FLIS PROCEDURES MANUAL

LOGISTICS ON-LINE

ACCESS (LOLA)

JANUARY 2004

CHAPTER 1
GENERAL

16.1.1 General

This section of the Logistics On-line Access (LOLA) Manual provides general information pertinent to the preparation of this document. Additionally, it provides a high-level summary of the benefits and major functions.

16.1.2 Purpose

The objective of this volumne is to provide the information necessary for a functional end-user to effectively use the LOLA Application. The LOLA Application, a component of the Federal Logistics Information System (FLIS), DLAH 00-90-C-0004, is designed to provide DLIS customers with easy access to the computer system, user-friendly screens to retrieve and update data during work sessions, and the ability to access other FLIS applications as needed.

16.1.3 Organization of the LOLA EM

The organization of information presented in this Manual conforms to the guidelines stated in DoD-STD-7935A, DOD Automated Information Systems (AIS) Documentation Standards. The information includes a non-technical presentation of the overall LOLA Application inclusive of its anticipated performance, its environment, and contingency modes of operation. Attention has been given to Sections 3, 4, 5, 6, 7, 8, 9, and 10 of this manual to include all information required for an end-user to learn the application so that the end-users will have a ready reference manual for future use.

16.1.4 Purpose of the System

LOLA provides the user with the capability to obtain information concerning items of supply contained in the logistics database. The system allows the user to locate items having both approved and non-approved item names by entering a variety of criteria, to include characteristics. In addition, LOLA provides the user with the means to obtain descriptions, definitions, and effective dated change information for item names, Federal Supply Groups (FSGs), and Federal Supply Classes (FSCs).

  a. LOLA is divided into seven subsystems:

    (1) Item of Supply Inquiry Subsystem

    (2) Characteristics Search Subsystem

    (3) FSG/FSC Item Name Search Subsystem

    (4) CAGE Inquiry Subsystem

(5) AMMO Code Inquiry Subsystem

(6) Catalog Tools Inquiry System

(7) LOLA Statistics Subsystem

b. Processing inquiries or searches for items of supply is performed incrementally, with each step designed to help the user narrow the search so that the output yielded is as precise as possible. Ideally, the final result will be one item of supply that meets the user's needs. If more than one item satisfies the criteria, however, all may be output. In the latter case, except for inquiries by complete Part Number (PN) and CAGE Code, or any inquiry/search that yields a single item of supply, printed output or data stored for downloading to a personal computer (PC) are limited to 9600 characters.

c. Processing of updates for NIIN Assignment or changes is performed incrementally, with each step designed to assist the user in submitting an on-line update as easily as possible. Access to all needed Tables and help will be readily available.

d. In LOLA, the user may directly interface between subsystems. In this respect, the user can have items of supply identified in the Characteristics Search Subsystem carried over to the Inquiry Subsystem for output. In addition, INCs selected in the FSG/FSC Item Name Search Subsystem can be transferred to the Characteristics Search Subsystem for processing. This design increases productivity and makes the system as 'user friendly' as possible.

16.1.5 References

This paragraph identifies FLIS reference documents used to create this volume.

a. DLIS Modernized System Functional Description, Revision 2, 04 March 1991, GDS.

b. LOLA Functional Description, Revision 2, 03 April 1991, GDS.

c. LOLA Functional Description, July 1989, DLSC.

d. DLIS System/Subsystem Specification, Sections 1-3 and 4A, Revision 7, 12 June 1991, GDS.

e. LOLA System/Subsystem Specification for On-Line Update 21 May 1991.

f. Logistics On-Line Access (LOLA) System/Subsystem Specification Volume II, 26 February 1993.

16.1.6 Terms and Abbreviations

A glossary of terms and abbreviations is provided in Appendix A of this document. The terms and abbreviations used in this manual include acronyms, unavoidable technical terms, and words unique to the FLIS environment. It does not include definitions for screen field labels as they are defined within the instructional information provided in Sections 3, 4, 5, 6, 7, 8, 9 and 10 of this manual.

16.1.7 Security

Restrictions that apply to the use of the LOLA Application are explained in Section 3, paragraph 16.3.4, Access Control. These restrictions are applied to safeguard sensitive data stored in the Federal Logistics Information System (FLIS). Users who are provided with access to the LOLA Application should be aware of penalties which may be levied for making unauthorized copies of sensitive material.

CHAPTER 2

SYSTEM SUMMARY

16.2.1 System Summary

This section provides a non-technical presentation of information on the overall system. Detailed technical information, i.e., how to use the Logistics On-Line Access (LOLA) Application, is presented in other sections of this manual.

16.2.2 Overview

The LOLA Application is a major component of an automated customer service system provided by the Defense Logistics Information Service (DLIS). LOLA was designed, developed, and implemented as part of an overall modernization effort at DLIS which was undertaken to address end-user considerations. These considerations include reliability, transparency where possible, seamless integration, quick response, single user interface, interoperability, connectivity, availability and growth. The LOLA Application accomplishes these tasks by providing timely responsiveness for customers, increasing reliability and performance, increasing responsiveness to change, and reducing dependence on hardcopy. FLIS is a centralized, large-scale, fully-integrated, mainframe system. As a part of this system, LOLA provides the on-line software designed to permit easy access to volumes of information stored in DLIS's databases. LOLA provides end-users with user-friendly, help responsive, interactive screens from which data is requested and then displayed.

16.2.3 Application Summary

The LOLA Application provides inquiry capabilities: Inquiry for Item of Supply, Characteristics Search, FSG/FSC Item Name Search, Freight, CAGE, AMMO Code and MOE Rule Data. This application supports on-line access to the Federal Logistics Information System (FLIS). LOLA interfaces with another FLIS Application called Characteristics Data Management (CDM). This interface, while transparent to the end-user, provides the characteristics decode feature to LOLA that allows end-users to view clear text data on their screens. The LOLA Application, also, provides on-line update capabilities. This application supports those customers having the need to submit update transactions via an on-line media. It interfaces with the Tables system. This interface is transparent to the user, but does provide access to the tables for verification of entries.

   a. Inquiry. The Inquiry for Item of Supply allows end-users to request information concerning a specific item of supply.

     (1) When employing the Inquiry function, the end-user has the following access options available:

       (a) By National Item Identification Number (NIIN)

       (b) Part Number (PN)

(c) Partial Part Number (PPN)

(d) Item Name Code (INC)

(e) Item Name

(f) Commercial and Government Entity (CAGE) Code

(g) CAGE Name

(h) Any valid Inquiry combination (See below)

Valid Inquiry Combinations

	NIIN	Part Number	Partial PN	INC	Item Name	CAGE Code	CAGE Name
NIIN	X						
Part Number				X	X	X	X
Partial PN				X	X	X	X
INC			X	X		X	X
Item Name		X	X			X	
CAGE Code		X	X	X		X	
CAGE Name		X	X	X		X	

(2) A list of items is generated matching the criteria entered by the end-user. The end-user then chooses the desired items and the output format for the data. Output data may be in the form of pre-formatted data views or tailored output consisting of a combination of data elements from various data groups. Depending on authorization, output may be displayed to screen, printed as a report, or formatted for downloading to a PC.

(3) To conduct a CAGE Code search, the end-user enters a CAGE Code. Processing is performed similar to an Item Name/Keyword search, except the resulting list of National Stock Numbers (NSNs), item names and part numbers is based on CAGE Code.

b. Characteristics Search. This subsystem allows the user to locate items of supply by searching for their characteristics. To initiate a characteristics search, the user must first enter an INC or Item Name.

(1) Entering an INC initiates the search for items of supply having an approved item name that is assigned an Item Name Code equal to the one entered.

(2) Entering an Item Name allows the search to be conducted for items of supply having an approved or non-approved name. In this case, the system automatically transfers to the FSG/FSC Item Name Subsystem. There, the system generates a list of names similar to the name entered; the user may then select an INC for an approved item name or a specific non-approved item. At this point, there is an automated return to the Characteristics Search subsystem to complete the user requested search. (NOTE: If a non-approved item

name is selected, the system assigns a unique identifier called a 'pseudo INC' for processing purposes. The value of the pseudo INC is transparent to the user.)

Based upon the specific approved or non-approved item name designated by the user as the initial criteria, the system progresses through a series of steps in which the user adds desired characteristics to the search criteria. The system then outputs the items of supply that match the criteria.

The default output media is the CRT (screen). The user may change the output media prior to output being generated. The standard media options are CRT (screen) or printer; some users may also be authorized to download data to a PC. The output may be provided in the standard format established for the Characteristics Search Subsystem or the user may cause the output to be displayed as selected on the Select Inquiry Output Options Screen in the Inquiry Subsystem.

   c. FSG/FSC Item Name Search. This is a multi-purpose subsystem that allows the user to:

    (1) Start a search for items of supply based on an item name, keyword, INC, FIIG, FSG, or FSC.

    (2) Obtain INC definitions, FSG titles, FSG notes, and FSC descriptions.

    (3) Identify the INCs that are included in a particular FIIG or FSC.

    (4) Identify the FSC's in which a particular INC is included.

    (5) Obtain effective dated change data for INCs, FSCs and FSGs.

If the user initiated a search by entering an item name, keyword, INC, FIIG, FSG, or FSC the system will generate a list of approved and/or non-approved Item Names based on the criteria entered. The user may select one specific name from the list and transfer to the Characteristics Search Subsystem. The system uses the INC of an approved item name or assigns a unique identifier to a non-approved item name as the basis for the characteristics search. (NOTE: The unique identifier assigned to a non-approved item name is called a "pseudo INC". The value of the pseudo INC is transparent to the user and is used by the system for processing purposes only.)

The FSG/FSC Item Name Search subsystem displays the results of searches on the CRT. However, if the user elects to perform a characteristics search using a specific approved INC or nonapproved Item Name identifier, the output capabilities provided by the Characteristics Search Subsystem will be available.

   d. CAGE Code Inquiry. This subsystem allows users to search by the following criteria:

   (1) CAGE Code
   (2) Company Name
   (3) Street Name - full or partial
   (4) Zip Code

(5) Phone Number
(6) Contractor Establishment Code (CEC)
(7) DUNS Number
(8) Congressional District
(9) Standard Industrial Classification (SIC) Code
(10) Tax ID
(11) Replacement CAGE
(12) Associated CAGE
(13) Debarment Code

e. AMMO Code Inquiry. This subsystem allows users to search by the AMMO Code. If a valid AMMO Code is entered, the output will be forwarded via the normal mode/media.

f. Catalog Tools Inquiry. This subsystem allows the users to search by the following criteria:

(1) CATTOOLS CAGE CODE INQUIRY: Searches are allowed by CAGE Code, Company Name, Street Name, Zip Code, Phone Number, Contractor Establishment Code (CEC), DUNS Number, Congressional District, Standard Industrial Classification (SIC) Code, Tax ID, Replacement CAGE, Associated CAGE and Debarment Code.

(2) CATTOOLS MOE RULE DATA INQUIRY: Searches are allowed by the following criteria:

(a) MOE Rule Number - A search to yield the data associated with the MOE Rule entered. If more than one MOE Rule and Effective Date exists, a list of the MOE Rules by Date is displayed and the user may then choose one to view.

(b) Effective Date - May also be used along with the MOE Rule to narrow down the search criteria.

(3) CATTOOLS FREIGHT DATA INQUIRY: Searches are allowed by the following criteria:

(a) A complete Freight Code can be entered displaying the data or a UFC code alone could be entered displaying a Pick List that the user may then choose from to view.

(b) A month and year may be entered to receive freight statistical data.

(4) CATTOOLS MGMT/FSC DATA INQUIRY: Searches are allowed by the following criteria:

(a) Enter the FSC and receive a pick list to choose from. The user can tag one or more items to view.

(b) Enter the date the FSC was established and receive a pick list to choose from.

(c) Enter the effective date of the FSC and receive a pick list to choose from.

(d) Enter the date the FSC was changed and receive a pick list to choose from.

(5) CATTOOLS AMMO CODE DATA INQUIRY: The user will enter an AMMO code and receive back data on an item.

g. LOLA Statistics. This subsystem allows the user to query for LOLA Statistics in the following manner:

(1) COUNTS BY TYPE OF QUERY: The user is allowed to query by Julian Date alone or in conjunction with Department, Activity, Quarter and Type. The following responses are received: Characteristics Search, FSG/FSC Item Name, Ammo Code, MOE Rule and Freight. Within the Statistics Counts by Type of Query, the Item of Supply Inquiry counts are received: NIIN, Part Number Inquiry (PN-INQ), CAGE Code, CAGE Name, INC, Item Name, CAGE Code Part Number, Partial Part Number, CAGE Code/Partial Part Number and Combination. CAGE Inquiry Counts received are: CAGE Code, Company Name, Zip Code, Phone Number, Contractor Establishment Code (CEC), DUNS, ADP/CAO, Congressional District, Standard Industrial Classification (SIC) Code, SIC Zip, SIC phone, Tax ID, Replacement CAGE, Associated CAGE, Company Street, Company Zip, Company Phone, Street Zip, Street Phone and Debarment Code. Total Inquiries is also displayed.

(2) COUNTS BY INQUIRY DATA TYPE: The user is allowed to query by Julian Date alone or in conjunction with Department or Activity. The following responses are received: Basic Reference, CAGE/Supplier, ID, Reference Number, Freight, Coded Characteristics, Decode Characteristics, MOE Coded, MOE Decode, Interchangeability and Substitutability (I&S), Standardization, Management Phrase, Requistion, Packaging, Selected Elements and Total transactions.

(3) LOLA UPDATE STATISTICS: The user is allowed to query by entering date and activity code and/or department and one of any other field. A NIIN can also be submitted with date alone. The statistics for fields User-ID through NIIN can only be pulled for 90 (ninety) days.

16.2.4 Performance

System responses to the end-user will be governed by two factors. These factors are divided into two categories: processing time and network time.

a. Processing time is the amount of time required by the computer to perform the request. For simple transactions, such as simple inquiries and updates, the minimum processing time is two seconds with no transaction taking more five seconds. For complex transactions, the minimum processing time is five seconds with no transaction exceeding eight seconds. For transactions requiring large output or numerous screens, the maximum time is five minutes.

b. Network time is the length of time required to send the user's request to the DLIS system and return the results. This time will vary depending on the type of physical connection with the DLIS system.

End-users who experience delays longer than this should contact the DLIS Customer Service Office, 1-888-352-9333.

16.2.5 Controls

Numerous controls have been built into FLIS. These controls safeguard system information to ensure that only authorized users can access data. Each of the controls, which are listed below, are explained fully for the user in other sections of this manual.

    a. User-IDs and Passwords

    b. Screen access and useability

    c. Terminal restrictions

16.2.6 System Environment

LOLA resides on an AMDAHL Mainframe and runs under MVS/ESA, CICS, and DB2.

The software units that comprise the LOLA Application have been created using the COBOL generator called Application Productivity software (APS). APS has been used to build the screens and provide the processing capabilities the end-user employs.

This environment supports multiple remote access terminals around the world.

    a. Hardware Required. The hardware required by LOLA end-users makes-up a workstation. The work stations may be local or remote and are composed of the following units:

       (1) a terminal or a micro computer (connected to the central computer at DISA Megacenter in Columbus, Ohio.

       (2) a keyboard

       (3) a printer (the printer may be shared with other workstations and as such be placed in a central location)

    b. Software Required. The software used by LOLA is installed and maintained by DISA Megacenter in Columbus, Ohio. Kermit is needed at the PC level for downloading data.

16.2.7 Contingencies and Alternate Modes of Operation

Contingency protocol in the event of a system failure/slow down (LOGRUN) is as follows:

    a. Special Extracts

    b. CD-ROM Products

    c. Hardcopy Products

    d. Electronic Data Transfer

    e. Tape

16.2.8 Assistance and Problem Reporting

DLIS provides end-users with assistance in the following ways:

   a. Updates to the end-users manuals

   b. Service number to call

   c. Integrated On-line Help

   d. On-line end-users manuals problems should be reported to the DLIS Customer Service Office, 1-888-352-9333.

CHAPTER 3

ACCESS TO THE SYSTEM

16.3.1 Signing onto LOLA

This section describes the step-by-step procedures to be used to access the Logistics On-Line Access (LOLA) Application.

16.3.2 First-Time Use of the System

The following paragraphs provide two types of information for the first-time end-user: Authorized System Use and System Conventions. Authorized System Use presents the information needed for the first-time end-user to get a user-ID and a password. System conventions present information about using the LOLA menus, using the help feature, error messages, and using function (F) keys.

    a. Access to FLIS is controlled through the use of User-IDs and Passwords.

       (1) A User-ID is a code entered during a process called System Sign-on. It is used to tell the System who is using it. Valid User-IDs are assigned by the DLIS Customer Management Branch. As a first time user you must fill out a registration form located on the DLIS home page (www.dlis.dla.mil) in the Forms and Publications section. The completed form is faxed or mailed to the number/address on the top of the form.

          (a) If at any time you forget your user-ID or have reason to believe it has been passed to an unauthorized user, you must contact DLIS immediately.

          (b) If you do not use your user-ID for a period of 90 days, it will become revoked and you must contact DLIS. If you have a problem signing-on to the System (entering your user-ID), contact DLIS.

       (2) Each user is assigned a generic password for initial sign-on, after which the end-user will have the opportunity to select their own unique password. The password is a code used to confirm your user-ID and access authorization. Your password will not print on the screen when it is entered, this is a precaution provided by the system to ensure the confidentiality of your password. Initial passwords are assigned by DLIS.

          (a) The password should be treated as confidential information and is not to be shared with co-workers, or you may lose your access.

          (b) Should you get an error when entering your password during sign-on, re-type it carefully. You will be given three attempts to enter it correctly. If all three attempts are incorrect, the system locks out the user. They must contact DLIS to investigate the security violation.

       (3) User-IDs and Passwords are keyed-in from the FLIS System LOGON Screen.

