INTRODUCTION

Data from Census 2000 are presented in three printed report series:

1. PHC-1, *Summary Population and Housing Characteristics*
2. PHC-2, *Summary Social, Economic, and Housing Characteristics*
3. PHC-3, *Population and Housing Unit Counts*

The data from Census 2000 were derived from a limited number of basic questions asked of the entire population and about every housing unit (referred to as the 100-percent questions, found on the “short form”), and from additional questions asked of a sample of the population and housing units (referred to as the sample questions, found on the “long form”).

The PHC-1, *Summary Population and Housing Characteristics*, report series provides data based on the 100-percent questions. The subjects are age, Hispanic or Latino origin, household relationship, race, sex, tenure (owner- or renter-occupied), and vacancy characteristics. Land area measurements and population density also are provided. This series is similar to the 1990 census CPH-1 series.

The PHC-2, *Summary Social, Economic, and Housing Characteristics*, report series provides sample data based on both the 100-percent and the sample questions. Sample subjects include place of birth; residence in 1995; language; educational attainment and school enrollment; veteran status; disability status; employment status; journey to work; work status, earnings, income, and poverty status in 1999; physical housing characteristics; units in structure; fuel and equipment characteristics; owner and renter household characteristics, such as year owner moved into unit; home value; contract and gross rent; and mortgage and rental cost characteristics. This series is similar to the 1990 census CPH-5 series.

The PHC-3, *Population and Housing Unit Counts*, report series provides Census 2000 and historical comparisons of the 100-percent population and housing unit counts. It provides land and water area measurements, and population density. The user notes section documents geographic changes over the past decade. This series is similar to the 1990 census CPH-2 series.

In each series, there is one report for each state, the District of Columbia, and Puerto Rico, plus a United States summary report. Many tables in the United States summary reports include data for Puerto Rico.

HOW TO FIND GEOGRAPHIC AREAS AND SUBJECT MATTER DATA

This report includes a table finding guide to assist the user in locating those statistical tables that contain the desired data. The table finding guide lists alphabetically, by geographic area, the subjects shown in this report. To determine which tables in this report show data for a particular topic, find the subject in the lefthand column of the table finding guide and then look across the columns using the headings at the top for the desired type of geographic area. Figure I-1 is an example of a table finding guide.

The table finding guide does not include cross-classifications of subject-matter items. Additional information to locate data within specific reports is provided in the headnote at the top of the table finding guide and in the footnotes at the bottom of the guide.

HOW TO USE THE STATISTICAL TABLES

Parts of a Statistical Table

The census data included in printed reports are arranged in tables. Each table includes four major parts: (1) heading, (2) boxhead, (3) stub, and (4) data field. A typical census report table is illustrated in Figure I-2.

The heading consists of the table number, title, and headnote. The table number indicates the position of the table within the report, while the title is a brief statement indicating the subjects and time reference of the data presented in the table. The headnote is enclosed in brackets and is located under the title. It contains statements that qualify, explain, or provide information pertaining to the entire table.

The boxhead is under the heading. This portion of the table, which contains the individual column heads or captions, describes the data in each vertical column. In the boxhead of many tables, a spanner appears across and above two or more column heads or across two or more lower spanners. The purpose of a spanner is to classify or qualify items below it or separate the table into identifiable blocks in terms of major aspects of the data.

SUBJECTS BY TYPE OF GEOGRAPHIC AREA AND TABLE NUMBER

The types of geographic areas covered in this report are shown on the side, and subjects are shown at the top. See PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes*, for a description of area classifications (Appendix A) and for definitions and explanations of subject characteristics (Appendix B).

¹State, District of Columbia, or Puerto Rico.
²Parish in Louisiana; city and borough, municipality, borough, or census area in Alaska; and municipio in Puerto Rico; in Maryland, Missouri, Nevada, and Virginia, one or more cities are independent of counties and are treated as statistical equivalents of counties; the entire District of Columbia, which has no counties, is treated as a county equivalent.
³County subdivisions within the state are shown alphabetically with places for the following 12 states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

