INTRODUCTION

Data from Census 2000 are presented in three printed report series:

1. PHC-1, *Summary Population and Housing Characteristics*
2. PHC-2, *Summary Social, Economic, and Housing Characteristics*
3. PHC-3, *Population and Housing Unit Counts*

The data from Census 2000 were derived from a limited number of basic questions asked of the entire population and about every housing unit (referred to as the 100-percent questions, found on the “short form”), and from additional questions asked of a sample of the population and housing units (referred to as the sample questions, found on the “long form”).

The PHC-1, *Summary Population and Housing Characteristics*, report series provides data based on the 100-percent questions. The subjects are age, Hispanic or Latino origin, household relationship, race, sex, tenure (owner- or renter-occupied), and vacancy characteristics. Land area measurements and population density also are provided. This series is similar to the 1990 census CPH-1 series.

The PHC-2, *Summary Social, Economic, and Housing Characteristics*, report series provides sample data based on both the 100-percent and the sample questions. Sample subjects include place of birth; residence in 1995; language; educational attainment and school enrollment; veteran status; disability status; employment status; journey to work; work status, earnings, income, and poverty status in 1999; physical housing characteristics; units in structure; fuel and equipment characteristics; owner and renter household characteristics, such as year owner moved into unit; home value; contract and gross rent; and mortgage and rental cost characteristics. This series is similar to the 1990 census CPH-5 series.

The PHC-3, *Population and Housing Unit Counts*, report series provides Census 2000 and historical comparisons of the 100-percent population and housing unit counts. It provides land and water area measurements, and population density. The user notes section documents geographic changes over the past decade. This series is similar to the 1990 census CPH-2 series.

In each series, there is one report for each state, the District of Columbia, and Puerto Rico, plus a United States summary report. Many tables in the United States summary reports include data for Puerto Rico.

HOW TO FIND GEOGRAPHIC AREAS AND SUBJECT MATTER DATA

This report includes a table finding guide to assist the user in locating those statistical tables that contain the desired data. The table finding guide lists alphabetically, by geographic area, the subjects shown in this report. To determine which tables in this report show data for a particular topic, find the subject in the lefthand column of the table finding guide and then look across the columns using the headings at the top for the desired type of geographic area. Figure I-1 is an example of a table finding guide.

The table finding guide does not include cross-classifications of subject-matter items. Additional information to locate data within specific reports is provided in the headnote at the top of the table finding guide and in the footnotes at the bottom of the guide.

HOW TO USE THE STATISTICAL TABLES

Parts of a Statistical Table

The census data included in printed reports are arranged in tables. Each table includes four major parts: (1) heading, (2) boxhead, (3) stub, and (4) data field. A typical census report table is illustrated in Figure I-2.

The heading consists of the table number, title, and headnote. The table number indicates the position of the table within the report, while the title is a brief statement indicating the subjects and time reference of the data presented in the table. The headnote is enclosed in brackets and is located under the title. It contains statements that qualify, explain, or provide information pertaining to the entire table.

The boxhead is under the heading. This portion of the table, which contains the individual column heads or captions, describes the data in each vertical column. In the boxhead of many tables, a spanner appears across and above two or more column heads or across two or more lower spanners. The purpose of a spanner is to classify or qualify items below it or separate the table into identifiable blocks in terms of major aspects of the data.

Figure I-1.

Table Finding Guide

SUBJECTS BY TYPE OF GEOGRAPHIC AREA AND TABLE NUMBER

The types of geographic areas covered in this report are shown on the side, and subjects are shown at the top. See PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes*, for a description of area classifications (Appendix A) and for definitions and explanations of subject characteristics (Appendix B).

| Geographic area | Population | | Housing units | | Area measurement | | Average per square mile | | Number of places |
|---|--------------------------|--------------------|----------------------|-------------------|------------------|-----------|-------------------------|---------------|------------------|

¹State, District of Columbia, or Puerto Rico.

²Parish in Louisiana; city and borough, municipality, borough, or census area in Alaska; and municipio in Puerto Rico; in Maryland, Missouri, Nevada, and Virginia, one or more cities are independent of counties and are treated as statistical equivalents of counties; the entire District of Columbia, which has no counties, is treated as a county equivalent.

³County subdivisions within the state are shown alphabetically with places for the following 12 states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

The stub is located at the left edge of the table. It includes a listing of line or row captions or descriptions. At the top of the stub is the stubhead. The stubhead is considered to be an extension of the table title and usually shows generic geographic area designations and restrictions.