Lu: VFLST113 New Password:                        Date: 10/03/00
```

NOTE: Remote users will have to make connection with DLIS in Battle Creek, Michigan prior to accessing the FLIS LOGON Screen. Ask DLIS's customer service office for the instructions used from your facility to accomplish this.

b. System conventions are the characteristics of the System which remain consistent from one application to another and from one screen and report to another. The use of conventions employed for the development of FLIS include standard screen formats, uniform function key use and availability of the System Help Features.

(1) There are three types of screens the end-user will work with when using LOLA: Menu Screens, Work Screens, and Help Screens. All of these screens have a common layout. See Below.

SCRNCD: XXXXXX	CHARACTERISTICS DATA MANAGEMENT	DATE: XXXXXXXX
USERID: XXXXXXXX	SCREEN HEADING	TIME: XXXXX

FIELD PROMPTS FOR MENU SELECTIONS

DATA ENTRY OR OUTPUT DISPLAYS

INFORMATIONAL AND ERROR MESSAGE LINE

F1=HELP	F2=CLEAR SCR	F3=PREV MENU	F4=MAIN MENU	F5=	F6=
F7=	F8=	F9=	F10=	F11=	F12=

(a) The top two lines include the current Screen ID (SCRNCD), the system date and time, and the screen heading.

(b) The bottom four lines are divided into two lines for messages and two lines for function (F) keys.

(2) Menu Screens provide a list of options from which the user makes a selection. The options which will be displayed on a menu are controlled by the level of authorization rights assigned to an end-user with their User Id and Password.

(a) Menu options are selected by positioning the cursor next to an option and pressing the ENTER key.

(b) The System will then display a secondary menu or the work screen associated with the menu selection.

(3) Work Screens, available for Inquiry only, are data entry or data display screens used to provide information to the end-user in various predefined formats. Field prompts provided on the LOLA work screens identify the type of information to be entered or displayed. Section 4, Processing Reference Guide, of this document states the specific values and methods to be used while entering data, viewing displays, and ending a session.

(4) End-users may bypass the menu selection process by employing the Expert Mode feature provided by FLIS. This feature is available for all FLIS Applications and allows users to key-in the Program Identifier (up to six letters) of the screen needed into the SCRNCD field (top left corner of the screen) and then pressing the ENTER key.

NOTE: Expert mode can not be used in LOLA Update.

This process may be used whenever the end-user wants to use a direct access approach in going from one input screen to another within the LOLA Application. The end-user must have authorization to access the process requested or else the security system will deny access.

c. The Help Function provided by the FLIS Screens allows end-users to access on-line help assistance from the LOLA Application screen. Help is available for screen information and for individual fields on the screens. Users request help by positioning the cursor in the field they need help with and then pressing the F1 key.

(1) Screen Help will be displayed when the cursor is placed on the screen ID field and F1 (Help) is pressed. Screen Explanation, Field Entry Requirements and Available Function Keys will be displayed on the screen.

(2) The top half of a field help screen contains field descriptions and/or a definition of the data element displayed.

(3) The bottom half of a field help screen lists decoded field value information, if relevant. If a value was entered in a field when the user requested help, the decoded information for that value will be displayed. If the value was incorrect or invalid, an error message will be displayed. If the field was left blank when help was requested, a list of possible values and their decode information will be displayed.

If the help screens are longer than one page, the user may press F7 (Page Up) and F8 (Page Down) to view the remaining text. To exit the help screen and return to the displayed screen, press F3 (Exit).

d. Error and informational messages are displayed on the bottom of the screen above the function keys to assist end-users in performing tasks on the system.

(1) Informational messages notify the user of the status of current system operations, i.e., "Incomplete Data" and "File not found." See Appendix B for a complete list of informational messages.

(2) When the program detects an input error, the field(s) will be highlighted and the cursor will be positioned in the first field with an error. Examples of error messages are "Access not valid" and "Invalid code." See Appendix B for a complete list of error messages.

e. Function keys (F keys) are tools used in a system to support end-user activities. Each Application in FLIS uses the same function key definitions to provide the end-user with the same results whether the end-user is using LOLA, CDM, or any of the other available applications. The definition of the F keys are:

F1	=	Help
F2	=	Clear Screen
F3	=	Previous Menu or Exit
F4	=	Transfer to LOGRUN Main Menu
F5	=	Application Use
F6	=	Application Use
F7	=	Application Use
F8	=	Application Use
F9	=	Application Use
F10	=	Application Use
F11	=	Application Use
F12	=	Application Use
PF24	=	'Sticky Cursor' (only available when using field level help)

By pressing the function keys, the user can invoke a specific action, thus use time effectively.

16.3.3 Equipment Familiarization

The workstations at each location may have different monitors, keyboards, and printers. End-users should contact their telecommunications expert to learn how to use and care for the equipment to be used when using FLIS.

16.3.4 Access Control

This paragraph describes system access procedures, as well as the security considerations pertaining to the storage and output of data. Prior to initiating a session on FLIS, the user must obtain authorization to use the system.

a. Authorization may be obtained by contacting the DLIS Customer Management Branch to receive a valid user-ID and password.

Once assigned, the user-ID is entered into a Group Profile. The Group Profile is a security feature that controls which menus can be displayed and what capabilities will be provided for each user, such as adding, changing, and deleting data information appropriate to their work. Special accesses and clearances are also defined according to the following standards:

(1) A user is able to access data for items of supply only as authorized by the security access the user is assigned. Access restrictions are:

(a) Data for NIINs that are not for U.S. items of supply are proprietary protected.

(NOTE: The first two numbers of NIINs for U.S. items of supply are always 00 or 01.) In addition, the characteristics of some items of supply are also proprietary protected and can be viewed only by users authorized proprietary access.

   (b) Data for FSG 11 (including FSC's in FSG 11), INC 97991, and CAGE Codes 57991, 67991, 77991, or 87991 are restricted to users having NOCO access authority.

   (c) Data for CAGE Codes 02227, 11874, 15492, 28865, and 98230 are restricted to users having CRYPTO access authorization.

   (d) Items of supply with a Limited Distribution Code of O and S are restricted to users authorized to view classified data.

   (2) All LOLA users may output data to the CRT, and if available, a printer.

  b. After obtaining a user-ID and password, FLIS may be accessed. The type(s) of processing the user can do with the system is determined by the personal level of authorization.

  c. The user can route output in three ways:

   (1) Screen

   (2) Printer

   (3) Overnight Processing (available to authorized users only)

16.3.5 Platform

The FLIS platform is on the AMDAHL mainframe and resides at the DISA Megacenter in Columbus, Ohio. Initial set-up and configuration will be required from the communication area before use.

16.3.6 Initiating a Session

This paragraph includes step-by-step procedures for initiating a session, as well as troubleshooting procedures.

  a. FLIS LOGON Screen. The first accessible screen is the LOGON Screen. The cursor will appear next to the Command field. Press (TAB), enter your seven letter identification User-ID code, and press (TAB) again. Type in your personalized Password. The Password will not appear on the screen. It is confidential and should not be shared with co-workers. Press Enter after keying-in your Password.

  b. LOGRUN Selection Menu Screen. After entering an authorized Password, the LOGRUN Selection Menu Screen will appear. Only those applications you have access to will appear on the Selection Menu. Select the application required, (i.e. LOGRUN/LOLA) by tabbing to the selection and hitting enter, by typing the appropriate number (i.e. 3) for the selection on the command line and hitting ENTER or by hitting the associated function key.

c. Action/Result Steps. The following steps will guide the user through the LOGON process.

ACTION	RESULT
Press Tab;	If correct, the "LOGRUN SELECTION MENU" will be displayed.
Enter personal User-ID Press Tab; Enter Password Press enter	If incorrect, the cursor will return to the Password field and a reject message will be displayed.
	A maximum of three attempts is allowed. After which, the user will be locked out of the system. They will then need to contact DLIS.
Select LOLA Application	The Logistics On-Line Remote Network Main Menu will be displayed.

16.3.7 Troubleshooting

If you encounter difficulties while attempting to access FLIS, the following table may offer some assistance in solving these difficulties.

Problem	Possible Cause	Solution
1.Blank Screen	No Power Monitor Contrast	Check Power Source Adjust Contrast
2.Cannot Access System	Communication	Check Terminal Cables
	Incorrect ID/Password	Re-key ID/Password
	Password	Call DLIS for Assistance
	Password Expired	Call DLIS for Assistance
	Non-Approved Authorization	Call DLIS for Assistance

16.3.8 Stopping and Suspending Work

While working in the system, it may be necessary to temporarily or permanently stop a work session. If this becomes necessary, follow the steps listed below.

a. Stopping a session. To end a session, press F4 (Main Menu) to the LOGRUN Main Menu, F3 to return to the LOGISTICS ONLINE REMOTE USERS NETWORK MAIN MENU, and F3 to quit and return to the Columbus MFLP TND screen. The session will be ended and the user will need to sign-on again for access.

b. Suspending a session. To temporarily end a session, press F3 (Previous Menu) until you return to the Logistics On-Line Remote Network Main Menu.

c. Automatic stopping of a session. If a terminal is not used for fifteen minutes, the user will be automatically signed off the terminal.

CHAPTER 4

INQUIRY SUBSYSTEM PROCESSING REFERENCE GUIDE

16.4.1 Processing Reference Guide

This section provides the end-user with the how-to-use technical information necessary to use LOLA Inquiry programs.

   a. Capabilities. The LOLA Inquiry programs allow end-users to request specific types of information and then view the responding information on-line. For a detailed flow of this process, see Figures 4.1-1 through 4.1-8c.

The end-user may make requests for information by entering a National Item Identification Number (NIIN) or by entering a single piece of information or selected combination of information:

     (1) Part Number (PN) by entering a complete or partial PN.

     (2) Item Name Code (INC) by entering a specific INC value.

     (3) CAGE code by entering a specific Commercial and Government Entity (CAGE) code value.

     (4) Multiple NIIN by pressing F6 and entering Multiple NIINS from 1 to 24.

     (5) Associated CAGE Code by entering a specific Commercial and Government Entity Code value.

     (6) Company Name by entering a Keyword value or specific company name value.

     (7) Replacement Code by entering a specific value for a replacement CAGE Code.

     (8) Debarment Code by entering a specific value (i.e. D=Debarred: P=Proposed; S=Suspended) for this field.

The end-user may also use a keyword search inquiry by entering either a descriptive Item Name or a CAGE Name. When the keyword search is used, a list of INCs or CAGE codes that match the criteria entered by the user is displayed. The user may then choose a specific item for review as well as the format of the data that will be output. Output data may appear as follows:

     (1) Screen

     (2) Printer

     (3) Overnight Processing (authorization necessary)

b. Conventions. Conventions used for the Federal Logistics Information System (FLIS) are described in Chapter 16.3.2.b of this manual. Conventions used within the LOLA Application include pre-formatted data views and screen entry requirements. These are explained (with instructions) in paragraphs 16.4.2 through 16.4.10 of the LOLA Inquiry Processing Procedures and screen illustrations in Appendix A.

c. Processing procedures for LOLA Inquiry are provided in paragraphs 16.4.2 through 16.4.10. These procedures provide step-by-step instructions for performing each of the LOLA Inquiry tasks.

16.4.2 Inquiry by CAGE Code

a. Task Description. This task will allow you to enter a Commercial and Government Entity (CAGE) Code, search for National Stock Numbers (NSN) associated with that CAGE code and retrieve data elements on those NSNs.

b. Special Access. Special clearances are required for access to the following information. Check with the security administrator at your facility for authorization.

NOCO
CRYPTO
Security Classified O
Security Classified S
Proprietary
NATO

c. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLINQ - Start Inquiry
LOLCCD - Item CAGE Pick List

d. Procedure. From the Start Inquiry screen, move to the CAGE CODE field, type in the desired CAGE code and press Enter. The CAGE Code must be alphanumeric. The Item CAGE Pick List screen will appear with the CAGE code and CAGE name for that code. A list of NSNs, INCs, item names and part numbers will be displayed. A limit of 100 NIIN matches will be displayed. Output on CAGE to NIIN will be limited to 100. Select the item or items you wish to view by placing an X next to the desired NSN(s) and press F6 (Process), or press F12 (Process All) to process all listed NSNs.

Processing will be either displaying, printing or downloading to PC the information depending on which you specified in the Output Option selection.

e. Special Features. If more than 12 items are available on the CAGE Pick List, press F7 (page up) and/or F8 (page down) to view all the items.

f. Data Features. To narrow the inquiry search, place additional information in either the part number field, INC field, or Item Name field. This may reduce the number of items on the pick list you will need to scan visually. If anything is placed in the CAGE Name field or NIIN field, the inquiry will be considered invalid and will not proceed. However, when a valid search is initiated, output of the search is limited to 100.

g. Considerations. You may change your Output Options (CRT/Printer/Overnight processing) and/or the specified data elements by pressing F10 (Change Data Elements) on the CAGE Pick List screen. Refer to Select/Change Output Options for further information.

16.4.3 Inquiry by CAGE Name

a. Task Description. This task will allow you to enter a Commercial and Government Entity (CAGE) name, search for a proper CAGE code, continue the search for NSNs dealing with that CAGE code and retrieve data elements on those NSNs.

b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLINQ - Start Inquiry
LOLCNM - CAGE Code Pick List
LOLCCD - Item CAGE Pick List

c. Procedure. From the Start Inquiry screen, move to the CAGE Name field, type in the desired CAGE name and press Enter.

NOTE: CAGE name entered must be a minimum of three characters in length. (Example: 'international' not 'in').

A list of CAGE codes and names will display on the screen. To pick the proper CAGE Code, move the cursor to the Tag column on the line item you desire. Press X to select that item and press F6 (Process) to process that code.

The Item CAGE Pick List screen will appear with the CAGE code and CAGE name for the code selected. A list of NSNs, INCs, item names and part numbers will be displayed. Select the item or items you wish to view with an X in the Tag column, or press F12 (Process All). When F12 is pressed, processing will commence automatically for all the NIINs displayed as though X's were entered.

Once all the desired items have been properly selected, press F6 (Process). Processing will be either displaying, printing or downloading to PC the information depending on which you specified in the Output Option selection.

If there is only one CAGE Code for the name entered on the Start Inquiry Screen the Item CAGE Pick List will appear with the entered CAGE Name and the matched CAGE Code. Thus the CAGE Code Pick List is bypassed.

d. Special Features. If more than 12 items are available on the CAGE Code Pick List or CAGE Pick List, press F7 (page up) and/or F8 (page down) to view all the items.

e. Data Features. To narrow the inquiry search, place additional information in either the part number field, or INC field. This may reduce the number of items on the pick list you will need to scan visually. If anything is placed in the CAGE Name field, Item Name field, or NIIN field, the inquiry will be considered invalid and will not proceed.

f. Considerations. You may change your Output Options (CRT/Printer/Overnight processing) and/or the specified data elements by pressing F10 (Change Output Options) on the Item CAGE Pick List screen. Refer to Select/Change Output Options for further information.

16.4.4 Inquiry by Item Name

a. Task Description. This task will allow you search by the Item Name Code to find the proper NIIN(s).

b. Special Access. Special clearances are required for access to the following information. Check with the security administrator at your facility for authorization.

c. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLINQ - Start Inquiry
LOLINM - INC Pick List
LOLINP - Item INC Pick List

d. Procedure. From the Start Inquiry screen, move to the Item Name field, enter a valid Item name and press Enter. The screen will respond with a INC Pick List corresponding to the Item Name. A limit of 100 NIIN to INC matches will be displayed. To pick an item, move to the Tag field of the line item you desire, press X to mark the item and press F6 (Process).

NOTE: Item name entered must be a minimum of three characters in length. (Example: 'THER' not 'TH').

The Item INC Pick List screen will appear. To pick the item, place an X in the Tag field of each NSN you wish to view and press F6 (Process) to process them, or press F12 (Process All) to process all listed items. When F12 is pressed, processing will commence automatically as though X's were entered.

The selected NSNs will either be displayed, printed, or sent to overnight processing, depending on the Output Options you previous selected.

If there is only one Item Name Code for the name entered on the Start Inquiry Screen, the Item INC Pick List will appear with the entered name and the matched INC. Thus the INC Pick List is bypassed.

e. Special Features. If more than 12 items are available on the Item INC Pick List, press F7 (page up) and/or F8 (page down) to view all the items.

f. Data Features. To narrow the inquiry search, place additional known information in either the part number field or the CAGE code field. This will reduce the number of items on the pick list you will need to scan visually.

g. Considerations. You may change your Output Options (CRT/Printer/Overnight processing) and/or the specified data elements by pressing F10 (Change Output Options) on the Item INC Pick List screen. Refer to Select/Change Output Options for further information.

16.4.5 Inquiry by Item Name Code (INC)

a. Task Description. This task will allow you search by the Item Name Code (INC) to find the desired NIIN(s).

b. Special Access. Special clearances are required for access to the following information. Check with the security administrator at your facility for authorization.

c. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLINQ - Start Inquiry
LOLINP - Item INC Pick List

d. Procedure. From the Start Inquiry screen, move to the Item Name Code field, enter a valid Item Name Code (INC) and press Enter.

NOTE: INC must be entered as all numerics.

The Item INC Pick List screen will appear. Select the item or items you wish to view by placing an X in the Tag field and press F6 (Process), or press F12 (Process All) to process all listed NSNs.

Each selected NSN will be displayed, printed, or sent to overnight processing (if authorized), depending on the Output Option you previously selected.

e. Special Features. If more than 12 items are available on the Item INC Pick List, press F7 (page up) and/or F8 (page down) to view all the items.

f. Data Features. To narrow the inquiry search, place additional information in either the part number field, CAGE code field, or CAGE name field. This will reduce the number of items on the pick list you will need to scan visually. There is a limit of 100 matches for each search initiated.

g. Considerations. You may change your Output Options (CRT/Printer/Overnight processing) and/or the specified data elements by pressing F10 (Change Output Options) on the Item INC Pick List screen. Refer to Select/Change Output Options for further information.

16.4.6 Inquiry by NIIN

a. Task Description. By entering a given NIIN, a search for information pertaining to that NIIN will be initiated.

b. Special Access. Special clearances are required for access to the following information. Check with the security administrator at your facility for authorization.

NOCO

c. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLINQ - Start Inquiry
LOLSUP - CAGE/Supplier Data
LOLIDD - Identification Data
LOLXRF - Reference/Part Number Data
LOLFRT - Freight Data
LOLCOD - Coded Characteristics
LOLMOE - MOE Rule Data Coded
LOLMOD - MOE Rule Data Decoded
LOLMUL - Multiple NIIN
LOLIAS - I&S Data
LOLDEC - Decoded Characteristics
LOLSTD - Standardization Data
LOLMGT - Management Data
LOLBAS - Basic Reference Data
LOLREQ - Requisition Data

d. Procedure. On the Start Inquiry screen, enter a NIIN in the NIIN Inquiry field leaving all other inquiry fields blank, then press Enter. If that NIIN is not found, an error message will be displayed on the screen.

NOTE: NIIN entered must be numeric for positions 1-2,6-9 and alpha or numeric for positions 3-5.

If the NIIN is found, an Active/Inactive NIIN will send the appropriate screen(s) to the select output media: CAGE/Supplier Data, Identification Data, Reference/Part Number Data, Freight Data, Coded Characteristics, MOE Rule Data Coded, MOE Rule Data Decoded, I&S Data, Decoded Characteristics, Standardization Data, Management/Phrase Data, Basic Reference Data, Requisition Data and Packaging Data.

e. Special Features. If the NIIN has been or will be canceled, the screen will display the Canceled NIIN with the date of cancellation and the replacement NIIN if there is a replacement or message "NIIN Cancelled with no replacement". Press F9 to display the data for the canceled NIIN, or press F6 to show data for the Replacement NIIN. You will only get a replacement NIIN if there is one to replace the canceled NIIN.

f. Data Features. None.

g. Considerations. The information you receive will depend on the Data Elements you specified on your Output Options screen. If you would like a printed copy, refer to Select/ Change Output Options.

16.4.7 Inquiry by Part Number (PN) or Partial Part Number (PPN)

a. Task Description. This task will allow you to enter a part number, select one or more part numbers, CAGE numbers, item names and NSNs, and inquiry the selected NSNs.

b. Special Access. Special clearances are required for access to the following information. Check with the security administrator at your facility for authorization.

c. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLINQ - Start Inquiry
LOLPNR - Item PN Pick List

d. Procedure. From the Start Inquiry screen, enter the part number in the Part Number field and press Enter. The Item PN Pick List will display with list of part numbers (if you entered a partial part number with a wildcard), CAGE codes, items names, and NSNs. Select the item(s) you wish to inquiry by placing an X in the Tag column next to the part number(s) or press F12 (Process All). When F12 is pressed, processing will commence automatically as though X's were entered. Once the desired item(s) have been selected, press F6 (Process) to display, print or overnight processing (if authorized) (depending on your previous Output Option selection).

e. Special Features. If you do not know the complete part number, you may search with partial part number. Enter as much of the start of the part number known (minimum of 1 character) and place a single question mark (?) at the end (i.e. 5?). A search will be conducted for all parts that start with those numbers (5). If more than 12 items are available on the Item PN Pick List, you may scan the other items by pressing F7 (page up) and/or F8 (page down).

f. Data Features. To narrow the inquiry search, place additional information about the part in the CAGE Name field or the CAGE code field (not both), and/or the item name field or the INC field (not both) on the Start Inquiry screen. Output on INC to NIIN will be limited to 100. If information is in the CAGE code field and CAGE Name field, the inquiry will be considered invalid and will not continue until one is erased. Also, if information is in the Item Name field and INC field, the inquiry will be considered invalid and will not continue until one is erased.

g. Considerations. You may change your Output Options (CRT/Printer/Overnight process-ing) and/or the specified data elements by pressing F10 (Change Output Options) on the Item PN Pick List screen. Refer to Select/Change Output Options for further information.

16.4.8 Inquiry by Multiple NIIN

a. Task Description. By entering a given NIIN from 1 to 24, a search for information per-taining to those NIINs will be initiated.

b. Special Access. Special clearances are required for access to the following information. Check with the security administrator at your facility for authorization.

NOCO

c. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLINQ - Start Inquiry
LOLMUL - Multiple NIIN Inquiry
LOLSUP - CAGE/Supplier Data
LOLIDD - Identification Data
LOLXRF - Reference/Part Number Data
LOLFRT - Freight Data
LOLCOD - Coded Characteristics
LOLMOE - MOE Rule Data Coded
LOLMOD - MOE Rule Data Decoded
LOLIAS - I&S Data
LOLDEC - Decoded Characteristics
LOLSTD - Standardization Data
LOLMGT - Management Data
LOLBAS - Basic Reference Data
LOLREQ - Requisition Data

d. Procedure. On the Start Inquiry screen press F6 key. The Multiple NIIN Inquiry screen will appear. Enter multiple NIINs from 1 to 24, a Submitter-ID, and press F10 for the Select Inquiry Output Option Screen to choose the output format and the output media desired.

NOTE: NIIN entered must be numeric for positions 1-2,6-9 and alpha or numeric for posi-tions 3-5.

If the NIIN is found, an Active/Inactive NIIN will send the appropriate screen(s) to the select output media: CAGE/Supplier Data, Identification Data, Reference/Part Number

Data, Freight Data, Coded Characteristics, MOE Rule Data Coded, MOE Rule Data Decoded, I&S Data, Decoded Characteristics, Standardization Data, Management/Phrase Data, Basic Reference Data, Requisition Data and Packaging Data.

e. Special Features. If the NIIN has been or will be canceled, the screen will display the Canceled NIIN with the date of cancellation and the replacement NIIN. Press F9 to display the data for the canceled NIIN, or press F6 to show data for the replacement NIIN. You will only get a replacement NIIN if there is one to replace the canceled NIIN.

f. Data Features. None.

g. Considerations. The information you receive will depend on the Data Elements you specified on your Output Options screen.

If you would like a printed copy or overnight processing (if authorized), refer to Select/Change Output Options.

16.4.9 Inquiry by Associated CAGE

a. Task Description. This task allows the user to inquire the database for an Associated CAGE Code and be presented with a Pick List and/or detailed data pertaining to the Associated CAGE Code entered.

b. Special Access. Special clearances are required for access to the following information. Check with security administrator at your facility for authorization.

NOCO
CRYPTO
Proprietary
NATO

c. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLINQ - Start Inquiry
CATACC - Inquiry by Associated CAGE
CATXCC - Expanded CAGE Code Inquiry
CATCLR - CAGE Code Notes
CATCGC - Inquiry by Changed CAGE Data

d. Procedure. From the Start Inquiry screen (LOLINQ), enter an Associated CAGE Code and press Enter.

The Inquiry by Associated CAGE screen (CATACC) will be displayed. Tag the CAGE Code you wish to inquire and press F6 (Process). The Expanded CAGE Code Inquiry screen (CATXCC) will be displayed. Press F8 (Page Down) or F7 (Page Up) to view the information.

From screen CATXCC, F9 (Clr TEXT) OR F10 (CHG DATA) may be pressed for further information. If F9 (Clr TEXT) is pressed, the CAGE Code Notes screen (CATCLR) will be

displayed. This screen will display Clear Text information for the CAGE Code selected on screen CATXCC. If F11 (Print) was pressed on CATXCC, this information will be loaded into a holding Terminal Screen Queue/Temporary Screen Queue (TSQ) to format the data for print. Screen CATCLR will not be displayed if this is the case.

If F10 (Chg Data) is pressed from screen CATXCC, the Inquiry by Changed CAGE Data screen (CATCGC) will be displayed with tracking information for the CAGE Code inquiry. This screen will display changed data for the First and Second Name/Location and the last time each Line Number was changed for this CAGE code.

   e. Special Features. None

   f. Data Features. None

   g. Considerations. You may change your Output Options (CRT/Printer/Overnight processing) and/or the specified data elements by pressing F10 (Change Output Options) on the Start Inquiry screen (LOLINQ). Refer to Select/Change Output Options for further information.

16.4.10 Select/Change Output Options to CRT

   a. Task Description. This task will display the retrieved information to your CRT.

   b. Special Access. None.

   c. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLOUT - Select Inquiry Output Options

   d. Procedure. Access the Select Inquiry Output Options screen by pressing F10 when defined as Change Output Options. Enter a C for CRT in the Output Media field. You may also define your Output Data Segment View at the same time. NOTE: Basic Reference Data is the default data segment view. To exit, press F6 (Process) to process your defined inquiry request.

   e. Special features. None.

   f. Data Features. There must be only one Output Media and at least one Output Data Segment View selected.

   g. Considerations. For more information about selecting Output Data Segment View, refer to Select/Change Output Data Segment View.

If you wish to print the information on the printer associated with your terminal, refer to Select/Change Output Options to Printer.

If you wish to run an overnight batch, refer to the Overnight processing option.

16.4.11 Select/Change Output Options to Printer

a. Task Description. Unless you specify differently, all retrieved information will be displayed on the screen. This task will send the information to the printer associated with your terminal instead.

b. Special Access. There is no special access required for this task. Exception: If you are sending printouts to a system printer you will need to have the system printer address added to your user id profile. You will need to contact DLIS to have this procedure completed. The address is a four digit alpha numeric code (i.e. P123). You can also do print screens to your everyday printer (does not require authorization).

c. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLOUT - Select Inquiry Output Options

16.4.12 Select Overnight Processing

a. Task Description. Unless you specify differently, all retrieve processed information will be at the DISA Megacenter in Columbus, Ohio. This task will send the information to you via Overnight Processing consisting of either electronic data output, or Magnetic Tape.

b. Special Access. There is special access required for this. Only certain activites entered in Table 783 Activity_Media_ID are the activities that can utilize Overnight Processing.

c. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLOUT - Select Inquiry Output Options

d. Procedure. Access the Select Inquiry Output Options screen by either entering LOLOUT in the screen code field, or press F10 when defined as Select Output Options. Enter an O for Overnight Processing in the Output Media field. If you are not authorized to receive Overnight Processing, then you will not have it listed as one of your Output Media's. NOTE: Basic Reference Data is the default data segment view. After you have selected the output data views you want to process, tab to the Deskcode, enter a 7-position Deskcode, and press F6 (Process) to process your defined inquiry request.

e. Special Features. None.

f. Data Features. There must be only one Output Media and at least one Output Data Segment View. The output from Overnight Processing does not look like a LOLA printed listing. The output will be in Output Data Request Code (ODRC) format. Also, note you may actually receive additional segments/views over and above what you actually requested. This is only because of the way the ODRC tables are defined. Also, you cannot obtain Characteristics Data (Coded or Decoded) when submitting CAGE Code/Part Number queries via Overnight Processing. Only NIIN overnight queries can obtain Characteristics Data.

g. Considerations. For more information about Overnight Processing, refer to DLIS Customer Service Office.

16.4.13 Related Processing

The first time a user accesses LOLA, the users will need to define one of the following output parameters:

Screen
Printer
Overnight Processing

If the user does not select an output parameter, the default will be the screen. See screen layout LOLOUT in Appendix A for further information.

16.4.14 Data Backup

The end-user will not have responsibility for backup procedures related to FLIS. All backups are performed by the Columbus Megacenter in Columbus, Ohio.

16.4.15 Recovery from Errors and Malfunctions

See Appendix B, Error Messages and Recovery Procedures.

16.4.16 Messages

See Appendix B, Error Messages and Recovery Procedures.

16.4.17 Futures Data

Using LOLA Inquiry, you may view, print or download futures data on supply items. Futures data is available only on the following segment views:

Identification Data
MOE Rule Data Coded
MOE Rule Data Decoded
Coded Characteristics
Decoded Characteristics
Management Data
Phrase Data

All current data on segment views show first. A message indicating the availability of futures data is also displayed.

Futures data with the same effective date, DIC and originating activity are grouped together.

You may press F12 to view the next set of futures data. If the last set is displayed, pressing F12 brings back the current data.

Futures data is printed in the same order as it shows on the screen. Headings and line spacing conform to the current standards for printing segment views.

CHAPTER 5

**CHARACTERISTICS SEARCH SUBSYSTEM PROCESSING
REFERENCE GUIDE**

16.5.1 Processing Reference Guide

This section provides the end-user with technical information regarding LOLA's characteristics search functions.

a. Capabilities. The LOLA Characteristics Search Subsystem allows the end-user to search the logistics database by specifying characteristics information to acquire information concerning item of supply.

While employing the Characteristics Search Subsystem, the user may start a search by entering an Item Name Code (INC) or, if a specific INC is not known, by entering a descriptive Item Name.

(1) INC Search. After the user enters a specific INC, he/she is provided with a list of Master Requirement Codes (MRCs) that apply to the INC and number of the NIINs for each MRC. The user chooses one or more MRC from which the user will select specific characteristics criteria. The NIINs that have characteristics that match the criteria are those that are output. The output may appear as follows:

Screen
Printer
Overnight Processing (if authorized)

(2) Item Name Search. If a descriptive Item Name is entered, the user is transferred directly to the FSG/FSC/Item Name Subsystem, where the user can identify a specific INC based on the Item Name entered (see Section 6). Once an INC is selected, the user may return to the Characteristics Search Subsystem and process the search as described above.

b. Conventions. Conventions used for the Federal Logistics Information System (FLIS) are described in Section 16.3.2.b of this manual. Conventions used within the LOLA Applications include pre-formatted data displays and screen entry requirement. These are explained in paragraphs 16.5.2 through 16.5.4 of the Processing Procedures and screen illustrations in see Appendix A.

c. Processing Procedures. Processing procedures for LOLA Characteristics Search are provided in paragraphs 16.5.2 through 16.5.4. These procedures provide step-by-step instructions for performing each LOLA Characteristics Search task.

16.5.2 Inquiry Characteristics by Item Name

a. Task description. This task will allow you to search the characteristics of an item once you have entered an item name to start the inquiry process.

b. Special Access. Special clearances are required for access to the following information. Check with the security administrator at your facility for authorization.

NOCO
CRYPTO
Security Classified O
Security Classified S
Overnight Processing (if authorized)
Proprietary

c. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLCHS - Start Characteristics
LOLINR - Item Name/Keyword Search Response
LOLMRC - MRC Pick List
LOLSAC - MRC SAC Selection Screen
LOLDIM - MRC Reply Selection (Dimension)
LOLMLT - MRC Reply Selection (Multiple Tables)
LOLNUM - MRC Reply Selection (Number)
LOLTBL - MRC Reply Selection (Single Tables)
LOLTOL - MRC Reply Selection (Tolerances)
LOLTXT - MRC Reply Selection (Text)

d. Procedure. From the Start Characteristics Search screen, enter the Item Name you would like to inquiry and press Enter. The Item Name/Keyword Search Response screen will display the Item Names and Item Name Code (INC). Tab to the line of a valid, approved Item Name/INC and press F10 (Start CHS). The MRC Pick List will display MRCs that are associated with the selected Item Name Code. You may select the desired MRCs by placing a X in the Tag field. Once all desired MRCs have been selected, press F6 (Process).

If the current MRC has more than one Secondary Access Code (SAC), the SAC Selection Screen will appear. This screen will display the SACs of an MRC and its descriptions. Tag the desired SAC and press F6.

The MRC Reply Selection screen will appear. This screen will vary depending on the characteristics associated with that MRC. Select the characteristics of your item and press F6 (Process).

The section Reviewing Characteristics Search Results will further explain how to select your output method and view NIIN search results.

e. Special Features. If more than 12 items are available on either the MRC Pick List or the MRC Reply Selection screens, press F7= page up and/or F8 = page down to view additional items.

The number of Reply Values displayed on a MRC Reply Selection Screen can be restricted

by entering specific information which defines guidelines for the database search. The type of information used to initiate the database search for each MRC Reply Selection Screen is provided with the explanation of each screen.

If you select more than one MRC from the MRC Pick List, you may move to your first MRC Reply Selection by pressing F6 (Process). F5 (Cancel) will stop this inquiry and return you to the Start FSG/FSC Item Name.

   f. Data Features. On the Start Characteristics Search screen, do not enter a INC and Item Name at the same time. If you know both, enter the INC and leave the Item Name field blank.

   g. Considerations. If the entered item name can not be found, the Start Characteristics Search screen will be displayed with an appropriate message.

16.5.3 Inquiry Characteristics by Item Name Code (INC)

   a. Task Description. This task will allow you to search the characteristics of an item once you have entered an INC to start the inquiry process.

   b. Special Access. Special clearances are required for access to the following information. Check with the security administrator at your facility for authorization.

NOCO

Proprietary

   c. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLCHS - Start Characteristics
LOLMRC - MRC Pick List
LOLSAC - MRC SAC Selection Screen
LOLDIM - MRC Reply Selection (Dimension)
LOLMLT - MRC Reply Selection (Multiple Tables)
LOLNUM - MRC Reply Selection (Number)
LOLTBL - MRC Reply Selection (Single Tables)
LOLTOL - MRC Reply Selection (Tolerances)
LOLTXT - MRC Reply Selection (Text)

If the selected MRC has SAC associated with it, the MRC SAC Selection screen will automatically appear. The user will need to select a SAC for processing (Press F6).

If SAC is not available for the selected MRC then the MRC SAC Selection screen will not appear for the MRC.

d. Procedure. From the Start Characteristics Search screen, enter in the INC you would like to inquiry and press Enter. The MRC Pick List will display MRCs that are associated with the entered INC. You may select the desired MRCs by placing a X in the Tag field. Once all desired MRCs have been selected, press F6 (Process).

If the current MRC has more than one SAC, the SAC Selection Screen will appear. This screen will display the SACs of an MRC and its descriptions. Tag the desired SAC and press F6.

The MRC Reply Selection screen will appear. This screen will vary depending on the characteristics associated with that MRC. Select the characteristics of your item and press F6 (Process).

The section Reviewing Characteristics Search Results will further explain how to select your output method and view NIIN search results.

e. Special Features. If more that 12 items are available on either the MRC Pick List or the MRC Reply Selection screens, press F7= page up and/or F8= page down to view additional items.

The number of Reply Values displayed on a MRC Reply Selection Screen can be restricted by entering specific information which defines guidelines for the database search. The type of information used to initiate the database search for each MRC Reply Selection Screen is provided with the explanation of each screen.

If you select more than one MRC from the MRC Pick List, you may view the next MRC Reply Selection by pressing F9 (Next MRC).

F5 (Cancel) will stop this inquiry and return you to the Start Characteristics Search screen.

f. Data Features. On the Start Characteristics Search screen, do not enter an INC and Item Name at the same time. If you know both, enter the INC and leave the Item Name field blank.

g. Considerations. If the entered item name code cannot be found, the Start Characteristics Search screen will display an appropriate message.

16.5.4 Reviewing Characteristics Search Results

a. Task Description. This task describes the various options available once the MRCs have been selected.

b. Special Access. Special clearances are required for access to the following information. Check with the security administrator at your facility for authorization.

   c. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLRES - Characteristics Search Results

   d. Procedure. Once you are on the Characteristics Search Results screen (See Inquiry Characteristics by Item Name Code (INC) or Inquiry Characteristics by Item Name), you have four (4) main options:

      (1) Return to MRC Pick List to modify MRC replies: Press F9 (Redo Current Search).

      (2) Enter a CAGE code to narrow the search: Enter a CAGE Code in the Secondary Search By CAGE Code field and press Enter.

      (3) Transfer NIIN to LOLA Inquiry (section 4 of this manual): transfer NIIN to the Select Inquiry Output Options screen.

      (4) NIIN Search Results: Press F6 (Process). This will display each individual NIIN that matches the MRC selected (and CAGE Code, if entered).

   e. Special Features. You may change the output media to CRT, printer, or Overnight processing (if authorized) while on the Characteristics Search Results screen. Enter the proper code in the field to the far right of the Enter Output Media prompt.

You can also select several NIINs and transfer to the Select Inquiry Output Options Screen by hitting F11 (Route to Inquiry). You can also process all NIINs by pressing F12 (to tag all) or entering an 'X' in the tag column.

On the NIIN Search Results screen, you may view any other MRCs by pressing F7 (page up) and/or F8 (page down). If you would like to view another NIIN, press F6 (Prev NIIN) and/or F9 (Next NIIN) as appropriate.

F5 (Cancel) will stop this inquiry and return you to the Start Characteristics Search Screen (LOLCHS).

Characteristics Search reflects current data only. Interfacing with the Inquiry Subsystem allows you to acquire futures data on the NIINs that match your search criteria.

   f. Data Features. You must have one output media entered. If you do not specify where to send the results, they will be displayed on the screen.

   g. Considerations. Use of the Secondary Search By CAGE Code can reduce the number of NIINs. If an invalid CAGE Code is entered, a message will be displayed at the bottom of the screen.

16.5.5 Related Processing

There is no related processing that concerns the end-user.

16.5.6 Data Backup

The end-user will not have responsibility for backup procedures related to the Federal Logistics Information System (FLIS). All backups are performed by the DISA Megacenter in Columbus, Ohio.

16.5.7 Recovery from Errors and Malfunctions

See Appendix B, Error Messages and Recovery Procedures.

16.5.8 Messages

See Appendix B, Error Messages and Recovery Procedures.

CHAPTER 6

FSG/FSC FUNCTIONAL PROCESSING REFERENCE
GUIDE

16.6.1 Processing Reference Guide

This section provides the end-user with technical information regarding LOLA's FSG/FSC Subsystem functions.

   a. Capabilities. The LOLA FSG/FSC Subsystem allows the user the capability to search and display information concerning H2/H6 Cataloging Handbooks, the H2-2 Publications Directory, and the Item Name/Keyword data tables. The end-user may make requests for information by entering:

   (1) Item Name

   (2) Keyword

   (3) Federal Item Identification Guide (FIIG)

