² This is the definition given in Annex XII, Definitions: D) definition of the terms “demilitarisation” and “demilitarized”: “For the purpose of the present Treaty the terms ‘demilitarisation’ and ‘demilitarized’ shall be deemed to prohibit, in the territory and territorial waters concerned, all naval, military and military air installations, fortifications and their armaments; artificial military, naval and air obstacles; the basing or the permanent or temporary stationing of military, naval and military air units; military training in any form; and the production of war material. This does not prohibit internal security personnel restricted in number to meeting tasks of an internal character and equipped with weapons which can be carried and operated by one person, and the necessary military training of such personnel.”

localities), refer to attacks. Should this different formulation be seen as an intention to lay down different rules in this field? To answer this question it is necessary to analyze the meaning of the words used. The expression “military operations” should be understood as all movements and activities related to hostilities, carried out by armed forces. The zone of military operations was defined by a mixed Working Group of the Diplomatic Conference in the following way: “in an armed conflict, the territory where the armed forces of the adverse Parties taking a direct or an indirect part in current military operations, are located”.³

2305 From the preceding it follows that the Party to the conflict in whose territory the demilitarized zone is located cannot set up military installations there or quarter troops participating in military operations in that zone, nor are such troops allowed to go through the zone. Such activity would be contrary to the very conditions underlying the creation of the zone. However, when the agreement by which the zone is created provides that it will continue to apply even if the adversary reaches the periphery, the latter must restrict itself to establishing a civil administration there without introducing troops or establishments which would be contrary to the nature of the zone. Failing such a provision, the adversary, upon arriving at the periphery of the zone, may at its discretion accept and respect the status of the zone or, on the contrary, make use of it in planning its military operations by quartering troops and setting up installations there.

2306 In conclusion, it is clear that a prohibition on extending military operations to demilitarized zones includes the prohibition on attacking them and also covers bringing in troops or military installations into such a zone by the belligerent controlling the territory. What happens to the zone in case it changes hands depends on the terms of the agreement by which it was established.

Paragraph 2

2307 This paragraph clearly says that the agreement cannot be a tacit one: it requires that a *consensus ad idem* of the Parties be clearly expressed. The mere notification, when it remains unanswered, is insufficient. However, it must be admitted that in certain urgent cases good faith requires a rapid response. The form of the agreement, the manner in which it is concluded and its contents, are left to the judgment of the Parties to the conflict. The paragraph specifically requires that the geographical limits should be described, and that the methods of supervision should be laid down. Undoubtedly efforts will be made to ensure that the limits of the zone coincide with natural boundaries whenever possible.

2308 Finally, it is provided that the agreement may be concluded in peacetime. However, it is unlikely that two or more States will agree in advance to keep one or more zones clear of military operations in the event of a conflict breaking out between them: this seems, at least, a rather theoretical point.

³ O.R. XV, p. 338, CDDH/II/266-CDDH/III/255, Annex A.

2309 According to the Rapporteur, the article, and in particular, this paragraph, covers not only zones from which military forces have been withdrawn in order to fulfil the conditions laid down by this article and by the agreement establishing the zones,⁴ but also those zones where there were no military forces to start with, and which in other respects, too, satisfy the conditions laid down in the article and in the agreement creating the zones. This view seems to be correct.

Paragraph 3

2310 The conditions laid down here are almost the same as those for non-defended localities (Article 59 – *Non-defended localities*, paragraph 2), and reference may be made to what was said above in this respect. According to the Rapporteur, the word “normally” in the introductory sentence was introduced to permit the Parties to agree about zones which do not fulfil all the conditions of this paragraph.⁵

2311 Finally, there is a slight difference from Article 59 (*Non-defended localities*). In fact, that article lays down the condition that no activity in support of military operations may be undertaken while the paragraph under consideration here provides that any activity linked to the military effort must have ceased. The language used in Article 60 has a slightly wider scope, and undoubtedly covers those factories which are mainly operating for the armed forces. However, this condition is not absolutely clear and that is why the Parties to the conflict are invited to include in the agreement an interpretation of this condition; such an interpretation may cover different categories of activities; it may also designate by name the businesses or establishments which must cease or modify their production.

Paragraph 4

2312 Again reference may be made to what was said with regard to paragraph 3 of Article 59 (*Non-defended localities*), which is worded in the same terms. However, the Parties to the conflict are invited to indicate in the agreement they conclude what other categories of persons will be admitted into the demilitarized zone. This will almost always be persons who are particularly weak or deserving of protection, such as children, the elderly, mothers of young children, pregnant women etc. Such a clarification is necessary, for in principle the zones provided for in this article are primarily concerned with protecting the population residing there and do not constitute places of refuge, as do the safety zones provided for in the Fourth Convention.

⁴ O.R. XV, p. 287, CDDH/215/Rev.1, para. 110.

⁵ *Ibid.*, p. 287, para. 111.

Paragraph 5

2313 This paragraph is identical to paragraph 6 of Article 59 (*Non-defended localities*), and we refer to the commentary thereon.⁶

Paragraph 6

2314 This paragraph only applies if the Parties to the conflict have provided, in the agreement establishing the zone, that it will remain in existence, even if the adversary takes possession of the territory in which the zone is located. Without such a provision the belligerent occupying the territory surrounding the zone could maintain or abolish it as it wished. If it decides to maintain it, it must notify the adverse Party, which may object.

Paragraph 7

2315 It is not often that the Geneva Conventions envisage the consequences which would be incurred by violation of their provisions or of agreements entered into pursuant to the Conventions. Examples in Protocol I are Articles 51 (*Protection of the civilian population*), paragraph 8, and Article 77 (*Protection of children*).

2316 This is also the case here, where it is provided that a material breach may lead to the end of the demilitarized zone. However, the peaceful population should not suffer because of this. Therefore, although the provision does not say so explicitly, the spirit of the Geneva Conventions requires that prior warning is given whenever possible, in order to allow the Party alleged to have committed the breach, the time to remedy the situation and put an end to the breach.

2317 It is clear, for it is a humanitarian imperative, that even if the zone loses its status, the adversary will not be exempt from observing the other provisions for protection enjoyed by the civilian population under the Protocol, particularly under Part IV (*Civilian population*) and the other rules of international law applicable in armed conflict. The expression “rules of international law applicable in armed conflict” is defined in Article 2 (*Definitions*), sub-paragraph (b), and we refer the reader to the commentary thereon.

2318 However, the fact that a zone is deprived of its privileged status does increase the risks to which the population is exposed in practice. Therefore the adverse Party must take the requisite precautionary measures and remember that “in the conduct of military operations, constant care shall be taken to spare the civilian population, civilians and civilian objects”.⁷

⁷ Art. 57, para. 1.

Part IV, Section I, Chapter VI – Civil defence

Introduction

- 2319 Civil defence¹ has an important place in the effort undertaken by international humanitarian law to mitigate the losses, damage and suffering inflicted on the civilian population by the dramatic developments of the means and methods of warfare, particularly when modern weaponry is used in violation of the principles and rules of the law of armed conflict.
- 2320 As a matter of fact, it was natural for international humanitarian law to contribute to promoting civil defence; the need and efficacy of this were widely demonstrated particularly during the Second World War and in subsequent conflicts. Civilian losses were certainly fewer in bombed towns where civil defence had been organized than in those where it had not.²
- 2321 From the point of view of international humanitarian law it is basically a matter of granting civil defence organizations a status ensuring them protection in the performance of their task,³ and a distinctive sign enabling them to be identified. Such a legal development is perfectly in accordance with the objectives of the Conventions which, as the ICRC stated in 1971, “do not merely demand that belligerents respect and treat certain categories of persons humanely”, but “from as early as 1864, the very first of the Geneva Conventions, and its subsequent versions, have endeavoured to provide protection and special facilities to the personnel and organizations which help war victims”.⁴

¹ As regards the terminology, a distinction should really be made between civil defence in the broad sense (in French “*protection civile*”) and civil defence in the narrow sense (in French “*défense civile*”). As the ICRC had already noted in a report in 1965, civil defence in the broad sense generally comprises all measures for national defence which are not of a military nature (including, in particular, measures to safeguard the position of public authorities, to maintain public order, public services including the health service, the maintenance of public morale and the protection of the war industry), while civil defence in the narrow sense constitutes only part of this (measures aimed at saving lives and limiting damage). The English term “civil defence”, which is mainly used in this narrow sense, and it will be exclusively used in this narrow sense in this commentary. Cf. *Status of Personnel of Civil Defence Organisation*, report submitted by the ICRC at the XXth International Conference of the Red Cross (Vienna, 1965), Geneva, May 1965, p. 1.

² In this sense, cf. particularly *O. R.* XII, p. 73, CDDH/II/SR.61, paras. 24-25; p. 80, para. 59.

³ In this sense, cf. particularly *ibid.*, p. 74, para. 32.

⁴ *CE/3b*, p. 140.

2322 The concern to strengthen the protection of personnel coming to the aid of the civilian population in general made it possible for the 1949 Conventions to provide special protection for personnel of civilian hospitals and for civilian medical transports.⁵ However, as we pointed out,⁶ the rules devoted to the general protection of civilian populations against the effects of hostilities were not greatly developed during the Diplomatic Conference of 1949. In fact, apart from occupied territories, that Conference did not deal with the question of civil defence personnel. Yet these people are also indispensable for the protection and survival of the population, as shown by the following words written by the ICRC when in 1971 it described them:

“namely those persons who rescue civilian wounded from under ruined buildings to take them to first aid posts or hospitals; the persons who fight fires, who provide displaced persons with emergency relief and social assistance and who take precautionary measures for the protection of the population”.⁷

2323 In fact the Fourth Convention broaches the question of civil defence only in the context of occupied territories. Article 63, paragraph 2, of that Convention grants civil defence organizations and their personnel, like National Red Cross and Red Crescent Societies, the right to pursue their activities even under foreign occupation.⁸

2324 However, studies carried out by the ICRC since 1954 on the general strengthening of protection for the civilian population, from the beginning showed “the provisions of Article 63 to be inadequate in the opinion of many experts”.⁹

2325 To be effective, civil defence activities should be safeguarded everywhere and not only in occupied territory. However, according to such experts, there should be a “clearer distinction between the civil defence services performing solely civilian duties and the units on civil defence duties which were military or of military status”.¹⁰

2326 The ICRC then introduced into the Draft Rules for the Limitation of the Dangers Incurred by the Civilian Population in Time of War (1956),¹¹ Article 12, paragraph 1, which reads as follows: “Parties to the conflict should facilitate the work of the civilian bodies exclusively engaged in protecting and assisting the civilian population in case of attack.”

⁵ Cf. Arts. 20-22, Fourth Convention.

⁶ Cf. particularly introduction to this Section, *supra*, p. 587.

⁷ CE/3b, p. 141.

⁸ For more details, cf. *Commentary IV*, p. 330 (Art. 63).

⁹ CE/3b, p. 142.

¹⁰ *Ibid.*

¹¹ On this subject, cf. introduction to this, *supra*, pp. 587-588.

- 2327 Although the Draft Rules were not followed up by governmental action, “the authorities in several countries, at that time or later, displayed considerable interest in that article”.¹² This led the ICRC to study this subject in depth.¹³
- 2328 A first report was submitted to the XXth International Conference of the Red Cross (Vienna, 1965).¹⁴ This Conference recognized “the necessity of strengthening the protection provided by international law to civil defence bodies”, and requested the ICRC “to continue its work in this field”.¹⁵
- 2329 A subsequent report submitted to the XXIst International Conference of the Red Cross (Istanbul, 1969) led the Conference to invite the ICRC to convene a meeting of government experts “with a view to submitting to Governments, for approval, regulations supplementing the provisions of the existing humanitarian conventions”.¹⁶
- 2330 The question was taken up by the ICRC in the Conference of Government Experts which met in 1971 and 1972, and Articles 54-59 of the 1973 draft, devoted to civil defence, were written on the basis of the work of that Conference.
- 2331 It should be added that the work of the CDDH was made all the more difficult for, as shown by the Rapporteur of the Drafting Committee of Committee II,
- “while civil defence was an almost entirely new subject in the system of Geneva law, it was an area in which considerable developments had taken place at the national level over recent years. Those two facts made it very difficult to find an appropriate international solution to the related problems”.¹⁷
- 2332 The CDDH in general, and Committee II in particular, deserve all the more credit for coming up with this solution.¹⁸
- 2333 In conclusion, three further remarks should be made with respect to this Chapter on civil defence.
- 2334 First, the provisions of this Chapter do not in any way seek to have an impact on the options that present themselves in the field of civil defence, in particular whether to provide shelters for the civilian population where they live, or to evacuate them.¹⁹ Civil defence tasks are protected irrespective of the solution that will be adopted.

¹² CE/3b, p. 143.

¹³ See in particular, *Status of Personnel of Civil Defence Organisation*, *op. cit.*, and with some additions, *Status of Civil Defence Service Personnel*, document presented by the ICRC at the XXIst International Conference of the Red Cross (Istanbul, 1969), Geneva, May 1969.

¹⁴ *Status of Personnel of Civil Defence Organisation*, *op. cit.*

¹⁵ Resolution XXIX.

¹⁶ Resolution XV.

¹⁷ O.R. XII, p. 272, CDDH/II/SR.80, para. 31.

¹⁸ On civil defence in Protocol I and on the work which ended with the adoption of Articles 61-67, *cf.*, in particular, E. Schultz, *Civil Defence in International Law*, Copenhagen, 1977; B. Jakovljević, *New International Status of Civil Defence*, The Hague-Boston-London, 1983; *Handbuch des Deutschen Roten Kreuzes zum IV. Genfer Rotkreuz-Abkommen und zu den Zusatzprotokollen – Zivilschutz*, Bonn, 1981.

¹⁹ On this subject, *cf.* *Handbuch des Deutschen Roten Kreuzes.... op. cit.*, p. 37.

- 2335** Secondly, it should be stressed that respect for the provisions concerning civil defence is in itself quite inadequate if it does not go together with respect for the rules relating to the conduct of hostilities: methods such as successive bombardments of the same place, or the use of time bombs in densely populated areas would make any civil defence activities very hazardous and virtually suicidal.
- 2336** Finally, efforts made with regard to civil defence also fall under the more general heading of precautions to be taken against the effects of attacks in order to protect the civilian population.²⁰

Y.S.

²⁰ Cf. Art. 58, sub-para. (c).

Protocol I

Article 61 – Definitions and scope

For the purposes of this Protocol:

- (a) “Civil defence” means the performance of some or all of the undermentioned humanitarian tasks intended to protect the civilian population against the dangers, and to help it to recover from the immediate effects, of hostilities or disasters and also to provide the conditions necessary for its survival. These tasks are:
- (i) warning;
 - (ii) evacuation;
 - (iii) management of shelters;
 - (iv) management of blackout measures;
 - (v) rescue;
 - (vi) medical services, including first aid, and religious assistance;
 - (vii) fire-fighting;
 - (viii) detection and marking of danger areas;
 - (ix) decontamination and similar protective measures;
 - (x) provision of emergency accommodation and supplies;
 - (xi) emergency assistance in the restoration and maintenance of order in distressed areas;
 - (xii) emergency repair of indispensable public utilities;
 - (xiii) emergency disposal of the dead;
 - (xiv) assistance in the preservation of objects essential for survival;
 - (xv) complementary activities necessary to carry out any of the tasks mentioned above, including, but not limited to, planning and organization;
- (b) “civil defence organizations” means those establishments and other units which are organized or authorized by the competent authorities of a Party to the conflict to perform any of the tasks mentioned under sub-paragraph (a), and which are assigned and devoted exclusively to such tasks;
- (c) “personnel” of civil defence organizations means those persons assigned by a Party to the conflict exclusively to the performance of the tasks mentioned under sub-paragraph (a), including personnel assigned by the competent authority of that Party exclusively to the administration of these organizations;
- (d) “*matériel*” of civil defence organizations means equipment, supplies and transports used by these organizations for the performance of the tasks mentioned under sub-paragraph (a).

Commentary

- 2337** Article 61 gives a definition of civil defence, of civil defence organizations and of civil defence personnel and *matériel*.
- 2338** The title of the article was discussed, some considering that it would be better and more precise to limit it to “definitions”, while others considered that, on the contrary, the term “scope” encompassed definitions.¹ In fact, these definitions clearly outline the scope of protected civil defence activities, as well as of the protected persons and objects. However, to be precise it should be indicated that the scope of these concepts is clarified by elements which can be found in almost all the other articles of the Chapter.
- 2339** Moreover, the definitions as a whole are given “for the purposes of this Protocol”, which clearly emphasizes that rights are only granted and duties are only imposed by Protocol I in situations of armed conflict which are covered by

¹ Cf. in particular *O.R.* XII, pp. 88-91, CDDH/II/SR.62, paras. 20, 22, 27, 29 and 35.

this instrument, although the creation of civil defence organizations should obviously be encouraged even in peacetime. For that matter, this reference highlights the fact that Articles 61-67 do not oblige States Parties to the Protocol to change the structure of their civil defence in peacetime, even though it is desirable whenever necessary to adapt such structures to the requirements imposed in time of armed conflict.

Sub-paragraph (a)

General remarks

2340 The 1973 draft had already based the definition of civil defence “on the criterion of the functions exercised”.² In fact, to define civil defence it was easier to use the tasks as a starting point, rather than the civil defence organizations themselves, given the disparate character of such organizations in different countries.³ The justification for that approach was repeatedly confirmed during the Diplomatic Conference.⁴ In particular it has the advantage of providing for:

“the possibility that in case of need civil defence functions might be performed by any civilian at the request of the authorities, so that civil defence should not become the monopoly of specialized organizations”.⁵

It was also stressed that this definition, based on functional criteria, was more in accord with the situation existing in many countries which did not have a developed civil defence infrastructure.⁶

2341 Given this approach, should a non-exhaustive list of the functions of civil defence be included, or, on the contrary, an exhaustive list? The 1973 draft opted for the first solution in including the term “*inter alia*” at the beginning of the list, thereby indicating that other activities than those mentioned could also fall under the heading of civil defence.⁷ This question caused a great deal of controversy during the Diplomatic Conference.⁸

2342 Those who preferred a non-exhaustive list thought, on the one hand, that the limitation imposed in the definition by making functions subject to an objective indicated in general terms, was sufficient to remove any danger that civil defence would be interpreted too broadly; on the other hand, that laying down an exhaustive list might result in “burning bridges” without being certain that nothing important had been forgotten. A compromise could have been reached

⁶ Cf. *ibid.*, p. 77, CDDH/II/SR.61, para. 44.

⁷ Cf. Art. 54 of the draft.

⁸ On this subject, cf. particularly *O.R.* XII, pp. 58-59 and 63, CDDH/II/SR.60, paras. 30 and 51; p. 82, CDDH/II/SR.61, paras. 70-71, 76; pp. 86-90, CDDH/II/SR.62, paras. 7-13, 18, 23-25, 33.

by deleting the term “*inter alia*” in the introductory sentence, whilst adding the words “other humanitarian tasks of a similar nature” at the end of the list.⁹

2343 In the end an exhaustive list was chosen nevertheless.¹⁰ One of the main reasons was the fear that a non-exhaustive list would allow functions to be included which were not specifically of a humanitarian nature and this could compromise all the efforts made to improve the protection of civil defence organizations. This fear was all the more justified, as in many countries the tasks of civil defence organizations include “aspects relating to the economy, defence, supplies and the protection of vital industries”,¹¹ and States cannot be expected to accept protection for the performance of such functions on the same basis as the protection given to the exclusively humanitarian functions of civil defence.

Introductory sentence

2344 The introductory sentence confirms that the list that follows is exhaustive. The tasks concerned must be all or some of those mentioned and cannot be any other tasks.

2345 It is not necessary that all the tasks are performed for civil defence to be said to exist, but it was not accepted that fulfilling only one of the tasks would be sufficient. In fact, this is a hypothetical case which could no longer be described as civil defence, for it is clear that it would inadequately fulfil the aim of civil defence, which is to protect the population against the dangers of hostilities. On the other hand, civil defence organizations may perform only one of the tasks mentioned,¹² provided that other tasks are fulfilled in other ways.

2346 The tasks listed are defined as being *humanitarian*. This is important, since some of the tasks listed may not be exclusively humanitarian, and it is a matter of clearly defining what aspect of the task should be assigned to civil defence, so that this can be unequivocally distinguished from anything which might be considered as a contribution to the war effort,¹³ such as air raid warnings, blackout measures or fire-fighting.¹⁴

2347 In addition, the tasks must have one of the following aims:

1) *To protect the civilian population against the dangers of hostilities or disasters*

2348 Basically this refers to the preventive tasks comprising the first four points of the list, i.e., warning, evacuation, management of shelters and management of blackout measures. With the exception of the blackout measures, which were not

¹² Cf. commentary sub-para. (b), *infra*, p. 732.

¹³ In this sense, cf. particularly O.R. XII, p. 63, CDDH/II/SR.60, para. 51; p. 79, CDDH/II/SR.61, para. 54.

¹⁴ Cf. commentary sub-para (a)(i), (iv) and (vii), *infra*, pp. 722, 724 and 726.

mentioned, these tasks were grouped under sub-paragraph (f) of the 1973 draft as examples of preventive measures.¹⁵

- 2349** Protection is to be provided not only against dangers resulting from hostilities (such as bombardments), but also against those resulting from disasters. From the observations made in Working Group A of Committee II, which are set out in the report of that Group,¹⁶ it is clear that the term “disasters” in the introductory sentence should be broadly construed. “It covers natural disasters as well as any other calamity not caused by hostilities.”¹⁷ This means, for example, that civil defence tasks related to a tidal wave (natural disaster) or to clouds of gas escaping from a chemical factory (disaster caused by human error) unrelated to hostilities, but occurring in a country involved in armed conflict, are also covered by the provisions of the Protocol.¹⁸ This is entirely logical, but it was appropriate to point out specifically that it was the case.
- 2350** In this respect an additional question was discussed, namely, the question whether civil defence tasks should be protected in the case of *civil strife*. Unfortunately the debate was not properly structured because it was opened on the basis of a suggestion proposing that the definition of civil defence should be made wider “in order that the greatest measure of civil assistance and welfare measures could be extended to the civilian population in the event of hostilities, civil strife and disaster”.¹⁹
- 2351** Formulated in this way the suggestion could obviously not be accepted as it exceeded the scope of the Protocol.²⁰ It was therefore rejected and, moreover, one delegate stated that this point did not come within the scope of Protocol II either, “which specified in Article 1, paragraph 2, that situations of internal disturbances and tensions were excluded from its material field of application”.²¹ Various other proposals of this kind²² led the President to put the matter to a vote, which resulted in a decision not to mention civil strife.²³
- 2352** However, this incorrect approach to the matter should not have any influence on the solution of a real problem: if, during an international armed conflict in the sense of this Protocol, there is internal strife (whether or not related to the armed

¹⁵ Cf. *Commentary Drafts*, pp. 71-72 (Art. 54). A link is also to be made between the tasks which flow from this obligation and those imposed by Article 58, sub-para. (c).

¹⁶ The Rapporteur of the Working Group stated on this subject that these observations constituted “a part of the preparatory work for the draft articles and should be taken into account when interpreting the texts”, *O.R.* XII, p. 373, CDDH/II/SR.91, para. 3. As these observations were included in the report of Committee II at the end of the fourth session of the Diplomatic Conference, we will only refer below to that report.

conflict) which results in acts of sabotage leading to disaster, civil defence functions are protected as they are in any other disaster. Common sense, like the text of the Protocol as it was finally adopted, requires an affirmative reply.

2) *To help the civilian population to recover from the immediate effects of hostilities or disasters*

2353 With the exception of the task referred to under sub-paragraph (a) (xiv) – and without referring to those under sub-paragraph (a) (xv) – all other tasks referred to under sub-paragraph (a) (v)-(xiii) have this function.

2354 The adjective “immediate” emphasizes the fact that civil defence should be restricted to urgent tasks and should not on a long-term basis fulfil functions normally performed by others.²⁴ Moreover, this restriction, related to the urgency of the tasks, is repeated several times by referring in individual items to emergency action.

3) *To provide the conditions necessary for the survival of the civilian population*

2355 This task has a more specifically preventive character. It covers some of the tasks which have been already mentioned: for example, the provision of shelters is an immediately protective measure, while their management is a measure related to ensure survival or could be seen as a more long-term protective measure. In addition, this task more specifically covers “assistance in the preservation of objects essential for survival” referred to under sub-paragraph (a) (xiv).

2356 Let us now examine the various tasks which are mentioned:

Sub-paragraph (a)(i)

2357 This refers primarily to the warning system implemented in case of air-raids. It may also refer to warning the population and making appropriate recommendations in the case of the approach of enemy army units.

2358 Characteristically the introductory sentence is of great importance here: the protected task is that of warning *the civilian population for humanitarian purposes*. This general aim, reiterated in the report of Committee II, was correctly illustrated in that context by the term “warning”, which is commented upon here, and which “means warning of the civilian population, in particular with respect to forthcoming attacks or natural disasters”.²⁵ For example, a warning given in a barracks is therefore clearly excluded from this definition.

²⁴ In this sense, *cf.* particularly *O.R.* XI, p. 579, CDDH/II/SR.51, para. 10; *O.R.* XII, p. 71, CDDH/II/SR.61, para. 13; pp. 92-93, CDDH/II/SR.62, paras. 48 and 50.

²⁵ *O.R.* XIII, p. 364, CDDH/406/Rev.1, para. 41.

Sub-paragraph (a)(ii)

2359 This function was already mentioned in the 1973 draft as a preventive measure.²⁶ It may consist of organizing and facilitating a necessary evacuation from a dangerous zone and of contributing to carrying it out in as humane a way as possible. The measure may actually be preventive, for example, in the case of a threatened tidal wave, landslide, avalanche, a river about to overflow its banks, or, at a military level, the invasion of enemy troops. However, it may also be necessary after the event, as in the case of the evacuation of an area affected by floods or which has been bombed. In the case of armed conflict the evacuation may also be carried out into safety zones²⁷ and civil defence can also contribute to the organization of such zones.

2360 If force has to be used with respect to persons refusing to be evacuated, this does not fall under the competence of civil defence, at least in the first instance.²⁸ However, in this respect it is mainly a question of preventing civil defence organizations from being assigned to carry out decisions which are basically of a political nature. In fact, although evacuation of the population before the advance of enemy troops can have a purely humanitarian motive, particularly when such troops have already shown by their actions that they do not respect civilians, it can also have a political motivation, in which case civil defence organizations should not be involved.

Sub-paragraph (a)(iii)

2361 This is the third example of preventive measures given in the 1973 draft.²⁹

2362 Although improvised measures in this field in the case of emergencies cannot be ruled out, and are certainly preferable to no measures being taken, it must be said that the task mentioned here should be prepared well in advance, in principle even in peacetime, if there is to be any real chance of it being effective.

2363 For that matter the construction and organization of shelters is one of the essential preventive tasks to be performed by civil defence organizations in peacetime in those countries where there is a developed system. On the one hand, this consists of constructing shelters (their construction may be compulsory) able to accommodate the civilian population and protect them from the effects of war and, on the other hand, it consists of making provisions for the organization of such shelters, i.e., the allocation of the population and the provision of supplies essential for the survival of those in shelters.

2364 However, the question whether shelters should be constructed in peacetime, or how to define the type of construction (e.g., should they be resistant to highly radioactive fall-out?) is more particularly a matter of the internal policies of each

²⁶ Cf. *Commentary Drafts*, pp. 71-72 (Art. 54).

²⁷ Cf. in particular Fourth Convention, Article 14 (Hospital and safety zones and localities) and Annex I (Draft agreement relating to hospital and safety zones and localities).

²⁸ Cf., however, commentary sub-para. (a)(xi), *infra*, pp. 728-729.

²⁹ Cf. *Commentary Drafts*, pp. 71-72 (Art. 54).

State and depends on the means available, its priorities and its choice of defence measures.

Sub-paragraph (a)(iv)

2365 This preventive measure could also be of benefit to the protection of military personnel or objects, in the same way that a warning could, and to an even greater extent. For this reason reference is only made to the *management* of blackout measures, and not to the concept as such. The civil defence task therefore consists of ensuring that civilians observe the blackout measures imposed in order to enhance their own safety, particularly in the case of air raids.

Sub-paragraph (a)(v)

2366 This is a typical civil defence task which may take very different forms, depending on the type of rescue to be performed and requires an extensive range of skills. The rescue operation may consist of searching for persons buried under the rubble of buildings destroyed by bombs or in an earthquake, of going to the aid of people who have been marooned through flooding, imprisoned in a building on fire, buried under an avalanche, trapped in contaminated areas... It is difficult to prepare for every type of disaster and the choice obviously depends on local conditions, whether natural (area prone to earthquakes, tidal waves, floods, volcanic eruptions, avalanches etc.) or man-made (agricultural, urban areas, flimsy construction of buildings, inflammable materials, skyscrapers etc.).

2367 In general rescue operations will be undertaken by teams, including members able to give first aid or even to give spiritual succour to the dying. In some cases this should be done in close collaboration with fire-fighting activities, and should also be coordinated with the formation of medical units to which those in need of medical care can be evacuated.

2368 Finally, it should be mentioned that effective protection of rescue tasks during armed conflict implies the observation of certain rules in the general conduct of hostilities. For example, the systematic practice of a second wave of bombing following closely on the first, or the use of time bombs would seriously impede or even prevent rescue tasks.

Sub-paragraph (a)(vi)

2369 In the “interim report of the Drafting Committee/Working Group on Civil Defence”³⁰ the proposal was accepted to exclude from the list the task mentioned

³⁰ The report is reproduced as an Annex to the report drawn up by Committee II at the end of the third session of the Diplomatic Conference: *O.R.* XIII, pp. 309-314, CDDH/235/Rev.1, Annex II.

here, but to add the following paragraph: “2. Medical services and assistance including first aid rendered by civil defence bodies and personnel are covered by Part II of Protocol I”.³¹

- 2370** Nevertheless, this activity was finally included in the list, mainly for the following reason: to enjoy protection, medical personnel protected by Part II of the Protocol must be *exclusively* assigned to medical purposes.³² In fact, it frequently happens that persons assigned to civil defence do not exclusively fulfil medical tasks, but do so in addition to other civil defence tasks. In such cases it is therefore important that they are protected as personnel of civil defence organizations, in the event that they are not already protected as medical personnel.³³
- 2371** The expression “medical services” should be understood in a broad sense and covers both medical transportation and medical care. Even though it most often consists of first aid, it was prudent not to exclude more extensive care, which may prove to be necessary *in situ* in some circumstances.
- 2372** The question whether reference should also be made to aid for *military* wounded was discussed at some length.³⁴ In fact, the introductory phrase states that the task of civil defence is the protection of only the *civilian* population, and it was recalled that this Chapter forms part of Part IV, devoted to the civilian population.³⁵ However, it is quite clear that civil defence personnel who come across wounded soldiers ought to help them. The very nature of international humanitarian law imposes the duty to respect and protect the wounded and to treat them humanely, in the first instance by providing the medical care required without making any distinction among them founded on any grounds other than medical ones.³⁶
- 2373** Rather than making an explicit reference in this sub-paragraph to the possibility of giving aid to wounded soldiers, it was preferred to mention it as an act which will not deprive civil defence organizations and their personnel of protection.³⁷
- 2374** The reference to religious assistance was added, in accordance with an amendment submitted at the fourth session of the Diplomatic Conference.³⁸ When this amendment was submitted the delegation in question stated in particular that the losses suffered by the civilian population in armed conflict “justified the presence, alongside rescue, medical and first aid personnel, of religious personnel rendering spiritual assistance to the dying and wounded and enjoying proper protection”.³⁹ In addition, one delegation stated that it was not

³⁹ *O.R.* XII, p. 322, CDDH/II/SR.85, para. 6.

its intention “to impose religious civil defence personnel upon States, but merely to ensure that such personnel were respected where they existed”.⁴⁰

Sub-paragraph (a)(vii)

2375 One has only to think of the terrible bombardments during the Second World War and of so many other bombardments to understand the importance of this task. When fire-fighting is necessary, it is closely related to the task of rescue.

2376 The importance of the introductory sentence was particularly stressed with regard to this task. In particular as a result of a proposal made in 1972 during the second session of the Conference of Government Experts,⁴¹ the ICRC felt that the commentary on the 1973 draft should point out that

“in the context of this definition, fire-fighting should provide assistance in rescuing or protecting only civilians and military personnel *hors de combat*, and preventing damage to civilian objects”.⁴²

2377 This idea was further clarified during the Diplomatic Conference when it was stated that “civil defence personnel could not take advantage of the protection granted it under that chapter in order to put out a fire which was raging, for example, at a military airport”.⁴³

2378 However, the distinction between fire-fighting covered by the definition – and therefore protected – and fire-fighting which is not covered, is not always an easy one. A fire in a military objective can actually endanger the lives of able-bodied civilians or of wounded soldiers or of civilians who happen to be in the vicinity. In this case, if it is done with a view to protecting such persons, the fire-fighting must be considered to be a civil defence task.⁴⁴ On the other hand, persons specifically charged with protecting military objectives from fire cannot claim protection accorded to civil defence tasks.

Sub-paragraph (a)(viii)

2379 The French text of the 1973 draft referred to “déttection”⁴⁵ rather than “repérage”, though the meaning is the same, and the same English term “detection” was used in both the draft and the final text of the Protocol. The civil defence task consists of marking danger areas in principle so as to be able to deny access to persons not specifically authorized to enter.

2380 Such danger may be the direct result of hostilities (bombed or contaminated areas etc.). However, in this respect the interim report of the Drafting Committee

⁴⁰ *Ibid.*, p. 323, para. 8.

⁴¹ *Cf. CE 1972, Report*, Vol. II, p. 93, CE/COM III/OPC 8.

⁴³ *O.R. XII*, p. 58, CDDH/II/SR.60, para. 30.

⁴⁴ In this sense, *cf. E. Schultz, op. cit.*, p. 12.

⁴⁵ *Cf. draft Art. 54, sub-para. (g).*

and the Working Group on civil defence stated that “this sub-paragraph does not cover the detection, marking or removal of minefields during combat operations”.⁴⁶ This clarification follows from a concern to keep civil defence separate from any activity which has an effect on the development of hostilities. On the other hand, once it is known that an area is mined, there should be no restriction on the initiative of civil defence organizations to prohibit access to such areas to civilians.

2381 However, the danger existing in some areas may also be the result of events which are not related to the conflict (volcanic areas, unsound buildings following an earthquake, flooding rivers etc.).

2382 In both cases the function of civil defence with regard to such areas is of a dynamic nature. It must take the initiative in determining which areas are dangerous for the civilian population, analyse the nature of such danger and act accordingly.

Sub-paragraph (a)(ix)

2383 This task was not included in the 1973 draft and was introduced in the interim report mentioned above, though it was placed in square brackets,⁴⁷ because of the absence of agreement on this subject.

2384 Finally one delegate explained his reason for opposing any reference to this task, namely because of the fact that “such operations were generally carried out after danger areas had been detected and marked and the population evacuated”.⁴⁸

2385 However, a wider view of the role of civil defence finally prevailed, and led to retaining this task. The preventive character which civil defence also has is emphasized in this way. To take just one example, it is perfectly logical that civil defence should not only be concerned with caring for victims of contaminated water, but also be concerned with decontaminating that water. Decontamination can take various forms (special washing of contaminated persons, purification of water, incineration of contaminated objects etc.) and we will not go into further detail here. The phrase “similar protective measures” allows for some latitude in this task, which is often of paramount importance in time of conflict, to prevent the spread of disease. Measures such as the placing in quarantine of contaminated persons or the banning of certain dangerous products could be included among such measures.

⁴⁶ O.R. XIII, p. 310, CDDH/235/Rev.1, Annex II, para. 8.

⁴⁷ *Ibid.*, p. 312 (Art. 54, sub-para (g)).

⁴⁸ O.R. XII, p. 324, CDDH/II/SR.85, para. 10.

Sub-paragraph (a)(x)

2386 The reference to this task was included as a result of an amendment.⁴⁹ The 1973 draft referred to “emergency material and social assistance” and to “provision of shelters”,⁵⁰ but it was necessary to make a distinction between the provision of shelters providing temporary protection against danger (particularly air-raid shelters) and more long-term accommodation which may become necessary because of the destruction of dwellings. However, it is quite clear that civil defence can only provide temporary solutions, such as erecting tents or pre-fabricated buildings. As regards supplies, well-protected stocks of non-perishable foodstuffs should allow civil defence organizations to fulfil the most urgent needs in the event of the destruction or contamination of food or other essential objects.⁵¹

Sub-paragraph (a)(xi)

2387 This activity was mentioned in the 1973 draft in a way that was at the same time more categorical and more restrictive: “maintenance of public order in disaster areas”.⁵² The draft in fact referred to *maintenance of order*, and not only to *emergency assistance* in the maintenance of order; on the other hand, the draft was restricted to *disaster areas* while the task as finally defined was extended to all *distressed areas*.

2388 These divergent versions reflect the fact that the reference to this task resulted in a great deal of discussion, which is understandable. It became quite clear from the beginning of these discussions that this task actually requires a clarification of the role of the police in connection with civil defence.⁵³ It also poses the problem of arming members of civil defence organizations.⁵⁴

2389 These questions were answered. The present wording was proposed, following an amendment,⁵⁵ in order to clarify that Chapter VI does not envisage the protection of the police.⁵⁶ As the task of maintaining order undeniably falls under the responsibility of the police, the amendment “therefore referred simply to ‘assistance’, to cover cases where civil defence units assisted the police in keeping public order in disaster areas”.⁵⁷

⁴⁹ *O.R.* III, p. 247, CDDH/II/402 (Art. 54 (g)(iii)); *cf.* also p. 249, CDDH/II/414 (Art. 54 (h)).

⁵⁰ Draft Art. 54, sub-para. (c) and (f).

⁵¹ On this concept, *cf.* sub-para. (a)(xiv), *infra*, pp. 730-731.

⁵² *Cf.* draft Art. 54, sub-para. (e).

⁵³ *Cf.* *O.R.* XI, p. 586, CDDH/II/SR.51, para. 46.

⁵⁴ *Cf.* *O.R.* XII, pp. 58-59, CDDH/II/SR.60, para. 30.

⁵⁵ *O.R.* III, p. 246, CDDH/II/344, para. 2.

⁵⁶ *Cf.* *O.R.* XII, p. 63, CDDH/II/SR.60, para. 52.

⁵⁷ *Ibid.*; *cf.* also p. 65, para. 59; p. 76, CDDH/II/SR.61, para. 42; p. 93, CDDH/II/SR.62, para. 52; p. 95, CDDH/II/SR.63, para. 3; pp. 96-97, paras. 8-11.

- 2390 This question later formed the object of a comprehensive statement in the report of Committee II,⁵⁸ which clarifies the meaning to be given to the expression “emergency” by indicating situations where such assistance may take place, and its exceptional character. In addition, it provides an interpretation of the expression “distressed areas”, which shows that this can be practically any area in time of armed conflict, and that the criterion whether any assistance should be given is, primarily, the deficiencies of the public administration.
- 2391 Of course, the task mentioned is only an example. Assistance in enforcing a prohibition to enter certain danger areas, in the evacuation of such areas,⁵⁹ in guarding stores of supplies essential to survival, in the control of distribution thereof, are other examples of activities which may be undertaken under the heading of this sub-paragraph (a)(xi).
- 2392 Finally, although the question of arming personnel performing civil defence tasks was broached in the debate occasioned by this sub-paragraph (a)(xi),⁶⁰ it was not settled at that time; this was left to later when the present Article 65 (*Cessation of protection*) was discussed.⁶¹

Sub-paragraph (a)(xii)

- 2393 This task was included in the draft in a slightly different form.⁶²
- 2394 The report of Committee II specified that the expression “public utilities” includes, “*inter alia*, water control works (e.g., dams, dykes, drainage and discharge canals, outlets, sluices, locks, floodgates and pumping installations)”.⁶³
- 2395 In addition, it should be mentioned that civil defence is limited to *emergency* repair of *indispensable* public utilities. Thus it does not have to make good every deficiency of such utilities, but should be limited to essential tasks, for example, if the distribution of drinking water were cut off, or if malfunction of the sewers resulted in the risk of an epidemic.
- 2396 This restriction of civil defence to indispensable emergency tasks follows from the concern that it should not go beyond the aim of protecting the civilian population, a concern which also led Committee II to delete “emergency social

⁵⁸ This stresses that “nothing in the definition of civil defence alters the position of the civil police, who are protected as civilians. Ordinary police functions are not civil defence functions. But in distressed areas, that is areas stricken by hostilities or disasters, where the normal functioning of public administration has broken down, civil defence organizations may, as an exceptional measure, assist also in the maintenance of order. Such assistance may include the direction of movements of refugees within or from distressed areas”: *O.R. XIII*, p. 364, CDDH/406/Rev.1, para. 41.

⁵⁹ *Cf.* E. Schultz, *op. cit.*, p. 13.

⁶⁰ *Cf.* particularly *O.R. XII*, pp. 58-59, CDDH/II/SR.60, para. 30, and p. 93, CDDH/II/SR.62, para. 52.

⁶¹ *Cf.* commentary Art. 65, para. 3, *infra*, pp. 774-778.

⁶² “Emergency repair of public services indispensable to the civilian population” (draft Art. 54, sub-para.(d)).

⁶³ *O.R. XIII*, p. 364, CDDH/406/Rev.1, para. 41. Moreover, *cf.* the expression “public utility services” used in Article 51 (Enlistment, labour), paragraph 2, of the Fourth Convention. For the meaning of this expression, *cf. Commentary IV*, p. 295.

assistance”, provided for in the 1973 draft,⁶⁴ from the list of civil defence tasks. It was feared in particular that including that item might have increased the range of civil defence tasks too much, as it could even cover services such as unemployment benefit and sick leave, and in doing so would detract from the emergency character which is an essential part of civil defence.⁶⁵

Sub-paragraph (a)(xiii)

- 2397** This task was not explicitly included in the 1973 draft, but may be considered to be part of the “public utilities” mentioned in the preceding sub-paragraph (a)(xii).
- 2398** This item was inserted as the result of an amendment.⁶⁶ The sponsor of this amendment considered succinctly that there were “compelling humanitarian, aesthetic, customary and hygienic reasons”⁶⁷ for its inclusion. The proposal was supported by another delegation⁶⁸ and nobody opposed it.
- 2399** With regard to this task, it should be noted that any burial (or cremation) of the dead has an urgent character, if only for obvious reasons of hygiene. Thus the reference to the emergency character should be interpreted merely as an intent to emphasize the auxiliary role of civil defence when it performs this activity, which falls under the responsibility of the public administration.

Sub-paragraph (a)(xiv)

- 2400** The 1973 draft called it “safeguard of objects indispensable to the survival of the civilian population”,⁶⁹ in this way intending to cover the same objects as those mentioned in Article 48 of the draft (the present Article 54 – *Protection of objects indispensable to the survival of the civilian population*),⁷⁰ i.e., objects “such as foodstuffs, agricultural areas for the production of foodstuffs, crops, livestock, drinking water installations and supplies and irrigation works”.⁷¹
- 2401** However, Committee II did not adopt this point of view. Its report indicated that the word “essential” was chosen to avoid confusion with the expression “objects indispensable to the survival” used in Article 48 (the present Article 54 – *Protection of objects indispensable to the survival of the civilian population*), and because “it has a broader scope than the term ‘indispensable’”.⁷²
- 2402** Thus the intention here was to cover a broader category of objects than that covered by Article 54 (*Protection of objects indispensable to the survival of the*

⁶⁴ Cf. Art. 54, sub-para.(c), of the draft.

⁶⁵ Cf. O.R. XIII, p. 92, CDDH/II/SR.62, paras. 47-48. However, see also p. 81, CDDH/II/SR.61, paras. 63 and 66, as well as p. 90, CDDH/II/SR.62, para. 32.

⁶⁷ O.R. XII, p. 81, CDDH/II/SR.61, para. 65.

⁶⁸ *Ibid.*, p. 82, para. 73.

⁶⁹ Art. 54, sub-para. (b), of the draft.

⁷⁰ Cf. *Commentary Drafts*, p. 71 (Art. 54, sub-para. (b)).

⁷¹ Cf. Art. 54, para. 2, Protocol I.

⁷² O.R. XIII, p. 365, CDDH/406/Rev.1, para. 41. Cf. also commentary Art. 54, *supra*, pp. 652-653.

civilian population), although this is a nuance of little practical importance. Once again common sense must prevail and it is not worth quibbling about whether soap, for example, is essential or indispensable.

2403 On the other hand, in contrast to the draft, this item refers to “assistance in the preservation”, instead of to “safeguard”. To some extent this distinction is related to the limits assigned the role of civil defence for the restoration and maintenance of public order.⁷³ Responsibility for preservation or safeguard as a whole would, in fact, undeniably include a police task. The report of Committee II indicates that “the assistance referred to does not involve guard duties or require the use of weapons”.⁷⁴

Sub-paragraph (a)(xv)

2404 The last point of the list is to some extent the result of a compromise between those in favour of an exhaustive list and those preferring an illustrative list.⁷⁵

2405 The list remains exhaustive, but some flexibility is introduced: activities which are not specifically mentioned may be covered, provided they are activities complementary to those in the list, i.e., they must be necessary to carry out any of the tasks listed, and they may not go beyond that.

2406 These tasks include planning and organization. Thus administrative civil defence activities, such as accounting, payment of salaries, administration of equipment, organization and planning of operations, are clearly covered. This is perfectly logical, as such tasks are also necessary for activity to be effective. For that matter, this is in accordance with provisions regarding hospitals, for example, where administrative personnel enjoy the same protection as medical personnel.⁷⁶

2407 However, it is further stated that such complementary activities are not limited to planning and organization. This is sensible, for on the one hand, other activities directly related to civil defence also deserve to be protected, such as training of personnel, while on the other hand, activities which apparently have no direct link may become indispensable, such as the installation of an *ad hoc* lighting system to continue searching for people buried in rubble at night.⁷⁷ Yet it is important that such tasks do not extend beyond what is necessary for carrying out any of the primary civil defence tasks.

2408 The report of Committee II indicates that the expression “mentioned above” “relates not only to the list of civil defence tasks, but also to the introductory sentence” of sub-paragraph (a).⁷⁸ This observation could lead to some

⁷³ Cf. commentary sub-para. (a)(xi), *supra*, pp. 728-729.

⁷⁴ O.R. XIII, p. 365, CDDH/406/Rev.1, para. 41. Moreover, an example is given to illustrate the type of assistance concerned: the temporary repair of an agricultural silo.

⁷⁵ On this subject, cf. *supra*, pp. 719-720 and note 8.

⁷⁶ Cf. in particular Fourth Convention, Art. 20.

⁷⁷ In this sense, cf. E. Schultz, *op. cit.*, pp. 13-14; M. Bothe, W.A. Solf, K.J. Partsch, *op. cit.*, pp. 396-397.

⁷⁸ O.R. XIII, p. 365, CDDH/406/Rev.1, para. 41.

confusion, insofar as it might call into question the exhaustive character of the list, if it should be interpreted as allowing any other task which could be classified within the confines of civil defence.⁷⁹ However, this is not the case, for the introductory sentence clearly restricts the scope to “the undermentioned humanitarian tasks”. This “observation” therefore, on the contrary, confirms that an activity is only covered by sub-paragraph (a)(xv) if it is complementary to a task which is included in the list, on the one hand, and which is in accordance with the introductory sentence of the sub-paragraph, on the other hand. In fact, it has been seen that tasks such as fire-fighting are only partially covered, i.e., when they fulfil the conditions listed in the introductory sentence.

Sub-paragraph (b)

- 2409** This sub-paragraph defines civil defence organizations, although belonging to such an organization is not a necessary condition for protection,⁸⁰ as it had been decided to give protection on the basis of function rather than on the basis of membership of an organization.⁸¹
- 2410** The question therefore arises whether there is any point in defining such organizations. One delegate answered this question, stating that it would be justified “to grant [...] in the first place protection to specialized bodies in civil defence tasks, because in the normal case, civil defence functions would be entrusted to specialized civil defence bodies”.⁸² In addition, to mention such an organization makes it easier to define the material objects (buildings, transports, equipment) on which the civil defence emblem can be placed.
- 2411** The expression “establishments and other units” is not very clear in itself. It should be understood in its material sense, for which it can be compared with the definition of medical units;⁸³ but it should also be understood to cover the institutions themselves, which are covered here irrespective of their legal form and whether they are subject to public or private law. Nevertheless, if they have not been established by the competent authorities of a Party to the conflict, such units must be *authorized* by those authorities (organizations which are established by the competent authorities are usually subject to public law). This is important, for as in the case of the use of the red cross or red crescent emblem, the use of the distinctive sign of civil defence thus falls in time of armed conflict under the responsibility of those authorities and they must repress abuse and may withdraw their authorization.
- 2412** The organizations concerned may be small or large, particularly as carrying out even one of the tasks listed means that they can be accorded protection. It could also be the civil defence department of an organization which also deals with

⁷⁹ In the broader sense, cf. also B. Jakovljević, *op. cit.*, p. 35.

⁸⁰ Cf. commentary Art. 62, para. 2, *infra*, pp. 740-741.

⁸¹ Cf. *ad* sub-para. (a), *supra*, p. 719.

⁸² O.R. XII, p. 59, CDDH/II/SR.60, para. 32.

⁸³ Cf. Art. 8, sub-para (e), and the commentary thereon, *supra*, pp. 128-129.

other activities.⁸⁴ This obviously raises the question whether there is *exclusive* assignment to civil defence tasks.

2413 In fact, to be recognized as civil defence organizations they must be “assigned and devoted exclusively” to civil defence tasks. This expression requires explanation. Exclusive assignment or devotion does not mean an unlimited assignment in time. Although this is not specified here, it may be of a temporary nature. In fact, the report of Committee II specified that organizations were included:

“which are assigned and devoted to such tasks only for a limited period, even if that period is a relatively short one, provided, however, that they are assigned or devoted exclusively to those tasks, during that period”.⁸⁵

2414 The system adopted is a combination of the strict requirement of exclusive assignment to civil defence tasks to be entitled to the special protection accorded civil defence, and some flexibility regarding the duration of such assignment.

2415 Civil defence personnel may therefore be assigned alternately to civil defence tasks and to other tasks, but only on two conditions: on the one hand, such other tasks must not be harmful to the enemy;⁸⁶ if they are, such personnel would probably lose the right to protection, even if they once more carried out civil defence tasks;⁸⁷ on the other hand, such personnel only enjoy protection – and the right to use the sign of civil defence – while they carry out civil defence tasks. As regards buildings, they may only be marked with the distinctive sign if they are exclusively assigned to civil defence tasks, including the complementary tasks mentioned in sub-paragraph (a)(xv).

2416 In practice, it is not always easy to make this distinction. It is especially at the moment when a mission is assigned that it should be determined whether this mission does or does not fall under the definition of civil defence. In contrast, it is not very realistic to envisage a change in the middle of a task. For example, if a team discovers wounded combatants during an assignment to recover wounded civilians who are buried under the rubble from a building, it will obviously care for those combatants and cannot be expected to remove the civil defence sign.⁸⁸ On the other hand, if it is assigned to a task of recovering the wounded buried under the rubble of a barracks, who are all or nearly all combatants, it will not enjoy the protection of the blue triangle.⁸⁹

2417 A more delicate question arises when a civil defence task can be considered as being harmful to the enemy. In this case there can of course be no question of

⁸⁴ In this sense, *cf.* M. Bothe, K.J. Partsch, W.A. Solf, *op. cit.*, p. 397, para. 2.2.3.

⁸⁵ *O.R.* XIII, p. 365, CDDH/406/Rev.1., para. 41. On the meaning of exclusive temporary assignment, reference should also be made to the definition given for medical personnel, units and transports: *cf.* commentary Art. 8, sub-para. (k), *supra*, pp. 132-133.

⁸⁶ On the concept “acts harmful to the enemy”, *cf.* commentary Art. 65, para. 1, *infra*, p. 770.

⁸⁷ On this subject, *cf.*, however, *infra*.

⁸⁸ On this subject, *cf.*, in addition, commentary sub-para. (a)(vi), *supra*, pp. 724-726.

⁸⁹ On the other hand, it should be noted that the protection given to medical services by the distinctive emblem of the red cross or red crescent is of course given for any action for the benefit of the wounded, whether they are military or civilians. *Cf.* also commentary Art. 66 (Identification), para. 9, *infra*, pp. 788-789.

carrying out the task under cover of the protective sign and it should not even be carried out at all, because of the risk of finally losing all right to protection. In borderline cases, particularly in the field of fire-fighting,⁹⁰ activities should be undertaken with both common sense and circumspection. Some have recommended that in this respect the principle of proportionality between the military interest in the activity and the humanitarian advantage resulting for civilian victims should be applied.⁹¹

2418 This therefore represents a subtly graduated system which can be summarized as follows:

- assignment exclusively to civil defence tasks and performing exclusively such tasks: right to special protection;
- assignment exclusively to civil defence tasks but occasionally performing other tasks not harmful to the enemy: right to special protection (although the text might be interpreted more restrictively);
- temporary assignment to tasks other than civil defence tasks, but which are not harmful to the enemy: no right to special protection during the performance of such other tasks, though there is a right to such protection in case of assignment to civil defence tasks later on;
- assignment to tasks harmful to the enemy or performance of tasks which can clearly be identified as being harmful to the enemy: no right to special protection, and probably permanent loss of this right.⁹²

2419 However, this last point requires clarification. An individual devoting himself in turn to civil defence tasks and to activities harmful to the enemy cannot be tolerated, particularly as the only individuals concerned here are civilians; the military assigned to civil defence are governed by a separate article.⁹³ Further the report of Committee II supports this conclusion, since it allows for the possibility of performing tasks covered by sub-paragraph (a) and other tasks in turn, and then again enjoying protection, “provided that these tasks do not constitute acts harmful to the enemy”.⁹⁴ Thus, the performance of tasks harmful to the enemy should result in the loss of the possibility of enjoying protection under this Chapter for the duration of the conflict. However, it seems justified to allow individuals who, in exceptional cases and in good faith, have performed activities which they had not recognized as being harmful to the enemy, or even permanently demobilized soldiers assigned to civil defence *as civilians*, the right to enjoy special protection once again. An amendment relating to this point was indeed proposed.⁹⁵ This led to discussions⁹⁶ and was not finally adopted but no negative decision was taken as regards its substance. In conclusion, it should be

⁹⁰ On this subject, *cf.*, in addition, commentary sub-para. (a)(vii), *supra*, p. 726.

⁹¹ *Cf.* M. Bothe, K.J. Partsch, W.A. Solf, *op. cit.*, p. 395. *Cf.* in addition commentary Art. 65, *infra*, p. 769.

⁹² In this sense, *cf.* M. Bothe, K.J. Partsch, W.A. Solf, *op. cit.*, p. 397.

⁹³ *Cf.* Art. 67.

⁹⁴ *O.R.* XIII, p. 365, CDDH/406/Rev.1, para. 41.

⁹⁵ *Cf.* *O.R.* III, pp. 263-264, CDDH/II/325, 325/Rev.1, 342.

⁹⁶ *Cf.* in particular *O.R.* XII, p. 105, CDDH/II/SR.64, para. 2; pp. 110-111, paras. 30-32; pp. 130-131, CDDH/II/SR.66, paras. 25-31.

pointed out that nothing expressly prohibits this possibility, which must therefore be accepted, as those concerned are indisputably civilians, even though the Third Convention provides for prisoner-of-war treatment for those who have belonged to the armed forces when they are interned by the Occupying Power while in occupied territory.⁹⁷

2420 Finally, as explained above, more restrictive rules are imposed on members of the armed forces assigned to civil defence, and for them the possibility of a temporary assignment was not adopted.⁹⁸

Sub-paragraph (c)

2421 This sub-paragraph defines civil defence personnel, though without specifying that the individuals concerned must belong to civil defence *organizations*. Thus it is taken for granted that one cannot have an *assignment* to civil defence tasks on an individual basis, outside any organization. This is accepted all the more willingly, since on the one hand such organizations are defined in very flexible terms,⁹⁹ and on the other hand, the possibility, in case of need, of appealing to the civilian population outside any organization remains open.¹⁰⁰

2422 Such personnel must be assigned *exclusively*¹⁰¹ to the performance of civil defence tasks, and must be so assigned by the Party to the conflict concerned.¹⁰²

2423 The inclusion of the fact that persons assigned exclusively to the *administration* of these civil defence organizations are also covered is superfluous. However, it does remove any possible ambiguity about administration being included in the complementary activities mentioned under sub-paragraph (a)(xv). The term “administration” should be understood in a broad sense to include all activities necessary for the running of civil defence organizations and the maintenance of their buildings and materials. However, here again, the assignment of such buildings and materials must be exclusive.

2424 Apart from this, the difference between the terms “Party to the conflict” and “competent authority of that Party” is without legal significance.

2425 Finally, as regards the relationship between personnel covered here and personnel in occupied territory covered by Article 63 of the Fourth Convention, the remark made in the report of Committee II is worthy of note:

“The definition of ‘civil defence organizations’ in this article in no way deprives individuals carrying out civil defence tasks of their rights under this Chapter, so long as they are part of, or under contract to, an organization of

⁹⁷ Cf. Third Convention, Art. 4B(1).

⁹⁸ Cf. commentary Art. 67, para. 1(a) and (b), *infra*, pp. 796-797.

⁹⁹ On this subject, cf. commentary sub-para. (b), *supra*, pp. 732-735.

¹⁰⁰ Cf. Art. 62, para. 2, and the commentary thereon, *infra*, pp. 740-741.

¹⁰¹ On the scope of this expression, cf. commentary sub-para. (b), *supra*, pp. 732-735. The report of Committee II also states that “the word ‘exclusively’ is used in order to indicate that these personnel, while assigned to civil defence tasks, must not exercise any other functions”. O.R. XIII, p. 365, CDDH/406/Rev.1, para. 41.

¹⁰² On this subject, cf. commentary sub-para. (b), *supra*, pp. 732-733.

the type referred to in Article 63 of the Fourth Geneva Convention of 1949; and there is no need for them to belong to or be embodied in a formal unit.”¹⁰³

Sub-paragraph (d)

- 2426 The term “*matériel*” defined here should be understood in a broader sense than in the First Convention, where it is distinguished from transports.¹⁰⁴
- 2427 In this instance it covers equipment, i.e., the boots and helmets of persons assigned to fire-fighting activities, as well as bookkeepers’ calculators; supplies, i.e., all food supplies, stocks of medicines, clothing etc.; and land, water and air transports of any sort.¹⁰⁵
- 2428 However, to fall under the definition, such equipment, supplies and transports must, of course, be used “for the performance of the tasks mentioned under sub-paragraph (a)”. The term *exclusively* is not mentioned here, but it is clear that the distinctive sign of civil defence must only be used to identify such *matériel* while it is exclusively assigned to such tasks. For example, a vehicle must not be assigned to any task that is not covered, even if it does not constitute an act that is harmful to the enemy under Article 65 (*Cessation of protection*), unless all traces of the distinctive sign have first been removed.
- 2429 On this subject it should be noted that the sponsors of one amendment proposed the exclusion of air transport by mentioning only “vehicles and watercraft”,¹⁰⁶ because they were afraid that rules regarding air transport would meet with difficulties, and because “civil defence was essentially land-based”.¹⁰⁷
- 2430 However, this proposal, which was supported by various delegations,¹⁰⁸ was not adopted because, as one delegate stated, there are mountainous regions “where emergency aid could be sent only by air”.¹⁰⁹
- 2431 Finally, it should be mentioned that a proposal was made to also mention protection of “the means of communication” used by civil defence.¹¹⁰
- 2432 This proposal was not adopted either. One delegate considered in particular that the obligation to protect civil defence means of communication could encourage abuse.¹¹¹ However, it is to be hoped that everything will be done to facilitate their functioning, which is often essential for the effective performance of civil defence tasks.

Article 62 – General protection

1. Civilian civil defence organizations and their personnel shall be respected and protected, subject to the provisions of this Protocol, particularly the provisions of this Section. They shall be entitled to perform their civil defence tasks except in case of imperative military necessity.
2. The provisions of paragraph 1 shall also apply to civilians who, although not members of civilian civil defence organizations, respond to an appeal from the competent authorities and perform civil defence tasks under their control.
3. Buildings and *matériel* used for civil defence purposes and shelters provided for the civilian population are covered by Article 52. Objects used for civil defence purposes may not be destroyed or diverted from their proper use except by the Party to which they belong.

Commentary

General remarks

2433 This article has undergone quite a few changes through various drafts put forward prior to the Diplomatic Conference and then during that Conference. In fact, the article as finally adopted is in some respects closer to the draft put before the second session of the Conference of Government Experts in 1972, than to the 1973 draft. Its modification during the Conference resulted to a large extent from an important amendment presented at the beginning of the discussions on civil defence, and later from a second amendment submitted to replace the first.¹

Title and scope of the article

- 2434** One important point on which the Conference went back to the 1972 draft is the title of this article, and consequently its scope. The 1973 draft was entitled “zones of military operations”, with a view to distinguishing, on the one hand, situations where military operations are taking place, including “combat zones” and, on the other hand, occupied territories.²
- 2435** The discussion in Committee II was concerned first of all with the definition of zones of military operations. Some wished to indicate more precisely that these were zones “where fighting is taking place”, and even more specifically, “land” fighting because it was held that “civil defence was essentially land-based”.³ This point was contested by a delegation which pointed out that land areas may be “affected by aerial or naval action”.⁴
- 2436** However, this proposal was also contested more fundamentally by a delegate who pointed out that occupied territories are also subject to military operations.⁵ This observation in particular led Committee II to revert to a general concept of protection, the provisions of this article covering all forms of civil defence, while Article 63 (*Civil defence in occupied territories*), which is about occupied territories, does not replace it, but supplements it as far as occupied territories are concerned.⁶ However, Article 62 is not concerned with military civil defence units.

⁶ Cf. *O.R.* XIII, p. 369, CDDH/406/Rev.1, para.49.

Military civil defence units

2437 In the commentary on the 1973 draft the ICRC included a paragraph on this question, by way of information, which set out the views of some of the experts who had been consulted.⁷ The problem was discussed at length during the Conference. As it forms a separate article in the text which was finally adopted (Article 67 – *Members of the armed forces and military units assigned to civil defence organizations*), it will be dealt with under the commentary on that article.⁸

Paragraph 1*First sentence – Respect and protection*

2438 Article 61 (*Definitions and scope*) defines civil defence organizations,⁹ while this paragraph is only concerned with *civilian* civil defence organizations. The use of this adjective was closely linked to the introduction of a special article on members of the armed forces and military units.

2439 The personnel of civil defence organizations is defined above.¹⁰

2440 The concepts of respect and protection have also been examined above.¹¹ Respect and protection are due to civilian civil defence organizations and their personnel “subject to the provisions of this Protocol, particularly the provisions of this Section”. As the report of Committee II clearly shows, it was wished to indicate that members of civil defence personnel are firstly “protected as civilians under this Protocol”, and as such they are protected in particular by the provisions included in Part IV, Section I; they are then more particularly covered by Articles 61-66, which therefore supplement, though do not replace, the general provisions.¹²

2441 This reminder of the general protection which members of civilian civil defence organizations enjoy *as civilians* means that it was unnecessary to mention that they should not be made the object of attack, or as the 1973 draft in particular recommended, they should not be *deliberately attacked*.¹³ As mentioned above, the provisions of Part IV, Section I, particularly those of Article 51 (*Protection of the civilian population*), are the ones which actually apply in this respect.¹⁴

⁷ Cf. *Commentary Drafts*, pp. 72-73 (Art. 55).

¹⁰ Cf. commentary Art. 61, sub-para. (c), *supra*, pp. 735-736.

¹¹ Cf. commentary Art. 10, para. 1, *supra*, p. 146.

¹² Cf. O.R. XIII, p. 367, CDDH/406/Rev.1, para. 46.

¹³ Cf. CE 1972, *Report*, Vol. I, p. 167, para. 3.318; draft, Art. 55, para. 1.

¹⁴ On this subject, cf. in addition O.R. XII, p. 100, CDDH/II/SR.63, para. 36; p. 107, CDDH/II/SR.64, para. 9; p. 113, para. 43.

Second sentence – Circumscription of activities

- 2442 This sentence grants civil defence organizations and their personnel the right to perform their civil defence tasks. The report of Working Group A stated that this was a “formula, designed to ensure the freedom of civil defence organizations”.¹⁵ The expression of this principle is important, particularly in occupied territories. Its implementation in these areas is elaborated in Article 63 (*Civil defence in occupied territories*). As regards the relationship between civilian civil defence organizations and the authorities under which they operate, this should not in principle cause any problem, as it is entirely in the authorities’ interests for the civil defence tasks to be performed.
- 2443 Nevertheless, if there were any disputes, the fact is that these organizations must be “organized or authorized” by such authorities.¹⁶ Thus their “freedom” does not seem to be very great.
- 2444 However, this sentence can be seen as an exhortation of such authorities not to arbitrarily refuse the right to perform such tasks to organizations fulfilling the required conditions, nor to arbitrarily withdraw that right from such organizations, particularly when there is an urgent need for them.¹⁷
- 2445 Subject to these remarks, the right can only be withdrawn – or, more often, curtailed – in case of “imperative military necessity”.¹⁸ This expression is not explained here, but what it amounts to is that such tasks may only be forbidden or curtailed when the authorities are placed before the alternative of either changing major operational plans or doing without civil defence personnel. An example might be works that must be carried out in an area where security cannot be guaranteed because of availability of resources and in the light of imperative operational choices. In such cases the choice must be based on the principles laid down particularly in Articles 51 (*Protection of the civilian population*) and 57 (*Precautions in attack*).¹⁹
- 2446 Finally, it should be noted that the right of civil defence personnel to perform their civil defence tasks also clearly implies that they will not be interned unless the security of the Occupying Power renders internment absolutely necessary.²⁰

Paragraph 2

- 2447 This paragraph is taken from the 1973 draft,²¹ with some drafting modifications. For that matter, the idea of protecting those persons performing

¹⁵ *Ibid.*, p. 375, CDDH/II/SR.91, para. 19.

¹⁶ *Cf.* commentary Art. 61, sub-para. (c), *supra*, pp. 735-736.

¹⁷ However, it is worth noting the remark of one delegate, who considered that this sentence “did not restrict the right of Governments to use personnel belonging to civilian civil defence organizations as they saw fit”: *O.R.* VI, p. 216, CDDH/SR.42, para. 67.

¹⁸ On this subject, *cf.* commentary Art. 54, para. 5, *supra*, pp. 658-659.

¹⁹ *Cf. supra*, pp. 613 and 677.

²⁰ *Cf.* Fourth Convention, Art. 42, para. 1.

²¹ *Cf.* draft Art. 55, para. 2.

civil defence tasks, outside civil defence organizations, had already been proposed during the second session of the Conference of Government Experts.²²

2448 As was stated when the draft article was submitted in Committee II, this paragraph is the “logical corollary” of paragraph 1, as, although it seemed justified “to grant [...] in the first place protection to specialized bodies”, the occasional use of persons who do not belong to such organizations should not be prohibited.²³

2449 The possibility of appealing to the civilian population in case of need is also laid down in Article 18 of the First Convention and in Article 17 (*Role of the civilian population and of aid societies*) of the Protocol. However, it is limited there to collecting the wounded and sick and to caring for them. The present paragraph therefore allows for an extension, where necessary, of the scope of activities performed by the population when an appeal is made to it.

2450 However, no reference is made, as in Article 18 of the First Convention, to the possibility of the population acting spontaneously. In order to be protected the civil defence action must always be made *in response to* an appeal from the “competent authorities” i.e., the authorities which form part of the government established in the territory concerned, and *under the control* of those authorities. Thus the special protection does not extend beyond such action. This restriction is understandable, for although spontaneous activity towards the wounded left without care should indisputably be encouraged, civil defence tasks sometimes have a more technical or more ambiguous character, as was shown above in the examination of those tasks.²⁴ To encourage the civilian population to act spontaneously in the performance of such tasks as, for example, assistance in maintaining public order could lead to delicate or even dangerous situations.

2451 Nevertheless, in practice it is to be hoped that there will be some flexibility in the implementation of this provision; for example, it would be regrettable to condemn the initiative of a civilian who had succeeded in preventing a fire on a farm.

2452 However, the requirement that control must be in the hands of the authorities is also a way of reminding the latter of their responsibility in this field, which is, on the one hand, to ensure the proper functioning of civil defence, if necessary with the assistance of the civilian population, and on the other hand, to prevent any abuse: respect for the distinctive sign depends on this.

Paragraph 3

2453 Paragraph 3 deals with the protection of buildings and *matériel* used for civil defence purposes, and with civil defence shelters.

²² Cf. particularly *CE 1972, Report*, Vol. II, p. 94, CE/COM III/OPC 15 (draft Art. 68) and p. 95, CE/COM III/OPC 17 (draft Art. 68).

²³ Cf. *O.R. XII*, p. 59, CDDH/II/SR.60, para. 32. One delegate even insisted that “it should be possible for any civilian to participate in civil defence activities”. Cf. *O.R. XII*, p. 81, CDDH/II/SR.61, para. 63.

²⁴ Cf. commentary Art. 61, sub-para. (a), *supra*, pp. 719-732.

- 2454 The buildings concerned are those accommodating civil defence organizations, i.e., primarily their administrative services, but also the locations for personnel on guard duty, stores for *matériel*, garages housing vehicles intended for civil defence etc.
- 2455 The *matériel*, is that defined in Article 61 (*Definitions and scope*), sub-paragraph (d).²⁵ What is important is not the type of *matériel* but its use for civil defence purposes. As stated by one delegate,²⁶ this reminder was actually quite unnecessary, since “*matériel*” materials is defined as such in Article 61 (*Definitions and scope*), sub-paragraph (d).
- 2456 Finally, the shelters referred to are those serving to protect the civilian population during attacks, particularly air raids. These are covered here, whether or not they are organized and made available by civil defence organizations.²⁷
- 2457 As regards the respect to which such objects are entitled, the 1973 draft provided that they “shall not be intentionally attacked or destroyed”.²⁸
- 2458 During the second session of the Conference of Government Experts the view was expressed that the prohibition should be limited to “deliberate attacks”.²⁹ In this way it would be prohibited to attack such objects as such, but this would not include incidental damages which they might suffer.
- 2459 During the Diplomatic Conference the position of the Chapter on civil defence in Part IV, Section II, of the Protocol was, in particular, put forward as an argument in favour of the idea that reference could simply be made, as regards the protection of such objects, to the article on the general protection of civilian objects, as that article provides a more specific and complete definition of protection.³⁰ This point of view finally prevailed. Thus civil defence objects are subject to the same rules as other civilian objects,³¹ and the efficacy of their protection depends to a large extent on their distance from any military objective. The only “advantage” that these objects have, compared with other civilian objects, is that they can be marked with the distinctive sign of civil defence (provided of course that they are *exclusively* assigned to civil defence tasks),³² and thus be identified as civilian objects with a special right to protection. Moreover, in this respect these objects are comparable to other objects authorized to display a distinctive protective emblem, such as medical objects and cultural objects. In common with medical objects, they also have similar provisions specifying when the right to protection ceases, and how this should be carried out.³³

²⁸ Draft Art. 55, para. 3.

²⁹ Cf. CE 1972, Report, Vol. II, p. 167, para. 3.318.

³⁰ Cf. O.R. XII, p. 104, CDDH/II/SR.63, paras. 52-53; p. 113, CDDH/II/SR.64, para. 43; p. 375, CDDH/II/SR.91, para. 21.

³¹ In this respect cf. particularly commentary Arts. 52, 57-58, *supra*, pp. 629 and 677.

³² Cf. commentary Art. 66, para. 1, *infra*, pp. 780-782.

³³ Cf. particularly Arts. 13 and 65.

- 2460 The second sentence of the paragraph addresses a different problem, namely, the right of the authority under whose control the civil defence objects are, to use them for other purposes or to destroy them, and the scope of that right.
- 2461 Objects should be understood to mean all that is connected with civil defence, except for personnel, i.e., buildings on the one hand, and *matériel* as defined in this Chapter,³⁴ on the other.
- 2462 The right to destroy objects used for civil defence purposes or to divert them from their proper use is only granted to “the Party to which they belong”. This clearly shows that the possibility for an Occupying Power to destroy or divert such objects from their proper use is not dealt with, this problem being dealt with in Article 63 (*Civil defence in occupied territories*).³⁵
- 2463 Here the question is in particular to allow the armed forces of a State not to leave to the enemy objects designed for civil defence purposes, but to apply a “scorched earth” policy in this respect, as accepted implicitly in Article 54 (*Protection of objects indispensable to the survival of the civilian population*), paragraph 5.³⁶
- 2464 The delicate question which then arises is if there are any limitations upon this right to destroy objects used for civil defence purposes or to divert them from their proper use. The text adopted by consensus by Committee II³⁷ restricted this right to cases of “imperative military necessity”. Several delegates had stressed the importance of these words, for that matter.³⁸
- 2465 An amendment submitted at one of the final plenary meetings³⁹ called for the deletion of the reference “in the case of imperative military necessity”. The reason for this amendment was probably a desire not to encroach on national sovereignty in this field.⁴⁰
- 2466 Although it cannot be precisely defined, it may nevertheless be assumed that there is a limit on the right of the authorities concerned to destroy objects used for civil defence purposes or to divert them from their proper use.
- 2467 The principles of international humanitarian law and the rules on the wounded and sick, which may be referred to by way of analogy, suggest that this limit is exceeded on the one hand, when the destruction or diversion does not fulfil

³⁴ Cf. Art. 61, sub-para. (d).

³⁵ Cf. commentary Art. 63, paras. 4-6, *infra*, pp. 754-758.

³⁶ In this sense, cf. *O.R.* XII, p. 376, CDDH/II/SR.91, para. 25.; pp. 377-378, paras. 35-37.

³⁷ Cf. *O.R.* XIII, p. 402, CDDH/406/Rev.1, Annex: Articles adopted by Committee II (Art. 55).

³⁸ Cf. particularly *O.R.* XII, p. 378, CDDH/II/SR.91, para. 39.

³⁹ Cf. *O.R.* III, p. 253, CDDH/417.

⁴⁰ However, this amendment provoked a criticism from one delegation, which pointed out that the result “is that the obligations on behalf of the civilian population with regard to the availability of shelters and the civil defence equipment and *matériel* have been weakened”: *O.R.* VI, p. 233, CDDH/SR.42, Annex (Netherlands). Another delegation interpreted the deletion differently and considered that “the postulation of military necessity as the sole ground on which an exception could be made would encourage the spirit of militarism”; moreover, it regretted that this possibility of diverting or destroying objects assigned to civil defence should not be limited by other conditions, and stated that “presumably, however, humanitarian aims would be taken into consideration” (*ibid.*, p. 215, CDDH/SR.42, para. 66).

imperative military necessity, and on the other hand when, over and above such necessity, it manifestly causes harm to those persons to whose protection the objects should have contributed.

2468 Thus to use *matériel* intended for civil defence purposes for other purposes is not unacceptable – provided of course that the distinctive sign has been removed – if the remaining *matériel* assigned to civil defence organizations is sufficient for the latter to continue to perform their tasks equally effectively. On the other hand, such use is not acceptable if it prejudices the activities of such organizations. In that case it would also constitute a breach of Article 58 (*Precautions against the effects of attacks*), sub-paragraph (c).⁴¹

Y.S.

⁴¹ On this subject, *cf. supra*, pp. 694-695.

Protocol I

Article 63 – Civil defence in occupied territories

1. In occupied territories, civilian civil defence organizations shall receive from the authorities the facilities necessary for the performance of their tasks. In no circumstances shall their personnel be compelled to perform activities which would interfere with the proper performance of these tasks. The Occupying Power shall not change the structure or personnel of such organizations in any way which might jeopardize the efficient performance of their mission. These organizations shall not be required to give priority to the nationals or interests of that Power.
2. The Occupying Power shall not compel, coerce or induce civilian civil defence organizations to perform their tasks in any manner prejudicial to the interests of the civilian population.
3. The Occupying Power may disarm civil defence personnel for reasons of security.
4. The Occupying Power shall neither divert from their proper use nor requisition buildings or *matériel* belonging to or used by civil defence organizations if such diversion or requisition would be harmful to the civilian population.
5. Provided that the general rule in paragraph 4 continues to be observed, the Occupying Power may requisition or divert these resources, subject to the following particular conditions:
 - (a) that the buildings or *matériel* are necessary for other needs of the civilian population; and
 - (b) that the requisition or diversion continues only while such necessity exists.
6. The Occupying Power shall neither divert nor requisition shelters provided for the use of the civilian population or needed by such population.

Commentary

General remarks

2469 When it adopted this article, Committee II also adopted the following comments¹ (Articles 55 and 56 referred to being the present Articles 62 (*General protection*) and 63):

“Article 55 applies to both occupied and non-occupied territory. Article 56 is thus supplementary to Article 55 as far as occupied territories are concerned. Article 63 of the Fourth Geneva Convention of 1949 is also applicable. It was emphasized in the debate that this article is not intended to strengthen the position of an Occupying Power.”

2470 The comments therefore contain three points which were repeatedly raised during the CDDH:

- the *supplementary* character of Article 63 in relation to Article 62 (*General protection*);²
- the equally supplementary character of Article 63 in relation to Article 63, paragraph 2, of the Fourth Convention;³

¹ *O. R. XIII*, p. 369, CDDH/406/Rev.1, para. 49.

² On this subject, *cf.* also in particular *O.R. XII*, p. 65, CDDH/II/SR.60, para. 61; p. 71, CDDH/II/SR.61, para. 11; p. 121, CDDH/II/SR.65, para. 25; p. 122, para. 29; *cf.* also commentary Art. 62, *supra*, pp. 738-739.

³ On this subject, *cf.* also in particular *O.R. XII*, p. 60, CDDH/II/SR.60, para. 35; p. 119, CDDH/II/SR.65, para. 17; p. 121, paras. 26-27; p. 125, para. 46.

- the intent not to strengthen the rights of the Occupying Power.⁴

2471 These comments should be borne in mind in an examination of the various provisions of the article.

2472 Finally, it will be noted that the article of the 1973 draft has been considerably expanded from two to six paragraphs, particularly in the light of numerous amendments and during the deliberations of the Group set up by Committee II to examine the Chapter on civil defence.

2473 In fact the substantive changes are less far-reaching than they seem to be:

- paragraph 1 is fairly closely based on paragraph 1 of the 1973 draft;
- the substance of paragraph 2 was almost entirely included in paragraph 1 of Article 56 of the 1973 draft;
- although paragraph 3, relating to the disarming of civil defence personnel by the Occupying Power, had indeed not been mentioned, it could legitimately be considered to be self-evident;
- paragraphs 4 and 5 are developed from paragraph 2 of the 1973 draft, concerning requisition or diversion of civil defence *matériel* by the Occupying Power, a problem which was discussed at length in Committee II;
- finally, paragraph 6 appropriately specifies that under no circumstances may shelters provided for civil defence be requisitioned or diverted from their proper use, even if they do not belong to civil defence organizations. The 1973 draft did not include this provision.

Paragraph 1 – Facilities which the Occupying Power must provide

First sentence

2474 Despite a question from one delegate,⁵ the concept of occupied territories was not re-examined with respect to civil defence.⁶

2475 Civil defence organizations are those which were defined in Article 61 (*Definitions and scope*), sub-paragraph (b). However, only *civilian* organizations are covered here. The question of military personnel who, while serving within civil defence organizations, have fallen into the power of the enemy in occupied territory, is dealt with in Article 67 (*Members of the armed forces and military units assigned to civil defence organizations*).⁷

2476 The authorities concerned here are those of the Occupying Power or those appointed by the latter.

2477 This first sentence is of a general character, while the other sentences of the paragraph specify its instances of application.⁸ However, the “facilities

⁴ On this subject, *cf.* also in particular *O.R.* VI, pp. 236-237, CDDH/II/SR.42, Annex (Romania); pp. 241-242 (Yugoslavia).

⁵ *Cf.* *O.R.* XII, p. 70, CDDH/II/SR.61, para. 4.

⁶ On this question, *cf.* *Commentary IV*, in particular pp. 21-22 (Art. 2, para. 2) and pp. 274-276 (Art. 47).

⁷ *Cf.* commentary Art. 67, para. 2, *infra*, pp. 799-802.

⁸ In this sense, *cf.* *Commentary Drafts*, p. 73 (Art. 56, para. 1).

necessary” for the performance of civil defence tasks are not listed or explained, either in this sentence or in the rest of the paragraph. The phrase refers above all to making the performance of the civil defence mission possible; on the one hand, by authorizing access to places where the tasks must be performed and by allowing personnel assigned to civil defence to carry out their activities, on the other hand, by authorizing and even assisting civil defence organizations in procuring the *matériel* necessary for such tasks, such as blankets or other objects essential for shelter, and equipment essential for fire-fighting such as boots or spare parts for vehicles.

- 2478 Nevertheless, the difficulty with this question is not so much what precisely is included in the rule, but how far it reaches.
- 2479 The “Outline for Draft Regulations” on civil defence presented to the Conference of Government Experts (referred to below as “Outline”) indicated that civil defence organizations would be granted in occupied territory “every facility for them to carry out their tasks, subject to temporary and exceptional measures that may be imposed by the Occupying Power for urgent reasons of security”.⁹
- 2480 In the same vein, the words “to the extent feasible” were added in an amendment submitted in Committee II¹⁰ because, according to the sponsors of the amendment, it is not very realistic to provide such an obligation “without qualification”.¹¹
- 2481 Finally, another amendment provided that “the provisions of the present article are subject to such temporary and exceptional measures in derogation as may be necessary for urgent reasons of security of the Occupying Power”.¹² The sponsor of the amendment based his proposal in this respect on Article 63 of the Fourth Convention, which actually imposes obligations on the Occupying Power “subject to [...] urgent reasons of security”.¹³
- 2482 However, the expression “to the extent feasible” was rejected, particularly because it was considered that this weakened the text,¹⁴ and “the occupying authorities must not be left free to interpret the situation in a sense which went against the interests of the civilian population.”¹⁵
- 2483 This decision does indeed show how rigorous the obligation imposed on the Occupying Power is. And yet it cannot be claimed that it is imposed without taking into account the circumstances and the material possibilities of fulfilling it: no one can be required to do the impossible. However, by rejecting this amendment the Diplomatic Conference emphasized that the argument that something is impossible should not be too readily adopted as an excuse.
- 2484 For that matter, if the situation really does render impossible the concession of certain facilities, the obligations of the Occupying Power with regard to civil

¹² O.R. III, p. 256, CDDH/II/346.

¹³ Cf. Art 63 of the Fourth Convention, introductory sentence, and O.R. XII, p. 121, CDDH/II/SR.65, para. 26.

¹⁴ Cf. O.R. XII, p. 328, CDDH/II/SR.86, para. 5.

¹⁵ *Ibid.*, p. 330, para. 16.

defence organizations are only secondary as compared with its obligations towards the civilian population. It is in particular by authorizing civil defence and relief actions coming from outside that the Occupying Power could try to compensate for its own deficiencies¹⁶

Second sentence

- 2485** The “Outline” provided that personnel permanently assigned to civil defence tasks could not be forced to undertake other activities against their will, but that personnel assigned to such tasks on a temporary basis could be employed on work as laid down in Article 51 of the Fourth Convention, provided that such work would not jeopardize their civil defence tasks.¹⁷ The text presented at the second session of the Conference of Government Experts further added that permanent civil defence personnel could not be compelled to serve outside occupied territory.¹⁸ During the second session it was decided to remove the distinction between permanent and temporary personnel and not to permit any such personnel to be compelled to perform tasks other than civil defence tasks or to serve outside occupied territory.¹⁹ The 1973 draft was worded in this sense, even laying down a prohibition on *all* relocation, i.e., including transfers within occupied territory.
- 2486** The text which was finally accepted is based on an amendment.²⁰ It places greater emphasis on the end result – the proper execution of tasks – than on the personnel themselves. For that matter, this concern was apparent when the above-mentioned amendment was submitted and one of the co-sponsors remarked that a prohibition against compelling personnel to undertake “activities unconnected with their functions” went too far, and that the text proposed by the amendment included “all that was required from the civil defence stand point”.²¹
- 2487** In fact, the freedom of the Occupying Power is quite limited, despite the apparently less restrictive wording which was adopted.
- 2488** First of all, the question of relocation of civil defence personnel was in the end left out. This question is actually covered by Article 49 of the Fourth Convention, which applies in occupied territories to civilian civil defence personnel, as well as to all civilians: that article clearly prohibits forced transfers, except where “imperative military reasons” so demand, and in such cases movement outside the bounds of the occupied territory is prohibited, “except when for material reasons it is impossible to avoid such displacement”.²²
- 2489** Then, with regard to the question of imposing an obligation to work on civil defence personnel, the general provisions of Article 51 of the Fourth Convention

¹⁶ On this subject, *cf.* in particular Arts. 64 and 70, para. 1.

¹⁷ *Cf.* CE/3b, pp. 154-155.

¹⁸ *Cf.* CE 1972, *Commentaries*, Part I, pp. 141-142 (Art. 69, para. 2).

¹⁹ *Cf.* CE 1972, *Report*, Vol. I, p. 167, paras. 3.323-3.324.

²⁰ *Cf.* O.R. III, p. 257, CDDH/II/404.

²¹ *Cf.* O.R. XII, p. 119, CDDH/II/SR.65, para. 15.

²² For further details on this subject *cf.* *Commentary IV*, pp. 279-282 (Art. 49).

are to be taken into consideration. These provisions lay down specifically that “the legislation in force in the occupied country concerning working conditions, and safeguards as regards, in particular, such matters as wages, hours of work” etc. shall be applicable.

2490 These general rules, added to the rule under consideration here, show that it will be practically impossible to impose legitimately other work on persons assigned full-time to civil defence tasks (the laws on working hours contained in the legislation of the occupied territory would probably prohibit this); and that the possibility of compelling personnel assigned to such tasks on a part-time basis to do other work is limited on the one hand by the prohibition of forcibly transferring such persons, and on the other hand, by the obligation under the labour law of the occupied territory to leave them sufficient time to perform their civil defence tasks.

Third sentence

2491 This third sentence repeats almost word for word Article 63, paragraph 1(b), of the Fourth Convention.²³ In a slightly different form it was included in the “Outline”²⁴ and it is virtually the same as the 1973 draft.

2492 However, in Committee II a draft amendment was introduced which would have seriously modified its meaning.²⁵ It proposed to end the sentence after the word “organizations”, i.e., to purely and simply prohibit the Occupying Power from changing in anything the structure or personnel of civil defence organizations from the way they were before the occupation.

2493 The *raison d'être* of this proposal was clearly explained: “it was intended not to leave the Occupying Power as sole judge of the desirability of making changes in the structure and personnel of civil defence bodies.”²⁶

2494 This proposal was finally not adopted, particularly because it seemed necessary to many delegates to maintain a balance between rights and duties of the Occupying Power, if there was to be any chance of these provisions being applied.²⁷

2495 This provision admittedly has the disadvantage of leaving a broad margin of interpretation and therefore to the subjective judgment of the Occupying Power.

²³ Sub-paragraph (b) provides: “The Occupying Power may not require any changes in the personnel or structure of these societies, which would prejudice the aforesaid activities”.

²⁴ In fact it provided that the Occupying Power may not “make in the personnel or management of the organizations any changes that might prejudice the efficient discharge of their tasks” (CE/3b, p. 154).

²⁵ Cf. O.R. III, p. 257, CDDH/II/424.

²⁶ Cf. O.R. XII, p. 327, CDDH/II/SR.86, para. 2.

²⁷ Cf. in particular *ibid.*, pp. 123-124, CDDH/II/SR.65, paras. 37 and 41.

However, seen in the context of the article as a whole, which is severe upon the Occupying Power, it does not allow any underhand abuses.²⁸

Fourth sentence

- 2496** Although it is expressed in a rather different way, the concept contained in this sentence was present already in the “Outline”.²⁹
- 2497** The 1973 draft also provided that the Occupying Power could not demand that civil defence bodies and their personnel “give the nationals of the Occupying Power priority”.³⁰
- 2498** During the Diplomatic Conference an amendment was proposed to delete this sentence³¹ because it was “superfluous and in contradiction with the Geneva Conventions’ system”.³² On this point it is true that the provision practically flows from the other provisions of the paragraph, and more generally, from other rules and principles of international humanitarian law: as the transfer of the Occupying Power’s own civilian population into occupied territory is prohibited by the Fourth Convention,³³ there should really only be *military* nationals of the Occupying Power in such territory, apart perhaps from exception of some civilians who had settled there before the occupation. As civil defence should be restricted to tasks intended to protect the civilian population,³⁴ it would lose its special status if military nationals of the Occupying Power were given priority. From a more general point of view, moreover, international humanitarian law protects victims as such, and not on the basis of criteria such as that of nationality.³⁵
- 2499** However, the concern not to allow any ambiguity in this respect finally prevailed, and following two amendments,³⁶ a sentence was even added stipulating that no obligation may be imposed on civil defence organizations to give priority to the interests of the Occupying Power. From the point of view of the organizations themselves we may add that their obligation not to give priority applies both to nationals of the Occupying Power and, *a fortiori*, to the interests of the Occupying Power, if they wish to retain their special status.

²⁸ As regards the purpose of this provision, it is also interesting to refer to the following passage from the commentary on Article 63 of the Fourth Convention, which applies to civilian civil defence organizations: “The clause aims at prohibiting arbitrary removal of the directors of a Society, the introduction of new officials or, in general, any measures whose object is to make the Societies conform to the policy of the Occupying Power [...]” (*Commentary IV*, p. 332).

²⁹ Cf. CE/3b, p. 154, sub-para. (a)(iii).

³⁰ Cf. draft Art. 56, para. 1, last sentence.

³¹ Cf. O.R. III, p. 256, CDDH/II/358.

³² Cf. O.R. XII, p. 121, CDDH/II/SR.65, para. 24.

³³ Cf. Fourth Convention, Art. 49, para. 6.

³⁴ On this subject, cf. commentary Art. 61, sub-para. (a), *supra*, pp. 720-722.

³⁵ On this subject, cf. particularly commentary Art. 9, para. 1, *supra*, pp. 138-140.

³⁶ Cf. O.R. III, p. 255, CDDH/II/323; p. 257, CDDH/II/404.

Paragraph 2 – Prohibition of coercion prejudicial to the civilian population

- 2500 Paragraph 1 is basically aimed at enabling civil defence organizations to perform their tasks, on the one hand, by granting them the necessary facilities, and on the other hand, by allowing them to retain their structure and by keeping them from tasks which do not fall within their competence.
- 2501 Paragraph 2 deals with interference of the Occupying Power with the *manner* of performing civil defence tasks.
- 2502 It could be considered that such a concern was present in the text of the 1973 draft, though it had never been clearly expressed.
- 2503 In fact, this paragraph addresses a fundamental question, though only partially. The amendment from which it was developed actually proposed the addition of a paragraph to provide that: “the Occupying Power shall not compel civil defence bodies to perform their activities”.³⁷
- 2504 At first sight this proposal seems to serve the interests of civil defence organizations more than those of the civilian population. In fact, its *raison d’être* was not solely based on reasons related to the purposes of international humanitarian law, i.e., to ensure the most extensive and effective protection possible to victims of armed conflict. It followed from the view of a government whose “citizens were forbidden to accept and recognize occupation”.³⁸
- 2505 This approach clearly fell outside the field of international humanitarian law, and the wording which was finally adopted replaces it in this context by placing the emphasis on the interests of the civilian population. In fact, it does not prohibit the Occupying Power from compelling, coercing or inducing civil defence organizations to perform their tasks if this is in the interests of the civilian population. It only purports to prevent the performance of tasks *prejudicial to the interests* of the civilian population.
- 2506 Of course, this allows for a margin of judgment. However, it is clear that in the context of international humanitarian law it is only legitimate to refer to material or immaterial prejudicial effects when they are unrelated to the political situation. To give a precise example, it is not legitimate to claim that lack of action of a civil defence organization with regard to flood victims is in the interests of the population because in disorganizing the Occupying Power it would be bringing the liberation of the territory nearer: international humanitarian law only has any chance of being observed if such considerations are scrupulously avoided and not taken into account in interpreting its provisions.
- 2507 The question arises how far the Occupying Power can go to make civil defence organizations perform their tasks in the interests of the civilian population. *To compel* means to impose by means of rules or regulations which have the force of law, in general on pain of punishment; *to coerce* means to impose by force; *to*

³⁷ *Ibid.*, p. 255, CDDH/II/340.

³⁸ According to this view, civil defence organizations are obliged, even in the case of occupation, to obey the orders from the authorities of their own government who direct “the general defence of the people. That obligation also applied to the civil defence system which was not to become a part of the aggressor’s machinery”. *Cf. O.R. XII*, pp. 120-121, CDDH/II/SR.65, paras. 20-24.

induce means to bring pressure bearing with promises to give advantages or threats to remove them.

2508 The way in which tasks are imposed on civil defence organizations should of course be within acceptable limits, but this is not the place for defining such limits. In fact, they are the same limits as those set out in Article 51 of the Fourth Convention concerning compulsory labour, which is allowed in particular when the work concerned is necessary for public utility services.³⁹

2509 In fact, there is a choice between two alternatives: either members of civil defence organizations do their best to accomplish their tasks and the Occupying Power should hardly ever intervene; or they engage in passive resistance by refusing to perform such tasks and the Occupying Power may intervene to safeguard the interests of the civilian population; it can do so either in the context of paragraph 2, or, where necessary, through measures affecting the structure or personnel of civil defence organizations.⁴⁰

2510 However, two points should be added. First, the choice is presented in a completely neutral way in the context of this commentary: there is no question here of taking sides in a matter of conscience and of inducing people in an occupied country to perform work for the benefit of the civilian population, or conversely to refuse to perform such work, with the aim of resisting the Occupying Power either passively or actively. We simply want to indicate that certain rights or obligations of the Occupying Power depend on this choice.

2511 Furthermore, the situation mentioned above is based on the presumption that the Occupying Power acts in accordance with the law, which is of course not always the case. The real problem is that of an Occupying Power which uses the interests of the civilian population as a pretext for imposing modifications on the structure or personnel or on the courses of action of civil defence organizations when such modifications are actually not in the interests of that population. It is to avoid this type of abuse that one delegation stated in its explanation of vote that these provisions “guarantee civil defence organizations the right to decide whether or not in the specific case of occupation, continuation of their activities is in the interest of the civilian population”.⁴¹

2512 Admittedly, the texts are too clear to be able to give legal support to this view. However, this point of view, which was not an isolated one,⁴² should induce any Occupying Power to act with great caution before interfering with civil defence organizations, and it should induce the Protecting Powers or their substitutes to be vigilant with regard to the proper motives for such interference.

³⁹ On this subject, *cf. Commentary IV*, pp. 293-298.

⁴⁰ *Cf. commentary para. 1, third sentence, supra*, pp. 750-751. *Cf. in addition Art. 43 of the Hague Regulations of 1907.*

⁴¹ 41. *Cf. O.R. VI*, pp. 241-242, CDDH/SR.42, Annex (Yugoslavia).

⁴² *Cf. also ibid.*, pp. 236-237 (Romania) and, especially, the last sentence of the commentaries adopted by Committee II with that article: *supra*, p. 746.

Paragraph 3 – Disarming civil defence personnel

- 2513 The question of civil defence personnel bearing arms was not discussed in the context of this article, but with regard to Articles 65 (*Cessation of protection*) and 67 (*Members of the armed forces and military units assigned to civil defence organizations*).⁴³
- 2514 However, as some delegations were doubtful about the advisability of permitting civil defence personnel to carry arms, a compromise was achieved with the introduction of this paragraph which explicitly grants the Occupying Power the right to disarm such personnel.⁴⁴ According to the Rapporteur of Working Group A, the words “for reasons of security” are self-explanatory and serve to reassure the Occupying Power, “if it noticed that civil defence personnel were armed”.⁴⁵
- 2515 The expression “for reasons of security” should therefore be considered to be self-explanatory and does not constitute a condition to be met by the Occupying Power, which may disarm civil defence personnel without the need for any justification.
- 2516 Finally, the question could arise whether this paragraph is really necessary. One delegation explicitly claimed that this was not the case.⁴⁶ In fact, it must be admitted that it is hardly possible to contest the Occupying Power’s competence to disarm civil defence personnel in occupied territory, even without this paragraph which resulted from a compromise rather than from an argument of logic. For that matter, the absence of such a provision regarding civilian medical personnel in no way implies a prohibition for the Occupying Power to disarm such personnel.⁴⁷
- 2517 What is required of the Occupying Power in both situations is to facilitate the task of such personnel and therefore, if they are disarmed, to ensure in another way their safety and that of persons in their care.

Introduction to paragraphs 4, 5 and 6

- 2518 According to Article 69, paragraph 3, of the 1972 draft, “buildings, equipment and means of transport belonging to civil defence organizations shall remain for the use of the civilian population” and “may only be requisitioned temporarily, in cases of urgent necessity, and provided the requisition does not seriously jeopardize the protection of the civilian population”.⁴⁸
- 2519 This approach was restrictive in that it only covered buildings, *matériel*, and transports “which has been permanently assigned” to civil defence bodies.⁴⁹ On

⁴³ Cf. commentary Art. 65, para. 3, *infra*, pp. 774-778 and Art. 67, para. 1(d), *infra*, pp. 797-798.

⁴⁴ Cf. O.R. XII, p. 382, CDDH/II/SR.91, para. 62.

⁴⁵ *Ibid.*, p. 381, para. 59.

⁴⁶ Cf. O.R. VI, p. 229, CDDH/SR.42, Annex (Indonesia).

⁴⁷ Cf. commentary Art. 15, para. 3, *supra*, p. 194.

⁴⁸ CE 1972, Report, vol. I, pp. 167-168.

⁴⁹ Cf. Commentary Drafts, p. 74 (Art. 56, para. 2).

the other hand, as regards requisitions, the fact that these were not referred to was not because of an intent to rule them out, but because it was “considered preferable not to touch on this problem, rather than to introduce a prohibition which carried numerous reservations and exceptions that might be abused by the Occupying Power”, and thus, it was therefore “dealt with under the rules of international law with regard to requisitions”, i.e., in particular Article 52 of the Hague Regulations of 1907.⁵⁰

- 2520** The question of requisitions was discussed at length during the Diplomatic Conference. The approach of the 1973 draft was not adopted in the end, as provisions based on Article 14 (*Limitations on requisition of civilian medical units*), paragraphs 2 and 3, were preferred.⁵¹
- 2521** Previously a proposal had been made to simply prohibit the requisition of buildings, *matériel* and transports belonging to civil defence organizations;⁵² the reference to the Hague Regulations, which was supported by some,⁵³ was opposed by others;⁵⁴ others still had indicated their preference for not mentioning requisition, but without referring implicitly to the Hague Regulations.⁵⁵
- 2522** Thus the solution which was adopted was a compromise based on the provisions of Article 14 (*Limitations on requisition of civilian medical units*). It comprises a general rule prohibiting requisitions in one paragraph, and describes the exceptions in a second paragraph.
- 2523** Moreover, paragraph 6 of the article under consideration here reserves a special treatment for civil defence shelters.⁵⁶

Paragraph 4

- 2524** The objects covered by this paragraph are buildings, and *matériel* as defined in Article 61 (*Definitions and scope*), sub-paragraph (*d*), which therefore covers transports.
- 2525** It covers not only buildings and *matériel* “belonging to [...] civil defence bodies”, but also those which are “used by civil defence bodies”. This addition

⁵⁰ Cf. *ibid.* (Art. 56, para. 2 and note 43). Article 52 of the Hague Regulations of 1907 reads: “Requisitions in kind and services shall not be demanded from municipalities or inhabitants except for the needs of the army of occupation. They shall be in proportion to the resources of the country, and of such a nature as not to involve the inhabitants in the obligation of taking part in military operations against their own country.

Such requisitions and services shall only be demanded on the authority of the commander in the locality occupied.

Contributions in kind shall as far as possible be paid for in cash; if not, a receipt shall be given and the payment of the amount due shall be made as soon as possible.”

⁵¹ In this sense, cf. *O.R.* XII, p. 381, CDDH/II/SR.91, para. 57.

⁵² Cf. *O.R.* III, p. 254, CDDH/II/70; p. 258, CDDH/II/425.

⁵³ Cf. in particular *O.R.* XII, p. 60, CDDH/II/SR.60, para. 35; p. 117, CDDH/II/SR.65, para. 2; p. 123, para. 38.

⁵⁴ Cf. in particular *O.R.* XI, pp. 581-582, CDDH/II/SR.51, para. 19.

⁵⁵ Cf. in particular *O.R.* XII, p. 125, CDDH/II/SR.65, para. 45.

⁵⁶ Cf. *ibid.*, p. 381, CDDH/II/SR.91, para. 57.

was made following an amendment,⁵⁷ justified by the argument that “it was perfectly conceivable that civil defence bodies might make use of buildings etc. which did not officially belong to them”, and it was therefore also necessary to protect such objects.⁵⁸ The distinction between objects assigned to civil defence on a permanent basis and those not so assigned, which was made in the Commentary on 1973 draft, was therefore not adopted.⁵⁹

2526 First of all, it is prohibited to *divert such objects from their proper use*, in other words, to require them to be used for purposes other than that for which they are intended. For example, this would be the case if an ambulance were ordered to transport *matériel*.

2527 Secondly, it is prohibited to *requisition* such objects, which means that the Occupying Power may not secure them to meet the needs of the occupying army.

2528 However, this prohibition is mitigated inasmuch as it only applies “if such diversion or requisition would be harmful to the civilian population”. Thus in general any diversion or requisition which is not harmful to the civilian population is possible in principle, though it may not necessarily be permitted, for paragraph 5 lays down two additional conditions.

2529 This general condition is certainly not always easy to evaluate and requires good faith on the part of those who must apply it. However, it has the great advantage of placing the interests of the civilian population in occupied territory above any others as regards humanitarian considerations.

2530 Finally, it should be noted that the detrimental effects should be assessed not only at the time when objects are diverted or requisitioned, but throughout the duration of such diversion or requisition.

Paragraph 5

2531 This paragraph is subordinate to the preceding paragraph, to which it adds two cumulative conditions:

- First, buildings and *matériel* diverted from their proper use or requisitioned, must be “necessary for other needs of the civilian population”. This brief formula means that the Occupying Power must use such objects to carry out other obligations that it has vis à vis the civilian population of the occupied territory, and not for its own needs.
- Secondly, the requisition or diversion should continue only as long as the above-mentioned need for them remains. In other words, diverted or requisitioned objects which are no longer necessary to meet the needs of the civilian population must be returned to their first use, even if they are no longer essential to the performance of civil defence tasks. This provision rules out the possibility that requisitions apparently made in the interests of the civilian population, may be later reassigned to another use.