In the stub, several features are used to help the user better understand the contents of the table. Usually, a block of data lines is preceded by a sidehead. The sidehead, similar to a spanner, describes and classifies the stub entries following it. The use of indentation in a stub indicates the relationship of one data line to another. Indented data lines represent subcategories that, in most instances, sum to a total. Occasionally

in tables, it is desirable to show one or more single-line subcategories that do not sum to the total.

The data field is that part of the statistical table that contains the data. It extends from the bottom of the boxhead to the bottom of the table and from the right of the stub to the right edge of the page.

Both geographic and subject-matter terms appear in tables. It is important to read the definitions of the terms used in the tables because census terms often are defined in special ways that reflect the manner in which the questions were asked and the data were tabulated. Definitions of geographic terms are provided in PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes*, Appendix A. Census tables often include derived measures such as medians, means, percentages, and ratios. These and other subject-matter terms are defined in Appendix B of the same report.

Symbols and Geographic Abbreviations

The following symbols are used in the tables and explanations of subjects covered in Census 2000 reports:

- A dash “-” represents zero or a derived measure that rounds to less than 0.1.
- (X) means not applicable. In the 1990 and earlier decennial census reports, three dots “...” meant not applicable.
- (NA) means not available.

How to Use This Census Report

-
- The superscript prefix “r” indicates that the count has been revised since the publication of the 1990 census reports, or that the area was erroneously omitted or not shown in the correct geographic relationship in the 1990 census reports. This symbol appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series.
 - A dagger “†” next to the name of a geographic area indicates that there has been a geographic change (for example, an annexation or detachment, a new incorporation, or a name change) since the information was published for the 1990 census for that area. This symbol appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series. The geographic change information for the entities in a state is shown in the “User Notes” section of the Census 2000 PHC-3 report for that state.
 - A plus sign “+” is appended to the lower bound of the highest interval when the median falls in the upper interval of an open-ended distribution. A minus sign “-” is appended to the upper bound of the lowest interval when the median falls in the lowest interval of an open-ended distribution. For more information on medians, see the section on “Derived Measures” in Appendix B.
 - A minus sign “-” preceding a figure denotes decrease. The minus sign appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series.
 - (U) means the place or place part is composed entirely of urban land area. The (U) appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series.
 - (R) means the place or place part is composed entirely of rural land area. The (R) appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series.
 - (U/R) means the place or place part is composed of both urban land area and rural land area. The (U/R) appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series.

The following geographic abbreviations and terms may be used in the tables in this report:

- A “(part)” next to the name of a geographic area in a hierarchical presentation indicates that the geographic entity is located only partially in the superior geographic entity. For example, a “(part)” next to a place name in a county subdivision-place hierarchy indicates that the place is located in more than one county subdivision. (Places also may be “split” by county, congressional district, urban/rural, metropolitan area, voting district, and other geographic boundaries, depending on the presentation.) Other geographic entities also can be “split” by a higher level entity. The exception is a tabulation block, which is unique within all geographic entities in census products.
- ANVSA is Alaska Native village statistical area.
- ANRC is Alaska Native Regional Corporation.
- CCD is census county division.
- CDP is census designated place.
- CMSA is consolidated metropolitan statistical area.
- MA is metropolitan area.
- MSA is metropolitan statistical area.
- OTSA is Oklahoma tribal statistical area.
- PMSA is primary metropolitan statistical area.
- SDAISA is state designated American Indian statistical area.
- TDSA is tribal designated statistical area.
- UT is unorganized territory.

GRAPHICS

Charts, statistical maps, and other graphic summaries are included in some Census 2000 reports.

USER NOTES

User notes include corrections, errata, and related explanatory information. This section appears directly before the statistical tables in census reports. It presents information about unique characteristics of the report and changes or corrections made too late to be reflected in the text or tables themselves. However, sometimes this information becomes available too late to be reflected even in the user notes. Census 2000 user updates are available on the Census Bureau's Internet site at www.census.gov/main/www/cen2000.html. To receive notification of user notes, subscribe to the Census Product Update (<http://www.census.gov/mp/www/cpu.html>), a biweekly e-mail newsletter available from the Customer Services Center of the Marketing Services Office at the U.S. Census Bureau, or contact the Customer Services Center directly on 301-763-INFO (4636) or at webmaster@census.gov.

