LIST OF STATISTICAL TABLES

Table no.	Title	Page
1.	**Population and Housing Units: 1980 to 2000; and Area Measurements: 2000** . . . . . Area, U.S. Population Abroad	1
2.	**Population, Housing Units, Area Measurements, and Density: 1790 to 2000** . . . . . United States	2
3.	**Apportionment of Membership of the U.S. House of Representatives: 1789 to 2000** . . . . . United States, Region, Division, State	4
4.	**Population by Urban and Rural and Size of Place: 2000** . . . . United States, Size of Place [Population]	6
5.	**Land Area in Square Miles by Urban and Rural and Size of Place: 2000** . . . . . United States, Size of Place [Population]	8
6.	**Population, Housing Units, and Land Area by Urban and Rural and Size of Urban Area: 2000** . . . . . United States, Urban and Rural, Size of Urban Area [Population]	9
7.	**Population by Urban and Rural and Size of Place Based on Current Urban Definition and 1950-90 Urban Definition: 1990** . . . . . United States, Size of Place [Population]	10
8.	**Population by Urban and Rural and Size of Place Based on 1950-90 Urban Definition: 1950 to 1990; and Pre-1950 Urban Definition: 1790 to 1950** . . . . . United States, Urban and Rural, Size of Place [Population]	12
9.	**Population Inside and Outside Metropolitan Area by Urban and Rural: 2000** . . . . . United States, Inside Metropolitan Area, Outside Metropolitan Area, Urban and Rural	14
10.	**Land Area in Square Miles Inside and Outside Metropolitan Area by Urban and Rural: 2000** . . . . . United States, Inside Metropolitan Area, Outside Metropolitan Area, Urban and Rural	16
11.	**Population: 1790 to 2000** . . . . . United States, Region, Division, State and Puerto Rico	18
12.	**Housing Units: 1940 to 2000** . . . . . United States, Region, Division, State and Puerto Rico	20
13.	**Decennial Rates of Change in Population: 1790 to 2000** . . . . United States, Region, Division, State and Puerto Rico	22
14.	**Decennial Rates of Change in Housing Units: 1940 to 2000** . . United States, Region, Division, State and Puerto Rico	24
15.	**Percent Distribution of the Population: 1790 to 2000** . . . . . United States, Region, Division, State	26

16. **Percent Distribution of Housing Units: 1940 to 2000** **28**
United States, Region, Division, State

17. **Area Measurements: 2000; and Population and Housing Unit Density: 1980 to 2000** **29**
United States, Region, Division, State and Puerto Rico

18. **Population by Urban and Rural: Earliest Census to 2000** . . . **30**
United States, Region, Division

19. **Housing Units by Urban and Rural: 1950 to 2000** **35**
United States, Region, Division

20. **Rank by Population, Population Change, Urban, Rural, Area Measurements, and Density: 1980 to 2000** **38**
Region, Division, State

21. **Rank by Housing Units, Housing Unit Change, Urban, Rural, Area Measurements, and Density: 1980 to 2000** **40**
Region, Division, State

22. **Population and Housing Units: 1960 to 2000** **42**
State and Puerto Rico, County

23. **Rank of Counties by Population: 2000** **77**
County

24. **Rank of Counties by Housing Units: 2000** **88**
County

25. **Number of Counties by Population: 2000** **99**
United States, Region, Division, State and Puerto Rico

26. **Number of Counties by Housing Units: 2000** **100**
United States, Region, Division, State and Puerto Rico

27. **Number of Counties by Percent of Population That Is Urban: 2000** **101**
United States, Region, Division, State and Puerto Rico

28. **Number of Counties by Percent of Housing Units That Is Urban: 2000** **102**
United States, Region, Division, State and Puerto Rico

29. **Number of Counties by Percent Change in Population: 1990 to 2000** **103**
United States, Region, Division, State and Puerto Rico

30. **Number of Counties by Percent Change in Housing Units: 1990 to 2000** **104**
United States, Region, Division, State and Puerto Rico

31. **Population and Housing Units: 1980 to 2000; and Area Measurements and Density: 2000** **105**
State, Place and [in Selected States] County Subdivision [10,000 or More Population], Puerto Rico

32. **Rank of Places of 100,000 or More by 2000 Population: 1790 to 2000; and Number of Housing Units: 1940 to 2000** **159**
Place [100,000 or More Population]

33. **Rank of 75 Largest Places by Population: 2000, 1990, 1950, 1900, 1850, and 1800; and Number of Housing Units: 2000, 1990, and 1950** **168**
Place

34. **Population and Housing Units: 1980 to 2000; and Area Measurements and Density for Metropolitan Areas: 2000** . . **170**
United States, Metropolitan Area, Puerto Rico

35. **Rank of Metropolitan Areas by Population: 2000; and Number of Housing Units: 2000** **210**
Metropolitan Area

36. Population, Housing Units, Area Measurements, Density, and Inside and Outside Metropolitan Area for Urban Areas: 2000 . . . . . **212**
United States, Urbanized Area, Urban Cluster, Puerto Rico

37. Rank of Urbanized Areas by Population: 2000; and Number of Housing Units: 2000 . . . . . **815**
Urbanized Area

38. Number and Types of County Subdivisions: 2000 . . . . . **818**
United States, Region, Division, State and Puerto Rico

39. Number and Types of Places: 2000 . . . . . **819**
United States, Region, Division, State and Puerto Rico

How to Use This Census Report

INTRODUCTION

Data from Census 2000 are presented in three printed report series:

1. PHC-1, *Summary Population and Housing Characteristics*
2. PHC-2, *Summary Social, Economic, and Housing Characteristics*
3. PHC-3, *Population and Housing Unit Counts*

The data from Census 2000 were derived from a limited number of basic questions asked of the entire population and about every housing unit (referred to as the 100-percent questions, found on the "short form"), and from additional questions asked of a sample of the population and housing units (referred to as the sample questions, found on the "long form").

The PHC-1, *Summary Population and Housing Characteristics,* report series provides data based on the 100-percent questions. The subjects are age, Hispanic or Latino origin, household relationship, race, sex, tenure (owner- or renter-occupied), and vacancy characteristics. Land area measurements and population density also are provided. This series is similar to the 1990 census CPH-1 series.

The PHC-2, *Summary Social, Economic, and Housing Characteristics,* report series provides sample data based on both the 100-percent and the sample questions. Sample subjects include place of birth; residence in 1995; language; educational attainment and school enrollment; veteran status; disability status; employment status; journey to work; work status, earnings, income, and poverty status in 1999; physical housing characteristics; units in structure; fuel and equipment characteristics; owner and renter household characteristics, such as year owner moved into unit; home value; contract and gross rent; and mortgage and rental cost characteristics. This series is similar to the 1990 census CPH-5 series.

The PHC-3, *Population and Housing Unit Counts,* report series provides Census 2000 and historical comparisons of the 100-percent population and housing unit counts. It provides land and water area measurements, and population density. The user notes section documents geographic changes over the past decade. This series is similar to the 1990 census CPH-2 series.

In each series, there is one report for each state, the District of Columbia, and Puerto Rico, plus a United States summary report. Many tables in the United States summary reports include data for Puerto Rico.

HOW TO FIND GEOGRAPHIC AREAS AND SUBJECT MATTER DATA

This report includes a table finding guide to assist the user in locating those statistical tables that contain the desired data. The table finding guide lists by geographic area, the subjects shown in this report. To determine which tables in this report show data for a particular topic, find the desired type of geographic area in the lefthand column of the table finding guide and then look across the columns using the headings at the top for the desired subject. Figure I–1 is an example of a table finding guide.

The table finding guide does not include cross-classifications of subject-matter items. Additional information to locate data within specific reports is provided in the headnote at the top of the table finding guide and in the footnotes at the bottom of the guide.

Figure I–1.

Table Finding Guide

SUBJECTS BY TYPE OF GEOGRAPHIC AREA AND TABLE NUMBER

The types of geographic areas covered in this report are shown on the side, and subjects are shown at the top. See PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes*, for a description of area classifications (Appendix A) and for definitions and explanations of subject characteristics (Appendix B).

HOW TO USE THE STATISTICAL TABLES

Parts of a Statistical Table

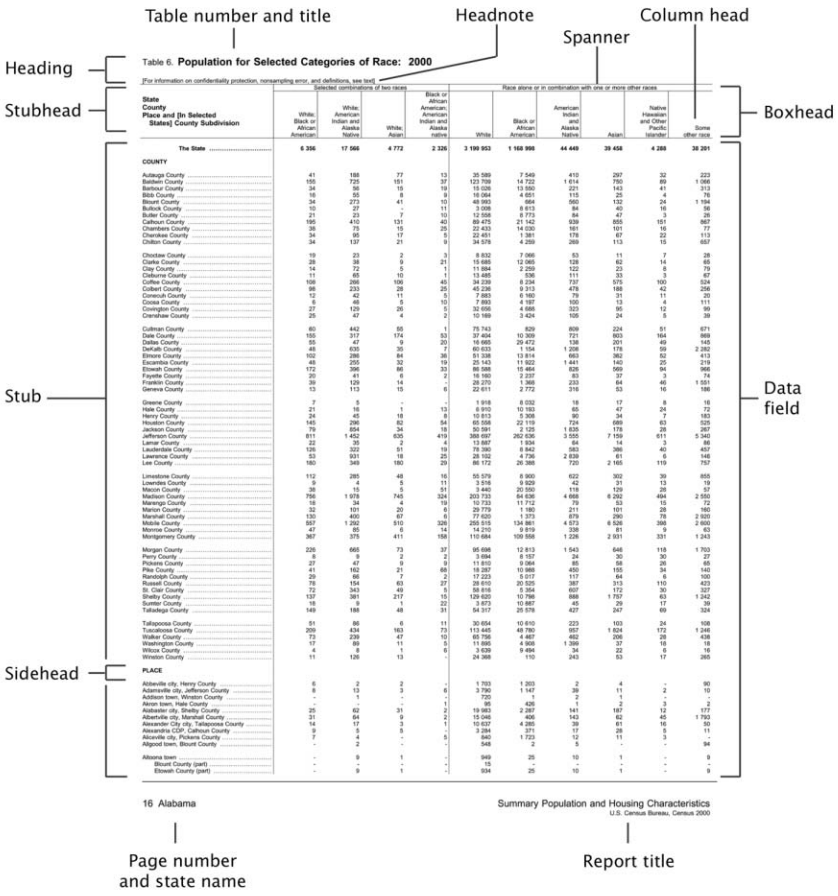
The census data included in printed reports are arranged in tables. Each table includes four major parts: (1) heading, (2) boxhead, (3) stub, and (4) data field. A typical census report table is illustrated in Figure I–2.

The heading consists of the table number, title, and headnote. The table number indicates the position of the table within the report, while the title is a brief statement indicating the subjects and time reference of the data presented in the table. The headnote is enclosed in brackets and is located under the title. It contains statements that qualify, explain, or provide information pertaining to the entire table.

The boxhead is under the heading. This portion of the table, which contains the individual column heads or captions, describes the data in each vertical column. In the boxhead of many tables, a spanner appears across and above two or more column heads or across two or more lower spanners. The purpose of a spanner is to classify or qualify items below it or separate the table into identifiable blocks in terms of major aspects of the data.

Figure I–2.

PARTS OF A STATISTICAL TABLE



The stub is located at the left edge of the table. It includes a listing of line or row captions or descriptions. At the top of the stub is the stubhead. The stubhead is considered to be an extension of the table title and usually shows generic geographic area designations and restrictions.

In the stub, several features are used to help the user better understand the contents of the table. Usually, a block of data lines is preceded by a sidehead. The sidehead, similar to a spanner, describes and classifies the stub entries following it. The use of indentation in a stub indicates the relationship of one data line to another. Indented data lines represent subcategories that, in most instances, sum to a total. Occasionally in tables, it is desirable to show one or more single-line subcategories that do not sum to the total.

The data field is that part of the statistical table that contains the data. It extends from the bottom of the boxhead to the bottom of the table and from the right of the stub to the right edge of the page.

Both geographic and subject-matter terms appear in tables. It is important to read the definitions of the terms used in the tables because census terms often are defined in special ways that reflect the manner in which the questions were asked and the data were tabulated. Definitions of geographic terms are provided in PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes,* Appendix A. Census tables often include derived measures such as medians, means, percentages, and ratios. These and other subject-matter terms are defined in Appendix B of the same report.

Symbols and Geographic Abbreviations

The following symbols are used in the tables and explanations of subjects covered in Census 2000 reports:

- A dash "-" represents zero or a derived measure that rounds to less than 0.1.
- (X) means not applicable. In the 1990 and earlier decennial census reports, three dots "..." meant not applicable.
- (NA) means not available.