   (4) Item Name Code (INC)

   (5) Federal Supply Group (FSG)

   (6) Federal Supply Code (FSC)

   b. While employing the FSG/FSC Item Name Search Subsystem, the user has the following options to access data in the logistics database:

   (1) A search to yield a list of Item Name Codes (INCs) by entering either a descriptive Item Name or a descriptive keyword.

   (2) A search to yield a list of INCs by entering a Federal Item Identification Guide (FIIG) number.

   (3) The definition of a specific INC, the subordinate group titles that make up a specific Federal Supply Group (FSG), or the data for a specific Federal Supply Class (FSC).

   (4) The data associated with a particular INC.

   (5) The data associated with FSC/FSG data.

   c. Conventions. Conventions used for the Federal Logistics Information System (FLIS) are described in Section 16.3.2.b of this manual. Conventions used within the LOLA Applications include pre-formatted data displays and screen entry requirement. These are explained (with directions) in paragraphs 16.6.2 through 16.6.12 of the Processing Procedures and screen illustrations in Appendix A.

d. Processing Procedures. Processing procedures for LOLA FSG/FSC Search are provided in paragraphs 16.6.2 through 16.6.12. These procedures provide step-by-step instructions for using each of the LOLA FSG/FSC Search tasks.

16.6.2. Display FSC Change Data

a. Task Description. This task allows you to enter an FSC to display the change data within a specified date range.

b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLSRC - Start FSG/FSC Item Name Search
LOLCHG - Get INC/FSC Effective Dated Changes
LOLFCH - FSC Change Data

c. Procedure. From the Start FSG/FSC Item Name Search, enter the FSG/FSC and then press the F5 (INC/FSC EFF DTD Changes) key. The Get INC/FSC Effective Dated Changes screen will be displayed. Enter change data for INC or change data for FSC, a valid Julian date range and press Enter. If all entries are valid, the FSC Change Data screen will appear with the entered information with corresponding description, effective date and DRN changed.

d. Special Features. If more than twelve descriptions are available on the FSC Change Data screen, press the F7 (page up) and/or F8 (page down) to view the remaining descriptions.

When finished viewing the FSC Change Data screen, press the F5 (previous screen) to return to the Get INC/FSC Effective Dated Changes screen.

e. Data Features. Entering an INC, FSC and FSG on the Get INC/FSC Effective Dated Changes screen will be considered an invalid search. To display INC effective dated changes, clear the change data for FSC, enter dates and hit enter. To display FSG effective dated changes enter the FSG on the change data for FSC, enter the valid Julian Date and hit enter.

The date range entered must be no earlier than 180 days prior to or 180 days after the current date.

For futures data (Effective Date of Change), an FSG or a complete FSC can be entered. Note that on screen LOLFCH, the screen header could change to either FSC or FSG depending on this input. Please refer to screen layout.

f. Considerations. If a valid FSC or date range is not entered, an error message will appear at the bottom of the screen.

16.6.3 Display FSC Description

a. Task Description. This task will allow you to display the description of an FSC.

b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLSRC - Start FSG/FSC Item Name Search
LOLFSC - FSC Description

c. Procedure. From the Start FSG/FSC Item Name Search screen, enter an FSC in the FSG/FSC Data field and press F11 (Item Name Definition/FSC Description). The FSC and Group will display on the FSC Description screen with the FSC Description.

d. Special Features. If more than twelve (12) lines are available on the FSC Description screen, press the F7 (page up) and/or F8 (page down) to view the remaining lines. You may transfer to the FSC Data screen by pressing F9 (FSC Data) on the FSC Description screen.

e. Data Features. To perform this task, only an FSC should be entered on the Start FSG/FSC Item Name Search screen. If any other information is entered on the screen, the search criteria will be considered invalid.

f. Considerations. If a valid search criteria is not entered, an error message will appear at the bottom of the screen.

This task may also be performed any time a function key is defined as FSC DESC.

16.6.4 Display FSG Group Notes

a. Task Description. This task will allow you to display the notes for a particular FSG.

b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLSRC - Start FSG/FSC Item Name Search
LOLFSG - Federal Supply Group Titles (H2-1 Contents)
LOLNOT - FSG Group Notes

c. Procedure. From the Start FSG/FSC Item Name Search screen, enter an FSG in the FSG/FSC Data field and press Enter. The FSG, any related Groups and Titles will display on the screen. Press the F9 (Group Notes) key to display the FSG Group Notes. FSG Group Notes will also be invoked when you enter an FSG in the Start FSG/FSC Item Name Search Screen and press F11.

d. Special Features. If more than twelve (12) lines are available on the FSC Description screen, press the F7 (page up) and/or F8 (page down) to view the remaining lines.

You may transfer back to the Federal Supply Group Titles (H2-1 Contents) screen by pressing F9 (FSG Titles) on the FSG Group Notes screen.

You may transfer to the FSC Data screen by pressing F10 (FSC Data) on the FSG Group Notes screen.

You may transfer back to the Start FSG/FSC Item Name Search screen by pressing F5 (Start Search Screen) on the FSG Group Notes screen.

e. Data Features. To perform this task, only an FSG should be entered on the Start FSG/FSC Item Name Search screen. If any other information is entered on the screen, the search criteria will be considered invalid.

f. Considerations. If a valid FSG is not entered, an error message will appear at the bottom of the screen.

16.6.5 Display Item Name Change Data

a. Task Description. This task allows you to enter an INC to display the item name change data within a specified date range.

b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLSRC - Start FSG/FSC Item Name Search
LOLCHG - Get INC/FSC Effective Dated Changes
LOLICH - Item Name Change Data

c. Procedure. From the Start FSG/FSC Item Name Search, enter your INC in the appropriate field and press the F5 (INC/FSC EFF DTD Changes) key. The Get INC/FSC Effective Dated Changes screen will display. Enter a valid Julian date range and press Enter. If all entries are valid, the Item Name Change Data screen will appear with the entered information with corresponding (Item Names, Effective Dates, FSC, Condition Codes, FIIGs, and Applicability Keys) effective dates, changed data and changed DRNs.

d. Special Features. If more than twelve (12) Item Names are available on the Item Name Change Data screen, press the F7 (page up) and/or F8 (page down) to view the remaining Item Names.

When finished viewing the Item Name Change Data screen, press the F5 (previous screen) to return to the Get INC/FSC Effective Dated Changes screen.

e. Data Features. Entering an INC, FSC and FSG on the Get INC/FSC Effective Dated Changes screen will be considered an invalid search. To display FSC effective dated changes, refer to the task Display FSC Change Data. To display FSG effective dated changes, enter the FSG on the change data for FSC, enter the valid Julian date range and hit enter.

NOTE: Entered INC must be numeric or alpha G-Z for position 1 and numeric in other positions.

The date range entered must be no earlier than 180 days prior to or 180 after the current date.

f. Considerations. If a valid INC or date range is not entered, an error message will appear at the bottom of the screen.

16.6.6 Display Item Name Definition

a. Task Description. This task will allow you to display the definition of a certain Item Name.

b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLSRC - Start FSG/FSC Item Name Search
LOLINC - Item Name Definition

c. Procedure. From the Start FSG/FSC Item Name Search, type in an INC in the INC Data field and press the F11 (Item Name Definition/FSC Description). Entered INC must be numeric or alpha G-Z for position 1 and numeric in other positions. The Item Name Definition screen will appear displaying the INC entered, the item name, FIIG, and the definition for that INC.

d. Special Features. If more than twelve (12) lines are available on the Item Name Definition screen, press the F7 (page up) and/or F8 (page down) to view the remaining lines.

You may transfer to the Item Name/Keyword Search Response screen by pressing F5 (Start Search Screen) on the Item Name Definition screen.

You may return to the Item Name Data screen by pressing F9 (INC Data) on the Item Name Definition screen.

You may begin a Characteristics Search (Section 5) by pressing F10 (Start CHS) on the Item Name Definition screen.

e. Data Features. To perform this task, only an INC should be entered on the Start FSG/FSC Item Name Search screen. If any other information is entered on the screen, the search criteria will be considered invalid.

f. Considerations. If a valid search criteria is not entered, an error message will appear at the bottom of the screen.

This task may also be performed any time a function key is defined as INC DEF.

16.6.7 FIIG Search

a. Task Description. This task will search and display a list of INCs and Item Names by entering a FIIG or partial FIIG.

b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLSRC - Start FSG/FSC Item Name Search
LOLFGR - FIIG Search Response

c. Procedure. From the Start FSG/FSC Item Name Search, enter a FIIG or partial FIIG and press Enter. The FIIG Search Response screen will appear with a list of Item Names, INCs, related INCs (for COLLOQUIAL INCs), FSC, Condition Codes concept number and Applicability Keys.

d. Special Features. If more than twelve Item Names are available on the FIIG Search Response screen, press the F7 (page up) and/or F8 (page down) to view the remaining Item Names.

To cancel the search results, press F5 (Cancel) on the FIIG Search Response screen.

To search on a different FIIG, enter the new FIIG in the Search FIIG field and press F6 (New Search).

To transfer to the FSC Description screen, move to the Item Name and press F9 (FSC Desc) on the FIIG Search Response screen or enter an 'X' on the tag beside the desired FSC and press F9.

To transfer to Characteristics Search (Section 5), press the F10 (Start CHS).

To transfer to the Item Name Definition screen, move to the Item Name and press F11 (INC DEF) or enter an 'X' on the tag field beside desired INC and press F9.

e. Data Features. To perform this task, only the FIIG should be entered on the Start FSG/FSC Item Name Search screen. If any other information is entered on the screen, the search criteria will be considered invalid.

A partial FIIG may be entered as valid search criteria. A partial FIIG is a FIIG of the first 4 or 5 character/numbers. Any FIIG that matches these starting characters/numbers will be displayed as part of the search result.

f. Considerations. If a valid search criteria is not entered, an error message will appear at the bottom of the screen.

16.6.8 FSC Data Search

a. Task Description. This task will display the item names and supporting data for a certain FSC.

b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLSRC - Start FSG/FSC Item Name Search
LOLDES - FSC Data

c. Procedure. From the Start FSG/FSC Name Search screen, type in a FSC in the FSG/FSC Data field and press Enter. If the FSG is found, the FSC, and Group will appear with a list of Item Names, INCs, Related INC (for COLLOQUIAL INCs), Condition Codes, FIIGs, and Applicability Key that support the given FSC.

d. Special Features. If more than twelve Item Names are available on the FIIG Search Response screen, press F7 (page up) and/or F8 (page down) to view the remaining Item Names.

To return to the Start FSG/FSC Item Name Search screen, press F5 (Start Search Screen).

To display the Item Name Definition screen for a specific Item Name, move to the Item Name and press the F9 (INC Def) key or enter an 'X' on the tag field beside desired INC and press F9.

To transfer to Characteristics Search (Section 5), press F10 (Start CHS). To display the FSC Description screen, press the F11 (FSC Desc) key.

e. Data Features. To perform this task, only a valid FSC should be entered on the Start FSG/FSC Item Name Search screen. If any other information is entered on the screen, the search criteria will be considered invalid.

f. Considerations. If a valid search criteria is not entered, an error message will appear at the bottom of the screen.

16.6.9 FSG Data Search

a. Task Description. This task displays the title and corresponding FSC data for a certain FSG.

b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLSRC - Start FSG/FSC Item Name Search
LOLFSG - Federal Supply Group Titles (H2-1 Contents)

c. Procedure. From the Start FSG/FSC Item Name Search screen, enter a FSG in the FSG/FSC Data field and press Enter. If that FSG is found, any Groups and numerically sequential Titles will display on the screen.

d. Special Features. If more than twelve (12) Groups and Titles are available on the Federal Supply Group Titles (H2-1 Contents) screen, press the F7 (page up) and/or F8 (page down) to view the remaining Groups and Titles.

To transfer back to the Start FSG/FSC Item Name Search screen, press the F5 (Start Search Screen).

To transfer to the FSG Group Notes screen, press the F9 (Group Notes) key.

To transfer to the FSC Data screen for a specified Group, move to the Group and press F10 (FSC Data).

e. Data Features. To perform this task, only a valid FSG should be entered on the Start FSG/FSC Item Name Search screen. If any other information is entered on the screen, the search criteria will be considered invalid.

f. Considerations. If a valid search criteria is not entered, an error message will appear at the bottom of the screen.

16.6.10 INC Data Search

a. Task Description. This task will allow the entry of an INC to retrieve the Item Name, FIIG, FSC Condition Code, Applicability Key for that INC, and a list of FSC and modifiers related to that INC.

b. Screen Displays. The following screens may be displayed during this procedure. For specific information about a screen, see Appendix A.

LOLSRC - Start FSG/FSC Item Name Search
LOLIND - Item Name Data

c. Procedure. From the Start FSG/FSC Item Name Search screen, enter an INC in the INC Data field and press Enter. Entered INC must be numeric or alpha G-Z for position 1 and numeric in other positions. The Item Name Data screen will appear containing the Item Name, FIIG, FSC Condition Code and Applicability Key matching to the entered INC. A list of FSCs and Modifiers will also appear.

d. Special Features. If more than twelve (12) FSCs or modifiers are available on the Item Name Data screen, press the F7 (page up) and/or F8 (page down) to view the remaining FSCs and Modifiers.

To transfer to the Item Name/Keyword/Response screen, press the F5 (Start Search Screen) key.

To display the INC Definition screen, press the F9 (INC Def) key.

To transfer to Characteristics Search (Section 5), press F10 (Start CHS).

To display the FSC Description screen for a specified FSC, move to the desired FSC and press the F11 (FSC Desc) key or enter an 'X' on the tag field beside the desired FSC and press F11.

e. Data Features. To perform this task, only an INC Data field should be entered on the Start FSG/FSC Item Name Search screen. If any other information is entered on the screen, the search criteria will be considered invalid.

f. Considerations. If a valid search criteria is not entered, an error message will appear at the bottom of the screen.

16.6.11 Item Name/Keyword Search

a. Task Description. This task will allow you to search and list INCs, Item Names, FSCs, Condition Codes, FIIGs, and Applicability Keys that apply to an entered Item Name or keyword.

b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLSRC - Start FSG/FSC Item Name Search
LOLINR - Item Name/Keyword Search Response

c. Procedure. From the Start FSG/FSC Item Name Search, enter an Item Name or Keyword and press Enter. The Item Name/Keyword Search Response screen will appear with a list of Item Names, INCs, Related INCs (for COLLOQUIAL INCs), FSC, Condition Codes, Concept Number and Applicability Keys.

d. Special Features. If more than twelve (12) Item Names are available on the FIIG Search Response screen, press the F7 (page up) and/or F8 (page down) to view the remaining Item Names.

To cancel the search and return to the Start FSG/FSC Item Name Search screen, press the F5 (Cancel) key.

To search on a different Item Name or keyword, enter the Item Name or keyword into the appropriate field and press F6 (New Search).

To display the FSC Description screen for a specified FSC, move to the appropriate line and press F9 (FSC Desc) or enter an 'X' on the tag field beside the desired FSC and press F9.

To transfer to Characteristics Search (Section 5), move to the desired Item Name and press F10 (Start CHS) or enter an 'X' on the tag field beside the desired Item Name and press F10.

To display the INC Definition screen for a certain INC, move to the line for the INC and press the F11 (INC Def) key or enter an 'X' on the tag field beside the desired INC and press F11.

e. Data Features. To perform this task, only an Item Name or keyword (not both) should be entered on the Start FSG/FSC Item Name Search screen. If any other information or both an Item and Keyword is entered on the screen, the search criteria will be considered invalid.

f. Considerations. If a valid search criteria is not entered, an error message will appear at the bottom of the screen.

16.6.12 Cancelled FSC Data Search

a. Task Description. This task is similar to FSC Data, but data for the cancelled INCs of the input FSG.

b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

LOLSRC - Start FSG/FSC Item Name Search
LOLDES - FSC Data

   c. Procedure. From the Start FSG/FSC Name Search screen, type in an FSG in the FSG/FSC Data field and press F10.

   d. Special Features. If more than twelve (12) Item Names are available on the FIIG Search Response screen, press the F7 (page up) and/or F8 (page down) to view the remaining Item Names.

To return to the Start FSG/FSC Item Name Search screen, press F5 (Start Search Screen).

To display the Item Definition screen for a specific Item Name, move to the Item Name and press the F9 (INC Def) key or enter an 'X' on the tag field beside the desired INC and press F9.

To transfer to Characteristics Search (Section 5), press F10 (Start CHS).

To display the FSC Description screen, press the F11 (FSC Desc) key.

FSG/FSC Item Name Search displays futures data as Change Data when you enter a date range that goes beyond the current date.

   e. Data Features. To perform this task, only a valid FSG should be entered on the Start FSG/FSC Item Name Search screen. If any other information is entered on the screen, the search criteria will be considered invalid.

   f. Considerations. If a valid search criteria is not entered, an error message will appear at the bottom of the screen.

16.6.13 Related Processing

There is no related processing that concerns the end-user.

16.6.14 Data Backup

The end-user will not have responsibility for backup procedures related to the Federal Logistics Information System (FLIS). All backups are performed by the DISA Megacenter in Columbus, Ohio.

16.6.15 Recovery from Errors and Malfunctions

See Appendix B, Error Messages and Recovery Procedures.

16.6.16 Messages

See Appendix B, Error Messages and Recovery Procedures.

CHAPTER 7

CAGE INQUIRY SUBSYSTEM REFERENCE GUIDE

16.7.1 Processing Reference Guide

This section provides the end-user with the how-to technical information necessary to use CAGE Inquiry programs.

a. Capabilities. The LOLA CAGE Inquiry programs allow End-Users to request specific types of information and then view the responding information on-line.

The End-user may make requests for information by entering specific search criteria, or entering a single piece of information.

(1) Search by any of the fields listed on the screen, but not in any combination. Only one field entry is allowed.

(2) Search by ADP/CAO inquiry. Enter data in one field only.

The user has the option to print from any of the output display screens. Output data may appear as follows:

(1) Screen

(2) Printer

(3) Overnight Processing (if authorized)

b. Conventions. Conventions used for the FLIS are described in Section 16.3.2.b of this manual. Conventions used within the LOLA Application include pre-formatted data views and screen entry requirements. These are explained (with directions) in paragaph 16.7.2 of the LOLA CAGE Inquiry Processing Procedures and Screen Illustrations in Appendix A.

c. Processing Procedures. Processing procedures for LOLA CAGE Inquiry is provided in paragraph 16.7.2. This procedure will provide step-by-step instructions for performing the LOLA CAGE Inquiry task.

16.7.2 CAGE Code Inquiry

a. Task Description. This task allows the user to query the database for CAGE Code information.

b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

CATCAG - CAGE Code Inquiry
CATXCC - CAGE Code Name Address Data

CATICN - CAGE Code Inquiry Pick List

c. Procedure. From a blank CAGE Code Inquiry screen type in a CAGE Code, Company Name, Street Name, Zip Code, Phone Number, CEC, Duns Number, Congressional District, SIC Code, Tax ID, Replacement CAGE, Associated CAGE or Debarment Code. A pick list will be returned for the field that is tagged.

If a valid CAGE Code is entered, the CAGE Code Name Address Data screen (CATXCC) will be displayed. If more data is available, press F6 (more data) to view. Press F9 (CLR-TEXT) to see the clear text or F10 (CHG-DATA) to view the changed data (if available). Press F11 (print) to send data to a local or system printer.

The searches performed other than CAGE Code will return a pick list to select from. Tag your selection and proceed with your search for CAGE Code information.

d. Special Features. From the CAGE Code Inquiry screen (CATCAG) press F5 (ADP/CAO). The inquiry by ADP/CAO screen (CATACI) will be displayed. You may enter information in only one of these fields and press enter. If no data is found for the entered code, a message will appear that states "No Data Found For...."

e. Data Features. None

f. Considerations. If a valid search criteria is not entered, an error message will appear at the bottom of the screen.

CHAPTER 8

AMMO CODE INQUIRY SUBSYSTEM REFERENCE GUIDE

16.8.1 Processing Reference Guide

This section provides the end-user with the how-to-use technical information necessary to use the AMMO Code Inquiry Programs.

   a. Capabilities. The AMMO Code Inquiry programs allow End-Users to request specific types of information and then view the responding information on-line.

   The End-User may make requests for information by entering specific search criteria for a single piece of information. The End-User enters the AMMO Code to perform the search.

   The user has the option to print from any of the output display screens. Output data may appear as follows:

   (1) Screen

   (2) Printer

   (3) Overnight Processing (if authorized)

   b. Conventions. Conventions used for the FLIS are described in Section 16.3.2.b of this manual. Conventions used within the LOLA Application include pre-formatted data views and screen entry requirements. These are explained (with directions) in paragraphs 16.8.2 of the AMMO Code Inquiry Procedures and screen illustrations in Appendix A.

   c. Processing Procedures. Processing procedures for AMMO Code Inquiry are provided in paragraph 16.8.2. This procedure will provide step-by-step instructions for performing the AMMO Code Inquiry task.

16.8.2 AMMO Code Inquiry

   a. Task Description. This task allows the user to query the database for AMMO Code information.

   b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

CATAMC - AMMO Code Inquiry
CATAMD - AMMO Code Data

   c. Procedure. From a blank AMMO Code Inquiry screen (CATAMC), type in an AMMO Code and hit the enter key. If a valid AMMO Code is entered, the AMMO Code Data (CATAMD) is displayed with the AMMO Code, INC, Status Code, Date Established/ Cancelled and a description. Press F11 (Print) to send data to a local or system printer.

d. Special Features. None.

e. Data Features. None.

f. Considerations. If a valid search criteria is not entered, an error message will appear at the bottom of the screen.

CHAPTER 9

CATALOG TOOLS INQUIRY SUBSYSTEM REFERENCE GUIDE

16.9.1 Processing Reference Guide

This section provides the end-user with the how-to-use technical information necessary to use the Catalog Tools Inquiry Subsystem.

   a. Capabilitites. The Catalog Tools Inquiry Subsystems allow End-Users to request specific types of information and then view the responding information on-line.

   The End-User may make requests for information by entering specific search criteria, entering a single piece of information, or selected combination of information.

   b. The user has the option to print from any of the output display screens. Output data may appear as follows:

     (1) Screen

     (2) Printer

     (3) Overnight Processing (if authorized)

   c. Conventions. Conventions used for the FLIS are described in Section 16.3.2.b of this manual. Conventions used within the LOLA Application include pre-formatted data views and screen entry requirements. These are explained (with directions) in paragraphs 16.9.2, 16.9.3, 16.9.4, 16.9.5 and 16.9.6 of the LOLA CATTOOLS Inquiry Processing Procedures and screen illustrations in Appendix A.

   d. Processing Procedures. Processing procedures for LOLA CATTOOLS Inquiry are provided in paragraph 16.9.2, 16.9.3, 16.9.4, 16.9.5 and 16.9.6. These procedures provide step-by-step instructions for performing each of the LOLA CATTOOLS Inquiry processes.

16.9.2 CATTOOLS CAGE Code Inquiry

   a. Task Description. This task allows the user to view the CAGE Code Inquiry.

   b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

CATCAG - CAGE Code Inquiry
CATXCC - CAGE Code Name Address Data
CATICN - CAGE Code Inquiry Pick List

   c. Procedure. From the LOLA Main Menu, select the Catalog Tools Inquiry System (CATINQ) and press Enter. From the CATTOOLS Main Menu, select the CATTOOLS

CAGE Code Inquiry (CATCAG) and press enter. The CAGE Code Inquiry screen will be displayed with CAGE Code, Company Name, Street Name, Zip Code, Phone Number, CEC, DUNS Number, Congressional District, SIC Code, Tax ID, Replacement CAGE, Associated CAGE and Debarment Code. A pick list will be returned for the field that is tagged.

   If a valid CAGE Code is entered, the CAGE Code Name Address Data Screen (CATXCC) will be displayed. If more data is available, press F6 (more data) to view. Press F9 (CLR-TEXT) to see the clear text or F10 (CHG-DATA) to view the changed data (if available). Press F11 (PRINT) to send data to a local or system printer.

The searches performed other than CAGE Code will return a pick list to select from. Tag your selection and proceed with your search for CAGE Code information.

   d. Special Features. From the CAGE Code Inquiry Screen (CATCAG), press F5 (ADP/ CAO). The inquiry by ADP/CAO screen (CATACI) will be displayed. You may enter information in only one of these fields and press enter. If no data is found for the entered code, a message will appear that states "No Data Found for....".

   e. Data Features. None

   f. Considerations. If a valid search criteria is not entered, an error message will appear at the bottom of the screen.

16.9.3 CATTOOLS MOE Rule Data Inquiry

   a. Task Description. This task allows the user to inquiry the database for MOE Rule information.

   b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

CATMOL - MOE Rule Data Inquiry
CATMOP - MOE Rule Pick List
CATXMR - MOE Master Inquiry
CATXMN - MOE Master Management Inquiry
CATXME - MOE Master Exclusive FSG/FSC
CATXMI - MOE Master Inclusion FSG/FSC

   c. Procedure. From the LOLA Main Menu, select the LOLA MOE Rule Data Inquiry option and press Enter. The MOE Rule Data Inquiry screen (CATMOL) will be displayed. Enter a valid MOE Rule Number and Effective Date or an Effective Date Range and press Enter. If you entered a MOE Rule Number and Effective Date, the MOE Master Inquiry screen (CATXMR) will be displayed. Press F6 (Mgmt Excp) from CATXMR to display the MOE Master Management Inquiry screen (CATXMN). Press F9 (Inclusion) from CATXMR to display the MOE Master Inclusive FSG/FSC screen (CATXMI). Press F10 (Exclusion) from CATXMR to display the MOE Master Exclusive FSG/FSC screen (CATXME).

If you entered a MOE Rule Number and no Effective Date, the MOE Master Inquiry screen (CATXMR) will be displayed. Follow the instructions in the paragraph above to continue processing.

d. Special Features. None

e. Data Features. None

f. Considerations. If a valid search criteria is not entered, an error message will appear at the bottom of the screen.

16.9.4 Cattools Freight Data Inquiry

a. Task Description. This task allows the user to view Freight Data.

b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

CATFRT - Freight Data Inquiry
CATFMI - Freight Master Inquiry
CATFMS - Freight Master Statistic Inquiry

c. Procedure. From the LOLA Main Menu, select the CATTOOLS Inquiry System. Then from the CATTOOLS Main Menu, select the Freight Data Inquiry option and press Enter. The Freight Data Inquiry screen (CATFRT) will be displayed. Enter a complete Freight Code (including NMFC, SUB and UFC) and press Enter. The Freight Master Inquiry screen (CATFMI) will be displayed with a Description, Extended Description, Last Update, NIIN Count, and Less Than Truckload (LTL) Rating.

If you enter just a UFC Code on the Freight Data Inquiry screen (CATFRT) and press Enter, the Freight Master Inquiry screen (CATFMI) will be displayed with your data.

If you enter a Year and Month in the Freight Statistics Inquiry field and press Enter, the Freight Master Statistics Inquiry screen (CATFMS) will display the Master Freight Table and the Extended Description Freight Table for the Month and Year entered. You may then print the data.

d. Special Features. When entering Inquiry data on screen CATFRT, all three fields in the Freight Master Inquiry section must be entered or the user may enter just a UFC Code in this section. The user cannot enter data in the Freight Master Inquiry and the Freight Statistics Inquiry sections.

e. Data Features. None.

f. Considerations. If a valid search criteria is not entered, an error message will appear at the bottom of the screen.

16.9.5 CATTOOLS MGMT/FSC Data Inquiry

a. Task Description. This task allows the user to view Management/FSC Data.

b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

CATFMS - Management FSC Inquiry
CATMFD - Management FSC Data
CATMFP - Management FSC Pick List

c. Procedure. From the LOLA Main Menu, select the CATTOOLS Inquiry System. Then from the CATTOOLS Main Menu, select the MGMT/FSC Data Inquiry option and press Enter. The Management FSC Inquiry screen (CATFMS) is displayed. Enter a FSC and press Enter. The Management FSC Data screen (CATMFD) is displayed. This screen contains the current FSC data and the History/Future FSC data.

You may also submit an inquiry on the management FSC inquiry screen (CATFMS) for the Date Established, Date Effective or Date Changed. You cannot use these options in conjunction with the FSC. Enter a date or date range in one of the three selections and press enter. The Management FSC Pick List screen (CATMFP) is returned. Only one item may be tagged. Tag your item and press F6 (Process). The Management FSC Data screen (CATMFD) is displayed. The current FSC Data and History/Future FSC data is shown. You may then print the data.

d. Special Features. When entering data on the screen CATFMS, you cannot enter an FSC with dates. It must be entered alone. The date fields cannot be entered with an FSC. They must be entered alone.

e. Data Features. None.

f. Considerations. If a valid search criteria is not entered, an error message will appear at the bottom of the screen.

16.9.6 CATTOOLS AMMO Code Data Inquiry

a. Task Description. This task allows the user to view AMMO Code Data.

b. Screen Displays. The following screens may display during this procedure. For specific information about a screen, see Appendix A.

CATAMC - AMMO Code Inquiry
CATAMD - AMMO Code Data

c. Procedure. From the LOLA Main Menu, select the CATTOOLS Inquiry System. Then from the CATTOOLS Main Menu, select the AMMO Code Data Inquiry option and press Enter. The AMMO Code Inquiry screen (CATAMO) is displayed. Enter an AMMO Code and press Enter. The AMMO Code data screen (CATAMD) is displayed. This screen displays the AMMO Code, INC, Status Code, Date Established/Cancelled and a description of the AMMO Code. You may then print the data.

d. Special Features. None

e. Data Features. None.

f. Considerations. If a valid search criteria is not entered, an error message will appear at the bottom of the screen.

CHAPTER 10

LOLA PROCEDURES QUICK INFORMATION SUBSYSTEM
PROCESSING REFERENCE GUIDE

16.10.1 Processing Reference Guide

This section provides the End-User with the how-to-use technical information necessary to use LOLA Procedures Quick Information programs.

a. Capabilities. The LOLA Procedures Quick Information programs will allow End-Users to request specific types of information and then view the responding information on-line. The user may perform searches for the following:

(1) Acronyms

(2) Data Element Definitions

(3) Edit/Validation Criteria

(4) Table Inquiry

(5) Return Codes

(6) DIC/Segment Format

b. Conventions. Conventions used for the Federal Logistics Information System (FLIS) are described in paragraph 16.3.2.b of this manual. Conventions used within the LOLA Procedures Quick Information Application include pre-formatted data views and screen entry requirements. These are explained (with instructions) in Appendix A.

c. Processing Procedures. Processing procedures for LOLA Procedures Quick Information are provided in paragraphs 16.10.2 through 16.10.7 of this manual. These procedures provide step-by-step instructions for performing each of the LOLA Procedures Quick Information tasks.

16.10.2 Acronym Inquiry

a. Task Descriptions. This task will allow the End-User to Inquiry/Search for Acronyms as defined in DoD 4100.39-M, Volume 12. This will provide the user with a full meaning of the acronym Entered. A full or partial acronym may be searched. An Index is also provided to assist the user in choosing the acronym to be searched.

b. Special Access. For special access, the End-User must check with the facility security administrator.

c. Screen Displays. The following screens may be displayed during this procedure. For specific information about a screen, see Appendix A.

PROACQ - Acronym Inquiry Search Screen
PROACX - Acronym Index Search Screen

   d. Procedure. From the LOGRUN Main Menu, move the cursor to the Procedures Quick Information (PROQIK) selection and press the Enter key to select this option.

The Quick Information main screen will be displayed. Position the cursor to the Acronym screen (PROACQ) and press the Enter key.

At this point, the Acronym Inquiry Search screen (PROACQ) will be displayed. Enter a full or partial acronym and press the Enter key. The Acronym will be displayed with its definition.

When you are finished with this function, press F3 (Prev Menu) to return to the LOGRUN Main Menu.

   e. Special Features. To view additional definitions, press F8 (Page Down). To re-display previously viewed definitions, press F7 (Page Up). For an Index of the Acronym, press F5 (INDEX).

   f. Data Features. None.

   g. Considerations. If a valid search criteria is not Entered, an error message will appear at the bottom of the screen.

16.10.3 Data Element Definitions Inquiry

   a. Task Description. This task will allow the End-User to Inquire/Search for Data Elements as defined in DoD 4100.39-M Volume 12. This will provide the user with a full meaning of the data elements Entered. Search can be conducted using a full or partial data element number or data element name. Also, search can be conducted using an Alias. To assist the user in searching, a DRN Index and Name Index is provided.

   b. Special Access. For special access, the End-User must check with the facility security administrator.

   c. Screen Displays. The following screens may be displayed during this procedure. For specific information about a screen, see Appendix A.

PROELD - Data Element Definitions Screen
PROELR - DRN Name Index Screen

   d. Procedure. The Logistics On-line Remote Network (LOGRUN) Main Menu will be displayed. Position the cursor to the Procedures Quick Information (PROQIK) and press the Enter key.

The Quick Information main screen will be displayed. Position the cursor to the Data Element Definitions (PROELD) and press the Enter key.

At this point, the Data Elements screen (PROELD) will be displayed. Enter a full or partial data element, data name or Enter an Alias and press the Enter key.

The definition of the data element, name and alias will be displayed for viewing.

If the data element number to search is not available, the user may press F5 to display DRN's on Number sequence or F6 to display DRN's by Name sequence. Enter an 'X' on the DRN desired and press the Enter key. The Data Element Definition (PROELD) screen will be displayed.

When you are finished with these functions, press F3 (Prev Menu) to return to the Logistics On-line Remote Network Main Menu.

   e. Special Features. To view additional definitions, press F8 (Page Down). To re-display previously viewed definitions, press F7 (Page Up).

   f. Data Features. None.

   g. Considerations. None.

16.10.4 Edit/Validation Inquiry

   a. Task Description. This task will provide the End User with a definition of Return Code in combination with the DIC (Document Indicator Code) or Data-Group, DRN (Data Return Code) and Return Code.

   b. Special Access. For special access, the End-User must check with the facility security administrator.

   c. Screen Displays. The following screens may be displayed during this procedure. For specific information about a screen, see Appendix A.

PROEDV - Edit/Validation Screen

   d. Procedure. From the LOGRUN Main Menu, move the cursor to the Procedures Quick Information (PROQIK) selection and press the Enter key to select this option.

The Quick Information main screen will be displayed. Position the cursor to the Edit/Validation criteria screen (PROEDV) and press the Enter key.

The Edit/Validation screen (PROEDV) will be displayed. Enter the Data-Group or DIC, Return Code and DRN and press the Enter key.

The definition for the DIC or Data-Group, Return Code and DRN will be displayed.

When you are finished with this function, press F3 (Prev Menu) to return to the LOGRUN Main Menu.

   e. Special Features. To display additional definitions, press F8 (Page Down). To re-display previously viewed definitions, press F7 (Page Up). To display the notes screen, press F11 (NOTES).

f. Data Features. None.

g. Considerations. If a valid search criteria is not Entered, an error message will appear at the bottom of the screen.

16.10.5 Table Inquiry

a. Task Descriptions. This task will allow the End-User to Inquiry/Search for Tables and their names, codes and definitions as stated in the FLIS Procedures manual, Volume 10. An Index of Tables is provided to allow the user to verify the Tables available for inquiry.

b. Special Access. For special access, the End-User must check with the facility security administrator.

c. Screen Displays. The following screens may be displayed during this procedure. For specific information about a screen, see Appendix A.

PROTAB - Table Inquiry Screen
PROIDX - Table Index Inquiry Screen
PRORP1 - Table Inquiry Reply Screen
PRORP2 - Table Inquiry Reply Screen
PRORP3 - Table Inquiry Reply Screen
PRORP4 - Table Inquiry Reply Screen
PRORP5 - Table Inquiry Reply Screen
PRORP6 - Table Inquiry Reply Screen
PRORP7 - Table Inquiry Reply Screen
PRORP8 - Table Inquiry Reply Screen
PRORP9 - Table Inquiry Reply Screen
PROR10 - Table Inquiry Reply Screen
PROR11 - Table Inquiry Reply Screen
PROR13 - Table Inquiry Reply Screen
PROR14 - Table Inquiry Reply Screen
PROR15 - Table Inquiry Reply Screen
PROR17 - Table Inquiry Reply Screen
PROR18 - Table Inquiry Reply Screen
PROR19 - Table Inquiry Reply Screen
PROR20 - Table Inquiry Reply Screen
PROR21 - Table Inquiry Reply Screen
PROR22 - Table Inquiry Reply Screen
PROR25 - Table Inquiry Reply Screen
PROAD1 - Table Additional Replies Screen
PROAD2 - Table Additional Replies Screen

d. Procedure. From the LOGRUN Main Menu, move the cursor to the Procedures Quick Information (PROQIK) selection and press the Enter key to select this option.

The Quick Information main screen will be displayed. Position the cursor on the Table Inquiry line and press the Enter key.

At this point, the Table Inquiry screen (PROTAB) will be displayed. Enter a table number or table name and press the Enter key.

When you are finished with this function, press F3 (Prev Menu) to return to the LOGRUN Main Menu.

   e. Special Features. To view additional definitions, press F8 (Page Down). To re-display previously viewed definitions, press F7 (Page Up). To view the number index, press F5 (NBRINDEX). To view the Name Index, press F6 (NAMEINDEX).

   f. Data Features. None.

   g. Considerations. If a valid search criteria is not Entered, an error message will appear at the bottom of the screen.

16.10.6 Return Code Inquiry

   a. Task Description. This task will provide the End-User with a definition of Return Codes.

   b. Special Access. For special access, the End-User must check with the facility security administrator.

   c. Screen Displays. The following screens may be displayed during this procedure. For specific information about a screen, see Appendix A.

PRORC1 - Return Code Inquiry Screen

   d. Procedure. From the LOGRUN Main Menu, move the cursor to the Procedures Quick Information (PROQIK) and press the Enter key to select this option.

The Quick Information main screen will be displayed. Position the cursor next to Return Codes (PRORC1) and press the Enter key.

The Return Code screen (PRORC1) will be displayed. Enter the Return Code desired and press the Enter key.

The definition for the Return Code will be displayed.

When you are finished with this function, press F3 (Prev Menu) to return to the LOGRUN Main Menu.

   e. Special Features. To view additional definitions, press F8 (Page Down). To re-display previously viewed definitions, press F7 (Page Up). To view an index of Return Codes press F5 (INDEX). To view the definition of Return Action Codes, press F9 (Definition). To view Notes, press F11 (Notes).

   f. Data Features. None.

g. Considerations. If a valid search criteria is not Entered, an error message will appear at the bottom of the screen.

16.10.7 DIC/Segment Format Inquiry

a. Task Descriptions. This task will provide the End-User with the definition and contents of a Document Identifier Code (DIC) or segment.

b. Special Access. For special access, the End-User must check with the facility security administrator.

c. Screen Displays. The following screens may be displayed during this procedure. For specific information about a screen, see Appendix A.

PROFOR - DIC/Segment Format
PRODIC - Document Identifier Code Format
PROINS - Instructions
PRONOT - Instructions/Notes
PROSEG - Segment Formats
PROTTL - Alphabetic Index of DIC Titles
PRONTE - Notes or Defintion
PROPAR - Variable Length Segment Parameters

d. Procedure. From the LOGRUN Main Menu, move the cursor to the Procedure Quick Information (PROQIK) selection and press the Enter key to select this option.

The Quick Information Main screen will be displayed. Position the cursor to the DIC/Segment Format (PROFOR) and press the Enter key.

The DIC/Segment Format screen (PORFOR) will be displayed. Enter the DIC or Segment and Fixed or Variable and press the Enter key.

The contents of that DIC or Segment will be displayed.

When you are finished with this function, press F3 (Prev Menu) to return to the LOGRUN Main Menu.

e. Special Features. To view additional data, press F8 (PAGE DOWN). To re-display previously viewed data, press F7 (Page Up). To view the Alphabetic Index of DIC Titles, Press F5 (INDEX).

f. Data Features. None.

g. Considerations. If a valid search criteria is not Entered, an error message will appear at the bottom of the screen.

16.10.8 Related Processing

There is no related processing that concerns the End-User.

16.10.9 Data Backup

The End-User will not have responsibility for backup procedures related to FLIS. All back-ups are performed by the DISA Megacenter in Columbus, Ohio.

16.10.10 Recovery from Errors and Malfunctions

See Appendix B, Error Messages and Recovery Procedures.

16.10.11 Messages

See Appendix B, Error Messages and Recovery Procedures.

CHAPTER 11

LOLA ON-LINE UPDATE PROCESSING REFERENCE GUIDE

16.11.1 Processing Reference Guide

This section provides the end-user with the how-to use technical information necessary to use LOLA Update programs. See Appendix A.

16.11.2 Capabilities

The LOLA On-line Update applications allows end-users to submit NIIN Assignments and Reinstatements, Adds, Changes, and Deletes to Data Groups and Data Elements.

The end-user submits transactions by selecting from a menu the type of transaction they would like to perform. They then enter identifying information for the transaction, then move on to the input screens. All screens are menu driven or have prompts for the user.

16.11.3 Conventions

Conventions used for the Federal Logistics Information System (FLIS) are described in Section 16.3.2.b of this manual. Conventions used within the LOLA Application include pre-formatted data views and screen entry requirements. These are explained (with instructions) in Appendix A.

APPENDIX A
PART 1 SCREEN LAYOUTS

This Appendix provides a cross reference of the inquiry screen codes (SCRNCD) and the screen title associated with that code.

SCRNCD	SCREEN TITLE
CATACC	Inquiry By Associated CAGE
CATACI	Inquiry by ADP/CAO
CATAMC	AMMO Code Inquiry
CATAMD	AMMO Code Data
CATCAG	CAGE Code Inquiry
CATCFI	Freight Inquiry by UFC Code
CATCGC	Inquiry By Changed CAGE Data
CATCLR	CAGE Code Notes
CATDCL	Debarment CAGE Code List
CATFMI	Freight Master Inquiry
CATFMS	Freight Master Statistic Inquiry
CATFRT	Freight Data Inquiry
CATICN	CAGE Code Inquiry Pick List
CATIDC	Inquiry by Debarment Code
CATINQ	CATTOOLS Main Menu
CATMFD	Management FSC Data
CATMFP	Management FSC Pick List
CATMFS	Management FSC Inquiry
CATMOL	MOE Rule Inquiry
CATMOP	MOE Rule Pick List
CATXCC	CAGE Code Name Address Date
CATXC2	CAGE Code Inquiry Data
CATXME	MOE Master Exclusive FSG/FSC
CATXMI	MOE Master Inclusive FSG/FSC