⁵⁷ Cf. O.R. III, p. 255, CDDH/II/323.

⁵⁸ Cf. O.R. XII, pp. 119-120, CDDH/II/SR.65, para. 19.

⁵⁹ Cf. *supra*, p. 754, and note 49.

- 2532** To summarize, let us take a practical example: a civil defence organization has several trucks to ensure transportation of its personnel in case of emergency. Some of these are not in use because they are not needed. The Occupying Power would be acting legitimately if it requisitioned them as a provisional arrangement to transport pupils from home to school with a view to meeting a technical shortage. In fact, it has a duty to facilitate the proper functioning of institutions devoted to the care and education of children.⁶⁰ However, if a sudden disaster once again rendered the trucks indispensable for civil defence tasks, they should be restored immediately. Finally, if that disaster did not occur, it should in any case restore the trucks to the civil defence organizations, irrespective of the needs of such organizations at the time, as soon as the trucks were no longer necessary for transporting the pupils, for example, if the means of transportation which provided this service previously were repaired.
- 2533** Thus strict limits are imposed on diversion or requisition, although some wished to go even further, either by prohibiting all requisition,⁶¹ or by imposing two apparently more draconian provisions, as did the 1972 draft:⁶² the urgent need for requisition and its temporary character.⁶³
- 2534** However, from the humanitarian point of view, the solution which was adopted seems to be an excellent one, since it best serves the general interests of the civilian population, while preserving the specific interests of civil defence, provided of course that it is applied in good faith.

Paragraph 6

- 2535** The specific mention of shelters provided for the use of the civilian population,⁶⁴ which was not made in the 1973 draft, was introduced by an amendment, though this was limited to the mention of “public shelters”.⁶⁵ One delegation, supporting this proposal, considered that this prohibition on diverting shelters from their proper use or requisitioning them, should be extended to private shelters in the interests of the civilian population.⁶⁶
- 2536** This suggestion was followed and the prohibition on diverting (the expression “from their proper use” being understood) and on requisitioning shelters was extended:
- on the one hand, to all shelters made available to the civilian population, i.e., basically all public shelters, irrespective of any assessment of whether they are needed;

⁶⁰ Cf. Fourth Convention, Art. 50, para. 1.

⁶¹ Cf. *supra*, p. 755.

⁶² Cf. *CE 1972, Report*, Vol. I, p. 167 (Art. 69, para. 3, of the ICRC draft and of the draft of the Sub-Commission).

⁶³ In this sense, cf. *O.R. XII*, p. 123, CDDH/II/SR.65, para. 35.

⁶⁴ On these, cf. commentary Art. 61, sub-para. (a)(iii), *supra*, pp. 723-724.

⁶⁵ Cf. *O.R. III*, p. 254, CDDH/II/307.

⁶⁶ Cf. *O.R. XII*, p. 123, CDDH/II/SR.65, para. 34.

– on the other hand, to all other shelters, including private shelters, this time depending on a criterion of need. In this case, moreover, the *need* should be evaluated according to the way “need” was defined prior to the occupation, and their requisition may not be justified, for example, by the argument that the Occupying Power considers all civil defence efforts superfluous. Thus requisition should remain exceptional: it could apply, for example, to a private individual who had built himself an underground palace.

2537 Moreover, if there were no shelters, or virtually no shelters before the occupation, and the need for shelters arose, particularly because of air raids, the general responsibility of the Occupying Power towards the population of occupied territory requires that a solution be found. This is where the concept of shelters “needed” by the civilian population becomes significant, as every adequate building, particularly underground, should be assigned to shelter the population as a priority. Finally, it should be noted that a separate paragraph has been devoted to shelters because, as we have seen, they do not necessarily come under the responsibility of civil defence organizations, and therefore if all shelters are to be covered, it is necessary to distinguish them from the buildings and *matériel* belonging to such organizations.⁶⁷

Y.S.

⁶⁷ Cf. also Art. 58, sub-para. (c).

Protocol I

Article 64 – Civilian civil defence organizations of neutral or other States not Parties to the conflict and international co-ordinating organizations

1. Articles 62, 63, 65 and 66 shall also apply to the personnel and *matériel* of civilian civil defence organizations of neutral or other States not Parties to the conflict which perform civil defence tasks mentioned in Article 61 in the territory of a Party to the conflict, with the consent and under the control of that Party. Notification of such assistance shall be given as soon as possible to any adverse Party concerned. In no circumstances shall this activity be deemed to be an interference in the conflict. This activity should, however, be performed with due regard to the security interests of the Parties to the conflict concerned.
2. The Parties to the conflict receiving the assistance referred to in paragraph 1 and the High Contracting Parties granting it should facilitate international co-ordination of such civil defence actions when appropriate. In such cases the relevant international organizations are covered by the provisions of this Chapter.
3. In occupied territories, the Occupying Power may only exclude or restrict the activities of civilian civil defence organizations of neutral or other States not Parties to the conflict and of international co-ordinating organizations if it can ensure the adequate performance of civil defence tasks from its own resources or those of the occupied territory.

Commentary**Paragraph 1 – Civilian civil defence organizations of States not Parties to the conflict**

2538 Paragraph 1 deals with civilian civil defence organizations of States not Parties to the conflict which perform civil defence tasks in the territory of a Party to the conflict.

2539 It is similar to Article 27 of the First Convention, which concerns *medical* personnel and units in comparable circumstances.¹

First sentence

2540 It follows from this sentence that:

- only personnel and *matériel* of *civilian* civil defence organizations may be sent into the territory of a Party to the conflict. This therefore excludes support provided on an individual basis and any that might be provided by *military* civil defence organizations;
- *matériel*² and personnel of such organizations cannot be sent into the territory of the Party to the conflict for which they are intended without the consent of the latter;
- that Party *controls* the use of such *matériel* and the work carried out by such personnel which are thus placed *under its responsibility*: this is important particularly in case of abuse.

2541 Moreover, it is indicated that such personnel and *matériel* may come from any State not Party to the conflict, whether or not it enjoys the status of neutrality or of permanent neutrality.³

¹ In this sense, *cf. O.R. XII*, p. 60, CDDH/II/SR.60, para. 36, which emphasizes, moreover, the usefulness of assistance from neutral countries “especially in conflicts taking place in countries which did not possess civil defence services”. *Cf. also ibid.*, p. 127, CDDH/II/SR.66, para. 2.

² On the meaning to be given to this word, *cf. commentary Art. 61*, sub-para. (d), *supra*, p. 736.

³ On the meaning of the expression “neutral and other States not Parties to the conflict”, *cf. commentary Art. 2*, sub-para. (c), *supra*, p. 61. In addition one delegation expressed its hesitation because it was afraid of abuses if this were made possible for all States not Parties to the conflict, and not only those enjoying permanent neutrality: *cf. O.R. VI*, p. 229, CDDH/SR.42, Annex (Indonesia, Art. 57).

- 2542** On the other hand, it is not specifically stated, though it must be assumed that:
- such personnel act with the consent of their own State. This is explicitly mentioned in Article 27 of the First Convention with regard to a similar situation and follows, moreover, from the fact that civil defence organizations must be set up, or authorized to perform their tasks, by the authorities of the Party to which they belong;
 - such personnel and *matériel* are exclusively assigned to, and used for civil defence tasks: this follows from the definition of civil defence organizations.⁴
- 2543** The protection accorded the personnel and *matériel* covered by this paragraph is the same as that which they enjoy when performing their tasks in their own territory: this is achieved simply by including the reference to the relevant articles, i.e., Articles 62 (*General protection*), 63 (*Civil defence in occupied territories*), 65 (*Cessation of protection*) and 66 (*Identification*). However, a detailed examination of these articles reveals that certain points require clarification:
- while civil defence organizations are “entitled to perform their civil defence tasks” as provided in Article 62 (*General protection*), paragraph 1, this right is nevertheless more restricted for an organization acting in territory of a State which is not its own: the Party giving its consent may withdraw such consent without having to give a reason for its decision, with the possible exception of occupied territories;⁵
 - Article 62 (*General protection*), paragraph 2, regarding appeals to civilians who are not members of civil defence organizations, does not in principle concern civilians of a State not Party to the conflict;
 - In accordance with Article 63 (*Civil defence in occupied territories*), paragraphs 4 and 5, the Occupying Power cannot requisition *matériel* of civil defence organizations of States not Parties to the conflict. If such *matériel* is no longer necessary to perform civil defence tasks in occupied territories, it should be returned to the State from which it came.

Second sentence

- 2544** The question which was raised here is whether the adverse Party to that receiving assistance from civil defence organizations of States not Parties to the conflict should give its consent to such assistance, or whether it should only be informed of it.⁶
- 2545** Some were in favour of “the agreement of all conflicting Parties concerned” with a view to ensuring the personnel concerned “the fullest possible protection”.⁷

⁴ Cf. commentary Art. 61, sub-para. (b), *supra*, pp. 732-733. Cf., in addition, commentary on the fourth sentence of this paragraph, *infra*, p. 763.

⁵ Cf. commentary para. 3, *infra*, pp. 766-767.

⁶ Cf. O.R. XII, p. 130, CDDH/II/SR.66, para. 19.

⁷ Cf. O.R. III, p. 260, CDDH/II/349, and O.R. XII, p. 70, CDDH/II/SR.61, para. 5.

- 2546 However, the case for a need to obtain the consent of the adverse Party was defeated, particularly because of the difficulty of obtaining it and the delays this would cause, and because it “would confer upon one Party powers over territory which did not belong to it”.⁸ This last point of view prevailed.
- 2547 Furthermore, the sentence finally adopted requires clarification on two points: is it the Party receiving the assistance or the State granting it which must give the notification? In submitting the draft of Article 57 the ICRC expert had indicated that there was an obligation to do so for the State from which the assistance came.⁹ This approach was justified by the fact that in the draft text notification was a condition of protection.¹⁰
- 2548 In the text which was finally adopted this is clearly not the case, since notification must be given “as soon as possible”. This leads to the conclusion that the *obligation* to give notification is imposed on the benefitting State even though it is also for obvious reasons in the interests of the State sending the assistance to transmit that information itself: on the one hand, to increase the safety of the personnel it has sent, and on the other, to maintain good relations with the Party which is to receive the notification.
- 2549 If necessary, notification by the benefitting Party can be given through the intermediary of the Protecting Power, its substitute or an impartial humanitarian organization.
- 2550 The notification must be given to every adverse Party “concerned”. In general an adverse Party is concerned *a priori* from the time that it is involved in direct hostilities with the benefitting Party.
- 2551 Thus it is only in a large-scale conflict involving several States that there may be adverse Parties which are not concerned, e.g., because they have no direct contact with the benefitting Party.

Third sentence

- 2552 This sentence repeats the concept expressed in Article 27, paragraph 3, of the First Convention. It was taken with a slight textual modification from the 1973 draft. As stated in the commentary on Article 27 mentioned above, this sentence is intended to prevent the assistance concerned from being “wrongly interpreted” and “the subject of criticism based on ignorance or malevolence”.¹¹
- 2553 The phrase “interference in the conflict” means “participation in hostilities” or “a breach of neutrality”.¹²
- 2554 The proposal presented to the Conference of Government Experts to replace the expression “interference in the conflict” with “hostile act”¹³ was not discussed.

⁸ Cf. O.R. XII, p. 129, CDDH/II/SR.66, paras. 15-16.

⁹ *Ibid.*, p. 128, para. 3.

¹⁰ Cf. draft Art. 57, para. 1.

¹¹ *Commentary I*, p. 233.

¹² *Ibid.*, p. 232.

¹³ Cf. CE 1972, Report, Vol. I, p. 168, par. 3.331; Vol. II, p. 94, CE/COM III/OPC 14.

2555 In fact, a treaty affects only the *legal* relations between States Parties to that treaty, and to that extent the activity concerned in no way modifies the relations between the Party from which the assistance comes and the adverse Party of the benefitting State.

Fourth sentence

2556 This sentence, which supplements the preceding sentence was added to take into account a proposal to replace the third sentence by: “in no circumstances shall this activity be of such a nature as to constitute interference in the conflict”.¹⁴ This proposal fundamentally altered the preceding sentence,¹⁵ in that it implied that civil defence activities *could* be interference in the conflict, and that precautions should always be taken to ensure that they were not. The adoption of such a provision would have rendered any civil defence activity undertaken by a State not Party to the conflict very risky.

2557 The compromise which was finally achieved therefore consisted of adding the sentence under consideration here to the third sentence, which could then be retained in its original form.¹⁶

2558 The fourth sentence clarifies the preceding sentence, though without diminishing its scope. In other words, if, for one reason or another, the civil defence activity concerned were carried out without due regard to “the security interests of the Parties to the conflict concerned”, this could still not be termed interference in the conflict. In fact, it is only a recommendation.¹⁷

2559 However, there is a limit: the activity must be *civil defence activity*. In this respect great care should be taken to ensure in particular that personnel of civil defence organizations of States not Parties to the conflict are only assigned to tasks which manifestly belong to civil defence and which do not entail any risk of such personnel getting involved in performing other tasks.¹⁸

2560 In this context the expression “Parties to the conflict concerned” refers to the adverse Parties of the benefitting Party. In fact, the interests of the benefitting Party are ensured by the fact that the activities are placed under its control – so that, for example, it can prevent access of the personnel concerned to areas containing strategic objectives.

Paragraph 2 – International co-ordination

2561 This paragraph lays down the principle of international co-ordination of civil defence actions and of the protection of international civil defence organizations.

¹⁴ Cf. *O.R.* XII, p. 385, CDDH/II/SR.92, para. 16.

¹⁵ In this sense, cf. *ibid.*, pp. 386-387, paras. 24-27.

¹⁶ On this subject, cf. *O.R.* XIII, p. 374, CDDH/406/Rev.1, para. 51; *O.R.* XII, pp. 385-389, CDDH/II/SR.92, paras. 16-44.

¹⁷ In this sense, cf. *O.R.* XII, p. 389, CDDH/II/SR.92, paras. 42-44.

¹⁸ On this subject, cf. commentary Art. 61, sub-para. (b), *supra*, pp. 732-735.

These two things should be distinguished, however, since co-ordination may take place even in the absence of international organizations.

First sentence

- 2562 Although protection of international organizations was provided for in the 1973 draft, the question of co-ordination had not been broached. This concept was introduced by Committee II. It was the result of a compromise,¹⁹ as some were afraid to grant international civil defence organizations the power to co-ordinate actions. For them, “relief actions could not be compared with civil defence actions. The latter might constitute interference in the conflict”.²⁰
- 2563 This point of view was contested by others who considered that “there were [...] no grounds for any misgivings about the scope of the aid envisaged”.²¹
- 2564 Finally, international co-ordination of civil defence activities is only *recommended* (in contrast with the international co-ordination of relief actions²²) to Parties receiving assistance and those providing it, if there is reason to do so. In other words, it is admitted that there are cases in which co-ordination is pointless, particularly when only one State supplies aid to a Party to the conflict. In addition, it is agreed that when co-ordination is useful, i.e., particularly if the aid comes from various different sources, it should not be *imposed* upon the Parties concerned.
- 2565 Ideally co-ordination should be carried out, on the one hand, between those providing aid, so as to deal with all the needs of a particular conflict as a whole and avoid overlapping, and on the other hand, in each benefitting Party and under the responsibility of the latter, in order to organize all the activities coherently, taking into account the respective skills and specialized knowledge of the various organizations providing aid.²³

Second sentence

- 2566 The reference to international organizations led to some discussion, on the one hand, because of the distrust felt by some with regard to co-ordination, as seen above, and on the other, because of the lack of specialized organizations capable of ensuring such co-ordination. The reference was introduced in the 1973 draft from a concern to provide for the future.²⁴ In fact, an international organization does already exist: the International Civil Defence Organization (ICDO). The observer for the ICDO indicated in Committee II that his organization “had been seeking to promote the organization by the countries in a given geographical

¹⁹ Cf. O.R. XIII, p. 370, CDDH/406/Rev.1, para. 51.

²⁰ Cf. O.R. XII, p. 387, CDDH/II/SR.92, para. 28.

²¹ *Ibid.*, para. 29.

²² Cf. Art. 70, para. 5.

²³ Cf. also commentary Art. 70, para. 5, *infra*, p. 829.

²⁴ Cf. O.R. XII, p. 128, CDDH/II/SR.66, para. 4.

region of civil defence centres capable of intervening in the event of natural disasters in peacetime”, but that it did not “possess [...] civil defence equipment”.²⁵ The expectation that certain bodies already set up in peacetime would be used in future in times of armed conflict, was also raised as an argument in favour of referring to such organizations.²⁶

2567 The meaning of the expression “in such cases” at the beginning of the sentence is not quite clear. The question is whether the provisions of this Chapter apply to relevant organizations whenever there are matters to be co-ordinated (i.e., “when appropriate”), or only when the Parties concerned *effectively* facilitate co-ordination. In fact, the apparently automatic application of the second sentence once the conditions of the first sentence are fulfilled, is deceptive. As there is only a recommendation to facilitate international co-ordination, there cannot be an obligation to accept relevant international organizations. Thus this provision simply means that if such organizations are accepted – a decision which rests solely with the benefitting State²⁷ – they must be protected in accordance with this Chapter.

2568 Thus, apart from the ICDO to the extent that it is operational, “relevant international organizations” comprise organizations which might be created in the future. Although some other international organizations, both governmental and non-governmental organizations, have already performed tasks which might be considered civil defence tasks, particularly in the field of evacuation, it should not be forgotten that the protection of this Chapter is confined to organizations assigned *exclusively* to such tasks, which therefore eliminates these organizations.

2569 The word “relevant” is used here in the sense of being “specialized in the field”. The French text uses the word “compétent”, but, as the English version shows, this is not intended to give any value judgment and is not used as the opposite of the term “incompétent”.

2570 Moreover, it is self-evident that the organizations concerned must be civilian organizations.²⁸

2571 The reference to “the provisions of this Chapter” is imprecise. What was said with regard to organizations of States not Parties to the conflict in respect of the reference to Articles 62 (*General protection*), 63 (*Civil defence in occupied territories*)²⁹, 65 (*Cessation of protection*) and 66 (*Identification*) also applies here *mutatis mutandis*.

2572 Incidentally, as the organizations under consideration are necessarily civilian, Article 67 (*Members of the armed forces and military units assigned to civil defence organizations*) cannot apply.

²⁵ *Ibid.*, p. 62, CDDH/II/SR.60, para. 48.

²⁶ *Ibid.*, p. 384, CDDH/II/SR.92, paras. 5-8.

²⁷ In this sense, *cf. ibid.*, p. 385, para. 15.

²⁸ *Ibid.*

²⁹ *Cf.* commentary para. 1, first sentence, *supra*, pp. 747-749.

Paragraph 3

- 2573** The object of Article 63 (*Civil defence in occupied territories*) is basically to determine the relationship between the Occupying Power and the civilian civil defence organizations in occupied territory. Therefore it does not clearly lay down the responsibility which falls upon the Occupying Power vis-à-vis the civilian population for ensuring that the necessary civil defence tasks are effectively performed.
- 2574** In fact, this paragraph highlights this responsibility: it imposes on the Occupying Power the obligation to accept aid from outside if it cannot “ensure the adequate performance of civil defence tasks”, which therefore implies the obligation to ensure that such tasks are performed one way or the other.
- 2575** This paragraph was not contained in the 1973 draft. It was proposed in an amendment³⁰ and adopted with only some minor drafting modifications.
- 2576** As the sponsor of this proposal stated, it was “designed to ensure that an Occupying Power could exclude or restrict the civil defence activities” of the organizations concerned only if it could “ensure the adequate performance of those activities itself”.³¹
- 2577** However, this apparently quite strict obligation requires some clarification.
- 2578** First, it only arises when the Occupying Power cannot “ensure the adequate performance of civil defence tasks”, either itself or through existing means available in occupied territory which under Article 63 (*Civil defence in occupied territories*) should stay in operation.
- 2579** This is comparable to the obligation that it has to accept relief actions if it is not able itself to ensure the supplying of objects indispensable for the survival of the civilian population.³² However, it must be admitted that it is difficult to establish exactly what the obligation entails, even more so than in the case of relief actions. In any case it seems clear that there could only be an *obligation* to accept aid in extreme cases, such as the evident inability to evacuate flood victims, to get fires under control or to rescue victims of air raids or earthquakes from under the rubble.
- 2580** Does a State not Party to the conflict or an international co-ordinating organization³³, in such cases, have a right to *impose* aid, even against the wishes of the Occupying Power? It would have been unrealistic to claim that this was the case, and when it adopted its report, Committee II also adopted the following commentary:

³⁰ Cf. *O.R.* III, p. 259, CDDH/II/324 (Art. 57, para. 2).

³¹ *O.R.* XII, p. 129, CDDH/II/SR.66, para. 9.

³² Cf. particularly Art. 59, Fourth Convention, and Art. 69, para. 2, of the Protocol.

³³ The reference here to “international co-ordinating organizations” rather than to “relevant international organizations”, as in the preceding paragraph, is not intended to imply different organizations. The organizations referred to here are basically those mentioned in paragraph 2, which do not as yet really exist in practice.

“It is understood that the activities of civil defence bodies of neutral or other States not Parties to the conflict or of international co-ordinating organizations in occupied territories are subject to the consent and control of the Occupying Power.”³⁴

2581 This statement is only apparently in contradiction with the text of the paragraph itself. In fact, there is indeed an obligation on the Occupying Power to ensure that civil defence tasks are performed adequately, if necessary by outside aid: if this is needed, the Protecting Power or its substitute will remind the Occupying Power of it. However, methods of implementation of this obligation cannot be prescribed to the Occupying Power, i.e., which State or States or organizations it should choose to provide the aid required. This involves compelling security considerations which it would not have been wise to ignore.

Y.S.

³⁴ *O.R. XIII*, p. 370, CDDH/406/Rev.1, para. 53.

Protocol I

Article 65 – Cessation of protection

1. The protection to which civilian civil defence organizations, their personnel, buildings, shelters and *matériel* are entitled shall not cease unless they commit or are used to commit, outside their proper tasks, acts harmful to the enemy. Protection may, however, cease only after a warning has been given setting, whenever appropriate, a reasonable time-limit, and after such warning has remained unheeded.
2. The following shall not be considered as acts harmful to the enemy:
 - (a) that civil defence tasks are carried out under the direction or control of military authorities;
 - (b) that civilian civil defence personnel co-operate with military personnel in the performance of civil defence tasks, or that some military personnel are attached to civilian civil defence organizations;
 - (c) that the performance of civil defence tasks may incidentally benefit military victims, particularly those who are *hors de combat*.
3. It shall also not be considered as an act harmful to the enemy that civilian civil defence personnel bear light individual weapons for the purpose of maintaining order or for self-defence. However, in areas where land fighting is taking place or is likely to take place, the Parties to the conflict shall undertake the appropriate measures to limit these weapons to handguns, such as pistols or revolvers, in order to assist in distinguishing between civil defence personnel and combatants. Although civil defence personnel bear other light individual weapons in such areas, they shall nevertheless be respected and protected as soon as they have been recognized as such.
4. The formation of civilian civil defence organizations along military lines, and compulsory service in them, shall also not deprive them of the protection conferred by this Chapter.

Commentary

General remarks

- 2582** This article aims at establishing the exact limits of the right to protection. In this respect it is very similar to Article 13 of the Protocol (*Discontinuance of protection of civilian medical units*), as well as to Article 22 of the First Convention, Article 35 of the Second Convention, and Article 19 of the Fourth Convention.
- 2583** Like those articles, Article 65 attempts to achieve this aim by setting out a list of acts which are deemed to be not harmful to the enemy. This list, which is not exhaustive,¹ shows that although the system used in Article 65 is similar to that of the above-mentioned articles, the problems to be solved are very different.
- 2584** Paragraph 2 gives three examples, while a whole paragraph is devoted to each of two particularly delicate problems, namely, the bearing of arms by civil defence personnel (paragraph 3) and the organizational structures that civil defence organizations are allowed to take (paragraph 4).

Paragraph 1 – Conditions and modalities

First sentence

- 2585** The persons and objects entitled to protection, as well as the right itself, were examined above.²

¹ In this sense, *cf.* in particular *O.R.* VI, p. 230, CDDH/SR.42, Annex (Israel). In the same sense regarding Article 13, *cf.* commentary Art. 13, *supra*, p. 173; with regard to the above-mentioned articles of the Conventions, *cf.* in particular *Commentary I*, p. 202 (Art. 22).

² *Cf.* commentary Art. 61, sub-paras. (b), (c) and (d), *supra*, pp. 732-736, and Art. 62, *supra*, p. 737.

- 2586** This right to protection “shall not cease” unless one necessary condition is met. The negative turn of phrase should be noted: this reveals that such a grave measure as the deprivation of protection must retain an exceptional character. Furthermore, even if such measure is taken, its effect will be suspended until a warning has been given and a time-limit has elapsed, giving the recipient of the warning time to obey.³
- 2587** The condition laid down in this provision is that the persons concerned must have committed, or the objects must have been used to commit “acts harmful to the enemy”.
- 2588** This expression was contested by some who would have preferred the term “hostile”, because of its “more specific” character.⁴ It is true that a harmful act can be committed unintentionally and the word “hostile” would have had the advantage of indicating *intent* to harm. However, Parties engaged in a conflict cannot be expected to allow an act harmful to them to continue indefinitely, even if there is no intent to harm. For this reason, and for the sake of harmonization of the terminology with the Conventions, the suggestion to adopt the expression used there and in Article 13 (*Discontinuance of protection of civilian medical units*) was followed.⁵
- 2589** The meaning of the expression “harmful act” has been examined before:⁶ the term is further clarified in this context by listing acts which are *not considered as acts harmful* to the enemy.
- 2590** Harmful acts only result in the cessation of protection if they are committed outside the “proper tasks” of civil defence. Article 13 (*Discontinuance of protection of civilian medical units*) uses the expression “humanitarian function”. The greater precision of the expression in this article can be explained by the fact that civil defence has a more clearly defined role to play and serves only the civilian population, while medical units are intended for assisting all the wounded, whether civilian or military. Moreover, as civil defence has been defined by listing all the tasks that it covers precisely and limitatively, it would have been unduly vague to refer only to the term “humanitarian function”.
- 2591** The fact remains that in the context of Article 65, as in that of Article 13 (*Discontinuance of protection of civilian medical units*), it will be exceptional for acts harmful to the enemy to be committed in the context of humanitarian activities, and then only incidentally.⁷

Second sentence

- 2592** This sentence is the same as the second sentence of Article 13 (*Discontinuance of protection of civilian medical units*), paragraph 1, which was examined above.⁸

³ On this subject, *cf.* commentary Art. 13, para. 1, *supra*, pp. 175-176.

⁵ *Cf.* O.R. XII, p. 136, CDDH/II/SR.66, para. 52.

⁶ *Cf.* commentary Art. 13, para. 1, *supra*, pp. 174-175.

⁷ On this subject, *cf.* commentary Art. 13, *supra*, p. 175.

⁸ *Ibid.*

Paragraph 2 – Acts not harmful to the enemy

2593 This paragraph contains the first three examples of acts which should not be considered as acts harmful to the enemy. Two further examples are given in paragraphs 3 and 4, respectively.

Sub-paragraph (a)

2594 The draft referred more briefly to civil defence personnel receiving instructions from military authorities. This question was debated at some length in Committee II, since, as stated in that body, “it was important, in the interests of the personnel involved, to state to what degree they might be permitted to be involved with a military authority”.⁹

2595 Some delegates, insisting that civil defence should not *be dependent* on military authorities,¹⁰ considered that “it was undesirable to ensure protection for civil defence personnel taking orders from the military authorities”.¹¹

2596 The deletion of this example was even formally proposed in an amendment.¹²

2597 However, the possibility for military authorities to give instructions to civil defence personnel in some circumstances was defended by many other delegates.¹³ The basic argument of those who supported this point of view was the need to co-ordinate the activities of civil defence personnel with those of the military, particularly in areas of military operations where “it was essential to make it clear that on the battlefield the military commander was in charge”.¹⁴

2598 Thus the importance of having a right to protection in cases of this type was emphasized,¹⁵ and this point of view prevailed.

2599 However, such instructions and supervision should only take place exceptionally, for if they were permanent, it would amount to genuine *dependence*, and the civilian character of the organizations concerned here would be cast in doubt. This distinction between “receiving instructions” from, and being “responsible to”, military authorities was actually brought out explicitly in the debate: “the idea of dependence evoked an element of permanence, which was absent from the idea of receiving instructions”.¹⁶

¹⁶ *Cf. ibid.*, pp. 141-142, para. 11. In the same sense, *cf.* in addition commentary para. 4, *infra*, p. 778.

Sub-paragraph (b)

- 2600** Co-operation of civil defence personnel with military personnel was already provided for in the 1973 draft. On the other hand, attachment of military personnel to civilian civil defence organizations was only added during the Diplomatic Conference.
- 2601** In general the discussion on the question of co-operation raised the same arguments as those put forward with regard to sub-paragraph (a).
- 2602** Some considered that the “exceptional” character of such co-operation should be specified, as otherwise the protection granted to civil defence personnel might become “illusory”.¹⁷ In this sense an amendment explicitly proposed to authorize co-operation only “as an exceptional measure”, on the one hand, and only “insofar as such co-operation is indispensable for the protection of the civilian population”, on the other.¹⁸
- 2603** Nevertheless, an obligation to ensure that co-operation would remain an exceptional step was rejected,¹⁹ and this idea was dropped. As regards the condition that such co-operation should be indispensable for the protection of the civilian population, this was not adopted either.
- 2604** However, it must not be forgotten that by its very definition, civil defence consists of tasks “intended to protect the civilian population”, and consequently co-operation could not lawfully be envisaged otherwise.
- 2605** The possibility of assigning military personnel to civil defence organizations was introduced in accordance with an amendment.²⁰ The intention of this amendment was to permit civilian organizations to benefit from the technical expertise of certain specialists difficult to find in time of armed conflict, except in the ranks of military personnel, without losing their civilian character as a result.²¹
- 2606** On the other hand, a proposal to allow attachment of “military units”²² was rejected after a vote²³ particularly because this would “completely modify the intent of the paragraph” and cast into doubt the civilian character of these civil defence organizations.²⁴
- 2607** Finally, it should be noted that military personnel assigned to civil defence organizations, while of course losing their status of combatants, nevertheless benefit from prisoner-of-war status if they fall into the power of the adverse Party.²⁵

¹⁷ Cf. *O.R.* XII, p. 66, CDDH/II/SR.60, para. 63, and p. 134, CDDH/II/SR.66, para. 43.

¹⁸ Cf. *O.R.* III, p. 267, CDDH/II/347.

¹⁹ Cf. in particular *O.R.* XII, p. 140, CDDH/II/SR.67, para. 3.

²⁰ Cf. *O.R.* III, pp. 268-269, CDDH/II/406 and Add. I.

²¹ In this sense, cf. in particular *O.R.* XII, p. 421, CDDH/II/SR.95, para. 58. In the commentary adopted with the report Committee II, moreover, indicated that only a “relatively small number” of members of the armed forces were concerned: *O.R.* XIII, p. 373, CDDH/406/Rev.1, para. 58

²² Cf. *O.R.* XII, p. 420, CDDH/II/SR.95, para. 54.

²³ *Ibid.*, p. 421, para. 60.

²⁴ *Ibid.*, pp. 420-421, paras. 55-59.

²⁵ On this subject, cf. Art. 67, paras. 1 and 2. Cf. in addition commentary para. 3, *infra*, pp. 777-778.

Sub-paragraph (c)

- 2608 As noted above, civil defence by definition, concerned with tasks intended to protect the *civilian population*.
- 2609 Therefore tasks with the object of assisting military victims do not fall under this definition and are not covered by this Chapter.
- 2610 However, it was important to determine to what extent civil defence personnel could assist military victims without losing their right to protection.
- 2611 The 1973 draft stated bluntly that carrying out “their tasks for the benefit of military victims” should not be considered to be harmful to the enemy.²⁶
- 2612 Although this clause was supported by one delegate,²⁷ most of the proposals made with regard to this subject during the Conference were concerned with restricting this possibility.²⁸
- 2613 The wording as adopted very appropriately uses the term “incidentally”. This means that if civil defence personnel, during activities undertaken to protect the civilian population, happen to come across military victims, they may assist them at the same time, without losing their right to protection. As regards the wounded, medical personnel of civil defence organizations even have a duty to assist wounded soldiers they find incidentally in the same way as civilians.²⁹
- 2614 The addition of the expression “particularly those who are *hors de combat*” is the result of an amendment.³⁰ This may seem strange at first sight, insofar as a member of the armed forces can in principle *only* be a victim if he is *hors de combat*, whether he surrenders and becomes a prisoner or whether he is dead, wounded, sick or shipwrecked.
- 2615 However, it is a sensible addition as some civil defence tasks can effectively benefit members of the armed forces who are not *hors de combat*. For example, the action of civil defence personnel fighting a fire in a town could incidentally be of benefit to some soldiers who happen to be on leave in that town. Thus it was altogether appropriate to specify that such actions indisputably fall under the legitimate scope of civil defence.

Paragraph 3 – The bearing of arms

- 2616 The question of civil defence personnel bearing arms was the subject of heated discussion in Committee II.
- 2617 The draft allowed the bearing of “small-arms” for civil defence personnel, but restricted this to two purposes, namely, maintaining order in a stricken area, and for self-defence. Very divergent opinions were expressed on this subject.

²⁶ Cf. draft Art. 58, para. 2(d).

²⁷ Cf. O.R. XII, p. 137, CDDH/II/SR.66, para. 61.

²⁸ Cf. in particular O.R. III, p. 265, CDDH/II/326; pp. 268-269, CDDH/II/406 and Add.1; O.R. XII, pp. 134-135, CDDH/II/SR.66, para. 47; p. 139, CDDH/II/SR.67, para. 1; p. 140, para. 3; p. 142, para. 13.

²⁹ On this subject, cf. in particular Art. 10.

³⁰ Cf. O.R. III, pp. 265-266, CDDH/II/326.

- 2618 Some wished to completely prohibit civil defence personnel from bearing arms, as they considered this to be more dangerous than useful. In their view the military will be less inclined to respect personnel they know to be armed and whom they therefore have reason to fear.³¹
- 2619 Others considered that bearing arms was useful, if not necessary. However, it was important to establish limits regarding the situations in which arms may be borne, the purposes to be served by bearing arms and the types of arms permitted.
- 2620 As regards the situations, the idea of prohibiting arms in areas of military operations was largely supported.³² However, other delegates considered that this latitude of allowing arms to be carried in some areas and not in others was difficult to apply. For that matter, one delegation asserted that civil defence personnel might just as well be made to contribute to maintain order in combat zones.³³
- 2621 In the end a compromise was achieved by defining the type of weapons authorized in such areas.
- 2622 In addition, the fact that civil defence personnel are not entitled to bear arms if they have received an order to disarm, was also raised in the context of this paragraph.³⁴ However, this question, which could only arise in case of occupation, was dealt with by Article 63 (*Civil defence in occupied territories*), paragraph 3.³⁵
- 2623 With regard to the purpose of bearing arms, some wished to adopt a very general reference: “for the purpose of safeguarding life and property”.³⁶ Others would have preferred a reference based on Article 13 (*Discontinuance of protection of civilian medical units*), paragraph 2(a), i.e., confining the purpose of bearing arms to “ensuring their own defence or that of the civilian population for which they are responsible”.³⁷ The idea of going beyond the objective of maintaining order, and likewise permitting weapons for “guarding installations vital for the survival of the civilian population” was also put forward.³⁸ In the end, after reconsideration, it was decided to return to the functions given for bearing arms in the 1973 draft, with a slight drafting modification. However, as to the purpose of maintaining order, it should be borne in mind that this is an auxiliary function only, to be exercised on a temporary basis.³⁹

³¹ Cf. particularly *O.R.* XII, p. 64, CDDH/II/SR.60, para. 55; p. 74, CDDH/II/SR.61, para. 29; p. 79, para. 54; p. 140, CDDH/II/SR.67, paras. 8 and 10.

³² Cf. *O.R.* III, pp. 265-266, CDDH/II/320 and 326; *O.R.* XII, pp. 72-73, CDDH/II/SR.61, para. 21; p. 79, para. 57; p. 132, CDDH/II/SR.66, para. 37; p. 140, CDDH/II/SR.67, para. 6.

³³ Cf. in particular *O.R.* XII, p. 137, CDDH/II/SR.66, para. 60; p. 142, CDDH/II/SR.67, para. 12.

³⁴ Cf. *O.R.* III, pp. 265-266, CDDH/II/326; *O.R.* XII, p. 132, CDDH/II/SR.66, para. 37.

³⁵ On this subject, cf. *supra*, p. 754.

³⁶ Cf. *O.R.* III, p. 266, CDDH/II/338.

³⁷ Cf. *ibid.*, p. 267, CDDH/II/347; *O.R.* XII, pp. 66-67, CDDH/II/SR.60, para. 66.

³⁸ Cf. *O.R.* XII, p. 78, CDDH/II/SR.61, para. 50.

³⁹ Cf. commentary Art. 61, sub-para. (a)(xi), *supra*, pp. 728-729.

2624 As regards the bearing of arms for the purpose of self-defence, this must be understood in the light of the commentary adopted on this subject by Committee II in its report,⁴⁰ which reads as follows:

“On the question of self-defence, it is understood that civil defence personnel may be armed for self-defence against marauders or other criminal individuals or groups. They may not engage in combat against the adverse Party and may not use force to resist capture. If, however, they are unlawfully attacked by individual members of the adverse Party’s forces, they may use their weapons in self-defence after having made a reasonable effort to identify themselves as civil defence personnel.”⁴¹

2625 Finally, as regards the type of weapons that are permitted, these are only “light individual weapons”, as for medical personnel.⁴² Moreover, it was specifically pointed out that the words “light individual weapons” should be interpreted as in Article 13.⁴³

2626 Working Group A on civil defence of Committee II decided not to give a definition of this expression.⁴⁴ However, one delegate submitted a definition to Committee II, indicating in his own words “what ‘light individual weapons’ were not, rather than what they were”.⁴⁵ This definition, “which was agreeable to a number of military experts of other delegations”,⁴⁶ constitutes a valuable contribution to the definition of this expression. It reads as follows:

“‘light individual weapons’ excludes fragmentation grenades and similar devices, as well as weapons which cannot be fully handled or fired by a single individual, and those basically intended for non-human targets”.⁴⁷

2627 The compromise between, on the one hand, the advocates of not permitting any weapons in any areas or circumstances, or only permitting weapons outside combat areas, and on the other, the advocates of permitting light individual weapons in all areas and circumstances, was resolved by the addition of two sentences to paragraph 3.

2628 The second sentence imposes a restriction in “areas where land fighting is taking place or is likely to take place”. The restriction is logically limited to land

⁴⁰ The commentary on paragraph 3 adopted by Committee II “constituted an agreed interpretation and as such was a ‘document related to the treaty’ within the meaning of Article 31 para. 2(b) of the Vienna Convention on the Law of Treaties (1969)”: *O.R.* XII, p. 420, CDDH/II/SR.95, para. 52. This commentary on paragraph 3 also comprises passages relating to other provisions of this paragraph which are examined below.

⁴¹ *O.R.* XIII, p. 372, CDDH/406/Rev.1, para. 58. This commentary itself led to a reaction from one delegation which feared that the possibility opened by the second sentence of this commentary “would subject civil defence personnel to even greater danger”: *cf. O.R.* VI, pp. 222-223, CDDH/SR.42, Annex (Australia).

⁴² *Cf.* commentary Art. 13, para. 2(a), *supra*, pp. 177-178.

⁴³ *Cf. O.R.* XIII, p. 372, CDDH/406/Rev.1, para. 58. *Cf.* in addition note 40, *supra*.

⁴⁴ *Cf. O.R.* XII, p. 421, CDDH/II/SR.95, para. 63.

⁴⁵ *Ibid.*

⁴⁶ *Cf. O.R.* XIII, p. 372, CDDH/406/Rev.1, para. 56. *Cf.* also *O.R.* XII, p. 422, CDDH/II/SR.95, paras. 64-68 and 70.

⁴⁷ *Cf. O.R.* XIII, p. 372, CDDH/406/Rev.1, para. 56; *cf.* also *O.R.* XII, pp. 421-422, CDDH/II/SR.95, paras. 63-65.

fighting, for it is indeed with respect to land forces that the weapons of civil defence personnel could pose a problem. However, neither the extent of the “areas” where land fighting is “taking place”, nor the way of judging whether such fighting is “likely to take place” in the near future, is defined. A large margin of judgment is thus left to those concerned with this provision. In fact, an objective appraisal reveals that what matters most is to determine the risk of contact with the enemy army, for it is during such contact that protection is essential and that the enemy’s trust in civil defence personnel could be shaken by such personnel being too heavily armed, which would anyway lead to confusion. For that matter, the purpose of the prescribed limitation is explicitly mentioned: it is “in order to assist in distinguishing between civil defence personnel and combatants”.

2629 Consequently the weapons of civil defence personnel in areas defined above must be restricted “to handguns, such as pistols or revolvers”, an expression which does not require comment. The question is whether the equipment of civil defence personnel could not have been limited to this type of weapons in all circumstances. In particular, the preference expressed by some delegates for the use of weapons “such as tear-gas grenades or the various non-lethal riot-control grenades used by the police”⁴⁸ for maintaining order led to the rejection of such a solution.

2630 The Parties to the conflict must take “the appropriate measures” to restrict the bearing of arms in such areas. For the measures to be effective in practice, this responsibility should be delegated to the authorities directly responsible for civil defence who should in turn entrust the local authorities with this, or be in a position to contact these authorities immediately.

2631 The rather vague description of the above-mentioned areas and the purpose of the prescribed restriction on bearing arms – i.e., to enhance the protection of civil defence personnel – made it necessary to specify that such a restriction was not a *condition* of protection in such areas. This is stated in the third sentence of the paragraph.

2632 Thus if civil defence personnel carry weapons other than handguns in such areas, they retain their right to respect and protection, provided of course that these are “light individual weapons”. Transportation of heavy weaponry would be considered as harmful to the enemy and would therefore result in the personnel concerned losing their right to protection.

2633 Thus the system applied in this paragraph is fairly similar to that of Article 26 (*Medical aircraft in contact or similar zones*). A risk is identified and those at risk are simply cautioned (Article 26 – *Medical aircraft in contact or similar zones*), or they are prohibited from taking the risk (Article 65), but if they do take it anyway, they nevertheless retain the right to protection.

2634 Two further clarifications were given by Committee II with regard to paragraph 3.⁴⁹ The expression “respected and protected” “means that the personnel must not knowingly be attacked or unnecessarily be prevented from discharging their proper functions”. In this respect it was correctly said that the interpretation of

⁴⁸ Cf. *ibid.*, p. 422, CDDH/II/SR.95, para. 64.

⁴⁹ Cf. O.R. XIII, p. 372, CDDH/406/Rev.1, para. 58. Cf. also note 40, *supra*, p. 776.

the term “respected and protected” given here applied only in this context.⁵⁰ Moreover:

“For members of the armed forces assigned⁵¹ to civil defence organizations, the last provision of paragraph 3 does not imply any change in their status as prisoners of war, if they fall into the hands of the adverse party.”

This applies, as we stated above, even though they clearly have lost their combatant status because of their being assigned to civil defence.⁵²

2635 In conclusion, it cannot be denied that paragraph 3 is characteristically a text of compromise, which means that it is rather difficult to apply. Several delegations expressed their fear in explanations of vote after the article was adopted by consensus in Committee II, regarding the efficacy of the protection accorded civil defence personnel if they are armed in combat areas.⁵³

2636 It is clear that bearing arms is something that is merely permitted; there is no obligation to do so, in combat areas or anywhere else. There is nothing that prevents Parties which do not wish their civil defence personnel to bear any arms, from stating so plainly.⁵⁴

Paragraph 4

2637 This paragraph was taken, with very slight drafting modifications, from the 1973 draft.

2638 As one delegate stated, it is justified in particular by the fact that in many countries members of civil defence are given ranks similar to those in the army; its provisions “might evoke military-type discipline and hierarchy, but in no case could that mean that civil defence bodies could be placed under the authority of the military”.⁵⁵ The question of the relationship between the military authorities and civil defence personnel is in fact dealt with in paragraph 2.

2639 Another delegate clearly explained the reason for allowing compulsory service: “provision for compulsory civilian service in civil defence units existed in many countries and was entirely divorced from compulsory military service”.⁵⁶

2640 In fact, therefore, this paragraph not only gives another situation which does not deprive personnel of the right to protection, but, more importantly, it recognizes the fact that in many States civil defence structures already in force are in accordance with the provisions of this Chapter.

Y.S.

⁵⁰ Cf. *O.R.* XII, p. 482, CDDH/II/SR.100, para. 64.

⁵¹ The French text of the comment is in *Actes (O.R.) XIII*. At p. 383, there is an error of grammar relating to the word “affectées” (assigned) which gives the impression that it relates to the “armed forces” rather than the “members”. This is clearly incorrect as “assigned” relates to the *members* of the armed forces.

⁵² Cf. commentary para. 2(b), and note 25, *supra*, p. 773.

⁵³ Cf. *O.R.* XII, pp. 427-430, CDDH/SR.96, paras. 1-22.

⁵⁴ Article 14, para. 3, of Annex I should be noted in this connection. This provides: “If civil defence personnel are permitted to carry light individual weapons, an entry to that effect should be made on the card mentioned.”

⁵⁵ *O.R.* XII, p. 135, CDDH/II/SR.66, para. 49.

⁵⁶ *Ibid.*, p. 140, CDDH/II/SR.67, para. 4.

Protocol I

Article 66 – Identification

1. Each Party to the conflict shall endeavour to ensure that its civil defence organizations, their personnel, buildings and *matériel*, are identifiable while they are exclusively devoted to the performance of civil defence tasks. Shelters provided for the civilian population should be similarly identifiable.
2. Each Party to the conflict shall also endeavour to adopt and implement methods and procedures which will make it possible to recognize civilian shelters as well as civil defence personnel, buildings and *matériel* on which the international distinctive sign of civil defence is displayed.
3. In occupied territories and in areas where fighting is taking place or is likely to take place, civilian civil defence personnel should be recognizable by the international distinctive sign of civil defence and by an identity card certifying their status.
4. The international distinctive sign of civil defence is an equilateral blue triangle on an orange ground when used for the protection of civil defence organizations, their personnel, buildings and *matériel* and for civilian shelters.
5. In addition to the distinctive sign, Parties to the conflict may agree upon the use of distinctive signals for civil defence identification purposes.
6. The application of the provisions of paragraphs 1 to 4 is governed by Chapter V of Annex I to this Protocol.
7. In time of peace, the sign described in paragraph 4 may, with the consent of the competent national authorities, be used for civil defence identification purposes.
8. The High Contracting Parties and the Parties to the conflict shall take the measures necessary to supervise the display of the international distinctive sign of civil defence and to prevent and repress any misuse thereof.
9. The identification of civil defence medical and religious personnel, medical units and medical transports is also governed by Article 18.

Commentary

General remarks

- 2641** Article 66 (*Identification*) deals with marking and other means of identification laid down for civil defence personnel and objects.¹ Its main *raison d'être* is the fact, amply demonstrated for medical personnel and objects, that civil defence personnel and objects cannot be effectively protected if there is no way of identifying them.
- 2642** This article is largely inspired by the provisions laid down in Article 18 (*Identification*), which deals with the same problems for medical personnel and objects and which it follows as closely as possible.² In addition it is supplemented by Chapter V (*Civil defence*) of Annex I.
- 2643** In this commentary we will refer to Article 18 (*Identification*) and Chapter V (*Civil defence*) of Annex I for explanations which we have already given in our comment on those provisions.

Paragraph 1

- 2644** This paragraph lays down the principle that civil defence personnel and objects must be identifiable. The way in which this obligation is to be fulfilled is described elsewhere in this article and in Chapter V (*Civil defence*) of Annex I.

¹ Cf. in addition commentary Art. 18, *supra*, p. 221.

² In this sense, cf. in particular *O.R.* XII, p. 390, CDDH/II/SR.92, para. 50.

*First sentence*³

- 2645** The personnel and objects which must be identifiable are those defined in Article 61 (*Definitions and scope*), sub-paragraphs (b), (c) and (d),⁴ as well as buildings also protected pursuant to Article 62 (*General protection*), paragraph 3. Thus this sentence does not cover civilians who perform civil defence tasks in response to an appeal from the authorities,⁵ but without being attached to a civil defence organization.
- 2646** Such personnel and objects must be identifiable “while they are exclusively devoted to the performance of civil defence tasks”. This wording requires explanation.
- 2647** During the preparatory work the idea had been put forward, first, to distinguish permanent from temporary personnel, and secondly to allow permanent personnel to use the sign permanently, and to allow temporary personnel to use it only for the duration of their assignment to civil defence tasks.⁶ This followed the system adopted in the Geneva Conventions for temporary medical personnel.⁷
- 2648** As we have seen, this distinction between permanent and temporary personnel was not finally adopted in the Protocol for civil defence personnel, particularly because the definition of the tasks performed by organizations responsible for civil defence varies a great deal from country to country and there was no intention to exclude the performance of other tasks, even by personnel permanently assigned to such organizations.⁸
- 2649** On the other hand, it then became essential to specify that the special protection of Chapter VI (*Civil defence*) of Part IV is only granted to personnel while they are exclusively devoted to the performance of civil defence tasks.
- 2650** Thus this provision not only indicates that civil defence personnel and objects must be identifiable by the civil defence sign while they are exclusively devoted to civil defence tasks; *a contrario*, it also implies that they *must not* be identified as such while they are not, or not exclusively, devoted to such tasks.⁹

³ On the general scope of the sentence, *cf.* commentary Art. 18, para. 1, *supra*, p. 225.

⁴ We refer to the commentary on these, *supra*, pp. 732-736.

⁵ *Cf.* Art. 62, para. 2.

⁶ *Cf.* CE/3b, pp. 155-156; CE 1971, *Report*, p. 89, paras. 505-506; CE 1972, *Commentaries*, Part I, p. 145 (Art. 71, para. 3); CE 1972, *Report*, Vol. I, p. 169, para. 3.337; *Commentary Drafts*, p. 76 (Art. 59, para. 7).

⁷ *Cf.* First Convention, Art. 41.

⁸ On this subject, *cf.* commentary Art. 61, sub-para. (b), *supra*, pp. 732-735.

⁹ On the meaning of the word “exclusively”, *cf.* commentary Art. 61, sub-para. (b), *supra*, pp. 732-735.

Second sentence

- 2651** The necessity of identifying shelters is obviously also of great importance. The fact that there is a separate sentence to cover them is because they might not belong to civil defence organizations.¹⁰
- 2652** The expression “similarly identifiable” means, on the one hand, that the means of identification laid down in the remainder of the article and in Chapter V (*Civil defence*) of Annex I should also be used for shelters, and on the other, that they should only be marked when they are *exclusively* devoted to the purpose of sheltering the civilian population.

Paragraph 2

- 2653** This paragraph is the corollary to paragraph 1. If it is necessary to ensure that one’s own civil defence personnel and objects are identifiable, it is also necessary to ensure that those of other Parties can be identified.¹¹
- 2654** It will be noted that this paragraph only deals with identification by means of the distinctive sign of civil defence, but not, as in Article 18 (*Identification*), paragraph 2, by distinctive signals. However, it is clear that it implies an identical obligation with respect to distinctive signals, if the Parties to the conflict agree to use such signals in accordance with the provision of paragraph 5. The fact that it is not mentioned here is probably because, in contrast with Article 18 (*Identification*), this article only allows the use of distinctive signals by agreement between the Parties: therefore adequate methods and procedures of identification may be laid down in the agreements themselves.¹²
- 2655** However, it is precisely with regard to distinctive signals that it is essential to establish methods and procedures, given their technical character.
- 2656** As regards visual identification, the emphasis should first of all be laid on visibility, and the provisions of this paragraph are based in this respect on Chapter II (*The distinctive emblem*) of Annex I. Moreover, the importance of informing the members of the armed forces of their obligations cannot be too often stressed.¹³ It is all the greater in this context, as there is a new international sign of civil defence.

Paragraph 3

- 2657** This paragraph is based on paragraph 3 of Article 18 (*Identification*).¹⁴ However, it merits two specific comments.

¹⁰ On this subject, *cf.* commentary Art. 62, para. 3, *supra*, pp. 741-744, and Art. 63, para. 6, *supra*, pp. 757-758.

¹¹ On the meaning of this paragraph, *cf.* in addition commentary Art. 18, para. 2, *supra*, p. 226.

¹² On this subject, *cf.* commentary para. 5, *infra*, pp. 784-785.

¹³ On this subject, *cf.* commentary Art. 83, *infra*, p. 959.

¹⁴ Reference is made to the commentary thereon, *supra*, pp. 227-228.

- 2658 First, it only concerns *civilian* civil defence personnel. This is explained by the fact that an *obligation* to display the international distinctive sign of civil defence and to carry an identity card certifying their status *rests* at all times on members of the armed forces assigned to civil defence organizations.¹⁵
- 2659 Secondly, the necessity of displaying the sign and carrying an identity card in occupied territories and areas where fighting is taking place, as well as the obligation only to wear the sign and carry the card during missions *exclusively* devoted to civil defence tasks, argue in favour of the exclusive and *permanent* – or at least long-term – assignment of such personnel to civil defence tasks, at any rate in such territories and areas, to avoid any confusion.

Paragraph 4

- 2660 Once the idea of granting special protection to civil defence personnel and objects is accepted, the need to identify them by means of a distinctive sign is evident, just as it was evident from the beginning with regard to medical personnel and objects.
- 2661 During the Conference of Government Experts an *ad hoc* Group, set up to make proposals regarding a special sign for civil defence organizations, came in particular to the following conclusions:
- the sign should not lead to confusion with other emblems: thus this excluded the possibility of extending the use of the red cross and red crescent emblem;¹⁶
 - it should be easily recognizable;
 - it should not conflict with any religious beliefs.¹⁷
- 2662 However, as this group did not propose an emblem, a meeting of experts was organized in Geneva with a view to defining an international distinctive sign of civil defence. The experts finally adopted two signs,¹⁸ and an alternative was proposed in the 1973 draft consisting either of an “equilateral light blue triangle on a light orange background” or of “two or, in case of need, more vertical light blue stripes on a light orange background”.¹⁹ These proposals had been selected on grounds of their practical nature and visibility of the designs and colour.²⁰
- 2663 During the Conference an amendment was put forward proposing yet another sign: “two oblique red bands on a yellow background”.²¹
- 2664 This sign, which was also supported by the International Civil Defence Organization, was proposed particularly because of its resemblance to the

¹⁵ Cf. Article 67, para. 1(c).

¹⁶ In this respect, cf. also *CE 1972, Commentaries*, Part I, p. 145, where this position was supported by the argument that the emblem of the red cross and the red crescent must be reserved for clearly defined activities and that its use should not be too widely extended.

¹⁷ For more details, cf. *CE 1972, Report*, Vol. II, p. 95, CE/COM III/OPC 16.

¹⁸ For further details on this subject, cf. *Meeting of Experts on an International Distinctive Sign for Civil Defence Services, Report*, ICRC, Geneva, 1973 (particularly paras. 25-44).

¹⁹ Cf. draft Art. 59, para. 4.

²⁰ Cf. *O.R. XII*, p. 143, CDDH/II/SR.67, para. 20.

²¹ Cf. *O.R. III*, p. 275, CDDH/II/427.

emblem with “oblique red bands on a white ground”, laid down in Article 6 of Annex I to the Fourth Convention, to mark hospital and safety zones and to meet “the concern not to increase the number of protective signs”.²²

2665 The Technical Sub-Committee on Signs and Signals nevertheless declared its preference for a blue triangle on an orange background – i.e., the first proposal in the 1973 draft – though it deleted the adjective “light” from the colours orange and blue.²³

2666 Apart from a controversy regarding the respective visibility of the two signs which remained at issue, the argument of the similarity of the sign with that laid down for marking hospital and safety zones was also used against this sign, as some delegates considered that confusion between the two symbols might reduce the protection of such areas.²⁴

2667 In the end, the proposal contained in the amendment was rejected by a vote in Committee II in favour of the blue triangle on an orange background.²⁵

2668 In addition to the choice of sign, it should be noted that paragraph 4 refers to the *international* distinctive sign of civil defence. In fact, in contrast with the Red Cross or Red Crescent Societies which were created after the adoption of the emblem, civil defence organizations were set up well before the adoption of Protocol I, and in many countries had already adopted other emblems. This article therefore does not impose a new emblem on such organizations even though it permits them to adopt it also in time of peace.²⁶

2669 Finally, paragraph 4 specifies that the equilateral blue triangle on an orange ground can only be considered as the international distinctive sign of civil defence “when used for the protection of civil defence organizations, their personnel, buildings and *matériel* and for civilian shelters”. This formula is based on that adopted for the definition of the distinctive red cross and red crescent emblem.²⁷ It is all the more understandable for the sign of civil defence as it seems difficult for some States to undertake that this sign – as with the red cross or red crescent emblem – will not be used for any other purposes in time of peace, particularly by organizations or companies which had adopted it previously.²⁸

Paragraph 5

2670 This paragraph lays down the possibility of the use of distinctive signals “for civil defence identification purposes”. Despite this rather vague wording, there is

²² In this sense, *cf.* *O.R.* XII, p. 357, CDDH/II/SR.89, para. 10, and p. 61, CDDH/II/SR.60, para. 42.

²³ *Cf.* *O.R.* XIII, p. 26, CDDH/49/Rev.1, Annex II, para. 26.

²⁴ *Cf.* in particular *O.R.* XII, p. 356, CDDH/II/SR.89, para. 4. As regards the other aspects of this controversy, *cf. ibid.*, pp. 355-362, paras. 1-40.

²⁵ *Cf.* *O.R.* XII, p. 361, CDDH/II/SR.89, para. 39; *cf.* also p. 365, CDDH/II/SR.90, paras. 1-2, and pp. 390-391, CDDH/II/SR.92, paras. 54-55.

²⁶ *Cf.* commentary para. 7, *infra*, pp. 786-787.

²⁷ On this subject, *cf.* commentary Art. 8, sub-para. (I), *supra*, pp. 134-135.

²⁸ On this subject, *cf.* commentary paras. 7 and 8, *infra*, pp. 786-788.

no doubt that such signals are intended to permit the identification of persons and objects entitled to the protection of the distinctive sign of civil defence.²⁹

- 2671 This paragraph is inspired by Article 18 (*Identification*), paragraph 5, which is concerned with the use of distinctive signals “to identify medical units and transports”.
- 2672 However, in contrast with that provision, it does not refer to a chapter of Annex I, and Chapter V of that Annex (*Civil defence*) does not broach the question of distinctive signals. Thus there are no pre-established rules for distinctive civil defence signals.
- 2673 Consequently, it is quite logical that the use of such signals cannot follow from an unilateral decision: it must result from agreements between the Parties to the conflict.³⁰ Anyway, paragraph 5 only mentions this as a possibility – “Parties to the conflict may agree” – without imposing any obligation upon them, not even that of endeavouring to reach an agreement upon this matter.
- 2674 Thus the use of distinctive signals for civil defence remains very uncertain from an international point of view. The fact that the Diplomatic Conference did not go further on this point is probably because, on the one hand, the usefulness of such signals is, after all, less obvious for civil defence than for the medical services, particularly medical transports, and on the other hand, because the special protection accorded civil defence is new and has not yet been proven.
- 2675 Insofar as they wish to reach agreement on distinctive signals for civil defence, the Parties are therefore free to choose those which seem most appropriate to them, provided that these do not infringe the many rules that exist in this field.³¹
- 2676 The commentary on the 1973 draft mentioned as an example flashing light signals and sirens.³²
- 2677 Chapter III (*Distinctive signals*) of Annex I, Article 5 (*Optional use*), paragraph 1, states that “the signals specified in this Chapter for exclusive use by medical units and transports shall not be used for any other purpose”, in this way excluding their use as signals for civil defence purposes. However, this is “subject to the provisions of Article 6”, and that article, which deals with “the light signal, consisting of a flashing blue light”, does not, “in the absence of a special agreement between the Parties to the conflict” prohibit “the use of such signals for other vehicles or ships”.³³ Thus a possibility is left open here for adopting signals for the identification of civil defence services.

²⁹ Thus, when it adopted its report Committee II adopted the following comment: “Civil defence identification means the identification of shelters for the civilian population and of civil defence personnel, buildings and *matériel*” (*O.R.* XIII, p. 375, CDDH/406/Rev.1, para. 62).

³⁰ This is contrary to Art. 59, para. 5, of the 1973 draft, as proposed by an amendment: *cf. O.R.* III, p. 272, CDDH/II/327, para. 5.

³¹ On this subject we refer to the commentary on Annex I, *infra*, p. 1137.

³² *Cf. Commentary Drafts*, p. 75 (Art. 58, para. 5).

³³ For more details on this subject, *cf.* commentary Articles 5 and 6, Annex I, *infra*, p. 1199 and p. 1205.

Paragraph 6

- 2678 This paragraph refers to Chapter V (*Civil defence*) of Annex I for the implementation of paragraphs 1 to 4 of the article under consideration here. Rightly, paragraph 5 is not mentioned, since Chapter V (*Civil defence*), as we have shown, does not deal with distinctive signals.
- 2679 Chapter V contains an article giving precise specifications for the identity cards prescribed in paragraph 3 of the article under consideration here.³⁴ In another article it sets out rules on the international distinctive sign of civil defence, and lays down recommendations thereon.³⁵
- 2680 The reference to paragraphs 3 and 4 does not require any explanation since these paragraphs concern the subjects dealt with in Article 14 (*Identity card*) and Article 15 (*International distinctive sign*), respectively, of Annex I.
- 2681 The reference to paragraphs 1 and 2 indicates that the Parties to the conflict in fulfilling the obligations laid down by these paragraphs regarding marking their civil defence services and identifying those of their adversary, have to take into account the technical specifications given in the above-mentioned articles of Annex I.

Paragraph 7

- 2682 The First Convention contains strict rules regarding the use of the distinctive emblem in peacetime.³⁶ In general only the Red Cross or Red Crescent Societies are entitled to use it in peacetime,³⁷ and its commercial use is prohibited.
- 2683 It was only possible to follow the example of these rules to a limited extent. The first Red Cross, and later, Red Crescent Societies were created to facilitate the application of the Geneva Convention of 1864 and then that of 1906. On the other hand, civil defence organizations were created a long time before they were recognized by international humanitarian law, and there are no national “Blue Triangle Societies”. Thus the relation between these organizations and the international distinctive sign of civil defence is not as close as that between the Red Cross or Red Crescent Societies and the emblem intended for the protection of the medical services.
- 2684 Nevertheless, some wished this connection to be strengthened in the future, and to this end considered that civil defence organizations should be permitted – if not encouraged – to adopt this sign even in time of peace. This is what is

³⁴ Art. 14, which on the one hand refers to Article 1 of Annex I, and provides a model in Figure 3 and, on the other hand, recommends that identity cards should mention whether civil defence personnel are authorized to bear light individual weapons.

³⁵ For more details, *cf.* commentary Annex I, Arts. 14 and 15, *infra*, p. 1285 and p. 1289.

³⁶ *Cf.* Articles 44, 53 and 54.

³⁷ It is understood that objects protected by that emblem in time of armed conflict may already be marked in peacetime, and that National Societies may authorize in peacetime the use of the emblem by ambulances and by first aid posts reserved for free treatment.

proposed in this paragraph, which was not included in the 1973 draft, and was the result of an amendment.³⁸

- 2685 However, as paragraph 8 will show, paragraph 7 does not prohibit, even implicitly, the use of the distinctive sign of civil defence for other purposes, when permitting its use in time of peace.
- 2686 In fact, Committee II adopted in its report the following comment applicable to paragraphs 7 and 8: “It is understood that these paragraphs do not deal with other than protective uses of the distinctive sign of civil defence”.³⁹
- 2687 This comment is not easy to understand in relation to paragraph 7, for in time of peace the term “protective use” is meaningless.
- 2688 In fact, the comment indicates that, under paragraph 7, the personnel and objects concerned are those which in time of peace accomplish tasks which would give them the right to use that sign in time of armed conflict for the purpose of their protection.
- 2689 Finally, the meaning of the expression “civil defence identification purposes” was explained above.⁴⁰

Paragraph 8

- 2690 The comment adopted by Committee II in its report⁴¹ is particularly relevant with regard to this paragraph. The supervision, prevention and repression required from the Contracting Parties and Parties to the conflict concern only “protective use” of the sign of civil defence. Thus that obligation is not extended directly to the use of the sign for commercial purposes.⁴²
- 2691 Moreover, an appropriate reminder was given of the existence of Article 38 (*Recognized emblems*), which prohibits the improper use of “emblems, signs or signals provided for by the Conventions or by this Protocol”.⁴³
- 2692 Delegates who wished to prohibit any use of the distinctive sign of civil defence in time of peace other than by civil defence organizations with the agreement of authorities⁴⁴ therefore failed to convince the Conference.

³⁸ Amendment CDDH/II/237 replaced successively by amendments CDDH/II/327 and CDDH/II/408: cf. *O.R.* III, pp. 271-275. This amendment also corresponds to the views expressed by the Technical Sub-Committee on Signs and Signals of Committee II: cf. *O.R.* XIII, p. 26, CDDH/49/Rev.1, Annex II, para. 27.

³⁹ *O.R.* XIII, p. 375, CDDH/406/Rev.1, para. 62.

⁴⁰ Cf. commentary paragraph 5, *supra*, p. 785 and note 29: the comment of Committee II mentioned in that note also applies for the present paragraph.

⁴¹ Cf. *supra* and note 39.

⁴² One delegate, incidentally, argued strongly against the obligation to prohibit the use of the civil defence sign for commercial purposes. In this connection he recalled the great difficulties encountered upon the introduction of a provision of this type on the red cross emblem in the First Geneva Convention of 1929, the reservations this led to, and the delays in the ratification of the 1949 Conventions resulting from objections to Article 53 of the First Convention by some commercial firms who had been using the red cross emblem for years: cf. *O.R.* XII, p. 145, CDDH/II/SR.67, paras. 36-39; cf. also *ibid.*, p. 146, *ibid.*, para. 41.

⁴³ Cf. *O.R.* XII, p. 145, CDDH/II/SR.67, para. 38.

⁴⁴ Cf. *O.R.* III, p. 273, CDDH/II/339, paras. 6-7, and *O.R.* XII, p. 73, CDDH/II/SR.61, para. 22.

- 2693** And yet, is it possible that the Contracting Parties do not have any obligation in this field? We do not think so. First, they are mentioned separately from the Parties to the conflict, which clearly shows that some action is considered necessary even in time of peace. Secondly, and principally, the obligation on the one hand to ensure respect for the distinctive sign of civil defence in time of armed conflict and, on the other hand, to familiarize the population with it, certainly requires some restrictions, also in peacetime. Confusion in time of armed conflict would nullify the protective effect of the distinctive sign of civil defence and this cannot be avoided at such times if it is not also dealt with in time of peace.
- 2694** Apart from this, the idea “to supervise the display” of the distinctive sign and “to prevent and repress any misuse thereof” is taken from Article 18 (*Identification*), paragraph 8, which in turn refers to the provisions of the Conventions and the Protocol.⁴⁵
- 2695** Finally, it should be noted that perfidious use of the international distinctive sign of civil defence causing death or serious injury to body or health is regarded as a grave breach of the Protocol.⁴⁶

Paragraph 9

- 2696** As early as the first session of the Conference of Government Experts in 1971 it was pointed out that the possibility of extending the use of the emblem of the red cross or red crescent to civilian medical personnel authorized by the relevant Party to the conflict made it “possible to allow the emblem to be used also by the medical services of civil defence organizations”.⁴⁷
- 2697** The 1973 draft took up this idea and expressed it unambiguously.⁴⁸
- 2698** The use of the word “also” in the text of paragraph 9 could lead to some hesitation. However, this is removed by the very clear comment adopted with regard to this paragraph by Committee II at the same time as its report:

“Medical and religious personnel as well as medical units and transports of civil defence organizations are covered by Part II of Protocol I. Such personnel may be assisted or even replaced by other civil defence personnel who are able to perform medical functions, but who are primarily assigned to other civil defence tasks. [...] Medical functions may also be performed on a temporary basis by civil defence personnel in cases of emergency where the necessary formalities have not been fulfilled in order to enable them to use the red cross as a distinctive emblem. In such cases, it is desirable that

⁴⁵ On this subject, *cf.* commentary Art. 18, para. 8, *supra*, pp. 234-235.

⁴⁶ *Cf.* Art. 85, para. 3(f). *Cf.* in addition the commentary on that paragraph, *infra*, pp. 998-999.

⁴⁷ *Cf.* CE 1971 Report, p. 89, para. 504.

⁴⁸ *Cf.* draft Art. 59, para. 8: “The identification of civil defence medical services is governed by Article 18”. The comment on this paragraph is even more eloquent in this respect: “The experts expressed the unanimous opinion that it would be advisable for medical personnel – whether they belong to the civil defence or were simply providing assistance – to be identified by a special sign.” (*Commentary Drafts*, p. 77).

personnel and units performing medical tasks are protected by the international sign of civil defence. This idea is conveyed by the inclusion of the word ‘also’ in this paragraph.”⁴⁹

2699 It follows that, though some medical tasks may occasionally be performed under the distinctive sign of civil defence, medical personnel are in principle identified by the emblem of the red cross or the red crescent, as is actually indicated in the definition of such personnel which includes personnel “assigned to civil defence organizations”.⁵⁰

2700 This distinction between medical personnel and materials of civil defence organizations and other personnel and objects belonging to the same organizations “does not, however, carry any implications with regard to organizational or command structure”.⁵¹

Y.S.

⁴⁹ Cf. *O.R. XIII*, p. 375, CDDH/406/Rev.1, para. 62. Moreover, it should be mentioned with regard to this word that in the French text the Drafting Committee replaced the word “aussi” by “également”.

⁵⁰ Cf. Art. 8, sub-para. (c)(i).

⁵¹ On this subject cf. the note added to the above-mentioned comment of Committee II, note 49: *O.R. XIII*, p. 375, CDDH/II/406/Rev.1, para. 62.

Protocol I

Article 67 – Members of the armed forces and military units assigned to civil defence organizations

1. Members of the armed forces and military units assigned to civil defence organizations shall be respected and protected, provided that:
 - (a) such personnel and such units are permanently assigned and exclusively devoted to the performance of any of the tasks mentioned in Article 61;
 - (b) if so assigned, such personnel do not perform any other military duties during the conflict;
 - (c) such personnel are clearly distinguishable from the other members of the armed forces by prominently displaying the international distinctive sign of civil defence, which shall be as large as appropriate, and such personnel are provided with the identity card referred to in Chapter V of Annex I to this Protocol certifying their status;
 - (d) such personnel and such units are equipped only with light individual weapons for the purpose of maintaining order or for self-defence. The provisions of Article 65, paragraph 3 shall also apply in this case;
 - (e) such personnel do not participate directly in hostilities, and do not commit, or are not used to commit, outside their civil defence tasks, acts harmful to the adverse Party;
 - (f) such personnel and such units perform their civil defence tasks only within the national territory of their Party.

The non-observance of the conditions stated in (e) above by any member of the armed forces who is bound by the conditions prescribed in (a) and (b) above is prohibited.
2. Military personnel serving within civil defence organizations shall, if they fall into the power of an adverse Party, be prisoners of war. In occupied territory they may, but only in the interest of the civilian population of that territory, be employed on civil defence tasks in so far as the need arises, provided however that, if such work is dangerous, they volunteer for such tasks.
3. The buildings and major items of equipment and transports of military units assigned to civil defence organizations shall be clearly marked with the international distinctive sign of civil defence. This distinctive sign shall be as large as appropriate.
4. The *matériel* and buildings of military units permanently assigned to civil defence organizations and exclusively devoted to the performance of civil defence tasks shall, if they fall into the hands of an adverse Party, remain subject to the laws of war. They may not be diverted from their civil defence purpose so long as they are required for the performance of civil defence tasks, except in case of imperative military necessity, unless previous

arrangements have been made for adequate provisions for the needs of the civilian population.

Commentary

General remarks

2701 The protection of military civil defence organizations was not envisaged in the documentation presented to the Conference of Government Experts,¹ and it was

¹ The ICRC stated that one of the main difficulties encountered during its work was as follows: "The organization and structure of civil defence services vary considerably from one country to another. Some countries have no such services. Sometimes the services are military or paramilitary and their personnel may have to discharge the duties of military and combat personnel. By contrast, some of the organizations are purely civilian and their duties purely humanitarian. It goes without saying that it is only for the latter that the Red Cross may contemplate granting protection and special facilities in humanitarian law." (*CE/3b*, p. 144).

only during the second session of that Conference that a series of questions raised by one delegation cast doubt on this approach. It seemed particularly questionable to that delegation that reserve military personnel, mobilized for the sole purpose of serving in civil defence organizations under civilian management, and other members of the armed forces assigned to technical tasks of civil defence “subject to the policy and requirements direction of [...] a civilian” should not be entitled to “the proposed special protections when they are engaged in humanitarian activities, merely because they are in uniform”.²

2702 Based on these considerations and subsequent discussions, the ICRC introduced a remark on Article 55 of the 1973 draft in the commentary:

“Some experts consulted by the ICRC recommended adding here the following paragraph:

‘Personnel of military units assigned exclusively to civil defence tasks shall not be intentionally attacked provided they display the international distinctive sign of civil defence specified in Article 59 below, and bear only small-arms. If they fall into the power of the enemy they shall be considered to be prisoners of war.’”³

2703 This commentary then added:

“This paragraph is based on Articles 25 and 29 of the First Convention relating to the protection and treatment of temporary personnel. It also takes into account the situation prevailing in several countries, namely the developing countries, which quite frequently do not yet possess any specialized bodies and where the civil defence tasks are therefore discharged by the army.”⁴

2704 However, the fact that the proposed provision was put forward only as a remark and was not contained in the draft itself is because of “the difficult problems which would be created by this provision and the opposition of other experts.”⁵

2705 In fact, this problem was one of the most discussed in Committee II, and it seems to us that it would be useful to examine the main arguments advanced on both sides before discussing the provision which was adopted, which is clearly the result of a compromise.

2706 Four principal arguments were advanced in favour of protecting members of the armed forces and of military units assigned to civil defence organizations:

- 1) The protection must be accorded to civil defence tasks and all those fulfilling such tasks must be protected (“functional” protection) independently of their military or civilian status.⁶

² Cf. *CE 1972, Report*, Vol. II, p. 94, CE/COM III/OPC 13, paras. 4-5.

³ *Commentary Drafts*, p. 72.

⁴ *Ibid.*, p. 73.

⁵ *Ibid.*

⁶ Cf. particularly *O.R. XII*, p. 76, CDDH/II/SR.61, para. 41; p. 77, para. 44; p. 78, para. 48.

- 2) In many countries there is no civil defence structure or qualified civilian personnel are too scarce: it is therefore essential that they can count on all the personnel available, even military personnel.⁷
- 3) There is no reason to refuse military civil defence personnel what is granted to military medical personnel.⁸
- 4) Civil defence is organized in some countries along military lines and such countries would not accept changing their arrangements nor would they accept an agreement compelling them to protect civil defence personnel of an adverse Party if their own personnel did not enjoy similar protection.⁹

2707 The main arguments of those who did not wish to grant such personnel protection may be summarized as follows:

- 1) In order to be effective, the rules protecting the civilian population must be simple and clear, which will no longer be the case if military personnel enjoy some degree of protection as well.¹⁰
- 2) In practice it will be difficult to distinguish military personnel assigned to civil defence from other military personnel, particularly if they carry arms, and this confusion will generally tend to impair civil defence tasks.¹¹
- 3) If military personnel enjoyed special protection, this would imply that they renounce participating in hostilities. Such renunciation is hardly likely in the majority of countries lacking qualified personnel for civil defence, as such countries also need the same personnel for military duties. It is therefore preferable that military personnel performing civil defence tasks retain their military status without any special protection and unequivocally.¹²
- 4) Once military personnel are exclusively assigned to civil defence tasks for the duration of the conflict, the problem of structure only consists of having them officially attached and seems easily surmountable.¹³

2708 An examination of the provisions that were finally adopted will reveal the importance attached to these various arguments.

2709 Before doing so, it should be noted that the problems broached in this article were first discussed in the context of the draft article concerning general protection¹⁴ before various amendments proposed that they should be dealt with in a separate article.¹⁵ A compromise solution was also proposed, consisting of adding a paragraph to the article on general protection, confirming the civilian status of personnel “whose liability to military service has definitely and finally ceased” and therefore the possibility of integrating them in civilian civil defence

⁷ Cf. particularly *O.R.* XI, p. 584, CDDH/II/SR.51, para. 38; p. 586, para. 47; *O.R.* XII, p. 77, CDDH/II/SR.61, para. 44.

¹⁵ Cf. *O.R.* III, p. 277, CDDH/II/335; p. 278, CDDH/II/407 and 419.

organizations.¹⁶ This solution was abandoned: on the one hand, it did not respond to the expectations of the supporters of protection for military civil defence personnel, while on the other, it could, as one delegate stated, in a way have created “a new category of protected civilians (persons whose liability to military service had definitely and finally ceased)”.¹⁷

2710 The question was then taken up by a Working Sub-Group which decided, from the various conceivable solutions,¹⁸ to retain that of devoting a special article to members of the armed forces and military units assigned to civil defence organizations and to establish special rules for them.¹⁹

Paragraph 1

Introductory sentence

2711 This sentence covers members of the armed forces and “military units” assigned to civil defence organizations. The meaning of *military units* should be understood by analogy with the expression “medical units”.²⁰ Thus they are “establishments and other units [...] organized for [...] purposes”²¹ of civil defence, i.e., which are entrusted with the mission to carry out one or more of the tasks listed in Article 61 (*Definitions and scope*), sub-paragraph (a).

2712 The text does not specify whether the organizations to which members of the armed forces and military units are assigned must be civilian, military, or whether they can be either. In fact the last solution should be accepted: Article 65 (*Cessation of protection*) implicitly authorizes the attachment of military personnel to civilian civil defence organizations,²² but there is nothing to prevent the organizations themselves from belonging to the armed forces, provided of course that the conditions listed in this article are fulfilled.

2713 If they are, the personnel and units in question will be “respected and protected”. In the comments adopted with its report, Committee II stated that this expression here means that “the personnel must not knowingly be attacked

¹⁶ Cf. *ibid.*, pp. 263-264, CDDH/II/325, 325/Rev.1 and 342.

¹⁷ Cf. *O.R.* XII, p. 110, CDDH/II/SR.64, para. 30. As this delegate also stated, Article 4 B (1) of the Third Geneva Convention, which provides that persons belonging to the armed forces of an occupied country shall be treated as prisoners of war if they are interned, was not decisive in this respect: cf. *ibid.*, para. 31.

¹⁸ I.e., no protection for military civil defence personnel; the new paragraph discussed above which was to be added to the article on general protection; an article (and conditions) relating to military civil defence personnel and units; identical protection for military and civilian civil defence personnel: in the sense of this last solution, cf. in particular *O.R.* XII, p. 116, CDDH/II/SR.64, para. 58.

¹⁹ On the work of the this Sub-Group, cf. in addition *O.R.* XIII, pp. 315-319; CDDH/325/Rev.1, Appendix; pp. 375-377, CDDH/406/Rev.1, paras. 63-66; *O.R.* XII, pp. 431-433, CDDH/II/SR.96, paras. 23-28.

²⁰ Cf. Art. 8, sub-para. (e).

²¹ On the meaning of these expressions, cf. commentary Art. 8, sub-para. (e), *supra*, pp. 128-129.

²² Cf. Art. 65, para. 2(b).

or unnecessarily prevented from discharging their proper functions”,²³ on the understanding that “unnecessarily” relates to absence of “imperative military necessity”.²⁴

Sub-paragraph (a)

2714 The personnel and units concerned may be assigned to one or several of the tasks listed in Article 61 (*Definitions and scope*), sub-paragraph (a), but they must be assigned exclusively and permanently.²⁵ Furthermore, it should be recalled that civil defence tasks are intended to protect the civilian population: similar tasks carried out for the benefit of *military personnel* are not covered by this article.

Sub-paragraph (b)

2715 Permanent assignment is assignment for an indeterminate period of time, but does not exclude the possibility of a change of assignment during the conflict. Sub-paragraph (b) goes further, since it excludes such change of assignment. It is therefore a key element of the compromise which was achieved in the end for the protection of military personnel devoted to civil defence. In fact it would have been very difficult to ask a Party to the conflict to abstain from hostile acts against military personnel whom it knew could at a later date be recalled to combat.²⁶

2716 Moreover, this solution is in accordance with what was decided regarding civilian civil defence personnel: such personnel can in fact enjoy protection under the present Chapter once again after performing tasks other than civil defence tasks, always provided that such other tasks were not “harmful” to the enemy, i.e., equivalent to traditional military tasks.²⁷

²³ Cf. *O.R.* XIII, p. 377, CDDH/406/Rev.1, para. 67; *O.R.* XII, pp. 433-434, CDDH/II/SR.96, paras. 31-34; cf. also commentary Art. 65, *supra*, p. 777-778 and note 50.

²⁴ In this sense cf. *O.R.* XIII, p. 376, CDDH/II/406/Rev.1, para. 67, which contains the proposal of the Working Group and clearly indicates that there was no intention to change the substance of this proposal. Cf. also *O.R.* XII, pp. 433-434, CDDH/II/SR.96, paras. 32-35. On the meaning of the expression “imperative military necessity”, cf. commentary Art. 62, para. 1, *supra*, p. 740.

²⁵ On the meaning of the words “permanently” and “exclusively” cf. commentary Art. 8, sub-para. (k), *supra*, pp. 132-133.

²⁶ Despite the exception made for auxiliary medical personnel: in fact, that type of personnel is mainly intended to fill a gap in the strength of permanent personnel in emergencies and is little used in practice. Thus this precedent is not decisive.

²⁷ Cf. commentary Art. 61, sub-para. (c), *supra*, pp. 735-736.

2717 Although it was adopted by consensus, this solution was the object of many statements at a plenary meeting of the Diplomatic Conference by delegations which were not entirely satisfied.²⁸

Sub-paragraph (c)

2718 Civilians must not be made the object of attack, while in principle military personnel are military objectives. Identification of military personnel in their capacity of civil defence personnel is therefore even more important than that of civilian personnel. This is why there is an *obligation* on military personnel, who generally wear the uniform of the armed forces, to display the international distinctive sign of civil defence and carry an identity card certifying their status.

2719 In this connection Committee II furthermore adopted the following comment at the same time as its report:

“With regard to the display of the international distinctive sign of civil defence in sub-paragraph (c), it was suggested that a sign of a minimum size on a tabard of about 30 cm. × 30 cm. might be appropriate. The identity card referred to in sub-paragraph (c) will have to be carried in addition to the military identity card provided for in the Third Geneva Convention of 1949.”²⁹

2720 It should be stressed that this large sized tabard is of course not a *condition* of protection, but the Committee decided to give such clear indications in order to prevent, as far as possible, the mistakes which would undoubtedly follow from a form of marking that was not so clear.³⁰

Sub-paragraph (d)

2721 As regards the carrying of arms, members of the armed forces assigned to civil defence organizations are subject to the same rules as civilian civil defence personnel.

2722 However, agreement on this point was not reached without difficulties, as many delegations, already dubious about the fact that military personnel assigned to civil defence are protected, were even more dissatisfied about such personnel

²⁸ We should mention, on the one hand, the view that later assignment to other military tasks should have been permitted: *cf.* in particular *O.R.* VI, pp. 269-270, CDDH/II/SR.43, Annex (Ghana); p. 271 (Indonesia); on the other hand, the doubt expressed about the compatibility of this provision with Article 43, paragraph 2, which gives members of the armed forces the right “to participate directly in hostilities”: *cf. ibid.*, p. 266 (Egypt). However, these two points of view had been previously refuted, the first because of the guarantees which must be given by those protected; the second on the basis that the intention of this provision was precisely for members of the armed forces to which it applied to renounce the right to participate in hostilities in exchange for total protection: *cf. O.R.* XII, pp. 433-434, CDDH/II/SR.96, para. 34.

²⁹ *Cf. O.R.* XIII, p. 377, CDDH/406/Rev.1, para. 67. *Cf.* in addition Annex I, Art. 15.

³⁰ Regarding the identity card, *cf.* Annex I, Art. 14.

being armed in view of “the dangers and difficulties of identifying military units and armed forces assigned to civil defence tasks”.³¹

2723 The purpose of bearing arms – for maintaining order and the self-defence of personnel³² – is recalled. Apart from this, reference is simply made to Article 65 (*Cessation of protection*), paragraph 3, which deals with this question in depth.³³

2724 Finally, it should be noted that, as in the case of civilian personnel, there is nothing to prevent the withholding of all weapons from such personnel, the provisions of Article 65 (*Cessation of protection*), paragraph 3, indicating the maximum allowed.

Sub-paragraph (e)

2725 This sub-paragraph may seem superfluous. As sub-paragraphs (a) and (b) lay down the condition that there must be an exclusive and permanent assignment to civil defence tasks throughout the duration of the conflict, it is difficult to see how the personnel concerned could commit acts harmful to the enemy without infringing the provisions of those sub-paragraphs.

2726 Nevertheless, it has been retained to underline the fact that as all members of the armed forces are combatants and therefore have the right to participate directly in hostilities,³⁴ the object of the paragraph “was to neutralize that right, or to provide that it could not be exercised”³⁵ by the persons concerned here.

2727 Apart from this, the different concepts raised in this sub-paragraph were examined above.³⁶

Sub-paragraph (f)

2728 This is an important condition. It prohibits members of the armed forces of a Party who are assigned to civil defence organizations from:

- being sent to strengthen the civil defence of allied Parties;

³¹ Cf. *O.R.* VI, p. 264, CDDH/SR.43, Annex (Austria); cf. also p. 266 (Egypt); pp. 275-276 (Sweden).

³² In this context it should be noted that the French text uses the expression “propre protection” in Art. 65, para. 3, and the expression “propre défense” in this paragraph. However, this is merely a translation error, as shown by the English text which uses the expression “self-defence” in both articles.

³³ On this subject, cf. commentary Art. 65, para. 3, *supra*, pp. 777-778. In its report the Committee explicitly stated that the comments it had made on Article 65, paragraph 3, were equally applicable to this paragraph, cf. *O.R.* XIII, p. 377, CDDH/406/Rev.1, para. 67.

³⁴ Cf. Art. 43, para. 2.

³⁵ *O.R.* XII, p. 440, CDDH/II/SR.97, para. 6.

³⁶ On the concept of participating directly in hostilities, cf. commentary Art. 43, para. 2, *supra*, pp. 514-517; see also Art. 51, para. 3, which provides that civilians participating directly in hostilities lose their right to protection for so long as the participation lasts, and the commentary thereon, *supra*, pp. 618-619; for the rest of this sub-paragraph, cf. commentary Art. 65, para. 1, *supra*, pp. 770-771.

- being used by that Party in territories it has occupied;³⁷
- being made available by that Party to a Party to a conflict in which it is not involved.

2729 It should be noted that such a restriction to national territory does not apply to medical personnel attached to the armed forces, and that military civil defence personnel are therefore subject to stricter rules in this respect. However, this difference is not illogical: on the one hand, some civil defence tasks are undeniably more delicate than medical tasks; on the other hand, their essential function is to repair the damage caused by the enemy to the detriment of civilians in their own territory, while armies need medical personnel to care for their wounded wherever they are.

Concluding sentence

2730 This sentence is aimed at further strengthening the guarantees that protection accorded members of the armed forces will not give rise to abuse.

2731 By specifically stating that direct participation in hostilities and committing acts harmful to the enemy (*cf.* sub-paragraph (e)) are *prohibited* for members of the armed forces assigned to civil defence organizations in accordance with sub-paragraphs (a) and (b), this sentence shows that in such a case more is involved than the loss of the right to protection. In addition, it constitutes a *breach* of the Protocol, which the Parties to the conflict are obliged to suppress and which may give rise to disciplinary or penal punishment.³⁸

2732 It may even constitute a grave breach if the distinctive sign has been displayed to abuse the enemy, depending on the consequences of such abuse.³⁹ In such a case, penal sanctions are compulsory.

Paragraph 2 – Status of captured personnel

First sentence

2733 The expression “military personnel serving within civil defence organizations” is equivalent to the expression “members of the armed forces and military units assigned to civil defence organizations” used in paragraph 1.

2734 The persons concerned here become prisoners of war when they fall into the power of the adverse Party. They are therefore subject to similar rules to those which apply to temporary medical personnel. This may seem illogical. The reason

³⁷ The question of members of the armed forces of a Party to the conflict whose territory is occupied is a different matter. It is dealt with in paragraph 2.

³⁸ On this subject, *cf.* Art. 85, para. 1, of the Protocol; Art. 49, para. 4, First Convention; Art. 50, para. 4, Second Convention; Art. 129, para. 4, Third Convention; Art. 146, para. 4, Fourth Convention.

³⁹ *Cf.* commentary Art. 85, para. 3(f), *infra*, pp. 998-999.

that temporary medical personnel are not released is actually that they may be used for military tasks and a Party to the conflict cannot be expected to release a person whom it knows may again commit harmful acts against it. Yet this is not the case with regard to military civil defence personnel, since they may not be assigned to other tasks or commit acts harmful to the enemy throughout the duration of the conflict.

2735 In fact, some recommended that such personnel should be treated in the same way as members of permanent military medical personnel, and only joined the consensus on this point with some reluctance.⁴⁰

2736 Moreover, it should be noted that those who recommended prisoner-of-war status for military civil defence personnel initially defended the view that such personnel should not be given any protection before they were captured.⁴¹

2737 Finally, it was the concern to make a clear distinction between military civil defence personnel and civilian civil defence personnel which led to attributing prisoner-of-war status to the former in the compromise which was finally adopted with regard to the protection of military personnel.⁴²

2738 Moreover, it should be noted that in practice the interest of military medical personnel not to be considered as prisoners of war basically lies in the fact that in principle, if they are captured, they should be returned to the Party to whom they belong as soon as there is a way to do so and they are no longer required to care for prisoners of war. But the question does not arise in a comparable way for military civil defence personnel since their activities are confined to national territory.

2739 Thus there is a difficult question as to what will be the fate of such personnel if they are captured when the adverse Party occupies their national territory where they are legitimately performing their activities. This question is dealt with in the second sentence of the paragraph.

Second sentence

2740 This sentence aroused controversy in Committee II. The Chairman of the special Working Sub-Group which was concerned with this article considered that it was not superfluous, although it covered elements dealt with in Articles 50 and 52 of the Third Convention, since it contained “an explicit stimulation addressed to the Detaining Power to make use of the specific abilities of that exceptional category of prisoner of war”.⁴³

⁴⁰ Cf. *O.R.* III, p. 277, CDDH/III/335; *O.R.* VI, p. 276, CDDH/SR.43, Annex (Switzerland); *O.R.* XII, p. 66, CDDH/II/SR.60, para. 64; pp. 111-112, CDDH/II/SR.64, para. 36; p. 115, paras. 53-54.

⁴¹ Cf. particularly *O.R.* XII, p. 64, CDDH/II/SR.60, para. 54; p. 71, CDDH/II/SR.61, para. 10.

⁴² In this sense, cf. particularly *O.R.* XII, p. 74, CDDH/II/SR.61, para. 28.

⁴³ *O.R.* XII, p. 432, CDDH/II/SR.96, para. 27. Cf. also p. 441, CDDH/II/SR.97, para. 19.

- 2741 Other delegations expressed doubts as to how appropriate this sentence was or considered that it was superfluous or even damaging, in that it was “likely to open the door to abuse by the Occupying Power”.⁴⁴ Finally it was adopted by a vote in Committee II.⁴⁵
- 2742 The expression “but only in the interest of the civilian population of that territory” was added later in a spirit of conciliation.⁴⁶
- 2743 In general, it should not be forgotten that for reasons of security prisoners of war are normally kept in the national territory of the captor, and not in occupied territory. As the recommendation made in the second sentence implies that the prisoners concerned remain in occupied territory – which is justified by the non-military functions they fulfil – the possibility of releasing such prisoners of war on parole in accordance with Article 21, paragraphs 2 and 3, of the Third Convention with a view to carrying out civil defence tasks, should be examined.
- 2744 Anyway, this sentence merely offers a possibility without removing any rights inherent in prisoner-of-war status. Therefore it does not give the Occupying Power any right to require those concerned to perform work which is not in accordance with the provisions of Section III of the Third Convention.
- 2745 This provision is similar to Article 29 of the First Convention which deals with the fate of auxiliary medical personnel who have been captured. Such personnel are prisoners of war just like any captured combatant “but shall be employed on their medical duties in so far as the need arises”.
- 2746 The provision under consideration here is slightly more flexible: they *may*, but do not necessarily *have to* be employed on civil defence tasks insofar as the need arises.
- 2747 Apart from this, the proviso that such personnel may not be *requested* to do dangerous work is merely a reminder of the provision of Article 52 of the Third Convention, which is actually even broader, since it refers to “labour which is of an unhealthy or dangerous nature”. Thus a person covered by the article under consideration here could not be obliged to do unhealthy work either. However, the concept of unhealthy or dangerous work was not defined. The Commentary on the Third Convention states that, as external safety measures must always be taken pursuant to Article 51 of the Third Convention, the essential difference between what is authorized and what is not lies “in the nature of the work”.⁴⁷ Yet there is no doubt that some civil defence tasks, such as fire-fighting or marking danger zones, are dangerous by their very nature.
- 2748 The expression “only in the interest of the civilian population of that territory” does not actually add anything to the article, at least in the context of a normal situation: indeed, the Fourth Convention in any case prohibits an Occupying Power from transferring part of its own population into the territory it has occupied.⁴⁸ The meaning of the provision is certainly not to make a distinction between the national population of occupied territory and civilians of other

⁴⁴ On that debate, cf. *O.R.* XII, pp. 441-444, CDDH/II/SR.97, paras. 19-34.

⁴⁵ Cf. *ibid.*, pp. 443-444, para. 34.

⁴⁶ Cf. *ibid.*, p. 444, paras. 35-37 and p. 445, paras. 48-50.

⁴⁷ Cf. *Commentary III*, p. 276. Cf. also *O.R.* XII, p. 443, CDDH/II/SR.97, paras. 31-33.

⁴⁸ Cf. Art. 49, para. 6, Fourth Convention.

nationalities who are there: the very nature of civil defence work prohibits such a distinction, which would not, moreover, be in accordance with one of the fundamental principles of international humanitarian law, i.e., non-discrimination in aiding victims. Thus this expression acts as a reminder that such work should not be carried out for the benefit of soldiers occupying the territory. Apart from being useful to emphasize this point in context, it should be remembered that this condition follows naturally from the definition of civil defence.⁴⁹

2749 The Chairman of the Working Sub-Group which examined this article considered that this provision should allow those concerned here to “continue their work within the structure of their own national civil defence organization”.⁵⁰ This solution is certainly desirable. Nevertheless, such prisoners of war must “remain under the control of and administratively part of a prisoner of war camp”, according to the rules laid down by the Third Convention for labour detachments,⁵¹ unless the above-mentioned release on parole is followed.

Paragraph 3 – Marking of buildings and equipment

2750 As with personnel, the use of the distinctive sign is mandatory for the buildings, equipment and transports of *military* units assigned to civil defence organizations. As we explained in our comments on paragraph 1, such a strict provision is justified by the military character of the objects in question, which would be military objectives if they were not assigned to civil defence.

2751 The list of objects which must be marked does not appear to be very logical in relation to the definition given of “*matériel*” of civil defence organizations, which includes transports,⁵² but this was merely due to a lack of co-ordination; it was not deliberate, as the paragraph was adopted by Committee II without discussion. Thus for this paragraph alone the traditional distinction between buildings, equipment and transport is made once more.⁵³

2752 The expression *major items* of equipment and transports was not explained. It is clear with regard to small items of equipment such as boots or bandages that marking is unnecessary. As regards transports, it is clearly important that they should always be marked.

2753 As regards the provision that such objects should be *clearly* marked with the distinctive sign, “as large as appropriate”, this follows the logic of all the

⁴⁹ Cf. commentary Art. 61, sub-para. (a), *supra*, pp. 719-722.

⁵⁰ Cf. O.R. XII, p. 442, CDDH/II/SR.97, para. 24.

⁵¹ Cf. Art. 56, Third Convention. However, in this connection, see the explanation of vote of a delegation which, without explicitly giving its view on this question of administrative dependency on a camp, “understands the provision in paragraph 2 to mean that the adverse Party may authorize volunteers from among the personnel described in paragraph 2 to continue their civil defence activities without interruption”, O.R. VI, p. 276, CDDH/SR.43, Annex (Switzerland).

⁵² Cf. Art. 61, sub-para. (d).

⁵³ Cf. particularly Chapters V and VI of the First Convention.

provisions in the Protocol concerning identification, and of Annex I, which emphasizes the need to enhance the visibility of the sign.⁵⁴

Paragraph 4 – Buildings and *matériel* which have fallen into the hands of the adverse Party

- 2754 “*Matériel*”, as mentioned in this paragraph, should once again be understood in the sense of Article 61 (*Definitions and scope*), sub-paragraph (d). Thus it includes transports.
- 2755 While Article 63 (*Civil defence in occupied territories*), paragraphs 4 and 5, lays down very restrictive rules regarding the requisition and diversion of objects of civilian civil defence organizations in occupied territories, the paragraph under consideration here in the first sentence merely refers to the laws of war in case such objects assigned to *military* civil defence units fall into the hands of the adverse Party. However, the second sentence imposes restrictions on the application of the laws of war.
- 2756 Thus, when the paragraph restricts its application to objects *permanently* assigned to the performance of civil defence tasks, it does so with a view to the second sentence. It goes without saying that objects temporarily assigned are also subject to the laws of war, but they are not covered by the second sentence, which moderates the first.
- 2757 The reference to the “laws of war” was contested, and one delegate stated that the term “war” had “been generally replaced by the term ‘armed conflict’”.⁵⁵ However, others raised the point that this expression “was a standard formula which was to be found in all legal handbooks on the subject and appeared also in paragraph 33 of the First Geneva Convention of 1949”, and that it had already been discussed in connection with Article 23 (*Other medical ships and craft*), paragraph 2, of the Protocol.⁵⁶
- 2758 The rules laid down with regard to military civil defence objects are quite similar to those laid down in the First Convention, particularly for medical buildings, materials and transports.⁵⁷
- 2759 In fact, the reference to the “laws of war” is essentially a reference to the Hague Regulations Respecting the Laws and Customs of War on Land, annexed to the Fourth Hague Convention of 1907. In short, the Regulations prohibit the destruction or seizing of the enemy’s property, unless such destruction or seizure be imperatively demanded by the necessities of war. It also prohibits pillage. On the other hand, it admits the right to booty, but this right may be exercised only with regard to any movable property of the enemy State, and in respect of such booty there is no obligation of restitution or compensation.⁵⁸

⁵⁴ In this respect, *cf.* particularly commentary Annex I, Art. 15, para. 3, *infra*, p. 1293.

⁵⁵ *Cf.* O.R. XII, p. 444, CDDH/II/SR.97, para. 43.

⁵⁶ *Cf. ibid.*, p. 445, paras. 44-45.

⁵⁷ *Cf.* First Convention, Articles 33 to 35.

⁵⁸ *Cf.* Hague Regulations, Arts. 23, para. 1(g); 28; 47; 53, para. 1 and 56; *cf.* also *Commentary I*, p. 275 (Art. 33, para. 2).

- 2760** Subject to the second sentence, a Party to the conflict in whose power the movable objects concerned here fall, may therefore use them as it sees fit.
- 2761** On the other hand, immovable property of the enemy is not war booty. Nevertheless, the Occupying State may make use of buildings, though only as administrator and usufructuary,⁵⁹ and still subject to the second sentence.
- 2762** The second sentence therefore mitigates the strict application of the first sentence. Although the Occupying State may use the objects concerned here as it wishes, this applies only under certain conditions.
- 2763** One needs either:
- an “imperative military necessity”⁶⁰ to divert such objects; or
 - the objects must be no longer required for the performance of civil defence tasks; or
 - finally, if the objects are still required for the performance of civil defence tasks, previous arrangements must have been made for adequate provision for the needs of the civilian population.
- 2764** Nevertheless, all these conditions, which are similar to those contained in Article 14 (*Limitations on requisition of civilian medical units*), paragraph 3, for the requisition of civilian medical units, leave some margin of judgment, and it is important that this judgment should be made in good faith. It follows from the spirit of the provision that in principle the civilian population should not suffer as a result of the requisition or diversion of the objects concerned here. If, in exceptional cases, it does suffer, this may only be for reasons of imperative military necessity, which must respect the principle of proportionality between the military advantage anticipated and the damage caused to the civilian population.⁶¹

Y.S.

⁵⁹ Cf. Hague Regulations, Art. 55.

⁶⁰ On the meaning of this expression, cf. commentary Art. 62, para. 1, *supra*, p. 740.

⁶¹ On the concept of proportionality, cf., by analogy, commentary Art. 51, para. 5(b), *supra*, pp. 623-626.

Part IV, Section II – Relief in favour of the civilian population

Introduction

- 2765** Providing supplies for the civilian population in time of armed conflict is a basic problem, as events have frequently and cruelly shown.
- 2766** The Fourth Convention contains numerous provisions – Articles 47-78 – relating to the obligations of an Occupying Power with respect to the population of the occupied territory. Moreover, Article 23 of this Convention deals with the free passage to be allowed to consignments intended for the civilian population of the Parties to the conflict. However, this article imposes fairly narrow limits with regard to the persons who may benefit from relief and regarding the nature of the relief.
- 2767** A major area of concern with regard to this problem became apparent within the context of the Red Cross, and more generally, to the whole of the international community. The XXIst International Conference of the Red Cross (Istanbul, 1969) adopted in Resolution XXVI a “Declaration of Principles for International Humanitarian Relief to the Civilian Population in Disaster Situations”.¹ In Resolution 2675 (XXV) of 9 December 1970 the United

¹ The Declaration is as follows:

- “1. The fundamental concern of mankind and of the international community in disaster situations is the protection and welfare of the individual and the safeguarding of basic human rights.
2. Relief by impartial international humanitarian organizations for civilian populations in natural or other disaster situations should as far as possible be treated as a humanitarian and non-political matter and should be so organized as to avoid prejudicing sovereign and other legal rights in order that the confidence of the Parties to a conflict in the impartiality of such organizations may be preserved.
3. The activities of impartial international humanitarian organizations for the benefit of civilian populations should be coordinated in order to secure prompt action and effective allocation of resources and to avoid duplication of effort.
4. Disaster relief for the benefit of civilian populations is to be provided without discrimination and the offer of such relief by an impartial international humanitarian organization ought not to be regarded as an unfriendly act.
5. All States are requested to exercise their sovereign and other legal rights so as to facilitate the transit, admission and distribution of relief supplies provided by impartial international humanitarian organizations for the benefit of civilian populations in disaster areas when disaster situations imperil the life and welfare of such populations.
6. All authorities in disaster areas should facilitate disaster relief activities by impartial international humanitarian organizations for the benefit of civilian populations.”