- The superscript prefix "r" indicates that the count has been revised since the publication of the 1990 census reports, or that the area was erroneously omitted or not shown in the correct geographic relationship in the 1990 census reports. This symbol appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts,* report series.
- A dagger "†" next to the name of a geographic area indicates that there has been a geographic change (for example, an annexation or detachment, a new incorporation, or a name change) since the information was published for the 1990 census for that area. This symbol appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series. The geographic change information for the entities in a state is shown in the "User Notes" section of the Census 2000 PHC-3 report for that state.
- A plus sign "+" is appended to the lower bound of the highest interval when the median falls in the upper interval of an open-ended distribution. A minus sign "-" is appended to the upper bound of the lowest interval when the median falls in the lowest interval of an open-ended distribution. For more information on medians, see the section on "Derived Measures" in Appendix B.
- A minus sign "-" preceding a figure denotes decrease. The minus sign appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts,* report series.
- (U) means the place or place part is composed entirely of urban land area. The (U) appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts,* report series.
- (R) means the place or place part is composed entirely of rural land area. The (R) appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts,* report series.
- (U/R) means the place or place part is composed of both urban land area and rural land area. The (U/R) appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts,* report series.

The following geographic abbreviations and terms may be used in the tables in this report:

- A "(part)" next to the name of a geographic area in a hierarchical presentation indicates that the geographic entity is located only partially in the superior geographic entity. For example, a "(part)" next to a place name in a county subdivision-place hierarchy indicates that the place is located in more than one county subdivision. (Places also may be "split" by county, congressional district, urban/rural, metropolitan area, voting district, and other geographic boundaries, depending on the presentation.) Other geographic entities also can be "split" by a higher level entity. The exception is a tabulation block, which is unique within all geographic entities in census products.
- ANVSA is Alaska Native village statistical area.
- ANRC is Alaska Native Regional Corporation.
- CCD is census county division.
- CDP is census designated place.
- CMSA is consolidated metropolitan statistical area.
- MA is metropolitan area.
- MSA is metropolitan statistical area.
- OTSA is Oklahoma tribal statistical area.
- PMSA is primary metropolitan statistical area.
- SDAISA is state designated American Indian statistical area.
- TDSA is tribal designated statistical area.
- UT is unorganized territory.

GRAPHICS

Charts, statistical maps, and other graphic summaries are included in some Census 2000 reports.

USER NOTES

User notes include corrections, errata, and related explanatory information. This section appears directly before the statistical tables in census reports. It presents information about unique characteristics of the report and changes or corrections made too late to be reflected in the text or tables themselves. However, sometimes this information becomes available too late to be reflected even in the user notes. Census 2000 user updates are available on the Census Bureau's Internet site at www.census.gov/main/www/cen2000.html. To receive notification of user notes, subscribe to the Census Product Update (http://www.census.gov/mp/www/cpu.html), a biweekly e-mail newsletter available from the Customer Services Center of the Marketing Services Office at the U.S. Census Bureau, or contact the Customer Services Center directly on 301-763-INFO (4636) or at webmaster@census.gov.

APPENDIXES

Appendixes A through E, G, and H, described below, are found in the separate printed volume, PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes,* or on the Internet at http://www.census.gov/prod/cen2000/phc-3-a.pdf. Appendix F is included in this report.

Appendix A, Geographic Terms and Concepts. Provides definitions of the types of geographic areas and related information used in census products.

Appendix B, Definitions of Subject Characteristics. Contains definitions for the subject-matter terms used in census products, including explanations of derived measures, limitations of the data, and comparability with previous censuses. The subjects are listed alphabetically. Population characteristics are defined first, followed by the definitions of the housing subjects.

Appendix C, Data Collection and Processing Procedures. Explains the enumeration and residence rules used in counting the population and housing units in the United States and Puerto Rico. It also describes the major components of the operational plan for Census 2000, and includes a glossary of terms.

Appendix D, Questionnaire Facsimile. Presents a facsimile of the Census 2000 questionnaire used to collect the data in this report.

Appendix E, Data Products and User Assistance. Summarizes the Census 2000 data products by describing the information available in printed reports and through electronic media such as CD-ROM, DVD, and the Internet. It also describes Census 2000 maps and other geographic products, reference materials, and sources of assistance.

Appendix F, Maps. Contains maps depicting the geographic areas shown in this report.

Appendix G, Accuracy of the Data. Provides information on confidentiality of the data, imputation of housing unit status and population counts, sources of errors in the data, and editing of unacceptable data.

Appendix H, Acknowledgments. Lists many of the U.S. Census Bureau staff who participated in the various activities of Census 2000.

Apportionment of the U.S. House of Representatives

INTRODUCTION

The primary reason for the establishment of the decennial census of population is set forth in Article I, Section 2, of the U.S. Constitution. The Constitution provides for an enumeration of the population to serve as the basis for the apportionment of seats in the U.S. House of Representatives among the states, with the provision that each state must have at least one representative. An apportionment has been made on the basis of each decennial census from 1790 to 2000, except following the 1920 census.

Calculation of a congressional apportionment requires three elements: the apportionment population of each state, the number of representatives to be allocated among the states, and a method to use for the calculation.

APPORTIONMENT POPULATION

The apportionment population base always has included those people who have established a residence in the United States. The first Census Act of 1790 established the concept of "usual residence" as the main principle in determining where people were to be counted. This concept has been followed in all subsequent censuses and was the guiding principle for Census 2000. (See Appendix C, "Data Collection and Processing Procedures," for further discussion of the "Enumeration and Residence Rules" for Census 2000. Appendix C may be found in the separate volume, PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes,* in print and on the U.S. Census Bureau's Internet Web site at http://www.census.gov/prod/cen2000/phc-3-a.pdf). Prior to 1870, the population base included the total free population of the states, three-fifths of the number of slaves, and excluded American Indians not taxed.

The 14th Amendment, ratified in 1868, removed the fractional count of the number of slaves from the procedure. In 1940, it was determined that there were no longer any American Indians who should be classed as "not taxed" (39 Op. Att'y.Gen.518 (1940)). In 1970, 1990, and 2000, certain segments of the overseas population (U.S. Armed Forces personnel, federal civilian employees, and dependents of both groups living with them) were allocated to their home states and included in the populations of those states for apportionment purposes only. These segments of the overseas population were not distributed among the political subdivisions of the states, nor included in other census tabulations or data products.

The Census 2000 apportionment population counts by state are presented in Table A of this text. These counts were transmitted by the Secretary of Commerce to the President on December 28, 2000, and from the President to the Congress on January 6, 2001. The population base for the apportionment of each census is shown in Table B. Laws related to the census are codified in Title 13, U.S. Code.

NUMBER OF REPRESENTATIVES

The Constitution set the number of representatives at 65 from 1787 until the first enumeration in 1790. The first apportionment, based on the 1790 census, resulted in 105 members. From 1800 through 1840, the number of representatives was determined by the ratio of the number of people each was to represent ("fixed ratio"), although the way to handle fractional remainders changed. Therefore, the number of representatives changed with that ratio, as well as with population growth and the admission of new states.

For the 1850 census and later apportionments, the number of seats was determined prior to the final apportionment ("fixed House size"); and thus, the ratio of people each representative was to represent was the result of the calculations. In 1911, the House size was fixed at 433 with provision for the addition of one seat each for the territories of Arizona and New Mexico should they become states (as they did in 1912) (U.S. Statutes at Large, 37 Stat 13, 14 (1911). A house size of 433 members was chosen because that was the size at which no state would lose a seat. The House size of 435 members has been unchanged since then, except for a temporary increase to 437 at the time of admission of Alaska and Hawaii as states in1959. However, the apportionment based on the 1960 census, which took effect for the congressional election in 1962, reverted to 435 seats. The representation by state resulting from each apportionment is shown in Table 3.

METHOD OF APPORTIONMENT

It is impossible to attain absolute mathematical equality in terms of the number of people per representative, or in the share each person has in a representative, when seats are to be apportioned among states of varying population size and when there must be a whole number of representatives per state. Proportional voting (fractional seats) has never been attempted in the U.S. House of Representatives. Laws concerning the method of apportionment are codified in Title 2, United States Code.

Since the first apportionment following the 1790 census, there have been five basic methods used to apportion the House of Representatives.

1790 to 1830. The *"Jefferson"* method of greatest divisors (fixed ratio with rejected fractional remainders). Under this method, a ratio of people to representatives was selected; the population of each state was divided by that number of people. The resulting whole number of the quotient was the number of representatives each state received. Fractional remainders were not considered, no matter how large. Thus, a state with a quotient of 3.99 received three representatives, the same number as a state with a quotient of 3.01. The size of the House of Representatives was not predetermined but resulted from the calculation.

1840. The *"Webster"* method of major fractions (fixed ratio with retained major fractional remainders). This method was applied in the same way as the Jefferson method, except if a fractional remainder were greater than one-half, another seat would be assigned. Thus a state with a quotient of 3.51 received four representatives, while a state with a quotient of 3.49 received three. In this method also, the size of the House of Representatives was not predetermined but resulted from the calculation.

1850-1900. The *"Vinton" or "Hamilton"* method. This method established a predetermined number of representatives for each apportionment, and divided the population of each state by a ratio determined by dividing the apportionment population of the United States by the total number of representatives. The resulting whole number was assigned to each state, with an additional seat assigned, one at a time, to the states with the largest fractional remainders, up to the predetermined size of the House of Representatives. This method was subject to the "Alabama paradox," in which a state could receive fewer representatives if the size of the House of Representatives was increased.

1910, 1930. The method of *major fractions*. This method assigned seats similarly to the Webster method of 1840 by rounding fractional remainders using the arithmetic mean. The ratio was selected so that the result would be the predetermined size of the House of Representatives. In 1910, the House size was fixed at 433, with provision for the addition of one seat each for Arizona and New Mexico when they became states.

1940-2000. The *"Hill"* method of equal proportions. This method assigns seats similarly to the Jefferson and Webster methods, except it rounds fractional remainders of the quotient of the state population divided by the ratio differently. With the method of equal proportions, an additional seat is assigned if the fraction exceeds the difference obtained by subtracting the integer part of the quotient from the geometric mean of this integer and the next consecutive integer. For

example, a state with a quotient of 3.48 receives four representatives, while a state with a quotient of 3.45 receives three representatives. During the 1940-2000 period, the size of the House of Representatives remained fixed at 435, except when Alaska and Hawaii became states in 1959, there was a temporary addition of one seat for each until the apportionment following the 1960 census.

Additional information about apportionment of the U.S. House of Representatives may be obtained from the Chief, Population Division, U.S. Census Bureau, Washington, DC 20233-8800. Information on apportionment is also available on the Census Bureau's Internet Web site at http://www.census.gov/population/www/censusdata/apportionment.html.

Table A. **Apportionment of U.S. House of Representatives and Apportionment Population Based on Census 2000**

State	Number of representatives	Apportionment population		
		Total	Resident population	U.S. overseas population
United States	**435**	**[1]281 424 177**	**281 421 906**	**576 367**

Wyoming	1	495 304	493 782	1 522

[1]Includes the resident population for the 50 states, as ascertained by Census 2000 under Title 13, U.S. Code, and counts of overseas U.S. military and federal civilian employees (and their dependents living with them) allocated to their home states, as reported to the Census Bureau by the employing federal agencies. The apportionment population excludes the resident and overseas population of the District of Columbia.

Table B. **Population Base for the Apportionment and Number of Representatives Apportioned: 1790 to 2000**

Census year	Apportionment population base[1]	Number of representatives[2]	Ratio of apportionment population to representative	Date of apportionment act

Constitution	(X)	65	[10]30,000	1789

[1]Excludes the population of the District of Columbia; the population of the territories; prior to 1940, the number of American Indians not taxed; and prior to 1870, two-fifths of the slave population. In 2000, 1990, and 1970, includes selected segments of the U.S. overseas population.

[2]This figure is the actual number of representatives apportioned at the beginning of each decade.

[3]Ratio of resident population to representative in 2000 is 645,632.

[4]Ratio of resident population to representative in 1990 is 570,352.

[5]Ratio of resident population to representative in 1970 is 465,468.

[6]No apportionment was made on the basis of the 1920 census.

[7]Amended by act of May 30, 1872.

[8]Amended by act of March 4, 1862.

[9]Amended by act of July 30, 1852.

[10] The minimum ratio of population to representative, as stated in Article I, Section 2 of the U.S. Constitution.

Population and Geographic Centers

INTRODUCTION

For Census 2000, the Census Bureau has calculated the mean and median centers of population, as well as the geographic center of area, for the United States. These three centers are measures of the central tendency or average location of spatial distributions in much the same manner as a mean or median provides an average value of a univariate distribution of a population's age, or years of school completed.

The mean center of population, traditionally referred to as the center of population, is shown for Census 2000 and for each census since 1790. The median center of population is shown for Census 2000 and for each census since 1880. The geographic center of area is shown for Census 2000. Details of the techniques for deriving each of these centers, as well as calculations of the three centers in terms of decimals rather than in degrees, may be obtained from the Chief, Geography Division, U.S. Census Bureau, Washington, DC 20233-7400. This information is also available on the Census Bureau's Internet Web site at http://www.census.gov/geo/www/cenpop/cntpop2k.html.

