

CONCEPTUAL ADJACENCIES AND RELATIONSHIPS

Spatial Organization and Relationship Diagrams

Space Adjacency

The bubble diagram illustrates the overall building relationships of many of the key spaces within the school buildings. The color coding indicates the major space types to which these spaces relate. Also shown are two arrows to indicate key building entrances: front door and service access.

Spaces within this area will be functional and flexible. Relationships among spaces will guide space configuration and adjacencies, with first priority given to functions with the strongest relationships. The design concept for this area will be a suite of collocated spaces, with flexible transitions among each function.