Nations General Assembly, “*convinced* that civilian populations are in special need of increased protection in time of armed conflicts”, reaffirmed eight fundamental principles relating to the protection of the civilian population in time of armed conflict, of which the eighth² confirms the applicability of the Declaration mentioned above in the case of armed conflict.

- 2768** The question was discussed during the drafting of the Draft Protocols, particularly in the Conferences of Government Experts and Red Cross Experts. As it considered that the problem of relief in occupied territory was adequately dealt with in the Fourth Convention, the 1973 draft laid the emphasis on the needs of civilian populations who were not in occupied territory, i.e., essentially of the population on the territory of a Party to the conflict. The first article determined the field of application of the Section, and was followed by an article underlining the responsibility of the Parties to the conflict to secure supplies for the civilian population, and a third article laying down the principle that relief actions should be undertaken and accepted when a Party to the conflict does not manage to secure such supplies. In addition, this article laid down the ways in which these actions are to be undertaken.
- 2769** During the Diplomatic Conference some delegations, in the name of the principle of national sovereignty, took issue over the propriety of an article reminding a Party to the conflict of its obligations to secure supplies for its own population. In fact, it could be argued that such a question is an issue of human rights rather than international humanitarian law.
- 2770** Moreover, some considered that a Party to the conflict could not be prevented from according, in this field, priorities based on military necessity rather than humanitarian criteria (for example, privileges accorded to members of the armed forces to ensure their health). Therefore, as the Parties to the conflict could not be forced to fulfil this obligation *without adverse distinction*, they did not consider it worth mentioning.³
- 2771** On the other hand, there was a considerable body of opinion that the obligation of an Occupying Power to ensure essential supplies for the civilian population of occupied territory should be supplemented, despite the existence of the many provisions relating to such territory in the Fourth Convention. Consequently, in order to meet this concern – and not because it was logically required by the general framework of the draft – the article was finally formulated.
- 2772** However, the large majority of the civilian population, who are not in occupied territory in time of armed conflict, was not forgotten. Though the Conference did not consider it appropriate to introduce an article on the responsibility of each Party to the conflict to secure supplies for its own population, as we have just

² The complete text of this eighth principle is as follows: “The provision of international relief to civilian populations is in conformity with the humanitarian principles of the Charter of the United Nations, the Universal Declaration of Human Rights and other international instruments in the field of human rights. The Declaration of Principles for International Humanitarian Relief to the Civilian Population in Disaster Situations, as laid down in Resolution XXVI adopted by the twenty-first International Conference of the Red Cross, shall apply in situations of armed conflict, and all parties to a conflict should make every effort to facilitate this application.”

³ On the points mentioned in this paragraph and the preceding paragraph, cf. *O.R.* XII, p. 316, CDDH/II/SR.84, paras. 31-35.

seen, it did, on the other hand, agree to lay down the principle that relief actions must be undertaken in favour of all civilian populations with insufficient supplies, as laid down in the draft. Moreover, the ways in which this principle is to be applied are broadly described.

2773 Finally, the Conference added an article on the question of personnel participating in relief actions, which was not broached either in the Conventions or in the 1973 draft.

2774 In conclusion, compared with the Conventions, the Protocol is characterized by enlarging the range of supplies deemed essential to the civilian population of occupied territory; by an extension of the benefit of this relief to the whole of the civilian population; by an emphasis on the obligation – even though still relative – for the Parties to the conflict to accept relief in case of necessity; by provisions relating to the personnel participating in relief actions, who had been hitherto ignored.

Y.S.

Article 68 - Field of application

The provisions of this Section apply to the civilian population as defined in this Protocol and are supplementary to Articles 23, 55, 59, 60, 61 and 62 and other relevant provisions of the Fourth Convention.

Commentary

2775 This article determines the personal field of application of Section II which applies “to the civilian population as defined in this Protocol”. The civilian population is defined in Article 50 (*Definition of civilians and civilian population*), paragraph 2, as comprising “all persons who are civilians”. As regards civilians, they are defined in Article 50 (*Definition of civilians and civilian population*), paragraph 1, as “any person who does not belong to one of the categories of

persons referred to in Article 4A(1), (2), (3) and (6) of the Third Convention and in Article 43 of this Protocol”.¹

2776 Moreover, it specifies that the provisions of this Section “are supplementary to” the relevant provisions of the Fourth Convention. As the provisions of the Protocol contain not only a reaffirmation of some rules, but also a development, it is clear that for the Parties to the Protocol the provisions of the Conventions should be read together with the supplementary provisions of Protocol I. This applies, for instance, to the obligations of the Occupying Power to ensure the necessary supplies for the civilian population of the occupied territory, obligations which are augmented in Article 69 (*Basic needs in occupied territories*). The same also applies to the fact that relief actions for the benefit of a Party to the conflict can be provided for the civilian population as a whole, and not only certain categories. This is important, as under the régime of the Conventions, an action for the benefit of a Party to the conflict which is not limited to the prescribed categories could have been challenged by the adverse Party. Moreover, if the relief came by sea, it could have been included in actions impeded by a blockade, or could have been treated as contraband.²

2777 Article 68 mentions the most important provisions of the Fourth Convention to be supplemented by this Section. These are Article 23, which deals with the consignment of medical stores, foodstuffs and clothing to a Party to a conflict; Article 55, which establishes the duty of the Occupying Power to ensure the food and medical supplies of the population of the occupied territory; Article 59, which deals with relief schemes on behalf of the population of the occupied territory; Article 60, which is a reminder that relief consignments to a territory shall in no way relieve the Occupying Power of any of its responsibilities towards the civilian population, and which prohibits the diversion of such relief consignments; Article 61, which deals with the distribution of relief consignments; and Article 62, which in principle grants the civilian population in occupied territory, and other protected persons in occupied territories the right to receive individual relief consignments sent to them.

2778 These are the most important articles supplemented by this Section, but there are other articles in the Fourth Convention which are affected to a greater or lesser extent, and Article 68 clearly shows that the enumeration is not exhaustive by stating that the Section also supplements the “other relevant provisions of the Fourth Convention”. On the other hand, the Diplomatic Conference refrained from specifying – as in the 1973 draft – that this Section is complementary “to such international rules concerning relief as may be binding upon the High Contracting Parties”. It went along with the opinion of one delegate who considered that this was “somewhat vaguely worded”, and who consequently requested that only the relevant provisions of the Fourth Convention be mentioned.³

Protocol I

Article 69 - Basic needs in occupied territories

1. In addition to the duties specified in Article 55 of the Fourth Convention concerning food and medical supplies, the Occupying Power shall, to the fullest extent of the means available to it and without any adverse distinction, also ensure the provision of clothing, bedding, means of shelter, other supplies essential to the survival of the civilian population of the occupied territory and objects necessary for religious worship.
2. Relief actions for the benefit of the civilian population of occupied territories are governed by Articles 59, 60, 61, 62, 108, 109, 110 and 111 of the Fourth Convention, and by Article 71 of this Protocol, and shall be implemented without delay.

Commentary**Paragraph 1 – Duties of the Occupying Power**

- 2779** This paragraph supplements paragraph 1 of Article 55 of the Fourth Convention, which imposes on the Occupying Power the obligation “of ensuring the food and medical supplies of the population” of the occupied territory. It sets out from the idea that it is too restrictive to limit this obligation to supplying the population of the occupied territory only with food and medical supplies. Thus mention is made here in addition of the provision of clothing, bedding, and means of shelter. In fact, it is quite possible to suffer, and even die, from heat or cold, and it is essential that the civilian population has adequate clothing, bedding and shelter. Urgent action to provide shelter applies particularly if the occupied territory has suffered damage from bombing. The immediate provision of makeshift shelters (tents, prefabricated or other forms of housing), is an essential preliminary step to more long-term reconstruction.
- 2780** However, the article does not contain an exhaustive list, and it places the responsibility upon the Occupying Power to provide all the “other supplies essential to the survival of the civilian population”. The word “other” clearly shows that this list was not intended to be exhaustive. This is no more than common sense. In fact, it depends on the local conditions whether certain supplies are essential or not. Thus fuel might be essential in a cold region, and some form of craft for an isolated island. The duty of the Occupying Power therefore depends on the local conditions.
- 2781** Moreover, the obligation also extends to objects necessary for religious worship. In this respect the Occupying Power already had an obligation laid down in Article 58 of the Fourth Convention to *accept* the “consignments of books and articles required for religious needs” and to *facilitate* “their distribution in occupied territory”. Article 69 of the Protocol therefore goes a little further since it imposes the obligation on the Occupying Power itself to provide these objects in the situation where the population of the occupied territory is deprived of them, and is unable to obtain them itself. Obviously the objects themselves are not described, as these depend on the religion of the population concerned.
- 2782** If the occupied territory has insufficient supplies, the Occupying Power must import supplies. This obligation, following from the obligation to ensure the food and medical supplies in accordance with Article 55, paragraph 1, of the Fourth Convention, extends here to all the essential supplies mentioned above.
- 2783** However, the obligation imposed on the Occupying Power only applies “to the fullest extent of the means available to it”. This restriction was already contained in Article 55, paragraph 1, of the Fourth Convention. During the Diplomatic Conference it was proposed to delete it. The delegations which proposed the deletion¹ feared that this restriction would permit the Occupying Power to evade the obligations of this article.² It was finally retained in particular to maintain on

¹ Cf. O.R. III, p. 281, CDDH/II/70.

² O.R. XII, p. 335, CDDH/II/SR.87, para. 17.

this point the indispensable correlation between Article 55 of the Fourth Convention and Article 69 of the Protocol which supplements it. However, in this respect it was clearly specified that there was “a positive, complete requirement on the Occupying Power to use all means available to provide the supplies in question”,³ and that there was an obligation upon the Occupying Power “to arrange for other steps to be taken if it could not supply the requirements in question from its own resources or those of the occupied territory”.⁴

2784 On the basis of these explanations the article was adopted by consensus in Committee II, and it must therefore be interpreted in that light. Thus the existence of an *obligation* on the part of the Occupying Power to accept relief action cannot be denied when it has no other means of meeting the essential needs of the civilian population of the occupied territory. It seems legitimate to recognize that such relief actions should comply with the condition of being humanitarian and impartial in character.⁵ Nevertheless, this criterion must not be abused in order to avoid any action.

2785 Finally, Article 69, paragraph 1, states that the provision of the supplies should be made “without any adverse distinction”, an obligation which applies equally to aid provided directly by the Occupying Power, and to relief actions. Similar comments are made in many other provisions in the Conventions and the Protocols.⁶ As shown above,⁷ some delegates contested the possibility of introducing this principle in the context of a general obligation imposed on the Parties to the conflict, which referred equally to the populations of these Parties. This objection disappeared from the moment it became clear that the article was concerned only with the population of the occupied territory. Moreover, it should be noted that it does not prohibit all distinctions, but only those based on criteria other than medical or humanitarian criteria. To give more blankets to old people or extra food to nursing mothers, for example, is obviously not against the principle, and on the contrary, is in accordance with its spirit.⁸

Paragraph 2 – Relief actions

2786 This paragraph is essentially a cross-reference to the Fourth Convention as regards the relief actions undertaken for the benefit of the populations of occupied territories and a reminder of the relevant provisions of this Convention. These provisions are concerned first of all with collective relief (Article 59) or individual relief (Article 62) intended for the whole population, and they determine the responsibilities of the Occupying Power with respect to such relief

³ *Ibid.*, para. 20.

⁴ *Ibid.*, para. 15.

⁵ On the meaning to be given to this expression, *cf.* commentary Art. 70, *infra*, pp. 817-818.

⁶ *Cf.* in particular Art. 12, First Convention; Art. 12, Second Convention; Art. 16, Third Convention; Art. 27, Fourth Convention; Art. 10, para. 2, and Art. 15, para. 3, and Art. 75, para. 1, Protocol I; Art. 2, para. 1, Protocol II.

⁷ Introduction to the Section, *supra*, p. 806.

⁸ See commentary Art. 70, *infra*, pp. 817-818.

(Article 60), and the means of distribution (Article 61). The extended scope laid down in Article 69, paragraph 1, of the Protocol, of relief considered to be essential, did not need to be mentioned in paragraph 2, as the content of relief consignments is not laid down exhaustively in the Fourth Convention (Article 59 states that these relief schemes “shall consist, in particular, of the provision of consignments of foodstuffs, medical supplies and clothing”).

2787 The other provisions mentioned are concerned with relief consignments intended for civilian internees. They lay down the general principles of such consignments (Article 108), and regulate the questions of collective relief (Article 109), exemption from postal and transport charges (Article 110), and special means of transportation (Article 111).⁹

2788 Nevertheless, two additional details are mentioned regarding relief actions for the benefit of the civilian population of occupied territories:

- the provisions on the personnel participating in relief actions, laid down in Article 71 of the Protocol (*Personnel participating in relief actions*) apply to such actions. There is no provision on such personnel in the Fourth Convention. We will examine the content in the context of the commentary on Article 71 (*Personnel participating in relief actions*);¹⁰
- these actions “shall be implemented without delay”. In this way the often urgent character of such actions is underlined. Nevertheless, this expression does not impose a specific obligation upon anyone to undertake such actions. Article 59 of the Fourth Convention specifies that relief actions “may be undertaken either by States or by impartial humanitarian organizations such as the International Committee of the Red Cross”. From this one can deduce a certain responsibility with regard to such actions for States and organizations able to undertake them, but not a specific legal obligation. It is above all reminiscent of the principle of international solidarity¹¹ for these cases of extreme need, which is obviously addressed in the first place to those who have the means and are capable of providing the required aid.

2789 However, the instruction is also addressed, and in a more pressing form, to the Occupying Power which is not able to ensure the provision of supplies for the population, and to those Powers which must permit free passage to relief consignments over their territory. These Powers genuinely have a duty to be diligent and speed up as much as possible the necessary procedures for the proper execution of relief actions. Delays due simply to procedural reasons would be inadmissible.

Y.S.

⁹ For further details on these various provisions, cf. *Commentary IV*.

¹⁰ *Infra*, p. 831.

¹¹ This principle can be deduced in particular from the Declaration adopted in Resolution 2675 of the United Nations General Assembly, mentioned above (cf. *supra*, introduction to this Section, pp. 805-806).

Protocol I

Article 70 - Relief actions

1. If the civilian population of any territory under the control of a Party to the conflict, other than occupied territory, is not adequately provided with the supplies mentioned in Article 69, relief actions which are humanitarian and impartial in character and conducted without any adverse distinction shall be undertaken, subject to the agreement of the Parties concerned in such relief actions. Offers of such relief shall not be regarded as interference in the armed conflict or as unfriendly acts. In the distribution of relief consignments, priority shall be given to those persons, such as children, expectant mothers, maternity cases and nursing mothers, who, under the Fourth Convention or under this Protocol, are to be accorded privileged treatment or special protection.
2. The Parties to the conflict and each High Contracting Party shall allow and facilitate rapid and unimpeded passage of all relief consignments, equipment and personnel provided in accordance with this Section, even if such assistance is destined for the civilian population of the adverse Party.
3. The Parties to the conflict and each High Contracting Party which allow the passage of relief consignments, equipment and personnel in accordance with paragraph 2:
 - (a) shall have the right to prescribe the technical arrangements, including search, under which such passage is permitted;
 - (b) may make such permission conditional on the distribution of this assistance being made under the local supervision of a Protecting Power;
 - (c) shall, in no way whatsoever, divert relief consignments from the purpose for which they are intended nor delay their forwarding, except in cases of urgent necessity in the interest of the civilian population concerned.
4. The Parties to the conflict shall protect relief consignments and facilitate their rapid distribution.
5. The Parties to the conflict and each High Contracting Party concerned shall encourage and facilitate effective international co-ordination of the relief actions referred to in paragraph 1.

Commentary

Paragraph 1

First sentence – Scope of the principle

2790 Relief actions intended for occupied territories are not covered by this paragraph.¹

2791 The concept of civilian population was defined above.²

2792 What is “a territory under the control of a Party to the conflict, other than occupied territory”? This expression was the result of two major trends which had appeared in the Working Group of Committee II, one of which wished “to place the Parties under a clearly defined obligation with respect to relief”, while the other considered that “such an obligation could not be imposed”.³ One of the consequences of the compromise resulting from this was that a clear distinction was made between the scope of application of Article 69 (*Basic needs in occupied territories*) and Article 70 (61 and 62 of the 1973 draft), the former applying to occupied territories, while the latter applied to territories other than occupied territories. The negative definition means that a territory under the control of a Party to the conflict is definitely covered by one or other of these provisions on relief. There might be some differences of opinion with regard to the concept

¹ On this subject, *cf.* commentary Art. 69, *supra*, p. 811.

² *Cf.* commentary Art. 68, *supra*, p. 809, and Art. 50, *supra*, p. 609.

³ *O.R.* XII, p. 333, CDDH/II/SR.87, para. 5.

of occupation,⁴ but it would not be possible to deny at the same time both the application of Article 69 (*Basic needs in occupied territories*) and that of Article 70.

- 2793 In fact, we are obviously concerned primarily here with the national territory of a State involved in a conflict. However, the article also covers the few territories in the world which still have special status,⁵ and, above all, territories under the control of movements fighting in conflicts such as those mentioned in Article 1 (*General principles and scope of application*), paragraph 4. As regards the *control* of territory, this refers here to material control. This should be understood to refer in particular to the capacity of the Party concerned to ensure the execution of its decisions in the whole territory. However, one should not exclude any territory from the scope of application of Articles 69 (*Basic needs in occupied territories*) or 70 on the ground that they are not in fact controlled by anyone, or that control is in dispute, even though it may happen that a relief action is in practice impossible in certain cases.
- 2794 The civilian population must be “not adequately provided with the supplies mentioned in Article 69”, which itself only supplements Article 55 of the Fourth Convention.⁶ The expression “not adequately provided”, similar to the wording of Article 55 of the Fourth Convention, is not very precise, but this is justified. The need for a relief action and the extent of its urgency must be assessed in every case individually, depending on the real requirements. It is the *essential* character of such requirements that must be the determining factor. This is a matter of common sense which cannot be formulated in precise terms.
- 2795 From the moment that the civilian population referred to here is, *in fact*, not adequately provided, the principle of relief actions applies: relief actions “shall be undertaken” (and not: may be undertaken).
- 2796 As in the case of relief actions intended for occupied territories, the question arises as *to whom* this apparent *obligation* is addressed.⁷
- 2797 Relief actions to be undertaken are defined as being “humanitarian and impartial in character” and “conducted without any adverse distinction”. In other words, any action which does not comply with these criteria, which were taken from the 1973 draft, simply would not be covered by Article 70. However, as in the case of relief actions intended for occupied territories, it is obviously essential not to use these conditions as a pretext to avoid accepting relief actions.
- 2798 The *humanitarian* character of the action is fulfilled once it is clear that the action is aimed at bringing relief to victims, i.e., in the present case, the civilian population lacking essential supplies. What matters most of all is to avoid deception, that is to say, using the relief action for other purposes. However, such cases must be assessed on a factual basis, and the humanitarian character of an

⁴ This problem is not dealt with here. Cf. *Commentary IV*, particularly Art. 6, pp. 60 ff.

⁵ The problem of such territories is not dealt with in the context of this commentary. In this respect, cf. in particular the Resolutions of the General Assembly, proposed by the Fourth Committee. Cf. also *UN Chronicle*, October 1979, p. 28; January 1980, p. 51; September 1983, pp. 17-19 (with regard to the last territory under the United Nations Trusteeship System).

⁶ Cf. commentary Art. 69, *supra*, pp. 812-813.

⁷ On this subject, cf. commentary Art. 69, *supra*, p. 814.

action could not be contested merely on the basis of its intention: the only ground for refusing an action would be the failure to comply with the required criteria.

2799 The *impartial* character of the action may be assumed on the basis of fulfilling the obligation, also laid down, to conduct the action “without any adverse distinction” (which is often referred to as the principle of non-discrimination).

2800 The second obligation results from the philosophical concept of the equality of human beings, which is actually a basic consequence of the principle of humanity. This refers to the real object of the action: the persons who are suffering. By contrast, the concept of impartiality refers to the agent of the action: it is a moral quality which must be present in the individual or institution called upon to act for the benefit of those who are suffering. In other words, the principle of non-discrimination removes objective distinctions between individuals, while impartiality removes the subjective distinctions.

2801 Impartiality presupposes the existence of recognized rules which must be applied dispassionately and without prejudice. Such rules conform precisely with the principles of non-discrimination and proportionality: impartiality “endeavours to relieve the suffering of individuals, being guided solely by their needs, and to give priority to the most urgent cases of distress”.⁸

2802 In the context of the provision under consideration here, the relief action must observe:

- the principle of non-discrimination, including the principle of proportionality (i.e., the sharing according to needs) as a general aim and an ideal which cannot always be achieved, especially in a limited action;
- impartiality in the real sense of the word: those conducting the action or providing the relief must resist any temptation to divert relief consignments or to favour certain groups or individuals rather than others because of personal preferences.

2803 This in no way excludes the possibility of specific actions, for example, for the benefit of children or handicapped people, nor of unilateral actions undertaken for the benefit of only one Party to the conflict. In particular, an unilateral action cannot be considered as indicating a lack of neutrality. It is important to emphasize this point, as traditional links, or even the geographical situation, may prompt a State to undertake such actions, and it would be stupid to wish to force such a State to abandon the action.

2804 Obviously all this also applies to actions undertaken by impartial humanitarian organizations, such as the ICRC. However, such organizations themselves accept the obligation of adopting an universal approach for all victims of armed conflict in order to preserve their credibility. They do not favour the population of one Party to the conflict to the detriment of that of another Party, except on the basis of purely humanitarian criteria or material constraints. Their actions are based

⁸ This remark is part of the text accompanying the principle of impartiality in the “Proclamation of the Fundamental Principles of the Red Cross”, adopted by Resolution IX of the XXth International Conference of the Red Cross, Vienna 1965. It also applies in the present context. On the subject of this principle, cf. also J. Pictet, *The Fundamental Principles of the Red Cross, Commentary*, Geneva, 1979, pp. 33-51.

on the needs of *all* the victims concerned, regardless of any criteria of nationality, and independently of the Party to which they belong.

2805 Finally, such actions are undertaken only “subject to the agreement of the Parties concerned”. This raises the problem of the degree to which a State can be obliged to accept relief for its own population. This was discussed at length throughout the Conferences of Experts and the CDDH. The 1972 draft laid down the obligation to accept relief, but nevertheless included one important restriction, since this obligation was imposed only “to the fullest extent possible”, an expression which some experts wished to delete. In the 1973 draft the obligation was laid down without any escape clause, provided of course that the conditions justifying such an action were met and the action complied with the criteria examined above. However, a reservation was made with regard to the competence to determine the technical details of the action and to place it under the supervision of a Protecting Power or an impartial humanitarian organization, and such a reservation is indeed also made in the text which was finally adopted. The clause requiring the agreement of the Parties concerned was added during the Conference essentially out of a concern to protect the national sovereignty of the State receiving the relief. Nevertheless it was clearly stated that this reservation:

“did not imply that the Parties concerned had absolute and unlimited freedom to refuse their agreement to relief actions. A Party refusing its agreement must do so for valid reasons, not for arbitrary or capricious ones”.⁹

Several delegations supported this interpretation of the expression “subject to the agreement of the Parties concerned”, and one of them even stressed that “the present draft, without involving any infringement of the sovereignty of the Parties concerned, suggested that the necessary agreement should not be withheld”.¹⁰ None of the delegations opposed this. Thus the expression should be interpreted in this sense, and this interpretation is actually supported by the provision of Article 54 (*Protection of objects indispensable to the survival of the civilian population*), paragraph 1, which prohibits the “starvation of civilians as a method of warfare”.¹¹

2806 However, the receiving Party is not the only Party concerned. If this were the case, it would have been more clearly stated, and there would have been no need to use the plural expression. In fact, three types of Party may be concerned: those from whose territory an action is undertaken or from which relief has been sent, those through whose territory relief consignments pass, and those receiving relief. On the other hand, an adverse Party to that receiving relief, but through whose territory relief consignments do not have to pass, is not among *the Parties concerned* in the sense of this paragraph.

⁹ O.R. XII, p. 336, CDDH/II/SR.87, para. 27.

¹⁰ *Ibid.*, p. 337, para. 30.

¹¹ On this subject, *cf.* in addition commentary Art. 54, *supra*, pp. 653-654.

- 2807 Logically, the second type of Party mentioned above, i.e., a Party through whose territory relief consignments must pass, is also excluded from *the Parties concerned* since it forms the object of a separate paragraph (paragraph 2).¹² This leads to the conclusion that the Parties concerned here, whose agreement is required, are primarily the Parties from which the relief is to come (assuming of course that it is not the government itself which has initiated the relief action or will be sending the relief consignments) and the Parties for which the relief is intended.
- 2808 However, it should be stressed once again that this provision should be read in conjunction with Article 54 (*Protection of objects indispensable to the survival of the civilian population*) which prohibits the starvation of civilians as a method of warfare, and the possibility of refusing a relief action or relief consignments is not a matter of discretion: such refusals should thus remain exceptional.

Second sentence – Non-interference

- 2809 Already in the 1972 draft it had been considered important to emphasize that the offer of relief “shall not be considered as an unfriendly act”, so that humanitarian activities in this field could be undertaken without unnecessary stress.
- 2810 The 1973 draft contained the following expression: “Relief actions fulfilling the above conditions shall not be regarded as interference in the armed conflict”. The text which was finally adopted chose to start from the *offer* itself, as even the mere offer must not be regarded as an unfriendly act. Nevertheless, it is obvious that the provision also covers the action itself, provided that, as in the case of a mere offer of relief, the rules with which it must comply and which were examined above, are respected.
- 2811 For the sake of completeness it was specified that such offers (and actions) should not be considered either as “interference in the armed conflict or as unfriendly acts”. The expression “unfriendly acts”, which was not contained in the draft, was added, as a result of an amendment.¹³ It was taken from the fourth principle of the Declaration of Principles adopted by Resolution XXVI of the XXIst International Conference of the Red Cross (Istanbul, 1969).¹⁴
- 2812 These two expressions elucidate, on the one hand, the fact that a relief action will never be considered as a lack of neutrality,¹⁵ and, on the other hand, that such an offer or action should in no way alter the good relations existing between the Party making the offer or undertaking the relief and the adverse Party of that Party whose population is receiving the relief. And *a fortiori* the offer or action cannot be seen as a hostile act, let alone as an act of war.

¹² On this subject, *cf. infra*, pp. 822-823.

¹³ *Cf. O.R. III*, pp. 282-283, CDDH/II/398 and Add.1, and *O.R. XII*, p. 319, CDDH/II/SR.84, para. 45.

¹⁴ On this subject, *cf. introduction* to this Section, *supra*, p. 805.

¹⁵ On the meaning of neutrality in this context, *cf. commentary Art. 19, supra*, p. 237.

Third sentence – Priorities in distribution

- 2813** Article 70 constitutes an undeniable development of international humanitarian law, when compared with Article 23 of the Fourth Convention, insofar as it extends the circle of those benefitting from the relief actions to the whole of the civilian population affected with regard to all essential supplies (themselves defined more widely than in Article 23) which may be made available by relief actions.
- 2814** It should be recalled that Article 23 of the Fourth Convention allows only for the distribution of medical and hospital stores and objects necessary for religious worship to the civilian population as a whole. As regards consignments of essential foodstuffs, clothing and medicines, these can exclusively be distributed to children under fifteen, expectant mothers, and maternity cases.
- 2815** Thus this restriction on those benefitting from relief is removed, and as stated above, Article 23 of the Fourth Convention must be considered to have been *modified* on this point for the Parties to the Protocol, at least in their reciprocal relations.¹⁶
- 2816** However, this increase in the circle of beneficiaries is accompanied by a reminder that priority with regard to relief must be given to some persons, and that there is even an *obligation* to apply such priorities. The responsibility for ensuring that this obligation is fulfilled falls upon those responsible for the distribution of the relief. These priorities clearly show that the obligation to conduct relief actions without any *adverse* distinction does not mean at all that it is prohibited to favour persons with special needs.
- 2817** The extent of such priorities is not specified, and one has indeed to trust those responsible for distribution in this respect. The reminder of priorities is mainly intended to encourage the search for the persons concerned, who are precisely those who have the most difficulties in standing up for themselves and their needs. In the case of equal needs, such persons should receive relief first.
- 2818** Four categories of persons who must be given priority are specifically mentioned. Three of these are those who were the sole beneficiaries of such relief according to Article 23 of the Fourth Convention, i.e., children, expectant mothers and maternity cases.
- 2819** As regards children, the age – limit of fifteen is not specified here, unlike in Article 23 of the Fourth Convention. It may be deduced from Article 77 of the Protocol (*Protection of children*) that the limit of childhood is set at eighteen years of age. However, special privileges are granted children under fifteen years of age,¹⁷ and others for newborn babies (who fall in the same category as the wounded).¹⁸ The absence of a fixed age – limit here therefore means that children up to eighteen years of age should have priority in receiving aid, but those responsible for distribution must first of all favour the most dependent children, i.e., in general, the youngest children – as common sense dictates.

¹⁶ On this subject, *cf.* commentary Art. 68, *supra*, p. 809.

¹⁷ *Cf.* Art. 77, paras. 2 and 3.

¹⁸ *Cf.* Art. 8, sub-para. (a).

- 2820 A fourth category, namely, nursing mothers, was added at the request of a delegate who stated that “babies needed food, and if mothers were to feed them, they too had to be fed”.¹⁹ This proposal was unanimously accepted, and it was stressed that it was indeed in accordance with the United Nations Declaration of the Rights of the Child (Resolution 1386 (XIV) of the General Assembly).²⁰
- 2821 However, the list is not exhaustive and priority must be given to any persons who, “under the Fourth Convention or under this Protocol, are to be accorded privileged treatment or special protection”. Examples include, in particular, wounded or sick civilians or others falling under these categories, such as the handicapped or other persons with a disability or those suffering physical or mental debilities. Similarly, persons deprived of their freedom as a result of the armed conflict²¹ should also have the benefit of special attention.
- 2822 The question of *military* wounded or sick is all the more delicate, as the Protocol is aimed at abolishing the distinction between the military wounded and sick, on the one hand, and civilians on the other.²² Article 70 clearly refers only to the civilian population, and it would therefore certainly be excessive to maintain that all the relief involved in the actions concerned here could also benefit the military wounded and sick. On the other hand, as *all* the wounded and sick must be cared for, and since it is permitted to send medical stores and equipment for the military wounded and sick,²³ the Parties concerned should not oppose the inclusion of medical stores and equipment intended for the military wounded and sick in this relief. In fact, Article 23 of the Fourth Convention was interpreted in this way in the Commentary on this Convention.²⁴

Paragraph 2 – Passage of relief consignments

- 2823 This paragraph relates to the passage of relief consignments and lays down an obligation with regard to these.
- 2824 The obligation is addressed to the “Parties to the conflict” and to “each High Contracting Party”, always provided that it applies to them, i.e., that their geographical position is such that the passage of relief consignments over their territory is necessary, or even simply useful, and that an appeal has been made to them in this respect.
- 2825 The Parties do not have the competence to refuse such passage. Thus they are *obliged* to permit and to facilitate such passage. However, this obligation does not imply agreement without limitations: the consignments, equipment and personnel concerned must be relief consignments, equipment and personnel (the adjective relates to all three terms)²⁵ “provided in accordance with this Section”,

¹⁹ O.R. XII, p. 336, CDDH/II/SR.87, para. 25.

²⁰ *Ibid.*, p. 337, para. 35.

²¹ On this subject, *cf.* Art. 11.

²² In this respect, *cf.* commentary Art. 8, sub-para. (a), *supra*, pp. 116-118.

²³ *Cf.* particularly Art. 38, Second Convention.

²⁴ *Cf. Commentary IV*, p. 180.

²⁵ *Cf. O.R. XII*, p. 339, CDDH/II/SR.87, para. 48.

i.e., essential for the survival of the civilian population, sent for purely humanitarian reasons and to be distributed without any adverse distinction.

2826 The reference to “this Section” is justified as Article 70 refers back to Article 69 (*Basic needs in occupied territories*) for the description of the supplies covered and the question of personnel participating in relief actions is regulated in Article 71 (*Personnel participating in relief actions*). However, paragraph 2 of Article 70 concerns only the passage of relief consignments intended for civilian populations other than those of occupied territories, as Article 69 (*Basic needs in occupied territories*), paragraph 2, refers back to the relevant articles of the Fourth Convention for the passage of consignments to occupied territories.

2827 Moreover, it is shown below that though the Parties are obliged to allow and facilitate the passage of such relief consignments, they still have the right to require certain guarantees.²⁶

2828 The obligation is addressed to States Parties to Protocol I which are not engaged in the conflict, as well as to the Parties to the conflict themselves: in fact, it is clearly stated that permission must be given, even if the assistance “is destined for the civilian population of the adverse Party”. Thus a Party to the conflict may not impede such assistance by means of a blockade.²⁷

2829 Finally an obligation is imposed to allow and facilitate “rapid and unimpeded passage” of the relief consignments, equipment and personnel. The intention of these words is to avoid any harassment, to reduce formalities as far as possible and dispense with any that are superfluous. Customs officials and the police in particular should receive instructions to this effect. The passage referred to may take place over land, water, or by air. However, the speed of the passage and whether it takes place unimpeded depends on local circumstances. Thus the obligation imposed here is relative: the passage of the relief consignments should be as rapid as allowed by the circumstances. Obviously the passage is in danger of being difficult across territory or through the airspace of a Party to the conflict, and no one is expected to do the impossible: such a Party must do all it can to facilitate the passage of relief consignments. On the other hand, if it does not consider itself to be in a position to guarantee the safety of a consignment, it should say so clearly so that an alternative solution can be sought, or if there is none, the decision to take the risk or to give up the relief action is taken with full knowledge of the facts.

Paragraph 3 – The right of supervision of transit States

2830 As shown above, paragraph 2 imposes an *obligation* to allow and facilitate the passage of relief consignments, but this obligation still depends on a certain number of conditions which may be made by the Parties to which the obligation applies.

²⁶ Cf. commentary para. 3, *infra*.

²⁷ On the question of blockades, cf. commentary Art. 54, *supra*, pp. 653-654. Cf. also commentary Art. 68, *supra*, p. 810, and note 2.

Sub-paragraph (a) – Technical arrangements

2831 First, such Parties have the right to “prescribe the technical arrangements, including search, under which such passage is permitted”. Article 23 of the Fourth Convention contains a similar right (“the right to prescribe the technical arrangements”). As the commentary on the Fourth Convention states:

“No mention is made of the points on which its instructions will bear, but it will be agreed that the Power authorizing free passage is entitled to check the consignments and arrange for their forwarding at prescribed times and on prescribed routes.”²⁸

The arrangements may be prescribed for each case individually, but on the whole a general agreement is preferable, applicable to all consignments within a certain period, if larger scale relief actions are being undertaken. The right to prescribe such arrangements should, moreover, only be used without infringing the obligation to facilitate the rapid and unimpeded passage of relief consignments as laid down in the preceding paragraph.

Sub-paragraph (b) – Supervision of distribution

2832 Next, the Parties may make their agreement to allow such passage conditional “on the distribution of this assistance being made under the local supervision of a Protecting Power”. Obviously this element of supervision is of paramount importance, all the more as the range of relief consignments permitted is far broader than it was under the provisions of the Fourth Convention.²⁹ In fact, if relief, such as, for example, foodstuffs or tents, were to end up in the hands of the armed forces, the relief action would undoubtedly increase the military potential of the receiving Party and would be obviously unacceptable to the adverse Party which had allowed the passage of these goods, but also to a Party to the Conventions not engaged in the conflict, whose status of neutrality would be in danger of being questioned by the adverse Party of the recipient.

2833 Such supervision must be carried out by *a Protecting Power*. The singular is used here, although there could be several Protecting Powers in action in the territory of a Party to the conflict, namely when there are several Parties to the conflict which have designated different Protecting Powers. However, it is clear that the supervisory task cannot fall on any Protecting Power other than that or those who are active in the territory of the receiving Party with the consent of the belligerents.³⁰

2834 The reference to a Protecting Power also covers the substitute appointed in accordance with Article 5 (*Appointment of Protecting Powers and of their substitute*).³¹

²⁸ *Commentary IV*, p. 184.

²⁹ On this subject, *cf.* commentary Art. 68, *supra*, p. 810.

³⁰ In this sense, *cf.* *O.R.* XII, pp. 339-342. CDDH/II/SR.87, paras. 49-74.

³¹ *Cf.* commentary Art. 5, para. 7, *supra*, p. 89.

- 2835 The draft referred to supervision of a Protecting Power “or an impartial humanitarian organization”. The question of retaining or deleting this expression was subject to discussion during the CDDH.³² Its deletion is actually logical and in accordance with the system of the Protocol.
- 2836 In fact, the system laid down in the Conventions envisages the possibility of failure, not only in the appointment of a Protecting Power, but also that of a substitute, in which case an impartial humanitarian organization, such as the ICRC, would assume “the humanitarian functions performed by Protecting Powers under the present Convention”.³³ In this case, such an organization is not acting officially *in the capacity of a substitute*, even if this difference is not of great practical importance.
- 2837 In the system of the Protocol, failure with regard to the appointment of Protecting Powers is also taken into account, but in this case the Parties to the conflict are *obliged* to accept the offer of the ICRC or of any other “organization which offers all guarantees of impartiality and efficacy [...] to act as a substitute”. As failure to appoint a substitute does not arise in the Protocol, it was not really necessary to provide for an alternative in paragraph 3 under consideration here, i.e., that supervision must be exercised by an impartial humanitarian organization. If such an organization does take over the supervision, it does so as a substitute.³⁴
- 2838 However, the possibility of failure with regard to the appointment of a substitute should not be completely ruled out. In this case there would have been a failure to apply Article 5 (*Appointment of Protecting Powers and of their substitute*), but this should not paralyze the Protocol as a whole. A wholly formalistic approach in this respect would be contrary to the spirit of the Protocol, as stated in the CDDH.³⁵ Thus it is a question of finding an *ad hoc* solution, and the ICRC, whose right of initiative was confirmed and reinforced in the Protocol,³⁶ could play an important role in this context.
- 2839 Moreover, it should be noted that Article 23 of the Fourth Convention mentions supervision of “Protecting Powers”, and that this was not considered to be exclusive in the commentary on the article:

“Although the Convention expressly mentions only the Protecting Powers, they are not alone in being able to assume responsibility for supervising the distribution of the consignments. Recourse might also be had to the good offices of another neutral State or any impartial humanitarian organization.”³⁷

- 2840 The supervision relates to the distribution of the assistance. The way in which such supervision should be carried out is not specified and it is up to the Protecting Power (or its substitute) which is responsible for carrying out the supervision, to

³³ Cf. Art. 10/10/10/11, para. 3, common to the Conventions.

³⁴ For further details on this subject, cf. commentary Art. 5, paras. 3 and 4, *supra*, pp. 82-87.

³⁵ Cf. O.R. XII, p. 340, CDDH/II/SR.87, para. 59.

³⁶ Cf. Art 81, para. 1.

³⁷ *Commentary IV*, p. 183.

establish measures which are sufficiently strict to guarantee that the relief consignments will actually arrive at their legitimate destination. However, a slight loss of supplies should be tolerated in view of the difficulty of the task and this should not be used as a pretext to suspend any relief actions.

- 2841** By way of example, the commentary on Article 23 of the Fourth Convention mentions some measures conducive to ensuring control, such as “receipts for individual consignments, frequent spot checks in depots and warehouses, periodical verification of distribution plans and reports”.³⁸
- 2842** The personnel of the Protecting Power and the personnel mentioned in Article 71 (*Personnel participating in relief actions*) should play an important role in this respect.
- 2843** As regards the ICRC, it has established a very strict system of control for all the relief consignments which it provides.

Sub-paragraph (c) – Rule that relief consignments shall not be diverted and exception

- 2844** The first part of this sub-paragraph (c) does not lay down a right, but emphasizes an obligation: the Parties allowing passage “shall, in no way whatsoever, divert relief consignments from the purpose for which they are intended nor delay their forwarding”. In fact, this is a superfluous reminder, as the obligation is covered by that contained in paragraph 2, namely, to facilitate the rapid and unimpeded passage of all such consignments.
- 2845** However, the exception to this obligation – which indeed is strictly circumscribed – contains an additional right for the Party allowing the transit. In very rare cases, such a Party may delay the relief consignment or even divert it from its destination. Nevertheless, this can only be in “cases of urgent necessity”, i.e., it must be virtually impossible to do otherwise, and such delay or diversion must be in the interests of the civilian population receiving the relief.
- 2846** In concrete terms, the delay can only really be justified if it is impossible for reasons of security to enter the territory where the receiving population is situated, or to cross some part of the territory of the Party allowing the transit, particularly if this is a Party to the conflict.
- 2847** As regards diverting relief consignments, this would be allowed particularly when there is a delay in the transport of perishable foodstuffs, always provided that they are replaced by fresh provisions as soon as normal conditions are restored. It might also be justifiable in the case that a disaster – such as an earthquake, epidemic etc. – affected the Party through whose territory the relief consignment was passing, so that the provisions were even more necessary for the victims of this disaster than for those for whom they had initially been intended. However, in this case the consignment should certainly only be diverted with to the agreement of the donor.³⁹

³⁸ *Ibid.*, p. 183.

³⁹ On the meaning of the expression “except in cases of urgent necessity”, cf. also *ibid.*, Art. 60, p. 323.

2848 Finally, it should be noted with regard to paragraph 3, as for the whole of Article 70, that the conditions which may be imposed by the Party allowing the passage of relief consignments are less restrictive than those in Article 23 of the Fourth Convention, of which the second paragraph, which actually related only to the adverse Party, was simply omitted. Apart from the conditions mentioned above, the Party concerned could also refuse transit through its territory, in the context of Article 23, if it had:

“serious reasons for fearing:

- a) that the consignments may be diverted from their destination,
- b) that the control may not be effective, or
- c) that a definite advantage may accrue to the military efforts or economy of the enemy through the substitution of the above-mentioned consignments for goods which would otherwise be provided or produced by the enemy or through the release of such material, services or facilities as would otherwise be required for the production of such goods”.

2849 These conditions have a subjective character, since they depend on the judgment of the Party through whose territory the consignments must pass, regarding the possibility of control by the Protecting Power (sub-paragraph (a)) and, if appropriate, regarding the quality of such control. This should not serve as a *pretext* to refuse passage (despite the reference to “serious reasons”).

2850 Moreover, paragraph 2(c) of Article 23 of the Fourth Convention actually goes even further and virtually allows the blockage of any relief action. In fact it is clear that such an action, even if it all goes to the civilian population needing it, to some extent relieves the burden on the economy of the receiving Party. However, this is a question of proportionality: there is no way in which one could weigh the humanitarian considerations of an action destined to ensure the survival of a civilian population lacking essential supplies against the military advantage that such an action could have for the receiving Party, which would in any case always be minimal and indirect, even though it would be wrong to deny its existence altogether.

2851 Article 70 of the Protocol in this respect modifies Article 23 of the Fourth Convention, and the second paragraph of that article should be considered as obsolete in any armed conflict to which Protocol I applies.

2852 In any case, the reform introduced on this point by the Protocol is perfectly logical.

2853 As the Parties concerned may make their permission to allow the passage of relief consignments through their territory conditional on the supervision of the distribution by a Protecting Power (or its substitute), it becomes the responsibility of the latter once it accepts the mandate, and as soon as the relief reaches the territory of the receiving Party. The Party which has given permission for the passage is relieved of all responsibility from that moment.

2854 If the Protecting Power which has accepted the mandate does not actually exercise effective supervision, it is up to the Party to the conflict which has appointed it to react, or even in extreme cases, to withdraw the mandate which it had given in accordance with Article 5 (*Appointment of Protecting Powers and of their substitute*), paragraph 2, of the Protocol. However, it should not reproach

the Party which has permitted the passage for the ineffective way in which the Protecting Power appointed by it has carried out its task.

2855 Moreover, if the Protecting Power declares that it is unable to carry out the mandate, the condition of paragraph 3(b) of Article 70 is not fulfilled and the Party concerned may refuse to allow the passage of the relief consignments.

2856 Thus, the required guarantees have been retained within the framework of the system introduced in Article 70, while reducing to a minimum the possibility for the Parties which have been requested to allow relief consignments to pass through their territory, to escape their obligations by invoking reasons based on subjective and unverifiable judgments.

Paragraph 4 – Obligation of Parties to the conflict with regard to protection and distribution of relief

2857 This paragraph is addressed to the Party to the conflict receiving the relief. It applies to the extent that the principle of such relief consignments have been accepted by that Party in accordance with paragraph 1.

2858 The obligation to *protect* relief consignments means, on the part of the Party concerned, that it must do its utmost to prevent such relief from being diverted from its legitimate destination, particularly by strictly punishing looting and any other diversion of relief and by providing clear and strict directives to the armed forces.

2859 If the authorities do not have the means to ensure such protection, particularly if they cannot prevent looting and diversion of relief consignments, the whole question whether the relief action can continue is obviously put in jeopardy, first from the point of view of the donors, then the Parties allowing the passage over their territory, and finally, and most of all, the adverse Parties of the receiving Party.

2860 Relief actions undertaken under the auspices of the ICRC, and consequently enjoying the protection of the red cross emblem, raise a special problem with regard to the obligations of the Parties to the conflict benefitting from the relief to ensure the protection of the relief consignments.

2861 The protective emblem should by itself ensure the protection of such consignments and the neutrality of the emblem should preclude them from being escorted by members of the armed forces. On the other hand, the employment of mine disposal vehicles for clearing minefields seems acceptable provided that a respectable distance is maintained between such vehicles and the Red Cross convoy.

2862 If the Party to the conflict benefitting from relief considers that the protection of the emblem is insufficiently effective, it should ask to be explicitly relieved of its responsibility, at least with regard to any abuse by the armed forces of the adverse Party.

2863 When the risk results from a lack of discipline or of knowledge of the emblem by the armed forces of the Party concerned, the latter should undertake a major effort of dissemination to ensure simultaneously that the significance of the protective emblem is understood and that the Red Cross mission is accepted.

- 2864 Finally, as regards banditry or riots which might be brought about by relief operations among a starving population, the ICRC should be able to rely on the support of the police force, if this is necessary, and if it so requests.
- 2865 The Parties to the conflict benefitting from relief consignments also have an obligation to *facilitate their rapid distribution*. This means that they should give all the required facilities to any personnel accompanying the relief consignments and to the Protecting Power (or its substitute) responsible for the supervision of distribution, though without interfering with the distribution itself.

Paragraph 5 – International co-ordination

- 2866 The co-ordination of relief in armed conflicts, as in the case of natural disasters, raises very real problems. All too often the lack of co-ordination has resulted in an imbalance in consignments, some foodstuffs being sent in too large quantities and perishing in warehouses, while others remain lacking; and then perhaps foodstuffs or materials not adapted to the conditions are being sent, and other consignments are being made without taking into account the requirements of the infrastructure (particularly the means of transport) that must be met in order to ensure their distribution.
- 2867 Paragraph 5 lays down the principle of *effective* international co-ordination (of a factual, not merely a formal nature) of relief. The obligation is laid down for all Parties concerned – i.e., donors, transit countries and beneficiaries – and it relates to any action undertaken during an international armed conflict in which the Protocol applies, destined for a territory controlled by a Party to the conflict other than an occupied territory.
- 2868 Nevertheless, it does not lay down a specific system of co-ordination. In the Working Group of Committee II, which discussed this question, some wished to add that international co-ordination should be carried out “by international bodies such as the United Nations or the International Red Cross”.⁴⁰ However, this remark did not meet with the agreement of either the Working Group⁴¹ or the group of representatives of the Red Cross.⁴²
- 2869 Thus the principle of co-ordination is merely mentioned. It allows for *ad hoc* solutions, but obviously does not prevent the adoption of supplementary international agreements aimed at dealing with this problem in a definitive way.⁴³

⁴⁰ O.R. XII, p. 334, CDDH/II/SR.87, para. 6.

⁴¹ Cf. *ibid.*

⁴² Cf. *ibid.*, p. 344, para. 95.

⁴³ Without going into details with regard to this problem, mention should be made in particular of the creation by Resolution 2816 (XXVI) of the United Nations General Assembly of the “Office of the United Nations Disaster Relief Co-ordinator” (UNDRO); the adoption by the XXIInd International Conference of the Red Cross in 1969 of “Principles and Rules for Red Cross Disaster Relief” – in addition to the Declaration of Principles mentioned in the introduction to this Section, *supra*, p. 805 and note 1; the 1969 Principles and Rules were modified in 1973, 1977 and 1981; and the existence of an agreement of 25 April 1969 (and its interpretation of 18 December 1974) between the ICRC and the League “for the purpose of specifying certain of their respective functions”, particularly in the field of relief.

Protocol I

Article 71 - Personnel participating in relief actions

1. Where necessary, relief personnel may form part of the assistance provided in any relief action, in particular for the transportation and distribution of relief consignments; the participation of such personnel shall be subject to the approval of the Party in whose territory they will carry out their duties.
2. Such personnel shall be respected and protected.
3. Each Party in receipt of relief consignments shall, to the fullest extent possible, assist the relief personnel referred to in paragraph 1 in carrying out their relief mission. Only in case of imperative military necessity may the activities of the relief personnel be limited or their movements temporarily restricted.
4. Under no circumstances may relief personnel exceed the terms of their mission under this Protocol. In particular they shall take account of the security requirements of the Party in whose territory they are carrying out their duties. The mission of any of the personnel who do not respect these conditions may be terminated.

Commentary

General remarks

2870 This article did not appear in the draft, and the Conventions do not contain special provisions for the personnel engaged in relief actions.

- 2871 Apart from personnel involved in actions under the responsibility of the ICRC, who consequently enjoy the protection of the red cross emblem,¹ personnel participating in relief actions are only protected, outside the régime of the Protocol, by general rules applicable to civilians of States which are not Parties to the conflict. Such persons certainly enjoy the general protection of populations against certain consequences of war,² and, as civilians, may not be attacked, but not all of them are covered by the Fourth Convention which excluded certain categories from its field of application.³ They do not have a *right* to carry out a particular task, and the reason for granting them a status in international humanitarian law is to allow them to *act* effectively for the benefit of a civilian population lacking essential supplies.
- 2872 Personnel participating in relief actions was first mentioned in an amendment to draft Article 62 (present Article 70 – *Relief actions*), aimed at including it amongst the elements for which the Parties concerned must authorize transit,⁴ together with relief provisions and equipment.
- 2873 A proposal was then made to mention it as well in the paragraph devoted to the obligations of the receiving Party.⁵
- 2874 Finally, the question was taken up again by a Working Group of Committee II, which proposed the introduction of a new article especially devoted to the personnel participating in relief actions. This article was adopted with some modifications by Committee II, and then by the Conference.
- 2875 The question of training such personnel already in peacetime is covered by Article 6 (*Qualified persons*).

Paragraph 1 – Aims and conditions

- 2876 The participation of personnel in a relief action, as laid down in this Article 71, covers both actions destined for occupied territories,⁶ and actions for other territories controlled by any of the Parties to the conflict.⁷
- 2877 The participation of such personnel is not automatic. One could envisage relief consignments simply delivered to the receiving Party at an airport, or a port, or in the case of transportation by land, to the border, or simply postal consignments. However, without any personnel involved in the action, the supervision which the Protecting Power or its substitute must exercise is in danger of becoming more difficult, and of requiring a large personnel if it is to be effective.

¹ On this subject *cf. infra*, p. 834.

² *Cf.* Fourth Convention, Part II.

³ *Cf.* Fourth Convention, Art. 4, para. 2. The personnel participating in relief actions in territories other than occupied territories are in fact not covered by the Fourth Convention, save the exceptional case where the State of which the relief personnel are nationals does not have normal diplomatic representation in the receiving State.

⁴ *Cf. O.R.* III, p. 280, CDDH/II/398 and Add.1, para. 2.

⁵ *Cf. O.R.* XII, p. 319, CDDH/II/SR.84, para. 46.

⁶ *Cf.* Art. 69, para. 2.

⁷ *Cf.* Art. 70, para. 1.

- 2878 While relief personnel are involved in the action only *where necessary*, such necessity can therefore be not purely technical, but must respond to the needs of an action conducted *without any adverse distinction*.
- 2879 The qualities required in this personnel are technical – experts in transport, in relief administration, in organization – to allow the relief to be forwarded to its destination in good condition, and to be distributed efficiently. However, there are also personal qualities: in addition to understanding of human feelings required in everyone engaged in humanitarian activity, relief personnel must be capable, if this should be necessary, of cooperating closely with the Protecting Power or the organization responsible for the supervision of the relief distribution.
- 2880 Participation of medical or paramedical personnel is not explicitly mentioned, but it is not excluded, and it should certainly be viewed in a favourable light. Often experts in hygiene and nutrition, nurses, or even doctors, can provide useful – if not essential – additional aid depending on the relief facilities and personnel locally available. Nevertheless, the status of such personnel raises a special problem which will be examined below.⁸
- 2881 Finally, participation of relief personnel “shall be subject to the approval of the Party in whose territory they will carry out their duties”. This should be interpreted to mean the Party which exercises control over this territory, e.g., in the case of occupied territories, the Occupying Power, and not the Party whose territory is occupied.
- 2882 Thus the principle of the participation of personnel is subject to the approval of these Parties, like the principle of the action itself. In fact, there are not two decisions but an overall agreement, and it is understood that participation of personnel is in itself an important element of such an agreement. Moreover, the presence of such personnel may also be considered indispensable by the Protecting Power or the substitute organization responsible for the supervision of the aid distribution, and its refusal could consequently also call into question the agreement of the donors or of the Party authorizing the action.
- 2883 The expression *relief personnel* is quite general, but it should not exclude the possibility for the receiving Party to refuse not the principle of participation of personnel, but participation by a particular person, especially as the right to terminate the mission *of any* member of the relief personnel is explicitly laid down in paragraph 4.⁹
- 2884 It would be reasonable in this case to comply with such a demand, provided that it remains exceptional and is justified, and it does not constitute a subterfuge to obstruct the action itself. In this respect it should be recalled that the approval for action required from the receiving Party does not give this Party the discretionary power to refuse a relief action.¹⁰

⁸ Commentary para. 2, *infra*, p. 834.

⁹ On this subject, *cf.* commentary para. 4, *infra*, pp. 835-836.

¹⁰ *Cf.* commentary Art. 70, para. 1, *supra*, p. 819.

Paragraph 2 – Protection

- 2885** The concepts of *respect* and *protection* have already been examined.¹¹ The obligation to respect and protect relief personnel applies to all the Parties to the conflict, which should, in particular, inform and instruct their armed forces not to attack such personnel.
- 2886** Nevertheless, movements which relief personnel may make into danger zones raise a special problem, since they do not have the right – apart from personnel participating in Red Cross international relief action – to display the protective red cross emblem.
- 2887** Two possible situations could be envisaged if the relief actions have to take place in danger zones, particularly in zones where control is disputed by the Parties to the conflict: in the first case, the action may have the benefit of the distinctive emblem of the red cross. In the context of an armed conflict, this will, in principle, be an action placed under the responsibility of the ICRC. This problem has already been examined.¹²
- 2888** In the second case the convoy does not have the benefit of the protective emblem. In this case it is up to the instigators of the action, the Protecting Power (or its substitute) responsible for its supervision, and the receiving Party to the conflict to decide whether or not they wish to attach an armed escort to the convoy; such escort could certainly be envisaged in this case.
- 2889** Medical personnel participating in relief actions, except those taking place under the auspices of the Red Cross, are not authorized to display the emblem, unless they are placed *under the control* of the receiving Party to the conflict.¹³ If this condition is met, they may enjoy the status of medical personnel. But there is a risk that the instigators of the action or the Protecting Power (or its substitute) responsible for its supervision will find such a condition unacceptable. Nevertheless, it is quite clear that such medical personnel, even though they are not entitled to the protection of the emblem, are entitled to the respect and protection due to all personnel taking part in relief actions.
- 2890** Finally, if personnel participating in relief actions were to fall into the power of the enemy of the receiving Party, they should obviously still be entitled to respect and protection. There is no special provision for their repatriation, but like any civilian of a State not Party to the conflict, they should not be detained, but should be put in a position to return to their own country as soon as possible.
- 2891** Meanwhile, the personnel should be well treated and receive adequate supplies of food, shelter, and if necessary, care.¹⁴

¹¹ Cf. commentary Art. 10, *supra*, p. 146.

¹² Cf. commentary Art. 70, para. 4, *supra*, pp. 828-829.

¹³ Cf. Art. 27, para. 1, First Convention.

¹⁴ In this respect the example should be followed of Article 32 of the First Convention, which deals with the return of medical personnel of States not Parties to the conflict, who have fallen into the hands of the enemy of the Party for whose benefit they were carrying out their mission.

Paragraph 3 – Obligations of the receiving Party

- 2892 This paragraph does not require a great deal of commentary. The general duty to assist should not be confused with the duty of protection of paragraph 2, which was examined above. It is up to the receiving Party to do its utmost to facilitate the task of relief personnel, particularly by simplifying administrative formalities as much as possible, by allowing the personnel to find accommodation if there is any problem with this, and by informing the population and the authorities concerned.
- 2893 Some limitations on the activities and movements of relief personnel are not excluded, but only “in case of imperative military necessity”.¹⁵
- 2894 For example, the limitation of activities could consist of prohibiting distribution to the population when it is known that they are passing foodstuffs onto the armed forces of the adverse Party. Nonetheless, such behaviour could not be permitted either by the Protecting Power or the organization in charge of ensuring supervision, which would also have the duty to intervene.
- 2895 In reality such limitations should be discussed and agreed upon by the receiving Party and the Protecting Power or the organization in charge of ensuring supervision of the action, before any unilateral decision is taken.
- 2896 A limitation on movements of personnel is obviously sometimes justified and it must be possible to make quick decisions to take into account the development of hostilities. Nevertheless, it should not be prolonged beyond what is necessary: it is explicitly stated that the limitation is *temporary* and for any prolongation sound reasons must be given.

Paragraph 4 – Obligations of personnel

- 2897 Though Article 71 as a whole is intended to grant a special status to personnel participating in relief actions, paragraph 4 prescribes the limits of these rights and the obligations involved.
- 2898 The obligation that “under no circumstances may relief personnel exceed the terms of their mission” underlines the necessity for such personnel to allow only legitimate beneficiaries to benefit from relief consignments. This is quite explicitly the aim of their mission. In particular they should not pass any foodstuffs or any other supplies to combatants.
- 2899 On the other hand, relief personnel should not be reproached if such supplies are extorted by combatants. In such a case it would be the action itself or the way in which it is carried out, which would be put into question.
- 2900 Medical care, given by medical personnel participating in a relief action, to wounded combatants they happen to encounter, regardless of the Party to which they belong, should not give rise to reproach either, even if such care does not

¹⁵ On the meaning to be given to this expression, *cf.* commentary Art. 54, para. 5, *supra*, pp. 658-659.

exactly fall within the context of the mission. In fact medical duties enjoy a general protection.¹⁶

- 2901** On the other hand, the duty of discretion for this personnel should be emphasized, particularly if their mission gives them access to information of a military nature. The transmission of such information would certainly exceed the terms of their mission.
- 2902** The security requirements of the Party in whose territory the action is taking place are mentioned in this context. They also imply, on the part of the personnel participating in relief actions, that they must comply with the technical requirements which the authorities could impose (route, schedule, curfews etc.). Naturally these requirements should not be aimed at obstructing the relief action, and the activity of the personnel, as we saw above, should not be limited except in the case of imperative military necessity. However, once these limits have been negotiated and determined, it is no longer up to each member of the personnel participating in the action to make his own judgment about them. He must comply with them.
- 2903** The sanction which may be imposed as a result of actions by a member of personnel which exceed the terms of the mission, is clear: his mission may be terminated. In concrete terms, this means that the member of the personnel concerned may be requested to leave the territory of the receiving Party immediately.
- 2904** This individual application of the measure is a good thing, in the sense that individual behaviour which is in conflict with the Protocol does not necessarily put into question the entire action.
- 2905** Nevertheless, to avoid abuse, such a decision should in principle be taken after the persons responsible for the action have been consulted, and should be duly justified. It is a matter of trust which must survive between the receiving Party and those responsible for the action.
- 2906** The possibility of prosecuting personnel participating in a relief action by the receiving Party is not explicitly excluded. However, it should be avoided as much as possible, in view of the disastrous consequences this could have on the action as a whole.
- 2907** Moreover, it is desirable to provide in the framework of the agreement concerning such action that personnel participating in relief action should enjoy immunity before the courts.

Part IV, Section III – Treatment of persons in the power of a Party to the conflict

Introduction

- 2908 Part IV, entitled “Civilian population”, comprises three sections: Section I, “General protection against effects of hostilities”, Section II, “Relief in favour of the civilian population”, and the present Section. The first two Sections deal with the civilian population as a collective concept which, according to Article 50 (*Definition of civilians and civilian population*), covers all civilians. In contrast, the present Section, concerning the “treatment of persons in the power of a Party to the conflict” formulates certain rules for the benefit of civilians as individuals. In this connection it should be recalled that, according to Article 50 (*Definition of civilians and civilian population*), any person who does not belong to one of the categories of persons referred to in Article 4A(1), (2), (3) and (6) of the Third Convention, or in Article 43 of this Protocol (*Armed forces*) is considered to be a civilian.
- 2909 It will be noted that the heading of this Section does not contain the adjective “civilian”. Yet the heading of Part IV (*Civilian population*) and that of Article 72 (*Field of application*) do not leave any room for doubt: the persons concerned are civilians and the fate of members of the armed forces is provided for elsewhere, in particular in Article 43 (*Armed forces*) and the articles following it. However, although combatant and prisoner-of-war status is denied persons who have committed hostile acts, they automatically have the benefit of the provisions of this Section if they do not enjoy more favourable treatment under other provisions. It will be clear from our comments on Article 75 below (*Fundamental guarantees*) which categories of persons are particularly concerned. Moreover, as we shall see, that article offers new guarantees for persons who are already protected.
- 2910 The meaning of the words “in the power of a Party to the conflict” is not immediately clear. Similar phrases were already contained in the Hague Regulations respecting the laws and customs of war on land (1899 and 1907), in Article 4, relating to prisoners of war. They also appear in the First Geneva Convention of 1949 in Articles 5, 14 and 32, in the Third Convention, Article 12, and in the Fourth Convention, Article 4, paragraph 1. In all these cases the persons concerned are in enemy hands or have fallen into the hands or power of the enemy.
- 2911 When the persons concerned are neutral nationals, the same Article 4, paragraph 2, of the Fourth Convention uses the expression “who find themselves in the territory of a belligerent State”. Similarly, the Conventions on the status

of stateless persons and on refugees use the words “in which he finds himself” and not the phrase “in the power of”.¹

2912 Do these different expressions denote a substantive difference in meaning? Should the expression “in the power of” be deemed to have the connotation of opposition, dependence or compulsion? We do not believe that this is so, and consider the above expressions to be equivalent. In our view the expression covers not only persons who have fallen into the hands of a Party to the conflict, but also those over whom it exercises, or would be able to exercise, authority, for the sole reason that they live in territory under its control. If this interpretation is accepted, the nationals of the Party to the conflict concerned may also invoke the provisions of this Section, though some ambiguity remains on this point and the discussions during the Diplomatic Conference, particularly in Committee III, were long and difficult; they did not shed a great deal of light on the precise scope of this Section, particularly Article 75 (*Fundamental guarantees*).

2913 No doubt this led the Finnish government to make the following declaration when it ratified the Protocol on 7 August 1980:

“With reference to [Article 75] of the Protocol, the Finnish Government declare their understanding that under Article 72, the field of application of Article 75 shall be interpreted to include also the nationals of the Contracting Party applying the provisions of that Article, as well as the nationals of neutral or other States not Parties to the conflict [...]”.

2914 This declaration removes any remaining doubt: the Finnish government commits itself to its own population explicitly and binds itself vis-à-vis the other Contracting States from which it expects a similar attitude.

2915 In general it must be conceded that the provisions of this Section apply to a Party to the conflict’s own nationals, except where the article itself indicates otherwise. Thus Article 78 (*Evacuation of children*) excludes from its scope of application children who are nationals of the Party to the conflict arranging for the evacuation. In other articles the provisions would be meaningless if they did not apply to nationals of the Party to the conflict concerned. For example, the reunion of dispersed families almost always concerns persons from both Parties (Article 74 – *Reunion of dispersed families*). Similarly the rule which prohibits Parties to the conflict from recruiting children under fifteen into their armed forces (Article 77 – *Protection of children*, paragraph 2) only makes sense if it applies to children who are nationals of the Party to the conflict concerned. Finally Article 79 (*Measures of protection for journalists*) contains provisions which must be applied by the Party to the conflict of which the journalist is a national.

2916 Having said this, it should be noted that each one of the articles of this Section (with the exception of Article 72 – *Field of application*, which defines the field of application of this Section) contains a brief description of the persons to which it applies.

C.P./J.P.

¹ Convention Relating to the Status of Stateless Persons, Art. 2: “Every stateless person has duties to the country in which he finds himself [...]”; Convention Relating to the Status of Refugees, Art. 2: “Every refugee has duties to the country in which he finds himself [...]”.

Protocol I

Part IV, Section III, Chapter I – Field of application and protection of persons and objects

Commentary

- 2917 The heading of this Chapter is quite clear as far as persons are concerned. As regards objects, there are no specific rules applicable to them in this Section.
- 2918 The Fourth Convention only rarely deals with the property or objects of protected persons. Thus Article 53 prohibits the Occupying Power in principle from destroying the personal property belonging to private persons. Article 33 prohibits pillage and reprisals against protected persons and their property. However, the object of that provision is not to guarantee the rights of ownership of protected persons.
- 2919 As far as the Hague Regulations (1907) are concerned, Articles 28, 46 and 47 rule that private property cannot be confiscated and that pillage is formally forbidden.
- 2920 In practice the private property of civilian enemy nationals is all too often seized as enemy property, contrary to general principles of law. Cases are on record in which, after a conflict, the property of enemy nationals was made the object of negotiation or even of arbitration.

C.P. / J.P.

Article 72 – Field of application

The provisions of this Section are additional to the rules concerning humanitarian protection of civilians and civilian objects in the power of a Party to the conflict contained in the Fourth Convention, particularly Parts I and III thereof, as well as to other applicable rules of international law relating to the protection of fundamental human rights during international armed conflict.

Commentary

- 2921 The ICRC draft contained a corresponding provision (Article 63), which was largely adopted by the Diplomatic Conference. The purpose is simply to clarify the general rule formulated in paragraph 3 of Article 1 of the Protocol (*General principles and scope of application*).

- 2922 This article did not lead to much discussion, and only one amendment was submitted.¹ Its purpose was to determine the exact group of people covered in each of the articles in this Section, and in so doing to exclude nationals.
- 2923 The Conference preferred a different formula based on the solution adopted in paragraph 4 of Article 49 (*Definition of attacks and scope of application*), which defines the applicability of Section I (*General protection against effects of hostilities*) by reference to the Fourth Convention, in particular Part II thereof. In Article 72 the reference is especially to Parts I and III of the Fourth Convention, as we are concerned with protecting individuals against arbitrary and oppressive actions of the authority into whose power they have fallen.
- 2924 This similarity to Article 49 (*Definition of attacks and scope of application*) led to the inclusion of civilian objects in the wording used although, as we saw above, objects are hardly referred to in the Section.
- 2925 The adoption of the above-mentioned amendment might have shed more light with regard to those who are beneficiaries of the articles of this Section; however, it should be noted that each of the articles contains a brief definition of the persons to whom it applies (Article 73 – *Refugees and stateless persons*; Article 74 – *Reunion of dispersed families*; Article 75 – *Fundamental guarantees*, for persons affected by situations referred to in Article 1 – *General principles and scope of application*; Article 76 – *Protection of women*; Article 77 – *Protection of children*; Article 78 – *Evacuation of children*; Article 79 – *Measures of protection for journalists*).
- 2926 The reference to Parts I and III of the Fourth Convention shows that civilians confronting the authorities of a country of which they are not nationals were intended to be covered in particular, but the reference to other rules of international law suggests that some provisions of the Section, especially Article 75 (*Fundamental guarantees*), apply to nationals of a State Party to the conflict vis-à-vis that State. At any rate this is the interpretation given of this provision by the Finnish government in the above-mentioned declaration.²
- 2927 What is meant by “other applicable rules of international law relating to the protection of fundamental human rights during international armed conflict”? As we have seen, this concerns only the protection of persons, and not the protection of objects or property. Thus the various instruments relating to human rights spring to mind first of all. In the first place, there is the Universal Declaration of 1948, but that Declaration represents, in its own words, “a common standard of achievement for all peoples and all nations” and does not constitute a legal obligation upon States.

¹ The text of this amendment (*O.R.* III, p. 286, CDDH/III/313) was as follows: “*Revise the article to read:*

1. Articles 64, 66, 67 and 69 supplement Parts I and III of the Fourth Convention with respect to the protection of civilians and civilian objects in the power of a Party to the conflict of which they are not nationals.

2. Articles 65 and 68 supplement Part II of the Fourth Convention with respect to the whole of the populations of the Parties to the conflict.”

² *Cf. supra*, introduction to this Section, p. 838.

- 2928 In the field under consideration here, there are three instruments binding the States which are Parties to them:
- a) the International Covenant on Civil and Political Rights (1966);
 - b) the European Convention for the Protection of Human Rights and Fundamental Freedoms (1950);
 - c) the American Convention on Human Rights (1969).³
- 2929 These three treaties, of which the first has universal membership while the others are regional, contain fairly similar clauses, although they are sometimes formulated differently. Moreover, they have one point in common: a clause which allows States Parties to suspend application in time of public emergency which threatens the life of the nation (Covenant, Article 4), in time of war or other public emergency threatening the life of the nation (European Convention, Article 15), in time of war, public danger, or other emergency that threatens the independence or security of a State Party (American Convention, Article 27).
- 2930 Such suspension allows measures to be taken only if they are justified by the circumstances and in no event measures which would be incompatible with other obligations imposed by international law. Moreover, there are exceptions for certain fundamental rights and with regard to these no derogation is permitted.
- 2931 The enumeration of these inalienable fundamental human rights is different in each of the three agreements.
- 2932 In the Covenant no derogation is permitted from Articles 6 (right to life), 7 (torture), 8, paragraphs 1 and 2 (slavery and servitude), 11 (imprisonment for debt), 15 (retroactive effect of criminal laws), 16 (recognition as a person), 18 (freedom of thought, conscience and religion).
- 2933 The agreements listed above continue to apply in the situations referred to in Article 1 of the Protocol (*General principles and scope of application*), but these situations are such as to permit derogation. Therefore it is to be foreseen that States will frequently use the possibility available to them to suspend the application of these agreements for the duration of the armed conflict; thus only the clauses which permit no derogation remain applicable. These are important guarantees, and, as we will see below, Article 75 (*Fundamental guarantees*) introduces a series of additional guarantees which apply, as stated in Article 1 (*General principles and scope of application*) in all circumstances. There is no possibility of derogation.
- 2934 Finally, we should mention the Convention on the Non-Applicability of Statutory Limitations to War Crimes and Crimes against Humanity (1968). In fact, according to the Preamble of this Convention, the effective punishment of war crimes is an important element in the protection of human rights and fundamental freedoms. Paragraph 7 of Article 75 (*Fundamental guarantees*) is, for that matter, dedicated to the prosecution and trial of war crimes and crimes against humanity.

³ There is also the African Charter on Human and Peoples' Rights which entered in force on 21 October 1986. In addition, an Arab Charter on Human Rights is in preparation.

2935 As we will see below, in many cases the provisions of this Section were based on those of the Covenant on Civil and Political Rights. The inclusion of these provisions in this Section has the great advantage that there is no derogation possible in the context of the Protocol.

C.P. / J.P.

Article 73 - Refugees and stateless persons

Persons who, before the beginning of hostilities, were considered as stateless persons or refugees under the relevant international instruments accepted by the Parties concerned or under the national legislation of the State of refuge or State of residence shall be protected persons within the meaning of Parts I and III of the Fourth Convention, in all circumstances and without any adverse distinction.

Commentary

2936 “Protected persons” under the Fourth Convention are persons who “find themselves, in case of a conflict or occupation, in the hands¹ of a Party [...] of which they are not nationals” (Article 4, paragraph 1).²

¹ For the meaning of the expression “in the hands” or “in the power”, see introduction to this Section, *supra*, p. 837.

² However, see the other paras. of Art. 4, which restrict or enlarge the group of protected persons: paragraph 2 provides that nationals of a State which is not bound by the Convention are
(continued on next page)

- 2937 Stateless persons³ therefore by implication enjoy the status of protected persons. The present Article 73 explicitly grants them such status.
- 2938 As regards refugees,⁴ the Fourth Convention lays down explicit rules with regard to some relationships only: on the one hand, those with the State of refuge or the State of residence (Articles 44 and 45, paragraph 4), and on the other hand, those with the Occupying Power when the latter is their country of origin (Article 70, paragraph 2; this special provision constitutes an exception to the definition of “protected persons”).
- 2939 Already during the Conference of Government Experts, which preceded the CDDH, the United Nations High Commissioner for Refugees (UNHCR) expressed the opinion, which was shared by the ICRC, that these provisions of the Fourth Convention were insufficient and that it was appropriate to grant refugees a status which would apply with equal force vis-à-vis all Parties to the conflict, i.e., including the Party of which they are nationals.
- 2940 The draft article presented by the ICRC did not meet any opposition on this principle. Only one written amendment of substance was proposed⁵ and accepted (see *infra*, point 2.1).
- 2941 To properly understand the scope of Article 73 it is necessary to first define the protection to which refugees are entitled under the Fourth Convention, either as civilians,⁶ or specifically as refugees. In order to draw a complete picture of the protection of refugees, reference is also made below to the relevant provisions of Protocol I.⁷

1. The situation of refugees under the Fourth Convention and Protocol I (without applying to Article 73)

1.1. Definition

- 2942 The Fourth Convention does not give a definition of the term “refugee”: it merely uses the criterion of *de facto* absence of protection by any government. The term “refugee” is therefore understood in a broad sense.⁸

not protected by it. It also provides that nationals of a neutral State (for the definition of a neutral State, see commentary Art. 2, sub-para. (c), *supra*, p. 61) who are in the territory of a belligerent State, and nationals of a co-belligerent State, will not be regarded as protected persons while the State of which they are nationals has normal diplomatic representation in the State in whose hands they are. Paragraph 3 refers to Part II, which has a wider scope: it covers all the populations of countries engaged in conflict without any distinction of nationality. Paragraph 4 excludes persons protected by the First, Second or Third Conventions.

³ For the definition of a stateless person, see *infra*, point 2.3, p. 850.

⁴ For the definition of refugees, see *infra*, points 1.1 and 2.4, p. 851.

⁵ O.R. III, p. 287, CDDH/III/306.

⁶ Members of the armed forces are not protected by the Fourth Convention, see *supra*, note 2, *in fine*.

⁷ N.B.: Article 73 extends the scope of application of the rules of the Fourth Convention; it has no effect on the provisions of Protocol I.

⁸ For the definitions of the main international instruments, see *infra*, point 2.4, p. 851.

1.2. *Protection of refugees as civilians*

2943 In the Fourth Convention a distinction can be made between the rules covering the civilian population irrespective of nationality, and those covering “protected persons”, i.e., civilians who are not nationals of the Power in whose hands they find themselves.

2944 As civilians, refugees fall under both categories of rules, of which the main ones are as follows:

a) *Rules applicable to civilians – and to refugees – addressed to all Parties to the conflict (including the State of which they are nationals)*

- general protection against the effects of hostilities (Fourth Convention: Articles 16, 17 and 24; Protocol I: Articles 48 – *Basic rule*, 51 – *Protection of the civilian population*, 57 – *Precautions in attack*, 58 – *Precautions against the effects of attacks*, 76 – *Protection of women*, 77 – *Protection of children*, and 78 – *Evacuation of children*);
- the right to take refuge in protected zones (Fourth Convention: Articles 14 and 15; Protocol I: Articles 59 – *Non-defended localities* and 60 – *Demilitarized zones*);
- the right of families to know the fate of their relatives (Fourth Convention: Articles 25, 26 and 140; Protocol I: Articles 32 – *General principle* and 74 – *Reunion of dispersed families*);
- the right to relief actions (Fourth Convention: Articles 23, 55, 59-62, 108-111, and 142; Protocol I: Articles 69 – *Basic needs in occupied territory* and 70 – *Relief actions*);
- fundamental guarantees, i.e., minimum standard of humane treatment and judicial guarantees (Protocol I: Article 75 – *Fundamental guarantees*).

b) *Rules applicable solely to civilians – and to refugees – who are not nationals of the Power in whose hands they find themselves (i.e., who are “protected persons”)*

- respect for the person and humane treatment (Fourth Convention: Articles 27 and 31-34);
- prohibition on using protected persons to render certain points immune from military operations (Fourth Convention: Article 28);
- the possibility of making application to any relief organization that might assist, for example, the ICRC and UNHCR (Fourth Convention: Article 30);
- retention of status held prior to the conflict (Fourth Convention: Articles 38 and 39);
- the right to leave the territory (Fourth Convention, Articles 35 and 48);
- the most severe measures of control are those of assigned residence and internment (Fourth Convention: Article 41);
- prohibition of deportations from occupied territory (Fourth Convention: Article 49);

- as regards offences committed before occupation, the penal jurisdiction of the Occupying Power is limited to breaches of the laws and customs of war (Fourth Convention: Article 70, paragraph 1).

1.3. *Specific protection of refugees*

2945 Article 44 of the Fourth Convention, which applies to aliens in the territory of a Party to the conflict (Part III, Section II), provides that the State of refuge or the State of residence, when it takes measures of control as laid down in the Convention, must not treat refugees as enemy aliens exclusively on the ground that their nationality *de jure* is that of an enemy State. Article 45, paragraph 4, contained in the same Section, provides that “in no circumstances shall a protected person be transferred to a country where he or she may have reason to fear persecution for his or her political opinions or religious beliefs” (principle of non-refoulement).

2946 Article 70, paragraph 2, applicable to occupied territories (Part III, Section III) provides that the penal jurisdiction of the Occupying Power over its own nationals who have sought refuge in the occupied territory before the conflict is limited to offences committed after the outbreak of hostilities and to offences under normal domestic law committed before the outbreak of hostilities which would have justified extradition in time of peace.

1.4. *Omission with regard to the protection of refugees*

2947 The category of persons protected, as defined in paragraphs 1 and 2 of Article 4 of the Fourth Convention, based on nationality, does not take into account the situation of refugees, who no longer enjoy the protection of the State of which they are nationals.

2948 When the Fourth Convention was adopted in 1949 some speakers remarked that the concept of “nationals” did not cover all cases, and in particular failed to cover the case of individuals who, having fled their country, no longer considered themselves, or were no longer considered as nationals of that country. Despite these remarks, it is for the Power in whose hands they are to decide whether the persons concerned should or should not be regarded as nationals of the country from which they have fled, i.e., as protected persons or not.⁹ This unsatisfactory situation, particularly when the State of refuge is invaded by the refugee’s State of origin, led to the adoption of Article 73 in Protocol I.

⁹ *Commentary IV*, p. 47.

2. Persons covered by Article 73 of Protocol I: Stateless persons and refugees considered as such before the outbreak of hostilities

2.1. General remarks

- 2949** The article specifies how the terms “stateless persons” and “refugees” should be understood: they are persons considered as such, either “under the relevant international instruments” or “under the national legislation of the State of refuge or State of residence”.
- 2950** The State of refuge is the State which has granted to the person in question the status of refugee or stateless person; the State of residence is the State which has permitted the refugee or stateless person to reside in its territory. These two concepts may apply to the same State or to two different States. In the latter case this means that one State – the State of residence – has agreed to harbour in its territory a refugee or stateless person considered as such by another State – the State of refuge.
- 2951** The international instruments referred to are to be understood as acts adopted by an international organization, irrespective of whether they have binding force or not.¹⁰ They include in particular treaties, conventions, agreements, protocols, resolutions, recommendations and declarations. All instruments containing a definition of refugees or stateless persons are relevant.
- 2952** Such instruments must have been “accepted by the Parties concerned”. This phrase, which was not included in the ICRC draft, was introduced to include the substance of the only written amendment proposed with regard to this article. Its object is to clearly establish that international instruments concerning stateless persons and refugees only apply to States which have accepted these instruments, in other words, States which are Parties to them if they are treaties, or States which have given them binding force, or which recognize their binding force, if they are resolutions. There can indeed be no question that States which have not accepted such instruments would be indirectly bound by them on the basis of this Protocol (see also the commentary on Article 32, pp. 346-347).
- 2953** However, every Party to the conflict will of course be obliged to respect decisions taken by another Party granting the status of refugee or stateless person, whether such decisions are taken on the basis of an international instrument, on the basis of national legislation, or on the basis of both. In other words, the decision of the State of refuge or the State of residence is binding upon all Parties to the conflict, even if they have not accepted any relevant international instrument. In fact, a decision based on the national legislation of the State of refuge is clearly sufficient under the terms of the article; a decision based on an international instrument could consequently not have the effect of reducing protection and rendering Article 73 inapplicable. This does not mean that a Party

¹⁰ *Commentary Drafts*, p. 80. See also *O.R.* XV, p. 18, CDDH/III/SR.42, para. 52. In fact, it is in this sense that the term “international instruments” was used during the CDDH; this corresponds with the English concept of legal instruments, and not with the French meaning of this term which is confined to treaties.

to the conflict can be bound indirectly to an international instrument which it has not accepted: it only means respecting a decision taken within the domestic framework of another State, which is, in any case, in accordance with the principle of the inviolability of rights laid down in Articles 38 and 47 of the Fourth Convention.

2.2. *Restriction of the category of beneficiaries in time (ratione temporis)*

- 2954** Article 73 is concerned with persons considered to be stateless persons or refugees “before the beginning of hostilities”.
- 2955** However, as regards stateless persons, we shall see below (point 2.5, letter b)) that even those who only came to be considered as such after the beginning of hostilities are protected, namely under Article 4, paragraph 1, of the Fourth Convention.
- 2956** As regards refugees, the main consequence of the restriction is to limit in practice the field of application of the article *ratione personae* to refugees who have fled from persecution or the threat of persecution. However, other refugees, i.e., persons displaced by the conflict outside or within their own country, will enjoy protection or relief provided for civilians, particularly by Article 75 (*Fundamental guarantees*) (see *supra*, point 1.2). On the other hand, they will also benefit from the relevant provisions of international law on refugees which remain applicable despite the conflict.

2.3. *Definition of stateless persons*

- 2957** One treaty of universal application is entirely devoted to the protection of stateless persons: this is the Convention Relating to the Status of Stateless Persons of 28 September 1954.¹¹ It gives the following definition in Article 1: “the term ‘stateless person’ means a person who is not considered as a national by any State under the operation of its law”. The main causes of statelessness are: lack of harmonization of rules of private international law (conflict of laws), having stateless parents at birth, and disappearance of the State of origin. Thus it is a status created by factual circumstances or legal rules, rather than a status that is conferred.
- 2958** Apart from the 1954 Convention which defines the status of stateless persons, there is another Convention that should be mentioned, one which deals with the actual source of the problem of statelessness: the Convention on the Reduction of Statelessness of 30 August 1961.¹²

¹¹ On 31 December 1984 there were 35 States Parties to this Convention.

¹² On 31 December 1984 there were 13 States Parties to this Convention.

2.4. *Definition of refugees*

2959 In some States there will be concordance between the definitions of international instruments and national definitions, as the national law will have used the definition of an international instrument. In other States there will be a difference, either because the State is not Party to any international treaty giving a definition – so that it is free to have its own definition – or because the definition it has adopted in its own national legislation is more extensive than that of the treaties to which it is a Party. In this last case the national definition will prevail as it is more favourable to the victims.

2960 The following definitions are given in the main relevant international instruments:

a) *Convention Relating to the Status of Refugees of 28 July 1951*¹³

2961 According to Article 1, Section A, paragraph (2), the term “refugee” applies to any person who:

“as a result of events occurring before 1 January 1951 and owing to well-founded fear of being persecuted for reasons of race, religion, nationality, membership of a particular social group or political opinion, is outside the country of his nationality and is unable or, owing to such fear, is unwilling to avail himself of the protection of that country; or who, not having a nationality and being outside the country of his former habitual residence as a result of such events, is unable or, owing to such fear, is unwilling to return to it”.

2962 Section B, paragraph (1) of the same article provides that the words “events occurring before 1 January 1951” are to be understood, as States may elect, to mean either “events occurring in Europe” or “events occurring in Europe or elsewhere”.

2963 In short, they are persons fleeing from persecution or from the threat of persecution.

b) *Protocol Relating to the Status of Refugees of 31 January 1967*¹⁴

2964 In substance the definition in the Protocol is identical to that of the 1951 Convention; the aim of the Protocol is to eliminate the time-limit (“before 1 January 1951”) and the geographical restriction (“in Europe”).

¹³ On 31 December 1984 there were 95 States Parties to this Convention.

¹⁴ It is possible to be party to the Convention or the Protocol, or to both simultaneously. The status of a refugee is identical in all three cases, as the Protocol refers back to the articles of the Convention on this subject. On 31 December 1984 94 States were Parties to the Protocol.

c) *Statute of the Office of the United Nations High Commissioner for Refugees (HCR) of 14 December 1950*¹⁵ and resolutions adopted within the framework of the United Nations

2965 Under the terms of this Statute the UNHCR's competence extends to all persons covered by the definition of the 1951 Convention, and also to:

“any other person, who is outside the country of his nationality or, if he has no nationality, the country of his former habitual residence, because he has or had well-founded fear of persecution by reason of his race, religion, nationality or political opinion and is unable or, because of such fear, is unwilling to avail himself of the protection of the Government of the country of his nationality, or, if he has no nationality, to return to the country of his former habitual residence”.

2966 The substance of this definition is identical to the definition of the 1967 Protocol.

2967 Over the years the UNHCR has been led, on the basis of resolutions of the General Assembly, the Economic and Social Council and the Executive Committee¹⁶ to extend his activities of protection and assistance to other categories of persons in similar situations, particularly to those “who, owing to external aggression, occupation, foreign domination or events seriously disturbing public order in either part of, or the whole of their country of origin or nationality are compelled to seek refuge outside that country”.¹⁷

2968 The UNHCR's mandate therefore extends not only to persons fleeing persecution or the threat of persecution, but also those fleeing from armed conflict or disturbances.

2969 If a State has recognized the competence of the UNHCR with regard to certain persons before the beginning of hostilities, this means that they will benefit from Article 73 independently of the fact whether or not they were considered refugees under a relevant international instrument.

d) *Organization of African Unity (OAU) Convention Governing the Specific Aspects of Refugee Problems in Africa of 10 September 1969*¹⁸

2970 This Convention provides that the term “refugee” applies to refugees as defined in the 1967 Protocol, as well as:

¹⁵ Adopted as an annex to Resolution 428 (V) of the United Nations General Assembly.

¹⁶ General Assembly Resolutions 1167 (XII), 1388 (XIV), 1501 (XV), 1671 and 1673 (XVI), 1783 and 1784 (XVII), 1959 (XVIII), 2958 (XXVII), 3143 (XXVIII), 3454 and 3455 (XXX), 31/35, 32/67, 32/68, 33/26, 34/60, 35/41, 35/135, 35/187; ECOSOC Resolutions 1655 (LII), 1705 (LIII), 1741 (LIV), 1799 (LV), 1877 (LVII), 2011 (LXI), 1978/39, 1980/8, 1980/54; Conclusions of the Executive Committee of the HCR: see HCR/IP/2/Eng/REV., 1984.

¹⁷ Official documents of the General Assembly, 36th session, supplement No. 12A (A/36/12/Add.1) of 09.11.81, pp. 18 ff. Resolution No. 22 can also be found in the *Conclusions on the international protection of refugees*, HCR/IP/2/Eng/REV., 1984.

¹⁸ On 31 December 1984 there were 29 States Parties to this Convention.

“to every person who, owing to external aggression, occupation, foreign domination or events seriously disturbing public order in either part or the whole of his country of origin or nationality, is compelled to leave his place of habitual residence in order to seek refuge in another place outside his country of origin or nationality”.

e) *Principles relating to the treatment of refugees adopted by the Afro-Asian Legal Consultative Committee*¹⁹

2971 The principles adopted in 1966 give the following definition of the refugee:

“A refugee is a person who, owing to persecution or well-founded fear of persecution for reasons of race, colour, religion, political belief or membership of a particular social group:

(a) leaves the State of which he is a national, or the Country of his nationality, or, if he has no nationality, the State or Country of which he is a habitual resident; or,

(b) being outside such State or Country, is unable or unwilling to return to it or to avail himself of its protection.”

2972 According to an Addendum of 1970, the principles of 1966

“mainly contemplate the status of what may be called political refugees who have been deprived of the protection of their own Government and do not provide adequately for the case of other refugees or displaced persons”.

2973 Consequently the Addendum purports to protect also such other persons, i.e.:

“Any person who because of foreign domination, external aggression or occupation has left his habitual place of residence, or being outside such place, desires to return thereto but is prevented from so doing by the Government or authorities in control of such place of his habitual residence”.

2.5. *The effects of Article 73*

a) *General remarks*

2974 Stateless persons and refugees “shall be protected persons within the meaning of Parts I and III of the Fourth Convention”, provided they are considered as such before the events leading to the application of the Protocol.

2975 In fact, this means that they will enjoy the protection laid down by the Fourth Convention as a whole, as Part II already applies to them in the sense that it covers the whole of the civilian population in the territory of Parties to the conflict without any adverse distinction, in particular of nationality.

2976 Such protection will be given “in all circumstances”, i.e., in all situations where humanitarian law applies. Furthermore it will be granted “without any adverse

¹⁹ Eighth session, Bangkok, 1966, and eleventh session, Accra, 1970.

distinction”, i.e., without any discrimination, unless this is based on a different need for protection or assistance.

2977 It should be noted that acts qualified as grave breaches in the Conventions constitute grave breaches of the Protocol if they are committed against persons protected by Article 73 (see Article 85 – *Repression of breaches of this Protocol*, paragraph 2, and Article 147, Fourth Convention).

b) *Effect on stateless persons*

2978 Although they are not explicitly protected by the 1949 Conventions, stateless persons enjoy the protection of all the provisions of the Fourth Convention by virtue of Article 4, paragraph 1.²⁰ According to this provision, “persons protected by the Conventions are those who, at a given moment and in any manner whatsoever, find themselves, in case of a conflict or occupation, in the hands of a Party to the conflict or Occupying Power of which they are not nationals”. On the other hand, they do not fall under the exceptions to the general rule which are contained in paragraphs 2 and 4 of the same Article 4. This proves that they are protected persons under the Fourth Convention. The article under consideration here is therefore merely a formal confirmation of this right.

2979 The fact that Article 73 only covers persons considered as stateless persons “before the beginning of hostilities” cannot have the effect of restricting the protection accorded them by the Fourth Convention, as this would be contrary to the *ratio legis* of the article, which is to improve their protection.

2980 Thus persons who, *before or after* the beginning of hostilities are considered as stateless persons under the relevant international instruments accepted by the Parties concerned or under the national legislation of the State of refuge or of residence, are protected by the Fourth Convention and Protocol I.²¹ As for refugees, the decision of the State which has acknowledged the status of stateless person is binding upon the other States concerned.

c) *Effect on refugees*

2981 As regards Part I of the Fourth Convention, Article 73 of the Protocol has the effect of modifying Article 4 of that Convention by adding to the list of protected persons “refugees in the sense of Article 73 of the Protocol” and eliminating the restrictions of paragraph 2 in respect of them. Thus refugees enjoy the protection of all the relevant provisions of the Fourth Convention, irrespective of their nationality and regardless of the Party in whose power they have fallen.²²

2982 The reference to Part III might seem superfluous. However, in our view it reveals a willingness to grant refugees the best possible protection and allows each article of the Convention to be interpreted in the most favourable light for refugees. This means, for example, that refugees are entitled to the protection of

²⁰ In this sense, see *Commentary IV*, pp. 45 ff.

²¹ This was not contested during the CDDH.

²² Thus all refugees benefit from the rules quoted above, point 1.2, including those under b).

Article 40, paragraph 2, of the Fourth Convention in all circumstances, even though that article refers to protected persons “of enemy nationality”, and they may also avail themselves of the right to leave the territory as laid down in Article 48 in order to go to a third country, despite the heading of that article, which refers to repatriation.²³

- 2983** The effects with regard to the different Sections of Part III are as follows: the provisions of Part III, Section I (Provisions common to the territories of the Parties to the conflict and to occupied territories) apply to refugees, whether they are in the power of the State of refuge or of the State of residence, which was already the case before Article 73 came into being, or whether they are in the State of which they are nationals, which is a new provision. According to this Section, refugees are entitled in particular to respect for their persons and to be humanely treated (Articles 27 and 31-34) and they are entitled to make application to the services of the Protecting Powers (of the State of refuge) and to relief organizations (Article 30).
- 2984** The provisions of Part III, Section II (Aliens within the territory of a Party to the conflict), already regulated the relations between refugees and the State of refuge; Article 73 merely confirms these provisions. Articles 44 and 45, paragraph 4, which are in this Section are not modified.
- 2985** The provisions of Part III, Section III (Occupied territories), become fully applicable to refugees, and this represents a change in the law when the Occupying Power is the State of which they are nationals. This Section in particular gives them the right to leave the occupied territory (Article 48) and protects them from being forcibly transferred or deported (Article 49). In addition, according to Article 70, paragraph 1, of the Fourth Convention, refugees may not be arrested, prosecuted or convicted for acts committed or for opinions expressed before the occupation, with the exception of breaches of the laws and customs of war. Paragraph 2 of that article is only applicable to nationals of the Occupying Power who sought refuge in the occupied territory before the beginning of hostilities, but without having acquired the status of refugee in the sense of Article 73.

C.F.W.

²³ The headings of the Conventions have in any case no official character: they were added by the Secretariat of the 1949 Conference and were not adopted by the Diplomatic Conference itself.

Article 74 – Reunion of dispersed families

The High Contracting Parties and the Parties to the conflict shall facilitate in every possible way the reunion of families dispersed as a result of armed conflicts and shall encourage in particular the work of the humanitarian organizations engaged in this task in accordance with the provisions of the Conventions and of this Protocol and in conformity with their respective security regulations.

Commentary

- 2986 Since the Second World War the reunion of dispersed families has become a major concern of humanitarian organizations. That conflict was actually characterized by the enormous numbers of people who were obliged to leave their normal place of residence by various constraints: capture by the enemy, exodus before the invasion following the destructions of war, evacuation ordered by the national or occupation authorities, mass migration of whole populations, forced labour, voluntary or compulsory evacuations, deportation for political or racial reasons, etc.
- 2987 The consequences of such removal from people's normal places of residence were further aggravated by the difficulty, and even impossibility, for them to send news from the place to which they had been moved. In this way family ties were abruptly and sometimes permanently broken.

- 2988** The ICRC endeavoured to put members of a family who had not heard from one another in contact with each other by collecting information regarding the identity of displaced persons. Before it is possible to reunite members of a family, it is of course necessary to find them and reestablish contact. In this field the existence of a fixed information and collection point is essential. With this idea in mind the ICRC created the Central Tracing Agency, which has now become a permanent organization.¹
- 2989** In addition, in 1943 the Allied authorities set up a tracing organization for the purpose of collecting all the documentation on missing persons and dispersed families. In 1947 this organization received the name of International Tracing Service (ITS) and in 1948 it was established in Arolsen (FRG). This organization first depended on the United Nations Relief and Rehabilitation Administration (UNRRA), then to the International Refugee Organization (IRO), and finally to the Allied High Commission for Germany. In 1955 the Allied authorities entrusted the management and administration of this service to the ICRC under an international agreement and the ICRC still continues to run it today. The ITS has assembled the largest collection world-wide of archives on concentration camps, so that, in particular, it is able to provide information and certificates required by former deportees, foreign labour and displaced persons, as well as by their relatives.
- 2990** Once the members of a dispersed family have been put into contact, reuniting them has often posed problems, and the ICRC endeavoured to help them to get together in a place of their choice. It is estimated that after the Second World War it contributed to reuniting approximately 700,000 persons with their families.
- 2991** In this field the United Nations High Commissioner for Refugees has also brought about many reunions of families by facilitating the acceptance of members of a family by a country where one member of that family already was. Obstacles often arose because governments were opposed to their nationals leaving, or refused to allow any more persons to enter their territory, and reunions were often achieved only after long and patient negotiation.
- 2992** Similar situations have arisen many times since the Second World War. For example, the war in Korea led to large-scale migration of the population, so that numerous families were separated. In the Middle East various conflicts have also led to displacement of populations so that members of a family are often separated. Population movement in Southeast Asia took place on a large scale, and many people have sought refuge, and are still seeking refuge in neighbouring countries. In all these situations, and in other cases, the ICRC has endeavoured to make contact between members of dispersed families by setting up special offices either in Geneva where the Central Tracing Agency is established, or at the seat of ICRC delegations in the countries concerned. Thus important services have been rendered to dispersed families.
- 2993** In 1949 the Diplomatic Conference agreed to include Article 26 in the Fourth Convention. This article is devoted to dispersed families and reads as follows:

“Each Party to the conflict shall facilitate enquiries made by members of families dispersed owing to the war, with the object of renewing contact with

¹ For further details on the Central Tracing Agency, see commentary Art. 78, para. 3, *infra*, p. 914.

one another and of meeting, if possible. It shall encourage, in particular, the work of organizations engaged on this task provided they are acceptable to it and conform to its security regulations.”

- 2994** This provision, which is not a very strong obligation, has been of some use and was frequently invoked by organizations devoted to the reunion of dispersed families, particularly by the ICRC.
- 2995** However, in 1976 the non-governmental organizations concerned with such problems considered that on the occasion of the adoption of the Protocol it would be appropriate to go slightly further by urging governments to facilitate the reunion of families. Thus the ICRC and the League of Red Cross and Red Crescent Societies, with the support of the United Nations High Commission or for Refugees, agreed on a text and succeeded in persuading several governments to submit it as a new article numbered 64 *bis*. This led to amendment CDDH/III/329, submitted by 28 governments; Committee III adopted it by consensus without any change, and it was also adopted by consensus in plenary. Thus it has become
Article 74.
- 2996** The article requires very little explanation, as its text is clear.
- 2997** Yet the question might arise, what is meant by “family”? In the narrow sense, the family covers persons related by blood and living together as one household. In a wider sense it covers all persons with the same ancestry. In the context of Article 74 it would be wrong to opt for an excessively rigid or precise definition; common sense must prevail. Thus the word “family” here of course covers relatives in a direct line – whether their relationship is legal or natural – spouses, brothers and sisters, uncles, aunts, nephews and nieces, but also less closely related relatives, or even unrelated persons, belonging to it because of a shared life or emotional ties (cohabitation, engaged couples etc.). In short, all those who consider themselves and are considered by each other, to be part of a family, and who wish to live together, are deemed to belong to that family.
- 2998** The main innovation of this article compared with 1949 is the duty imposed on Parties to the conflict and on Contracting Parties to facilitate the reunion of families. This duty is not only imposed on Contracting Parties which are Parties to the conflict, but also on Contracting Parties which are not involved in the conflict. This is quite logical, since it often happens during armed conflict that nationals of a country involved in a conflict seek refuge or are taken to neutral countries.
- 2999** The second part of the article merely reiterates, with some further details, what was said in 1949: the organizations concerned must act in accordance with the provisions of the Geneva Conventions and of this Protocol. Reference should be made in particular to Article 81 (*Activities of the Red Cross and other humanitarian organizations*). The last part of the article refers to “their respective security regulations”. This clearly refers to security regulations laid down by the Contracting Parties or the Parties to the conflict, and not to security regulations which humanitarian organizations might have been induced to issue. From a grammatical point of view, the possessive pronoun “their” could refer to either, in the English text as well as in the French and Spanish texts, but the intention is quite clear.

Protocol I

Article 75 – Fundamental guarantees

1. In so far as they are affected by a situation referred to in Article 1 of this Protocol, persons who are in the power of a Party to the conflict and who do not benefit from more favourable treatment under the Conventions or under this Protocol shall be treated humanely in all circumstances and shall enjoy, as a minimum, the protection provided by this Article without any adverse distinction based upon race, colour, sex, language, religion or belief, political or other opinion, national or social origin, wealth, birth or other status, or on any other similar criteria. Each Party shall respect the person, honour, convictions and religious practices of all such persons.
2. The following acts are and shall remain prohibited at any time and in any place whatsoever, whether committed by civilian or by military agents:
 - (a) violence to the life, health, or physical or mental well-being of persons, in particular:
 - (i) murder;
 - (ii) torture of all kinds, whether physical or mental;
 - (iii) corporal punishment; and
 - (iv) mutilation;
 - (b) outrages upon personal dignity, in particular humiliating and degrading treatment, enforced prostitution and any form of indecent assault;
 - (c) the taking of hostages;
 - (d) collective punishments; and
 - (e) threats to commit any of the foregoing acts.
3. Any person arrested, detained or interned for actions related to the armed conflict shall be informed promptly, in a language he understands, of the reasons why these measures have been taken. Except in cases of arrest or detention for penal offences, such persons shall be released with the minimum delay possible and in any event as soon as the circumstances justifying the arrest, detention or internment have ceased to exist.
4. No sentence may be passed and no penalty may be executed on a person found guilty of a penal offence related to the armed conflict except pursuant to a conviction pronounced by an impartial and regularly constituted court respecting the generally recognized principles of regular judicial procedure, which include the following:
 - (a) the procedure shall provide for an accused to be informed without delay of the particulars of the offence alleged against him and shall afford the accused before and during his trial all necessary rights and means of defence;

- (b) no one shall be convicted of an offence except on the basis of individual penal responsibility;
 - (c) no one shall be accused or convicted of a criminal offence on account of any act or omission which did not constitute a criminal offence under the national or international law to which he was subject at the time when it was committed; nor shall a heavier penalty be imposed than that which was applicable at the time when the criminal offence was committed; if, after the commission of the offence, provision is made by law for the imposition of a lighter penalty, the offender shall benefit thereby;
 - (d) anyone charged with an offence is presumed innocent until proved guilty according to law;
 - (e) anyone charged with an offence shall have the right to be tried in his presence;
 - (f) no one shall be compelled to testify against himself or to confess guilt;
 - (g) anyone charged with an offence shall have the right to examine, or have examined, the witnesses against him and to obtain the attendance and examination of witnesses on his behalf under the same conditions as witnesses against him;
 - (h) no one shall be prosecuted or punished by the same Party for an offence in respect of which a final judgement acquitting or convicting that person has been previously pronounced under the same law and judicial procedure;
 - (i) anyone prosecuted for an offence shall have the right to have the judgement pronounced publicly; and
 - (j) a convicted person shall be advised on conviction of his judicial and other remedies and of the time-limit within which they may be exercised.
5. Women whose liberty has been restricted for reasons related to the armed conflict shall be held in quarters separated from men's quarters. They shall be under the immediate supervision of women. Nevertheless, in cases where families are detained or interned, they shall, whenever possible, be held in the same place and accommodated as family units.
6. Persons who are arrested, detained or interned for reasons related to the armed conflict shall enjoy the protection provided by this Article until their final release, repatriation or re-establishment, even after the end of the armed conflict.
7. In order to avoid any doubt concerning the prosecution and trial of persons accused of war crimes or crimes against humanity, the following principles shall apply:
- (a) persons who are accused of such crimes should be submitted for the purpose of prosecution and trial in accordance with the applicable rules of international law; and
 - (b) any such persons who do not benefit from more favourable treatment under the Conventions or this Protocol shall be accorded the treatment provided by this Article, whether or not the crimes of which they are accused constitute grave breaches of the Conventions or of this Protocol.