MEAN CENTER OF POPULATION

The mean center of population is the point at which an imaginary, flat, weightless, and rigid map of the United States would balance if weights of identical value were placed on it so that each weight represented the location of one person on April 1, 2000.

The mean center of population based on Census 2000 results is located at latitude 37 degrees, 41 minutes, and 49 seconds North (37° 41' 49" N) and longitude 91 degrees, 48 minutes, and 34 seconds West (91° 48' 34" W), in Phelps County, Missouri. A commemorative marker is located in Edgar Springs, Missouri, 2.8 miles west of the true center. See Table A on page III–2 and the maps on pages F–9 and F–10 in Appendix F.

MEDIAN CENTER OF POPULATION

The median center is located at the intersection of two median lines, a north-south line (a meridian of longitude) selected so that half of the Nation's population lives east and half lives west of it, and an east-west line (a parallel of latitude) selected so that half of the Nation's population lives north and half lives south of it.

The Census 2000 median center of population is located at latitude 38 degrees, 45 minutes, and 23 seconds North (38° 45' 23" N), and longitude 86 degrees, 55 minutes, and 51 seconds West (86° 55' 51" W), in Van Buren township, Daviess County, Indiana, about 6.7 miles southeast of Odon, Indiana. See Table B on page III–2 and the maps on pages F–9 and F–11 in Appendix F.

GEOGRAPHIC CENTER OF AREA

The geographic center of area is the point at which the surface of the United States would balance if it were a plane of uniform weight per unit of area. That point, approximately 44 degrees, 58 minutes, and 1 second North latitude (44° 58' 01" N) and103 degrees, 46 minutes, and 1 second West longitude (103° 46' 01" W) is located West of Castle Rock in Butte County, South Dakota, as it has been since the 1960 census, after Alaska and Hawaii became states. See the map on page F–9 in Appendix F.

The geographic center of the conterminous United States (48 states and the District of Columbia) is located near Lebanon in Smith County, Kansas, at approximately 39 degrees, 49 minutes, and 59 seconds North latitude (39° 49' 59" N) and 98 degrees, 34 minutes, and 59 seconds West longitude (98° 34' 59" W).

Table A. **Mean Center of Population of the United States: 1790 to 2000**

Census year	North latitude	West longitude	Approximate location[1]
United States:			
2000	37° 41' 49"	91° 48' 34"	In Phelps County, MO, 2.8 miles east of Edgar Springs, MO.
1990	37° 52' 20"	91° 12' 55"	In Crawford County, MO, 10 miles southeast of Steelville, MO.
1980	38° 08' 13"	90° 34' 26"	In Jefferson County, MO, 1/4 mile west of DeSoto, MO.
1970	38° 27' 47"	89° 42' 22"	In St. Clair County, IL, 5 miles east-southeast of Mascoutah, IL.
1960	38° 35' 58"	89° 12' 35"	In Clinton County, IL, 6-1/2 miles northwest of Centralia, IL.
1950	38° 48' 15"	88° 22' 08"	In Clay County, IL, 3 miles northeast of Louisville, IL.
Conterminous United States:[2]			
1950	38° 50' 21"	88° 09' 33"	In Richland County, IL, 8 miles north-northwest of Olney, IL.
1940	38° 56' 54"	87° 22' 35"	In Sullivan County, IN, 2 miles southeast by east of Carlisle, IN.
1930	39° 03' 45"	87° 08' 06"	In Green County, IN, 3 miles northeast of Linton, IN.
1920	39° 10' 21"	86° 43' 15"	In Owen County, IN, 8 miles south-southeast of Spencer, IN.
1910	39° 10' 12"	86° 32' 20"	In Monroe County, IN, in the city of Bloomington, IN.
1900	39° 09' 36"	85° 48' 54"	In Bartholomew County, IN, 6 miles southeast of Columbus, IN.
1890	39° 11' 56"	85 °32' 53"	In Decatur County, IN, 20 miles east of Columbus, IN.
1880	39° 04' 08"	84° 39' 40"	In Boone County, KY, 8 miles west by south of Cincinnati, OH.
1870	39° 12' 00"	83° 35' 42"	In Highland County, OH, 48 miles east by north of Cincinnati, OH.
1860	39° 00' 24"	82° 48' 48"	In Pike County, OH, 20 miles south by east of Chillicothe, OH.
1850	38° 59' 00"	81° 19' 00"	In Wirt County, WV, 23 miles southeast of Parkersburg, WV.[3]
1840	39° 02' 00"	80° 18' 00"	In Upshur County, WV, 16 miles south of Clarksburg, WV. Upshur County was formed from parts of Barbour, Lewis, and Randolph Counties in 1851.[3]
1830	38° 57' 54"	79° 16' 54"	In Grant County, WV, 19 miles west-southwest of Moorefield, WV. Grant County was formed from part of Hardy County in 1866.[3]
1820	39° 05' 42"	78° 33' 00"	In Hardy County, WV, 16 miles east of Moorefield, WV.[3]
1810	39° 11' 30"	77° 37' 12"	In Loudoun County, VA, 40 miles northwest by west of Washington, DC.
1800	39° 16' 06"	76° 56' 30"	In Howard County, MD, 18 miles west of Baltimore, MD. Howard County was formed from part of Anne Arundel County in 1851.
1790	39° 16' 30"	76° 11' 12"	In Kent County, MD, 23 miles east of Baltimore, MD.

[1]Place names are in terms of 2000 and may not have existed at time of the recorded census.
[2]Conterminous United States excludes Alaska and Hawaii.
[3]West Virginia was set off from Virginia, Dec. 31, 1862, and admitted as a state June 20, 1863.

Table B. **Median Center of Population of the United States: 1880 to 2000**

Census year	North latitude	West longitude	Approximate location[1]
United States:			
2000	38° 45' 23"	86° 55' 51"	In Daviess County, IN, 6.7 miles southeast of Odon, IN.
1990	38° 57' 55"	86° 31' 53"	In Lawrence County, IN, 5.1 miles north of Oolitic, IN.
1980	39° 19' 00"	86° 08' 15"	In Brown County, IN, 2.8 miles southwest of Princes Lakes, IN.
1970	39° 47' 43"	85° 31' 43"	In Henry County, IN, 4.7 miles northeast of Carthage, IN.
1960	39° 56' 25"	85° 17' 00"	In Henry County, IN, 4.5 miles east-northeast of New Castle, IN.
1950	40° 00' 12"	85° 02' 21"	In Wayne County, IN, 2.8 miles northeast of Economy, IN.
Conterminous United States:[2]			
1950	40° 00' 12"	84° 56' 51"	In Wayne County, IN, 3.2 miles south of Lynn, IN.
1940	40° 04' 18"	84° 40' 11"	In Darke County, OH, 3.5 miles southwest of Greenville, OH.
1930	40° 11' 52"	84° 36' 35"	In Darke County, OH, 1.9 miles southeast of Ansonia, OH.
1920	40° 11' 52"	84° 44' 00"	In Darke County, OH, 3.3 miles east of Union City, OH.
1910	40° 07' 33"	85° 02' 00"	In Randolph County, IN, 4.4 miles southwest of Winchester, IN.
1900	40° 03' 32"	84° 49' 01"	In Randolph County, IN, 6.7 miles east of Lynn, IN.
1890	40° 02' 51"	84° 40' 01"	In Darke County, OH, 1.8 miles north of Wayne Lakes, OH.
1880	39° 57' 00"	84° 07' 12"	In Miami County, OH, 3.5 miles east-southeast of Tipp City, OH.

[1]Place names are in terms of 2000 and may not have existed at time of the recorded census.
[2]Conterminous United States excludes Alaska and Hawaii.

Table Finding Guide

SUBJECTS BY TYPE OF GEOGRAPHIC AREA AND TABLE NUMBER

The types of geographic areas covered in this report are shown on the side, and subjects are shown at the top. See PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes,* for a description of area classifications (Appendix A) and for definitions and explanations of subject characteristics (Appendix B).

[1]State or District of Columbia, or Puerto Rico.

[2]Parish in Louisiana; city and borough, municipality, borough, or census area in Alaska; and municipio in Puerto Rico; in Maryland, Missouri, Nevada, and Virginia, one or more cities are independent of counties and are treated as statistical equivalents of counties; the entire District of Columbia, which has no counties, is treated as a county equivalent.

[3]County subdivisions within the state are shown alphabetically with places for the following 12 states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

User Notes

Additional information concerning this Census 2000 product may become available after this report is published. This information, called Notes and Errata, is available in portable document format (PDF) on the U.S. Census Bureau's Internet site at http://www.census.gov/main/www/cen2000.html. To receive notification of user notes, subscribe to the Census Product Update (http://www.census.gov/mp/www/cpu.html), a biweekly e-mail newsletter available from the Customer Service Center of the Marketing Services Office at the U.S. Census Bureau, or contact the Customer Services Center directly on 301-763-INFO (4636) or at webmaster@census.gov.

GENERAL NOTES

User Note 1

The user should be aware that there are limitations to many of these data. Please refer to the text provided with this report for further explanation of the limitations of the data. The population and other data shown for Census 2000 in this report are as of April 1, 2000; the boundaries used for all geographic entities are as of January 1, 2000. All boundaries are intended for Census Bureau statistical data collection and presentation only; their depiction and designation for statistical purposes do not constitute a determination of jurisdictional authority or entitlement. Corrections to the Census 2000 data as a result of certified Count Question Review changes are available from the Census Bureau's Internet site at: www.census.gov/prod/cen2000/notes/errata.pdf.

User Note 2

Data comparability for county subdivisions is shown only when the county subdivision contains substantially the same territory as reported for the 1990 census (generally defined as at least 80 percent of the previous territory) unless the county subdivision is also a place. There is no comparability provided for county subdivisions that have been extensively revised. Revised entities are noted by and within county or independent city. Changes to a geographic entity can be the result of legal change actions, statistical redefinition, correction of previous boundary or drafting errors, or new erroneous information.

Incorporated place and census designated place (CDP) comparability is provided for all places that retained their name or general area without regard to the amount of territorial change between censuses. Place comparability is not shown if the entity is new for Census 2000 (including changes from a CDP to a legally incorporated place and vice versa) or is the result of a merger that created an entirely new entity, or if a Census 2000 CDP contains less than 50 percent of the territory of a 1990 census CDP.

GEOGRAPHIC CHANGE NOTES

The Geographic Change Notes for the entities in a state are shown in the "User Notes" section of the Census 2000 PHC-3, *Population and Housing Unit Counts,* report for that state. The geographic change information documents high-level geographic entities—counties, county subdivisions, and places—that are different from the information reported in the 1990 census. The notes identify geographic entities whose name and/or boundary have changed, entities that no longer exist, newly established entities (both legal and statistical), and changes in geographic relationships, such as places that exist in one county and have expanded into or withdrawn from another county (the notes do not identify the other county(ies) in which the entity exists; this can be determined from the table listing all places in the state reports) and places that have become independent of or dependent within one or more county subdivisions. The changes are reported by and within county.

USER NOTES BY TABLE

Table 1

Puerto Rico was ceded to the United States by Spain in 1898. On July 25, 1952, pursuant to acts of Congress, it achieved the political status of the Commonwealth of Puerto Rico.

The area measurements for the U.S. minor outlying islands are approximate. The U.S. minor outlying islands of Baker, Howland and Jarvis Islands; Kingman Reef; Navassa Island; and Palmyra Atoll were shown as "Other" in 1980.

The Trust Territory of the Pacific Islands (TTPI), administered since its establishment on July 8, 1947, by the United States under the United Nations Trusteeship system, is not included in this table. The Northern Mariana Islands (NMI) was first reported separately in 1980, subsequent to NMI's adoption of its own constitution on January 9, 1978; however, it legally still constituted the Mariana Islands District of the TTPI at the time of the 1980 census. By Presidential proclamation on November 3, 1986, the NMI obtained commonwealth status, and the Federated States of Micronesia (FSM) and the Marshall Islands attained free association with the United States.

Palau, which became a Freely Associated State under a Compact of Free Association with the United States effective October 1, 1994, is not included in this table. The 1990 population count of Palau is 15,122; housing units count is 3,312; land area is 177.3 square miles; water area is 452.6 square miles; and 1980 population count is 12,116 and housing units count is 2,294.

The U.S. population abroad excludes U.S. citizens temporarily abroad on private business, travel, and so forth. Such persons were enumerated at their usual place of residence in the United States as absent members of their own households. Also excludes private, nonfederally affiliated U.S. citizens living abroad for an extended period.

The armed forces data are based on administrative records provided by the Department of Defense (DOD). Census 2000 data for federal civilian employees and their dependents are based on administrative records provided by the employing federal agencies. The 1990 data for federal civilian employees and their dependents are based on administrative records provided by employing federal agencies (including DOD) and survey results provided by DOD. Included in "Total," and "U.S. population abroad" for 1990 are 393,550 overseas civilians and dependents of federal employees who were not reported separately. The 1980 data were based on administrative records provided by the Office of Personnel Management and the Departments of Defense and State.

