Washington, DC*

## An Educator's Guide to the Music of Aaron Copland

---

---

### AN OUTDOOR OVERTURE

Aaron Copland

#### NOTE TO CONDUCTORS AND INSTRUMENTALISTS

- An extensive list of errata in both the printed score and individual parts is contained in *Teaching Music Through Performance in Band, Vol. 2*, Richard Miles, compiler and editor (Chicago: GIA Publications, Inc., 1998), pp. 410–425. Educators should ensure that all parts are corrected in order to conserve rehearsal time.

#### PICCOLO

- **Measures 175–176:** Drop an octave on held high F# or switch to special fingering for F# (add middle finger in right hand and lift pinky) to facilitate diminuendo

#### CLARINET

##### 1<sup>st</sup> Clarinet

- **Measures 32–40:** Use one player on the Solo Clarinet part and one on the 1<sup>st</sup> Clarinet part in octaves
- **Measure 102:** Assistant Solo Clarinet should play cues with the Solo Clarinet
- **Measures 192–195:** Beginning on beat 2 of measure 192, only one 1<sup>st</sup> Clarinet should play where written; all other players should play down *8va* until measure 196

##### 3<sup>rd</sup> Clarinet

- **Measures 74–75:** Should be slurred

## TRUMPET

- **Part Assignments:** Transcribed for 4 Cornets and 2 Trumpets; must have 2 players on 1<sup>st</sup> Cornet because of solos in measures 99–102
- **Measures 16–35:** Pitch and flow of slurs in opening solo are very difficult; this can be made somewhat easier if played on C Trumpet

## TROMBONE

- **Measures 63–70:** Watch rhythmic integrity with Tubas, Horns, and Saxophones
- **Measures 77–88:** Melodic line should be only *forte*
- **Measures 216–228:** Play only at *fortissimo*; do not overblow

## EUPHONIUM

- **Measure 6:** Play Eb down an octave to match melodic line
- **Measures 14–15:** Blending with Tubas is crucial; combined effect should be a heavy, driving force
- **Measures 22–26:** Staccato notes should be played as *pizzicato*
- **Measures 60–88:** Listening is very important at this point; typically, bass lines are on the downbeat; however, this piece is opposite. This particular line is infamous for potential problems including rushing, dragging, phasing. The key is to listen to both the feel of the down- and up-beat.
- **Measure 261, beat 3:** This triplet is usually dictated; to ensure that every note sounds, *crescendo* to the low F

## TUBA

- Split the Tuba section so the majority of players are on lower *divisi* part
- **Measures 60–69:** Play only *forte* at most
- **Measures 86–88:** Play upper part more *marcato*
- **Measures 104–234:** Play *staccato*
- **Measures 228–250:** Begin at lesser dynamic, *mezzo forte* or less, and *poco a poco crescendo* to *fortissimo*
- **Measures 253–256:** *Molto marcato* on dotted eighth/sixteenth rhythms