-
- The superscript prefix “r” indicates that the count has been revised since the publication of the 1990 census reports, or that the area was erroneously omitted or not shown in the correct geographic relationship in the 1990 census reports. This symbol appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series.
 - A dagger “†” next to the name of a geographic area indicates that there has been a geographic change (for example, an annexation or detachment, a new incorporation, or a name change) since the information was published for the 1990 census for that area. This symbol appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series. The geographic change information for the entities in a state is shown in the “User Notes” section of the Census 2000 PHC-3 report for that state.
 - A plus sign “+” is appended to the lower bound of the highest interval when the median falls in the upper interval of an open-ended distribution. A minus sign “-” is appended to the upper bound of the lowest interval when the median falls in the lowest interval of an open-ended distribution. For more information on medians, see the section on “Derived Measures” in Appendix B.
 - A minus sign “-” preceding a figure denotes decrease. The minus sign appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series.
 - (U) means the place or place part is composed entirely of urban land area. The (U) appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series.
 - (R) means the place or place part is composed entirely of rural land area. The (R) appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series.
 - (U/R) means the place or place part is composed of both urban land area and rural land area. The (U/R) appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series.

The following geographic abbreviations and terms may be used in the tables in this report:

- A “(part)” next to the name of a geographic area in a hierarchical presentation indicates that the geographic entity is located only partially in the superior geographic entity. For example, a “(part)” next to a place name in a county subdivision-place hierarchy indicates that the place is located in more than one county subdivision. (Places also may be “split” by county, congressional district, urban/rural, metropolitan area, voting district, and other geographic boundaries, depending on the presentation.) Other geographic entities also can be “split” by a higher level entity. The exception is a tabulation block, which is unique within all geographic entities in census products.
- ANVSA is Alaska Native village statistical area.
- ANRC is Alaska Native Regional Corporation.
- CCD is census county division.
- CDP is census designated place.
- CMSA is consolidated metropolitan statistical area.
- MA is metropolitan area.
- MSA is metropolitan statistical area.
- OTSA is Oklahoma tribal statistical area.
- PMSA is primary metropolitan statistical area.
- SDAISA is state designated American Indian statistical area.
- TDSA is tribal designated statistical area.
- UT is unorganized territory.

USER NOTES

User notes include corrections, errata, and related explanatory information. This section appears directly before the statistical tables in census reports. It presents information about unique characteristics of the report and changes or corrections made too late to be reflected in the text or tables themselves. However, sometimes this information becomes available too late to be reflected even in the user notes. Census 2000 user updates are available on the Census Bureau's Internet site at www.census.gov/main/www/cen2000.html. To receive notification of user notes, subscribe to the Census Product Update (<http://www.census.gov/mp/www/cpu.html>), a biweekly e-mail newsletter available from the Customer Services Center of the Marketing Services Office at the U.S. Census Bureau, or contact the Customer Services Center directly on 301-763-INFO (4636) or at webmaster@census.gov.

APPENDIXES

Appendixes A through E, G, and H, described below, are found in the separate printed volume, PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes*, or on the Internet at <http://www.census.gov/prod/cen2000/phc-3-a.pdf>. Appendix F is included in this report.

Appendix A, Geographic Terms and Concepts. Provides definitions of the types of geographic areas and related information used in census products.

Appendix B, Definitions of Subject Characteristics. Contains definitions for the subject-matter terms used in census products, including explanations of derived measures, limitations of the data, and comparability with previous censuses. The subjects are listed alphabetically. Population characteristics are defined first, followed by the definitions of the housing subjects.

Appendix C, Data Collection and Processing Procedures. Explains the enumeration and residence rules used in counting the population and housing units in the United States and Puerto Rico. It also describes the major components of the operational plan for Census 2000, and includes a glossary of terms.

Appendix D, Questionnaire Facsimile. Presents a facsimile of the Census 2000 questionnaire used to collect the data in this report.

Appendix E, Data Products and User Assistance. Summarizes the Census 2000 data products by describing the information available in printed reports and through electronic media such as CD-ROM, DVD, and the Internet. It also describes Census 2000 maps and other geographic products, reference materials, and sources of assistance.

Appendix F, Maps. Contains maps depicting the geographic areas shown in this report.

Appendix G, Accuracy of the Data. Provides information on confidentiality of the data, imputation of housing unit status and population counts, sources of errors in the data, and editing of unacceptable data.

Appendix H, Acknowledgments. Lists many of the U.S. Census Bureau staff who participated in the various activities of Census 2000.

¹State, District of Columbia, or Puerto Rico.

