SUBJECT: NRC INSPECTION REPORT 50-280/01-08; 50-281/01-08; AND 72-002/01-05

Dear Mr. Christian:

On August 24, 2001, the NRC completed an inspection at your Surry Nuclear Plant. This inspection was an examination of activities conducted under your license as they relate to safety and compliance with the Commission's rules and regulations and with the conditions of your license. Within these areas, the inspection consisted of a selected examination of procedures and representative records, observations of activities, and interviews with personnel. The enclosed inspection report presents the results of this inspection which were discussed on August 24, 2001, with Mr. R. Blount, II and other members of your staff.

Based on the results this inspection, the inspectors identified one finding of very low safety significance (Green) which was determined to be a violation of NRC requirements. However, because of the very low safety significance and because you have entered the item into your corrective action program, the NRC is treating this violation as a Non-Cited Violation in accordance with Section VI.A.I of the NRC's Enforcement Policy. If you deny this Non-Cited Violation, you should provide a response with the basis of your denial, within 30 days of the date of this inspection report, to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555-0001; with copies to the Regional Administrator, Region II; Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001; and the NRC Resident Inspector at the Surry Nuclear Plant.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter without the Safeguards Information will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of
