

**Department of Veterans Affairs (VA)
Executive Order 13520 – Reducing Improper Payments
FY 2011 First Quarter High-Dollar Overpayments Report**

The President signed Executive Order 13520, “Reducing Improper Payments” on November 20, 2009. On March 22, 2010, OMB issued government-wide guidance on the implementation of the Executive Order. The guidance is under Part III, Appendix C of OMB Circular A-123. This guidance requires agencies with programs susceptible to significant improper payments to submit to the agency’s Inspector General and the Council of Inspectors General on Integrity and Efficiency, and make available to the public, a quarterly report on any high-dollar overpayments identified by the agency.

In its 2010 Performance and Accountability Report, VA reported four programs under the Veterans Benefits Administration (VBA) and two programs under the Veterans Health Administration (VHA) that meet thresholds of the Improper Payments Elimination and Recovery Act of 2010 (IPERA) for susceptibility to significant improper payments. These programs are Compensation, Pension, Education, Insurance, Non-VA Care Fee, and Non-VA Care Civilian Health and Medical Program of the Department of Veterans Affairs (CHAMPVA).

In accordance with OMB Circular A-123, Appendix C, Part III, VBA and VHA reviewed the six programs deemed susceptible to significant improper payments. The OMB guidelines define a high-dollar improper payment as any payment in excess of 50 percent of the correct amount of the intended payment under the following circumstances:

1. Where the total payment to an individual exceeds \$5,000 as a single payment or in cumulative payments for the quarter; or
2. Where a payment to an entity exceeds \$25,000 as a single payment or in cumulative payments for the quarter.

The OMB guidelines require that agencies submit, on a quarterly basis, a report to:

1. List all high-dollar overpayments identified by the agency during the quarter;
2. Describe whether each high-dollar overpayment was made to an entity or individual, and the city/county and state of the entity or individual;
3. List the program responsible for each high-dollar overpayment error;
4. Describe any actions the agency has taken or plans to take to recover high-dollar overpayments; and
5. Describe any actions the agency will take to prevent overpayments from occurring in the future.

The report is divided into five parts for each program area and the high-dollar overpayments are identified from the highest to lowest overpayments within each program area. In addition to OMB’s guidelines, our report includes two additional categories: the cause of overpayment and the status of overpayment. The status of an overpayment will be “collection in progress,” or “collection in full.” Collection in progress is defined as actions taken by VA to recover from future benefit awards or payments, referral to the Treasury Offset Program, or request to return money that was paid after the death of a beneficiary through reclamation procedures. Veterans also have dispute and waiver request rights during the collection processes.

1. Compensation Program

The Compensation and Pension Service identified 416 high-dollar compensation overpayments.

A total of 253 overpayments (61 percent) were created due to the death of the beneficiary. Entitlement to benefits ceases effective the first day of the month in which death occurs. These overpayments are caused when a beneficiary dies too late in a month to stop the release of the payment for the month of death, or when VA is not timely notified of the death of a beneficiary.

Thirty-eight overpayments (9 percent) were caused when certain Veterans returned to active duty status. The Department of Defense runs a quarterly match of the active duty and VA disability files to identify persons who are receiving active duty pay and VA disability benefits concurrently. Once notified of active duty status, VA must provide due process notice to the beneficiary before any adjustment may occur.

Thirty-two overpayments (8 percent) were caused by retroactive adjustments due to incarceration of the beneficiary. Notification of incarceration is a function of agreements made with States, the Bureau of Prisons, and other law enforcement agencies. Once notified of a beneficiary's incarceration, VA must provide due process notice to the beneficiary before any adjustment may occur.

Twenty-one overpayments (5 percent) were caused by retroactive adjustments due to the beneficiary's status as a fugitive felon. Law enforcement agencies notify VA when a beneficiary has been identified as a fugitive felon. Once notified, VA must provide due process notice to the beneficiary before any adjustment may occur.

An additional 45 high-dollar overpayments (11 percent) were identified, but there was insufficient information available electronically to determine the period covered by the overpayment and/or the propriety or cause of the overpayment.

The remaining 27 accounted for 6 percent of the compensation records identified as high dollar overpayments. Eleven overpayments were due to hospitalization at VA expense requiring an adjustment; 8 overpayments were due to administrative errors such as incorrect disability evaluations, benefits paid after death, dependency, and insufficient service; 4 overpayments were due to income changes; and 4 overpayments were due to military retired pay adjustments.