```

a. Screen Explanation. This screen allows the user to enter search criteria for an inquiry.

b. Field Entry Requirements. The valid field entries are described below.

(1)	Field Name:	CAGE CODE
	Entry Requirements:	May be entered only as a single entry.
	Valid Entries:	Any valid CAGE Code and press enter. The CAGE Code is all numeric or a combination of alphanumeric.
	Results:	Sends output as defined on the CAGE Code Name/ Address Data (CATXCC) screen.

(2)	Field Name:	COMPANY NAME
	Entry Requirement:	A full or partial company name may be entered.
	Valid Entries:	Any full or partial company name.
	Results:	Transfers to the CAGE Code Inquiry Pick List (CATICN) screen.

(3)	Field Name:	STREET NAME
	Entry Requirements:	May inquire by number address and/or partial or full street name.
	Valid Entries:	Full or partial street address.
	Results:	Transfers to the CAGE Inquiry Pick List (CATICN) screen.

(4)	Field Name:	ZIP CODE
	Entry Requirements:	May inquire by zip code (5 digit).
	Valid Entries:	Five digit zip code.
	Results:	Transfers to the CAGE Inquiry Pick List (CATICN) screen.

(5)	Field Name:	PHONE NUMBER
	Entry Requirements:	May inquire by full 10 digit phone number required.
	Valid Entries:	Ten digit telephone number.
	Results:	Transfers to the CAGE Code Name/Address Data (CATXCC) screen.

(6)	Field Name:	CEC

Entry Requirements: May inquire by the Contractor Establishment Code (CEC). This is a 9 position alphanumeric government owned code which represents a basic business organization.

Valid Entries: Nine digit alphanumeric code.

Results: Transfers to the CAGE Code Name/Address Data (CATXCC) screen. To see CEC, press F6 (more data) and you are transferred to the CAGE Inquiry Data (CATXC2) screen.

(7)   Field Name: DUNS NUMBER

Entry Requirements: May inquire by a 9 position numeric code that provides a cross-reference to the civilian sectors of the government.

Valid Entries: Nine-position numeric code.

Results: Transfers to the CAGE Code Name/Address Data (CATXCC) screen. To see CEC, press F6 (more data) and you are transferred to the CAGE Inquiry Data (CATXC2) screen.

(8)   Field Name: CONGRESSIONAL DISTRICT

Entry Requirements: A three-digit code which designates a Federal Congressional District within a particular State, (U.S. codes only).

Valid Entries: A valid three digit numeric code.

Results: Transfers to the CAGE Code Inquiry Pick List (CATIC2) screen. A pick list is displayed. The user makes a selection and is transferred to the CAGE Code Name/Address Data (CATXCC) screen. To view the Congressional District information, press F6 (more data) and you are transferred to the CAGE Code Inquiry Data (CATXC2) screen.

(9)   Field Name: SIC CODE (Standard Industrial Classification Code)

Entry Requirements: A four-position numeric code used to identify business activity and function, (manufacturer, wholesaler, etc.) and the line of business in which they are engaged (may be up to 4 SICs per Cage Codes).

Valid Entries: A valid four-digit numeric code.

Results: Transfers to the CAGE Code Inquiry Pick List
                                (CATIC2) screen. A pick list is displayed. The user
                                makes a selection and is transferred to the CAGE
                                Code Name/Address Data (CATXCC) screen. To
                                view the SIC Code(s), press F6 (more data) and you
                                are transferred to the CAGE Code Inquiry Data
                                (CATXC2) screen.

(10) Field Name: TAX ID
      Entry Requirements: A unique 9-digit code assigned by the Treasury
                                Department for all businesses. This is a tax
                                identification number.
      Valid Entries: A unique 9-digit code.
      Results: Transfers to the CAGE Code Name/Address Data
                                (CATXCC) screen. To view the TAX ID number,
                                press F6 (more data) and you are transferred to the
                                CAGE Inquiry Data (CATXC2) screen. The TAX ID
                                number is by the Company-TIN (TAX ID Number).

(11) Field Name: REPLACEMENT CAGE
      Entry Requirements: Enter a 5-digit alphanumeric or all numeric code.
      Valid Entries: A valid numeric or alphanumeric 5-digit code
      Results: Transfers to the CAGE Code Name/Address Data
                                (CATXCC) screen. This shows the old and
                                replacement CAGE Codes.

(12) Field Name: ASSOCIATED CAGE
      Entry Requirements: Enter a 5 digit numeric or alphanumeric code.
      Valid Entries: A 5 digit numeric or alphanumeric code.
      Results: Transfers to the Inquiry by Associated CAGE
                                (CATACC) screen. A pick list is displayed. Make a
                                selection and you are transferred to the CAGE Code
                                Name/Address Data (CATXCC) screen.

(13) Field Name: DEBARMENT CODE
      Entry Requirements: A one digit alpha character.
      Valid Entries: Select D for debarred, P for proposed debarment or
                                S for suspended.
      Results: Transfers to the Debarment CAGE Code List
                                (CATDCL) for debarred codes, proposed debarred
                                codes and suspended codes. A pick list is displayed.
                                Make a selection and you are transferred to the
                                Inquiry by Debarment Code (CATIDC) screen.

c. Available Function Keys. The following unique function keys may be used from the CAGE Code Inquiry screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	ADP/CAO	Transfers to the Inquiry by ADP/CAO (CATACI) screen.
F10	Print Setup	Transfers to the User Profile Information (CATPRT) screen.

The system limits the number of matches you will see on-line for CAGE Code, Company Name, Zip Code, Congressional District, Replacement CAGE, Associated CAGE and Debarment Code.

Or to obtain additional matches for this search, call or forward your request to DLIS's Customer Service Office 1-888-352-9333, email: dlis-support@dlis.dla.mil. Please specify how you want the output.

```

a. Screen Explanation. This screen is displayed when the user selects Freight Data Inquiry from the LOLA Main Menu (LOLA).

b. Field Entry Requirements. The valid field entries are described below.

NOTE: When entering Inquiry data on this screen, all three fields in the Freight Master Inquiry section must be entered or the user may enter just a UFC Code in this section. The user cannot enter data in the Freight Master Inquiry and the Freight Statistics Inquiry sections for a combination search.

(1) Field Name: FREIGHT CODE (NMFC, SUB, UFC)
     Entry Requirements: Optional
     Valid Entries: Valid Freight, SUB, or UFC Code
     Results: The Freight, Inquiry by UFC Code screen (CATCFI) will
                                       be displayed if the user entered a UFC Code by itself and
                                       there is more than one Freight Code associated with it
                                       and F5 was pressed.

(2) Field Name: FREIGHT STATISTICS INQUIRY (Enter Month and
                                       Year)
     Entry Requirement: Optional
     Valid Entries: Valid Year/Month in MMCCYY format
     Results: The Freight Master Statistics Inquiry screen (CATFMS) is
                                       displayed with Master Freight Table and Extended
                                       Description Freight Table data shown.

c. Available Function Keys. There are no unique function keys available for this screen.

```

a. Screen Explanation. This screen is displayed after the user chooses the CATTOOLS MGMT/FSC Data Inquiry option from the CATTOOLS MAIN MENU (CATINQ), off the LOLA Main Menu.

b. Field Entry Requirements. The valid field entries are described below.

(1) Field Name: ENTER FSC

Entry Requirement: Optional

Valid Entries: Any valid numeric FSC Code

Results: When <Enter> is pressed, the user will be transferred to the CATMFD (Management FSC Detail) screen if only one FSC is found or the CATMFP (Management FSC Pick List) screen if more than one FSC is found.

(2) Field Name: DATE ESTABLISHED

Entry Requirement: Optional

Valid Entries: May be entered as a date range or the first field only may be entered.

Results: When <ENTER> is pressed, the user will be transferred to the CATMFD (Management FSC Detail) screen if only one date range is found for the FSC and date entered or the user will be transferred to the CATMFP (Management FSC Pick List) screen if more than one FSC/date range is found for the data entered.

(3) Field Name: DATE EFFECTIVE

Entry Requirement: Optional

Valid Entries: Must be entered as a date range or the first field only may be entered.

Results: When <ENTER> is pressed, the user will be transferred to the CATMFD (Management FSC Detail) screen if only one date range is found for the FSC and date entered or the user will be transferred to the CATMFP (Management FSC Pick List) screen if more than one FSC/date range is found for the data entered.

(4) Field Name: DATE CHANGED

Entry Requirement: Optional

Valid Entries: Must be entered as a date range or the first field only may be entered.

Results: When <ENTER> is pressed, the user will be
                            transferred to the CATMFD (Management FSC
                            Detail) screen if only one date range is found for
                            the FSC and date entered or the user will be
                            transferred to the CATMFP (Management FSC Pick
                            List) screen if more than one FSC/date range is
                            found for the data entered.

   c. Available Function Keys. There are no unique function keys available for the Management FSC Inquiry screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F7=         F8=          F9=          F10=CHANGE OUTPUT OPTIONS F12=PROC ALL
```

a. Screen Explanation. This screen displays a list of items based on the CAGE Code entered and allows the user to pick the item(s) to be processed. Other fields shown on the screen are display only fields and will display data based on the entries made. It will display only the first 108 lines.

When multiple screens are needed to display information, MORE DATA, END OF DATA, or SEARCH CRITERIA EXCEEDS ALLOWABLE AMOUNT will appear at the bottom of the screen. The last screen in the series will also display Total NSNs found.

b. Field Entry Requirements. The valid field entries are described below.

(1)	Field Name:	TAG
	Entry Requirement:	To select a given NSN(s), place an X in the Tag field to the left of the desired NSN(s). Press F6 (Process) when all desired NSN(s) are selected.
	Valid Entries:	X
	Results:	Processes selected NSNs as defined on the Select Inquiry Output Options (LOLOUT) screen.
(2)	Field Name:	TAG
	Entry Requirement:	An NSN could be matched through an associated cage of the input cage or the replacement of the input cage. To display data of the cage which produced matches, place an X on the tag field to the left of desired NSN and press F9.
	Valid Entries:	X
	Results:	Display CAGE Supplier Data for the CAGE which produced the match.

c. Available Function Keys. The following unique function keys may be used from the Item CAGE Pick List screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the screen where the search was started.
F6	Process	Will process selected NSNs as defined on the Select Inquiry Output Options (LOLOUT) screen.
F7	Page Up	Displays the prior page of the current file being viewed.
F8	Page Down	Displays the next page of the current file being viewed.
F9	CAGE-Only	Displays CAGE/SUPPLIER DATA of an associated CAGE code.
F10	Change Output	Transfers to the Select Inquiry Options Output Options (LOLOUT) screen.

F12 Proc All   Selects and processes all NSNs on the current list.

The system limits the number of matches you will see on-line for CAGE-CODE SEARCH.

You may continue with the search by specifying more search conditions.

Or to obtain additional matches for this search, call or forward your request to DLIS's Customer Service Office 1-888-352-9333, email: dlis-support@dlis.dla.mil. Please specify how you want the output.

A.29 LOLCHG - Get INC/FSC Effective Dated Changes
Screen

```

```

a. Screen Explanation. This screen allows the user to enter the criteria to obtain INC or FSC change data.

b. Field Entry Requirements. The valid field entries are described below.

(1)   Field Name: CHANGE DATA FOR INC
       Entry Requirement: Must be entered in combination with a valid Date
                                    Range.
       Valid Entries: Any valid INC (Numeric or Alpha G-Z on 1st
                                    character).
       Results: Transfers to Item Name Change Data (LOLICH)
                                    screen.

(2)   Field Name: CHANGE DATA FOR FSC
       Entry Requirement: Must be entered in combination with a valid Date
                                    Range.
       Valid Entries: Any valid FSC or FSG (Numeric).
       Results: Transfers to FSC or FSG Change Data (LOLFCH)
                                    screen.

(3)   Field Name: DATE RANGE
       Entry Requirement: Must be entered in combination with either a valid
                                    INC, FSC or FSG.
       Valid Entries: Must be entered in Julian date format and be no
                                    earlier than 180 days prior or 180 days after the
                                    current date. Valid ranges will be displayed.

c. Available Function Keys. The following unique function keys may be used from the Get INC/FSC Effective Dated Changes screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5   Return Start Search   Transfers back to the screen where the search was
                                    started.
(ENTER)   Displays changed data for valid input.

```

a. Screen Explanation. This screen displays the reply value for a selected MRC using dimensions as the input characteristic. The Optional Reply Value will enable users to reduce number of reply values and to specify characteristics to be processed. The keywords which may be used to initiate a reply on the LOLDIM screen are MIN, MAX, DISPLAY, PROCESS, TO, ?. In the format entry example below, the criteria is a unit of measure.

FORMAT ENTRY EXAMPLE: (within the current MRC)

ENTRY EXAMPLE:

KEYWORD	CRITERIA	EXPLANATION
DISPLAY	10	to display the characteristics for a Dimension = 10.
DISPLAY	MIN 10 TO MIN ?	to display the minimum characteristics with Dimension >10.
DISPLAY	MIN 10 TO MIN 20	to display the characteristics with Dimension >= 10 and not >20 inclusive.
DISPLAY	MAX 20	to display the characteristics for Dimenstion not >20.
DISPLAY	MAX 20 TO MAX ?	to display the characteristics with maximum Dimension >= 20.
DISPLAY	MAX 20 TO MAX 40	to display the characteristics with maximum Dimension between 20 and 40 inclusive.
DISPLAY	MIN 10 TO MAX 40	to display the characteristic with minimum dimension >= 10 and maximum Dimension <= 40.
PROCESS	10	to process the characteristics for a Dimension = 10.
PROCESS	MIN 10 TO MIN ?	to obtain the NIINs with minimum Dimension >= 10.
PROCESS	MIN 10 TO MIN 20	to obtain the NIINs with minimum Dimension between 10 and 20 inclusive.
PROCESS	MAX 20	to obtain the NIINs with maximum Dimension of 20.
PROCESS	MAX 20 TO MAX ?	to obtain the NIINs with maximum Dimension >=20.
PROCESS	MAX 20 TO MAX 40	to obtain the NIINs with maximum dimension between 20 and 40 inclusive.

ENTRY EXAMPLE:

KEYWORD	CRITERIA	EXPLANATION
PROCESS	MIN 10 TO MAX 40	to obtain the NIINs with minimum Dimension >= 10 and maximum Dimension not > 40

Also see LOLMLT, LOLNUM, LOLTBL, LOLTXT, and LOLTOL for other characteristics.

b. Field Entry Requirements. The valid field entries are described below.

(1)   Field Name: TAG
       Entry Requirements: May be entered with multiple TAGs.
       Valid Entries: X
       Results: Transfers to the Characteristics Search Results (LOLRES) screen when F6 (Process) is pressed.

(2)   Field Name: OPTIONAL REPLY VALUE
       Entry Requirement: Must be valid keyword and criteria.
       Valid Entries: DISPLAY, PROCESS, MIN, MAX, TO, ?
       Results: DISPLAY will reduce number of reply values available with given criteria. PROCESS will transfer to the Characteristics Search Results Screen.

c. Available Function Keys. The following unique function keys may be used from the MRC Reply Selection (Dimensions) screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the screen where the search was started.
F6	Process	Transfers to the Characteristics Search Results (LOLRES) screen.
F7	Page Up	Displays the prior page of the current file being viewed.
F8	Page Down	Displays the next page of the current file being viewed.
F9	Next MRC	Displays the next MRC if more than one was selected.
F10	And/Or	Toggles between 'AND' and 'OR' processing. If user presses F10 and F6, 'AND' processing will be active. Processing will default to 'OR'.

F12 Text   Transfers to the MRC Reply Selection (Text) screen
                                             (LOLTXT) if available for this MRC.

a. Screen Explanation. This screen displays a list of INCs that resulted in the FIIG search. When multiple screens are needed to display information, MORE DATA or END OF DATA will appear at the bottom of the screen. The last screen in the series will also display the Totals for all fields.

b. Field Entry Requirements. The valid field entries are described below. Other fields shown on the screen are display only fields and will display data based on the entries made.

(1)	Field Name:	SEARCH FIIG
	Entry Requirement:	Must be entered as a single entry.
	Valid Entries:	Enter a valid FIIG and press F6 (New Search).
	Results:	Returns to current screen with item names associated with new FIIG number.
(2)	Field Name:	TAG
	Entry Requirement:	Must be entered as a single entry.
	Valid Entries:	Position the cursor on the Tag field of the desired item name and press a function key.
	Results:	See Section 16.9.B.14.c, Available Function Keys.

c. Available Function Keys. The following unique function keys may be used from the FIIG Search Response screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the screen where the search was started.
F6	New Search	Performs a search for a valid FIIG entered in the Search FIIG field.
F7	Page Up	Displays the prior page of the current file being viewed.
F8	Page Down	Displays the next page of the current file being viewed.
F9	FSC Desc	Transfers selected item name to the FSC Description (LOLFSC) screen.
F10	Start CHS	Transfers selected item to the Characteristics Search Subsystem.
F11	INC Def	Transfers selected item to the Item Name Definition (LOLINC) screen.

The system limits the number of matches (100) you will see on-line for FIIG SEARCH.

You may continue with the search by specifying more search conditions.

Or to obtain additional matches for this search, call or forward your request to DLIS's Customer Service Office 1-888-352-9333, e-mail dlis-support@dla.mil. Please specify how you want the output.

```

a. Screen Explanation. This screen allows the user to pick the item(s) from a list of output from the inquiry being processed. When multiple screens are needed to display information, MORE DATA or END OF DATA will appear at the bottom of the screen. The last screen in the series will also display the Totals for all fields.

b. Field Entry Requirements. The valid field entries are described below. Other fields shown on the screen are display-only fields and will display data based on the entries made. It will display only the first 108 lines.

(1)	Field Name:	TAG
	Entry Requirement:	To select a given NSN(s), place an X in the Tag field to the left of the desired NSN(s). Press F6 (Process) when all desired NSNs have been selected.
	Valid Entries:	X
	Results:	Sends output as defined to the Select Inquiry Output Options (LOLOUT) screen.

c. Available Function Keys. The following unique function keys may be used from the Item INC Pick List screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the screen where the search was started.
F6	Process	Sends output as defined to the Select Inquiry Output Options (LOLOUT) screen.
F7	Page Up	Displays the prior page of the current file being viewed.
F8	Page Down	Displays the next page of the current file being viewed.
F9	Full Name	Displays the full name of the selected item being viewed.
F10	Change Output	Transfers to the Select Inquiry Options Output Options (LOLOUT) screen.
F12	Proc All	Selects and processes all NSNs on the current list.

```

a. Screen Explanation. This screen allows the user to enter search criteria for an inquiry.

b. Field Entry Requirements. The valid field entries are described below.

(1)   Field Name: NIIN INQUIRY
         Entry Requirement: May be entered only as a single entry.
         Valid Entries: Any valid NIIN and press Enter. First two characters and last four characters of NIIN must be numeric. Others may be alpha or numeric.
         Results: Sends output as defined on the Select Inquiry Output Options (LOLOUT) screen, or displays the Canceled NIIN (LOLCAN) screen if that NIIN has been canceled.

(2)   Field Name: PART NUMBER
         Entry Requirement: May be entered in combination with a valid CAGE Code or CAGE Name, and/or a valid INC or Item Name.
         Valid Entries: Any valid part number or partial part number (delimited by '?') and press Enter.
         Results: Transfers to the Item PN Pick List (LOLPNR) screen.

(3)   Field Name: CAGE CODE
         Entry Requirement: May be entered in combination with a valid part number or partial part number, and/or a valid INC or Item Name.
         Valid Entries: Any valid CAGE Code.
         Results: Transfers to the Item CAGE Pick List (LOLCCD) screen.

(4)   Field Name: CAGE NAME
         Entry Requirement: May be entered in combination with a valid part number or partial part number, and/or a valid INC or Item Name.
         Valid Entries: Any valid keyword of a CAGE name.
         Results: Transfers to the CAGE Code Pick List (LOLCNM) screen.

(5)   Field Name: INC
         Entry Requirement: May be entered in combination with a valid part number or partial part number, and/or a valid CAGE Code or CAGE Name.

Valid Entries:	Any valid INC (must be numeric).
Results:	Transfers to the Item INC Pick List (LOLINP) screen.

(6) Field Name: ITEM NAME

Entry Requirement:	May be entered in combination with a valid part number or partial part number, and/or a valid CAGE Code or CAGE Name.
Valid Entries:	Any valid Item Name.
Results:	Transfers to the INC Code Pick List (LOLINM) screen.

   c. Available Function Keys. The following unique function keys may be used from the Start Inquiry screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F10	Select Output Options	Transfers to Select Inquiry Output Options (LOLOUT) screen.
F12	USER PROF	Displays user's profile. Allows user to change printer number associated to the terminal.

The system limits the number of matches you will see on-line for CAGE Code, INC, and Part Number keyword searches. You may continue with the search by specifying more search conditions.

To obtain additional matches for this search, call or forward your request to DLIS's Customer Service Office 1-888-352-9333, e-mail dlis-support@dlis.dla.mil. Please specify how you want the output.

A.49 LOLINR - Item Name/Keyword Search Response
Screen

```
SCRNCD: LOLINR          LOGISTICS ON-LINE ACCESS            DATE: 02-NOV-00

```

a. Screen Explanation. This screen displays the composite reply value for a selected MRC using dimensions as the input characteristic. The Optional Reply Value will enable users to reduce number of reply values and to specify characteristics to be processed. The keywords which may be used to initiate a reply on the LOLMLT screen are MIN, MAX, DISPLAY, PROCESS, TO, ?. In the format entry example below, the criteria is a unit of measure.

ENTRY EXAMPLE:

KEYWORD	CRITERIA	EXPLANATION
DISPLAY	PC000532	to display the characteristics for Table PC000532.
DISPLAY	PC000532 TO ?	to display the characteristics for Table PC000532 to end of file.
DISPLAY	PC000532 TO ST534	to display the characteristics for Tables PC000532 through ST534 inclusive.
PROCESS	PC000532	to process the characteristics for Table PC000532.
PROCESS	PC000532 TO ?	to process the characteristics for Table PC000532 to end of file.
PROCESS	PC000532 TO ST534	to process the characteristics for Tables PC000532 through ST534 inclusive.

Also see LOLDIM, LOLNUM, LOLTBL, LOLTXT, and LOLTOL for other characteristics.

b. Field Entry Requirements. The valid field entries are described below.

(1) Field Name: TAG
     Entry Requirements: May be entered with multiple TAG fields.
     Valid Entries: X
     Results: Transfers to the Characteristics Search Results (LOLRES) screen when F6 (Process) is pressed.

(2) Field Name: OPTIONAL REPLY VALUE
     Entry Requirement: Must be valid keyword and criteria.
     Valid Entries: DISPLAY, PROCESS, TO
     Results: DISPLAY will reduce number of reply values available with given criteria. PROCESS will transfer to the Characteristics Search Results Screen.

c. Available Function Keys. The following unique function keys may be used from the MRC Reply Selection (Multiple Tables) screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the screen where the search was started.
F6	Process	Transfers to the Characteristics Search Results (LOLRES) screen.
F7	Page Up	Displays the prior page of the current file being viewed.
F8	Page Down	Displays the next page of the current file being viewed.
F9	Next MRC	Displays the next MRC if more than one was selected.
F10	AND/OR	Toggles between 'AND' and 'OR' processing. If user presses F10 then F6, 'AND' processing will be active. Processing will default to 'OR'.
F12	Text	Transfers to the MRC Reply Selection (Text) screen (LOLTXT) if available for this MRC.

F7=           F8=          F9=          F10=SELECT OUTPUT OPTIONS F12=USER PROF
```

a. Screen Explanation. This screen is displayed when a user presses the F6 key from the Start Inquiry Screen (LOLINQ). It allows the user to enter NIINs from 1 to 24, a Submitters-ID, the option to go to Select Output Options (LOLOUT) and the output media desired.

b. Field Entry Requirements. The valid field entries are described below.

(1) Field Name: SUBMITTERS MEMO ID
     Entry Requirements: Any ID the user wants. If the user does not submit an ID,
                                    it outputs the user's usercode.
     Valid Entries: Any ID or leave blank.
     Results: Enters the ID or user's usercode.

(2) Field Name: NIIN(S) INQUIRY
     Entry Requirement: Enter NIINs from 1 to 24
     Valid Entries: Any valid NIIN or PSCN. First two characters and last
                                    four characters of NIIN must be numeric. Others may be
                                    alpha or numeric.
     Results: Sends output as defined on the Select Inquiry Output
                                    Option (LOLOUT) screen for the first NIIN requested.
                                    After all data is seen for the first NIIN, the second NIIN's
                                    data will appear.

c. Available Function Keys. The following unique function keys may be used from the Start Inquiry screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F10 Select Output Options   Transfers to Select Inquiry Output Options
                                    (LOLOUT) screen.
F12 USER PROF   Displays user's profile. Allows user to change
                                    printer number associated to the terminal.

A.56 LOLNOT - FSG Group Notes Screen

```
SCRNCD: LOLNOT          LOGISTICS ON-LINE ACCESS          DATE: 02-NOV-00
USERID: XXXXXXX              FSG GROUP NOTES               TIME: 07:23
----------------------------------------------------------------------------
FSG: 58 Communication, Detection, and Coherent Radiation Equipment
----------------------------------------------------------------------------
Note-Excludes oscillator items which should be classified in FSC 5955 or 5963;
fiber optic items which should be classified in Group 60; electronic modules as
defined under Class 5963; and electrical cable, cord and wire assemblies,
harnesses and sets, related to FSG 58 equipment (see FSC 5995). In Group 58,
more than in any other group, it frequently happens that the same name is
listed as an index entry in each of several classes. In addition, that name may
also appear as an entry in groups other than 58. Each such entry refers to a
distinctly different part or assembly, even though the different items have the
same name. The listing of the same names in two or more classes indicates that,
in one form, the part or assembly covered by the name is applicable to the
equipment covered by one class, and in another form is applicable to the
equipment covered by another class. For example, the item name CODER, AUDIO
FREQUENCY is applicable to two distinctly different assemblies, one of which
has an application in cryptologic equipment, covered by Class 5810, and the

```

a. Screen Explanation. This screen displays the reply value for a selected MRC using dimensions as the input characteristic. The Optional Reply Value will enable the user to reduce the number of reply values and to specify characteristics to be processed. The keywords which may be used to initiate a reply on the LOLNUM screen are MIN, MAX, DISPLAY, PROCESS, TO, ?. In the format entry example below, the criteria is a unit of measure.

ENTRY EXAMPLE:

KEYWORD	CRITERIA	EXPLANATION
DISPLAY	5	to display the characteristics for the number 5.
DISPLAY	5 TO ?	to display the characteristics for the number 5 to end of file.
DISPLAY	5 TO 25	to display the characteristics for the numbers 5 through 25 inclusive.
PROCESS	5	to process the characteristics for the number 5.
PROCESS	5 TO ?	to process the characteristics for the number 5 to end of file.
PROCESS	5 TO 25	to process the characteristics for the numbers 5 through 25 inclusive.

Also see LOLDIM, LOLMLT, LOLTBL, LOLTXT, and LOLTOL for other characteristics.

b. Field Entry Requirements. The valid field entries are described below.

(1)   Field Name: TAG
        Entry Requirement: May be entered as with multiple TAG fields.
        Valid Entries: X
        Results: Transfers to the Characteristics Search Results (LOLRES) screen when F6 (Process) is pressed.

(2)   Field Name: OPTIONAL REPLY VALUE
        Entry Requirement: Must be valid keyword and criteria.
        Valid Entries: DISPLAY, PROCESS, TO, ?
        Results: DISPLAY will reduce number of reply values available with given criteria. PROCESS will transfer to the Characteristics Search Results Screen.

c. Available Function Keys. The following unique function keys may be used from the MRC Reply Selection (Numbers) screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the screen where the search was started.
F6	Process	Transfers to the Characteristics Search Results (LOLRES) screen.
F7	Page Up	Displays the prior page of the current file being viewed.
F8	Page Down	Displays the next page of the current file being viewed.
F9	Next MRC	Displays the next MRC if more than one was selected.
F10	And/Or	Toggles between 'AND' and 'OR' processing. If user presses F10 and F6, 'AND' processing will be active. Processing will default to 'OR'.
F12	Text	Transfers to the MRC Reply Selection (Text) screen.

a. Screen Explanation. This screen allows the user to select how the results of an inquiry will be output.

b. Field Entry Requirements. The valid field entries are described below.

(1)   Field Name: OUTPUT MEDIA

Entry Requirement: Must be entered in combination with at least one other option.

Valid Entries: C or P

Results: Will sent Inquiry Results to the CRT or the printer associated with your workstation.

(2)   Field Name: IDENTIFICATION DATA

Entry Requirement: May be entered in combination with any option.

Valid Entries: X

Results: Will display the Identification Data (LOLIDD) screen at the end of the inquiry search.

(3)   Field Name: REF/PART NUMBER DATA

Entry Requirement: May be entered in combination with any option.

Valid Entries: X

Results: Will display the Reference/Part Number Data (LOLXRF) screen at the end of the inquiry search.

(4)   Field Name: MANAGEMENT PHRASE DATA

Entry Requirement: May be entered in combination with any option.

Valid Entries: X

Results: Will display the Management Data (LOLMGT) screen at the end of the inquiry search.

(5)   Field Name: CODED CHARACTERISTICS

Entry Requirement: May be entered in combination with any option.

Valid Entries: X

Results: Will display the Coded Characteristics at the end of the inquiry search.

(6)   Field Name: MOE RULE DATA CODED

Entry Requirement: May be entered in combination with any option.

Valid Entries: X

Results: Will display the MOE Rule Data Coded (LOLMOE) screen at the end of the inquiry search.

(7)   Field Name: STANDARDIZATION DATA

        Entry Requirement: May be entered in combination with any option.

        Valid Entries: X

        Results: Will display the Standardization Data (LOLSTD) screen at the end of the inquiry search.

(8)   Field Name: PACKAGING DATA

        Entry Requirement: May be entered in combination with any option.

        Valid Entries: X

        Results: Will display the Packaging Data (LOLPKG) screen at the end of the inquiry search.

(9)   Field Name: DECODED CHARACTERISTICS

        Entry Requirement: May be entered in combination with any option.

        Valid Entries: X

        Results: Will display the decoded characteristics at the end of the inquiry search.

(10)   Field Name: MOE RULE DATA DECODED

        Entry Requirement: May be entered in combination with any option.

        Valid Entries: X

        Results: Will display the MOE Rule Data Decoded (LOLMOD) screen at the end of the inquiry search.

(11)   Field Name: FREIGHT DATA

        Entry Requirement: May be entered in combination with any option.

        Valid Entries: X

        Results: Will display the Freight Data (LOLFRT) screen at the end of the inquiry search.

(12)   Field Name: I&S DATA

        Entry Requirement: May be entered in combination with any option.

        Valid Entries: X

        Results: Will display the I&S Data (LOLIAS) screen at the end of the inquiry search.

(13)   Field Name: BASIC REFERENCE DATA

        Entry Requirement: May be entered in combination with any option.

        Valid Entries: X

| | Results: | Will display the Basic Reference Data (LOLBAS) screen at the end of the inquiry search screen. |

(14) Field Name: REQUISITION DATA
      Entry Requirement: May be entered in combination with any option.
      Valid Entries: X
      Results: Will display the Requisition Data (LOLREQ) screen at the end of the inquiry search.

(15) Field Name: CAGE/SUPPLIER DATA
      Entry Requirement: May be entered in combination with any option.
      Valid Entries: X
      Results: Will display the CAGE/Supplier Data (LOLSUP) screen at the end of the inquiry search.

c. Available Function Keys. The following unique function keys may be used from the Select Inquiry Output Options screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5 Prev Scr	Returns to the previous screen.
F6 Process	Continues the current search process or returns to the Start Inquiry (LOLINQ) screen if no search is in progress.
F11 Tag All But Coded	Selects all output options except Coded Characteristics, Decoded MOE Rule, Basic Reference, Requisition and CAGE/Supplier.
F12 Tag All	Selects all output options.

a. Screen Explanation. This screen displays the inquiry results when the user chooses the CRT as the output media and the Requisition Data Segment View as an output option. When multiple screens are needed to display information, MORE DATA, END OF DATA, or END OF VIEW will appear at the bottom of the screen.

b. Field Entry Requirements. There are no field entries for this screen.

c. Available Function Keys. The following unique function keys may be used from the Requisition Data screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the screen where the search was started.
F6	Prev NIIN	Displays the previous NIIN if more than one NIIN was selected.
F7	Page Up	Displays the prior page of the current file being viewed.
F8	Page Down	Displays the next page of the current file being viewed.
F9	Next NIIN	Displays the next NIIN if more than one NIIN was selected.
F10	Print	Sends the information displayed to the printer associated with your terminal. Available only after special access has been granted by the security administrator for your facility.