Table 2

An 1870 population figure including an estimate for the assumed underenumeration in the southern states is 39,818,449. The enumerated counts are used in this and subsequent tables because revised figures for states, urban-rural residence, etc., are unavailable. On the basis of the revised figure, the population increased by 8,375,128, or 26.6 percent, between 1860 and 1870, and by 10,370,760, or 26.1 percent, between 1870 and 1880.

1840 and 1830 populations include persons (6,100 in 1840 and 5,318 in 1830) on public ships in the service of the United States, not credited to any region, division, or state, or distributed by urban or rural residence. These persons are not included in other tables of this report.

Percentage changes are computed on basis of change in data since preceding census date, and period covered, therefore, is not always exactly 10 years. Adjustments for differences in census dates must be made if strictly comparable figures are desired for each decade.

Density figures given for various census years represent the area within the boundaries of the United States, which was under the jurisdiction of the United States on the date in question, including in some cases considerable areas not then organized or settled and not covered by the census. In 1870, for example, Alaska was not covered by the census.

Table 3

As required by the U.S. Supreme Court ruling *(Department of Commerce v. House of Representatives,* 525 U.S. 316, 119 S. Ct. 765 (1999)), the Census 2000 apportionment population counts do not reflect the use of statistical sampling to adjust for overcounting or undercounting.

The apportionment since 1940 has been computed in accordance with provisions of Title 2, United States Code, Section 2a. The apportionment for 1920 is the same as that for 1910 since there was no reapportionment based on the 1920 census.

Table 7

The significant differences in the number and population of places classified as entirely urban and those classified as partly urban are the result of changes between the criteria used for the current urban definition and the 1950-90 urban definition. The current urban definition ignored place boundaries entirely when defining urban areas, while the 1950-90 urban definition used whole places except in the most exceptional situations. This resulted in far fewer places being classified as entirely urban offset by many more places being classified as partly urban. For more information, refer to the section on Urban and Rural in Appendix A, Geographic Terms and Concepts, in the separate report, PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes.*

Table 11

UNITED STATES. Total for 1890 includes population (325,464) of Indian Territory and Indian Reservations specially enumerated in 1890, but not included in general report on population for 1890. Totals for 1840 and 1830 exclude persons (6,100 in 1840 and 5,318 in 1830) on public ships in the service of the United States, not credited to any region, division, or state.

ALABAMA. The area of Alabama north of the 31st parallel was part of the original territory of the United States. The northern two-thirds were a part of Georgia until 1802. The southern one-third of the territory north of the 31st parallel was unorganized until 1798 with the creation of Mississippi Territory. The United States claimed the territory south of the 31st parallel as part of the Louisiana Purchase in 1803, but did not formally acquire this territory from Spain until 1812. Alabama Territory was organized from the eastern part of Mississippi Territory on March 3, 1817, with generally the same boundary as the present state. Alabama was admitted to the Union on December 14, 1819, as the 22nd state.

Although the territory had not yet been legally established, census data for Alabama are available beginning with the 1800 census. The 1800 population shown for Alabama is for that portion of the present state north of the 31st parallel that was part of Mississippi Territory; it does not include population in the area claimed by Georgia. The 1810 population shown is for all of the present state north of the 31st parallel. The population of the entire legally established Mississippi Territory (of which the area of Alabama was a part) was 40,352 in 1810 and 8,550 in 1800.

ALASKA. The United States acquired the area of Alaska by purchase from Russia in 1867, with generally the same boundary as the present state. The formal boundary between the southeastern portion of Alaska and Canada was settled by treaty in 1903. Alaska Territory was organized on August 24, 1912. Alaska was admitted to the Union on January 3, 1959, as the 49th state.

Alaska was not enumerated in the 1870 census even though the area was part of the United States. Census data for Alaska are available beginning with the 1880 census.

ARIZONA. The United States acquired most of the area of Arizona from Mexico in 1848. The United States acquired additional area, comprising the southern part of Arizona, from Mexico in 1853 as part of the Gadsden Purchase. Arizona Territory was organized from the western part of New Mexico Territory on February 24, 1863. Part of Arizona Territory north and west of the Colorado River was added to the state of Nevada in 1866, resulting in generally the same boundary as the present state of Arizona. Arizona was admitted to the Union on February 14, 1912, as the 48th state.

Although the territory had not yet been legally established, census data are available for Arizona beginning with the 1860 census. For an explanation of the revision to the 1860 population of Arizona, see Richard L. Forstall, *Population of States and Counties of the United States: 1790-1990,* Washington, DC: U.S. Government Printing Office, 1996, page 14.

ARKANSAS. The United States acquired the area of Arkansas from France as part of the Louisiana Purchase in 1803. Arkansas Territory (spelled in the enabling act as Arkansaw) was organized from part of Missouri Territory on March 2, 1819, and included the greater part of Oklahoma, west to the 100th meridian. Arkansas Territory was reduced in area in 1824 and 1828 to generally assume the boundary of the present state. Arkansas was admitted to the Union on June 15, 1836, as the 25th state.

Although the territory had not yet been established, census data are available for Arkansas beginning with the 1810 census (as part of Louisiana Territory). The 1810 and 1820 populations for Arkansas reflect the 1819 boundary of the territory, which included territory now in the state of Oklahoma. The population of the entire legally established Louisiana Territory (of which the area of Arkansas was a part) in 1810 was 20,845.

CALIFORNIA. The United States acquired the area of California from Mexico in 1848, with generally the same boundary as the present state. The area of California was never organized as a territory, but was administered from 1848 to statehood by a federal military authority. California was admitted to the Union on September 9, 1850, as the 31st state.

Census data for California are available beginning with the 1850 census; however, the data for 1850 are incomplete because the questionnaires from Contra Costa and Santa Clara Counties were lost and those for San Francisco County were destroyed by fire. Some missing 1850 data have been supplanted by information obtained from a state census in 1852.

COLORADO. The United States acquired the area of Colorado from France as part of the Louisiana Purchase in 1803, from territory ceded by Mexico in 1848, and from territory sold to the United States by the state of Texas in 1850. Colorado Territory was organized from parts of Kansas, Nebraska, New Mexico, and Utah territories on February 28, 1861, with generally the same boundary as the present state. Colorado was admitted to the Union on August 1, 1876, as the 38th state.

Although the territory had not yet been legally established, census data for Colorado are available beginning with the 1860 census. The 1860 population shown for Colorado is for the portion of Kansas Territory that was organized as Colorado Territory. The 1860 population shown for Colorado excludes an undetermined number enumerated as part of Nebraska and New Mexico territories. The portion of present-day Colorado in Utah Territory—the portion west of the Rocky Mountains—was not enumerated in 1860. The population of the entire legally established Kansas Territory (of which the enumerated area of Colorado was a part) in 1860 was 141,483.

CONNECTICUT. The area of Connecticut was part of the original territory of the United States. It was chartered as a colony in 1662. In 1786, it ceded area to the United States' government that became part of the Northwest Territory in 1787, but Connecticut retained the "Connecticut Western Reserve," a 120-mile strip of territory in present-day northeast Ohio. Connecticut did not cede this territory until 1800. Connecticut ratified the U.S. Constitution on January 9, 1788; it was the fifth of the original 13 states to join the Union. Its boundary was generally the same as the present state (excluding the Connecticut Western Reserve), although the boundary between Connecticut and Massachusetts was changed slightly in 1804.

Census data for Connecticut are available beginning with the 1790 census.

DELAWARE. The area of Delaware was part of the original territory of the United States. Included in the grant to William Penn, the Three Lower Counties (Delaware) were annexed as part of the grant establishing the Province of Pennsylvania in 1683. The counties were granted a separate charter providing semi-autonomy in 1701, with generally the same boundary as the present state.

In 1776, Delaware declared itself a separate government. Delaware ratified the U.S. Constitution on December 7, 1787; it was the first of the original 13 states to join the Union.

Census data for Delaware are available beginning with the 1790 census.

DISTRICT OF COLUMBIA. The area of the District of Columbia was part of the original territory of the United States. The District of Columbia was formed from territory ceded by Maryland and Virginia in 1788, and was established in accordance with Acts of Congress passed in 1790 and 1791. Its boundary, a square ten miles on a side with vertices at the cardinal points to resemble a diamond, was established on March 30, 1791, and included all of the territory within present-day Arlington County, Virginia, and part of Alexandria city, Virginia. The portion south of the Potomac River was retroceded to Virginia in 1846.

Census data for the District of Columbia are available beginning with the 1800 census. The population shown for the District of Columbia from 1800 to 1840 does not include the portion of Virginia legally included in the district at the time of those censuses. The population of the District of Columbia as legally existent in those censuses is: 43,712 in 1840; 39,834 in 1830; 33,039 in 1820; 24,023 in 1810; and 14,093 in 1800. Congress abolished the original county (Washington County) and incorporated places (Georgetown and Washington cities) in the District of Columbia in 1871, but later reestablished the city of Washington. The Census Bureau continued to recognize the boundaries of the previously existing areas for the 1880 and 1890 censuses. Congress has treated the District of Columbia as coextensive with Washington city since 1895.

FLORIDA. The United States acquired the area of Florida from Spain in 1819, although the area was not formally transferred until 1821. Florida Territory was organized on March 30, 1822, with generally the same boundary as the present state. Florida was admitted to the Union on March 3, 1845, as the 27th state.

Census data for Florida are available beginning with the 1830 census.

GEORGIA. The area of Georgia was part of the original territory of the United States. It was chartered as a colony in 1732. Georgia ratified the U.S. Constitution on January 2, 1788; it was the fourth of the original 13 states to join the Union. At that time, Georgia included territory that extended westward to the Mississippi River and now makes up most of Alabama and Mississippi. The territory west of the present state boundary was added to Mississippi Territory when Georgia ceded to the United States its claims to the territory in 1802. As part of this cession, Georgia obtained part of the South Carolina cession of 1787 from the federal government along its northern boundary. These changes left Georgia with generally the same boundary as the present state.

Census data for Georgia are available beginning with the 1790 census. No population was reported in 1790 for the portion of Georgia now within Alabama and Mississippi. The 1800 population shown for Georgia includes population in the territory that is now part of Alabama and Mississippi. For an explanation of the revision to the 1810 population of Georgia, see Richard L. Forstall, *Population of States and Counties of the United States: 1790-1990,* Washington, DC: U.S. Government Printing Office, 1996, page 40.

HAWAII. The United States acquired the area of Hawaii through annexation of the Republic of Hawaii on July 7, 1898. Hawaii was officially organized as a territory of the United States on June 14, 1900, with generally the same boundary as the present state. Hawaii was admitted to the Union on August 21, 1959, as the 50th state.

Census data for Hawaii are available beginning with the 1900 census. The 1910 through 1930 populations do not include Midway Islands, and the 1940 population does not include Baker Island, Canton Island, Enderbury Island, Howland Island, Jarvis Island, Johnston Atoll, and Midway Islands although these areas were enumerated as part of Hawaii Territory even though not legally part of the territory. The 1940 population does include Palmyra Atoll (administratively named Palmyra Island), which was legally part of Hawaii Territory since its organization, but separated from Hawaii upon statehood. (Palmyra Atoll had no population in any other census.) Canton Island and Enderbury Island are now part of the Republic of Kiribati. The other islands and atolls, which are under the jurisdiction of the Department of Interior or the Department of Defense, are part of the U.S. Minor Outlying Islands.

For the 1930, 1940, 1950, and 1970 censuses, the population and housing unit data for Kalawao County were included in Maui County. The population and housing unit counts for Kalawao County shown as Kalawao division (CCD) in 1970 was 172 population and 0 (zero) housing units (there are no housing units because the residents were classified as living in a medical facility). The adjusted population for Maui County (including Kalawao County) in 1970 is 45,984. The validity of the urban population reported in Hawaii for 1900, 1910, and 1920 is limited because a place population of 2,500 was required to classify territory as urban, and the Census Bureau did not consistently identify places in Hawaii before 1930.

IDAHO. The United States acquired the area of Idaho through a treaty with Great Britain in 1846. Idaho Territory was organized from parts of Dakota, Nebraska, and Washington territories on March 3, 1863, and included parts of present-day Montana and Wyoming. Its area was reduced, in 1864 by the organization of Montana Territory and in 1868 by the organization of Wyoming Territory, to generally the same boundary as the present state. Idaho was admitted to the Union on July 3, 1890, as the 43rd state.

Census data for Idaho are available beginning with the 1870 census. The portion of Yellowstone National Park in Idaho was probably enumerated as part of Wyoming from 1880 to 1910. The area was shown as a separate county equivalent in the census reports for Idaho from 1920 to 1960. The portion of the park in Idaho was legally added to Fremont County before the 1970 census.

ILLINOIS. The area of Illinois was part of the original territory of the United States, being part of lands ceded by four states to the United States and designated in 1787 as the "Territory northwest of the River Ohio." Illinois Territory was organized on February 3, 1809, from the western part of Indiana Territory, and included all of present-day Illinois, most of Wisconsin, the western part of the Upper Peninsula of Michigan, and northeastern Minnesota. Illinois was admitted to the Union on December 3, 1818, as the 21st state, with generally the same boundary as the present state.

