not add to total because household members may be included in more than one group.
[3]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table B-29. Value of Owner-Occupied Housing Units by Occupancy and Utilization Characteristics and Services Available for Housing Units With Householder of Spanish Origin: 1983

[Data based on sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Characteristics	Total	Less than $10,000	$10,000 to $19,999	$20,000 to $29,999	$30,000 to $39,999	$40,000 to $49,999	$50,000 to $59,999	$60,000 to $74,999	$75,000 to $99,999	$100,000 to $199,999	$200,000 or more	Median (dollars)

Not reported	-	-	-	-	-	-	-	-	-	-	-	-

[1]Limited to one-unit structures on less than 10 acres and no business on property.
[2]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[3]Figures may not add to total because household members may be included in more than one group.
[4]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table B-33. Gross Rent of Renter-Occupied Housing Units by Occupancy and Utilization Characteristics and Services Available for Housing Units With Householder of Spanish Origin: 1983

[1]Excludes one-unit structures on 10 acres or more.
[2]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[3]Figures may not add to total because household members may be included in more than one group.
[4]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table C-1. Income of Families and Primary Individuals by Occupancy and Utilization Characteristics and Services Available: 1983

[Data based on sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Characteristics	Total	Less than $3,000	$3,000 to $6,999	$7,000 to $9,999	$10,000 to $14,999	$15,000 to $19,999	$20,000 to $24,999	$25,000 to $34,999	$35,000 to $49,999	$50,000 to $74,999	$75,000 or more	Median (dollars)

[1]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[2]Figures may not add to total because household members may be included in more than one group.
[3]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

[1]Limited to one-unit structures on less than 10 acres and no business on property.
[2]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[3]Figures may not add to total because household members may be included in more than one group.
[4]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

[1]Excludes one-unit structures on 10 acres or more.
[2]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[3]Figures may not add to total because household members may be included in more than one group.
[4]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table C-13. Income of Families and Primary Individuals by Occupancy and Utilization Characteristics and Services Available for Housing Units With Black Householder: 1983

[1]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[2]Figures may not add to total because household members may be included in more than one group.
[3]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table C-17. **Value of Owner-Occupied Housing Units by Occupancy and Utilization Characteristics and Services Available for Housing Units With Black Householder: 1983**

[Data based on sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]

Characteristics	Total	Less than $10,000	$10,000 to $19,999	$20,000 to $29,999	$30,000 to $39,999	$40,000 to $49,999	$50,000 to $59,999	$60,000 to $74,999	$75,000 to $99,999	$100,000 to $199,999	$200,000 or more	Median (dollars)

[1]Excludes one-unit structures on 10 acres or more.
[2]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[3]Figures may not add to total because household members may be included in more than one group.
[4]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table C-25. Income of Families and Primary Individuals by Occupancy and Utilization Characteristics and Services Available for Housing Units With Householder of Spanish Origin: 1983

Not reported	600	-	-	-	-	-	-	600	-	-	-	...

[1]Limited to one-unit structures on less than 10 acres and no business on property.
[2]Wish to move only relates to respondent's opinion of specific neighborhood conditions.
[3]Figures may not add to total because household members may be included in more than one group.
[4]Satisfaction and wish to move only relate to respondent's opinion of police protection, outdoor recreation facilities, and hospitals or health clinics.

Table C-33. **Gross Rent of Renter-Occupied Housing Units by Occupancy and Utilization Characteristics and Services Available for Housing Units With Householder of Spanish Origin: 1983**

AREA CLASSIFICATIONS

Counties—The primary divisions of most of the States are termed counties; in Louisiana, the corresponding areas are termed parishes. Alaska has no counties; in this State, areas designated as census divisions have been defined for general statistical purposes by the State, in cooperation with the Census Bureau, and are treated as county equivalents. Four States (Maryland, Missouri, Nevada, and Virginia) contain one or more cities that are independent of any county; for statistical purposes, these independent cities are treated as county equivalents.

Standard metropolitan statistical areas—The definitions of standard metropolitan statistical areas (SMSA's) used in the Annual Housing Survey correspond to the 243 SMSA's used in the 1970 census. These include 228 SMSA's as defined and named in the Bureau of the Budget publication, *Standard Metropolitan Statistical Areas: 1967,* U.S. Government Printing Office, Washington, D.C. 20402. After 1967, 15 SMSA's were added, of which 2 were defined in January 1968, and an additional 13 were defined in February 1971 as a result of the 1970 census. Changes in SMSA definition criteria, boundaries, and titles made after February 1971 are not reflected in this series of reports. SMSA's are defined by the Office of Management and Budget (formerly Bureau of the Budget).

Except in the New England States, an SMSA is a county, or group of contiguous counties, which contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are socially and economically integrated with the central city. In the New England States, SMSA's consist of towns and cities instead of counties. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities. For a detailed description of the criteria used in defining SMSA's, see the Bureau of the Budget publication cited in the preceding paragraph.

In this report, figures for "in central cities" refer to all housing units within the legal city boundaries.

DEFINITIONS AND EXPLANATIONS OF SUBJECT CHARACTERISTICS

General

As stated in the introduction, the 1983 Annual Housing Survey was conducted by personal interview. The survey interviewers were instructed to read the questions directly from the questionnaire. The definitions and explanations given for each subject are, to a considerable extent, drawn from various technical and procedural materials used in the collection of the data. This material helped the field interviewers to understand more fully the intent of each question and thus to resolve problems or unusual cases. Additional explanatory information has been added to this portion of the text to assist the user in understanding the statistics.

Comparability with 1976 and 1979 SMSA Annual Housing Survey data—Most of the concepts and definitions used in the 1976, 1979, and 1983 reports are essentially the same. However, there are some differences in the measurement of losses. In the 1976 report, losses are measured from 1970, while in the 1983 report, losses are measured from 1979. In the 1979 report, losses are measured from 1976. Also, in 1976, housing units in nonpermit-issuing areas (mainly rural areas) were counted as losses only when the whole structure in which the unit was located was lost from the inventory. In the 1979 and 1983 reports, the data refer to losses of individual housing units regardless of whether the entire structure was lost from the inventory. The source of the data for lost units in the 1976 reports is the 1970 Census of Housing; the source of the data for lost units in the 1979 and 1983 reports are the 1976 and 1979 Annual Housing Surveys.

Additional differences, if any, are discussed under the particular subject. Because of the relatively small sample size, particular care should be taken in making comparisons between the three surveys, especially where there are small differences between the figures (see appendix B).

Comparability with 1970 Census of Housing data—The concepts and definitions are essentially the same for items that appear in both the 1970 census and the 1983 survey reports.

There is a major difference, however, in the time period of the recent mover classification. In the Annual Housing Survey, recent movers are households that moved into their unit during the 12 months prior to the interview, a time period of 1 year or less. In the 1970 Census of Housing reports, different time periods were used. In Volume II, *Metropolitan Housing Characteristics,* the shortest time period for "year moved into unit," is 1969 to March 1970 (1¼ years); in Volume IV, *Components of Inventory Change,* the time period is 1969 to December 1970 (approximately 2 years); and in Volume VII, No 5, *Mover Households,* the time period is April 1965 to March 1970 (approximately 5 years). Volume IV is the only 1970 census report which shows cross-tabulations of data on characteristics of present units by characteristics of previous units for recent movers.

Other definitional differences, if any, are discussed under the particular subject. Additional differences between the 1983 Annual Housing Survey data and the 1970 census data may be attributed to several factors. These include the extensive use of self-enumeration in the census in contrast to personal interview in the Annual Housing Survey; differences in processing procedures; the estimation procedures and sample designs; the sampling variability of the estimates from the Annual Housing Survey; to a smaller extent, the sampling variability associated with the sample data from the census; the nonsampling errors associated with the Annual Housing Survey estimates; and the nonsampling errors associated with the census data.

Statistics on counts and characteristics of changes in the housing inventory between the 1960 and 1970 censuses are given for the United States and for 15 selected SMSA's in the 1970 Census of Housing, Volume IV, *Components of Inventory Change*. In volume IV, the data are based on information for a sample of housing units enumerated in late 1970 as part of the 1970 census. Data are provided for such components of change between 1960 and 1970 as new construction, conversions, other additions, demolitions, mergers, other losses, and housing units that were the same in 1960 and in 1970.

In part A of this report, some of the data for components of inventory change are shown; i.e., new construction and housing unit losses (units removed from the inventory) through demolition, disaster, or some other means. The 1983 data on new construction were obtained primarily from a sample of units selected from building permits. The 1970 *Components of Inventory Change* data were obtained from the 1970 census tabulations of the year structure built item; i.e., housing units built in 1960 or later were classified as added by new construction.

Data as of 1970 for mortgage insurance, real estate taxes last year, selected monthly housing costs, and acquisition of property are presented in the 1970 Census of Housing, Volume V, *Residential Finance*. In volume V, the data are based on information collected for a sample of housing units in the Residential Finance Survey which was conducted in 1971 as part of the 1970 census. The 1971 report provided data on the financing of homeowner and rental properties, including characteristics of the mortgages, properties, and homeowners.

Differences in the concepts and definitions between the data in this report and volume V include the following. The basic unit of tabulation in this report is the housing unit; in volume V, it is the property. Data on mortgage insurance are based on the occupant's answer; in volume V, mortgage insurance was verified by the lender. In this report, real estate taxes and selected monthly housing costs reflect the total amount of real estate taxes and housing costs, excluding special assessments. In volume V, real estate taxes and selected monthly housing costs include special assessments.

Comparability with 1980 Census of Housing data—Most of the concepts and definitions are the same for items that appear in both the 1980 census and the 1983 Annual Housing Survey (AHS).

There are one major difference and two minor differences, however, in the housing unit definition. The major difference is that the 1980 census includes vacant mobile homes as housing units; the 1983 AHS excludes these units. The first minor difference is that the housing unit definition in the 1983 AHS requires a unit to be separate living quarters and have direct access or complete kitchen facilities; for the 1980 census, the complete kitchen facilities alternative was dropped with direct access required of all units. The second minor difference is that, in the 1983 AHS, living arrangements containing five or more persons not related to the person in charge were classified as group quarters; in the 1980 census, the requirement was raised to nine or more persons not related to the person in charge.

In the 1983 AHS, owner-occupied cooperatives were identified; in the 1980 census, these units were not identified separately, but were included in the overall count of owner-occupied units. The 1980 census will provide data on vacant-for-rent and renter-occupied condominium units.

Additionally, in the 1983 AHS, complete plumbing facilities need only to be located in the structure in which the housing unit is located. In the 1980 census, these items must be inside the specific housing unit.

Differences between the 1983 Annual Housing Survey data and the 1980 census may also be attributed to several other factors. These include the extensive use of self-enumeration in the census in contrast to personal interview in the survey; differences in processing procedures and sample designs; the sampling variability associated with the sample data from both the AHS and the census; the nonsampling errors associated with the survey estimates; and the nonsampling errors associated with the census data.

Comparability with 1970 and 1980 Censuses of Population data—In the 1970 and 1980 censuses, data for years of school completed were based on responses to two questions: the highest grade or year of regular school each household member attended, and whether or not that grade or year was completed. In the 1983 AHS, data for years of school completed were based on responses to a single question; the highest grade or year of school completed by the householder. Therefore, the 1983 AHS may overstate the education level of the householder; that is, respondents may have reported the grade or year the householder was currently enrolled in or had last been enrolled in whether or not the grade or year was completed.

Comparability with Current Construction Reports from the Survey of Construction—The Census Bureau issues several publications under the general title, "Current Construction Reports." The data for these reports are primarily from the Survey of Construction.

The Survey of Construction consists of approximately 14,000 permit-issuing places throughout the United States. The reports from the survey contain current data on housing starts and completions, construction authorized by building permits, housing units authorized for demolition in permit-issuing places for selected areas; new one-unit structures sold and for sale, characteristics of new housing, and value of new construction put in place. The concepts and definitions used in this report

differ from some of those used in the Survey of Construction. The major difference is that the Survey of Construction shows counts and characteristics of housing units in various stages of construction through completion. The Annual Housing Survey shows counts and characteristics of the existing housing inventory. Additional differences between the 1983 Annual Housing Survey and the Survey of Construction may be attributed to factors such as the sampling variability and nonsampling errors of the data from the two surveys, survey procedures and techniques, and processing procedures.

Comparability with other Bureau of the Census data—Statistics in this report refer, for the most part, to the housing unit, household, or householder. Data on the individual household members such as "Population in housing units" and "Own children under 18 years old" may differ from other similar data compiled by the Bureau of the Census. For these types of data, write to Chief, Population Division, Bureau of the Census, Washington, D.C. 20233.

Comparability with housing vacancy surveys—There may be differences between this survey and Federal, State, local, and other surveys which present vacancy rates. The differences may be attributed to such factors as differing interview periods, survey designs, survey techniques, and processing procedures, as well as differences in concepts and definitions. In addition, there are sampling and nonsampling errors.

Living Quarters

Living quarters are classified as either housing units or group quarters. Usually, living quarters are in structures intended for residential use (e.g., a one-unit structure, apartment house, hotel or motel, boarding house, or mobile home or trailer). Living quarters may also be in structures intended for nonresidential use (e.g., the rooms in a warehouse where a watchman lives), as well as in places such as tents, caves, and old railroad cars.

Housing units—A housing unit is a house, an apartment, a group of rooms, or a single room occupied or intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants do not live and eat with any other persons in the structure and which have either (1) direct access from the outside of the building or through a common hall which is used or intended to be used by the occupants of another unit or by the general public or (2) complete kitchen facilities for the exclusive use of the occupants. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except as described in the section on group quarters). For vacant units, the criteria of separateness, direct access, and complete kitchen facilities for exclusive use are applied to the intended occupants whenever possible. If the information cannot be obtained, the criteria are applied to the previous occupants. Both occupied and vacant housing units are included in the housing inventory, except that mobile homes trailers, tents, caves, boats, railroad cars, and the like, are included only if they are occupied.

Group quarters—Group quarters are living arrangements for institutional inmates or for other groups containing five or more persons not related to the person in charge. Group quarters are located most frequently in institutions, boarding houses, military barracks, college dormitories, fraternity and sorority houses, hospitals, monasteries, convents, and ships. A house or apartment is considered group quarters if it is shared by the person in charge and five or more persons unrelated or, if there is no person in charge, by six or more unrelated persons. Information on the housing characteristics of group quarters was not collected.

Mobile homes, trailers, hotels, rooming houses, etc.—Mobile homes or trailers, tents, boats, or railroad cars are not considered housing units if vacant, used only for business, or used only for vacations.

Occupied rooms or suites of rooms in hotels, motels, and similar places are classified as housing units only when occupied by permanent residents; i.e., persons who consider the hotel as their usual place of residence or have no usual place of residence elsewhere. Vacant rooms or suites of rooms are classified as housing units only in those hotels, motels, and similar places in which 75 percent or more of the accommodations are occupied by permanent residents.

If any of the occupants in a rooming or boarding house live and eat separately from everyone else in the building and have either direct access or complete kitchen facilities for exclusive use, their quarters are classified as separate housing units. The remaining quarters are combined. If the combined quarters contain four or fewer roomers unrelated to the householder, they are classified as one housing unit; if the combined quarters contain five or more roomers unrelated to the householder, or person in charge, they are classified as group quarters. In a dormitory, residence hall, or similar place, living quarters of the supervisory staff and other employees are separate housing units if they satisfy the housing unit criteria; other living quarters are considered group quarters.

Institutions—Living quarters of staff personnel are separate housing units if they satisfy the housing unit criteria. Other living quarters are considered group quarters.

Year-round housing units—Data on housing characteristics are limited to year-round housing units, i.e., all occupied units plus vacant units which are intended for year-round use. Vacant units intended for seasonal occupancy and vacant units held for migratory labor are excluded because it is difficult to obtain reliable information for them. However, this report does present counts of the total housing inventory which includes all vacant seasonal and vacant migratory housing units.

Changes in the Housing Inventory

Housing units added by new construction—Conventional (nonmobile home or trailer) housing units which were not in existence at the time of the 1979 survey are classified as new construction units. Mobile homes and trailers are considered as new construction if the model year is 1980 or later. Information was collected on vacant units under construction at the time of interview only if construction had proceeded to a point that all exterior windows and doors were installed and final usable floors were in place. Housing units built since the 1979 survey but removed from the inventory before the time of interview are not reflected in the new construction counts.

In the 1979 survey, a housing unit built since the 1976 survey was classified as a unit added by new construction. In the Annual Housing Survey, data on new construction were obtained primarily from a sample of units selected from building permits; in the 1970 Census of Housing, Volume IV, *Components of Inventory Change,* new construction data were obtained from the 1970 sample records of units built in 1960 or later.

Housing units lost from the inventory—In table 4 of part A of this report, characteristics are presented for all housing units removed from the inventory through demolition, disaster, or other means.

Housing units lost through demolition or disaster—A housing unit which existed during the 1979 survey period and was torn down on the initiative of a public agency or as a result of action on the part of the owner is classified as a unit lost through demolition. Housing units destroyed by fire, flood, or other natural causes are classified as units lost through disaster.

In the 1970 Census of Housing, Volume IV, *Components of Inventory Change,* the data on losses refer to all housing unit losses, including losses of units in structures which still contained one or more housing units. In addition, units lost through disaster were counted, in 1970, as units lost through other means.

Housing units lost through other means—Any housing unit which existed during the 1979 survey period is counted as lost through other means when it is lost from the housing inventory through means other than demolition or disaster. This component includes the following types of losses:

1. Housing units lost by change to group quarters; for example, a housing unit that was occupied by a family in 1970 and by a family and five lodgers at the time of the interview.
2. Housing units lost from the inventory because they are vacant and either the roof, walls, doors, or windows no longer protect the interior from the elements or the unit is severely damaged by fire.
3. Vacant housing units lost from the inventory because there is positive evidence (sign, notice, mark on the house or block) that the units are scheduled for demolition or rehabilitation or that they are condemned for reasons of health or safety so that further occupancy is prohibited.
4. Housing units lost by change to entirely nonresidential use.
5. Housing units moved from site since the 1979 survey. Such moves in the same area do not necessarily result in a net loss from the total inventory since they presumably represent units added in the place to which they were moved.

In the 1970 Census of Housing, Volume IV, *Components of Inventory Change,* housing units lost through disaster (fire, flood, or other such causes) were counted in 1970 as units lost through other means.

Unspecified housing units—There are other components of change in the housing inventory for which the Annual Housing Survey provides no specific measures. The survey procedures do not include a measure of conversions and mergers and units added from other sources such as nonresidential structures. The net effect of these omissions on the change in the total housing inventory is not known.

Housing units changed by conversion—Conversion refers to the creation of two or more housing units out of a smaller number of housing units through structural alteration or change in use. Structural alteration includes such changes as adding a room or installing partitions to form another housing unit. Change in use is a simple rearrangement in the use of space without structural alteration, such as locking a door which closes off one or more rooms to form a separate housing unit.

Housing units changed by merger—A merger is the result of combining two or more housing units to form a smaller number of housing units through structural alteration or change in use. Structural alteration includes such changes as the removal of partitions or dismantling of kitchen facilities. Change in use may result from a simple rearrangement of space without structural alteration, such as unlocking a door which formerly separated two housing units. A change in use also occurs, for example, when a family occupies both floors of a house which formerly contained a separate housing unit on each floor.

Housing units added through other sources—Any housing unit added to the inventory through sources other than new construction or conversion is classified as a unit added through other sources. This component of inventory change includes housing units created from living quarters previously classified as group quarters and units created from nonresidential space such as a store, garage, or barn. Also included are housing units built at one site and moved to another. Such housing units, if moved within the same area, do not necessarily result in a net addition to the total inventory, since they presumably represent units lost in the place from which they were moved. A previously vacant mobile home or trailer, whether on a different site or the same site, is a net addition if currently occupied as a housing unit.

These unspecified housing units are *not* identified in the survey.

Occupancy and Vacancy Characteristics

Occupied housing units—A housing unit is classified as occupied if a person or group of persons is living in it at the time of the

interview or if the occupants are only temporarily absent, for example, on vacation. However, if the unit was occupied entirely by persons with a usual place of residence elsewhere, the unit is classified as vacant. By definition, the count of occupied housing units is the same as the count of households.

Population in housing units—Population in housing units is the total population excluding those persons in group quarters and those persons occupying housing units but whose usual residence is elsewhere.