APPENDIXES

Appendixes A through E, G, and H, described below, are found in the separate printed volume, PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes*, or on the Internet at <http://www.census.gov/prod/cen2000/phc-3-a.pdf>. Appendix F is included in this report.

Appendix A, Geographic Terms and Concepts. Provides definitions of the types of geographic areas and related information used in census products.

Appendix B, Definitions of Subject Characteristics. Contains definitions for the subject-matter terms used in census products, including explanations of derived measures, limitations of the data, and comparability with previous censuses. The subjects are listed alphabetically. Population characteristics are defined first, followed by the definitions of the housing subjects.

Appendix C, Data Collection and Processing Procedures. Explains the enumeration and residence rules used in counting the population and housing units in the United States and Puerto Rico. It also describes the major components of the operational plan for Census 2000, and includes a glossary of terms.

Appendix D, Questionnaire Facsimile. Presents a facsimile of the Census 2000 questionnaire used to collect the data in this report.

Appendix E, Data Products and User Assistance. Summarizes the Census 2000 data products by describing the information available in printed reports and through electronic media such as CD-ROM, DVD, and the Internet. It also describes Census 2000 maps and other geographic products, reference materials, and sources of assistance.

Appendix F, Maps. Contains maps depicting the geographic areas shown in this report.

Appendix G, Accuracy of the Data. Provides information on confidentiality of the data, imputation of housing unit status and population counts, sources of errors in the data, and editing of unacceptable data.

Appendix H, Acknowledgments. Lists many of the U.S. Census Bureau staff who participated in the various activities of Census 2000.

Table Finding Guide

SUBJECTS BY TYPE OF GEOGRAPHIC AREA AND TABLE NUMBER

The types of geographic areas covered in this report are shown on the side, and subjects are shown at the top. See PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes*, for a description of area classifications (Appendix A) and for definitions and explanations of subject characteristics (Appendix B).

¹State, District of Columbia, or Puerto Rico.

²Parish in Louisiana; city and borough, municipality, borough, or census area in Alaska; and municipio in Puerto Rico; in Maryland, Missouri, Nevada, and Virginia, one or more cities are independent of counties and are treated as statistical equivalents of counties; the entire District of Columbia, which has no counties, is treated as a county equivalent.

³County subdivisions within the state are shown alphabetically with places for the following 12 states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

User Notes

Additional information concerning this Census 2000 product may become available after this report is published. This information, called Notes and Errata, is available in portable document format (PDF) on the U.S. Census Bureau's Internet site at <http://www.census.gov/main/www/cen2000.html>. To receive notification of user notes, subscribe to the Census Product Update (<http://www.census.gov/mp/www/cpu.html>), a biweekly e-mail newsletter available from the Customer Service Center of the Marketing Services Office at the U.S. Census Bureau, or contact the Customer Services Center directly on 301-763-INFO (4636) or at webmaster@census.gov.

GENERAL NOTES

User Note 1

The user should be aware that there are limitations to many of these data. Please refer to the text provided with this report for further explanation of the limitations of the data. The population and other data shown for Census 2000 in this report is as of April 1, 2000; the boundaries used for all geographic entities are as of January 1, 2000. All boundaries are intended for Census Bureau statistical data collection and presentation only; their depiction and designation for statistical purposes do not constitute a determination of jurisdictional authority or entitlement. Corrections to the Census 2000 data as a result of certified Count Question Review changes are available from the Census Bureau's Internet site at: www.census.gov/prod/cen2000/notes/errata.pdf.

User Note 2

Data comparability for county subdivisions is shown only when the county subdivision contains substantially the same territory as reported for the 1990 census (generally defined as at least 80 percent of the previous territory) unless the county subdivision is also a place. There is no comparability provided for county subdivisions that have been extensively revised. Revised entities are noted by and within county. Changes to a geographic entity can be the result of legal change actions, statistical redefinition, correction of previous boundary or drafting errors, or new erroneous information.

Incorporated place and census designated place (CDP) comparability is provided for all places that retained their name or general area without regard to the amount of territorial change between censuses. Place comparability is not shown if the entity is new for Census 2000 (including changes from a CDP to a legally incorporated place and vice versa) or is the result of a merger that created an entirely new entity, or if a Census 2000 CDP contains less than 50 percent of the territory of a 1990 census CDP.

CORRECTION NOTES

User Note 1

The county subdivisions for which data are provided in Williamson County are precincts. All precincts in Williamson County are shown incorrectly as townships in the tables.