Although the territory had not yet been legally established, census data for Illinois are available beginning with the 1800 census. The 1810 population is for the entire area of the Illinois Territory, including territory not in the present state. For an explanation of the revision to the 1800 population of Illinois, see Richard L. Forstall, *Population of States and Counties of the United States: 1790-1990,* Washington, DC: U.S. Government Printing Office, 1996, page 48.

INDIANA. The area of Indiana was part of the original territory of the United States, being part of lands ceded by four states to the United States and designated in 1787 as the "Territory northwest of the River Ohio." Indiana Territory was organized on May 7, 1800, from the western part of the Northwest Territory; it included all of present-day Illinois, nearly all of Indiana and Wisconsin, the western part of the Upper Peninsula of Michigan, and northeastern Minnesota. Indiana Territory was greatly reduced by the organization of Michigan Territory in 1805 and Illinois Territory in 1809. Indiana Territory was increased in 1816 by the addition of a strip of land that set the northern boundary between Indiana and Michigan territories and was reduced by relinquishing territory in the Upper Peninsula to Michigan Territory. Indiana was admitted to the Union on June 29, 1816, as the 19th state, with generally the same boundary as the present state.

Although the territory had not yet been legally established, census data for Indiana are available beginning with the 1800 census. The 1810 population includes a small population in territory now within Michigan (most of this area was not enumerated, being primarily unceded American Indian lands). For an explanation of the revision to the 1800 population of Indiana, see Richard L. Forstall, *Population of States and Counties of the United States: 1790-1990,* Washington, DC: U.S. Government Printing Office, 1996, page 52.

IOWA. The United States acquired the area of Iowa from France in 1803 as part of the Louisiana Purchase. Iowa Territory was organized on June 12, 1838, from part of Wisconsin Territory; it included all of present-day Iowa, the eastern part of North Dakota and South Dakota, and the western part of Minnesota. Iowa was admitted to the Union on December 28, 1846, as the 29th state with generally the same boundary as the present state. The remaining part of the territory was unattached until the organization of Minnesota Territory in 1849. Nebraska and Iowa have made periodic adjustments to their boundary as the Missouri River has changed its course.

Census data for Iowa are available beginning with the 1840 census. The 1840 population includes the portion of Iowa Territory in present-day Minnesota west of the Mississippi River and a line drawn from its source northward to the Canadian boundary.

KANSAS. The United States acquired the area of Kansas from France in 1803 as part of the Louisiana Purchase. Part of the area was subsequently relinquished in a treaty with Spain in 1819, and was reacquired as part of the annexation of Texas in 1845. Kansas Territory was organized on May 30, 1854, from Missouri Territory (also identified in some statutes as Indian Country or Indian Territory), and included part of present-day Colorado. Kansas was admitted to the Union on January 29, 1861, as the 34th state, with generally the same boundary as the present state. The remaining part of the territory was included in Colorado Territory, which was organized in February 1861.

Census data for Kansas are available beginning with the 1860 census. The 1860 population includes only the population within the present state boundary; the population for the area that became part of Colorado Territory was assigned to that area even though it was not yet legally established. The population of the entire legally established Kansas Territory in 1860 was 141,483.

KENTUCKY. The area of Kentucky was originally part of Virginia within the original United States. Virginia ceded the district of Kentucky to the United States in 1792, and this area was included briefly in the Southwest Territory ("territory . . . south of the Ohio River"). Kentucky was admitted to the Union on June 1, 1792, as the 15th state. Upon resolution of a boundary dispute with Tennessee in 1820, Kentucky assumed generally the same boundary as the present state. Kentucky is one of four states that are legally described as a commonwealth.

Although it was still part of Virginia, census data for Kentucky are available separately beginning with the 1790 census. The population shown for Kentucky in the 1790-1820 censuses is based on the present state boundary, not the territory claimed by Kentucky from Tennessee along its southern boundary. The population of the entire legally established state of Virginia (of which the area of Kentucky was a part) in 1790 was 821,287.

LOUISIANA. The United States acquired the area of Louisiana from France in 1803 as part of the Louisiana Purchase, although the area east of the Mississippi River and north of Lake Pontchartrain and the southwestern boundary were disputed with Spain until 1812. Orleans Territory, which included the greater part of Louisiana, was organized on March 26, 1804. (The Louisiana Territory, organized on March 3, 1805, did not include any of the present-day state of Louisiana; the Louisiana Territory was the portion of the Louisiana Purchase that was north of the 33rd parallel, which is the current northern boundary of the state of Louisiana.) Louisiana was admitted to the Union on April 30, 1812, as the 18th state, with generally the same boundary as the present state.

Census data for Louisiana are available beginning with the 1810 census. The 1810 population is for Orleans Territory, which conformed to the present-day state boundary.

MAINE. Maine was originally part of Massachusetts. It was included in the Charter of New England in 1620 and the Charter of Massachusetts Bay in 1629; the latter became the Constitution of the Massachusetts Bay Colony, predecessor to the Commonwealth of Massachusetts. In 1819, Massachusetts agreed to allow its district of Maine to petition for statehood. Maine was admitted to the Union as a separate state on March 15, 1820, as the 23rd state. The state's boundary with Canada was not formally established until the Webster-Ashburton Treaty of 1842, when Maine assumed generally the same boundary as the present state.

Census data for Maine are available beginning with the 1790 census. Maine was enumerated as a separate district within the state of Massachusetts in the 1790, 1800, and 1810 censuses. Presentation of data as a separate state began with the 1820 census. The population of the legal area of Massachusetts (of which the area of Maine was a part) was 700,745 in 1810; 574,564 in 1800; and 475,327 in 1790.

MARYLAND. The area of Maryland was part of the original territory of the United States. It was chartered as a colony in 1632. The area described by this charter, however, conflicted with the charter for Virginia and, later, the charter for Pennsylvania. Virginia relinquished its claims in

1658, and the Pennsylvania boundary was resolved with the survey of the Mason and Dixon Line in the 1760s. Maryland ratified the U.S. Constitution on April 28, 1788; it was the seventh of the original 13 states to join the Union. Its area was reduced with the cession in 1788 and formation in 1791 of the District of Columbia, resulting in generally the same boundary as the present state.

Census data for Maryland are available beginning with the 1790 census. The population reported for 1790 includes the area subsequently in the District of Columbia.

MASSACHUSETTS. The area of Massachusetts was part of the original territory of the United States. It was originally included in the Charter of New England in 1620; the Charter of Massachusetts Bay, which became the Constitution of the Massachusetts Bay Colony in 1629; and a charter that united the Massachusetts Bay and Plymouth colonies in 1691. In 1785, it ceded area to the United States that became part of the Northwest Territory in 1787. Massachusetts ratified the U.S. Constitution on February 6, 1788; it was the sixth of the original 13 states to join the Union. At the time of statehood, the area of Maine was a district in Massachusetts. In 1819, it agreed to allow its district of Maine to petition for statehood, and Maine was admitted to the Union as a separate state on March 15, 1820. There were changes to the boundary between Connecticut and Massachusetts in 1804 and between Rhode Island and Massachusetts in 1862, and a resurvey of the latter boundary in 1897, resulting in generally the same boundary as the present state. Massachusetts is one of four states that are legally described as a commonwealth.

Census data for Massachusetts are available beginning with the 1790 census. The population data for 1790, 1800, and 1810 do not include the area of Maine. The population of the legal area of Massachusetts including the area of Maine for those censuses was 700,745 in 1810; 574,564 in 1800; and 475,327 in 1790.

MICHIGAN. The area of Michigan was part of the original territory of the United States, being part of lands ceded by four states to the United States and designated in 1787 as the "Territory northwest of the River Ohio." Michigan Territory was organized on June 30, 1805, from the northeastern part of Indiana Territory, and included all of the Lower Peninsula, the eastern part of the Upper Peninsula, a small strip of northern Indiana, and a portion of northwestern Ohio that was later contested. In 1818, when Illinois was admitted as a state, all of the remainder of Illinois Territory was added to Michigan Territory, including almost all of present-day Wisconsin, part of Minnesota, and the western part of the Upper Peninsula; at the same time, the central portion of the Upper Peninsula and eastern Wisconsin were added from the former Indiana Territory. In 1834, Michigan Territory was enlarged from part of Missouri Territory, including all of present-day Iowa, the remainder of Minnesota, and the eastern part of North Dakota and South Dakota. Michigan was reduced with the organization of Wisconsin Territory and the cession of the Toledo Strip to Ohio in 1836. As a compromise for the cession of territory to Ohio, Michigan Territory retained all of the Upper Peninsula when Wisconsin Territory was organized, resulting in a boundary generally the same as the present state. Michigan was admitted to the Union on January 26, 1837, as the 26th state.

Although not yet legally established as a separate territory, census data for Michigan are available beginning with the 1800 census. The 1800 census includes the population of a small area that is in present-day Ohio and excludes the population that was enumerated with Indiana of a small area of present-day Michigan. The 1800 population of the legally established Northwest Territory (of which Michigan was a part) was 45,916. The 1810, 1820, and 1830 census populations are for the entire area of Michigan Territory, including population in extensive areas not in the present state, and, in 1810, excluding again the population of a small area of present-day Michigan enumerated with Indiana. For an explanation of the revision to the 1800, 1820, and 1830 population of Michigan, see Richard L. Forstall, *Population of States and Counties of the United States: 1790-1990,* Washington, DC: U.S. Government Printing Office, 1996, page 82.

MINNESOTA. The area of Minnesota was partially included in the original territory of the United States, being part of lands ceded by four states to the United States and designated in 1787 as the "Territory northwest of the River Ohio." The United States acquired the remainder of the area from France in 1803 as part of the Louisiana Purchase and by a convention signed with Great Britain in

1818 that extended the northern boundary along the 49th parallel westward from a line drawn due north from the source of the Mississippi River. Minnesota Territory was organized on March 3, 1849, from unorganized area formerly within Iowa and Wisconsin territories. The territory included all of the present-day state of Minnesota, the eastern part of North Dakota and South Dakota, and a small part of Nebraska. Minnesota Territory was reduced in size in 1854 when the portion in present-day Nebraska was included in Nebraska Territory. Minnesota was admitted to the Union on May 11, 1858, as the 32nd state, with generally the same boundary as the present state. The remaining part of Minnesota Territory was not assigned until the organization of Dakota Territory in 1861; in 1860 census reports, the area was identified as "unorganized Dakota."

Census data for Minnesota are available beginning with the 1850 census. The 1850 population is for the entire area of Minnesota Territory, including population in area not in the present state.

MISSISSIPPI. All of the area of Mississippi except the part south of the 31st parallel was included in the original territory of the United States. The United States claimed the territory south of the 31st parallel as part of the Louisiana Purchase in 1803. Mississippi Territory was organized on April 7, 1798, from unorganized area; it included area west of Georgia to the Mississippi River, comprising the southern third of the present-day states of Alabama and Mississippi. The territory annexed the northern part of the same two future states when Georgia ceded its western claims in 1802 and the lands south of the 31st parallel in 1812. Mississippi Territory was reduced by the organization of Alabama Territory in 1817. Mississippi was admitted to the Union on December 10, 1817, as the 20th state, with generally the same boundary as the present state, although jurisdiction over the entire area was not formally accomplished until Spain relinquished its claims to the southern portion of the state in 1819.

Census data for Mississippi are available beginning with the 1800 census. The 1800 and 1810 populations do not include the area now within the state of Alabama even though that area was legally part of Mississippi Territory. The population of Mississippi Territory as legally existing for those censuses was 40,352 in 1810, and 8,550 in 1800.

MISSOURI. The United States acquired the area of Missouri from France as part of the Louisiana Purchase in 1803. Missouri Territory was organized on June 4, 1812, from Louisiana Territory, and included all of the present-day states of Arkansas, Iowa, Kansas, Missouri, Nebraska, and Oklahoma and parts of Colorado, Minnesota, Montana, Nebraska, New Mexico, North Dakota, South Dakota, Texas, and Wyoming. The territory was reduced by conclusion of a treaty with Spain in 1819 that removed the portion of Texas that was in the territory and part of present-day Colorado, Kansas, and Wyoming. That same year, Missouri Territory was further reduced by the organization of Arkansas Territory. Missouri was admitted to the Union on March 2, 1821, as the 24th state from a small part of Missouri Territory. With the Platte Purchase of 1836, Missouri added territory in the northwest, west to the Missouri River, to assume generally the same boundary as the present state. (Missouri Territory—the portion not included in the state of Missouri—continued to exist as a separate area until the organization of Nebraska Territory in 1854, although reduced after a large part of the northern area was annexed to Michigan Territory in 1834. Some statutes refer to this Missouri Territory as Indian Country or Indian Territory.)