Some VA overpayments are inherent based on the requirements of 38 CFR § 3.103, Procedural Due Process and Appellate Rights, which does not allow VA to take adverse action regarding the payment of benefits without providing the beneficiary 60 days advance notice, unless the beneficiary requests that VA take the adverse action immediately. This "due process" period extends an overpayment period by two additional months. The only exception to providing procedural due process is when VA is notified of a beneficiary's death. Following are some examples.

When a beneficiary dies during the latter days of a month, a recurring benefit payment is often made before VA is notified that the death occurred. While VA has a death match program with the Social Security Administration (SSA), the match is received once per month from SSA, and usually after a benefit payment has been released. The number of overpayments following death has been reduced as a result of VA's Veterans Service Network, a "real time" processing technology.

While the Defense Finance and Accounting Service notifies VA of Veterans who return to active duty, VA must provide a 60-day "due process" period prior to discontinuing benefits, thereby extending the overpayment by two months.

Beneficiaries who are incarcerated or are fugitive felons are subject to a reduction or termination of benefits. Through matching programs, such as the fugitive felon program, the Bureau of Prisons, and other law enforcement agencies, VA receives information regarding incarcerated and fugitive felon beneficiaries after the beneficiary has been incarcerated or deemed a fugitive felon. By law, VA must provide a 60-day "due process" period prior to reducing or terminating benefits. As such, overpayments in these cases most frequently cannot be avoided.

Total Compensation Payments made this quarter: \$11,688,509,135.70
Total High-Dollar Overpayments identified in this quarter: \$3,484,162.39
Percent of Overpayments: 0.0298%

2. Pension Program

Compensation and Pension Service identified 63 high-dollar pension overpayments.

Forty-two overpayments (67 percent) were created due to a change in countable income.

Nine overpayments (14 percent) were due to administrative errors such as incorrect income adjustments, dependency, and insufficient service.

Six overpayments (10 percent) were created due to death of the beneficiary.

Three overpayments (less than 5 percent) were created due to incarceration or fugitive felon status.

Three (less than 5 percent) unknown overpayments were created where there was insufficient information available electronically to determine the period covered by the overpayment and/or the propriety or cause of the overpayment.

Beneficiaries that are in receipt of pension before end of the month of August and who are not exempt from reporting their income under Public Law 103-271, will receive Eligibility Verification Review (EVR) forms in January of the following year. These forms will be used to report income for the prior calendar year, and claimants will have 60 days to return this information. If the information received within this time frame is insufficient, an additional 60 days will be given to submit the required information.

Increases in countable income may result in high dollar overpayments when there are not enough medical expenses to reduce the countable income. VA receives information on a regular basis from several Federal agencies and compares it to information used to determine the status of VA beneficiaries. The matches identify cases where there are apparent contradictions between information contained in VA records and information furnished by other Federal agencies that affect entitlement. Some matching data, such as that received from the SSA and the Internal Revenue Service (IRS), is usually received after the increase in countable income has already occurred. The EVR process and the data matching agreements with other Federal agencies ensure that necessary adjustments in countable income are appropriately processed when notification is received showing a change in countable income.

Total Pension Payments made this quarter: \$1,050,243,951.77

Total High-Dollar Overpayments identified in this quarter: \$1,348,591.84

Percent of Overpayments: 0.1284%

Note:

Feedback to the findings from the Quarterly High Dollar Overpayment Reports was provided to the field during the Veterans Service Center Manager (VSCM) conference call on February 17, 2011. The results of the analysis indicate, in part, that field offices are not following the guidance as outlined in Fast Letters (FL's) 08-05 and 08-09. Field offices are reminded of the following:

Guidance provided in FL 08-05, Controls to Minimize Compensation Benefit Overpayments, wherein claims processors are required to establish an EP 690 in addition to the control EP. The purpose of this EP 690 is to help monitor timeliness in completing action on pending issues with potential overpayments.

FL 08-09, Prioritization and Processing of System-Generated Messages (Writeouts) are current procedures for monitoring notice of exception reports. To facilitate monitoring for timeliness in completing action on potential underpayments or overpayments, claims processors are instructed to establish and maintain an additional EP 693 until all actions are complete.