```

a. Screen Explanation. This screen displays the results of the search being processed and allows the user to select the method of output. It also allows the user to limit the scope of the search to a specific CAGE Code or to redo the MRC criteria for the current search prior to selecting output options.

b. Field Entry Requirements. The valid field entries are described below.

(1) Field Name: SECONDARY SEARCH BY CAGE CODE
     Entry Requirement: Any valid CAGE Code.
     Valid Entries: Enter a valid CAGE Code and press Enter.
     Results: Returns to the Characteristics Search Results screen.

(2) Field Name: TAG
     Entry Requirement: May be entered as multiple entries with other selected TAG.
     Valid Entries: X
     Results: Transfers to the NIIN Search Results (LOLMDC) screen when F6 (Process) is pressed.

(3) Field Name: ENTER OUTPUT MEDIA
     Entry Requirement: As defined on the screen.
     Valid Entries: As defined on the screen.
     Results: Sends each NIIN to the selected location.

c. Available Function Keys. The following unique function keys may be used from the Characteristics Search Results screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5   Cancel   Cancels current search and returns to the screen where the search was started.
F6   Process   Displays the search results as defined in the Enter Output Media field.
F7   Page Up   Displays the prior page of the current file being viewed.
F8   Page Down   Displays the next page of the current file being viewed.
F10 Redo Search   Transfers to the MRC Pick List (LOLMRC) screen.
F11 Route to Inquiry   Transfers to the Select Inquiry Output Options screen for inquiry processing.
F12 Tag All   Selects and processes all NIINs on the current list.

A.63 LOLSAC - MRC SAC Selection Screen

```

a. Screen Explanation. This screen displays the Secondary Address Code (SAC) and description for a selected MRC. The user may select one of the SAC listed to process the appropriate reply selection screen. The screen will only appear if the selected MRC has at least one associated SAC. When multiple screens are needed to display information, MORE DATA or END OF DATA will appear at the bottom of the screen. The last screen in the series will also display the Totals for all fields.

b. Field Entry Requirements. The valid field entries are described below. Other fields shown on the screen are display-only fields and will display data based on the entries made.

(1)	Field Name:	TAG
	Entry Requirement:	None.
	Valid Entries:	Tab to the desired SAC and press F6 (Process).
	Results:	Transfers to the selected reply selection screen.

c. Available Function Keys. The following unique function keys may be used from the MRC SAC Selection Screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the screen where the search was started.
F6	Process	Transfers to the selected reply screen.
F7	Page Up	Displays the prior page of the current file being viewed.
F8	Page Down	Displays the next page of the current file being viewed.

a. Screen Explanation. This screen displays the reply value for a selected MRC that has a single table as the characteristic. There is only one keyword which may be entered to initiate a reply on the LOLTBL screen. The keyword choices are TO, DISPLAY, PROCESS, ?. The format is the reply table in the example below.

ENTRY EXAMPLE:

KEYWORD	CRITERIA	EXPLANATION
DISPLAY	AD0001	to display the characteristics for Table AD0001.
DISPLAY	AD0001 TO ?	to display the characteristics for Table AD0001 to end of file.
DISPLAY	AD0001 TO AG0500	to display the characteristics for Table AD0001 through AG0500 inclusive.
PROCESS	AD0001	to process the characteristics for Table AD0001.
PROCESS	AD0001 TO ?	to process the characteristics for Table AD0001 to end of file.
PROCESS	AD0001 TO AG0500	to process the characteristics for Table AD0001 through AG0500 inclusive.

Also see LOLDIM, LOLMLT, LOLNUM, LOLTXT, and LOLTOL for other characteristics.

b. Field Entry Requirements. The valid field entries are described below.

(1) Field Name: TAG
   Entry Requirements: May be entered with multiple TAG fields.
   Valid Entries: X
   Results: Transfers to the Characteristics Search Results (LOLRES) screen when F6 (Process) is pressed.

(2) Field Name: OPTIONAL REPLY VALUE
   Entry Requirement: Must be valid keyword and criteria.
   Valid Entries: DISPLAY, PROCESS, TO, ?
   Results: DISPLAY will reduce number of reply values available with given criteria. PROCESS will transfer to the Characteristics Search Results Screen.

c. Available Function Keys. The following unique function keys may be used from the MRC Reply Selection (Tables) screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the screen where the search was started.
F6	Process	Transfers to the Characteristics Search Results (LOLRES) screen.
F7	Page Up	Displays the prior page of the current file being viewed.
F8	Page Down	Displays the next page of the current file being viewed.
F9	Next MRC	Displays the next MRC if more than one was selected. Returns to Item Cage Pick List if user came from there.
F10	AND/OR	A toggle to allow either 'AND' or 'OR' selections from the Reply-Value screen. 'OR' will allow for MRC to contain either of the replys picked. 'AND' - MRC will contain all of the replys picked. NOTE: Selection shows in the message field as to current toggle.
F12	Text	Transfers to the MRC Reply Selection (Text) screen (LOLTXT) if available for this MRC.

```

a. Screen Explanation. This screen displays the reply value for a selected MRC using dimensions as the input characteristic. The Optional Reply Value will enable users to reduce number of reply values and to specify characteristics to be processed. The keywords which may be used to intiate a reply on the LOLTOL screen are MIN, MAX, DISPLAY, PROCESS, TO, ?. In the format entry example below, the criteria is a unit of measure.

ENTRY EXAMPLE:

KEYWORD	CRITERIA	EXPLANATION
DISPLAY	100	to display the characteristics for the item displayed having a tolerance of 100.
DISPLAY	100 TO ?	to display the characteristics for the item displayed having a tolerance of 100 to the end of file.
DISPLAY	100 TO 500	to display the characteristics for the item displayed having tolerances of 100 through 500 inclusive.
DISPLAY	100 WITHIN 5%	to display the characteristics for the item displayed having a tolerance within the range of 5% of 100.
PROCESS	100	to process the characteristics for the item displayed having a tolerance of 100.
PROCESS	100 TO ?	to process the characteristics for the item displayed having a tolerance of 100 to end of file.
PROCESS	100 TO 500	to process the characteristics for the items displayed having tolerances of 100 through 500 inclusive.
PROCESS	100 WITHIN 5%	to process the characteristics for the items displayed having a tolerance within the range of 5% of 100.

Also see LOLDIM, LOLMLT, LOLNUM, LOLTBL, and LOLTXT for other characteristics.

b. Field Entry Requirements. The valid field entries are described below.

(1)   Field Name: TAG
        Entry Requirements: May be entered with multiple TAG fields.

Valid Entries: X

Results: Transfers to the Characteristics Search Results (LOLRES) screen when F6 (Process) is pressed.

(2)   Field Name: OPTIONAL REPLY VALUE

       Entry Requirement: Must be valid keyword and criteria.

       Valid Entries: DISPLAY, PROCESS, TO, WITHIN, % ?

       Results: DISPLAY will reduce number of reply values available with given criteria. PROCESS will transfer to the Characteristics Search Results Screen.

c. Available Function Keys. The following unique function keys may be used from the MRC Reply Selection (Tolerances) screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the screen where the search was started.
F6	Process	Transfers to the Characteristics Search Results (LOLRES) screen.
F7	Page Up	Displays the prior page of the current file being viewed.
F8	Page Down	Displays the next page of the current file being viewed.
F9	Next MRC	Displays the next MRC if more than one was selected.
F10	And/Or	Toggles between 'AND' and 'OR' processing. If user presses F10 and F6, 'AND' processing will be active. Processing will default to 'OR'.
F12	Text	Transfers to the MRC Reply Selection (Text) screen (LOLTXT) if available for this MRC.

a. Screen Explanation. This screen displays the inquiry results when the user chooses the CRT as the output media and the Reference/Part Number Data Segment View as an output option.

b. Field Entry Requirements. There are no valid field entries for this screen not covered by Section 16.9.B.55.c, Available Function Keys. When multiple screens are needed to display information, MORE DATA, END OF DATA, or END OF VIEW will appear at the bottom of the screen.

c. Available Function Keys. The following unique function keys may be used from the Reference/Part Number Data screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the screen where the search was started.
F6	Prev NSN	Displays the previous NSN if more than one NSN was selected.
F7	Page Up	Displays the prior page of the current file being viewed.
F8	Page Down	Displays the next page of the current file being viewed.
F9	Next NSN	Displays the next NSN if more than one NSN was selected.
F10	Print	Sends the information displayed to the printer associated with your terminal. Available only after special access has been granted by the security administrator for your facility.

APPENDIX A

PART 2 SCREEN LAYOUTS

This appendix contains the Screen Layouts and how to use the screens.

The following are the only LOLA screens that may be directly invoked using Expert Navigation:

1. LOLINQ - Start Inquiry Screen
2. LOLCHS - Start Characteristics Search Screen
3. LOLSRC - Start FSG/FSC Item Name Search Screen
4. LOLUPD - LOLA On-Line Update

Within any LOLA Subsystem screen, you may jump to any of the screens available to your group. This is defined in the Table REC_MENU3.

A.72 LOLUPD - LOLA Update Main Menu Screen

```

a. Screen Explanation. This screen allows the user to select the type of update to be performed. After making a selection, the TRANSACTION HEADER Screen will be displayed. After entering all required data, the appropriate input screen/menu will be displayed dependant on the selection made on this screen.

b. Field Entry Requirements. The valid entries are described below.

REVIEW RESULTS OF TRANSACTION -	Selection of this option will forward you to the TRANSACTION COMPLETED LIST screen where you can view the results of transactions submitted via On-line Update. This screen will also allow you to "fix" and reprocess a transaction that did not pass the internal MIOS edits.
NIIN ASSIGNMENT -	(DICs LNC, LNK, LNR, LNW) Selection of this option will forward you to the TRANSACTION HEADER screen, followed by the menu screen. The appropriate input screens will be provided dependent on the selection made on that screen.
PROCESS MULTIPLE DICS -	(DIC LMD) Selection of this option will forward you to the TRANSACTION HEADER screen, followed by the CHANGE MULTIPLE DATA GROUPS menu screen. The appropriate input screens will be provided dependent on the selection made on that screen.
PROCESS MULTIPLE NIIN -	(DIC LMX) Selection of this option will forward you to the TRANSACTION HEADER screen, followed by the NIIN SCREEN menu screen. The appropriate input followed by the NIIN ASSIGNMENT/ REINSTATEMENT menu screen. The appropriate input screens will be provided dependent on the selection made on that screen.
NIIN REINSTATEMENT -	(DICs LBK, LBC, LBR, LBW) Selection of this option will forward you to the TRANSACTION HEADER screen, screens will be provided dependent on that screen.

MAINTAIN DATA GROUP -   (DICs LAU, LCU, LDU, LAR, LCR, LDR, LAS, LCS, LDS, LCZ, LAB, LAF, LCF, LDF, LAM, LCM, LDM, LCC) Selection of this option will forward you to the TRANSACTION HEADER screen, followed by the DATA GROUP MAINTENANCE menu screen. The appropriate input will be provided dependent on the selection made on that screen.

MAINTAIN DATA ELEMENT -   (DICs LAD, LCD, LDD, LCC, LTU, LTV, LTW; commonly referred to as "R Segment" updates for Segments A, B, G, and H). Selection of this option will forward you to the TRANSACTION HEADER screen, followed by the DATA ELEMENT MAINTENANCE menu screen. The appropriate input will be provided dependent on the selection made on that screen.

MAINTAIN CANCELLATIONS -   (DICs LKD, LKU, LKV, LKI, LKE) Selection of this option will forward you to the TRANSACTION HEADER screen, followed by the CANCELLATION menu screen. Input screens will be provided and selection made on that screen.

DASS CRITICAL SOS CHG -   (DIC LSS) Selection of this option will forward you to the TRANSACTION HEADER screen, followed by the appropriate input screen.

NIIN STATUS CD CHG -   (DIC LCI) Selection of this option will forward you to the TRANSACTION HEADER screen, followed by the appropriate input screen.

TEMPLATE LIST -   User can review their own personal Template TRANSACTION.

REQUEST FOR CODIFICATION -   (DIC LSB) Selection of this option will forward you to segment 2, B or H.

  c. Available Function Keys. No unique function keys are used from the LOLA UPDATE MAIN MENU screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

A.73 LOLHDR - Transaction Header Screen

```
SCRNCD: LOLHDR              L O L A   U P D A T E        DATE: 03-OCT-00
USERID: XXXXXXX               TRANSACTION  HEADER        TIME: 07:24
---------------------------------------------------------------------------

        NATIONAL STOCK NUMBER:      ____ _____

        DOCUMENT CONTROL NUMBER:  _____

        ORIGINATING ACTIVITY      _

        SUBMITTING ACTIVITY:      98

        TRANSACTION DATE:         ____
                                  (PF12 FOR CURRENT DATE)

    <MSG 1682> ENTER REQUIRED DATA AND PRESS ENTER

                        SCR F3=LOLA MENU  F4=MAIN MENU  F5=CANCEL   F6=
    F7=        F8=          F9=           F10=          F11=        F12=CURRENT DATE
```

a. Screen Explanation. This screen allows the user to enter update Header criteria. All of the fields on this screen are MANDATORY. When all of the fields have been filled press ENTER. At this time each field is checked to see if the values entered are valid. If an invalid or missing value is entered a message will be displayed on the screen. It is important to note that the checks that are being made are valid entry or ″basic edits″. For example ORIGINATING ACTIVITY is checked to see if a valid Activity Code was entered, not that the Activity entered can originate this transaction. SUBMITTING ACTIVITY is automatically loaded from your 'USER PROFILE' and can be changed only if the user has multiple activities in their user profile.

b. Field Entry Requirements. The valid entries are described below.

(1)   Field Name: NATIONAL STOCK NUMBER
      Entry Requirement: For maintenance transactions enter the NIIN only. The
                                 cursor will be located at the first position of the NIIN
                                 field. The appropriate FSC will be loaded for you. For new
                                 NSN assignment enter the appropriate FSC only, a new
                                 NIIN will be assigned for you at DLIS.
      Valid Entries: The 9 position NIIN, for maintenance transactions or the
                                 4 position FSC, for new NIIN assignments.
      Results: Be moved to the Document Control Number field.

(2)   Field Name: DOCUMENT CONTROL NUMBER
      Entry Requirement: The 7 position Document Control Number.
      Valid Entries: Any Alpha-Numeric characters.
      Results: Be moved to the Originating Activity field.

(3)   Field Name: ORIGINATING ACTIVITY
      Entry Requirement: A valid Activity Code.
      Valid Entries: A two position alpha-numeric Activity Code.
      Results: Be moved to the Submitting Activity field.

(4)   Field Name: TRANSACTION DATE
      Entry Requirement: The Julian Date that the transaction is to be processed
                                 on. Today's date will be displayed by default, for
                                 EFFECTIVE DATED transactions enter the appropriate
                                 Effective Date.
      Valid Entries: The Julian Date is a 5 position Numeric field that is
                                 structured as follows: YYDDD. Where the first 2 positions
                                 are the Year and the last 3 positions are the Day, i.e.,
                                 91234.

Results: This Header portion of the transaction is now ready for
                                  Submittal. Press ENTER to process the Header and to
                                  start building the transaction.

   c. Available Function Keys. The following unique function keys may be used from the
TRANSACTION HEADER screen. All standardized FLIS function keys are available. Refer
to Section 16.3.2.e of this document.

   F5   Cancel   Cancels current search and returns to the LOLA
                                  Update Main Menu.

```

a. Screen Explanation. This screen allows the user to select the type of Item Identification that is to be applied to the NIIN assignment transaction.

b. Field Entry Requirements. The valid entries are described below.

(1)   Field Name: (LNC) NIIN ASSIGNMENT PARTIAL DESCRIPTION W/REFERENCE NUMBERS

       Entry Requirement: Position the cursor next to this option and press ENTER.

       Valid Entries: No entries are required.

       Results: The following Data Group input screens will be displayed: ITEM IDENTIFICATION, MOE RULE, REFERENCE NUMBER, STANDARDIZATION, CATALOG MANAGEMENT and CHARACTERISTICS.

(2)   Field Name: (LNK) NIIN ASSIGNMENT REFERENCE METHOD

       Entry Requirement: Position the cursor next to this option and press ENTER.

       Valid Entries: No entries are required.

       Results: The following Data Group input screens will be displayed: ITEM IDENTIFICATION, MOE RULE, REFERENCE NUMBER, STANDARDIZATION and CATALOG MANAGEMENT.

(3)   Field Name: (LNR) NIIN ASSIGNMENT FULL DESCRIPTION W/REFERENCE NUMBERS

       Entry Requirement: Position the cursor next to this option and press ENTER.

       Valid Entries: No entries are required.

       Results: The following Data Group input screens will be displayed: ITEM IDENTIFICATION, MOE RULE, REFERENCE NUMBER, STANDARDIZATION, CATALOG MANAGEMENT and CHARACTERISTICS.

(4)   Field Name: (LNW) NIIN ASSIGNMENT FULL DESCRIPTION W/O REFERENCE NUMBERS

       Entry Requirement: Position the cursor next to this option and press ENTER.

       Valid Entries: No entries are required.

Results: The following Data Group input screens will be displayed: ITEM IDENTIFICATION, MOE RULE, STANDARDIZATION, CATALOG MANAGEMENT and CHARACTERISTICS.

(5)   Field Name: (LBC) REINSTATE NIIN PARTIAL DESCRIPTION W/REFERENCE NUMBERS

Entry Requirement: Position the cursor next to this option and press ENTER.

Valid Entries: No entries are required.

Results: The following Data Group input screens will be displayed: ITEM IDENTIFICATION, MOE RULE, REFERENCE NUMBER, CATALOG MANAGEMENT and CHARACTERISTICS.

(6)   Field Name: (LBK) REINSTATE NIIN REFERENCE METHOD

Entry Requirement: Position the cursor next to this option and press ENTER.

Valid Entries: No entries are required.

Results: The following Data Group input screens will be displayed: ITEM IDENTIFICATION, MOE RULE, REFERENCE NUMBER, CATALOG MANAGEMENT and CHARACTERISTICS.

(7)   Field Name: (LBR) REINSTATE NIIN FULL DESCRIPTION W/ REFERENCE NUMBERS

Entry Requirement: Position the cursor next to this option and press ENTER.

Valid Entries: No entries are required.

Results: The following Data Group input screens will be displayed: ITEM IDENTIFICATION, MOE RULE, REFERENCE NUMBER, CATALOG MANAGEMENT and CHARACTERISTICS.

(8)   Field Name: (LBW) REINSTATE NIIN FULL DESCRIPTION W/O REFERENCE NUMBERS

Entry Requirement: Position the cursor next to this option and press ENTER.

Valid Entries: No entries are required.

Results: The following Data Group input screens will be displayed: ITEM IDENTIFICATION, MOE RULE, REFERENCE NUMBER, CATALOG MANAGEMENT and CHARACTERISTICS.

    c. Available Function Keys. The following unique function keys may be used from the TYPE OF NIIN/REINSTATEMENT screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

    F5   Cancel   Cancels current search and returns to the LOLA Update Main Menu.

The NIIN ASSIGNMENT/REINSTATEMENT menu screen allows you to select the type of item identification that is to be applied to the NIIN assignment/reinstatement transaction. After you have selected the type of NIIN ASSIGNMENT/REINSTATEMENT, you will be forwarded to the input screens required for the transaction you are creating.

A.75 LOLGRP - Data Group Maintenance Screen

```
SCRNCD: LOLGRP              L O L A   U P D A T E        DATE: 03-OCT-00

```

a. Screen Explanation. This screen allows the user to enter their update criteria. This screen is for the Data Group maintenance, see the "RESULTS" portion of the Field Entry Requirements (below), for the specific DIC that will be generated from your choice.

b. Field Entry Requirements. The valid entries are described below.

(1)   Field Name: MOE RULE DATA

       Entry Requirement: Position the cursor next to this option and enter the appropriate code.

       Valid Entries: (A) to add to the MOE RULE Data Group, (D) to delete from the MOE RULE Data Group or (C) to change a MOE RULE Data Group.

       Results: Selecting this option creates an LAU, LDU or LCU transaction.

(2)   Field Name: REFERENCE NUMBER DATA

       Entry Requirement: Position the cursor next to this option and enter the appropriate code.

       Valid Entries: (A) to add, (C) to change, or (D) to delete from the REFERENCE NUMBER Data Group.

       Results: Selecting this option creates an LAR, LCR, or LDR transaction.

(3)   Field Name: ADD NIIN AS REFERENCE NUMBER (LAB)

       Entry Requirement: Position the cursor next to this option and enter the appropriate code.

       Valid Entries: (A) to add is the only valid option.

       Results: Selecting this option creates an LAB transaction.

(4)   Field Name: STANDARDIZATION DATA

       Entry Requirement: Position the cursor next to this option and enter the appropriate code.

       Valid Entries: (C) to change the STANDARDIZATION DATA.

       Results: Selecting this option creates an LCS to change REPLACED NIIN, or an LCZ to change a REPLACEMENT NIIN. The appropriate DIC will be determined programmatically.

(5)   Field Name: STANDARDIZATION RELATIONSHIP

       Entry Requirement: Position the cursor next to this option and enter the appropriate code.

Valid Entries: (A) to add, or (D) to delete from the STANDARDIZATION
                     Data Group.

Results: Selecting this option creates an LAS to add REPLACED
                     NSN's, or LDS to delete REPLACED NSNs.

(6) Field Name: FREIGHT DATA

Entry Requirement: Position the cursor next to this option and enter the
                     appropriate code.

Valid Entries: (A) to add, (C) to change, or (D) to delete from the
                     FREIGHT Data Group.

Results: Selecting this option creates an LAF, LCF or LDF
                     transaction.

(7) Field Name: CATALOG MANAGEMENT DATA

Entry Requirement: Position the cursor next to this option and enter the
                     appropriate code.

Valid Entries: (A) to add, (C) to change, or (D) to delete from the
                     FREIGHT Data Group.

Results: Selecting this option will create a LAF, LCF, of LDF
                     transaction.

(8) Field Name: CHARACTERISTICS DATA

Entry Requirement: Position the cursor next to this option and enter the
                     appropriate code.

Valid Entries: (A) to add, (C) to change, or (D) to delete from the
                     CHARACTERISTICS DATA Group.

Results: Selecting this option will create an LCC transaction.

    c. Available Function Keys. The following unique function keys may be used from the
DATA GROUP MAINTENANCE screen. All standardized FLIS function keys are available.
Refer to Section 16.3.2.e of this document.

F5   Cancel   Cancels current search and returns to the LOLA
                            Update Main Menu.

```

a. Screen Explanation. This screen allows the user to select the type of Data Element maintenance transaction to be performed. One of the codes displayed on the bottom of the screen must be entered next to one of the selections.

b. Field Entry Requirements. The valid entries are described below.

(1) Field Name: ITEM IDENTIFICATION DATA

Entry Requirement: Position the cursor next to this selection and enter the appropriate code.

Valid Entries: An A, C, D, or F.

Results: Entering a 'A' will create an LAD transaction.
Entering a 'C' will create an LCD transaction.
Entering a 'D' will create an LDD transaction.
Entering a 'F' will create an LCG transaction.

(2) Field Name: MOE RULE DATA

Entry Requirement: Position the cursor next to this selection and enter the appropriate code.

Valid Entries: An A, C, or D.

Results: Entering a 'A' will create an LAD transaction.
Entering a 'C' will create an LCD transaction.
Entering a 'D' will create an LDD transaction.

(3) Field Name: FREIGHT DATA

Entry Requirement: Position the cursor next to this selection and enter the appropriate code.

Valid Entries: An A, C, or D.

Results: Entering a 'A' will create an LAD transaction.
Entering a 'C' will create an LCD transaction.
Entering a 'D' will create an LDD transaction

(4) Field Name: CATALOG MANAGEMENT DATA

Entry Requirement: Position the cursor next to this selection and enter the appropriate code.

Valid Entries: An A, C, or D.

Results: Entering a 'A' will create an LAD transaction.
Entering a 'C' will create an LCD transaction.
Entering a 'D' will create an LDD transaction

(5)   Field Name: NUCLEAR ORDNANCE SOURCE OF SUPPLY

           Entry Requirement: Position the cursor next to this selection and enter the appropriate code.

           Valid Entries: An A, C, or D.

           Results: Entering a 'A' will create an LTU transaction.
                                         Entering a 'C' will create an LTV transaction.
                                         Entering a 'D' will create an LTW transaction

c. Available Function Keys. The following unique function keys may be used from the DATA ELEMENT MAINTENANCE screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

     F5   Cancel   Cancels current search and returns to the LOLA Update Main Menu.

```

a. Screen Explanation. This screen will create an LAD transaction(s) for the Item Identification (A segment) Data Group. If all fields have values entered, 6 (six) LAD transactions will be created for you. Once the appropriate field entries have been made press F-6.

b. Field Entry Requirements. The valid entries are described below.

(1)   Field Name: ITEM NAME CODE (INC)
      Entry Requirement: Enter the appropriate INC and press F6.
      Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
      Results: A LAD transaction will be sent to update the selected NIIN.

(2)   Field Name: NONAPPROVED ITEM NAME (NAIN)
      Entry Requirement: Enter the appropriate NAIN and press F6.
      Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
      Results: A LAD transaction will be sent to update the selected NIIN.

(3)   Field Name: PRECIOUS METALS INDICATOR CODE
      Entry Requirement: Enter the appropriate PMIC and press F6.
      Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
      Results: A LAD transaction will be sent to update the selected NIIN.

(4)   Field Name: ELECTRO STATIC DISCHARGE CODE
      Entry Requirement: Enter the appropriate ESDC and press F6.

	Valid Entries:	Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
	Results:	A LAD transaction will be sent to update the selected NIIN.

(5)	Field Name:	AUTOMATIC DATA PROCESSING EQUIPMENT CODE
	Entry Requirement:	Enter the appropriate ADPEC and press F6.
	Valid Entries:	Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
	Results:	A LAD transaction will be sent to update the selected NIIN.

c. Available Function Keys. The following unique function keys may be used from the ADD ITEM IDENTIFICATION DATA screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the LOLA Update Main Menu.
F6	PROCESS	Validate the data input on the screen and sends the transaction to be processed.

```

a. Screen Explanation. This screen will create an LAF, LCF, or LDF transaction. Enter the appropriate values into the fields and press F6.

b. Field Entry Requirements. The valid field entries are described below.

(1)   Field Name: INTEGRITY CODE
       Entry Requirement: Enter the appropriate INTEGRITY CODE.
       Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
       Results: The cursor will be placed on the next input field.

(2)   Field Name: (NMFC)
       Entry Requirement: Enter the appropriate NATIONAL MOTOR FREIGHT CODE.
       Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
       Results: The cursor will be placed on the next input field.

(3)   Field Name: NMFC SUB ITEM NUMBER.
       Entry Requirement: Enter the appropriate NATIONAL MOTOR FREIGHT CODE SUB ITEM NUMBER.
       Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
       Results: The cursor will be placed on the next input field.

(4)   Field Name: UFC CODE (MODIFIED).
       Entry Requirement: Enter the appropriate UNIFORM FREIGHT CLASSIFICATION (UFC) CODE (MODIFIED).

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will be placed on the next input field.

(5)   Field Name: HAZARDOUS MATERIEL CODE (HMC)

Entry Requirement: Enter the appropriate HMC.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will be placed on the next input field.

(6)   Field Name: CLASS RATING

Entry Requirement: Enter appropriate CLASS RATING Code.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will be placed on the next input field.

(7)   Field Name: LESS THAN CARLOAD RATING CODE

Entry Requirement: Enter the LESS THAN CARLOAD RATING CODE.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will be placed on the next input field.

(8)   Field Name: RAIL VARIATION CODE

Entry Requirement: Enter the appropriate RAIL VARIATION CODE.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP.

Results: The cursor will be positioned on the next input field.

(9) Field Name: WATER COMMODITY CODE

Entry Requirement: Enter the appropriate WATER COMMODITY CODE.

Valid Entries: The Data Element definition can be obtained by positioning the cursor on the input field and pressing F1 for HELP. The Format for this Element is as follows: the first position must be numeric 1-9, the second position must be numeric 0-9, and the third position can be alpha or numeric.

Results: The cursor will be positioned on the next input field.

(10) Field Name: TYPE OF CARGO CODE

Entry Requirement: Enter the appropriate TYPE OF CARGO CODE.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will be positioned on the next input field.

(11) Field Name: SPECIAL HANDLING CODE

Entry Requirement: Enter the appropriate SPECIAL HANDLING CODE.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will be positioned on the next input field.

(12) Field Name: AIR COMMODITY/SPECIAL HANDLING

Entry Requirement: Enter the AIR COMMODITY/SPECIAL HANDLING.

Valid Entries: The Data element definition can be obtained by positioning the cursor on the input field and pressing F1 for HELP.

Results: The cursor will be positioned on the next input field.

(13) Field Name: AIR DIMENSION CODE

Entry Requirement: Enter the appropriate AIR DIMENSION CODE.

Valid Entries: Valid entries can be obtained by positioning the cursor on
                               the input field and pressing F1 for HELP. While in HELP
                               a definition and a list of Valid Values will appear. Position
                               the cursor next to the appropriate value and use the
                               "sticky cursor" option. The selected value will be entered
                               into the field automatically.

Results: Press F6 to process screen, then F12 to process
                               transaction.

   c. Available Function Keys. The following unique function keys may be used from the
FREIGHT DATA screen. All standardized FLIS function keys are available. Refer to Sec-
tion 16.3.2.e of this document.

   F5   Cancel   Cancels current search and returns to the LOLA
                               Update Main Menu.
   F6   PROC SCREEN   Validate the data input on the screen. This key
                               must be used prior to submitting the transaction.
   F12 PROC TRANS   This will create the transaction and send the user
                               to the next input screen/menu.

A.79 LOLCGA - Change FSC and/or FSC Related Data
(LCG) Screen

```
SCRNCD: LOLCGA          L O L A    U P D A T E        DATE: 03-OCT-00

F7=          F8=          F9=FILE DATA F10=         F11=        F12=PROC TRANS
```

a. Screen Explanation. This screen will create an LCG transaction for FSC or FSC related data. If data exists on the input NIIN, that data will be displayed. If data does not exist the field will be displayed with asterisks (*). In either case enter values into the field(s) that are to be changed, then Process (F6) the transaction.

b. Field Entry Requirements. The valid entries are described below.

(1)	Field Name:	EFFECTIVE DATE
	Entry Requirement:	Enter the Julian Date that the transaction will be processed.
	Valid Entries:	The field will default to todays date. If a different date is required enter the desired Effective Date for the input transaction.
	Results:	The cursor will be positioned on the Federal Supply Class field.
(2)	Field Name:	FEDERAL SUPPLY CLASS
	Entry Requirement:	Enter the appropriate FEDERAL SUPPLY CLASS and either press F6 to process the update or continue to add values to this screen.
	Valid Entries:	A valid ASSIGNED FSC is required.
	Results:	A LCG transaction will be sent to update the selected NIIN, if F6 is entered. The other fields can also be entered if required.
(3)	Field Name:	ITEM NAME CODE
	Entry Requirement:	Enter the appropriate ITEM NAME CODE and either press F6 to process the update or continue to add values to this screen.
	Valid Entries:	A valid ITEM NAME CODE is required.
	Results:	A LCG transaction will be sent to update the selected NIIN, if F6 is entered.
(4)	Field Name:	NON APPROVED ITEM NAME
	Entry Requirement:	Enter the 19 character NON APPROVED ITEM NAME and press F6 to process the update.
	Valid Entries:	Valid entries may be an Item Identifying Name that adequately describes the NIIN on the input field.
	Results:	A LCG transaction will be sent to update the selected NIIN, if F6 is entered. The other fields can also be entered if desired. If other fields are entered, then separate transactions will be created.

(5)   Field Name: REF-PTL-DESCR-MTHD-RSN

Entry Requirement: Enter the appropriate RPDMRC and press F6 to process the update.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: A LCG transaction will be sent to update the selected NIIN, if F6 is entered. The other fields can also be entered if desired. If other fields are entered, then separate transactions will be created.

(6)   Field Name: TYPE OF ITEM IDENTIFICATION

Entry Requirement: Enter the appropriate TYPE OF ITEM IDENTIFICATION CODE and press F6 to process the update.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: A LCG transaction will be sent to update the selected NIIN, if F6 is entered. The other fields can also be entered if desired. If other fields are entered, then separate transactions will be created.

   c. Available Function Keys. The following unique function keys may be used from the CHANGE FSC OR FSC RELATED DATA screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the LOLA Update Main Menu.
F6	PROCESS	Validate the data input on the screen and sends the transaction to be processed.
F9	FILE DATA	Displays current file data.