Although the territory had not yet been legally established, census data for Missouri are available beginning with the 1810 census. The 1810 and 1820 populations are for the present-day area of the state of Missouri. The population of the entire legally established Louisiana Territory (of which the area of Missouri was a part) in 1810 was 20,845. The 1820 census enumeration apparently did not include area in Missouri Territory beyond what is now the state of Missouri.

MONTANA. The United States acquired the area of Montana from France as part of the Louisiana Purchase in 1803 and by a treaty with Great Britain in 1846. Montana Territory was organized from the northeastern part of Idaho Territory on May 26, 1864, with generally the same boundary as the present state. Montana was admitted to the Union on November 8, 1889, as the 41st state.

Census data for Montana are available beginning with the 1870 census. The 1860 census population in present-day Montana was included in unorganized Dakota, although legally the area was within Nebraska and Washington territories. The portion of Yellowstone National Park in Montana was probably enumerated as part of Wyoming from 1880 to 1910.

NEBRASKA. The United States acquired the area of Nebraska from France as part of the Louisiana Purchase in 1803. Nebraska Territory was organized on May 30, 1854, from the northwestern part of Missouri Territory (also called Indian Country or Indian Territory). At the time of its organization, the territory included almost all of present-day Nebraska and parts of Colorado, Montana, North Dakota, and South Dakota. The area of the territory was reduced greatly in 1861 with the organization of Colorado and Dakota territories. Nebraska was admitted to the Union on March 1, 1867, as the 37th state. In 1882, Nebraska acquired from Dakota Territory an area north of the Keya Paha River and Niobrara River to assume generally the same boundary as the present state. Nebraska and Iowa have made periodic adjustments to their boundary as the Missouri River has changed its course.

Census data for Nebraska are available beginning with the 1860 census. The 1860 population is for part of the area of the Nebraska Territory including all of present-day Nebraska, and settlements now within Colorado, South Dakota, and Wyoming. If the part of Nebraska Territory in 1860 that is in present-day Montana and North Dakota, as well as additional parts of South Dakota, was enumerated, the population was included as part of unorganized Dakota; thus, no accurate data are available for the entire Nebraska Territory as legally defined.

NEVADA. The United States acquired the area of Nevada from Mexico in 1848. Nevada Territory was organized from the western part of Utah Territory on March 2, 1861. The territory added area along the eastern boundary from Utah Territory in 1862. Nevada was admitted to the Union on October 31, 1864, as the 36th state. In 1866, additional territory on the east and southeast was added from Utah and Arizona territories, and the state assumed generally the same boundary as the present state.

Although the territory had not yet been legally established, census data for Nevada are available beginning with the 1860 census. The 1860 census population is for the area of present-day Nevada formed from Utah Territory. (The portion of present-day Nevada then in New Mexico Territory was not enumerated in 1860.) The population of the entire legally established Utah Territory (of which the area of Nevada was a part) in 1860 was 47,130. For an explanation of the revision to the 1870 population of Nevada, see Richard L. Forstall, *Population of States and Counties of the United States: 1790-1990,* Washington, DC: U.S. Government Printing Office, 1996, page 104.

NEW HAMPSHIRE. The area of New Hampshire was part of the original territory of the United States. It was originally included in the Charter of New England in 1620, but a separate grant established New Hampshire in 1629. In 1641, the area reunited with Massachusetts, and separated and reunited several times until it finally became a separate provincial government in 1741. New Hampshire ratified the U.S. Constitution on June 21, 1788; it was the ninth of the original 13 states to join the Union. The state's boundary with Canada was not formally established until the Webster-Ashburton Treaty of 1842, when New Hampshire assumed generally the same boundary as the present state.

Census data for New Hampshire are available beginning with the 1790 census.

NEW JERSEY. The area of New Jersey was part of the original territory of the United States. It was originally chartered in 1664. West Jersey was split from New Jersey in 1676, but they reunited in 1702. New Jersey ratified the U.S. Constitution on December 18, 1787; it was the third of the original 13 states to join the Union, with generally the same boundary as the present state.

Census data for New Jersey are available beginning with the 1790 census.

NEW MEXICO. The United States acquired almost all the area of New Mexico from Mexico in 1848. The United States acquired a small area, comprising the southwestern corner of New Mexico, from Mexico in 1853 as part of the Gadsden Purchase. New Mexico Territory was organized from the acquired area December 13, 1850, and included most of present-day Arizona and New Mexico as well as parts of Colorado and Nevada. The territory was reduced with the organization of Colorado Territory in 1861 and Arizona Territory in 1863 to assume generally the same boundary as the present state. New Mexico was admitted to the Union on January 6, 1912, as the 47th state.

Census data are available for New Mexico beginning with the 1850 census. The 1850 census population is for the entire New Mexico Territory, including areas not in present-day New Mexico. For an explanation of the revision to the 1860 population of New Mexico, see Richard L. Forstall, *Population of States and Counties of the United States: 1790-1990,* Washington, DC: U.S. Government Printing Office, 1996, page 110.

NEW YORK. The area of New York was part of the original territory of the United States. When originally chartered in 1664, it included a much larger area. A portion was sold to create New Jersey in 1664, and title claims were ceded in 1682 to Delaware and Pennsylvania. In 1780, New York ceded area to the United States that became part of the Northwest Territory in 1787. New York ratified the U.S. Constitution on July 26, 1788; it was the 11th of the original 13 states to join the Union. In 1791, New York consented to the statehood separation of Vermont; in 1792, it sold area along Lake Erie (the Erie Triangle) to Pennsylvania, to assume generally the same boundary as the present state.

Census data for New York are available beginning with the 1790 census. The 1790 census data do not include population included in present-day Pennsylvania or Vermont. These areas were enumerated as parts of those states, although the Erie Triangle and all of the state of Vermont legally were part of New York at the time of the census.

NORTH CAROLINA. The area of North Carolina was part of the original territory of the United States. Both North Carolina and South Carolina were included in the charter that established Carolina in 1663. The two areas separated in 1712—a separation that was finalized when the Carolina Colony was dissolved in 1729—with generally the same shared boundary as the present states. However, they did not settle on a final boundary until 1813. North Carolina ratified the U.S. Constitution on November 21, 1789; it was the 12th of the original 13 states to join the Union. North Carolina ceded its territory westward to the Mississippi River, comprising present-day Tennessee, to the United States in 1790, to assume generally the same boundary as the present state.

Census data for North Carolina are available beginning with the 1790 census. For an explanation of the revision to the 1810 population of North Carolina, see Richard L. Forstall, *Population of States and Counties of the United States: 1790-1990,* Washington, DC: U.S. Government Printing Office, 1996, page 118.

NORTH DAKOTA. The United States acquired most of the area of North Dakota from France in 1803 as part of the Louisiana Purchase. It obtained the area in the north and northeast part of the present-day state by a convention, signed with Great Britain in 1818 that extended the northern boundary along the 49th parallel. Dakota Territory was organized on March 2, 1861, from unorganized area formerly within Minnesota Territory and part of Nebraska Territory. Dakota Territory included all of the present-day states of North Dakota and South Dakota, most of Montana, the northern half of Wyoming, and a small part of Nebraska. The territory was reduced in 1863 with the organization of Idaho Territory, enlarged in 1864 with the addition of most of the remainder of present-day Wyoming, and again reduced with the organization of Wyoming Territory in 1868. In 1882, the state of Nebraska acquired an area north of the Keya Paha River and Niobrara River. North Dakota was admitted to the Union simultaneously with South Dakota on November 2, 1889, as the 39th and 40th states, with generally the same boundaries as the present states.

Census data for the combined area in present-day North Dakota and South Dakota are available in the 1860 census (and listed in national tables with South Dakota). The 1860 census population is for territory reported as "unorganized Dakota" and includes population in areas now in Montana. The 1860 population excludes some population enumerated in Nebraska Territory. Although the state had not yet been legally established, the 1870 and 1880 populations generally are for the area of the present state. The population of Dakota Territory as legally established was 135,177 in 1880 and 14,181 in 1870.

OHIO. The area of Ohio was part of the original territory of the United States, being part of lands ceded by four states to the United States and designated in 1787 as the "Territory northwest of the River Ohio." It also included the area known as the Connecticut Western Reserve, which was not ceded by Connecticut to the United States until 1800. Ohio Territory was organized on

April 30, 1802, from the Northwest Territory, with generally the same boundary as the present state. Ohio was admitted to the Union on February 19, 1803, as the 17th state. Ohio acquired legal title to the area known as the Toledo Strip when Michigan ceded its claim in 1836.

Although not yet legally established as a separate entity, census data for Ohio are available beginning with the 1800 census. The 1800 census population for Michigan includes the population of a small area in present-day Ohio. The 1800 population of the legally established Northwest Territory (of which Ohio was a part) was 45,916. For an explanation of the revision to the 1800 population of Ohio, see Richard L. Forstall, *Population of States and Counties of the United States: 1790-1990,* Washington, DC: U.S. Government Printing Office, 1996, page 126.

OKLAHOMA. The United States acquired the area of Oklahoma from France as part of the Louisiana Purchase in 1803. Part of present-day Oklahoma, which had been included in Arkansas Territory, was ceded to Spain by conclusion of a treaty in 1819; the ceded area was reacquired as part of the annexation of Texas in 1845. The area of Oklahoma was part of unorganized territory designated as Indian Country or Indian Territory on June 20, 1834, although this conflicted with territory already included within Missouri Territory. Oklahoma Territory was organized on May 2, 1890, from the western part of Indian Territory and the Public Land Strip (the panhandle, which was sold to the United States by Texas), and resulted in the territory being in two pieces. The territory was enlarged with the addition of the Cherokee Outlet, which joined Oklahoma Territory into a single area. The Supreme Court affirmed the claim of Oklahoma to the Greer County area in southwest Oklahoma in 1896. Oklahoma Territory and the remaining Indian Territory were combined, and Oklahoma was admitted to the Union on November 16, 1907, as the 46th state, with generally the same boundary as the present state. A boundary dispute with Texas was settled in 1930, deleting a narrow strip of territory from Oklahoma.

Census data are available for Oklahoma beginning with the 1890 census. The 1890 and 1900 census populations reported for Oklahoma include the population for Indian Territory. The population of Oklahoma Territory as legally established was 398,331 in 1900 and 78,475 in 1890. The population of Indian Territory as legally established was 392,060 in 1900 and 180,182 in 1890. The Census Bureau conducted a special census of the Oklahoma and Indian territories on July 7, 1907. The population of the entire area was 1,414,177.

OREGON. The United States acquired the area of Oregon by a treaty with Great Britain in 1846. Oregon Territory was organized from the acquired area on August 14, 1848, and included all of present-day Oregon, Idaho, and Washington and part of western Montana and Wyoming. The territory was reduced in 1853 when Washington Territory was organized. In 1859, additional territory was transferred to Washington Territory, leaving Oregon with generally the same boundary as the present state. Oregon was admitted to the Union on February 14, 1859, as the 33rd state.

Census data for Oregon are available beginning with the 1850 census. The 1850 population is for the area in present-day Oregon; it does not include the entire territory as legally established. The population of Oregon Territory as legally constituted in 1850 was 13,294.

PENNSYLVANIA. The area of Pennsylvania was part of the original territory of the United States. It was chartered in 1681, although New York did not relinquish its claim to the area until the following year. The southern boundary was resolved with the survey of the Mason and Dixon Line in the 1760s. Connecticut had claims to Pennsylvania territory resolved by award of the Continental Congress in 1782. Pennsylvania ratified the U.S. Constitution on December 12, 1787; it was the second of the original 13 states to join the Union. Pennsylvania assumed generally the same boundary as the present state with the acquisition of the Erie Triangle from New York in 1792. Pennsylvania is one of four states that are legally described as a commonwealth.

Census data for Pennsylvania are available beginning with the 1790 census. Any population that was enumerated in the Erie Triangle was included in Pennsylvania, although this area was not legally part of the state until 1792.

RHODE ISLAND. The area of Rhode Island was part of the original territory of the United States. An original patent was granted for the Providence Plantations in 1643, and a charter was granted for the Colony of Rhode Island and Providence Plantations in 1663. Rhode Island ratified the U.S.

Constitution on May 29, 1790; it was the 13th of the original 13 states to join the Union, with generally the same boundary as the present state. However, there were changes to the boundary between Rhode Island and Massachusetts in 1862, and additional changes from a resurvey of that boundary in 1897. The official name of the state is "State of Rhode Island and Providence Plantations."

Census data for Rhode Island are available beginning with the 1790 census.

SOUTH CAROLINA. The area of South Carolina was part of the original territory of the United States. Both North Carolina and South Carolina were included in the charter that established Carolina in 1663. The two areas separated in 1712—a separation that was finalized when the Carolina Colony was dissolved in 1729—with generally the same shared boundary as the present states. However, they did not settle on a final boundary until 1813. South Carolina ceded area to the United States to assume generally the same boundary as the present state; the ceded area became part of the Georgia and Mississippi Territory in 1802. South Carolina ratified the U.S. Constitution on May 23, 1788; it was the eighth of the original 13 states to join the Union.

Census data for South Carolina are available beginning with the 1790 census.