Reminder that guidance under M21-1MR, Part Individual, Chapter 2.B.7.a, was provided to field stations during the VSCM conference call conducted on October 21, 2010. During this call, claims processors were reminded to take immediate action to resolve claims involving due process when their associated controls mature.

3. Education Program

Education Service identified 1,670 high-dollar overpayments.

This quarter's reportable overpayments represent an 18 percent decrease from last quarter's 2,027 reportable overpayments. This can be attributed to improved accuracy in processing as well as a continued refinement of improper payment criteria. Of the 1670 reportable overpayments, 45.3 percent were overpayments to individuals and 54.7 percent were overpayments to educational institutions. Challenges identified during the implementation period for the Post-9/11 GI Bill have been addressed. Many issues which increased the potential for overpayment during implementation have been resolved such as:

- The implementation of the permanent payment system has resolved operator entry errors as many functions have been automated. Interim manual processing procedures for Post 9/11 GI Bill claims, including authorization of multiple payments per claim, presented an increased opportunity for operator entry errors.
- All eligibility determinations are now automated in the permanent payment system for the Post-9/11 GI Bill. The complexity of Post 9/11 GI Bill claims, including separate determinations of basic eligibility and eligibility for housing allowance, contributed to increased errors prior to implementation of the permanent pay system.
- Increased training and experience has resulted in increased accuracy across all education programs. The vast increase of workload during the initial year of implementation generated pressures to work claims as quickly as possible. A doubling of claims processing staff to support the increased volume of claims resulted in a workforce that was largely inexperienced. Both these factors contributed to increased errors in other programs in addition to the Post 9/11 GI Bill.

Eighty-six percent of overpayments were caused by provisions of law that require retroactive reduction or termination of benefits after payment has been properly made which includes requirements to pay some benefits in advance of the student's attendance. While these claims were proper when paid, subsequent changes in enrollment status may require repayment of any unearned portion of benefits previously paid.

Nine percent of the overpayments were caused by errors or delays in processing by VA.

Five percent of the overpayments were caused by errors or delays in reporting enrollment information by schools.

Total Education Payments made this quarter: \$3,040,108,358.00

Total High-Dollar Overpayments identified in this quarter: \$11,887,264.69

Percent of Overpayments: 0.00391%

Note:

Many Education overpayments result from provisions of law which were proper at the time they were made, but later this operation resulted in making improper payments. These include payments made in advance of an enrollment period, particularly tuition and other benefits under the Post-9/11 GI Bill. If the student never attended, reduces his course load, or stops attending, some or all of the amounts paid become improper payments and subject to collection. In addition, provisions applying to Education benefit programs in general forbid the payment of benefits for any course which is not counted toward the beneficiary's graduation requirements. If a student receives a grade in such a course (whether the course has been completed or not), benefits must be adjusted retroactive to the beginning of the term. To minimize the effects of such statutory provisions, VA provides cautionary information in print publications and electronic media, and also includes this information in letters to students each time they are awarded benefits.

Delays or errors by school officials in reporting information result in improper payments, particularly if reductions in course load or terminations are involved. The complexity of Post 9/11 GI Bill reporting requirements can lead to errors on the part of school officials. VA maintains regular contact with school officials to remind them of requirements for timely and accurate reporting, frequently disseminates informational materials, and provides specific training when indicated, such as for the implementation of the Post-9/11 GI Bill.

Delays or errors by VA in the processing of claims also produce improper payments. The complexity of Post 9/11 GI Bill claims continues to contribute to increased delays and errors, which affected other programs in addition to the Post 9/11 GI Bill. However, the implementation during the last quarter of FY2010 of a new automated processing system for the Post-9/11 GI Bill will continue to improve both accuracy and speed of processing.

4. Insurance Program

None.

5. Non-VA Care Fee Program

VHA identified 32 Non-VA Care Fee high-dollar overpayments totaling \$2,800,257 through the expanded efforts of the VHA Chief Business Office (CBO), Veterans Integrated Service Networks (VISNs), Financial Services Center (FSC), and the VA Management Quality Assurance Service (MQAS). High-dollar overpayments consisted of both single and cumulative payments. Overpayments were caused by an incorrect application of payment methodology and data entry errors.

