Subject: Time Stamping as prove of copyright
Date: Tuesday, March 23, 2010 6:02:22 AM

It is my belief that the speed and simplicity of which someone can register Intellectual Property is vastly important in the very fast moving digital age.

With that in mind I would propose removing the current method of registering with US copyright office and put in place strict guidelines for Time Stamping as a prove of Copyright of any Intellectual Property.

It would be much faster, easier, cheaper and would bring this process into the 21st century.

Sincerely

Stephen Brett