SOUTH DAKOTA. The United States acquired almost all of the area of South Dakota from France in 1803 as part of the Louisiana Purchase. A small portion in the northeast part of the present-day state was added by a convention signed with Great Britain in 1818. Dakota Territory was organized on March 2, 1861, from unorganized area formerly within Minnesota Territory and part of Nebraska Territory. Dakota Territory included all of the present-day states of North Dakota and South Dakota, most of Montana, the northern half of Wyoming, and a small part of Nebraska. The territory was reduced in 1863 with the organization of Idaho Territory, enlarged in 1864 with the addition of most of the remainder of present-day Wyoming, and again reduced with the organization of Wyoming Territory in 1868. In 1882, the state of Nebraska acquired an area north of the Keya Paha River and Niobrara River. South Dakota was admitted to the Union simultaneously with North Dakota on November 2, 1889, as the 39th and 40th states, with generally the same boundary as the present state.

Census data for the combined area in present-day North Dakota and South Dakota are available in the 1860 census (and listed in national tables with South Dakota). The 1860 census population is for territory reported as unorganized Dakota and territory now in Montana. Although the state had not yet been legally established, the 1870 and 1880 populations are for the area of the present state. The population of Dakota Territory as legally established was 135,177 in 1880 and 14,181 in 1870.

TENNESSEE. The area of Tennessee was originally part of North Carolina. North Carolina ceded the area of Tennessee in 1790 to the United States, and this area was organized as the "territory . . . south of the Ohio River" on April 12, 1790. Tennessee was admitted to the Union on June 1, 1796, as the 16th state. Upon resolution of a boundary dispute with Kentucky in 1820, Tennessee assumed generally the same boundary as the present state.

Census data for Tennessee are available separately beginning with the 1790 census. The 1790 population shown for Tennessee is for the Southwest Territory, which generally had the present state boundary.

TEXAS. Texas was originally part of Mexico, achieving independence as the Republic of Texas in 1836. The United States acquired the area of Texas through annexation and Texas was admitted to the Union on March 1, 1845, as the 28th state. At the time of statehood, Texas included part of present-day Colorado, Kansas, New Mexico, Oklahoma, and Wyoming. Texas sold territory to the United States in 1850 to assume generally the same boundary as the present state, but there were some subsequent revisions. In 1896, the Supreme Court ruled the Texas claim to the Greer County area in southwest Oklahoma to be invalid, and the area was officially deemed to be part of Oklahoma. An additional boundary dispute with Oklahoma was settled in 1930 by adding a narrow strip of territory to Texas. As the Rio Grande has changed its course, the United States and the Republic of Mexico have made periodic adjustments to their boundary that affected the boundary of Texas.

Census data for Texas are available beginning with the 1850 census.

UTAH. The United States acquired the area of Utah from Mexico in 1848. Utah Territory was organized on September 9, 1850, from the acquired area plus a small portion of territory sold to the United States by Texas. Utah Territory included all of present-day Utah, most of Nevada, and part of western Colorado and southwestern Wyoming. The territory was reduced in 1861 with the organization of Colorado and Nevada territories, and additional area was lost to Nevada in 1862 and 1866. The territory was further reduced in 1863 with the organization of Idaho Territory and in 1868 with the organization of Wyoming Territory, to arrive at generally the same boundary as the present state. Utah was admitted to the Union on January 4, 1896, as the 45th state.

Census data are available for Utah beginning with the 1850 census. The 1850 census population is for the entire area of the territory, including areas not in present-day Utah. The 1860 census population does not include the area now in Nevada, but does include portions of Utah Territory in Colorado and Wyoming, although no population was reported for the Colorado portion. The 1860 population for legally existing Utah Territory was 47,130. For an explanation of the revision to the 1870 population of Utah, see Richard L. Forstall, *Population of States and Counties of the United States: 1790-1990,* Washington, DC: U.S. Government Printing Office, 1996, page 162.

VERMONT. The area of Vermont was part of the original territory of the United States. It was included in the Charter of New England in 1620, but was later included in grants creating New York in 1664 and 1674. Representatives of 51 towns in the present area declared an independent state of "New Connecticut alias Vermont" in 1777, but also referred to the area as the "New Hampshire Grants." New York consented to the statehood separation of Vermont, which was admitted to the Union on February 18, 1791, as the 14th state, with generally the same boundary as the present state.

Census data for Vermont are available beginning with the 1790 census.

VIRGINIA. The area of Virginia was part of the original territory of the United States. Virginia was the first chartered colony, with the original 1606 charter including the entire Eastern Seaboard. Individual charters provided to other colonies reduced the size of Virginia. In 1784, Virginia ceded area to the United States that became the Northwest Territory in 1787. Virginia ratified the U.S. Constitution on June 26, 1788; it was the tenth of the original 13 states to join the Union.

At the time of statehood, Virginia included all of present-day Kentucky and West Virginia. The area of the state was reduced in 1791 by the formation of the District of Columbia and in 1792 when Virginia ceded the area that became the state of Kentucky. Virginia added territory in 1846 when the portion of the District of Columbia taken from Virginia was retroceded to the state. The state of West Virginia, consisting of 48 counties, was established from Virginia on June 20, 1863; in 1866, Congress officially added two more counties (Berkeley and Jefferson) to West Virginia, leaving Virginia with generally the same boundary as the present state. Virginia is one of four states that are legally described as a commonwealth.

Census data for Virginia are available beginning with the 1790 census. The populations shown from 1790 to 1860 are for the present boundary of Virginia. These data include, from 1800 to 1840, the portion of the District of Columbia not formally part of Virginia until 1846, and do not include the area of Kentucky in 1790 or the counties taken to form West Virginia from 1790 to 1860. The population of Virginia as legally existing from 1860 to 1790 was: 1,596,318 in 1860; 1,421,661 in 1850; 1,239,797 in 1840; 1,211,405 in 1830; 1,065,366 in 1820; 974,600 in 1810; 880,200 in 1800; and 821,287 in 1790.

WASHINGTON. The United States acquired the area of Washington through a treaty with Great Britain in 1846. Washington Territory was organized from part of Oregon Territory on March 2, 1853; it included all of present-day Washington, northern Idaho, and northwestern Montana. In 1859, when Oregon was admitted as a state, the remainder of Oregon Territory the rest of Idaho, additional area of Montana, and part of Wyoming was added to Washington Territory. Washington Territory assumed generally the same boundary as the present state when Idaho Territory was organized in 1863. Washington was admitted to the Union on November 11, 1889, as the 42nd state.

Although the territory had not yet been legally established, census data for Washington are available beginning with the 1850 census. The 1850 and 1860 populations are for the entire territory as legally established in 1859, when it included all of Idaho and part of Montana and Wyoming. The population of the entire legally established Oregon Territory (of which the area of Washington was a part) in 1850 was 13,294.

WEST VIRGINIA. The area of West Virginia was originally part of the colony and later the state of Virginia. West Virginia was separated from Virginia and admitted to the Union as a state on June 20, 1863, as the 35th state. West Virginia originally included 48 Virginia counties; in 1866, Congress officially added two more counties, Berkeley and Jefferson, to the state resulting in generally the same boundary as the present state.

Although West Virginia had not been legally established, census data for West Virginia are available beginning with the 1790 census when it was enumerated as part of Virginia. The populations shown from 1790 to 1860, before statehood, are based on the county boundaries that existed at each census; these boundaries generally conformed to the present boundary of West Virginia. The population of Virginia (of which the area of West Virginia was a part) as legally existing from 1860 to 1790 was: 1,596,318 in 1860; 1,421,661 in 1850; 1,239,797 in 1840; 1,211,405 in 1830; 1,065,366 in 1820; 974,600 in 1810; 880,200 in 1800; and 821,287 in 1790.

WISCONSIN. The area of Wisconsin was part of the original territory of the United States, being part of lands ceded by four states to the United States and designated in 1787 as the "Territory northwest of the River Ohio." Wisconsin Territory was organized on July 3, 1836, from part of Michigan Territory; it included all of present-day Wisconsin, Iowa, and Minnesota, eastern North Dakota and South Dakota, and a small part of northeastern Nebraska. The territory was reduced in 1838 with the organization of Iowa Territory west of the Mississippi River and a line northward from the river's source. Wisconsin was admitted to the Union on May 29, 1848, as the 30th state, with generally the same boundary as the present state.

Although the territory had not yet been legally established, census data for Wisconsin are available beginning with the 1820 census. The 1840 census population is for the entire territory, including the portion of Minnesota northeast and east of the Mississippi River and a line northward from the river's source. For an explanation of the revision to the 1820 and 1830 population of Wisconsin, see Richard L. Forstall, *Population of States and Counties of the United States: 1790-1990,* Washington, DC: U.S. Government Printing Office, 1996, page 184.

WYOMING. The United States acquired the area of Wyoming from France as part of the Louisiana Purchase in 1803, from Great Britain as part of a treaty in 1846, and from territory ceded by Mexico in 1848. Wyoming Territory was organized from part of Dakota, Idaho, and Utah territories on July 25, 1868, with generally the same boundary as the present state. Wyoming was admitted to the Union on July 10, 1890, as the 44th state.

Census data are available for Wyoming beginning with the 1870 census.

PUERTO RICO. The United States acquired the area of Puerto Rico from Spain in 1898. Congress granted the people of Puerto Rico United States citizenship in 1917. The area became a commonwealth on July 25, 1952, with the right to internal self-government.

Census data are available for Puerto Rico from periodic censuses, beginning with a census taken by the War Department in 1899. The 1920 and earlier censuses were enumerated on Jan. 1, 1920; Apr. 15, 1910; and Nov. 10, 1899. Earlier data are available from censuses conducted by the government of Spain from 1765 to 1897.

Table 17

CALIFORNIA. The land area for the state of California is incorrect. The land area should be decreased by 19.82 square miles to 155,939.52 square miles. The change did not affect the average population per square mile as reported.

Table 18

For the population of conterminous United States by urban-rural residence from 1790 to 1960, see table 20 of U.S. Census of Population, 1960, Volume I, Part A or Part 1. Alaska figures for 1939 and 1929 are included in the United States, West Region, and Pacific Division totals as of 1940 and 1930, respectively.

Table 22

ALASKA. Anchorage Municipality was Anchorage Borough prior to 2000. Denali Borough was organized from part of Southeast Fairbanks and Yukon-Koyukuk Census Areas in 1990. Juneau, Sitka, and Yakutat are each now referred to as a "city and borough." Skagway-Hoonah-Angoon Census Area was created from part of Skagway-Yakutat-Angoon Census Area in 1992. Yakutat City and Borough was created from part of Skagway-Yakutat-Angoon Census Area in 1992.

Boroughs and census areas replace census divisions of 1970 and election districts of 1960 as county equivalents; 1970 and 1960 figures are shown where comparable data are available. Aleutians East Borough was created from part of Aleutian Islands Census Area and Dillingham Census Area in 1987. Aleutians West Census Area was created in 1990 from balance of Aleutian Islands Census Area that did not become part of Aleutians East Borough. Lake and Peninsula Borough was created from part of Dillingham Census Area in 1989. Northwest Arctic Borough was created from Kobuk Census Area and part of North Slope Borough in 1982.

ARIZONA. La Paz County was created from part of Yuma County in 1983.

FLORIDA. Duval County is governmentally consolidated with an incorporated place, Jacksonville city, but the city is not geographically coextensive with the county. In the 1970, 1980, and 1990 censuses, Jacksonville city was erroneously shown as a consolidated city that was geographically coextensive with Duval County and contained the separately incorporated places of Atlantic Beach, Jacksonville Beach, and Neptune Beach cities and Baldwin town. Dade County was officially renamed Miami-Dade County in 1997.

HAWAII. 1970 population (172) and housing units (unavailable) of Kalawao County included in Maui County.

IDAHO. 1960 state total includes unpopulated part of Yellowstone National Park shown separately in 1960 but included in Fremont County in 1970 and 1980.

MASSACHUSETTS. Essex, Franklin, and Hampshire Counties became nonfunctioning geographic units before January 1, 2000. This information does not appear in the published reports, but the detailed summary files show these counties as active governments.

MONTANA. The portion of Yellowstone National Park in Montana until 1997 was not in any county, and therefore the Census Bureau treated it as a separate geographic entity that was equivalent to a county in Montana for data presentation purposes; in that year, the Montana portion of the park became part of Gallatin and Park Counties.

NEVADA. 1960 state total includes population (2,900) and housing units (673) of that part of Ormsby County outside Carson City city consolidated with Carson City city in 1969.

NEW MEXICO. Cibola County was created from part of Valeria County in 1981.

SOUTH DAKOTA. 1970 and 1960 state totals include population (1970, 1,389; 1960, 1,042) and housing units (1970, 431; 1960, 293) of Washabaugh County, which consolidated with Jackson County in 1979.

VIRGINIA. 2000 data for Halifax County include the population (8,491) and housing units (3,946) for South Boston town, formerly an independent city, which changed its legal status to "town" and became part of Halifax County in 1995.