²Parish in Louisiana; city and borough, municipality, borough, or census area in Alaska; and municipio in Puerto Rico; in Maryland, Missouri, Nevada, and Virginia, one or more cities are independent of counties and are treated as statistical equivalents of counties; the entire District of Columbia, which has no counties, is treated as a county equivalent.

³County subdivisions within the state are shown alphabetically with places for the following 12 states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

GENERAL NOTES

User Note 1

In Alaska, the entity equivalent to a county is termed a borough, census area, city and borough, or municipality. All references to "county" in the user notes refer to these entity types.

User Note 2

The user should be aware that there are limitations to many of these data. Please refer to the text provided with this report for further explanation of the limitations of the data. The population and other data shown for Census 2000 in this report is as of April 1, 2000; the boundaries used for all geographic entities are as of January 1, 2000. All boundaries are intended for Census Bureau statistical data collection and presentation only; their depiction and designation for statistical purposes do not constitute a determination of jurisdictional authority or entitlement. Corrections to the Census 2000 data as a result of certified Count Question Review changes are available from the Census Bureau's Internet site at: www.census.gov/prod/cen2000/notes/errata.pdf.

User Note 3

Data comparability for county subdivisions is shown only when the county subdivision contains substantially the same territory as reported for the 1990 census (generally defined as at least 80 percent of the previous territory). There is no comparability provided for county subdivisions that have been extensively revised. Revised entities are noted by and within borough, census area, city and borough, and municipality. Changes to a geographic entity can be the result of legal change actions, statistical redefinition, correction of previous boundary or drafting errors, or new erroneous information.

Incorporated place and census designated place (CDP) comparability is provided for all places that retained their name or general area without regard to the amount of territorial change between censuses. Place comparability is not shown if the entity is new for Census 2000 (including changes from a CDP to a legally incorporated place and vice versa) or is the result of a merger that created an entirely new entity, or if a Census 2000 CDP contains less than 50 percent of the territory of a 1990 census CDP.

HISTORICAL NOTES

The United States acquired the area of Alaska by purchase from Russia in 1867, with generally the same boundary as the present state. The formal boundary between the southeastern portion of Alaska and Canada was settled by treaty in 1903. Alaska Territory was organized on August 24, 1912. Alaska was admitted to the Union on January 3, 1959, as the 49th state.

Alaska was not enumerated in the 1870 census even though the area was part of the United States. Census data for Alaska are available beginning with the 1880 census.

GEOGRAPHIC NOTES

User Note 1

Alaska is partially divided into 16 legal entities identified in state law as boroughs, but having legal descriptions of borough (12), city and borough (3), and municipality (1). The Census Bureau treats these entities as equivalent to counties in other states. Three county-level entities are legally referred to as unified home rule boroughs: Anchorage Municipality, Juneau City and Borough, and Sitka City and Borough. Each is governmentally and geographically consolidated with a place-level entity with the same name and legal description. Yakutat City and Borough is a non-unified home rule borough; the Census Bureau does not treat it as governmentally consolidated with any incorporated place because state law allows cities to incorporate within such an entity. The remainder of the state is legally referred to as the unorganized borough. For census data presentation purposes, officials of the state of Alaska, in cooperation with the Census Bureau, subdivided the unorganized borough into 11 statistical entities termed census areas. The county-level entities are subdivided into 36 census subareas, which are statistical subdivisions delineated for presentation of decennial census data.

There are 148 incorporated places and 201 CDPs in Alaska. Incorporated places in the state are legally described as cities, city and boroughs, and the one municipality. The Census Bureau treats all incorporated places and CDPs as dependent within census subareas.

User Note 2

Denali Borough was organized from part of Southeast Fairbanks and Yukon-Koyukuk Census Areas in 1990. Yakutat City and Borough was organized from part of Skagway-Yakutat-Angoon Census Area in 1992. Skagway-Yakutat-Angoon Census Area was renamed Skagway-Hoonah-Angoon Census Area in 1992. Several legal entities, previously referred to as boroughs, have been re-identified to reflect the correct legal description. Anchorage municipality was Anchorage city prior to 2000. Juneau, Sitka, and Yakutat are each now referred to as a “city and borough.”

