

## Parent-Teen Activity Series

### Tip of the Month

There are some things you could teach your teen as he/she prepares to drive and purchase a car. First, teach your teen about the finances of buying and maintaining a car. Next, help him choose which car is mechanically sound and appropriate. Help her apply for tags and title if necessary. Next, show your teen how much insurance coverage will be needed and how much it will cost. Talk about the basics of car maintenance. Make the experience hands-on and your teen will be more interested!