Race—The classification of "race" refers to the race of the householder occupying the housing unit. The concept of race as used by the Census Bureau does not denote clear-cut scientific definition of biological stock. The interviewer was to report the race of the householder in three categories: White, Black (Negro), and other. The last category includes American Indian, Chinese, Eskimo, Japanese, Korean, and any other race except White and Black. Figures on tenure are given separately for White and Black householders; housing units with householders of other races are included in the total in table 1 of part A and may be derived by subtracting the sum of White and Black from the total. More detailed characteristics of units with Black householders are presented in separate tables. The classification of race in the Annual Housing Survey was made by the interviewer's own observation. The 1970 data on race was based on self-classification by respondents.

Spanish origin—The classification "Spanish origin" refers to the origin of the householder occupying the housing unit. Detailed characteristics of housing units with householder of Spanish origin are presented in separate tables. Spanish origin was determined on the basis of a question that asked for self-identification of a person's origin or descent. Respondents were asked to select their origins from a flash card. Persons of Spanish origin were those who indicated that their origin was either Mexican-American, Chicano, Mexican, Mexicano, Puerto Rican, Cuban, Central or South American, or other Spanish. Persons of Spanish origin may be of any race.

In the 1970 and 1980 censuses, and current surveys' reports, Spanish persons are identified according to various criteria: Birthplace, birthplace of parents, language, surname, and origin or descent. For this reason, care should be taken in making comparisons of Spanish-origin estimates from the Annual Housing Survey and other surveys.

Tenure—A housing unit is owner occupied if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. Also, a cooperative or condominium unit is owner occupied only if the owner or co-owner lives in it. All other occupied housing units are classified as renter occupied, including housing units rented for cash rent and those occupied without payment of cash rent.

Cooperatives and condominiums—A cooperative is a type of ownership whereby a group of housing units are owned by a corporation of member-owners. Each individual member is entitled to occupy an individual housing unit and is a shareholder in the corporation which owns the property.

A condominium is a type of ownership that enables a person to own an apartment or house in a project of similarly owned units. The owner has the deed and very likely the mortgage on the unit occupied. The owner may also hold common or joint ownership in some or all common areas such as grounds, hallways, entrances, elevators, etc.

Cooperative or condominium ownership may apply to various types of structures including single-family houses, rowhouses, townhouses, etc., as well as apartment units.

Duration of occupancy—Data on duration of occupancy are based on information for the householder; the data refer to the period when present occupancy began. Statistics are shown on whether the householder lived in the housing unit less than 3 months or 3 months or longer. To qualify as having lived here last winter, the householder must have moved into the unit prior to February 1983.

Year householder moved into unit—The data are based on the information reported for the householder and refer to the year of latest move. Thus, if the householder moved back into a housing unit previously occupied, the year of the latest move was to be reported; if the householder moved from one apartment to another in the same building, the year the householder moved into the present unit was to be reported. The intent is to establish the year the present occupancy by the householder began. The year the householder moves is not necessarily the same year other members of the household move; although, in the great majority of cases the entire household moves at the same time.

Vacant housing units—A housing unit is vacant if no one is living in it at the time of the interview, unless its occupants are only temporarily absent. In addition, a vacant housing unit may be one which is occupied entirely by persons who have a usual residence elsewhere.

New housing units not yet occupied are classified as vacant housing units if construction has reached a point where all exterior windows and doors are installed and final usable floors are in place. Vacant units are excluded if unfit for human habitation; that is, if the roof, walls, windows, or doors no longer protect the interior from the elements, or if there is positive evidence (such as a sign on the house or block) that the unit is to be demolished or is condemned. Also excluded are quarters being used entirely for nonresidential purposes, such as a store, or an office; or quarters used for storing business supplies or inventory, machinery, or agricultural products.

Vacancy status—Vacant housing units are classified as either "seasonal and migratory" or "year-round." Seasonal housing units are intended for occupancy during only certain seasons of the year. Included are housing units intended for recreational use, such as beach cottages and hunting cabins, and vacant units

held for herders and loggers. Migratory units are vacant units held for occupancy by migratory labor employed in farm work during the crop season.

Year-round vacant housing units are available or intended for occupancy at any time of the year. A housing unit in a resort area which is usually occupied on a year-round basis is considered year-round. A housing unit used only occasionally throughout the year is also considered year-round. Year-round vacant housing units are subdivided as follows:

For sale only—Vacant year-round units "for sale only" also include vacant units in a cooperative or condominium building if the individual units are offered for sale only.

For rent—Vacant year-round units "for rent" also include vacant units offered either for rent or for sale.

Rented or sold, not occupied—If any money rent has been paid or agreed upon, but the new renter has not moved in as of the date of the interview, or if the unit has recently been sold, but the new owner has not yet moved in, the year-round vacant unit is classified as "rented or sold, not occupied."

Held for occasional use—This category consists of vacant year-round units which are held for weekend or other occasional use throughout the year. The intent of this question is to identify homes reserved by their owners as second homes. Because of the difficulty of distinguishing between this category and seasonal vacancies, it is possible that some second homes are classified as seasonal and vice versa.

Temporarily occupied by persons with usual residence elsewhere (URE)—If all the persons in a housing unit usually live elsewhere, that unit is classified as vacant, provided the usual place of residence is held for the household and is not offered for rent or for sale. For example, a beach cottage occupied at the time of the interview by a family which has a usual place of residence in the city is included in the count of vacant units. If the house in the city was in the survey sample, the house would be reported "occupied" and would be included in the count of occupied units, since the occupants are only temporarily absent.

Held for other reasons—If a vacant year-round unit does not fall into any of the classifications specified, it is classified as "held for other reasons." For example, this category includes units held for settlement of an estate, units held for occupancy by a caretaker or janitor, and units held for personal reasons of the owner.

In part A, the "other vacant" category includes all housing units temporarily occupied by persons with usual residence elsewhere and units held for other reasons.

Characteristics of vacant housing are limited to year-round vacant units. Vacant units intended for seasonal occupancy and vacant units held for migratory labor are excluded because it is difficult to obtain reliable information for them. However, counts of seasonal units are given in part A.

Duration of vacancy—The statistics on duration of vacancy refer to the length of time (in months) from the date the last occupants moved from the housing unit to the date of the interview. The data, therefore, do not provide a direct measure of the total length of time that units remained vacant. For newly constructed units which have never been occupied, the duration of vacancy is counted from the date construction was completed. For recently converted or merged units, the time is reported from the date that conversion or merger was completed. Housing units occupied entirely by persons with usual place of residence elsewhere are excluded from the data.

Homeowner vacancy rate—The homeowner vacancy rate is the number of year-round units for sale as a percent of the total homeowner inventory; i.e., all owner-occupied housing units and year-round vacant housing units for sale or sold, not occupied.

Rental vacancy rate—The rental vacancy rate is the number of year-round units for rent as a percent of the total rental inventory; i.e., all renter-occupied housing units and all year-round vacant housing units for rent or rented, not occupied.

Housing Units Occupied by Recent Movers

Recent movers—Households that moved into their present housing units within 12 months prior to the date of the interview are termed "recent movers." The household is classified by year moved into unit on the basis of information reported for the householder.

Previous occupancy—The classification of previous occupancy is divided into two categories: "previously occupied" and "not previously occupied." Previously occupied indicates that some person or persons not related to the householder by blood, marriage, or adoption occupied the housing unit prior to the householder or other related household member's occupancy. Not previously occupied indicates that either the householder or some other current household member related to the householder by blood, marriage, or adoption was the first occupant of the housing unit.

Present and previous units of recent movers—The present unit is the housing unit occupied by the recent mover at the time of the interview. The previous unit is the housing unit from which that person moved. If the household moved more than once during the 12 months prior to the date of the interview, the previous unit is the one from which the household last moved.

Same or different householder—Characteristics of the present and previous units occupied by recent movers are largely restricted to households that were essentially the same in the two units. The definitions of the characteristics for the previous unit are generally the same as those for the present unit.

A household for which the householder in the present housing unit is the same person as the householder in the previous housing unit (identified in the table as "same householder") is considered essentially the same even though there may have been some changes in the composition of the household. Conversely, a household in which there was no change except for a new householder was considered with "different householder."

Main reason for move from previous unit—The statistics presented are restricted to housing units occupied by recent movers in which the present householder was also the householder at the previously occupied unit. The classification categories refer to the principal reason the householder moved from the previous unit. The category "job related reasons" refers to reasons such as job transfer, to look for work, to take a new job, entered or left U.S. Armed Forces, retirement, commuting reasons, school attendance, and other job related reasons.

The category "family status" refers to reasons such as needed larger house or apartment, divorced or separated, widowed, to be closer to relatives, newly married, family increased in size, family decreased in size, to establish own household, schools, wanted neighborhood with children, wanted neighborhood without children, and other family related reasons.

The category "housing needs" refers to reasons such as wanted to own residence; neighborhood overcrowded; change in racial or ethnic composition of neighborhood; wanted better neighborhood; wanted more expensive place or better investment; lower rent or less expensive house; wanted better house; displaced by urban renewal, highway construction, or other public activity; displaced by private action; wanted to rent residence; wanted residence with more conveniences; and occurrence of natural disaster.

The category "other reasons" includes crime, wanted change of climate, and other reasons for moving which do not fall into any of the above classifications.

Main reason for move into present residence or neighborhood—The statistics presented are restricted to housing units occupied by recent movers in which the present householder was also the householder at the previously occupied unit. The classification categories refer to the principal reason the householder moved into the present unit. The category "job related reasons" refers to job transfer, to look for work, to take a new job, entered U.S. Armed Forces, retirement, commuting reasons, school attendance, and other job related reasons.

The category "family status" refers to reasons such as needed larger house or apartment, to be closer to relatives, wanted neighborhood with children, wanted neighborhood without children, and schools.

The category "housing needs" refers to reasons such as neighborhood less crowded, racial or ethnic composition of neighborhood, wanted better neighborhood, wanted more expensive place or better investment residence with more conveniences, lower rent or less expensive house, and other housing needs.

The category "other reasons" includes low crime, change of climate, and other reasons for move into present neighborhood which do not fall into any of the above classifications.

Homeownership—Data are shown for householders who, during the 12 months prior to interview, moved into their housing unit. These data are restricted to owner-occupied housing units and show the number of previously owned units which the householder occupied as his/her usual place of residence. Excluded from the count of previously owned units are vacation homes purchased for rental or commercial purposes.

Purchase price—This item refers to owner-occupied recent mover homes on less than 10 acres. The purchase price is the total cost of the house and lot or condominium unit at the time the property was purchased.

Major source of down payment—This item refers to the source of the capital used to purchase the property (house or lot) or condominium unit. It includes capital used for outright purchases. The categories include sale of previous home, savings, borrowing other than mortgage on property, gift, land on which structure was built, and other sources.

Utilization Characteristics

Persons—All persons occupying the housing unit are counted. These persons include not only occupants related to the householder but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters of the householder. The data on persons show categories of the number of one-person through seven-or-more-person households by the number of housing units.

A person is counted at the usual place of residence for that person. This refers to the place where the person lives and sleeps most of the time. This place is not necessarily the same as a legal residence, voting residence, or domicile.

Rooms—The statistics on rooms are for the number of housing units with a specified number of rooms. Rooms counted include whole rooms used for living purposes, such as living rooms, dining rooms, kitchens, finished attic or basement rooms, recreation rooms, permanently enclosed porches that are suitable for year-round use, and lodgers' rooms. Also included are rooms used for offices by a person living in the unit.

A partially divided room, such as a dinette next to a kitchen or living room, is a separate room only if there is a partition from floor to ceiling, but not if the partition consists only of shelves or cabinets.

Not included in the count of rooms are bathrooms, halls, foyers or vestibules, balconies, closets, alcoves, pantries, strip or pullman kitchens, laundry or furnace rooms, unfinished attics or basements, other unfinished space used for storage, open porches, trailers used only as bedrooms, and offices used only by persons not living in the unit.

If a room is used by occupants of more than one housing unit, the room is included with the unit from which it is most easily reached.

Persons per room—Persons per room is computed for each occupied housing unit by dividing the number of persons in the unit by the number of rooms in the unit. The figures shown refer, therefore, to the number of housing units having the specified ratio of persons per room.

Bedrooms—The number of bedrooms in the housing unit is the count of rooms used mainly for sleeping, even if also used for other purposes. Rooms reserved for sleeping, such as guest rooms, even though used infrequently, are counted as bedrooms. On the other hand, rooms used mainly for other purposes, even though used also for sleeping, such as a living room with a hideaway bed, are not considered bedrooms. A housing unit consisting of only one room, such as a one-room efficiency apartment, is classified by definition as having no bedroom.

Data on bedrooms lacking privacy are shown for housing units with two or more bedrooms. Housing units have bedrooms lacking privacy when it is necessary to pass through a bedroom to get to another room, such as a den, and/or to get to the bathroom. The bathroom access criterion is applied only to housing units with one complete bathroom or one bathroom plus half bath in which the half bath lacks a flush toilet.

Structural Characteristics

Complete kitchen facilities—A housing unit has complete kitchen facilities when it has all three of the following for the exclusive use of the occupants of the unit: (1) An installed sink with piped water, (2) a range or cookstove, and (3) a mechanical refrigerator. All kitchen facilities must be located in the structure. They need not be in the same room. Quarters with only portable cooking equipment are not considered as having a range or cookstove. An icebox is not included as a mechanical refrigerator.

The kitchen facilities are for the exclusive use of the occupants when they are used only by the occupants of one housing unit, including lodgers or other unrelated persons living in the unit. When a structure consists of only one housing unit, all equipment located inside the structure is classified, by definition, for exclusive use.

For vacant housing units from which one or all of the kitchen facilities had been removed, the kitchen facilities used by the last occupant were to be reported.

Basement—Statistics on basements are based on the number of housing units located in structures built with a basement. A structure has a basement if there is enclosed space in which persons can walk upright under all or part of the building. In parts B and F, basements in structures with occupied units are further classified by signs of water leakage. The category "with signs of water leakage" consists of housing units in which the basement shows signs of water having leaked in from the outside during the last 90 days, even if the signs only appear when it rains. No signs of water leakage means that the basement shows no signs of water leakage, or that the signs of water leakage are caused by a problem inside the structure such as faulty plumbing. If the basement shows signs of water having leaked in from the outside but the problem causing the leakage has been corrected, the unit was classified as having no signs of water leakage.

The 1983 data on basements are for all year-round housing units; the 1970 data on basements are restricted to all occupied housing units.

Year structure built—Year structure built refers to when the building was first constructed, not when it was remodeled, added to, or converted. The figures refer to the number of housing units in structures built during the specified periods and in existence at the time of the interview. For mobile homes and trailers, the manufacturer's model year was assumed to be the year built.

Units in structure—In determining the number of housing units in a structure, all units, both occupied and vacant, were counted. The statistics are presented for the number of housing units in structures of specified type and size, not for the number of residential structures.

A structure is a separate building if it has either open space on all sides or is separated from other structures by dividing walls that extend from ground to roof. In part A, structures containing only one housing unit are further classified as detached or attached.

A one-unit structure is detached if it has open space on all four sides even though it has an adjoining shed or garage. A one-unit structure is attached if it has one or more walls extending from ground to roof which divide it from other adjoining structures, such as in rowhouses, townhouses, etc.

Mobile homes and trailers are shown as a separate category (see parts A, C, and D). When one or more rooms have been added to a mobile home or trailer, it is classified as a one-unit structure. If, however, only a porch or shed has been added, it is still counted as a mobile home or trailer.

Elevator in structure—Statistics on elevator in structure refer to the number of housing units in structures with four floors or more which have a passenger elevator. Housing units are without elevator in a structure of four floors or more if the structure has no passenger elevator or if the only elevator service is for freight.

Stories between main and apartment entrances—This item is restricted to two-or-more-unit structures and is concerned with the number of floors from the main entrance of the apartment building to the main entrance of the apartment. The number of stories is determined from ground level if there is no main building entrance and the apartment has its own private entrance, either from the ground level of the building or from an area that is *not located inside* the building, or if there is a main building entrance, but the entrance to the apartment cannot be reached by using the main building entrance.

Roof—Housing units with signs of water leakage are those in which the roof shows signs of water having leaked in from the outside during the last 90 days. No signs of water leakage means that the roof shows no signs of water leakage from the outside, or that the roof shows signs of water leakage, but the problem causing the leakage has been corrected. If the signs of water leakage are caused by a problem inside the structure, such as faulty plumbing, the housing unit is classified as having no signs of water leakage.

Interior walls and ceilings—Statistics are presented on whether or not there are open cracks or holes and broken plaster or peeling paint on the interior walls or ceilings of a housing unit. In-

cluded are cracks or holes that do not go all the way through to the next room or to the outdoors. Hairline cracks or cracks that appear in the walls or ceilings but are not large enough for a fingernail file to be inserted and very small holes caused by nails or other similar objects are not considered to be open cracks or holes.

Broken plaster or peeling paint must be on the inside walls or ceilings, and at least one area of the broken plaster or peeling paint must be approximately one square foot or larger.

Interior floors—Data are shown on whether there are holes in the interior floors of a housing unit. The holes do not have to go through the floor. Excluded are very small holes caused by nails or other similar objects.

Overall opinion of structure—The data presented are based on the respondent's overall opinion of the house or building as a place to live. The respondent was asked to rate the structure as excellent, good, fair, or poor.

Common stairways—The statistics on common stairways are presented for housing units in structures of two or more units with common stairways. The figures for loose steps and loose railings reflect the physical condition of the stairway; i.e., whether there are loose, broken, or missing steps or stair railings. Common stairways are stairways which are usually used by the occupants of more than one housing unit or by the general public. They may be either inside the structure or attached to the outside of the building.

Light fixtures in public halls—These statistics are presented for housing units in two-or-more-unit structures with public halls which have light fixtures. Data include whether or not the light fixtures are in working order. Light fixtures include wall lights, ceiling lights, or table lamps in the public halls of the building. Public halls are used by the occupants of more than one housing unit or by the general public.

Electric wiring—A housing unit is classified as having exposed electric wiring if the unit has any wiring that is not enclosed, either in the walls or in metal coverings, or if the unit has any wiring outside the walls enclosed in some material other than metal. Extension cords and other types of wiring that extend from a wall outlet to an appliance or lamp are not considered as exposed wiring.

Electric wall outlets—A housing unit is classified as having electric wall outlets in each room if there is at least one working electric wall outlet or wall plug in each room of the unit. A working electric wall outlet or wall plug is one that is in operating condition; i.e., can be used when needed. If a room does not have an electric wall outlet, an extension cord used in place of a wall outlet is not considered to be an electric wall outlet.

Electric fuses and circuit breakers—These statistics are presented for occupied housing units which had an electrical circuit fuse blown or breaker switch tripped during the 3 months prior to interview. The data are restricted to households whose householder has been at the present address for at least 90 days prior to the date of the interview. A blown fuse or tripped breaker switch results in the temporary loss of electricity until the fuse is replaced or the breaker switch reset. Blown fuses inside certain appliances or equipment (such as some large air conditioners) are counted as blown fuses or tripped breaker switches.

Plumbing Characteristics

Plumbing facilities—The category "with all plumbing facilities" consists of housing units which have hot and cold piped water inside the structure as well as a flush toilet and a bathtub or shower inside the structure for the exclusive use of the occupants of the unit. All plumbing facilities must be located in the structure but they need not be in the same room. Lacking some or all plumbing facilities means that the housing unit does not have all three specified plumbing facilities (hot and cold piped water, flush toilet, and bathtub or shower) inside the structure, or that the toilet or bathing facilities are also for the use of the occupants of other housing units.

Complete bathrooms—A housing unit is classified as having a complete bathroom if it has a room with a flush toilet, bathtub or shower, and a washbasin, as well as piped hot water in the structure for the exclusive use of the occupants of the unit. A half bathroom has either a flush toilet or a bathtub or shower for exclusive use, but does not have all the facilities for a complete bathroom.

The category "also used by another household" consists of housing units with bathroom facilities which are also for the use of the occupants of other housing units. The category "none" consists of units with no bathroom facilities, units with only a half bathroom, and units with all bathroom facilities but not in one room.

