UNTIL 8:30 A.M. (EDT)  
Wednesday, July 18, 2007

**CONSUMER PRICE INDEX: JUNE 2007**

The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.2 percent in June, before seasonal adjustment, the Bureau of Labor Statistics of the U.S. Department of Labor reported today. The June level of 208.352 (1982-84=100) was 2.7 percent higher than in June 2006.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) increased 0.1 percent in June prior to seasonal adjustment. The June level of 203.906 (1982-84=100) was 2.7 percent higher than in June 2006.

The Chained Consumer Price Index for All Urban Consumers (C-CPI-U) increased 0.2 percent in June on a not seasonally adjusted basis. The June level of 120.221 (December 1999=100) was 2.3 percent higher than in June 2006. Please note that the indexes for the post-2005 period are subject to revision.

**CPI for All Urban Consumers (CPI-U)**

On a seasonally adjusted basis, the CPI-U advanced 0.2 percent in June, following a 0.7 percent increase in May. The index for energy, which had increased sharply in each of the preceding three months, declined 0.5 percent in June. The index for petroleum-based energy decreased 0.9 percent and the index for energy services fell 0.1 percent. The food index rose 0.5 percent in June with grocery store food prices up 0.6 percent. The index for all items less food and energy advanced 0.2 percent in June, following a 0.1 percent rise in May. A larger increase in the index for shelter and an upturn in the index for new and used vehicles were responsible for the larger advance.

Table A. Percent changes in CPI for Urban Consumers (CPI-U)

Expenditure Category	Seasonally adjusted							Compound annual rate 3-mos. ended June '07	Un- adjusted 12-mos. ended June '07
	Changes from preceding month								
	2006	2007

Transportation	1.7	-.8	.1	2.8	1.2	2.8	-.2	16.5	0.9
Medical care	.2	.8	.5	.1	.4	.3	.2	3.8	4.0
Recreation	-.3	.1	.0	.0	.1	.2	.0	1.1	.3
Education and communication	.2	-.1	.3	.5	.3	.6	.0	3.5	2.4
Other goods and services	.6	.8	.2	.2	.3	.3	.3	3.4	3.7
Special Indexes									
Energy	4.2	-1.5	.9	5.9	2.4	5.4	-.5	32.9	4.6
Food	.0	.7	.8	.3	.4	.3	.5	5.1	4.1
All Items less food and energy	.1	.3	.2	.1	.2	.1	.2	2.3	2.2

Consumer prices increased at a seasonally adjusted annual rate (SAAR) of 5.2 percent in the second quarter after advancing at a 4.7 percent rate in the first three months of 2007. This brings the year-to-date annual rate to 5.0 percent and compares with an increase of 2.5 percent in all of 2006. The index for energy, which rose 2.9 percent in all of 2006, advanced at a 27.8 percent SAAR in the first half of 2007 and accounted for about 48 percent of the advance in the overall CPI-U during that period. Petroleum-based energy costs increased at a 48.3 percent annual rate and charges for energy services rose at a 5.5 percent annual rate. The food index rose at a 6.2 percent SAAR in the first half of 2007 and contributed about 17 percent to the overall CPI-U increase in the first six months. Grocery store food prices increased at a 8.0 percent annual rate in the first half of 2007, reflecting acceleration over the last year in each of the six major groups. These increases ranged from annual rates of 14.8 percent in the index for dairy products to 5.5 percent in the index for other food at home.

The CPI-U excluding food and energy advanced at a 2.3 percent SAAR in the second quarter, the same rate as in the first three months of 2007. The advance at a 2.3 percent SAAR for the first half of 2007 compares with a 2.6 percent rise in all of 2006. The deceleration largely reflects a smaller increase in the index for shelter and a downturn in the index for apparel. Shelter costs, which rose 4.2 percent in all of 2006, have risen at a 3.4 percent annual rate in the first half of 2007. The index for apparel, which registered its first annual increase in 2006 since 1997, has declined at an annual rate of 2.9 percent thus far in 2007. The annual rates for selected groups for the last seven and one-half years are shown below.