User Note 2

Ohlman village in Audubon township, Montgomery County, is incorrectly reported to have zero population and housing units. The correct Census 2000 population, housing unit count, and population density are shown below:

Ohlman village

| | |
|----------------------------------|-------|
| Population | 75 |
| Housing units..... | 51 |
| Population per square mile | 275.7 |

HISTORICAL NOTES

The area of Illinois was part of the original territory of the United States, being part of lands ceded by four states to the United States and designated in 1787 as the “Territory northwest of the River Ohio.” Illinois Territory was organized on February 3, 1809, from the western part of Indiana Territory, and included all of present-day Illinois, most of Wisconsin, the western part of the Upper Peninsula of Michigan, and northeastern Minnesota. Illinois was admitted to the Union on December 3, 1818, as the 21st state, with generally the same boundary as the present state.

Census data for Illinois are available beginning with the 1800 census. The 1810 population is for the entire area of the Illinois Territory, including territory not in the present state. For an explanation of the revision to the 1800 population of Illinois, see Richard L. Forstall, *Population of States and Counties of the United States: 1790-1990*, Washington, DC: U.S. Government Printing Office, 1996, page 48.

GEOGRAPHIC NOTES

User Note 1

Illinois is divided into 102 counties. The 1,708 county subdivisions in the state include 1,433 governmentally functioning townships and 273 election precincts; 85 counties contain townships and 17 counties contain precincts (these numbers reflect the correction for Williamson County). There is one exception: one incorporated place, Chicago city, is independent of any township, and therefore is treated by the Census Bureau as equivalent to a county subdivision in each of the two counties—Cook and DuPage—in which the city is located. The Census Bureau identifies two areas in Lake Michigan that are not within a county subdivision; these areas are not assigned to any county subdivision and are not counted in the number of county subdivisions.

There are 1,287 incorporated places and 26 CDPs in Illinois. Some incorporated places are geographically coextensive with a single precinct or township. Cicero town is governmentally consolidated as well as geographically coextensive with Cicero township, Cook County; there are an additional 19 incorporated places that are geographically coextensive with a governmentally functioning township where each entity has its own set of officials. Incorporated places in the state are legally described as cities, towns, and villages. The Census Bureau treats all incorporated places (except for Chicago) and CDPs as dependent within townships or precincts.

User Note 2

Table 5 does not show revised 1990 census counts for places that were located in more than one county subdivision. These places are listed below. Revisions to the 1990 census counts for whole places (indicated by the superscript prefix “r” next to the figure) can be found in Table 6.

Woodridge village (part), DuPage County
Woodstock city, McLean County
Yorkville city, Kendall County

GEOGRAPHIC CHANGE NOTES

The Geographic Change Notes listed below document high-level geographic entities—counties, county subdivisions, and places—that are different from the information reported in the 1990 census. The notes identify geographic entities whose name and/or boundary have changed, entities that no longer exist, newly established entities (both legal and statistical), and changes in geographic relationships, such as places that exist in one county and have expanded into or withdrawn from another county (the notes do not identify the other county(ies) in which the entity exists; this can be determined from the Table listing all places in this publication) and places that have become independent of or dependent within one or more county subdivisions. The changes are reported by and within county. A few of the reported changes in name, legal status, or legal relationship may be incorrect; if so, the correct version is shown in any Correction Notes section above. Some changes are the result of legal actions that took place prior to the 1990 census, but were not reported in that census.

The change notes for previous censuses reported only changes that occurred primarily as the result of specific legal actions, as well as identifiable revisions to statistical entities (primarily

county subdivisions). For Census 2000, the notes reflect any boundary change that affects a geographic entity, regardless of whether it is the result of legal action, redefinition of a statistical entity, correction of a previous boundary-reporting or -drafting error, or new erroneous information. For example, the county-level text "all districts revised" may reflect a legal redistricting of all county subdivisions in the county, a major or minor relocation of county subdivision boundaries due to more accurate mapping or more accurate boundary information, or a combination of these that, in one way or another, affect every county subdivision in a county. In states whose legal entities rarely undergo a legal boundary change, such as the New England states, most of the entities reported to have exchanged, gained, or lost territory did so as the result of mapping changes, not legal actions. The extent and location of the boundary changes affecting any particular entity can be determined by comparing the TIGER/Line® Files, Cartographic Boundary Files, or a comparable set of maps for the 1990 and 2000 censuses.