Source of water or water supply—A public system or private company refers to a common source supplying running water to six or more housing units. The water may be supplied by a city, county, water district, or private water company, or it may be obtained from a well which supplies six or more housing units. If a well provides water for five or fewer housing units, it is classified as an "individual well." Water sources such as springs, creeks, rivers, cisterns, ponds, or lakes are included in the "other" category.

For housing units that had piped water inside the structure, respondents were asked to provide information on breakdowns or failures in the water supply. The water may be available from sources such as a sink, washbasin, bathtub, or shower. A housing unit is classified as having "no piped water inside structure" if the unit has no piped water or if the only piped water available is outside the structure; for example, on an open porch or in another building. Data on breakdowns or failures of water supply are shown if the housing unit was occupied by the householder at least 90 days prior to interview and if the breakdown or failure lasted 6 consecutive hours or longer during the 90 days prior to the interview.

Breakdowns or failures in the water supply means that the housing unit was completely without running water from its regular source. A housing unit was considered to be completely without runnning water if (1) the water system serving the unit supplied no water at all, (2) no water was available in the unit due to a breakdown or failure in the water supply inside the structure, or (3) the equipment and facilities (i.e., faucets in the kitchen and the bathroom sinks, faucet and shower in the bathtub, flush toilet, etc.) were all inoperable. If the faucet in the kitchen was broken, but the one in the bathtub was working, the unit was not classified as being completely without water.

Housing units with a breakdown or failure in the water supply are also classified according to the number of breakdowns or failures and to the most common source of the problem. Problems inside the building refer to such problems as broken pipes in the housing unit (or building) or turning the water off in the housing unit (or building) for maintenance and repairs. Problems outside the building refer to such problems as power failures, breaks in the main water line, or shutdown by the water company for maintenance and repairs.

Sewage disposal—A public sewer is connected to a city, county, sanitary district, neighborhood, or subdivision sewer system. It may be operated by a governmental body or private organization. A septic tank or cesspool is an underground tank or pit used for disposal of sewage. Small sewage treatment plants, which in some localities are called neighborhood septic tanks, are classified as public sewers. A chemical toilet uses chemicals to break down or dissolve sewage; a privy refers to an outhouse or small shelter outside the unit which contains a toilet. Housing units for which sewage is disposed of in some other way are included in the "other" category.

The data on breakdowns or failures in the means of sewage disposal are limited to housing units in which the means of sewage disposal was a public sewer, septic tank, or cesspool. The breakdown or failure may have been the result of an overloaded sewage disposal system, lack of running water, a broken or cracked tank, etc. Data on breakdowns are shown if the housing unit was occupied by the householder at least 90 days prior to the interview and if the breakdown or failure lasted 6 consecutive hours or longer during the 90 days prior to the interview.

Flush toilet—The statistics on breakdowns or failures of flush toilet are limited to housing units that had all plumbing facilities with only one flush toilet; that is, one complete bathroom or one complete bathroom plus a half bath without a flush toilet. The flush toilet may be completely unusable because of broken pipes, stopped up soil pipe, lack of water supplied to the flush toilet, or some other reason.

Housing units with breakdown or failure in flush toilet are classified by the number of breakdowns or failures and to the most common source of the problem. Problems inside the building refer to such breakdowns or failures as broken pipes in the unit (or building), a cracked or broken bowl, or faulty flushing mechanism. Problems outside the building refer to such breakdowns or failures as breaks in the main water or sewer line or shutdowns by the water company for maintenance or repairs.

Data on breakdowns or failures of flush toilet are shown if the housing unit was occupied by the householder at least 90 days prior to the interview, and if the breakdown or failure lasted 6 consecutive hours or more during the 90 days prior to the interview.

Equipment and Fuels

Telephone available—A housing unit is classified as having a telephone if there is a telephone for receiving calls available to the occupants of the unit. The telephone may be located outside or inside the housing unit, and one telephone may serve the occupants of several units. The number of housing units with a telephone available, therefore, does not indicate the number of telephones installed in homes.

Heating equipment—Warm-air furnace refers to a central system which provides warm air through ducts leading to various rooms. A heat pump refers to an electric heating-cooling system which utilizes indoor and outdoor coils, a compressor, and a refrigerant to pump hot air in during the winter and cooled air in during the summer. Only heat pumps that are centrally installed with ducts to the rooms are included in this category. Steam or hot water refers to a central heating system in which heat from steam or hot water is delivered through radiators or other outlets. Built-in electric units are permanently installed in floors, walls, ceilings, or baseboards. A floor, wall, or pipeless furnace delivers warm air to the room right above the furnace or to the room(s) on one or both sides of the wall in which the furnace is installed.

Room heaters with flue include circulating heaters, convectors, radiant gas heaters, and other nonportable heaters that burn gas, oil, kerosene, or other liquid fuels, and which are connected to a flue, vent, or chimney to remove smoke and fumes. Room heaters without flue include any room heater (not portable) that burns gas, oil, or kerosene which does not connect to a flue, vent, or chimney. Fireplaces, stoves, or portable heaters include room heaters that burn coal, coke, charcoal, wood, or other solids. It also includes portable room heaters that burn kerosene, gasoline, fuel oil, or other liquid fuel, as well as portable electric heaters that get current from an electrical wall outlet.

For vacant housing units from which the heating equipment had been removed, the equipment used by the last occupants was to be reported.

For breakdowns or failures of heating equipment, data are shown for housing units occupied by the householder during the winter prior to the interview if the equipment was unusable for 6 consecutive hours or longer during that time. To qualify as having lived here last winter, the householder must have moved into the housing unit prior to February 1983.

Heating equipment is considered unusable if it cannot be used for the purposes intended; the breakdown or failure may be caused by broken pipes, electrical or gas parts out of order, or downed power lines.

Insufficient heat—The statistics presented refer to housing units in which the householder occupied the unit during the winter prior to the date of the interview. To qualify as having lived here last winter, the householder must have moved into the unit prior to February 1983.

Separate data are shown for housing units with additional heat source, rooms which lacked specified heat source, and housing units with closed rooms. The term "specified heating equipment" includes warm-air furnace; heat pump; steam or hot water system; built-in electric units; floor, wall, or pipeless furnace; and room heaters with flue. Excluded are room heaters without flue or vent, fireplaces, stoves, and portable heaters.

The data on additional heat source refer to housing units with specified heating equipment which had to use additional sources of heat to supplement the regular heating system because the regular system did not provide enough heat. Additional sources of heat, such as kitchen stoves, fireplaces, or portable heaters, may have been used only in the mornings or on very cold evenings. Electric blankets, heating pads, or hot water bottles are not considered additional sources of heat.

Rooms lacking specified heat source include rooms lacking hot air ducts, registers, radiators, and room heaters. The intent of this item was to identify rooms in housing units with specified heating equipment which did not contain the means of conveying the heat to the room. The kitchen was not considered to be a room for this item.

In addition, data are also shown for rooms which were closed because they could not be kept warm. The rooms must have been closed for 7 consecutive days or longer during the previous winter, and the unit must have heating equipment. For this item also, the kitchen was not considered a room.

Separate data are also shown for housing units with rooms which were so cold for 24 hours or more that it caused discomfort to the occupants. Housing units with specified heating equipment were excluded from this item. The purpose of this item was to determine if the absence of the more sophisticated types of heating equipment caused discomfort to the occupants of the unit.

Air conditioning—Air conditioning is defined as the cooling of air by a refrigeration unit; excluded are evaporative coolers, fans, or blowers which are not connected to a refrigeration unit. A room air-conditioning unit is an individual air conditioner which is installed in a window or an outside wall and generally intended to cool one room, although it may sometimes be used to cool several rooms. A central system is a central installation which air conditions the entire housing unit. In an apartment building, a central system may cool all apartments in the building; each apartment may have its own central system; or there may be several systems, each providing central air conditioning for a group of apartments. A central installation with individual room controls is a central air-conditioning system.

House heating fuel—Utility gas is gas piped through underground pipes from a central system to serve the neighborhood. Bottled, tank, or LP gas is pressurized gas stored in tanks or bottles which are filled or exchanged when empty. Fuel oil is heating oil normally supplied by truck to a storage tank for use by the heating system. Kerosene, etc. includes kerosene, gasoline, alcohol, and other similar combustible liquids. Electricity is generally supplied by means of above or underground electric power lines. Coal or coke refers to coal or any coal derivative usually delivered by means of truck. Wood refers to the use of wood or wood charcoal, etc., as a fuel. Solar heat refers to the use of energy available from sunlight as a heating fuel source.

Services and Neighborhood Conditions

Extermination service—The statistics on extermination service refer to households that have been at their present address for at least 3 months prior to the date of interview and that reported they had seen mice or rats or signs or traces of their presence inside the house or building during the last 3 months. Signs of mice and rats or traces of their presence include droppings, holes in the wall, or ripped or torn food containers. Regular extermination service refers to periodic visits by a licensed company or individual who uses chemicals and sprays to control or kill rodents. The regular service interval may be once a month, four times a year, or any other such interval. Irregular extermination service includes visits by an exterminator who is called by the household or building manager only when needed, or where it is known that a building is serviced but it is not known whether the service is regular or irregular. No extermination service includes housing units in a house or building that has not been serviced during the 12 months prior to the interview and where it is not known if there is any extermination service.

Neighborhood conditions and neighborhood services—The statistics presented are based on the respondent's opinion and attitude toward the neighborhood. Thus, the respondent's answer may or may not reflect the actual description of the neighborhood. Furthermore, the respondent may not have the same opinion as a neighbor about the neighborhood services, for example, the respondent may feel that the street lighting or neighborhood shopping facilities are inadequate while a neighbor may not.

Neighborhood conditions, and neighborhood conditions and wish to move—Data on neighborhood conditions are based on the respondent's answers to a three-part question concerning specific neighborhood conditions. The respondent was asked (1) if the condition was present, (2) if the condition was bothersome, and (3) if the condition was so objectionable that the respondent would like to move from the neighborhood.

1. Street noise—Street noise refers to noise made by children playing outdoors, noise from a factory or business, or any other sounds that the respondent considers street noise.
2. Streets need repair—The data are based on the respondent's opinion that the streets, either paved or unpaved, are continually in need of repair or are bordered by open ditches used for water or sewage drainage.

. Crime—This category refers to all forms of street and neighborhood crime such as petty theft, assaults against the person, burglary, etc., or any related activities that the respondent judges to be a crime.
. Litter—Included are all types of trash, debris, or junk such as paper, cans, or abandoned cars in the street, on empty lots, or on properties on the street which the respondent considers as litter.
. Abandoned buildings—This category refers to both single and multiunit buildings which the respondent reported to be abandoned or boarded up. Included in this category are remains of previous buildings.
. Commercial or industrial—This category refers to commercial, industrial, or other activities, including both large and small industries as well as businesses and stores, that the respondent considers to be nonresidential.
. Odors—This category refers to the respondent's opinion concerning fumes, smoke, or gas coming from cars, trucks, nearby industries, factories, businesses, etc.

eighborhood services—Data on neighborhood servces are based on the respondent's answer to a series of quesons concerning neighborhood services. Police protection, outoor recreation facilities, and hospitals or health clinics were overed by a two-part question in which the respondent was sked: (1) if a particular neighborhood service was satisfactory nd (2) if the condition was so unsatisfactory that the respondnt would like to move from the neighborhood.

. Police protection—This category refers to the respondent's opinion about the presence, quality, quantity, and response time of services that should be provided by the police.
. Outdoor recreation facilities, such as parks, playgrounds, or swimming pools—This category refers to the respondent's assessment of neighborhood outdoor recreation facilities.
. Hospitals and health clinics—This category refers to the quality and proximity of health facilities, etc., serving the local community in the opinion of the respondent.

The respondent was also asked a three-part question on public ansportation: (1) if service is available, (2) if service is satisfacry, and (3) if any member of the household used the service least once a week.

Data were also collected on satisfaction with neighborhood opping such as grocery stores and drug stores, and whether not these stores are located within 1 mile of the neighborhood.

Respondents were asked a three-part question on public ementary schools: (1) if children within the household attend public elementary school or private elementary school, (2) public elementary school is satisfactory, and (3) if the public ementary school is within 1 mile of the neighborhood.

verall opinion of neighborhood—The data presented are sed on the respondent's overall opinion of the neighborhood cording to conditions and neighborhood services available escribed in preceding paragraphs). The respondent was ked to rate the neighborhood as excellent, good, fair, or poor.

Financial Characteristics

Value—Value is the respondent's estimate of how much the property (house and lot) would sell for if it were for sale. The statistics on value are shown only for one-unit structures on less than 10 acres without a commercial establishment or medical or dental office on the property. Owner-occupied cooperatives, condominiums, and mobile homes and trailers are excluded from the value tabulations.

Income—The statistics on income in the Annual Housing Survey are based on the respondent's reply to questions on income for the 12 months prior to the interview and are the sum of the amounts reported for wage and salary income, self-employment income, Social Security or railroad retirement income, public assistance or welfare payments, and all other money income. The figure represents the amount of income received before deductions for personal income taxes, Social Security, union dues, bond purchases, health insurance premiums, Medicare deductions, etc.

In this report, the statistics relate to the money income of the family or primary individual occupying the housing unit; i.e., the sum of the income of the householder and all other members of the family 15 years old and over, or the income of the primary individual. Incomes of persons living in the unit but not related to the householder are not included in this sum.

Wage or salary income is defined as the total money earnings received for work performed as an employee at any time during the 12-month period prior to the interview. It includes wages, salary, piece-rate payments, commissions, tips, cash bonuses, and Armed Forces pay. Net self-employment income is defined as net money income (gross receipts minus operating expenses) received from a business, professional practice, partnership, or farm in which the person was self-employed.

Social Security or railroad retirement income includes cash receipts of Social Security pensions; survivors' benefits, disability insurance programs for retired persons, dependents of deceased insured workers, or disabled workers; and deductions for Medicare and health insurance premiums. Cash receipts of retirement, disability, and survivors' benefit payments made by the U.S. Government under the Railroad Retirement Act are also included. Separate payments received for hospital or other medical care are not included.

Income from all other sources includes money income received from sources such as periodic payments from estates and trust funds; dividends; interest; net rental income (or loss) from property rentals; net receipts from roomers or boarders; net royalties; public assistance or welfare payments which include cash receipts received from public assistance programs, such as old age assistance, aid to families with dependent children, and aid to the blind or totally disabled; unemployment insurance benefits; money received for transportation and/or subsistence by persons participating in special governmental training programs, such as the Area Redevelopment Act and the Manpower Development and Training Act; workmen's compensation cash benefits; periodic payments by the Veteran's Administration to

disabled veterans; public or private pensions; periodic receipts from insurance policies or annuities; alimony or child support from persons who are not members of the household; net gambling gains; and nonservice scholarships and fellowships.

Receipts from the following sources were not included as income: Value of income "in kind," such as, free living quarters, housing subsidies, food stamps, or food produced and consumed in the home; money received from the sale of property (unless the recipient was engaged in the business of selling such property); money borrowed; tax refund; withdrawal of bank deposits; accrued interest on uncashed savings bonds; exchange of money between relatives living in the same household; and gifts and lump-sum payments, inheritances, and other types of lump-sum receipts.

The income statistics and the characteristics of the household refer to different periods in time. For 1983, the income data refer to the 12 months prior to the interview, whereas the household characteristics refer to the date of interview. For 1970, income data refer to the calendar year 1969, whereas the household characteristics refer to April 1, 1970. Thus, family income does not include amounts received by persons who were members of the family during all or part of the income period if these persons no longer resided with the family at the time of the interview. On the other hand, family income includes income reported by related persons who did not reside with the family during the income period but who were members at the time of the interview. For most families, however, the income reported was received by persons who were members of the family throughout the income period.

There may be significant differences in the income data between the Annual Housing Survey and other Bureau surveys and censuses. For example, the time period for income data in the Annual Housing Survey refers to the 12 months prior to the interview while other income data generally refer to the calendar year prior to the date of the interview. Additional differences in the income data may be attributed to factors such as the various ways income questions are asked, the sampling variability and nonsampling errors between the Annual Housing Survey and other Bureau surveys and censuses, survey procedures and techniques, and processing procedures.

Value-income ratio—The value-income ratio is computed by dividing the value of the housing unit by the total money income of the family or primary individual. The data are presented for the same owner-occupied units for which "value" was tabulated (see "Value" for exclusions). The ratio was computed separately for each housing unit and was rounded to the nearest tenth. In reporting value, respondents were asked to select an appropriate class interval. The midpoints of the value intervals were used in the computation of the value-income ratio, except that a mean of $3,500 was assigned for values less than $5,000 and a mean of $350,000 was assigned for values of $300,000 or more. For income, the dollar amounts were used. Units occupied by families or primary individuals who reported no income or a net loss comprise the category "not computed."

The 1983 income statistics are for the 12 months prior to the date of the interview. For 1970, the income statistics cover the calendar year 1969.

Mortgage insurance—The data are restricted to owner-occupied units with a mortgage or similar debt. In addition, the units must be one-unit structures on less than 10 acres without a commercial establishment or medical or dental office on the property. Owner-occupied cooperatives, condominiums, and mobile homes and trailers are excluded from the tabulations on mortgage insurance.

A mortgage or similar debt refers to all forms of debt where the property is pledged as security for payment of the debt. It includes such debt instruments as deed of trust, trust deeds, mortgage bonds, and vendor liens. In the first three arrangements, usually a third party, known as the trustee, holds the title to the property until the debt is paid. In the vendor lien arrangement, the title is kept by the buyer but the seller (vendor) reserves, in the deed to the buyer, a lien on the property to secure payment of the balance of the purchase price. Also included as a mortgage or similar debt are contracts to purchase land contracts, and lease-purchase agreements where the title to the property remains with the seller until the agreed upon payments have been made by the buyer.

Mortgage insurance is financial protection provided to the lender in case the borrower fails to keep up the required mortgage payments and defaults on the loan. Such insurance protection is offered by both the government, acting as an insurance agent, and by private mortgage insurance companies. The Federal government agencies that currently insure or guarantee mortgages or similar debts include the Federal Housing Administration (FHA), the Veteran's Administration (VA), and the Farmers Home Administration. Mortgages or loans that are not insured or guaranteed by FHA, VA, or the Farmers Home Administration are referred to as "conventional" mortgages. Mortgage debts insured or guaranteed by State or local government agencies are not included in the category "insured by FHA, VA, or Farmers Home Administration."

The Federal Housing Administration insures loans on homes. The Veterans' Administration guarantees or insures loans under the Serviceman's Readjustment Act (GI Bill). The Farmers Home Administration provides much of the same service as FHA, but confines its assistance to rural areas.

Private mortgage insurance companies provide insurance protection to lenders so that borrowers may obtain conventional loans with higher loan-to-value ratios than noninsured loans. Down payment and monthly payment are often less for noninsured loans but terms are generally longer and the borrower pays an insurance premium as part of the monthly mortgage payment. The data on private mortgage insurance is not separable from data on other conventional loans and is therefore included in the category "not insured or insured by private mortgage insurance."

Monthly mortgage payment—The data are limited to owner-occupied, one-unit structures on less than 10 acres having

commercial establishment or medical or dental office on the property. The data present the monthly dollar amount paid for the mortgage, principal and interest only. Real estate taxes and fire hazard insurance costs are excluded from the data even if they are included in the regular payment to the lender.

Real estate taxes last year—The data are restricted to owner-occupied, one-unit structures on less than 10 acres without a commercial establishment or medical or dental office on the property. The data exclude owner-occupied cooperatives, condominiums, mobile homes, and trailers. Real estate taxes last year refers to the total amount of all real estate taxes payable on the entire property during the last billing period. It includes State and local real estate taxes. Not included are payments on delinquent taxes due from prior years or payments for special assessments, facilities, or services. When the real estate taxes are included with the mortgage, a separate amount for the taxes is obtained.

In part C, the mean real estate taxes for last year per $1,000 value of the property (house and lot) are presented. Housing units for which no taxes are paid are excluded from the computation of the mean.

Property insurance—This refers to fire and hazard insurance; that is, policies which protect the unit and its contents against loss due to damage by fire, lightning, wind, hail, explosion, etc. Homeowners' policies are included since this type of insurance has fire and hazard insurance together with other types of homeowner protection such as liability. If the cost of the insurance was included as part of the mortgage payment, a separate amount for the insurance was obtained. The amount of the insurance premium reported was the amount paid for an entire 12-month period even if made in two or more installments. Property insurance is shown only as a component of selected monthly housing costs and selected monthly housing costs as percentage of income. (See parts A and C.) The data are restricted to owner-occupied, one-unit structures on less than 10 acres without a commercial establishment or medical or dental office on the property. The data exclude owner-occupied cooperatives, condominiums, and mobile homes and trailers.