	Percentage change 12 months ended in December						SAAR 6 mos. ended in June	
	2000	2001	2002	2003	2004	2005	2006	2007
All items	3.4	1.6	2.4	1.9	3.3	3.4	2.5	5.0
Food and beverages	2.8	2.8	1.5	3.5	2.6	2.3	2.2	6.2
Housing	4.3	2.9	2.4	2.2	3.0	4.0	3.3	3.2
Apparel	-1.8	-3.2	-1.8	-2.1	-.2	-1.1	.9	-2.9
Transportation	4.1	-3.8	3.8	.3	6.5	4.8	1.6	12.3

Recreation	1.7	1.5	1.1	1.1	.7	1.1	1.0	.6
Education and communication	1.3	3.2	2.2	1.6	1.5	2.4	2.3	3.1
Other goods and services	4.2	4.5	3.3	1.5	2.5	3.1	3.0	4.1
Special indexes								
Energy	14.2	-13.0	10.7	6.9	16.6	17.1	2.9	27.8
Energy commodities	15.7	-24.5	23.7	6.9	26.7	16.7	6.1	48.3
Energy services	12.7	-1.5	.4	6.9	6.8	17.6	-.6	5.5
All items less energy	2.6	2.8	1.8	1.5	2.2	2.2	2.5	2.8
Food	2.8	2.8	1.5	3.6	2.7	2.3	2.1	6.2
All items less food and energy	2.6	2.7	1.9	1.1	2.2	2.2	2.6	2.3

The food and beverages index rose 0.5 percent in June. The index for food at home, which rose 0.4 percent in May, increased 0.6 percent in June. The index for dairy products increased 3.2 percent, accounting for over half of the June food at home advance. Milk prices rose 3.5 percent and have risen 9.9 percent since the beginning of the year. The index for fruits and vegetables declined for the second consecutive month--down 1.1 percent in June. The indexes for fresh vegetables and for fresh fruits declined 2.7 and 0.7 percent, respectively, while the index for processed fruits and vegetables increased 1.4 percent. The index for meats, poultry, fish, and eggs increased 0.5 percent. The indexes for pork and for beef increased 0.5 and 0.2 percent, respectively. Poultry prices rose 2.1 percent. Through the first six months of 2007, beef and pork prices have each risen 5.2 percent and poultry prices, 6.5 percent. The indexes for cereal and bakery products and for other food at home each increased 0.7 percent. The index for nonalcoholic beverages rose 0.3 percent. The other two components of the food and beverages index--food away from home and alcoholic beverages--increased 0.3 and 0.4 percent, respectively.

The index for housing increased 0.3 percent in June, following increases of 0.2 percent in each of the preceding three months. The index for shelter rose 0.4 percent, following an increase of 0.2 percent in May. Within shelter, the index for rent rose 0.3 percent; the index for owners' equivalent rent, 0.2 percent; and the index for lodging away from home, 2.5 percent. The index for household energy increased 0.1 percent as a 2.5 percent increase in the index for fuel oil was partially offset by decreases in the indexes for natural gas and for electricity--each down 0.1 percent. (Prior to seasonal adjustment, charges for electricity rose 6.9 percent, reflecting in part the switch to seasonal rates in some areas.) The index for household furnishings and operations increased 0.1 percent in June.

The transportation index, which had risen sharply in each of the preceding three months, declined 0.2 percent in June, reflecting a downturn in the index for motor fuels. The index for gasoline prices, which had increased 28.0 percent during the previous three months, declined 1.1 percent in June. (Prior to seasonal adjustment, gasoline prices fell 1.9 percent from their peak level recorded in May.) The index for new vehicles was virtually unchanged. The index for used cars and trucks increased 0.4 percent. During the last 12 months new vehicle prices have declined 1.0 percent and prices for used cars and trucks, 4.5 percent. The index for public transportation rose 0.8 percent in June, reflecting a 0.9 percent increase in the index for airline fares. (Prior to seasonal adjustment, airline fares advanced 2.8 percent.)

The index for apparel declined for the fourth consecutive month, down 0.6 percent in June. (Prior to seasonal adjustment, apparel prices decreased 3.5 percent. Prices for women's and girls' apparel registered the largest decline--down 5.8 percent.)

Medical care costs rose 0.2 percent in June and are 4.0 percent higher than a year ago. The index for medical care commodities--prescription drugs, nonprescription drugs, and medical supplies--was virtually unchanged. The index for medical care services rose 0.3 percent. The indexes for professional services and for hospital and related services increased 0.2 and 0.3 percent, respectively.

The index for recreation was virtually unchanged in June. Increases in the indexes for pets, pet products and services and for video and audio--up 0.6 and 0.2 percent, respectively--were offset by decreases in most other recreation categories. The index for admissions to movies, theaters, concerts, and sporting events declined 1.1 percent.