Adams County, Illinois

Clayton township..... lost territory to Northeast township.
 Clayton village..... gained territory.
 Ellington township exchanged territory with Quincy township.
 Golden village gained territory.
 Liberty village gained territory.
 Loraine village gained territory.
 Melrose township exchanged territory with Quincy township.
 Northeast township gained territory from Clayton township.
 Plainville village gained territory.
 Quincy city..... gained and lost territory.
 Quincy township exchanged territory with Ellington, Melrose, and
 Riverside townships.
 Riverside township exchanged territory with Quincy township.
 Ursa village gained territory.

Alexander County, Illinois

Cache precinct..... lost territory to Cairo precinct.
 Cairo city gained territory.
 Cairo precinct..... gained territory from Cache precinct.
 Tamms village gained and lost territory.

Bond County, Illinois

Greenville city gained and lost territory.
 Mulberry Grove village gained territory.
 Panama village lost territory.
 Smithboro village..... gained territory.

Boone County, Illinois

Belvidere city gained and lost territory.
 Caledonia village new incorporated place.
 Capron village gained territory.
 Loves Park city expanded into Boone County.
 Poplar Grove village gained and lost territory.
 Timberlane village..... new incorporated place.

Brown County, Illinois

Mount Sterling city gained territory.

Bureau County, Illinois

Cherry village..... gained and lost territory.
Dalzell village..... gained territory.
De Pue village gained territory.
Fairfield township lost territory to Gold township.
Gold township..... gained territory from Fairfield township.
La Moille village gained territory.
Ladd village..... gained and lost territory.
Malden village gained territory.
Ohio village..... gained and lost territory.
Princeton city gained and lost territory.
Seatonville village gained territory.
Sheffield village..... gained and lost territory.
Spring Valley city gained territory.
Tiskilwa village gained territory.
Walnut village..... gained and lost territory.
Wyanet village lost territory.

Calhoun County, Illinois

Brussels village gained territory.
Hardin village..... gained territory.
Kampsville village lost territory.

Carroll County, Illinois

Chadwick village gained territory.
Lanark city gained territory.
Milledgeville village gained territory.
Mount Carroll city gained territory.
Savanna city gained territory.
Thomson village..... gained territory.

Cass County, Illinois

Ashland village gained territory.
Beardstown city gained and lost territory.
Chandlerville township..... lost territory to Panther Creek township.
Chandlerville village..... gained and lost territory.
Panther Creek township..... gained territory from Chandlerville township.
Virginia city gained and lost territory.

Champaign County, Illinois

Bondville village gained and lost territory.
Champaign City township..... exchanged territory with Cunningham township; gained territory from Champaign, Hensley, and Somer townships.
Champaign city..... gained and lost territory.
Champaign township..... lost territory to Champaign City township.
Cunningham township exchanged territory with Champaign City and Urbana townships; gained territory from Somer township.
Fisher village gained territory.
Gifford village gained territory.
Hensley township lost territory to Champaign City township.
Homer village..... gained and lost territory.
Lake of the Woods CDP..... gained and lost territory.
Mahomet village gained territory.

Champaign County, Illinois—Con.

Ogden village..... gained territory.
Philo village..... gained territory.
Rantoul village..... gained territory.
Royal village..... gained territory.
St. Joseph village..... gained territory.
Savoy village..... gained and lost territory.
Somerset township..... lost territory to Champaign City and Cunningham townships.
Tolono village..... gained territory.
Urbana city..... gained and lost territory.
Urbana township..... exchanged territory with Cunningham township.

Christian County, Illinois..... gained territory from Sangamon County.

Edinburg village..... gained territory.
Jeiseyville village..... name changed to Jeisyville.
Jeisyville village..... name changed from Jeiseyville.
Kincaid village..... gained territory.
Morrisonville village..... gained territory.
Mount Auburn township..... gained territory from Illiopolis township, Sangamon County.
Moweaqua village..... lost territory.
Pana city..... gained territory.
Stonington village..... gained and lost territory.
Taylorville city..... gained and lost territory.

Clark County, Illinois

Marshall city..... gained territory.
Martinsville city..... gained territory.

Clay County, Illinois

Clay City village..... gained territory.
Flora city..... gained and lost territory.
Louisville village..... gained territory.
Xenia village..... gained and lost territory.

