GENERAL DYNAMICS
Information Technology

General Dynamics Information Technology provides a comprehensive range of professional and technical services to meet critical operational, planning, staffing, management and technology needs for the Missile Defense Agency (MDA) and other federal military, civilian government and commercial sectors. Please check our website at www.gdit.com to understand what we do, the customers we serve, and where your company's core competencies may best fit. In addition, our **Partners** page also provides useful links and information you can download on doing business with General Dynamics Information Technology.

Missile Defense Agency

We are a lead services provider and integrator for the Aegis Ballistic Missile Defense Program Directorate (MDA/AB). We provide advisory and assistance services for the MDA CIO in the Information Management and Technical Operations Directorate (MDA/DXC). Additionally, we provide scientific, engineering, technical and operational support services to a number of MDA organizations including:

- Systems Engineering & Integration Directorate (MDA/DEE)
- Missile Defense National Team Systems Engineering & Integration (MDNTS)
- Command and Control, Battle Management and Communication (C2BMC) Program Directorate (MDA/BC)
- Missile Defense National Team C2BMC (MDNTB)
- Ground-Based Midcourse Defense Program Office (MDA/GM)
- Warfighter Interface Directorate (MDA/DW)
- Infrastructure and Environnent Directorate (MDA/DOI)

To be considered for teaming opportunities, please check our Partners site and register at: http://www.gdit.com/partners/partners.aspx OR www.GDIT.com (Partners Tab)