8. No provision of this Article may be construed as limiting or infringing any other more favourable provision granting greater protection, under any applicable rules of international law, to persons covered by paragraph 1.

Commentary Drafts, pp. 80-84 (Art. 65).

Commentary

- 3000 This article is one of the longest in the entire Protocol. It was the object of lengthy discussion in the Conference itself and in informal meetings of delegates.¹

¹ The ICRC had submitted a draft article numbered Art. 65, which read as follows:
 “Article 65 – Fundamental guarantees

1. Persons who would not receive more favourable treatment under the Conventions or the present Protocol, namely, nationals of States not bound by the Conventions and the Parties' own nationals shall, in all circumstances, be treated humanely by the Party in whose power they may be and without any adverse distinction. The present article also applies to persons who are in situations envisaged under Article 5 of the Fourth Convention. All these persons shall enjoy at least the provisions laid down in the following paragraphs.

(continued on next page)

- 3001** When it presented the draft article, the ICRC expressed its concern that a minimum of protection should be granted in time of armed conflict to any person who was, for one reason or another, unable to claim a particular status, such as that of prisoner of war, civilian internee in accordance with the Fourth Convention, wounded, sick or shipwrecked.
- 3002** The article was the object of many amendments and proposals during the deliberations in the Working Group. Several of the amendments were related to details concerning the guarantees to be accorded.
- 3003** On the other hand, two amendments on points of substance are worth mentioning. The first comes from the Finnish delegation.² It has the merit of great clarity. As we saw above,³ the Finnish government made a declaration on the lines of this amendment upon ratification of the Protocol.

2. The following acts are and shall remain prohibited at any time and in any place whatsoever, whether committed by civilian or military agents:

- (a) violence to the life, health and physical or mental well-being of persons, in particular murder, torture, corporal punishment and mutilation;
- (b) physical or moral coercion, in particular to obtain information;
- (c) medical or scientific experiments, including the removal or transplant of organs, not justified by the medical treatment and not carried out in the patients' own interest;
- (d) outrages upon personal dignity, in particular humiliating and degrading treatment;
- (e) taking of hostages;
- (f) threats to commit any of the foregoing acts.

3. No sentence may be passed or penalty executed on a person found guilty of an offence related to a situation referred to in Article 2 common to the Conventions, except in pursuance of a previous judgment pronounced by an impartial and properly constituted court, affording the following essential guarantees:

- (a) no person may be punished for an offence he or she has not personally committed; collective penalties are prohibited;
- (b) no person may be prosecuted or punished for an offence in respect of which a final judgment has been previously passed, acquitting or convicting that person;
- (c) everyone charged with an offence is presumed to be innocent until proved guilty according to law;
- (d) no person may be sentenced except in pursuance of those provisions of law which were in force at the time the offence was committed, subject to later more favourable provisions.

4. Women whose liberty has been restricted shall be held in quarters separated from men's quarters. They shall be under the immediate supervision of women. This does not apply to those cases where members of the same family are together in the same place of internment.

5. The persons mentioned in paragraph 1, detained by reason of a situation referred to in Article 2 common to the Conventions and who are released, repatriated or established after the general cessation of hostilities, shall enjoy, in the meantime, the protection of the present article."

² The text reads as follows: "Persons who would not receive more favourable treatment under the Conventions or the present Protocol, namely nationals of States not bound by the Conventions, the Parties' own nationals and nationals of neutral or co-belligerent States having normal diplomatic representation with the Party in whose power they are shall, in all circumstances, be treated humanely by that Party and without any adverse distinction. The present Article also applies to persons who are in situations under Article 5 of the Fourth Convention. All these persons shall enjoy at least the provisions laid down in the following paragraphs." (*O.R.* III, p. 295, CDDH/III/319).

³ Cf. introduction to this Section, *supra*, p. 838.

- 3004 The other amendment came from a group of socialist States and related to the punishment of war crimes.⁴ The Diplomatic Conference took it into account in paragraph 7 of the article.
- 3005 Committee III examined and discussed this provision for over two weeks: the Working Group also spent a great deal of time on this article, which was finally adopted during the last session of the Diplomatic Conference in 1977. The work of the Conference was greatly facilitated by unofficial consultations conducted in March and April 1977, i.e., before the opening of the fourth session of the Conference. They were concerned with sorting out the amendments and amalgamating them so as to reduce their number. Moreover, Committee III was guided by the work done on Protocol II during the second session of the Conference. Committee III decided to include in Article 65 (which has become Article 75) the text drawn up for Articles 4 (*Fundamental guarantees*) and 6 (*Penal prosecutions*) of Protocol II, except where there was a good reason to change the wording in view of the fact that Protocol I deals with international and not non-international conflicts. It should be recalled that Articles 4 (*Fundamental guarantees*) and 6 (*Penal prosecutions*) of Protocol II reproduce, in some cases word for word, the corresponding provisions of the Covenant on Civil and Political Rights (hereafter: the Covenant).
- 3006 As a detailed examination of the text will show, Article 75 contains imprecise and obscure points. However, it represents an important step forward in humanitarian law by laying down several minimum rules of protection for the benefit of all those who find themselves in time of armed conflict in the power of a Party to the conflict, whereas in such circumstances provisions of human rights law are subject to possible derogations.⁵ This article must therefore be seen as a victory for humanitarian law, and its mission is truly to play a role of great importance.
- 3007 In addition, Article 75, even more than common Article 3 of the 1949 Conventions, which was called a “mini Convention”, constitutes a sort of “summary of the law” particularly in the very complex field of judicial guarantees, which will certainly facilitate the dissemination of humanitarian law and the promulgation of its fundamental principles.

⁴ The text read as follows: “None of the provisions of this Protocol may be used to prevent the prosecution and punishment of persons accused of war crimes and crimes against humanity.” (O.R. III, p. 293, CDDH/III/315 and Add.1).

⁵ Covenant, Art. 4; European Convention, Art. 15; American Convention, Art. 27.

Paragraph 1

3008 This paragraph was only adopted after all the others, and after laborious negotiations.⁶ The meaning to be ascribed to this paragraph is not immediately clear. In fact, during the deliberations speakers expressed divergent opinions in this respect.⁷

3009 Under the terms of this paragraph, individuals who are covered must fulfil the following three conditions:

- they must be in the power of a Party to the conflict;
- they must be affected by armed conflict or by occupation;
- they must not benefit from more favourable treatment under the Conventions or under this Protocol.

*Brief analysis of these three concepts**1. Being in the power of a Party to the conflict*

3010 The meaning of these words was determined in the analysis of the title of the Section, which includes these words.⁸ The question is why the expression is repeated here, since the title covers all the articles of the Section. Thus, for example, Article 76 (*Protection of women*) only covers women who are in the power of a Party to the conflict, although that article does not specify this explicitly. These matters seem self-evident, but in this case it was considered appropriate to repeat them.

2. Being affected by armed conflict or occupation

3011 The word “affected” in this context means: touched by or concerned. It remains to determine how far this category of persons extends. When there is armed conflict, all those who find themselves in the territory of the countries at war or in occupied territory, are affected in some way or another. This is very probably

⁶ On this subject the Rapporteur expressed himself as follows: “Paragraph 1 of Article 65 [75] was the last paragraph resolved because it raised a delicate question of whether the protections of the article were to be extended to a Party’s own nationals. At an early stage it was decided that the scope of the article should be restricted to persons affected by the armed conflict and further restricted to the extent that the actions by a Party in whose power they are so affect them. This is the purpose of the introductory clause of the paragraph. Moreover, paragraphs 3 to 7 inclusive are further limited by their own terms to persons affected in specific ways, e.g., persons ‘arrested, detained, or interned for actions related to the armed conflict’ (paragraph 3).”

Nevertheless, the question of whether or not to specify one’s own nationals as protected by the article remained contentious for many days. Ultimately a compromise was reached whereby reference was deleted to all examples of persons covered by the article, at which point the article was quickly approved by the Committee.” (*O.R.* XV, pp. 460-461, CDDH/407/Rev.1, paras. 41-42).

⁷ See particularly *O.R.* VI, pp. 261-278, CDDH/SR.43, Annex.

⁸ See introduction to this Section, *supra*, p. 837.

not what was intended, particularly because of the words “in so far”; it cannot therefore be denied that there are persons who are not affected in the sense of this article. In general those who contravene the normal laws of the State (ordinary criminals) and who are punished on these grounds, are not “affected” within the meaning of this article. On the other hand, if security measures are taken against certain individuals because of their attitude, whether true or alleged, with regard to the conflict, Article 75 certainly applies to them.⁹

3012 The situation may be more complex when internal strife is added to international armed conflict, which might lead to nationals taking up the cause of the adverse nation, and even giving support to its military action. There are numerous examples of such situations in the distant and recent past. The Conference did not express itself on this point, but it should be recalled that the national legislation of many countries includes judicial guarantees equivalent to those of Article 75, and sometimes even goes further.

3013 In the armed conflicts referred to in Article 1 (*General principles and scope of application*), paragraph 4, the situation is different: in that situation the individuals engaged in the conflict technically have the same nationality, but the question whether the guarantees provided will be applied will not depend on this fact alone, for international law overrides the criterion of nationality and any provisions which punish aid to the enemy, treason, insurrection, desertion etc. on the basis of nationality. In fact, captured combatants and civilians who are subject to security measures must be considered as enemy nationals and treated accordingly. They are not actually bound by a duty of allegiance with respect to the State in whose territory they find themselves or of which they bear the nationality. In other words, in such a conflict, captured combatants and civilians interned, arrested or prosecuted because of their attitude towards the conflict, should have the benefit of all the provisions of the Geneva Conventions; combatants must be treated as prisoners of war, and civilians as protected persons under the Fourth Convention.

3014 If in such a situation there were nevertheless cases in which the status of prisoner of war or of protected person were denied to certain individuals, the protection of Article 75 must be applied to them as a minimum.

3. Not benefitting from more favourable treatment under the Conventions or under this Protocol

3015 The protections which follow from Article 75 apply above all to those who cannot lay claim to application of the Conventions or to their application in full, taking into account the derogations provided for in Article 5 of the Fourth Convention. As we have seen with regard to the title of this Section, it covers civilians, and therefore it is the Fourth Convention and the status of persons

⁹ Without pronouncing the legality of the measure, it may be recalled that during the Second World War the United States prohibited all its nationals of Japanese origin from staying in the Pacific Coast States.

protected by that Convention with which we are concerned here. However, cases may occur of civilians who have committed hostile acts claiming prisoner-of-war status and treatment in accordance with Article 4A and Article 5 of the Third Convention.

- 3016** Thus persons protected by the Fourth Convention will therefore be entitled to the treatment provided for them by that Convention. However, as we will see below, situations may arise where Article 75 will contain protections for such persons which are not explicitly provided in the Fourth Convention; it is clear that they may avail themselves of these, since the article is only a minimum standard.
- 3017** During and following the Diplomatic Conference paragraph 1 gave rise to numerous difficult controversies, particularly as regards the application of Article 75 to own nationals. It seems that the Diplomatic Conference did not wish to adopt a more precise wording in order to achieve a consensus, and the decision of the Finnish government to clarify the obligations it took upon itself in this respect upon ratification is understandable.
- 3018** There was in particular a point of view based on the fact that the ICRC draft explicitly mentioned the Party to the conflict's own nationals; the same applied to the above-mentioned Finnish amendment; the amendment to Article 63 of the draft (the present Article 72 – *Field of application*) had the same tenor.¹⁰ This precision disappeared in the text proposed by the Working Group and adopted by Committee III and later by the Conference itself. What conclusion can be drawn from this? Some claim that the fact that the reference to own nationals was deleted reveals an intention to exclude nationals from the application of the provisions of Article 75. Others believe that precisely by virtue of the wording of Article 72 (*Field of application*) and Article 75 there was no need to mention nationals of the Parties to the conflict explicitly.
- 3019** In any case the number of nationals covered by this article will be considerably reduced, since they can only avail themselves of it insofar as they are affected by a situation referred to in Article 1 (*General principles and scope of application*). It is this restriction which, as the Rapporteur indicated, made it possible to adopt the article by consensus.
- 3020** It was also claimed that the Protocol, which is additional to the Conventions, could not modify the basic concepts of the Geneva Conventions. The point is that these Conventions are concerned with protecting the individual from arbitrary and oppressive enemy action and not with determining the relationship between the individual and his own government. This line of argument seems tenuous: it is not clear why the Protocol should not increase the category of protected persons as it does, for example, for certain combatants. Admittedly it would certainly have been very useful to mention explicitly that nationals are included, but no negative conclusions should be drawn from the absence of such mention.
- 3021** It was also argued that here the expression “in the power of a Party to the conflict” is used, while Articles 11 (*Protection of persons*), 44 (*Combatants and prisoners of war*), 45 (*Protection of persons who have taken part in hostilities*) and 46 (*Spies*) use the expression “in the power of an adverse Party”. It may justifiably

¹⁰ See commentary Art. 72, *supra*, pp. 841-842.

be considered that the wording of this paragraph covers persons in the power of any Party to the conflict, even that of which the individual is a national. However, it should be noted that the Protocol uses both the terms “Party to the conflict” and “adverse Party” repeatedly without making any difference to the category of persons covered by the two expressions.

Categories of persons covered by Article 75

3022 The Convention did not draw up a systematic list of persons whom it intended should be covered by this article. However, the discussions and drafts provide some idea in this respect, which can be summarized as follows:

1. Nationals of States not Parties to the Conventions

3023 This is highly theoretical since the 1949 Conventions have virtually universal participation.¹¹

2. Nationals of States not Parties to the conflict

3024 As provided in Article 4 of the Fourth Convention, such nationals are not, except in occupied territories, considered as protected persons as long as the State of which they are nationals has normal diplomatic representation in the State in whose power they find themselves.

3025 According to paragraph 8 of Article 75, no provision of the same article may be construed as limiting or infringing any other more favourable provision granting greater protection to persons covered by paragraph 1.

3026 Nationals of States not Parties to the conflict may rely on bilateral treaties on establishment and residence, as well as, where applicable, on the Hague Convention of 1907 Respecting the Rights and Duties of Neutral Powers and Persons in Case of War on Land.

3. Nationals of allied States

3027 Nationals of allied States will normally have the benefit of protection by their own authorities. However, if the State of their nationality does not have normal diplomatic representation in the State in whose power they find themselves, they are protected persons under the Fourth Convention.

4. Refugees and stateless persons

3028 Article 73 (*Refugees and stateless persons*) puts refugees and stateless persons considered as such *before the beginning of hostilities* on the same footing as

¹¹ On 31 December 1984 there were 161 States Parties to the Conventions. See *infra*, p. 1549.

protected persons under the Fourth Convention. Persons who have become refugees *after the beginning of hostilities* are covered by Article 75. Stateless persons enjoy the protection of the Fourth Convention in any event, as shown in the commentary on Article 73 (*Refugees and stateless persons*) (*supra*, p. 854).

5. *Mercenaries*

3029 In its report¹² Committee III expresses itself as follows on the subject of the new article¹³ relating to mercenaries:

“Finally, although the proposed new article makes no reference to the fundamental protections of Article 65, it was understood by the Committee that mercenaries would be one of the groups entitled to the protections of that article which establishes minimum standards of treatment for persons not entitled to more favourable treatment under the Conventions and Protocol I.”

3030 This explanation given by Committee III is a statement of the obvious, but the discussions had led to some doubts which were now removed. Moreover, although mercenaries may be denied the status of combatant and consequently that of prisoner of war, they are civilians covered by the Fourth Convention.

6. *Other persons denied prisoner-of-war status*

3031 According to Article 45 (*Protection of persons who have taken part in hostilities*), paragraph 3, any person who has taken part in hostilities, who is not entitled to prisoner-of-war status and who does not benefit from more favourable treatment in accordance with the Fourth Convention has the right at all times to the protection of Article 75. This covers persons who not only cannot claim prisoner-of-war status, but are also not protected persons under the Fourth Convention. It will be noted that this definition covers mercenaries who are not covered by Article 4 of the Fourth Convention.

7. *Protected persons subject to Article 5 of the Fourth Convention*

3032 These are persons who, on the basis of Article 5 of the Fourth Convention, are deprived of certain rights laid down by that Convention during detention. There can be no doubt that Article 75 constitutes a minimum standard which does not allow for any exceptions. Such persons must regain all the rights and privileges laid down by the Convention as soon as circumstances permit.

3033 The formula of non-discrimination contained in this paragraph is similar to that used, for example, in Article 2 of Protocol II (*Personal field of application*), Article 12 of the First Convention, Article 16 of the Third Convention, and

¹² *O.R.* XV, p. 455, CDDH/407/Rev.1, para. 27.

¹³ Article 47, Protocol I.

Article 27 of the Fourth Convention. Comparable formulae can also be found in human rights instruments.¹⁴

- 3034** As regards respect for the person, honour and religious convictions and practices, this wording was used already in the Geneva Conventions (Articles 14 and 34, Third Convention; Article 27, Fourth Convention). However, as pointed out in the commentary on Article 27 of the Fourth Convention, respect for “religious convictions and practices” should be understood in a broad sense. It covers all philosophical and ethical convictions. We know that in some armies there are nowadays, in addition to chaplains, counsellors on moral matters to whom members of the armed forces can go for assistance. This should be seen as an example of the modern tendency of individuals to look for a moral code also outside religion.
- 3035** When it discussed Article 67 (the present Article 76 – *Protection of women*), proposals were submitted to Committee III aimed at preventing women from being arrested or imprisoned solely on account of their convictions. In the end the Committee decided not to take into account these proposals in order to avoid the possibility of an *a contrario* argument to the effect that other persons could be legitimately arrested or imprisoned solely on the ground of their convictions. Committee III preferred to deal with this question in a special new article to apply to everyone.¹⁵ These discussions took place during the last session of the Conference and there was no time for Committee III to deal with this problem.¹⁶
- 3036** The report of the Working Group was not contested in Committee III or during the plenary meetings where this article was adopted. Thus respect for convictions implies that a person professing any particular convictions cannot be arrested or imprisoned for this reason alone. For that matter, this view can be found in human rights instruments, in particular in the Covenant, of which Article 19, paragraph 1, provides that everyone has “the right to hold opinions without interference”. However, Article 19 is not one of the articles from which no derogation may be made.

Paragraph 2

- 3037** A number of fundamental rules applicable to all persons defined in paragraph 1 are pronounced here. The other paragraphs of the article cover certain more restricted categories which are duly defined. This pronouncement is directly

¹⁴ For example, the Covenant, Article 2, paragraph 1: “without distinction of any kind, such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status”.

¹⁵ *O.R.* XV, pp. 463-464, CDDH/407/Rev.1, para. 55.

¹⁶ On this subject it is interesting to note the commentary of the Rapporteur: “Fourth, the proposal for a new article 65 *bis* [...] failed to achieve a consensus. Despite the fact that all delegations agreed with the principle of the proposal – that no person may be arrested, detained or interned solely because of his convictions – it proved impossible in the time available to work out an agreed text. Ultimately, the Committee agreed to record its consensus that this rule was implicit in Article 65, paragraph 1 [Article 75 of the Protocol], as adopted by the Committee.” (*ibid.*, p. 449, para. 12).

inspired by the text of common Article 3 of the Conventions which applies to conflicts not of an international character; it is also very similar to Article 4, paragraph 2, of Protocol II (*Fundamental guarantees*); as far as possible, Committee III followed the text of that Article 4 (*Fundamental guarantees*), which had already been adopted.

- 3038** The terminology of the French text adopted here is curious: it reads “sont et demeureront prohibés”. Why the use of the future tense as the verb “demeurer” in this context covers the future? The French text of Article 3 common to the Conventions uses the present tense: “sont et demeurent prohibés”, which seems clearer and more logical. At any rate the meaning is the same and the English text uses the same wording as that of common Article 3: “the following acts are and shall remain prohibited”.
- 3039** “At any time and in any place”: the meaning of this expression is not immediately clear. There is no doubt that Article 75, like the Protocol as a whole, only applies in situations as provided for in Article 1 (*General principles and scope of application*) and only in territories of Parties to the conflict or territories under their control. Why then this terminology, which suggests that, following the example of the rules relating to human rights, the article applies in time of peace as well as in time of war? On this point the Conference merely followed the proposals of the ICRC. Apparently one must deduce from this expression that the article applies throughout the situations provided for in Article 1 (*General principles and scope of application*) and in all the territories covered by such situations. A confirmation of the foregoing can be found in the text of Article 3, sub-paragraph (b), of the Protocol (*Beginning and end of application*) and in paragraph 6 of the present Article 75.
- 3040** The reference to civilian or military agents is very useful; this is taken from Article 32 of the Fourth Convention and is concerned with establishing the responsibility of anyone acting in the name of a Party to the conflict.

Sub-paragraph (a)

- 3041** This paragraph gives a number of examples of acts detrimental to life, health or physical or mental well-being.

Sub-paragraph (a)(i)

- 3042** This relates to the wilful or intentional killing of a human being. Article 147 of the Fourth Convention uses the expression “wilful killing”. It covers all cases of manslaughter, including by wilful negligence, such as, for example, cases of a deliberate refusal to administer care with intent to cause death.¹⁷

¹⁷ For breaches by failure to act, see Art. 86.

Sub-paragraph (a)(ii)

3043 According to the Declaration on torture adopted on 9 December 1975 by the United Nations General Assembly (Resolution 3452 (XXX)):

“torture means any act by which severe pain or suffering, whether physical or mental, is intentionally inflicted by or at the instigation of a public official on a person for such purposes as obtaining from him or a third person information or confession, punishing him for an act he has committed or is suspected of having committed, or intimidating him or other persons”.

It may be recalled that the torture of protected persons is prohibited by Article 17 of the Third Convention, Article 32 of the Fourth Convention, as well as by Article 3 common to the Conventions.

3044 In our time torture is universally condemned and in various circles great efforts are being made to eliminate this scourge.¹⁸ Although agreement was easily reached on the principle of prohibiting it, it is more difficult to establish effective methods making it possible for governments to be sure that no acts of torture are committed by agents under their authority. In time of armed conflict it is the responsibility of governments to strengthen the measures of control and the powers of which they dispose if they are to be certain that they will not be held responsible for acts of torture committed by their agents, whether civilian or military.

3045 For its part the Covenant prohibits torture in its Article 7, which does not allow for any derogation.

Sub-paragraph (a)(iii) and (iv)

3046 Article 75 here reiterates prohibitions already contained in the Conventions (common Article 3; Articles 13 and 88 of the Third Convention; Article 32 of the Fourth Convention). The prohibition of mutilation is duplicated in Article 11 of the Protocol (*Protection of persons*).

Sub-paragraph (b)

3047 This refers to acts which, without directly causing harm to the integrity and physical and mental well-being of persons, are aimed at humiliating and ridiculing them, or even forcing them to perform degrading acts.

3048 Such provisions are contained in the Conventions (common Article 3; Articles 14 and 52, Third Convention; Article 27, Fourth Convention).

¹⁸ It is interesting to note the various resolutions of the United Nations General Assembly which, though without binding force of law, nevertheless have a real moral value. The 1975 Declaration was mentioned above. In addition on 10 December 1984 the General Assembly adopted a Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment.

- 3049** The provision relating in Article 75 to enforced prostitution and indecent assault applies to everybody covered by the article, regardless of sex. Article 76 (*Protection of women*), relating to the special protection to which women are entitled, reiterates the provision relating to enforced prostitution and indecent assault, specifically mentioning rape.
- 3050** Degrading treatment is also prohibited by Article 7 of the Covenant.

Sub-paragraph (c)

- 3051** During recent years the term “hostages” has acquired different meanings. It seems that in Article 75 this term must be understood in the same way as in Article 34 of the Fourth Convention, which prohibits the taking of hostages. We are therefore faced here with the problem of hostages taken by an authority – and not by individuals – and who are detained for the purpose of obtaining certain advantages.
- 3052** This means that hostages are persons who find themselves, willingly or unwillingly, in the power of the enemy and who answer with their freedom or their life for compliance with the orders of the latter and for upholding the security of its armed forces.
- 3053** Article 3 common to the Conventions also contains a prohibition on the taking of hostages.

Sub-paragraph (d)

- 3054** This prohibition was added by the Conference, as it was afraid that collective punishments might be inflicted by processes other than proper judicial procedures and that in that case they would not be covered by paragraph 4(b). Article 33 of the Fourth Convention prohibits collective penalties.
- 3055** The concept of collective punishment must be understood in the broadest sense: it covers not only legal sentences but sanctions and harassment of any sort, administrative, by police action or otherwise.

Sub-paragraph (e)

- 3056** This prohibition is actually concerned with intimidation; a similar formula was used in Article 40 of the Protocol (*Quarter*). Measures of intimidation are prohibited by Article 33 of the Fourth Convention.
- 3057** In its draft the ICRC had proposed to also include a prohibition on physical or moral coercion, particularly when applied in order to obtain information; similar clauses exist for prisoners of war (Article 17, Third Convention) and for protected civilians (Article 31, Fourth Convention). According to the Rapporteur of Committee III the prohibition of torture together with the more general prohibition on causing harm to life, health and physical and mental well-being, was considered sufficient to omit a reference to coercion. It might be added that

in this field individuals are also protected by paragraph 4(f) which says that no one may be compelled to confess guilt.

- 3058** Similarly Committee III considered it unnecessary to include separately a prohibition of intimidation, harassment and threats aimed at forced movement or migration of individuals or groups of the population in occupied territories; sub-paragraph (e) of this paragraph covers such situations.

Paragraph 3

- 3059** This paragraph is important, but the terms used are sometimes ambiguous and raise problems of interpretation.
- 3060** The phrase “any person” almost certainly means any person complying with the definition of paragraph 1 of the article. Thus this refers primarily to civilians, as combatants are not covered by Article 75, and, in particular, not by its paragraph 3, unless prisoner-of-war status is refused them in case of capture. In this case, provided for in Article 45 (*Protection of persons who have taken part in hostilities*), paragraph 3, if they do not have the benefit of the Fourth Convention, they have at least the right to the protection of Article 75.
- 3061** “Arrested”: this means the period that a person is in the hands of the police, preceding the trial stage which is dealt with in paragraph 4, or prior to internment.
- 3062** “Detained”: in general this expression refers to deprivation of liberty, usually suffered in prison or other penitentiary institutions; here the term refers to detention prior to sentence or prior to a decision on internment.
- 3063** “Interned”: this term generally means deprivation of liberty ordered by the executive authorities when no specific criminal charge is made against the individual concerned.
- 3064** These three expressions are actually closely related and each refers to a different way in which a person can be deprived of his liberty. In part this terminology can also be found in human rights instruments (Universal Declaration, Article 9; Covenant, Article 9). Internment is the only concept which seems reserved for time of armed conflict.
- 3065** “For actions”: this expression is easy to understand when it refers to persons who have committed criminal acts. However, it often happens that people are subjected to banishment, assigned residence or even internment, without being charged with committing any specific act, but because of their previous activities or their general behaviour, such as having revealed sympathy for the adversary, opposition to the Occupying Power or even pacifist opinions. As regards the State’s own citizens, their ethnic or racial origin has sometimes been used as a legitimate cause for suspicion. Internees will therefore generally be informed of the reason for such measures in broad terms, such as legitimate suspicion, precaution, unpatriotic attitude, nationality, origin, etc. without any specific reasons being given.
- 3066** “Related to the armed conflict”: this phrase leads to the greatest problems for the interpretation of this article, as it uses different expressions several times, though they seem to refer to the same thing.
- 3067** It is the terminology used in all the paragraphs of the article, except in paragraph 1, which refers back to Article 1 of the Protocol (*General principles*

and scope of application) and this in turn refers in particular to the situations provided for in common Article 2 of the Conventions. The interesting point is that paragraph 2 of that common Article 2 covers cases of occupation meeting with no armed resistance. It must therefore be concluded that the expression “armed conflict” was used in the various paragraphs of Article 75 to cover all the situations within the purview of the substantive provisions determining the scope of the Conventions and of the Protocol.

- 3068** First of all, paragraph 1 uses the words “affected by a situation referred to in Article 1”, and we saw above what this means. This formula is equivalent, if slightly broader than that of paragraph 3, since it covers persons who may be affected by armed conflict without having committed any acts related to that conflict, for example, on the basis of their nationality or ethnic origin.
- 3069** Later paragraph 4 refers to “a penal offence related to the armed conflict”. Paragraphs 5 and 6 use the expression “for reasons related to the armed conflict”. Finally, Article 76 (*Protection of women*) also refers to “reasons related to the armed conflict” (although in the French text there is a slight difference between the wording used in paragraphs 5 and 6 of Article 75 and that used in Article 76).
- 3070** The diversity of the expressions used might be considered rather perplexing. In fact, each of the expressions mentioned above refers to acts or reasons, the reasons covering cases of internment, while the acts may lead to criminal prosecution and in due course to internment. Although it is relatively easy to think of reasons for which a State might wish to take security measures such as internment or assigned residence, it is, on the other hand, more difficult to determine how penal offences should be understood in relation to armed conflict. This question is examined in greater detail with regard to paragraph 4.
- 3071** “In a language he understands”. This phrase does not require lengthy explanation. It is a formula which has been used since 1929 in the Geneva Conventions.¹⁹ It covers both written and verbal communications.
- 3072** “Promptly”: unfortunately this expression is rather imprecise. Article 9 of the Covenant provides that anyone who is arrested will be informed at the time of his arrest of the reasons for his arrest. However, Article 9 is not one of the articles from which derogation is not allowed, even in case of war (Article 4). According to Article 71 of the Fourth Convention, anyone who is charged and prosecuted by the Occupying Power will be informed promptly of the charges made against him. These examples reveal the clear intention that those arrested should be advised promptly of the reasons for their arrest; it is difficult to determine a precise time limit, but ten days would seem the maximum period.
- 3073** Legal practice in most countries recognizes preventive custody, i.e., a period during which the police or the public prosecutor can detain a person in custody without having to charge him with a specific accusation; in peacetime this period is no more than two or three days, but sometimes it is longer for particular offences (acts of terrorism) and in time of armed conflict it is often prolonged.

¹⁹ The 1929 Convention Relative to the Treatment of Prisoners of War, Art. 20; Third Convention, Arts. 41, 107, 165; Fourth Convention, Arts. 65, 71, 99.

Useful indications can be found in national legislation. In any case, even in time of armed conflict, detaining a person for longer than, say, ten days without informing the detainee of the reasons for his detention would be contrary to this paragraph.

- 3074** The second sentence of the paragraph is not very clear and requires some comment.
- 3075** “Except in cases of arrest or detention for penal offences, such persons shall be released with the minimum delay possible”: it seems clear that detainees not charged with a criminal offence within the period mentioned must be released; this is laid down in all national legislation. However, in time of armed conflict States often assume the right to take security measures with regard to certain persons who are considered dangerous.
- 3076** “And in any event as soon as the circumstances justifying the arrest, detention or internment have ceased to exist”: this provision is based on Articles 43 and 132 of the Fourth Convention, which are concerned with periodic review of internment decisions. It is understandable that internment decisions are taken because of circumstances (armed conflict, combat in a nearby area, hostile movement in the population etc.). On the other hand, it is difficult to accept that people are arrested or detained because of circumstances; such decisions should be based on a presumption of a criminal offence. Perhaps the intention was to indicate that sometimes internment is preceded by arrest and detention sanctioned by court order. However, the reference to “the circumstances” should not be taken too literally, but these words should be understood as meaning “the facts”.
- 3077** The Report of Committee III expresses itself as follows on this paragraph:
“Paragraph 3 was added to the ICRC text pursuant to a proposal by the representative of Belgium to cover the period of arrest prior to that dealt with in the judicial safeguards of paragraph 4.”²⁰
- 3078** The intentions of the drafters are therefore quite clear, even if the wording is not so clear. In conclusion the following points should be recalled:
- 3079** – Within a period which should not exceed, say, ten days, any one deprived of liberty for actions related to the armed conflict must be informed of the reasons for this measure unless he is released.
- 3080** – If the person in question is charged with a specific offence, legal proceedings should take their course; if he is to be interned, a decision should duly and properly be taken and communicated to the person concerned.

²⁰ *O.R.* XV, p. 461, CDDH/407/Rev.1, para. 46.

Paragraph 4*Introductory sentence*

- 3081** The scope of application of this paragraph requires us to pause and give it due thought; it refers primarily to civilians in the power of a Party to the conflict who are affected by a situation as referred to in Article 1 (*General principles and scope of application*) and who do not benefit from more favourable treatment under the Conventions or this Protocol; moreover, they must have been found guilty of a penal offence related to the armed conflict.
- 3082** Thus this paragraph does not cover protected persons defined in Article 4 of the Fourth Convention, or persons defined in Article 73 of the Protocol (*Refugees and stateless persons*). It is intended to cover all civilians of foreign nationality who are not protected persons in the sense of Article 4, and who are in the territory of a Party to the conflict, as well as the whole of the civilian population of occupied territories with the exception of those protected by the Fourth Convention. Some combatants who are denied prisoner-of-war status in case of capture are also covered,²¹ if they are not already covered by the Fourth Convention. Finally, the Party to the conflict's own nationals are covered insofar as they fulfil the conditions laid down in paragraph 1.
- 3083** For persons covered by the Fourth Convention the guarantees of this article are of course supplementary. Thus for enemy nationals in another State's national territory, Article 75 contains important improvements; in fact, while the treatment of such persons is generally provided for in Articles 35 to 46, and in case of internment, in Articles 79-141 of the Fourth Convention, no special guarantees are provided in the case they are tried and sentenced for penal offences. For the inhabitants of occupied territories, Articles 64-78 of the Fourth Convention contain guarantees on penal matters which are more or less equivalent to those of Article 75, and indeed go even further, since intervention by the Protecting Power is expressly provided for. However, it should be noted that Article 75 acknowledges a presumption of innocence, a concept which is not contained in the Fourth Convention.
- 3084** The wording of this introductory sentence is based on common Article 3. However, Article 3 refers to a "regularly constituted court", while this paragraph uses the expression "impartial and regularly constituted court". The difference is slight, but it emphasizes the need for administering justice as impartially as possible, even in the extreme circumstances of armed conflict, when the value of human life is sometimes small. Article 3 relies on the "judicial guarantees which are recognized as indispensable by civilized peoples", while Article 75 rightly spells out these guarantees. Thus this article, and to an even greater extent, Article 6 of Protocol II (*Penal prosecutions*), gives valuable indications to help explain the terms of Article 3 on guarantees.
- 3085** For enemy nationals in another State's national territory intervention by the Protecting Power in case of criminal prosecution seems possible on the basis of

²¹ Cf. Art. 45, para. 3, Protocol I (spies, mercenaries etc.).

Articles 9, 30 and 43 of the Fourth Convention; the representatives of the Protecting Power could call upon the guarantees provided for and demand that they are observed. For inhabitants of occupied territories intervention by the Protecting Power is laid down in detail in Articles 71-74 of the Fourth Convention.

- 3086** Refugees and stateless persons have to be treated as protected persons under the Fourth Convention, in accordance with Article 73 of this Protocol (*Refugees and stateless persons*), and they can therefore fall back on the Protecting Power of the State of refuge, failing which it may reasonably be expected that the United Nations High Commissioner for Refugees will exercise a similar role to that of a Protecting Power in such circumstances.
- 3087** However, if the High Commissioner for Refugees found it impossible to act, such persons could turn to any organization capable of assisting them, in accordance with Article 30 of the Fourth Convention. The same applies for foreigners in the national territory of a belligerent and for foreign residents of occupied territories who do not have the protection of diplomatic representation or the aid of a Protecting Power.
- 3088** One organization which could aid such persons is, of course, the International Committee of the Red Cross, which under Article 10 of the Fourth Convention may undertake humanitarian activities for the protection of civilians and for their relief, subject to the consent of the Parties to the conflict concerned.
- 3089** It is to be hoped that in the difficult circumstances of penal proceedings in time of war, none of the persons referred to above will be deprived of the assistance of a Protecting Power, or at least the assistance of a humanitarian organization.
- 3090** As regards nationals of the State in the name of which the proceedings and sentencing take place, the situation is more complicated; the accused may avail himself of the guarantees listed in this paragraph, but it is hardly conceivable that a Protecting Power could, or would wish to intervene in the trial and sentence of a national of that State by his own judiciary. On the other hand, intervention by a humanitarian organization such as the ICRC is not excluded, provided that it is accepted by the State concerned. For that matter, the ICRC has played that role many times in the past on the basis of its right of initiative.
- 3091** Let us add a remark about the judicial system. This introductory sentence assumes that prior to conviction there will be a judgement finding the accused guilty. It is a fact that in several European countries penal proceedings are carried out in two phases: first, the court pronounces its verdict on culpability and subsequently it decides on the punishment to be meted out. However, there are also countries where the court rules on culpability and punishment in the same decision and at the same time. Such a system is not in contradiction with this paragraph.
- 3092** Most of the guarantees listed in sub-paragraphs (a)-(j) are contained in the Conventions and the Covenant on Human Rights,²² but in each of these treaties there is a clause permitting derogations from the articles in question in time of war. Article 75 is not subject to any possibility of derogation or suspension and consequently it is these provisions which will play a decisive role in the case of

²² Covenant, Art. 14; European Convention, Arts. 5-6; American Convention, Art. 8.

armed conflict. Besides, the provisions in all these instruments are more or less equivalent.

3093 Finally, it is necessary to try and determine what is meant by a penal offence related to the armed conflict. We have tried to determine, with regard to paragraph 1, what should be understood by persons “affected by a situation referred to in Article 1”, and reference can be made to what was said.

3094 As regards penal offences, there is no doubt at all that violations of the normal provisions of criminal law should be excluded, even if they are indirectly linked to the armed conflict: for example, someone who commits a robbery because he has lost his job as a result of the armed conflict and is unable to support himself. On the other hand, it is accepted in general that a State at war may require that its citizens and residents in its territory carry out special tasks and services: the State may impose compulsory military service on men and women; it may compel those who are not drafted into the armed forces to work in factories or on the land; it may also evacuate certain areas, requisition moveable and immoveable property, etc. In other words, in the circumstances of war when the very existence of the nation is at stake, the State may mobilize all the country’s resources for the purpose of survival.

3095 In fact, such distinctions, though seemingly logical, are not based on a clear text, and it would have been preferable for the Protocol itself to have defined the penal offences for which the accused may claim the guarantees of Article 75.

Sub-paragraph (a)

3096 The first part of the sentence repeats to a large extent what was said in paragraph 3. However, according to paragraph 3, the information, whether written or oral, must be given in a language the arrested person understands. That obligation is not repeated here, but the second part of the sentence guarantees the accused all necessary rights and means of defence; it is therefore clear that a defendant who does not understand the language used by the judicial authorities must be provided with an interpreter. By the same token, he must be able to understand the assistance given by a qualified defence lawyer. If these conditions were not fulfilled, the defendant would not have the benefit of all necessary rights and means of defence.

3097 On the other hand, reference is made here to the “particulars of the offence”, a detail which is not contained in paragraph 3.

Sub-paragraph (b)

3098 After the Second World War and ever since, international public opinion has condemned convictions of persons on account of their membership of a group or organization. Objections were also raised against collective punishment inflicted indiscriminately on families or on the population of a district or building. In the same vein, the execution of hostages, which was not prohibited by international law in all circumstances, was considered contrary to the moral rule which should guide international society. It was therefore decided to outlaw all convictions and

punishments which are not based on individual responsibility – in accordance with the now universally accepted principle that no one may be punished for an act he has not personally committed – as well as reprisals. This is the origin of a series of provisions contained in the four Conventions, in particular in Article 33 of the Fourth Convention, which prohibits collective penalties and reprisals and Article 34 of the same Convention, which prohibits the taking of hostages.

3099 Of course, this does not cover cases of complicity or incitement, which are punishable offences in themselves and may lead to a conviction; national legislation determines the conditions of punishment and the degree of culpability. However, the Conventions and the Protocol contain two particular provisions regarding punishment of grave breaches. The Conventions provide in case of grave breaches for the punishment both of those who committed them directly, and of those who have given the order to commit them (Articles 49/50/129/146). Article 86 of the Protocol (*Failure to act*) lays down provisions for the punishment of commanders who have not taken the necessary measures to prevent their subordinates from committing grave breaches of the Conventions and the Protocol.

3100 Admittedly, *stricto jure*, these provisions are only applicable to grave breaches of the Conventions and the Protocol, but they do provide useful indications to determine whether or not there is an individual penal responsibility.

Sub-paragraph (c)

3101 This provision reproduces almost word-for-word paragraph 1 of Article 15 of the Covenant on Civil and Political Rights. According to Article 4 of that Covenant, there is no possibility of derogation from this provision in time of armed conflict. Article 6 of Protocol II (*Penal prosecutions*), paragraph 2(c), contains the same provision. However, the paragraph under consideration here uses a slightly different expression at the beginning: “no one shall be accused or convicted of”, while in the Covenant and in Protocol II the sentence starts as follows: “No one shall be held guilty of”. There is a minor difference between Protocol II and the Covenant in the French text (not in English) which is of no practical significance. On the other hand, by adding the word “accused” the drafters of Article 75 had a specific purpose in mind: several delegations had expressed the fear that the provision would lead persons to be considered guilty before being tried.²³

3102 Several delegations considered that the reference to “national or international law” was clear. During the debates which took place on this subject in Committee I with regard to an identical provision in Protocol II (Article 6 – *Penal prosecutions*, paragraph 2(c)), some delegations suggested replacing that expression by “under the applicable law”²⁴ or alternatively by “under applicable

²³ O.R. XV, p. 461, CDDH/407/Rev.1, para. 47.

²⁴ This is the formula used in the American Convention on Human Rights (Art. 9).

domestic or international law”,²⁵ but Committee I retained the present text and Committee III adopted it without further discussion to include it in this article.

- 3103** In matters of criminal law national courts apply primarily their own national legislation; in many countries they can only apply provisions of international conventions insofar as those provisions have been incorporated in the national legislation by a special legislative act. Thus in several European countries the punishment of war crimes and crimes against humanity has, since the Second World War, frequently encountered obstacles which could only be overcome by invoking the need to repress crimes rightly condemned by all nations, even in the absence of rules of application. This reference to international law has often been called the “Nuremberg clause”. The European Human Rights Convention, which contains the same phraseology, clarifies this expression in paragraph 2 of Article 7: “This Article shall not prejudice the trial and punishment of any person for any act or omission which, at the time when it was committed, was criminal according to the general principles of law recognized by civilized nations.”
- 3104** In fact, although the principle of legality (*nullum crimen, nulla poena sine lege*) is a pillar of domestic criminal law, the *lex* should be understood in the international context as comprising not only written law, but also unwritten law, since international law is in part customary law. Thus the second “principle of Nuremberg” reads: “The fact that internal law does not impose a penalty for an act which constitutes a crime under international law does not relieve the person who committed the act from responsibility under international law.”²⁶
- 3105** Let us stress that it is in a government’s own interests to adopt the necessary legislation, even in peacetime, for the repression of certain crimes punishable under international law. In this way they can avoid the criticism of acting arbitrarily by promulgating retroactive penal laws, even though international law may authorize them to do so.
- 3106** The second and third sentences of this sub-paragraph express generally recognized principles.

Sub-paragraph (d)

- 3107** This rule is found in all human rights documents.²⁷ It is also included in Article 6 (*Penal prosecutions*) of Protocol II.
- 3108** It is a widely recognized legal principle that it is not the responsibility of the accused to prove he is innocent, but of the accuser to prove he is guilty. This concept may play an important role when criminal prosecutions are brought against persons on the basis of their membership of a group.²⁸

²⁵ O.R. X, p. 144, CDDH/I/317/Rev.2.

²⁶ The formulation adopted in 1950 by the International Law Commission of the principles of international law recognized by the Charter of the Nuremberg Tribunal and in the Judgment of that Tribunal is contained in “The Work of the International Law Commission”, UN Office of Public Information, New York, 1980, pp. 116 ff.

²⁷ Universal Declaration, Art. 11; Covenant, Art. 44; European Convention, Art. 6; American Convention, Art. 8.

²⁸ Cf. commentary sub-paragraph (b), *supra*, p. 880.

Sub-paragraph (e)

- 3109** This rule is contained in a slightly different form in Article 14, paragraph 3(d), of the Covenant (“to be tried in his presence”) and in identical wording in Protocol II, Article 6 (*Penal prosecutions*), paragraph 2(e). The Rapporteur of Committee III noted that it was understood that persistent misconduct by a defendant could justify his removal from the courtroom.²⁹ This sub-paragraph does not exclude sentencing a defendant in his absence if the law of the State permits judgement *in absentia*.
- 3110** In some countries the discussions of the judges of the court are public and take place before the defendant; in other countries the discussion is held *in camera*, and only the verdict is made public. Finally, there are countries where the court’s decision is communicated to the defendant by the clerk of the court in the absence of the judges. This sub-paragraph does not prohibit any such practices: the important thing is that the defendant is present at the sessions where the prosecution puts its case, when oral arguments are heard, etc. In addition, the defendant must be able to hear the witnesses and experts, to ask questions himself and to make his objections or propose corrections.³⁰

Sub-paragraph (f)

- 3111** The majority of national judiciary systems contain provisions of this nature, but it took many centuries before the legality of torturing defendants to obtain confessions and information on their accomplices was abandoned. However, it was appropriate to include here a reminder of this legal guarantee, which is recognized today, as all too often the police or examining magistrates tend to use questionable means to extract a confession which they consider to be the “final proof”.
- 3112** The Geneva Conventions as a whole are aimed at preventing victims of war from becoming the object of brutality intended to extract information from them or from third parties (Article 17, Third Convention; Article 31, Fourth Convention). Protocol II contains the same rule (Article 6 – *Penal prosecutions*, paragraph 2(f)) as does the Covenant (Article 14, paragraph 3(g)).

²⁹ *O.R. XV*, p. 462, CDDH/407/Rev.1, para. 48.

³⁰ In an explanation of vote, one delegation declared that its country interpreted this provision as follows: “in the case of penal proceedings occupying two or more instances, in which the purpose of the last instance was to review only the applicable law and not the findings of the previous instance, the court of review had to decide whether or not the accused had to appear before it at the hearing. The court of review could not impose a higher penalty in the absence of the accused, and all the latter’s rights as provided for in Article 65, paragraph 4(e) were therefore fully granted.” (*O.R. XV*, p. 205, CDDH/III/SR.58, para. 10).

Sub-paragraph (g)

- 3113** This clause has the same wording as the corresponding clause of the Covenant (Article 14, paragraph 3(e)).
- 3114** According to the Rapporteur of Committee III, this provision was worded so as to be compatible with both the system of cross-examination of witnesses and with the inquisitorial system in which the judge himself conducts the interrogation.
- 3115** It is clear that the possibility of examining witnesses is an essential prerequisite for an effective defence.

Sub-paragraph (h)

- 3116** Once again the drafters of the article have tried to stay as close as possible to the Covenant (Article 14, paragraph 7). The Rapporteur expressed himself as follows about it:

“the provision on *ne bis in idem* [...] is drawn from the United Nations Covenant on Civil and Political Rights [...] and is so drafted as to pose the minimum difficulties to States in an area where practice varies widely”.³¹

We would like to believe the Rapporteur, but one cannot help thinking that a defendant could find himself in a difficult situation when subjected to a second trial, after the courts of another Party to the conflict or another State have already tried him on the same charges and he has been acquitted or, if he was convicted, has already served his sentence. In such circumstances defendants could no doubt invoke either the rule contained in the European Convention or that in the Covenant: “No one shall be liable to be tried or punished again for an offence for which he has already been finally convicted or acquitted in accordance with the law and penal procedure of each country” (Covenant, Article 14, paragraph 7).

- 3117** Respect for *res judicata* is one of the basic principles of penal procedure, and it is important to uphold this principle.

Sub-paragraph (i)

- 3118** It is an essential element of fair justice that judgments should be pronounced publicly. Of course, a clear distinction should be made between proceedings and judgment. It may be necessary because of the circumstances and the nature of the case to hold the proceedings *in camera*, but the judgment itself must be made in public, unless, as the Rapporteur pointed out, this is prejudicial to the defendant himself; this could be the case for a juvenile offender.³²

³¹ *Ibid.*, p. 462, CDDH/407/Rev.1, para. 48.

³² *Ibid.*

3119 As regards holding oral proceedings *in camera*, Article 14, paragraph 1, of the Covenant gives some clear indications:

“The Press and the public may be excluded from all or part of a trial for reasons of morals, public order (*ordre public*) or national security in a democratic society, or when the interest of the private lives of the parties so requires, or to the extent strictly necessary in the opinion of the court in special circumstances where publicity would prejudice the interests of justice”.

3120 It should be noted that Article 74 of the Fourth Convention gives representatives of the Protecting Power the right to be present at sessions of any court trying a protected person in occupied territories, unless the hearing in exceptional circumstances must take place *in camera* in the interests of the security of the Occupying Power. In this case the Protecting Power must be informed.

Sub-paragraph (j)

3121 The wording of this provision is clear. However, it should be noted that in many countries judgments in penal matters are not subject to appeal; in such cases there is often the possibility of resorting to an appeal on the law (cassation), i.e., of invoking an error in the application of the law. As regards the “other remedies”, this no doubt refers to a pardon or reprieve. In some countries judgments of military courts must be confirmed by a superior military authority.

Paragraph 5

3122 It will be noted at once that the wording is slightly different from that contained in paragraph 3. In paragraph 5 reference is made to “women whose liberty has been restricted for reasons related to the armed conflict”, while paragraph 3 contains the expression “persons arrested, detained or interned for actions related to the armed conflict”. Should the difference in these phrases be seen as indicating a specific intention? This does not seem to be the case. It certainly seems that the word “reasons” is more appropriate for the situations that are intended to be covered. In fact, in cases of internment the decision is often made on the basis of “reasons” and not of “actions”, for example, the political attitude of the internee. Thus, paragraph 5, like paragraph 3, covers women who have been arrested, detained or interned, as the expression “whose liberty has been restricted” covers all three cases.

3123 The idea of granting women special respect is already contained in Articles 27, 76 and 85 of the Fourth Convention. Article 25 of the Third Convention also provides that women must be accommodated separately and benefit from treatment at least as favourable as that granted to men (Articles 14 and 88). Article 108 of the Third Convention provides that women prisoners of war serving a prison sentence must be under the supervision of women. A similar rule is contained in the Standard Minimum Rules for the Treatment of Prisoners in the

version approved by ECOSOC in 1977, Rule 53, paragraph 3 of which provides that “women prisoners shall be attended and supervised only by women officers”.

3124 As regards bringing together families in the same premises, this idea is already contained in the Fourth Convention (Article 82).

Paragraph 6

3125 This paragraph takes up an idea that was already contained in Article 6 of the Fourth Convention and is repeated in Article 3 of this Protocol (*Beginning and end of application*), sub-paragraph (b).

3126 The ICRC draft did not contain such a provision since it was already contained in Article 6 of the Fourth Convention and it was therefore unnecessary to repeat it in the Protocol; on the other hand, there was a proposal to include it in Article 75, which in itself constituted a mini-convention, containing clauses providing for the beginning and end of application. The Conference preferred to repeat the substance of the relevant provision of the Fourth Convention in Article 3 (*Beginning and end of application*) and retained what is now paragraph 6. This has resulted in some repetition, though it is superfluous. It should be noted that while Article 3 (*Beginning and end of application*) covers armed conflicts and occupation, paragraph 6 of Article 75 refers only to the end of the armed conflict; however, as we saw with regard to paragraph 3, this is of no consequence.

3127 The usefulness of the provision is clear: frequently people only return to normal conditions after the end of armed conflict; sometimes internment goes on, judgments have not been pronounced immediately, and in some cases the trial of suspects has even been delayed until the end of the conflict. Thus it is logical that the guarantees laid down in this article should continue to apply as long as necessary.

3128 The paragraph does not state explicitly that the guarantees provided also apply to persons who might be arrested, detained or interned after the end of armed conflict. For nationals in their own State this is an important matter for the immediate post-war period is often like a day of reckoning, and it is then that suspects have most need of guarantees, both in the judicial and in the administrative field. It seems clear that such guarantees, primarily introduced for time of conflict or occupation, apply *a fortiori* after the end of armed conflict in favour of persons prosecuted for reasons related to the conflict.

3129 Article 6 of the Fourth Convention refers to “release”, while Articles 3 (*Beginning and end of application*) and 75 use the term “final release”. This is not a big difference, but we live in a time of overstatement; it is clear that if assigned residence is substituted for internment, this is not a release nor a final release. However, the intention of the drafter is clear: the release must be total.

3130 Repatriation obviously refers only to aliens. As regards re-establishment, this concerns persons who cannot be repatriated or simply released where they are and for whom a State of refuge or State of residence must therefore be found.

Paragraph 7

- 3131** As stated above,³³ this paragraph was not contained in the ICRC draft; it is the result of an amendment submitted jointly by a group of countries.³⁴
- 3132** Although they did not oppose the amendment some other delegates doubted its usefulness and even its necessity. Finally, as we see, the Working Group prepared a more detailed text which was accepted without discussion by Committee III and by the Conference itself.
- 3133** However, it is of interest to mention the explanations of some delegations. One delegation stated that:
- “The phrase ‘prosecution and trial in accordance with the applicable rules of international law’ [...] undoubtedly meant that the national law applicable in such cases must be strictly in conformity with the respective rules of international law.”³⁵
- 3134** The position adopted by that delegation seems logical, since, as we have seen, in many countries a suspect cannot be taken to court on the sole basis of the rules of international law.
- 3135** The following statement of a delegation should also be noted. It emphasized that “the provisions laid down in the paragraph in no way obligate any State to act in a way that might constitute a derogation from the general principle *nulla poena sine lege* and due process of law”.³⁶
- 3136** In actual fact this interpretative statement does not seem to be very relevant. The obligation to track down and prosecute persons accused of war crimes or crimes against humanity does not actually arise from Article 75. Such obligations result rather from the provisions of the Geneva Conventions (Articles 49/50/129/146), supplemented by Article 85 of the Protocol (*Repression of breaches of this Protocol*), as well as from international instruments such as the Charter of the Nuremberg Tribunal, the 1948 Convention on the Prevention and Punishment of the Crime of Genocide, the 1968 Convention on the Non-Applicability of Statutory Limitations to War Crimes and Crimes Against Humanity etc.³⁷

³³ *Supra*, p. 863.

³⁴ When he presented this amendment one of the co-sponsors expressed himself as follows: “It was essential to ensure that no provision of the draft Protocol could be invoked by those criminals in order to escape the punishment they deserved. In fact, some of them had tried to evade that punishment by putting forward interpretations of existing legal principles that were pure casuistry. It should not be possible for the principles laid down in additional Protocols to be used in that way.” (*O.R.* XV, p. 37, CDDH/III/SR.43, para. 60).

³⁵ *O.R.* XV, p. 205, CDDH/III/SR.58, para. 11; *O.R.* VI, p. 269, CDDH/SR.43, Annex (Federal Republic of Germany).

³⁶ *O.R.* VI, p. 272, CDDH/SR.43, Annex (Japan).

³⁷ However, another delegation stated: “We therefore hold the opinion that it is of special importance when, in connexion with the enumeration of fundamental guarantees, Article 65 [85] not only reaffirms the penal responsibility for war crimes and crimes against humanity but requests that persons who are accused of such crimes should be submitted for the purpose of prosecution and trial in accordance with the applicable rules of international law.” (*O.R.* VI, p. 268, CDDH/SR.43, Annex (German Democratic Republic)).

3137 Finally, it is relevant to quote an important statement made by one delegation:

“As the Soviet delegation understands Article 65 [75], its effects do not extend to war criminals and spies. National legislation should apply to this category of persons, and they should not enjoy international protection.

We should like to record in this connection the reservation which the USSR made to Article 85 of the 1949 Geneva Convention on the treatment of prisoners of war.

The reservation says, in particular, that persons ‘who have been convicted under the law of the Detaining Power, in accordance with the principles of the Nürnberg Trial, for war crimes and crimes against humanity [...] must be subject to the conditions obtaining in the country in question for those who undergo their punishment’.

The position thus taken by the USSR remains unchanged.”³⁸

3138 This statement requires some comment. The reservation made by the USSR to Article 85 of the Third Convention applies only to the treatment of prisoners of war after they have been convicted for war crimes or crimes against humanity. There is no doubt that the same applies to persons who are not prisoners of war but are convicted of such crimes. The guarantees of Article 75 are in the first place judicial guarantees and they operate before the judgment condemning the defendant; they must therefore apply to persons being prosecuted. Clauses concerning the system of detention, which therefore apply beyond the moment of conviction, are contained in paragraphs 1, 6 and 7.

3139 The relevant common article of the Conventions (49/50/129/146) provides that those who are charged with breaches of these Conventions will have the benefit of judicial and free defence guarantees which are not less favourable than those provided by Articles 105 ff. of the Third Convention.³⁹

3140 “War crimes” should be understood to mean serious breaches of the laws and customs of war.⁴⁰ “Crimes against humanity” are:

“inhumane acts such as murder, extermination, enslavement, deportation or persecutions, committed against any civilian population on social, political, racial, religious or cultural ground by the authorities of a State or by private individuals acting at the instigation or with the toleration of such authorities.”⁴¹

3141 After all, sub-paragraph 7(a) merely accepts as law the rules of international law which provide for the repression of such crimes, without creating new obligations; thus it should be seen primarily as a confirmation of existing rules.

³⁸ *Ibid.*, pp. 277-278 (USSR).

³⁹ See *Commentary III*. Article 75 contains most of the guarantees provided for in the Third Convention.

⁴⁰ Report of the International Law Commission, third session, 1951, vol. 2, p. 59.

⁴¹ *Ibid.*, thirty-seventh session, 1985, para. 18 (1954 version of the Draft Code of offences against the peace and the security of mankind).

As regards the expression “the applicable rules of international law”, it would seem that the interpretation given above by a delegation is valid.⁴²

3142 Sub-paragraph (b) is subject to any more favourable treatment available under the Conventions or this Protocol. Prisoners of war who have the benefit of important judicial guarantees are of course not covered, since Article 75 does not concern combatants. In accordance with common Article 49/50/129/146, civilians who are guilty of breaches of the Conventions or the Protocol will have the benefit of guarantees not less favourable than those provided for in Articles 105 *et seq.* of the Third Convention. It is not certain whether those guarantees are more favourable than the ones set out in Article 75. In case of doubt, the defendant can always invoke the most favourable provision. In occupied territories, protected persons benefit from the guarantees provided in Articles 64 *et seq.* of the Fourth Convention. Finally, it may happen that civilians are prosecuted for war crimes which constitute a breach of provisions other than those of the Conventions and the Protocol or for crimes against humanity. In that case they would benefit from the standards of treatment provided for in this article.

3143 To summarize: Article 75 is not in any way an obstacle to the prosecution and trial of persons accused of war crimes or crimes against humanity; the text of the Protocol shows this clearly and this paragraph may seem to be redundant. However, it is a fact that often things which are self-evident become even more evident if they are stated. Moreover, the drafters of the provision were right to confirm the guarantees which must apply to trials held for war crimes or crimes against humanity. In fact, it would be deplorable if repression of such crimes were to lead to questionable trials, and public opinion as a result became disappointed and embittered.

⁴² It should be noted that the English expression “applicable rules of international law” seems rather more clear than the French version “règles du droit international applicable”. The Drafting Committee clearly lacked the time to adapt the French text to read “règles applicables du droit international”. In its report, Committee III wrote the word “applicables” with an “s”, which was more logical (CDDH/407/Rev.1). The letter “s” disappeared in the final version, though no reason can be found for this in the Official Records of the Conference. The Spanish text is exactly the same as the English text.

The same remark applies to paragraph 8, where the expression “règles du droit international applicable” is again used. Article 72 correctly uses the expression “normes applicables du droit international” (in English, “applicable rules of international law”). It is to be regretted that the Drafting Committee was careless in these matters, since “rules” is sometimes translated by “normes” and sometimes by “règles”, though the concept referred to was clearly the same.

It should also be noted that in Article 2, sub-paragraph (b), the French version of the Protocol uses the expression “règles du droit international applicable dans les conflits armés” (in English, “rules of international law applicable in armed conflict”). In this case the French spelling is quite correct since the word “applicable” is qualified by the words “dans les conflits armés”.

Paragraph 8

- 3144** To some extent this paragraph repeats what was said in paragraph 1. However, the latter refers to more favourable treatment under the Conventions and the Protocol, while paragraph 8 refers to more favourable provisions under any applicable rules of international law, which is a broader concept. Are there any categories of persons, outside those covered by the Conventions and the Protocol, who benefit from greater protection under rules of international law?
- 3145** First, there are the nationals of neutral States who may have recourse to Hague Convention V of 1907 Respecting the Rights and Duties of Neutral Powers and Persons, and also to international customary practices concerning nationals of neutral States. Another category is formed by the diplomats of enemy or neutral States who may invoke international customary practices as well as some provisions of the Vienna Convention of 18 April 1961 on Diplomatic Relations, in particular Article 44 of that Convention. According to that article, the receiving State must, even in case of armed conflict, grant facilities to enable persons enjoying diplomatic status, other than its own nationals, and members of their families, to leave at the earliest possible moment; it must also make available the necessary transport.⁴³
- 3146** The categories of persons mentioned above are only examples, and other cases may arise; if greater protection results from another Convention or from customary law, those provisions must apply, even if the persons concerned are covered by Article 75.

C.P./J.P.

⁴³ The Vienna Convention of 24 April 1963 on Consular Relations contains a similar provision in its Article 26. On 31 December 1984, 142 and 109 States respectively were Parties to these Conventions. However, the provisions quoted referred to customary law.

Article 76 – Protection of women

1. Women shall be the object of special respect and shall be protected in particular against rape, forced prostitution and any other form of indecent assault.
2. Pregnant women and mothers having dependent infants who are arrested, detained or interned for reasons related to the armed conflict, shall have their cases considered with the utmost priority.
3. To the maximum extent feasible, the Parties to the conflict shall endeavour to avoid the pronouncement of the death penalty on pregnant women or mothers having dependent infants, for an offence related to the armed conflict. The death penalty for such offences shall not be executed on such women.

Commentary

- 3147 In the draft the ICRC had proposed a text¹ which was taken up and completed by the Conference. According to the ICRC it was primarily concerned with extending to all women the provisions contained in Article 27, paragraph 2, of the Fourth Convention in favour of women who are protected persons within the meaning of the Convention (“Women shall be especially protected against any attack on their honour, in particular against rape, enforced prostitution, or any form of indecent assault”).
- 3148 Furthermore, the ICRC draft adopted the idea contained in Article 6, paragraph 5, of the International Covenant on Civil and Political Rights by providing that the death penalty may not be imposed upon a pregnant woman; in fact, that provision is aimed rather at the unborn child than at the mother herself. This draft was well received by the Conference, where it was discussed at length, and which then went beyond the ICRC proposals. Three amendments had been submitted. The first two were concerned, on the one hand, with prohibiting the death sentence from being pronounced on pregnant women; their sponsors argued that the conviction itself, even if not followed by an execution, could have harmful effects on the mother and the unborn child, and they also required that the death penalty be not pronounced on mothers with young children, or on old persons responsible for their care. Finally, the third amendment proposed that women arrested for patriotism or for their political non-submission should be released as soon as possible and with priority.²
- 3149 Some compromise was achieved and following the report of the Working Group the article was finally adopted by consensus in Committee III and the Plenary Conference approved this decision without further discussion.

Paragraph 1

- 3150 This is almost identical to the text of the ICRC draft; it is also largely a repetition of paragraph 2(b) of Article 75 (*Fundamental guarantees*), with the addition of a reference to rape.
- 3151 The rule applies quite generally and therefore covers all women who are in the territory of Parties involved in the conflict, following the example of Part II of the Fourth Convention. In fact, the provision is not subject to any further specification, unlike most of the rules contained in Section III. Thus it applies both to women affected by the armed conflict, and to others; to women protected by the Fourth Convention and to those who are not.
- 3152 When a special reference to women was introduced in Article 27 of the Fourth Convention in 1949, the drafters of that provision had in mind the abuses

¹ “Article 67 – Protection of women

1. Women shall be the object of special respect and shall be protected, in particular against rape, enforced prostitution, and any other form of indecent assault.
2. The death penalty for an offence referred to in Article 2 common to the Conventions shall not be executed on pregnant women.”

² O.R. III, pp. 298-299, CDDH/III/321-323.

perpetrated particularly during the Second World War, when countless women of all ages had been subjected to terrible outrages. Extending the protection to all women in territories involved in conflict reveals the intent to proscribe such acts in general.

3153 The rule relates to respect for the person and honour, as laid down in paragraph 1 of Article 75 (*Fundamental guarantees*). In any case, paragraph 5 of that article provides for special treatment for women whose liberty has been restricted.

3154 In conclusion, this provision develops the Fourth Convention by extending the circle of its beneficiaries; it also constitutes a substantial supplement to the International Covenant on Civil and Political Rights, which is less detailed in this respect, as it concentrates above all on the equality of the sexes.

Paragraph 2

3155 This paragraph was added by the Conference, as it was concerned to ensure that pregnant women and mothers of young children should be released as soon as possible. The terms used require some explanation. In the first place it should be noted that if a woman claims to be pregnant and her pregnancy is not obvious, a medical examination is required.

3156 The question also arises what exactly is meant by the expression “having dependent infants”? On this the Rapporteur records the following:

“After some discussion, the Committee decided to heed the experience of Committee I in dealing with comparable provisions in draft Protocol II in which that Committee had been unable to reach agreement on an age when infants no longer are dependent on their mothers. It was recognized that this might differ from case to case and from culture to culture. The Committee also decided not to use the term ‘nursing mothers’, but rather the broader term ‘mothers of infants on whom the infants are dependent’.”³

3157 Thus all infants are covered who require the presence and care of their mothers and have not yet acquired full independence.

3158 In Protocol II this concept can be found in Article 6 (*Penal prosecutions*), paragraph 4 of which provides that the death penalty shall not be carried out on pregnant women and mothers of young children. Thus the concept of dependence was not retained in Protocol II.

3159 In the French version the expression “enfants en bas âge” lacks precision and does not refer to a specific age. The Spanish text “niños de corte edad” is similar to the French text and is not very specific either.

3160 The English text, “mothers having dependent infants”, seems to shed some light, since the word “infants” is used, rather than “children”. According to the dictionary, the word “infant” often means a child who is not yet walking, but in Great Britain “infant schools” are schools for children between five and seven years old. Finally, in legal terms, the word “infant” means a minor, i.e., a person

³ O.R. XV, p. 464, CDDH/407/Rev.1, para. 56.

under eighteen years of age. Thus no specific criteria can be taken from the English text either.

3161 Some more useful indications can be found in the Conventions themselves. For example, Article 50, paragraph 5, of the Fourth Convention provides:

“The Occupying Power shall not hinder the application of any preferential measures in regard to food, medical care and protection against the effects of war which may have been adopted prior to the occupation in favour of children under fifteen years, expectant mothers, and mothers of children under seven years.”

3162 Article 14 of the same Convention, concerning safety zones, also mentions mothers of children under seven.

3163 In the absence of national rules or customs prescribing a higher age, it may therefore be assumed that the age of seven years is the age under which the provision must be mandatorily applied. However, it must be considered as a minimum. In fact, children often depend on their mother well beyond that age; this should be taken into account and such children should be considered as “dependent infants” beyond the age indicated above.

3164 The expression “for reasons related to the armed conflict” also requires some explanation. Paragraph 3 of Article 75 (*Fundamental guarantees*) uses the expression “actions related to the armed conflict”. However, it does not seem that different situations were envisaged by these different wordings: it is more a matter of careless drafting. The French text (“pour des raisons liées au conflit armé”) and the Spanish text (“razones relacionadas con el conflicto armado”) do not shed much light. As we said with regard to paragraph 3 of Article 75 (*Fundamental guarantees*), the term “reasons” seems more appropriate and correct to cover all the cases which may arise: arrest for committing a breach, arrest for the purpose of interrogation, internment for present or past opinions or for any other reasons. Nevertheless, everything we said with regard to paragraph 3 of Article 75 (*Fundamental guarantees*) also applies here. Reference should therefore also be made to the commentary on this provision to determine the meaning of the words “related to the armed conflict” (*supra*, pp. 875-876).

3165 “With the utmost priority” is an unusual expression which suggests that there are several degrees of priority. No doubt this means priority in relation to cases of other arrested, detained or interned women who are not pregnant nor have dependent infants, and it is priority in relation to all cases, including men. The word “utmost” was used to emphasize that the provision is mandatory, and to express the intent that pregnant women should be released as soon as possible and that mothers should be reunited with their dependent infants without delay.

3166 During the discussions in the Working Group which examined this article and gave it its present form, a proposal was made to add to this paragraph a provision preventing women from being arrested or imprisoned solely on the ground of their convictions. After a lengthy discussion this proposal was not taken up from a concern that it would legitimize the arrest or imprisonment of other persons solely on the grounds of their convictions. However, the Working Group suggested dealing with the problem in a more general way in a separate article, as a provision applicable to everyone. As we saw above with regard to paragraph

1 of Article 75 (*Fundamental guarantees*),⁴ Committee III did not succeed in the limited time available in agreeing on this new article and it was therefore abandoned.

3167 During the discussions it was proposed that elderly persons responsible for young children should also be covered by this provision, but no consensus was achieved on this point.

Paragraph 3

3168 The discussion on this paragraph, which deals with the death penalty, raised numerous problems. It was relatively easy to agree on the prohibition on execution of pregnant women; in fact, many of the national penal codes which still contain the death penalty include this restriction, and the practice of deferring execution until after the woman had given birth has been abandoned almost everywhere, *de jure* or *de facto*. On the other hand, a prohibition on pronouncing the death penalty on pregnant women or mothers having dependent infants conflicted with specific provisions of national legislation in several countries. The idea of deferring execution in such cases for a period was considered inhumane and therefore unacceptable. Finally, a compromise was agreed upon in the Working Group; it was accepted without discussion by Committee III, and then in plenary.

3169 The first sentence looks like a limited obligation, as shown by the series of terms mitigating it: “to the maximum extent feasible”, “shall endeavour”, “avoid”. On the other hand, the second sentence constitutes a clear prohibition and is formulated without qualifications. Thus, if despite the recommendation contained in the first sentence, the death penalty is pronounced on a pregnant woman or mother having dependent infants, it should in no event be executed, even when the child is no longer dependent.

3170 The terms used require some explanation: “to the maximum extent feasible” corresponds to the French “dans toute la mesure du possible”, and in Spanish to “en toda la medida de lo posible”. Article 58 (*Precautions against the effects of attacks*) uses the same wording in the English text, though the corresponding French and Spanish texts are different: respectively, “dans toute la mesure de ce qui est pratiquement possible” and “hasta donde sea factible”. It is rather strange that an expression which is the same in English in these two articles should appear with different expression in the French and Spanish texts. Here again, the Drafting Committee did not correct this error through lack of time.

3171 The expression was discussed at length with regard to other articles, and the English speaking contingent insisted on using the word “feasible” and on a corresponding translation in other languages; that should serve as a guide in the interpretation of that expression. Thus it should be understood as meaning “capable of being done, accomplished or carried out, possible or practicable”.⁵

⁴ See *supra*, p. 871.

⁵ On the meaning of this expression, see commentary on Arts. 57 and 58, *supra*, pp. 681 and 692.

3172 For the expression “mothers having dependent infants”, reference may be made to what we said on this matter with regard to paragraph 2 of this article. As regards breaches committed that are related to the armed conflict, reference should be made to what was said above with regard to paragraph 4 of Article 75 (*Fundamental guarantees*). It is true that that provision uses the words “a penal offence related to the armed conflict”, which is slightly different from the text of the paragraph under consideration here. However, it is difficult to see how an offence other than a penal offence could be invoked to justify the death penalty. In fact they refer to the same situation.

C.P. / J.P.

Protocol I

Article 77 – Protection of children

1. Children shall be the object of special respect and shall be protected against any form of indecent assault. The Parties to the conflict shall provide them with the care and aid they require, whether because of their age or for any other reason.
2. The Parties to the conflict shall take all feasible measures in order that children who have not attained the age of fifteen years do not take a direct part in hostilities and, in particular, they shall refrain from recruiting them into their armed forces. In recruiting among those persons who have attained the age of fifteen years but who have not attained the age of eighteen years, the Parties to the conflict shall endeavour to give priority to those who are oldest.
3. If, in exceptional cases, despite the provisions of paragraph 2, children who have not attained the age of fifteen years take a direct part in hostilities and fall into the power of an adverse Party, they shall continue to benefit from the special protection accorded by this Article, whether or not they are prisoners of war.
4. If arrested, detained or interned for reasons related to the armed conflict, children shall be held in quarters separate from the quarters of adults, except where families are accommodated as family units as provided in Article 75, paragraph 5.
5. The death penalty for an offence related to the armed conflict shall not be executed on persons who had not attained the age of eighteen years at the time the offence was committed.

Commentary

3173 The situation of children in time of armed conflict is covered by several articles in the Fourth Convention. Thus Article 14, concerning safety zones, indicates that such zones may protect in particular children under fifteen. Children are also mentioned in Article 17, which provides for the evacuation of civilians from besieged areas. Article 23, which deals with the free passage of relief consignments intended for the weakest categories of the population, explicitly refers to children under fifteen among the potential beneficiaries. Article 24, which has a similar scope to the article under consideration here, is entirely devoted to children, particularly children under fifteen who are orphaned or who are separated from their families as a result of the war, and to the identification of children under twelve. In Article 38, which applies to protected persons in the national territory of belligerents, children under fifteen are included amongst those persons who should enjoy preferential treatment to the same extent as nationals of the State concerned. Article 50 deals with children in occupied territories and to the institutions devoted to their care. Still in occupied territory, Article 51 prohibits compelling children under eighteen years of age to work, and Article 68 prohibits pronouncing the death penalty on persons under eighteen years of age. Moreover, this last provision, from which no derogation is possible, has been adopted in the International Covenant of 1966 on Civil and Political Rights (Article 6, paragraph 5).

3174 When it presented the draft article,¹ the ICRC's specific purpose was to extend

¹ "Article 68 – Protection of children;

1. Children shall be the object of privileged treatment. The Parties to the conflict shall provide them with the care and aid their age and situation require. Children shall be protected against any form of indecent assault.
2. The Parties to the conflict shall take all necessary measures in order that children aged under fifteen years shall not take part in hostilities and, in particular, they shall refrain from recruiting them in their armed forces or accepting their voluntary enrolment.
3. The death penalty for an offence related to a situation referred to in Article 2 common to the Conventions shall not be pronounced on persons who were under eighteen years at the time the offence was committed."

to all children in territories of States involved in a conflict, some of the provisions of the Fourth Convention which apply in occupied territories (Article 50) and to prohibit the participation of children in armed conflict. It will be shown below that by and large the Diplomatic Conference agreed with these views.

- 3175** The Working Group of Committee III discussed this article for more than a week; it raised some delicate problems and three amendments had to be examined.² Finally the Working Group achieved a compromise which was adopted by consensus in Committee III and then by the Conference itself, and which has become the present article.
- 3176** In view of its character, this article serves as a development of both the Fourth Convention and of other rules of international law which govern the protection of fundamental human rights in time of armed conflict, particularly the International Covenant of 1966 on Civil and Political Rights and the Declaration of the Rights of the Child, adopted unanimously in 1959 by the United Nations General Assembly. At the present time a Draft Convention on the Rights of the Child is under discussion in the United Nations.
- 3177** This article is not subject to any restrictions as regards its scope of application; it therefore applies to all children who are in the territory of States at war, whether or not they are affected by the conflict.

Paragraph 1

- 3178** The word “children” is not clarified in any way, and this omission is intentional. The Rapporteur said: “It should also be noted that the Committee decided not to place specific age limits in paragraphs 1 and 4 and that there is no precise definition of the term ‘children’.”³
- 3179** The term “child” does not have a generally accepted definition. According to the Concise Oxford Dictionary the term “child” means a young human being who has not reached the age of discretion, i.e., the age at which one is fit to manage one’s own affairs (7th edition, 1982). According to the Oxford English Dictionary (1970) a child is a human being up to the age of puberty. The French Dictionary Robert indicates that it means a human being from birth up to the age of thirteen; this is followed by adolescence.⁴ The age of puberty varies, depending on climate, race and the individual. However, the limit of fifteen years of age, which is given many times in the Fourth Convention and is also given in paragraphs 2 and 3 of this article, seems to provide a reasonable basis for a definition. Moreover, the article itself in paragraphs 2 and 5 uses the word “persons” in referring to a limit of eighteen years. This does not prevent the fact that some countries have adopted a lower or higher age than fifteen years, but there is no doubt that all human beings under fifteen should, within the meaning of the Fourth Convention and

² See *O.R.* III, pp. 300-301, CDDH/III/304, CDDH/III/324 and Corr.1 and CDDH/III/325.

³ *O.R.* XV, p. 465, CDDH/407/Rev.1, para. 63.

⁴ *Oxford English Dictionary*, 1970, Vol. II, p. 341: “A young person of either sex below the age of puberty”; P. Robert, *Dictionnaire alphabétique et analogique de la langue française*, Paris, 1971, vol. 2, p. 493.

this Protocol, be considered and treated as children. The age of fifteen most often corresponds to such development of the human faculties that special measures are no longer required to the same degree. However, some flexibility is appropriate, for there are individuals who remain children, both physically and mentally, after the age of fifteen. Furthermore, this age of fifteen has been adopted in other international instruments. Thus, for example, in a recommendation of 1965 relating to the minimum age for marriage (Resolution 2018 (XX)) the United Nations General Assembly requested States to determine a minimum age for marriage and specified that that age should in no case be under fifteen years.

- 3180** The meaning of the provision under consideration here is sufficiently clear: at most we should add that according to the Rapporteur the last words, “or for any other reason”, refer to retarded children, or in modern terminology, those who are physically or mentally handicapped.
- 3181** The first sentence is very similar to paragraph 1 of Article 76 (*Protection of women*). Like women, children are entitled to special respect and must be protected against any form of indecent assault. This is a welcome supplement to Article 27 of the Fourth Convention, as experience has shown that children, even the very youngest children, are not immune from sexual assault.
- 3182** The second sentence demands that Parties to the conflict should provide children with the care and aid they require. This may seem self-evident, but it is just as well to state it in black and white.

Paragraph 2

- 3183** Recent conflicts have all too often shown the harrowing spectacle of boys, who have barely left childhood behind them, brandishing rifles and machine-guns and ready to shoot indiscriminately at anything that moves. Participation of children and adolescents in combat is an inhumane practice and the ICRC considered that it should come to an end. It entails mortal danger for the children themselves, but also for the many people who are exposed to their erratic.
- 3184** Nevertheless, the ICRC proposals encountered some opposition, as on this point governments did not wish to undertake unconditional obligations. In fact, the ICRC had suggested that the Parties to the conflict should “take all necessary measures”, which became in the final text, “take all feasible measures”. This formula already exists in other articles, particularly Article 76 (*Protection of women*), and we refer to the commentary thereon.⁵ Although the obligation to refrain from recruiting children under fifteen remains, the one of refusing their voluntary enrolment is no longer explicitly mentioned. In fact, according to the Rapporteur, Committee III noted that sometimes, especially in occupied territories and in wars of national liberation, it would not be realistic to totally prohibit voluntary participation of children under fifteen.⁶

⁵ For the general meaning of the expression, cf. commentary Arts. 57-58, *supra*, pp. 681 and 692.

⁶ O.R. XV, p. 465, CDDH/407/Rev.1, para. 63.

- 3185** It is possible to understand the point of view adopted by the Diplomatic Conference without fully agreeing with it. It is true that there is no law on military organization anywhere that provides for the recruitment of persons under fifteen, but children of that age have certainly participated in hostilities voluntarily in extreme circumstances, and have sometimes performed acts of heroism, possibly without always being aware of the reasons for the conflict. It is difficult to moderate their enthusiasm and their will to fight. Military and civil authorities will find valid reasons in this provision for refusing the voluntary enrolment of minors under the age of fifteen, and for exhorting them to continue their studies and their education. However, if despite this, such “under fifteens” are intent on participating in hostilities – a case covered by paragraph 3 – the authorities employing or commanding them should be conscious of the heavy responsibility they are assuming and should remember that they are dealing with persons who are not yet sufficiently mature, or even have the necessary discernment of discrimination. Thus they should give them the appropriate instruction on handling weapons, the conduct of combatants and respect for the laws and customs of war.
- 3186** Similarly, even though the authorities may not succeed in preventing young persons from taking part in hostilities, they should at least provide them with uniforms, identity tags indicating their status as minors or, failing these, with distinguishing signs such as, for example, an armband or a tunic or any other sign showing that the individual wearing it is a combatant.
- 3187** The text refers to taking a *direct* part in hostilities.⁷ The ICRC proposal did not include this word. Can this lead to the conclusion that indirect acts of participation are not covered? Examples would include, in particular, gathering and transmission of military information, transportation of arms and munitions, provision of supplies etc. The intention of the drafters of the article was clearly to keep children under fifteen outside armed conflict, and consequently they should not be required to perform such services; if it does happen that children under fifteen spontaneously or on request perform such acts, precautions should at least be taken; for example, in the case of capture by the enemy, they should not be considered as spies, saboteurs or illegal combatants and treated as such. In addition, appropriate instruction is again essential.
- 3188** The second sentence of the paragraph is the result of a compromise; in fact, in an amendment one delegation had proposed that the limit on non-recruitment should be raised from fifteen to eighteen years.⁸ The majority was opposed to extending the prohibition of recruitment beyond fifteen years, but in order to take this proposal into account it was provided that in the case of recruitment of persons between fifteen and eighteen, priority should be given to the oldest.
- 3189** As we see, this provision directly concerns the composition of the armed forces; it is therefore related to Articles 43 (*Armed forces*), 44 (*Combatants and prisoners of war*), 45 (*Protection of persons who have taken part in hostilities*) of the present

⁷ Art. 43, para. 2, attributes the right to participate *directly* in hostilities to members of the armed forces and to them alone. We refer to the commentary on this paragraph, *supra*, p. 514.

⁸ Cf. O.R. III, p. 301, CDDH/III/325.

Protocol, to Articles 51 and 147 of the Fourth Convention, and to Article 23 of the Hague Regulations of 1907.

- 3190** Up to now there have been no rules in this field, and this article will certainly be very useful, even if it is not mandatory in some circumstances.
- 3191** Finally it should be noted that this provision is primarily concerned with the nationals of the recruitment State, though without excluding nationals of other States. In other words, this article undoubtedly applies to that State's own nationals, and to some extent protects them from their own authorities. It is conceivable on the basis of this article that a father might oppose the recruitment of his son under fifteen years of age, or request that in the event of his son's voluntary enrolment, such enrolment should not be accepted.

Paragraph 3

- 3192** One does not often see an international treaty laying down rules governing the situation which would arise if an article of the same treaty were violated. This paragraph is an example of such case. It is intended to cover the case where, despite the prohibitions contained in the first two paragraphs, "under fifteens" were to participate in hostilities. However, the text itself emphasizes the "exceptional" character of such cases.
- 3193** As we have already said, it is not very likely that such young persons would be recruited on the basis of a law or decree. It is more likely that they would join up as a result of spontaneous actions by individuals or groups such as military academies, volunteer corps or patriotic societies. Spontaneous uprisings to resist an invader (*levée en masse*) are also quite likely.
- 3194** We also mentioned above the precautionary measures which should be taken by the authorities in such an extreme case, particularly ensuring that such young persons are provided with distinguishing signs displaying their combatant status. A child identified in this way will obviously be treated as a prisoner of war if he is captured. In fact, there is no age-limit for the right to such treatment. Theoretically prisoners of war may be very young or very old. However, according to Article 16 of the Third Convention, age is a factor which justifies privileged treatment. On many occasions the ICRC has intervened in favour of very young prisoners of war, requesting privileged treatment for them during captivity and priority during repatriation.⁹ Even when they are prisoners of war, "under fifteens" will continue to have the benefit of the provisions of this article, particularly paragraphs 1, 4 and 5. The death penalty cannot be pronounced on them, and they must be interned in quarters separate from those of adults.
- 3195** If a child under fifteen years of age participates in hostilities under such conditions that he does not have the right to prisoner-of-war status, he may fall under the Fourth Convention if he is a protected person within the meaning of

⁹ See *Report of the International Committee of the Red Cross on its Activities during the Second World War (September 1, 1939 – June 30, 1947)*, Vol. I, 1948, pp. 297-300.

that Convention. Finally, if he does not have the right to prisoner-of-war treatment, and he is not a protected person either, he is entitled, according to Article 45 (*Protection of persons who have taken part in hostilities*), paragraph 3, to the protection of Article 75 (*Fundamental guarantees*), which is referred to in paragraph 4 of Article 77. That provision is important, especially with regard to judicial guarantees, as these are only available under the Fourth Convention for protected persons in occupied territory.

3196 Finally, all children who are in the situation just referred to can rely on the provisions of Article 77, even if they are prisoners of war or protected persons under the Fourth Convention.

Paragraph 4

3197 As in paragraph 1 – we refer to the commentary thereon – no age-limit is laid down, and the word “children” is not defined. However, it is reasonable to assume that children under fifteen years of age must be detained in quarters separate from those of adults, except, obviously where families are accommodated as family units.

3198 The situation is less clear with regard to young people between sixteen and eighteen years old. In this respect the Rapporteur of Committee III made the following remark: “Whether persons of sixteen, seventeen or eighteen years of age would thus have to be retained separately from adults, is left to national law, traditions, and the decision of the Parties to a conflict.”¹⁰ Like him, we feel that for this last category it is appropriate to act in accordance with the customs and practices followed in the places of detention of the countries concerned. If there is any uncertainty, the interests of the young people should prevail.

3199 To some extent this question is related to the age of criminal responsibility. In some countries no penal sanction may be inflicted on individuals who have not reached a minimum age, which may vary from country to country. In many States, even if the age of criminal responsibility is below the general age of majority, youth constitutes a mitigating factor, and penalties are reduced. Very often offences committed by young people are submitted to juvenile courts, and the penalties are often educational or rehabilitation measures to be served in special establishments. In such cases the separation required by this paragraph is of course automatically achieved.

3200 Lodging members of the same family who are being detained in the same quarters is already laid down in Article 82 of the Fourth Convention.

Paragraph 5

3201 This is probably the most important paragraph, as the provision is not subject to any restriction; it contains its own definition in terms which are unequivocal.

¹⁰ O.R. XV, p. 465, CDDH/407/Rev.1, para. 63.

In territories at war no person under the age of eighteen years may be executed for an offence related to the armed conflict.

3202 In this field the Fourth Geneva Convention of 1949 paved the way in Article 68, paragraph 4, which provides that, in any case, the death penalty may not be pronounced by the courts of the Occupying Power on a protected person who is under eighteen years of age. The 1966 International Covenant on Civil and Political Rights followed this example, and Article 6 provides that the death sentence cannot be imposed for crimes committed by persons below eighteen years of age. On the other hand, the European Convention (1950) does not contain any provision in this respect. Article 4 of the American Convention (1969) prohibits the death penalty for persons under eighteen years of age or over seventy. To sum up, the present provision fills gaps which still existed, and with regard to time of armed conflict and offences related to conflicts, it can be said that the death penalty for persons under eighteen years of age is ruled out completely.

3203 It should be noted that the provision does not use the word “children”, but the more general term “persons”. The ICRC draft provided that the death penalty should not be “pronounced”, and the Working Group had accepted that text. But one delegate argued that the legislation of his country did not permit a prohibition on the death penalty being pronounced, though a prohibition of its execution could be accepted. Committee III and the Conference itself accepted this objection and the final text takes it into account.

3204 It is to be hoped that this provision will not be abused, especially by urging young people under eighteen to perform highly perfidious or unscrupulous acts which would not carry the death penalty for their perpetrator because of his youth. Such practices could have damaging consequences if they occurred frequently and the authorities responsible might give up attempting to apprehend the perpetrators of such acts, seeking rather to eliminate them. The heavy responsibility upon those who ordered adolescents to commit such acts or tolerated them, should be underlined, for they jeopardize the safety of all young people. In addition, it should be recalled that they would have to account for their acts before the courts.

3205 As regards the words “offence related to the armed conflict”, we have already seen with regard to Article 75 (*Fundamental guarantees*), paragraphs 3 and 4, and Article 76 (*Protection of women*), paragraphs 2 and 3, what is meant by this expression, which in general does not cover ordinary criminal offences. In addition, we would refer to the commentary on the above-mentioned provisions (p. 357 and p. 893 *supra*).

3206 The death penalty is prohibited or restricted in a number of provisions of the Geneva Conventions and the Additional Protocols, and the following summary can be made in this respect:

- 1) A general rule applicable to all civilian or military persons in the territory of the Parties to the conflict prohibits the execution of the death penalty for penal offences related to the armed conflict on persons under eighteen years of age at the time the offence was committed (Protocol I, Article 77). The corresponding rule applicable in non-international conflicts (Protocol II,

Article 6 – *Penal prosecutions*) prohibits the pronouncement of the death penalty in like circumstances.

- 2) A general rule applicable to women prohibits the execution of the death penalty on pregnant women and mothers having dependent infants, for offences related to the conflict (Protocol I, Article 76 – *Protection of women*). The same rule applies in internal conflicts (Protocol II, Article 6 – *Penal prosecutions*).
- 3) Prisoners of war are subject to the legislation of the Detaining Power; they must be informed of offences carrying the death penalty under this legislation; no new offence may be added to that list without the concurrence of the Power on which they depend. Various precautions are laid down in favour of prisoners of war accused of offences carrying the death penalty, and this penalty may not be executed until at least six months after the final judgment (Third Convention, Articles 100 and 101).
- 4) In occupied territories the death penalty can only be pronounced by courts of the Occupying Power against protected persons for a limited number of duly enumerated offences (Fourth Convention, Article 68, paragraph 2). Furthermore, various precautions must be observed, and in the case of conviction, the execution may not take place until after a period of at least six months (Fourth Convention, Article 75). Finally, the Fourth Convention (Article 68, paragraph 4), prohibits the pronouncement (and therefore, like the article under consideration here, the execution) of the death penalty on protected persons under eighteen years of age at the time of the offence.

3207 As we have seen, some very important restrictions have been adopted on the pronouncement and execution of the death penalty; at any rate, there is a general tendency throughout the world to abolish this penalty, and this tendency is reflected in the 1949 Conventions, as well as in the present Protocol.

3208 It is worthy of note that one delegate, without objecting to the article as it was adopted, would have wished to add a sixth paragraph prohibiting any penal prosecution and conviction of children too young at the time of the offence to understand the consequences of their actions. According to the Rapporteur, Committee III agreed that, following a general principle of penal law, a person cannot be convicted of a criminal act if he was not able to understand the consequences of that act at the time he committed it. To some extent this problem is related to the age of criminal responsibility, discussed above with regard to paragraph 3. The Committee therefore decided to leave this question to national legislation.

C.P./J.P.

Protocol I

Article 78 – Evacuation of children

1. No Party to the conflict shall arrange for the evacuation of children, other than its own nationals, to a foreign country except for a temporary evacuation where compelling reasons of the health or medical treatment of the children or, except in occupied territory, their safety, so require. Where the parents or legal guardians can be found, their written consent to such evacuation is required. If these persons cannot be found, the written consent to such evacuation of the persons who by law or custom are primarily responsible for the care of the children is required. Any such evacuation shall be supervised by the Protecting Power in agreement with the Parties concerned, namely, the Party arranging for the evacuation, the Party receiving the children and any Parties whose nationals are being evacuated. In each case, all Parties to the conflict shall take all feasible precautions to avoid endangering the evacuation.
2. Whenever an evacuation occurs pursuant to paragraph 1, each child's education, including his religious and moral education as his parents desire, shall be provided while he is away with the greatest possible continuity.
3. With a view to facilitating the return to their families and country of children evacuated pursuant to this Article, the authorities of the Party arranging for the evacuation and, as appropriate, the authorities of the receiving country shall establish for each child a card with photographs, which they shall send to the Central Tracing Agency of the International Committee of the Red Cross. Each card shall bear, whenever possible, and whenever it involves no risk of harm to the child, the following information:
 - (a) surname(s) of the child;
 - (b) the child's first name(s);
 - (c) the child's sex;
 - (d) the place and date of birth (or, if that date is not known, the approximate age);
 - (e) the father's full name;
 - (f) the mother's full name and her maiden name;
 - (g) the child's next-of-kin;
 - (h) the child's nationality;
 - (i) the child's native language, and any other languages he speaks;
 - (j) the address of the child's family;
 - (k) any identification number for the child;
 - (l) the child's state of health;
 - (m) the child's blood group;
 - (n) any distinguishing features;

- (o) the date on which and the place where the child was found;
- (p) the date on which and the place from which the child left the country;
- (q) the child's religion, if any;
- (r) the child's present address in the receiving country;
- (s) should the child die before his return, the date, place and circumstances of death and place of interment.

Commentary

3209 In countries at war special measures are nearly always taken in favour of children for it is desirable to ensure the well-being, upbringing and education of children. Therefore special provisions have been adopted in the field of food supplies, medical care and clothing. Efforts have also been made to accommodate young people in areas or quarters where the dangers of war are reduced. In this context children have often been sent abroad to allied or neutral countries¹ which agreed or offered to accommodate them. In the majority of cases it was a matter of avoiding the dangers resulting from hostilities for children, of ensuring sufficient food, as well as an appropriate upbringing and education. On the whole such evacuations, carried out in an orderly manner, with the agreement of the authorities and the parents, have had good results.

3210 The Fourth Convention encouraged the reception of orphaned children or children separated from their families into neutral countries. Thus Article 24 provides:

¹ By which we mean here and below, "neutral or other State not Party to the conflict"; on this expression, see commentary Art. 2, sub-para. (c), *supra*, p. 61.

“The Parties to the conflict shall take the necessary measures to ensure that children under fifteen, who are orphaned or who are separated from their families as a result of the war, are not left to their own resources, and that their maintenance, the exercise of their religion and their education are facilitated in all circumstances. Their education shall, as far as possible, be entrusted to persons of a similar cultural tradition.

The Parties to the conflict shall facilitate the reception of such children in a neutral country for the duration of the conflict with the consent of the Protecting Power, if any, and under due safeguards for the observance of the principles stated in the first paragraph.”

3211 The Diplomatic Conference of 1974-1977 had a more cautious approach. In fact, it has also happened that evacuations have been carried out for other reasons, for example, to educate children according to certain political or religious views, or to prepare them to serve in the armed forces of a State. Sometimes they have been carried out in conditions such as to result in the children losing their identity or being raised in a manner foreign to that of their family or their country.

3212 To a large extent Article 78 takes these aspects into account. While it permits the evacuation of children abroad, it lays down precise conditions which the Parties to the conflict must observe in such situations. In fact, the evacuation of children itself involves serious dangers. In this connection it is useful to recall a study carried out by UNESCO,² quoted by the International Union for Child Welfare in its memorandum presented to the second session of the Conference of Government Experts in 1972:³

“When we study the nature of the psychological suffering of the child who is a victim of war, we discover that it is not the fact of war itself – such as bombings, military operations – which have affected him emotionally; his sense of adventure, his interest for destruction and movement can accommodate itself to the worst dangers, and he is not conscious of his peril if he keeps near him his protector who, in his child’s heart, incarnates security and if, at the same time, he can clasp in his arms some familiar object.

It is the repercussion of events on the family affective ties and the separation with his customary framework of life which affect the child, and more than anything the abrupt separation from his mother.”

3213 It follows from the above that everything possible should be done to avoid separating children (especially young children) from their natural protectors. However, it is clear that in time of war the mother and father are often assigned to military or civilian tasks and are therefore not able to take care of the well-being and upbringing of their child. Frequently the child will be entrusted to the grandparents or other more distant relatives, or otherwise he may be left to reception centres.

² Th. Brosse, *War-Handicapped Children*, UNESCO, Paris, 1950.

³ *CE 1972, Report*, Vol. II, pp. 85-91 (CE/COM III/PC 117).

- 3214** On the basis of its experience, in 1972 the ICRC submitted an article to the Government Experts which merely imposed an obligation upon States receiving children to register them and to supply information to the Central Tracing Agency; in the ICRC's view it was primarily a matter of ensuring and facilitating the children's return to their country and their family. The ICRC modified the draft on the basis of the discussions which took place in 1972.⁴
- 3215** As we will see below, the Diplomatic Conference introduced important clarifications and additions to the ICRC draft. The latter had also introduced provisions relating to the evacuation of children in Article 32 of draft Protocol II, but the Conference only partially adopted these, incorporating them into Article 4 (*Fundamental guarantees*), paragraph 3, of that Protocol. In this connection it should be noted that the evacuation of children under difficult conditions has mainly occurred in cases of internal armed conflict.
- 3216** Thus, for example, at the end of the Spanish Civil War in the years 1938-1939 orphaned Basque children or those separated from their families were evacuated to the USSR, which led to dramatic situations from the personal and family point of view. When they became adults, many of these children wished to return to Spain, and did so during the 1960s. However, many of them did not feel at home in Spain and demanded to be allowed to return to the USSR, which required lengthy negotiations. In fact these people did not feel at home either in Spain or the USSR.

⁴ "Article 69 – Evacuation of children

1. If their condition necessitates their evacuation for reasons of health, in particular to obtain medical treatment or to hasten convalescence, children may be transferred to a foreign country. Where they have not been separated by circumstances from their parents or legal guardians, the latter's consent must be obtained. In the case of evacuation to a foreign country, the operation shall be supervised or directed by the Protecting Power, in agreement with the Parties to the conflict concerned.

2. In the case of evacuation to a foreign country, the Party to the conflict carrying out the evacuation and the authorities of the receiving country shall arrange, if possible, for the children's education to be continued in the language and culture of the country to which they belong.

3. So as to facilitate the return, to their families and country, of children cared for or received abroad, the authorities of the receiving country shall establish for each child a card, with photographs, which they shall communicate to the Central Tracing Agency. Each card shall bear, whenever possible, the following minimum information:

- (a) surname of the child;
- (b) the child's first name;
- (c) the place and date of birth (failing this, the approximate age);
- (d) the father's first name;
- (e) the mother's first name and her maiden name;
- (f) the child's nationality;
- (g) the address of the child's family;
- (h) the date on which and the place where the child was found;
- (i) the date on which and the place from where the child left his country;
- (j) the child's blood group;
- (k) any distinguishing features;
- (l) the child's present address."

- 3217** Another example is the case of some 30,000 Greek children who were moved to various foreign countries at the end of the Greek Civil War of 1945-1946. In 1948 and 1949 the United Nations General Assembly requested the International Committee of the Red Cross and the League of Red Cross Societies to take care of the repatriation of these children. This was a long and difficult process, but finally, during the 1950s, several thousand children were returned to their country.
- 3218** These examples, although relating to internal conflicts, clearly show that when children are evacuated to other countries, all the necessary measures should be taken at the same time to permit their prompt return once the conditions which necessitated the evacuation have disappeared.

Paragraph 1

- 3219** Like several other provisions in this Section, this article contains its own definition of the persons to whom it applies. Thus it covers children – with no further clarification – except that children who are nationals of the Party to the conflict carrying out the evacuation are not included.
- 3220** Thus a Party to the conflict may arrange for the evacuation of its own children to an allied or neutral country without having to act in accordance with the provisions of this article; the same applies to evacuations of children arranged for by a Party to the conflict within its own territory. In the past such evacuations have been frequently undertaken for various different reasons: to remove children from the dangers of war, to provide adequate food and care for them, to ensure their upbringing and education in satisfactory conditions etc.
- 3221** Having said this, there is no doubt that when Parties to the conflict evacuate children in cases other than those provided for in this article it is entirely in their interest to act in accordance with the provisions of paragraphs 2 and 3, even if they are under no legal obligation to do so. In short, these are sound administrative measures. In any case, they are laid down in broad terms in Article 24 of the Fourth Convention.
- 3222** Let us now look at the conditions set out in the article under consideration here. As nationals of the State arranging for the evacuation are not covered, the provision is mainly concerned with children of enemy nationality, of refugees or of stateless persons, and of nationals of States without diplomatic representation. Thus in most cases these are protected persons within the meaning of the Fourth Convention. There may also be child refugees who are not protected persons because they have acquired that status after the outbreak of hostilities, or children who are nationals of States not bound by the Fourth Convention, but such cases are relatively rare. The majority of children concerned therefore fall under the provisions of the Fourth Convention. Thus it is prohibited to evacuate them to the territory of a Power that is not Party to the Convention, and if they are taken to a Power which is Party to the Convention, it is necessary to ensure that it is able and willing to apply the Convention (Article 45, Fourth Convention). The Power arranging for the evacuation remains responsible for the treatment given the persons who are evacuated. Protected persons, to the same extent as nationals

of the State concerned, are free to move when they find themselves in a particularly exposed area (Article 39, sub-paragraph 4).

3223 In occupied territories, Article 49 prohibits forcible transfers from occupied territory. The same does not apply for voluntary transfers. Evacuations within occupied territory are possible only if the security of the population or military necessity so requires. Only when it is impossible for material reasons to avoid it, is a temporary transfer of a population outside occupied territory legitimate and this population should be returned to its own country as soon as hostilities have ceased in that area. In this case too, children will enjoy the guarantees accorded protected persons. In this way families will be kept together.

3224 Finally, let us recall the terms of Article 49, paragraph 6, of the Fourth Convention, which provide that an Occupying Power cannot transfer parts of its own population into the territory it occupies.