```

a. Screen Explanation. This screen will be used to Add data to the FREIGHT DATA Group (LAD).

b. Field Entry Requirements. The valid entries are described below.

(1) Field Name: HAZARDOUS MATERIAL CODE

Entry Requirement: Enter the HAZARDOUS MATERIAL CODE and press F6.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: A LAD transaction will be sent to update the selected NIIN, if F6 is entered. Other fields can also be entered. If other fields are entered, separate transactions will be created.

(2) Field Name: INTEGRITY CODE

Entry Requirement: Enter the INTEGRITY CODE and press F6 to process.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: A LAD transaction will be sent to update the selected NIIN, if F6 is entered. Other fields can also be entered. If other fields are entered, separate transactions will be created.

(3) Field Name: LESS THAN CARLOAD RATING CD

Entry Requirement: Enter the appropriate LESS THAN CARLOAD RATING CODE and press F6 to process the update.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: A LAD transaction will be sent to update the selected NIIN, if F6 is entered. Other fields can also be entered. If other fields are entered, separate transactions will be created.

(4)   Field Name: RAIL VARIATION CODE

      Entry Requirement: Enter the appropriate RAIL VARIATION CODE and press
                                          F6 to process the update.

      Valid Entries: Valid entries can be obtained by positioning the cursor on
                                          the input field and pressing F1 for HELP. While in HELP
                                          a definition and a list of Valid Values will appear. Position
                                          the cursor next to the appropriate value and use the
                                          "sticky cursor" option. The selected value will be entered
                                          into the field automatically.

      Results: A LAD transaction will be sent to update the selected
                                            NIIN, if F6 is entered. Other fields can also be entered. If
                                          other fields are entered, separate transactions will be
                                          created.

  c. Available Function Keys. The following unique function keys may be used from the
ADD DATA ELEMENT screen. All standardized FLIS function keys are available. Refer to
Section 16.3.2.e of this document.

  F5   Cancel   Cancels current search and returns to the LOLA
                                           Update Main Menu.
  F6   PROCESS   Validate the data input on the screen and forward
                                           the transaction for processing.

```

a. Screen explanation. This screen is used for new NIIN Assignments (LN_) or NIIN Reinstatements (LB_). This will be required for input, to create the selected transaction.

b. Field Entry Requirements. The valid entries are described below.

(1)   Field Name: INC
      Entry Requirement: Enter the ITEM NAME CODE and press F6.
      Valid Entries: An ITEM NAME CODE.
      Results: The cursor will move to the next input field.

(2)   Field Name: ITEM NAME
      Entry Requirement: To be used when an INC is not entered, this field is used for Non Approved Item Names only.
      Valid Entries: An item Identifying Name.
      Results: The cursor will move to the next input field.

(3)   Field Name: TYPE OF II
      Entry Requirement: Enter the TYPE OF ITEM IDENTIFICATION CODE.
      Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
      Results: The cursor will move to the next input field.

(4)   Field Name: FIIG
      Entry Requirement: Enter the appropriate Guide Number FIIG.
      Valid Entries: A valid FIIG Number must be entered.
      Results: The cursor will move to the next input field.

(5)   Field Name: DEMIL
      Entry Requirement: Enter the appropriate Demilitarization Code.
      Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
      Results: The cursor will move to the next input field.

(6)   Field Name: RPDMRC

Entry Requirement: Enter the appropriate RPDMRC.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will move to the next input field.

(7)   Field Name: CRITICALITY CODE

Entry Requirement: Enter the appropriate CRITICALITY CODE.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will move to the next input field.

(8)   Field Name: PMIC

Entry Requirement: Enter the appropriate PMIC.

Valid Entries: Valid Entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the approprite value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will move to the next input field.

(9)   Field Name: ADPE CODE

Entry Requirement: Enter the ADPEC and press F6 to process.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will move to the next input field.

(10)   Field Name: ESDC

Entry Requirement: Enter the appropriate ESDC.

Valid Entries: Valid entries can be obtained by positioning the cursor on
                            the input field and pressing F1 for HELP. While in HELP
                            a list of Valid Values will appear. Position the cursor nest
                            to the appropriate value and use the "sticky cursor"
                            option. The selected value will be entered into the field
                            automatically.

Results: The cursor will move to the next input field.

(11) Field Name: HMIC
     Entry Reuirement: Enter the appropriate HMIC.
     Valid Entries: Valid entries can be obtained by positioning the cursor on
                            the input field and pressing F1 for HELP. While in HELP
                            a definition and a list of Valid Values will appear. Position
                            the cursor next to the appropriate value and use the
                            "sticky cursor" option. The selected value will be entered
                            into the field automatically.

     Results: The MOE RULE DATA GROUP screen will be displayed.

c. Available Function Keys. The following unique function keys may be used from the
IDENTIFICATION DATA GROUP screen. All standardized FLIS function keys are avail-
able. Refer to Section 16.3.2.e of this document.

F5   Cancel   Cancels current search and returns to the LOLA
                            Update Main Menu.
F6   PROC SCREEN   Validate the data input on the screen. This key
                            must be used prior to submitting the transaction.
F12 PROC TRANS   This will create the transaction and send the user
                            to the next input screen/menu.

```
4B ☼:00.7   05/47

a. Screen Explanation. This screen will be used to create a LCD transaction to change data in the Catalog Management Data Group.

b. Field Entry Requirements. The valid entries are described below.

(1)   Field Name: MOE/MAC

        Entry Requirement: The MOE Code is used when there is only one (1) "line" of CMD Data recorded for the Users Service. The MAC is used when multiple "lines" of CMD Data are recorded for the Users Service.

        Valid Entries: Press F1 for help on the MOE Code MS, SS.

        Results: The cursor will be moved to the next input field.

(2)   Field Name: EFFECTIVE DATE

        Entry Requirement: A valid Julian date for an Effective Dated Transaction or '00000' if you want the transaction to process now.

        Valid Entries: The 5 position Julian date or 5 '0s'.

        Results: The cursor will be moved to the next input field.

(3)   Field Name: CHANGE SERVICE RELATED CMD DATA

        Entry Requirement: Enter an 'X' to select this option and press F6.

        Valid Entries: Valid entry is 'X'.

        Results: The user will be sent to their Service Related data screen. The following data can be updated dependent on the Service of the user.

                              ARMY: MANAGEMENT CONTROL DATA, ARMY RECOVERABILITY CODE, ARMY

                              AIR FORCE: MANAGEMENT CONTROL DATA, AIR FORCE ERRC CODE, AIR FORCE

                              COAST GUARD: MANAGEMENT CONTROL DATA, COAST GUARD REPARABILITY CODE, COAST GUARD

                              MARINE CORPS: MANAGEMENT CONTROL DATA, MARINE CORPS RECOVERABILITY CODE, MARINE CORPS

                              NAVY: MANAGEMENT CONTROL DATA, NAVY MATERIAL CONTROL CODE, NAVY

(4)   Field Name: CHANGE BASIC MANAGEMENT DATA

        Entry Requirement: Enter an 'X' next to this option and press F6.

        Valid Entries: An 'X' is required to select this option.

Results: The cursor will move to the next input field, or you can
                            press F6 to create a transaction for this option. If other
                            fields are selected, then separate LCD transactions will be
                            created.

(5)   Field Name: CHANGE UNIT OF ISSUE DATA
       Entry Requirement: Enter an 'X' next to this option and press F6.
       Valid Entries: An 'X' is required to select this option.
       Results: The cursor will move to the next input field, or you can
                            press F6 to create a transaction for this option. If other
                            fields are selected, then separate LCD transactions will be
                            created.

(6)   Field Name: CHANGE FORMER PHRASE RELATIONSHIP GROUP
       Entry Requirement: Enter an 'X' next to this option and press F6.
       Valid Entries: An 'X' is required to select this option.
       Results: The cursor will move to the next input field, or you can
                            press F6 to create a transaction for this option. If other
                            fields are selected, then separate LCD transactions will be
                            created.

(7)   Field Name: CHANGE QUANTITATIVE EXPRESSION
       Entry Requirement: Enter an 'X' next to this option and press F6.
       Valid Entries: An 'X' is required to select this option.
       Results: Press F6 to create a transaction for this option. If other
                            fields have been selected, then separate LCD transactions
                            will be created.

   c. Available Function Keys. The following unique function keys may be used from the
CHANGE CATALOG MANAGEMENT DATA screen. All standardized FLIS function keys
are available. Refer to Section 16.3.2.e of this document.

   F5   Cancel   Cancels current search and returns to the LOLA
                            Update Main Menu.
   F6   PROCESS   Validate the data input on the screen and forward
                            the transaction for processing.

 <MSG 3032> ENTER NEW DATA AND PRESS PF6 TO PROCESS

 F1=HELP      F2=CLEAR SCR F3=LOLA MENU F4=MAIN MENU F5=CANCEL   F6=PROC SCREEN
 F7=PAGE UP   F8=PAGE DOWN F9=DLT ROW   F10=FILE DATA            F12=PROC TRANS
```

a. Screen Explanation. This screen will be used to create or maintain the MOE RULE Data Group. The use of this screen is determined by prior MENU selections. The transactions that use this screen are the LN_, LB_, LAU, LCU, and LDU transactions. Use F6 to process the screen, then F12 to process the transaction. If more MOE Rule transactions are required, use F8 after F6. Repeat as necessary. If you want to delete a MOE rule and associated data that was previously input (during the creation of this transaction), F7 or F8 to that MOE Rule and press F9. (NOTE: F2 only clears the screen, it will not delete the data from the transaction, you must use F9-DLT SCRN.)

b. Field Entry Requirements. The valid entries are described below.

(1)   Field Name: EFFECTIVE DATE

Entry Requirement: Enter the Julian Date that the transaction is to be effective. The default value will be todays date.

Valid Entries: Numeric values representing the Year and Day that the transaction is to be effective i.e, YYDDD.

Results: The Effective Date will be loaded into the transaction and the cursor will move to next field.

(2)   Field Name: TAG

Entry Requirement: User may tag with a X

Valid Entries: and hit F9 to Delete the line.

Results: The cursor will move to the next field.

(3)   Field Name: MOE RULE

Entry Requirement: The appropriate MOE Rule Number

Valid Entries: A valid MOE RULE Number.

Results: The cursor will move to the next field.

(4)   Field Name: FMR MOE RULE

Entry Requirement: This field is required when changing a MOE RULE (LCU) transaction.

Valid Entries: A VALID MOE RULE.

Results: The cursor will move to the next field.

(5)   Field Name: AMC

Entry Requirement: Enter the appropriate ACQUISITION METHOD CODE and press F6 to process the screen or continue to add/modify the other fields.

	Valid Entries:	Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
	Results:	The cursor will move to the next input field.

(6)   Field Name: AMSC

Entry Requirement: Enter the appropriate ACQUISITION METHOD SUFFIX CODE and press F6 to process the screen or continue to add/modify the other fields.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will move to the next input field.

(7)   Field Name: IMC

Entry Requirement: Enter the appropriate ITEM MANAGEMENT CODE and press F6 to process the screen or continue to add/modify the other fields.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will move to the next input field.

(8)   Field Name: IMCA

Entry Requirement: Enter the appropriate ITEM MANAGEMENT CODING ACTIVITY and press F6 to process the screen or continue to add/modify the other fields.

Valid Entries: A valid Activity Code can be found by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will move to the next input field.

(9)   Field Name: DSOR
      Entry Requirement: Enter the appropriate DEPOT SOURCE OF REPAIR
                            CODE and press F6 to process the screen or continue to
                            add/modify the other fields.
      Valid Entries: A valid Activity Code can be obtained by positioning the
                            cursor on the input field and pressing F1 for HELP. While
                            in HELP a definition and a list of Valid Values will
                            appear. Position the cursor next to the appropriate value
                            and use the "sticky cursor" option. The selected value will
                            be entered into the field automatically.
      Results: The cursor will move to the next input field.

(10) Field Name: NIMSC
      Entry Requirement: Enter the appropriate NIMSC and press F6 to process the
                            screen or continue to add/modify the other fields.
      Valid Entries: Valid entries can be obtained by positioning the cursor on
                            the input field and pressing F1 for HELP. While in HELP
                            a definition and a list of Valid Values will appear. Position
                            the cursor next to the appropriate value and use the
                            "sticky cursor" option. The selected value will be entered
                            into the field automatically.
      Results: The cursor will move to the next input field.

(11) Field Name: CIC
      Entry Requirement: Enter the appropriate CARD IDENTIFICATION CODE
                            and press F6 to process the screen or continue to add/
                            modify the other fields.
      Valid Entries: Valid entries can be obtained by positioning the cursor on
                            the input field and pressing F1 for HELP. While in HELP
                            a definition and a list of Valid Values will appear. Position
                            the cursor next to the appropriate value and use the
                            "sticky cursor" option. The selected value will be entered
                            into the field automatically.
      Results: The cursor will move to the next input field.

(12) Field Name: SUPPL-RCVR
      Entry Requirement: Enter the appropriate SUPPLEMENTAL RECEIVER
                            CODE and press F6 to process the update or continue to
                            add/modify the other fields.

	Valid Entries:	A Valid Activity Code can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
	Results:	The cursor will move to the next input field.
(13)	Field Name:	SUPPL-COLLBR
	Entry Requirement:	Enter the appropriate SUPPLEMENTAL COLLABORATOR CODE(S) and press F6 to process the screen.
	Valid Entries:	A valid Activity Code can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
	Results:	Press F6 to process the screen, then F12 to process the transaction.

c. Available Function Keys. The following unique function keys may be used from the MOE RULE DATA GROUP screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the LOLA Update Main Menu.
F6	PROC SCREEN	Validate the data input on the screen. This key must be used prior to submitting the transaction.
F7	PREV MOE	Displays the first MOE Rule transaction for this session if the screen is blank. If data has been entered, the previous input MOE Rule will be displayed.
F8	NEXT MOE	Clears the input fields and allows another MOE Rule to be entered unless you were paging up (F7) in which case it takes you to the next record.
F9	DLT SCRN	Deletes the specific MOE Rule displayed on the screen and displays the next MOE Rule entered for this session, unless it was the last record, in which case it will display a blank screen.
F12	PROC TRANS	This will create the transaction and send the user to the next input screen/menu.

A.84 LOLDDB - Delete MOE Rule Data Screen

```

   NSN  6150 012333333

                                       MOE RULE  ____

     SUPPL-RECEIVER
     DELETE TAG

     SUPPL-COLLABORATOR
     DELETE TAG

     DEPOT SOURCE OF REPAIR
     DELETE TAG

<MSG 1692> ENTER MOE RULE OF DATA TO BE DELETED
<MSG 0534> PRESS PF6 TO PROCESS
F1=HELP      F2=CLEAR SCR F3=LOLA MENU F4=MAIN MENU F5=CANCEL  F6=PROCESS SCRN
F7=          F8=          F9=          F10=         F11=       F12=PROCESS TRAN
```

a. Screen Explanation. The screen is used to delete Element(s) from the MOE RULE Data Group. It will not delete the MOE RULE from the NIIN.

b. Field Entry Requirements. The valid entries are described below.

(1)   Field Name: NSN

        Entry Requirement: No entry requirements, the value is defaulted.

        Valid Entries: Not applicable.

        Results: The NSN is the stock number that the transaction will be processed against.

(2)   Field Name: MOE RULE

        Entry Requirement: Enter Valid MOE RULE and Press F6.

        Valid Entries: A MOE RULE registered on the displayed NSN.

        Results: Data for the requested MOE RULE will be returned to the screen.

(3)   Field Name: EFFECTIVE DATE

        Entry Requirement: The Julian Date the transaction is to be effective.

        Valid Entries: A numeric date 0-9.

        Results: The cursor will move to the next input field.

(4)   Field Name: SUPPL-RCVR

        Entry Requirement: Place an 'X' next to one or more SUPPLEMENTAL RECEIVERS.

        Valid Entries: 'X'.

        Results: The tagged SUPPLEMENTAL RECEIVER(S) will be deleted if F6 is pressed or other Data Elements can be deleted as well.

(5)   Field Name: SUPPL-COLL

        Entry Requirement: Place an 'X' next to one or more SUPPLEMENTAL COLLABORATORS.

        Valid Entries: 'X'.

        Results: The tagged SUPPLEMENTAL COLLABORATOR(S) will be deleted if F6 is pressed or other Data Elements can be deleted as well.

(6)   Field Name: DEPOT SOURCE OF REPAIR

        Entry Requirement: Place an 'X' next to one or more DEPOT SOURCE OF REPAIR.

        Valid Entries: 'X'.

Results: The tagged DEPOT SOURCE OF REPAIR(S) will be
                            deleted if F6 is pressed as well as the other tagged Data
                            Elements.

   c. Available Function Keys. The following unique function keys may be used from the
DELETE MOE RULE DATA screen. All standardized FLIS function keys are available.
Refer to Section 16.3.2.e of this document.

   F5   Cancel   Cancels current search and returns to the LOLA
                            Update Main Menu.
   F6   PROCESS   Validate the data input on the screen and process
                            the transaction.

<MSG 2291> ENTER CRITERIA AND PRESS PF6 TO COMMIT

F1=HELP     F2=CLEAR SCR F3=LOLA MENU F4=MAIN MENU F5=CANCEL    F6=PROC SCREEN
F7=PAGE UP  F8=PAGE DOWN F9=DLT ROW   F10=         F11=         F12=PROC TRANS
```

a. Screen Explanation. This screen is used to Add, Change, or Delete Reference Number Data. To view Reference Data that is assigned to the submitted NIIN use the F7 and F8 keys to page through Reference Numbers. After entering data use F6 to process screen, then press the appropriate F key for the processing desired. If more Reference Numbers are required press F8 and repeat this process as necessary. Once all the reference number transactions have been entered press F12. If you want to delete a Reference Number and associated data that was previously entered on this transaction use F7/F8 until the desired data is displayed on the screen then press F9. (NOTE: F2 onlys clears the screen, it will not delete the data from the transaction, you must use F9-DLT SCRN.)

b. Field Entry Requirements. The valid entries are described below.

(1) Field Name: CAGE CODE
    Entry Requirement: Enter the appropriate CAGE CODE.
    Valid Entries: A valid CAGE CODE must be entered.
    Results: The cursor will move to next input field.

(2) Field Name: REFERENCE NUMBER
    Entry Requirement: Enter the appropriate REFERENCE NUMBER.
    Valid Entries: A valid Reference Number (the first position cannot be blank).
    Results: The cursor will be positioned on the next field or TAB to next field.

(3) Field Name: RNCC
    Entry Requirement: Enter the appropriate RNCC.
    Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
    Results: The cursor will move to next field.

(4) Field Name: RNVC
    Entry Requirement: Enter the appropriate RNVC.
    Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
    Results: The cursor will move to the next input field.

(5)   Field Name: DAC

        Entry Requirement: Enter the appropriate DAC.

        Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

        Results: The cursor will move to next input field.

(6)   Field Name: RNAAC

        Entry Requirement: Enter the appropriate RNAAC.

        Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

        Results: The cursor will move to next input field.

(7)   Field Name: RNFC

        Entry Requirement: Enter the appropriate RNFC.

        Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

        Results: The cursor will move to the next input field.

(8)   Field Name: RNSC

        Entry Requirement: Enter the appropriate RNSC.

        Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

        Results: The cursor will move to the next input field.

(9)   Field Name: RNJC

Entry Requirement: Enter the appropriate RNJC.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will move to the next input field.

(10) Field Name: SADC

  Entry Requirement: Enter the appropriate SADC

  Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

  Results: The cursor will move to the next input field.

  c. Available Function Keys. The following unique function keys may be used from the REFERENCE NUMBER DATA screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the LOLA Update Main Menu.
F6	PROC SCREEN	Validate the data input on the screen. This key must be used prior to submitting the transaction.
F7	PREV REF	Displays the first Reference Number input for this transaction if the screen is blank. If data has been entered and F6 pressed, the previous input will be displayed.
F8	NEXT REF	Clears the input fields and allows another reference number to be input. If you were paging up (F7), it will take you to the next record.
F9	DLT SCRN	Deletes the data displayed on the screen and displays the next record, unless it was the last record in which case it will display a blank screen.
F12	PROC TRANS	This will create the transaction and send the user to the next input screen/menu.

<MSG 2527> ENTER DATA INTO REPLACEMENT AND REPLACED DATA FIELDS
<MSG 2532> PF6 (PROCESS SCREEN), PF12 (PROCESS TRANSACTION), OR PF5 (CANCEL)
F1=HELP     F2=CLEAR SCR F3=LOLA MENU F4=MAIN MENU F5=CANCEL  F6=PROC SCREEN
F7= PAGE UP  F8= PAGE DOWN F9=          F10=             F12= PROC TRANS
```

a. Screen Explanation. Only REPLACEMENT NSN's are allowed to utilize this screen to create an LAS or LDS transaction. If you entered a REPLACED NSN on the Build Header Screen and wanted to create an LDS transaction, the NSN that was entered has been overlaid with the proper REPLACEMENT NSN. If this is not a valid situation press F5 to exit and try the STANDARDIZATION DATA option. If a LAS is required, input required data into the fields. If an LDS is required place an 'X' in the TAG Field corresponding to the NSN that is to be deleted from this relationship. Use F7/F8 to view additional screens. You must use F6 prior to paging up or down or processing the transaction.

b. Field Entry Requirements. The valid entries are described below.

(1)   Field Name: TAG

Entry Requirement: For LDS transactions only. Used to indicate which NSN is to be deleted for LDS transactions.

Valid Entries: 'X'.

Results: The cursor is moved to the next input field.

(2)   Field Name: REPLACED NSN

Entry Requirement: A valid NSN.

Valid Entries: An NSN.

Results: The cursor will be moved to the next input field.

(3)   Field Name: ISC

Entry Requirement: A valid ITEM STANDARDIZATION CODE.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will be moved to the next input field.

(4)   Field Name: ORIG STDZN DEC

Entry Requirement: A valid ORIGINATOR STANDARDIZATION DECISION CODE.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will be moved to the next input field.

(5)   Field Name: STDZN DEC DATE
      Entry Requirement: A valid STANDARDIZATION DECISION DATE.
      Valid Entries: The Julian date that the Standardization decision was
                                    made.
      Results: The cursor will be move to the next input field, or press
                                    F6 to save the data that has been input on the screen.

    c. Available Function Keys. The following unique function keys may be used from the
STANDARDIZATION RELATIONSHIP DATA screen. All standardized FLIS function keys
are available. Refer to Section 16.3.2.e of this document.

  F5   Cancel   Cancels current search and returns to the LOLA
                                  Update Main Menu.
  F6   PROC SCREEN   Validate the data input on the screen. This key
                                  must be used prior to submitting the transaction.
  F7   PAGE UP   To view the previous screens data.
  F8   PAGE DOWN   To view/input the next screens data.
  F12 PROC TRANS   This will create the transaction and send the user
                                  to the next input screen/menu.

A.87 LOLDDA - Delete Item Identification Data Screen

```

a. Screen Explanation. This screen will create an LDD transaction against the Item Identification Data Group.

b. Field Entry Requirements. The valid entries are described below.

(1)   Field Name: ADPEC

        Entry Requirement: Enter the appropriate ADPEC.

        Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

        Results: The LDD transaction is now ready to be submitted.

c. Available Function Keys. The following unique function keys may be used from the DELETE ITEM IDENTIFICAITON DATA screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	Cancel	Cancels current search and returns to the LOLA Update Main Menu.
F6	PROCESS	Validate the data input on the screen and process the transaction.

                        OR     (DEFAULT)

             _    ADD JTC RELATIONSHIP GROUP

<MSG 2592> ENTER MOE/MAC, EFF DATE AND PLACE A "X" NEXT TO REQUIRED OPTION
<MSG 0534> PRESS PF6 TO PROCESS
F1=HELP       F2=CLEAR SCR F3=LOLA MENU F4=MAIN MENU F5=CANCEL    F6=PROCESS
F7=           F8=          F9=          F10=         F11=         F12=
```

a. Screen Explanation. This screen allows the user to select the appropriate Catalog Management Data for their LAD Transaction. If Service Related CMD Data is selected the user will be automatically transferred to their Service Management Control Data.

b. Field Entry Requirements. The valid entries are described below.

(1) Field Name: MOE/MAC
     Entry Requirement: User may leave the MOE/MAC displayed or change to another valid MOE/MAC. If no change Tab to next field.
     Valid Entries: A list of valid MOE Codes can be viewed by positioning the cursor on the input field and pressing F1 for Help. A definition and valid values will display. Position cursor next to required value and use "sticky cursor". The selected value will be placed in the field automatically.
     Results: Cursor will move to next input field or use Tab key.

(2) Field Name: EFFECTIVE DATE
     Entry Requirement: Enter the Julian Date the transaction is to process.
     Valid Entries: A valid Julian Date: all numerics (0-9).
     Results: Cursor will be moved to next field on the screen.

(3) Field Name: ADD SERVICE RELATED CMD DATA
     Entry Requirement: Place the cursor next to option and press F6.
     Valid Entries: No entry is required.
     Results: The appropriate Add Service Management Data Element screen will be displayed.

(4) Field Name: ADD PHRASE RELATIONSHIP GROUP
     Entry Requirement: Place cursor next to this option and press F6.
     Valid Entries: No entry is required.
     Results: Receive 'ADD PHRASE RELATIONSHIP' screen.

(5) Field Name: ADD PHRASE (TECHNICAL DOCUMENT NUMBER) ONLY
     Entry Requirement: Place cursor next to this option and press F6.
     Valid Entries: No entry is required.
     Results: Receive 'ADD TECHNICAL DOCUMENT NUMBER' screen.

(6) Field Name: ADD JTC RELATIONSHIP GROUP
     Entry Requirement: Place cursor next to this option and press F6.
     Valid Entries: No entry is required.

Results: Receive 'ADD JTC RELATIONSHIP' screen.

   c. Available Function Keys. The following unique function keys may be used from the
ADD CATALOG MANAGEMENT DATA screen. All standardized FLIS function keys are
available. Refer to Section 16.3.2.e of this document.

   F5   Cancel   Cancels current search and returns to the LOLA
                                  Update Main Menu.
   F6   PROCESS   Validate the data input on the screen and process
                                  the transaction.

a. Screen Explanation. This screen is used to Change Management Data using the LCD transaction. Fill in the field(s) that are to be changed and press F6, then F12. A LCD transaction will be created for each field that has a valid entry.

b. Field Entry Requirements. The valid entries are described below.

(1) Field Name: EFFECTIVE DATE
     Entry Requirement: Automatically entered from previous screen.
     Valid Entries: N/A
     Results: N/A

(2) Field Name: MOE/MAC CODE
     Entry Requirement: Automatically entered from previous screen.
     Valid Entries: N/A
     Results: N/A

(3) Field Name: ACQUISITION ADVICE CODE
     Entry Requirement: Enter the appropriate ACQUISITION ADVICE CODE.
     Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
     Results: A LCD transaction will be sent to update the selected NIIN. The other fields can also be entered if desired. If other fields are entered, then separate transactions will be created.

(4) Field Name: SOURCE OF SUPPLY/SOSM CD
     Entry Requirement: Enter the appropriate SOURCE OF SUPPLY or SOURCE OF SUPPLY MODIFIER CODE.
     Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically. There will be no valid values available for the Source of Supply Modifier.
     Results: A LCD transaction will be sent to update the selected NIIN. The other fields can also be entered if desired. If other fields are entered, then separate transactions will be created.

(5)   Field Name: UNIT OF ISSUE CD

          Entry Requirement: Enter the appropriate UNIT OF ISSUE CODE.

          Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

          Results: A LCD transaction will be sent to update the selected NIIN. The other fields can also be entered if desired. If other fields are entered, then separate transactions will be created.

(6)   Field Name: QUANTITY UNIT PACK CODE

          Entry Requirement: Enter the appropriate QUANTITY UNIT PACK CODE.

          Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

          Results: A LCD transaction will be sent to update the selected NIIN. The other fields can also be entered if desired. If other fields are entered, then separate transactions will be created.

(7)   Field Name: CONTROLLED INVENTORY ITEM CODE

          Entry Requirement: Enter the CONTROLLED INVENTORY ITEM CODE.

          Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 HELP. While in HELP a definition and a list of values will appear. Place cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

          Results: A LCD transaction will be sent to update the selected NIIN. The other fields can also be entered if desired. If other fields are entered, then separate transactions will be created.

(8)   Field Name: SHELF LIFE CODE

          Entry Requirement: Enter the appropriate SHELF LIFE CODE.

| | Valid Entries: | Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically. |

Results: A LCD transaction will be sent to update the selected NIIN. The other fields can also be entered if desired. If other fields are entered, then separate transactions will be created.

(9) Field Name: PHRASE CODE
Entry Requirement: Enter the appropriate PHRASE CODE.
Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
Results: A LCD transaction will be sent to update the selected NIIN. The other fields can also be entered if desired. If other fields are entered, then separate transactions will be created.

(10) Field Name: UNIT PRICE
Entry Requirement: Enter the appropriate UNIT PRICE.
Valid Entries: A valid NUMERIC (0-9) Unit Price must be entered.
Results: A LCD transaction will be sent to update the selected NIIN. The other fields can also be entered if desired. If other fields are entered, then separate transactions will be created.

c. Available Function Keys. The following unique function keys may be used from the Change Management Data screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5 Cancel — Cancels current search and returns to the LOLA Update Main Menu.
F6 PROC SCREEN — Validate the data input on the screen.
F12 PROC TRANS — Forwards the transaction for processing.

a. Screen Explanation. This screen will be used to change the MOE RULE Data assigned to a particular NIIN.

b. Field Entry Requirements. The valid entries are described below.

(1)	Field Name:	MOE RULE
	Entry Requirement:	Enter the appropriate MOE RULE and press F6.
	Valid Entries:	A valid MOE RULE is required.
	Results:	The data associated with the input MOE will be returned to the screen.

(2)	Field Name:	EFF DATE
	Entry Requirement:	Enter the Julian Date that the transaction will be processed, required with NIMSC only.
	Valid Entries:	The field will not be displayed until the NIMSC is changed and F6 is processed.
	Results:	The appropriate transaction will be created if F6 is entered. The other fields can also be entered if required.

(3)	Field Name:	CIC
	Entry Requirement:	Enter the appropriate CARD IDENTIFICATION CODE, ITEM MANAGEMENT CODING and press F6 to process.
	Valid Entries:	Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
	Results:	A transaction will be sent to update the selected NIIN, if F6 is entered. The other fields may be changed prior to pressing F6.

(4)	Field Name:	AMC
	Entry Requirement:	Enter the appropriate ACQUISITION METHOD CODE and press F6 to process the update.
	Valid Entries:	Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
	Results:	A transaction will be sent to update the selected NIIN, if F6 is entered. The other fields may be changed.

(5)   Field Name: AMC SUF

Entry Requirement: Enter the appropriate ACQUISITION METHOD SUFFIX CODE and press F6 to process the update.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: Transaction will be sent to update the selected NIIN, if F6 is entered: The other fields may be changed.

(6)   Field Name: IMC

Entry Requirement: Enter the appropriate ITEM MANAGEMENT CODE and press F6 to process the update.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: A transaction will be sent to update the selected NIIN, if F6 is entered. The other fields may be changed.

(7)   Field Name: IMCA

Entry Requirement: Enter the appropriate ITEM MANAGEMENT CODING ACTIVITY and press F6 to process the update.

Valid Entries: A listing of valid Activity Codes can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: A transaction will be sent to update the selected NIIN, if F6 is entered. The other fields may be changed.

(8)   Field Name: DSOR

Entry Requirement: Enter the appropriate DEPOT SOURCE OF REPAIR and press F6 to process the update.

Valid Entries: A listing of valid Activity Codes can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: A transaction will be sent to update the selected NIIN, if F6 is entered. The other fields may be changed.

(9) Field Name: SUPPL-COLLBR

Entry Requirement: Enter the appropriate SUPPLEMENTAL COLLABORATOR and press F6 to process the update.

Valid Entries: A listing of valid Activity Codes can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: A transaction will be sent to update the selected NIIN, if F6 is entered. The other fields may be changed.

(10) Field Name: SUPPL-RCVR

Entry Requirement: Enter the appropriate SUPPLEMENTAL RECEIVER and press F6 to process the update.

Valid Entries: A listing of valid Activity Codes can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: A transaction will be sent to update the selected NIIN, if F6 is entered. The other fields may be changed.

c. Available Function Keys. The following unique function keys may be used from the CHANGE MOE RULE DATA screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5 Cancel Cancels current search and returns to the LOLA Update Main Menu.

F6 PROCESS Validate the data input on the screen and forward the transaction for processing.