The CBO Purchased Care Program Office worked closely with FSC to identify overpayments totaling \$4.3 million of which \$1,705,090 met the high-dollar overpayment thresholds. MQAS identified a total of \$815,122 in high-dollar overpayments during their Fee program reviews of four facilities. The CBO Purchased Care Program Office also worked with each VISN to identify high-dollar overpayments totaling \$280,045 by reviewing internal reports and providing the results to the VISNs for review and verification of improper payments. CBO internal reports included the (1) monthly potential outlier reports, (2) monthly inpatient potential improper payment reports, (3) bills of collection audit reports, and (4) post payment duplicate payments report. Additionally, several VISNs conducted self audits and reviews and reported high-dollar overpayments. VA's Office of Inspector General, who identified high-dollar overpayments in prior quarters, reported no high-dollar overpayments this quarter.

Total Fee Payments made this quarter: \$1,036,505,473

Total High-Dollar Overpayments identified in this quarter¹: \$2,800,257

Note:

Purchased Care recently re-released the solicitation for the Diagnostic Related Group recovery audit contract to recover overpayments from FY 2007 to present. An award was made in March 2011. Purchased Care has also awarded a separate contract intended to conduct a similar audit for outpatient services. The recovery outpatient audit began in the second quarter of FY 2011. Purchased Care has also awarded a contract for more robust audits of FY 2010 and FY 2011 Non-VA Care Fee payments. These audits initiated in the second quarter FY 2011. Results of the audits will be utilized for process improvements as well as establishing FY 2012 performance targets.

Purchased Care currently reports identified outliers, which are payments that fall outside of the normal payment curve, on a monthly basis. These outliers are provided to the local medical facilities for review. This significant process improvement has resulted in improved accuracy in reporting of these events as well as follow-up activity for each facility.

CBO has completed installation of the Fee Basis Claims System (FBCS), allowing integrated claims scrubbing, automated identification of duplicate payments, reduced data entry errors, and system-wide use of electronic claims processing. CBO is also working with the software vendor to enhance FBCS for continuous improvement.

CBO created a Field Assistance Unit to improve operations and management controls at field sites.

6. Non-VA Care CHAMPVA Program

VHA identified eight Non-VA Care CHAMPVA high-dollar overpayments totaling \$254,540 through the expanded efforts of the Health Administration Center (HAC). High-dollar overpayments consisted of only cumulative payments. Overpayments were caused by payments made to ineligible beneficiaries, improper application of other health insurance (OHI), data entry errors, and vendor billing errors.

To identify high-dollar overpayments, the HAC reviewed (1) a quarterly possible duplicate payment audit, (2) a monthly proper payment audit, (3) an ongoing weekly high-dollar audit for all claims over \$100,000, and (4) the first quarter bills of collection audit. The HAC conducts a 100 percent multi-division in-depth prepayment review of all claims over \$100,000 and the Claims Processing Division conducts a prepayment review of all claims over \$10,000 to reduce the likelihood of a high-dollar improper payment being made.

Total CHAMPVA Payments made this quarter: \$244,904,000
 Total High-Dollar Overpayments identified in this quarter³: \$254,540
 Percentage of Overpayments⁴: 0.1%

Amount of Overpayment	Entity or Individual	City/County	State	Cause of Overpayment	Actions/Plans to Recover Overpayment	Status of Overpayment	Overall Action Plans
\$58,686.45	Entity	Baltimore	MD	Incorrect input of patient responsibility	HAC's Standard Recoupment Process where bills of collection are created, issued to the debtor, and tracked. Unpaid bills are then forwarded to the Treasury Offset Program after 180 days.	Collection in Progress	See note below

\$7,053.70	Individual	Breaks	VA	Incorrect OHI		Collection in Progress	

³ High-dollar overpayments identified in the Non-VA CHAMPVA Program were initially processed during the period FY 1998 to FY 2011.

⁴ The "Percentage of Overpayments" compares high-dollar overpayments processed in prior quarters with the total payments processed in the first quarter.

Note:

The HAC continues to enhance internal controls; provider education and communication; beneficiary communication and outreach; and the OHI validation process.

The HAC has implemented continuous monitors, audits and reviews of CHAMPVA claims processing as well as development of a statement of work that captures real-time OHI information; ongoing training on data input; and routine data matches with VBA and Centers for Medicare & Medicaid Services.
