Introduction

The *National Criminal Justice Thesaurus* contains descriptors or terms used to index literature in the National Institute of Justice/National Criminal Justice Reference Service (NCJRS) Abstracts Database. This database is maintained by NCJRS, the National Institute of Justice's international clearinghouse of criminal justice information.

The National Institute of Justice, the research and development agency of the U.S. Department of Justice, created NCJRS in 1972 to communicate information and to distribute publications and materials resulting from Institute-sponsored research, development, and evaluation studies. The NCJRS document collection consists of more than 146,000 books, articles, reports, and nonprint media dealing with the broad spectrum of criminal justice issues. The Abstracts Database contains abstracts of all the documents in the collection; it can be searched directly on DIALOG, on CD-ROM, via the NCJRS Web site, or by calling NCJRS.

In addition to providing access to the NCJRS Abstracts Database, the clearinghouse offers a variety of information services, including (1) information specialists to answer questions on criminal justice issues; (2) distribution of more than 3,000 publications of the National Institute of Justice, other Office of Justice Programs agencies, and the Office of National Drug Control Policy; (3) free subscriptions to the *National Institute of Justice Journal* and *NCJRS Catalog*; and (4) a library and public reading room in Rockville, Maryland, and document loan capabilities to libraries in the United States. For more information on NCJRS, call 800-851-3420, e-mail askncjrs@ncjrs.org, or visit the NCJRS Web site at <http://www.ncjrs.org>. From outside the United States, call 301-519-5500 to be connected with an information specialist.

Term selection in the *National Criminal Justice Thesaurus* is based on the vocabulary used in the documents entering the NCJRS database, the frequency of term usage in the literature, and the language of the user community. For example, the geographic section of the *National Criminal Justice Thesaurus* is not a comprehensive thesaurus for the world, but only contains terms for documents in the database. The five-digit number assigned to each term is a descriptor code that may be used when searching on that term.

Substantive Descriptors and Related Entries

The order in which notations appear under a descriptor, when appropriate, is as follows:

SN	SCOPE NOTE
UF	USED FOR
BT	BROADER TERM
NT	NARROWER TERM
RT	RELATED TERM

A *SCOPE NOTE (SN)* may define or limit the specific use of a term in the NCJRS system. A typical *SCOPE NOTE* is included under the term "Miranda rights," which is found in the example under *RELATED TERM* below. It may be a true definition, may place a positive or negative limitation on usage, or may combine a definition and some limitations.

Two types of terms are listed: descriptors and synonyms or near synonyms. Descriptors are authoritative terms that are acceptable for indexing and searching. A *USE* entry follows synonyms or near synonyms of descriptors. The entry directs the user to the preferred valid descriptor for communicating with the system. Synonymous entries appear solely to provide as many points of entry to the *Thesaurus* as possible. The importance of the *USE* entry extends beyond synonymy. The entry can represent the relationship to a descriptor of a near synonym with general conceptual similarity. A *USE* entry provides a valid descriptor term synonymous with or approximating the concept of the term referenced. For example:

Post mortem examination
USE Autopsy

The *USED FOR (UF)* entry is the reverse of the *USE* entry. This entry shows the user that the descriptor includes the concept represented by the *USE* entry. For example:

04003 Autopsy
UF Post mortem examination

A *BROADER TERM (BT)* entry is also a hierarchical notation and is the reciprocal of the *NT* notations. A *BT* entry indicates that the descriptor is in the same class, but that it is on a higher level in the hierarchy. For example:

01450 Peyote
04632 BT: Controlled drugs
01777 BT: Hallucinogens

The *NARROWER TERM (NT)* denotes a hierarchical relationship between the main descriptor and a descriptor that belongs in the same class, but is on a lower level; that is, the narrower term is more specific. For example:

01777 Hallucinogens
00616 NT: LSD (acid)
10450 NT: MDMA (designer drug)
05131 NT: PCP (phencyclidine hydrochloride)
01450 NT: Peyote

The *RELATED TERM (RT)* entries perform two functions, only one of which is concerned with the scope of the main entry. A term listed as *RT* may clarify scope—that is, provide further definition of the main descriptor entry. The alternate function is to alert the user to other terms and thus provide additional points of reference. For example, to illustrate the two-sided *RT* relationship:

04183 Arrest and apprehension
04985 RT: Arrest warrants
02462 Citizen arrests
05069 Crimes in progress
08629 Handcuffs
09333 Juvenile arrest trends
09379 Juvenile police intake
00568 Juvenile processing
04816 Lawful use of force
00624 Manhunt
05208 Miranda rights
08303 Prisoner transport
08578 Probable cause
08590 Stop and frisk

05208 Miranda rights
SN: (Predetention rights of the accused as required by the U.S. Supreme Court ruling)
04183 RT: Arrest and apprehension
08945 Arrest procedures
04197 Constitutional rights and civil liberties
09712 Police arrest training
09544 Police due process training
02849 Rights of the accused

Every hierarchical and collateral entry has a reciprocal entry elsewhere in the *Thesaurus*.

ARRAY TERMS are very broad terms (e.g., "Equipment/," "Facilities/," and "Programs/") that are considered to be too general to be of much value in indexing or retrieval. Such terms have been appended with a slash (/); whenever possible, a more specific term should be used in lieu of this term. The following standard *SCOPE NOTE* is used in conjunction with all array terms: "Use of a more specific term is recommended; consult the terms listed below." The listing of *RT* references following each array term refers the reader to all terms at the next lower level of specificity (but not the still lower levels of specificity).

How to Use the Thesaurus

Alphabetization

Terms are alphabetized on a letter-by-letter basis. All spaces, hyphens, and other signs which may appear within the term are ignored, except the left parenthesis "(" that precedes "a." The example below demonstrates this exception.

UF Hypnosis (questioning under)
 Hypnosis of victim or witness
 Hypnotism in investigation

Selecting the most specific descriptor

To avoid retrieving irrelevant documents and to ensure full retrieval of target information, you should always select the most specific thesaurus descriptor of the concept for which you are searching. Because documents are indexed to the narrowest applicable term within a hierarchy, a search on a broader term only will not retrieve the documents indexed to the narrower terms.

Search examples

Suppose you want to find documents about juvenile delinquents in the NCJRS Abstracts Database. The *Thesaurus* can help pinpoint the appropriate term or terms for your search. You may begin by checking the rather general term *Delinquents*, in which case you would find the following entry:

Delinquents (juvenile)
USE Juvenile delinquents

This citation indicates that the term "Juvenile delinquents" is the preferred descriptor for indexing and retrieval. Turning to the preferred term, you will find the following list of cross-references:

09504 **Juvenile delinquents**
 UF: Delinquents (juvenile)
03990 BT: Juveniles
09405 NT: Black juvenile delinquents
02409 Emotionally disturbed delinquents
05119 Female juvenile delinquents
09416 Handicapped delinquents
05425 Male juvenile delinquents
09322 Mentally retarded delinquents
09323 Middle class juvenile delinquents
05261 RT: Alternative schools
01308 Auto theft
03822 Confrontation tactics
05049 Crime in schools
04698 Drug related crimes
05095 Juvenile court waiver
09505 Juvenile offenders
04103 Juvenile status offenders
08442 Juveniles in adult facilities
11373 Moral panic

05245	Parent education
05241	School delinquency programs
08311	Ungovernable juveniles
03001	Youthful offenders

Skipping the terms designated *UF* (i.e., nonpreferred synonym of "Juvenile delinquents") and *BT* (indicating that "Juvenile delinquents" is part of the more comprehensive hierarchy of "Juveniles"), you will come to the *NT* references. "Emotionally disturbed delinquents," "Female juvenile delinquents," "Handicapped delinquents," etc.—all are valid search terms that you may prefer to use if they are more accurate expressions of the concept for which you are searching. As mentioned above, a search on the term "Juvenile delinquents" alone will not retrieve documents indexed under "Emotionally disturbed delinquents" or under the other *NTs*. If any of the narrower terms are relevant to your search, they should definitely be included in your search strategy. You should also note the *RT* references, which provide new directions for your search by adding related terms.