Clinton County, Illinois

Albers village..... gained and lost territory.
Aviston village..... gained territory.
Bartelso village..... gained and lost territory.
Beckemeyer village..... gained territory.
Breese city..... gained territory.
Carlyle city..... gained and lost territory.
Centralia city..... gained territory.
Clement township..... gained territory from Irishtown township.
Damiansville village..... gained territory.
Germantown village..... gained and lost territory.
Hoffman village..... gained territory.
Irishtown township..... lost territory to Clement township.
New Baden village..... gained and lost territory.
Trenton city..... gained territory.
Wamac city..... gained territory.

Rock City village gained and lost territory.
Silver Creek township exchanged territory with Freeport township.

Tazewell County, Illinois

Armington village lost territory.
Creve Coeur village..... lost territory.
Delavan city gained territory.
Dillon township..... gained territory from Hopedale township.
East Peoria city gained and lost territory.
Goodfield village gained and lost territory.
Green Valley village gained territory.
Hopedale township..... lost territory to Dillon township.
Hopedale village..... gained territory.
Mackinaw village gained territory.
Marquette Heights city gained territory.
Minier village gained territory.
Morton village gained territory.
North Pekin village gained territory.
Pekin city gained and lost territory.
South Pekin village gained territory.
Washington city gained and lost territory.

Union County, Illinois

Anna city..... gained territory.
Cobden village..... gained territory.
Jonesboro city gained territory.

Vermilion County, Illinois

Bismarck village new incorporated place.
Catlin village..... gained territory.
Danville city gained and lost territory.
Fairmount village..... gained territory.
Georgetown city..... gained territory.
Hoopeston city gained and lost territory.
Oakwood village..... gained territory.
Tilton village..... gained and lost territory.

Wabash County, Illinois

Mount Carmel city..... gained territory.

Warren County, Illinois

Alexis village gained territory.
Kirkwood village..... gained territory.
Monmouth city gained and lost territory.

Washington County, Illinois

Centralia city expanded into Washington County.
Irvington village gained territory.
Nashville city gained and lost territory.
Oakdale village gained territory.
Okawville village gained territory.
Richview village gained territory.
Wamac city..... gained territory.

Wayne County, Illinois

Cisne village gained territory.
Fairfield city gained and lost territory.
Golden Gate village..... gained and lost territory.

Wayne County, Illinois—Con.

Mill Shoals village gained and lost territory.
Mount Erie village gained territory.
Wayne City village gained and lost territory.

White County, Illinois

Carmi city gained and lost territory.
Mill Shoals village gained and lost territory.
Norris City village gained and lost territory.
Springerton village gained and lost territory.

Whiteside County, Illinois

Albany village gained territory.
Erie village gained territory.
Fulton city gained territory.
Morrison city gained territory.
Prophetstown city gained territory.
Rock Falls city gained and lost territory.
Sterling city gained and lost territory.
Tampico village gained and lost territory.

Will County, Illinois

Aurora city expanded into Will County.
Beecher village gained territory.
Bolingbrook village gained and lost territory.
Braidwood city gained and lost territory.
Channahon village gained and lost territory.
Coal City village expanded into Will County.
Crest Hill city gained and lost territory.
Crete village gained territory.
Crystal Lawns CDP gained and lost territory.
Diamond village gained territory.
Elwood village gained territory.
Fairmont CDP gained and lost territory.
Frankfort Square CDP gained and lost territory.
Frankfort village gained and lost territory.
Goodings Grove CDP gained territory.
Homer township gained territory from New Lenox township.
Ingalls Park CDP gained and lost territory.
Jackson township gained territory from Joliet township.
Joliet city gained and lost territory.
Joliet township lost territory to Jackson township.
Lakewood Shores CDP gained and lost territory.
Lemont village expanded into Will County.
Lockport city gained and lost territory.
Manhattan village gained and lost territory.
Matteson village expanded into Will County.
Minooka village gained and lost territory.
Mokena village gained and lost territory.
Monee village gained territory.
Naperville city gained and lost territory.
New Lenox township lost territory to Homer township.

Will County, Illinois—Con.

New Lenox village gained and lost territory.
Orland Park village expanded into Will County.
Park Forest village gained and lost territory.
Peotone village gained and lost territory.
Plainfield village gained and lost territory.
Preston Heights CDP gained and lost territory.
Rockdale village gained and lost territory.
Romeoville village gained and lost territory.
Sauk Village village gained territory.
Shorewood village gained and lost territory.
Steger village gained territory.
Tinley Park village gained and lost territory.
University Park village gained and lost territory.
Willowbrook CDP gained territory.
Wilmington city gained and lost territory.
Woodridge village gained and lost territory.