3225 The position is rather complicated and we will therefore attempt to summarize it as follows:

- 1) Children who are nationals of the Party to the conflict arranging for the evacuation: that Party is free to make such arrangements as it sees fit, though in the interests of the children it is, of course, highly desirable to apply the rules laid down in the Protocol.
- 2) Children who are not nationals of the Power arranging for the evacuation and who are protected persons under the Fourth Convention: the rules of the Convention and the Protocol apply concurrently.
- 3) Children who are neither nationals of the Power arranging for the evacuation, nor protected persons under the Fourth Convention:⁵ the rules laid down in the Protocol apply.

3226 The reasons given which may justify an evacuation are exhaustive: health, medical treatment or safety. As we said above, the Protocol tends to restrict the evacuation of children, no doubt in the light of negative experiences, some of which were described above. In general an interruption of family and affective ties can have dire effects on the development of children; a balance must be found between opposing needs.

3227 For occupied territories safety was not retained as a condition for evacuation. On this the Rapporteur stated:

“[...] the limitation to evacuation for compelling reasons of health or medical treatment where the evacuation is to be from occupied territory reflects a deep-seated concern among many representatives in the Committee that the dangers of Occupying Powers abusing their discretion are greater than the dangers of prohibiting evacuation for reasons of safety”.⁶

⁵ Children who are nationals of allied countries which have normal diplomatic relations with the Power arranging for the evacuation and whose diplomatic representatives can accomplish their diplomatic mission in favour of their compatriots without hindrance are not protected persons; the same applies, except in occupied territory, to children who are nationals of neutral or other States not Parties to the conflict.

⁶ O.R. XV, p. 466, CDDH/407/Rev.1, para. 66.

- 3228** It may happen that evacuation in itself presents serious danger. In such circumstances the rule contained in Article 127, paragraph 4, of the Fourth Convention may give useful guidance. According to that provision, if the combat zone draws close to a place of internment, internees shall not be transferred unless they are exposed to greater risks by remaining on the spot than by being transferred.
- 3229** In such circumstances the responsible authorities could also consider establishing demilitarized zones or safety zones or otherwise they could declare inhabited areas to be “non-defended localities”. Obviously children should be amongst the first persons to be allowed to enter such protected areas.
- 3230** The adjective “temporary” which is used here is very important; it clearly shows that anyone who makes a decision to evacuate children, must at the same time hold out the prospect of their return and of restoring relations with their family in due course.
- 3231** As regards the authority which decides upon and undertakes the evacuation, the article is not very clear. In its own national territory the government and its organs with responsibility for these questions may give the children the possibility to leave for an allied or neutral country. For voluntary transfers from occupied territory, the initiative most often comes from local authorities, although they can only act with the consent and support of the Occupying Power, on the basis of an offer made by a neutral or allied country to receive children for a reasonably long period. In all these cases the Occupying Power, according to the terms of the article, is the Power arranging for the evacuation.
- 3232** Both in the State’s own national territory and in occupied territories the written consent of parents or guardians, or those who are responsible for the care of the children, is required. It might have been thought that the consent of the Power whose nationals are being evacuated would have been sufficient, but it was argued that some governments are “puppet” governments and that it was therefore necessary to obtain the consent of the family. In general the Diplomatic Conference showed great restraint in this field, especially in the case of occupied territories.
- 3233** In the absence of parents or guardians, consent is required of the persons who by law or custom are primarily responsible for the care of the children; this wording takes into account that in some parts of the world the family has a broader definition than in others.
- 3234** Supervision by the Protecting Power is provided for here: this, of course, refers to the Protecting Power looking after the interests of the belligerent Power of which the children are nationals or, in the case of refugees, the interests of the receiving State; in the absence of a Protecting Power for such refugees, support of the United Nations High Commissioner for Refugees or its representatives is an alternative.
- 3235** Lastly, if the children to be evacuated are not protected persons under the Fourth Convention, or in the absence of a Protecting Power, a humanitarian organization such as the ICRC may deal with the evacuation. The National Red Cross and Red Crescent Societies whose humanitarian activities are laid down in Article 81 (*Activities of the Red Cross and other humanitarian organizations*) can also lend their assistance to such evacuations.

- 3236** The paragraph ends with a sentence inviting Parties to the conflict to take all feasible precautions to avoid endangering the evacuation. The French text is less precise, in that it refers to “jeopardizing the evacuation” (“compromettre l’évacuation”) it is not clear what acts could jeopardize the evacuation. We understand this provision to mean that Parties to the conflict which have organized or accepted the evacuation should, of course, desist from undertaking military operations which would endanger the children being evacuated. Obviously signals can be used to indicate the routes and time of transport by air, sea or land used by the evacuation convoys. It is not impossible for Parties to the conflict to require specific routes to be used and others not to be used. The Protecting Powers can certainly play a useful role in this field.
- 3237** Finally, it should be noted that the article does not contain a definition of “children”. On this point we refer to what was said above on Article 77 (*Protection of children*); in general it may be considered that any human being under fifteen years of age should be considered as a child for the purposes of the Conventions and the Protocol. This does not mean that in certain cases people over the age of fifteen may not also be considered to be children.

Paragraph 2

- 3238** This paragraph lays down obligations but does not indicate to whom they apply. In the first place, it is the duty of the State receiving the children to continue the education of children in accordance with the wishes of their parents. However, the Party to the conflict arranging for the evacuation is also responsible for the fate of the evacuated children and should ensure that the requirements laid down are fulfilled. Any measures aimed at converting children to a religion other than that of their family, even if such conversion is voluntary, are of course prohibited. Similarly, indoctrination must be prohibited.
- 3239** Having said this, it will not always be easy to find a sufficient number of people who are able to ensure the education of children in the same conditions they enjoyed up to that time. Language problems may arise, as well as problems of custom and understanding; nevertheless, all possible measures should be taken.
- 3240** In conclusion, it should be noted that this paragraph lays down duties for receiving States which are often neutral countries and not Parties to the conflict; this is an expression of the solidarity uniting the States bound by the Conventions and their additional Protocol, a solidarity which is found moreover in other provisions, particularly in Article 1 (*General principles and scope of application*), paragraph 1, of the Protocol.

Paragraph 3

- 3241** The text is quite clear and requires very little comment. The Central Tracing Agency is that which is mentioned in Article 123 of the Third Convention and Article 140 of the Fourth Convention as Central Information Agency. The ICRC had established, without a clear legal basis, such an agency in 1914 during the First World War. A new Agency was founded in 1939 on the basis of Article 79 of

the Convention of 27 July 1929 Relative to the Treatment of Prisoners of War. That Agency was also concerned with the fate of civilians. Since the end of the Second World War it has remained active and was made available to Parties to conflicts which have taken place since then. This Agency still deals with enquiries about members of the armed forces or civilians registered during the Second World War.

- 3242** The information to be shown on every child's card is very full and it will not always be possible to give all of it. Moreover, there are cases where providing certain information could be harmful to the person it concerns and this is why an exception is made whenever it involves risk of harm to the child.
- 3243** When this paragraph was adopted in plenary, a discussion arose regarding the mother's maiden name: some delegates argued that in their countries such a concept was unknown, as a married woman retained her surname. For this reason the French text uses the word "éventuellement", though this is omitted in the English text.
- 3244** Some questions arose with regard to the meaning to be given to the word "family" in sub-paragraph (j). The Rapporteur replied that this word meant either the father or mother, or any surviving member of the family .⁷

Protocol I

Article 79 – Measures of protection for journalists

1. Journalists engaged in dangerous professional missions in areas of armed conflict shall be considered as civilians within the meaning of Article 50, paragraph 1.
2. They shall be protected as such under the Conventions and this Protocol, provided that they take no action adversely affecting their status as civilians, and without prejudice to the right of war correspondents accredited to the armed forces to the status provided for in Article 4A(4) of the Third Convention.
3. They may obtain an identity card similar to the model in Annex II of this Protocol. This card, which shall be issued by the government of the State of which the journalist is a national or in whose territory he resides or in which the news medium employing him is located, shall attest to his status as a journalist.

Commentary**General remarks**

- 3245** The circumstances of armed conflict expose journalists exercising their profession in such a situation to dangers which often exceed the level of danger normally encountered by civilians. In some cases the risks are even similar to the dangers encountered by members of the armed forces, although they do not belong to the armed forces. Therefore special rules are required for journalists who are imperilled by their professional duties in the context of armed conflict.¹
- 3246** It must be stressed from the outset that Article 79 is a rule of international *humanitarian* law: it purports to protect journalists engaged on dangerous missions from the harmful effects of armed conflict. Neither the right to seek information nor the right to obtain information are at issue in this provision.

The state of the law before 1977

- 3247** Article 13 of the Hague Regulations Concerning the Laws and Customs of War on Land annexed to the Fourth Hague Convention of 1907 provides that “Individuals who follow an army without directly belonging to it, such as newspaper correspondents and reporters” are entitled in case of capture to prisoner-of-war treatment on one condition: that they are in possession of “a certificate from the military authorities of the army which they were accompanying”. This solution was retained by the Geneva Convention of 27 July 1929 Relative to The Treatment of Prisoners of War (Article 81).
- 3248** However, the Third Convention of 12 August 1949 is no longer satisfied with granting analogous treatment but its Article 4A(4) accords captured war correspondents the status of prisoner of war. Thus war correspondents are included among those who accompany the armed forces without actually being members thereof. However, only those correspondents who have special authorization permitting them to accompany the armed forces fall under this category: accredited correspondents. An identity card issued by the military authorities will assist them in proving their status.² Wounded, sick or shipwrecked war correspondents fall under the protection granted by the First and Second Conventions (Article 13).
- 3249** Apart from these special rules for war correspondents authorized to accompany the armed forces, international humanitarian law instruments dating from before 1977 do not contain any special provisions relating to journalists or their mission.

¹ For a general analysis, see H.-P. Gasser, “The Protection of Journalists Engaged in Dangerous Professional Missions”, *IRRC*, January-February 1983, p. 3.

² *Commentary III*, Art. 4A(4), pp. 64-65.

Historical background of this provision

- 3250** The historical background to Article 79 is special in that this provision did not result from the draft of Protocol I submitted to the Diplomatic Conference by the ICRC on the basis of consultations with government experts. It originates elsewhere. In fact, the United Nations General Assembly, on a French initiative, in 1970, authorized the Economic and Social Council, and through it the Human Rights Commission, to draw up a special draft convention with a view to protecting journalists on dangerous missions.³
- 3251** At the request of the General Assembly, successive drafts for such a Convention were submitted by the Human Rights Commission to the two sessions of the Conference of Government Experts for consideration.⁴ The majority of experts welcomed the proposal to provide special protection for journalists in view of the importance of transmitting as much information as possible on events during armed conflict.
- 3252** Invited by the United Nations General Assembly to express its views on the draft articles drawn up by the Human Rights Commission,⁵ the CDDH did so during the second session, though in an unexpected way. Instead of limiting itself to commenting on the United Nations draft, an *ad hoc* Working Group of Committee I considered that the protection of journalists on dangerous missions should be dealt with in the context of an instrument of international humanitarian law and not in a special convention.
- 3253** Thus the Working Group submitted to Committee I a draft article to be included in Protocol I – the future Article 79 – and an annex.⁶ These texts were successively accepted by Committee I⁷ and in plenary⁸ without opposition and without any further modifications except minor drafting changes.
- 3254** However, an interesting controversy arose during the discussion in Committee I: in fact, one delegation submitted an amendment which would have obliged journalists claiming protection under Article 79 to wear a protective emblem clearly visible from a distance in the shape of a bright orange armlet with two black triangles.⁹ This proposal was rejected primarily on the basis of the following argument: by making the wearer of the armlet conspicuous to combatants, such means of identification might make the journalists' mission even more dangerous; similarly it was argued that in this way the journalists would be likely to endanger the surrounding civilian population.¹⁰

¹⁰ *O.R.* VIII, pp. 368-371, CDDH/I/SR.35, paras. 8-23.

- 3255 The information which should be shown on the identity card was also the object of some discussion in Committee I.¹¹
- 3256 In 1975 the United Nations General Assembly acknowledged the solution adopted by the Diplomatic Conference “with satisfaction”.¹² Since then there has been no further action on the initial idea of drafting a special convention on this subject. The specific problems raised by the protection of journalists on the battlefield form part of the whole body of humanitarian problems posed by armed conflict. The Geneva Conventions, and now the 1977 Protocols, are the appropriate framework for any rules on this matter. Moreover, as one delegate remarked during the discussion in Committee I, including the provision on journalists in a humanitarian law instrument should have the effect of making these Geneva Conventions and the Additional Protocols more familiar to those very journalists, since they would be more interested in consulting them.¹³ International humanitarian law can only benefit from this.

Paragraph 1 – Status of journalists

- 3257 Journalists engaged in a professional mission in an area of armed conflict are civilians in the sense of Article 50 (*Definition of civilians and of the civilian population*), paragraph 1, of Protocol I. In other words, a journalist, who is undoubtedly a civilian, does not lose this status by entering an area of armed conflict on a professional mission, even if he is accompanying the armed forces or if he takes advantage of their logistic support. Moreover, paragraph 1 of this article does not create any new law; it clarifies and reaffirms the law in force regarding persons exercising the functions of a journalist in an area of armed conflict without being an accredited correspondent in the sense of Article 4A(4) of the Third Convention.
- 3258 As became clear in the Diplomatic Conference itself, the wording of paragraph 1 is not entirely satisfactory.¹⁴ In fact, a journalist on a professional mission in an area of conflict should not merely be *considered* as a civilian, he *is* a civilian in accordance with the definition contained in Article 50 (*Definition of civilians and of the civilian population*), paragraph 1, of Protocol I. Thus this provision is merely declaratory and does not create a new status. There can be no doubt about this. The fact that Committee I refrained from modifying the wording of this paragraph which the Working Group had proposed, despite the criticisms raised during discussions, does not allow for any alternative conclusion regarding the meaning delegates intended the text to have. The Committee did not want to change the draft because it did not wish to reopen the discussion on a finely balanced text, the result of a compromise taking all the views into account.¹⁵

¹¹ *Ibid.*, pp. 311-319, CDDH/I/SR.31, paras. 1-53.

¹² Resolution 3500 (XXX) of 15 December 1975 and, by implication, Resolution 32/44 of 8 December 1977.

¹³ *O.R.* VIII, p. 313, CDDH/I/SR.31, para. 11.

¹⁴ *Ibid.*, pp. 313-314, paras. 13 and 19.

¹⁵ Statement of the Chairman of the Committee, *ibid.*, p. 319, para. 53.

- 3259** Indirectly this paragraph at the same time clarifies the status of war correspondents protected by Article 4A(4) of the Third Convention: they are civilians. In fact, Article 50 (*Definition of civilians and of the civilian population*), paragraph 1, of Protocol I, referred to in Article 79, includes the categories of persons mentioned in Article 4A(4) of the Third Convention in its definition of civilians.¹⁶
- 3260** The text does not define what is meant by a “journalist”.¹⁷ Thus the ordinary meaning of the word must be taken. Although the etymology calls to mind correspondents and reporters writing for a daily newspaper, the present use of the word covers a much wider circle of people working for the press and other media. The definition contained in draft Article 2(a) of the International Convention for the Protection of Journalists engaged in Dangerous Missions in Areas of Armed Conflict¹⁸ could serve as a guide for the interpretation of Article 79. According to that definition:
- “The word ‘journalist’ shall mean any correspondent, reporter, photographer, and their technical film, radio and television assistants who are ordinarily engaged in any of these activities as their principal occupation [...]”
- 3261** Thus the term “journalist” is understood in a broad sense.
- 3262** However, anyone who, as a member of the armed forces, has a function connected with information within the armed forces is not a journalist in the sense of Article 79.¹⁹ He shares the fate of all other members of the armed forces.
- 3263** What is meant by “dangerous professional missions in areas of armed conflict”? The meaning of the words is clear: any professional activity exercised in an area affected by hostilities is dangerous by its very nature and is thus covered by the rule. It is not necessary to give a precise geographical delimitation of such “areas of armed conflict” from either a legal or a practical point of view. In fact, journalists enjoy the rights to which they are entitled as civilians in all circumstances.
- 3264** The concept of a “professional mission” covers all activities which normally form part of the journalist’s profession in a broad sense: being on the spot, doing interviews, taking notes, taking photographs or films, sound recording etc. and transmitting them to his newspaper or agency. The military or civil authorities may subject such activities to controls in order to ensure that they comply with the rules they have laid down.
- 3265** To sum up, a journalist on a dangerous professional mission is a civilian and enjoys the protection granted civilians by the relevant provisions of international humanitarian law. This solution is preferable to the approach chosen by the United Nations draft, namely, of creating a special status for journalists. In fact, any increase in the number of persons with a special status, necessarily

¹⁶ Cf. commentary Art. 50, *supra*, p. 610.

¹⁷ As Art. 4A(4) of the Third Convention does not define the term “war correspondent”.

¹⁸ Document of the United Nations A/10147 of 1 August 1975, Annex I.

¹⁹ Nor, for that matter, within the meaning of Art. 4A(4) of the Third Convention.

accompanied by an increase of protective signs, tends to weaken the protective value of each protected status already accepted, particularly that of medical personnel. In short, the efficacy of protection and the credibility of the whole system of protection would have suffered. By avoiding this pitfall the Diplomatic Conference came to a wise solution.

Paragraph 2 – The protection granted journalists

- 3266** Paragraph 2 lays down the legal consequences of what is said in paragraph 1. As civilians, journalists enjoy the protection afforded civilians: all the provisions of the Conventions and of Protocol I relating to the protection of civilians apply to them.
- 3267** Such protection extends to two factual situations which are governed by rules of international humanitarian law. On the one hand, the journalist who is directly exposed to the dangers of the battlefield enjoys the legal protection granted by the Geneva Conventions, Protocol I and customary law, which protect the individual against the effects of hostilities. Thus, for example, the journalist on the battlefield may not be a target, since all civilians enjoy immunity from attack (Article 51 – *Protection of the civilian population*, paragraph 2). On the other hand, a journalist who falls into the power of a Party to the conflict continues to be subject to the protection of the law applicable to civilians as such, in accordance particularly with the Fourth Convention.
- 3268** Journalists engaged in dangerous professional missions may claim the protection granted by instruments of humanitarian law “provided that they take no action adversely affecting their status as civilians”. Thus it is quite clear that in case of any direct participation in hostilities they would forfeit for the duration of such participation the immunity they enjoy as civilians (Article 51 – *Protection of the civilian population*, paragraph 3). For the interpretation of this restriction on protection, see the commentary on Article 51 (*Protection of the civilian population*), paragraph 3 (*supra*, p. 618).
- 3269** In this context it should also be recalled that a journalist risks losing effective protection (even if he does not lose the *right* to protection to which civilians are entitled) if he closely follows a military unit engaged in action or if he gets too close to a military objective, since these are both legitimate objectives for attack. In the same vein, if he wears clothing which too closely resembles military uniform, he will incur risks of a similar nature. In all these cases he therefore acts at his own risk: in exposing himself to danger in this way he would forfeit protection *de facto*. On the battlefield a combatant cannot reasonably be asked to spare an individual whom he cannot identify as a journalist, i.e., as a protected person.
- 3270** In general it should not be forgotten that the appearance of a journalist on the battlefield is unlikely to have the effect of putting an end to the exchange of fire so that he can do his job. For that matter, Article 79 does not require this.
- 3271** Finally, this paragraph provides that the rules laid down in Article 79 are without prejudice to the “right of war correspondent accredited to the armed forces to the status provided for in Article 4A(4) of the Third Convention”. This makes it clear that the special régime accorded by the Third Convention to

accredited war correspondents is not affected by the new law of 1977, and that it continues to be fully in force. Thus two categories of journalists may be operating in an area of conflict: journalists accredited to the armed forces, and “freelance” journalists. If they were captured, the former would be prisoners of war, while the latter would be civilians protected under the Fourth Convention and this Protocol.

Paragraph 3 – Identity Card

- 3272** The identity card mentioned in paragraph 3 is not a constitutive element in creating the legal status of its bearer. It merely serves to “attest to his status as a journalist”. This card is a means of proving his status when this should be necessary, particularly if he is arrested or captured.
- 3273** It is not obligatory to carry an identity card. Thus failure to possess an identity card should not be prejudicial to a journalist in the power of a Party to the conflict.
- 3274** The card should be issued by the authorities either of his own State or the State of residence or the State where the press agency or organization employing him is situated. Can one deduce from this provision that the applicant has a right to obtain a card? As the status of journalist is not defined in Protocol I, States will act according to their own national rules or practices to define the relevant criteria. Therefore there is in any case some degree of discretion. Taking this margin of appreciation into account, it may be stated that the relevant States (insofar as they are Parties to Protocol I) have an obligation to issue such cards to journalists once the conditions are fulfilled.
- 3275** As the list of competent authorities that may issue such cards is exhaustive, it is clear that it is not up to a supranational organization to do so. Any fears that Article 79 might introduce a system of permits or licences, run by a supranational organization with controls, are unfounded.
- 3276** The format of the identity card is specified in Annex II of the Protocol, and paragraph 3 refers thereto.²⁰ The card and the required information is based on the model identity card provided for persons accompanying the armed forces under Article 4A(4) of the Third Convention (see Annex IV to the Third Convention).
- 3277** The identity card reproduced in Annex II is only a model on which cards to be issued by the competent authorities should be based. Thus States have some degree of latitude as regards the lay-out of their identity cards. However, there are limitations. It seems clear that a card issued by a national authority must contain, in one form or another, all the information specified in the model. Other information may be added where necessary.²¹ It also seems essential that the text

²⁰ On the subject of Annex II, see the correction made by the Swiss Federal Political Department to the original copies of the Protocols (Notification of 6 November 1978) indicating that a heading relating to the names of issuing countries should be added in Russian on the front of the identity card of journalists on dangerous missions.

²¹ Several delegates requested that it should be obligatory for the card to have the thumbprint and the religion of the bearer, but these proposals were not accepted in Committee I (*O.R.* VIII, pp. 311-319, CDDH/II/SR.31, paras. 1-53). National authorities are free to require such items.

entitled “Notice” should be shown on the front of the card. In fact, this “notice” explains in a few sentences the significance of the identity card and the rights of its bearer.²²

3278 Some delegates considered that the card should also be written in the current language of the area where the journalist is engaged on his mission.²³ However, this proposal was not pursued for purely practical reasons, i.e., lack of space on the card. The national authorities have the right to add the local language or languages to the five languages shown on the model, and it is highly desirable that they should do so. They are also free to omit one or other of the languages proposed by Annex II if there is no practical necessity for it being included.

H.P.G.

²² For the model card, see Annex II to Protocol I, *infra*, p. 1303.

²³ For the discussion in Committee I, see *O.R.* VIII, pp. 311-319, CDDH/I/SR.31, paras. 1-53.

Protocol I

Part V – Execution of the Conventions and of this Protocol

Introduction

- 3279** This Part reaffirms and develops the corresponding provisions of the Conventions, clarifying the duty to respect and to ensure respect for the Conventions and the Protocol.
- 3280** Section I (*General provisions*), closely related to Part I, which has the same title, is mainly concerned with preparatory and preventive measures. It contains one general article and some special provisions which either add to the relevant articles of the Conventions or reiterate provisions thereof for the purposes of the Protocol, as the case may be.
- 3281** Section II (*Repression of breaches of the Conventions and of this Protocol*) is basically concerned with repression of breaches. However, it also deals with prevention of breaches and with the responsibility of States. It should be noted with regard to the Commission set up in accordance with Article 90 (*International Fact-Finding Commission*) that States may at any time make an *a priori* declaration on recognition of the competence of that Commission.

B.Z.

Part V, Section I – General Provisions

Introduction

3282 This Section, which is based on the duty of Contracting Parties to respect and to ensure respect for the Conventions and the Protocol, confirms the obligation to take all measures necessary for implementing these instruments.

3283 This is supplemented by a list of particular measures for execution:

- making available legal advisers;
- dissemination of humanitarian law;
- the adoption and the reciprocal communication of translations and necessary laws and regulations.

3284 One article affirms the importance of the activities of the Red Cross and other humanitarian organizations and requires that all such organizations be granted facilities.

3285 This Section adds to the corresponding provisions of the Conventions and in some cases merely reiterates provisions thereof for the purposes of the Protocol. It is also closely related to some of the articles of Part I, also entitled *General provisions*.

B.Z.

Article 80 – Measures for execution

1. The High contracting Parties and the Parties to the conflict shall without delay take all necessary measures for the execution of their obligations under the Conventions and this Protocol.
2. The High Contracting Parties and the Parties to the conflict shall give orders and instructions to ensure observance of the Conventions and this Protocol, and shall supervise their execution.

Commentary

General remarks

- 3286** Under Article 1 (*General principles and scope of application*), paragraph 1, the Contracting Parties undertake to respect and ensure respect for the Protocol in all circumstances; that provision is based on the customary rule *pacta sunt servanda* as enshrined in the Vienna Convention on the Law on Treaties of 23 May 1969.¹
- 3287** The present article emphasizes the duty of Parties to take all necessary measures to this end and to do so without delay, i.e., at the appropriate time for each of these measures, for they do not all have to be taken at the same time. Paragraph 1 lays down the principle; paragraph 2 covers measures which have been more precisely defined.
- 3288** The concept of execution in this article should be understood at two different levels. The first level covers measures introducing all or the relevant parts of the treaty into the legal order of each Contracting Party in accordance with the rules of its constitution (which certainly in all cases prescribe the publication of such a treaty).² This is a legal measure and may, depending on the State, be carried out together with ratification or accession, or, on the other hand, separately from ratification or accession, whether this occurs simultaneously or at a later date.
- 3289** In addition, the application of some provisions requires preparatory steps such as the designation or establishment of organizations and the introduction of procedures. Finally, some treaty provisions require development or clarification to be fully and uniformly effective. These various measures may be taken either at a legislative level or by the executive in its widest sense.
- 3290** The second meaning of “execution”, which is also contained in this article, is that of its actual application. Some measures must be taken continuously, for example, dissemination;³ others are only conceivable in situations falling within the material scope of application of the Protocol, as defined in Article 1 (*General principles and scope of application*), paragraphs 3 and 4.⁴
- 3291** The reference to the Conventions first of all is a reminder of what the Parties to these instruments have already undertaken by accepting them;⁵ such a reference is also and primarily justified by the fact that the new measures to be

¹ For further details and for the text of the article concerned of the Vienna Convention, *cf.* commentary Art. 1, para. 1, *supra*, pp. 35-38. On the scope of the expression “High Contracting Parties” in the Protocol, *cf.* commentary Preamble, *supra*, p. 25.

² Respect for the constitutional order of each Contracting Party is without prejudice to the rule laid down in the first sentence of Article 27 (“Internal law and observance of treaties”) of the above-mentioned Vienna Convention: “A party may not invoke the provisions of its internal law as justification for its failure to perform a treaty.”

³ *Cf.* the explicit wording of Art. 83, para. 1, and the commentary thereon, *infra*, p. 961.

⁴ With regard to the point in time at which various groups of provisions of the Protocol will become or may become applicable, *cf.* commentary Art. 3, *supra*, pp. 66-67.

⁵ *Cf.* common Article 1 of the Conventions and, in relation to the present Article 80 and to Art. 84 of the Protocol, Arts. 45, 48/46, 49/128/145 of the Conventions.

taken will often have a supplementary function in view of the fact that the Protocol is additional to the Conventions.

- 3292** Some of the articles of the Protocol, which impose obligations at all times, refer to the “High Contracting Parties”; others, which are concerned only with Contracting Parties involved in an armed conflict, are addressed to the “Parties to the Conflict”. The two paragraphs of this article, like several other articles, refer to “the High Contracting Parties and the Parties to the conflict”, in order to emphasize the crucial importance of ensuring that they will be complied with in time of armed conflict.⁶
- 3293** Apart from the addition of the words “and the Parties to the conflict” the deletion of two passages from the draft has given the article a more general scope. Article 80 was adopted by consensus both in Committee I and in plenary.⁷

Paragraph 1

- 3294** This paragraph covers in a general way all necessary measures of a legislative, regulatory or simply practical nature – paragraph 2 covers only one specific aspect of this. Official translations of the Protocol, as well as any laws and regulations that a Party may adopt to ensure its application, shall be communicated to all Parties to the Conventions in accordance with Articles 84 (*Rules of application*) and 100 (*Notifications*), sub-paragraph (c).
- 3295** As shown by the expression “without delay”, each Party must study the matter and take the necessary measures as soon as the Protocol enters into force for it.⁸ Moreover, it is desirable that for this important task it should take advantage of the six months period between ratification or accession and entry into force; in fact, the consideration given to the Protocol prior to ratification or accession should already include a preliminary study of the necessary measures within the meaning of this article.
- 3296** Carrying out this task will require the participation of many institutions such as government authorities and other organizations outside public administration. The study and preparation of measures to be taken could usefully be entrusted to an inter-departmental committee and the National Red Cross or Red Crescent Society, for example, could be associated with it.
- 3297** The following is a non-exhaustive list of provisions which, although not necessarily fully applying to every Contracting Party, may require preparatory action to be taken upon entry into force of the Protocol:⁹

⁶ Even although this is no longer necessary in view of the wording of Article 96, para. 3, the expression “and the Parties to the conflict” was also intended to cover the authorities to which that paragraph applies; *cf.* the commentary thereon, *infra*, p. 1090. *Cf.* also *supra*, note 1, second sentence.

⁷ *Cf.* respectively *O.R.* VIII, p. 403, CDDH/I/SR.38, para. 2 (supplemented by *O.R.* IX, p. 474, CDDH/I/SR.76, para. 5); *O.R.* VI, p. 253, CDDH/SR.43, para. 93.

⁸ *Cf.* Art. 95.

⁹ This list is taken from a memorandum addressed by the ICRC to the Parties to the Protocols, entitled “Implementation of the Protocols” (*IRRC*, July-August 1980, pp. 198-204). Fuller information can be found in the commentary on the provisions cited.

- *Article 6 – Qualified persons*

The training of qualified personnel as envisaged by this article constitutes a permanent task for the Contracting Parties and National Red Cross and Red Crescent Societies.
- *Article 12 – Protection of medical units*

Paragraph 2(b): Civilian medical units must be recognized and authorized as soon as possible.

Paragraph 4: It is necessary to ensure at all times that permanent medical units are so sited that attacks against military objectives will not endanger them.
- *Article 16 – General protection of medical duties*

Only appropriate legislation will make it possible to effectively ensure the protection of medical duties.
- *Article 18 – Identification*

Measures to ensure the identification of medical personnel, units and transports should be taken as soon as possible.
- *Article 22 – Hospital ships and coastal rescue craft*

and
- *Article 23 – Other medical ships and craft*

Any rules and regulations issued in application of Chapter III of the Second Convention should be adapted and extended to the ships and craft covered by these articles of the Protocol.
- *Articles 24-31 – Protection of medical aircraft*

The method of notification and of entering into agreements relating to medical aircraft within the meaning of Article 29 must be decided upon in peacetime (see also Article 12 of Annex I). It is in the interests of medical aviation that measures for the identification of medical aircraft be taken (see Articles 5-13 of Annex I).
- *Article 33 – Missing persons*

Preparatory steps should be taken for organizing searches, registration and transmission of information.
- *Article 34 – Remains of deceased*

An organization should be set up to carry out the provisions of this article or an existing organization should be assigned this task.
- *Article 36 – New weapons*

Measures should be taken, in the study, development, acquisition or adoption of a new weapon or of a new means or method of warfare, to determine whether its employment would, in some or all circumstances, be prohibited by the Protocol or by any other rule of international law applicable to the Contracting Party concerned.
- *Article 43 – Armed forces*

The armed forces must have an internal disciplinary system ensuring compliance with the rules of international law applicable in armed conflict. The notification in paragraph 3 may be already made in peacetime.
- *Article 45 – Protection of persons who have taken part in hostilities*

A judicial procedure must be established to determine the possible prisoner-of-war status of persons who are not detained as prisoners of war and who are to be tried for offences arising out of the hostilities.

-
- *Article 56 – Protection of works and installations containing dangerous forces*
The following rules in particular are applicable at all times: to avoid locating military objectives at or in the vicinity of such works; efforts should be made to improve their protection by means of agreements between the Contracting Parties; the works should be marked with the special sign (see Article 16 of Annex I).
 - *Article 58 – Precautions against the effects of attacks*
Fixed military objectives should be constructed as far away as possible from densely populated areas and the necessary measures should be planned to protect the civilian population (the definition of the word “attack” is given in paragraph 1 of Article 49 - *Definition of attacks and scope of application*).
 - *Article 60 – Demilitarized zones*
Agreements may be concluded for establishing demilitarized zones even in time of peace.
 - *Articles 61-67 – Civil defence*
For civil defence to enjoy the guarantees provided by the Protocol it must be organized in accordance with the requirements of Articles 61-67. Attention should be paid in particular to the problem of identification.
 - *Article 74 – Reunion of dispersed families*
Care should be taken to ensure that security regulations that are to apply in time of armed conflict do not impede the reunion of dispersed families.
 - *Article 75 – Fundamental guarantees*
Guarantees for humane treatment and judicial guarantees as required by this article must be established at the national level by adequate legislation which will be applicable in time of armed conflict.
 - *Article 76 – Protection of women*
The same applies as for Article 75.
 - *Article 77 – Protection of children*
The same applies as for Article 75. In particular, all possible measures should be taken in practice to prevent children under 15 from participating directly in hostilities.
 - *Article 78 – Evacuation of children*
An organization to be entrusted with this task in time of armed conflict should be designated.
 - *Article 79 – Measures of protection for journalists*
Measures should be taken to create the identity card here described, which should be available as soon as the Protocol enters into force.
 - *Article 80 – Measures for execution*
This list indicates the measures to be taken in peacetime. In addition, orders and instructions to ensure observance of the Conventions and the Protocol should be dealt with by regulations and military manuals.
 - *Article 82 – Legal advisers in armed forces*
Legal advisers should be trained and available already in peacetime.
 - *Article 83 – Dissemination*
The dissemination of the Conventions and the Protocol is a permanent obligation. The Contracting Parties should incorporate the study of this in

programmes of military instruction and encourage the civilian population to study these instruments.

– *Article 84 – Rules of application*

Translations of the Protocol, as well as laws and regulations adopted to ensure its application, should be communicated as soon as possible.

– *Article 85 – Repression of breaches of this Protocol*

The national penal legislation must ensure that the breaches listed in this article can be repressed.

– *Article 86 – Failure to act*

National legislation must be adapted in accordance with this provision insofar as necessary.

– *Article 87 – Duty of commanders*

Already in peacetime Contracting Parties must give military commanders appropriate instructions to ensure that the measures laid down in this article are taken, particularly with regard to compliance with the Conventions and the Protocol by their subordinates.

– *Article 88 – Mutual assistance in criminal matters*

Legislation necessary to implement mutual assistance and co-operation on extradition must be passed already in peacetime.

– *Article 90 – International Fact-Finding Commission*

The declaration recognizing the competence of the Commission laid down in paragraph 2(a) and (b) may be made at any time.

– *Article 97 – Amendment*
and

– *Article 98 – Revision of Annex I*

Necessary measures should be taken to give effect to any amendment to the Protocol or its Annex I accepted by the Contracting Party concerned.

– *Annex I – Regulations concerning identification*

See the remarks made with regard to Articles 18, 24-31, 56, 61-67 and 98.

– *Annex II – Identity card for journalists on dangerous professional missions*

See the remark made with regard to Article 79.

Paragraph 2

3298 As we have seen, this concerns a more specific level of immediate and direct application of the Protocol, i.e., orders and instructions given in particular circumstances to specific addressees. In fact, permanent orders and instructions may be deemed to come under paragraph 1. The duty of Parties to supervise their execution is an obligation which would apply even without being stated explicitly and applies equally to paragraph 1, since it follows from the duty to “respect and ensure respect” which, as stated above, forms the basis of this article.

B.Z.

Protocol I

Article 81 – Activities of the Red Cross and other humanitarian organizations

1. The Parties to the conflict shall grant to the International Committee of the Red Cross all facilities within their power so as to enable it to carry out the humanitarian functions assigned to it by the Conventions and this Protocol in order to ensure protection and assistance to the victims of conflicts; the International Committee of the Red Cross may also carry out any other humanitarian activities in favour of these victims, subject to the consent of the Parties to the conflict concerned.
2. The Parties to the conflict shall grant to their respective Red Cross (Red Crescent, Red Lion and Sun) organizations the facilities necessary for carrying out their humanitarian activities in favour of the victims of the conflict, in accordance with the provisions of the Conventions and the Protocol and the fundamental principles of the Red Cross as formulated by the International Conferences of the Red Cross.
3. The High Contracting Parties and the Parties to the conflict shall facilitate in every possible way the assistance which Red Cross (Red Crescent, Red Lion and Sun) organizations and the League of Red Cross Societies extend to the victims of conflicts in accordance with the provisions of the Conventions and this Protocol and with the fundamental principles of the Red Cross as formulated by the International Conferences of the Red Cross.
4. The High Contracting Parties and the Parties to the conflict shall, as far as possible, make facilities similar to those mentioned in paragraphs 2 and 3 available to the other humanitarian organizations referred to in the Conventions and this Protocol which are duly authorized by the respective Parties to the conflict in accordance with the provisions of the Conventions and this Protocol.

Commentary**General remarks**

3299 The first reference to the different Red Cross organizations in humanitarian treaties dates back to 1929. At that time, when a Diplomatic Conference in Geneva drew up the Convention Relative to the Treatment of Prisoners of War, it primarily codified customary practices which had been established during the First World War. As far as the ICRC is concerned, there was recognition of its right to carry out its humanitarian work for the protection of prisoners of war with the consent of the belligerents concerned (Article 88) as well as the opportunity to propose to the Powers concerned the establishment of a Central Agency of Information regarding prisoners of war (Article 79).

3300 In the Convention for the Amelioration of the Condition of the Wounded and Sick in Armies in the Field, as revised in 1929, Article 10 is entirely devoted to the protection of personnel of voluntary aid societies duly recognized and authorized by their governments. That article concerns primarily the National Red Cross and Red Crescent Societies which are, *par excellence*, voluntary aid societies and recognized by their governments. However, it is concerned with their activities only in time of armed conflict. Therefore, in the Final Act the Diplomatic Conference expressed the following wish:

“The Conference, recognising the importance of the contribution demanded of National Red Cross Societies and the Voluntary Aid Societies in promoting fellowship between nations, considers it highly desirable that, as far as it may be consistent with municipal law, they should be granted all possible facilities and exemptions for their work in time of peace, particularly as regards accommodation, free passage of personnel and property, and their relief activities.”

3301 After the Second World War the Diplomatic Conference of 1949 confirmed the prerogatives entrusted to the ICRC and extended them to the four Conventions. In addition, the ICRC was granted right of access to prisoners of war and protected civilians. Finally, the Conventions mention the ICRC in a series of articles related to various tasks.

3302 The National Societies feature prominently in the First Convention (Articles 26 and 44) and the Second Convention (Article 24). In the Third Convention, Article 125 explicitly deals with relief societies assisting prisoners of war: it is clear that these are primarily National Societies. There is a similar article in the Fourth Convention (Article 142).

3303 The Fourth Convention explicitly mentions National Societies. First, in accordance with Article 30, protected persons should have every facility for making application to the National Society of the country where they may be. Finally and above all, Article 63 provides that:

“Subject to temporary and exceptional measures imposed for urgent reasons of security by the Occupying Power:

- a) Recognized National [...] Societies shall be able to pursue their activities in accordance with Red Cross Principles, as defined by the International Red Cross Conferences [...];
- b) the Occupying Power may not require any changes in the personnel or structure of these societies, which would prejudice the aforesaid activities.”

3304 Under this provision, National Societies gained some degree of international recognition. It was of great importance that they were protected against arbitrary measures an Occupying Power might take, in view of what happened in the Second World War, and since the Board of Governors of the League of Red Cross Societies met in Oxford in 1946, members of the Red Cross Movement had been concerned with these problems. The Constitution of the League now contains a provision (Article 5, paragraph 2) according to which the Assembly, or in an emergency, the Council, may take all measures necessary if an internal or external authority were to interfere with the conduct of activities carried out by a member Society in accordance with the fundamental principles of the Red Cross or if actions of that authority were prejudicial to the Society. The ICRC, either alone or together with the League, must also act to protect and re-establish the integrity of the National Societies.

3305 From the beginning of the preparatory studies for the Additional Protocols several National Societies wished to see a new provision to confirm the position of the National Societies and of the League.¹ As several governments had expressed their support for this view, the ICRC considered that it would be best for them to present their proposals to the Diplomatic Conference. Thus the draft Additional Protocol submitted by the ICRC did not contain a special provision on Red Cross organizations.

3306 The XXIInd International Conference of the Red Cross (Teheran, 1973) examined the drafts of the Additional Protocols to the Conventions and adopted Resolution XV on this special point, which states, in particular:

“[...] having examined the two draft Additional Protocols and taken note of the comments made during the debates,

requests the Diplomatic Conference to be held in Geneva in 1974, to introduce the appropriate provisions to strengthen the role and facilitate the humanitarian activities of National Societies and of their Federation, for example by adding

¹ See *CRCE 1971, Report*, pp. 57-59; *ibid.*, 1972, p. 29; *CE 1971, Report*, pp. 26 and 31; *ibid.*, 1972, Vol. I, p. 52, para. 1.109.

1. a general provision inviting the parties to a conflict to grant National Societies all the means and help required to enable them to carry out all their humanitarian activities on behalf of the victims of armed conflicts,
2. special provisions covering the personnel, services and programmes National Societies are in a position to provide in order to make sure that the objectives of the Geneva Conventions and of the Protocols are attained.”

3307 As we know, the Diplomatic Conference opened three months later, in February 1974. Many government delegations included one or more members of the National Society of the country concerned. Very soon these “Red Cross men” met with representatives of the ICRC and the League to examine the points which more particularly concerned the Red Cross. There were lengthy discussions on this article. From the beginning it was clear that such a provision should cover the whole of the Red Cross; and the ICRC, although for its part only concerned with confirming the existing rules, supported these views. Negotiations were conducted with a series of delegations to find out what governments might find acceptable.

3308 These discussions continued during the second session of the Conference in 1975 and concluded with the presentation of a text for a new article which, with some drafting modifications, became Article 81. This proposal had 32 co-sponsors from various parts of the world,² and thus the article was finally adopted by consensus almost without further discussion by Committee I in 1975, and similarly during a plenary meeting in 1977.

Paragraph 1

3309 As we saw, the ICRC considered that the Conventions already provided an adequate and quite precise basis for its main activities: Article 9/9/9/10 common to the Conventions, which recognizes the ICRC’s right of initiative; Articles 126 of the Third Convention and 143 of the Fourth Convention, which grant it access to prisoners of war and civilians deprived of their liberty; similarly the possibility of organizing a Central Information Agency in accordance with Articles 123 of the Third Convention and 140 of the Fourth Convention and the possibility for persons protected under the Fourth Convention to make application to the ICRC in accordance with Article 30 of that Convention; finally, the recognition of the special function of the ICRC with regard to providing relief to victims of war contained in Articles 125 (Third Convention) and 142 (Fourth Convention).

3310 As far as the Protocol is concerned, it mentions some new tasks of the ICRC and grants it the necessary facilities for carrying them out, such as, for example, in Article 5 (*Appointment of Protecting Powers and of their substitute*), paragraphs 3 and 4.

3311 However, the ICRC does not underestimate the importance of the general principle expressed in the first sentence of this paragraph and gratefully welcomed it. The second sentence reiterates the formula contained in Article 9/9/9/10

² O.R. III, pp. 311-312, CDDH/I/263 and Add.1.

common to the four Conventions, using slightly different words. Article VI, paragraphs 5 and 6, of the Statutes of the International Red Cross provide, with regard to the ICRC:

“5. As a neutral institution whose humanitarian work is carried out particularly in time of war, civil war, or internal strife, it endeavours at all times to ensure the protection of and assistance to military and civilian victims of such conflicts and of their direct results. [...]

6. It takes any humanitarian initiative which comes within its role as a specifically neutral and independent institution and intermediary and considers any question requiring examination by such an institution.”

3312 It should also be noted that the first paragraph of the article under consideration here is addressed to the Parties to the conflict,³ while the aforementioned proposal made by States used the expression “the High Contracting Parties”. The reasons for this change are not given in the Official Records. This in no way alters the fact that the ICRC in some cases has had to request aid or consent from States not involved in the conflict, which are therefore Contracting Parties without being Parties to the conflict; in fact, they have a legal obligation to co-operate in the application of the Protocol, since in subscribing to Article 1 of the Conventions and the Protocol, they undertook to respect them and ensure respect for them in all circumstances.⁴

3313 The first part of the sentence refers to the tasks of giving “protection and assistance to the victims of conflicts”, while the second part of the sentence refers to “any other humanitarian activities in favour of these victims”.

3314 It looks as though the first part of the sentence refers to tasks explicitly laid down in specific provisions of the Conventions and the Protocol, while the second part of the sentence covers what the ICRC might be called upon to undertake in favour of victims of war if it went beyond the text of the Conventions and the Protocol, as laid down in Article 9/9/9/10 common to the Conventions.

Paragraph 2

3315 The terminology used here is of some importance. The text mentions Red Cross or Red Crescent “organizations” rather than National Societies.⁵ This is to cover Red Cross or Red Crescent organizations acting in favour of victims of a conflict when such organizations, because of very precise conditions regarding recognition, cannot be recognized internationally as National Societies, for example, because they are sponsored by entities other than States. In fact, the first of the conditions of recognition provides that any new Society must be

³ Like para. 2, while paras. 3 and 4 refer to “the High Contracting Parties and the Parties to the conflict”.

⁴ It should be noted that other articles of the Protocol concern States not Parties to the conflict.

⁵ The Conventions refer to “National Societies” (First Convention, Article 44; Fourth Convention, Articles 30 and 63). There is no longer a Red Lion and Sun Society, as the only country to use this emblem, Iran, renounced its use in 1980.

constituted in the territory of an independent State and must be the only National Red Cross or Red Crescent Society in that State.⁶ Moreover, the ICRC, which is responsible for recognizing such Societies, adopted a line of conduct in this field under which there can be no recognition during an armed conflict if the country concerned is involved in the conflict.⁷

3316 Having said this, it is clear that in time of armed conflict the assistance of a Red Cross or Red Crescent organization may be very valuable, and this provision to some extent codifies what has happened in recent conflicts, for example, during the war in Algeria where the Algerian Red Crescent organization was established fairly rapidly and rendered important services.

3317 This provision is primarily addressed to public authorities and organizations dependent upon them; they must grant their national organization all facilities necessary for carrying out their humanitarian activities. This recommendation is by no means superfluous, for governments have in the past imposed restrictive measures on their National Societies either through fear or incomprehension. On the other hand, it is quite clear that a Society must show itself to be honest and act impartially.

3318 During the *travaux préparatoires* some National Societies would have liked to obtain greater protection against their own authorities. However, as it concerns wartime conditions, it was difficult to obtain more from governments. The changes that National Societies wanted were particularly concerned with their role in case of internal conflict. On this subject, we would refer to the commentary on Article 18 of Protocol II (*Relief societies and relief actions*). One thing is generally accepted – and this is of paramount importance – namely, the protection granted National Societies in case of occupation in Article 63 of the Fourth Convention.

3319 Humanitarian activities of National Societies in favour of victims of conflicts largely rest on the Conventions themselves: Article 26, First Convention; Article 24, Second Convention; Article 125, Third Convention, and Articles 30 and 142, Fourth Convention. As regards prisoners of war and civilian internees, National Societies are, by their very nature, relief societies which may come to their aid, irrespective whether the victims concerned are their own nationals or whether the relief is for enemy prisoners of war and civilian internees. The XVIIth International Conference of the Red Cross (Stockholm, 1948) recommended that National Societies should contribute to relief in favour of prisoners of war and civilian internees of enemy nationality, and that such relief should be afforded on the basis of the most complete impartiality.⁸ Once again, this recommendation was based on the generous attitude adopted during the Second World War by the few National Societies which had surmounted the hatred engendered by the conflict and acted in the true spirit of the Red Cross.

⁶ The various provisions of the Statutes of the International Red Cross quoted below are taken from the *International Red Cross Handbook*, 12th edition, 1983.

⁷ This line of conduct was approved by the XXIth International Conference of the Red Cross, Resolution XII.

⁸ XVIIth International Conference of the Red Cross, Resolution XXVI.

- 3320** This provision invites National Societies to act in accordance with the fundamental principles of the Red Cross as formulated by the International Conferences. Article 63 of the Fourth Convention of 1949 has almost the identical wording. That article refers to the “Red Cross principles, as defined by the International Red Cross Conferences”. In fact, in 1949 these principles had not yet been explicitly formulated. One of the conditions for recognition of new Societies, which was already in force in 1949, summarized the principles by referring to “the impartiality, the political, religious and economic independence, the universality of the Red Cross and the equality of the National Red Cross Societies”.
- 3321** Later the Red Cross Movement considered that it was necessary to define its ideals more precisely, and after careful consideration, the XXth International Conference (Vienna, 1965) proclaimed the fundamental principles on which Red Cross activities are based.⁹ It also decided that these should be solemnly read out at the opening of every International Conference, and this rule has been duly observed.¹⁰
- 3322** These principles are termed “fundamental principles” because they embody the Red Cross ideal, and also in order to distinguish them from other principles adopted by various International Conferences on specific points. The League, which in 1975 undertook a revision of its Constitution, included these principles in a preamble. It is clear that the principles must be followed by the Red Cross as a whole, and although they are not mentioned in the first paragraph of Article

⁹ The text is given below:

“Humanity

The Red Cross, born of a desire to bring assistance without discrimination to the wounded on the battlefield endeavours – in its international and national capacity – to prevent and alleviate human suffering wherever it may be found. Its purpose is to protect life and health and to ensure respect for the human being. It promotes mutual understanding, friendship, co-operation and lasting peace amongst all peoples.

Impartiality

It makes no discrimination as to nationality, race, religious beliefs, class or political opinions. It endeavours only to relieve the suffering of individuals, being guided solely by their needs, and to give priority to the most urgent cases of distress.

Neutrality

In order to continue to enjoy the confidence of all, the Red Cross may not take sides in hostilities or engage at any time in controversies of a political, racial, religious or ideological nature.

Independence

The Red Cross is independent. The National Societies, while auxiliaries in the humanitarian services of their Governments and subject to the laws of their respective countries, must always maintain their autonomy so that they may be able at all times to act in accordance with Red Cross principles.

Voluntary service

The Red Cross is a voluntary relief organization not prompted in any manner by desire for gain.

Unity

There can be only one Red Cross Society in any one country. It must be open to all. It must carry on its humanitarian work throughout its territory.

Universality

The Red Cross is a world-wide institution in which all Societies have equal status and share equal responsibilities and duties in helping each other.”

¹⁰ J. Pictet, *The Fundamental Principles of the Red Cross, Commentary*, Geneva, 1979.

81, the ICRC, the traditional guardian of the Movement's principles, has also to observe them.

3323 When this article, and in particular, paragraphs 2 and 3, was adopted by consensus by Committee I, the Israeli delegate in his explanation of vote referred to the situation of the Red Shield of David Society (Magen David Adom). He indicated that that Society had fulfilled the functions and activities of a National Red Cross Society in Israel for many years, but that for historical and religious reasons, it did not use either the red cross emblem or any other emblem accepted at that time. It could not therefore be officially given recognition by the ICRC or be admitted to the League. The delegate expressed the hope that this situation would be rectified and stated that in the interim the Red Shield of David Society would continue to fulfil the functions and obligations of a National Red Cross Society.¹¹

Paragraph 3

3324 According to the explanations given by the spokesman for the sponsors of the proposal which became the present article, this paragraph is about facilities to be granted Red Cross and Red Crescent National Societies or organizations of countries which are not Parties to the conflict. This point of view was correct, but the text may also refer to the aid which a National Society of a country at war might desire to give to the victims of the conflict in an allied country; in such a situation the friendly relations between the two allied countries would almost certainly make it unnecessary to invoke the present provision, but a situation could arise where recourse to this article would not be without purpose. The provision is addressed to all contracting Parties, including Parties to the conflict, as they can all be called upon to facilitate the assistance covered by this paragraph.

3325 National Societies often give their aid directly to the National Society of the country where the victims of a conflict to be aided are. However, there may also be cases where several National Societies wish to join efforts and want to ensure that their assistance really does go to the victims for whom it is intended. In such situations they generally address themselves in time of war to the ICRC, or sometimes to the League, which is specifically mentioned here. According to Article VII of the Statutes of the International Red Cross:

“2. The object of the League is, within the framework of the present Statutes and subject to the provisions of Article VI,¹² to encourage and facilitate at all times the humanitarian action of the National Societies and to assume the responsibilities incumbent upon it as the federation of those Societies.

3. For this purpose, the functions of the League are:

a) to act as the permanent organ of liaison, co-ordination and study between the National Red Cross Societies and to co-operate with them [...].”

¹¹ O.R. VIII, pp. 403-404, CDDH/I/SR.38, paras. 3-8.

¹² Which deals with the ICRC, see *supra*, p. 939.

3326 As the Statutes of the International Red Cross could lead to situations where both institutions could claim competence to act, the ICRC and the League concluded an Agreement in 1952 which was revised in 1969, with a view to specifying in some detail the extent of their respective powers in certain areas, particularly with regard to relief actions for the civilian population. Under the heading “Red Cross Action in the Event of a Conflict”, Article 2 of the Agreement provides:

“In countries where there is an international war, civil war, blockade or military occupation, the ICRC, in virtue of the functions of a neutral intermediary devolving on it under the Geneva Conventions and the Statutes of the International Red Cross, shall assume the general direction of the Red Cross international action.

If, in these countries, as a result of special circumstances or in the event of a natural disaster, the League is, at the request of a National Society, called upon to give assistance to the civilian population of its country, the ways and means of the intervention of the League as well as its co-operation with the ICRC and the National Societies concerned shall be defined from case to case in accordance with Articles 4 and 5 of the present Agreement.

When the intervention of a neutral intermediary is not or is no longer necessary, the ICRC shall reach agreement with the League with a view to associating it with the relief action or even handing over to it the entire responsibility.”

3327 This general provision is subject to rules on application and implementation; in 1974 it was extended by the adoption of specific rules of interpretation. Red Cross relief actions have assumed considerable proportions, and it is important that National Societies know exactly by what means they can despatch aid and how they can ensure that it arrives at its destination intact.

3328 At 31 December 1984 there were 135 National Red Cross or Red Crescent Societies. They were all members of the League.¹³

3329 As regards Red Cross or Red Crescent organizations which, for reasons given above, cannot be immediately recognized so as to become National Societies, the ICRC, like the League, maintains *de facto* relations with them and facilitates their humanitarian activities when they are in accordance with the fundamental principles. Further, it has frequently happened that organizations set up during a conflict have become duly recognized National Societies once hostilities have ceased.

¹³ In accordance with the Statutes of the International Red Cross, recognition of new Societies is pronounced by the ICRC. Their admission into the League is decided upon by the League. However, these two parallel procedures are co-ordinated.

Paragraph 4

- 3330** Once again the provision is addressed both to the Parties to the conflict and to the Contracting Parties, and this is understandable. In fact the Societies concerned here may have a national character and work in favour of their own nationals, or they may work from the outside, i.e., operating from a country not involved in the conflict in favour of nationals of one specific State or they may have a truly international vocation by working without distinction in favour of the victims of war or particular categories of such victims (for example, prisoners of war, civilian internees, invalids, members of a particular religion).
- 3331** The text reads: “facilities similar to those mentioned in paragraphs 2 and 3”. It should be noted that paragraph 2 refers to “necessary” facilities, while paragraph 3 merely talks about “facilitating” certain things. In fact the facilities concerned consist, most of all, of permits for persons and goods, transport facilities for goods and other equipment, exemptions from import taxes and customs duties etc.
- 3332** Paragraph 4 uses the term “as far as possible”, which is less strong than that contained in the first three paragraphs, i.e., “all facilities within their power”, “the facilities necessary”, “in every possible way”. It may be concluded that the provision under consideration here is less urgent.
- 3333** What is meant by the words “humanitarian organizations referred to in the Conventions and this Protocol”?
- 3334** This evidently means in the first place voluntary aid societies which, like National Red Cross or Red Crescent Societies are recognized and authorized by their governments within the meaning of the First Convention to give assistance to medical services. We know that in some countries there are, apart from National Red Cross Societies, other recognized aid societies which come to the assistance of medical services.¹⁴ The position of such societies is dealt with in Articles 26 and 27 of the First Convention and Article 24 of the Second Convention, as well as Articles 9 (*Field of application*) and 17 (*Role of the civilian population and of aid societies*) of Protocol I.
- 3335** The Third and Fourth Conventions also contain provisions on the assistance which aid societies may provide for prisoners of war and for protected persons deprived of their liberty (Article 125, Third Convention; Article 142, Fourth Convention). These articles specify that the societies concerned may be constituted in the territory of the Detaining Power or in another country, or they may have an international character. The number of societies permitted to exercise their activities may be limited by the Detaining Power, provided that effective and sufficient aid is provided for the internees. These provisions are of particular importance in occupied territories.
- 3336** Finally, Article 30 of the Fourth Convention enables protected persons to apply, not only to the Protecting Powers, the ICRC and the National Society, but in addition to any organization that might assist them.
- 3337** Aid societies should exercise their humanitarian activities in accordance with the provisions of the Conventions and of the Protocol. In fact these Conventions

¹⁴ Such as the Order of Malta and the Order of St. John of Jerusalem.

do not contain very much on the subject, but it may be concluded from the provisions as a whole that the activities of aid societies must be impartial and may not compromise military operations. Societies authorized to exercise relief activities must submit themselves to any security rules imposed upon them, and may not use their privileged situation to collect and transmit political or military information.

3338 It should be noted that this concerns organizations which are duly authorized by the Parties to the conflict. It may also be a branch of a national or international relief organization located in territory under the control of a Party to the conflict, and the branch should then be authorized to undertake or continue to perform humanitarian activities.

3339 It is appropriate that in addition to the Red Cross institutions Article 81 mentions the other organizations which can assist victims of war. In fact, in time of conflict, suffering and misery are so great that all goodwill should be encouraged and supported.

C.P./J.P.

Article 82 – Legal advisers in armed forces

The High Contracting Parties at all times, and the Parties to the conflict in time of armed conflict, shall ensure that legal advisers are available, when necessary, to advise military commanders at the appropriate level on the application of the Conventions and this Protocol and on the appropriate instruction to be given to the armed forces on this subject.

Commentary

- 3340** The establishment of an army, its training, equipment and armaments has no other object than to prepare for the eventuality of armed conflict. If this arises, military operations must be conducted in accordance with the rules set forth in international treaties to which the Parties to the conflict are Parties, and with the generally recognized principles and rules of international law which are applicable to armed conflict (Article 2 – *Definitions*, sub-paragraph (b)).
- 3341** To this end Hague Convention IV of 1907 laid down in Article 1 that “the Contracting Powers shall issue instructions to their armed land forces which

shall be in conformity with the Regulations” that they had adopted. At least until the adoption of the 1949 Conventions it was primarily through the development of military manuals for the use of armed forces that the majority of military Powers implemented the injunction of the Hague Convention to instruct their troops. However, the events of the Second World War and the prosecutions which were instituted when hostilities ceased, showed the extent to which these efforts had been inadequate. Thus in 1949 the drafters of the Geneva Conventions devoted their attention to supplementing the 1907 rule¹ with a provision relative to dissemination², which in the present Protocol is reaffirmed by Article 83 (*Dissemination*). During the 1950s a new tendency emerged in some armies to supplement the written instructions with a group of qualified lawyers who were to lend their assistance. This initiative seemed particularly justified as in many cases military manuals do not restrict themselves to reproducing the texts of the international treaties and do not actually reflect these treaties. In all areas which are not governed by peremptory or uncontested rules of international law, they bear witness to the practices recognized by the State concerned, without assessing whether these practices will be recognized internationally. Whether a custom has been established in a particular sense is a question of fact, not one of the rules adopted by a particular State.³

3342 Similarly, it must be recognized that even when limited to uncontroversial rules directly applicable by military commanders in the field, the law of armed conflict is becoming increasingly complex, detailed and extensive. Thus the Diplomatic Conference during its sessions from 1974 to 1977 added the 130 articles (not counting the Annexes) of Protocols I and II to the 429 articles (not counting the Annexes) of the Geneva Conventions of 12 August 1949 (in 1864 there had been 10 articles in all). Moreover, new texts are being adopted, for example on weapons.⁴ Military commanders can no longer be expected to master the complexity of this law or the documents relating to it, in the same way that they have to master the art of exercising command over their troops. It is evident that a division of tasks is just as necessary in this field as in other sectors of military life.

3343 The proposal to create a post of legal adviser to military commanders was made at the beginning of the preliminary discussions preceding the Diplomatic Conference.⁵ Following the suggestions presented during the two sessions of the Conference of Government Experts it was introduced in Article 71 of the draft presented by the ICRC to the Diplomatic Conference, in a much stronger form

¹ Taken itself from the Hague Convention of 29 July 1899.

² First Convention, Art. 47; Second Convention, Art. 48; Third Convention, Art. 127; Fourth Convention, Art. 144. However, it should be noted that the basic point of the Hague rule, as well as the obligation to inform the civilian population, was already contained in the 1906 Geneva Convention (Art. 26) and in the first Geneva Convention of 1929 (Art. 27).

³ See *US Field Manual, op. cit.*, p. 3, para. 1; see also *8 Law Reports*, p. 51.

⁴ See the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons which may be deemed to be Excessively Injurious or to have Indiscriminate Effects of 10 October 1980 which entered into force on 2 December 1983; on 31 December 1984, 24 States were Parties to this Conventions.

⁵ See *CRCE 1971, Report*, p. 29.

than that of the article under consideration here.⁶ During the Conference itself its usefulness was not contested. However, whether it was because of a concern that adequate personnel would not be available, or the possibility that legal advisers attached to the armed forces would be assigned supervisory functions which might affect the hierarchy which is indispensable for the proper functioning of military institutions, or whether it was simply the fear of being bound by unduly strict rules on this point, consensus was finally only achieved on a text which was considerably watered down as compared with the original proposal.⁷

3344 Nevertheless, the obligatory character of the present provision was maintained. The word “ensure” is a term sometimes used in the Conventions;⁸ it means that the Party in question must make sure that the task is executed. There is therefore no justification for thinking that the task itself might be optional.⁹ To be more precise, Article 82 creates the obligation for the Parties to the Protocol to adopt all appropriate regulations to ensure that legal advisers are available to the armed forces. The fact that the conditions for the use and allocation of these advisers are regulated in particularly flexible terms (“when necessary”, “at the appropriate level”) does not in any way alter the fact that the creation of the post of legal adviser is obligatory. However, the content of the obligation and the extent of the measures to be taken can certainly vary from one country to another, depending on the importance of the role which these legal advisers are called upon to play. Some may wish to appoint these advisers at all – or nearly all – levels of command, while others intend to appoint them only at the headquarters of large units and at military academies, and still others only envisage their participation in exceptional situations. Nevertheless, the obligation for all Parties to the Protocol to create posts for legal advisers to the armed forces applies all the same. In fact, the Protocol even goes so far as to define in broad terms the qualifications which such legal advisers must possess, since they must be capable of advising, when necessary, the military commanders concerned, on the application of the Conventions and the Protocol, and on the appropriate instruction to be given to the armed forces on this subject. There is therefore an obligation for the Parties to the Protocol to ensure that these legal advisers, who are likely to be chosen from legal experts in military law, which all armies have available, get the appropriate training.

⁶ Article 71 – Legal advisers in the armed forces: “The High Contracting Parties shall employ in their armed forces, in time of peace as in time of armed conflict, qualified legal advisers who shall advise military commanders on the application of the Conventions and the present Protocol and who shall ensure that appropriate instruction be given to the armed forces”. See also *CE 1971, Report*, p. 112, para. 579, and *CE 1972, Report*, vol. I, pp. 183-184, para. 491; p. 189, paras. 4.126-4.127; p. 191, para. 4.144; p. 122, paras. 4.153-4.155.

⁷ For the discussion in Committee I, see *O.R. VIII*, pp. 390-393, CDDH/I/SR.37, and pp. 404-405, CDDH/I/SR.38. For the amendments, see *O.R. III*, p. 314.

⁸ See, for example, First Convention, Arts. 17 and 19, para. 2; Fourth Convention, Art. 18, para. 5.

⁹ *Cf. Commentary I*, pp. 176-177.

- 3345** To summarize, the Protocol enjoins the High Contracting Parties to take certain measures to ensure respect for the Conventions and the Protocol¹⁰ and in particular, to make legal advisers available to the armed forces for the purpose of giving appropriate advice in this respect. The conditions for the use of such personnel and the choice of the methods of training them are left to the discretion of the Parties to the Protocol.
- 3346** Some of the reasons which underly this flexibility, particularly with regard to the conditions for the use of the legal advisers concerned, have already been indicated. It was necessary to avoid questioning the validity of an order from a superior whenever the legal adviser had not been consulted, and even to avoid putting into question the whole military hierarchy. It was also important to prevent the incorporation of legal advisers in the armed forces from weakening the sense of responsibility of military commanders, and from encouraging them to become totally disinterested in the rules of international law applicable in cases of armed conflict, on the pretext that this was the business of the lawyers, and not theirs. Such a result would be counter-productive. Although it is regrettable that in recent history military commanders have not always been concerned with the law of armed conflict as much as they should have been, the importance of the role which they have always played in the development and application of this law cannot be denied.¹¹ In many cases appropriate and correct conduct on the battlefield came first, to be followed by the formulation of the corresponding rule. Thus historically, the law of armed conflict was created largely in the heat of battle, and the weight and obligation of its implementation and development rests primarily on the shoulders of those who exercise military command in the field. To withdraw this fundamental responsibility – which has always been that of military commanders – from them, would undoubtedly have constituted a serious error, and the Protocol was careful to avoid this.
- 3347** On the other hand, there is little doubt that a great many military commanders will be relieved by the introduction in their own headquarters or at a higher level, of legal advisers capable of elucidating for them the increasingly complex problems of the law of armed conflict. However, they must first be available, and some countries remarked during the Diplomatic Conference that they

¹⁰ On the obligations of “conduct” or “means”, *cf.* Report of the International Law Commission on the work of its twenty-ninth session, 1977, United Nations, General Assembly, 32nd session, supplement No. 10 (A/32/10), pp. 21-37.

¹¹ By way of example we give an extract from the proclamation issued by General G.-H. Dufour, who was to be one of the founders of the Red Cross almost twenty years later, to his troops on 5 November 1847 in his capacity as commander-in-chief of the Confederate troops during the Civil War known as the “Sonderbund” war, in Switzerland: “Soldiers, you must emerge from this struggle not only victorious but also irreproachably. Future generations must be able to say of you: ‘When necessary, they fought valiantly, but they showed themselves to be humane and generous’. Therefore I place under your care children and women, old people and ministers of religion. Anyone who lays hands on a harmless person, dishonours himself and defiles his flag. Prisoners, and above all, the wounded deserve your respect and your compassion, the more so as you have often found yourselves with them in the same camps. You shall not do any unnecessary damage in the campaign” (translated by the ICRC) (see O. Reverdin, “Le Général Guillaume-Henri Dufour, précurseur d’Henri Dunant”, in *Studies and Essays in Honour of Jean Pictet*, *op. cit.*, p. 958).

did not have the means of training such specialists. It is a fact that, in the current circumstances at least, a thorough training in humanitarian law applicable in armed conflict cannot easily be obtained in the faculties of law of universities, if only because their programmes are already overloaded.¹² Apart from some countries where the armed forces already have a remarkable range of legal services at their disposal,¹³ and consequently specialized schools where these lawyers are trained not only in disciplinary and administrative subjects, but also in international law, the majority of countries do not (or do not yet) have any such facilities, and will have to create them. This task could be undertaken in conjunction with Article 6 (*Qualified persons*), which enjoins the High Contracting Parties to endeavour to train qualified personnel to facilitate in particular the application of the Conventions and the Protocol.¹⁴ There is no doubt that by means of Article 6 (*Qualified persons*), as well as by means of the present provision, the Protocol wishes to stimulate the training of competent personnel versed in the law of armed conflict. For the Parties to the Protocol this is a very real duty that rests upon them. The general opinion is that this result can be achieved by instituting a very close cooperation between lawyers (military magistrates, officer-lawyers, lawyers of competent ministries, university professors, and professors of the different military schools) and officers exercising command or responsible for the instruction of the armed forces.¹⁵ It is also considered that a good military legal adviser should have some knowledge of military problems. Undoubtedly such an effort implies that certain matters will have to be clarified, for example, in the field of interpretation, preparation or making available of appropriate documentation,¹⁶ participation in courses,

¹² In this respect see the relevant remarks made by M. Bothe, then professor at Hanover University, "Methodological and Didactic Problems Involved in the University Teaching of International Humanitarian Law, Especially in Connexion with the 1977 Geneva Protocols", *European Seminar on Humanitarian Law*, Jagellonian University, Cracow, 1979, p. 61.

¹³ To give some examples: for the United States of America, see J.J. Douglas and T.E. Workman, "The Educational Program for the Service Lawyer", 31 *Federal Bar Journal, Military Law Issue* 1, Winter 1972, p. 7; also see J.J. McGowan, "Training in the Geneva and Hague Conventions: a Dead Issue?", in XIV-1-2 *RDPM DG*, 1975, p. 51, and *infra ad* Art. 87, note 20. In the Soviet armed forces, legal advisers have been reported to exist down to the level of a small unit, with the triple task of instructing, advising and supervising in all the fields related to the application of the law of armed conflicts. Facts relating to the Federal Republic of Germany concerning legal advisers for large units and professors of law attached to military academies can be found in K. Bayer, "L'administration de la justice militaire dans la Bundeswehr", XVII-4 *RDPM DG*, 1978, p. 584; see also D. Fleck, "The Employment of Legal Advisers and Teachers of Law in the Armed Forces", *IRRC*, April 1973, p. 173, and K.J. Partsch, "Rechtsberater in den Streitkräften – Ein neuer juristischer Beruf?", in *Studies and Essays in Honour of Jean Pictet*, *op. cit.*, p. 193. See also P. Verri, "Institutions militaires: le problème de l'enseignement du droit des conflits armés et de l'adaptation des règlements à ses prescriptions humanitaires", *ibid.*, p. 603.

¹⁴ For the commentary on Art. 6, see *supra*, p. 92.

¹⁵ Cf. "Seminar on the Teaching of Humanitarian Law to the Armed Forces" (San Remo, 6-18 November 1972), *IRRC*, January 1973, p. 42 and particularly p. 51.

¹⁶ It should be noted in this respect that in some armies all provisions of international law applicable in case of armed conflict have been stored in the memory of a computer. A staff which has a terminal can thus instantly find all legal provisions applicable to a given problem (cf. J.J. Douglas and T.E. Workman, *op. cit.*, p. 21).

seminars, symposia and various exercises,¹⁷ but there is nothing there outside the scope of military organization.

- 3348** An apparently essential prerequisite for the implementation of Article 82 is the creation at every ministry of defence of a division or section, service or office, exclusively devoted to international law applicable in armed conflict. Such a service should be available to armed forces at all times, whether in peacetime or in time of armed conflict. Its first task would be to assemble a complete documentation of applicable texts (with appropriate translations) to develop, under the authority of the ministry on which it is dependent, an appropriate consultation system which would meet the necessary requirements, and finally it should attend to the recruitment and training of candidates.
- 3349** The *consultation system* may vary, in particular according to the functions attributed to the legal advisers. Legal advice in the strict sense of the word is difficult to imagine in subordinate units. It is hardly compatible with the rapid decisions and action required at these levels if the units in question are to carry out such tasks as would normally be assigned them. On the other hand, it seems beyond doubt that the legal adviser could provide considerable and effective assistance for these units in the *instruction* of troops and commanding officers in closest contact with them, or even in the supervision of such instruction. For this purpose it would not seem unreasonable to envisage, if need be by delegating legal advisers attached to the division, the presence of such advisers up to a level relatively close to the fighting soldiers themselves, for example, at regimental level. In many cases the respect for the law of armed conflict depends ultimately on the conduct of the combatant himself, and on him alone. His direct superiors, already burdened with increasingly heavy duties, would perhaps be glad to be able to count on valuable assistance in this field.
- 3350** As regards *legal consultation in the proper sense of the word*, this could bear on the preparation and development of plans, the choice of means, the determination of objectives, and the measures taken to achieve them. It is principally at the top command level – which could be assisted by a real consultative group on the subject of international law – and in large units, that legal advisers will be called upon to give legal advice which may influence the decisions of headquarters staff and commanders.
- 3351** Consequently the consultation system created under Article 82 could take into account this double requirement: the introduction of legal advisers at levels relatively close to the troops, on the one hand, for the essential purpose of participating in their instruction, and on the other hand, in large units and at the top command level for the purpose of consultation in the true sense of the word, for the benefit of commanders and their headquarters staff.
- 3352** As regards the *recruitment* of the personnel called upon to exercise the function of legal adviser in the armed forces, it seems there is a choice between two solutions. First, it is possible to opt for qualified lawyers, who would specialize, if necessary, in the law of armed conflicts. However, such lawyers would lack the essential military knowledge which they would still have to acquire. Another

¹⁷ See, by way of example, “Premier cours international sur le droit de la guerre pour officiers” (International Institute of Humanitarian Law, San Remo), XVI-1 *RDPMDG*, 1977.

solution therefore would be to use military officers and initiate them in the law of armed conflicts.

3353 Whichever solution is preferred, it is important that the legal adviser devotes himself to his mission full time.

3354 A schematic outline of these various possibilities leads us to examine from three different angles the problem posed by the introduction of legal advisers in the armed forces: role, position in the armed forces and selection.

A. Role

1. In peacetime

3355 The legal adviser is essentially called upon to cooperate in the *instruction* of international law applicable in case of armed conflict:

- instruction in military academies;
- instruction of the headquarters staff of the unit to which he is attached;
- instruction of officers of units at lower levels;
- instruction of the troops, particularly in the context of operational exercises.

2. In time of armed conflict

3356 The role of the legal adviser is a preventive one. It is concerned with the application and the respect for the rules of the law of armed conflict. For this reason the legal adviser may be called upon in particular:

- a) to give his *opinion*, even *proprio motu*, on the planned military operations or on operations already being executed;
- b) to provide *expertise* on particular problems (for example, the choice of arms);
- c) to ensure the *functioning* of the procedure of legal consultation, particularly with subordinate levels;
- d) to remind commanders of their *obligations* under the terms of Article 87 of the Protocol (*Duty of commanders*).

3357 Moreover, he may be called upon in particular:

- a) to cooperate in the *training* of assistant legal advisers who may be attached to subordinate units;
- b) to actively participate in the *preparation* of large-scale exercises, the development of plans for wartime operations, to give his evaluation of the legal consequences of their execution, particularly with respect to the methods planned and the means to be used;
- c) to encourage the use of legal *consultation* procedures and to assess their operation;
- d) to supervise the *organization* of instruction in subordinate units, and to assess the extent of the knowledge acquired;
- e) to ensure that the knowledge acquired is kept up permanently and that *instruction* on the subject of the law of armed conflicts is continually maintained.

B. Position in the armed forces (attribution, size, subordination)

3358 For the purpose of this analysis it may be assumed that, by and large, the structure is similar in all armed forces.

1. Level of attribution

3359 In general, it is considered that permanent postings for legal advisers should be limited to the following levels:

- the highest command of the army and its headquarters staff;
- commanders of lower units and headquarters, down to division level or the level of the independent brigade (both inclusive), for the land, sea and air forces;
- commanders of other units intended to operate separately from the rest of the army;
- area commanders (including those in occupied territories) and commanders of military bases and areas.

2. Size

3360 Particularly in consideration of the tasks of instruction which may fall upon legal advisers, it would seem desirable to create in large units a small legal staff group composed of several officers, rather than being limited to a single expert.

3. Subordination

3361 There seem to be two systems:

a) Double subordination

The legal adviser is subordinate both to the commanding officer or to the chief-of-staff concerned, and to the legal service of the ministry of defence. This system simultaneously ensures the independence of the legal adviser (who thus has direct access to the ministry of defence), control over his activities by his professional superior, and some control of the matter by commanding officers. By granting the legal adviser a special status, distinct from that of the officers of the staff to which the adviser is attached, this system could have a negative effect on the atmosphere of trust which is essential for productive collaboration.

b) Single subordination

While receiving general instructions from the service on which he depends, the legal adviser is subordinate only to the commanding officer or to the chief-of-staff of the unit to which he has been assigned. Taking into account his rank, if he is a soldier, his position would be exactly the same as that of the other officers of this unit or staff, but his professional superior would not have direct control over his activities.

3362 As regards the rules on the chain of command subordination, whether there is double or single subordination, it may lay down either direct access to the commanding officer or the usual channels via the headquarters.

C. Selection

3363 The selection of legal advisers for the armed forces raises the question whether a civilian or a soldier should be appointed to this post. There are advantages and disadvantages to both alternatives.

1. Legal advisers are selected from military personnel

3364 There are two possibilities:

a) From combatant military personnel

The choice can be either made from military personnel in active combat service, provided that they are exclusively assigned to their mission of legal adviser, or from reserve officers, or retired officers.

Advantages:

- an understanding of the military environment, its psychology, organization and problems;
- military training, enabling the person concerned to evaluate situations from a tactical or strategic, as well as from a technical point of view;
- an aptitude for making himself understood, for understanding and for creating the essential atmosphere of trust.

Disadvantage:

- difficulty in acquiring the essential legal expertise, particularly at the highest levels.

b) From the personnel of the military judiciary

Advantages:

- thorough legal training, especially in military law;
- authority is automatically conferred by virtue of membership of the military judiciary;

Disadvantages:

- this personnel is already overloaded with tasks of an administrative, disciplinary and penal nature;
- they are not very familiar with the law of armed conflicts.

2. Legal advisers chosen from the civilian population

3365 With few exceptions, it is difficult to imagine finding specialists in international law, unless the choice is made from university professors, who by definition are civilians. At the highest levels of command in the army the presence of such experts may be necessary in any case. If they are called upon to advise on fundamental options which will have repercussions at lower levels, it is essential

that they have an uncontested authority in their professional field. Supported by aides who are drawn from the ranks of military officers, they should be capable of giving well-founded, balanced and authoritative opinions. However, this solution cannot always be adopted at all levels where the presence of legal advisers is necessary, for the simple reason that there are never very many of these experts. Moreover, what was said above regarding legal advisers chosen from military personnel, applies *a contrario* to civilian legal advisers:

Advantage:

lawyers already specialized in the law of armed conflicts.

Disadvantages:

- a lack of knowledge of military matters;
- problems with making themselves understood in the military environment;
- relatively low level of credibility and trust, which is unpropitious for the instruction of combatant forces.

3366 Once he has been trained and assigned to a unit or staff, the legal adviser should be available at all times, i.e., in time of peace as well as in time of armed conflict. For national liberation movements the obligation is limited to the period of armed conflict (“the Parties to the conflict in time of armed conflict”).

3367 *In conclusion* we emphasize that the legal adviser should be equally well informed regarding the development of operational plans and their execution,¹⁸ as regarding programmes of instruction, and if necessary, should be able to suggest alternatives to the proposed decisions. In no case should the legal adviser become the commander’s accomplice by giving a semblance of legality to orders which in fact infringe the law of armed conflict.¹⁹ No doubt he is expected to confer some degree of legal security to the military commanders concerned, but this is by complying with the rules, both with their letter and with their spirit. He could also make up for the failure of custom to fulfil its traditional role, when there is not enough time for customs to become established because events move too quickly, or when custom is not confirmed by practice. However, for this it is necessary that legal advisers of the different Parties to the Protocol have concordant opinions on most points, even on controversial questions. This goal should be relatively easy to achieve in the context of an alliance, which would not in the least reduce the value of the attempt. However the problem becomes crucial with regard to a potential adversary. A commander who considers that he has complied with the law of armed conflict and falls into the hands of an adverse Party whose ideas are diametrically opposed to those of the legal adviser whose advice he followed, may find himself being accused of a war crime. Lawyers should be enticed by such eventualities to continue the quest for harmonization which was accomplished throughout the Diplomatic Conference, at an inter-

¹⁸ On this point, see the remarks of G.I.A.D. Draper in “The Role of Legal Advisers in the Armed Forces”, *IRRC*, January-February 1978, pp. 6-17.

¹⁹ On the subject of the relationship between the legal services and the command structure, and on their implications during the trials following the Second World War, see R.J. Fontenot, “Development of the Staff Legal Officer’s Responsibility under the Law of War”, XIV-1-2 *RDPM DG*, 1975, pp. 67-110.

national level and with the support of their governments. If the opportunity arises, negotiations should take place to bring about interpretative agreements on particularly controversial points. This could be done in time of peace or during the armed conflict itself, pursuant to Article 7 of the Protocol (*Meetings*) or Article 6/6/6/7 common to the Conventions.

J. de P.

Article 83 – Dissemination

1. The High Contracting Parties undertake, in time of peace as in time of armed conflict, to disseminate the Conventions and this Protocol as widely as possible in their respective countries and, in particular, to include the study thereof in their programmes of military instruction and to encourage the study thereof by the civilian population, so that those instruments may become known to the armed forces and to the civilian population.
2. Any military or civilian authorities who, in time of armed conflict, assume responsibilities in respect of the application of the Conventions and this Protocol shall be fully acquainted with the text thereof.

Commentary

- 3368** In UNESCO's Constitution it is said that: "Since wars begin in the minds of men, it is in the minds of men that the defences of peace must be constructed". Having regard to that pronouncement, our time calls for an unprecedented effort in the field of education and instruction. Education should "promote understanding, tolerance and friendship among all nations",¹ particularly as scientific discoveries and technological advances created immense possibilities but also entail grave dangers.² Thus, this effort should be generally aimed at a harmonious balance between technical progress and the intellectual and moral advancement of mankind.³ The rules of the Conventions were never forgotten in such pleas for information and the training of minds,⁴ and the Red Cross is asked to pass on its message of humanity, impartiality and neutrality.⁵ Centred on armed conflicts where technical progress has uncovered hitherto unknown dangers, the Conventions are a reminder to everyone that the adversary too, is a human being, since persons *hors de combat* must be treated humanely. Beyond war, engines of death and blind destruction, anonymous forces confronting each other, or preparing to confront each other, there are men, women and children who all have the same dignity, are prey to the same torments and show the same courage. Such is the message of the Conventions, and, today, of the Protocol additional to the Conventions, which appeals to the heart and to the mind, and of which the dissemination "will contribute to the promotion of humanitarian ideals and a spirit of peace among nations".⁶
- 3369** This is why the International Conferences of the Red Cross⁷ have not ceased to attract the attention of the Parties to the Conventions, regarding the necessity of the immediate application of provisions relating to the dissemination of the rules they contain (First Convention, Article 47; Second Convention, Article 48; Third Convention, Article 127; Fourth Convention, Article 144). Essentially Article 83 of the Protocol is a reaffirmation of this. A number of resolutions of the United Nations General Assembly also urge all Member States of the

⁵ Resolution of the United Nations General Assembly of 19 November 1946, drawing the attention of the Member States to the particular importance of enabling the National Red Cross and Red Crescent Societies to exercise their activity in accordance with the principles of the Geneva and Hague Conventions and in the humanitarian spirit of the Red Cross and the Red Crescent.

⁶ Resolution 21, annexed to Protocol 1, "Dissemination of knowledge of international humanitarian law applicable in armed conflicts".

⁷ See Centenary Congress, 1963, Resolution IV; XXth International Conference of the Red Cross, 1965, Resolution XXI; XXIst International Conference of the Red Cross, 1969, Resolution IX; XXIInd International Conference of the Red Cross, 1973, Resolution XII; XXIIIrd International Conference of the Red Cross, 1977, Resolution VII; XXIVth International Conference of the Red Cross, 1981, Resolution X.

Organization to instruct their armed forces and the civilian population in the treaty rules applicable in the case of armed conflict,⁸ and to take effective measures⁹ to this end. The Secretary-General of the Organization was invited a number of times to encourage the study and instruction of the relevant principles by the means at his disposal.¹⁰

3370 From the beginning of the preparatory discussions to the Diplomatic Conference, it was the unanimous view of the experts that the dissemination of the treaty rules was of primary importance, and that education was a better guarantee of respect for these rules than any sanction could ever be.¹¹ The ICRC entirely shared this view.¹² Numerous suggestions of a practical nature were presented, both during the first and second sessions of the Conference of Government Experts. We will return to these below. Despite this unanimity, it was not without some hesitation, as we will see below, that Committee I approved the draft presented by the ICRC, on the basis of the deliberations of the Conference of Government Experts.¹³ At a plenary meeting following a narrow vote¹⁴ paragraph 3¹⁵ of Committee I's proposal was removed, while paragraphs 1 and 2, which comprise the present Article 83, were approved by consensus.¹⁶ Finally the Conference adopted Resolution 21, annexed to the Protocols, which is also devoted to dissemination.

Paragraph 1 – Dissemination amongst members of the armed forces and the civilian population

3371 The founding of the Red Cross and the adoption of the first Convention in 1864 signify the consecration of a principle in the law of nations by which it is as a human being – and not only as a citizen of a particular State – that the individual is protected. In this sense, as well as from a strictly legal point of view, a true humanitarian law was created at that time. Admittedly this was only done in anticipation of armed conflicts, because the integrity and dignity of human beings are most seriously threatened in these situations.

3372 From the time that this body of law was established for the benefit of mankind, it seemed essential that people and not merely administrations were familiar with

⁸ See Res. 2852, "Respect for Human Rights in armed conflict", paras. 6-7 (XXVI, 1971); Res. 3032, para. 3 (XXVII, 1972); Res. 3102, paras. 5-6 (XXVIII, 1973); Res. 3500, para. 2 (XXX, 1975); res. 31/19, para. 2 (1976).

⁹ Res. 32/44, para. 7 (1977).

¹⁰ Cf. *supra*, note 8.

¹¹ *CE 1971, Report*, p. 111, para. 578.

¹² *CE 1972, Report*, vol. I, p. 192, para. 4.149.

¹³ See *CE 1972, Report*, vol I, pp. 192-193, paras. 4.158-4.159, and *O.R. VIII*, pp. 393-398, CDDH/I/SR.37; pp. 405-408, CDDH/I/SR.38.

¹⁴ See *O.R. VI*, pp. 257-260, CDDH/SR.43.

¹⁵ This paragraph (Art. 72) read as follows: "3. The High Contracting Parties shall report to the depositary of the Conventions and to the International Committee of the Red Cross at intervals of four years on the measures they have taken in accordance with their obligations under this article."

¹⁶ *O.R. VI*, p. 260, para. 122; for the explanations of vote, see also *ibid.*, pp. 271 and 274-275.

it. This is the general purport of the obligation laid down in paragraph 1 of Article 83 in which the High Contracting Parties undertake, in time of peace and in time of armed conflict, to disseminate the Conventions and this Protocol as widely as possible in their respective countries in such a way that these instruments may become known to the armed forces and to the civilian population. It should be noted, *in passing*, that the English version uses a more imaginative wording than the French version, as it uses the word “disseminate”, which evokes the idea of sowing seeds, and not only the role of spreading information evoked by the French “diffusion”.

“*Convinced* that a sound knowledge of international humanitarian law is an essential factor for its effective application,

Confident that widespread knowledge of that law will contribute to the promotion of humanitarian ideals and a spirit of peace among nations [...]” (Resolution 21, preamble),

the Conference confirms in Article 83 the obligation already contained in the Conventions by which the High Contracting Parties must undertake such dissemination, both in time of peace and in time of armed conflict.¹⁷ This is to say that it extends to all Parties to the Protocol from the moment of ratification or accession, and is not limited to Parties to the conflict nor is the obligation applicable only when there is a conflict. Taking into account the means available, some latitude has still been left to the High Contracting Parties, as revealed by the words “as widely as possible”. In fact some delegations were anxious that these words might lead to confusion between the propagation of rules applicable in case of armed conflict and attempts to justify war.¹⁸ Let us hope that these causes of concern were sufficiently answered at the beginning of the commentary on this article. In addition, Resolution 21 mentioned above, not only does not subscribe to these objections, but actually outlines in broad terms a programme of effective dissemination intended for signatory States, to be undertaken, when necessary, with the help and advice of the ICRC. National Societies are also invited to offer their services.

3373 It should be remembered that a number of other articles of the Protocol also relate directly or indirectly to the dissemination of treaty rules. This applies to Article 6 (*Qualified persons*) which is concerned with the training of qualified personnel. Resolution 21, devoted to dissemination, refers explicitly to this article (paragraph 2 (b)). Article 82 (*Legal advisers in armed forces*) is also concerned with the dissemination of these rules, as is Article 87 (*Duty of commanders*), paragraph 2, which makes this the duty of military commanders.¹⁹ Finally, Article 84 (*Rules of application*) provides, in particular, that the High Contracting Parties are to communicate to one another, as soon as possible, the laws and regulations

¹⁷ This is not the only obligation imposed by the Protocol in time of peace. The same applies for Articles 6, 36, 80, 82, and 84. See also commentary Art. 3, *supra*, p. 65.

¹⁸ See *O.R.* VIII, pp. 394 and 398, CDDH/I/SR.37, paras. 59 and 86.

¹⁹ It should be remembered that Art. 41, para. 1, of the Third Convention and Art. 99, para. 2, of the Fourth Convention require that the text of the Convention shall be posted in a language the prisoners and internees will understand, at places where all may read them, or shall be supplied to any interested persons.

which they may adopt to ensure the application of the Protocol, including those in the field of dissemination. However, the third paragraph of the article proposed by the ICRC,²⁰ which explicitly laid down that the Parties to the Protocol had to report to the depositary of the Conventions and to the ICRC at intervals of four years on the measures taken with regard to dissemination,²¹ had provoked problems in the Committee. It was not accepted in plenary,²² and is therefore not included in the final text. Communication of, for example, military manuals is one of the measures often recommended in this field, and considered appropriate for encouraging a better dissemination of the treaty rules in the armed forces.²³

3374 In fact, the present provision does not merely lay down a general obligation to disseminate the Conventions and the Protocol. It describes this obligation in detail, as did the corresponding provisions in the Conventions, by giving as examples programmes of military instruction and study by the civilian population.

1. *Programmes of military instruction*

3375 The text is clear: the High Contracting Parties are obliged to include the study of the Conventions and the Protocol in programmes of military instruction. We will not dwell at length here on all the technical aspects of such instruction; setting up the programme for this will probably require decisions at a ministerial level. In any case, the dissemination of such instruction is only conceivable if qualified personnel and adequate material are available. The representatively-attended Seminar held at San Remo in November 1972²⁴ laid down some unofficial “guidelines” in this respect, as well as a “programme of instruction in humanitarian law for the armed forces”,²⁵ from which the Parties to the Protocol could certainly gain inspiration in many respects, even though it was established

²⁰ See *supra*, note 13.

²¹ This proposal was based on Resolution XXI of the XXth International Conference of the Red Cross, which had expressed the desire that governments and National Societies should periodically report to the ICRC on the measures taken in the field of the dissemination of the Conventions. Although there were not many of these reports, some nevertheless constituted extremely detailed contributions of great interest. They were communicated, with the agreement of the governments concerned, to the participants of the XXIst and XXIInd International Conferences of the Red Cross.

²² See *supra*, p. 961 and note 15. However, see: XXIVth International Conference of the Red Cross, *Dissemination of knowledge and teaching of International Humanitarian Law and of the Principles and Ideals of the Red Cross, Answers from Governments and National Societies to the ICRC Questionnaire*, Geneva, 1981, 246 pages.

²³ On the occasion of the Seminar on the instruction of humanitarian law in military institutions, held in San Remo from 6-18 November 1972, the International Institute of Humanitarian Law in San Remo published an “Annexe documentaire”, which to some extent answered this concern. It contains extracts from the military instruction manual of the Federal Republic of Germany, the United States Field Manual, the French Regulations on general discipline in the armies, the British Manual of Military Law, the Italian “Law of War” and the Swiss Manual on the Laws and Customs of War.

²⁴ See *supra*, note 23.

²⁵ See *IRRC*, January 1973, pp. 47-51.

before the finalization of the Protocol. International courses on the law of war for officers have been organized since 1976, with the collaboration of the ICRC at the same Institute of San Remo.²⁶ Numerous publications²⁷ and excellent instruction materials are already at disposal at an international level, and the ICRC is available, to the extent of its means, to competent authorities to help them develop and put into practice programmes of instruction adapted to national conditions in accordance with the wish expressed in the above-mentioned Resolution 21 (paragraph 2 (a)).²⁸ However, these efforts, which, it is to be hoped, will continue to increase, can never be a substitute for those of governments.

3376 All armies have manuals for military instructors' training courses, which are based on tried and tested principles of "the art of command" or those of military pedagogy. There is no reason why the instruction of international humanitarian law applicable in the case of armed conflict should not be dealt with by the same methods, which have been proven and, consequently, why it should not be directly incorporated in the military instruction as such in exactly the same way as the preparation for combat. Supplementary techniques are always useful: lectures, films, slides, audio-visual methods, war games including questions and answers etc., though for future combatants nothing can ever replace exercises in the field, as shown particularly by the military manoeuvres which take place periodically in all countries. An "assault course", an exercise of attack or defense, can no longer be conceived without the obligation of resolving the problems arising with regard to the law of armed conflict: the presence of the emblem of the red cross or the red crescent and other protective signs, the capture, interrogation and evacuation of prisoners of war, an exchange of the wounded, the burial of the dead, the protection of civilians and civilian objects, the spoils of war etc. Both for soldiers, and for officers of lower or higher ranks, the law of armed conflicts forms one of the elements of decisions which must in general be taken in the field. It is certainly always their mission which dictates their conduct in the first place, but the aim to bear in mind is that in the execution of this mission the law of armed conflicts must never be ignored. In general there is no lack of motivation outside treaty obligations for such behaviour, and the troops will understand these very well when trouble is taken to explain them: effectiveness, which means that all efforts should be concentrated on military objectives; moderation, which allows an adversary wishing to cease combat an opportunity to do so and does not drive him to despair; and finally, discipline, which means that orders are executed without invoking pretexts to try and shirk

²⁶ *Ibid.*, January-February 1978, pp. 18-43 (also available as an off-print, "The Law of War and the Armed Forces", from the Henry Dunant Institute); also see the Annual Reports on ICRC activities 1980, pp. 70-71; 1981, pp. 67-68; 1982, p. 91; 1983, pp. 100-101; 1984, pp. 87-89, and Resolution XI of the XXIVth International Conference of the Red Cross.

²⁷ See *Bibliography of International Humanitarian Law Applicable in Armed Conflicts*, ICRC and Henry Dunant Institute, Geneva, 1980, pp. 285-298.

²⁸ Such measures are included in the Red Cross programme of action, which will be dealt with below, in connection with the study of international humanitarian law by the civilian population. Seminars and courses are provided for members of the armed forces with the collaboration of the ICRC, the International Institute of Humanitarian Law and the Henry Dunant Institute.

them, even if this concerns the conduct or alleged conduct of the adversary. These essential elements of military life and of the battlefield, where the greatest pressure on the psychological resistance of soldiers and their superiors is felt, should form an integral part of the dissemination of treaty rules. Indeed, they are the origin of the law of armed conflict.

2. Study by the civilian population

3377 In the articles devoted to dissemination, the Conventions include “the study thereof in their programmes of military and, if possible, civil instruction”. The ICRC was concerned to reinforce this obligation, and following the opinion of the experts on this point, removed the words “if possible” from the draft of Article 72, which was submitted on this point to the Diplomatic Conference. However, the arguments which had been raised in 1949 for the more modest wording were put forward again. A straightforward international obligation to provide instruction for the civilian population creates technical difficulties for federal States in which responsibility for civilian education falls on regional, provincial or other authorities and not on central government.²⁹ Moreover, some delegations did not see how the government of their country could provide such instruction to the entire population anyway.³⁰ As a result of these remarks, the text was therefore revised so that it only obliges the High Contracting Parties to “encourage” the study of the Conventions and the Protocol by the civilian population. This formula is not unknown in domestic law. The authorities of the central government sometimes adopt “incentive legislation” with a view to facilitating activities in various fields which, from the constitutional point of view, fall under the responsibility of provincial and local authorities. The formula therefore implies that the High Contracting Parties should at least take measures conducive to the study of the Conventions and the Protocol by the civilian population, even if this might require special legislation. Resolution 21 annexed to the Protocol makes a number of suggestions in this respect:

- a) encouraging the authorities concerned to plan and give effect, if necessary with the assistance and advice of the ICRC, to arrangements to teach international humanitarian law in a manner suited to international circumstances (paragraph 2 (a));
- b) undertaking the training of suitable persons (sub-paragraph (b));
- c) recommending that the appropriate authorities intensify the teaching of international humanitarian law in universities (faculties of law, political science, medicine etc.)(sub-paragraph (c));
- d) recommending to educational authorities the introduction of courses on the principles of international humanitarian law in secondary and similar schools (sub-paragraph (d)).

²⁹ See *O.R.* VIII, pp. 393-398, CDDH/I/SR.37.

³⁰ *Ibid.*, p. 396, para. 68.

- 3378** These suggestions imply that practical measures, which fall within the competence of the central authority, are effectively taken: the texts must be available in the national language or languages,³¹ appropriate support in the form of materials or personnel should be given to the institutions called upon to provide this instruction in the same way as for any other programme considered to be in the general interest, and coordination measures which, by definition, are solely within the competence of the central authority, must be taken. In this respect, the above-mentioned Resolution 21 also urges National Societies to offer their services to the authorities concerned and invites the ICRC to participate actively in this effort by publishing material that will assist in teaching this subject, and circulating any appropriate information in this respect, and by organizing, on its own initiative, or when requested by governments or National Societies, seminars and courses (paragraphs 3 and 4).
- 3379** Moreover, it should not be forgotten that the activity of the Red Cross in the field of the dissemination of international humanitarian law is laid down in the Statutes of the International Red Cross, of the ICRC, of the League of Red Cross and Red Crescent Societies, and of many National Societies. As stated above, this has been the subject of several resolutions during the International Conferences of the Red Cross.³²
- 3380** Programmes of action were set up by the ICRC and the League in the field of the dissemination of international humanitarian law, based on the provisions of the treaties and constitutional documents referred to, and on Resolution 21 of the Diplomatic Conference.³³ The specific object of these programmes is:
- a) to encourage States to accede to the Protocols;
 - b) to analyse the legal and practical consequences of the provisions of the Protocols;
 - c) to disseminate and encourage the dissemination of international humanitarian law.
- 3381** Finally, it is appropriate to keep in mind that not all States have a federal structure and many grant only a relative degree of autonomy to the educational institutions in their territory. Thus, fairly frequently it is only by means of decisions taken at a ministerial level – whether it is a matter for the central or for a provincial government – that the dissemination of international humanitarian law amongst the civilian population can be realistically ensured. In fact, it would be desirable to set up permanent inter-departmental committees³⁴ in each country to examine and establish the appropriate means for ensuring the

³¹ See, in particular, para. 2 of Art. 83.

³² In these activities the ICRC and the League also procure the assistance of the Henry Dunant Institute and extend their cooperation to specialized institutions, in particular, apart from the International Institute of Humanitarian Law in San Remo, the International Institute of Human Rights (Strasbourg), UNESCO, the Commission médico-juridique de Monaco, etc.

³³ There is a complete account of the activities carried out in this field by the ICRC and by the League during the years following the end of the Diplomatic Conference, in the reports on ICRC activities (see also Resolution X of the XXIVth International Conference of the Red Cross), as well as in the *IRRC*, November-December 1983, pp. 338-359.

³⁴ See also *supra*, p. 931, *ad* Art. 80.

systematic dissemination of international humanitarian law amongst the civilian population, if possible with the support of expert organizations, and in this way to promote the spirit of humanity and consequently a spirit of peace.

Paragraph 2 – Dissemination of the text in times of armed conflict

3382 The Conventions and the Protocol are to be applied in times of armed conflict, and a general training in international humanitarian law, no matter how good this is, is not sufficient then for the civilian or military authorities responsible. In fact, the corresponding provisions of the Third and Fourth Conventions provide that the authorities which would assume responsibility for the application of these Conventions in times of armed conflict, must possess the text.³⁵ This provision is repeated in paragraph 2 of Article 83 with a slightly different wording (“shall be fully acquainted with the text” (of the Conventions and the Protocol)), but it is extended to all military or civilian authorities exercising responsibilities in respect of one or other of the four Conventions (not only the Third and Fourth Conventions) and the Protocol. Thus it applies to all the armed land, sea and air forces, as well as to all the administration on which they depend.³⁶ However, this does not mean that every military commander or representative of the ministry of defence must have a full and detailed knowledge of the text of the 559 articles (not counting the Annexes) of the Conventions and the Protocol. It is sufficient that they have a knowledge of the text of the articles which are concerned with their area of responsibility, and the same applies for any representative of the civilian authorities. However, this obligation should not be interpreted too narrowly as the ordinary meaning given to the terms of a treaty should be understood in the context in which these terms are used, and in the light of the object and purpose of the treaty.³⁷ A general knowledge of the Conventions and the Protocol is therefore always essential, while the depth and breadth of knowledge may vary, depending on the nature and extent of the responsibilities of the person concerned.

3383 Apart from the ministry of defence, paragraph 2 may apply to many other government departments: the ministry of foreign affairs, which is the point of contact for the personnel of the Protecting Power; the ministry of public health, on which the health services depend; the ministry of the interior, which is generally responsible for civil defence and the police; the ministry of transport, on which the execution of relief actions may depend etc.

³⁵ Third Convention, Art. 127, para. 2, and Fourth Convention, Art. 144, para. 2, for the general obligation, and for camp commanders, Third Convention, Art. 39, para. 1, and Fourth Convention, Art. 99, para. 1.

³⁶ In the case of intervention by the United Nations forces, the governments of the countries which furnish contingents must give their troops adequate training on the Conventions and the Protocols before they leave their home country. (Cf. Resolution XXV of the XXth International Conference of the Red Cross, and D. Schindler, “United Nations Forces and International Humanitarian Law”, in *Studies and Essays in Honour of Jean Pictet*, *op. cit.*, p. 524.)

³⁷ Cf. Vienna Convention on the Law of Treaties, Art. 31, para. 1.

3384 Setting up such a programme of dissemination evidently implies the preliminary coordination between the various ministries concerned, not only for the dissemination itself, but also with regard to the allocation of responsibilities.

J. de P.

Article 84 – Rules of application

The High Contracting Parties shall communicate to one another, as soon as possible, through the depositary and, as appropriate, through the Protecting Powers, their official translations of this Protocol, as well as the laws and regulations which they may adopt to ensure its application.

