Replacement Case, UVEX XC	1 each	S99-S520-MIL	4240-01-516-3444
Prescription Lens Carrier, UVEX XC	1 each	S99-S3350-MIL	6540-01-516-5342

The UVEX XC protective spectacle consists of a plastic frame (one size) with interchangeable polycarbonate lenses. The frame features ratcheting adjustment and telescoping arms for improved fit and comfort. The lens provides extended coverage over the eye socket area. Additionally, a small ventilation space has been engineered between the frame and the lens that vents the eye socket area to help reduce moisture. The frame is identical to that used in the UVEX Genesis. The frame and lens assembly weighs 1.3 ounces. All lenses have been treated with a hard-coat on the exterior surface to reduce scratching and an anti-fog coating on the interior surface to reduce fogging. The UVEX XC provides ballistic-fragmentation protection, and meets all ANSI Z87.1-2003 optical and safety requirements. The lens material blocks 99.9% of all UVA and UVB light. An optional prescription lens carrier is available for those who require corrective lenses.

WARNING: Use of prescription lens configurations not listed on the Authorized Protective Eyewear List (APEL) for a specific APEL spectacle or goggle may result in serious injury. We strongly recommend that Soldiers use Army optometry clinics to obtain prescription (Rx) correction for APEL products approved for this purpose. Rx correction is available through garrison and deployed optometry clinics at no cost to the Soldier. All APEL approved Rx configurations have been subjected to ballistic fragmentation testing for safety. Offers by vendors for unapproved Rx products via vendor website and/or through conferences should be avoided, as these items may not be safe or operationally suitable for use in a field environment.