```

a. Screen Explanation. This screen is used to change Freight data on a NIIN. The screen can be used for a 'LCD' transaction.

b. Field Entry Requirements. The valid entries are described below.

(1) Field Name: HZRD MTL
     Entry Requirement: Enter the appropriate HAZARDOUS MATERIAL CODE,
                             press F6 to process, or continue making changes.
     Valid Entries: Valid entries can be obtained by positioning the cursor on
                             the input field and pressing F1 for HELP. While in HELP
                             a definition and a list of Valid Values will appear. Position
                             the cursor next to the appropriate value and use the
                             "sticky cursor" option. The selected value will be entered
                             into the field automatically.
     Results: The appropriate transaction will be sent to update the
                             selected NIIN, if F6 is entered. The other fields can also
                             be entered if required.

(2) Field Name: LCL
     Entry Requirement: Enter the appropriate LESS THAN CARLOAD CODE,
                             press F6 to process, or continue making changes.
     Valid Entries: Valid entries can be obtained by positioning the cursor on
                             the input field and pressing F1 for HELP. While in HELP
                             a definition and a list of Valid Values will appear. Position
                             the cursor next to the appropriate value and use the
                             "sticky cursor" option. The selected value will be entered
                             into the field automatically.
     Results: The appropriate transaction will be sent to update the
                             selected NIIN, if F6 is entered. The other fields can also
                             be entered if required.

(3) Field Name: RAIL VAR
     Entry Requirement: Enter the appropriate RAIL VARIATION CODE, press F6
                             to process or continue making changes.
     Valid Entries: Valid entries can be obtained by positioning the cursor on
                             the input field and pressing F1 for HELP. While in HELP
                             a definition and a list of Valid Values will appear. Position
                             the cursor next to the appropriate value and use the
                             "sticky cursor" option. The selected value will be entered
                             into the field automatically.
     Results: The appropriate transaction will be sent to update the
                             selected NIIN, if F6 is entered. The other fields can also
                             be entered if required.

(4) Field Name: WATER CMDTY

Entry Requirement: Enter the appropriate WATER COMMODITY CODE, press F6 to process or continue making changes.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The appropriate transaction will be sent to update the selected NIIN, if F6 is entered. The other fields can also be entered if required.

(5) Field Name: TYPE CGO

Entry Requirement: Enter the appropriate TYPE OF CARGO CODE, press F6 to process or continue making changes.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The appropriate transaction will be sent to update the selected NIIN, if F6 is entered. The other fields can also be entered if required.

(6) Field Name: SPCL HDLG

Entry Requirement: Enter the appropriate SPECIAL HANDLING CODE, press F6 to process or continue making changes.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The appropriate transaction will be sent to update the selected NIIN, if F6 is entered. The other fields can also be entered if required.

(7) Field Name: AIR DIM

Entry Requirement: Enter the appropriate AIR DIMENSION CODE, press F6 to process or continue making changes.

| Valid Entries: | Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically. |
| Results: | The appropriate transaction will be sent to update the selected NIIN, if F6 is entered. The other fields can also be entered if required. |

(8) Field Name: AIR CMDTY

Entry Requirement: Enter the appropriate AIR COMMODITY CODE, press F6 to process or continue making changes.

Valid Entries: To obtain a definition of this field press F1. No table values are available for this field.

Results: The transaction will be sent to update the selected NIIN, if F6 is entered. The other fields can also be entered if required.

(9) Field Name: INTGTY CD

Entry Requirement: Enter the appropriate INTEGRITY CODE, press F6 to process or continue making changes.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The appropriate transaction will be sent to update the selected NIIN, if F6 is entered. The other fields can also be entered if required.

c. Available Function Keys. The following unique function keys may be used from the CHANGE FREIGHT DATA screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

```

a. Screen Explanation. This screen is used to delete a MOE RULE data group. The User inputs the effective date, the Deletion Reason Code and the MOE RULE of the data they wish to delete and presses F6 to process.

b. Field Entry Requirements. Valid entries are described below.

(1) Field Name: EFFECTIVE DATE
Entry Requirement: Enter the appropriate EFFECTIVE DATE.
Valid Entries: A valid Julian date (numeric 0-9). A definition of this field may be obtained by pressing F1.
Results: The cursor will be placed on the next input field.

(2) Field Name: DELETION REASON CODE
Entry Requirement: Enter a valid DELETION REASON CODE.
Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
Results: The cursor will be placed on the next input field.

(3) Field Name: MOE RULE
Entry Requirement: Enter a valid MOE RULE on the input NIIN.
Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
Results: Transaction is ready for processing, Press F6.

c. Available Function Keys. The following unique function keys may be used from the DELETE MOE RULE DATA screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5   Cancel   Cancels current search and returns to the LOLA Update Main Menu.

F6   PROCESS   Validate the data input on the screen and forward the transaction for processing.

a. Screen Explanation. This screen generates Data Element Deletion (LDD) transaction(s) for the selected sub groupings of the Management Data Group. If Service Related CMD Data is selected the appropriate Service Peculiar Data Screen will be displayed. The Delete I&S Jump To Relationship Grp can only be selected by itself, no other option will be available. Otherwise any or all of the remaining choices may be selected.

b. Field Entry Requirements. The valid entries are described below.

(1)   Field Name: MOE/MAC
       Entry Requirement: The MOE Code is used when there is only one (1) "line" of CMD Data recorded for the Users Service. The MAC is used when multiple "lines" of CMD Data are recorded for the Users Service.
       Valid Entries: Press F1 for help on the MOE Code; MS,SS.
       Results: The cursor will move to the next input field.

(2)   Field Name: EFFECTIVE DATE
       Entry Requirement: A valid Julian date for an Effective Dated Transaction or '00000' if you want the transaction to process now.
       Valid Entries: The 5 position Julian date or 5 '0s'.
       Results: The cursor will move to the next input field.

(3)   Field Name: DELETE SERVICE RELATED CMD DATA
       Entry Requirement: Input an 'X' in the field and press F6 or continue making selections.
       Valid Entries: 'X'.
       Results: The cursor will move to the next input field.

(4)   Field Name: DELETE PHRASE RELATIONSHIP GROUP
       Entry Requirement: Input an 'X' in the field and press F6 or continue making selections.
       Valid Entries: 'X'.
       Results: The cursor will move to the next input field.

(5)   Field Name: DELETE TECH DOC NUM OR DLA REPAIR CD
       Entry Requirement: Input an 'X' in the field and press F6.
       Valid Entries: 'X'.
       Results: The cursor will move to the next input field.

(6)   Field Name: DELETE I&S JUMP TO RELATIONSHIP
       Entry Requirement: Input an 'X' in the field and press F6 to process.
       Valid Entries: 'X'.

Results: The cursor will move to the next input field.

   c. Available Function Keys. The following unique function keys may be used from the DELETE CATALOG MANAGEMENT DATA screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F2	CLEAR SCREEN	Clears all input fields.
F5	Cancel	Cancels current search and returns to the LOLA Update Main Menu.
F6	PROCESS	Displays the next input screen or it will send the selected transaction to be processed by the Update Programs.

```

a. Screen Explanation. This screen is used to create transactions to add (LAM), change (LCM), or delete (LDM) data from the Catalog Management Data group. It is also used to input data for NIIN Assignment and Reinstatements (LN_) (LB_) transactions. Enter data into appropriate fields. Prompts and messages will indicate which field are required. (An '*' indicates data not available for field).

b. Field Entry Requirements. The valid entries are described below.

(1)	Field Name:	EFFECTIVE DATE
	Entry Requirement:	Enter the appropriate EFFECTIVE DATE
	Valid Entries:	Enter a Julian date that is equal to or greater than todays date. A definition of this field can be obtained by pressing F1.
	Results:	The cursor will be placed on the next input field.

(2)	Field Name:	MOE/MAC CODE
	Entry Requirement:	Enter the appropriate MOE/MAC code.
	Valid Entries:	Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically. MAC codes values are MS/SS.
	Results:	The cursor will be placed on the next input field.

(3)	Field Name:	ACQUISITION ADVICE CODE
	Entry Requirement:	Enter the appropriate ACQUISITION ADVICE CODE
	Valid Entries:	Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
	Results:	The cursor will be placed on the next input field.

(4)	Field Name:	SOURCE OF SUPPLY/SOSM CD
	Entry Requirement:	Enter the appropriate SOURCE OF SUPPLY or SOURCE OF SUPPLY MODIFIER CODE

Valid Entries: For the SOURCE OF SUPPLY CODE valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically. There will be no HELP available for the SOURCE OF SUPPLY MODIFIER.

Results: The cursor will be placed on the next input field.

(5) Field Name: UNIT OF ISSUE CD

Entry Requirement: Enter the appropriate UNIT OF ISSUE CODE

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will be placed on the next input field.

(6) Field Name: UNIT OF ISSUE CONVERSION FACTOR

Entry Requirement: Enter a valid UNIT OF ISSUE CONVERSION FACTOR

Valid Entries: A definition of this field can be obtained by pressing F1 (no table values will be displayed).

Results: The cursor will move to next input field.

(7) Field Name: UNIT PRICE

Entry Requirement: Enter the appropriate DOLLAR VALUE UNIT PRICE

Valid Entries: A definition of this field can be obtained by pressing F1 (no table values will be displayed).

Results: The cursor will move to the next input field.

(8) Field Name: QUANTITY PER UNIT PACK (QUP)

Entry Requirement: Enter the appropriate QUANTITY UNIT PACK (QUP).

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will move to the next input field.

(9) Field Name: CONTROLLED INVENTORY ITEM CODE

Entry Requirement: Enter a valid CONTROLLED INVENTORY ITEM CODE.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will move to the next input field.

(10) Field Name: SHELF LIFE CODE

Entry Requirement: Enter the appropriate SHELF LIFE CODE.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will move to the next input field.

(11) Field Name: DLA REPARABLE CHARACTERISTICS INDICATOR CODE

Entry Requirement: Enter the appropriate DLA REPARABLE CHARACTERISTICS INDICATOR CODE.

Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.

Results: The cursor will be positioned on the first input field. Press F6 to process the screen.

c. Available Function Keys. The following unique function keys may be used from the CATALOG MANAGEMENT DATA screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5 Cancel   Cancels current search and returns to the LOLA Update Main Menu.

F6 PROC SCREEN   Validate the data input on the screen; this key must be used prior to submitting the transaction.

F11 BYPASS   This key allows activities not required to input
                                     Catalog Management Data to 'bypass' this screen.
F12 PROC TRANS   This key creates the transaction and sends the user
                                     to the next input screen or menu.

F7=          F8=          F9=          F10=         F11=       F12=PROC TRANS
```

a. Screen Explanation. This screen is used to create transactions to ADD, CHANGE or DELETE data elements or the entire data group from the Army peculiar Catalog Management Data. It is also used for NIIN Assignments and Reinstatements. Screen prompts and messages will indicate if the field is required. If no data is entered do not use F6; use F12 only. If any data is entered, use F6 and F12 in that order. When reprocessing/correcting a transaction and a change is made in the Basic Catalog Management Data, all data on the service peculiar screen will be removed and must be re-input.

b. Field Entry Requirements. The valid entries are described below.

(1) Field Name: RECOVERABILITY CODE
     Entry Requirement: Enter the appropriate RECOVERABILITY CODE
     Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
     Results: The cursor will be positioned on the next input field or press F6 to process screen.

(2) Field Name: MATERIAL CATEGORY CODE
     Entry Requirement: Enter the appropriate MATERIEL CATEGORY CODE
     Valid Entries: A definition of this field can be obtained by pressing F1 (no table values will be displayed).
     Results: The cursor will be positioned on the next input field or press F6 to process screen.

(3) Field Name: ACCOUNTING REQUIREMENTS CODE
     Entry Requirement: Enter a valid ACCOUNTING REQUIREMENTS CODE
     Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear. Position the cursor next to the appropriate value and use the "sticky cursor" option. The selected value will be entered into the field automatically.
     Results: The cursor will be positioned on the first input field; or press F6 to process screen, then F12 to process transaction.

c. Available Function Keys. The following unique function keys may be used from the ARMY MANAGEMENT DATA screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5   Cancel   Cancels current search and returns to the LOLA
                                      Update Main Menu.
F6   PROC SCREEN   Validate the data input on the screen; this key
                                      must be used prior to submitting the transaction.
F12   PROC TRANS   This will create the transaction and send the user
                                      to the next input screen/menu. It is also used to
                                      bypass the screen, if no data is entered.

<MSG 2462> ADD VALUES AND PRESS PF6 TO PROCESS

F1=HELP      F2=CLEAR      F3=LOLA MENU F4=MAIN MENU F5=CANCEL   F6=PROC SCREEN
F7=PREV PHRASE DATA   F8=NEXT PHRASE DATA   F9=DLT PHRSE CODE     F12=PROC TRANS
```

a. Screen Explanation. Current DLIS Phrase DATA of the NSN will be Diplayed. This screen will generate up to 25 phrase codes on a single NSN. Enter the data into the required fields and press F6 again. If more then 25 Phrase codes are required press F8 (next Phrase) and repeat this procedure (up to 2 times). Once all of the phrase transactions are entered press F12 to process the transaction(s). If you want to delete a Phrase Code and associated data that was previously input tag DLT field with a X and then press F9. (NOTE: F2 onlys clears the screen, it will not delete the data from the transaction, you must use F9-PHRASE CODE.

b. Field Entry Requirements. The valid entries are described below.

(1)   Field Name: DLT
      Entry Requirement: Enter a X in field and press F9 to process the screen.
      Valid Entries: Valid entries can be obtained by positioning the cursor on the input field and pressing F1 for HELP. While in HELP a definition and a list of Valid Values will appear.
      Results: The input fields that are related to the input Phrase Code will be highlighted and the cursor will be positioned on the first Highlighted field.

(2)   Field Name: PHRS PHRASE CODE
      Entry Requirement: Enter the appropriate PHRASE CODE's and press F6 to process the screen.
      Valid Entries: See DoD 4100.39M Vol. 10 Table 52 Valid Input of Phrase Codes. For Help press F1 and definition of Phrase Codes will appear. If blank all Phrase Codes will appear and if filled only single phrase code will be displayed.
      Results: After entering F6, if F12 is used the transaction will be created. If F8 is entered, the next blank 25 phrase codes screen will be displayed

(3)   Field Name: PHRASE DATA
      Entry Requirement: Enter the appropriate Related phrase Data and press F6 to process the screen.
      Valid Entries: A valid PHRASE DATA is required.
      Results: After entering F6, if F12 is used the transaction will be created. If F8 is entered, after entering F6, the input fields will be cleared and another Phrase transaction can be created (up to 50 times).

(4)   Field Name: QUANTITY PER ASSEMBLY(QPA) JUMP TO CODE (JTC)

Entry Requirement: Enter the appropriate Quantity Per Assembly and press F6 to process the screen.

Valid Entries: A valid Quantity Per Assembly or JTC if required.

Results: After entering F6, if F12 is used the transaction will be created. If F8 is entered, after entering F6, the input fields will be cleared and another Phrase transaction can be created (up to 50 times).

(5)   Field Name: ORDER OF USE and UNIT OF MEASURE U/M.

Entry Requirement: Enter the appropriate Order Of Use and press F6 to process the screen.

Valid Entries: A valid Order Of Use required.

Results: After entering F6, if F12 is used the transaction will be created. If F8 is entered, after entering F6, the input fields will be cleared and another Phrase transaction can be created (up to 50 times).

(6)   Field Name: JUMP TO CODE

Entry Requirement: Enter the appropriate Jump To Code and press F6 to process the screen.

Valid Entries: A valid Jump To Code is required.

Results: After entering F6, if F12 is used the transaction will be created. If F8 is entered, after entering F6, the input fields will be cleared and another Phrase transaction can be created (up to 50 times).

(7)   Field Name: UNIT OF MEASURE

Entry Requirement: Enter the appropriate Unit Of Measure and press F6 to process the screen.

Valid Entries: A valid Unit Of Measure is required.

Results: After entering F6, if F12 is used the transaction will be created. If F8 is entered, after entering F6, the input fields will be cleared and another Phrase transaction can be created (up to 50 times).

c. Available Function Keys. The following unique function keys may be used from the PHRASE DATA screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5   CANCEL   Cancels the current transaction and returns to the LOLA Update Main Menu.

F6   PROC SCREEN   Validate the data input on the screen. This key
                           must be used prior to submitting the transaction.

F7   PREV PHRASE   Displays the first Phrase Transaction for this
                           session if the Phrase screen is blank. If data has
                           been entered, the previous input Phrase transaction
                           for this session will be displayed.

F8   NEXT PHRASE   Clears the input fields and allows another phrase
                           transaction to be created unless you were paging up
                           (F7) in which case it takes you to the next record.

F9   DEL PHRASE   Deletes the specific Phrase Transaction shown on
                           the screen and displays the next Phrase transaction
                           entered for this session, unless it was the last
                           transaction in which case it will display a blank
                           screen.

F12   PROC TRANS   This will create the transaction and send the user
                           to the next input screen/menu; or bypass this
                           screen if no data is input.

```

a. Screen Explanation. This screen is used to add or delete data. The only entries are the Related NSN and Jump To Code. All other data fields will be filled in with previous input values.

b. Field Entry Requirements. The valid entries are described below.

(1)   Field Name: EFFECTIVE DATE
      Entry Requirement: N/A
      Valid Entries: N/A
      Results: N/A

(2)   Field Name: MOE/MAC CODE
      Entry Requirement: N/A
      Valid Entries: N/A
      Results: N/A

(3)   Field Name: RELATED NSN
      Entry Requirement: A valid Related NSN
      Valid Entries: The Related NSN must be in an I&S relationship with the Input NSN.
      Results: The cursor will move to the next input field.

(4)   Field Name: I&S Jump To Code
      Entry Requirement: The Jump To Code associated with the Related NSN.
      Valid Entries: N/A
      Results: The transaction is ready to be processed.

c. Available Function Keys. The following unique function keys may be used from the Edit I&S Jump To Relationship Group screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	CANCEL	Cancels the current transaction and returns to the LOLA Update Main Menu.
F6	PROC SCREEN	Validates the data input on the screen; must use F6 prior to F12.
F12	PROC TRANS	Creates the transactions and forwards it for processing.

A.108 LOLSGV - Characteristics Data Screen

```
SCRNCD: LOLSGV            L O L A   U P D A T E        DATE: 03-OCT-00
USERID: XXXXXXX           CHARACTERISTICS DATA         TIME: 07:34

F7=PREV MRC  F8=NEXT MRC  F9=DEL SCRN  F10=PROC SCR F11=      F12=PROC TRANS
```

a. Screen Explanation. Characteristics has two methods of input, LOLSGV and LOLTXT these screens allows the User to input individually or input all of the MRC's on the text screen that are appropriate characteristics for their item. To ADD or CHANGE characteristics data, enter the MRC, MODE CODE, ISAC and REPLY if required. To DELETE a MRC and Reply, enter MRC only and press F6 or put a D on TAG Field. To DELETE all characteristics data, enter MRC 9118 and press F6. (NOTE: PAC NAME must not be input. The PAC NAME will be programmatically handled.) When all of the required data is entered on the screen press F6 to SAVE your input. Then press either F8 to enter more characteristics or F12 to process the transaction. If you want to delete characteristics data that was previously input put a C in the Tag Field and hit F6 to process the data.

b. Field Entry Requirements. The valid entries are described below.

(1)   Field Name: TAG Field
      Entry Requirement: C for Clear D for Delete
      Valid Entries: A C or D associated with the input.
      Results: The cursor will move to the next input field.
(2)   Field Name: MRC (MASTER REQUIREMENT CODE)
      Entry Requirement: A valid MRC.
      Valid Entries: A MRC associated with the input NIIN and related FIIG.
      Results: The cursor will move to the next input field.

(3)   Field Name: ISAC
      Entry Requirement: A valid ISAC combination.
      Valid Entries: ISACs associated with the input MRC.
      Results: The cursor will move to the next input field.
(4)   Field Name: MODE CODE
      Entry Requirement: A valid MODE CODE.
      Valid Entries: A MODE CODE associated with the input MRC.
      Results: The cursor will move to the next input field.

      Results: The cursor will move to the next input field.

(5)   Field Name: REPLY
      Entry Requirement: A valid CODED Reply for the input MRC/MODE CODE.
      Valid Entries: The values required for this field will be reflected in the FIIG that is being used to catalog this item.
      Results: Press F6 to save the data on this screen. Then either press F10 to submit another MRC which are to long for the MRC line than HIT F12 to submit the transaction for processing.

c. Available Function Keys. The following unique function keys may be used from the

CHARACTERISTICS DATA screen. All standardized FLIS function keys are available. Refer to Section 16.3.2.e of this document.

F5	CANCEL	Cancels the current transaction and returns to the LOLA Update Main Menu.
F6	PROC SCREEN	Validate the data input on the screen. This key must be used prior to submitting the transaction.
F7	PREV MRC	Allows the User to view the previous CHARACTERISTICS DATA screen. Under this option the Data Displayed can not be altered.
F8	NEXT MRC	Allows input of additional characteristics data.
F9	DLT SCRN	Deletes the specific MRC and reply displayed on the screen and displays the next MRC and reply entered for this session, unless it was the last record, in which case it will display a blank input screen.
F12	PROC TRANS	This will create the transaction and send the user to the next input screen/menu.

A.109 LOLCH6 - Change Quantitative Expression Screen

```

a. Screen Explanation. This is the first screen when Procedures Quick Information is selected from the procedures Quick Information Main Menu. It allows the End-User to select additional information about the listed sections.

b. Field Requirements. The valid field entries are described below.

(1)   Field Name: ACRONYMS
         Entry Requirement: None.
         Valid Entries: Tab to the selection field and press ENTER.
         Results: Transfers to the screen (PROACQ).

(2)   Field Name: DATA ELEMENT DEFINITIONS
         Entry Requirement: None.
         Valid Entries: Tab to the selection field and press ENTER.
         Results: Transfers to the Data Element Definitions screen (PROELD).

(3)   Field Name: EDIT/VALIDATION CRITERIA
         Entry Requirement: None.
         Valid Entries: Tab to the selection field and press ENTER.
         Results: Transfers to the Edit/Validation Inquiry screen (PROEVD).

(4)   Field Name: TABLE INQUIRY
         Entry Requirement: None.
         Valid Entries: Tab to the selection field and press ENTER.
         Results: Transfers to the Table Inquiry screen (PROTAB).

(5)   Field Name: RETURN CODES
         Entry Requirement: None.
         Valid Entries: Tab to the selection field and press ENTER.
         Results: Transfers to the Return Code Inquiry screen (PRORCI).

(6)   Field Name: DIC/SEGMENT FORMAT
         Entry Requirement: None.
         Valid Entries: Tab to the selection field and press ENTER.
         Results: Transfers to the DIC/Segment Format screen (PROFOR).

c. Available Function Keys. There are no unique function keys that may be used on the Quick Information screen. All standardized FLIS function keys are available.

A.112 PROTAB - Table Inquiry Screen

```
SCRNCD: PROTAB                   PROCEDURES                   DATE: 05-OCT-00
USERID: XXXXXXX                 TABLE INQUIRY                 TIME: 08:23
------------------------------------------------------------------------------

    ENTER ONE REQUEST ONLY: (PRESS PF5 FOR LIST OF TABLE NUMBERS AND NAMES)

    TABLE NUMBER: ___

    TABLE NAME:
                   _____
                   _____
                   _____
                   _____

<MSG 0660> ENTER TABLE NUMBER OR TABLE NAME AND PRESS <ENTER> KEY

F1=HELP      F2=CLEAR SCR F3=PREV MENU F4=MAIN MENU F5=NBR INDEX F6=NAME INDEX
F7=          F8=          F9=          F10=         F11=         F12=
```

a. Screen Explanation. The inquiry screen gives the user a choice of entering either the FLIS table number or FLIS table name. If the user does not know the correct table number or name he/she should press F5. By pressing F5 the user can scan an index list of table numbers and names. This screen can be displayed by positioning the cursor next to Table Inquiry on the Quick Information screen.

(1) To return to screen PROQIK (Quick Information) the user presses F3.

(2) The user may initiate another table number or name search by keying another number or name and pressing the Enter key.

b. Field Requirements. The valid field entries are described below.

(1)   Field Name: TABLE NUMBER
       Entry Requirement: Mandatory if Table Name not entered.
       Valid Entries: 3 digit numeric.
       Results: Transfers the End-User to the appropriate screen, based on the entry made.

(2)   Field Name: TABLE NAME
       Entry Requirement: Mandatory if Table Number not entered.
       Valid Entries: Alphabetical Name.
       Results: Transfers the End-User to the appropriate screen, based on the entry made.

c. Available Function Keys. The following unique function keys may be used from this screen. All standardized FLIS function keys are available. The screen's SCRNCD field or designated F keys must be used to exit this screen.

F5   NBR Index   Provides the user with an index list of table numbers and table names in numeric order.
F6   NAME Index   Same except in alphabetic order.

a. Screen Explanation. This Inquiry screen displays descriptive information pertaining to an input code value. This screen can be displayed by entering various input code values on the Table Inquiry Reply screen (PRORP8).

(1) If this search has more data than can be displayed in one screen, the user may page down by pressing the F8 key, and page up by pressing the F7 key.

(2) To return to screen PROQIK (Quick Information) the user presses F3.

b. Field Requirements. The valid field entries are described below.

(1)	Field Name:	ENTRY
	Entry Requirement:	Mandatory
	Valid Entries:	Alpha-numeric Value. The word 'ALL' to view the entire table.
	Results:	Displays appropriate information pertaining to entry code.

c. Available Function Keys. The following unique function keys may be used from this screen. All standardized FLIS function keys are available. The screen's SCRNCD field or designated F keys must be used to exit this screen.

F2	Clear Screen	Erase any tagged items and repositions the cursor to the top of the screen.
F5	Cancel	Transfers back to PROTAB.
F7	Page Up	Displays the prior page of the current Inquiry Reply being viewed.
F8	Page Down	Displays the next page of the current Inquiry Reply being viewed.
F9	Header	Transfers the user to screen PROAD2 (Table Additional Replies) for Headers.
F10	Trailer	Transfers the user to screen PROAD2 (Table Additional Replies) for Trailers.
F11	Notes	Transfers the user to screen PROAD1 (Table Additional Replies) for Notes.

a. Screen Explanation. This Inquiry screen displays descriptive information pertaining to an input code value. This screen can be displayed by entering various input code values on the Table Inquiry Reply screen (PROR18).

(1) If this search has more data than can be displayed in one screen, the user may page down by pressing the F8 key, and page up by pressing the F7 key.

(2) To return to screen PROQIK (Quick Information) the user presses F3.

(3) This screen is for the Next Part if applicable, when F12 is available.

b. Field Requirements. The valid field entries are described below.

(1)	Field Name:	ENTRY
	Entry Requirement:	Mandatory
	Valid Entries:	Alpha-numeric Value. The word 'ALL' to view the entire table.
	Results:	Displays appropriate information pertaining to entry code.

c. Available Function Keys. The following unique function keys may be used from this screen. All standardized FLIS function keys are available. The screen's SCRNCD field or designated F keys must be used to exit this screen.

F5	Cancel	Transfers back to PROTAB.
F7	Page Up	Displays the prior page of the current Inquiry Reply being viewed.
F8	Page Down	Displays the next page of the current Inquiry Reply being viewed.
F9	Definition	Transfers the user to screen PROAD2 (Table Additional Replies) for Headers.
F10	Trailer	Transfers the user to screen PROAD2 (Table Additional Replies) for Trailers.
F11	Notes	Transfers the user to screen PROAD1 (Table Additional Replies) for Notes.
F12	Next Part	If applicable. If a table has multiple parts then this F key is used to access additional data.

```

a. Screen Explanation. This Inquiry screen gives the user a choice of entering a DIC Format or segment. If the user does not know the correct DIC he/she should press F5. By pressing F5 the user can scan an index list of DICs. This screen can be displayed by positioning the cursor next to DIC/Segment Format on the Quick Information screen.

(1) To return to screen PROQIK (Quick Information) the user presses F3.

(2) The user may initiate DIC/Segment Format search by pressing F2 and entering a new DIC or Segment Format and pressing the ENTER key.

b. Field Requirements. The valid field entries are described below.

(1) Field Name: DIC
     Entry Requirement: Mandatory if segment not entered.
     Valid Entries: 3 character alphabetic.
     Results: Transfers the user to appropriate screen, based on the entry made.

(2) Field Name: MEDIA/FORMAT
     Entry Requirement: Mandatory
     Valid Entries: 8 character alphabetic.
     Results: In combination with either DIC or Segment transfers the user to the appropriate screen.

(3) Field Name: SEGMENT
     Entry Requirement: Mandatory if DIC not entered.
     Valid Entries: 1 character alphanumeric.
     Results: Transfers the user to appropriate screen, based on the entry made.

c. Available Function Keys. The following unique function keys may be used from this screen. All standardized FLIS function keys are available. The screen's SCRNCD field or designated F keys must be used to exit this screen.

F5   Index   Provides the user with an index list of DICs and titles in title order.

```

a. Screen Explanation: The inquiry screen gives the user a choice of entering one of the following search criteria: Master Requirement Code, MRC Usage Designator, FIIG, Keyword Group Code, Search Word(s) Keyword Modifier Statement or MRC Reply Table Code. This screen can be displayed by positioning the cursor next to MRC Requirements Table on the MRD Inquiry Menu screen.

    (1) To return to screen MRDINQ (MRD Inquiry Menu), the user presses F3.

    (2) The user may initiate another search by keying in another field.

  b. Field Requirements: The valid entry is described below.

(1)	Field Name:	MASTER REQUIREMENT CODE
	Entry Requirement:	Mandatory if other field entries are not used.
	Valid Entries:	4 digit alpha code.
	Results:	Transfers the End-User to the appropriate screen, based on the entry made.
(2)	Field Name:	MRC USAGE DESIGNATOR
	Entry Requirement:	Mandatory if other field entries are not used.
	Valid Entries:	Special character (*) that identifies the MRCs in a U.S. FIIG. A blank space indicates an inactive MRC or a NATO MRC.
	Results:	Transfers the End-User to the appropriate screen, based on the entry made.
(3)	Field Name:	FIIG
	Entry Requirement:	Mandatory if other field entries are not used.
	Valid Entries:	Alphanumeric code which identifies a Federal Item Identification Guide.
	Results:	Transfers the End-User to the appropriate screen, based on the entry made.
(4)	Field Name:	KEYWORD GROUP CODE
	Entry Requirement:	Mandatory if other field entries are not used.
	Valid Entries:	Numeric code which identifies the group and the keyword requirement statement used.
	Results:	Transfers End-User to the appropriate screen, based on the entry made.
(5)	Field Name:	SEARCH WORD(s), KEYWORD MODIFIER STATEMENT
	Entry Requirement:	Mandatory if other field entries are not used.