The index for education and communication, which advanced 0.6 percent in May, was virtually unchanged in June. Educational costs rose 0.2 percent and the index for communication costs decreased 0.2 percent. Within the communication group, the index for information and information processing declined 0.3 percent; the indexes for personal computers and peripheral equipment and for internet services and electronic information providers declined 2.7 and 1.2 percent, respectively.

The index for other goods and services increased 0.3 percent in May. The index for tobacco and smoking products rose 0.5 percent and has increased 5.9 percent during the last 12 months. The index for miscellaneous personal services rose 0.3 percent, reflecting a 1.1 percent increase in the index for financial services.

## CPI for Urban Wage Earners and Clerical Workers (CPI-W)

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers increased 0.1 percent in June.

Consumer Price Index data for July are scheduled for release on Wednesday, August 15, 2007, at 8:30 A.M. (EDT).

## **Consumer Price Index Levels to Three Decimal Places**

Effective with the January 2007 release of the Consumer Price Index (CPI), the Bureau of Labor Statistics began computing percent changes based upon three decimal place indexes rather than one decimal place indexes. This change applied to the All Items Consumer Price Index and all component indexes for the CPI-U, CPI-W, and C-CPI-U, for the U.S. City Average and for all other published areas. In addition, CPI index values were displayed to three decimal places in all paper and electronic publications. As in the past, percent changes were rounded and displayed to one decimal place.

The change in procedure addressed a rounding issue that resulted in published percent changes that were 0.1 percentage point higher or lower than the same percent changes based on unrounded index values (i.e., indexes to three or more decimal places). These differences were particularly important when percent changes were very small. Publishing the index values to three decimal places, and using these values to compute percent changes, essentially eliminated the possibility of rounding differences. This change only affected the presentation of the index data. Index values continue to be calculated from underlying price data in the same manner as in the past, and no systematic upward or downward effect on the data was introduced. The levels of the indexes are affected only in that they are published to three decimal places rather than one place. Official CPI data previously published were not be revised.

For more information contact Patrick Jackman or Ken Stewart either by telephone at (202) 691-6952 and (202) 691-6966, respectively, or by electronic mail at [Jackman.Patrick@bls.gov](mailto:Jackman.Patrick@bls.gov) or [Stewart.Ken@bls.gov](mailto:Stewart.Ken@bls.gov)

## **Note on Sampling Error in the Consumer Price Index**

The CPI is a statistical estimate that is subject to sampling error because it is based upon a sample of retail prices and not the complete universe of all prices. BLS calculates and publishes estimates of the 1-month, 2-month, 6-month and 12-month percent change standard errors annually, for the CPI-U. These standard error estimates can be used to construct confidence intervals for hypothesis testing. For example, the estimated standard error of the 1 month percent change is 0.06 percent for the U.S. All Items Consumer Price Index. This means that if we repeatedly sample from the universe of all retail prices using the same methodology, and estimate a percentage change for each sample, then 95% of these estimates would be within 0.12 percent of the 1 month percentage change based on all retail prices. For a 1-month change of 0.2 percent in the All Items CPI for All Urban Consumers, we are 95 percent confident that the actual percent change based on all retail prices would fall between 0.08 and 0.32 percent. For the latest data, including information on how to use the estimates of standard error, see "Variance Estimates for Changes in the Consumer Price Index, January 2005-December 2005 in the CPI Detailed Report, February 2006. These data are available on the CPI home page (<http://www.bls.gov/cpi>), using the following link <http://www.bls.gov/cpi/cpivar2006.pdf>

## **Facilities for Sensory Impaired**

Information from this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200, Federal Relay Services: 1-800-877-8339. For a recorded message of Summary CPI data, call (202) 691-5200.

## **Brief Explanation of the CPI**

The Consumer Price Index (CPI) is a measure of the average change in prices over time of goods and services purchased by households. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) the CPI for Urban Wage Earners and Clerical Workers (CPI-W), which covers households of wage earners and clerical workers that comprise approximately 32 percent of the total population and (2) the CPI for All Urban Consumers (CPI-U) and the Chained CPI for All Urban Consumers (C-CPI-U), which cover approximately 87 percent of the total population and include in addition to wage earners and clerical worker households, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPIs are based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected in 87 urban areas across the country from about 50,000 housing units and approximately 23,000 retail establishments-department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of fuels and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected every month in the three largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits or telephone calls of the Bureau's trained representatives.

In calculating the index, price changes for the various items in each location are averaged together with weights, which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. For the CPI-U and CPI-W separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 27 local areas. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period. For the C-CPI-U data are issued only at the national level. It is important to note that the CPI-U and CPI-W are considered final when released, but the C-CPI-U is issued in preliminary form and subject to two annual revisions.

