

APPENDIX

Acknowledgements

DoDEA, USACE DoDEA Design Center and Jacobs have worked hand-in-hand to align DoDEA facilities with 21st Century principles in teaching and learning. This involved gathering together a notable group of educators, designers, subject matter experts and stakeholders for a series of intensive work sessions. A result of these work sessions is the collaborative development of these education facilities specifications. This would not have been possible without the support of all who participated. We especially appreciate the energy, diligence and care taken in the drafting, reviewing and technical production of this work.