Selected monthly housing costs—The data are presented for owner-occupied, one-unit structures on less than 10 acres without a commercial establishment or medical or dental office on the property. Separate distributions are shown for mortgage, real estate taxes, property insurance, utilities (electricity, gas, water, and sewage disposal), fuels (oil, coal, kerosene, wood, etc.), and garbage collection.

Households that did not report the amount of mortgage and/or real estate taxes were included in the "not reported" category.

Selected monthly housing costs as percentage of income—The yearly housing costs (selected monthly housing costs multiplied by 12) are expressed as a percentage of the total income of the family or primary individual. This percentage is presented for the same owner-occupied units for which selected monthly housing costs were tabulated (for exclusions, see "Selected monthly housing costs"). The percentage was computed separately for each housing unit and was rounded to the nearest tenth. For income and selected monthly housing costs, the dollar amounts were used. Housing units occupied by families or primary individuals who reported no income or a net loss comprise the category "not computed."

Housing units that did not report the amount of mortgage and/or real estate taxes were included in the "not reported" category.

Sales price asked—For vacant housing units, the sales price is the amount asked for the property at the time of the interview and may differ from the price at which the property is sold. The statistics on sales price asked are sown only for vacant-for-sale one-unit structures on less than 10 acres without a commercial establishment or medical or dental office on the property.

Garage or carport on property—The garage or carport must be currently available for use by the occupants of the housing unit; i.e., members of the household can use it for parking even if it is currently used as a storage area for items such as lawn equipment or furniture. It may be attached to the house or it may be completely unattached, but it must be on the property. Excluded are garages or carports that have been converted to other uses such as living quarters, an area used for business purposes, rented to someone else, or for some reason cannot be used for parking.

Contract rent—Contract rent is the monthly rent agreed to, or contracted for, even if the furnishings, utilities, or services are included. The statistics on rent exclude one-unit structures on 10 acres or more. Renter units occupied without payment of cash rent are shown separately as no cash rent in the rent tabulations.

Gross rent—The computed rent termed "gross rent" is the contract rent plus the estimated average monthly cost of utilities (electricity, gas, water) and fuels (oil, coal, kerosene, wood, etc.) if these items are paid by the renter (or paid by someone else, such as a relative, welfare agency, or friend) in addition to rent. Contract rent is the monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included. Thus, gross rent is intended to eliminate differentials which result from varying practices with respect to the inclusion of utilities and fuels as part of the rental payment. The estimated costs of water and fuels are reported on a yearly basis but they are converted to monthly figures in the computation process.

The statistics on rent exclude one-unit structures on 10 acres or more. Renter housing units occupied without payment of cash rent are shown separately as no cash rent in the rent tabulations.

Gross rent in nonsubsidized housing—The gross rent for nonsubsidized housing units excludes units reported in public housing projects, units with Federal, State, or local government rent subsidies, as well as one-unit structures on 10 acres or more. Data on nonsubsidized units, in this report, are not based on

government or local records; the figures are, therefore, subject to the ability of a respondent to properly classify the unit as subsidized or nonsubsidized housing.

Gross rent as percentage of income—The yearly gross rent (monthly gross rent multiplied by 12) is expressed as a percentage of the total income of the family or primary individual. The percentage is presented for the same renter-occupied housing units for which gross rent was tabulated; thus, the statistics on gross rent as percentage of income reflect the exclusion of certain renter-occupied units. The percentage was computed separately for each housing unit and was rounded to the nearest whole number. For gross rent and income, the dollar amounts were used in the computation. Housing units for which no cash rent is paid and units occupied by families or primary individuals who reported no income or a net loss comprise the category "not computed."

The 1983 income statistics are for the 12 months prior to the date of the interview. For 1970, the income statistics cover the calendar year 1969.

Gross rent in nonsubsidized housing as percentage of income—This item is computed in the same manner as "gross rent as percentage of income" except that rents and incomes for public and subsidized housing units are excluded. Data on nonsubsidized units in this report are not based on government or local records; they are, therefore, subject to the ability of a respondent to properly classify the unit as subsidized or nonsubsidized housing.

Inclusion in rent (garbage collection and furniture)—Counts are shown separately for housing units in which garbage collection and furniture are included in the rent. The data are restricted to renter-occupied units for which cash rent is paid and exclude one-unit structures on 10 acres or more.

Garbage collection—Included are units which have garbage collection service available in connection with the building. The service may be public or private and must be available without additional cost to the renter. If the garbage (food waste) is collected by one company and the trash (paper, cans, etc.) by another, the data refer to the garbage collection service. In tables 3, 6, and 9 of part C, separate counts are also shown for renter-occupied units reporting additional amounts paid for garbage collection service.

Furniture—The statistics refer to furnished apartments or houses in which the management supplied major pieces of furniture such as bed, sofa, chest of drawers, and table and chairs for the use of the occupant. Refrigerator, cooking range or stove, lamps, and rugs are not considered furniture. Housing units in which the occupants rent furniture from some source other than the management are not classified as furnished.

Rent asked—For vacant housing units, the rent is the amount asked for the unit at the time of the interview and may differ from the rent contracted for when the unit was occupied. The data are for vacant, year-round units for rent, excluding one-un structures on 10 acres or more. The median rent asked is show separately for housing units in which the rent includes payme for all utilities (electricity, gas, and water) and fuels (oil, coa kerosene, wood, etc.). Median rent asked is also shown for hou ing units in which the rent includes payment for utilities and fuel as well as garbage collection service.

Public, private, or subsidized housing—A housing unit classified as being in a public housing project if the structu in which the unit is located is owned by a local housir authority or other public agency, such as a housing ar redevelopment authority or a housing development agency, ar operated as public housing. These organizations may recei subsidies from the Federal or State government but the loc agency owns the property. All other housing units are classifi as private housing.

Private housing units are further classified by whether the u is subsidized; that is, the respondent pays a lower rent becau a Federal, State, or local government program pays part of t cost of construction, building mortgage, or operating expense These programs include (1) the interest subsidy programs of t Department of Housing and Urban Development (HUD) f rental and cooperative housing for moderate-income familie (2) the rent supplement program where part of the rent for lo income families occupying certain types of rental housing pr jects is paid by HUD, and (3) the direct loan program of HU for housing the elderly.

The statistics on public or subsidized housing exclude or unit structures on 10 acres or more and mobile homes. In ad tion, the data are not based on government or local records; t figures are, therefore, subject to the ability of a respondent properly classify the unit as public or private and, if private, subsidized or nonsubsidized housing.

Household Characteristics

Household—A household consists of all the persons who occu a housing unit. By definition, the count of households is the sa as the count of occupied housing units.

Householder—The householder is the first household memb 18 years old and over who is the owner or renter of the sam unit. If no household member occupying the sample unit ow or rents the unit, the householder is the first household memb listed who is 18 years old or older. Prior to 1980, the conc "head of household" was used. One person in each househ was designated as the head, that is, the person who was rega ed as the head by the respondent. However, if a married wom living with her husband was reported as the head, her husba was considered the head for the purpose of simplifying tabulations.

Household composition by age of householder—Statistics by of householder are presented separately for two-or-more-per households and for one-person households. Households hav two or more persons are further subdivided as follows:

Married-couple families, no nonrelatives—Each household in this group consists of the householder and spouse, and other persons, if any, all of whom are related to the householder.

Other male householder—This category includes households with male householders who are married, but with wife absent because of separation or other reason where husband and wife maintain separate residences; and male householders who are widowed, divorced, or single. Also included are households with male householder, wife present and nonrelatives living with them.

Other female householder—This category includes households with female householders who are married, but with husband absent because of separation or other reason where husband and wife maintain separate residences; and female householders who are widowed, divorced, or single. Also included are households with female householder, husband present, and nonrelatives living with them.

Households consisting of only one person are shown separately for male householder and female householder under the category "one-person households."

Family or primary individual—Housing units are occupied by either families or primary individuals. The term "family" refers to the householder and all (one or more) other persons living in the same household who are related to the householder by blood, marriage, or adoption. If the householder lives alone or with nonrelatives only, then the householder is considered a primary individual.

Married couples related to the householder of a family are included in the family and are not considered as separate families. A lodger, servant, or other person unrelated to the householder is considered a member of the household but not of the family.

In the statistics on household composition, families are always included in one of the three major groups of two-or-more-person households. Primary individuals with nonrelatives living with them are tabulated as two-or-more-person households and further subdivided as other male householder or female householder. Primary individuals living alone are always tabulated as one-person households.

Subfamily—A subfamily is a married couple with or without children or one parent with one or more own single (never married) children under 18 years old living in a household and related to, but not including, the householder or spouse. The most common example of a subfamily is a young married couple sharing the home of the husband's or wife's parents.

Age of householder—The age classification refers to the age reported for the householder as of that person's last birthday.

Persons 65 years old and over—All persons, including the householder, who are members of the household and are 65 years old and over are included in the count of housing units with persons 65 years old and over.

Own children—Statistics on presence of own children of householders are shown in this report. A child under 18 years old is defined as an own child if he or she is a single (never married) son, daughter, stepchild, or adopted child of a householder. Own children of subfamilies are excluded from the total count of own children.

Other relative of householder—This category includes all persons related to the householder by blood, marriage, or adoption except spouse or child of householder and members of subfamilies.

Nonrelative—A nonrelative of the householder is any person in the household who is not related to the householder by blood, marriage, or adoption. Roomers, boarders, lodgers, partners, resident employees, wards, and foster children are included in this category.

Years of school completed by householder—The statistics refer to the highest grade of regular school completed, not to the highest grade attended. For persons still attending school, the highest grade completed is one less than the one in which they are currently enrolled. Regular school refers to formal education obtained in graded public, private, or parochial schools, colleges, universities, or professional schools, whether day or night school, and whether attendance was full or part time. That is, regular schooling is formal education which may advance a person toward an elementary or high school diploma, college, university, or professional school degree. Schooling or tutoring in other than regular schools is counted only if the credits obtained are regarded as transferable to a school in the regular school system. Householders whose highest grade completed was in a foreign school system or in an upgraded school were instructed to report the approximate equivalent grade (or years) in the regular United States school system. Householders were not reported as having completed a given grade if they dropped out or failed to pass the last grade attended. Education received in the following types of schools is not counted as regular schooling: Vocational schools, trade schools, business schools, and noncredit adult education classes.

*NOTE – Fill item 1 only if AHS-52 is not labeled or if control number on label is incorrect. In addition, the complete address of the sample unit must be entered or updated on each questionnaire.

**NOTE – In item 5e enter the relationship of the person providing the information for the Noninterview or Vacant interview; e.g., manager, agent, or neighbor. If no one was consulted, leave item 5e blank.

Facsimile of the Annual Housing Survey Questionnaire: 1983—Continued

Section II – REGULAR, URE, AND VACANT INTERVIEWS

1. How many rooms are in this house (apartment)? Do not count bathrooms, porches, balconies, foyers, halls, or half-rooms.

(022) _____ Number of rooms

OFFICE USE ONLY

(022) × ☐

2. How many bedrooms are in this house (apartment)? Count rooms used mainly for sleeping even if used for other purposes.

(024) _____ Number of bedrooms

OR

0 ☐ None

3. Does this house (building) have complete kitchen facilities; that is, a kitchen sink with piped water, a refrigerator and a range or a cookstove which are available for your use (the use of the intended occupants)?

(026)
1 ☐ Yes – For this household only
2 ☐ Yes – Also used by another household
3 ☐ No

4. Does the water for this house (apartment) come from a public or private system; an individual well; or some other source such as a spring, creek, river, cistern, etc.?

(028)
1 ☐ A public system or private company
2 ☐ An individual well
3 ☐ Some other source – *Specify below*

_____

_____

5. What means of sewage disposal does this house (building) have?

(030)
1 ☐ Public sewer
2 ☐ Septic tank or cesspool
3 ☐ Chemical toilet
4 ☐ Privy
5 ☐ Use facilities in another structure
6 ☐ Other – *Specify*

_____

☐ Vacant interview – *Skip to 7*

6. How is this house (apartment) heated – by gas, oil, electricity, or with some other fuel?

(Mark the ONE used most)

(032)
GAS
1 ☐ From underground pipes serving the neighborhood
2 ☐ Bottled, tank, or LP
3 ☐ Fuel oil
4 ☐ Kerosene, etc.
5 ☐ Electricity
6 ☐ Coal or coke
7 ☐ Wood
8 ☐ Solar heat
9 ☐ Other fuel
0 ☐ No fuel used

7. Is there a garage or carport on this property which is currently available for your use (the use of the intended occupants)?

(034)
1 ☐ Yes
2 ☐ No

CHECK ITEM A

(See item 8, page 1)

☐ Regular or URE interview – *Skip to Section IVB, page 10*

☐ Vacant interview – *Go to Section III, page 4*

~ PGM 3 ↓

Section III – VACANT INTERVIEWS

1a. How many living quarters, both occupied and vacant, are there in this house (building)?

(101)
1 ☐ Mobile home or trailer (no permanent room attached) – *Skip to item 2a*
2 ☐ One, detached from any other building (includes mobile home or trailer WITH one or more permanent rooms attached)
3 ☐ One, attached to one or more buildings
4 ☐ 2
5 ☐ 3 or 4
6 ☐ 5 to 9
7 ☐ 10 to 19
8 ☐ 20 to 49
9 ☐ 50 or more

} *Skip to item 2a*

OFFICE USE ONLY

(101) × ☐

OBSERVATION

b. Is any part of this property used as a commercial establishment?

(103)
1 ☐ Yes
2 ☐ No

OBSERVATION

c. Is any part of this property used as a medical or dental office?

(104)
1 ☐ Yes
2 ☐ No

2a. How many stories (floors) are there in this house (building)? Do not count the basement.

(MARK mobile homes by observation)

(105)
1 ☐ 1 to 3 – *Skip to 3*
2 ☐ 4 to 6
3 ☐ 7 to 12
4 ☐ 13 or more

OBSERVATION

b. Is there a passenger elevator in this building?

(106)
1 ☐ Yes
2 ☐ No

3. Does this house (building) have complete plumbing facilities; that is, hot and cold piped water, a flush toilet and a bathtub or shower, which are available for the use of the intended occupants of this house (apartment)?

☐ Yes → **Are these facilities ONLY for the use of the intended occupants?**

(107)
1 ☐ Yes – Used for this household only – *Ask 4*
2 ☐ No – Also used by another household – *Skip to 5*
3 ☐ No – *Skip to 5*

4. A complete bathroom is a room with a flush toilet, a bathtub or shower, and a washbasin with piped water.

A half bathroom has at least a flush toilet or a bathtub or shower, but does not have all the facilities for a complete bathroom.

How many complete bathrooms and half-bathrooms does this house (apartment) have?

(Mark only one box)

(108)
1 ☐ Complete plumbing facilities but not in one room
2 ☐ 1 complete bathroom
3 ☐ 1 complete bathroom plus a half bath with no flush toilet
4 ☐ 1 complete bathroom plus a half bath with flush toilet
5 ☐ 2 complete bathrooms
6 ☐ More than 2 complete bathrooms

NOTES

Facsimile of the Annual Housing Survey Questionnaire: 1983—Continued

Section III – VACANT INTERVIEWS – Continued

5. What type of heating equipment does this house (apartment) have?

(MARK heating equipment to be used most)

SHOW FLASHCARD B

(109)
1 ☐ Central warm-air furnace with ducts in individual rooms
2 ☐ Heat pump
3 ☐ Steam or hot water system
4 ☐ Built-in electric units (permanently installed in wall, ceiling, or baseboard)
5 ☐ Floor, wall, or pipeless furnace
6 ☐ Room heater(s) WITH flue or vent burning gas, oil, or kerosene
7 ☐ Room heater(s) WITHOUT flue or vent burning gas, oil, or kerosene
8 ☐ Fireplaces, stoves, or portable room heaters
9 ☐ Unit has no heating equipment

6a. Is this unit intended for year-round use, for occupancy only on a seasonal basis, or for use by migrant workers?

☐ YEAR ROUND – *Ask 6b*

(117)
10 ☐ Seasonal – summers only
11 ☐ Seasonal – winters only
12 ☐ Other seasonal – *Specify in Notes*
9 ☐ Migratory
} *Skip to 7*

NOTES – Other seasonal use

OFFICE USE ONLY
(117) ☐

b. Is this house (apartment) for rent, for sale only, rented not occupied, sold not occupied, held for occasional use, or something else?

(117)
1 ☐ For rent, OR for sale or for rent
2 ☐ For sale only – regular ownership
3 ☐ For sale only – condominium ownership
} *Skip to 7*
4 ☐ For sale only – cooperative ownership – *Ask 6c*
5 ☐ Rented, not occupied
6 ☐ Sold, not occupied
7 ☐ Held for occasional use
8 ☐ Other vacant – *Specify*
} *Skip to 7*

OFFICE USE ONLY
(117) ☐

c. To the Census Bureau, a cooperative is property which is owned by a corporation. Each shareholder is entitled to occupy an individual unit. Is this what you mean when you say this is a cooperative?

☐ Yes
☐ No – *Reask 6b and correct the entry*

7. How many months has this house (apartment) been vacant?

(119)
1 ☐ Less than 1 month
2 ☐ 1 month up to 2 months
3 ☐ 2 months up to 6 months
4 ☐ 6 months up to 12 months
5 ☐ 1 year up to 2 years
6 ☐ 2 years or more

OBSERVATION

8a. Is the unit boarded-up?

(120) 1 ☐ Yes 2 ☐ No

OBSERVATION

b. Are there any buildings (other than this building) with windows broken or boarded-up on this street?

(121) 1 ☐ Yes 2 ☐ No

FORM AHS-52 (9-14-82) Page 5

Section III – VACANT INTERVIEWS – Continued

9. Does this place have 10 acres or more?

(122) 1 ☐ Yes, 10 acres or more 2 ☐ No, less than 10 acres

CHECK ITEM A

VACANCY STATUS *(See item 6b, page 5)*

- **FOR RENT, OR FOR SALE OR FOR RENT** *(6b, box 1)*

(See item 1a, page 4, and item 9 above)

(134) 1 ☐ Month 2 ☐ Year ☐ Other – Specify _____

b. In regard to the mortgage (loan), do the required payments include –
(1) Real estate taxes on this property? (135) 1 ☐ Yes 2 ☐ No
(2) Fire and hazard insurance? (136) 1 ☐ Yes 2 ☐ No

NOTE – *Ask 25a for all categories before asking 25b.*

NOTE – *Ask 25b only for those categories in 25a which were answered "Yes."*

25a. (1) Do you pay for electricity? (137) 1 ☐ Yes 2 ☐ No
25b. (1) In the past 12 months, what was the average MONTHLY cost for electricity?
(138) $_____.00

(2) Do you pay for gas? (139) 1 ☐ Yes 2 ☐ No
(2) In the past 12 months, what was the average MONTHLY cost for gas?
(140) $_____.00

(3) Do you pay for oil, coal, kerosene, wood, OR any other fuel? (141) 1 ☐ Yes 2 ☐ No, these fuels not used or obtained free
(3) What is the YEARLY cost for oil, coal, kerosene, wood and any other fuel?
(142) $_____.00

(4) Do you pay for fire and hazard insurance? *(Also include if part of mortgage payments.)* (143) 1 ☐ Yes 2 ☐ No
(4) What is the YEARLY cost for fire and hazard insurance?
(144) $_____.00

(5) Do you pay for real estate taxes? *(Also include if part of mortgage payments.)* (145) 1 ☐ Yes 2 ☐ No
(5) What is the YEARLY cost for real estate taxes? (Do not include taxes in arrears from previous years.)
(146) $_____.00

(6) Do you pay for water supply and/or sewage disposal separately from real estate taxes? (147) 1 ☐ Yes 2 ☐ No or payment included in real estate taxes
(6) What is the YEARLY cost for water supply and sewage disposal?
(148) $_____.00

25c. Do you pay for garbage (food waste) collection separately from real estate taxes? (149) 1 ☐ Yes 2 ☐ No, or payment included in real estate taxes – *Skip to Check Item F, page 16*

d. What is the YEARLY cost for garbage (food waste) collection? (150) $_____.00 *Skip to Check Item F, page 16*

26. What is the MONTHLY rent? *(Mark the frequency of payment box and enter the MONTHLY rent. If rent is not paid by the month, compute the MONTHLY rent in "Notes" space and enter the monthly rent on the line provided.)*
(151) $_____.00
(152) 1 ☐ More frequently than once a month 2 ☐ Less frequently than once a month 3 ☐ Once a month

(Do not include site rent for mobile homes if it is paid separately.)