The index measures price change from a designed reference date. For the CPI-U and the CPI-W the reference base is 1982-84 equals 100.0. The reference base for the C-CPI-U is December 1999 equals 100. An increase of 16.5 percent from the reference base, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period market basket of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65.

For further details visit the CPI home page on the Internet at <http://www.bls.gov/cpi/> or contact our CPI Information and Analysis Section on (202) 691-7000.

## Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example below illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

### Index Point Change

CPI	202.416
Less previous index	201.800
Equals index point change	.616

### Percent Change

Index point difference	.616
Divided by the previous index	201.800
Equals	0.003
Results multiplied by one hundred	0.003x100
Equals percent change	0.3

### Regions Defined

The states in the four regions shown in Tables 3 and 6 are listed below.

The Northeast--Connecticut, Maine, Massachusetts, New Hampshire, New York, New Jersey, Pennsylvania, Rhode Island, and Vermont.

The Midwest--Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

The South--Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia, and the District of Columbia.

The West--Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

## A Note on Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year--such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-12-ARIMA Seasonal Adjustment Method. Seasonally adjusted indexes and seasonal factors are computed annually. Each year, the last 5 years of seasonally adjusted data are revised. Data from January 2002 through December 2006 were replaced in January 2007. Exceptions to the usual revision schedule were: the updated seasonal data at the end of 1977 replaced data from 1967 through 1977; and, in January 2002, dependently seasonally adjusted series were revised for January 1987-December 2001 as a result of a change in the aggregation weights for dependently adjusted series. For further information, please see "Aggregation of Dependently Adjusted Seasonally Adjusted Series," in the October 2001 issue of the [CPI Detailed Report](#).

The seasonal movement of All items and 54 other aggregations is derived by combining the seasonal movement of 73 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 73 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used in the aggregation of the dependent series for the last 5 years, but the seasonally adjusted indexes will be used before that period. Note: 44 of the 73 components are seasonally adjusted for 2007.

Seasonally adjusted data, including the All items index levels, are subject to revision for up to five years after their original release. For this reason, BLS advises against the use of these data in escalation agreements.

Effective with the calculation of the seasonal factors for 1990, the Bureau of Labor Statistics has used an enhanced seasonal adjustment procedure called Intervention Analysis Seasonal Adjustment for some CPI series. Intervention Analysis Seasonal Adjustment allows for better estimates of seasonally adjusted data. Extreme values and/or sharp movements which might distort the seasonal pattern are estimated and removed from the data prior to calculation of seasonal factors. Beginning with the calculation of seasonal factors for 1996, X-12-ARIMA software was used for Intervention Analysis Seasonal Adjustment.

In January 2007, BLS adjusted 37 series using Intervention Analysis Seasonal Adjustment, including selected food and beverage items, fuel oil, motor fuels, vehicles, jewelry, admission to sporting events and educational books and supplies. For example, this procedure was used for the Motor fuel series to offset the effects of damage to oil refineries from Hurricane Katrina, as well as the effects of implementing new fuel requirements in the United States.

For a complete list of Intervention Analysis Seasonal Adjustment series and explanations, please refer to the article "Intervention Analysis Seasonal Adjustment", located on our website at: <http://www.bls.gov/cpi/cpisapage.htm>.

For additional information on seasonal adjustment in the CPI, please write to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Washington, DC 20212 or contact Jeff Wilson on (202) 691-6968 by e-mail at [Wilson.Jeff@bls.gov](mailto:Wilson.Jeff@bls.gov). If you have general questions about the CPI, please call our information staff at (202) 691-7000.

<sup>1</sup> Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

- M - Every month.
- 1 - January, March, May, July, September, and November.
- 2 - February, April, June, August, October, and December.

<sup>2</sup> Regions defined as the four Census regions. See technical notes.

<sup>3</sup> Indexes on a December 1996=100 base.

<sup>4</sup> Indexes on a December 1986=100 base.

<sup>5</sup> In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Phoenix-Mesa, AZ; Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA;

Tampa-St. Petersburg-Clearwater, FL.

<sup>6</sup> Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

<sup>1</sup> Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

<sup>2</sup> Regions defined as the four Census regions. See technical notes.

<sup>3</sup> Indexes on a December 1996=100 base.

<sup>4</sup> Indexes on a December 1986=100 base.

<sup>5</sup> In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Phoenix-Mesa, AZ; Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA;

Tampa-St. Petersburg-Clearwater, FL.

<sup>6</sup> Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.