Commentary

General remarks

3385 As we saw with regard to article 80 (*Measures for execution*), every Contracting Party must take a certain number of measures for execution in order for the Protocol to be applied fully. The present article, taken almost word for word from a provision in the Conventions,¹ concerns the reciprocal communication of

¹ Common Article 48/49/128/145.

information by the Contracting Parties about the rules they have drawn up for this purpose.²

- 3386** The object of such information is to inform each Party of the way in which the other Parties understand their obligations and discharge them. This should mainly serve to avoid or reduce errors, discrepancies and contradictions. One could also expect some stimulation and a fruitful exchange of thoughts and experiences.
- 3387** In the absence of a common interpretation, prior knowledge of differences of interpretation may further serve to help avoid misunderstandings, which in some cases could have serious consequences.
- 3388** There were no amendments to the draft of this article. After the addition of the expression “as soon as possible” by the Working Group, the present text was adopted by consensus both in Committee I and in plenary.³

Official translations

- 3389** The authentic texts of the Conventions are those in English and French; to these may be added the official Spanish and Russian translations, produced by the depositary.⁴ In conformity with contemporary practice, there are six authentic texts of the Protocol, viz., in Arabic, Chinese, English, French, Russian and Spanish.⁵
- 3390** The legal system of each Party to the Protocol determines in which language(s) it must have the Protocol translated. These translations, which are official insofar as Contracting Parties issue them or recognize them, certainly constitute one of the necessary measures within the meaning of Article 80 (*Measures for execution*) to execute the obligations arising from the Protocol.
- 3391** These translations may be based on any of the six authentic texts, though there is no doubt that they will be more accurate if a comparison is made between two or several of the authentic texts. On the other hand, although there is no obligation in this respect, it seems desirable that States which have a common language should agree on a common translation.

Laws and regulations

- 3392** The term “laws and regulations” should be understood in the widest possible sense to cover all rules from the legislative and from the executive insofar as

² On the meaning in the Protocol of the expression “High Contracting Parties”, cf. commentary Preamble, *supra*, p. 25. For the present art., cf. *infra*, “Parties to the Conventions not bound by the Protocol”.

³ Cf. respectively *O.R.* VIII, p. 408, CDDH/I/SR.38, para. 33; *O.R.* VI, p. 260, CDDH/SR.43, para. 122.

⁴ Common Article 54/55/133/150. The depositary of the Conventions and the Protocol is the Swiss Federal Council, as stated in Article 93; for its functions as depositary, cf. commentary Art. 100, *infra*, p. 1114.

⁵ In accordance with Art. 102; for further details on the concepts of authentic texts, official translations prescribed by a treaty and official national translations, cf. commentary on that art., *infra*, pp. 1120-1122.

such rules are in any way related to the application of the Protocol, examples for which are given in the commentary on Article 80 (*Measures for execution*), paragraph 1.⁶

Duties of Contracting Parties and of the depositary

- 3393** The obligation arising from this article consists of a duty to mutually communicate information. However, this does not justify one Contracting Party considering itself released from that obligation with regard to another Party on the ground that the latter has not discharged it. The object of this provision, as with humanitarian law as a whole, is sufficiently important to reject any possibility of reciprocity.⁷ Thus each Contracting Party is individually obliged to apply the present article as soon as possible after the rules and translations are passed or adopted.
- 3394** The effect of this article would be increased if the Contracting Parties, whenever necessary, added a translation in an international language of the laws and regulations they communicate. They will decide on the suitability of such a translation and the international language to be used.
- 3395** On the other hand, it clearly follows from the article that the depositary must receive a sufficient number of each document to send at least one copy to each Party to the Conventions, as we will see below; in fact, the depositary is only obliged to pass on what it receives and it is not responsible for translating, nor in principle for reproducing such documents.
- 3396** In addition it would be very useful for all such documents also to be communicated to the ICRC either directly or through the intermediary of the depositary, as was done for the Conventions, even though this is not actually required by the article.

Parties to the Conventions not bound by the Protocol

- 3397** The expression “High Contracting Parties” in this article only covers the Parties to the Protocol, and not Parties only bound by the Conventions. As regards the recipients, there is an omission remedied in Article 100 (*Notifications*), subparagraph (c), which provides that communications received by the depositary in accordance with Article 84 will be also communicated by it to all the Parties to the Conventions.

⁶ Cf. *supra*, p. 931.

⁷ On reciprocity, cf. commentary Art. 1, para. 1, *supra*, p. 37-38.

Part V, Section II – Repression of breaches of the Conventions and of this Protocol

Introduction

3398 This Section supplements the articles of the Conventions relating to the repression of breaches,¹ while extending the application of that system of repression to breaches of the Protocol. It therefore seems necessary to review, in the following order: the system of repression laid down in the Conventions; “grave breaches” as defined by the Conventions; new elements and clarifications introduced by the Protocol; other elements contained in international criminal law.²

¹ First Convention, Arts. 49-54; Second Convention, Arts. 50-53; Third Convention, Arts 129-132; Fourth Convention, Arts. 146-149. In fact these articles also lay down a general duty and specific preventive measures, as does this Section. We will not deal here with Art. 51/50/131/148 common to the Conventions, nor with Art. 91 of the Protocol, which are not about the repression of breaches, but about responsibility of Contracting Parties with regard to reparation.

² In addition to *Commentaries I-IV* and works which are more particularly mentioned with regard to the specific provisions of this Section, we list below a limited selection of works, documents and articles on a) international penal law, b) repression of war crimes and c) repression of breaches of humanitarian law, (subject a) also covers b) and c); subject b) also covers c):

a) *International Penal Law*:

S. Glaser, *Introduction à l'étude du droit international pénal*, Paris, 1954; *id.*, *Droit pénal international conventionnel*, Brussels, 1970; C. Lombois, *Droit pénal international*, Paris, 1971.

b) *Repression of war crimes*:

International Law Commission, *The Charter and Judgment of the Nürnberg Tribunal, History and Analysis*, Doc. A/CN.4/5, 3 March 1949; L. Oppenheim, *op. cit.*, pp. 566-588 (paras. 251-257c); United Nations, *Question of the Non-Applicability of Statutory Limitations to War Crimes and Crimes Against Humanity*, Doc. E/CN.4/906, 15 February 1966; P. Mertens, *L'imprescriptibilité des crimes de guerre et des crimes contre l'humanité*, Brussels, 1974; H.-H. Jescheck, “Nuremberg Trials”, *Encyclopaedia of Public International Law, op. cit.*, Instalment 4, 1982, p. 50; *id.*, “War Crimes”, *ibid.*, p. 294; G.I.A.D. Draper, “War, Laws of, Enforcement”, *ibid.*, p. 323; Ch. Rousseau, *Le droit des conflits armés, op. cit.*, pp. 170-187; F. Weiss, “Time Limits for the Prosecution of Crimes Against International Law”, 53 *BYIL*, 1983, p. 163; United Nations General Assembly, *Report of the International Law Commission on the work of its thirty-seventh session*, Official Records, 40th session, supplement No. 10 (A/40/10), 1985, paras. 11-101.

c) *Repression of breaches of humanitarian law*:

W.A. Solf and E.R. Cummings, “A Survey of Penal Sanctions Under Protocol I to the Geneva Conventions of August 12, 1949”, 9 *Case Western Reserve Journal of International Law* 2, 1977, p. 205; M.C. Bassiouni, “Repression of Breaches of the Geneva Conventions under the Draft Additional Protocol to the Geneva Conventions of August 12, 1949”, 8 *Rutgers Camden Law Journal* 2, 1977, p. 185; J. de Breucker, “La répression des infractions graves aux dispositions du premier Protocole additionnel aux quatre Conventions de Genève du 12 août 1949”, XVI-4

(continued on next page)

3399 In addition, as a proposal for a general article on reprisals had been submitted and discussed in the context of this Section, which was finally rejected, we will devote a special passage to that question.

The repression system of the Conventions

3400 In accordance with the relevant common article of the Conventions (49/50/129/146) the Contracting Parties undertake to:

- a) enact any legislation necessary³ for the repression of grave breaches defined by the Conventions;⁴
- b) suppress all acts contrary to the Conventions other than grave breaches;
- c) prosecute and try persons alleged to have committed, or to have ordered to be committed, any such grave breaches. It is also possible to hand such persons over for trial to another Contracting Party interested in prosecuting them.

RDPMDG, 1977, p. 497; E.J. Roucouas, "Les infractions graves aux droit humanitaire (Article 85 du Protocole additionnel I aux Conventions de Genève)", 31 *Revue Hellénique de droit international* 3-4, 1978, p. 57; B.V.A. Röling, "Aspects of the Criminal Responsibility for Violations of the Laws of War", *The New humanitarian Law of Armed Conflict*, *op. cit.*, p. 199; Ph. Bretton, "La mise en œuvre des Protocoles de Genève de 1977", *op. cit.*; G.I.A.D. Draper, "The Implementation and Enforcement...", *op. cit.*; "Incidences des dispositions pénales du Protocole I additionnel aux Conventions de Genève de 1949 sur le système judiciaire national", XXI-1-2-3-4 *RDPMDG*, 1982, p. 415 (Summary in English, "Effects of the penal provisions of Protocol I additional to the Geneva Conventions of 1949 on the national legal system", p. 430) (Congress held at Lausanne in 1982); M. Aubert, "La répression des crimes de guerre dans le cadre des Conventions de Genève et du Protocole Additionnel I et l'entraide judiciaire accordée par la Suisse", 79 *Revue suisse de jurisprudence* 23, 1983, p. 368; J. Verhaegen, "les nouveaux horizons du droit international pénal des conflits armés", *Revue de droit pénal et de criminologie*, January 1985, p. 25.

³ On this point, *Cf. Commentaries I-IV* (para. 1 of common Art. 49/50/129/146 and Art. 50/51/130/147); ICRC, *Respect of the Geneva Conventions – Measures taken to repress violations* (Reports submitted by the ICRC to the XXth and XXIst International Conferences of the Red Cross), Vol. I (1965) and II (1969), reprinted in 1971; G. Levasseur and R. Merle, "L'état des législations internes au regard de l'application des obligations contenues dans les conventions internationales de droit humanitaire", in Centre de droit international de l'Institut de sociologie de l'Université Libre de Bruxelles (Centre Henri Rolin), *Droit humanitaire et conflits armés, Université Libre de Bruxelles, colloque des 28, 29 et 30 janvier 1970*, Brussels, 1976, p. 217; H.-H. Jescheck, "War Crimes", *op. cit.*, pp. 296-297; "Incidences des dispositions pénales...", *op. cit.*; M. Bothe, "The Role of National Law in the Implementation of International Humanitarian Law", in *Studies and Essays in Honour of Jean Pictet*, *op. cit.*, p. 301; J. Verhaegen, "Les nouveaux horizons...", *op. cit.*, pp. 32-33.

⁴ The general obligation to take all measures necessary for the execution of the Conventions and the Protocol is repeated in Art. 80 of the Protocol which is supplemented by Art. 84; reference should be made to commentary Art. 80, *supra*, p. 930, and in particular note 2 ("A party may not invoke the provisions of its internal law as justification for its failure to perform a treaty").

- 3401** Thus the Conventions make a distinction between grave breaches and other breaches: any conduct⁵ contrary to their provisions constitutes a breach; as for grave breaches, these are listed and individually defined.
- 3402** The Contracting Parties are obliged to “suppress” conduct contrary to their provisions other than grave breaches. The term “suppress” (in French: *faire cesser*, i.e., put an end to...) should be understood in a broad sense: literally of course this means putting an end to such conduct; depending on its gravity and the circumstances,⁶ such conduct can and should lead to administrative, disciplinary or even penal sanctions – in accordance with the general principle that every punishment should be proportional to the severity of the breach.⁷
- 3403** Grave breaches have two special aspects. One is the duty of the Contracting Parties to take any legislative measure necessary to establish adequate penal sanctions to be imposed on persons who have committed, or have ordered to be committed, any such breaches. The other is that such breaches are subject to universal jurisdiction. Each Contracting Party⁸ must search for persons alleged to have committed, or to have ordered to be committed, any such grave breach. In accordance with the principle *aut dedere aut judicare*⁹ it must either bring such persons regardless of their nationality, before its own courts, or, if it prefers, and in accordance with the provisions of its own legislation, it must hand them over for trial to another Contracting Party interested in prosecuting them, provided it has made out a *prima facie* case against them. Regardless of the rules contained in criminal law or the law relating to extradition of each Contracting Party, universal jurisdiction provides an alternative which should not leave any loophole.¹⁰
- 3404** The accused enjoy procedural guarantees and free defence which will ensure them a fair trial and which are at least equivalent to those laid down in Articles 105 ff of the Third Convention; they are entitled, in particular: to assume their defence, to be assisted by a qualified defence lawyer, to intervention by the

⁵ In fact the Conventions use the term “act”, but taking into account the clarification given on this point by Article 86 of the Protocol, this should be understood to mean conduct, as it also covers failure to act (on these concepts, cf. commentary Art. 86, *infra*, p. 1005).

⁶ On this subject, cf. commentary Art. 89 (considerations regarding the expression “serious violations”), *infra*, p. 1033.

⁷ Cf., for example, *Commentary III*, pp. 622 and 624-625 (Art. 129, paras. 1 and 3).

⁸ On the scope of the expression “the High Contracting Parties”, cf. commentary Preamble, *supra*, p. 25. Thus this also covers neutral States or States not Parties to the conflict (on these concepts, cf. commentary Art. 2, sub-para. (c), *supra*, p. 61); in this sense, cf. L. Oppenheim, *op. cit.*, pp. 588-589 (para. 257c), note 4); H.-H. Jescheck, “War Crimes”, *op. cit.*, p. 297; for the opposite view: B.V.A. Röling, “Aspects of the Criminal Responsibility...”, *op. cit.*, p. 202.

⁹ I.e., either hand over or bring to trial; the alternative expression is: *aut dedere aut punire* (either hand over or punish).

¹⁰ The Conventions do not exclude handing over the accused to an international criminal court whose competence has been recognized by the Contracting Parties (*Commentary III*, p. 624 (Art. 129, para. 2)); in the same sense: B.V.A. Röling, “Aspects of the Criminal Responsibility...”, *op. cit.*, pp. 200-201; against: G.I.A.D. Draper, “The Implementation ...”, *op. cit.*, pp. 38, 41-42 and “War...”, *op. cit.*, p. 325; for a more balanced view: W.A. Solf and E.R. Cummings, *op. cit.*, p. 238 and note 146, consider that Article 102 of the Third Convention rules out the practice of *ad hoc* tribunals such as those created after the Second World War.

Protecting Power and to appeal against any sentence with a view to quashing or revising it or to the reopening of the trial.

Grave breaches as defined by the Conventions

3405 The following are acts which constitute grave breaches of the Conventions (respectively Arts. 50/51/130/147):¹¹

- wilful killing;
- torture or inhuman treatment, including biological experiments;
- wilfully causing great suffering or serious injury to body or health;
- extensive destruction and appropriation of property, not justified by military necessity and carried out unlawfully and wantonly;
- compelling a prisoner of war or a protected person under the Fourth Convention to serve in the forces of a hostile Power;
- depriving a prisoner of war or a protected person under the Fourth Convention of the rights of fair and regular trial prescribed in the Conventions;
- taking of hostages;
- unlawful confinement of protected persons under the Fourth Convention;
- unlawful deportation or transfer of protected persons under the Fourth Convention.

3406 In order to constitute grave breaches such acts must be committed against persons or property protected by the Conventions. Protected persons are:

- the wounded and sick, and members of medical and religious personnel (First Convention);
- the wounded, sick and shipwrecked, religious, medical and nursing personnel of hospital ships and their crew, medical and religious personnel of other ships (Second Convention);
- prisoners of war (Third Convention);
- civilians who, in case of conflict or occupation, find themselves in the hands of a Party to the conflict, or of an Occupying Power, of which they are not nationals¹² (Fourth Convention).

¹¹ This list, like that taken from Art. 85, paras. 2-4, of the Protocol, is not illustrative but exhaustive. This means that only the conduct included in the list is subject to universal jurisdiction under the Conventions and the Protocol. It does not mean that other breaches cannot also be subject to universal jurisdiction by reason of customary or treaty law (for examples, *cf.* W.A. Solf and E.R. Cummings, *op. cit.*, p. 217 and note 63, and B.V.A. Röling, “Aspects of the Criminal Responsibility...”, *op. cit.*, p. 212). Nor does it prevent Contracting Parties from providing in their national legislation for the penal repression of yet other breaches; those, however, would only be punishable if committed by members of their own armed forces (*O.R.* VI, p. 292, CDDH/SR.44, para. 76; M. Bothe, K.J. Partsch, W.A. Solf, *op. cit.*, p. 515, para. 2.10). See also commentary Art. 89, *infra*, pp. 1033-1034.

¹² Including nationals of neutral States or co-belligerent States under the conditions set out in Art. 4, para. 2, of the Fourth Convention. On the meaning of the word “neutral” in the Conventions, *cf.* commentary Art. 2, sub-para. (c), of the Protocol, *supra*, p. 61.

3407 Protected objects are:

- hospitals, ambulances, medical equipment and vehicles (First Convention);
- hospital ships, coastal rescue craft and coastal medical installations (Second Convention);
- civilian hospitals and their equipment and in occupied territory movable or immovable property (Fourth Convention).

New elements and clarifications introduced by the Protocol

3408 These may be summarized as follows:

- the system of repression of the Conventions is supplemented, or clarified on certain points, by Articles 86-91 of the Protocol;
- the system of repression of the Conventions, as supplemented by the Protocol, applies to breaches of the Protocol (Article 85 – *Repression of breaches of this Protocol*, paragraph 1);
- acts described as grave breaches in the Conventions are grave breaches of the Protocol if they are committed against new categories of persons and objects protected under the Protocol (Article 85 – *Repression of breaches of this Protocol*, paragraph 2);
- the list of grave breaches is supplemented (Article 11 – *Protection of persons*, paragraph 4, and Article 85 – *Repression of breaches of this Protocol*, paragraphs 3 and 4);
- judicial guarantees are set out in detail and the list is enlarged (Article 75 – *Fundamental guarantees*, paragraph 4);
- grave breaches of the Conventions and the Protocol are qualified as war crimes (Article 85 – *Repression of breaches of this Protocol*, paragraph 5; Article 75 – *Fundamental guarantees*, paragraph 7); this does not, however, affect the application of these instruments.

International criminal law

3409 On the one hand, penal provisions of international humanitarian law constitute only part of international humanitarian law; on the other hand, they constitute only part of international penal law applicable in case of armed conflict. Below we will first refer to the relevant treaties, other instruments and documents, and thereafter to some aspects of repression regarding which those materials give some enlightenment.

a) Treaties, instruments and documents

- *Agreement for the Prosecution and Punishment of the Major War Criminals of the European Axis, establishing an International Military Tribunal*, concluded

- in London on 8 August 1945 between France, the United Kingdom, the United States, and the USSR;¹³
- *Charter of the International Military Tribunal* (Nuremberg), annexed to the above Agreement;
 - *Charter of the International Military Tribunal for the Trial of Major War Criminals in the Far East* (Tokyo), 19 January 1946, which contains principles similar to those of the above-mentioned Charter;¹⁴
 - *Convention on the Prevention and Punishment of the Crime of Genocide* of 9 December 1948¹⁵
 - *Affirmation of the Principles of International Law Recognized by the Charter of the Nuremberg Tribunal*: in Resolutions 95 (I) of 11 December 1946 and 177 (II) of 21 November 1947 the United Nations General Assembly affirmed the Principles of International Law recognized by the Charter of the Nuremberg Tribunal and in the Judgement of the Tribunal, and requested the International Law Commission to formulate these principles; this was to be done within or outside the context of a *draft code of offences against the peace and the security of mankind*, which the ILC was also requested to prepare. The formulation of the Principles and the first Draft Code were submitted to the General Assembly in 1950 and 1951 respectively;¹⁶
 - *Convention for the Protection of Cultural Property in the Event of Armed Conflict* of 14 May 1954;¹⁷
 - *Convention on the Non-Applicability of Statutory Limitations to War Crimes and Crimes against Humanity* of 26 November 1968;¹⁸
 - *Principles of international co-operation in the detection, arrest, extradition and punishment of persons guilty of war crimes and crimes against humanity* of 3 December 1973;¹⁹
 - in addition, mention should be made of the Convention against the taking of hostages and the one on torture, concluded under the auspices of the United

¹³ Under its Article 5, 19 States subsequently became Parties to that agreement. For a list of these States, *cf.* International Law Commission, *The Charter...*, *op. cit.*, p. 4; L. Oppenheim, *op. cit.*, pp. 581-582 (para. 257 and note 3); D. Schindler and J. Toman, *op. cit.*, p. 831.

¹⁴ This similarity between the two Charters was noted, for example, in the second preambular paragraph of Resolution 95 (I) of the United Nations General Assembly.

¹⁵ Resolution 260 A (III) of the United Nations General Assembly. As of 31 December 1984 95 States were Parties to the Convention.

¹⁶ The whole question was subsequently deferred pending the adoption of a definition of aggression, which was given in 1974 (*cf.* commentary Preamble, *supra*, p. 28). The examination was taken up again by the General Assembly in 1978 and by the International Law Commission in 1982. The latest stage of developments on this question appears in United Nations, *Report of the ILC on the work of its 37th session*, *op. cit.*, paras. 11-37; the 1950 formulation of the Nuremberg Principles is contained in paragraph 45 and the 1954 version of the Draft Code in paragraph 18.

¹⁷ The sanctions are prescribed in Article 28; on this Convention in general, *cf.* commentary Art. 53, *supra*, pp. 641-643.

¹⁸ Resolution 2391 (XXIII) of the United Nations General Assembly; as of 31 December 1984 28 States were Parties to this Convention. There is also a European Convention on Non-applicability of Statutory Limitations to Crimes Against Humanity and War Crimes, adopted by the Council of Europe on 25 January 1974; the Convention was not yet in force as of 31 December 1984.

¹⁹ These principles are included in Resolution 3074 (XXVIII) of the United Nations General Assembly.

Nations, as well as the draft convention on terrorism which is being considered by the United Nations;²⁰

- finally, questions such as mutual assistance in judicial matters and extradition are also dealt with in treaties concluded in the context of regional organizations.

b) *Elements contained in the above-mentioned materials*

Relation to humanitarian law

3410 Several of the instruments mentioned deal with breaches of humanitarian law, either in a general and descriptive way, or in a concrete and specific way. The Nuremberg Charter, the 1950 version of the Nuremberg Principles and the Draft Code (1954 version) all apply to violations of the laws and customs of war (the first two, with examples). The Convention on statutory limitations explicitly mentions “grave breaches” of the Geneva Conventions.

Penal responsibility

- 3411** Humanitarian law provides that those who have committed a grave breach and those who have ordered a grave breach to be committed must be punished.²¹ Thus the principal (offenders) as well as the secondary parties (joint offenders) are liable to punishment, i.e., those who have personally performed acts (including failure to act), which includes those who did abet or organize the crime.²²
- 3412** It should be recalled that accessory accomplices are also punishable, i.e., anyone who has not taken part as a direct or principal actor in materially committing the breach, but who has helped the offender or joint offenders in preparing or perpetrating the breach and who has incidentally co-operated.²³
- 3413** As formulated by the International Law Commission in 1950, the Nuremberg Principles lay down the responsibility of any persons committing war crimes and any accomplices, all of whom are considered guilty of crimes under international

²⁰ International Convention against the Taking of Hostages of 17 December 1979. As of 31 December 1984, 24 States were Parties to that Convention. Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment of 10 December 1984. Three Conventions relating to the security of civil aviation were concluded within the International Civil Aviation Organization. All three are in force and also contain provisions on repression. The Conventions are the Tokyo Convention (1963), the Hague Convention (1970) and the Montreal Convention (1971).

²¹ A proposed amendment to Article 85 of the Protocol had explicitly covered: “(a) complicity in grave breaches, (b) attempt to commit grave breaches, (c) direct incitement or conspiracy to commit grave breaches – if they are committed” (O.R. III, p. 320, CDDH/I/304). This proposal was introduced by its sponsor and referred without discussion to the relevant Working Group and Sub-Group; it was not included in the drafts drawn up by these two groups (cf. O.R. IX, p. 57, CDDH/I/SR.46, para. 9; O.R. X, pp. 165-175, CDDH/I/GT/102/Rev.1; pp. 159-160, CDDH/I/324, paras. 1-7).

²² G. Stefani, G. Levasseur, B. Bouloc, *Droit pénal général*, 11th ed., Paris, 1980, pp. 242-245 (paras. 245-249). J.C. Smith, B. Hogan, *Criminal Law*, London, 1983, pp. 118-121.

²³ G. Stefani, G. Levasseur, B. Bouloc, *op. cit.*, pp. 250-251 (para. 254).

law (Principles I, VI and VII).²⁴ The Convention on genocide covers, apart from those who have committed the crime of genocide, also those guilty of conspiracy to commit genocide,²⁵ those guilty of direct and public incitement to commit that crime, and those who are guilty of complicity (Article III). The Convention on statutory limitations covers the same persons in similar terms, as well as representatives of the State who tolerated the commission of the defined crimes (Article II).²⁶

Attempt

- 3414 Humanitarian law does not specify whether the attempt of a grave breach is also punishable, i.e., when the commission of the act in question has begun but has been suspended or has failed to have effect as a result of circumstances outside the control of the person who had begun committing the act.²⁷
- 3415 The Nuremberg Principles do not refer to it in the formulation of 1950.²⁸ The Convention on genocide provides that the attempt is also punishable (Article III). The Convention on statutory limitations applies only to crimes of which the material constitutive elements (i.e., the results) have been realized, except if there was conspiracy: no statutory limitation will apply to conspiracy to commit any of the defined crimes “irrespective of the degree of completion” of the crime (Article II).
- 3416 At the present stage of development of the law we find that under the relevant treaties the attempt to commit a grave breach or a similar crime is not always subject either to universal jurisdiction or to penal suppression. However, the attempt will be subject to penal or disciplinary sanctions under national legislation whenever this is felt to be desirable.

Mutual assistance in criminal matters and extradition

- 3417 These questions will be treated in relation to Article 88 (*Mutual assistance in criminal matters*).²⁹

²⁴ Under the 1954 version of the Draft Code the person who commits the defined crimes is punishable, but also those guilty of conspiracy, direct incitement and complicity (Art. 2, para. 13). The further examination of that article has not yet been taken up by the International Law Commission (*cf.* United Nations, *Report of the ILC on the work of its 37th session, op. cit.*, paras. 31, 35, 43-51 and 101). On the concept of conspiracy, *cf.* the following note.

²⁵ The French text uses the words “participeraient à une entente”, which corresponds to the English “conspire”. The concept of *conspiracy* is based on Common Law; this crime is characterized by two constitutive elements: agreement and a common plan, and one or other of these elements or both must be unlawful (*cf.* C. Lombois, *op. cit.*, p. 104 (para. 98) and pp. 113-114 (note 98)). The concept of a common plan or conspiracy (“plan concerté” or “complot” in the French text) applies for all crimes defined in the Charter of the Nuremberg International Military Tribunal (Art. 6); it only applies to crimes against peace in the 1950 formulation of the Principles (Principle VI); it applies for all crimes defined in the Draft Code of 1954 (the above-mentioned Art. 2, para. 13, regarding which, *cf.* remark *supra*, note 24, second sentence).

²⁶ On this aspect, *cf.* Art. 86 of the Protocol.

²⁷ G. Stefani, G. Levasseur, B. Bouloc, *op. cit.*, p. 200 (para. 194). See also *supra*, note 21.

²⁸ The Draft Code of 1954 does include the attempt in the above-mentioned Article 2, paragraph 13, but the remark made *supra*, note 24, second sentence, also applies on this point.

²⁹ See *infra*, p. 1025.

Statutory limitation

- 3418** Humanitarian law does not specify whether the prosecution of persons suspected of having committed grave breaches and whether the execution of sentences pronounced on them can be frustrated by provisions of national law relating to statutory limitation.³⁰
- 3419** Since the end of the Second World War many States and writers have considered that neither the prosecution nor the punishment of war crimes and crimes against humanity can be precluded by lapse of time; in any case many of them hold the view that the statutory limitation of such crimes cannot be invoked because international law, which punishes such crimes, does not mention statutory limitation, which is only an exception or derogation from the ordinary rules of law.³¹
- 3420** National legislation with regard to statutory limitation varies from country to country. Some do not have it at all, others apply it to all crimes, others still exempt war crimes and crimes against humanity from the rules of statutory limitation, or only exempt one of these categories.
- 3421** The limited number of Parties to the United Nations Convention on the Non-Applicability of Statutory Limitations³² and the fact that the European Convention on the same subject is not yet in force, should not be seen in too negative a light. In fact, many of the countries which are not Parties to these conventions do not have statutory limitation or have restricted it in case of war crimes and crimes against humanity.³³
- 3422** We may conclude that there is a general, though not universal recognition of the non-applicability of statutory limitations to such crimes and that the scope of the recognition varies, depending on the treaty or national legislation considered.³⁴

³⁰ A period of limitation for crimes is the preclusion of penal proceedings by reason of lapse of time; the period varies depending on the offence committed. A period of limitation applicable to the penalty is the preclusion of the execution of sentence if it has not started within a certain period after the date of the sentence, or if it has been interrupted for a certain period (*cf.* G. Stefani, G. Levasseur, B. Bouloc, *op. cit.*, pp. 112 (para. 96), 597-599 (para. 687)).

³¹ UN Doc. E/CN.4/906 referred to above note 2, para. 140. On the question of the non-applicability of statutory limitation to war crimes and crimes against humanity, reference may be made to this document as a whole; it reflects in detail the views of States and the writings on this subject.

³² It should be noted that in its Resolution XII the XXIst International Conference of the Red Cross (Istanbul, 1969) requested “the Governments of all States to accede to this Convention which is now inseparable from the system designed to safeguard human rights”.

³³ This is true even though, as one writer recently put it, the difference between the various solutions adopted is enormous (G. van den Wijngaert in “Incidences...”, *op. cit.*, p. 456).

³⁴ The European Convention is more restrictive than the United Nations Convention, as it applies to violations of the laws and customs of war, including grave breaches of the Geneva Conventions, only “when the specific violation under consideration is of a particularly grave character by reason either of its factual and intentional elements or of the extent of its foreseeable consequences” (Art. 1, para. 2 *in fine*).

Reprisals

- 3423** Contrary to the wishes of a number of the delegations at the Diplomatic Conference, the Protocol does not contain a general provision on reprisals.
- 3424** Two competing proposals were submitted to this end: on the one hand, a prohibition of all reprisals against persons and objects protected under the Conventions and the Protocol; on the other hand, a prohibition subject to exceptions depending on conditions and methods. The simultaneous withdrawal of these two contradictory proposals at an advanced stage in the Conference confirmed the choice made in the draft, namely a series of separate prohibitions in various different articles.³⁵
- 3425** In order to better understand the points of view which emerged at the Conference and the solution which was adopted, it is useful to give a brief historical summary.³⁶

Definition

- 3426** Reprisals are stern measures taken by one State against another for the purpose of putting an end to breaches of the law of which it is the victim or to obtain reparation for them. Although such measures are in principle against the law, they are considered lawful by those who take them in the particular circumstances in which they are taken, i.e., in response to a breach committed by the adversary.
- 3427** In this particular context we do not intend to deal with reprisals in general, but only in the context of armed conflict, i.e., in *jus in bello*. In the law of armed conflicts, reprisals exercised by the belligerents can be defined as compulsory measures, derogating from the ordinary rules of such law, taken by a belligerent following unlawful acts to its detriment committed by another belligerent and which intend to compel the latter, by injuring it, to observe the law.³⁷
- 3428** Reprisals have constituted the most important means of coercion available to States for a long time, particularly in the conduct of hostilities.
- 3429** They should not be confused with measures of retortion, which are also stern measures taken in response to another State's actions and designed to put an end to them, whether or not these actions were lawful, but with the difference that the measures used remain in conformity with the law.
- 3430** A distinction should also be made between reprisals and straightforward reciprocity, which implies identical conduct to that of the adversary, but without necessarily the concept of punishment in response to a violation.³⁸

³⁵ Art. 20; Art. 51, para. 6; Art. 52, para. 1; Art. 53, sub-para. (c); Art. 54, para. 4; Art. 55, para. 2; Art. 56, para. 4.

³⁶ For a list of references to the CDDH on a possible general provision, *cf.* the references *ad* Art. 89, *infra*, p. 1031.

³⁷ *CE/2b*, p. 49; definition based on one given in the first article of a resolution passed by the Institute of International Law entitled "Régime des représailles en temps de paix" (system of reprisals in time of peace) (*Annuaire IDI*, 1934, Vol. II, p. 708).

³⁸ On the inadmissibility of the principle of reciprocity in applying the Conventions and the Protocol, *cf.* commentary Art. 1, para. 1, *supra*, p. 37-38.

3431 Finally, a distinction should be made between reprisals and self-defence. The main difference between them is that in case of self-defence force is used to directly rebut an attack or counter some other form of prejudicial conduct, while reprisals are designed to force the adversary to change its conduct.

*The law up to 1929*³⁹

3432 Various attempts to deal with reprisals in the context of the international law of armed conflict had been undertaken without ever reaching the stage of adopting treaty rules. Mention should be made of the draft submitted by Russia at the Brussels Conference of 1874,⁴⁰ and the Oxford Manual adopted by the Institute of International Law in 1880.⁴¹ The Peace Conferences held in The Hague in 1899 and 1907, which adopted the two successive versions of the Convention Respecting the Laws and Customs of War on Land, did not go directly into the question of reprisals nor did they adopt any provision relating to this matter.⁴²

3433 However, the idea persisted that reprisals should be prohibited, or at least that they should be subject to rules when it proved impossible to renounce them. In fact measures of reprisal are contrary to the principle that no one may be punished for an act that he has not personally committed; they constitute an inadequate means of restoring respect for the law, particularly in view of the counter-reprisals which they may provoke, and all this is likely to lead to a general escalation of the conflict.

3434 During the First World War, reprisals greatly worsened the fate of victims, and in 1916, in a notable appeal, the ICRC put forward the idea of prohibiting them totally against prisoners of war.

3435 Subsequently the Diplomatic Conference of 1929 supported the total prohibition of reprisals against prisoners of war. This constituted a considerable step forward in the development of humanitarian law.

The 1949 Conventions

3436 In 1949, the prohibition adopted in 1929 was extended to cover reprisals against all categories of persons and objects protected under the four Conventions.⁴³

3437 From that time international law established the prohibition of reprisals against any military personnel or civilians protected under the Geneva Conventions; rights conferred by these instruments could no longer be annulled or diminished

³⁹ For a detailed historical background, cf. F. Kalshoven, *Belligerent Reprisals*, *op. cit.*

⁴⁰ Excerpts of texts and discussion, *ibid.*, pp. 46-51.

⁴¹ Relevant materials and discussion, *ibid.*, pp. 51-55. The Oxford Manual of 1880 stated: "In grave cases in which reprisals appear to be absolutely necessary, their nature and scope shall never exceed the measure of the infraction of the laws of war committed by the enemy." In addition, "they must conform in all cases to the laws of humanity and morality".

⁴² F. Kalshoven, *Belligerent Reprisals*, *op. cit.*, pp. 56-66.

⁴³ Cf. respectively their Articles 46/47/13, para. 3/33, para. 3; for the list of protected persons and objects, cf. *supra*, pp. 976-977.

as a result of breaches of which the protected persons were innocent whatever the original breach may have been. That the Conventions were able to prohibit reprisals was due to the fact that they provided other means of ensuring respect for the law, such as supervision and sanctions.⁴⁴

3438 It should be noted at this point that the Hague Convention of 14 May 1954 for the Protection of Cultural Property in the Event of Armed Conflict prohibits any measures of reprisal against cultural property.

3439 However, the question was only resolved within the area indicated above. From the humanitarian point of view the crucial problem to be dealt with was the prohibition of reprisals against the civilian population in the conduct of hostilities.

The Conference of Government Experts (1971-1972)

3440 On the basis of documentation from the ICRC on this subject,⁴⁵ the *first session* of the Conference was divided into two tendencies.

3441 For some, reprisals should no longer be considered as a legitimate means of exacting the application of the law; as reprisals were among the most barbarous methods of the traditional laws of war, they should henceforth be deemed abolished, or at least be made subject to far-reaching restrictions to be defined in as precise a way as possible.

3442 For others reprisals undertaken by belligerents were still part of the law of armed conflict and represented a reasonably effective method in the conduct of hostilities.

3443 For its part the ICRC considered that the restrictions on reprisals imposed by the requirements of humanity in the conduct of hostilities should be forcefully reaffirmed. In this connection it mentioned the three principles of subsidiarity, proportionality and humanity.

3444 Finally, it was recalled that Resolution 2675 (XXV) of the United Nations General Assembly entitled “Basic Principles for the Protection of Civilian Populations in Armed Conflicts” confirms the prohibition of reprisals against the civilian population.⁴⁶

3445 The proposals submitted by the ICRC to the *second session* of the Conference included provisions prohibiting attacks directed by way of reprisals against the civilian population, civilians or objects indispensable to the survival of the civilian population. Another article imposed in particular minimum conditions that would apply to reprisals when a belligerent believed that it had to resort to reprisals in a field where they are not prohibited by the law in force.⁴⁷

⁴⁴ *Commentary IV*, p. 228 (Art. 33, para. 3).

⁴⁵ *CE/2b*, pp. 49-62.

⁴⁶ *CE 1971, Report*, p. 111, paras. 573-577; for the text of Resolution 2675 (XXV), *cf.* introduction to Part IV, Section I, *supra*, p. 588, note 17.

⁴⁷ For details on these proposals, *cf. CE 1972, Report*, Vol. II, pp. 7 and 12 (drafts Arts. 45, para. 4; 48, para. 1; 74).

3446 The views expressed were as divergent as during the first session. Some experts considered any new provision as unnecessary as reprisals were already prohibited. Others were in favour of provisions prohibiting reprisals against civilians and civilian objects and rules to which reprisals taken in the conduct of hostilities would be subject. Others still considered that reprisals should be made subject to general rules.⁴⁸

*The Diplomatic Conference*⁴⁹

3447 During the Diplomatic Conference the same views emerged as during the Conference of Government Experts, and its work leaves a number of questions unanswered.

3448 Taking into account the opinions expressed by government experts, the ICRC had included, in its draft, provisions prohibiting reprisals against the wounded, sick and shipwrecked, the civilian population, civilians and objects indispensable to the survival of the civilian population. Contrary to the 1972 draft, it had not included provisions reaffirming certain rules regulating and restricting the right of Parties to the conflict to use reprisals not yet prohibited by the law in force in the conduct of hostilities: the ICRC had submitted to the view of the majority of experts.⁵⁰

3449 Committees II and III adopted the prohibitions of reprisals in the draft, as well as new prohibitions, each in the Parts with which they were entrusted.⁵¹ After some hesitation the General Committee of the Conference assigned Committee I with the task of examining the problem of reprisals as a whole, taking into account the work already carried out by Committees II and III.⁵²

3450 It proved impossible to reconcile the different points of view. Some again confirmed that the use of reprisals, subject to certain exceptions, conditions and means, or, if possible, only the threat of such measures, were and should remain available as a response in the case of serious, manifest and deliberate violations: to deny this would be to benefit the Party violating the law to the detriment of

⁴⁸ *Ibid.*, Vol. I, p. 149, para. 3.161; p. 151, paras. 3.177-3.178; pp. 190-191, paras. 4.134-4.139 and 4.141.

⁴⁹ For the Official Records of the CDDH, *cf. supra*, note 36. Articles which appeared after the CDDH, describing in detail the debates and their results, include S.E. Nahlik, "Le problème des représailles...", *op. cit.*; *id.*, "Belligerent Reprisals as seen in the Light of the Diplomatic Conference on Humanitarian Law, Geneva 1974-1977", 42 *Law and Contemporary Problems* 2, 1978, p. 36; F. Aldrich, "New Life for the Laws of War", 75 *AJIL* 4, 1981, p. 764, on pp. 781-782.

⁵⁰ 1973 draft, Art. 20; Art. 46, para 4; Arts. 48 and 66; *Commentary Drafts*, pp. 29, 59, 62; 84-85 and 90 (*ad* these articles and Part V, Section I).

⁵¹ *Cf.* the articles mentioned *supra*, note 35, and the commentary thereon for their historical background and scope.

⁵² *O.R.* V, p. 375, CDDH/SR.31, paras. 20-23.

that respecting it. It was better to discuss a proposal on specific rules than to leave reprisals to the uncertain rules of customary law under which they are allowed.⁵³

- 3451** Others considered that reprisals were already, or should be, prohibited in general, though it was not always clear from the statements whether this concerned reprisals against protected persons and objects – to be defined – or against all persons and objects; they did not consider reprisals to be an effective means of restoring respect for the law, but a mechanism which could serve as a pretext for the worst abuses, no matter what rules might be adopted.⁵⁴
- 3452** Finally, some considered that it was not possible to introduce in humanitarian law a legal sanction of the laws of war which had always been considered to be incompatible with the principle of humanity; others still thought that the Conference was only competent to deal with reprisals exercised exclusively against protected persons or objects.⁵⁵

The law which has resulted from the Diplomatic Conference

- 3453** As the conflicting proposals were withdrawn in a spirit of compromise because of the impossibility of reaching an agreement, the legal situation resulting from the adoption of the Protocol now remains to be determined.
- 3454** – Reprisals against persons and objects protected by the Conventions are prohibited.⁵⁶
- 3455** – Reprisals against the persons and objects covered by the following provisions of the Protocol are prohibited:
- Article 20 (*Prohibition of reprisals*) (persons and objects protected by Part II – *Wounded, sick and shipwrecked*);
 - Article 51 (*Protection of the civilian population*), paragraph 6;
 - Article 52 (*General protection of civilian objects*), paragraph 1;
 - Article 53 (*Protection of cultural objects and places of worship*), subparagraph (c);
 - Article 54 (*Protection of objects indispensable to the survival of the civilian population*), paragraph 4;
 - Article 55 (*Protection of the natural environment*), paragraph 2;
 - Article 56 (*Protection of works and installations containing dangerous forces*), paragraph 4.
- 3456** – Some expressed the fear that by adopting provisions prohibiting reprisals in specific cases, some persons and objects might be overlooked.⁵⁷ In fact, apart

⁵³ Cf., e.g., *O.R.* IX, p. 59, CDDH/I/SR.46, paras. 21 and 24; pp. 64-65, paras. 46 and 49-51; p. 66, para. 54; p. 74, CDDH/I/SR.47, para. 38; pp. 77-78, paras. 48-49 and 51.

⁵⁴ Cf., e.g., *ibid.*, p. 60, CDDH/I/SR.46, para. 28; pp. 61-62, paras. 36 and 39; p. 63, paras. 42-44; pp. 70-71, CDDH/I/SR.47, paras. 20-24; pp. 74-76, paras. 39-40 and 43-46.

⁵⁵ Cf. *ibid.*, p. 78, CDDH/I/SR.47, para. 52; p. 80, para. 58.

⁵⁶ The same applies for property protected under the above-mentioned 1954 Hague Convention; for the list of persons and objects protected under the Conventions, cf. *supra*, pp. 976-977.

⁵⁷ Apart from those who had considered reprisals prohibited in all circumstances. cf. explicit statement *O.R.* IX, p. 452, CDDH/I/SR.73, Annex (Poland).

from these prohibitions, the Conventions and the Protocol incontestably prohibit any reprisals against any person who is not a combatant in the sense of Article 43 (*Armed forces*),⁵⁸ and against any object which is not a military objective.

3457 – There was one area in which the Conference did not wish to get involved and for which it did not want to lay down explicit rules, namely, the conduct of hostilities between combatants. Yet, the discussions about this have shown agreement on the following minimum restrictions, inspired by customary law and formulated in various ways during the *travaux préparatoires*:⁵⁹

- *subsidiarity*: reprisals may only be taken in the case of imperative necessity when all other means have proved ineffective and after a specific, formal and prior warning has been given that such measures would be taken if the breach did not cease or if it recommenced, and the warning remained ineffective; such a decision can only be taken by the highest authorities of the Party to the conflict; the reprisals will end as soon as they have achieved their purpose, i.e., the cessation of the breach which provoked them;
- *proportionality*: in deciding upon the way in which reprisals will be applied and upon their extent the utmost restraint must be exercised consistent with the purpose they are to serve, namely, to lead the adversary to respect the law; the degree of severity of the reprisals shall in no case exceed that of the breach committed by the enemy;
- *humanity*: in all cases Parties to the conflict must respect the laws of humanity and the dictates of the public conscience.

3458 – Unlawful reprisals do not render lawful the recourse to counter-reprisals by the adversary consisting of measures which are, even as a reprisal, prohibited.

3459 – The prohibition of reprisals cannot be suspended because of material violation of treaties of humanitarian law. This might be derived directly from the definition of reprisals, the *raison d'être* of the specific above-mentioned prohibitions. Any doubt which might arise from Article 60 of the Vienna Convention of 29 May 1969⁶⁰ on the Law of Treaties, which provides for termination or suspension after a material breach of a treaty, is removed by the same article. Indeed this article states that its provisions are subject to specific treaty provisions applicable in the event of a breach (paragraph 4), in particular those relating to the protection of the human person in treaties of a humanitarian character, including provisions prohibiting reprisals (paragraph 5).

B. Z.

⁵⁸ Or any other person participating directly in hostilities, for the duration of such participation.

⁵⁹ Opposition to the proposed article actually only came from those who did not consider the conditions to be sufficiently strict, or who would have preferred a complete prohibition of reprisals.

⁶⁰ Article 60 is entitled “Termination or suspension of the operation of a treaty as a consequence of its breach”.

Article 85 – Repression of breaches of this Protocol

1. The provisions of the Conventions relating to the repression of breaches and grave breaches, supplemented by this Section, shall apply to the repression of breaches and grave breaches of this Protocol.
2. Acts described as grave breaches in the Conventions are grave breaches of this Protocol if committed against persons in the power of an adverse Party protected by Articles 44, 45 and 73 of this Protocol, or against the wounded, sick and shipwrecked of the adverse Party who are protected by this Protocol, or against those medical or religious personnel, medical units or medical transports which are under the control of the adverse Party and are protected by this Protocol.
3. In addition to the grave breaches defined in Article 11, the following acts shall be regarded as grave breaches of this Protocol, when committed wilfully, in violation of the relevant provisions of this Protocol, and causing death or serious injury to body or health:
 - (a) making the civilian population or individual civilians the object of attack;
 - (b) launching an indiscriminate attack affecting the civilian population or civilian objects in the knowledge that such attack will cause excessive loss of life, injury to civilians or damage to civilian objects, as defined in Article 57, paragraph 2(a)(iii);
 - (c) launching an attack against works or installations containing dangerous forces in the knowledge that such attack will cause excessive loss of life, injury to civilians or damage to civilian objects, as defined in Article 57, paragraph 2(a)(iii);
 - (d) making non-defended localities and demilitarized zones the object of attack;
 - (e) making a person the object of attack in the knowledge that he is *hors de combat*;
 - (f) the perfidious use, in violation of Article 37, of the distinctive emblem of the red cross, red crescent or red lion and sun or of other protective signs recognized by the Conventions or this Protocol.
4. In addition to the grave breaches defined in the preceding paragraphs and in the Conventions, the following shall be regarded as grave breaches of this Protocol, when committed wilfully and in violation of the Conventions or the Protocol:
 - (a) the transfer by the Occupying Power of parts of its own civilian population into the territory it occupies, or the deportation or transfer of all or parts of the population of the occupied territory within or outside this territory, in violation of Article 49 of the Fourth Convention;

- (b) unjustifiable delay in the repatriation of prisoners of war or civilians;
 - (c) practices of *apartheid* and other inhuman and degrading practices involving outrages upon personal dignity, based on racial discrimination;
 - (d) making the clearly recognized historic monuments, works of art or places of worship which constitute the cultural or spiritual heritage of peoples and to which special protection has been given by special arrangement, for example, within the framework of a competent international organization, the object of attack, causing as a result extensive destruction thereof, where there is no evidence of the violation by the adverse Party of Article 53, sub-paragraph (b), and when such historic monuments, works of art and places of worship are not located in the immediate proximity of military objectives;
 - (e) depriving a person protected by the Conventions or referred to in paragraph 2 of this Article of the rights of fair and regular trial.
5. Without prejudice to the application of the Conventions and of this Protocol, grave breaches of these instruments shall be regarded as war crimes.

Commentary

General remarks

- 3460 The draft of this article (Article 74) was modest: on the one hand, it made the provisions of the Conventions relating to the repression of breaches, supplemented by this Section, applicable to breaches of the Protocol; on the other hand, it designated any acts defined as grave breaches in the Conventions as grave breaches of the Protocol, if they were committed against the new categories of persons or objects protected under the Protocol. These two aims are the object of paragraphs 1 and 2 of the article adopted by the Conference.
- 3461 In this way the draft Protocol increased the number of situations in which already defined acts would become grave breaches; it only added one new grave breach to the existing list. In fact, a separate draft article (Article 75) covered the perfidious use of protective signs or signals, which the Conference decided to include as paragraph 3(f) of Article 85. The caution evident in these proposals was justified by the thought that the need to improve the effectiveness of the system laid down by the Conventions had priority.
- 3462 Even before introducing draft Article 74 in Committee, the ICRC deemed it useful, particularly in the light of special expert consultations, to submit a new proposal, also containing a list of grave breaches of the Protocol.¹
- 3463 When they had been introduced in Committee, the drafts of this article and of that relating to the perfidious use of protective signs and signals were studied successively, together with the majority of the amendments relating to them,² by Sub-Working Group A and by Working Group A of Committee I.
- 3464 The text drawn up by these two bodies was discussed and adopted, paragraph by paragraph and sub-paragraph by sub-paragraph in Committee, and then the article as a whole was adopted by consensus both in Committee I and in plenary.³
- 3465 In general the delegations which expressed views on the article as adopted considered that it represented an important step forward towards an improved application of humanitarian law. The text was not perfect, but it was a satisfactory compromise.
- 3466 Some regretted that certain breaches which were as grave as those listed in the article had not been included.⁴ Others regretted that the lack of precision of

⁴ For example, the use of means of combat as listed in the proposals CDDH/I/347 and Rev.1 and CDDH/418 (*O.R.* III, p. 322). On the exhaustive character of the list of grave breaches, *cf.* introduction to this Section, *supra*, p. 976, note 11.

certain rules would make their introduction in national legislation, as well as their application, difficult and possibly not very uniform.⁵

Paragraph 1

3467 The system of repression in the Conventions is not to be replaced, but reinforced and developed by this Section (Articles 85-91), so that it will in future apply to the repression of breaches of both the Protocol and the Conventions.⁶

Paragraph 2

3468 The qualification of grave breaches is extended to acts defined as such in the Conventions when they are committed against the following categories of persons and objects:⁷

- persons who have taken part in hostilities and have fallen into the power of an adverse Party within the meaning of Articles 44 (*Combatants and prisoners of war*) and 45 (*Protection of persons who have taken part in hostilities*): this definition is broader than that of prisoners of war in the Third Convention;
- refugees and stateless persons within the meaning of Article 73 (*Refugees and stateless persons*) (which makes them protected persons under the Fourth Convention);
- the wounded, sick and shipwrecked of the adverse Party: Article 8 (*Terminology*), sub-paragraphs (a) and (b) enlarges the corresponding categories as defined in the Conventions;
- medical or religious personnel, medical units and transports under the control of the adverse Party and protected by the Protocol: the same applies as for the wounded, sick and shipwrecked (*cf.* Article 8 – *Terminology*, sub-paragraphs (c), (d), (e) and (g)). The expression “under the control of the adverse Party” is justified by the fact that such persons and objects may come, for example, from a non-belligerent State, an aid society recognized and authorized by such a State or even an impartial international humanitarian organization which makes them available to a Party to the conflict.

3469 Several delegations would have preferred also to mention Article 75 (*Fundamental guarantees*), which applies to all persons “affected by a situation referred to in Article 1” in the power of a Party to the conflict who do not benefit

⁵ In general, we would refer, with regard to the drafting and scope of this article, to the following works quoted in the introduction to this Section (*supra*, p. 973, note 2): W.A. Solf and E.R. Cummings, *op. cit.*, pp. 221-242; M.C. Bassiouni, “Repression of Breaches...”, *op. cit.*, pp. 199-201; J. de Breucker, “La répression des infractions graves...”, *op. cit.*; E.J. Roucouas, *op. cit.*, pp. 65-133; B.V.A. Röling, “Aspects of the Criminal Responsibility...”, *op. cit.*, pp. 208-209; Ph. Bretton, “La mise en œuvre des Protocoles de Genève de 1977”, *op. cit.*, pp. 405-411.

⁶ On the system of the Conventions, supplemented by the Protocol, *cf.* introduction to this Section, *supra*, pp. 974-976.

⁷ For a more detailed description we refer to the commentary on the provisions mentioned.

from more favourable treatment under the Conventions or the Protocol. They abandoned this idea in a spirit of compromise in the face of opposition from those who were afraid of extending the concept of grave breaches – subject to universal jurisdiction – to breaches committed by a Party to the conflict against its own nationals.⁸

3470 One delegation pointed out that the reference to Article 45 (*Protection of persons who have taken part in hostilities*) only concerned persons whose status has not yet been established, but not those whose right to prisoner-of-war status has been rejected in the proper manner.⁹ On this point there is no doubt that, on the one hand the above-mentioned article “protects” those whose status has not yet been established, while on the other hand, those who have been granted prisoner-of-war status are no longer in need of this article; the question is more difficult for those envisaged by that delegation. First, there are those covered by the article concerned in the first sentence of paragraph 3: they are actually referred to rather than protected by that provision, as it merely refers to Article 75 (*Fundamental guarantees*), which is applicable anyway, but was not included in the paragraph under consideration here. As regards persons covered by the second sentence, they are or are not protected by the Fourth Convention in accordance with the provisions of its Article 4. If they are, they enjoy the protection offered by the penal provisions; if they are not, only Article 75 of the Protocol (*Fundamental guarantees*) applies, but subject to the limitations indicated above.

Paragraph 3

3471 The significance of the reminder in this paragraph of grave breaches defined in Article 11 (*Protection of persons*) will be explained below. Apart from this reminder, the paragraph deals with breaches related to the conduct of hostilities: hostile acts directed against protected persons or objects, or the effects of which exceed their legitimate objectives, and also the perfidious use of protective signs and signals. A grave breach belonging to the same category is defined in paragraph 4(b).

3472 This category is that governed by the body of law traditionally known as the “Hague law”, and it concerns qualified breaches of the provisions of Parts III and IV of the Protocol. Numerous fears were expressed that bringing this category under the system of repression of grave breaches would entail real danger: it would be much more difficult to define grave breaches “on the battlefield” and to try acts committed in the course of hostilities than to deal with acts committed

⁸ O.R. IX, p. 256, CDDH/I/SR.60, paras. 9-11; p. 283, CDDH/I/SR.61, para. 86. It should be noted that according to the commentary on that article, *supra*, pp. 866-870, other categories of persons may be protected by it. Finland's instrument of ratification, as a complement to a declaration on the categories of persons enjoying protection under Article 75, contains a declaration that “the provisions of Article 85 shall be interpreted to apply to nationals of neutral or other States not Parties to the conflict as they apply to those mentioned in paragraph 2”.

⁹ O.R. IX, p. 280, CDDH/I/SR.61, para. 68. In the same sense, J. de Breucker, *op. cit.*, p. 503; E.J. Roucouas, *op. cit.*, p. 93.

against persons or objects in the power of the enemy, as do the Geneva Conventions.¹⁰ However, the Conference considered that it was essential to include in this article rules corresponding to those of Parts III and IV: the differences between the traditional field of the Conventions and that of the Hague law should not entail insurmountable difficulties, as shown by various precedents.¹¹

Opening sentence

3473 In order to list all the grave breaches of the Protocol in this article, a reference is included here to the breach defined in Article 11 (*Protection of persons*), paragraph 4. That breach has its own constitutive elements, slightly different from those laid down in the opening sentence of this paragraph for the sub-paragraphs that it introduces.¹²

3474 Common constitutive elements applicable to all the sub-paragraphs of paragraph 3 are the following:¹³

- *wilfully*: the accused must have acted consciously and with intent, i.e., with his mind on the act and its consequences, and willing them (“criminal intent” or “malice aforethought”); this encompasses the concepts of “wrongful intent” or “recklessness”, viz., the attitude of an agent who, without being certain of a particular result, accepts the possibility of it happening; on the other hand, ordinary negligence or lack of foresight is not covered, i.e., when a man acts without having his mind on the act or its consequences¹⁴ (although failing to take the necessary precautions, particularly failing to seek precise information, constitutes culpable negligence punishable at least by disciplinary sanctions);¹⁵

¹⁰ See *O.R. IX*, p. 19, CDDH/I/SR.43, para. 17; pp. 35-36, CDDH/I/SR.44, paras. 40-48.

¹¹ *ibid.*, p. 21, CDDH/I/SR.43, paras. 24 and 26; p. 25, para. 47; p. 28, CDDH/I/SR.44, para. 9; p. 32, para. 31.

¹² Art. 11, para. 4, uses the phrase “seriously endangers” and not “causing [...] serious injury”; it should also be noted that, in contrast with this paragraph, it only covers breaches against persons *in the power* of a Party other than that to which they belong.

¹³ We use the noun or the verb “act” below for the sake of clarity, but in the light of Art. 86 this should be understood to mean “conduct”. That article deals with repression of failures to act when there is a duty to act.

¹⁴ On the various concepts which are not all defined identically by national law, *cf.* for example, G. Stefani, G. Levasseur, B. Bouloc, *op. cit.*, pp. 213-234 (paras. 211-239). As regards recklessness, see also *supra*, p. 159, note 15. On failure to act and on negligence, *cf.* also commentary Art. 86, *infra*, p. 1005.

¹⁵ It should be noted that Austria when it ratified the Protocol made a reservation with regard to Articles 85 and 86: “Pour juger toute décision prise par un commandant militaire, les articles 85 et 86 du Protocole I seront appliqués pour autant que les impératifs militaires, la possibilité raisonnable de les reconnaître et les informations effectivement disponibles au moment de la décision soient déterminants.” (“In order to judge any decision taken by military commanders, Articles 85 and 86 of Protocol I will be applied with military imperatives, the reasonable possibility of recognising them and information actually available at the time of the decision, being decisive.” (Translated by the ICRC)).

- *in violation of the relevant provision*: in each of the sub-paragraphs this element refers to specific provisions of Parts III and IV, which we will indicate below in relation to each sub-paragraph;¹⁶
- *causing death or serious injury to body or health*: the effect must be such that, even if it does not cause death, it will affect people in a long-lasting or crucial manner, either as regards their physical integrity or their physical and mental health.¹⁷

Sub-paragraph (a)

- 3475** According to Article 49 (*Definition of attacks and scope of application*), paragraph 1, the term “attacks” means “acts of violence against the adversary, whether in offence or defence”. As defined in Article 50 (*Definition of civilians and civilian population*), anyone who is not a combatant is a civilian (*cf.* the provisions referred to in that article); in case of doubt regarding the status of a person, that person is to be considered as a civilian. The prohibition on attacking the civilian population and civilians – i.e., isolated civilians – is explicitly laid down in Article 51 (*Protection of the civilian population*), paragraph 2.¹⁸ All precautions must be taken with a view to sparing civilians, both in planning and in carrying out an attack (*cf.* Article 57 – *Precautions in attack*).
- 3476** It is a grave breach under this sub-paragraph to make the civilian population or individual civilians, knowing their status, the object of attack when the attack is wilfully directed against them and when the consequences defined in the opening sentence follow.

Sub-paragraph (b)

- 3477** This sub-paragraph is based on the same provisions as the preceding sub-paragraph, and in addition on Article 52 (*General protection of civilian objects*), which defines and generally protects civilian objects. The attacks concerned here are not those directly aimed at the civilian population or individual civilians, but attacks affecting them incidentally; “indiscriminate attacks” are defined and prohibited by Article 51 (*Protection of the civilian population*), paragraphs 4 and 5.
- 3478** The criterion of proportionality used in the same article, paragraph 5(b), to describe an example of such attacks, is defined here with reference to Article 57 (*Precautions in attack*); it weighs up “the concrete and direct military advantage anticipated” (paragraph 2(a)(iii)) and the obligation of “avoiding, and in any

¹⁶ For further details we refer also to the commentary on the provisions concerned.

¹⁷ Causing serious injury to body or health of persons protected under the Conventions is already qualified as a grave breach; *cf.* also *supra*, note 12, and commentary Art. 11, para. 4, *supra*, p. 158.

¹⁸ According to paragraph 3 of that article, a civilian who participates directly in hostilities would not be protected during such participation.

event [...] minimizing, incidental loss of civilian life, injury to civilians, and damage to civilian objects” (paragraph 2(a)(ii)).

- 3479** This sub-paragraph 3(b), like sub-paragraph 3(c), adds the words “in the knowledge” to the common constitutive elements set out in the opening sentence: therefore there is only a grave breach if the person committing the act knew with certainty that the described results would ensue, and this would not cover recklessness.
- 3480** It should also be noted that damage to objects, which is dealt with only to a limited extent in Article 147 of the Fourth Convention, is only mentioned in relation to the state of mind of the person committing the breach. The actual consequences defined by the opening sentence of the paragraph as constitutive elements of a breach, are death or serious injury to body or health in excess of what would be justified under the principle of proportionality.
- 3481** A grave breach, according to this sub-paragraph, is an indiscriminate attack wilfully launched in the knowledge that its consequences will be excessive as described in this sub-paragraph, and which produces the effects described in the opening sentence to such an extent as to be in violation of the principle of proportionality.¹⁹

Sub-paragraph (c)

- 3482** In addition to the above-mentioned provisions, Article 56 (*Protection of works and installations containing dangerous force*), must be referred to here; it grants special protection to works and installations containing dangerous forces, namely, dams, dykes and nuclear electrical generating stations.²⁰ Even if they constitute military objectives they must not be made the object of attack if such attack may cause the release of forces contained therein, and consequent severe losses among the civilian population.
- 3483** This special protection, which applies under the same conditions for military objectives located at or in the vicinity of such works, can only cease in strictly prescribed circumstances (paragraph 2). In that case the civilian population continues to enjoy the general protection to which it is entitled, including precautionary measures, and the attack must be conducted with special precautions (paragraph 3).²¹
- 3484** The expressions “in the knowledge” and “excessive”, as well as the reference to objects, have the same significance here as in sub-paragraph (b). Like sub-paragraph (b), this sub-paragraph represses attacks directed against military

¹⁹ On the principles which determine the lawfulness of incidental civilian loss, and in particular the principle of proportionality, see commentary on Art. 51, *supra*, pp. 625-626; introduction to this Section, *supra*, p. 976, note 11; commentary on Art. 89, *infra*, p. 1033 (on the meaning of the phrase “serious violations”); see also J. Verhaegen, “Une interprétation inacceptable du principe de proportionnalité”, XXI-1-2-3-4 *RDPMDG*, 1982, p. 329.

²⁰ The list in Article 56 is exhaustive.

²¹ Paragraph 6 of that article urges Contracting Parties and Parties to the conflict to conclude further agreements to provide additional protection for such objects. Paragraph 7, which refers to Article 16 of Annex I, lays down a special sign for such works and installations.

objectives, but with incidental effects on the civilian population which are incompatible with the principle of proportionality. Consequently we are concerned here either with attacks against works or installations which are themselves military objectives or with attacks against military objectives located at or in the vicinity of such works, whether or not the special protection has ceased.

3485 On the other hand, the principle of proportionality can not be invoked to justify incidental effects on the civilian population of an attack intentionally directed against a work or installation which does not constitute a military objective: such an attack would fall under sub-paragraph (a).

3486 Under this sub-paragraph, it is a grave breach to wilfully launch an attack against the works or installations concerned, if these constitute a military objective, or against a military objective located at or in the vicinity of such works or installations, in the knowledge that this will have the above-mentioned excessive consequences, if the attack produces the effects described in the opening sentence to such an extent as to be in violation of the principle of proportionality.²²

Sub-paragraph (d)

3487 Non-defended localities and demilitarized zones are defined in and governed by Articles 59 (*Non-defended localities*) and 60 (*Demilitarized zones*), respectively. We only recall that the former may be established by a unilateral declaration or by agreement, while the latter can only be established by an agreement between the Parties to the conflict.²³

3488 As long as it retains its status, a non-defended locality shall not be made the object of attack. As long as it retains its status, the Parties to the conflict cannot extend their military operations to a demilitarized zone if that is contrary to the provisions of the agreement by which it was established; however, the military operations which may be permitted by the agreement cannot in any case include attacks. If they lose their status pursuant to Article 59 (*Non-defended localities*) or 60 (*Demilitarized zones*), or pursuant to the agreements, the non-defended localities and demilitarized zones nevertheless continue to have the benefit of the other provisions of the Protocol and other relevant rules of international law (*cf.* paragraph 7 of both articles).

3489 This sub-paragraph deals with zones which enjoy a special status; if they lose it, the rules of Part IV, Section I, and those of this Section relating to the distinction between combatants and military objectives, on the one hand, and the civilian population and civilian objects on the other hand, continue to apply.

3490 Thus a grave breach as laid down in this sub-paragraph is an attack wilfully directed against a non-defended locality or demilitarized zone, if the attacker is aware of their status and if it produces the effects defined in the opening sentence.

²² The references contained in note 19 *supra* also apply to this sub-paragraph.

²³ The Party in control of a non-defended locality or demilitarized zone must mark it, as far as possible, by such signs as may be agreed upon with the other Party (Art. 59, para. 6; Art. 60, para. 5).

Sub-paragraph (e)

- 3491** Paragraph 1 of Article 41 (*Safeguard of an enemy hors de combat*) provides that “a person who is recognized or who, in the circumstances, should be recognized to be *hors de combat* shall not be made the object of attack”; paragraph 2 defines the concept “*hors de combat*”. There is a breach of this rule not only when the attacker knows, but also when, in the circumstances, he should know that the person he is attacking is *hors de combat*.
- 3492** On the other hand, the sub-paragraph under consideration here requires that the attacker should actually know that the person is *hors de combat*, for there to be a grave breach. The words “in the knowledge”, which exclude cases of negligence, are superfluous since the opening sentence lays down the criterion of intent, i.e., wilful act.²⁴ These words have a different meaning in sub-paragraphs (b) and (c), where they relate to knowledge of the material effects of the breach.
- 3493** Thus a grave breach within the meaning of this sub-paragraph is committed when someone wilfully attacks a person he knows to be *hors de combat*, causing his death or serious injury to his body or health.

Sub-paragraph (f)

- 3494** Articles 53 and 54 of the First Convention prohibit abuse of the red cross, red crescent and red lion and sun²⁵ emblems and require that such abuse should be prevented and repressed. Nevertheless, the Conventions did not qualify their perfidious use as a grave breach. This omission is henceforth rectified.
- 3495** The protective emblems and signs recognized by the Conventions and the Protocol are first of all those which they have established or provided themselves:
- red cross, red crescent (First Convention, Article 38; Protocol I, Annex I, Article 3 – *Shape and nature*);
 - oblique red bands on a white ground (Fourth Convention, Annex I, Article 6);
 - blue triangle on an orange ground (Protocol I, Article 66 – *Identification*, paragraph 4; Annex I, Article 15 – *International distinctive sign*);
 - three bright orange circles (Protocol I, Article 56 – *Protection of works and installations containing dangerous forces*, paragraph 7; Annex I, Article 16 – *International special sign*);
 - signs agreed upon between Parties to the conflict (Protocol I, Article 59 – *Non-defended localities*, paragraph 6; Article 60 – *Demilitarized zones*, paragraph 5).
- 3496** As Article 18 (*Identification*) places distinctive signals on the same footing as distinctive emblems as regards the repression of misuse, the distinctive signals laid down by the Protocol and used in accordance with the relevant provisions, should be added to this list (Article 18 – *Identification*, paragraph 5; Annex I,

²⁴ In the same sense, E.J. Roucouas, *op. cit.*, p. 107.

²⁵ On this latter emblem, *cf.* Editors' note, *supra*.

Article 6 – *Light signal*, Article 7 – *Radio signal*, Article 8 – *Electronic identification*).

- 3497 Next, Article 37 (*Prohibition of perfidy*) explicitly mentions the protected status of signs, emblems or uniforms of the United Nations or of neutral or other States not Parties to the conflict²⁶ (paragraph 1(d)).
- 3498 Finally, paragraph 1 of Article 38 (*Recognized emblems*) prohibits the improper use of any emblems, signs or signals provided for by the Conventions or the Protocol, or of other internationally recognized protective emblems, signs or signals, including the flag of truce and the protective emblem of cultural property.
- 3499 To summarize therefore, the perfidious use of emblems, signs or signals provided for by the Conventions or the Protocol, or of emblems, signs, signals or uniforms referred to in Articles 37 (*Prohibition of perfidy*) and 38 (*Recognized emblems*) of the Protocol, for the purpose of killing, injuring or capturing an adversary, constitutes a grave breach under this sub-paragraph if it leads to the results defined in the opening sentence.²⁷

Paragraph 4

- 3500 Paragraph 3 deals with grave breaches “on the battlefield”. Paragraph 4 defines a grave breach of this nature in its sub-paragraph (d); apart from this, it is concerned with acts prejudicial to the rights of persons in the power of the enemy, as is the case in the Conventions. Some of the breaches described, which incontestably involve the individual responsibility of those who have committed the acts, follow almost inevitably from policy decisions taken by a Party to the conflict, rather than from purely individual initiatives (sub-paragraphs (a), (b) and (c)).

Opening sentence

- 3501 In contrast with paragraph 3, this paragraph does not lay down particular consequences as constitutive elements which the grave breaches it defines have in common. The opening phrase only states that the breaches must be committed wilfully and in violation of the Conventions or the Protocol, as the case may be.

²⁶ On the expression “neutral and other States not Parties to the conflict”, cf. commentary Art. 2, sub-para. (c), *supra*, p. 61.

²⁷ However, cf. commentary Arts. 37 and 38, *supra*, pp. 439 and 459 respectively, for the case where the United Nations may be engaged in hostilities and its emblem is therefore no longer a protective emblem within the meaning of Article 37 and of this sub-paragraph.

Sub-paragraph (a)

- 3502** Article 49 of the Fourth Convention prohibits all forcible transfers, as well as deportations of protected persons from occupied territory (paragraph 1).²⁸ Only the security of the population of the occupied territory or imperative military reasons can justify total or partial evacuation of an occupied area; such evacuations may only take place within the bounds of the occupied territory, except when for material reasons this is impossible, and protected persons shall be transferred back to their homes as soon as hostilities in the area in question have ceased (paragraph 2). The Occupying Power may not deport or transfer parts of its own civilian population into the occupied territory (paragraph 6). The unlawful deportation or transfer of protected persons are among the grave breaches listed in Article 147.
- 3503** The part of the sub-paragraph dealing with the transfer or deportation of the population of the occupied territory is merely a repetition of Article 147 of the Fourth Convention, and Article 49 of that Convention, to which reference is made, continues to apply unchanged.
- 3504** Thus the new element in this sub-paragraph concerns the transfer by the Occupying Power of parts of its own civilian population into the territory it occupies: this practice, which was a breach, is now a grave breach because of the possible consequences for the population of the territory concerned from a humanitarian point of view.

Sub-paragraph (b)

- 3505** Two articles of the Third Convention lay down an obligation to repatriate prisoners of war. First, Article 109: during hostilities the seriously wounded and seriously sick, unless it is against their will (*cf.* also Article 110, paragraph 1). Secondly, Article 118: all prisoners of war, without delay, after the cessation of active hostilities.²⁹
- 3506** As regards civilians, all protected persons under the Fourth Convention who find themselves in the territory of a Party to the conflict are entitled, in accordance with Article 35 of that Convention, to leave the territory at the outset of or during the conflict, unless their departure is contrary to the national interests of

²⁸ In fact, by using the word “nevertheless”, paragraph 2, which is dealt with later, clearly shows that paragraph 1 also prohibits forcible transfers within occupied territory. On the basis of *Commentary IV*, pp. 278-280 and 599 it may be concluded that such a forcible transfer was already a grave breach within the meaning of Article 147; W.A. Solf and E.R. Cummings, *op. cit.*, pp. 232-233, hold this view; E.J. Roucouas, *op. cit.*, p. 116, holds the opposite view.

²⁹ Subject, however, to Article 119, paragraph 5 (prisoners detained until the end of criminal proceedings or until the completion of punishment for an offence under criminal law). On the problems related to the application of Article 118 of the Third Convention, *cf. inter alia*, in addition to *Commentary III*, pp. 540-553, Ch. Shields-Delessert, *Release and Repatriation of Prisoners of War at the End of Active Hostilities*, Zurich, 1977; E.J. Roucouas, *op. cit.*, pp. 117-119 (and other works referred to there); W.A. Solf and E.R. Cummings, *op. cit.*, pp. 233-234 (and references there).

the State. Only reasons of that nature can justify a Party to the conflict retaining a protected person who wants to leave the territory and possibly placing him in assigned residence or interning him – except in case of criminal proceedings or a sentence depriving him of his liberty. Restrictive measures will cease as soon as possible after the end of hostilities, though again an exception is made in case of criminal proceedings or sentences depriving those concerned of their liberty.³⁰

3507 Thus there is an essential difference between prisoners of war and civilians; prisoners of war must be repatriated, except for special cases;³¹ civilians are entitled to leave enemy territory subject to certain restrictions, but neither they nor the State in whose territory they are, have an obligation in this respect.

3508 The grave breach within the meaning of sub-paragraph 4(b) consists, in the case of prisoners of war, in failure to comply with Articles 109 or 118 of the Third Convention without valid and lawful reasons justifying the delay.³²

3509 With regard to civilians, the grave breach consists in delaying the departure of a foreign national who wants to leave the territory, in violation of Articles 35 or 134 of the Fourth Convention, without valid and lawful reasons justifying such delay.

Sub-paragraph (c)

3510 The policies and practices of *apartheid* have been referred to in a series of resolutions of the United Nations General Assembly. In particular, it adopted the International Convention on the Suppression and Punishment of the Crime of *Apartheid*³³ in its Resolution 3068 (XXVIII) of 30 November 1973. This declares that *apartheid* is a crime against humanity (Article I);³⁴ the same article declares that inhuman acts resulting from the policies and practices of *apartheid* and other similar policies and practices of racial segregation and discrimination, as defined in Article II, are crimes violating the principles of international law and constituting a serious threat to international peace and security.

³⁰ Cf. in particular Fourth Convention, Arts. 35-37, 41-43, 46, 132-134. The last article is concerned with facilitating the return of internees to their last place of residence or with their repatriation after the end of hostilities or occupation.

³¹ During hostilities, all seriously sick and wounded prisoners who are opposed to being repatriated (Third Convention, Article 109); after the end of active hostilities, prisoners who do not wish to be repatriated (each individual case requiring a thorough examination) (Third Convention, Art. 118); cf. *supra*, note 29. When ratifying the Protocol the Republic of Korea declared that the failure of a Detaining Power to repatriate prisoners if this accords with their clearly and freely expressed will is not a breach within the meaning of this paragraph.

³² Only material reasons such as circumstances making transportation impossible or dangerous are acceptable. The intention to use prisoners of war or civilians in one's power as a means of applying pressure on the adversary, for example, is not acceptable.

³³ As of 31 December 1984 there were 79 States Parties to this Convention.

³⁴ This qualification was already contained in the Convention on the Non-Applicability of Statutory Limitations to War Crimes and Crimes against Humanity. On that Convention, cf. introduction to this Section, *supra*, pp. 977 and 980.

- 3511** Article II defines inhuman acts covered by the term “crime of *apartheid*” and committed for the purpose of establishing and maintaining domination by one racial group over any other racial group and systematically oppressing the latter. This term also covers similar policies and practices of racial segregation and discrimination.
- 3512** In this sub-paragraph the Protocol only condemns practices, whether the practices of *apartheid* or any other inhuman and degrading practices; as far as the policies are concerned, they will remain exclusively within the domain of crimes against humanity.
- 3513** Although the provisions of the Conventions and the Protocol never mention *apartheid* by name, they contain several articles explicitly prohibiting any adverse distinction founded on whatever criterion, including race.³⁵
- 3514** In addition, inhuman treatment is qualified as a grave breach by the relevant articles of the Conventions, and this concept of inhuman treatment encompasses outrages upon the human dignity of protected persons.
- 3515** Finally, if we take into account that this sub-paragraph applies only in situations covered by Article 1 (*General principles and scope of application*), it must be concluded that the practices concerned were already grave breaches of the Conventions, whatever their motive; this is simply a special mention of reprehensible conduct for which the motive is particularly shocking.

Sub-paragraph (d)

- 3516** Article 53 of the Protocol (*Protection of cultural objects and of places of worship*) deals with the protection of cultural objects and places of worship without prejudice, as it says itself, to the provisions of the Hague Convention for the Protection of Cultural Property in the Event of Armed Conflict of 14 May 1954, and to other relevant rules of international law. That article prohibits committing any acts of hostility against those objects which constitute the cultural or spiritual heritage of peoples and using them in support of the military effort.
- 3517** To qualify as a grave breach within the meaning of this sub-paragraph, the attack must have been committed wilfully in accordance with the opening sentence of the paragraph;³⁶ the objects must not have been used in support of the military effort (*cf.* Article 53 – *Protection of cultural objects and of places of worship*, sub-paragraph (*b*)); special protection must have been given to the objects in question by special arrangement, for example, within the framework

³⁵ Arts. 12/12/16/13 and 27 of the Conventions; Arts. 9, 10, 69, 70 and 75 of the Protocol.

³⁶ The meaning of the term “clearly recognized” was not elucidated during the Conference and allows for two interpretations. For E.J. Roucouas, *op. cit.*, p. 109, it is a question of identification; for J. de Breucker, *op. cit.*, p. 505, it apparently means recognition of the right to protection. This ambiguity is probably not of great importance: in the first case it duplicates the requirement of intent, which implies that the attacker is aware of the status of what he is attacking; in the second case, the term seems to be just as superfluous, since a special arrangement is required anyway.

of a competent international organization;³⁷ the objects must not have been located in the immediate vicinity of military objectives; and the attack must have caused extensive destruction of the objects.

Sub-paragraph (e)

- 3518** Guarantees for a fair and regular trial are laid down in Articles 99-108 of the Third Convention and 71-75 and 126 of the Fourth Convention. Articles 130 and 147 of these Conventions, respectively, qualify as a grave breach the act of depriving a protected person of the rights of fair and regular trial prescribed in these Conventions.
- 3519** At first sight paragraph 2 should have sufficed to make the above-mentioned penal provisions applicable to those mentioned in that paragraph; however, the object of this sub-paragraph is to ensure that the judicial guarantees laid down in Article 75 (*Fundamental guarantees*) are added to those of the Conventions insofar as they supplement or clarify the latter.
- 3520** It is in this respect that the sub-paragraph under consideration here supplements the penal provisions of the Conventions.

Paragraph 5

- 3521** This paragraph, which was considered indispensable or self-evident by some delegations, seemed out of place or dangerous to others.
- 3522** The former emphasized the need to confirm that there is only one concept of war crimes, whether the specific crimes are defined under the law of Geneva or The Hague and Nuremberg law.³⁸ Without denying that grave breaches of the Conventions and the Protocol are indeed war crimes, the latter preferred those instruments to stick to their own terminology in view of their purely humanitarian objectives.³⁹
- 3523** Finally the paragraph was adopted by consensus, despite some reservations, once a formula had been added which guaranteed the application of the Conventions and the Protocol.⁴⁰ The expression “without prejudice to” means

³⁷ Cf. commentary Art. 53, *supra*, p. 643, for further details on the special protection under the 1954 Convention and on the role of UNESCO in this respect. E.J. Roucouas, *op. cit.*, pp. 113-114, thinks that the 1972 Convention Concerning the Protection of the World Cultural and Natural Heritage could also constitute a special arrangement within the meaning of this sub-paragraph (cf. also commentary Art. 53, *supra*, pp. 645-646).

³⁸ Cf. also introduction to this Section, *supra*, pp. 977-979.

³⁹ In favour: in particular, *O.R.* IX, p. 282, CDDH/I/SR.61, para. 85; pp. 313-314, CDDH/I/SR.64, para. 49; p. 317, para. 69; p. 319, para. 84; *O.R.* VI, p. 293, CDDH/SR.44, paras. 81-82; p. 294, para. 90; p. 306, *id.*, Annex (Yugoslavia). Against: in particular, *O.R.* IX, p. 269, CDDH/I/SR.61, para. 4; p. 279, para. 62; p. 280, para. 69; p. 282, para. 84; p. 307, CDDH/I/SR.64, para. 10; p. 310, para. 29; *O.R.* VI, p. 293, CDDH/SR.44, para. 85.

⁴⁰ See *O.R.* IX, p. 280, CDDH/I/SR.61, para. 71.

that the affirmation contained in this paragraph will not affect the application of the Conventions and the Protocol.⁴¹ In the French text the expression used is “sous réserve”.⁴²

B.Z.

⁴¹ The same affirmation is contained in Art. 75, para. 7.

⁴² The French text of Arts. 3 and 53 uses the term “sans préjudice” and the two terms have been used as equivalent in French. *Cf.* also Art. 16 of Protocol II.

Article 86 – Failure to act

1. The High Contracting Parties and the Parties to the conflict shall repress grave breaches, and take measures necessary to suppress all other breaches, of the Conventions or of this Protocol which result from a failure to act when under a duty to do so.
2. The fact that a breach of the Conventions or of this Protocol was committed by a subordinate does not absolve his superiors from penal or disciplinary responsibility, as the case may be, if they knew, or had information which should have enabled them to conclude in the circumstances at the time, that he was committing or was going to commit such a breach and if they did not take all feasible measures within their power to prevent or repress the breach.

Commentary

- 3524** A failure to act (omission) consists of failing to do or say something. In a legal sense it consists of failing in a duty to act. Paragraph 1 covers all breaches resulting

from a failure to act, contrary to a duty to act, while paragraph 2 is devoted to the special responsibility of a superior who has not taken measures which he was able to take to prevent or repress a breach committed by a subordinate.

3525 Article 13 of the Third Convention already contains a categorical provision:

“Any unlawful act or omission by the Detaining Power causing death or seriously endangering the health of a prisoner of war in its custody is prohibited and will be regarded as a serious breach of the present Convention.”

In trials following the Second World War, Allied tribunals had indeed convicted several persons in cases where they had not intervened to prevent a breach or to put a stop to it. However, it was accepted that this rested only on national legislation, either on explicit provisions, or on the application of general principles found in criminal codes. In any case, Article 129 of the Third Convention does not explicitly provide that Contracting Parties must enact penal sanctions for failure to act, but deals with such cases only by prohibiting protected persons being deprived of their right to a fair and proper trial.

3526 From the beginning of the preparatory work to the Diplomatic Conference, numerous experts and even some governments were anxious to introduce a rule of international law on omission.¹ The ICRC took this into account. The draft it presented to the Diplomatic Conference contained Article 76,² which was devoted to omission and which was based on proposals submitted by experts, particularly by experts in criminal law convened by the ICRC for this purpose from 29 January to 2 February 1973, and on those submitted by a restricted meeting of government experts consulted during March of the same year. With one exception³ the ICRC proposal did not meet with opposition on points of substance. It is not for the first time that international treaty law provides for criminal responsibility of those who have failed in their duty to act. In this context we would refer to the Convention on the Non-Applicability of Statutory Limitations to War Crimes and Crimes Against Humanity of 26 November 1968, of which Article 2 explicitly seeks to bring to trial representatives of the State authority who “tolerate” the commission of

“war crimes as they are defined in the Charter of the International Military Tribunal, Nuremberg, of 8 August 1945 [...] particularly the “grave

¹ See *CE 1972, Report*, Vol. I, pp. 188-189, para. 4.122, 4.126-4.127; Vol. II, p. 107, *CE/COM IV/45-46*. See also *Government Replies*, pp. 150 and 152.

² This draft article read as follows:

“1. The High contracting Parties undertake to repress breaches of the Conventions or of the present Protocol resulting from a failure to perform a duty to act.

2. The fact that a breach of the Conventions or of the present Protocol was committed by a subordinate does not absolve his superiors from penal responsibility if they knew or should have known that he was committing or would commit such a breach and if they did not take measures within their power to prevent or repress the breach.”

³ *O.R.* III, p. 328, *CDDH/II/303*; however, see also, *O.R.* IX, p. 45, *CDDH/II/SR.45*, para. 9.

breaches” enumerated in the Geneva Conventions of 12 August 1949 for the protection of war victims.” (Article I)⁴

3527 The articles of the Conventions devoted to penal sanctions apply only to persons “committing, or ordering to be committed”⁵ grave breaches of the Conventions. It was therefore also necessary in the article under consideration here to harmonize “the law of Geneva” with the above-mentioned Convention and with the latest trends in the field of the codification of international law.⁶ We should, however, point out right from the start that determining the limits of responsibility for acts of omission gives rise to a number of problems of criminal law which have not yet been resolved.⁷

3528 Article 86 was adopted by consensus both in Committee and in plenary.⁸

Paragraph 1 – General obligation to repress or suppress breaches resulting from a failure to act

3529 The importance of this provision cannot be doubted. The fact that a breach of the rules of applicable international law may consist of an omission, i.e., a failure to act, just as well as an act by a State organ, is uncontested nowadays and follows both from State practice and from case-law and legal literature. It may even be said that international responsibility of States (and this was not a matter of responsibility of individuals) has perhaps been invoked more often for omissions than for acts.⁹

3530 As regards breaches of the law of armed conflict, the responsibility of those who have refrained from taking the requisite measures to prevent or repress them, has been dealt with explicitly only since the end of the First World War.¹⁰

⁴ In the same sense we may refer to the Convention against Torture and other Cruel, Inhuman or Degrading Treatment or Punishment adopted by the United Nations General Assembly at the 93rd plenary meeting on 10 December 1984. Article 1 of this Convention condemns acts of torture “inflicted by or at the instigation of or with the consent or acquiescence of a public official or other person acting in an official capacity”.

⁵ Cf. First and Second Conventions, Art. 50; Third Convention, Art. 129; Fourth Convention, Art. 146. However, it should be noted that at least one of the grave breaches included in Articles 130 of the Third Convention and 147 of the Fourth Convention may well result literally from a failure to act, namely, the grave breach which consists of depriving a protected person of his right to a fair and regular trial.

⁶ See introduction to this Section, *supra*, p. 973.

⁷ On this subject, see “Le projet de code pénal international, commentaires”, *Revue internationale de droit pénal*, 1981, pp. 553-556. A distinction is made in particular between “infractions d’omission proprement dites”, “les infractions de commission par omission” and “la conduite omissive et participation”.

⁸ O.R. IX, p. 278, CDDH/1/SR.61, para. 59, and O.R. VI, p. 307, CDDH/SR.45. Only one delegation expressed some reservation in his explanations (*ibid.*, pp. 308-309).

⁹ See “State responsibility”, *Yearbook of the International Law Commission*, 1973, Vol. I, pp. 19 and 21-22.

¹⁰ See the Report of the “Commission on the responsibility of the authors of the [first World] War and on enforcement of penalties” of 29 March 1919, which provided for the prosecution of all those who had given orders for action in violation of the laws and customs of war or those who knowingly and while they had the power to intervene, abstained from preventing or taking measures to prevent, terminate or repress such acts, *International Law Studies*, Vol. 60, “Documents on prisoners of war”, Newport, Rhode Island, 1979, pp. 158 ff.

- 3531** The London Agreement of 8 August 1945, which was designed to serve as a basis for the prosecutions instituted after the Second World War, particularly for breaches of the law of armed conflict, does not refer to breaches consisting of omissions. Nevertheless, as we said above, people were convicted for omissions,¹¹ in particular on the basis of Article 1 of the 1907 Hague Regulations which provides that members of the armed forces must “be commanded by a person responsible for his subordinates”.¹² And Article 43 of the Protocol (*Armed forces*) is indeed just as unequivocal, since it provides that armed forces must be placed “under a command responsible [...] for the conduct of its subordinates”.
- 3532** Specific provisions of the 1907 Regulations relating to occupation and the duties of the occupying forces were also invoked.¹³
- 3533** Under the Conventions there are far more situations which may give rise to breaches consisting of failure to act.¹⁴
- 3534** It may also be emphasized that the paramount breach, which encompasses all others, consists of refraining from allowing the implementation of the Conventions when the conditions for their application are met.

¹¹ This was especially the case in the western theatre of operations in “The German High Command Trial” (*cf. 12 Law Reports*), and in the Far East in the “Trial of General Tomoyuki Yamashita” (*cf. 4 Law Reports*).

¹² “The German High Command Trial”, *op. cit.*, p. 108.

¹³ *Ibid.*; these include in particular Article 42, which states that “territory is considered occupied when it is actually placed under the authority of the hostile army”, and Article 43, which urges the occupant to take “all the measures in his power to restore, and ensure, as far as possible, public order and safety, while respecting, unless absolutely prevented, the laws in force in the country”.

¹⁴ By way of example, we refer to the obligation to respect and ensure respect for the Conventions in all circumstances (Art. 1), to use the services of a Protecting Power (Art. 8/8/8/9), and failing that, of a substitute (Art. 10/10/10/11), in particular to make various notifications through their intermediary, to ensure that the wounded and sick are cared for (First Convention, Art. 12), and that the shipwrecked are cared for (Second Convention, Art. 12), to ensure compliance with provisions relating to the dead (First Convention, Arts. 16-17, Second Convention, Arts. 19-20), to permit repatriation of neutral medical personnel (First Convention, Art. 30), to provide free of charge for the maintenance of prisoners of war (Third Convention, Art. 15) and to ensure their safety (*ibid.*, Art. 13), to undertake an enquiry in the case of the death of prisoners in special circumstances (*ibid.*, Art. 121), to take all sanitary measures necessary to ensure their health (*ibid.*, Art. 29), to grant them a monthly advance of pay (*ibid.*, Art. 60), to establish an information bureau (*ibid.*, Art. 122), to ensure that prisoners are able to contact the outside world (*ibid.*, Arts. 69-77), to release and repatriate them after the cessation of hostilities (*ibid.*, Art. 118), while any unjustified delay in this is qualified by the Protocol as a grave breach (Art. 85, para. 4(b)). The Fourth Convention lays down requirements in favour of civilian internees similar to those provided for prisoners of war, and urges the Occupying Power to ensure and maintain public health and hygiene in occupied territory (Art. 56) and to ensure food and medical supplies for the population (Art. 55). In all these circumstances, and in many others covered in particular by the Protocol (for example, Art. 11, para. 4, which expressly provides that any wilful act or omission which seriously endangers the physical or mental health or integrity of any person who is in the power of a Party other than the one on which he depends, is a grave breach of the Protocol) which extends the protection of the Conventions to the civilian wounded and sick, civilian health services and new categories of prisoners of war, failure to take the necessary measures for fulfilling the obligations of the Conventions is tantamount to committing a breach of such obligations.

- 3535** Article 85 (*Repression of breaches of this Protocol*) of the Protocol, paragraph 4(e), is a confirmation of the Conventions; it qualifies as a grave breach the act of depriving a person protected by the Conventions or by Articles 44 (*Combatants and prisoners of war*), 45 (*Protection of persons who have taken part in hostilities*) or 73 (*Refugees and stateless persons*) of the Protocol of the rights of fair and regular trial, in accordance with the provisions thereof and with Article 75 of the Protocol (*Fundamental guarantees*). As we have said, this breach can easily result from a failure to act.
- 3536** However, the Protocol also imposes on Contracting Parties and on Parties to the conflict, and consequently, as the case may be, on members of their armed forces, “obligations to act”, i.e. to adopt a particular positive conduct.¹⁵ This is the case with regard to new weapons (Article 36 – *New weapons*), the liberation of prisoners of war captured under unusual conditions of combat (Article 41 – *Safeguard of an enemy hors de combat*, paragraph 3), the obligation for combatants to distinguish themselves from the civilian population, either by means of their uniform, a distinguishing sign or by carrying arms openly (Article 44 – *Combatants and prisoners of war*, paragraphs 3 and 7), the obligation to make a distinction in the conduct of military operations, on the one hand, between combatants and civilians, and on the other, between civilian objects and military objectives (Articles 48 – *Basic rule*, and 52 – *General protection of civilian objects*) and to always ensure in the conduct of such operations that the natural environment is protected against widespread, long-term and severe damage (Articles 35 – *Basic rules*, and 55 – *Protection of the natural environment*) and to spare the civilian population, civilians and civilian objects (Article 57 – *Precautions in attack*) by taking a series of measures: ensuring that the objectives to be attacked are actually military objectives, choosing methods of attack likely to avoid or minimize incidental damage to the civilian population, and when appropriate, warning the population of attacks which may affect it, taking certain precautions against the effects of attacks (Article 58 – *Precautions against the effects of attacks*). We should also point to the duties of the Occupying Power vis-à-vis occupied territories (Article 69 – *Basic needs in occupied territories*), those of Parties to the conflict and of High Contracting Parties vis-à-vis relief actions (Article 70 – *Relief actions*), the provisions relating to the special protection of certain categories of persons, for example, women and children (Articles 76 – *Protection of women*, and 77 – *Protection of children*), the obligation to disseminate the Conventions and the Protocol in such a way that these instruments are known to the armed forces and the civilian population (Article 83 – *Dissemination*), the obligation to create posts for legal advisers (Article 82 – *Legal advisers in armed forces*) and to take all necessary measures for the proper application of the rules which have been adopted (Article 80 – *Measures for execution*). This list gives some idea of the many breaches which may be committed in international humanitarian law simply by a failure to act.

¹⁵ On this point see Ph. Bretton, “Le problème des ‘méthodes et moyens de guerre et de combat’ dans les Protocoles...”, *op. cit.*, pp. 31-38.

3537 Yet, responsibility for a breach consisting of a failure to act can only be established if the person failed to act when he had a duty to do so. The text of this paragraph should certainly be understood in this way since it prescribes Contracting Parties or Parties to the conflict to deal with any “failure to act when under a duty to do so”. This concept includes lack of due diligence having regard to the circumstances and amounting to a violation of the requirements indicated above. This concept of a “duty to act” raises the complex problem of the attribution of powers and duties which is not a matter of international law but is governed by the national law of the Parties to the Protocol. However, once national law has attributed powers and duties, the duty resulting therefrom with regard to international humanitarian law has to be interpreted in the light of treaty instruments. In other words, the national law of a State establishes the powers and duties of civilian or military representatives of that State,¹⁶ but international law lays down the way in which they may be exercised within the area governed by it. In the provision under consideration here the Contracting Parties and the Parties to the conflict undertake to ensure that this will indeed occur and that the powers and duties that have been attributed will actually be exercised in accordance with the requirements imposed by treaty rules.

3538 As regards the measures of application to be taken to prevent or repress breaches resulting from a failure to act when there is a duty to do so, the Protocol adopts a solution similar to that laid down by the Conventions in cases where a breach is caused by an act committed or ordered to be committed.¹⁷ It distinguishes breaches from grave breaches. Grave breaches must be repressed, which implies the obligation to enact legislation laying down effective penal sanctions for perpetrators of such breaches. According to Article 85 (*Repression of breaches of this Protocol*), paragraph 1, the provisions of the Conventions also apply to grave breaches of the Protocol.¹⁸ On the other hand, the text of the present paragraph is silent on the other requirements of the Conventions, the application of which ensues from the same Article 85 (*Repression of breaches of this Protocol*), i.e., the search for the perpetrators, regardless of their nationality, and the obligation either to bring them before the courts of the Detaining Power or to hand them over to another contracting Party concerned in order that it may try them.¹⁹ It is self-evident, when a Detaining Power tries a prisoner belonging to the adverse Party, that the “duty to act” of the accused must be interpreted in the light of the powers and duties attributed to him under his own national legislation.²⁰

¹⁶ Unfortunately history is full of examples of civilian authorities which have been guilty of war crimes; thus not only military authorities are concerned (*cf. O.R. IX, p. 131, CDDH/1/SR.51, para. 40*).

¹⁷ First Convention, Art. 49; Second Convention, Art. 50; Third Convention, Art. 129; Fourth Convention, Art. 146.

¹⁸ In this respect see also introduction to this Section, *supra*, p. 973, and commentary Art. 85, para. 1, *supra*, p. 992.

¹⁹ On extradition, see commentary Art. 88, *infra*, p. 1025.

²⁰ We refer also to Art. 88, which provides for the broadest possible mutual assistance in criminal matters in any proceedings brought in respect of grave breaches.

3539 For breaches of the Protocols other than grave breaches the terms are the same as those used by the Conventions for breaches of the Conventions other than grave breaches: the Parties to the Protocol undertake to *suppress* them, which means that any “repression” that might be undertaken ultimately by penal or disciplinary sanctions are the responsibility of the authority on which those committing such breaches depend or the Power to which they belong. However, this does not detract from the right of States under customary law, as reaffirmed in the writings of a number of publicists, to punish serious violations of the laws of war under the principle of universal jurisdiction. With regard to other measures, administrative sanctions or change of assignment, they can, by the nature of things, only be taken by their own authorities. Finally, it should be added that this provision supplements (*cf.* Article 85 – *Repression of breaches of this Protocol*, paragraph 1) the provisions of the Conventions relating to the repression of breaches, and is consequently without prejudice to the application thereof as and when the case arises.

Paragraph 2 – Responsibility of superiors

3540 Taking up one of the conditions laid down in Article 1 of the 1907 Hague Regulations,²¹ Article 43 (*Armed forces*), paragraph 1, of the Protocol provides, as we have seen, that armed forces must be placed “under a command responsible [...] for the conduct of its subordinates”. Article 39 of the Third Convention even makes this a specific obligation for the administration of prisoner-of-war camps.²² The recognition of the responsibility of superiors who, without any excuse, fail to prevent their subordinates from committing breaches of the law of armed conflict is therefore by no means new in treaty law. However, this principle was not specifically governed by provisions imposing penal sanctions.²³

3541 This provision, which should be read in conjunction with paragraph 1 and Article 87 (*Duty of commanders*), which lays down the duties of commanders, raises a number of difficult questions. The strongest objection which could be raised against this provision perhaps consists in the difficulty of establishing intent (*mens rea*)²⁴ in case of a failure to act, particularly in the case of negligence. For

²¹ Taken up in Art. 4A(2) of the Third Convention.

²² This provides that every prisoner-of-war camp will be placed under the immediate authority of a responsible commissioned officer who will ensure that the provisions of the Conventions are known to the camp staff under his orders and will be responsible for its application, under the direction of his government. A similar rule is contained in Article 99 of the Fourth Convention.

²³ A proposal was submitted on this subject during the second session of the Conference of Government Experts (*CE 1972, Report*, Vol. II, p. 107, CE/COM IV/45), and the ICRC inserted a provision to this end in the draft presented to the Diplomatic Conference (Art. 76, para. 2, *cf. supra*, note 2, p. 1006). This text was the object of various amendments (*cf. O.R. III*, p. 328, CDDH/I/74, CDDH/I/303, CDDH/I/306, and for the discussions, *O.R. IX*, pp. 113-119, CDDH/I/SR.50), before being adopted by consensus both in Committee and in plenary meeting (*see supra*, note 8, p. 1007).

²⁴ On this subject in general, see B.V.A. Röling, “Criminal Responsibility for Violations of the Law of War”, 12 *RBDI*, 1976/1, and, by the same author, “Aspects of the Criminal Responsibility...”, *op. cit.*, pp. 213-220.

that matter, this last point gave rise to some controversy during the discussions in the Diplomatic Conference, particularly due to the fact that the Conventions do not contain any provision qualifying negligent conduct as criminal.²⁵ However, one delegate, referring to the concept expressly reflected in the English version (which was not included in the French text, curiously enough, see *infra*, p. 1013), namely, information which “should have” enabled them to conclude that a subordinate was committing or was going to commit a breach, remarked that this was undoubtedly a case of responsibility incurred by negligence, and that it was important to make this clear.²⁶ However, this does not mean that every case of negligence may be criminal. For this to be so, the negligence must be so serious that it is tantamount to malicious intent,²⁷ apart from any link between the conduct in question and the damage that took place.²⁸ This element in criminal law is far from being clarified, but it is essential, since it is precisely on the question of intent that the system of penal sanctions in the Conventions is based. This applies both in the field of breaches resulting from a failure to act in general and with regard to breaches resulting from negligence. However, since the post-war tribunals succeeded in satisfying the requirement of justice in these very difficult situations, the Conference probably thought that there was no reason to believe the same would not happen again in the future.

3542 It should be clearly noted that this paragraph condemns failure to act of superiors in case of breaches which are not grave breaches as well as in case of grave breaches. In the first case the sanction can be disciplinary or penal, while universal jurisdiction understood as *aut dedere aut judicare* applies in the second case, i.e., in case of a grave breach.

3543 Under the terms of this provision three conditions must be fulfilled if a superior is to be responsible for an omission relating to an offence committed or about to be committed by a subordinate:

a) the superior concerned must be the superior of that subordinate (“his superiors”);

²⁵ See *O.R.* IX, p. 161, CDDH/I/SR.50, para. 41.

²⁶ *Ibid.*, p. 118, paras. 59-60. This is an important point; *cf.* for example, Article 16 of the Swiss Military Penal Code which provides that “Celui qui pouvait éviter l’erreur (sur les faits) en usant des précautions voulues est punissable par négligence si la loi réprime son acte comme délit de négligence” (anyone who could have avoided the fault (as to the facts) by using the necessary precautions, is punishable for negligence if the law qualified his act as an offence (translated by the ICRC)).

²⁷ In a 1952 trial (*USA v. Schultz*) the United States Court of Military Appeals decided that mere negligence did not constitute a universally recognized basis for criminal responsibility (*cf.* B.M. Carnahan, “The Law of War in the United States Court of Military Appeals”, XX 3-4, *RDPMDG* 1981, pp. 343-344). Article 15 of the Swiss Military Penal Code provides that “commet un crime ou un délit par négligence celui qui, par une imprévoyance coupable, agit sans se rendre compte ou sans tenir compte des conséquences de son acte. L’imprévoyance est coupable quand l’auteur de l’acte n’a pas usé des précautions commandées par les circonstances et par sa situation personnelle” (anyone who, as a result of criminal negligence, acts without realizing or taking into account the consequences of his act is committing an offence. Such lack of foresight is criminal when the perpetrator of the act has not used precautions required by the circumstances and by his personal situation (translated by the ICRC)). For examples relating to the airforce, see J.M. Spaight, *op. cit.*, p. 58.

²⁸ See in particular, M.C. Bassouni, *International Criminal Law, a Draft Criminal Code*, Leyden, 1980, pp. 58, 149, 155.