Section IVB – REGULAR (OR URE) INTERVIEWS – Continued

CHECK ITEM D (See item 8a, page 10)
- ☐ Mobile home or trailer (no permanent room attached) – *Ask 27a*
- ☐ All others – *Skip to 28*

27a. Do you own the mobile home site or is it rented? (153)
1 ☐ Owned – *Skip to 28*
2 ☐ Rented for cash or occupied without payment of cash rent

b. What is the MONTHLY rent for this site? (566)
(Mark the frequency of payment box and enter the MONTHLY site rent. (If rent is not paid by the month, compute the MONTHLY site rent in "Notes" space, and enter the monthly site rent on the line provided.)
$ _____ .00 Per month
0 ☐ No cash rent

(567)
1 ☐ More frequently than once a month
2 ☐ Less frequently than once a month
3 ☐ Once a month

28. Is this house (apartment) in a public housing project; that is, is it owned by a local housing authority or other local public agency? (154)
1 ☐ Yes – *Skip to 30a*
2 ☐ No

29. Is the rent for this house (apartment) subsidized; that is, is the rent lower because the federal, state or local government pays part of the cost? (155)
1 ☐ Yes
2 ☐ No

NOTE – *Ask 30a for all categories before asking 30b. Exclude phrase "In addition to rent" for sample units OCCUPIED WITHOUT PAYMENT OF CASH RENT.*

NOTE – *Ask 30b only for those categories in 30a which were answered "Yes."*

30a. In addition to rent, do you pay for electricity? (156)
1 ☐ Yes
2 ☐ No, included in rent or supplied free
3 ☐ No, electricity not used

30b. (1) In the past 12 months, what was the average MONTHLY cost for electricity? (157)
$ _____ .00

(2) In addition to rent, do you pay for gas? (158)
1 ☐ Yes
2 ☐ No, included in rent or supplied free
3 ☐ No, gas not used

(2) In the past 12 months, what was the average MONTHLY cost for gas? (159)
$ _____ .00

(3) In addition to rent, do you pay for water? (160)
1 ☐ Yes
2 ☐ No, included in rent or no charge

(3) What is the YEARLY cost for water? (161)
$ _____ .00

(4) In addition to rent, do you pay for oil, coal, kerosene, wood, OR any other fuel? (162)
1 ☐ Yes
2 ☐ No, included in rent
3 ☐ No, these fuels not used or obtained free

(4) What is the YEARLY cost for oil, coal, kerosene, wood, and any other fuel? (163)
$ _____ .00

(5) In addition to rent, do you pay for garbage (food waste) collection? (164)
1 ☐ Yes
2 ☐ No

(5) What is the YEARLY cost for garbage (food waste) collection? (165)
$ _____ .00

Section IVB – REGULAR (OR URE) INTERVIEWS – Continued

CHECK ITEM E (See Check Item B, page 12)
- ☐ Rented for cash (box 6, 7, or 8 marked) – *Ask 31*
- ☐ Occupied without payment of cash rent (box 9, 10, or 11 marked) – *Skip to Check Item F*

31. Do you rent this apartment (house) furnished or unfurnished? (166)
1 ☐ Furnished
2 ☐ Unfurnished

CHECK ITEM F (See item 8, page 1)
- ☐ URE interview – *Ask 32*
- ☐ Regular Interview – *Skip to item 33*

32. Is this UNIT intended for year-round use, for occupancy only on a seasonal basis, or for use by migrant workers? (167)
0 ☐ YEAR ROUND (occupied temporarily at time of interview)
10 ☐ Seasonal – summers only
11 ☐ Seasonal – winters only
12 ☐ Other seasonal – Specify _____
9 ☐ Migratory
→ *Skip to Check Item H, page 20*

33. In the past 12 months, how much did . . . earn in wages, salaries, tips, and commissions before taxes and deductions?
(Obtain income for reference person and all household members 15+ RELATED TO REFERENCE PERSON by blood, marriage, or adoption.)
(If more than six persons, enter in the "Notes" beginning with the sixth person and then combine the amounts for all these persons on the last "Amount" line. Leave the Line No. blank.)

	Line No.	Amount (Dollars only)
(168)		(169) $ _____ .00
(170)		(171) $ _____ .00
(172)		(173) $ _____ .00
(174)		(175) $ _____ .00
(176)		(177) $ _____ .00
(178)		(179) $ _____ .00

Notes

34a. In the past 12 months, how much did this family (you) earn in net income from its (your) own business, professional practice or partnership?
(Exclude income previously reported in item 33. Probe if identical amounts are reported. Indicate that identical amounts are correct by marking this box ☐.)
(180) $ _____ .00
(181) 1 ☐ None
2 ☐ Lost money *(Enter amount LOST on line above)*

b. In the past 12 months, how much did this family (you) earn in net income from farming or ranching?
(Exclude income previously reported in items 33 and 34a. Probe if identical amounts are reported. Indicate that identical amounts are correct by marking this box ☐.)
(182) $ _____ .00
(183) 1 ☐ None
2 ☐ Lost money *(Enter amount LOST on line above)*

Facsimile of the Annual Housing Survey Questionnaire: 1983—Continued

Section IVB – REGULAR INTERVIEWS – Continued

NOTE – *Ask 35a for all categories before asking 35b.*

(Obtain income for reference person and all household members 15+ RELATED TO REFERENCE PERSON by blood, marriage, or adoption.)

35a. In the past 12 months, did any member of this family (you) receive any money from –

NOTE – *Ask 35b only for those categories in 35a which were answered "Yes"*

35b. How much was received from (source of income) in the past 12 months?

(1) Social Security or Railroad Retirement payments?	(184) 1 ☐ Yes 2 ☐ No	(185) $ ____ .00
(2) Interest on savings accounts or bonds?	(188) 1 ☐ Yes 2 ☐ No	(189) $ ____ .00
(3) Estates, trusts, or dividents?	(186) 1 ☐ Yes 2 ☐ No	(187) $ ____ .00
(4) Net rental income?	(190) 1 ☐ Yes 2 ☐ No	(191) $ ____ .00
(5) Welfare payments or other public assistance such as SSI?	(192) 1 ☐ Yes 2 ☐ No	(193) $ ____ .00
(6) Unemployment compensation?	(194) 1 ☐ Yes 2 ☐ No	(195) $ ____ .00
(7) Worker's compensation?	(196) 1 ☐ Yes 2 ☐ No	(197) $ ____ .00
(8) Government employee pensions?	(198) 1 ☐ Yes 2 ☐ No	(199) $ ____ .00
(9) Veterans payments?	(200) 1 ☐ Yes 2 ☐ No	(201) $ ____ .00
(10) Private pensions or annuities?	(202) 1 ☐ Yes 2 ☐ No	(203) $ ____ .00
(11) Alimony or child support?	(204) 1 ☐ Yes 2 ☐ No	(205) $ ____ .00
(12) Regular contributions from persons not living in this household?	(206) 1 ☐ Yes 2 ☐ No	(207) $ ____ .00
(13) Anything else?	(208) 1 ☐ Yes 2 ☐ No	(209) $ ____ .00

NOTE – *Exclude income previously reported. Probe if an amount in item 35b is identical to an amount in item 33 or 34. Indicate that identical amounts are correct by marking this box* ☐.

CHECK ITEM G

(See Control Card items 11b, 11c, and 14)

☐ Household contains household members 15+ NOT RELATED TO THE REFERENCE PERSON by blood, marriage, or adoption – *Ask 36, page 18*

☐ All others – *Skip to Check Item H, page 20*

Section IVB – REGULAR INTERVIEWS – Continued

CHECK ITEM H

Part (1) *(See Check Item B, page 12)*
- ☐ Box 1 or 2 marked – *Ask 39a*
- ☐ Box 3 or 4 marked – *Go to Part (2)*
- ☐ Box 5 marked – *Go to Part (3)*
- ☐ Box 6, 7, 8, 9, 10, or 11 marked – *Skip to Check Item I*

Part (2) *(See items 22 and 23, page 13)*
- ☐ Installment loan or contract, mortgage, deed of trust, or land contract – *Skip to 39d*
- ☐ Owned free and clear – *Skip to Check Item I*
- ☐ "DK," "NA," "REF," or Blank in items 22 and 23 – *Skip to Check Item I*

Part (3) *(See item 8a, page 10)*
- ☐ Box 1 marked – *Skip to 39b*
- ☐ All others – *Skip to 39c*

39a. Is there a mortgage or loan on this condominium (cooperative) or is it owned free and clear?	(307)	1 ☐ Mortgage or loan – *Skip to 39d* 2 ☐ Owned free and clear – *Skip to Check Item I*
b. Do you have an installment loan or contract on this mobile home (trailer) or do you own it free and clear?	(307)	1 ☐ Installment loan or contract – *Skip to 39d* 2 ☐ Owned free and clear – *Skip to Check Item I*
c. Do you have a mortgage or loan on this house (apartment) or do you own it free and clear?	(307)	1 ☐ Mortgage or loan 2 ☐ Owned free and clear – *Skip to Check Item I*
d. What kind of mortgage (loan) do you have? *SHOW FLASHCARD D*	(308)	1 ☐ Federal Housing Administration 2 ☐ Veterans Administration 3 ☐ Farmers Home Administration 4 ☐ Other mortgage

CHECK ITEM I

Mark all three parts (see cc 21 and item 5d, page 1)

Part (1) Reference person lived here last 90 days.	(309)	1 ☐ Yes 2 ☐ No
Part (2) Reference person moved into this house or apartment before February 1983.	(310)	1 ☐ Yes 2 ☐ No
Part (3) Reference person MOVED here since . . . date of this interview (item 5d, page 1) a year ago . .	(311)	1 ☐ Yes – Go to *Check Item J* 2 ☐ No – *Skip to Check Item Q, page 28*

CHECK ITEM J

Part (1) *(See item 8, page 1)*
- ☐ URE Interview – *Go to Check Item Q, page 28*
- ☐ Regular Interview – *Go to Part 2 below*

Part (2) *(See items 7a and 7b, page 10)*
- ☐ Regular ownership (box 1 marked) – *Go to Part 3 below*
- ☐ Owned as a cooperative (box 2 marked) – *Skip to Check Item K, page 21*
- ☐ Owned as a condominium (box 3 marked) – *Go to Part 3 below*
- ☐ Rented for cash or occupied without payment of cash rent (box 4 or 5 marked) – *Skip to 43, page 21*

Part (3) *(See item 8a, page 10)*
- ☐ Mobile home or trailer (no permanent room attached) – *Skip to Check Item K, page 21*
- ☐ All others – *Ask 40a, page 21*

NOTES

Facsimile of the Annual Housing Survey Questionnaire: 1983—Continued

Section VI – RECENT MOVERS SUPPLEMENT

40a. Was this property (condominium unit) purchased in the past 12 months?
(401) 1 ☐ Yes
2 ☐ No – *Skip to Check Item K*

b. When this house and lot (condominium unit) was acquired, what was the purchase price? Do not include closing costs.
(402) $ _____ .00

c. What was the MAJOR source of the down payment used for the purchase or construction of this property (condominium unit)?
(403)
1 ☐ Sale of previous home (only if sold during 12-month period preceding acquisition of present home)
2 ☐ Sale of other real property or other investment (including stock)
3 ☐ Savings (cash, bank deposits, share accounts, or bonds)
4 ☐ Borrowing other than a mortgage on this property
5 ☐ Gift
6 ☐ Land on which structure was built
7 ☐ Other – *Specify*
_____
8 ☐ No down payment required

CHECK ITEM K
(See item 39d, page 20)
☐ Kind of mortgage specified (box 1, 2, 3 or 4 marked OR "NA," "DK" or "REF" entered) – *Ask 41a*
☐ Item 39d blank – *Skip to 42a*

41a. Earlier you told me that this property (mobile home) is mortgaged. When you acquired this property did you originate (place) a new mortgage or assume an existing mortgage?
(404) 1 ☐ Originated mortgage
2 ☐ Assumed mortgage – *Skip to 42a*

b. At the time you acquired this property (mobile home), what was the amount of the mortgage? Do not include second trusts, or any other loan associated with the property.
(405) $ _____ .00

42a. Is this the first home . . . *(Reference person)* has ever owned as his (her) usual residence?
(406) 1 ☐ Yes – *Skip to 43*
2 ☐ No – *Ask 42b*

b. Including this home, how many homes has . . . *(Reference person)* owned altogether? Do not include vacation homes, or homes purchased for commercial or rental purposes.
(407) 1 ☐ Two
2 ☐ Three or more

43. Was . . . *(Reference person)* the first occupant(s) of this house (apartment) or did someone else live here before . . . *(Reference person)*?
(408) 1 ☐ First occupants
2 ☐ Previously occupied

44. The following questions are about the place where . . . *(Reference person)* lived before moving here. What was the address of . . .'s *(Reference person)* previous residence?

Number	Street	Apartment
City, town, or place		
County	State	ZIP Code

OR
(409) 0 ☐ Outside the United States – *Skip to 66, page 27*
(409) OFFICE USE ONLY

45 Did . . . *(Reference person)* live inside the incorporated limits of *(Name of place in item 44)*?
(460) 1 ☐ Yes
2 ☐ No, lived outside incorporated limits or place not incorporated

FORM AHS-52 (9-14-82) Page 21

Section VI – RECENT MOVERS SUPPLEMENT – Continued

46. Please look at this card.
SHOW FLASHCARD F
What are the reasons . . . *(Reference person)* moved FROM that residence?
(Mark all answers given)

EMPLOYMENT
(410) *
1 ☐ Job transfer
2 ☐ To look for work
3 ☐ To take a new job
4 ☐ Entered or left U.S. Armed Forces
5 ☐ Retirement
6 ☐ Commuting reasons
(411) *
7 ☐ To attend school
8 ☐ Other employment reasons – *Specify*
_____

FAMILY
(412) *
09 ☐ Needed larger house or apartment
10 ☐ Divorced or separated
11 ☐ Widowed
(413) *
12 ☐ To be closer to relatives
13 ☐ Newly married
14 ☐ Family increased
(414) *
15 ☐ Family decreased
16 ☐ To establish own household
17 ☐ Other family reasons – *Specify*
_____

OTHER
(415) *
18 ☐ Neighborhood overcrowded
19 ☐ Change in racial or ethnic composition of neighborhood
20 ☐ Crime
(416) *
21 ☐ Wanted neighborhood with children
22 ☐ Wanted neighborhood without children
23 ☐ Wanted better neighborhood
(417) *
24 ☐ Wanted more expensive place or better investment
25 ☐ Wanted to own residence
26 ☐ Wanted better house
(418) *
27 ☐ Wanted to rent residence
28 ☐ Wanted residence with more conveniences

13 ☐ Racial or ethnic composition of neighborhood
14 ☐ Low crime rate

(429) *

15 ☐ Wanted neighborhood with children
16 ☐ Wanted neighborhood without children
17 ☐ Wanted better neighborhood

(430) *

18 ☐ Wanted more expensive place or better investment
19 ☐ Residence with more convenience
20 ☐ Lower rent or less expensive house

(431) *

21 ☐ Change of climate
22 ☐ Schools
23 ☐ Other – *Specify* ↙

INTERVIEWER INSTRUCTIONS

- Two or more boxes marked in item 49 – *Ask 50*
- If only ONE box is marked in item 49 – *Transcribe code to item 50 and ask 51a*

50. Of all the reasons you just mentioned, what is the MAIN reason . . . *(Reference person)* moved to this particular residence or neighborhood?

(432) ☐☐ Box number of MAIN reason

51a. Was . . . *(Reference person)* the person or one of the persons who owned or rented the previous residence at the time he (she) moved?

(433)

☐ Yes ↙
1 ☐ Respondent is the reference person – *Skip to 52, page 25*
2 ☐ Respondent is not the reference person – *Ask 51b*
☐ No ↙
3 ☐ Respondent is the reference person – *Skip to 52, page 25*
4 ☐ Respondent is not the reference person – *Ask 51b*

b. Were you also a member of . . .'s *(Reference person)* household in the previous residence?

(434)

1 ☐ Yes
2 ☐ No

Facsimile of the Annual Housing Survey Questionnaire: 1983—Continued

Section VI – RECENT MOVERS SUPPLEMENT – Continued

52. How many rooms were in THAT residence? Do not count bathrooms, porches, balconies, halls, foyers, or half-rooms. (435) _____ Number

53. How many bedrooms were in THAT residence? Count rooms used mainly for sleeping, even if used for other purposes. (436) _____ Number

54. How many persons were living THERE at the time . . . (Reference person) moved? (437) _____ Number

55. Were there complete plumbing facilities in that building; that is, hot and cold piped water, a flush toilet, and a bathtub or shower? (438)
☐ Yes
Were these facilities used by that household only?
1 ☐ Yes – Used by that household only
2 ☐ No – Also used by another household
3 ☐ No

56. How many living quarters, both occupied and vacant, were in that building? (439)
1 ☐ Mobile home or trailer (no permanent room attached)
2 ☐ One, detached from any other building (Includes mobile home or trailer WITH one or more permanent rooms attached)
3 ☐ One, attached to one or more buildings
4 ☐ 2
5 ☐ 3 or 4
6 ☐ 5 to 9
7 ☐ 10 to 19
8 ☐ 20 to 49
9 ☐ 50 or more

CHECK ITEM M (See item 51a, page 24)
☐ "No" (box 3) marked – Skip to item 66, page 27
☐ All others (box 1 or 2 marked) – Ask 57a

57a. Was that residence owned or being bought by someone in the household? (440)
☐ Yes
Was it owned as a cooperative or condominium?
1 ☐ No – Skip to Check Item N, page 26
2 ☐ Yes, a cooperative – Skip to 57c
3 ☐ Yes, a condominium – Skip to 59, page 26
☐ No – Ask 57b

b. Was it rented for cash rent or occupied without payment of cash rent? (440)
4 ☐ Rented for cash
5 ☐ Occupied without payment of cash rent
} Skip to Check Item N, page 26

c. To the Census Bureau, a cooperative is property which is owned by a corporation. Each shareholder is entitled to occupy an individual unit. Is this what you mean when you say that it was a cooperative?
☐ Yes – Skip to 60, page 27
☐ No – Reask 57a and correct the entry

NOTES

Section VI – RECENT MOVERS SUPPLEMENT – Continued

CHECK ITEM N
TENURE OF PREVIOUS RESIDENCE (See item 57, page 25)
REGULAR OWNERSHIP (Box 1 marked in 57a)
(See item 56, page 25)
☐ One-unit structure – Ask 58a
☐ Two-or-more unit structure, or a mobile home or trailer – Skip to 66, page 27
RENTED FOR CASH OR OCCUPIED WITHOUT PAYMENT OF CASH RENT (Box 4 or 5 marked in 57b)
(See item 56, page 25)
☐ One-unit structure – Skip to 60
☐ Two-or-more unit structure, or a mobile home or trailer – Skip to Check Item O

58a. Was that house on a place of 10 acres or more? (441)
1 ☐ Yes – Skip to 66, page 27
2 ☐ No

b. Was there a commercial establishment or medical or dental office on the property? (442)
1 ☐ Yes – Skip to 66, page 27
2 ☐ No

59. What was the value of that property when . . . (Reference person) moved; that is, about how much did that property (house and lot) (condominium unit) sell for, or would it have sold for, had it been for sale?