Boroughs and census areas replace census divisions of 1970 and election districts of 1960 as county equivalents; 1970 and 1960 figures are shown where comparable data are available. Aleutians East Borough was created from part of Aleutian Islands Census Area and Dillingham Census Area in 1987. Aleutians West Census Area was created in 1990 from balance of Aleutian Islands Census Area that did not become part of Aleutians East Borough. Lake and Peninsula Borough was created from part of Dillingham Census Area in 1989. Northwest Arctic Borough was created from Kobuk Census Area and part of North Slope Borough in 1982.

GEOGRAPHIC CHANGE NOTES

The Geographic Change Notes listed below document high-level geographic entities—counties, county subdivisions, and places—that are different from the information reported in the 1990 census. The notes identify geographic entities whose name and/or boundary have changed, entities that no longer exist, newly established entities (both legal and statistical), and changes in geographic relationships, such as places that exist in one county and have expanded into or withdrawn from another county (the notes do not identify the other county(ies) in which the entity exists; this can be determined from the Table listing all places in this publication) and places that have become independent of or dependent within one or more county subdivisions. The changes are reported by and within county. A few of the reported changes in name, legal status, or legal relationship may be incorrect; if so, the correct version is shown in any Correction Notes section above. Some changes are the result of legal actions that took place prior to the 1990 census, but were not reported in that census.

The change notes for previous censuses reported only changes that occurred primarily as the result of specific legal actions, as well as identifiable revisions to statistical entities (primarily county subdivisions). For Census 2000, the notes reflect any boundary change that affects a geographic entity, regardless of whether it is the result of legal action, redefinition of a statistical

entity, correction of a previous boundary-reporting or -drafting error, or new erroneous information. For example, the county-level text “all districts revised” may reflect a legal redistricting of all county subdivisions in the county, a major or minor relocation of county subdivision boundaries due to more accurate mapping or more accurate boundary information, or a combination of these that, in one way or another, affect every county subdivision in a county. In states whose legal entities rarely undergo a legal boundary change, such as the New England states, most of the entities reported to have exchanged, gained, or lost territory did so as the result of mapping changes, not legal actions. The extent and location of the boundary changes affecting any particular entity can be determined by comparing the TIGER/Line® Files, Cartographic Boundary Files, or a comparable set of maps for the 1990 and 2000 censuses.

Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "-") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "–") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. Table 6. Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000—Con.

[For information concerning historical counts, see "User Notes." A place or place part is designated as (U) if it has entirely urban land area, as (R) if it has entirely rural land area, or as (U/R) if it has both urban land area and rural land area. An entity shown as entirely urban (U) may have rural water area, which is not included in the total area shown. An entity with land area rounding to less than 0.01 in square miles (shown as "-") has a small amount of land area in square meters (less than 12,949 square meters). Density computed using land area. For information on nonsampling error and definitions, see text]

Map Sections

¹ A "*" following a place name indicates that the place is coextensive with a separate census subarea. The census subarea name is shown only if different than the name of the place.