- b) he knew, or had information which should have enabled him to conclude that a breach was being committed or was going to be committed;
- c) he did not take the measures within his power to prevent it.

a) *The qualification of superior*

3544 This is not a purely theoretical concept covering any superior in a line of command, but we are concerned only with the superior who has a personal responsibility with regard to the perpetrator of the acts concerned because the latter, being his subordinate, is under his control.²⁹ The direct link which must exist between the superior and the subordinate clearly follows from the duty to act laid down in paragraph 1. Furthermore, only that superior is normally in the position of having information enabling him to conclude in the circumstances at the time that the subordinate has committed or is going to commit a breach.³⁰ However, it should not be concluded from this that this provision only concerns the commander under whose direct orders the subordinate is placed. The role of commanders as such is dealt with in Article 87 (*Duty of commanders*). The concept of the superior is broader and should be seen in terms of a hierarchy encompassing the concept of control.

b) *Knowledge, or information from which knowledge can be derived*

3545 There is no problem if the superior knew that a breach had been committed or was going to be committed and if this can be proved (Article 75 – *Fundamental guarantees*, paragraph 4(d)). This could be the case, for example, if the superior knew of preparatory actions or of previous breaches. On the other hand, the clause by which penal or disciplinary responsibility of superiors will arise if they “had information which should have enabled them to conclude in the circumstances at the time” that a breach had been committed or was going to be committed, raises problems of judgment.³¹ In the first place, it should be noted that there is a significant discrepancy between the English version, “information which should have enabled them to conclude”, and the French version, “des informations leur permettant de conclure”, which means “information enabling them to conclude”.³² In such a case the rule is to adopt the meaning which best

²⁹ See, in this sense, “The German High Command Trial”, *op. cit.*, p. 76, and “Trial of General Tomoyuki Yamashita”, *op. cit.*, pp. 35, 87.

³⁰ In this sense, *O.R.* IX, p. 117, CDDH/I/SR.50, para. 48.

³¹ This clause underwent considerable changes during the *travaux préparatoires*. The proposal submitted to the Conference of Government Experts mentioned “breaches of the laws of war which were, or ought to have been, within their [civil and military authorities] knowledge”. (*CE 1972, Report*, Vol. II, p. 107, CE/COM IV/45). Article 76 of the ICRC draft contains the expression “he should have known”. The amendment proposed by the United States contained the following wording: “If they knew or should reasonably have known in the circumstances at the time” (*O.R.* III, p. 328, CDDH/I/306).

³² On this point see the remarks by K.J. Partsch, in M. Bothe, K.J. Partsch, W.A. Solf, *op. cit.*, p. 525, and *O.R.* IX, p. 278, CDDH/I/SR.61, paras. 53-59.

reconciles the divergent texts, having regard to the object and purpose of the treaty,³³ and therefore the French version should be given priority since it covers both cases.³⁴ It seems to be established that a superior cannot absolve himself from responsibility by pleading ignorance of reports addressed to him,³⁵ or by invoking temporary absence as an excuse.³⁶ According to post-war judicial decisions, the tactical situation, the level of training and instruction of subordinate officers and their troops, and their character traits are also pieces of information of which the superior cannot claim to be ignorant.³⁷ Such information available to a superior may enable him to conclude either that breaches have been committed or that they are going to be committed (examples would be information on lack of any instruction for the troops on the Geneva Conventions and the Protocol, on the means of attack allocated or available in an area densely populated by civilians, on lack of medical services and absence of instructions relating to prisoners of war). Every case must be assessed in the light of the situation of the superior concerned at the time in question, in particular distinguishing the time that the information was available and the time at which the breach was committed, also taking into account other circumstances which claimed his attention at that point, etc.³⁸

3546 What is the position if the superior concerned persists in maintaining that he was not aware of the breaches committed or of information enabling him to conclude that they had been committed or were going to be committed, and if no proof can be furnished to the contrary? It is not possible to answer this question in the abstract; something that is true may, depending on circumstances, seem unlikely. It is not impossible for a superior actually to be ignorant of breaches committed by his subordinates because he deliberately wishes to remain ignorant. The fact is that in several flagrant cases the tribunals which were established to try war crimes after the Second World War did not accept that a superior could wash his hands of an affair in this way, and found that, taking into account the circumstances, a knowledge of breaches committed by subordinates could be presumed.³⁹

³³ Cf. Art. 33, para. 4, of the Vienna Convention on the Law of Treaties.

³⁴ In this sense, see *supra*, note 32.

³⁵ See “The Hostages’ Trial”, 8 *Law Reports*, p. 89.

³⁶ *Ibid.*

³⁷ See the Yamashita case, 4 *Law Reports*, p. 35, and in this respect, the observations made by M.C. Bassiouni in “Repression of Breaches...”, *op. cit.*, pp. 207-208.

³⁸ In this sense, *O.R.* IX, pp. 131-132, CDDH/I/SR.51, para. 43.

³⁹ In the case of the “High Command Trial” the Tribunal found that the responsibility of a superior was involved “where his failure to properly supervise his subordinates constitutes criminal negligence on his part. In the latter case, it must be a personal neglect amounting to a wanton, immoral disregard of the action of his subordinates amounting to acquiescence.” (12 *Law Reports*, p. 76). In the Yamashita case, the Tribunal declared: “Where murder and rape and vicious, revengeful actions are widespread offences and there is no effective attempt by a commander to discover and control the criminal acts, such a commander may be held responsible, even criminally liable, for the lawless acts of his troops, depending upon their nature and the circumstances surrounding them” (4 *Law Reports*, p. 35). In another case the Tribunal clearly based its verdict on the fact that “it was inconceivable that he [the commander] should not have been aware of the acts of atrocity committed by his subordinates [...]” (*ibid.*, p. 88). In other
(continued on next page)

c) *The obligation to take measures to prevent or repress breaches*

3547 This last clause deals with the central purpose of this paragraph: the superior who is responsible and who is aware of the facts must act to prevent or repress the breach. This rule concerns both the immediate commander and his superiors. However, the specific duties of commanders are further dealt with in the detailed provisions which will be examined under Article 87 (*Duties of commanders*). The present provision merely poses the principle of the indictment of superiors who have tolerated breaches of the law of armed conflict. This rule is not without precedent in national law.⁴⁰

3548 Using relatively broad language, the clause requires both preventive and repressive action. However, it reasonably restricts the obligation upon superiors to “feasible” measures, since it is not always possible to prevent a breach or punish the perpetrators. In addition, it is a matter of common sense that the measures concerned are described as those “within their power” and only those. These requirements correspond exactly to the judgments in post-war cases. An illustration can be found in the judgment given by the International Military Tribunal of Tokyo regarding the treatment of prisoners of war and civilian internees and the reasons given in that judgment may serve as a corroboration. The Tribunal stated that it was the duty of those responsible to ensure that prisoners were well treated, that ill-treatment was avoided, and to establish and guarantee an effective and permanent system for this purpose. If they refrain from taking the requisite measures, or if, having taken them, they do not ensure their constant and effective application, they fail in their duties and incur responsibility. Such responsibility continues if, while knowing that breaches are committed, they refrain from taking the appropriate measures that are in their power to prevent further breaches in the future. Ignorance does not absolve them from responsibility if it can be attributed to a fault on their part. The fact that the

circumstances the Tribunals seemed to have found that at least some proof must be furnished before accepting that a superior was aware of the acts of his subordinates (*ibid.*, p. 89). When depositing its instrument of ratification on 13 August 1982, Austria made the following reservation: “Pour juger toute décision prise par un commandant militaire, les articles 85 et 86 du Protocole I seront appliqués pour autant que les impératifs militaires, la possibilité raisonnable de les reconnaître et les informations effectivement disponibles au moment de la décision soient déterminants.” (“In order to judge any decision taken by military commanders, Articles 85 and 86 of Protocol I will be applied with military imperatives, the reasonable possibility of recognizing them and information actually available at the time of the decision, being decisive.” (Translated by the ICRC)).

⁴⁰ Cf. for example, Article 4 of the French Decree on repression of war crimes of 8 August 1944: “Lorsqu’un subordonné est poursuivi comme auteur principal d’un crime de guerre et que ses supérieurs hiérarchiques ne peuvent être recherchés comme coauteurs, ils sont considérés comme complices dans la mesure où ils ont organisé ou toléré les agissements criminels de leurs subordonnés.” (“When a subordinate is prosecuted as the person primarily responsible for a war crime and it is not possible to look upon his superiors in the hierarchy as jointly responsible, they will be treated as accomplices insofar as they organized or tolerated the criminal activities of their subordinates.” (translated by the ICRC)). For other examples, see 4 *Law Reports*, pp. 87-88.

breaches have widespread public notoriety, are numerous and occur over a long period and in many places, should be taken into consideration in reaching a presumption that the persons responsible could not be ignorant of them.⁴¹

Protocol I

Article 87 – Duty of commanders

1. The High Contracting Parties and the Parties to the conflict shall require military commanders, with respect to members of the armed forces under their command and other persons under their control, to prevent and, where necessary, to suppress and report to competent authorities breaches of the Conventions and of this Protocol.
2. In order to prevent and suppress breaches, High Contracting Parties and Parties to the conflict shall require that, commensurate with their level of responsibility, commanders ensure that members of the armed forces under their command are aware of their obligations under the Conventions and this Protocol.
3. The High Contracting Parties and Parties to the conflict shall require any commander who is aware that subordinates or other persons under his control are going to commit or have committed a breach of the Conventions or of this Protocol, to initiate such steps as are necessary to prevent such violations of the Conventions or this Protocol, and, where appropriate, to initiate disciplinary or penal action against violators thereof.

Commentary

- 3549 The first duty of a military commander, whatever his rank, is to exercise command. For this purpose the relationship between ranks and responsibilities

are, as a general rule, exactly determined within the armed forces, and the authority of each of the different levels of the hierarchy is precisely defined. It is under these conditions that the armed forces can be submitted to a régime of internal discipline; and the way the system is applied is the sole responsibility of the Contracting Parties and the Parties to the conflict. This régime is inseparable from the status of armed forces (Article 43 – *Armed forces*). According to this article, the disciplinary system must ensure, in particular, compliance with the rules of international law applicable in armed conflict. In the provision under consideration here, the Protocol enjoins the High Contracting Parties and the Parties to the conflict to ensure that military commanders carry out this task.

3550 We are concerned here with the very essence of the problem of enforcement of treaty rules in the field. This is why the authors of the Protocol considered it necessary to define more precisely on this point the scope of Article 80 (*Measures for execution*), relating to the general measures for the execution of their obligations that the Parties to the Protocol are bound to take. In fact the role of commanders is decisive. Whether they are concerned with the theatre of military operations, occupied territories or places of internment, the necessary measures for the proper application of the Conventions and the Protocol must be taken at the level of the troops, so that a fatal gap between the undertakings entered into by Parties to the conflict and the conduct of individuals is avoided.¹ At this level, everything depends on commanders, and without their conscientious supervision, general legal requirements are unlikely to be effective.² Undoubtedly the development of a battle may not permit a commander to exercise control over his troops all the time; but in this case he must impose discipline to a sufficient degree (*cf.* Article 43 – *Armed forces*, paragraph 1), to enforce compliance with the rules of the Conventions and the Protocol, even when he may momentarily lose sight of his troops.³

3551 There was no provision of this type in the Conventions or in the draft presented by the ICRC to the Diplomatic Conference. The present Article 87 owes its inclusion to an amendment presented during the third session,⁴ and was adopted in Committee I with 72 votes in favour, 0 against, and 3 abstentions,⁵ before being adopted by consensus in plenary meeting.⁶

⁴ *O.R.* III, pp. 329-330, CDDH/I/307, and 307/Rev.1.

⁵ *O.R.* IX, p. 393, CDDH/I/SR.70, para. 30. The voting on the article as a whole was preceded by a vote by paragraph (*ibid.*, pp. 390-399). The reasons behind the request for voting by paragraph are examined below. For the explanations of vote, see *ibid.*, pp. 399 ff., CDDH/I/SR.71. For the discussions, see *ibid.*, pp. 119-121, CDDH/I/SR.50, and p. 385, CDDH/I/SR.69.

⁶ *O.R.* VI, p. 307, CDDH/SR.45.

Paragraph 1 – Responsibility of commanders

- 3552** This paragraph obliges the Contracting Parties and the Parties to the conflict to make the control of the application of the Conventions and the Protocol part of the duties of military commanders. For this purpose the text lists a series of measures which commanders are obliged to take, namely, to prevent breaches from being committed, to suppress them when they have been committed, and to report them to the competent authorities. These measures also form the object of paragraphs 2 and 3 of Article 87, and it is appropriate first of all to try and focus on the concept of “military commanders”.
- 3553** According to the sponsors of the proposal which was behind the rule under consideration here: “in its reference to ‘commanders’, the amendment was intended to refer to all those persons who had command responsibility, from commanders at the highest level to leaders with only a few men under their command”.⁷ This is quite clear. There is no member of the armed forces exercising command who is not obliged to ensure the proper application of the Conventions and the Protocol. As there is no part of the army which is not subordinated to a military commander at whatever level, this responsibility applies from the highest to the lowest level of the hierarchy, from the Commander-in-Chief down to the common soldier who takes over as head of the platoon to which he belongs at the moment his commanding officer has fallen and is no longer capable of fulfilling his task.
- 3554** This responsibility primarily applies with respect to “members of the armed forces under their command”. This term should be understood very specifically, if full practical meaning is to be given to the provision. A commander may, for a particular operation and for a limited period of time, be supplied with reinforcements consisting of troops who are not normally under his command. He must ensure that these members of the armed forces comply with the Conventions and the Protocol as long as they remain under his command. In addition, it is self-evident that the obligation applies in the context of the responsibilities as they have devolved over different levels of the hierarchy, and that the duties of a non-commissioned officer are not identical to those of a battalion commander,⁸ and the duties of the latter are not identical to those of a divisional commander. Within the confines of these areas of competence, the responsibility of each of these applies with respect to all the members of the armed forces under his command.

⁷ O.R. IX, p. 120, CDDH/I/SR.50, para. 70. This statement was not contested. Some delegations would even have wished this clarification to have been included in the text of the Protocol in order to avoid any ambiguity, as the word “commander” is not always understood in the same way in the armies of different countries (for the discussions, see *ibid.*, pp. 119-127).

⁸ See, for example, the reservation made by Switzerland with regard to Art. 57, para. 2. According to this reservation, “these provisions only create obligations for commanders at the level of battalions or groups, and at higher levels. The information available to the commanders at the moment of their decision is the determining factor.” (translated by the ICRC; original text: “ces dispositions ne créent des obligations que pour les commandants au niveau du bataillon ou du groupe et aux échelons plus élevés. Sont déterminantes les informations dont les commandants disposent au moment de leur décision.”).

- 3555** However, the text does not limit the obligation of commanders to apply only with respect to members of the armed forces under their command; it is further extended to apply with respect to “other persons under their control”. It is particularly, though not exclusively,⁹ in occupied territory that this concept of indirect subordination may arise, in contrast with the link of direct subordination which relates the tactical commander to his troops. Territory is considered occupied when it is actually placed under the authority of the hostile army, and the occupation extends only to the territory where such authority has been established and can be exercised.¹⁰ Consequently the commander on the spot must consider that the local population entrusted to him is subject to his authority in the sense of Article 87, for example, in the case where some of the inhabitants were to undertake some sort of pogrom¹¹ against minority groups. He is responsible for restoring and ensuring public order and safety as far as possible,¹² and shall take all measures in his power to achieve this,¹³ even with regard to troops which are not directly subordinate to him, if these are operating in his sector.¹⁴ *A fortiori* he must consider them to be under his authority if they commit, or threaten to commit, any breaches of the rules of the Conventions against persons for whom he is responsible. As regards the commander who, without being invested with responsibility in the sector concerned, discovers that breaches have been committed or are about to be committed, he is obliged to do everything in his power to deal with this, particularly by informing the responsible commander.
- 3556** As regards the measures mentioned above, which military commanders must take in the case of a breach or threatened breach of the Geneva Conventions and the Protocol (i.e., to prevent, suppress, and where necessary, report such breaches), these are indicated again in paragraph 3 with a slightly different wording, though without any substantial modification as regards the basic meaning. This will therefore be examined below.

Paragraph 2 – Dissemination amongst the armed forces

- 3557** Article 82 (*Legal advisers in armed forces*) provides that legal advisers must be available when necessary to advise military commanders at the appropriate level on the instruction to be given to the armed forces on the subject of the application

⁹ If the civilian population in its own territory is hostile to prisoners of war and threatens them with ill-treatment, the military commander who is responsible for these prisoners has an obligation to intervene and to take the necessary measures, even though this population is not officially under his authority. He is also bound to intervene if prisoners of war threaten their own comrades. The same applies when civilian elements are engaged in his operational sector without being officially subordinated to the military commander.

¹⁰ Hague Regulations, Art. 42.

¹¹ Pogrom: ill-treatment to which a defenceless civilian population is subjected.

¹² Hague Regulations, Art. 43.

¹³ *Ibid.*

¹⁴ On the problem in general, see “Trial of Wilhelm List and Others”, 8 *Law Reports*, in particular, pp. 69-71.

of the Conventions and of the Protocol. Moreover, such a provision is included in the context of the general obligation upon the Contracting Parties to disseminate the rules as widely as possible, particularly by including the study thereof in programmes of military instruction (Article 83 – *Dissemination*). However, legal advisers will never be available at all levels of command. Moreover, they are there to “advise the military commanders” in this field and not to replace them. Under the terms of Article 87, paragraph 2, it is the commanders themselves who must ensure that members of the armed forces under their command are aware of their obligations under the Conventions and the Protocol.

3558 Such authority will be exercised, taking into account the responsibilities ensuing from the provisions of Articles 82 (*Legal advisers in armed forces*) and 83 (*Dissemination*) mentioned above, by the commanders “commensurate with their level of responsibility”, i.e., in accordance with the same criteria as those applicable to the instruction of the troops. If, as in many armies, the commander of a unit is responsible for the instruction of his men, it will be up to him to ensure, primarily through the commissioned and non-commissioned officers under his command, that his unit gets proper training. He will ensure that this is done either periodically or expressly before an engagement by drawing particular attention, where necessary, to the sort of action to be avoided, taking into account the situation or the morale of the troops¹⁵ (the probable presence of civilians in the neighbourhood of the military objective and the conduct to be observed towards them, the attitude towards an adversary wishing to surrender or with regard to recognized signs etc.). It is in fact “in order to prevent and suppress breaches” that military commanders are responsible for such instruction and with the duty to supervise it. This implies that problems are broached in a specific manner. As regards commanders of levels higher than that of company commander, they will have corresponding obligations within the confines of the area of their competence. This may consist, for example, for battalion commanders, of instructing subordinate commanders and the officers of their own headquarters in this field, or for a regimental commander, of ensuring the uniformity and regularity of instruction within the regiment, if necessary calling in the legal adviser who may be permanently attached at a higher level etc.¹⁶

Paragraph 3 – Practical steps

3559 Paragraph 1 of Article 87 lays down the principle that military commanders are obliged to prevent breaches of the Conventions and the Protocol, and if

¹⁵ Interesting remarks on these facts can be found in J. Goldstein, B. Marshall and J. Schwartz in “The MyLay Massacre and its Cover-up: Beyond the Reach of Law?”, in *The Peers Commission Report*, particularly chapter 8: “Significant factors which contributed to the Son My Tragedy” (New York-London, 1976).

¹⁶ With a view to facilitating such instruction and control, the ICRC has undertaken to give courses on the law of armed conflicts at the International Institute of Humanitarian Law in San Remo.

necessary, to suppress them and report them to the competent authorities. Paragraph 3 lays down similar requirements as regards its purport, though referring to the case where a commander “is aware that subordinates or other persons under his control are going to commit or have committed a breach”. Thus these two paragraphs complement each other.

3560 In adopting these texts, the drafters of the Protocol justifiably considered that military commanders are not without the means for ensuring respect for the rules of the Conventions. In the first place, they are on the spot and able to exercise control over the troops and the weapons which they use. They have the authority, and more than anyone else they can prevent breaches by creating the appropriate frame of mind, ensuring the rational use of the means of combat and by maintaining discipline. Their role obliges them to be constantly informed of the way in which their subordinates carry out the tasks entrusted them, and to take the necessary measures for this purpose. Finally, they are in a position to establish or ensure the establishment of the facts, which would be the starting point for any action to suppress or punish a breach.

3561 Every commander at every level has a duty to react by initiating “such steps as are necessary to prevent such violations”. By way of example, a non-commissioned officer must intervene to restrain a soldier who is about to kill a wounded adversary or a civilian, a lieutenant must mark a protected place which he discovers in the course of his advance, a company commander is to have prisoners of war sheltered from gunfire, a battalion commander must ensure that an attack is interrupted when he finds that the objective under attack is no longer a military objective, and a regimental commander must select objectives in such a way as to avoid indiscriminate attacks.

3562 The text of paragraph 3 also requires that any commander “where appropriate”, will “initiate disciplinary or penal action against violators”. Paragraph 1 lays down the obligation for military commanders to prevent breaches “and, where necessary, to suppress and to report [them] to competent authorities”. Thus these two texts again are complementary. During the course of the discussions some delegations expressed the fear that these provisions would result in an unjustified transfer of responsibilities from the level of the government to that of commanders in zones where military operations are taking place.¹⁷ They also feared that inappropriate prosecutions could take place, and that military commanders might encroach on the judgment of the judicial authorities.¹⁸ These fears, which were the reason for the requests for voting by paragraph on this article,¹⁹ do not seem to be justified. It is not a matter of transferring to military commanders the competence and responsibilities which are those of the judicial authorities, even if this is a military court, whether or not it is represented by a military commission constituted in accordance with the law. The object of these texts is to ensure that military commanders at every level exercise the power vested in them, both with regard to the provisions of the Conventions and the Protocol, and with regard to other rules of the army to which

¹⁷ See *O.R.* IX, p. 402, CDDH/I/SR.71, para. 17.

¹⁸ *Ibid.*

¹⁹ See *supra*, p. 1018, note 5.

they belong. Such powers exist in all armies. They may concern, at any level, informing superior officers of what is taking place in the sector, drawing up a report in the case of a breach, or intervening with a view to preventing a breach from being committed, proposing a sanction to a superior who has disciplinary power, or – in the case of someone who holds such power himself – exercising it, within the limits of his competence, and finally, remitting the case to the judicial authority where necessary with such factual evidence as it was possible to find. In this way, for example, a commander of a unit would act like an investigating magistrate.²⁰ Indeed, some delegations remarked that Article 87 contains provisions which are already found in the military codes of all countries.²¹ In Article 87 it is merely a question of ensuring that they are explicitly applicable with respect to the provisions of the Conventions and the Protocol.²² In fact, all this does not prevent commanders from trying to identify any possible gaps in the law of armed conflict or to put forward consistent interpretations on points which have not been clearly regulated.

3563 One last question deserves to be raised. The objection is sometimes made that to require that a military commander devote all his attention to the respect for the Conventions and the Protocol is not realistic, for he should primarily devote himself to the conduct of combat with nothing distracting him from this essential task.²³ One can reply to this as follows: first, the preventive stage, which consists of instructing members of the armed forces and inculcating habits and reflexes which are reconcilable with the requirements of the Conventions, does not take place during combat, but before – even before war has broken out.²⁴ Secondly it is appropriate to point out that orders are not only given during combat, but mostly beforehand. All orders given before combat should always and at every level include a reminder of the provisions of the Conventions that are relevant in the particular situation. Finally there is a problem which relates to the very essence of the organization of the armed forces. Although it is true that every military commander is responsible for everything that takes place in his sector, this does not mean that he must do everything himself: for example, members of the military police, medical officers, and specialists in the treatment of prisoners of war should be available at the appropriate levels, in addition to legal advisers, to assume, at the request of the commanders concerned, such tasks as may be assigned them in advance, for which they should be specially prepared, with a view to guaranteeing the best possible application of the Conventions and the Protocol when the time arrives, as well as setting in motion procedures for the suppression of breaches when necessary.

²⁰ On the fundamental role which the corps of officers is called upon to play to ensure respect for the rules of international law applicable in armed conflicts, see, for example, W. Williams, "The Law of War and 'Personnel Infrastructure'", XV-1-2 *RDPMDG*, 1976, pp. 19-35.

²¹ In this sense, see *O.R.* IX, p. 399, CDDH/1/SR.71, para. 2.

²² *Ibid.*, pp. 400-401, para. 11.

²³ See W.H. Parks, *op. cit.*, p. 19.

²⁴ *Cf.* Art. 83.

Protocol I

Article 88 – Mutual assistance in criminal matters

1. The High Contracting Parties shall afford one another the greatest measure of assistance in connection with criminal proceedings brought in respect of grave breaches of the Conventions or of this Protocol.
2. Subject to the rights and obligations established in the Conventions and in Article 85, paragraph 1, of this Protocol, and when circumstances permit, the High Contracting Parties shall co-operate in the matter of extradition. They shall give due consideration to the request of the State in whose territory the alleged offence has occurred.
3. The law of the High Contracting Party requested shall apply in all cases. The provisions of the preceding paragraphs shall not, however, affect the obligations arising from the provisions of any other treaty of a bilateral or multilateral nature which governs or will govern the whole or part of the subject of mutual assistance in criminal matters.

Commentary

General remarks

3564 The provisions of the Conventions relating to repression supplemented by this Section apply to the repression of breaches both of the Conventions and the Protocol;¹ thus grave breaches of the Conventions and the Protocol fall under universal jurisdiction. To ensure that no grave breach remains unpunished, each Contracting Party² has the right and duty to search for persons alleged to have committed, or to have given orders to commit,³ a grave breach. According to the relevant provision of the Conventions,⁴ each Contracting Party may, however, also

“if it prefers, and in accordance with the provisions of its own legislation, hand such persons over for trial to another High Contracting Party concerned, provided such High Contracting Party has made out a *prima facie* case”.

3565 The possibility of handing over the accused to be tried by another Contracting Party willing to prosecute him is an option open to the Contracting Party in whose territory the accused is or in whose hands he has fallen. In addition, handing over such people is subject to the conditions laid down in the legislation of the requested Party and the other Contracting Party (i.e., the requesting Party) must have made out a *prima facie* case against the accused.⁵

3566 National legislation may pose conditions, e.g., it may require that there is an extradition treaty or that reciprocal rights are given by the requesting State. It may impose restrictions such as the quite common prohibition of extraditing its own nationals or a prohibition of extradition if the accused is punishable in the

¹ Cf. introduction to this Section, *supra*, pp. 973-977, and commentary Art. 85, para. 1, *supra*, p. 992.

² On this point, *cf.* the above-mentioned introduction, *supra*, p. 975 and note 8.

³ Cf. *ibid.*, pp. 974 and 979-980.

⁴ Para. 2 *in fine* of common Article 49/50/129/146.

⁵ This does not exclude the possibility of handing over a suspect to an international criminal tribunal established and competent to deal with such breaches (*cf.* introduction to this Section, *supra*, p. 975, note 10).

requesting State in a way that is not accepted by the law of the requested State; this last obstacle may be overcome by a guarantee by the requesting State that the punishment in question will not be imposed in that particular case. Moreover, it should be noted that handing over of an accused to another State is often subject to the specialty principle, i.e., the accused may only be tried for the offence for which he is being extradited.

3567 The requirement of a *prima facie* case being made against the defendant by the requesting country is not only to protect individuals against excessive or unjustified requests, but also to ensure that penal proceedings as envisaged will not be frustrated or reduced in scope as a result of the transfer to another Contracting Party.

3568 This article is in accordance with the system outlined above. The Conference was presented with two draft articles (78 and 79) dealing separately with mutual assistance and extradition, respectively. In the end it combined the two articles to form one. It abandoned provisions on various special aspects of extradition, keeping only the provisions of paragraph 2, as to be read in conjunction with paragraph 3. Paragraph 1, which is also to be read in conjunction with paragraph 3, confirms the duty to afford such mutual assistance as is necessary for the prosecution of any grave breaches wherever they have been committed and wherever those guilty of them may be.⁶

3569 If its legal system so requires, each Contracting Party must, in accordance with Article 80 (*Measures for execution*), take all necessary legislative or other measures for the application of the present article.⁷

3570 This article was adopted in Committee I after a vote, and in plenary by consensus.⁸

Paragraph 1

3571 This paragraph is concerned with mutual assistance in criminal matters in a narrow sense.⁹ The Parties to the Protocol undertake to afford one another the greatest possible measure of assistance in any proceedings relating to a grave breach. Such mutual assistance involves the compilation and exchange of

⁶ On this article and related problems, we refer to the following works quoted in the introduction to this Section (*supra*, p. 973, note 2): M.C. Bassiouni, *op. cit.*, pp. 196, 211-217; E.J. Roucouas, *op. cit.*, pp. 63-64, 67, 136-138; B.V.A. Röling, "Aspects of the Criminal Responsibility...", *op. cit.*, pp. 200, 202-203; Ph. Bretton, "La mise en œuvre...", *op. cit.*, pp. 412-413; G.I.A.D. Draper, "The Implementation...", *op. cit.*, pp. 37-42; "Incidences...", *op. cit.*, p. 426; H.-H. Jescheck, "War Crimes", *op. cit.*, p. 297; G.I.A.D. Draper, "War...", *op. cit.*, p. 324; M. Aubert, *op. cit.*, pp. 372-374.

⁷ Cf., for example, the conclusions in this regard in "Incidences...", *op. cit.*, p. 426.

⁸ Cf., respectively, *O.R.* IX, p. 394, CDDH/I/SR.70, para. 43 (vote: 70-0-3); *O.R.* VI, p. 309, CDDH/SR.45, para. 13.

⁹ In the broad sense, as used in the heading of the article and in the second sentence of paragraph 3, the expression also covers questions relating to extradition.

information, and in general, any assistance with a view to the tracing, arrest and trial of suspects.¹⁰

- 3572** This may concern mutual assistance for criminal proceedings conducted in another country, such as the notification of documents, tracing evidence, handing over files and documents, conducting searches etc. It may also concern handing over the prosecution or the execution of foreign criminal judgments.¹¹
- 3573** The principle of mutual assistance is certainly implied in the common article of the Conventions which makes grave breaches subject to universal jurisdiction, even though the conditions and modalities of such mutual assistance are determined by the law of the Contracting Party to whom the request is made (in accordance with paragraph 3 of the present article).

Paragraph 2

- 3574** As indicated in the general remarks, the question of the legal basis necessary for extradition is dealt with in very different ways in different countries: some countries make any extradition of a person in their custody subject to the existence of a bilateral or multilateral extradition treaty between themselves and the requesting State.¹² Others do not require a treaty and can proceed to extradition on the basis of national law.¹³ Finally, among those which require a treaty for extradition to take place, some consider that Article 49/50/129/146 common to the Conventions constitutes a sufficient legal basis in this respect.¹⁴
- 3575** The Conference was not able to agree on a text which would have established that the Conventions or the Protocol would constitute the legal basis necessary for those States which require a treaty as a basis for any extradition.
- 3576** Some States wanted to adopt as a general rule that there should, in general, be extradition to the country where the alleged grave breach had been committed.¹⁵

¹⁰ Cf. for example, Resolution 3074 (XXVIII) of the United Nations General Assembly, which was often cited in the discussions, on the principles of international co-operation in the detection, arrest, extradition and punishment of persons guilty of war crimes and crimes against humanity.

¹¹ Examples taken from the Swiss federal law on international mutual assistance in criminal matters of 20 March 1981 (RS 351.1) which applies to grave breaches of humanitarian law; on this point, cf. M. Aubert, *op. cit.*, pp. 372-374.

¹² Cf. O.R. IX, p. 158, CDDH/I/SR.53, para. 45; p. 153, para. 52.

¹³ Cf. *ibid.*, p. 25, CDDH/I/SR.43, paras. 48-49.

¹⁴ Cf. *ibid.*, pp. 412-413, CDDH/I/SR.71, para. 63.

¹⁵ Based on the above-mentioned Resolution 3074 (XXVIII) (*supra*, note 10) these countries had submitted amendment CDDH/I/310 and Corr.1, and Add.1 and 2 (O.R. III, p. 334) to this effect. This rule was contained in the Moscow Declaration of 30 October 1943 on German atrocities, adopted by the Soviet Union, the United Kingdom and the United States; the rule was said to be “without prejudice to the case of the major criminals whose offences have no particular geographical localization”. On these points this Declaration was confirmed by the London Agreement of 8 August 1945. The 1948 Convention on genocide recognizes the competence of the State where the crime was committed; the 1968 Convention on non-applicability of statutory limitations requires making possible “the extradition, in accordance with international law”; the above-mentioned Resolution 3074 (XXVIII) provides, in addition to the rule that was indicated,

(continued on next page)

This proposal was only retained in part, namely in the form of an obligation to consider such a request in accordance with the second sentence of this paragraph, because of the opposition of other States to extradition being given special priority, or in general, to give this any systematic preference.¹⁶

- 3577** According to the final wording of this paragraph, it is subject to the rights and obligations arising from the Conventions and from Article 85 (*Repression of breaches of this Protocol*), paragraph 1, of the Protocol. As long as the penal repression of grave breaches is ensured, the right of each Contracting Party to choose between prosecuting a person in its power or to hand him over to another Party interested in prosecuting him therefore remains absolute, subject to the legislation of the Party to which the request is addressed, and to any other treaties applicable in the case in question.
- 3578** On the other hand, there is a duty to co-operate in the matter of extradition when circumstances permit: taking into account the provisions of paragraph 3, this involves giving favourable consideration to a request for extradition from a country justifying its legal interest in the prosecution, if the conditions imposed by the law of the State to which the request is made are satisfied. The interest of another Contracting Party in the prosecution may be founded on the fact that the grave breach was committed in its territory, or that it was committed against its nationals.¹⁷
- 3579** Thus a State presented with a request for extradition not only has to choose between prosecuting the accused itself and extraditing him, but also, as the case may be, between the respective merits of two or more concurrent requests for extradition.
- 3580** The Conference did not adopt a phrase in the draft which was designed to prevent grave breaches from being treated as political offences for the purpose of extradition. The intention of this phrase had been to preclude the requested Party refusing extradition – assuming that all the other conditions of extradition were satisfied – on the basis of the argument that the motive or purpose of the breach had been political. Several recent universal or regional treaties, including the Convention on genocide (Article VII), contain explicit provisions on this subject. This question, too, has to be resolved in each case on the basis of the national legislation and the relevant treaties;¹⁸ once again, without having to settle the question whether the political nature of grave breaches may be invoked, we

that every State has the right to try its own nationals for war crimes; the formulation of 1950 of the Principles of Nuremberg and the Draft Code so far do not deal with this question (on these various texts, *cf.* introduction to this Section, *supra*, pp. 977-979. *Cf.* also commentary Art. 75, para. 7, *supra*, p. 887.

¹⁶ *Cf.* O.R. IX, p. 149, CDDH/I/SR.53, para. 9; p. 151, para. 16; p. 156, para. 36; p. 158, para. 42; p. 176, CDDH/I/SR.54, paras. 74-75.

¹⁷ The sponsors of amendment CDDH/I/310 and Corr.I and Add.1 and 2 (*cf. supra*, note 15) recognized the legitimacy of such a request: *cf.* O.R. IX, p. 172, CDDH/I/SR.54, para. 49.

¹⁸ On the question as a whole, *cf.* C. van den Wijngaert and B. de Schutter, "Terrorisme individuel et terrorisme d'Etat: une différence d'analyse", *Revue internationale de criminologie et de police technique*, 1982, p. 263; see also L. Oppenheim, *op. cit.*, pp. 588-589 (note 4); M.C. Bassiouni, *op. cit.*, pp. 199-200; B.V.A. Röling, "Aspects of the Criminal Responsibility..." , *op. cit.*, p. 202; G.I.A.D. Draper, "The Implementation..." , *op. cit.*, p. 40; M. Aubert, *op. cit.*, p. 372.

should stress the absolute need to punish those guilty of grave breaches, with or without extradition.

3581 It should be noted that the right of asylum may not be invoked by persons suspected of acts contrary to the purposes and principles of the United Nations, or of war crimes.¹⁹ Those suspected of war crimes are also excluded from instruments protecting refugees and stateless persons.²⁰

Paragraph 3

3582 This paragraph, which covers matters dealt with in the two preceding paragraphs, makes every request, whether it concerns mutual assistance in a narrow sense or extradition, subject to the law of the Party requested: for both aspects it confirms the provisions of the above-mentioned common article of the Conventions regarding handing over accused persons to another Contracting Party.

3583 In all those cases where national law incorporates bilateral or multilateral treaties binding the requested State, or where the legislation accords with such treaties, the second sentence of the paragraph could have been omitted without changing the substance.

3584 Therefore States remain free to draft such legislation and to conclude such treaties as they wish, within the limits imposed by the obligation to repress by penal measures grave breaches of the Conventions and of the Protocol.

B.Z.

¹⁹ See, respectively, the Universal Declaration of Human Rights of 1948, Art. 14; and the 1967 Declaration on Territorial Asylum (Resolution 2312 (XXII) of the United Nations General Assembly), Art. 1.

²⁰ Convention of 1951 Relating to the Status of Refugees, Art. 1, Section F, sub-para. (a); Convention of 1954 Relating to the Status of Stateless Persons, Art. 1, para. 2(iii)(a); 1950 Statute of the Office of the United Nations High Commissioner for Refugees, para. 7(d).

Protocol I

Article 89 – Co-operation

In situations of serious violations of the Conventions or of this Protocol, the High Contracting Parties undertake to act, jointly or individually, in co-operation with the United Nations and in conformity with the United Nations Charter.

¹ This written statement from Spain was mistakenly reported under Art. 7: in fact it concerns the draft article that was to be placed before or after draft Art. 70 (and which is now Art. 89); *cf.* moreover *O.R.* VI, pp. 348-349, CDDH/SR.46, paras. 53 and 60, and the Annex to the same record, which does not contain the statement announced by Spain.

Commentary

General remarks

- 3585** This article resulted from a discussion which was essentially concerned with reprisals,² but it does not deal with that subject either explicitly or implicitly. Nevertheless, together with other articles of the Conventions and of the Protocol, it should help to make reprisals unnecessary, even in situations where they are not explicitly prohibited. Like provisions concerned with the individual and collective responsibility of the Contracting Parties, the mechanisms for execution and supervision, fact-finding and repression, this article actually has as its purpose the ensuring of respect for the law, and more especially, the prevention of breaches being answered by further breaches.³
- 3586** Despite the very general wording of its heading, this article refers only to co-operation with the United Nations. This is in addition to other forms of co-operation between Contracting Parties, such as Article 1 (*General principles and scope of application*),⁴ in which the Contracting Parties undertake to respect and to ensure respect for the Protocol in all circumstances; Article 7 (*Meetings*), which provides for meetings of the Contracting Parties to consider general problems concerning the application of the Conventions and of the Protocol; the provisions concerning the repression of breaches, in particular those calling for the greatest measure of mutual assistance in criminal matters.⁵
- 3587** This provision results from a proposal which was considered at the same time as two other proposals explicitly relating to reprisals.⁶ As the Working Group was unable to agree on a single text, the present wording was returned to the Committee together with other proposals;⁷ when these were withdrawn, it was adopted in Committee after a vote.⁸ The plenary Conference also adopted it after a vote.⁹ Both in Committee and in the plenary Conference several delegations regretted that this provision was not considered and discussed in greater detail.¹⁰

Situations envisaged

- 3588** The meaning of the words “in situations of serious violations of the Conventions or of this Protocol” was not elucidated during the Conference. The expression “serious violations” is only used in one other place in the Protocol, viz., in Article 90 (*International Fact-Finding Commission*), paragraph 2(c)(i).¹¹
- 3589** The system of the Conventions and the Protocol requires that the Contracting Parties suppress any act or omission contrary to the provisions of these instruments; furthermore they must impose penal sanctions on conduct defined by these same instruments as “grave breaches”.¹²
- 3590** The terms “violation” and “breach” may be considered to be synonymous, and both cover any conduct – both acts and omissions – contrary to the Conventions or the Protocol. Does this mean that the expressions “grave breaches” and “serious violations” are also synonymous?
- 3591** The principal elements of the answer can be found in Article 90 (*International Fact-Finding Commission*), of which the above-mentioned paragraph 2(c)(i) distinguishes grave breaches *as defined* in the Conventions and the Protocol, and other serious violations *of* the Conventions or *of* the Protocol. The latter term therefore refers to conduct contrary to these instruments which is of a serious nature but which is not included as such in the list of “grave breaches”.
- 3592** We do not need to have in mind exactly what conduct could fall under this definition, to be able nevertheless to distinguish three categories that qualify:
- isolated instances of conduct, not included amongst the grave breaches, but nevertheless of a serious nature;¹³
 - conduct which is not included amongst the grave breaches, but which takes on a serious nature because of the frequency of the individual acts committed or because of the systematic repetition thereof or because of circumstances;
 - “global” violations, for example, acts whereby a particular situation, a territory or a whole category of persons or objects is withdrawn from the application of the Conventions or the Protocol.
- 3593** In this article, as in the above-mentioned Article 90 (*International Fact-Finding Commission*), the situations envisaged are undeniably those of grave breaches or

¹¹ The word “violation”, which is also found in the Conventions (Art. 52/53/132/149) appears several times in the Protocol, for example, in Art. 51 (para. 8), 85 (para. 4), 87 (para. 3, which uses “breach” and “violation” synonymously) and 90 (para. 2). The expression “material breach” is used in Article 60 (para. 7) and the verb “violates” in Article 91. Finally, the expression “in violation of” is used four times in Article 85 (paras. 3 and 4).

¹² Conventions, articles mentioned *supra*, note 5; Protocol, Arts. 85-86. On the repression of breaches in general, *cf.* introduction to this Section, *supra*, pp. 973-977.

¹³ *Cf.* for example introduction to this Section, *supra*, p. 976, note 11, and commentary Art. 85, *supra*, p. 991 and note 4.

other serious violations. Nevertheless, it is not concerned with situations where the wrongful conduct remains rare and isolated, so that other mechanisms expressly established for prevention, supervision and repression are to be adequate.

Addressees

3594 The article prescribes for all Contracting Parties, and not only those who are Members of the United Nations, that they should act in those situations in co-operation with the Organization and in conformity with its Charter.¹⁴ Thus there will be States bound by the Protocol and this article who are not Members of the United Nations.¹⁵ It should be noted that the United Nations, by virtue of the Charter, must ensure that States which are not Members act in accordance with the principles laid down in Article 2 of the United Nations Charter “so far as may be necessary for the maintenance of international peace and security”.¹⁶ Furthermore, without referring to the observer status they may enjoy, States which are not Members may still bring certain questions before the United Nations or participate in certain discussions.¹⁷

Prescribed action

3595 The wording of this article follows *mutatis mutandis* Article 56 of the United Nations Charter which is aimed at co-operation for the achievement of universal respect for, and observance of, human rights and fundamental freedoms for all with a view to ensuring peaceful and friendly relations among nations. The scope of application of such co-operation is obviously more restricted here, since it is concerned with situations covered by the Conventions and the Protocol, but it is no less justified.

3596 Acting for the protection of man, also in time of armed conflict,¹⁸ accords with the aims of the United Nations no less than does the maintenance of international peace and security.¹⁹ The Organization showed its concern in two main ways: first, by its participation in the process of reaffirming and developing international humanitarian law;²⁰ secondly, by its resolutions on the applicability of humanitarian law and requiring its application to given situations or categories of persons, and also by issuing reports evaluating the application and respect of that law.

¹⁴ For a complete list of references in the Protocol to the United Nations, its Charter and its signs, emblems and uniforms, *cf.* commentary Preamble, *supra*, p. 26, note 8.

¹⁵ As of 31 December 1984 these were the Republic of Korea and Switzerland; these States did not make reservations or declarations on this article.

¹⁶ Charter of the United Nations, Art. 2, para. 6.

¹⁷ *Ibid.*, Art. 11, para. 2, and Arts. 32, 35 and 50.

¹⁸ *Cf.* the resolutions of the General Assembly and reports of the Secretary-General entitled “Respect for human rights in armed conflict” (*cf. infra*, pp. 1573-1576).

¹⁹ United Nations Charter, Preamble and Art. 1.

²⁰ *Cf.* references given *supra*, note 18.

- 3597** The United Nations actions to which Article 89 refers may therefore consist of issuing an appeal to respect humanitarian law, just as well as, for example, setting up enquiries on compliance with the Conventions and the Protocol and even, where appropriate, of coercive actions which may include the use of armed force.²¹ United Nations actions may also take the form of assistance in terms of material or personnel, given to Protecting Powers, their substitutes or to humanitarian organizations.
- 3598** This article is without prejudice to any of the provisions of the United Nations Charter to which reference is made. The Protocol, as stated in its Preamble, does not authorize any threat or use of force inconsistent with the United Nations Charter.²² Consequently the Protocol does not impair the right of individual or collective self-defence as recognized under Article 51 of the United Nations Charter until such time as the Security Council may have taken the necessary measures to maintain peace. Any use of force, individual or collective, even when consistent with the Charter, is subject to the rules of international law applicable in armed conflict, in particular those codified in the Conventions and the Protocol.²³
- 3599** Except for States bound by the Protocol which are not Members of the United Nations, this article does not create new law. It leaves intact the right of States to individual or collective self-defence as laid down in Article 51 of the United Nations Charter while respecting international humanitarian law. It is a reminder that, in addition to maintaining international peace and security, the United Nations is concerned with respect for human rights, also in time of armed conflict.

B.Z.

²¹ Relevant articles of the Charter: (a) General Assembly: 10, 11 (paras. 2 and 3), 12, 14 and 15; (b) Security Council: 24, 39-51. In addition, the General Assembly, in its Resolution 377 (V) of 1950 (“Uniting for Peace”), confirmed its competence to recommend collective measures, including the use of armed force when necessary, if the Security Council because of lack of unanimity fails to act where there appears to be a threat to the peace, breach of the peace, or act of aggression.

²² In any case this would be inconceivable in view of Art. 103 of the United Nations Charter: obligations of Members under the Charter prevail over those under any other international agreement. We refer also to the Vienna Convention on the Law of Treaties of 23 May 1969, Arts. 30 (para. 1) and 31 (para. 3(c)).

²³ On the applicability of the law of armed conflict to United Nations forces, *cf.* F. Seyersted, *op. cit.*; Y. Sandoz, “The Application of Humanitarian Law by the Armed Forces of the United Nations Organization”, *IRRC*, Sept.-Oct. 1978, p. 274; D. Schindler, “United Nations Forces and International Humanitarian Law”, *op. cit.*, p. 521.

Article 90 – International Fact-Finding Commission

1. (a) An International Fact-Finding Commission (hereinafter referred to as “the Commission”) consisting of fifteen members of high moral standing and acknowledged impartiality shall be established.
- (b) When not less than twenty High Contracting Parties have agreed to accept the competence of the Commission pursuant to paragraph 2, the depositary shall then, and at intervals of five years thereafter, convene a meeting of representatives of those High Contracting Parties for the purpose of electing the members of the Commission. At the meeting, the representatives shall elect the members of the Commission by secret ballot from a list of persons to which each of those High Contracting Parties may nominate one person.
- (c) The members of the Commission shall serve in their personal capacity and shall hold office until the election of new members at the ensuing meeting.
- (d) At the election, the High Contracting Parties shall ensure that the persons to be elected to the Commission individually possess the qualifications required and that, in the Commission as a whole, equitable geographical representation is assured.
- (e) In the case of a casual vacancy, the Commission itself shall fill the vacancy, having due regard to the provisions of the preceding subparagraphs.
- (f) The depositary shall make available to the Commission the necessary administrative facilities for the performance of its functions.
2. (a) The High Contracting Parties may at the time of signing, ratifying or acceding to the Protocol, or at any other subsequent time, declare that they recognize *ipso facto* and without special agreement, in relation to any other High Contracting Party accepting the same obligation, the competence of the Commission to enquire into allegations by such other Party, as authorized by this Article.
- (b) The declarations referred to above shall be deposited with the depositary, which shall transmit copies thereof to the High Contracting Parties.
- (c) The Commission shall be competent to:
 - (i) enquire into any facts alleged to be a grave breach as defined in the Conventions and this Protocol or other serious violation of the Conventions or of this Protocol;
 - (ii) facilitate, through its good offices, the restoration of an attitude of respect for the Conventions and this Protocol.

- (d) In other situations, the Commission shall institute an enquiry at the request of a Party to the conflict only with the consent of the other Party or Parties concerned.
- (e) Subject to the foregoing provisions of this paragraph, the provisions of Article 52 of the First Convention, Article 53 of the Second Convention, Article 132 of the Third Convention and Article 149 of the Fourth Convention shall continue to apply to any alleged violation of this Protocol.
3. (a) Unless otherwise agreed by the Parties concerned, all enquiries shall be undertaken by a Chamber consisting of seven members appointed as follows:
- (i) five members of the Commission, not nationals of any Party to the conflict, appointed by the President of the Commission on the basis of equitable representation of the geographical areas, after consultation with the Parties to the conflict;
 - (ii) two *ad hoc* members, not nationals of any Party to the conflict, one to be appointed by each side.
- (b) Upon receipt of the request for an enquiry, the President of the Commission shall specify an appropriate time limit for setting up a Chamber. If any *ad hoc* member has not been appointed within the time limit, the President shall immediately appoint such additional member or members of the Commission as may be necessary to complete the membership of the Chamber.
4. (a) The Chamber set up under paragraph 3 to undertake an enquiry shall invite the Parties to the conflict to assist it and to present evidence. The Chamber may also seek such other evidence as it deems appropriate and may carry out an investigation of the situation *in loco*.
- (b) All evidence shall be fully disclosed to the Parties, which shall have the right to comment on it to the Commission.
- (c) Each Party shall have the right to challenge such evidence.
5. (a) The Commission shall submit to the Parties a report on the findings of fact of the Chamber, with such recommendations as it may deem appropriate.
- (b) If the Chamber is unable to secure sufficient evidence for factual and impartial findings, the Commission shall state the reasons for that inability.
- (c) The Commission shall not report its findings publicly, unless all the Parties to the conflict have requested the Commission to do so.
6. The Commission shall establish its own rules, including rules for the presidency of the Commission and the presidency of the Chamber. Those rules shall ensure that the functions of the President of the Commission are exercised at all times and that, in the case of an enquiry, they are exercised by a person who is not a national of a Party to the conflict.
7. The administrative expenses of the Commission shall be met by contributions from the High Contracting Parties which made declarations under paragraph 2, and by voluntary contributions. The Party or Parties to the conflict requesting an enquiry shall advance the necessary funds for expenses incurred by a Chamber and shall be reimbursed by the Party or Parties against which the allegations are made to the extent of fifty per cent

of the costs of the Chamber. Where there are counter-allegations before the Chamber each side shall advance fifty per cent of the necessary funds.

Commentary

3600 Proposals had already been put forward in 1949 aimed at automatically setting into motion a procedure of enquiry in the case of a breach of the Conventions. However, after lengthy discussion,¹ it had finally been necessary to abandon

¹ See *Commentary I*, pp. 374-379.

these efforts and settle for the brief provision contained in the four Conventions of 1949.² This provision never achieved a tangible result. Despite the efforts of the ICRC, States never succeeded in actually setting up an enquiry because the consent of the Parties concerned was lacking.³

- 3601** From the beginning of the *travaux préparatoires* to the Diplomatic Conference of 1974-1977, the necessity for some form of check on compliance with the rules applicable in case of armed conflict was emphasized by the experts. The development of Article 5 (*Appointment of Protecting Powers and of their substitute*), and the provision relating to the training of qualified personnel (Article 6 – *Qualified persons*) reflect this concern. However, some wished for an additional mechanism,⁴ a sort of “fall back” institution.⁵
- 3602** The ICRC, for its part, was not at all opposed to this. It has always considered that it was not itself an investigative body, publishing findings and reporting on breaches.⁶ However, because there was no specific proposal from the experts, it did not include in the draft a provision relating to commissions of enquiry. Thus the main foundations for the present article were two amendments,⁷ presented during the course of the Conference. One of these proposals was even more ambitious than the present Article 90, since it was entitled “Permanent Commission for the Enforcement of Humanitarian Law”, while the other proposal bore the title “International Enquiry Commission”. In one of the drafts the members of the commission were to be appointed by the ICRC, while the other draft recommended the establishment of regional lists for this purpose. These texts gave rise to new amendments⁸ and proposals. Long and difficult discussions took place in the Committee.⁹ Voting took place almost paragraph by paragraph, and the text was finally adopted as a whole with 40 votes in favour, 18 against, and 17 abstentions.¹⁰ More or less the same happened in the plenary meeting which finally adopted the text of the article with 49 votes in favour, 21 against, and 15 abstentions.¹¹

² First Convention, Art. 52; Second Convention, Art. 53; Third Convention, Art. 132; Fourth Convention, Art. 149. This procedure of enquiry should not be confused with that provided for in Arts. 121, Third Convention, and 131, Fourth Convention, concerning prisoners or internees killed in special circumstances.

Paragraph 1 – Establishment of the Commission and election of its members*Sub-paragraph (a)*

- 3603** The Commission in question is an International Fact-Finding Commission¹² consisting of fifteen members. This title actually indicates the scope of the Commission's competence. In principle it is only concerned with facts, and essentially has no competence to proceed to a legal assessment of the facts that have been established. However, the analysis of paragraph 2(c) of this article, which defines the Commission's area of competence more precisely, will show that the Commission may be called upon to provide a legal evaluation of the extent of its mandate. Similarly, paragraph 5 shows that the Commission's conclusions may go beyond simply reporting the facts.
- 3604** The composition of fifteen members corresponds to the proposals of some of the initiators of the article,¹³ and seems appropriate when one refers to paragraph 3 which provides that the enquiry shall be undertaken by a Chamber of seven members, of whom only five have to be members of the Commission. Thus it is possible to constitute simultaneously two, or even three Chambers, depending on the requirements of the situation.
- 3605** The members of the Commission must have a high moral standing and their impartiality must be "acknowledged". This phrase is also found with regard to the supervisory bodies set up under some of the human rights conventions.¹⁴
- 3606** Thus the criterion of impartiality is opposed to the election of persons who are too closely linked by their function or their profession to the politics of the State from which they come.¹⁵
- 3607** Similarly a person who is known for his uncompromising public position with regard to States which are or could be involved in an armed conflict, would not be eligible. Furthermore, it is self-evident that once they have been elected, members of the Commission should abstain from making any public comment on current armed conflicts.¹⁶

¹² For the efforts made in this field by the United Nations, see the two reports of the Secretary-General "Questions of methods on fact-finding" (General Assembly, 21st session, Resolution 2182 of 12 December 1966, Official Documents, supplement No. 16 (A/6316)), and Resolution 2329 of 18 December 1967 (*ibid.*, 22nd session, supplement No. 16 (A/6716)), and B.G. Ramcharan (ed.), *International Law and Fact-Finding in the Field of Human Rights, International Studies in Human Rights*, The Hague, 1982. See also *SIM Conference on Human Rights Fact-Finding, Utrecht 1983, Final Report*, The Netherlands Institute of Human Rights.

¹³ *O.R.* III, p. 338, CDDH/I/241, and Add.1. Another proposal envisaged a Commission of five members (*ibid.*, p. 340, CDDH/I/267). By way of comparison, the International Convention on the Elimination of all Forms of Racial Discrimination (Art. 8) provides for the establishment of a Committee consisting of eighteen experts. This Committee has the task of examining the reports submitted by the States Parties to the Convention on the measures they have taken to give effect to this Convention.

¹⁴ For example, see Art. 8 of the above-mentioned Convention.

¹⁵ In this respect, see the remarks of K.J. Partsch, in M. Bothe, K.J. Partsch and W.A. Solf, *op. cit.*, p. 542.

¹⁶ In this sense, see Ph. Bretton, "La mise en œuvre des Protocoles de Genève de 1977", *op. cit.*, p. 398, note 51.

- 3608** It should also be noted that once the conditions laid down in sub-paragraph (b) have been fulfilled, the obligation to establish the Commission is not related to the existence of an armed conflict. It is therefore a permanent, impartial and non-political body.

Sub-paragraph (b)

- 3609** This provision is closely related to the “optional clause on recognition of compulsory competence”, which is contained in paragraph 2(a).¹⁷ This means that the Commission will not be set up until twenty Contracting Parties have agreed to recognize *ipso facto* and in advance the Commission’s competence.¹⁸ Then, it must be constituted, and the depositary is bound to convene, at a constitutive meeting, the representatives of these twenty countries for the purpose of electing the members of the Commission. Thus it is primarily a body not of all the Parties to the Protocol, but of the Parties which in advance agree to accept its competence. Nevertheless, it is not excluded that other Parties to the Protocol may have recourse to the Commission in a particular case, as shown in paragraph 2(d).
- 3610** The members are elected for five years; at the end of this period the depositary convenes another meeting of all the Parties concerned, for the purpose of holding another election.
- 3611** The text contains only some brief ideas on the procedure to be followed during these meetings. However the depositary may seek guidance, for example, from the provisions contained in certain conventions on human rights, to resolve problems that have not been regulated: quorum, required majority, possibility of re-election etc.¹⁹ The States participating in the meeting may obviously choose candidates from their own nationals. However, in view of the increased competence given the Commission in case of application of paragraph 2(d), it would seem desirable that the Commission is not exclusively composed of representatives of the electing countries.

Sub-paragraph (c)

- 3612** The Commission is independent from the States which establish it. This independence is clearly indicated in sub-paragraph (c) by the words which state that the members serve “in their personal capacity”, i.e., in complete freedom. They do not receive instructions. In this context it may be recalled that the members of the Human Rights Committee take an oath or make a solemn

¹⁷ The final wording is due to a last minute amendment (O.R. III, p. 344, CDDH/416, and O.R. VI, pp. 322-325, CDDH/SR.45).

¹⁸ For States which accepted *ipso facto* the competence of the Commission, see *infra*, para. 2 (a), p. 1044.

¹⁹ See, for example, Art. 30 of the International Covenant on Civil and Political Rights, which relates to the procedure for the election of the Human Rights Committee.

declaration, partly inspired by the one taken by judges of the International Court of Justice, to perform their duties and exercise their powers “honourably, faithfully, impartially and conscientiously”.²⁰

Sub-paragraph (d)

- 3613** Candidates must have “the qualifications required”. One suggestion presented during the discussions was aimed at nominating experts who should “not only be of great personal integrity but should be acquainted with, and have interdisciplinary experience of, the various aspects of the Geneva Conventions and the Protocols”.²¹ It should be recalled in this respect that the members of the Commission could not leave any legal problem wholly out of consideration.
- 3614** As regards the clause which requires an equitable geographical representation, this is common for bodies with supervisory functions under the human rights conventions which combine it with the requirement of “representation of the different forms of civilization and of the principal legal systems”.²² The last point may be important for the assessment of evidence (paragraph 4).²³ The criterion of geographical distribution should, if possible, be considered in relation to all the Parties to the Protocol and the Conventions, and not only the countries which recognize *ipso facto* the Commission’s competence.²⁴

Sub-paragraph (e)

- 3615** In the case of a vacancy, the Commission proceeds by co-option, based on the original list of candidates presented at the constitutive meeting or the last meeting convened for an election. The candidate who obtained most votes from the reserve list will not necessarily be elected, since the criteria of qualification and geographical distribution must be respected.²⁵

Sub-paragraph (f)

- 3616** This clause seems to cover only the availability of the necessary locations and secretarial facilities,²⁶ independently of the expenses provided for under paragraph 7.

²⁵ M. Bothe, K.J. Partsch, W.A. Solf, *op. cit.*, p. 543.

²⁶ Cf. *ibid.*

Paragraph 2 – The Commission’s area of competence*Sub-paragraph (a)*

3617 By analogy with Article 36, paragraph 2, of the Statute of the International Court of Justice, this provision contains an optional clause on recognition of compulsory competence²⁷ for States which at the time of signing, ratifying or acceding to the Protocol, or at any subsequent time, declare that they recognize this competence *ipso facto* (*de plein droit* in the French version) with respect to any other State making the same declaration. Thus only those States which choose to, and which commit themselves in advance, are bound by the obligation to accept the enquiry. This formulation²⁸ established a compromise between two positions which created a serious rift between the participants of the Conference, one side insisting on a system of compulsory enquiry, while the other was irreversibly opposed to what they regarded as an intolerable encroachment on the sovereignty of States.²⁹ A final attempt to make the enquiry compulsory “in the case of a violation of the rules in occupied territory” also failed in plenary meeting of the Conference,³⁰ even with a restriction limiting this clause to territory occupied as a result of aggression.³¹

3618 There is no doubt that only States are competent to submit a request for an enquiry to the Commission, to the exclusion of private individuals, representative bodies acting on behalf of the population, or organizations of any nature. On the other hand, there is no reason why a Protecting Power, duly entrusted in protecting the interests of a Party to the conflict which had recognized the Commission’s competence, could not submit a request to the latter in the context of its general mandate. Moreover, it is not necessarily the Party which is the victim of the alleged violation which requests the enquiry. Any Contracting Party in the sense of paragraph 1 (b) can do so, provided that the request applies to another Contracting Party in the sense of the same provision. As regards the Commission, it is absolutely not permitted to act on its own initiative.³²

Sub-paragraph (b)

3619 This provision obliges the depositary to notify all Parties to the Protocol, and even all Parties to the Conventions in accordance with Article 100 (*Notifications*),

²⁷ Cf. Ph. Bretton, “La mise en œuvre des Protocoles de Genève de 1977”, *op. cit.*, p. 398.

²⁸ Accepted in plenary meeting with 43 votes in favour, 13 against, and 33 abstentions (see *O.R.* VI, p. 325, CDDH/SR.45, para. 79).

²⁹ On this controversy, see E. Kussbach, “Commission internationale d’établissement des faits”, XX-1-2 *RDPMDG*, 1981, p. 78, at pp. 96-101.

³⁰ *O.R.* VI, pp. 313 and 317, CDDH/SR.45, paras. 29 and 48; for the discussion, see *ibid.*, pp. 311-318.

³¹ *Ibid.*, p. 324, para. 78.

³² Such a proposal was contained in the initial amendment CDDH/I/241 (*O.R.* III, p. 338), but was later abandoned. See also *O.R.* IX, p. 205, CDDH/I/SR.56, para. 73.

sub-paragraph (c), and not only the Contracting Parties who made a declaration on compulsory competence in accordance with sub-paragraph (a) of this paragraph.

Sub-paragraph (c)

(i) – Enquiry

- 3620** The Commission is competent to enquire into facts and not to judge. If a submission regarding certain facts alleged to have taken place is made in due form, i.e., in accordance with sub-paragraph (a) above, the Commission is competent to try and establish whether these facts took place.
- 3621** Moreover, this does not apply to all facts. The allegation which is submitted to the Commission must relate to a “grave breach” or “serious violation” of the Conventions or the Protocol. Thus the Commission must pass judgment on the admissibility of the request. Breaches and violations which are not serious are excluded, which in itself implies first of all a legal appraisal, which may not always be easy. Minor violations may become serious if they are repeated, and it is then up to the Commission to determine this,³³ in order to establish its competence. Virtually no distinction is made between grave breaches and serious violations in the text of the Conventions or the Protocol, which almost always refers to “grave breaches”. A serious violation may be found which is not covered by the list of grave breaches.³⁴
- 3622** As we saw above, only grave breaches and serious violations of the Conventions and the Protocol fall under the competence of the Commission, and not those of other rules of the law of armed conflict, whether these are rules of customary law or not. Thus it is up to the Commission to interpret the provisions of the Conventions and of the Protocol, where necessary, to determine its competence on this point.
- 3623** Some delegates at the Conference expressed the fear that in this way the Commission would come up against some thorny problems regarding its own competence, which could become a source of possible controversy.³⁵ This is yet another reason why the Commission should include amongst its members highly qualified lawyers. If the Commission had to spend a great deal of time on lengthy discussions regarding its own competence, its efficacy would be compromised.

³³ See *O.R.* IX, p. 53, CDDH/I/SR.45, para. 45. However, it is perfectly possible to imagine resort to the Commission to ensure the supervision of hospital zones and localities from time to time (First Convention, Art. 23 and Annex I, Arts. 8-10) and of hospital and safety zones and localities (Fourth Convention, Art. 14 and Annex I, Arts. 8-10) or non-defended localities or demilitarized zones (Arts. 59 and 60, Protocol I).

³⁴ E. Kussbach expresses the view that a serious violation (unlike a grave breach) engages the responsibility of the Party to the conflict without engaging, at an international level, the responsibility of the individual (“Commission internationale d’établissement des faits”, *op. cit.*, p. 101. In addition see introduction to this Section, *supra*, p. 976, note 11, and commentary Art. 89, *supra*, pp. 1033-1034.

³⁵ See *O.R.* VI, pp. 341-342, CDDH/SR.46.

(ii) – Good offices

- 3624** When it has taken note of facts which seem to it to constitute grave breaches or serious violations, the Commission is invited to facilitate, through its good offices,³⁶ the restoration of an attitude of respect for the provisions concerned. This clause is confirmed and even extended in paragraph 5 (a) below, in the sense that, in providing such good offices, the Commission has to submit to the Parties concerned such recommendations as it deems appropriate. Once again it is difficult to imagine that the Commission can invite the restoration of an attitude of respect for certain provisions without having first formed an opinion regarding their non-respect. However, as the Commission must not pronounce on questions of law, it must be careful not to include such elements of legal evaluation in its report. Thus they would only have internal value,³⁷ and the Commission should only express in the report a *prima facie* appraisal.³⁸
- 3625** The term “good offices” can be understood to mean the communication of conclusions on the points of fact, comments on the possibilities of a friendly settlement, written and oral observations by States concerned, etc.³⁹

Sub-paragraph (d)

- 3626** This sub-paragraph creates the possibility of resorting to the Commission for States which have not declared in advance that they recognize the competence of this Commission, in accordance with sub-paragraph (a) of this paragraph. This means that any Party to an international armed conflict, even if it is not a Party to the Protocol, may approach the Commission regarding an allegation of a grave breach or serious violation of the Conventions, which adds to the significance of the creation of the Commission. If such a Party to the conflict is a Party to the Protocol, it can do the same in the context of the Protocol. However, the Commission will consider itself to be competent only when the Party or Parties concerned give their consent. The question may arise whether such consent should be deemed to have been obtained in advance when the Party which is the subject of these allegations is one of those that recognized the Commission's competence *a priori* (sub-paragraph(a) above). This interpretation would undeniably introduce an element of inequality: the Parties to the conflict which have not recognized the compulsory competence of the Commission could force a Party which has recognized this competence to accept the enquiry, but not the

³⁶ Cf. Art. 41 (e) of the Covenant.

³⁷ In this sense, cf. M. Bothe, K.J. Partsch, W.A. Solf, *op. cit.*, p. 544.

³⁸ In this sense, cf. E. Kussbach, “Commission internationale d'établissement des faits”, *op. cit.*, p. 102.

³⁹ Cf. M. Schreiber, *op. cit.*, p. 365. See also B. Graefrath, “Die Untersuchungskommission im Ergänzungsprotokoll zu den Genfer Abkommen vom 12.8.1949”, *Wissenschaftliche Zeitschrift der Humboldt Universität zu Berlin*, Ges.-Sprachw. R.XXX (1981) 1, p. 13.

other way round.⁴⁰ This does not seem to correspond to the wording of sub-paragraph (a) of this paragraph. In fact the “other situations” referred to here are situations in which the conditions set out in sub-paragraph (a) have not been fulfilled and in which the clause on recognition of compulsory competence therefore does not apply. Only States which recognize the competence of the Commission *a priori* may impose an enquiry on a State which has done the same. This provision has the advantage of allowing all Parties to an armed conflict, including national liberation movements, to resort to the Commission on a case by case basis, but at any time, though obviously subject to the condition that the challenged Party gives its consent.

Sub-paragraph (e)

3627 The article which is common to the four Conventions and is referred to in this sub-paragraph, reads as follows:

“At the request of a Party to the conflict, an enquiry shall be instituted, in a manner to be decided between the interested Parties, concerning any alleged violation of the Convention.

If agreement has not been reached concerning the procedure for the enquiry, the Parties should agree on the choice of an umpire who will decide upon the procedure to be followed.

Once the violation has been established, the Parties to the conflict shall put an end to it and shall repress it with the least possible delay.”

3628 This obligation, which applies to all alleged violations, and not solely to grave breaches and serious violations, is not only confirmed, but is extended to all alleged violations of the Protocol. All Parties to the Protocol which do not recognize the Commission’s competence, as provided in this article, remain subject to the obligation to institute an enquiry at the request of a Party to the conflict, pursuant to the common article quoted above of the four Conventions. Similarly, all Parties to the Conventions and the Protocol which recognize the competence of the Commission as laid down in this article, remain subject, by reason of the same common article, to the obligation to institute an enquiry at the request of a Party to the conflict for all violations which do not fall under the Commission’s competence, i.e., for all violations which are not serious.

3629 Thus there is no change as far as basic obligations are concerned. However, this article common to the four Conventions has never in fact been applied. The wording is so succinct that the proceedings can be paralyzed at a procedural level at any time. It is precisely on this point that the present provision has achieved what is perhaps a decisive step forward with respect to allegations of grave breaches or serious violations.

⁴⁰ See *O.R.* VI, pp. 342 and 365, CDDH/SR.46. Moreover, Ch. Rousseau, *op. cit.*, p. 273, specifies that clauses of this type, because they are by way of an exception and subject to a restrictive interpretation when they are included in a treaty.

Paragraph 3 – The constitution of the Chamber of Enquiry*Sub-paragraph (a)*

- 3630** On some points the terms of this sub-paragraph are similar to those of Article 42 of the International Covenant on Civil and Political Rights which relate to the appointment of an *ad hoc* Conciliation Commission. However, it will be noted that the Protocol, by leaving open the possibility of any other solution which the Parties concerned may choose in common agreement, remains flexible and susceptible to any other formulation.
- 3631** The role of the President of the Commission is decisive for the constitution of the Chamber responsible for conducting the enquiry. Paragraph 6 of Article 90 contains provisions relating directly to him. The President is called upon to appoint five members of the Commission to form part of the Chamber “after consultation with the Parties to the conflict”. This expression differs from that used in the above-mentioned Article 42 of the Covenant, which requires “the prior consent of the States Parties concerned”. Thus it may be concluded that the President is not formally bound by the opinion of the Parties that have been consulted.⁴¹ In fact, it would seem desirable not only that the members of the Chamber are not nationals of a Party to the conflict, as stated in the text, but that they belong to neutral countries.⁴²
- 3632** The two *ad hoc* members, not nationals of any Party to the conflict, but appointed by these Parties, need not necessarily be chosen from the members of the Commission. They “represent” the Party which has appointed them and should contribute to creating an atmosphere of trust within the Chamber itself.⁴³

Sub-paragraph (b)

- 3633** In time of armed conflict, the time taken by the body responsible for supervising compliance with the applicable rules may be crucial, not only for the fate of possible victims but also with regard to the risk of counter-measures being taken by the Party which considers itself wronged.⁴⁴ On this latter point, the procedure provided for in Article 90 is intended to have a dissuasive effect,

⁴¹ In this respect, Ph. Bretton remarks that one might think that this is not just an opinion, since it would be very difficult for the president, who might be jeopardizing the success of the enquiry, to appoint someone who did not have the agreement of the Parties involved in the enquiry, and this obligation of consultation could well be transformed into a procedure of a binding opinion, even though, according to the text, the Parties do not have a power of veto here (“La mise en œuvre des Protocoles de Genève de 1977”, *op. cit.*, p. 401).

⁴² In this sense, see *O.R.* IX, pp. 208-209, CDDH/I/SR.57, para. 11, and p. 423, CDDH/I/SR.72, para. 47; see also *O.R.* VI, p. 376, CDDH/SR.46.

⁴³ In this sense, *cf.* E. Kussbach, “Commission internationale d’établissement des faits”, *op. cit.*, p. 103.

⁴⁴ With regard to reprisals, see introduction to this Section, *supra*, p. 981.

and from the time that a request for an enquiry is presented to the Commission, there is some degree of urgency.⁴⁵ Moreover, the longer matters drag on, the more difficult it may become to establish the facts precisely. Thus the President must react immediately to a request presented to him, and will himself appoint the two *ad hoc* members in case the Parties fail to do so,⁴⁶ perhaps after attempting a final consultation with the Parties.

Paragraph 4 – Conduct of the enquiry

Sub-paragraph (a)

3634 Once the Chamber has been constituted, it invites the Parties to the conflict concerned to assist it and to present evidence. The above-mentioned Convention on the Elimination of all Forms of Racial Discrimination provides in Article 11 that a State receiving a communication is to submit written explanations or statements clarifying the matter to the supervisory body, indicating, where appropriate, what measures have been taken to remedy the situation. It is also bound to furnish any relevant supplementary information when it is requested to do so. It may be admitted that the assistance of the Protecting Power can be called in a similar manner, if there is occasion to do so. If the Chamber carries out the investigation *in loco*, it is obvious that it should be provided with all the facilities necessary for this. Ideally it would be assisted by qualified personnel, in the sense of Article 6 of the Protocol (*Qualified persons*). Furthermore, model procedures have been established for this purpose for the organs of the United Nations which have to deal with violations of human rights.⁴⁷ Protocol II annexed to the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons⁴⁸ provides, in Article 8, that the head of an observation mission of the United Nations must be informed of the location of minefields in the area where an enquiry is being held.

⁴⁵ See *O.R.* IX, p. 65, CDDH/I/SR/46, para. 53; p. 86, CDDH/I/SR.48, para. 12; p. 194, CDDH/I/SR.56, para. 20.

⁴⁶ In this respect, see the interesting remarks by Ph. Bretton, "La mise en œuvre des Protocoles de Genève de 1977", *op. cit.*, pp. 401-402.

⁴⁷ Resolution 1870 (LVI) of the Economic and Social Council, which brought them to the attention of all organs and agencies of the United Nations concerned with human rights (*cf.* M. Schreiber, *op. cit.*, pp. 367 and 377, note 3); for the text, see B.G. Ramcharan, *op. cit.*, Annex I and II, pp. 231-248, and "Belgrade minimal rules of procedure for international human rights fact-finding missions", *ibid.*, pp. 250-252, and 75 *AJIL* I, 1981, pp. 163-165 (ILA).

⁴⁸ See *supra*, commentary Art. 35, para. 2, p. 402.

Sub-paragraphs (b) and (c)

3635 The rules of evidence laid down in these sub-paragraphs tend to confer to the Chamber's activity a quasi-judicial character.⁴⁹ Furthermore it should be noted that all "the Parties", which means the Parties *concerned* (see the French text which states "Parties concernées"), are covered by this provision, while the preceding sub-paragraph refers only to the Parties to the conflict. The evidence may implicate either a Party to the conflict which was not the object of the allegations made, whether or not it accepted the compulsory competence of the Commission, or a State which is not Party to the conflict (for example, in the case of internment in a neutral country).

Paragraph 5 – Report of the Commission*Sub-paragraph (a)*

3636 As regards its wording, this sub-paragraph is similar to Article 13, paragraph 1, of the above-mentioned International Convention on the Elimination of all Forms of Racial Discrimination. Under the terms of that article the States concerned receive a report containing the findings of the Commission "on all questions of fact relevant to the issue between the parties, and containing such recommendations as it may think proper for the amicable solution of the dispute". The similarity to the present sub-paragraph is striking, and it is therefore no longer merely a question of good offices, as in paragraph 2(c)(ii). This may be interpreted as a first step towards mediation.

Sub-paragraph (b)

3637 Unlike the corresponding provisions of the conventions on human rights,⁵⁰ this sub-paragraph does not determine the period within which the State accused of violation has to reply to the Chamber's requests. This question of the period of time is of great importance as it determines the moment when the Commission will have to expose publicly the responsibility of the Parties concerned, by publicly reporting on their shortcomings, if any. Thus the question must be resolved in the Commission's own rules, as required under paragraph 6. Depending on the situation, particularly when there is a danger of a violent reaction from the Party which considers itself wronged, the enquiry has to be conducted as rapidly as possible. The reproach of being far too slow could indeed be made of the analogous procedures instituted in the context of the human rights conventions.

⁴⁹ In this sense, see Ph. Bretton, "La mise en œuvre des Protocoles de Genève de 1977", *op. cit.*, p. 402.

⁵⁰ Covenant, Art. 41, para. 1(a), and Convention on the Elimination of all Forms of Racial Discrimination, Art. 11, para. 1, which provide for a period of three months.

Sub-paragraph (c)

3638 The wording of this sub-paragraph has given rise to controversy. For some, “the conclusions reached by a highly qualified international commission of inquiry would have the same effect as a sanction, and the incriminated Party would not be able to disregard them” for fear of public opinion.⁵¹ In fact, there may be a need for publicity even when no violation has been noted, to remove all suspicion from the incriminated Party. Other delegations contrasted the advantages of “discreet diplomacy”⁵² to these arguments. Such discretion could well be considered to be the prerogative of organs of conciliation. It was clearly this position which finally won the day, and indeed in the most restrictive form. A proposal aimed at prohibiting public disclosure, “unless the Parties consent thereto”, was rejected by the Conference.⁵³ Thus for the Commission to report its findings publicly there should be a request from all the Parties to the conflict, not the Parties to which paragraph 4(b) and (c) and paragraph 5(a) refer. The findings must be understood to mean the report as a whole, as well as its constitutive elements.

Paragraph 6 – The Commission’s own rules

3639 The Commission can refer, for the purpose of establishing its own rules and before adopting these rules, to models, such as the rules of supervisory organs under the human rights conventions, provided that it respects the conditions laid down in the present paragraph and by the article as a whole, and takes into account the requirements inherent in situations of armed conflict. The depositary can also use these rules as an example at the constitutive meeting of the High Contracting Parties provided for in paragraph 1(a), as long as this meeting has not adopted its own rules.⁵⁴

3640 Because of the central role of the President (see paragraph 3) the continuity of his function is explicitly referred to, on the one hand, and the necessity of providing for his replacement when need be, on the other hand, to ensure that this function is never exercised by a person who is a national of a Party to the conflict. In any case, like all members of the Commission, the President should be a person of the highest calibre and in every respect above suspicion.

Paragraph 7 – The Commission’s expenses

3641 The original proposals anticipated that the cost of the Commission would be met only by voluntary contributions channelled through the International

⁵¹ *O.R. IX*, p. 40, CDDH/I/SR.44, para. 69, and *O.R. VI*, p. 384, CDDH/SR.46.

⁵² *O.R. IX*, p. 205, CDDH/I/SR.56, para. 74.

⁵³ *Ibid.*, p. 425, CDDH/I/SR.72, para. 58.

⁵⁴ See *supra*, p. 1041.

Committee of the Red Cross or through the depositary.⁵⁵ As this solution did not really appear to be satisfactory, it was amended⁵⁶ to the formulation of the present paragraph, which puts forward a clearly improved solution, although it is still subject to criticism.⁵⁷

3642 In the first place, it is to be hoped that the obligation that every State which makes a declaration of acceptance of the compulsory competence of the Commission must share in its administrative expenses will not be such as to discourage it from making this declaration.

3643 By obliging the Party or Parties to the conflict which request an enquiry, to advance the necessary funds for expenses incurred by a Chamber, it was hoped to discourage rash demands for enquiries. However, the obligation for the Party or Parties against which the allegations have been made to reimburse fifty per cent of the expenses incurred, is perhaps not very likely either to favour recognition of the Commission's compulsory competence. In fact, such reimbursement is due, regardless of whether the allegations and counter-allegations are proved. It is sufficient that they have been made against one or more States which recognize the compulsory competence for the reimbursement to be payable. At the very least, this solution must be said to be defective. However, it is true that compared with the costs States are willing to incur for armaments and military expenses in time of armed conflict, these expenses are only a drop in the ocean.

Conclusion

3644 Article 90 is closely related to Article 1 common to the Conventions and Article 1 of the Protocol (*General principles and scope of application*), which enjoin the Contracting Parties to respect and to ensure respect for the Conventions and the Protocol in all circumstances. This article may prove to be useful, despite its faults. It institutes for the first time in the law of armed conflict – and this must be underlined, as all previous efforts failed – a permanent non-political and impartial international commission of enquiry to which the Parties to the conflict can resort at any time. With regard to the Commission's competence, the text allows the Contracting Parties to choose between recognizing its compulsory competence *a priori* and an optional acceptance in each case. In this way it achieves a balance between the two conflicting points of view which arose during the Conference. It is to be hoped that the quorum of twenty Parties to the Protocol recognizing the compulsory competence of the Commission, an essential quorum for it to be established, will soon be achieved.

Article 91 – Responsibility

A Party to the conflict which violates the provisions of the Conventions or of this Protocol shall, if the case demands, be liable to pay compensation. It shall be responsible for all acts committed by persons forming part of its armed forces.

Commentary

- 3645 Article 91 literally reproduces Article 3 of the Hague Convention Concerning the Laws and Customs of War on Land of 1907, and does not abrogate it in any way, which means that it continues to be customary law for all nations. It was the result of a proposal presented at the fourth session of the Conference,¹ and was accepted by consensus both in the Committee and in plenary meeting.²
- 3646 When this article was adopted in The Hague it was presented there as constituting a necessary sanction to the Regulations Concerning the Laws and Customs of War on Land. It was felt that governments would undoubtedly give their armed forces the necessary instructions, as they are obliged to, but that this would not be sufficient to avoid all violations. Such a provision, which is indeed justified, corresponded to the general principles of law on international

¹ See *O.R.* III, p. 347, CDDH/I/335, and Add. 1. The original text contained two paragraphs, the second of which was devoted to reproducing the article common to the four Conventions concerning the liability of Contracting Parties (First Convention, Art. 51; Second Convention, Art. 52; Third Convention, Art. 131; Fourth Convention, Art. 148). In the end such repetition was considered superfluous.

² See *O.R.* IX, p. 397, CDDH/I/SR.70, and *O.R.* VI, pp. 344-345, CDDH/SR.46, para. 22.

responsibility. Moreover, any recourse by wronged persons to the law was considered illusory if this could not be exercised against the government of the perpetrators of these violations, through their own government.³

3647 The practice of States has fallen far short of these laudable intentions. In fact, there has always been a tendency for the victors to demand compensation from the vanquished, without reciprocity and without making any distinction between the damages and losses resulting from lawful or unlawful acts of war.⁴

3648 It was undoubtedly for this reason that the Diplomatic Conference of 1949 inserted an article common to the four Conventions (First Convention, Article 51; Second Convention, Article 52; Third Convention, Article 131; Fourth Convention, Article 148) entitled “Responsibilities of the Contracting Parties”, which reads as follows:

“No High Contracting Party shall be allowed to absolve itself or any other High Contracting Party of any liability incurred by itself or by another High Contracting Party in respect of breaches referred to in the preceding Article.”

3649 In fact this is the same principle as that contained in the present Article 91 and in Article 3 of Hague Convention IV of 1907. The purpose of this provision is specifically to prevent the vanquished from being compelled in an armistice agreement or peace treaty to renounce all compensation due for breaches committed by persons in the service of the victor.⁵

3650 However, it is true that these days the problem of the responsibility of States for acts of war does not only arise on the basis of respect for *jus in bello*. It also arises on the basis of *jus ad bellum*, which was not yet the case in practical terms at the time of the First World War. A State which resorts to war in violation of the principle of Article 2, paragraph 4, of the United Nations Charter may be held responsible for all damages caused by such a war,⁶ and not only for those resulting from unlawful acts committed in the sense of *jus in bello*. The International Law Commission has stated that “every internationally wrong act of a State entails that State’s international responsibility”.⁷ In this context it is therefore not the

³ See A. Mechelynck, *op. cit.*, p. 99.

⁴ For the First World War, see in this respect, F. Berber, *op. cit.*, pp. 238-240, and I. Seidl-Hohenveldern, “Reparations”, in Bernhardt (ed.), *op. cit.*, Instalment 4, 1982, pp. 178-180 and, for the Second World War, “Reparations after World War II”, by the same author, *ibid.*, pp. 180-184; see also A.A. Steinkamm, “War Damages”, *ibid.*, pp. 298-303.

⁵ See also *Commentary III*, pp. 629-630. Moreover, the obligation to prosecute and provide effective penal sanctions for the perpetrators of grave breaches is absolute under the terms of the corresponding articles of the Conventions (First Convention, Art. 49; Second Convention, Art. 50; Third Convention, Art. 129; Fourth Convention, Art. 146).

⁶ In this respect, see Art. 231 of the Treaty of Versailles, even though at that time resort to force had not yet been declared illegal, and that without prejudice to the right of individual or collective self-defence (Art. 51 of the United Nations Charter). The three situations which are an exception to Art. 2(4) of the United Nations Charter remain legal: individual or collective self-defence, the measures provided for in Art. 42 of the Charter, and the exercise of the right of self-determination (see also *supra*, commentary Preamble, p. 23, and Art. 1, para. 4, p. 41).

⁷ Art. 1 of the Draft Articles on State responsibility, *Yearbook of the International Law Commission*, 1980, vol. II, part 2, p. 30.

vanquished Party which is bound to make reparation for war damage, but the Party which resorted to force unlawfully, to the exclusion of the Party which merely exercised its right of self-defence. However, this aspect of the problem should remain separate from that of violations committed during the course of the conflict itself, which may have been committed by any one of the Parties involved. The main merit of the present Article 91 is to affirm this, as the above-mentioned article common to the four Conventions had also done.

3651 On the conclusion of a peace treaty, the Parties can in principle deal with the problems relating to war damage in general and those relating to the responsibility for starting the war, as they see fit.⁸ On the other hand, they are not free to forego the prosecution of war criminals, nor to deny compensation to which the victims of violations of the rules of the Conventions and the Protocol are entitled.

First sentence – The obligation to compensate

3652 The obligation applies to all Parties to the conflict, but obviously only if violations have been committed. Thus no distinction is made between the victor and the vanquished, nor between a Party which is presumed to have resorted to force unlawfully and a Party which is believed only to have exercised its right of self-defence. Anyway, the Preamble confirms this interpretation when it affirms that the provisions of the Conventions and the Protocol must be fully applied in all circumstances to all persons who are protected by those instruments (i.e., also to the possible victims of violations) without any adverse distinction based on the nature or origin of the armed conflict, or on the causes espoused by or attributed to the Parties to the conflict. Thus there is an obligation which belongs exclusively to *jus in bello*.

3653 What is meant by compensation? The normal usage of the term refers to the award made to make reparation for a wrong. The French version uses the word “indemnité”.⁹ In fact the treaties concluded at the end of the First and Second World Wars used the term “reparations”. These took many different forms, but their purpose was different from that of Article 91, as we have seen.

3654 This obligation corresponds to an uncontested principle of international law which has been reaffirmed by the Permanent Court of International Justice many times:

⁸ Cf. Art. 29 of the above-mentioned Draft Articles of the International Law Commission, to the effect that consent precludes the wrongfulness of an act, except when the obligation arises from a peremptory norm of international law. The prohibition of resorting to force certainly falls under this category, but it may be assumed that in many cases responsibility will be difficult to establish with certainty, or the wrongs will be committed by more than one Party. When depositing its instrument of ratification on 15 January 1982, the Republic of Korea made the following declaration: “In relation to Article 91 of Protocol I, a Party to the conflict which violates the provisions of the Conventions or of this Protocol shall take the responsibility for paying compensation to the party damaged from the acts of violation, whether the damaged party is a legal Party to the conflict or not.”

⁹ The French text uses the term “indemnité”. “Indemnity” was probably not used in the English text deliberately, even as early as 1907 in the Hague Convention, as it refers particularly to a sum of money demanded by the victor: “sum exacted by victorious belligerent” (Oxford Dictionary).

“It is a principle of international law and even a general conception of law, that any breach of an engagement involves an obligation to make reparation [...] Reparation is the indispensable complement of a failure to apply a convention and there is no necessity for this to be stated in the convention itself.”¹⁰

- 3655** The text declares that such compensation is due only “if the case demands”. It is not sufficient for a violation simply to have been committed. For the obligation to make reparation to exist, there must also be a loss or damage¹¹ which in most cases will be of a material or personal nature. Moreover, compensation will be due only if restitution in kind¹² or the restoration of the situation existing before the violation, are not possible. Such compensation is usually expressed in the form of a sum of money which must correspond either to the value of the object for which restitution is not possible,¹³ or to an indemnification which is proportional to the loss suffered.¹⁴ If the compensation is assessed in terms of material goods and not in money, it may never consist of cultural property.¹⁵ Compensation may also be awarded in the form of services, but it is absolutely clear that retaining prisoners of war after active hostilities have ceased, for the purpose of contributing to reconstruction work in the country of the Detaining Power as war reparations, would violate the Third Convention (Article 118).¹⁶ No agreement between the Parties to the conflict permits any derogation on this point from the right of prisoners of war to be repatriated without delay after the cessation of active hostilities.
- 3656** Those entitled to compensation will normally be Parties to the conflict or their nationals, though in exceptional cases they may also be neutral countries, in the case of violation of the rules on neutrality or of unlawful conduct with respect to neutral nationals in the territory of a Party to the conflict.¹⁷
- 3657** Apart from exceptional cases,¹⁸ persons with a foreign nationality who have been wronged by the unlawful conduct of a Party to the conflict should address

¹⁰ Permanent Court of International Justice, Chorzow Factory Case, 13 September 1928, (Series A, No. 17, p. 29).

¹¹ Cf. E. Jiménez de Aréchaga, “International Responsibility”, in M. Sørensen (ed.), *Manual of Public International Law*, New York, 1968, p. 534.

¹² In this respect, see, for example, some of the Peace Treaties concluded after the Second World War with Hungary, Art. 24; Romania, Art. 23; Italy, Art. 75. Nevertheless, *restitutio in integrum* is only possible for damage resulting from armed conflict in exceptional cases.

¹³ Cf. Permanent Court of International Justice (Series A, No. 17, p. 47), quoted by M. Sibert, *Traité de droit international public*, vol. I, Paris, 1951, p. 324.

¹⁴ Cf. *Yearbook of the International Law Commission*, 1980, vol. I, p. 88, para. 17.

¹⁵ See the Protocol of The Hague for the Protection of Cultural Property in the Event of Armed Conflict of 14 May 1954, Part I, para. 3, which states that such property “shall never be retained as war reparations”.

¹⁶ In this respect, see the ICRC protests after the end of the Second World War, *Report of the ICRC on its activities during the Second World War (1 September 1939-30 June 1947)*, vol. I, Geneva, 1948, pp. 394-403.

¹⁷ Such situations will in most cases be subject to the general rules on international responsibility. Acts causing damage and entailing responsibility based on application of Art. 91, actually remain exceptional.

¹⁸ See, for example, “Bundesversorgungsgesetz” of the Federal Republic of Germany, of 12 December 1950, 1 *Bundesgesetzblatt* 791, 1950.

themselves to their own government, which will submit their complaints to the Party or Parties which committed the violation. However, since 1945 a tendency has emerged to recognize the exercise of rights by individuals.

3658 Joint or collective responsibility, for example, in cases of coalition, cannot be excluded.

3659 The scope of this provision is limited to violations of the Conventions and the Protocol, but the principle on which it is based has a general application for any violation of international commitments, as we saw above. This provision is without prejudice to questions which might arise with regard to compensation for damage inflicted when there has not been any violation in the strict sense of the word, for example, caused by an external or unforeseen event, unrelated to the conduct of hostilities (*force majeure* or fortuitous event).¹⁹

Second sentence – Responsibility²⁰

3660 In international law the conduct of any organ of the State, whether military or civilian, constitutes an act of State, provided that it acted in its official capacity, regardless of its position, whether superior or subordinate.²¹ Thus the same applies to any member of the armed forces, without prejudice to the personal responsibility which he may incur, since a member of the armed forces is an agent of the State or of the Party to the conflict to which he belongs.²² Such responsibility even continues to exist when he has exceeded his competence or contravened his instructions.²³ It can be imputed not only for acts committed by a person or persons who form part of the armed forces, as this provision lays down, but also for possible omissions.²⁴ As regards damages which may be caused by private individuals, i.e., by persons who are not members of the armed forces (nor of any other organ of the State), legal writings and case-law show that the responsibility of the State is involved if it has not taken such preventive or

¹⁹ Cf. Arts. 31 and 35 of the above-mentioned draft of the International Law Commission.

²⁰ Apart from the above-mentioned article common to the four Conventions (see *supra*, p. 1053, note 1), the responsibility of the State and of its agents is specifically referred to in the Third Convention in Arts. 12, 39, 56, 57 and 66, and in the Fourth Convention in Arts. 29, 45, 60 and 96. See in particular, *Commentary III*, pp. 128-139, and *Commentary IV*, pp. 209-213.

²¹ Cf. Art. 5 of the above-mentioned draft of the International Law Commission.

²² It automatically follows that a person who has no discernment, whether because of his age or for any other reason, should not be enlisted in the armed forces. In addition, see Art. 77, para. 2, Protocol I.

²³ Cf. Art. 10 of the above-mentioned draft of the International Law Commission.

²⁴ Cf. Art. 3 *ibid.*; see also *O.R.* VI, p. 344, CDDH/SR.46, para. 23. In its judgment in the Corfu Channel case, the International Court of Justice confirmed the obligation of providing information on the existence of a minefield in territorial waters and warning ships when they approach. The Court based its judgment on general and well-recognized principles such as elementary considerations of humanity which are even more exacting in time of peace than in time of war (“Corfu Channel Case”, *ICJ Reports* 1949, p. 22). The Convention on Prohibitions or Restrictions of the Use of Certain Conventional Weapons extends the obligation so that it also includes minefields on land (Art. 7, Protocol II). In this respect, see in particular, *The material remains of war*, United Nations Institute for Training and Research (UNITAR), and Libyan Institute for International Relations, UNITAR/CR/26, 1983, in particular, pp. 39-42 and 58-67.

repressive measures as could reasonably be expected to have been taken in the circumstances. In other words, responsibility is incurred if the Party to the conflict has not acted with due diligence to prevent such acts from taking place, or to ensure their repression once they have taken place.²⁵

3661 This responsibility covers “all” acts committed by members of the armed forces of a Party to the conflict, and not only unlawful acts (or omissions conflicting with a duty to act) in the sense of the Conventions and the Protocol. We saw above that only acts which constitute violations (except for any case of *force majeure* or fortuitous event that may occur) can give rise to compensation. However, it cannot be ruled out that the principle known as no-fault or strict liability would be taken into account, i.e., a concept of objective responsibility or liability which enters into play simply on the ground that the act or omission took place in the territory or under the jurisdiction of the State. This principle is recognized today in the field of environmental damage (irrespective even of the question whether there has been a breach of Article 35 – *Basic rules*, paragraph 3), in nuclear matters, and in case of damage caused by spacecraft.²⁶ In this sense it therefore seems possible that a Party to the conflict could be liable to pay compensation even in a case where no particular violation of the rules of the Conventions and the Protocol, or of another rule of the law of armed conflict, can be imputed to it. However, such liability could not be based on the present article.²⁷

J. de P.

²⁵ See M. Sibert, *op. cit.*, p. 317.

²⁶ See C.W. Jenks, “Liability for Ultra-Hazardous Activities in International Law”, 117 *Hague Recueil*, 1966/I, pp. 90-200.

²⁷ Responsibility would then rest on non-compliance with a duty to prevent (see “International liability for injurious consequences arising out of acts not prohibited by international law”, Report of the International Law Commission on the work of its thirty-fourth session, General Assembly Official Records, Supplement No. 10 (A/37/10), pp. 190-192, paras. 122-128).

Part VI – Final provisions

Introduction

- 3662** Basically this Part contains the technical clauses common to all treaties which, in the Protocol, are similar to those of all multilateral treaties. This applies for the procedure of becoming a Party to the treaty and for notifications, registration and the authentic texts. Finally, like many other treaties, the Protocol is silent with regard to reservations; thus these follow the rules of general international law and we will return to this question below.
- 3663** Some special features in this Part follow from the “additional” character of the Protocol: thus signature and accession are open only to Parties to the Conventions,¹ and similarly there is an article devoted to the relations between the Conventions and the Protocol.
- 3664** Another special feature is the existence of an article relating to amendments to the Protocol, and another providing for a simple procedure for revision of Annex I, which has a technical character.
- 3665** Other special features are justified by the humanitarian aim of the Protocol; in this respect the small number of Parties necessary for its entry into force may be given as an example as well as the possibility of bringing it into force by means of a declaration or even by means of *de facto* application, and the restrictions that apply to the effects of denunciation.

Reservations

Definition

- 3666** We are familiar with the fact that, when States sign or ratify a treaty, or when they accede to one,² they frequently make unilateral statements, usually known as “reservations”, “interpretative declarations”, “declarations” or also “communications”. The object of such statements varies, mainly as a function of the kind of treaty concerned, and the rules on reservations in international law

¹ In this sense the Protocol might be considered as a “restricted” treaty, since only specific States may become Parties to it; in fact, it is open-ended since, like the Conventions, it is intended to be universally applicable.

² For further information about such these legal procedures, in particular with respect to the Protocol, *cf.* articles 92-94 and the commentary thereon, *infra*, p. 1067.

have enshrined considerably during the last thirty years – it could even be said to have occurred between 1951 and 1969.³ We will limit ourselves to outlining the relevant aspects of the rules laid down in the Vienna Convention on the Law of Treaties, without dwelling on the prior divergent views and uncertainties; the reason why the Protocol does not contain provisions on reservations, is precisely because the Conference preferred to rely on the Vienna Convention as a codification of the principles of customary law.⁴

3667 Article 2, paragraph 1(d), of the Vienna Convention contains the following definition:

“‘reservation’ means a unilateral statement, however phrased or named, made by a State, when signing, ratifying, accepting, approving or acceding to a treaty, whereby it purports to exclude or to modify the legal effect of certain provisions of the treaty in their application to that State”.

3668 Thus a reservation is a unilateral act by one particular State, as opposed to the text of the treaty to which it refers, irrespective of whether that treaty was established or adopted by a special conference (such as the CDDH, for example), or under the auspices of an international organization, or perhaps within such an organization. The unilateral character remains when several States formulate similar or identical reservations to a particular treaty, whether or not they do this after consultation *inter se*.⁵

3669 Any declaration made by a State purporting “to exclude or modify the legal effect of certain provisions of the treaty in their application to that State” is a reservation within the meaning of the definition given above. As the name given to the declaration or its phraseology are not decisive, there may be two types of discrepancies between form and substance. In the first case a declaration which is not phrased or named as a reservation may nevertheless in fact constitute a reservation if it purports to exclude or modify the legal effect of certain provisions of the treaty; in the second case, where it cannot or is not meant to produce such an exclusion or modification of legal effect, a declaration may not be a reservation despite its wording or name.⁶

3670 There is a difference between reservations and interpretative declarations. The former purport to exclude or modify the legal effect of certain provisions in their application to the State making them; the latter lay down the meaning or the scope which a State attributes to a particular provision, without claiming to

³ Advisory Opinion of the International Court of Justice on Reservations to the Convention on Genocide, *ICJ Reports*, 1951, p. 15; Vienna Convention on the Law of Treaties of 23 May 1969, Art. 2, para. 1(d), and Arts. 19-23 (referred to below as “the Vienna Convention”).

⁴ For the work of the CDDH, *cf. infra*, pp. 1063-1065. As regards legal literature, we will limit ourselves to just one reference, to a work which *inter alia* also devotes numerous paragraphs to reservations to the Geneva Conventions: P.-H. Imbert, *Les réserves aux traités multilatéraux*, Paris, 1979.

⁵ As far as the Geneva Conventions are concerned, *cf.* C. Pilloud, “Reservations to the Geneva Conventions of 1949”, *op. cit.*, pp. 117-120, 164-168, 170-180 and 184-186.

⁶ *Ibid.*, pp. 117-123, 164-168 and 181-184; *Commentary I*, pp. 116-117 (Art. 10), 301-302 (Art. 38); *Commentary III*, pp. 114-115 (Art. 10); *Commentary IV*, pp. 103-104 (Art. 11).

exclude or modify its legal effect.⁷ However, the practical importance or this distinction is rather limited; for, as we have just seen, the real nature of a declaration, beyond its wording or the name given to it, must be established in any case, and in addition, such a finding will have to be made by every other State concerned.

3671 Finally, we refer to three types of declaration which may accompany signature, ratification or accession, though they differ in character from reservations and interpretative declarations:

- a) declarations of acceptance under optional clauses, for example, relating to recognition of competence or jurisdiction;⁸
- b) declarations by which States specify that their participation in a treaty must not be taken to imply recognition of another State which they do not recognize, or to entail treaty relations with it, irrespective of whether or not that other State is Party to the treaty at the time of the declaration.⁹
- c) declarations which do not relate to the treaty subject to signature, ratification or accession.¹⁰

*The rules on reservations*¹¹

1. *Principle*

3672 The Vienna Convention provides that when a State signs, ratifies or accedes to a treaty, it may formulate a reservation unless “the reservation is incompatible with the object and purpose of the treaty” (Article 19).

3673 Reservations must be formulated in writing and communicated to the Contracting States¹² and other States entitled to become Parties to the treaty¹³ (Article 23, paragraph 1). A reservation formulated at the time a treaty is signed subject to ratification,¹⁴ must, in order to be valid, be formally confirmed when

⁷ This is different from the interpretation known as the “authentic” interpretation, i.e., the common interpretation on which States Parties to a treaty have agreed, whether in a formal treaty or otherwise. Cf. P. Reuter, *Introduction au droit des traités*, op. cit., pp. 101-102 (para. 136).

⁸ For example, Art. 90, para. 2(a) of the Protocol; the classic example is Article 36, paragraphs 2-3, of the Statute of the International Court of Justice.

⁹ It is to be hoped that declarations of this type relating to instruments of humanitarian law will never preclude their actual application; Art. 4 and Art. 5, para. 5, of the Protocol were adopted for this purpose and in order to remove any fear of unintended indirect effects.

¹⁰ Cf., for example, the communication made by France on Protocol I at the time of its accession to Protocol II.

¹¹ Hereafter we only take treaties without provisions on reservations into account – which is the case for the Protocol.

¹² I.e., according to Art. 2, para. 1(f), “a State which has consented to be bound by the treaty, whether or not the treaty has entered into force”.

¹³ Below we will use the expression “States concerned” to designate these two categories of States collectively. According to Arts. 92 and 94, only Parties to the Conventions are entitled to become Parties to the Protocol. The various communications relating to the Protocol are made, in accordance with Art. 100, through the depositary.

¹⁴ Procedure laid down in Arts. 92 and 93 of the Protocol.

the treaty is ratified by the State which formulated the reservation (Article 23, paragraph 2).

3674 Just as it is the responsibility of every other State concerned to determine whether any particular declaration does or does not constitute a reservation, so every State determines individually whether a reservation formulated by another State is or is not compatible with the object and purpose of the treaty.¹⁵

2. *Acceptance and objection*

3675 A State may *accept* the reservation formulated by another State either explicitly or tacitly.¹⁶ Acceptance of the reservation by a Contracting State allows the treaty to enter into force between that State and the State which had made the reservation. The treaty applies between these two States as modified by the reservation (Article 20, paragraph 4(a) and (c), and paragraph 5; Article 21, paragraph 1(a) and (b); Article 23, paragraphs 1 and 3).