SHOW FLASHCARD C

(443)
1 ☐ Less than $5,000
2 ☐ $ 5,000 – $ 7,499
3 ☐ 7,500 – 9,999
4 ☐ 10,000 – 12,499
5 ☐ 12,500 – 14,999
6 ☐ 15,000 – 17,499
7 ☐ 17,500 – 19,999
8 ☐ 20,000 – 22,499
9 ☐ 22,500 – 24,999
10 ☐ 25,000 – 27,499
11 ☐ 27,500 – 29,999
12 ☐ 30,000 – 34,999
13 ☐ 35,000 – 39,999
14 ☐ 40,000 – 44,999
15 ☐ 45,000 – 49,999
16 ☐ 50,000 – 54,999
17 ☐ 55,000 – 59,999
18 ☐ 60,000 – 64,999
19 ☐ 65,000 – 69,999
20 ☐ 70,000 – 74,999
21 ☐ 75,000 – 79,999
22 ☐ 80,000 – 89,999
23 ☐ 90,000 – 99,999
24 ☐ 100,000 – 124,999
25 ☐ 125,000 – 149,999
26 ☐ 150,000 – 199,999
27 ☐ 200,000 – 249,999
28 ☐ 250,000 – 299,999
29 ☐ 300,000 or more
} Skip to 66, page 27

60. Was that house on a place of 10 acres or more? (444)
1 ☐ Yes – Skip to 66, page 27
2 ☐ No

CHECK ITEM O (See item 57b, page 25)
☐ Rented for cash – Ask 61
☐ Occupied without payment of cash rent – Skip to 62, page 27

61. What was the MONTHLY rent for that apartment (house)? (445) $ _____.00 Per month
(If rent was not paid by the month, write amount and time period covered in "Notes" space, then compute MONTHLY rent and enter on line provided.)
(Include site rent for mobile homes if it was paid separately.)

NOTES

Facsimile of the Annual Housing Survey Questionnaire: 1983—Continued

Section VI – RECENT MOVERS SUPPLEMENT – Continued

62. Was that house (apartment) in a public housing project; that is, was it owned by a local housing authority or other local public agency?
(446) 1 ☐ Yes – *Skip to 64a*
2 ☐ No

63. Was the rent for that house (apartment) subsidized; that is, was the rent lower because the federal, state, or local government was paying part of the cost?
(447) 1 ☐ Yes
2 ☐ No

NOTE – *Ask 64a for all categories before asking 64b. (Exclude phrase "In addition to rent" for sample units OCCUPIED WITHOUT PAYMENT OF CASH RENT.)*

NOTE – *Ask 64b only for those categories in 64a which were answered "Yes."*

64a. (1) In addition to rent, did that household pay for electricity?
(448) 1 ☐ Yes
2 ☐ No, included in rent or supplied free
3 ☐ No, electricity not used

64b. (1) What was the average **MONTHLY** cost for electricity?
(449) $ _____ . 00

(2) In addition to rent, did that household pay for gas?
(450) 1 ☐ Yes
2 ☐ No, included in rent or supplied free
3 ☐ No, gas not used

(2) What was the average **MONTHLY** cost for gas?
(451) $ _____ . 00

(3) In addition to rent, did that household pay for water?
(452) 1 ☐ Yes
2 ☐ No, included in rent or no charge

(3) What was the **YEARLY** cost for water?
(453) $ _____ . 00

(4) In addition to rent, did that household pay for oil, coal, kerosene, wood, **OR** any other fuel?
(454) 1 ☐ Yes
2 ☐ No, included in rent
3 ☐ No, these fuels not used or obtained free

(4) What was the **YEARLY** cost for oil, coal, kerosene, wood, and any other fuel?
(455) $ _____ . 00

(5) In addition to rent, did that household pay for garbage (food waste) collection?
(456) 1 ☐ Yes
2 ☐ No

(5) What was the **YEARLY** cost for garbage (food waste) collection?
(457) $ _____ . 00

NOTES

CHECK ITEM P
(See item 57b, page 25)
☐ Rented for cash – *Ask 65*
☐ Occupied without payment of cash rent – *Skip to 66*

65. Was that apartment (house) rented furnished or unfurnished?
(458) 1 ☐ Furnished
2 ☐ Unfurnished

66. Besides the move to the present residence, how many other times did . . . *(Reference person)* move in the past 12 months?
(Do not include visits or vacations.)
(459) 1 ☐ None
2 ☐ One
3 ☐ Two
4 ☐ Three or more

Section VII – HOUSING QUALITY AND EQUIPMENT BREAKDOWN SUPPLEMENT

INTRODUCTION Now I have some questions concerning problems you may have experienced in this home.

CHECK ITEM Q
(See Check item I, Part (2), page 20)
Part (1) Reference person moved into this house (apartment) before February 1983
☐ Yes – *Go to Part (2) below*
☐ No – *Skip to Check Item R*
(See item 12, page 11)
Part (2) Heating Equipment
☐ Room heater(s) WITHOUT flue or vent (box 7 marked) – *Ask 67*
☐ Fireplaces, stoves, or portable room heater(s) (box 8 marked) – *Ask 67*
☐ Unit has no heating equipment (box 9 marked) – *Ask 67*
☐ All others – *Skip to 68*

67. During the time period of December 1982 through February 1983 was this house (apartment) so cold for 24 hours or more that it caused you discomfort?
(801) 1 ☐ Yes
2 ☐ No } *Skip to 70*

68. During the time period of December 1982 through February 1983 when your regular heating system was working, did you, at any time, have to use additional sources of heat **BECAUSE YOUR REGULAR SYSTEM DID NOT PROVIDE ENOUGH HEAT?**
(802) 1 ☐ Yes
2 ☐ No } *Skip to 69*

CHECK ITEM R
(See item 12, page 11)
HEATING EQUIPMENT
☐ Room heater(s) WITHOUT flue or vent (box 7 marked) – *Skip to 70*
☐ Fireplaces, stoves, or portable room heater(s) (box 8 marked) – *Skip to 70*
☐ Unit has no heating equipment (box 9 marked) – *Skip to 70*
☐ All others – *Ask 69*

69. How many rooms in this house (apartment) do **NOT** have hot air ducts, registers, radiators, or room heaters? Do not count kitchen or bathroom(s).
(803) 1 ☐ None
2 ☐ 1 room
3 ☐ 2 rooms
4 ☐ 3 or more rooms

70. Does each room in this house (apartment) have a working electric wall outlet (wall plug)?
(808) 1 ☐ Yes
2 ☐ No

71. Is all the wiring in this house (apartment) concealed in the walls or in metal coverings? Do not count appliance cords, extension cords or chandelier cords.
(809) 1 ☐ Yes
2 ☐ No

72a. Is it necessary to go through any bedroom to get to any bathroom?
(810) 1 ☐ Yes
2 ☐ No

b. Is it necessary to go through any bedroom to get to any other room?
(811) 1 ☐ Yes
2 ☐ No

NOTES

Section VII – HOUSING QUALITY AND EQUIPMENT BREAKDOWN SUPPLEMENT – Continued

CHECK ITEM S

(See Check Item I, Part (1), page 20)
Reference person lived here last 90 days
- ☐ Yes – *Ask 73a*
- ☐ No – *Skip to Check Item U*

73a. Have any electric fuses or breaker switches blown in this house (apartment) in the last 90 days? (816)
1 ☐ Yes
2 ☐ No . . . . . } *Skip to 74a*
3 ☐ Don't know

b. How many times did this happen? (817)
1 ☐ 1
2 ☐ 2
3 ☐ 3 or more

74a. At any time in the last 90 days, have you seen any mice or rats, or signs of mice or rats in this house (building)? (818)
1 ☐ Yes
2 ☐ No – *Skip to Check Item T*

b. Is this house (building) serviced by an exterminator for mice or rats regularly, only when needed, irregularly, or not at all? (819)
1 ☐ Regularly
2 ☐ Only when needed
3 ☐ Irregularly
4 ☐ Not at all

CHECK ITEM T

(See item 8, page 1)
- ☐ REGULAR INTERVIEW – *Ask 75*
- ☐ URE INTERVIEW – *Skip to 81a, page 30*

75. Do you have piped water in this building? (825)
1 ☐ Yes
2 ☐ No – *Skip to 77a*

76a. At any time in the last 90 days, were you COMPLETELY without running water? (826)
1 ☐ Yes
2 ☐ No – *Skip to 77a*

b. Were you completely without running water for 6 consecutive hours or more? (827)
1 ☐ Yes
2 ☐ No . . . . . } *Skip to 77a*
3 ☐ Don't know

c. How many times? (828)
1 ☐ 1
2 ☐ 2
3 ☐ 3 or more

d. What was the (most common) reason you were completely without water for 6 consecutive hours or more – was it because of problems inside the building or problems outside the building? (829)
1 ☐ Inside
2 ☐ Outside

77a. At any time in the last 90 days was there a breakdown in your flush toilet or toilets, such that there were no usable toilets? (830)
1 ☐ Yes
2 ☐ No – *Skip to 78a, page 30*

b. Did any of these breakdowns last 6 consecutive hours or more? (831)
1 ☐ Yes
2 ☐ No – *Skip to 78a, page 30*

c. How many of these breakdowns were there? (832)
1 ☐ 1
2 ☐ 2
3 ☐ 3
4 ☐ 4 or more

d. What was the (most common) reason you were completely without the use of your flush toilet for 6 consecutive hours or more – was it because of problems inside the building or problems outside the building? (833)
1 ☐ Inside
2 ☐ Outside

Section VII – HOUSING QUALITY AND EQUIPMENT BREAKDOWN SUPPLEMENT – Continued

78a. At any time in the last 90 days, was there a breakdown in your sewage disposal system such that it was completely unusable? (834)
1 ☐ Yes
2 ☐ No – *Skip to Check Item U*

b. Did any of these breakdowns last 6 consecutive hours or more? (835)
1 ☐ Yes
2 ☐ No . . . . . } *Skip to Check Item U*
3 ☐ Don't know

c. How many of these breakdowns were there? (836)
1 ☐ 1
2 ☐ 2
3 ☐ 3 or more

CHECK ITEM U

(See Check Item I, Part (2), page 20)
Part (1) Reference person moved into this house (apartment) before February 1983
- ☐ Yes – *Go to Part (2) below*
- ☐ No – *Skip to 81a*

(See item 12, page 11)
Part (2) Heating equipment
- ☐ Unit has no heating equipment (box 9 marked) – *Skip to 81a*
- ☐ All others – *Ask 79a*

79a. During the time period of December 1982 through February 1983, was there a breakdown in your heating equipment; that is, was it completely unusable for 6 consecutive hours or more? (837)
1 ☐ Yes
2 ☐ No – *Skip to 80a*

b. How many times did that happen? (838)
1 ☐ 1
2 ☐ 2
3 ☐ 3
4 ☐ 4 or more

80a. During the time period of December 1982 through February 1983, did you completely close certain rooms for a week or longer because you couldn't get them warm? Include kitchen and bathroom(s). (839)
1 ☐ Yes
2 ☐ No – *Skip to 81a*

b. Which rooms?
Mark (X) all that apply (840)
1 ☐ Living room
2 ☐ Dining room
3 ☐ One or more bedrooms
4 ☐ Other – *Specify*

81a. Is there a basement in this house (building)? *(A basement is an enclosed space in which persons can walk upright under all or part of the building.)* (841)
1 ☐ Yes
2 ☐ No – *Skip to 82*

b. Does the basement show any signs of water having leaked in from the outside? (842)
1 ☐ Yes
2 ☐ No
3 ☐ Don't know

82. Does the roof of this house (building) leak? (843)
1 ☐ Yes
2 ☐ No
3 ☐ Don't know

83. In view of all the things we have talked about, how would you rate this house (building) as a place to live – would you say it is excellent, good, fair, or poor? (844)
1 ☐ Excellent
2 ☐ Good
3 ☐ Fair
4 ☐ Poor

NOTES

Facsimile of the Annual Housing Survey Questionnaire: 1983—Continued

Section VIII – NEIGHBORHOOD QUALITY SUPPLEMENT

NOTE – Ask all categories in 84a before asking 84b

NOTE – Ask 84b only for those categories in 84a which were answered "Yes"

84a. The following questions are concerned with different aspects of your present neighborhood. Here is a list of conditions which many people have on their streets. Which, if any, do you have?		b. Does the (Condition) bother you?	c. Is it so objectionable that you would like to move from the neighborhood?
(1) Street (highway) noise?	(901) * 1 ☐ Yes 2 ☐ No	(1) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No
(2) Streets or roads continually in need of repair, or open ditches?	(902) * 1 ☐ Yes 2 ☐ No	(2) 3 ☐ Yes – Ask c 4 ☐ No	5 ☐ Yes 6 ☐ No

101a. Does your condominium (cooperative maintenance) fee include water supply and/or sewage disposal? (549)
1 ☐ Yes – *Skip to 102a, page 35*
2 ☐ No

b. Do you pay for water supply and/or sewage disposal separately (550)
1 ☐ Yes
2 ☐ No – *Skip to 102a, page 35*

c. What is the YEARLY cost for water supply and sewage disposal? (551) $_____.00

Facsimile of the Annual Housing Survey Questionnaire: 1983—Continued

Section IX – CONDOMIUM/COOPERATIVE SUPPLEMENT – Continued

102a. Does your condominium (cooperative maintenance) fee include oil, coal, kerosene, wood, OR any other fuel? (552)
1 ☐ Yes – Skip to 103a
2 ☐ No

b. Do you pay for oil, coal, kerosene, wood, OR any other fuel separately? (553)
1 ☐ Yes
2 ☐ No – Skip to 103a

c. What is the YEARLY cost for oil, coal, kerosene, wood, and any other fuel? (554) $ _____ .00

103a. Does your condominium (cooperative maintenance) fee include garbage (food waste) collection? (555)
1 ☐ Yes – Skip to 104
2 ☐ No

b. Do you pay for garbage (food waste) collection separately from real estate taxes? (556)
1 ☐ Yes
2 ☐ No or payment included in real estate taxes – Skip to 104

c. What is the YEARLY cost for garbage (food waste) collection? (557) $ _____ .00

104. Does your condominium (cooperative maintenance) fee include –

(1) Upkeep and maintenance of the common property, buildings, equipment, and grounds? (558)
1 ☐ Yes
2 ☐ No

(2) Off-street parking? (559)
1 ☐ Yes
2 ☐ No

(3) Swimming facilities? (560)
1 ☐ Yes
2 ☐ No

(4) Other recreational facilities? (561)
1 ☐ Yes
2 ☐ No

(5) Security personnel? (562)
1 ☐ Yes
2 ☐ No

(6) Anything else? (563)
1 ☐ Yes – Specify _____
2 ☐ No

CHECK ITEM Y

Part (1) (See Check Item B, page 12)
☐ Box 5 marked – Go to Part (2)
☐ All others – Skip to Check Item AA, page 40

Part (2) (See item 8a, page 10)
☐ Mobile home or trailer (no permanent room attached) – Ask 105a, page 36
☐ All others – Skip to Check Item Z, page 36

NOTES

Section X – HOUSING COST SUPPLEMENT

105a. Do you own the mobile home (trailer) SITE or is it rented? (565)
1 ☐ Owned – Skip to 106a
2 ☐ Rented for cash or occupied without payment of cash rent

b. What is the MONTHLY rent for this site? (Mark the frequency of payment box and enter the MONTHLY site rent. If rent is not paid by the month, compute the MONTHLY site rent in "Notes" space, and enter the monthly site rent on the line provided.) (566) $ _____ .00 Per month
0 ☐ No cash rent

(567)
1 ☐ More frequently than once a month
2 ☐ Less frequently than once a month
3 ☐ Once a month

106a. In what year did you acquire this mobile home (trailer)? (568) 19 ____

b. Was the mobile home (trailer) NEW when you acquired it? (569)
1 ☐ Yes
2 ☐ No

c. When you acquired this mobile home (trailer), what was the purchase price? Do not include the price of the site or closing costs. (570) $ _____ .00 Purchase price
0 ☐ Not purchased

CHECK ITEM Z

(See item 39a, page 20)
☐ Kind of mortgage specified (box 1, 2, 3, or 4 marked or "DK," "NA," or "REF" entered) – Ask 107
☐ Item 39d blank – Skip to 110a, page 37

107. Earlier you told me that your residence is mortgaged. In regard to that mortgage (loan), what are the required payments to the lender? If more than one mortgage (loan), on this property, give the total amount of the payments. (534) $ _____ .00 PER
(535)
1 ☐ Month
2 ☐ Year
☐ Other – Specify _____

108a. In regard to the mortgage (loan), do the required payments include mortgage payments for property other than your residence? (571)
1 ☐ Yes
2 ☐ No – Skip to 109

b. How much of the (specify amount in 107) is for YOUR RESIDENCE? (572) $ _____ .00
0 ☐ Don't know

109. In regard to the mortgage (loan), do the required payments include –
(1) Real estate taxes for your residence? (573)
1 ☐ Yes
2 ☐ No

(2) Fire and hazard insurance for your residence? (574)
1 ☐ Yes
2 ☐ No

SAMPLE DESIGN

Annual Housing Survey—The estimates for each of the 13 SMSA's in this report series (H-170-83) are based on data collected from the 1983 Annual Housing Survey (AHS) which was conducted by the Bureau of the Census acting as collection agent for the Department of Housing and Urban Development.

The SMSA's selected for the AHS are interviewed on a rotating basis. The group of 13 SMSA's selected for interview during 1983 were interviewed previously in 1976 and 1980 for the Louisville, KY-IN; New York, NY; Sacramento, CA; and St. Louis, MO-IL, SMSA's; in 1975 and 1979 for the Chicago, IL; Hartford, CT; Miami, FL; and Portland, OR-WA, SMSA's; and in 1976 and 1979 for the Baltimore, MD; Denver, CO; Honolulu, HI; Houston, TX; and Seattle-Everett, WA, SMSA's (see the list of SMSA reports from the AHS in the introduction of this report).

Five of the larger SMSA's (Chicago, IL; Houston, TX; New York, NY; St. Louis, MO-IL; and Seattle-Everett, WA) in the 1983 group of SMSA's were represented by a sample size of about 15,000 designated housing units in the previous surveys, evenly divided between the central city and the balance of the respective SMSA. The eight remaining SMSA's (Baltimore, MD; Denver, CO; Hartford, CT; Honolulu, HI; Louisville, KY-IN; Miami, FL; Portland, OR-WA; and Sacramento, CA) in the 1983 group were represented by a sample of about 5,000 designated housing units in the previous surveys distributed proportionately between the central city and balance of the respective SMSA based on the distribution of total housing units in each sector.

In the 1975, 1976, and 1979 surveys for all SMSA's and in the 1980 survey for all SMSA's, excluding New York, NY and St. Louis, MO-IL, AHS sample units were divided among 12 panels with one-twelfth of the sample housing units being interviewed each month. Due to budget limitations, panel 3 was dropped in the 1980 survey for the New York, NY and St. Louis, MO-IL, SMSA's and interviewing was done during April 1980 through February 1981. Due to additional budget limitations for the 1983 survey, additional reductions were necessary. This reduction was done in order to achieve sample sizes of 8,500 in the Chicago, IL and New York, NY, SMSA's and sample sizes of 4,250 in the other 11 SMSA's. Interviewing for all SMSA's was done during April 1983 through December 1983.

In this SMSA, 3,793 housing units were eligible for interview. Of these sample housing units, 147 interviews were not obtained because, for occupied sample units, the occupants refused to be interviewed, were not at home after repeated visits, or were unavailable for some other reason; or, for vacant units, no informed respondent could be found after repeated visits. In addition to the 3,793 housing units eligible for interview, 341 units were visited but were not eligible for interview because they were condemned, unfit, demolished, converted to group quarters use, etc.

Designation of sample housing units for the 1983 survey—The sample housing units designated to be interviewed in the 1983 survey consisted of the following categories which are described in detail in the succeeding sections.

1. All sample housing units that were interviewed in the 1979 survey and remained in sample after the 1983 reduction. This sample includes housing units that were selected as part of the Coverage Improvement Program and represented most of the housing units which, until 1976, (1979 for the Chicago, IL; Hartford, CT; Miami, FL; and Portland, OR-WA, SMSA's), did not have a chance of selection. The coverage improvement housing units did not undergo reduction after selection in 1976 or 1979.
2. All sample housing units that were type A noninterviews (i.e., units eligible to be interviewed) or type B noninterviews (i.e., units not eligible for interview at the time of the survey but which could become eligible in the future) in the 1979 survey and remained in sample after the 1983 reduction. (For a list of reasons for type A and type B noninterviews, see the facsimile of the 1983 AHS questionnaire, page App-18.)
3. All sample housing units that were selected from a listing of new residential construction building permits issued since the 1979 survey and remained in sample after the 1983 reduction. (This sample represented the housing units built in permit-issuing areas since the 1979 survey.)
4. All sample housing units that were added to sample segments in the nonpermit universe since the 1979 survey and remained in sample after the 1983 reduction. (This sample represented additions to the housing inventory in nonpermit-issuing areas since the 1979 survey.)

