¹ Error ranges cannot be properly computed when the number of sample cases is very small and/or the unemployment rate is low.

² Fewer than 500 persons or less than 0.05 percent.

NOTE: Data for demographic groups are not shown when they do not meet BLS publication standards of reliability for the particular area based on the sample in that area. Items may not add to totals or compute to displayed percentages because of rounding. Detail for race and Hispanic-origin groups will not add to totals because data for the "other races" group are not presented and Hispanics are included in both the white and black population groups. Levels incorporate updated 1990 census-based population controls.
