SUBJECT: Major Automated Information System (MAIS) Oversight List

This memorandum supersedes the December 26, 2007, Assistant Secretary of Defense for Networks and Information Integration memorandum, "Designation of Major Automated Information System Programs and Information Technology Services Acquisitions Oversight List."

The definitions of a MAIS program and Other Major Information Technology Investment Program have been codified in section 2445a of title 10, U.S.C. The updated MAIS Oversight List (Attachment 1) includes baselined and un-baselined programs that meet these definitions and must report under chapter 144A of title 10, U.S.C. The list is sorted by the lead DoD acquisition component and indicates each program's Acquisition Category, Milestone Decision Authority, Overarching Integrated Product Team, and Joint Capability Area assignments.

Attachment 2 identifies each MAIS program that has been removed from the previous list and the rationale for its removal. For programs that entered into sustainment, the attachment identifies the lead Department of Defense Component responsible for the program's continued oversight during the sustainment phase of its life cycle. The programs in sustainment will be considered as inactive MAISs during the remainder of their life cycles.

My point of contact is Mr. William May at 571-372-4413 or william.may@osd.mil.
