

Clinic News:

- 1) Seasonal Influenza vaccinations are in stock. The annual flu vaccine is mandatory for all CG active duty (AD) and selected reserve (SELRES) personnel, Child Development Services personnel (including CG certified Family Child Care Providers), and CG civilian, contract and auxiliary healthcare personnel who provide direct patient care in CG Regional Practice clinics (unless granted an exemption). Personnel can walk into the Clinic and receive their vaccination during normal working hours.
- 2) The CG wide transition of Pharmacy services is in full swing and scheduled for completion on 1Nov12. What this means: Prescriptions will no longer be dispensed locally at our pharmacy; instead, you will receive prescriptions that can be filled in town by a local pharmacy. Walgreens no longer accepts TRICARE.
  - Prior to departing the clinic you will get assistance from our Pharmacy Technician in setting up your account with **Express Scripts** (Tricare Mail order Pharmacy). Any long-term prescriptions will be refilled by this program and your medications will be delivered to your address.
- 3) October is Breast Cancer Awareness Month. Please go to the National Breast Cancer Foundation for more information <http://www.nationalbreastcancer.org/breast-cancer-awareness-month>