Focusing a search

If the first term located is followed by a slash, it is an *ARRAY TERM*. Though *ARRAY TERMS* can be used for searching, they are often too broad to be useful for indexing or retrieval. The following entry is typical of *ARRAY TERMS*:

01391	Property crimes/
	SN: (Use of a more specific term is recommended; consult the terms listed below)
	UF: Crimes against property
08679	RT: Agricultural crime
04914	Antitrust offenses
10067	Archeological preservation laws
02497	Arson
00110	Burglary
02443	Counterfeiting
04384	Crime costs
04941	Crimes against businesses
08617	Crimes of opportunity
01405	Dealing in stolen goods
01726	Extortion
03629	Forgery
01768	Fraud
03627	Hijacking
00469	Hit and run
04651	Industrial espionage
03850	Loan sharking
04600	Offenses/
02586	Piracy
05362	Property crime statistics
04255	Property identification
03640	Theft offenses
04757	Vandalism
08965	Watch dogs
01355	White collar crimes
08600	Zoo crimes

Scan the *RT* terms listed under the *ARRAY TERM* and select those related to your interest as new points from which to search. Do not make a final choice until you have determined whether there are still narrower terms that would be better choices. In this particular example, if you selected the *RT* "Crime costs" as a new starting point, you would find that "Crime costs" has two narrower terms—"Business crime costs" and "Stolen vehicle costs"—either of which may be a more specific expression of the concept you are trying to locate.

Searching cross-cultural terms

To facilitate access to the numerous international documents in the Abstracts Database, the *Thesaurus* contains a number of cross-cultural terms. These include expressions particular to another country that have no direct equivalent in the U.S. system or for which an equivalent cannot be readily identified. For the most part, these idioms are entered as nonpreferred synonyms of their nearest American equivalent. For instance, the French concept "*Sursis avec mise a l'epreuve*" would have the following reference to the preferred U.S. term.

Sursis avec mise a l'epreuve:
USE Probation

In addition, numerous international organizations are included in the organizational file of the *Thesaurus*.

Combining several descriptors

To attain an even greater level of specificity, the technique of combining or "coordinating" more than one descriptor in a search is useful. Though the *Thesaurus* contains no specific term to express the concept of "police attitudes toward abuse of authority," the combination of the existing descriptors "Abuse of authority" and "Police attitudes" will yield only those documents that hold relevant information on both descriptors. In coordinating, descriptors from all three files of the *Thesaurus* (substantive, organizational, and geographic) may be combined. For instance the geographic code or descriptor for "France" may be combined with "Preventive detention" to obtain information on preventive detention in France.

Statistics

The following statistics describe this edition of the *National Criminal Justice Thesaurus*:

Substantive Descriptors

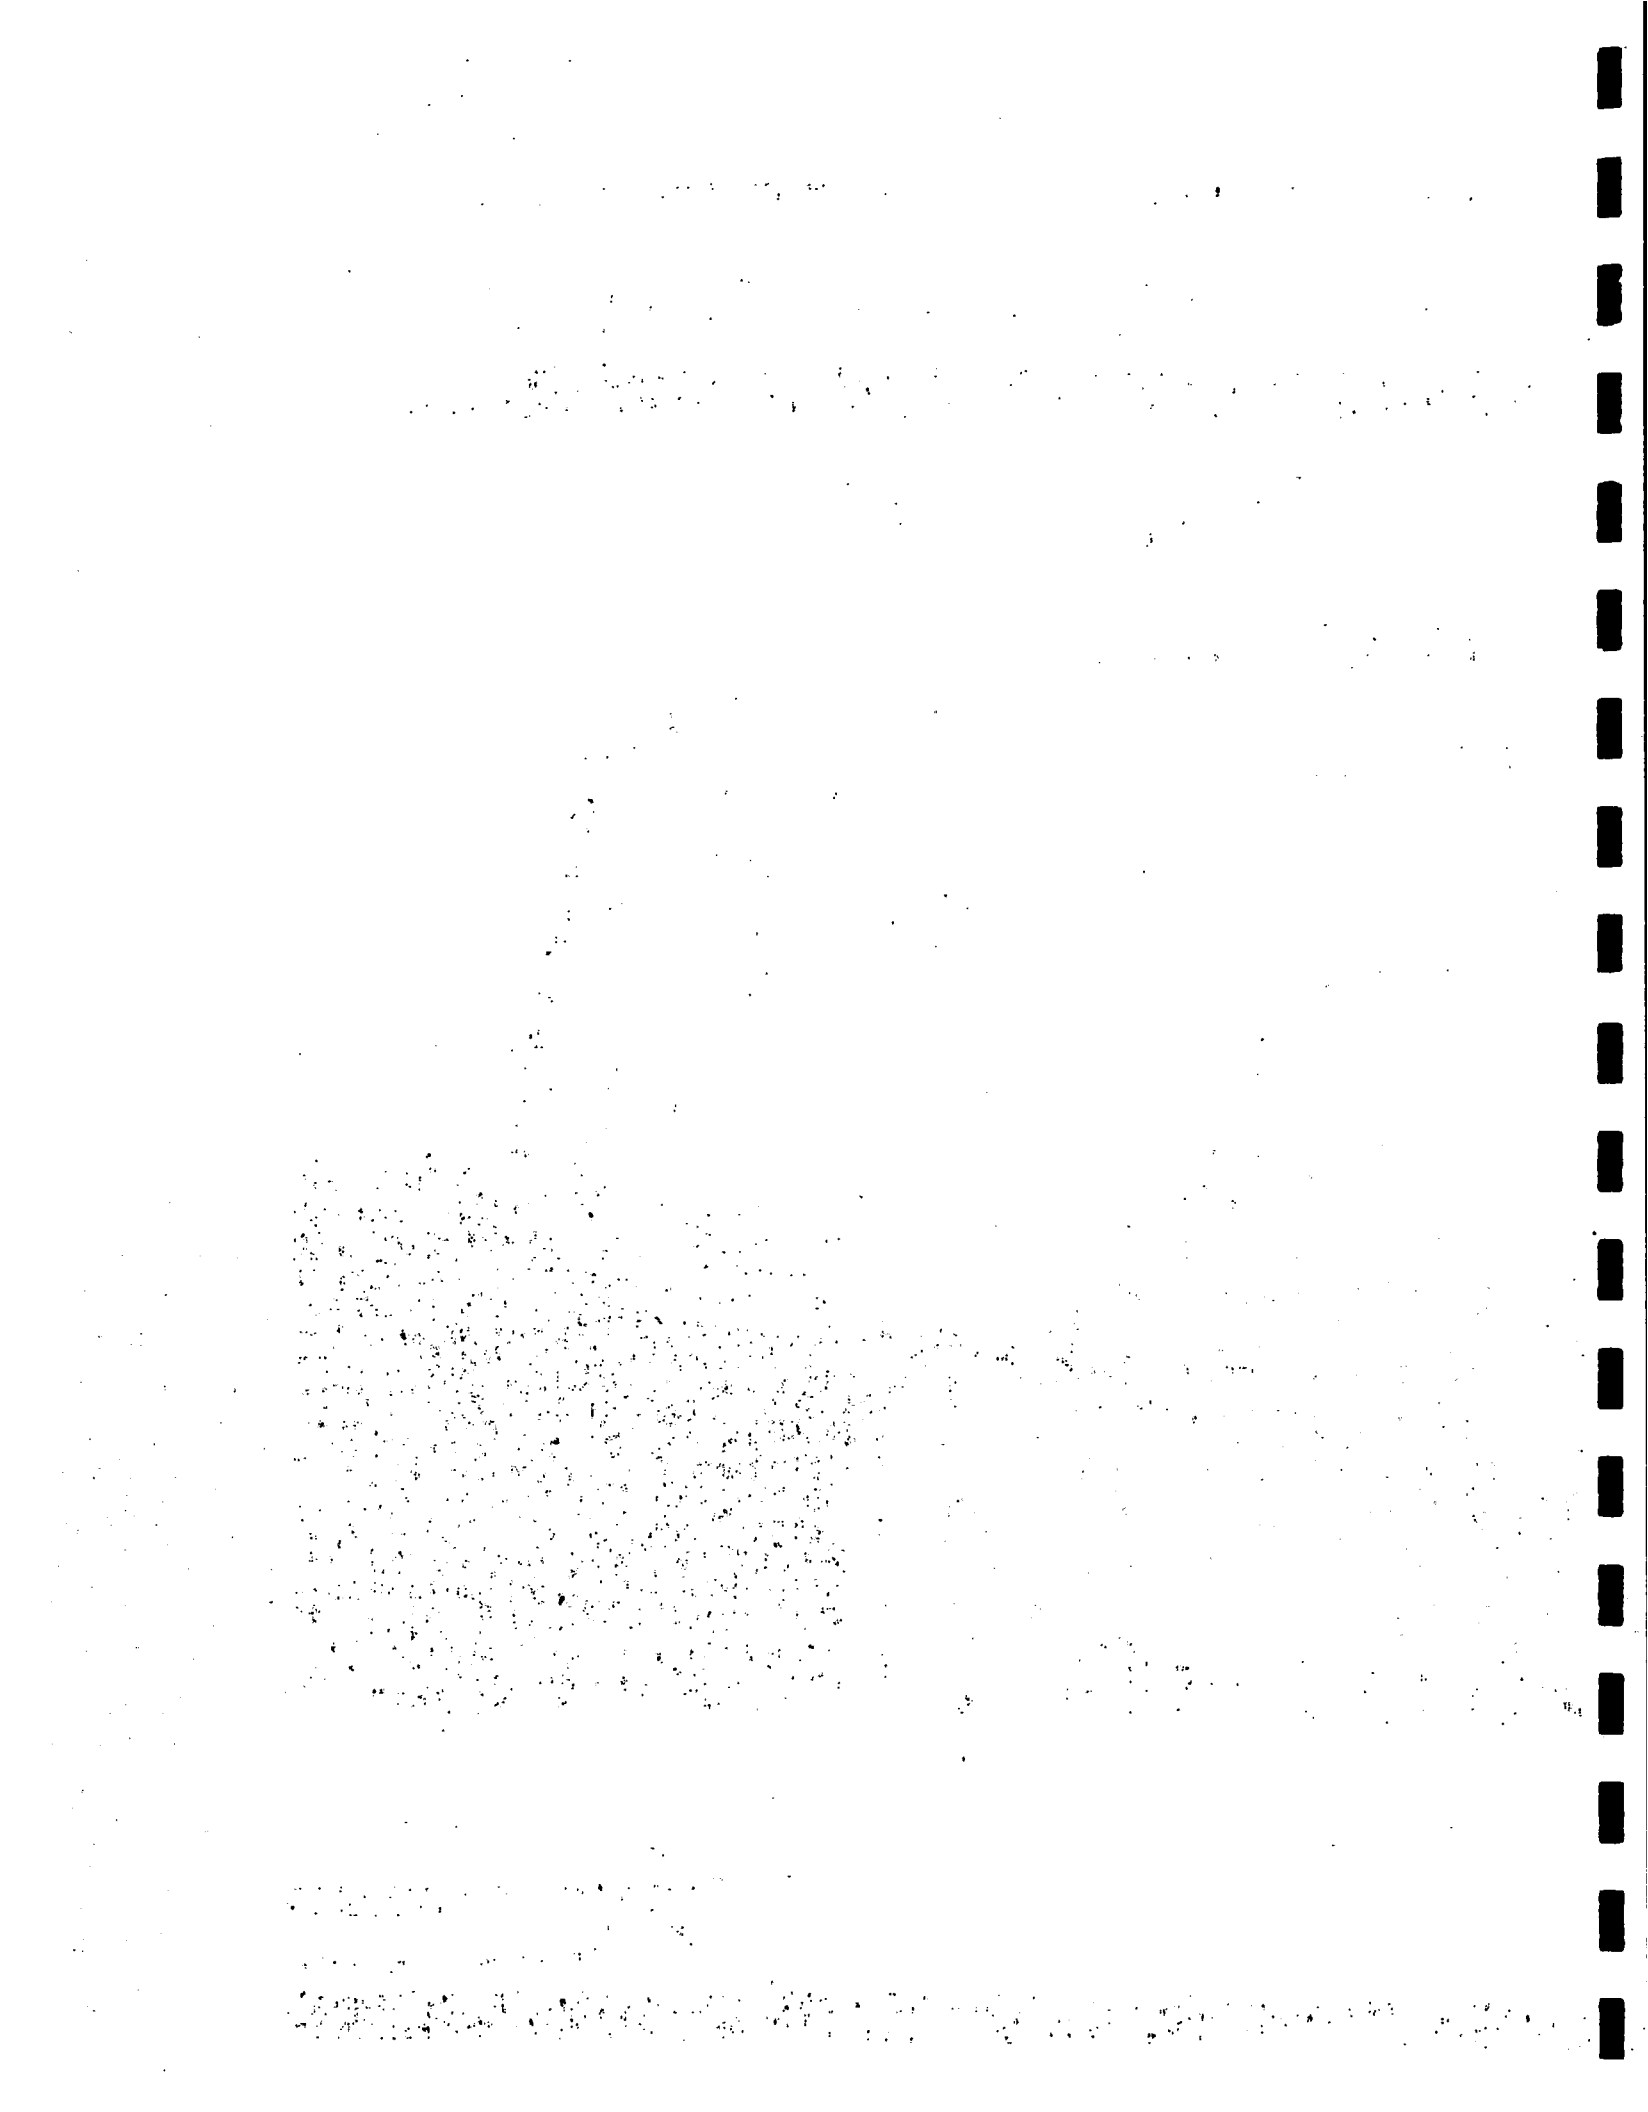

Total number of terms:	5,823
Total number of descriptors:	4,117
Total number of UF terms:	1,706
Total number of RT relationships:	16,601

Organizational Descriptors

Total number of terms:	558
Total number of descriptors:	379
Total number of UF terms:	179
Total number of RT relationships:	51

Geographic Descriptors

Total number of terms:	329
Total number of descriptors:	244
Total number of UF terms:	85
Total number of RT relationships:	77

About the National Institute of Justice

The National Institute of Justice (NIJ), a component of the Office of Justice Programs, is the research agency of the U.S. Department of Justice. Created by the Omnibus Crime Control and Safe Streets Act of 1968, as amended, NIJ is authorized to support research, evaluation, and demonstration programs, development of technology, and both national and international information dissemination. Specific mandates of the Act direct NIJ to:

- Sponsor special projects, and research and development programs, that will improve and strengthen the criminal justice system and reduce or prevent crime.
- Conduct national demonstration projects that employ innovative or promising approaches for improving criminal justice.
- Develop new technologies to fight crime and improve criminal justice.