Selection of the original AHS-SMSA sample—The sample for the SMSA's which, in 1970, were 100-percent permit-issuing was selected from two sample frames—housing units enumerated in the 1970 Census of Population and Housing in areas under the jurisdiction of permit-issuing offices (the permit-issuing universe) and housing units constructed in permit-issuing areas since the 1970 census (the new construction universe). In addition, the sample for those SMSA's which were not 100-percent permit-issuing in 1970 included a sample selected from a third frame—those housing units located in areas not under the jurisdiction of permit-issuing offices (the nonpermit universe). In 1970, the following five SMSA's were 100-percent permit-issuing: Hartford, CT; Honolulu, HI; Miami, FL; New York, NY; and Sacramento, CA. The remaining eight SMSA's contain a sample from the nonpermit universe.

Sampling operations, described in the following paragraphs, were performed separately within the central city and the balance of the SMSA for each of the sample frames. The overall sampling rate used to select the sample for each SMSA was determined by the size of the sample. Thus, for the five largest SMSA's, the overall sampling rate differed for the central city and the balance of the SMSA, since the sample was divided equally between the central city and the balance of the SMSA. The remaining SMSA's had an overall sampling rate about the same for the sample selected from both the central city and the balance of the SMSA, since the sample was distributed proportionately between the central city and the balance of the SMSA according to the distribution of the total housing units in each sector.

The major portion of the sample in each SMSA was selected from a file which represented the 20-percent sample of housing units enumerated in permit-issuing areas of the SMSA during the 1970 Census of Population and Housing. This file contained records for occupied housing units, vacant housing units, and housing units in certain special places or group quarters. Sampling operations were done separately for the special place and group quarters records, and for the occupied and vacant housing unit records. Before the sample was selected from the occupied and vacant housing unit records, the occupied housing unit records were stratified by race of head (non-Black/Black) and the vacant records were stratified into four categories pertaining to the value or rent associated with the vacant housing units. The occupied housing unit records were further stratified so that each unit was assigned to 1 of 50 strata according to its tenure, family size, and household income category as illustrated by the following table:

Household income	Tenure	
	Owner—Family size 1 2 3 4 5+	Renter—Family size 1 2 3 4 5+
Under $3,000		
$3,000 to $5,999 . . .		
$6,000 to $9,999 . . .		
$10,000 to $14,999 .		
$15,000 and over . . .		

Thus, for this SMSA, the occupied housing unit records from the permit-issuing universe were assigned to 1 of 100 strata for either the central city or for the balance, and the vacant housing unit records were assigned to 1 of the 4 vacant strata for either the central city or for the balance of the SMSA. A sample selection procedure was then instituted that would produce one-half of the desired sample size. However, whenever a record was selected to be in sample, the housing unit record adjacent to it on the file was also selected to be in sample, thereby insuring the necessary designated sample size.

Before the sample was selected from the group quarters and special place records, the records were stratified by census tract and census enumeration district (ED) within the central city and within the balance of the SMSA. A sample of special place records was then selected by a procedure that produced one-quarter of the desired sample size. However, at the time of the survey, the housing units at each of the special places were listed and subsampled at a rate which produced an expected four sample units, thereby insuring the necessary designated sample size.

The second frame from which this SMSA sample was selected was a list of new construction building permits issued since 1970 (i.e., the new construction universe). The sample selection from the list of new construction building permits was an independent operation within this SMSA. Prior to sample selection, the

list of permits was chronologically stratified by the date the permits were issued, and clusters of an expected four (usually adjacent) housing units were formed. These clusters were then sampled for inclusion at the overall sampling rate.

For those SMSA's which were not 100-percent permit-issuing, the remainder of the AHS sample was selected from a frame consisting of areas not under the jurisdiction of permit-issuing offices (i.e., the nonpermit universe). The first step in the sampling operation for the nonpermit universe was the selection (using the overall sampling rate) of a sample of census enumeration districts within these areas. Prior to this sample selection, the ED's were stratified by census tract within the central city and within the balance of the SMSA. The probability of selection of an ED was proportionate to the following measure of size.

$$\frac{\text{Number of housing units in 1970 census ED} + \dfrac{\text{Group quarters population in 1970 census ED}}{3}}{4}$$

The sample ED's were then divided into segments; i.e., small land areas with well-defined boundaries having an expected size of four, or a multiple of four, housing units. At the time of the survey, those segments that did not have an expected size of four were further subdivided to produce an expected four sample housing units.

The next step was the selection of one of these segments within each sample ED. All housing units in existence at the time of interview in these selected segments were eligible for sample. Thus, housing units enumerated in the 1970 census as well as housing units built since the 1970 census are included.

Sample selection for the Coverage Improvement Program—The Coverage Improvement Program was undertaken to correct certain deficiencies in the AHS-SMSA sample from the permit-issuing and new construction universes. The coverage deficiencies included the following units:

1. New construction from building permits issued prior to January 1970, but completed after April 1, 1970.
2. Mobile homes placed in parks either missed during the 1970 census or established since the 1970 census.
3. Housing units missed in the 1970 census.
4. Housing units converted to residential use that were nonresidential at the time of the 1970 census.
5. Houses that have been moved onto their present site since the 1970 census.
6. Mobile homes placed outside parks since the 1970 census or vacant at the time of the 1970 census.

For the Chicago, IL; Hartford, CT; Miami, FL; and Portland, OR-WA, SMSA's which were interviewed for the first time in 1975, a full implementation of the Coverage Improvement Program was conducted as part of the 1979 AHS. For the Baltimore, MD; Denver, CO; Honolulu, HI; Houston, TX; and Seattle-Everett, WA, SMSA's which were interviewed for the first time in 1976, the Coverage Improvement Program was conducted as part of the 1976 AHS with some updating and refining as part of the 1979 AHS. For these SMSA's, estimates of housing units added by a specific procedure reflect units added in 1976 as well as any additions that resulted from the updating and refining in 1979. For the Louisville, KY-IN; New York, NY; Sacramento, CA; and St. Louis, MO-IL, SMSA's which were also interviewed for the first time in 1976, the Coverage Improvement Program was only conducted as a part of the 1976 AHS.

Coverage improvement for deficiency 1—A sample of new construction units, whose permits were issued before January 1970, but completed after April 1970, was selected for each SMSA. Two different procedures were used. For the first procedure, the sampling was carried out in two stages for one- and two-unit structures and in three stages for three-or-more-unit structures. Sample units selected from one- and two-unit structures were sampled at one-fourth the rate of units originally selected for the AHS-SMSA sample (regular AHS units).

The first stage was a sample of permit offices, and the second stage was a sample of the 1969 permits within each of the selected permit offices. In the Honolulu, HI and New York, NY, SMSA's an additional sample of 1968 permits for three-or-more-unit structures was included in the second stage.

For the third stage, structures of size three or more were divided into clusters of an expected size of two units and a sample of clusters was selected. This coverage improvement procedure was not updated as part of the 1979 AHS for the Baltimore, MD; Denver, CO; Honolulu, HI; Houston, TX; and Seattle-Everett, WA, SMSA's.

In the Chicago, IL; Hartford, CT; Miami, FL; and Portland, OR-WA, SMSA's units whose permits were issued before January 1970, but which were completed after April 1970, were identified from the Survey of Construction (SOC), a survey of building permits conducted monthly by the Bureau of the Census. These units were then sampled at one-third the rate of regular AHS units.

Coverage improvement for deficiency 2—In permit-issuing areas, a sample of mobile homes placed in a park that was missed by the census or established after the census was selected in two stages. First, for each SMSA, a sample of tracts was selected and canvassed. All parks were listed and then matched back to the 1970 census to identify parks missed by the census and parks established after the census. Second, the parks were divided into clusters of an expected size of four sites and a sample of clusters was selected and interviewed. Each of the sample units represented the same number of units that the regular AHS sample units represented. Since research showed that there were no mobile homes or trailer parks in the central cities of the Chicago, IL; Hartford, CT; and Portland, OR-WA, SMSA's, this procedure was only implemented outside the central cities for these SMSA's. Based on a cost benefit analysis, this procedure was updated as part of the 1979 AHS only for the Denver, CO, SMSA.

Coverage improvement for deficiencies 3-6—The remaining missed units were sampled by one of two procedures. The first procedure was designed to represent units from the following

types of missed structures (structures that had no chance of selection for the AHS):

1. Structures missed in the 1970 census.
2. Structures that were completely nonresidential in the 1970 census but now contain units converted to residential use.
3. Mobile homes that had been placed outside parks since the 1970 census and have a utility hookup, or were on the site during the present survey but not occupied on April 1, 1970, or had no utility hookup but were occupied by persons with a usual residence elsewhere.
4. Houses that had been moved onto their present site since the 1970 census.

Initially, a subsample of AHS sample units was selected from the permit-issuing universe at a rate of 1 in 24 for the Chicago, IL; Hartford, CT; Miami, FL; and Portland, OR-WA, SMSA's and a rate of 1 in 22 for the other nine SMSA's. Then, succeeding structures in a defined path of travel to the right of the structure containing the sample unit were listed until eight structures (excluding the sample unit structure) were found that had been eligible to be selected for the AHS. Finally, the intervening structures that did not have a chance of selection in the AHS were identified and units within these structures were interviewed. In cases where the interviewer workload would have been too great, a representative subsample of units within these structures was selected. Although the Baltimore, MD and Houston, TX, SMSA's were interviewed for the first time in 1976 and had these sampling procedures implemented at that time, some 1976 coverage improvement assignments were not sent out to be interviewed due to time limitations. The sampling was completed as part of the 1979 AHS.

The second procedure was designed to represent missed units from structures represented in the AHS. These missed units were:

1. Units missed in the 1970 census.
2. Units converted to residential use since the 1970 census in structures that contained some residential units in 1970.

First, a subsample of AHS housing units in multiunit structures of less than 10 units was selected from the permit-issuing universe. Second, for the multiunit structure selected above, all housing units were listed and matched to the 1970 census. Any missed housing units were then assigned for interview.

1979-1983 additions to the housing inventory—In the permit-issuing universe, a sample of new construction building permits, issued since the 1979 survey, was selected to represent housing units built in permit-issuing areas since the 1979 survey. Sampling procedures were identical to those used in selecting the 1970-1979 new construction sample, which were described previously. In the nonpermit universe, sample segments were dependently recanvassed, using listing sheets from 1979, to identify any housing units missed in the 1979 survey or any housing units added since the 1979 survey.

1983 sample reduction—The sample reduction for the 1983 AHS-SMSA survey dropped housing units from the permit-issuing universe, the new construction universe, and the nonpermit universe. From the new construction universe, whole clusters were dropped. From the nonpermit universe, whole segments were dropped. Reduction from the permit-issuing universe pertained to individual housing units.

The 1983 sample reduction was to achieve three criteria. The first criteria was to achieve sample sizes of 8,500 in the Chicago, IL and New York, NY, SMSA's and sample sizes of 4,250 in the other 11 SMSA's. The second criteria was to achieve samples distributed proportionately between the central city and balance of the respective SMSA based on the distribution of total housing units in each sector. The third criteria was to obtain a sample having equal numbers of renters and owners. In order to achieve this result, panels 1 to 3 were dropped in the Chicago, IL; Houston, TX; St. Louis, MO-IL; and Seattle-Everett, WA, SMSA's and in the balance of the New York, NY, SMSA. For the sample units that were classified as owners in the prior year (1975 or 1976), panels 1 to 3 were dropped in the Baltimore, MD; Denver, CO; Hartford, CT; Louisville, KY-IN; Portland, OR-WA; and Sacramento, CA, SMSA's. In order to achieve the desired sample sizes, additional reduction was done across all units in the remaining panels in all SMSA's.

1970 Census of Population and Housing—The estimates pertaining to the 1970 housing inventory (i.e., the housing inventory that existed at the time of the 1970 census) are based on either 20-, 15-, or 5-percent sample data collected in April 1970 for the Decennial Census of Population and Housing. A detailed description of the sample design employed for the 1970 census can be obtained in the 1970 Census of Housing report, Volume I, *Housing Characteristics for States, Cities, and Counties,* Part 1.

ESTIMATION

The 1983 AHS sample produced two types of estimates for each SMSA: Estimates pertaining to characteristics of the housing inventory at the time of the interview (i.e., the 1983 housing inventory) and estimates pertaining to characteristics of housing units removed from the housing inventory since 1979 (i.e., 1979-1983 lost units). Each type of estimate employed separate, although similar, estimation procedures.

1983 housing inventory—The AHS estimates of characteristics of the 1983 housing inventory were produced using a two-stage ratio estimation procedure for the Chicago, IL; Hartford, CT; Honolulu, HI; Houston, TX; New York, NY; Portland, OR-WA; St. Louis, MO-IL; and the Seattle-Everett, WA, SMSA's; and a three-stage ratio estimation procedure for the Baltimore, MD; Denver, CO; Louisville, KY-IN; Miami, FL; and Sacramento, CA, SMSA's.

Prior to the implementation of the ratio estimation procedures, the basic weight (i.e., the inverse of the probability of selection) for each interviewed sample housing unit was adjusted to account for the noninterviews previously mentioned. This noninterview adjustment was done separately for occupied and vacant housing units built in permit-issuing areas since the previous

survey and by occupancy status and tenure for all other housing units. The noninterview adjustment factor was equal to the following ratio:

$$\frac{\text{Weighted count of interviewed housing units} + \text{Weighted count of noninterviewed housing units}}{\text{Weighted count of interviewed housing units}}$$

The following describes the noninterview adjustment cells for all units excluding those built in permit-issuing areas since the last survey.

Within each sector of each SMSA, a noninterview factor was computed separately for 50 noninterview cells for sample housing units from the permit-issuing universe (where the cells consisted of one or more of the different strata used in the stratification of the universe as previously described). In addition, within each sector, separate noninterview factors were computed for one noninterview cell for conventional new construction sample housing units in permit-issuing areas built prior to the current survey, three cells for the coverage improvement universe, two cells for the nonpermit universe, one cell for sample housing units from the permit-issuing universe which consisted of the four vacant strata in the stratification of the universe as previously described, and one cell from the special place universe.

The following ratio estimation procedure was employed for all sample housing units from the permit-issuing universe. This factor was computed separately for all sample housing units within each permit-issuing universe noninterview cell mentioned previously. The ratio estimation factor for each cell was equal to the following:

$$\frac{\text{1970 census count of housing units from the permit-issuing universe in the corresponding cell}}{\text{AHS sample estimate of 1970 housing units from the permit-issuing universe in the corresponding cell}}$$

For each SMSA, the numerators of the ratios were obtained from the 1970 Census of Population and Housing 20-percent file of housing units enumerated in areas under the jurisdiction of permit-issuing offices. The denominators of the ratios were obtained from weighted estimates of all the AHS sample housing units within the corresponding ratio estimation categories using the existing weight (i.e., the basic weight times the noninterview factor). The computed ratio estimation factor was then applied to the existing weight for each sample housing unit within the corresponding ratio estimation category.

This ratio estimation procedure was introduced to correct the probabilities of selection for samples in each of the strata used in the sample selection of the permit-issuing universe. Prior to the AHS sample selection within each SMSA, housing units already selected for other Census Bureau surveys were deleted from the permit-issuing universe. The same probability of selection was then applied to the remaining units to select the AHS sample. Since the number of housing units deleted from the AHS universe frame was not necessarily proportional among all strata, some variation in the actual probability of selection between strata were introduced during the AHS sample selection process.

The next ratio estimation procedure was applied in the Baltimore, MD; Denver, CO; Louisville, KY-IN; Miami, FL; and Sacramento, CA, SMSA's.

This ratio estimation procedure was utilized to adjust the central city/balance distribution of the weighted sample estimate of new construction housing units built since the last survey in permit-issuing areas to an independently derived estimate of this distribution.

This ratio estimation factor was calculated separately for the central city and balance of each SMSA and was applied to all new construction housing units from permit-issuing areas within the corresponding sector (central city or balance of the SMSA). This ratio estimation factor equaled the following:

$$\frac{\text{Independent estimate of the proportion of new construction housing units from permit-issuing areas built since the last survey in the corresponding sector of the SMSA}}{\text{Sample estimate of the proportion of new construction housing units from permit-issuing areas built since the last survey in the corresponding sector of the SMSA}}$$

The independent estimates of new construction were based upon the number of authorized building permits which were determined from the Survey of Construction (SOC). The sample estimates were obtained from the weighted estimate of the AHS-SMSA sample housing units after the first-stage ratio estimation procedure. The computed ratio estimation factor was then applied to the existing weight for all sample housing units classified within the corresponding ratio estimation cell.

The next ratio estimation procedure was applied in all SMSA's. This procedure involved the ratio estimation of the AHS-SMSA weighted sample estimate of the August 1983 housing inventory in each sector (central city and balance) for each SMSA to an independent estimate of total housing units for the corresponding sector. This ratio estimation factor equaled the following:

$$\frac{\text{Independent estimate of the August 1983 housing unit inventory for the corresponding sector of the SMSA}}{\text{AHS-SMSA sample estimate of the housing inventory for the corresponding sector of the SMSA}}$$

The independent estimates of total housing units that were used as the numerator of this ratio are described below. The denominator of this ratio was obtained from the weighted estimate of the AHS-SMSA sample housing units using the existing weight.

Independent estimates of total housing units were derived for the central city, balance, and the total SMSA for the 13 1983 SMSA's. These estimates were derived by using 1980 census counts in conjunction with estimates of change in the housing inventory between the 1980 census and the 1983 survey. These estimates of change were based on estimates of new construction permit authorizations and post-census demolition permits.

The sample estimates of total housing units after the permit new construction ratio estimation (i.e., the existing sample estimate) were compared to the corresponding independent estimates for the central city, balance, and total SMSA for each of the 13 SMSA's and the estimate which showed the most likely level of net growth since the 1980 census in both the central

city and balance as well as the total SMSA were used in this ratio estimation. As a result of this analysis, these independent estimates were used in the Baltimore, MD; Denver, CO; Hartford, CT; Louisville, KY-IN; Miami, FL; New York, NY; Sacramento, CA; St. Louis, MO-IL; and Seattle-Everett, WA, SMSA's.

The Chicago, IL and Portland, OR-WA, SMSA's used a combination of the independent estimate and sample estimate. The independent estimate was used for the total SMSA. For the sectors, the independent estimate of the total SMSA was proportioned between the central city and balance according to the central city/balance distribution of total housing units given by the sample estimates.

For the Honolulu, HI and Houston, TX, SMSA's, the independent estimate was used for the total SMSA and the estimate for the sectors was based upon counts from the 1970 and the 1980 censuses, and the independent estimate from 1983.

1979-1983 lost housing units—The 1979-1983 lost housing units (housing units removed from the inventory) estimates employed the two-stage ratio estimation procedure used to produce the AHS-SMSA estimates of the 1979 housing inventory for the Honolulu, HI and Portland, OR-WA, SMSA's and the corresponding three-stage ratio estimation procedure for the Chicago, IL; Baltimore, MD; Denver, CO; Hartford, CT; Houston, TX; Miami, FL; and Seattle-Everett, WA, SMSA's as was described in the Current Housing Report, Series H-170, *Housing Characteristics for Selected Metropolitan Areas.* Since the 1979-1983 lost housing units existed, by definition, in the 1979 housing inventory, there was a 1979 housing inventory weight associated with each 1979-1983 lost unit. This weight was used to tabulate the estimates of the characteristics of the 1979-1983 lost housing units.

1979 estimation procedure—This report presents data on the housing characteristics of the 1979 housing inventory from the 1979 Annual Housing Survey SMSA sample. The AHS-SMSA estimation procedure employed a three-stage ratio estimation process for the Chicago, IL; Baltimore, MD; Denver, CO; Hartford, CT; Houston, TX; Miami, FL; and Seattle-Everett, WA, SMSA's; and a two-stage ratio estimation process for the Honolulu, HI and Portland, OR-WA, SMSA's. A detailed description of this ratio estimation procedure can be found in the AHS Series H-170 reports for 1979.

