2010 DoD
BIOMETRICS
COLLABORA
TION FORUM

Architecture Objectives and Metrics

- Mr. Giovanni Demonte, Architecture Branch Chief

- Synopsis:

Enterprise Architecture (EA), or a holistic blueprint, is essential to efficiently managing and leveraging biometrics information technology (IT) to optimize effectiveness. While technical in nature, EA is ultimately intended to support and inform decisions within a variety of business functions. With potential for such cross-cutting impact, it is critical to discuss and agree upon the EA's objectives with the stakeholders and future users of the architecture.

Session Objectives

Challenges:

- Stakeholder consensus and understanding of requirements and goals.

Desired Output:

- Identify and validate biometrics enterprise architecture objectives.
- Identify and validate biometrics enterprise architecture metrics and associated best practices.

Findings and Insights

- Summarize key discussion points from the session.

Next Steps and Timeline

- Highlight any progress (or breakthroughs) made during session.
- Outline the “way ahead” with a timeline for completion.