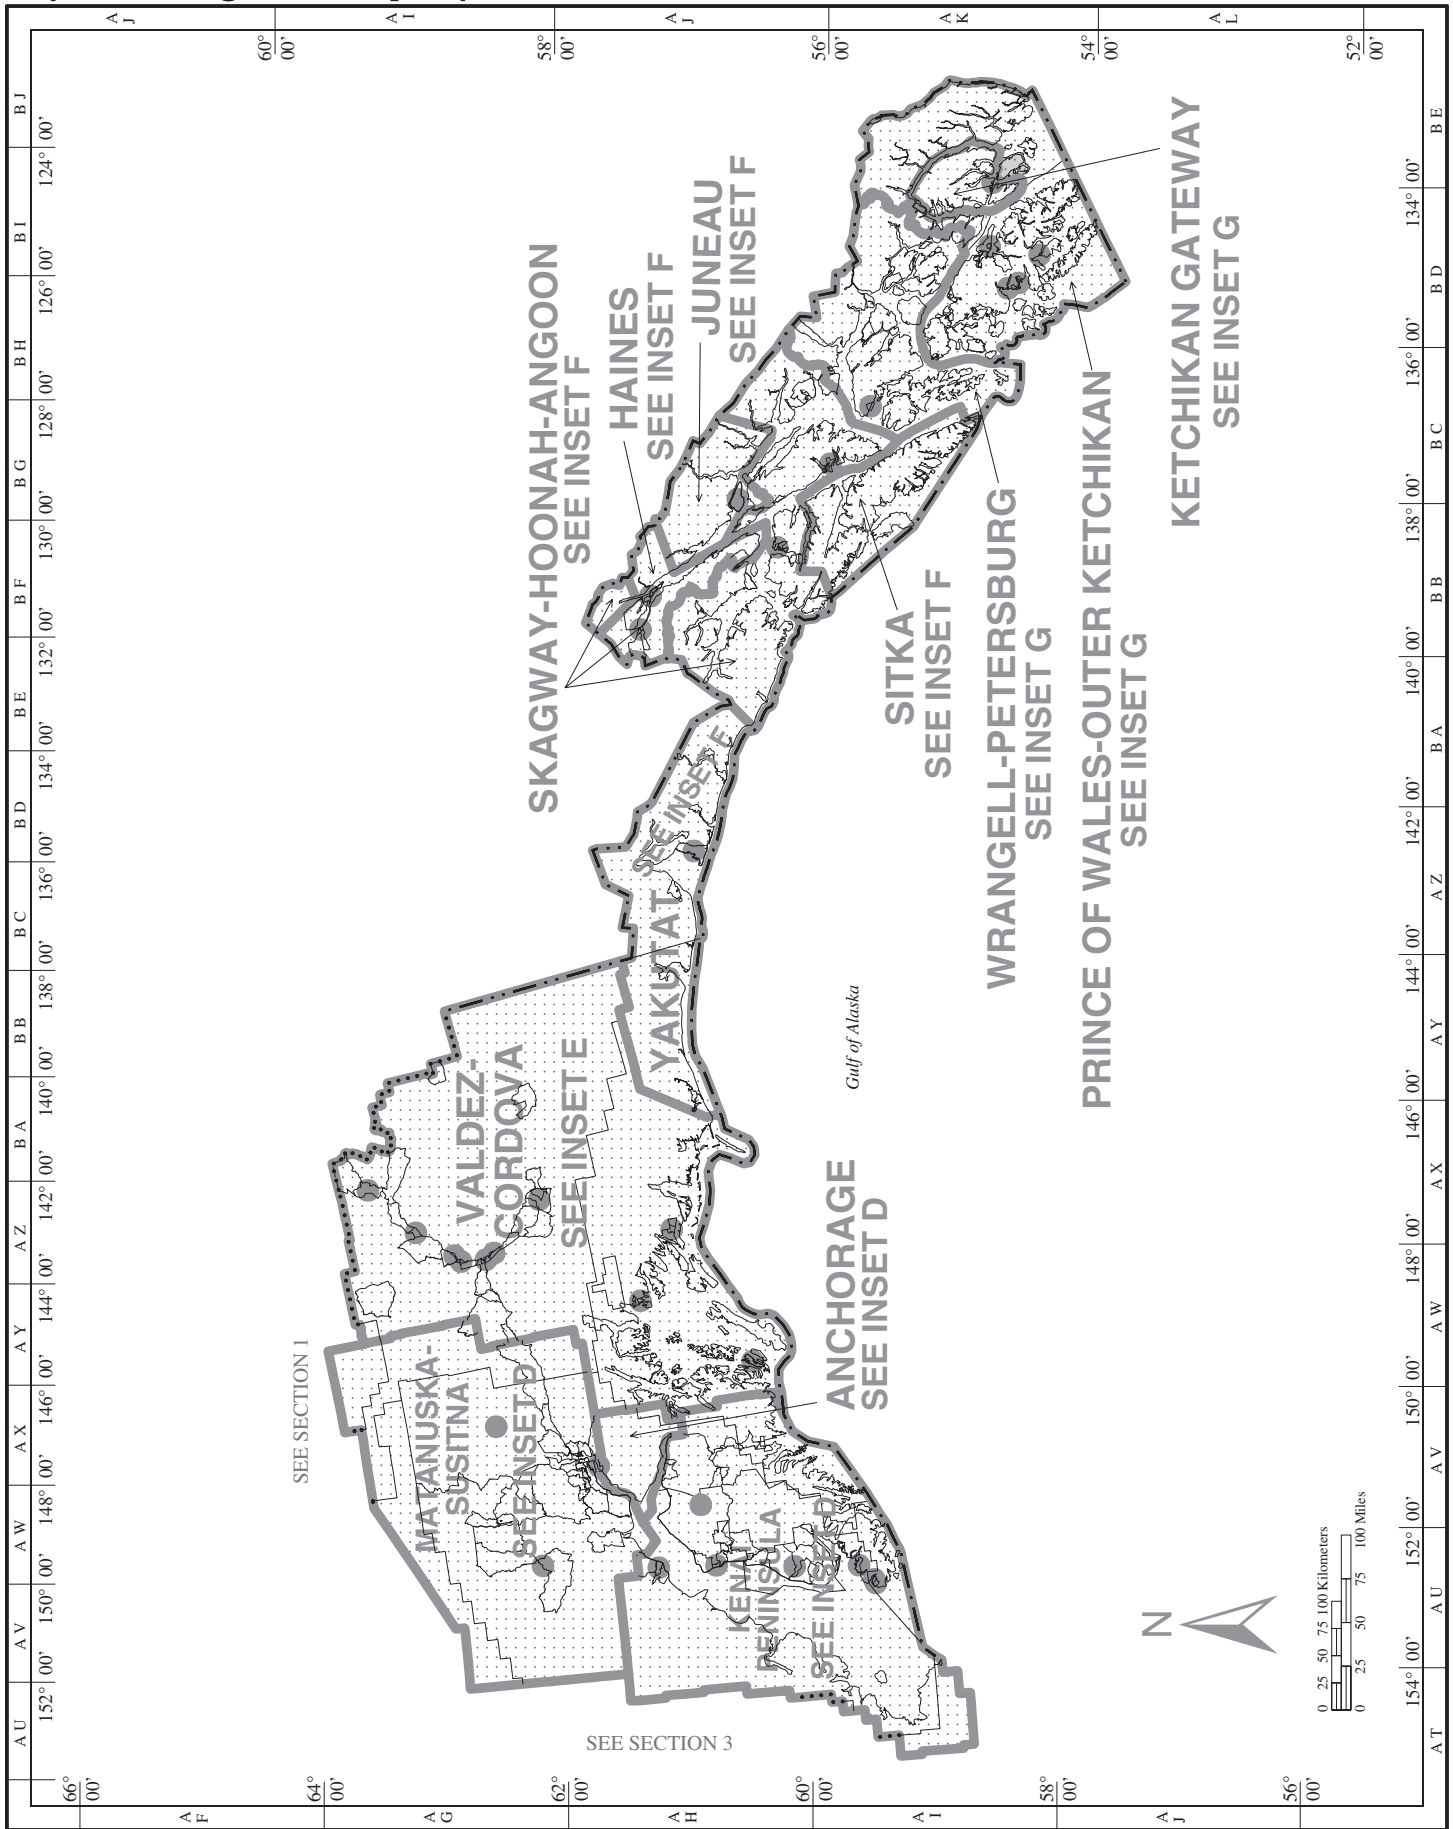

Note: All legal boundaries and names are as of January 1, 2000. Where international, state, borough, census area, city and borough, municipality, and/or census subarea boundaries coincide, the map shows the boundary symbol for the highest level of these geographic entities. The borough, census area, city and borough, and municipality boundaries are always shown. Where a census subarea boundary coincides with a place boundary, the map does not show the place boundary symbol. Any geographic entity name may include '(pt.)' if some portion of the entity extends beyond the limits of the map area displayed on the page, or if multiple discontinuous pieces of the entity have been discretely labeled on the page. A geographic entity name may include '(pts.)' if many discontinuous pieces exist for that entity that cannot be discretely labeled. The boundaries shown on this map are for Census Bureau statistical data collection and tabulation purposes only; their depiction and designation for statistical purposes does not constitute a determination of jurisdictional authority or rights of ownership or entitlement.

