---

IPR's that 'patent' biological life or any component of life, should be BANNED!!!!

Ripping off God's creations for corporate profits is stupid, unconscionable, and puts us all at risk for 'unintended consequences' that even these 'master manipulators' are too damned pathetically human to contemplate.

Not that this is going to make a difference, nor that ANY commentary is going to make a difference since the pay-off is obviously a fait-accompli.

Sincerely,

Dorothy Arvizu
