SUBJECT: "You Spill, You Dig" The Deployment Environmental Video and Handbook

Dear Fellow Soldiers:

With the assistance of the soldiers of Task Force Eagle and the U.S. Army Corps of Engineers, we have produced a deployment environmental video and handbook/flashcard entitled "You Spill, You Dig." These products were based on experiences, lessons learned and your suggestions from operations Joint Endeavor and Joint Guard and are intended to assist future deploying troops in their preparation for deployments and operations in the field. This information emphasizes the equipment, supplies, and procedures necessary for the proper spill response. It is important to become familiar with this information not only to prevent environmental damage, but to protect yourself and your fellow soldiers from harm associated with potentially dangerous substances.

The handbooks and flashcards will be distributed in the AOR through the Base Camp Coordinating Activity (BCCA), Tuzla, Bosnia, and the Engineer Office of the National Support Element (NSE), Taszar, Hungary. The video will be available on loan through these same organizations. Within Central Region, quantities will be provided to the engineer brigades and each ASG DPW.

There is a self-addressed comment card in the back of every handbook; I welcome your comments on these products and any suggestions you may have for improvement.

A handwritten signature in black ink, appearing to read 'Anders B. Aadland', with a large, stylized flourish on the right side.

ANDERS B. AADLAND
Brigadier General, GS
Deputy Chief of Staff Engineer