BOROUGH, CENSUS AREA, CITY AND BOROUGH, AND MUNICIPALITY LOCATION INDEX

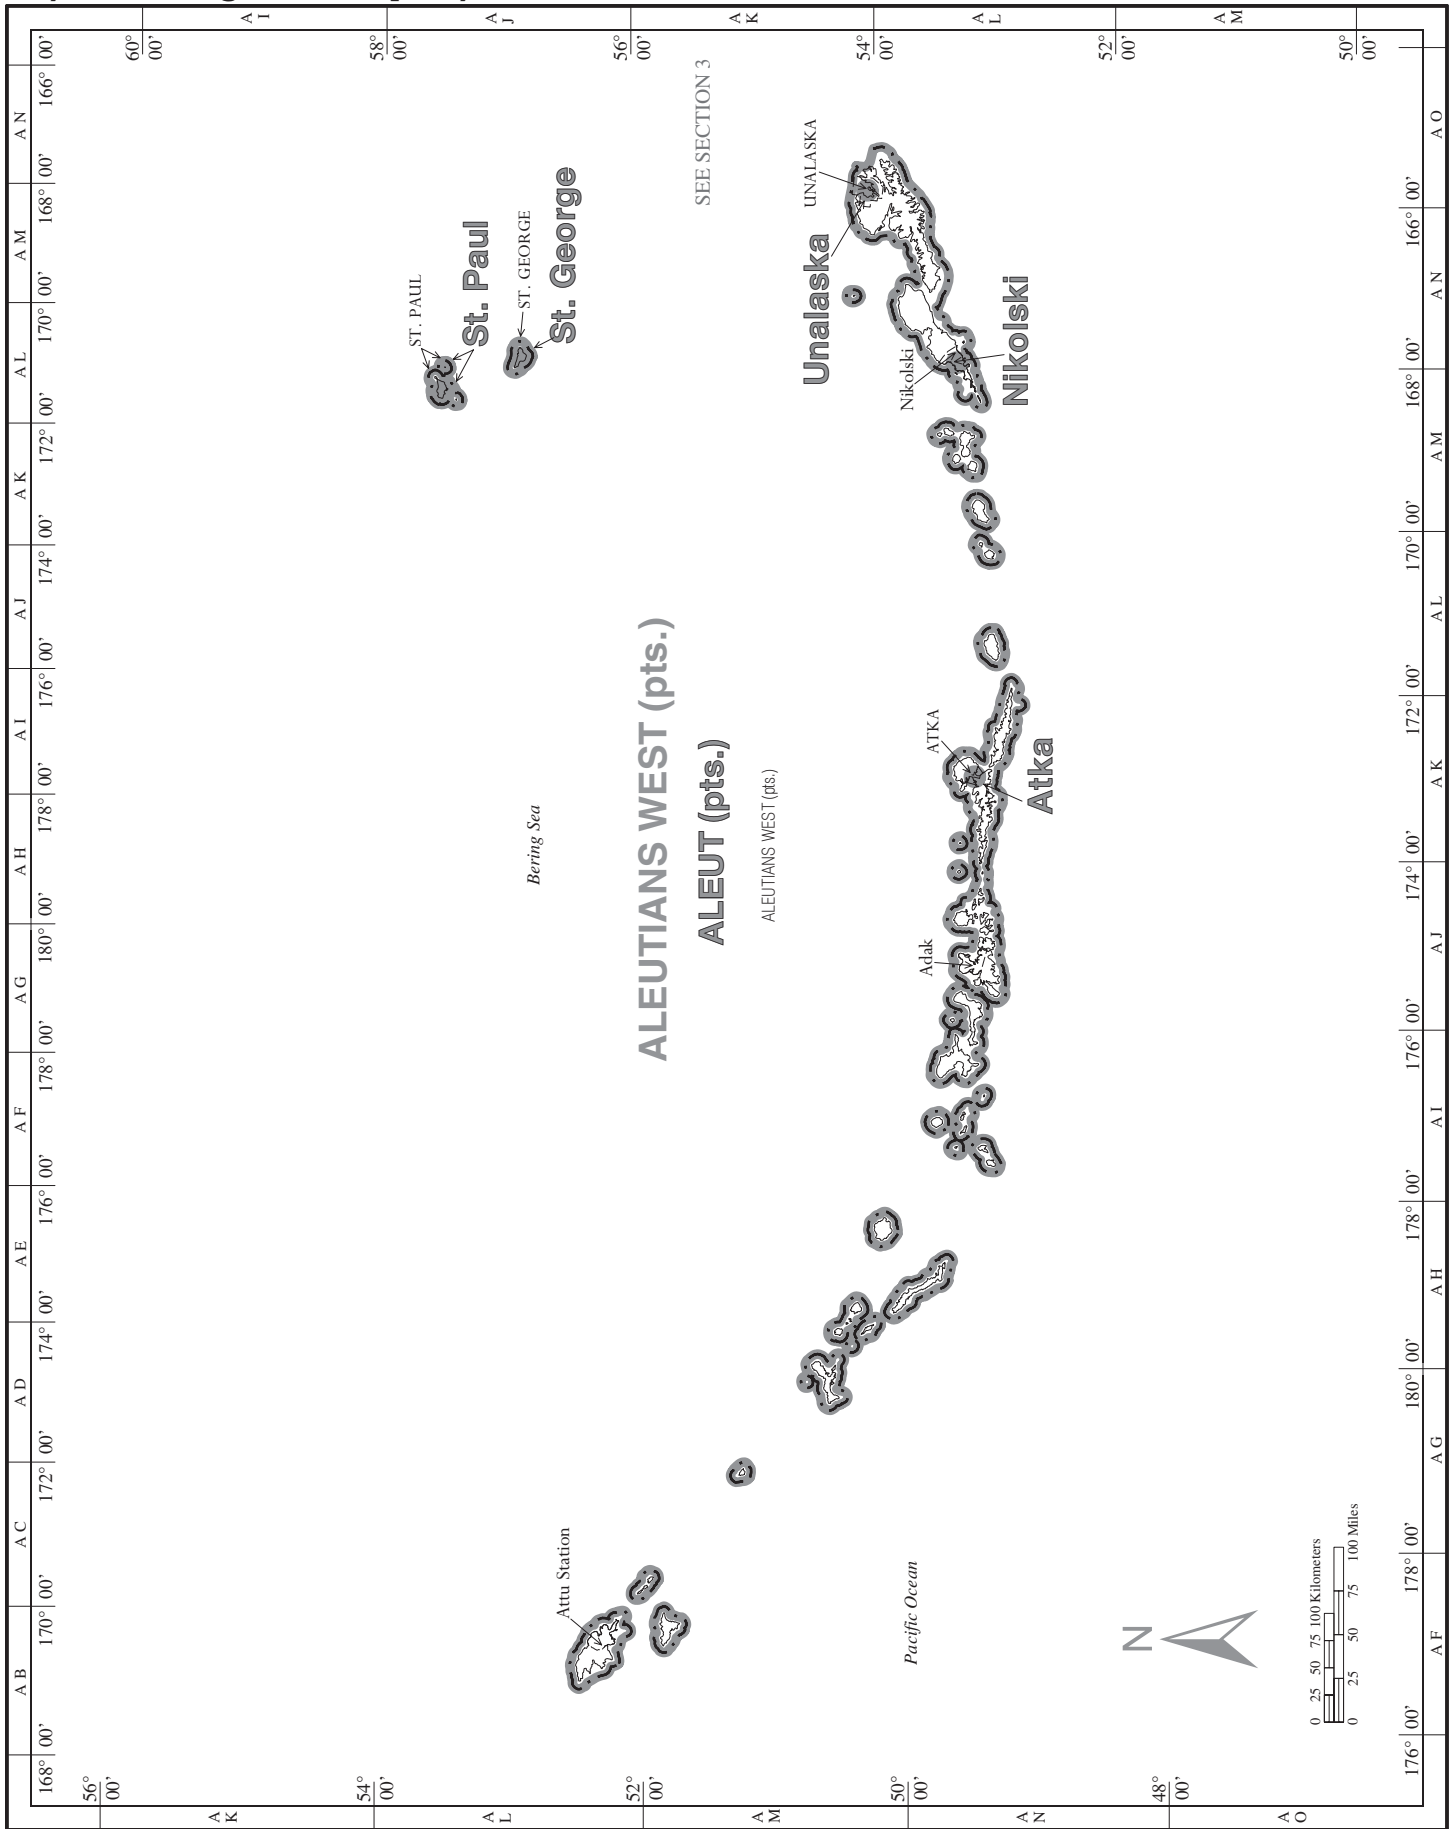

This list presents the reference coordinates for each borough, census area, city and borough, and municipality on the borough, census area, city and borough, and municipality subdivision outline map. Map section numbers refer to the borough, census area, city and borough, and municipality subdivision outline maps only.

Metropolitan Area, Boroughs, Census Areas, and Central Cities

Metropolitan area boundaries are those defined by the Federal Office of Management and Budget on June 30, 1999. The use of '(PART)' indicates that the geography is either discontinuous, extends beyond the map page, or in the case of central cities, the central city extends beyond the MSA/CMSA boundary. All other boundaries and names are as of January 1, 2000.