Valid Entries: Keyword or a requirement statement for an assigned Master Requirement Code (MRC).

Results: Transfers End-User to the appropriate screen, based on the entry made.

(6)   Field Name: MRC REPLY TABLE CODE

       Entry Requirement: Mandatory if other field entries are not used.

       Valid Entries: Alphanumeric code. Must be two alpha positions followed by two numeric positions.

       Results: Transfers End-User to the appropriate screen, based on the entry made.

c. Available Function Keys: All standardized FLIS function keys are available. The screen's SCRNCD field or designated F keys must be used to exit this screen.

a. Screen Explanation: This Inquiry Results screen displays descriptive results pertaining to an input code value. This screen can be displayed by entering various input code values on the Style Reply Table Inquiry Selection (MRDI3A) screen.

(1) If this search has more data than can be displayed in one screen, the user may page down by pressing the F8 key, and page up by pressing the F7 key.

(2) To return to screen MRDINQ (MRD Inquiry Menu) the user presses F3.

b. Field Requirements: The valid entry is described below.

(1)	Field Name:	TAG
	Entry Requirement:	Mandatory
	Valid Entries:	"X"
	Results:	Entering an "X" and pressing Enter will transfer the End-User to the appropriate screen, based on the selection.

b. Field Requirements: The fields on this screen are display fields and will display information based on previous entries made.

c. Available Function Keys: The following unique function keys may be used from this screen. All standardized FLIS function keys are available. The screen's SCRNCD field or designated F keys must be used to exit this screen.

F2	Clear Screen	Erases any tagged items and repositions the cursor to the top of the screen.
F5	INQ SEL	Transfers back to MRDI3A.
F6	Print	Prints the current page to the designated printer.
F7	Page Up	Displays the prior page of the Inquiry Reply being viewed.
F8	Page Down	Displays the next page of the Inquiry Reply being viewed.

a. Screen Explanation: The inquiry screen gives the user a choice of entering one of the following search criteria: FIIG, INC, MRC, ISAC Reply Table Code or ISAC Indicator Code. This screen can be displayed by positioning the cursor next to ISAC Control Table on the MRD Inquiry Menu screen.

   (1) To return to screen MRDINQ (MRD Inquiry Menu), the user presses F3.

   (2) The user may initiate another search by keying in another field.

b. Field Requirements: The valid entry is described below.

   (1)   Field Name: FIIG
          Entry Requirement: Mandatory if other field entries are not used.
          Valid Entries: A valid alphanumeric code which identifies a Federal Item Identification Guide (FIIG) in which the MRC will be used.
          Results: Transfers the End-User to the appropriate screen, based on the entry made.

   (2)   Field Name: INC
          Entry Requirement: Mandatory if other field entries are not used.
          Valid Entries: A five-digit numeric code.
          Results: Transfers the End-User to the appropriate screen, based on the entry made.

   (3)   Field Name: MRC
          Entry Requirement: Mandatory if other field entries are not used.
          Valid Entries: A four-digit alpha code.
          Results: Transfers the End-User to the appropriate screen, based on the entry made.

   (4)   Field Name: ISAC REPLY TABLE CODE
          Entry Requirement: Mandatory if other field entries are not used.
          Valid Entries: A four-digit numeric code.
          Results: Transfers End-User to the appropriate screen, based on the entry made.

   (5)   Field Name: ISAC INDICATOR CODE
          Entry Requirement: Mandatory if other field entries are not used.
          Valid Entries: The following are valid entries: Code "P" (optional ISAC), Code "M" (mandatory ISAC), Code "R" (relationship only), Code "W" (without) and a blank means no code and that ISAC is not applicable.

Results: Transfers End-User to the appropriate screen, based on the entry made.

c. Available Function Keys: All standardized FLIS function keys are available. The screen's SCRNCD field or designated F keys must be used to exit this screen.

```

a. Screen Explanation: This screen allows the End-User to perform a search for different types of statistics. The query responses include the following: Characteristics, FSG/FSC Item Name, Ammo Code, MOE Rule, Freight, NIIN, Part-Number Inquiry, CAGE Code, CAGE Name, INC, Item Name, CAGE Code/Part Number, Partial Part Number, CAGE Code/Partial Part Name and Combination. The responses to the CAGE Inquiry Counts are by the following categories: CAGE Code, Company Name, Zip Code, Phone Number, CEC, DUNS, ADP/CAO, Congressional District, SIC Code, SIC ZIP, SIC Phone, Tax ID, Replacement CAGE, Associated CAGE, Company Street, Company ZIP, Company Phone, Street Zip, Street Phone and Debarment Code. The total Inquires for all fields is also displayed.

　　(1) To return to screen STAMEN (Statistics Menu), the user presses F3.

　　(2) The user may initiate another search by keying in another field.

b. Field Requirements: Searches may be performed by a combination of fields or by a field with the julian date field. The julian date field must be filled in for any search. The valid field entries are described below.

(1)	Field Name:	DEPT (Department)
	Entry Requirement:	Optional - to be used if searching for Department Statistics.
	Valid Entries:	Two-digit code. May be alpha, numeric or alphanumeric. Must enter a date or date range to perform search.
	Results:	Performs search and statistics are displayed.
(2)	Field Name:	ACTVTY (Activity)
	Entry Requirement:	Optional - to be used if searching for Activity Code Statistics.
	Valid Entries:	Two to eight digit code. May be alpha, numeric or alphanumeric. Must be entered with a date or date range to perform search.
	Results:	Performs search for the date entered and statistics are displayed.
(3)	Field Name:	JUL-DATE/THRU (Julian date)
	Entry Requirement:	Mandatory for the JUL-DATE. The THRU field is optional.
	Valid Entries:	Julian date for either field. This is a five digit entry with the year first and then the day (i.e., 00300).
	Results:	Performs search for the date entered and statistics are displayed.
(4)	Field Name:	QUARTER

    Entry Requirement: Optional - to be used if searching for a specific
                                        quarter of statistics.
    Valid Entries: A one-digit numeric code (1-4). Must be entered
                                          with a date or date range to perform search.
    Results: Performs search and statistics are displayed.

(5)   Field Name: TYP (Type)
           Entry Requirement: Optional
           Valid Entries: A one-digit alpha or numeric code. Must be entered
                                          with a date or date range to perform search.
           Results: Performs search and statistics are displayed.

    c. Available Function Keys: All standardized FLIS function keys are available. The screen's SCRNCD field or designated F keys must be used to exit this screen.

```

a. Screen Explanation: This screen allows the End-User to perform a search for different types of statistics. The query responses include the following: Basic Reference, CAGE/ Supplier, ID, Reference Number, Freight, Coded Characteristics, Decoded Characteristics, MOE Coded, MOE Decoded, I&S, Standardization, Management/Phrase, Requisition, Packaging, Selected Elements and Transactions.

(1) To return to screen STAMEN (Statistics Menu), the user presses F3.

(2) The user may initiate another search by keying in another field.

b. Field Requirements: Searches may be performed by a combination of fields or by a field with the julian date field. The julian date field <u>must</u> be filled in for any search. The valid field entries are described below.

(1)	Field Name:	DEPT (Department)	
	Entry Requirement:	Optional - to be used if searching for Department Statistics.	
	Valid Entries:	Two-digit code. May be alpha, numeric or alphanumeric. Must enter a date or date range to perform search.	
	Results:	Performs search and statistics are displayed.	
(2)	Field Name:	ACTIVITY	
	Entry Requirement:	Optional - to be used if searching for Activity Code Statistics.	
	Valid Entries:	Two to six digit code. May be alpha, numeric or alphanumeric. Must be entered with a date or date range to perform search.	
	Results:	Performs search and statistics are displayed.	
(3)	Field Name:	JULIAN DATE FROM	
	Entry Requirement:	Mandatory for the From field. The THRU field is optional.	
	Valid Entries:	Julian date for either field. This is a five-digit entry with the year first and then the day (i.e., 00300).	
	Results:	Performs search for the date entered and statistics are displayed.	

c. Available Function Keys: All standardized FLIS function keys are available. The screen's SCRNCD field or designated F keys must be used to exit this screen.

F5   STATS by Type of Query   Transfers the End-User to the Statistics Counts By Type of Query screen

A.173 LOLUS1 - Statistics Counts For LOLA Update

```
SCRNCD: LOLUS1          LOGISTICS ON-LINE ACCESS          DATE: 05-OCT-00
USERID: XXXXXXX     STATISTICS COUNTS FOR LOLA UPDATE     TIME: 07:26
---------------------------------------------------------------------
   ENTER DATE AND ACTIVITY CD AND/OR DEPT AND ONE OF ANY OTHER FIELD. NIIN CAN
   ALSO BE SUBMITTED WITH DATE ALONE. STATS FOR FIELDS USER-ID THRU NIIN CAN
   BE PULLED FOR NINETY DAYS ONLY.
                          DATE: _____ TO _____   MONTHLY: _  (Y OR BLANK)

                   ACTIVITY CD: __

                          DEPT: __

                       USER-ID: _____

                           DIC: ___

                   DOC CTR NBR: _____

                          NIIN: _____

<MSG 0493> ENTER NEW CRITERIA AND PRESS <ENTER> KEY

F1=HELP      F2=CLEAR SCR F3=STAT MENU F4=MAIN MENU F5=
F7=          F8=          F9=          F10=         F11=          F12=PRT-SETUP
```

Queries and searches will be by Julian date, either by a single date or by range of Julian date. (example: 97300) With the addition of four new fields, the user can query by any two of the fields, i.e. ACTIVITY CD (AC) and USER-ID or ACTIVITY CD and DOC CTR NBR, or DEPT CODE (DC) and DIC.

To clarify: user has to have at least ACTIVITY CD (AC) or DEPT and one other of the new fields. The only exception to that is that they can query by NIIN only, or they can query by ACTIVITY CD and DEPT only. Detailed search is only valid for 90 days, any data older then 90 days will only show counts by AC.

The new program/screen will count total approved and disapproved giving a grand total. Also it will count rows that have identical information and show that on the screen. As an error code if more fields are filled than allowed: ENTERED TOO MANY FIELDS FOR DATE-RANGE SEARCH.

For further Help put cursor on SCRNCD LOLUPD or any input fields ACTIVITY CD (AC), USER-ID, ACTIVITY CD, DOC CTR NBR, DEPT CODE and DIC and hit F1.

	Results:	Press F6 to save the data on this screen. Then either press F8 to submit another MRC or F12 to submit the transaction for processing. You must always use PF6 then PF12 when data is input on the screen, except when using PF6 then PF7 or PF8.

   c. Available Function Keys. The following unique function keys may be used from the CHARACTERISTICS DATA screen. All standardized FLIS System function keys are avail-

able. Refer to Section 16.03.02.e of this document.

F5	CANCEL	Cancels the current transaction and returns to the LOLA Update Main Menu.
F6	PROC SCREEN	Validate the data input on the screen. This key must be used prior to submitting the transaction.
F7	PAGE UP	Allows the User to view the previous Packaging DATA screen. Under this option the Data Displayed cannot be altered.
F8	PAGE DOWN	Allows user to view additional Packaging Data.
F9	FILE DATA	Displays Current Data for Packaging
F12	PROC TRANS	This will create the transaction and send the user to the next input screen/menu.

(29)	Field Name:	PACKAGING DESIGN ACTIVITY CODE
	Entry Requirement:	Hit PF1 for Help
	Valid Entries:	See DoD 4100.39-M Vol.12 For valid reference, after input
	Results:	The cursor will move to the next input field
	Results:	Press F6 to save the data on this screen. Then either press F8 to submit another MRC or F12 to submit the transaction for processing. You must always use PF6 then PF12 when data is input on the screen, except when using PF6 then PF7 or PF8.

c. Available Function Keys. The following unique function keys may be used from the CHARACTERISTICS DATA screen. All standardized DLIS Modernization System function keys are available. Refer to Section 16.03.02.e of this document.

F5	CANCEL	Cancels the current transaction and returns to the LOLA Update Main Menu.
F6	PROC SCREEN	Validate the data input on the screen. This key must be used prior to submitting the transaction.
F7	PAGE UP	Allows the User to view the previous Packaging DATA screen. Under this option the Data Displayed cannot be altered.
F9	FILE DATA	Displays Current Data for Packaging
F10	NEXT SCRN/PREV	Page up or down
F12	PROC TRANS	This will create the transaction and send the user to the next input screen/menu.

APPENDIX B - Error Messages and Recovery

This appendix details error and informational messages used by the LOLA application, identified by a unique four digit number (ID No.). The description or message text provides information as to the nature of an error or failure and any action to be taken. Also furnished is information regarding the source of the message (i.e., why the message has appeared) and any corrective action to be taken by the user.

1. **Message:** MOVE CURSOR TO DESIRED OPTION THEN PRESS <ENTER>
    Source: Message received when viewing a new menu.
    Corrective Action: None.

2. **Message:** INVALID OPTION
    Source: When an invalid key for that screen is hit.
    Corrective Action: None.

3. **Message:** OPTION NOT AVAILABLE AT THIS TIME
    Source: From the Main Menu screen when an option is chosen and that option is not yet operational.
    Corrective Action: None.

4. **Message:** CURSOR TO OPTION OR ENTER SEARCH CRITERIA
    Source: Message received when viewing an Index screen.

    Corrective Action: None. Message states that you need to move the cursor to the Index pick of your choice and then hit <ENTER> to view that selection or to use the Search field to find the desired data.

5. **Message:** MORE
    Source: When more data exists.
    Corrective Action: Press F8 (Page Down) to view data.

6. **Message:** TOP OF PAGE
    Source: The user has pressed F7 (Page Up) and is at the top of the data currently being viewed.
    Corrective Action: None.

7. **Message:** BOTTOM OF PAGE
    Source: The user has pressed F8 (Page Down) and is at the bottom of the data currently being viewed.
    Corrective Action: None.

8. **Message:** USE THE PF KEYS TO NAVIGATE THROUGH THE NEXT
    Source: Initial message when entering a text screen.
    Corrective Action: None.

9.   **Message:** USE F7 TO SCROLL UP

   Source: User pressed F7 (Page Up) and is already at top of data being viewed.

   Corrective Action: None.

10.   **Message:** FIRST RECORD

   Source: User pressed F11 to view a previous record and is already at the first record found in the search.

   Corrective Action: None.

11.   **Message:** LAST RECORD

   Source: User pressed F12 to view the next record and is already at the last record found in the search.

   Corrective Action: None.

12.   **Message:** INVALID SEARCH REQUEST XXXXXX REENTER SEARCH CRITERIA

   Source: User entered an invalid character in the search field.

   Corrective Action: Re-enter a valid search criteria; i.e., a word or group of words with no special characters or an equals sign followed by a number to search for a section (=xxxx).

13.   **Message:** SECTION XXXXX NOT FOUND IN DATABASE

   Source: When a section is requested with an equals sign and a section number (=3.1.1) and the requested section is not found on the database.

   Corrective Action: Re-enter a new number or tab to the sections as they appear on the screen and press <ENTER>.

14.   **Message:** NO ASSOCIATED DATA FOR THIS SECTION

   Source: While in the Text screen, F5 was pressed and no Associated Data was found.

   Corrective Action: None.

15.   **Message ID No. and Description:** 0490 CALLED PROGRAM NOT YET OPERATIONAL

   Source: The desired software unit is not yet operational.

   Corrective Action: None.

   Message ID No. and Description: 0491 NO MATCHES FOUND - ENTER NEW CRITERIA

   Source: No matching data for has been found for the item selected.

   Corrective Action: Enter new data or selection criteria.

17.   **Message ID No. and Description:** 0492 ENTER CRITERIA AND PRESS <ENTERKEY>

   Source: No selection data or selection criteria has been entered.

   Corrective Action: Enter data or selection criteria to be used and press the <ENTER> key.

18.   **Message ID No. and Description:** 0493 ENTER NEW CRITERIA AND PRESS <ENTER> KEY

Source: No item data/information has been found for the desired item.

Corrective Action: Enter new data or selection criteria to be used and press the <ENTER> key.

19. **Message ID No. and Description:** 0494 ENTER VALID CRITERIA

Source: Invalid data or selection criteria has been entered.

Corrective Action: Enter new data or selection criteria to be used.

20. **Message ID No. and Description:** 0495 PRESS <ENTER> KEY TO PROCESS

Source: Processing has not been initiated.

Corrective Action: Press the <ENTER> key.

21. **Message ID No. and Description:** 0496 PF KEY PRESSED IS NOT ACTIVE

Source: An F or PF key that is not active for the screen being used has been pressed.

Corrective Action: Select another PF key.

22. **Message ID No. and Description:** 0497 NOT AUTHORIZED TO VIEW DATA FOR HIGHLIGHTED FIELDS; RE-ENTER

Source: The requesting individual does not have proper authorization or clearance to view certain data/information as indicated by the highlighted fields on the screen.

Corrective Action: Press the <ENTER> key or re-enter appropriate data for another desired item.

23. **Message ID No. and Description:** 0498 ACCESS TO FSG/FSC ENTERED IS NOT AUTHORIZED; RE-ENTER

Source: The requesting individual does not have the proper authorization or clearance to access data/information for the selected FSG/FSC.

Corrective Action: Press the <ENTER> key or re-enter appropriate data for another desired item.

24. **Message ID No. and Description:** 0499 ACCESS TO CAGE CODE ENTERED IS NOT AUTHORIZED; RE-ENTER

Source: The requesting individual does not have the proper authorization or clearance to access data/information for the selected CAGE Code.

Corrective Action: Press the <ENTER> key or re-enter appropriate data for another desired item.

25. **Message ID No. and Description:** 0500 ACCESS TO NIIN ENTERED IS NOT AUTHORIZED; RE-ENTER

Source: The requesting individual does not have the proper authorization or clearance to access data/information for the selected NIIN.

Corrective Action: Press the <ENTER> key or re-enter appropriate data for another desired item.

26.   **Message ID No. and Description:** 0501 ACCESS TO INC ENTERED IS NOT AUTHORIZED; RE-ENTER

Source: The requesting individual does not have the proper authorization or clearance to access data/information for the selected INC.

Corrective Action: Press the <ENTER> key or re-enter appropriate data for another desired item.

27.   **Message ID No. and Description:** 0502 INC NOT FOUND - ENTER NEW CRITERIA

Source: No INC has been found for the desired item.

Corrective Action: Enter new data or selection criteria to be used.

28.   **Message ID No. and Description:** 0503 ITEM NAME MUST HAVE AT LEAST 3 CHARACTERS; RE-ENTER

Source: The Item Name entered is less than the three character minimum required to locate it in the database.

Corrective Action: Enter at least three characters of the Item Name.

29.   **Message ID No. and Description:** 0504 A COMPLETE INC MUST BE ENTERED; RE-ENTER

Source: A complete INC has not been entered.

Corrective Action: Enter a complete INC.

30.   **Message ID No. and Description:** 0505 KEYWORD MUST HAVE AT LEAST 3 CHARACTERS; RE-ENTER

Source: The Keyword entered is less than the three character minimum required to locate it in the database.

Corrective Action: Enter at least three characters of the Keyword.

31.   **Message ID No. and Description:** 0506 FIIG MUST HAVE AT LEAST 4-6 CHARACTERS; RE-ENTER

Source: The FIIG entered is less than the four character minimum required to locate it in the database.

Corrective Action: Enter at least four to six characters of the FIIG.

32.   **Message ID No. and Description:** 0507 PN MUST HAVE AT LEAST 1 CHAR (ONLY CHAR CANNOT BE '?'; RE-ENTER

Source: No character has been entered to locate a PN in the database; if a single character is entered it cannot be a question mark ('?').

Corrective Action: Enter at least one character of the PN.

33.   **Message ID No. and Description:** 0508 A COMPLETE NUMERIC FSG OR FSC MUST BE ENTERED; RE-ENTER

Source: A complete numeric FSG or FSC has not been entered.

Corrective Action: Enter a complete numeric FSG or FSC.

34. **Message ID No. and Description:** 0509 A COMPLETE NIIN MUST BE ENTERED; RE-ENTER
Source: A complete NIIN has not been entered.
Corrective Action: Enter a complete NIIN.

35. **Message ID No. and Description:** 0510 IF A NIIN IS ENTERED, OTHER CRITERIA CANNOT BE ENTERED; RE-ENTER
Source: A NIIN, along with other criteria, has been entered for processing.
Corrective Action: Remove all other criteria except the NIIN.

36. **Message ID No. and Description:** 0511 BOTH CAGE CODE AND CAGE NAME CANNOT BE ENTERED; RE-ENTER
Source: Both a CAGE Code and the CAGE Name have been entered for processing.
Corrective Action: Enter either the CAGE Code or the CAGE Name, but not both.

37. **Message ID No. and Description:** 0512 BOTH INC AND ITEM NAME CANNOT BE ENTERED; RE-ENTER
Source: Both a INC and the Item Name have been entered for processing.
Corrective Action: Enter either the INC or the Item Name, but not both.

38. **Message ID No. and Description:** 0513 BOTH CAGE NAME AND ITEM NAME CANNOT BE ENTERED; RE-ENTER
Source: Both a CAGE Name and the Item Name have been entered for processing.
Corrective Action: Enter either the CAGE Name or the Item Name, but not both.

39. **Message ID No. and Description:** 0514 ENTER AT LEAST ONE CRITERIA AND PRESS <ENTER> KEY
Source: No criteria has been entered for processing.
Corrective Action: Enter at least one criteria and press the <ENTER> key.

40. **Message ID No. and Description:** 0515 ONLY ONE CRITERIA MAY BE ENTERED; RE-ENTER
Source: More than one criteria has been entered for processing.
Corrective Action: All but one of the criteria must be removed.

41. **Message ID No. and Description:** 0516 INVALID COMBINATION OF CRITERIA ENTERED; RE-ENTER
Source: The criteria entered is not compatible for processing.
Corrective Action: Remove incompatible criteria and attempt to re-process.

42. **Message ID No. and Description:** 0517 THIS NIIN IS PROPRIETARY PROTECTED; RE-ENTER

    Source: The NIIN that has been entered or selected is a proprietary item.

    Corrective Action: Select/enter a new NIIN.

43. **Message ID No. and Description:** 0518 CAGE NAME MUST HAVE AT LEAST 3 CHARACTERS; RE-ENTER

    Source: The CAGE Name entered is less than the three character minimum required to locate it in the database.

    Corrective Action: Enter at least three characters of the CAGE Name.

44. **Message ID No. and Description:** 0519 A COMPLETE CAGE CODE MUST BE ENTERED; RE-ENTER

    Source: A complete CAGE Code has not been entered.

    Corrective Action: Enter a complete CAGE Code.

45. **Message ID No. and Description:** 0520 PRESS APPROPRIATE PF KEY FOR THE PROCESSING DESIRED

    Source: A F key has been selected that is not appropriate for the software unit/screen displayed.

    Corrective Action: Select another F key.

46. **Message ID No. and Description:** 0521 PICK ONE OR MORE ITEMS AND PRESS APPROPRIATE PF KEY

    Source: No item selection has been made.

    Corrective Action: One or more items must be selected and the appropriate F key pressed for the software unit/screen in use.

47. **Message ID No. and Description:** 0522 NO ITEMS SELECTED - SELECT AT LEAST ONE ITEM

    Source: No item selection has been made.

    Corrective Action: At least one item must be selected.

48. **Message ID No. and Description:** 0523 PICK ONE OR MORE MRCs AND PRESS APPROPRIATE FUNCTION KEY

    Source: No MRC selection has been made.

    Corrective Action: One or more MRCs must be selected and the appropriate F key pressed for the software unit/screen in use.

49. **Message ID No. and Description:** 0524 NO MRCs SELECTED - SELECT AT LEAST ONE MRC

    Source: No MRC selection has been made.

    Corrective Action: At least one MRC must be selected.

50. **Message ID No. and Description:** 0525 SELECT AN FSG TITLE AND PRESS APPROPRIATE PF KEY

    Source: No FSG Title selection has been made.

    Corrective Action: An FSG Title must be selected and the appropriate F key pressed for the software unit/screen in use.

51.   **Message ID No. and Description:** 0528 ENTER 'X' TO SELECT DATA
        VIEWS

        Source: An 'X' has not been entered in the selection field.

        Corrective Action: Place an 'X' in the selection field to view data for
        the appropriate item.

52.   **Message ID No. and Description:** 0530 ENTER CHANGES - PRESS
        APPROPRIATE PF KEY TO CONTINUE

        Source: Data changes have not been entered.

        Corrective Action: Key in data changes and press the appropriate F
        key for the software unit/screen in use.

53.   **Message ID No. and Description:** 0531 ENTER ONE CRITERIA AND
        PRESS <ENTER> KEY

        Source: Criteria has not been entered.

        Corrective Action: Key in criteria and press the <ENTER> key.

54.   **Message ID No. and Description:** 0532 ENTER ONLY ONE
        CRITERIA; RE-ENTER

        Source: More than one criteria has been entered.

        Corrective Action: Remove all but one criteria and re-initiate
        processing.

55.   **Message ID No. and Description:** 0533 ENTER 'C', 'P', OR 'D' FOR
        OUTPUT MEDIA; RE-ENTER

        Source: A key other than 'C', 'P', or 'D' has been pressed in an effort to
        produce output.

        Corrective Action: Select an output media by pressing either 'C'(CRT),
        'P'(Printer), or 'D'(Download).

56.   **Message ID No. and Description:** 0534 PRESS F6 TO PROCESS

        Source: A key other than F6 has been pressed.

        Corrective Action: Press the F6 key to initiate processing.

57.   **Message ID No. and Description:** 0535 ACCESS TO FSG ENTERED
        IS NOT AUTHORIZED

        Source: The requesting individual does not have the proper
        authorization or clearance to access data/information for the selected
        FSG.

        Corrective Action: Enter another FSG.

58.   **Message ID No. and Description:** 0536 ACCESS TO FSC ENTERED
        IS NOT AUTHORIZED

        Source: The requesting individual does not have the proper
        authorization or clearance to access data/information for the selected
        FSC.

        Corrective Action: Enter another FSC.

59.   **Message ID No. and Description:** 0537 A COMPLETE NUMERIC
        FSG MUST BE ENTERED; RE-ENTER

Source: A complete numeric FSG has not been entered.

Corrective Action: Enter a complete numeric FSG.

60.   **Message ID No. and Description:** 0538 A COMPLETE NUMERIC FSC MUST BE ENTERED; RE-ENTER

Source: A complete numeric FSC has not been entered.

Corrective Action: Enter a complete numeric FSC.

61.   **Message ID No. and Description:** 0539 A VALID NUMERIC JULIAN DATE MUST BE ENTERED; RE-ENTER

Source: Invalid numbers have been entered or an improper format has been followed in placing data into the Date field.

Corrective Action: Check the data entered to see that it meets requirements for a Julian date.

62.   **Message ID No. and Description:** 0540 'FROM' DATE CANNOT BE GREATER THAN 'TO' DATE; RE-ENTER

Source: The date value entered in the 'From' Date field is greater (has a higher value) than the date entered in the 'To' field.

Corrective Action: Enter a new (lower) date value in the 'From' Date field.

63.   **Message ID No. and Description:** 0541 'FROM' DATE IS EARLIER THAN DATE RANGE; RE-ENTER

Source: A date value has been placed in the 'From' Date field that is less than the allowable (minimum) range value.

Corrective Action: Enter a new (higher) date value in the 'From' Date field.

64.   **Message ID No. and Description:** 0542 'TO' DATE IS BEYOND DATE RANGE; RE-ENTER

Source: A date value has been placed in the 'To' Date field that is greater than the allowable (maximum) range value.

Corrective Action: Enter a new (lower) date value in the 'To' Date field.

65.   **Message ID No. and Description:** 0543 CANNOT START SEARCH/ INQUIRY WITH INC FOR NON-APPROVED ITEM NAME

Source: An attempt has been made to start Search/Inquiry with INC using an Item Name that has not been approved.

Corrective Action: Use an approved Item Name to start Search/Inquiry with INC.

66.   **Message ID No. and Description:** 0544 ENTER 'C' OR 'P' FOR OUTPUT MEDIA; RE-ENTER

Source: An output media option has not been selected.

Corrective Action: Select one of the two available output media options.

67.   **Message ID No. and Description:** 0545 CHARACTERISTICS DATA IS PROPRIETARY PROTECTED

Source: An attempt has been made to access proprietary Characteristic Data.

Corrective Action: None.

68. **Message ID No. and Description:** 0546 USE CURSOR SELECT TO CHOOSE TABLE FOR INQUIRY

Source: The cursor selection has not been properly used when attempting to choose a Table for Inquiry.

Corrective Action: Move the cursor to the item/table to be selected for Inquiry.

69. **Message ID No. and Description:** 0547 INVALID MRC USAGE DESIGNATOR

Source: An invalid MRC Usage Designator has been entered.

Corrective Action: Enter a new MRC Usage Designator.

70. **Message ID No. and Description:** 0548 INVALID MASTER REQUIREMENT CODE

Source: An invalid Master Requirement Code has been entered.

Corrective Action: Enter a new Master Requirement Code.

71. **Message ID No. and Description:** 0549 INVALID FIIG

Source: An invalid FIIG has been entered.

Corrective Action: Enter a new FIIG.

72. **Message ID No. and Description:** 0550 ONLY MRC USAGE OF 'T' ALLOWED WITH FIIG

Source: Usage of an MRC other than 'T' has been attempted with a FIIG.

Corrective Action: Key in a 'T' for MRC usage.

73. **Message ID No. and Description:** 0551 INVALID KEYWORD GROUP CODE

Source: An invalid Keyword Group Code has been entered.

Corrective Action: Enter a new Keyword Group Code.

74. **Message ID No. and Description:** 0552 INVALID MRD REPLY TABLE CODE

Source: An invalid MRD Reply Table Code has been entered.

Corrective Action: Enter a new MRD Reply Table Code.

75. **Message ID No. and Description:** 0553 TOO MANY CRITERIA SELECTIONS CHOSEN

Source: The number of criteria selections made has exceeded the maximum number allowed.

Corrective Action: Make new criteria selections.

76. **Message ID No. and Description:** 0554 PRINT JOB SUBMITTED

Source: Production of a hard copy has been sent to a printer.

Corrective Action: None.

77.   **Message ID No. and Description:** 0555 PRINT JOB FAILED
     Source: Production of a hard copy has failed.
     Corrective Action: Initiate another print job.

78.   **Message ID No. and Description:** 0556 THIS IS THE LAST PAGE
     Source: An attempt was made to page down beyond the last page of available data.
     Corrective Action: None.

79.   **Message ID No. and Description:** 0557 SYSTEM ERROR ACCESSING TSQ
     Source: A system error resulted while accessing TSQ.
     Corrective Action: None.

80.   **Message ID No. and Description:** 0558 THIS IS THE FIRST PAGE
     Source: An attempt was made to page up beyond the first page of available data.
     Corrective Action: None.

81.   **Message ID No. and Description:** 0559 USE CURSOR TO SELECT DETAIL
     Source: The cursor was not used when selecting the necessary detail.
     Corrective Action: Move the cursor to make the detail selection.

82.   **Message ID No. and Description:** 0560 CHOOSE A VALID PF KEY
     Source: A F key that is not valid for the screen being used has been pressed.
     Corrective Action: Select another Function key.

83.   **Message ID No. and Description:** 0561 NO DATA TO PRINT
     Source: A print command has been made for which there is no data available.
     Corrective Action: None.

84.   **Message ID No. and Description:** 0562 THIS IS THE LAST RECORD
     Source: The last record in the file/table has been reached.
     Corrective Action: None.

85.   **Message ID No. and Description:** 0563 THIS IS THE FIRST RECORD
     Source: The first record in the file/table has been reached.
     Corrective Action: None.

86.   **Message ID No. and Description:** 0564 NO MATCHES FOUND - NEXT AVAILABLE FSC IS SHOWN
     Source: The search or inquiry has found no record matches in the database for a specified FSC(s); the next available FSC for which data matches are available is displayed.
     Corrective Action: None.

87.   **Message ID No. and Description:** 0565 NO MATCHES FOUND - STARTED WITH FIRST NEXT AVAILABLE FSG