Williamson County, Illinois all precincts erroneously shown as changing legal description to township.

Cambria village gained and lost territory.
Carterville city gained and lost territory.
Crainville village gained and lost territory.
Creal Springs city gained territory.
Energy village gained and lost territory.
Herrin city gained and lost territory.
Hurst city gained territory.
Johnston City city gained and lost territory.
Marion city gained and lost territory.
Stonefort village lost territory.

Winnebago County, Illinois

Burritt township gained territory from Winnebago township.
Cherry Valley village gained and lost territory.
Durand village gained and lost territory.
Loves Park city gained and lost territory.
Machesney Park village gained and lost territory.
New Millford village gained territory.
Owen township gained territory from Rockton and Roscoe townships.
Pecatonica township exchanged territory with Seward township.
Pecatonica village gained and lost territory.
Rockford city gained and lost territory.
Rockton township lost territory to Owen township.
Rockton village gained territory.
Roscoe township lost territory to Owen township.
Roscoe village gained and lost territory.
Seward township exchanged territory with Pecatonica township.
South Beloit city gained and lost territory.
Winnebago township lost territory to Burritt township.
Winnebago village gained territory.

Woodford County, Illinois

Benson village gained territory.
Congerville village..... gained territory.
Cruger township..... gained territory from Olio township.
El Paso city..... gained territory.
Eureka city..... gained territory.
Germantown Hills village gained and lost territory.
Goodfield village gained and lost territory.
Kansas township lost territory to Palestine township.
Metamora village gained territory.
Minonk city gained territory.
Montgomery township lost territory to Palestine township.

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "-") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

| State Place and [in Selected States] County Subdivision | 2000 urban (U) or rural (R) land area | Population | | | Housing units | | | 2000 area measurements in square miles | | 2000 average per square mile | |
|---|--|------------|---------|--------|---------------|--------|--------|---|-----------|---------------------------------|------------------|
| | | 2000 | 1990 | 1980 | 2000 | 1990 | 1980 | Total area | Land area | Population | Housing units |

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "–") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

| State Place and [in Selected States] County Subdivision | 2000 urban (U) or rural (R) land area | Population | | | Housing units | | | 2000 area measurements in square miles | | 2000 average per square mile | |
|---|--|------------|----------|--------|---------------|----------|--------|---|-----------|---------------------------------|------------------|
| | | 2000 | 1990 | 1980 | 2000 | 1990 | 1980 | Total area | Land area | Population | Housing units |

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

| State Place and [in Selected States] County Subdivision | 2000 urban (U) or rural (R) land area | Population | | | Housing units | | | 2000 area measurements in square miles | | 2000 average per square mile | |
|---|--|------------|----------|--------|---------------|---------|-------|---|-----------|---------------------------------|------------------|
| | | 2000 | 1990 | 1980 | 2000 | 1990 | 1980 | Total area | Land area | Population | Housing units |

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "-") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

| State Place and [in Selected States] County Subdivision | 2000 urban (U) or rural (R) land area | Population | | | Housing units | | | 2000 area measurements in square miles | | 2000 average per square mile | |
|---|--|------------|--------|--------|---------------|--------|--------|---|-----------|---------------------------------|------------------|
| | | 2000 | 1990 | 1980 | 2000 | 1990 | 1980 | Total area | Land area | Population | Housing units |

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

| State Place and [in Selected States] County Subdivision | 2000 urban (U) or rural (R) land area | Population | | | Housing units | | | 2000 area measurements in square miles | | 2000 average per square mile | |
|---|--|------------|--------|--------|---------------|--------|--------|---|-----------|---------------------------------|------------------|
| | | 2000 | 1990 | 1980 | 2000 | 1990 | 1980 | Total area | Land area | Population | Housing units |

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

| State Place and [in Selected States] County Subdivision | 2000 urban (U) or rural (R) land area | Population | | | Housing units | | | 2000 area measurements in square miles | | 2000 average per square mile | |
|---|--|------------|--------|--------|---------------|--------|--------|---|-----------|---------------------------------|------------------|
| | | 2000 | 1990 | 1980 | 2000 | 1990 | 1980 | Total area | Land area | Population | Housing units |