Ratio estimation procedure of the 1970 Census of Population and Housing—This report presents data on the housing characteristics of the 1970 housing inventory from the 1970 Census of Population and Housing. The statistics based on 1970 census sample data employed a ratio estimation procedure which was applied separately for each of the three census samples. A detailed description of this ratio estimation procedure can be found in the 1970 Census of Housing report, Volume I, *Housing Characteristics for States, Cities, and Counties,* Part 1.

RELIABILITY OF THE ESTIMATES

There are two types of possible errors associated with estimates based on data from sample surveys—sampling and nonsampling errors. The following is a description of the sampling and nonsampling errors associated with the AHS-SMSA sample and of the nonsampling errors associated with the 1970 census estimates. A description of the sampling errors associated with the sample estimates from the 1970 census can be found in the 1970 Census of Housing report, Volume I, *Housing Characteristics for States, Cities, and Counties,* Part 1.

Nonsampling errors—In general, nonsampling errors can be attributed to many sources: Inability to obtain information about all cases, definitional difficulties; differences in the interpretation of questions; inability or unwillingness of respondents to provide correct information; mistakes in recording or coding the data; other errors of collection, response, processing, coverage; and estimation for missing data. Nonsampling errors are not unique to sample surveys since they can, and do, occur in complete censuses as well.

Obtaining a measurement of the total nonsampling error associated with the estimates from a survey is very difficult, considering the number of possible sources of error. However, an attempt was made to measure some of the nonsampling errors associated with the estimates for the 1970 Census of Population and Housing and the 1979 AHS-SMSA sample.

1970 census—A number of studies were conducted to measure two types of general errors associated with 1970 census estimates—"coverage" and "content" errors. The "coverage" errors determined how completely housing units were counted in the census and the extent to which occupancy status was erroneously reported. The "content" errors measured the accuracy of the data collected for enumerated housing units. These errors were measured by reinterviews, record checks, and other surveys.

The detailed results of these studies, as well as the methodology employed, are presented in the 1970 Census of Population and Housing Evaluation and Research Program Reports, Series PHC(E)-5, *The Coverage of Housing in the 1970 Census,* and PHC(E)-10, *Accuracy of Data for Selected Housing Characteristics as Measured by Reinterviews.*

AHS-SMSA—A content reinterview program was not done for the 1979, 1980, and 1983 AHS-SMSA samples. However, a study was conducted for the 1975 AHS-SMSA sample and the 1976 AHS-SMSA sample. The results of which are presented in the Census Bureau memoranda, "Reinterview Results for the Annual Housing Survey—SMSA Sample: 1975" and "Reinterview Results for the Annual Housing Survey—SMSA Sample: 1976."

Coverage errors—In errors of coverage and estimation for missing data, the AHS new construction sample had deficiencies in the representation of conventional (non-mobile home or trailer) new construction. Due to time constraints, only those building permits issued more than 5 months before the survey ended were eligible to be sampled to represent conventional new construction in permit-issuing areas for this SMSA. However, these permits issued during the last 5 months of the survey do not necessarily represent missed housing units. Due to the relatively short time span involved, it is possible that construction

of these housing units was not completed at the time the survey was conducted, in which case, they would not have been eligible for interview. In addition to these deficiencies, new construction in special places that do not require building permits, such as military bases, are also not adequately presented.

The Coverage Improvement Program also had certain deficiencies. It appears that the listing procedure used to correct deficiencies 3-6 (see the coverage improvement section of this appendix) was not very effective in finding nonresidential conversions. Such conversions were primarily in business districts, whereas the listing procedure started from a residential unit.

Deficiencies also exist in ED's where area sampling methods are used. It had been assumed that all housing units located inside these ED's would be represented in the sample. However, it has been estimated that the 1976 AHS sample missed as much as 2 percent of all housing units in these ED's because they were not listed during the canvassing. It should be noted that since these ED's were recanvassed for the 1979 and 1983 surveys, the number of missed housing units may be considerably less for 1983.

The final ratio estimation procedure corrects for these deficiencies as far as the count of total housing is concerned; i.e., it adjusts to the best available estimate. However, biases of subtotals would still remain.

Rounding errors—For errors associated with processing, rounding of estimates introduces another source of error in the data, the severity of which depends on the statistics being measured. The effect of rounding is significant relative to the sampling error only for small percentages or small medians, when these figures are derived from relatively large bases (e.g., median number of persons per household). This means that confidence intervals formed from the standard errors given may be distorted, and this should be taken into account when considering the results of the survey.

Sampling errors for the AHS-SMSA sample—The particular sample used for this survey is one of a large number of possible samples of the same size that could have been selected using the same sample design. Even if the same questionnaires, instructions, and interviewers were used, estimates from each of the different samples would differ from each other. The sampling error of a survey estimate provides a measure of the variation among the estimates from all possible samples and thus, is a measure of the precision with which an estimate from a sample approximates the average result of all possible samples.

One common measure of the sampling error is the standard error. As calculated for this report, the standard error reflects the variation in the estimates due to sampling and nonsampling errors, but it does not measure as such, any systematic biases in the data. Therefore, the accuracy of the estimates depends on the standard error, biases, and any additional nonsampling errors not measured by the standard error. The sample estimate and its estimated standard error enable one to construct interval estimates in which the interval includes the average result of all possible samples with a known probability. For example, if all possible samples were selected, each of these surveyed under essentially the same general conditions, and an estimate and its estimated standard error were calculated from each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average result of all possible samples.
2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.
3. Approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average result of all possible samples.

The average result of all possible samples either is or is not contained in any particular computed interval. However, for a particular sample, one can say with specified confidence that the average result of all possible samples is included in the constructed interval.

The figures presented in the tables that follow (page App-47) are approximations to the standard errors of various estimates shown in this report for this SMSA. In order to derive standard errors that would be applicable to a wide variety of items and also could be prepared at a moderate cost, a number of approximations were required. As a result, the tables of standard errors provide an indication of the order of magnitude of the standard errors rather than precise standard errors for any specific item. Standard errors applicable to estimates of characteristics of the 1979 housing inventory can be found in the AHS Series H-170 reports for 1979.

Tables I, II, and III (pages App-47 to App-49) presents the standard errors applicable to estimates of characteristics of the 1983 housing inventory as well as estimates of characteristics of the 1979-1983 lost housing units (housing units removed from the inventory). Linear interpolation should be used to determine the standard errors for estimates not specifically shown in this table. The standard errors on the AHS estimates of the population in housing units shown in tables A-1, B-1, and C-1 of part A of this report are 110,511 for the total SMSA, 31,384 for the central cities of the SMSA, and 105,961 for the balance of the SMSA.

The reliability of an estimated percentage, computed by using the sample data for both numerator and denominator, depends upon both the size of the percentage and the size of the total upon which the percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more.

Table IV (page App-49) presents the standard errors of estimated percentages for the 1983 housing inventory as well as estimated percentages of the 1979-1983 lost housing units (housing units removed from the inventory). Two-way interpolation should be used to determine standard errors for estimated percentages not specifically shown in table IV.

Included in tables I through IV are estimates of standard errors for estimates of zero and zero percent. These estimates of standard errors are considered as overestimates of the true standard errors and should be used primarily for construction of confidence intervals for characteristics when estimates of zero are obtained.

For ratios, 100 (x/y), where x is not a subclass of y, table IV underestimates the standard error of the ratio when there is little or no correlation between x and y. For this type of ratio, a better approximation of the standard error may be obtained by letting the standard error of the ratio be approximately equal to:

$$(100)\left(\frac{x}{y}\right)\sqrt{\left(\frac{\sigma_x}{x}\right)^2+\left(\frac{\sigma_y}{y}\right)^2}$$

where: x = the numerator of the ratio
y = the denominator of the ratio
σ_x = the standard error of the numerator
σ_y = the standard error of the denominator

Illustration of the use of the standard error tables—Table A-1 of part A of this report shows that in 1983 there were 709,900 owner-occupied housing units in this SMSA. Interpolation using table I of this appendix shows that the standard error of an estimate of this size is approximately 10,350. The following interpolation procedure was used.

The information presented in the following table was extracted from table I. The entry for "x" is the one sought.

Size of estimate	Standard error
700,000	10,370
709,900	x
768,500	10,260

The entry of "x" is determined as follows by vertically interpolating between 10,370 and 10,260.

$$709{,}900-700{,}000 = 9{,}900$$
$$768{,}500-700{,}000 = 68{,}500$$

$$10{,}370+\frac{9{,}900}{68{,}500}\ (10{,}260-10{,}370) = 10{,}350$$

Consequently, the 68-percent confidence interval, as shown by these data, is from 699,550 to 720,250 housing units. Therefore, a conclusion that the average estimate, derived from all possible samples, of 1983 owner-occupied housing units lies within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, we could conclude that the average estimate derived from all possible samples, lies within the interval from 693,340 to 726,460 housing units with 90 percent confidence; and that the average estimate lies within the interval from 689,200 to 730,600 housing units with 95 percent confidence.

Table A-1 of part A also shows that of the 709,900 owner-occupied housing units, 152,800, or 21.5 percent, had two bedrooms. Interpolation using table IV of this appendix (i.e., interpolation on both the base and percent) shows that the standard error of the 21.5 percent is approximately 0.8 percentage points. The following interpolation procedure was used.

The information presented in the following table was extracted from table IV, with factor applied (see table IV footnotes). The entry for "p" is the one sought.

Base of percentage	Estimated percentage		
	10 or 90	21.5	25 or 75
700,000	0.6	a	0.9
709,900		p	
800,000	0.6	b	0.9

1. The entry for cell "a" is determined by horizontal interpolation between 0.6 and 0.9.

$$21.5-10.0 = 11.5$$
$$25.0-10.0 = 15.0$$

$$0.6+\frac{11.5}{15.0}\ (0.9-0.6) = 0.8$$

2. The entry for cell "b" is determined by horizontal interpolation between 0.6 and 0.9.

$$21.5-10.0 = 11.5$$
$$25.0-10.0 = 15.0$$

$$0.6+\frac{11.5}{15.0}\ (0.9-0.6) = 0.8$$

3. The entry for "p" is then determined by vertical interpolation between 0.8 and 0.8 This interpolation is not necessary as "a" and "b" have the same value. The formula, however, would appear as follows.

$$709{,}900-700{,}000 = 9{,}900$$
$$800{,}000-700{,}000 = 100{,}000$$

$$0.8+\frac{9{,}900}{100{,}000}\ (0.8-0.8) = 0.8$$

Consequently, the 68-percent confidence interval, as shown by these data, is from 20.7 to 22.3 percent; the 90-percent confidence interval is from 20.2 to 22.8 percent; and the 95-percent confidence interval is from 19.9 to 23.1 percent.

Differences—The standard errors shown are not directly applicable to differences between two sample estimates. The standard error of a difference between estimates is approximately equal to the square root of the sum of the squares of the standard error of each estimate considered separately. This formula is quite accurate for the difference between estimates of the same characteristics in two different SMSA's or the difference between separate and uncorrelated characteristics in the same

SMSA. If there is a high positive correlation between the two characteristics, the formula will overestimate the true standard error; but if there is a high negative correlation, the formula will underestimate the true standard error. Due to the overlap of the 1979 and 1983 AHS-SMSA samples a positive correlation should be expected when making comparisons between 1979 and 1983 characteristics.

Illustration of the computation of the standard error of a difference— Table A-1 of part A of this report shows that in 1983 there were 391,500 owner-occupied housing units with three bedrooms in this SMSA. Thus, the apparent difference, as shown by these data, between owner-occupied housing units with two bedrooms and owner-occupied housing units with three bedrooms is 238,700. Table I shows the standard error of 152,800 is approximately 6,620 and the standard error of 391,500 is approximately 9,460. Therefore, the standard error of the estimated difference of 238,700 is about 11,550.

$$11{,}550 = \sqrt{(6{,}620)^2 + (9{,}460)^2}$$

Consequently, the 68-percent confidence interval for the 238,700 difference is from 227,150 to 250,250 housing units. Therefore, a conclusion that the average estimate derived from all possible samples, of this difference, lies within a range computed in this way would be correct for roughly 68 percent of all possible samples. Similarly, the 90-percent confidence interval is from 220,220 to 257,180 housing units, and the 95-percent confidence interval is from 215,600 to 261,800 housing units. Thus, we can conclude with 95 percent confidence that the number of 1983 owner-occupied housing units with three bedrooms is greater than the number of owner-occupied units with two bedrooms since the 95-percent confidence interval does not include zero or negative values.

Medians—For medians presented in certain tables, the sampling error depends on the size of the base and on the distribution upon which the median is based. An approximate method for measuring the reliability of the estimated median is to determine an interval about the estimated median so that there is a stated degree of confidence that the average median from all possible samples lies within the interval. The following procedure may be used to estimate confidence limits of a median based on sample data:

1. From table IV, determine the standard error of a 50-percent characteristic on the base of the median.
2. Add to and subtract from 50 percent, the standard error determined in step 1.
3. Using the distribution of the characteristics, determine the confidence interval corresponding to the two points established in step 2. To find the lower endpoint of the confidence interval, it is necessary to know into which interval of the distribution the lower percentage limit falls. Similarly, to find the upper endpoint of the confidence interval, it is necessary to know into which interval of the distribution the upper percentage limit falls. Note that these two distribution intervals could be different, although this will not happen very often.

For about 68 out of 100 possible samples, the average median from all possible samples would lie between these two values.

A two-standard-error confidence interval may be determined by finding the values corresponding to 50 percent plus and minus twice the standard error determined in step 1. For about 95 out of 100 possible samples, the average median from all possible samples would lie between these two values.

Illustration of the computation of the 95-percent confidence interval of a median— Table A-1 of part A of this report shows the median number of persons for owner-occupied housing units is 2.9. The base of the distribution from which this median was determined is 709,900 housing units.

1. Interpolation using table IV shows that the standard error of 50 percent on a base of 709,900 is approximately 1.1 percentage points.
2. To obtain a 95-percent confidence interval on the estimated median, initially add to and subtract from 50 percent twice the standard error determined in step 1. This yields percentage limits of 47.8 and 52.2
3. From the distribution for "persons" in table A-1 of part A, the interval for owner-occupied housing units with three persons (for purposes of calculating the median, the category of three persons is considered to be from 2.5 to 3.5 persons) contains the 47.8 percent derived in step 2. About 305,700 housing units or 43.1 percent fall below this interval, and 136,200 housing units or 19.2 percent fall within this interval. By linear interpolation, the lower limit of the 95-percent confidence interval is found to be about:

$$2.5 + (3.5-2.5)\,\frac{(47.8-43.1)}{19.2} = 2.7$$

Similarly, the interval for owner-occupied housing units with three persons contains the 52.2 percent derived in step 2. About 305,700 housing units or 43.1 percent fall below this interval, and 136,200 housing units or 19.2 percent fall within this interval. The upper limit of the 95-percent confidence interval is found to be about:

$$2.5 + (3.5-2.5)\,\frac{(52.2-43.1)}{19.2} = 3.0$$

Thus, the 95-percent confidence interval ranges from 2.7 to 3.0 persons.

TABLE I. **Standard Errors for Estimated Number of Owner Housing Units in the 1983 Housing Inventory and for Estimated Number of 1979-1983 Lost Owner Housing Units for the Houston, TX, SMSA, for the Central City of the SMSA and for the Balance (Not in Central City) of the SMSA**

(68 chances out of 100)

Size of estimate	Standard error[1]			Size of estimate	Standard error[1]		
	SMSA	In central city	Not in central city		SMSA	In central city	Not in central city

150,000	7,600	6,190	7,990	1,329,300	—	—	—

Note: Some examples that pertain to both owner and renter housing units are: total housing units; all occupied housing units; all year-round housing units, mobile home or trailer; all housing units occupied by recent movers; and total vacant housing units.

[1]For estimates pertaining to new construction, the standard errors shown in the table should be multiplied by a factor of 1.6 for the total SMSA, 1.2 for the central city, and 1.7 for the balance (not in central city) of the SMSA. Standard errors of estimates pertaining to total housing units for the central city, balance, and total SMSA are assumed to be equal to zero.

TABLE IV. **Standard Errors for Estimated Percentages of Housing Units in the 1983 Housing Inventory and for Estimated Percentages of 1979-1983 Lost Housing Units for the Houston, TX, SMSA, for the Central City of the SMSA and for the Balance (Not in Central City) of the SMSA**

[1]Standard errors are presented to the nearest one-tenth of one percentage point except when the standard error is less than fifteen-hundredths of one percentage point; in those cases, the standard error is shown to the nearest one-hundredth of one percentage point. For estimates pertaining to new construction, the standard errors shown in the table should be multiplied by a factor of 1.8 for the total SMSA, 1.2 for the central city, and 2.2 for the balance (not in central city)of the SMSA.

The following factors should be applied to estimates that do not pertain strictly to new construction. The factors are given separately for renter housing units, owner housing units, and for estimates pertaining to both owners and renters. Some examples of the estimates to which these factors should be applied are given by the following: all occupied housing units; all renter-occupied housing units; all housing units built prior to 1970; owner-occupied housing units with complete kitchen facilities; and all housing units with flush toilets. For percentages pertaining to renters, multiply the above standard errors by a factor of 1.1 for the total SMSA, 1.0 for the central city, and 1.2 for the balance (not in central city) of the SMSA. For percentages pertaining to owners, multiply the above standard errors by a factor of 1.0 for the total SMSA and for the central city and 1.2 for the balance (not in central city). For percentages pertaining to both owners and renters apply a factor of 1.2 for the total SMSA, 1.0 for the central city, and 1.3 for the balance (not in central city) of the SMSA.

Table Finding Guide, Part A

Subjects, by Type of Area and Table Number

(This guide lists all subjects covered in this part but does not indicate all cross-classifications; for example, by owner- and renter-occupied units (tenure). In the tables, the prefix letter "A" indicates data for the total SMSA, prefix letter "B" indicates data for inside central city, and prefix letter "C" indicates data for not inside central city)

Table Finding Guide, Part D

Subjects, by Type of Area and Table Number

(This guide lists all subjects covered in this part but does not indicate all cross-classifications; for example, by owner- and renter-occupied units (tenure). In contrast to parts A, B, C, and F, data in part D appear on the same table for the total SMSA, in central city, and not in central city)

Subject	All occupied housing units	Units occupied by households with Black householder	Units occupied by households with householder of Spanish origin
CHARACTERISTICS OF ALL OCCUPIED AND RECENT MOVER UNITS			
Occupancy, Utilization and Structural Characteristics:			
Occupied housing units			
Tenure			
Previous occupancy			
Main reason for move from previous unit			
Main reason for move into present residence or neighborhood			
Persons			
Rooms			
Persons per room			
Bedrooms			
Basement			
Year structure built			
Units in structure			
Parking facilities			
Plumbing Characteristics, Equipment, and Services:			
Plumbing facilities	1	11	21
Complete bathrooms			
Sewage disposal			
Air conditioning			
Garbage collection service			
Financial Characteristics:			
Income			
Value			
Homeownership			
Monthly mortgage payment			
Mortgage insurance			
Gross rent			
Public, private, or subsidized housing			
Household Characteristics:			
Household composition by age of householder			
Own children under 18 years old by age group			
CROSS-TABULATIONS OF:			
Purchase price, source of down payment, and amount of mortgage by income for recent movers	2	12	22
Present Unit Characteristics by Previous Unit Characteristics for Recent Movers:			
Tenure and location	3	13	23
Units in structure	4	14	24
Age of householder and presence of persons 65 years old and over	5	15	25
Bedrooms	6	16	26
Plumbing facilities	7	17	27
Persons per room	8	18	28
Value	9	19	29
Gross rent	10	20	30

Table Finding Guide, Part F

Cross-Classifications of Subjects, by Type of Area and Table Number

(This guide lists all subjects covered in this part but does not indicate all cross-classifications, for example, by owner- and renter-occupied units (tenure). In the tables, the prefix letter "A" indicates data for the total SMSA, prefix letter "B" indicates data for inside central city and prefix letter "C" indicates data for not inside central city)

Subject	Income			Value			Gross rent		
	All occupied housing units	Units occupied by households with–		All occupied housing units	Units occupied by households with–		All occupied housing units	Units occupied by households with–	
		Black householder	Householder of Spanish origin		Black householder	Householder of Spanish origin		Black householder	Householder of Spanish origin