1970 and 1960 state totals include population (1970, 35,166; 1960, 31,366) and housing units (1970, 10,252; 1960, 8,648) of Nansemond County, which became an independent city in 1972 and consolidated with Suffolk city in 1974. 1970 and 1960 data for Prince William County include population (1970, 9,164; 1960, 3,555) and housing units (1970, 2,854; 1960, 1,154) of Manassas city and population (1970, 6,844; 1960, 5,342) and housing units (1970, 1,536; 1960, 1,372) of

Manassas Park city, which became independent of the county in 1975. 1970 and 1960 data for York County include population (1970, 5,441; 1960, 4,278) and housing units (1970, 1,739; 1960, 1,318) of Poquoson city, which became independent of the county in 1975.

1960 data for Bedford County include population (5,921) and housing units (1,842) of Bedford city, which became independent of the county in 1968. 1960 data for Fairfax County include population (13,585) and housing units (3,621) of Fairfax city, which became independent of the county in 1961. 1960 data for Halifax County include population (5,535) and housing units (1,752) of Emporia city, which became independent of the county in 1967. 1960 state total also includes population (51,612) and housing units (13,921) of Norfolk County, which consolidated with South Norfolk city (population, 22,035; housing units, 7,167) and became designated as Chesapeake city in 1963; and of Princess Anne County (population, 77,127; housing units, 21,268), which consolidated with Virginia Beach city in 1963, but does not include addition of 17 persons to Norton city. 1960 data for Roanoke County include population (16,058) and housing units (4,365) of Salem city, which became independent of the county in 1968. 1960 data for Rockbridge County include population (7,537) and housing units (1,959) of Lexington city, which became independent of the county in 1966. 1960 data for Southampton County include population (7,264) and housing units (2,098) of Franklin city, which became independent of the county in 1961.

WISCONSIN. Menominee County organized from parts of Oconto and Shawano Counties in 1961.

WYOMING. 1960 state total includes population (420) and housing units (239) of that part of Yellowstone National Park shown separately in 1960 but included in Park and Teton Counties in 1970 and 1980.

Table 29

The column "Counties with no change" includes Martin County, IN, and 3 counties newly recognized in Alaska since the 1990 census (Denali Borough, Skagway-Hoonah-Angoon Census Area, and Yakutat City and Borough).

Table 30

The column "Counties with no change" includes Washington County, CO; Garfield County and Wheeler County, NE; and 3 counties newly recognized in Alaska since the 1990 census (Denali Borough, Skagway-Hoonah-Angoon Census Area, and Yakutat City and Borough).

Table 31

CALIFORNIA. The land area for the state of California is incorrect. The land area should be decreased by 19.82 square miles to 155,939.52 square miles. The change did not affect the average population per square mile as reported.

FLORIDA. Fontainebleau CDP, Miami-Dade County, is shown incorrectly as Fountainbleau. Lake Buenaventura CDP, Osceola County, is incorrectly identified as Yeehaw Junction CDP; it was named Buena Ventura Lakes in the 1990 census.

GEORGIA. The population, housing unit count, land area, and average population per square mile for Athens-Clarke County (balance) are incorrect. The total area is correct as reported. The corrections are shown below:

Population	100,303
Housing units	41,643
Land area (square miles)	117.92
Average population per square mile	850.6

TENNESSEE. The corrected 2000 population for Nashville-Davidson (balance), Davidson County, is 546,534, and the corrected housing unit count is 242,456.

Table 32

ANCHORAGE MUNCIPALITY, AK (2000 population rank 65). Anchorage municipality was Anchorage city prior to 2000. Anchorage city consolidated with Anchorage borough in 1975. 1940 and 1930 populations are for 1939 and 1929, respectively.

ARLINGTON CDP, VA (2000 population rank 102). Data shown since 1950, when Arlington, which is coextensive with Arlington County, was first defined as urban.

AUGUSTA-RICHMOND COUNTY (BALANCE), GA (2000 population rank 97). Consolidated with Richmond County in 1996; figures prior to 2000 are for Augusta city. 1950 population was estimated.

ATHENS-CLARKE COUNTY (BALANCE), GA (2000 population rank 245). Consolidated with Clarke County in 1991; figures prior to 2000 are for Athens city. The 2000 population and housing unit counts for Athens-Clarke County (balance) are incorrect. The corrected population is 100,303, and the corrected housing unit count is 41,643.

BOSTON CITY, MA (2000 population rank 20). Roxbury city annexed in 1867; Charlestown city annexed in 1874.

CHESAPEAKE CITY, VA (2000 population rank 90). Norfolk County and South Norfolk city consolidated as Chesapeake city in 1963.

COLUMBUS CITY (BALANCE), GA (2000 population rank 108). Consolidated with Muscogee County except for Bibb City town in 1971; figures prior to 1980 are for Columbus city.

EUGENE CITY, OR (2000 population rank 160). 1890 population not returned separately.

FORT WAYNE CITY, IN (2000 population rank 84). 1860 population estimated.

HAMPTON CITY, VA (2000 population rank 146). Consolidated with Elizabeth City County in 1952.

HARTFORD CITY, CT (2000 population rank 184). 1800 and 1790 populations estimated.

HONOLULU CDP, HI (2000 population rank 46). Including the CDPs of Aliamanu CDP and Fort Shafter CDP, which should have been a part of Honolulu CDP, the 1990 population for Honolulu CDP is 377,059.

INDIANAPOLIS (BALANCE), IN (2000 population rank 12). Consolidated with Marion County except for Beech Grove, Lawrence, and Southport cities and Speedway town in 1970; figures prior to 1970 are for Indianapolis city.

JACKSON CITY, MS (2000 population rank 111). 1850 population returns incomplete; slave population not counted.

JACKSONVILLE CITY, FL (2000 population rank 14). Governmentally consolidated with Duval County but not geographically coextensive with the Duval County. In the 1970, 1980, and 1990 censuses, Jacksonville city was erroneously shown as a consolidated city that was geographically coextensive with Duval County and contained the separately incorporated places of Atlantic Beach, Jacksonville Beach, and Neptune Beach cities and Baldwin town.

KNOXVILLE CITY, TN (2000 population rank 119). 1860 population not returned separately.

LEXINGTON-FAYETTE, KY (2000 population rank 64). Consolidated with Fayette County in 1974; figures prior to 1980 are for Lexington city. 1850 population estimated.

NASHVILLE-DAVIDSON (BALANCE), TN (2000 population rank 25). The 2000 population and housing unit counts for Nashville-Davidson (balance) are incorrect. The corrected 2000 population is 546,534, and the corrected housing unit count is 242,456. Consolidated with Davidson County; figures prior to 1970 are for Nashville city. 1820 and 1810 populations not returned separately.

NEWARK CITY, NJ (2000 population rank 63). 1830 population prior to incorporation.

NEWPORT NEWS CITY, VA (2000 population rank 115). Consolidated with Warwick city in 1958.

NEW YORK CITY, NY (2000 population rank 1). Population shown for years since 1900 is for New York city and its boroughs as constituted under the act of consolidation in 1898.

PATERSON CITY, NJ (2000 population rank 141). 1850 and 1840 populations prior to incorporation.

PHILADELPHIA CITY, PA (2000 population rank 5). Spring Garden, Northern Liberties, Kensington, Southwark, and Moyamensing districts annexed in 1854.

PITTSBURGH CITY, PA (2000 population rank 52). Allegheny city annexed in 1907.

PORTSMOUTH CITY, VA (2000 population rank 242). 1850 population corrected since publication of U.S. Census of Population: 1930, Volume I.

RALEIGH CITY, NC (2000 population rank 62). 1810 population not returned separately.

SALEM CITY, OR (2000 population rank 162). 1890 population shown is estimated. No figure was shown in the 1910 or 1900 census report.

SAN FRANCISCO CITY, CA (2000 population rank 13). 1850 population shown is for 1852 as given in state census for that year; 1850 returns for San Francisco destroyed by fire.

SPRINGFIELD CITY, MO (2000 population rank 135). 1860 population not returned separately.

STAMFORD CITY, CT (2000 population rank 193). 1890 population estimated.

TUCSON CITY, AZ (2000 population rank 30). 1870 population prior to incorporation.

VIRGINIA BEACH CITY, VA (2000 population rank 38). Consolidated with Princess Anne County in 1963; figures prior to 1970 are for Virginia Beach city only.

WASHINGTON CITY, DC (2000 population rank 21). Washington city has been considered coextensive with the District of Columbia since 1895. 1800 population prior to incorporation.

WATERBURY CITY, CT (2000 population rank 219). 1860 population corrected since publication of U.S. Census of Population: 1930, Volume 1.

WINSTON-SALEM CITY, NC (2000 population rank 109). Winston city and Salem town consolidated as Winston-Salem city between 1910 and 1920. Figures for 1910, 1900, 1890, and 1880 represent combined population of Winston city and Salem town; population given for 1870 is that of Winston city alone.

YONKERS CITY, NY (2000 population rank 95). 1860 population estimated.

Table 33

This table is limited to urban places, of which there were only 33 in 1800. For more information, see Campbell Gibson, *Population of the 100 Largest Cities and Other Urban Places in the United States: 1790 to 1990,* Working Paper No. 27, U.S. Bureau of the Census, Washington, DC, 1998.

ALLEGHENY CITY, PA (1850 population rank 30). Annexed by Pittsburgh city in 1907.

BROOKLYN CITY, NY (1850 population rank 7). Brooklyn city and other territory consolidated with New York in 1898.

CHARLESTOWN CITY, MA (1850 population rank 40). Annexed by Boston city in 1874.

HONOLULU CDP, HI (1990 population rank 44). Including the CDPs of Aliamanu CDP ad Fort Shafter CDP, which should have been a part of Honolulu CDP, the 1990 population for Honolulu CDP is 377,059.

NASHVILLE-DAVIDSON (BALANCE), TN (2000 population rank 25). The 2000 population and housing unit counts for Nashville-Davidson (balance) are incorrect. The corrected 2000 population is 546,534, and the corrected housing unit count is 242,456. Consolidated with Davidson County; figures prior to 1990 are for Nashville city.

NEW HAVEN CITY, CT (1850 population rank 34). Population shown is of town, including city; town and city not returned separately

NEW YORK CITY, NY (2000 population rank 1). Population shown for years since 1900 is for New York city and its boroughs as constituted under the act of consolidation in 1898.

ROXBURY CITY, MA (1850 population rank 37). Annexed by Boston city in 1867.

SAN FRANCISCO CITY, CA (1850 population rank 22). Figure shown is that given in state census of 1852. Returns for 1850 were destroyed by fire.

SPRING GARDEN DISTRICT, PA (1850 population rank 9);
NORTHERN LIBERTIES DISTRICT, PA (1850 population rank 11);
KENSINGTON DISTRICT, PA (1850 population rank 12);
SOUTHWARK DISTRICT, PA (1850 population rank 20); and
MOYAMENSING DISTRICT, PA (1850 population rank 28). These areas annexed by Philadelphia city in 1854.

WASHINGTON CITY, DC (2000 population rank 21). Washington city has been considered coextensive with the District of Columbia since 1895.

WILLIAMSBURGH TOWN, NY (1850 population rank 24). Annexed by Brooklyn city in 1854.

Table 34

SAN FRANCISCO-OAKLAND-SAN JOSE, CA CMSA. The land area for Monterey County is incorrect. The land area should be decreased by 19.82 square miles to 3,302.14 square miles. The corrected average population per square mile is 121.7.

ST. LOUIS, MO-IL MSA. The portion of Sullivan city in Crawford County, MO, is legally part of the St. Louis, MO-IL MSA. The 2000 and 1990 figures for the St. Louis, MO-IL MSA do not include this area.

Table 38

The "Number of counties" column includes 3,006 counties; 11 boroughs, 3 city and boroughs, 12 census areas, and Anchorage municipality in Alaska; the District of Columbia; 64 parishes in Louisiana; Baltimore city, Maryland; St. Louis city, Missouri; Carson City, Nevada; and 40 independent cities in Virginia. In Puerto Rico, municipio is the county equivalent.

The columns under "Independent incorporated place" are composed of incorporated places that are primary subdivisions of counties, existing independently of other primary subdivisions, such as townships. Independent places located in more than one county are counted in each county.

Those Indian reservations in New York that are located in more than one county are counted in each county under the column "American Indian reservation."

The “Other” column includes 36 census subareas in Alaska; 3 gores and 1 grant in Vermont; 1 minor civil division county equivalent in Virginia; 34 plantations and 1 gore in Maine; and 8 grants, 4 locations, and 6 purchases in New Hampshire. The “Other” column for Puerto Rico includes 825 barrios and 75 barrios-pueblo and excludes subbarrios.

STATISTICAL TABLES

Table 36. Population, Housing Units, Area Measurements, Density, and Inside and Outside Metropolitan Area for Urban Areas: 2000

[Density computed using land area. For information on nonsampling error and definitions, see text]

United States Urbanized Area Urban Cluster Puerto Rico	Population	Housing units	Area measurements in square miles		Average per square mile		Population