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

| State Place and [in Selected States] County Subdivision | 2000 urban (U) or rural (R) land area | Population | | | Housing units | | | 2000 area measurements in square miles | | 2000 average per square mile | |
|---|--|------------|--------|--------|---------------|-------|-------|---|-----------|---------------------------------|------------------|
| | | 2000 | 1990 | 1980 | 2000 | 1990 | 1980 | Total area | Land area | Population | Housing units |

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

| State Place and [in Selected States] County Subdivision | 2000 urban (U) or rural (R) land area | Population | | | Housing units | | | 2000 area measurements in square miles | | 2000 average per square mile | |

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

| State Place and [in Selected States] County Subdivision | 2000 urban (U) or rural (R) land area | Population | | | Housing units | | | 2000 area measurements in square miles | | 2000 average per square mile | |
|---|--|------------|---------|---------|---------------|----------|--------|---|-----------|---------------------------------|------------------|
| | | 2000 | 1990 | 1980 | 2000 | 1990 | 1980 | Total area | Land area | Population | Housing units |

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "–") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

| State Place and [in Selected States] County Subdivision | 2000 urban (U) or rural (R) land area | Population | | | Housing units | | | 2000 area measurements in square miles | | 2000 average per square mile | |
|---|--|------------|--------|--------|---------------|-------|-------|---|-----------|---------------------------------|------------------|
| | | 2000 | 1990 | 1980 | 2000 | 1990 | 1980 | Total area | Land area | Population | Housing units |

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

| State Place and [in Selected States] County Subdivision | 2000 urban (U) or rural (R) land area | Population | | | Housing units | | | 2000 area measurements in square miles | | 2000 average per square mile | |
|---|--|------------|--------|--------|---------------|--------|-------|---|-----------|---------------------------------|------------------|
| | | 2000 | 1990 | 1980 | 2000 | 1990 | 1980 | Total area | Land area | Population | Housing units |

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

| State Place and [in Selected States] County Subdivision | 2000 urban (U) or rural (R) land area | Population | | | Housing units | | | 2000 area measurements in square miles | | 2000 average per square mile | |

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "—") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

Appendixes

Several appendixes traditionally found in printed reports are now available in a separate volume. See PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes*, in print or on the Internet at <http://www.census.gov/prod/cen2000/phc-3-a.pdf> for the following:

- Appendix A. Geographic Terms and Concepts
- Appendix B. Definitions of Subject Characteristics
- Appendix C. Data Collection and Processing Procedures
- Appendix D. Questionnaire
- Appendix E. Data Products and User Assistance
- Appendix G. Accuracy of the Data
- Appendix H. Acknowledgments

This Appendix section contains:

- Appendix F. Maps

Appendix F. Maps

Counties

County Subdivision Outline Map Legend and County Location Index

Map Legend

| | |
|-----------------|--|
| ----- | State |
| ERIE | County |
| ----- YORK | County Subdivision ¹ |
| ----- ROME | Incorporated Place ¹ |
| ----- Zena | Census Designated Place |
| ----- Lake Erie | Large River, Lake, Water Body, or Shoreline |
| ←→ | A fishhook joins contiguous and/or discontinuous parts of the same geographic entity |

Map Sections

¹ A ¹ following a place name indicates that the place is coextensive with a separate county subdivision. The county subdivision name is shown only if different than the name of the place. A ¹⁰¹ following a place name indicates that the place is an independent place or independent city. An independent place is not part of any legal county subdivision and thus serves as the statistical equivalent of a legal county subdivision. An independent city is not part of any county or legal county subdivision and thus serves as both the statistical equivalent of a county and a legal county subdivision. The name for the county subdivision is always the same as that of the place and never shown separately on the map.

Note: All legal boundaries and names are as of January 1, 2000. Where state, county, and/or county subdivision boundaries coincide, the map shows the boundary symbol for the highest level of these geographic entities. The county boundary is always shown. Where a county subdivision boundary coincides with a place boundary, the map does not show the place boundary symbol. Any geographic entity name may include '(pt.)' if some portion of the entity extends beyond the limits of the map area displayed on the page, or if multiple discontinuous pieces of the entity have been discretely labeled on the page. A geographic entity name may include '(pts.)' if many discontinuous pieces exist for that entity that cannot be discretely labeled. The boundaries shown on this map are for Census Bureau statistical data collection and tabulation purposes only; their depiction and designation for statistical purposes does not constitute a determination of jurisdictional authority or rights of ownership or entitlement.

County Location Index

This list presents the reference coordinates for each county on the county subdivision outline map. Map section numbers refer to the county subdivision outline maps only.