- Evaluate the effectiveness of criminal justice programs and identify programs that promise to be successful if continued or repeated.
- Recommend actions that can be taken by Federal, State, and local governments as well as by private organizations to improve criminal justice.
- Carry out research on criminal behavior.
- Develop new methods of crime prevention and reduction of crime and delinquency.

In recent years, NIJ has greatly expanded its initiatives, the result of the Violent Crime Control and Law Enforcement Act of 1994 (the Crime Act), partnerships with other Federal agencies and private foundations, advances in technology, and a new international focus. Some examples of these new initiatives:

- New research and evaluation is exploring key issues in community policing, violence against women, sentencing reforms, and specialized courts such as drug courts.
- Dual-use technologies are being developed to support national defense and local law enforcement needs.
- The causes, treatment, and prevention of violence against women and violence within the family are being investigated in cooperation with several agencies of the U.S. Department of Health and Human Services.
- NIJ's links with the international community are being strengthened through membership in the United Nations network of criminological institutes; participation in developing the U.N. Criminal Justice Information Network; initiation of UNOJUST (U.N. Online Justice Clearinghouse), which electronically links the institutes to the U.N. network; and establishment of an NIJ International Center.
- The NIJ-administered criminal justice information clearinghouse, the world's largest, has improved its online capability.
- The Institute's Drug Use Forecasting (DUF) program has been expanded and enhanced. Renamed ADAM (Arrestee Drug Abuse Monitoring), the program will increase the number of drug-testing sites, and its role as a "platform" for studying drug-related crime will grow.
- NIJ's new Crime Mapping Research Center will provide training in computer mapping technology, collect and archive geocoded crime data, and develop analytic software.
- The Institute's program of intramural research has been expanded and enhanced.

The Institute Director, who is appointed by the President and confirmed by the Senate, establishes the Institute's objectives, guided by the priorities of the Office of Justice Programs, the Department of Justice, and the needs of the criminal justice field. The Institute actively solicits the views of criminal justice professionals and researchers in the continuing search for answers that inform public policymaking in crime and justice.