3676 A State may make an *objection* to a reservation made by another State. Unless the State which formulated the objection clearly expressed its intention to the contrary, an objection by a Contracting State does not prevent the treaty from entering into force, as soon as at least one other Contracting State has accepted the reservation, between the State formulating the objection and the State which made the reservation; however, “the provisions to which the reservation relates do not apply as between the two States to the extent of the reservation” (Article 20, paragraph 4(b) and (c); Article 21, paragraph 3; Article 23, paragraphs 1 and 3).

3677 Thus, it is necessary for the objecting State clearly to express its intention for the treaty not to enter into force, as modified by the reservation, between itself and the State which had made the reservation once at least one other Contracting State has accepted a reservation. Otherwise, the State accepting a reservation and that objecting to it may find themselves in the same situation, depending on the specific object of the reservation.¹⁷

3678 It should be emphasized that a reservation only applies as between the State making it and other States bound by the treaty. The reservation does not modify the provisions of the treaty for the other Parties to the treaty *inter se* (Article 21, paragraph 2).

3679 As we saw with regard to objections, the Vienna Convention provides that a ratification or accession containing a reservation is effective only if at least one other Contracting State has accepted the reservation. The twelve month period

¹⁵ This does not preclude collective steps, in particular to obtain clarification of the meaning of a reservation. For an example of such a step through the intermediary of the depositary, cf. C. Pilloud, “Reservations to the Geneva Conventions of 1949”, *op. cit.*, pp. 171-173; *Commentary III*, pp. 423-425 (Art. 85).

¹⁶ A State is deemed to have accepted a reservation if it has not raised an objection to that reservation within twelve months from receiving notification of it, or by the date on which it ratified or acceded to the treaty, if this is later (Art. 20, para. 5).

¹⁷ For views on the effect that such situations are identical or that there is a possible difference, cf. P.-H. Imbert, *op. cit.*, pp. 260-268.

laid down for tacit acceptance by States which had previously consented to be bound by the treaty may be longer than the periods laid down by certain treaties for their entry into force for a State after depositing its instrument of ratification or accession.¹⁸ This requires two comments. Although, as we have seen, the Vienna Convention codified customary law, this period of twelve months may, on the other hand, be seen as a new norm, strictly applicable only between States bound by the Vienna Convention at the time of concluding a particular treaty.¹⁹ In any event, the uncertainty which may exist, as to whether a State making a reservation has the status of a Contracting State, is relative in view of the fact that the risk is slight that a reservation will not be accepted by any other Contracting State, either explicitly or tacitly, whether the expression of that State's consent to be bound by the treaty is given either before or after that of the State making the reservation.

3. *Withdrawal of reservations and objections*

- 3680** A reservation or an objection to a reservation may be withdrawn at any time, in writing. The withdrawal of a reservation becomes operative in relation to all other Contracting States when they have received notice thereof; the withdrawal of an objection becomes operative when notice thereof has been received by the State which formulated the reservation (Article 22 and Article 23, paragraph 4).

The work of the CDDH²⁰

- 3681** On the question of reservations the draft Protocol contained an article consisting of two paragraphs: the first listed the articles to which no reservation

¹⁸ The Protocol lays down a period of six months for this purpose (Art. 95, para. 2).

¹⁹ On this subject, cf. P.-H. Imbert, *op. cit.*, pp. 103-108. Art. 4 of the Vienna Convention reads as follows: “*Non-retroactivity of the present Convention*: Without prejudice to the application of any rules set forth in the present Convention to which treaties would be subject under international law independently of the Convention, the Convention applies only to treaties which are concluded by States after the entry into force of the present Convention with regard to such States.”

could be made,²¹ and the second provided that any reservation would lose effect five years after it had been formulated, failing renewal by means of a declaration addressed to the depositary.

- 3682** When introducing this draft, the ICRC specified that it should be checked whether the content of the articles listed were still the same as in the original draft and, above all, whether there were other basic provisions contained in the draft or added by the Conference that were not included in the list. Such a list was proposed to take into account the new trends in international law and the difficulty of prohibiting any reservation at all – a prohibition which might have seemed to be the only solution for a multilateral instrument with a humanitarian aim. If it proved too difficult to reach agreement with regard to the list of articles to which no reservation could be made, the ICRC was ready, in order to complete the work, to support the views in favour of deleting any provision relating to reservations, and consequently to leave this matter to be governed by general international law.²²
- 3683** The Working Group deleted paragraph 2 of the draft article by consensus and also proposed the deletion of paragraph 1 or, failing that, a new formula drafted by a small informal group.²³ The proposal for deletion was adopted after a vote in Committee.²⁴ A new proposal was presented in the plenary Conference,²⁵ but this did not get the required two-thirds majority.²⁶
- 3684** The delegations which spoke against the various lists proposed, did so according to their statements, because these lists were incomplete and because, as no agreement was likely within a reasonable period, it was best to leave the question to be governed by the rules of general international law. Several of these delegations emphasized the fact that they did not intend to make reservations to the articles listed or that they had in mind making few, if any, reservations.
- 3685** As the Protocol does not contain an article relating to reservations, this question is subject to the rules of international law as codified in the Vienna Convention. The following may be hoped for:
- a) that the possibility of making reservations will facilitate the universal acceptance of the Protocol without adversely affecting its object and purpose, which is to improve the protection provided by the Conventions to the victims of international armed conflicts;²⁷

²¹ Articles of the draft corresponding to the following Articles of the final text: 5, 10, 20, 35, 37 (para. 1, first sentence), 41 (para. 1, first sentence), 43, 48, 51 and 52.

²² *O.R.* IX, pp. 359-360, CDDH/I/SR.67, paras. 30-32.

²³ *O.R.* X, pp. 251-252, CDDH/405/Rev.1, Annex III (CDDH/I/350/Rev.1), paras. 39-47. Reservations which were “incompatible with the humanitarian object and purpose of this Protocol, and in particular” those to Articles 1, 3, 5, 10, 20, 35, 43-45, 47, 51-56, 75, 85, 89, 91 and 96, para. 3 of the final text, were prohibited.

²⁴ *O.R.* IX, p. 479, CDDH/I/SR.76, para. 39. Vote: 47-34-4.

²⁵ *O.R.* III, p. 358, CDDH/421. Reservations “incompatible with the humanitarian aim and purpose of this Protocol, and in particular” those to Articles 1, 43, 44, 47 and 96, para. 3 of the final text, were prohibited.

²⁶ *O.R.* VI, p. 359, CDDH/SR.46, para. 101. Vote by roll call: 42-36-17.

²⁷ *Cf. infra*, p. 1549, the list of Parties to the Protocol which indicates whether any reservations or declarations have been made. The text of reservations and declarations relating to the Conventions and the Protocols are available in reports which are regularly updated by the ICRC.

- b) that any objections that may be raised to a reservation should not involve a refusal to enter into treaty relations with the State making the reservation;
- c) that States will not only study with the greatest caution the need to make a reservation but will regularly re-examine the need to maintain that reservation.²⁸

B.Z.

²⁸ On withdrawal of reservations to the Conventions, *cf.* C. Pilloud, “Reservations to the Geneva Conventions of 1949”, *op. cit.*, p. 184; several other cases of withdrawal have occurred since then.

Protocol I

Article 92 – Signature

This Protocol shall be open for signature by the Parties to the Conventions six months after the signing of the Final Act and will remain open for a period of twelve months.

Commentary

General remarks

3686 In view of the wording of the subsequent article (“This Protocol shall be ratified”), Article 92 deals with “signature subject to ratification”, as in fact did the corresponding article common to the four Conventions (56/55/136/151).

- 3687** Signature does not definitively bind States to the Protocol; this is achieved by ratification and accession¹ dealt with in Articles 93 (*Ratification*) and 94 (*Accession*).² By signing the Protocol, States undertake to seriously consider the possibility of ratifying it; they are not obliged to proceed to ratification if they come across major obstacles in the interim.³
- 3688** As regards the signature of the Final Act of the Conference, this merely amounted to authentication of the instruments drawn up by the Conference.⁴
- 3689** Article 92 was adopted by consensus both in Committee I and in a plenary meeting.⁵

Analysis of the article

States entitled to sign

- 3690** The Diplomatic Conference allowed all States Parties to the Conventions of 1949, and Members of the United Nations to participate on an equal basis. It also admitted national liberation movements as observers, insofar as they were recognized by the regional intergovernmental organizations concerned. The same States and liberation movements were entitled to sign the Final Act in two separate groups.⁶
- 3691** On the other hand, States not Parties to the Conventions, and liberation movements, are not permitted to sign and ratify the Protocol or to accede to it. In fact:
- a) as the Protocol is additional to the Conventions, it is not possible to be bound by the Protocol without being bound by the Conventions;⁷
 - b) the fact that liberation movements do not have the status of States explains the drafting of Article 96 (*Treaty relations upon entry into force of this Protocol*), paragraph 3, which provides for a special procedure for them to accept the Conventions and the Protocol.

¹ In this respect, refer to Articles 14 and 15 of the Vienna Convention on the Law of Treaties of 23 May 1969.

² For the concepts of ratification, accession and succession, *cf.* the commentary on these articles, *infra*, pp. 1071-1072 and 1077.

³ According to Article 18 (Obligation not to defeat the object and purpose of a treaty prior to its entry into force), sub-para. (a), of the above-mentioned Vienna Convention, a signatory State must refrain from acts which would defeat the object and purpose of a treaty until it shall have made its intention clear not to become a party to the treaty.

⁴ *Cf.*, in this respect, Article 10 (Authentication of the text), sub-para. (b), of the said Vienna Convention.

⁵ *O.R.* IX, p. 473, CDDH/I/SR.76, para. 3; *O.R.* VI, p. 350, CDDH/SR.46, para. 62.

⁶ For the list of States and liberation movements participating in the CDDH, *cf.* *O.R.* I, Part I, pp. 4-7 and 15-113, Final Act, paras. 2-3, and appended signatures (the signatures of the Final Act also appear in *O.R.* VII, pp. 336-337, CDDH/SR.59, para. 5).

⁷ On the additional character of the Protocol, *cf.* also the commentary on its title, *supra*, pp. 20-21 and commentary Article 1, para. 3, *supra*, p. 39, and Art. 96, para. 1, *infra*, pp. 1085-1086.

- 3692** This does not in any way alter the fact that the Protocol is a treaty open to universal membership, as are the Conventions which it supplements; it should be noted that in fact the Conventions are at this time the multilateral treaties which have the largest participation (161 States as of 31 December 1984).
- 3693** The Protocol can only be signed by Parties to the Conventions. In view of the period of time which precedes their entry into force for a State, this means that States must have ratified the Conventions or have acceded to them at least six months previously.⁸ Since 13 February 1950 it has no longer been possible to sign the Conventions, and all signatories ratified them a long time ago. On the other hand, despite the strict interpretation mentioned above, it may be conceded that a State not Party to the Conventions could have simultaneously acceded to the Conventions and signed the Protocol:⁹ the Vienna Convention on the Law of Treaties¹⁰, common sense and humanitarian considerations justify this interpretation.

Period of deferment

- 3694** The six month waiting period before the Protocol is open for signature is a rather exceptional feature:¹¹ in general a treaty is open for signature from the moment it is adopted. Some delegations explained how long it would take to complete the domestic procedures to consider the acceptability of such a complex treaty, even at the stage of signature, and the other delegations agreed.¹²
- 3695** Thus the idea of such a deferment was accepted to ensure a greater number of signatories as soon as the Protocol would be open to signature. However, one delegation expressed the fear that such deferral could have the opposite effect as Protocol I would be forgotten by the ministries concerned.¹³

Opening the Protocol for signature

- 3696** The adoption of an instrument produced at a Conference and the signature of its Final Act often take place on the same day. In the case of the Protocol it was

⁸ Art. 58, 61/57, 60/138, 140/153, 156 of the Conventions.

⁹ We will see below that the period during which the Protocol was open for signature has also terminated. The possibility envisaged here has not arisen during this period; however, an analogous case did arise, namely the simultaneous accession to the Conventions and the Protocol (cf. commentary Art. 94, *infra.*, p. 1076).

¹⁰ Art. 40 (Amendment of multilateral treaties), para. 3.

¹¹ The Convention of 10 October 1980 on the use of certain conventional weapons laid down the same deferment period in Art. 3.

¹² O.R. X, p. 240, CDDH/405/Rev.1, Annex III (CDDH/I/350/Rev.1), paras. 5-6.

¹³ O.R. IX, p. 508, CDDH/I/SR.77, Annex (Syria); O.R. VI, p. 385, CDDH/SR.46, Annex (Syria).

adopted on 8 June 1977,¹⁴ which is regarded as the date of the Protocol, while the Final Act was signed on 10 June 1977.¹⁵

3697 The Protocol was opened for signature from 12 December 1977 to 12 December 1978; during this time 62 States signed it.¹⁶

Reservations and declarations

3698 At the time of signature of the Protocol, reservations or declarations could be made and some have actually been made.¹⁷ If they affect the undertaking of a State to be bound by the Protocol or the interpretation which it intends to give to it, such reservations and declarations must be confirmed at the time of ratification, if they are to have effect.¹⁸ However, this is not the case with regard to the declarations under Article 90 (*International Fact-Finding Commission*), paragraph 2, sub-paragraph (a), which can be validly made upon signature,¹⁹ ratification or accession, or at any time thereafter.

Notification by the depositary

3699 The signatures, as well as the reservations and declarations made at the time of signature, were notified by the depositary designated in Article 93 (*Ratification*) in accordance with Article 100 (*Notifications*), sub-paragraphs (a) and (c).²⁰

B. Z.

¹⁴ By consensus, *cf.* O.R. VII, p. 194, CDDH/SR.56, para. 4.

¹⁵ *Ibid.*, pp. 336-337, CDDH/SR.59, para. 5.

¹⁶ For the list of signatories, *cf. infra*, p. 1549.

¹⁷ Seven of the ten countries which made reservations or declarations only actually reserved the right to formulate reservations or declarations on ratification.

¹⁸ For the question of reservations and declarations as a whole, *cf.* the introduction to this Part, *supra*, pp. 1059-1065.

¹⁹ This possibility was not used.

²⁰ For the functions of the depositary in their entirety, refer to the commentary on this article, *infra*, p. 1114.

Article 93 – Ratification

This Protocol shall be ratified as soon as possible. The instruments of ratification shall be deposited with the Swiss Federal Council, depositary of the Conventions.

Commentary

General remarks

3700 Article 93 is the natural and indispensable complement to the preceding article relating to signature. Ratification is the act by which a State Party to the Conventions, which is a signatory to the Protocol, binds itself definitively to this instrument so that it applies to its relations with the other Contracting Parties. If the State concerned wishes to do so, these two steps can be replaced by the single act of accession.

3701 Moreover, there is the possibility of “notification of succession”; by means of such notification a newly independent State continues its participation to a

treaty established on his behalf, before it became independent, by the former administering power. This possibility exists even though it has not been laid down in the Protocol;¹ it was used for the Conventions in a large number of cases.² However, it does not seem very probable that a case of succession will arise for the Protocol.

3702 The definitive undertaking in the form of ratification, accession or succession, should be distinguished, on the one hand, from the contingencies laid down in Article 96 (*Treaty relations upon entry into force of this Protocol*), paragraphs 2 and 3, and, on the other, from notice of the provisional application of treaties by a newly independent State.³

3703 The Swiss Federal Council was the depositary of the Conventions of 1949 and of all their preceding Conventions, and it was obvious that its role should be extended to the Protocol aimed at supplementing them.⁴

3704 This article was adopted by consensus, both in Committee I and in plenary.⁵

Analysis of the article

The nature of ratification

3705 The Conference chose for signature to be followed by ratification, and for accession, out of the various ways in which consent to be bound by a treaty can be expressed.⁶

3706 As signature does not bind a State definitively, it can be appended fairly easily. On the other hand, ratification commits the State, which must henceforth comply with the obligations contained in the treaty; it therefore requires a thorough examination on the merits, and means that a number of domestic procedures laid down in the constitution of every State must be followed.

3707 Preparing for ratification can in fact be accompanied by the development of measures for the execution of the obligations such as those envisaged in Article 80 (*Measures for execution*); at least a preliminary study of such measures is indispensable in the examination of ratification. On the other hand, their final drafting and implementation do not become legal obligations until the Protocol has been ratified or even not until it has entered into force with regard to the State concerned.⁷

¹ The question is dealt with in the Vienna Convention on Succession of States in Respect of Treaties of 23 August 1978.

² Cf. B. Zimmermann, "La succession d'Etats et les Conventions de Genève", in *Studies and Essays in honour of Jean Pictet, op. cit.*, p. 113.

³ *Ibid.* Cf. also the above-mentioned Convention, *supra* note 1, Arts. 27-29.

⁴ For an overall picture of the functions of the depositary, cf. commentary Art. 100, *infra*, p. 1114.

⁵ *O.R.* IX, p. 473, CDDH/1/SR.76, para. 3; *O.R.* VI, p. 351, CDDH/SR.46, para. 67.

⁶ Cf. Vienna Convention on the Law of Treaties of 23 May 1969, Arts. 11-16.

⁷ Cf. Art. 95.

- 3708 The minimum obligation of every State between depositing its ratification and the entry into force of the treaty for it, is to refrain from acts which would defeat the object and purpose of the treaty.⁸
- 3709 The expression “as soon as possible” is not very common. It has been taken from the corresponding article of the Conventions (57/56/137/152) and represents an exhortation without laying down a precise period.⁹

The form of the ratification

- 3710 The instrument of ratification must be deposited by the diplomatic representatives of the country concerned with the Swiss Federal Council, or transmitted in the form of a written communication.

Reservations and declarations

- 3711 The instrument of ratification must also mention any reservations and declarations that may be made and, if the question arises, confirm declarations of any nature made at the time of the signature, if the State wishes to maintain these.¹⁰ However, a declaration in accordance with Article 90 (*International Fact-Finding Commission*), paragraph 2(a), made at the time of signature,¹¹ does not need to be confirmed upon ratification in order to be maintained. Moreover, it can be made at any time after the ratification.

Notification by the depositary

- 3712 The depositary will notify the deposit of every instrument of ratification, as well as any declarations and reservations, in accordance with Article 100 (*Notifications*), sub-paragraphs (a) and (c). As of 31 December 1984, 18 of the 62 signatory States had ratified the Protocol, of which six did so with a declaration in accordance with Article 90 (*International Fact-Finding Commission*), paragraph 2(a), and seven with reservations or declarations.¹²

B. Z.

⁸ Cf. Convention mentioned above, *supra*, note 6, Article 18 (Obligation not to defeat the object and purpose of a treaty prior to its entry into force), sub-para. (b).

⁹ One delegation would have liked to delete this clause: *O.R.* X, p. 240, CDDH/405/Rev.1, Annex III (CDDH/I/350/Rev.1), para. 7; *O.R.* VI, p. 351, CDDH/SR.46, para. 68; p. 375, *id.*, Annex (Indonesia).

¹⁰ On the general question of reservations to the Protocol, cf. introduction to this Part, *supra*, pp. 1059-1065.

¹¹ This possibility was not used.

¹² For the list of ratifications, with references to all reservations or declarations, cf. *infra*, p. 1549.

Article 94 – Accession

This Protocol shall be open for accession by any Party to the Conventions which has not signed it. The instruments of accession shall be deposited with the depositary.

Commentary

General remarks

- 3713** Accession gives the Parties to the Conventions the possibility to bind themselves in a single act instead of doing so by the two-stage process of signature followed by ratification, as laid down in Articles 92 (*Signature*) and 93 (*Ratification*). It remains the only possible way for States which are not

signatories, as the Protocol has no longer been open for signature since 13 December 1978.¹

3714 This article was adopted by consensus both in Committee I and in plenary.²

Analysis of the article

States entitled to accede

3715 Only Parties to the Conventions are entitled to accede; by means of a reasonable and not unduly strict interpretation of this requirement of prior adherence to the Conventions,³ there were three accessions to the Conventions and the Protocol simultaneously.⁴

3716 In view of the differences between accession, on the one hand, and signature followed by ratification, on the other hand, it is also self-evident that only a State which is not a signatory to the Protocol can accede to it.

Opening the Protocol for accession

3717 Traditionally treaties were opened for accession only at the end of the period that they were open for signature, or sometimes only after the treaty had entered into force. For example, the Conventions had adopted the latter solution.⁵ In accordance with the current trend in treaty law, the Protocol provided some latitude in allowing accession even while it was still possible to sign.

3718 Contemporary multilateral treaties frequently require the participation of a fairly large number of States in order to enter into force.⁶ In view of the relative brevity of the period when signature was possible, States which were not signatories would run the risk of being prevented from acceding for a long time if they could only do so after the entry into force, which itself would then depend on achieving the given number of ratifications alone.

3719 So as not to stand in the way of States wishing to bind themselves at an early date, the Protocol therefore provided the possibility of accession, not only before it entered into force, but from the time it was open for signature. Article 94 does not explicitly mention the deferment period, as does Article 92 (*Signature*).

¹ Cf. commentary Art. 93, *supra*, pp. 1071-1072, for the other ways in which the Protocol can be made applicable in a definitive manner, *ad hoc*, or provisionally.

² *O.R.* IX, p. 473, CDDH/I/SR.76, para. 3; *O.R.* VI, p. 351, CDDH/SR.46, para. 68.

³ On this point, *cf.* commentary Art. 92, *supra*, pp. 1068-1069.

⁴ As of 31 December 1984. One State simultaneously succeeded to the Conventions and acceded to the Protocol, but this is even less debatable.

⁵ Art. 60/59/139/155 common to the Conventions.

⁶ Thus, for example, the Vienna Convention on the Law of Treaties of 23 May 1969 itself requires 35, in accordance with Art. 84 (Entry into force), para. 1.

However, it was understood by the Conference that the Protocol would not be open for accession before being open for signature.⁷

- 3720 As it happens, the arguments given above for such flexible arrangements in treaties in general do not necessarily explain why this facility exists here, as the participation of only two States was sufficient for the Protocol to enter into force in accordance with Article 95 (*Entry into force*), paragraph 1. On the other hand, the deferment period of six months before opening the Protocol for signature constituted an argument in favour of opening it at the same time for accession: during this period States could evaluate the consequences of participating in the Protocol to their own satisfaction and decide to accede to it. One may recall that one instrument of accession was indeed deposited during the period that the Protocol was open for signature.⁸

The nature of accession

- 3721 Accession is the single act definitively expressing the consent of a State to be bound by the Protocol and making it applicable to that State's relations with the other Contracting Parties. Thus, like ratification, it requires a thorough examination on the merits, and a number of internal procedures laid down by the constitution of every State must be carried out.

- 3722 Moreover, the preparations for accession can already be accompanied by the development of measures for the execution of obligations such as those envisaged in Article 80 (*Measures for execution*); at least a preliminary study of such measures is indispensable in the examination of accession. On the other hand, their final preparation and implementation do not become legal obligations until the Protocol has been acceded to or even until it has entered into force for the State concerned.⁹

The form of accession

- 3723 The instrument of accession must be deposited by the diplomatic representatives of the country concerned with the Swiss Federal Council, or transmitted in the form of a written communication.¹⁰

⁷ O.R. VI, p. 351, CDDH/SR.46. para. 69; pp. 361 and 378-379, *id.*, Annex (Australia and Japan).

⁸ Libya, 7 June 1978.

⁹ *Cf.* Art. 95.

¹⁰ For an overall picture of the functions of the depositary, *cf.* commentary Art. 100, *infra*, p. 1113.

Reservations and declarations

3724 The instrument of accession must also mention any reservations and declarations that may be made.¹¹ A declaration in accordance with Article 90 (*International Fact-Finding Commission*), paragraph 2 (a), can be made at the time of accession, or at any time thereafter.

Notification by the depositary

3725 The depositary will notify the deposit of every instrument of accession, as well as any reservations and declarations made on accession in accordance with Article 100 (*Notifications*), sub-paragraphs (a) and (c). As of 31 December 1984, there were 30 accessions to the Protocol, without any declarations in accordance with Article 90 (*International Fact-Finding Commission*), paragraph 2 (a), and five were with reservations or declarations.¹²

B.Z.

¹¹ On the general question of reservations to the Protocol, *cf.* introduction to this Part. *supra*, pp. 1059-1065.

¹² For the list of accessions, with references to all reservations or declarations made, *cf. infra*, p. 1549.

Article 95 – Entry into force

1. This Protocol shall enter into force six months after two instruments of ratification or accession have been deposited.
2. For each Party to the Conventions thereafter ratifying or acceding to this Protocol, it shall enter into force six months after the deposit by such Party of its instrument of ratification or accession.

Commentary

General remarks

- 3726** The principal object of paragraph 1 is to determine the decisive moment at which, by its entry into force, the Protocol becomes really part of international law. This moment is also that at which the Protocol enters into force for the first two Parties, i.e., its legal effects can be applied with respect to these Parties.

- 3727** Paragraph 2 determines the moment of the Protocol's entry into force for States ratifying or acceding to it after the deposit of the second instrument of ratification or accession.
- 3728** Article 95 was adopted by consensus, both in Committee I and in plenary.¹

Analysis of the article

Paragraph 1

- 3729** Even when it has been adopted by the competent body, a treaty really only commences to exist as an instrument of international law when a specific number of States accept being bound by it in accordance with the agreed conditions.
- 3730** The number of two ratifications had been adopted for this purpose by the Conventions.² The Conference welcomed the ICRC proposal to keep to this minimum number of two for the Protocol:³ this meant that it would quickly become applicable, at least between the Contracting States. Moreover, it could accelerate the rate of ratifications and accessions. Following this point of view in a consistent fashion, the Conference also decided to permit one or two instruments of accession to determine the entry into force of the Protocol, or to contribute to this. In fact, the Protocol entered into force on 7 December 1978 while it was still open for signature, after one ratification and one accession.⁴ On this date it became an integral part of international law.
- 3731** There is an interval of six months between the deposit of the second instrument of ratification or accession and the Protocol's entry into force for the first two Contracting Parties. This period serves to allow the States involved to prepare any legislative or administrative measures for implementing their new obligations.⁵ It also serves to permit the depositary to make the notifications required by Article 100 (*Notifications*), sub-paragraphs (a), (b) and (c) (accessions, ratifications, entry into force of the Protocol, and any declarations in accordance with Article 90 – *International Fact-Finding Commission*, paragraph 2(a)).

Paragraph 2

- 3732** This applies to States other than the first two Contracting Parties. There is an interval of six months identical to that laid down in paragraph 1, for the same reasons, between the deposit by a State of its instrument of ratification or

¹ *O.R.* IX, p. 473, CDDH/1/SR.76, para. 3; *O.R.* VI, p. 351, CDDH/SR.46, para. 69.

² Art. 58/57/138/153 common to the Conventions.

³ Nevertheless one State would have preferred that the entry into force of the Protocol had required half of the Parties to the Conventions, plus one, to be bound by it; *cf.* *O.R.* VI, p. 375, CDDH/SR.46, Annex (Indonesia).

⁴ Ratification by Ghana on 28 February 1978, and accession by Libya on 7 June 1978.

⁵ *Cf.* commentary Art. 80, *supra*, p. 929.

accession and the entry into force of the Protocol between that State and the other Contracting Parties.

Entry into force and application

- 3733** This article deals with the moment from which the legal effects of the Protocol will be applicable to the Contracting Parties, but this requires three clarifications.
- 3734** First, the provisions relating to the entry into force of the Protocol and to certain functions of the depositary are obviously applicable from the outset.
- 3735** Secondly, the respective points in time at which the other provisions become effectively applicable may vary: in this respect, one may refer to the commentary on Article 3 (*Beginning and end of application*).⁶
- 3736** Finally, only Contracting Parties, i.e., States, are taken into consideration in this context, and not the authorities covered by Article 96 (*Treaty relations upon entry into force of this Protocol*), paragraph 3: sub-paragraph (a) of this paragraph provides for a special solution for the situations it covers.

Immediate effect

- 3737** The Conventions contain a common article⁷ by virtue of which the situations covered in their Article 2 will give immediate effect to ratifications and accessions deposited by the Parties to the conflict before or after the beginning of such situations. Thus, for obvious humanitarian reasons, the six month interval which normally separates the ratification or accession by a State from the entry into force of the Conventions for that State, is dispensed with if the conditions for their application are fulfilled.
- 3738** Because the Protocol is an instrument additional to the Conventions,⁸ the ICRC had considered that the clause concerned would apply to the Protocol and that it would not even be necessary to repeat it. However, upon reflection it was considered useful to ask Committee I whether there might be any doubt on this point.⁹
- 3739** As no organ of the Conference requested a debate on this question, it may be concluded that, by virtue of Article 62/61/141/157 common to the Conventions, the existence of a situation covered by Article 1 of the Protocol (*General principles and scope of application*) will give immediate effect to the ratifications and accessions of the Parties to the conflict. If this has not already been done, the depositary will give notification of such ratifications and accessions by the quickest means available.

⁹ O.R. IX, p. 359, CDDH/I/SR.67, para. 24.

Protocol I

Article 96 – Treaty relations upon entry into force of this Protocol

1. When the Parties to the Conventions are also Parties to this Protocol, the Conventions shall apply as supplemented by this Protocol.
2. When one of the Parties to the conflict is not bound by this Protocol, the Parties to the Protocol shall remain bound by it in their mutual relations. They shall furthermore be bound by this Protocol in relation to each of the Parties which are not bound by it, if the latter accepts and applies the provisions thereof.
3. The authority representing a people engaged against a High Contracting Party in an armed conflict of the type referred to in Article 1, paragraph 4, may undertake to apply the Conventions and this Protocol in relation to that conflict by means of a unilateral declaration addressed to the depositary. Such declaration shall, upon its receipt by the depositary, have in relation to that conflict the following effects:
 - (a) the Conventions and this Protocol are brought into force for the said authority as a Party to the conflict with immediate effect;
 - (b) the said authority assumes the same rights and obligations as those which have been assumed by a High Contracting Party to the Conventions and this Protocol; and
 - (c) the Conventions and this Protocol are equally binding upon all Parties to the conflict.

Commentary**General remarks**

- 3740** The three paragraphs of this article deal with related, though separate, questions. Paragraph 1 is applicable, as indicated by the heading of the article itself, upon entry into force of the Protocol with respect to each Party to this instrument; the questions dealt with in paragraphs 2 and 3, although they are of the same order, apply only in cases of conflict.
- 3741** Paragraph 1 and the first sentence of paragraph 2 deal with treaty relations in the full sense of the term, i.e., the relations between Parties which have followed the prescribed procedures of signature followed by ratification or of accession, and are therefore fully and permanently bound by the Conventions and the Protocol.¹ The rest of the article provides for special ways in which the Protocol can enter into force in relation to a particular conflict.
- 3742** It is appropriate to recall with regard to the three paragraphs that in relations between Parties to a conflict not governed by the Protocol (or even not governed by the Conventions), the customary law of international armed conflict is fully applicable from the outset.
- 3743** Paragraphs 1 and 2 correspond to the draft submitted to the Conference (Article 84). Paragraph 3 is the result of a proposal presented during the Conference after the adoption of Article 1 (*General principles and scope of application*), paragraph 4, in Committee I.
- 3744** Paragraph 3 was adopted immediately in Committee without being examined by the Working Group, which several delegations regretted.² After being examined by the Working Group paragraphs 1 and 2 were adopted in Committee I by consensus, as was the article as a whole.³ The plenary Conference adopted the article in its entirety by roll-call.⁴

¹ For the Protocol, *cf.* Arts. 92-94. *Cf.* also the comments on the expression “the High Contracting Parties” in commentary Preamble, *supra*, p. 25.

² O.R. IX, pp. 364-367, CDDH/I/SR.67, paras. 56-85; pp. 369-376, CDDH/I/SR.68, paras. 1-33; the vote was 50-0-14 (*ibid.*, p. 365, CDDH/I/SR.67, para. 71).

³ *Ibid.*, pp. 473-474, CDDH/I/SR.76, paras. 3-4.

⁴ O.R. VI, p. 354, CDDH/SR.46, para. 76 (vote: 93-1-2).

Paragraph 1

- 3745** The Conference's title indicated its purpose, namely to reaffirm and develop international humanitarian law applicable in armed conflicts, and the Protocol expresses the same idea in the third paragraph of the Preamble. The title of the Protocol proclaims that it is "Additional to the Geneva Conventions of 12 August 1949" and Article 1 (*General principles and scope of application*), paragraph 3, provides that it "supplements" these Conventions.⁵
- 3746** The addition of a supplement to the Conventions entails the appearance of two separate, though basically overlapping treaty communities once the Protocol enters into force.⁶ On the one hand, the virtually universal already existing community of Parties to the Conventions; on the other hand, that which came into existence on 7 December 1978⁷ of Parties bound by the Conventions and by the Protocol.⁸
- 3747** Only this new treaty community is covered by the paragraph under consideration here. It lays down a rule that applies at all times, and not only in time of armed conflict within the meaning of Article 1 (*General principles and scope of application*), paragraphs 3 and 4.⁹
- 3748** Basically the Protocol supplements the Conventions by extending the scope of their application, the categories of protected persons and objects and the protection conferred. Thus the Conventions remain and the Protocol adds to them without in principle removing anything.¹⁰ When the recognized rules of interpretation reveal an incompatibility on a particular point between the provisions of the Conventions and those of the Protocol, the latter take precedence. In this respect this paragraph merely repeats, succinctly, the relevant rule of the law of treaties.¹¹
- 3749** The Protocol explains its relation to the Geneva Conventions of 1949; the latter do the same with regard to the conventions preceding them, which they replace,¹²

⁵ See also the commentary on the title (*supra*, pp. 20-21); on the third paragraph of the Preamble (p. 27) and on Art. 1, para. 3 (p. 39).

⁶ We do not consider here the community of States Parties to Protocol II which has its own particular features.

⁷ I.e., the date of entry into force of Protocol I, in accordance with Art. 95, para. 1 thereof.

⁸ It is impossible to be bound by the Protocol without being bound by the Conventions (*cf.* commentary Arts. 92 and 94, *supra*, pp. 1068-1069 and 1076). *Cf. infra*, p. 1549 for a list of the Parties to the Conventions and the Parties to the Protocol.

⁹ *Cf.* commentary Art. 3, *supra*, pp. 66-67, on the different points in time when the provisions of the Protocol become applicable or may become applicable.

¹⁰ *Cf.*, however, the case of mercenaries, who are dealt with specifically in Art. 47 of the Protocol; they are now entitled only to a limited degree of protection, while under the Third Convention they were not dealt with as a separate category.

¹¹ The Vienna Convention on the Law of Treaties of 23 May 1969, Art. 30, paras. 3-4; the rule in question is the general rule *lex posterior derogat priori*, i.e., the later law prevails over the earlier law.

¹² *Cf.* Art. 59/58/134 of the First, Second and Third Conventions, respectively. We note that only one country, Burma, is still bound by the two Geneva Conventions of 1929 (on the wounded and sick; and on prisoners of war, respectively) without being bound by the 1949 Conventions.

and the Hague Regulations respecting the laws and customs of war on land (of 1899 or 1907), which they supplement.¹³

3750 In the area which the Protocol and the law of The Hague have in common, but which is absent from the Conventions, the situation is as follows according to the above-mentioned rule: pre-existing law continues to apply as treaty law or customary law insofar as it is not modified or replaced by the Protocol.

3751 In general the relation between the Protocol and all other relevant instruments is studied in this commentary with regard to each provision or group of provisions for which the question arises.¹⁴

Paragraph 2

3752 This paragraph is taken *mutatis mutandis* from paragraph 3 of Article 2, common to the Conventions, and like the latter, deals with two aspects of the same assumption, namely that the Parties to a given conflict are not all bound by the same rules. Until such time as the Protocol is in force universally like the Conventions, it is necessary to determine what is the status in such a situation of the provisions of the Protocol insofar as they are not customary law.

First sentence

3753 This has been a basic rule of the Geneva Conventions since 1929,¹⁵ while the earlier Conventions of Geneva and The Hague included a *clausula si omnes* or clause of universal participation. According to that clause, it was sufficient for one of the Parties to the conflict not to be bound by a particular convention for all the other Parties to the conflict, even though they were bound by that convention, to be absolved from applying it, even between themselves. This had the effect that formally the conventions of humanitarian law in existence at the time were not applicable at the beginning of the First World War.¹⁶

3754 Under the present sentence a Party to a conflict bound by the Protocol remains bound to apply it vis-à-vis the adverse Parties bound by the same instrument, even if one or several adverse or allied Parties are not bound by the Protocol. If necessary Article 1 (*General principles and scope of application*), paragraph 1, of the Protocol confirms that this applies in all circumstances despite practical difficulties which may arise, for example, in military alliances.¹⁷

¹³ Cf. Art. 135 of the Third Convention and Art. 154 of the Fourth Convention.

¹⁴ Basically these are questions arising from Part III and Part IV, Section I. Among the other instruments we could mention, for instance, the Hague Convention for the Protection of Cultural Property in the Event of Armed Conflict, of 1954 and the Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques, of 1976.

¹⁵ The same rule also applies to the Hague Convention for the Protection of Cultural Property in the Event of Armed Conflict of 1954 (Art. 18, par. 3, first sentence) and to the United Nations Convention on the use of certain conventional weapons of 1980 (Art. 7, para. 1).

¹⁶ Cf. *Commentary I*, pp. 33-34 (Art. 2, para. 3).

¹⁷ Cf. *ibid.*, for treatment in greater depth.

*Second sentence*1. *Conflicts between States*

3755 The procedure by which a State binds itself to the terms of an international treaty is a lengthy one: apart from a thorough examination of the treaty it must carry out at least a preliminary study of the measures for execution which will follow from participation in the treaty in question.¹⁸ Thus it may happen that a State gets involved in an international armed conflict without having completed the internal procedure of examining the Protocol. In that case, if the State concerned so desires, this is a way of making the Protocol legally applicable between itself and the other Parties to the conflict already bound by that instrument.¹⁹ Although the sentence concerned only refers to one Party, the same procedure may of course be used by several Parties to a conflict which are not bound by the Protocol.

3756 The way that is open to achieve this is limited in its effects. In fact, it does not definitively bind the Party concerned to all the obligations as does ratification or accession; acceptance²⁰ is limited to the current conflict and the Party making the declaration of acceptance retains total freedom as regards its formal participation in the Protocol.

3757 This procedure is not unduly legalistic. The question when and precisely under what conditions the Conventions would become applicable according to their relevant provision (identical to the provision under consideration here), was discussed at length in 1949. We summarize below the conclusions of the commentary on the Conventions:

- it is highly desirable to have an official and explicit declaration from the accepting Party. However, this is not expressly required, and if the declaration is lacking or its transmission delayed, actual application implies acceptance (tacit acceptance);²¹
- the Parties bound by the Protocol engaged in a conflict with a non-contracting Party will presume that the latter intends to apply the Protocol and they will apply it themselves pending a possible declaration and above all until they have had the possibility of assessing the conduct of the non-contracting adverse Party;

¹⁸ Cf. *supra*, commentary Arts. 80 (p. 929), 93 (p. 1072) and 94 (p. 1077).

¹⁹ Cf. *Commentary III*, p. 35, note 1 (Art. 2, para. 3, *in fine*), for an example of how the corresponding provision of the Conventions has been applied. In the now highly exceptional case that a State Party to the conflict would not be bound by the Conventions, acceptance of the Protocol within the meaning of the present paragraph must be accompanied by acceptance of the Conventions within the meaning of common Art. 2, para. 3 thereof.

²⁰ Acceptance as meant here is different from acceptance as mentioned in various treaties, in particular the Vienna Convention on the Law of Treaties (Art. 16); in that sense acceptance is one of the methods whereby a State may become Party to a treaty and it has the same legal effect as ratification, approval and accession.

²¹ The Hague Convention of 1954 requires a declaration (Art. 18, para. 3, second sentence); the United Nations Convention of 1980 requires a notification of acceptance addressed to the depositary (Art. 7, para. 2).

- only in case the non-contracting Party manifestly fails to apply the Protocol in practice, may the Parties bound by the Protocol abandon applying it – with regard to that non-contracting Party – irrespective of whether or not there has been a declaration of acceptance.

2. *Armed conflict for self-determination*²²

3758 The following paragraph lays down a special procedure for authorities representing peoples fighting for self-determination. If the authority concerned is fighting against a Party to the Protocol, recourse to paragraph 3 will have the advantage of greater clarity; the possibility laid down in this paragraph does not seem adequate. However, if communication with the depositary is difficult, slow or impossible, such a solution may still be envisaged, in which case the declaration should also relate to the Conventions, based on their common Article 2, paragraph 3.²³

Paragraph 3

3759 As the Protocol states in Article 1 (*General principles and scope of application*), paragraph 4, that armed conflicts for self-determination are international, the Conference considered it necessary to lay down a special procedure of acceptance for authorities representing peoples engaged in such conflicts. We will first examine the declaration laid down in this paragraph, and then study any further cases that may occur if all the conditions required here are not fulfilled.

1. *Conditions of application of the paragraph*

- 3760** – In view of the reference to Article 1 (*General principles and scope of application*), paragraph 4, there must be an armed conflict “in which peoples are fighting against colonial domination and alien occupation and against racist régimes in the exercise of their right of self-determination [...]”²⁴
- 3761** – The armed conflict must be between a people fighting for self-determination and a Party to the Protocol. If the instrument of ratification or accession of the

²² On this point and on paragraph 3 we refer primarily to the commentary on Art. 1, para. 4, *supra*, p. 41 and to the literature referred to in note 71, especially to: W.T. Mallison and S.V. Mallison, *op. cit.*, pp. 13-14; J.J.A. Salmon, *op. cit.*, pp. 71-73, 82, 102-103; D. Schindler, “The Different Types of Armed Conflict...”, *op. cit.*, pp. 135-137, 140-144; G. Abi-Saab, “Wars of National Liberation...”, *op. cit.*, pp. 400-415, 433-434; E. Kussbach, “Die Rechtsstellung nationaler Befreiungsbewegungen...”, *op. cit.*, pp. 501-516; J.A. Barberis, *op. cit.*, pp. 244, 251-259, 267-268; A. Cassese, “Wars of National Liberation...”, *op. cit.*, pp. 315-316, 320-324.

²³ In this connection, *cf.* point 4, *infra*, p. 1091. E. Kussbach thinks that paragraph 2 is also open to the authorities in question together with an acceptance under common Art. 2, para. 3 (“Die Rechtsstellung nationaler Befreiungsbewegungen...”, *op. cit.*, p. 502, note 5).

²⁴ *Cf.* commentary Art. 1, para. 4, *supra*, p. 43 for further developments on such conflicts.

Party concerned was deposited less than six months before, a declaration by the authority representing the people engaged in the conflict remains possible by virtue of the provision on immediate effect included in the Conventions.²⁵

3762 – There must be a declaration addressed to the depositary.²⁶

3763 – The declaration must come from an authority representing the people engaged in the conflict concerned, which requires two points to be clarified:

- first, it has occurred in some conflicts for self-determination that two or more authorities were deemed to represent the people engaged in the conflict.²⁷ In such a case the present paragraph may be applied without difficulty if there is a common declaration or if there are concordant declarations from those authorities; if, on the other hand, one or other of the authorities does not make the declaration, this paragraph applies only between the Contracting Party and the authority or authorities making the declaration;²⁸
- a proposal to require recognition by the competent regional intergovernmental organization, which was not included in Article 1 (*General principles and scope of application*), paragraph 4, was not adopted either for inclusion in the text of the present paragraph.²⁹

2. Nature of the declaration

3764 – The declaration which the authority concerned must make is unilateral since it produces its effects irrespective of the conduct of the Contracting Party. On the other hand, it does not create merely unilateral obligations; it brings into force rights and duties between the two Parties to the conflict which flow from the Conventions and the Protocol and it does so because of the fact that the Contracting Party against which the fight is directed had previously become a Party to the Protocol.

3765 – The declaration is a condition for sub-paragraphs (a)-(c) becoming applicable: the status recognized to liberation movements indeed gives them, as it gives States, the right to choose whether or not to submit to international humani-

²⁵ Art. 62/61/141/157; cf. also commentary Art. 95, para. 2, *supra*, p. 1081.

²⁶ The depositary in turn will communicate the declaration by the quickest methods to the Parties to the Conventions, in accordance with Art. 100, sub-para. (d).

²⁷ Cf. D. Schindler, “The Different Types of Armed Conflicts...”, *op. cit.*, pp. 143-144 and G. Abi-Saab, “Wars of National Liberation...”, *op. cit.*, p. 409, on the existence of more than one movement and the application of the present paragraph.

²⁸ It is difficult to see how any other solution could in fact be compatible with sub-para. (c) or with the rejection of the *clausula si omnes* in para. 2.

²⁹ Cf. commentary Art. 1, para. 4, *supra*, p. 43. On this point, cf. also J.J.A. Salmon, *op. cit.*, pp. 83-84; D. Schindler, “The Different Types of Armed Conflicts...”, *op. cit.*, pp. 141-142; G. Abi-Saab, “Wars of National Liberation...”, *op. cit.*, pp. 408-409; E. Kussbach, “Die Rechtsstellung nationaler Befreiungsbewegungen...”, *op. cit.*, p. 511 (all these authors remark on the value of such recognition but they think it is not required by the present article); see also J.A. Barberis, *op. cit.*, pp. 248-251, 267. We may add that such a requirement was put forward by the United Kingdom in a declaration it made when it signed the Protocol, and by the Republic of Korea in a declaration made when ratifying the Protocol.

tarian law, insofar as it goes beyond customary law. In this respect they are in a fundamentally different legal position from insurgents in a non-international armed conflict: if the State in whose territory such a conflict takes place is a Party to the Conventions and to Protocol II, Article 3 common to the Conventions and, as the case may be, Protocol II, will bind all the Parties to that armed conflict straightaway.³⁰

- 3766** – Any reservations the Contracting Party may have made will affect the relations between that Party and the authority making the declaration insofar as they are compatible with the object and purpose of the Conventions and of the Protocol.³¹ The authority, too, could formulate reservations, subject to the general conditions relating thereto, if it considered it necessary to do so;³² however, the greatest prudence is appropriate in order to avoid any controversy which might jeopardize the application of international humanitarian law in the conflict that has broken out.

3. *Effects of the declaration*

- 3767** – The Conventions and the Protocol immediately come into force between the Contracting Party and the authority.
- 3768** – In relation to the conflict taking place the authority making the declaration assumes the same rights and the same obligations as a Party to the Conventions and to the Protocol.³³ On the other hand, Article 7 (*Meetings*) and, with the exception of this article, the whole of Part VI, are not applicable to the authority.³⁴
- 3769** – The Conventions and the Protocol bind all the Parties to the conflict equally: this is a reminder of a basic rule of this law, reaffirmed in the fifth paragraph of the Preamble, and in Article 1 (*General principles and scope of application*), paragraph 1, of the Protocol. “All Parties to the conflict” is to be understood subject to what we said regarding the case that two or more authorities represent the same people engaged in a conflict.

³⁰ Cf. commentary Protocol II, general introduction, *infra*, p. 1325, and introduction to Part I, *infra*, p. 1343. Notwithstanding this description of the legal situation, nobody would support the contention that there could be any conflict which would not be subject to at least common Article 3; and to Protocol II, too, however different the views may be on the nature of the conflict, provided that Protocol II applies to the territory in question and all material conditions are met for that Protocol to apply.

³¹ Cf. introduction to Part VI, *supra*, pp. 1059-1065.

³² In this sense E. Kussbach, “Die Rechtsstellung nationaler Befreiungsbewegungen...”, *op. cit.*, p. 510; he refers to the fact that the Conventions and the Protocol are silent on the question of reservations, and to the equality of rights and obligations of all concerned under the terms of sub-para. (b) of the present paragraph 3.

³³ In order to emphasize the importance of implementing Art. 80 forthwith, the Commission decided after adopting the present paragraph to use the formula “The High Contracting Parties and the Parties to the conflict” in both paras. of Art. 80. However, see commentary Preamble, *supra*, p. 25, on the meaning of the term “High Contracting Parties”.

³⁴ However, cf. commentary Art. 7, *supra*, p. 103, and Art. 97, *infra*, pp. 1094-1096.

4. *Cases when a declaration is impossible*

3770 The declaration laid down in this paragraph is only possible if an armed conflict is conducted against a Party to the Protocol. What is the position if an armed conflict within the meaning of Article 1 (*General principles and scope of application*), paragraph 4, is conducted against a Party not bound by the Protocol?

a) *The State is a Party to the Conventions*

3771 The gradual recognition in international law of the right of self-determination and of the international nature of armed conflicts conducted in the exercise of this right had led to the view, even before the Protocol, that common Article 2, paragraph 3, of the Conventions opened also to national liberation movements a possibility to accept the Conventions.

3772 For the advocates of this solution the fact that the drafters of the 1949 Conventions had not intended to cover national liberation movements did not detract in the least from the need to interpret the term “Powers” in that article in a manner consistent with the whole of the legal system as in force at the time of interpretation.³⁵

3773 In fact the same majority of States had insisted on the international character of armed conflicts in the exercise of self-determination³⁶ already before the adoption of the Protocol, and had then proposed, defended and obtained the inclusion of paragraph 4 of Article 1 (*General principles and scope of application*) and paragraph 3 of the present Article 96 of the Protocol.

3774 These States did not for one moment think of taking away from national liberation movements a right which they had recognized on many occasions as due to these movements and which will now be regulated and clarified in this article once the Protocol is in force for the State concerned. Consequently, for a very large majority of States the route of acceptance of the Conventions in accordance with their common Article 2, paragraph 3, remains open to authorities representing peoples fighting for self-determination against a State which is a Party to only the Conventions.³⁷ In the same case a declaration of acceptance of

³⁵ Cf. commentary Art. 1, para. 4, *supra*, p. 47 (and note 56) and p. 51 (with notes 72 and 73).

³⁶ And thus by implication the interpretation given above which may be considered as a question of procedure.

³⁷ On the interpretation of common Art. 2, cf. J.J.A. Salmon, *op. cit.*, pp. 71-72; D. Schindler, “The Different Types of Armed Conflicts...”, *op. cit.*, pp. 135-136, thinks that it is a question of interpretation rather than a rule of customary law, having regard to the opposition of several States in addition to the States concerned; G. Abi-Saab, “Wars of National Liberation...”, *op. cit.*, pp. 400-403, 433, thinks that this rule applies *vis-à-vis* all States and that the present paragraph confirms the validity of this rule; A. Cassese; “Wars of National Liberation...”, *op. cit.*, p. 332, is of the opinion that the international character of these conflicts has become a rule of customary law as a result of the decision of the Conference and that this right applies *vis-à-vis* all States which were represented there, with the exception of the one which consistently opposed the formulation of such a rule. See also E. Kussbach, *supra*, p. 1088, note 23.

the Protocol would only count as a unilateral undertaking of obligations in matters which are not covered by customary law.³⁸

b) *The State is not a Party to the Conventions*

3775 In this situation, which is highly exceptional nowadays, any declaration by a liberation movement could only have the effect of a unilateral commitment in matters not covered by customary law.

B.Z.

³⁸ In this respect, *cf.* the 1980 Convention on the use of certain conventional weapons, Art. 7, para. 4(b).

Article 97 – Amendment

1. Any High Contracting Party may propose amendments to this Protocol. The text of any proposed amendment shall be communicated to the depositary, which shall decide, after consultation with all the High Contracting Parties and the International Committee of the Red Cross, whether a conference should be convened to consider the proposed amendment.
2. The depositary shall invite to that conference all the High Contracting Parties as well as the Parties to the Conventions, whether or not they are signatories of this Protocol.

Commentary

General remarks

- 3776** The inclusion in the Protocol of an article providing for the possibility of amendment corresponds with a general trend in recent multilateral treaties.¹ Part IV of the Vienna Convention on the Law of Treaties of 23 May 1969 (Amendment and modification of treaties – Articles 39-41) contains some provisions on this subject which are applicable when a treaty does not provide otherwise. We will refer to these provisions below.
- 3777** The draft presented to the Conference (Article 86) did not give rise to any proposed amendment and only underwent one modification. Instead of making every amendment to the Protocol, including Annexes I and II, subject exclusively to this article, the Conference laid down detailed rules separately for revision of Annex I (Article 98 – *Revision of Annex I*). The article under consideration here did not give rise to any discussion in Committee I or in the plenary Conference and was adopted by consensus in both.²

Paragraph 1

- 3778** In accordance with the terminology of the Vienna Convention, this article uses the term “amendment” and not “revision”. In this context “amendment” usually means changes made to individual provisions, while “revision” usually means changes affecting, rather, the whole of a treaty. However, this distinction is not always followed and has no legal significance.³ Like the Vienna Convention, this article covers either case and is applicable to both isolated changes and all-embracing revisions.
- 3779** One distinction made by the Vienna Convention defines the scope of this article. An amendment changes a treaty so as to affect all the Parties; on the other hand, when the change to the treaty is only in the mutual relations of two or more Parties, the Vienna Convention refers to “modification”.⁴
- 3780** It should be noted that this article only deals with amendments to the Protocol. However, a procedure for amending the Conventions could – as they do not contain a provision to this effect – apply this article by analogy and similarly make use of the remarks below.

¹ On amendment, revision or modification of treaties, *cf.* P. Reuter, *Introduction au droit des traités*, *op. cit.*, pp. 131-135 (paras. 193-201) and 151-152 (Notes 193-201); W.G. Grewe, “Treaties, Revision”, *Encyclopedia of Public International Law*, *op. cit.*, Instalment 7, 1984, p. 499.

² *Cf.* respectively, *O.R.* IX, p. 474, CDDH/1/SR.76, para. 5; *O.R.* VII, p. 16, CDDH/SR.47, para. 5.

³ On this subject, and particularly on the reasons for retaining the word “amendment” rather than “revision” in the Vienna Convention, *cf.* P. Reuter, *Introduction au droit des traités*, *op. cit.*, p. 151 (note 193); W.G. Grewe, *op. cit.*, p. 501.

⁴ On such “modifications” of the Conventions and the Protocol, *cf.* commentary Art. 4, *supra*, p. 74.

- 3781** The proposal for amendment may come from any Contracting Party, i.e., any Party to the Protocol, irrespective of the way in which it has become a Party.⁵ This is not so for Parties to which the Protocol applies in relation to a conflict in progress, by virtue of an *ad hoc* acceptance on their part;⁶ but this does not alter the fact that it would be desirable for such Parties to be invited as observers if a conference were to be called.
- 3782** The proposal may contain one or more amendments; it may come from one Contracting Party acting for itself or on behalf of several Parties, or it could come from two or more Contracting Parties acting jointly – for example, following a meeting held in accordance with Article 7 (*Meetings*).
- 3783** The fact that the depositary is designated to proceed to consult the Contracting Parties and the ICRC follows logically from its mandate.⁷ That each Contracting Party has the right to participate in the decision about what is to be done regarding the proposed amendment does not require explanation;⁸ the fact that the ICRC is also consulted is a recognition of its role in the codification and development of humanitarian law. Parties to the Conventions not bound by the Protocol are not consulted, but in accordance with Article 100 (*Notifications*), sub-paragraph (c), the depositary informs them of the proposed amendment and of the consultation relating to it.
- 3784** The consultation will in fact consist of submitting the proposed amendment and asking each of the Contracting Parties to give its opinion, within a given period, on convening a conference to examine the proposal.⁹ If there are several proposed amendments, those consulted are free to give an overall view or to present their view on each proposal individually.¹⁰
- 3785** The article is silent regarding the way in which the depositary should decide, on the basis of the results of the consultation, whether it should convene a conference.¹¹ In the absence of any indications in the Official Records of the Conference it must be considered that the latter deliberately abstained from requiring approval by, for example, a third or by a majority of the Contracting

⁵ Cf. commentary Arts. 93 and 94, *supra*, pp. 1071-1072 and 1075. The answer is less clear for a newly independent State which has made a declaration on provisional application of treaties, but this is rather unlikely in the case of the Protocol; if a meeting were called, such a State should nevertheless be invited in any case.

⁶ Cf. commentary Art. 96, paras. 2 and 3, *supra*, p. 1086.

⁷ For a summary of this mandate, cf. commentary Art. 100, *infra*, p. 1114.

⁸ This is confirmed by Article 40, para. 2(a), of the Vienna Convention.

⁹ Although it does not refer to this, the present article does not exclude the possibility that those consulted are also given a choice between a meeting and a written procedure in the case of minor amendments.

¹⁰ On the possibility of conditional approval of proposals in such cases, cf. commentary Art. 7, *supra*, p. 106.

¹¹ No indication can be found either in the Vienna Convention, nor in the message sent by the Swiss Federal Council to the Swiss Federal Parliament on 18 February 1981, Chapter 211.73. The Convention on the use of certain conventional weapons of 10 October 1980 which required participation by 20 States to enter into force (Art. 5, para.1) requires in this respect a majority consisting of at least 18 Contracting Parties (Art. 8, paras. 1 and 2). On conditional approval, cf. note 10.

Parties.¹² The decision of the depositary will be notified to the Contracting Parties, to the Parties to the Conventions, and to the ICRC.

Paragraph 2

- 3786** In the event of an affirmative decision, the depositary will invite all concerned to the conference, namely, the Parties to the Protocol and the Parties to the Conventions; it would be desirable also to invite Parties to which the Protocol applies by virtue of various types of declarations or acceptance as mentioned above.¹³
- 3787** The question of what rights the various delegations have is not explicitly resolved in this article. It might be thought that, as the Protocol is additional to the Conventions, all Parties to the Conventions should enjoy the right to make proposals, the right to take part in the discussions and the right to vote.¹⁴ This would have the advantage of permitting every Party to the Conventions which is not bound by the Protocol – but called upon to become a Party – to take a decisive part in its evolution; that would undoubtedly help to avoid any development which might make it more difficult for such a Party to accept the Protocol later on.
- 3788** These arguments can be rightly countered with the argument that the Parties to the Protocol must be able to determine how this relatively autonomous treaty should be developed, a treaty by which they, and only they, are bound, and from which they alone derive rights and obligations.
- 3789** Reference to the Vienna Convention, in particular to the concept of amendment as given above, provides two additional arguments in favour of the last-mentioned solution. The first is that an amendment to a treaty is intended to change it with regard to the relations between all the Parties to that treaty; thus it relates only to Parties bound by the Protocol. The second argument is that the Vienna Convention grants Parties to a treaty the right to decide on the action to be taken with regard to a proposed amendment and to participate in any negotiations that may be held on that proposal;¹⁵ with regard to the Protocol it must be deduced from this that the group of Parties which have a voice in the matter must be the same in both paragraphs of this article, and therefore it concerns only the Parties to the Protocol.¹⁶
- 3790** This solution leaves open what right, if any, other participants in the conference will have to put forward proposals and to take part in deliberations. This must be decided by the Parties to the Protocol, at the latest at the beginning of the conference; the same is true for the question of the majority needed for adopting

¹² Solutions adopted respectively by Art. 98, para. 2 (which gives the same right to the ICRC), and by Art. 7.

¹³ Cf. *supra*, pp. 1094-1095, and notes 5 and 6.

¹⁴ It may be recalled that in the Diplomatic Conference these rights were also granted States which, while not being Parties to the Conventions, were Members of the United Nations.

¹⁵ Vienna Convention, Art. 40, para. 2.

¹⁶ In the same sense, reference should be made to the Convention on conventional weapons, Art. 8, paras. 1-2.

any proposed amendment. On this point, unless the Parties to the Protocol decide otherwise, the required majority will be two-thirds of the Parties to the Protocol present and voting, i.e., without taking into account abstentions.¹⁷ The amending agreement will decide on the question of the entry into force of the amendments with respect to Parties already bound by the Protocol and with respect to those which may become bound in due course.¹⁸

B.Z.

¹⁷ Cf. Vienna Convention, Arts. 39 and 9, para. 2. Similarly, the above-mentioned message from the Swiss Federal Council, chapter 211.73.

¹⁸ See the rules of the Vienna Convention which are applicable unless a different intention is expressed, Art. 40, para. 5.

Protocol I

Article 98 – Revision of Annex I

1. Not later than four years after the entry into force of this Protocol and thereafter at intervals of not less than four years, the International Committee of the Red Cross shall consult the High Contracting Parties concerning Annex I to this Protocol and, if it considers it necessary, may propose a meeting of technical experts to review Annex I and to propose such amendments to it as may appear to be desirable. Unless, within six months of the communication of a proposal for such a meeting to the High Contracting Parties, one third of them object, the International Committee of the Red Cross shall convene the meeting, inviting also observers of appropriate international organizations. Such a meeting shall also be convened by the International Committee of the Red Cross at any time at the request of one third of the High Contracting Parties.
2. The depositary shall convene a conference of the High Contracting Parties and the Parties to the Conventions to consider amendments proposed by the meeting of technical experts if, after that meeting, the International Committee of the Red Cross or one third of the High Contracting Parties so request.
3. Amendments to Annex I may be adopted at such a conference by a two-thirds majority of the High Contracting Parties present and voting.
4. The depositary shall communicate any amendment so adopted to the High Contracting Parties and to the Parties to the Conventions. The amendment shall be considered to have been accepted at the end of a period of one year after it has been so communicated, unless within that period a declaration of non-acceptance of the amendment has been communicated to the depositary by not less than one third of the High Contracting Parties.
5. An amendment considered to have been accepted in accordance with paragraph 4 shall enter into force three months after its acceptance for all High Contracting Parties other than those which have made a declaration of non-acceptance in accordance with that paragraph. Any Party making such a declaration may at any time withdraw it and the amendment shall then enter into force for that Party three months thereafter.
6. The depositary shall notify the High Contracting Parties and the Parties to the Conventions of the entry into force of any amendment, of the Parties bound thereby, of the date of its entry into force in relation to each Party, of declarations of non-acceptance made in accordance with paragraph 4, and of withdrawals of such declarations.

Commentary**General remarks**

- 3791** This article sets out the procedure to be followed for the periodic revision of Annex I to this Protocol, which is entitled “Regulations concerning identification”, hereafter referred to as Annex I. The procedure is sub-divided into six consecutive steps with which the six paragraphs of this article successively deal. Paragraphs 1 and 2 mention the role of the ICRC.¹
- 3792** Originally the report of the experts of the Technical Sub-Commission of Committee I of the Conference of Government Experts recommended in 1972 that “an international group of technical experts should review [...] to revise and update the identification and signalling standards, practices and procedures” proposed in the report for medical aircraft “in the light of technological advances”.²
- 3793** To this end Article 16 (Chapter V) of the draft Regulations concerning identification annexed to the 1973 draft of Protocol I provided for periodical revision.

¹ Cf. introduction to Annex I, *infra*, p. 1137.

² *CE 1972, Report*, Vol. I, p. 55, Annex III, para. 14.

- 3794** This procedure applies to all the provisions of Annex I and not only those concerning medical aircraft. In fact technical development and progress have an effect not only on the identification and signalling of medical units and transports in the air, but also on those at sea and on land, as military developments in the field of radio communications, detection, localization and identification cover all these: land, sea, air and even space.
- 3795** All these technological advances have civilian uses, sometimes before being used for military purposes, which required the creation of specialized international organizations for regulating their use:
- the International Telecommunication Union (ITU) for the management of the electromagnetic frequencies spectrum, which is a natural resource;
 - the International Maritime Organization (IMO) for maritime navigation (before 1 July 1982 the IMO was called the Inter-Governmental Maritime Consultative Organization (IMCO));
 - The International Civil Aviation Organization (ICAO) for air navigation.
- 3796** These three intergovernmental organizations each have a special procedure for the adoption and revision of rules which makes it possible for them to keep up with technological progress. For this purpose these organizations convene conferences of government experts of the member States. Furthermore, various other international conventions provide in advance for the possibility of amendment.
- 3797** The recommendation of the experts of the Technical Sub-Commission for periodic revision and updating of the Regulations concerning identification annexed to Protocol I is therefore in accordance with established custom for technical rules. The usefulness of the regulations depends on their adaptation to technological development; this is what justifies the periodic meetings of technical experts and a special procedure for revision separate from that for amendment of the Protocol.³
- 3798** When the 1973 draft had been considered at the first session, the Technical Sub-Commission thought that it was a legal matter within the terms of reference of Committee II which was sent the text of Chapter V (Article 16) together with the proposed amendments for consideration.⁴
- 3799** In the course of the work of Committee II during the third session, Article 16 of the draft Annex became Article 18 *bis* of the Protocol; it was adopted by consensus and transferred to Part VI of the Protocol. The Conference also adopted it by consensus and it became Article 98 in the final version of the Protocol.⁵
- 3800** Article 98 provides for revision of Annex I, after the ICRC has consulted the High Contracting Parties, four years after the entry into force of Protocol I and thereafter at intervals of not less than four years. As Protocol I entered into force on 7 December 1978, the ICRC consulted the Contracting Parties on 7 December

⁴ O.R. XIII, p. 34, CDDH/49/Rev.1, paras. 69-72. O.R. III, pp. 91-92, CDDH/II/68; pp. 92-93, CDDH/II/357 and 359; p. 378, Chapter V, Art. 16; p. 401, note.

⁵ O.R. XII, pp. 246-247, CDDH/II/SR.77, para. 69; O.R. VII, p. 55, CDDH/II/SR.48.

1982, in accordance with Article 98, with regard to the question whether a meeting of technical experts should be convened in order to review the Regulations concerning identification.

- 3801** For its part the ICRC did not propose such a meeting of experts as it considered that the number of States Parties to the Protocol was still too small in 1982 and that it was preferable to postpone the procedure for revision until later. Moreover, the international organizations to which the Diplomatic Conference had addressed its Resolutions 17, 18 and 19 in 1977, viz., respectively, ICAO, IMO and ITU, were still working on many important points.
- 3802** As of June 1985 the results of the work undertaken by these organizations in response to these Resolutions had yielded already certain indispensable technical additions for the practical application of Annex I.
- 3803** If henceforth the revision procedure, in accordance with Article 98, modifies the existing rules, this commentary will also have to be updated.

Heading of the article

- 3804** Annex I of the 1973 draft contained a Chapter V entitled “Periodical revision”. That Chapter only contained one article, Article 16, entitled “Procedure”.
- 3805** Committee II transferred the amended Article 16 to Protocol I as Article 18*bis* entitled “Revision of the Annex” and deleted Chapter V of the draft. Article 18*bis* became the present Article 98, of which the heading reads “Revision of Annex I”. In fact it is concerned with the periodical revision and updating of the Regulations concerning identification annexed to Protocol I.

Paragraph 1

- 3806** Paragraph 1 lays down the intervals at which the revision should take place, and the role of the Contracting Parties and the ICRC in this process.
- 3807** According to the sponsors of the amendment which the Technical Sub-Commission communicated to Committee II together with draft Article 16 of Annex I, an interval of four years would enable any meetings of technical experts to coincide with the sessions of the International Conference of the Red Cross.⁶
- 3808** As we have seen, the ICRC carried out its task of consulting the High Contracting Parties regarding the revision of Annex I for the first time in 1982.
- 3809** The proposal made by the ICRC to postpone the first revision of the Regulations did not meet with opposition. Thus the ICRC must again consult the Parties to the Protocol about revision of the Regulations at the next date due for revision, viz., not less than four years after 7 December 1982, i.e., after 7 December 1986; and similarly thereafter at intervals of not less than four years. The interval may be longer if the ICRC considers that technological developments justify this.

⁶ Cf. *O.R.* XII, p. 208, CDDH/II/SR.74, para. 5.

- 3810** When consulting the Contracting Parties regarding the need to convene a meeting of technical experts for the purpose of revising the Regulations, the ICRC may propose such a meeting or suggest that it be postponed to the next due date four years later. If the ICRC proposes that the meeting should take place, it may at the same time propose the amendments it deems desirable. On the other hand, if it proposes postponing the meeting, the ICRC must give reasons therefore. The purpose of Article 98 is the periodic revision of Annex I in order to maintain its effectiveness and thus it is this criterion of efficacy which must guide the ICRC's decision whether to convene or postpone a meeting of experts.
- 3811** Paragraph 1 gives the ICRC the role of ensuring that the technical provisions of Annex I will always remain up to date. Therefore the ICRC undertakes to remain at all times informed of the views held by the experts of the Parties to the Protocol on technological developments in the fields covered by the Regulations. With the support of these experts it also undertakes to prepare the necessary amendments and to anticipate the needs in the light of technological progress.
- 3812** Finally, the ICRC is to convene a meeting of technical experts six months after it has proposed such a meeting to the Contracting Parties. This interval gives those who may be opposed to the meeting the opportunity of expressing their view. The meeting of experts proposed by the ICRC will not be convened if one third of the Contracting Parties objects.
- 3813** The “appropriate international organizations” must be invited by the ICRC in order that they may be represented by observers at the planned meeting. These are in particular the ITU, ICAO and IMO, the International Electro-Technical Commission (IEC), the International Commission on Illumination (CIE), as well as other organizations interested in future developments, such as the International Maritime Satellite Organization (INMARSAT).
- 3814** The ICRC may be called upon to convene a meeting of technical experts at any time at the request of one third of the Contracting Parties. It is highly desirable that these Parties should add to their request the necessary explanations and the amendments they wish to make to Annex I, in order that the ICRC may advise the technical experts thereof in good time. The technical experts concerned in this paragraph are government experts to be appointed by the Contracting Parties.

Paragraph 2

- 3815** The second step in the revision procedure is the calling of a conference of the Parties to the Protocol and the Parties to the Conventions to consider the amendments proposed by the meeting of technical experts. For this purpose, at the end of the meeting of experts, the ICRC or one third of the Parties to the Protocol may request the Federal Council (the Swiss government), the depositary of the Protocol, to convene the conference.⁷
- 3816** The text of this paragraph, which provides that the Contracting Parties, as well as the Parties to the Conventions, must be invited to conferences convened to

⁷ For a summary of the depositary's functions, *cf.* commentary Art. 100, *infra*, p. 1113.

consider amendments proposed by the meeting of technical experts, is on the same lines as paragraph 2 of Article 97 (*Amendment*) of the Protocol. In addition, Article 7 (*Meetings*) of the Protocol provides for meetings of Parties to the Protocol. It may be thought that for all such meetings and conferences the arrangements regarding financing, rules of procedure, place and date of meeting etc. will be similar. According to this paragraph, the deliberations in the conference can only be about amendments proposed by the technical experts. Thus the participating States may only propose additions, deletions or modifications of the agenda if they are related to these amendments. Neither this Article nor Article 97 (*Amendment*) of the Protocol says anything about the question whether Parties to the Conventions which are not Parties to the Protocol are entitled to make proposals and to take part in the discussions.⁸ However, for amendments to Annex I this right ought to be granted to all participants of the conference concerned. A decision on granting it should be taken by the Parties to the Protocol.

3817 Paragraph 2 does not say whether the depositary State should also invite the above-mentioned international organizations as observers. This seems useful, and even indispensable, since the conference is called to consider technical provisions which sometimes involve the competence of one or other of these specialized organizations. The Swiss Federal Council in its message to the Federal Parliament on the additional Protocols did not express a view on this point.

3818 After the adoption of Article 18*bis* in Committee, the representatives of four States at the diplomatic Conference made statements reserving the position of their governments on this article. These reservations regarding the article as a whole were prompted by their views on granting powers to the ICRC to convene meetings of technical experts and conferences of Contracting Parties in accordance with the provisions of paragraphs 1 and 2 of the article. They said that this did not belong to the authority of the ICRC in its capacity as an impartial international organization, and that the provisions of Article 18*bis* impinged upon the sovereignty of States.⁹

3819 During the discussions in Committee II the ICRC representative emphasized that the sovereignty of States was not at issue.¹⁰ The procedures laid down in paragraphs 4, 5 and 6 of Article 98 prove this: the sovereignty of States is respected.

⁸ Cf. commentary Art. 97, *supra*, p. 1093.

⁹ Cf. O.R. XII, p. 258, CDDH/II/SR.79, paras. 8-10; O.R. XIII, p. 269, CDDH/235/Rev.1, paras. 64-65.

¹⁰ Cf. O.R. XII, p. 209, CDDH/II/SR.74, para. 13; p. 211, paras. 26, 30; p. 241, CDDH/II/SR.77, para. 30; p. 242, para. 38.

Paragraph 3

- 3820** The majority of two-thirds of the High Contracting Parties present and voting as specified in this paragraph corresponds to the rule of the Diplomatic Conference on voting on questions of substance.¹¹
- 3821** The voting procedure to be used by the Parties to the Protocol on amendment to Annex I might logically be the same as that provided for in the Rules of procedure of the Diplomatic Conference.¹²

Paragraph 4

- 3822** The provisions of this paragraph leave intact the sovereign right of States to accept or reject an amendment to Annex I. In its message on the Protocols, the Swiss Federal Council stated, with regard to this article, that every Contracting Party has the option of declaring within twelve months that it does not wish to be bound by the amendment (the so-called “opting-out system”).
- 3823** The number of Contracting Parties may change in the course of the one year period laid down for the acceptance or rejection of an amendment. On this point paragraph 2 of Article 95 (*Entry into force*) of the Protocol establishes the date when a State becomes Party to the Protocol, namely, six months after the deposit of its instrument of ratification or accession. On the other hand, the date when a Party denouncing the Protocol ceases to be a Party is laid down in Article 99 (*Denunciation*) of the Protocol.
- 3824** In the case of new accessions or ratifications the number of Contracting Parties to take into account to calculate one third as laid down in this paragraph should be taken as six months prior to the end of the above-mentioned period of one year.
- 3825** In fact for Parties ratifying or acceding to the Protocol during the last half of this year, the period of one year laid down in paragraph 4 lapses on the date when the Protocol enters into force for them. Thus such Parties are not taken into account in calculating the one third rejecting an amendment.

Paragraph 5

- 3826** There is a three month period following the date of acceptance, before an amendment enters into force for all Contracting Parties which have not made a declaration of non-acceptance. This three month period should permit States to issue national rules for the implementation of the amendment concerned. This period should also permit the depositary to make the notifications laid down in paragraph 6.

¹¹ Rule 36 of the Rules of procedure clarifies the meaning of the expression “representatives present and voting”; the expression “High Contracting Parties present and voting” has the same meaning. Cf. *O.R.* II, p. 10, CDDH/2/Rev.3, Rule 36.

¹² Cf. *ibid.*, pp. 9-11, Rules 34-40.

- 3827** During or after the one year period, a State which has made a declaration of non-acceptance may revoke its decision and accept the amendment. It will then enter into force for that State at the same time as for the other Contracting Parties if the non-acceptance is withdrawn before the expiry of the one-year period. If the withdrawal of the non-acceptance is communicated to the depositary State after the expiry of the one year period laid down in paragraph 4, the amendment enters into force three months after the notification of the withdrawal.
- 3828** During the discussion of the provision laid down in paragraph 5, the Chairman of Committee II noted that in accordance with Article 32 of the Vienna Convention on the Law of Treaties the records of the Conference may, in general, be used as a means of interpreting the text when there is doubt about its precise meaning. Furthermore, the representative of the United Kingdom, explaining paragraph 5 on behalf of the sponsors of amendment CDDH/II/359, said that

“they had taken as their model some recent international instruments with technical annexes, in particular the IMCO Protocol relating to Intervention on the High Seas in Cases of Marine Pollution by Substances other than Oil (1973). In order to speed up the entry into force of amendments to such technical annexes, [...] the traditional principle was merely reversed, a State being deemed to accept an amendment unless it rejected it.”¹³

Paragraph 6

- 3829** The efficacy of Annex I depends on the provisions to be adopted by specialized international organizations following Resolutions 17, 18 and 19 addressed to those organizations by the Diplomatic Conference.
- 3830** Annex I may therefore have to align itself with the rules and regulations of the competent international organizations, in particular as regards light signals, radio communications, identification by radar and electronic identification.
- 3831** Thus it will be useful for such specialized international organization also receive the information provided by the depositary in accordance with paragraph 6.
- 3832** This article does not deal explicitly with States which become Parties to the Protocol after the entry into force of an amendment to Annex I. However, Article 40, paragraph 5, of the above-mentioned Vienna Convention lays down a rule, applicable if there is no specific rule in the treaty in question, similar to that of paragraph 5 above. According to that article, such States become Parties to the Protocol with Annex I as amended unless they express an intention to the contrary.

Ph.E.

¹³ Cf. *O.R.* XII, pp. 213-214, CDDH/II/SR.74, paras. 42-45. See also the 1969 IMO International Convention relating to Intervention on the High Seas in Cases of Oil Pollution Casualties (INTERVENTION 1969) and the 1973 Protocol relating to Intervention on the High Seas in Case of Marine Pollution by Substances other than Oil (INTERVENTION PROT 1973).

Protocol I

Article 99 – Denunciation

1. In case a High Contracting Party should denounce this Protocol, the denunciation shall only take effect one year after receipt of the instrument of denunciation. If, however, on the expiry of that year the denouncing Party is engaged in one of the situations referred to in Article 1, the denunciation shall not take effect before the end of the armed conflict or occupation and not, in any case, before operations connected with the final release, repatriation or re-establishment of the persons protected by the Conventions or this Protocol have been terminated.
2. The denunciation shall be notified in writing to the depositary, which shall transmit it to all the High Contracting Parties.
3. The denunciation shall have effect only in respect of the denouncing Party.
4. Any denunciation under paragraph 1 shall not affect the obligations already incurred, by reason of the armed conflict, under this Protocol by such denouncing Party in respect of any act committed before this denunciation becomes effective.

Commentary

General remarks

- 3833** The idea that a State could free itself from the obligations imposed upon it by humanitarian law by means of a denunciation might seem to be incompatible with the very nature of that law.¹
- 3834** In view of the uncertainty of customary law and legal writings on the possibilities of denouncing a treaty when it does not have a specific clause for this purpose, it seemed preferable, already in the case of the Conventions² to provide for the right to denounce them, at the same time making this right subject to certain restrictions and adding a reminder that some obligations continue to exist in all circumstances.³ The provisions adopted here reiterate the relevant clause of the Conventions, with some useful clarifications.
- 3835** Finally, we should mention that no State has ever denounced the Conventions, and it is to be hoped that this article will also remain theoretical.
- 3836** This article was adopted by consensus, both in Committee I and in plenary.⁴

Paragraph 1

- 3837** The period of one year from the date when the depositary received the written notification required by paragraph 2, in order for the denunciation to have effect, is taken from paragraph 3 of the above-mentioned article of the Conventions.
- 3838** Nevertheless, the first part of the second sentence of this paragraph provides that the effect of a denunciation will be deferred if, on the expiry of that one year period, the denouncing Party is engaged in one of the situations referred to in Article 1 (*General principles and scope of application*).⁵ This is an exception which is also made in the same paragraph of the Conventions. Unfortunately the wording of that paragraph is rather ambiguous.
- 3839** Taken literally, that paragraph means that the effect of the denunciation will be deferred if the denouncing Power is involved in a conflict covered by the Conventions at the time when it notifies its denunciation.
- 3840** This literal interpretation was not followed by the ICRC in its commentary on the Conventions,⁶ since the spirit of the article means that it has to be applied in a broader sense: if denunciation is notified less than one year before an event which entails the application of the Conventions, its effect will again be deferred

¹ Cf. O.R. VII, p. 35, CDDH/SR.47, para. 106.

² Art. 63/62/142/158 common to the Conventions. We should add that Protocol II, too, has a denunciation clause (Art. 25), although it was not included in the draft.

³ On the question of denunciation of treaties, cf. Art. 56 of the Vienna Convention on the Law of Treaties of 23 May 1969. See also, among others, M. Akehurst, "Treaties, Termination", in *Encyclopedia of Public International Law, op. cit.*, Instalment 7 (1984), p. 507.

⁴ O.R. IX, p. 474, CDDH/I/SR.76, para. 7; O.R. VII, p. 35, CDDH/SR.47, para. 105.

⁵ Cf. paras. 3 and 4 of that article on scope of application.

⁶ Cf., e.g., *Commentary I*, p. 412 (Art. 63, para. 3).

until the situation so started has come to an end and in any event until the release, repatriation and re-establishment operations referred to have been completed.

- 3841** This interpretation, in accordance with the spirit of the article, was not contested. Even though there may have been some doubt in the past, there can be none now. In fact, it is difficult to imagine that the Protocol would continue to apply when the Conventions which it supplements had ceased to do so, as a result of allegedly divergent denunciation clauses.⁷
- 3842** The effect of the denunciation will be deferred until the end of the armed conflict or occupation, and in any case, until operations connected with the final release, repatriation or re-establishment of the persons protected by the Conventions or the Protocol have been terminated: on these various concepts, we refer to the commentary on Article 3 (*Beginning and end of application*), sub-paragraph (b) (*supra*, p. 67).
- 3843** The phrase used in the Protocol is not “until peace has been concluded”, as in the common Article of the Conventions, but “not [...] before the end of the armed conflict or occupation”. This takes into account the long period which may elapse between “the general close of military operations and [...] termination of the occupation” (Article 3 – *Beginning and end of application*, sub-paragraph (b)) and the official conclusion of a peace treaty which even in some cases never happens. Yet when the period of one year has effectively elapsed, there is no need to further defer the effects of denunciation beyond the date when the Conventions and the Protocol cease to be applicable, i.e., the general close of military operations or the termination of occupation, without prejudice however to any subsequent operations for the final release, repatriation or re-establishment of protected persons.
- 3844** One other problem arises with regard to the relation between postponement of the effect of denunciation in accordance with the relevant article of the Conventions and in accordance with this paragraph. For the Conventions the postponement takes place in situations provided for in their common Articles 2 and 3 (the latter relating to conflicts not of an international character): thus the Conventions as a whole remain on force even if the denouncing Party is only engaged in a non-international armed conflict. Should the postponement in that case apply to the Protocol? As the Protocol may be denounced without a denunciation of the Conventions, and as this paragraph refers to Article 1 of the Protocol (*General principles and scope of application*), this question must be answered in the negative.

Conclusions on paragraph 1

- 3845** – It is theoretically possible to denounce the Conventions and the Protocol.

⁷ To apply the Protocol on its own in this way is anyway conceivable only for some of its provisions, e.g. of Parts III and IV.

- 3846** – A State Party to the Conventions and to the Protocol may denounce the Protocol without denouncing the Conventions; the converse is not possible.
- 3847** – Denunciation of the Protocol alone, or of both the Conventions and the Protocol, is kept in abeyance if, at the time the denunciation is made, or during a period of one year thereafter, the denouncing Party is engaged in a situation referred to in Article 1 (*General principles and scope of application*), paragraphs 3 and 4, of the Protocol. Denunciation of only the Conventions is postponed if, during the same period, the denouncing Party is involved in a situation referred to by common Article 3.
- 3848** – The denunciation will remain in abeyance until the end of the situation referred to, and in any case until the operations for the final release, repatriation or re-establishment of protected persons have been terminated.

Paragraph 2

- 3849** Any denunciation must, like ratification and accession, be notified in writing to the depositary which will transmit it to all the High Contracting Parties.
- 3850** According to Article 100 (*Notifications*), sub-paragraph (e), and Article 101 (*Registration*), paragraph 2, the depositary must also inform the Parties to the Conventions whether or not they are signatories of the Protocol, as well as the Secretariat of the United Nations.⁸

Paragraph 3

- 3851** “The denunciation shall have effect only in respect of the denouncing Party”, that is to say, in its relations with other States bound by the Protocol; relations between the latter are not affected by it.
- 3852** This provision is taken from paragraph 4 of the relevant article of the Conventions and follows from the fact that universal participation is not a requirement: regardless of whether one Party to the conflict is not, or is no longer bound by the Protocol, Parties to that instrument nevertheless remain bound by it in their mutual relations.
- 3853** This concept is the same as that underlying the first sentence of paragraph 2 of Article 2 common to the Conventions, as well as the first sentence of paragraph 2 of Article 96 of the Protocol (*Treaty relations upon entry into force of this Protocol*).

⁸ We refer to the commentary on Art. 100, *infra*, p. 1114, for a summary of the depositary’s functions.

Paragraph 4

- 3854** This paragraph restates a rule of customary law codified in the Vienna Convention on the Law of Treaties of 23 May 1969.⁹ The period referred to, i.e., the period after denunciation has taken effect in accordance with paragraph 1, and the expression “any act committed”, clearly show that this paragraph refers to the obligation to prosecute breaches (Article 85 – *Repression of breaches of this Protocol*, Article 86 – *Failure to act*, Article 88 – *Mutual assistance in criminal matters*, Article 89 – *Co-operation* and Article 90 – *International Fact-Finding Commission*) and to pay compensation (Article 91 – *Responsibility*).
- 3855** As this rule applies even without explicit confirmation, and as the Protocol is additional to the Conventions, the relevant articles of the Conventions¹⁰ should also be taken into account, whether or not the Conventions have been denounced.

Other residual obligations

- 3856** Apart from the obligations examined above, there are other duties which remain to be discharged by the denouncing Party, irrespective of whether it has denounced only the Protocol, or both the Protocol and the Conventions. The corresponding article of the Conventions provides for this in a formula based on a clause known as the “Martens clause”, which is in turn adopted in Article 1 (*General principles and scope of application*), paragraph 2 of the Protocol. Even in the absence of any treaty clause, “civilians and combatants remain under the protection and authority of the principles of international law derived from established custom, from the principles of humanity and from the dictates of public conscience”.¹¹
- 3857** Even after the denunciation has taken effect, the denouncing Party remains bound therefore by the obligations referred to in paragraph 4, by other treaties in force with respect to it, by the whole of the relevant customary law, including the clauses of the Conventions and the Protocol which represent a codification of customary law, and in particular by *jus cogens*.¹²

B. Z.

⁹ Art. 70 (Consequences of the termination of a treaty): denunciation of a multilateral treaty by a State “does not affect any right, obligation or legal situation of the parties created through the execution of the treaty” prior to the date when the denunciation takes effect.

¹⁰ Arts. 49-52/50-53/129-132/146-149.

¹¹ Cf. also Art. 43 (Obligations imposed by international law independently of a treaty) of the above-mentioned Vienna Convention.

¹² *Jus cogens* means peremptory norms of general international law, which are defined as follows by Art. 53 (Treaties conflicting with a peremptory norm of general international law (*jus cogens*)) of the above-mentioned Vienna Convention: “a peremptory norm of general international law is a norm accepted and recognized by the international community of States as a whole as a norm from which no derogation is permitted and which can be modified only by a subsequent norm of general international law having the same character”. Cf. for example, L.A. Alexidze, “Legal Nature of Jus Cogens in Contemporary International Law”, 172 *Hague Recueil*, 1981/III, pp. 219-270.

Article 100 – Notifications

The depositary shall inform the High Contracting Parties as well as the Parties to the Conventions, whether or not they are signatories of this Protocol, of:

- (a) signatures affixed to this Protocol and the deposit of instruments of ratification and accession under Articles 93 and 94;
- (b) the date of entry into force of this Protocol under Article 95;
- (c) communications and declarations received under Articles 84, 90 and 97;
- (d) declarations received under Article 96, paragraph 3, which shall be communicated by the quickest methods; and
- (e) denunciations under Article 99.

Commentary

3858 The designation of a depositary is a common characteristic of plurilateral or multilateral treaties. The depositary may be one or more States, an international

organization, or the chief administrative officer of such an organization.¹ The institution and the functions of the depositary are codified in Articles 76-80 of the Vienna Convention on the Law of Treaties of 23 May 1969.²

- 3859** The depositary of the Conventions of 1949 and the Conventions preceding these was the Swiss Federal Council (federal government) and therefore it was logical to designate it as the depositary for the Protocol.
- 3860** Apart from the functions described in this article and the articles to which it refers (84 – *Rules of application*, 90 – *International Fact-Finding Commission*, 92 – *Signature*, 93 – *Ratification*, 94 – *Accession*, 95 – *Entry into force*, 96 – *Treaty relations upon entry into force of this Protocol*, 97 – *Amendment*, 99 – *Denunciation*), other functions are attributed to the depositary by Articles 7 (*Meetings*), 98 (*Revision of Annex I*), 101 (*Registration*) and 102 (*Authentic texts*).
- 3861** Finally, in executing a customary function of the depositary codified by the Vienna Convention, on two occasions the depositary addressed proposals to correct the original text of the Protocol to the States Parties to the Conventions. In the absence of any objection on the part of the States concerned within the time-limit determined, the depositary finally proceeded to correct the errors as proposed.
- 3862** The expression “High Contracting Parties” covers States which have become Parties to the Protocol by ratification, accession or succession.³ In accordance with Articles 92 (*Signature*), 93 (*Ratification*) and 94 (*Accession*), these States are

¹ On this subject, *cf.*, for example, J. Stoll, “Depositary”, in *Encyclopedia of Public International Law, op. cit.*, Instalment 7 (1984), p. 68.

² The essence can be found in Article 77 (Functions of depositaries):
“1. The functions of a depositary, unless otherwise provided in the treaty or agreed by the Contracting States, comprise in particular:

(a) keeping custody of the original text of the treaty and of any full powers delivered to the depositary;

(b) preparing certified copies of the original text and preparing any further text of the treaty in such additional languages as may be required by the treaty and transmitting them to the parties and to the States entitled to become parties to the treaty;

(c) receiving any signatures to the treaty and receiving and keeping custody of any instruments, notifications and communications relating to it;

(d) examining whether the signature or any instrument, notification or communication relating to the treaty is in due and proper form and, if need be, bringing the matter to the attention of the State in question;

(e) informing the parties and the States entitled to become parties to the treaty of acts, notifications and communications relating to the treaty;

(f) informing the States entitled to become parties to the treaty when the number of signatures or of instruments of ratification, acceptance, approval or accession required for the entry into force of the treaty has been received or deposited;

(g) registering the treaty with the Secretariat of the United Nations;

(h) performing the functions specified in other provisions of the present Convention.

2. In the event of any difference appearing between a State and the depositary as to the performance of the latter’s functions, the depositary shall bring the question to the attention of the signatory States and the contracting States or, where appropriate, of the competent organ of the international organization concerned.”

³ On the expression “the High Contracting Parties”, *cf.* commentary Preamble, *supra*, p. 25. On ratification, accession and succession, *cf.* commentary Arts. 93, *supra*, pp. 1071-1072, and 94, *supra*, p. 1075.

all Parties to the Conventions. Basically it would therefore have been sufficient to mention only these in the introductory sentence.

3863 Communications by the depositary are made in the form of written notifications; only the provision of sub-paragraph (d) requires that they are made “by the quickest methods”.

Sub-paragraph (a)

3864 During the period that the Protocol was open for signature, the depositary notified the various signatures affixed to the Protocol. It did the same with regard to the deposit of the instruments of ratification and accession. The same should also take place in the case of succession. The notifications contained the text of declarations and reservations accompanying certain signatures, ratifications or accessions.⁴

Sub-paragraph (b)

3865 The entry into force of the Protocol on 7 December 1978 in accordance with the terms of Article 95 (*Entry into force*), paragraph 1, was duly notified by the depositary.

Sub-paragraph (c)

3866 In accordance with Article 84 (*Rules of application*), the Contracting Parties must communicate to one another their official translations of the Protocol, as well as any laws and regulations which they may adopt to ensure its application.

3867 In accordance with Article 90 (*International Fact-Finding Commission*), paragraph 2(a), the Contracting Parties may declare that they recognize *ipso facto* and without special agreement, in relation to any other High Contracting Party accepting the same obligation, the competence of the International Fact-Finding Commission to enquire into allegations by such other Party. By 31 December 1984 six States had made such a declaration at the time of ratification.⁵ None did so upon signature, accession, or, as allowed by Article 90 (*International Fact-Finding Commission*), “at any other subsequent time”.

3868 Finally, Article 97 (*Amendment*) deals with amendments which might be proposed to this Protocol. No amendment had been proposed under the terms of the said article as of 31 December 1984.

⁴ On the question of reservations and declarations, *cf.* the introduction to this Part, *supra*, pp. 1059-1065.

⁵ For the list of these States, *cf. infra*, p. 1549.

Sub-paragraph (d)

- 3869** This deals with the communication of declarations made by an authority representing a people engaged in a conflict of the character mentioned in Article 1 (*General principles and scope of application*), paragraph 4, against a High Contracting Party. Such a communication must be made by the quickest methods. This concern is understandable, since it involves the application of the Protocol in an actual conflict and human lives could be at stake.
- 3870** According to its own terms, the depositary will not pass judgment on the representative character of the authority by which the declaration has been made. On the other hand, it will only proceed to make a notification under this sub-paragraph if the State against which this authority is fighting is a Party to the Protocol.⁶

Sub-paragraph (e)

- 3871** Any denunciation of the Protocol should be notified by the depositary in the same forms as the other acts covered by this article – with the exception of sub-paragraph (*d*). However, the effect of such a denunciation might be deferred under the conditions and for the period defined by Article 99 (*Denunciation*), paragraph 1.

B.Z.

⁶ *Message du Conseil fédéral suisse aux Chambres fédérales* of 18 February 1981, chapter 211.72.

Article 101 – Registration

1. After its entry into force, this Protocol shall be transmitted by the depositary to the Secretariat of the United Nations for registration and publication, in accordance with Article 102 of the Charter of the United Nations.
2. The depositary shall also inform the Secretariat of the United Nations of all ratifications, accessions and denunciations received by it with respect to this Protocol.

Commentary

3872 As we saw with respect to Article 95 (*Entry into force*) the Protocol entered into force on 7 September 1978 after ratification by Ghana and accession by Libya. It was duly transmitted by the depositary to the Secretariat of the United Nations for registration and publication. In accordance with Article 102, paragraph 1, of the United Nations Charter, every treaty and every international agreement entered into by any Member of the United Nations must be

transmitted to the Secretariat as soon as possible for registration and publication.¹

3873 The said Article 102 of the Charter provides in paragraph 2 that the States Parties to a treaty may not invoke it before any organ of the United Nations unless it has been duly registered by the Secretariat.²

3874 The publication in the *United Nations Treaty Series* is made in the authentic languages of the treaty and in any case in English and French. The growing volume of treaties due for publication has resulted in a serious backlog in the publication of the *United Nations Treaty Series*, greatly exceeding the period of one year between registration and publication considered normal. The General Assembly considered what measures should be taken during its thirty-third session (1978)³ and subsequent sessions.

3875 In fact, although the Protocol was registered in 1979, it was not yet published on 31 December 1984.

3876 Paragraph 2 of this article only requires the notification to the Secretariat of the United Nations of ratifications, accessions and denunciations. Obviously successions should also be notified.⁴ The same applies for any amendments adopted in accordance with Article 97 (*Amendment*) and Article 98 (*Revision of Annex I*) once such amendments have entered into force. It would be desirable that declarations under Article 90 (*International Fact-Finding Commission*), paragraph 2(a), and Article 96 (*Treaty relations upon entry into force of this Protocol*), paragraph 3, be also notified.

Commentary

General remarks

3877 First of all, this article provides that the original of the Protocol will be deposited with the depositary the primary function of which is by definition to keep custody of this document.¹ The depositary will transmit certified true copies

¹ For a summary of the depositary's functions, *cf.* commentary Art. 100, *supra*, p. 1114.

thereof to the Parties to the Conventions; only they can become Parties to the Protocol.²

3878 In the past, most multilateral treaties were written in only one or two languages, but nowadays most are written in several languages and universal treaties are usually written in the six official languages of the United Nations – viz., Arabic, Chinese, English, French, Russian and Spanish.

3879 Until 1929 the Geneva Conventions were written in French only. The 1949 Conventions were drafted simultaneously in English and French; their common Article 55/54/153/150 declared the two languages to be equally authentic and instructed the depositary to arrange for official translations in the Russian and Spanish languages.

3880 The ICRC draft proposed keeping the same formula while leaving open the list of languages in which an official translation would be made. The present wording omits all mention of official translations and retains as authentic texts the versions in the six official languages of the United Nations. It was adopted by consensus in the Working Group, in Committee I and in the plenary Conference.³

The differences in status of versions in different languages

Authentic texts

3881 A treaty may be authenticated, i.e., recognized as a true original, in one or several languages, depending on the decision of the body in which the treaty is adopted. In general, these will be the languages in which the body concerned conducted its work or, at least, in which it adopted the treaty. However, there are two possible exceptions.

3882 The treaty may provide that one of the authenticated texts (in principle, authentication takes place by signature of the Final Act) will prevail in case of divergence; this possibility is provided for in Article 33 (*Interpretation of treaties authenticated in two or more languages*) of the Vienna Convention on the Law of Treaties of 23 May 1969. The Protocol did not adopt such priority for any particular text, as shown by the expression “are equally authentic”.

3883 On the other hand, the CDDH did in fact resort to the second exception envisaged by the same article in the above-mentioned Vienna Convention. In fact, although the six official languages of the United Nations did become at different times⁴ official languages and working languages for the CDDH,⁵ the Chinese language was not used in the documentation of the Conference. However, the delegation of the host country informed the relevant Working Group that provisions had been taken to prepare a Chinese version of the

² Cf. commentary Arts. 92 and 94, *supra*, pp. 1068-1069 and 1076.

³ Cf. *O.R.* X, p. 245, CDDH/405/Rev.1, Annex III (CDDH/I/350/Rev.1), paras. 28-29; *O.R.* IX, p. 474, CDDH/I/SR.76, para. 7; *O.R.* VII, p. 35, CDDH/SR.47, para. 106.

⁴ For further details, cf. the second paragraph of the introductory note in each volume of the Official Records.

⁵ Cf. *O.R.* II, p. 13, CDDH/2/Rev.3 (Rules of procedure), Rule 51.

Protocol within a reasonable period of time, in collaboration with the Chinese authorities; therefore the Working Group adopted this article by consensus. The Chinese version was communicated by the depositary to States Parties to the Conventions on 12 October 1977.

3884 Thus the six languages listed are equally authentic – or, according to another traditional formula, bear equal authority. This means that all these versions have exactly the same meaning and that each of them faithfully represents the provisions as adopted by the Diplomatic Conference.

3885 It must be recognized, however, that the two statements made in the previous sentence are too categorical and that they have rather the character of a presumption: according to Article 33 of the Vienna Convention to which we referred, “The terms of the treaty are presumed to have the same meaning in each authentic text”. If a comparison of the authentic texts discloses a difference in meaning and, as is the case with the Protocol, there is no particular text that prevails in case of divergence, Article 33 provides the following rule:

- a) apply the two foregoing articles of the same Convention: Article 31 (General rule of interpretation) and Article 32 (Supplementary means of interpretation);
- b) if the difference in meaning cannot be removed thereby, the meaning must be adopted which best reconciles the texts, having regard to the object and purpose of the treaty.

3886 Having several authentic texts may therefore create problems in case of divergence or contradiction; on the other hand, it may help to make interpretation easier by comparing the different versions, and this will rather more often be the case. Apart from the need to resolve any differences that may arise between authentic texts in accordance with the rules and means of interpretation as referred to above, such differences may also give rise to a correction procedure when there is occasion to do so.⁶

Official translations

3887 A treaty may provide that, in addition to the authentic texts, official translations will be made; as we saw, it was so provided in the Conventions. The main purpose of such official translations is to avoid different versions being made in the same language.

3888 They are official in that they are issued by the same body which adopted the treaty, or by a body designated for that purpose, e.g., the depositary. If there are discrepancies, the authentic texts prevail over the official translations. And these should not be confused with official *national* translations which we will deal with below under the heading “Other translations”.

⁶ Cf. the above-mentioned Vienna Convention, Art. 79 – Correction of errors in texts or in certified copies of treaties. See also commentary Art. 100, *supra*, p. 1114.

3889 This brief note is prompted by the singular linguistic situation of the Conventions and the Protocol: two of the versions (English and French) are authentic texts both for the Conventions and for the Protocol; another two versions (Russian and Spanish) are official translations in the case of the Conventions but authentic texts for the Protocol; yet another two versions (Arabic and Chinese) have no special status in the case of the Conventions, but are authentic texts for the Protocol. In interpreting the Conventions and the Protocol these differences in status of the various versions have to be taken into account.

Other translations

3890 The domestic law of each Party to the Protocol will determine in which languages that Party will have to have the Protocol translated.⁷ Such translations are official in so far as they are established or recognized by a State; they should not be confused with official translations produced in accordance with the provisions of the treaty itself, as defined above.

3891 Only the authentic texts are authoritative and they prevail over all translations. The Protocol provides, however, that the Parties should exchange their official translations as soon as possible, so as to keep each other informed.⁸

3892 We should also point out the case of languages which two or more countries have in common; it would be useful if, for each of these languages, the countries concerned would try to co-operate as far as possible and adopt a common official translation.

B.Z.

⁷ Such a translation may be based on any one of the six authentic texts; however, a more reliable translation will undoubtedly result if two or more of the authentic texts are compared.

⁸ The same applies to other laws and regulations adopted to ensure the application of the Protocol; *cf.* commentary Arts. 80 and 84, *supra*, pp. 929 and 969.

Annex I – General introduction

Introduction

3893 Annex I to Protocol I, entitled “Regulations concerning identification”, contains technical regulations relating to the marking and identification of:

- medical personnel, units and transports,
- civil defence personnel and transports,
- works and installations containing dangerous forces,

identifiable visually by distinctive signs set aside for their exclusive use as well as by distinctive signals and other technical devices contemplated in Annex I.

3894 These technical regulations are required for the implementation of the provisions of Articles 18 (*Identification*), 56 (*Protection of works and installations containing dangerous forces*) and 66 (*Identification*) of Protocol I. Annex I comprises sixteen articles grouped in six chapters. Some of its provisions relate to Resolutions 17, 18 and 19 adopted, together with Annex I, at the fourth session of the Diplomatic Conference in 1977.

Title of Annex I to the Protocol

3895 Draft Annex I submitted by the ICRC to the first session of the Diplomatic Conference in 1974 bore the title: “Regulations concerning the identification and marking of medical personnel, units and means of transport, and civil defence personnel, equipment and means of transport”.¹

3896 In order to examine the draft, Committee II of the Diplomatic Conference set up a Technical Sub-Committee which met during the first and third sessions. In its reports to Committee II, the Technical Sub-Committee adopted the title of the ICRC’s draft Annex I without change.²

¹ *O.R.* I, Part III, p. 28.

² *O.R.* XI, p. 5, CDDH/II/SR.1, para. 4; pp. 83-91, CDDH/II/SR.11, paras. 2, 5, 53-66; pp. 93-95, CDDH/II/SR.12, paras. 1-18. *O.R.* XIII, pp. 23-51, CDDH/49/Rev.1, Annex II, Appendices I-III; p. 159; CDDH/221/Rev.1, para. 260. Approval by Committee II, at the second session in 1975, of the report prepared by the Technical Sub-Committee at the first session of the Conference: *O.R.* V, p. 226, CDDH/SR.22, para. 5. *O.R.* XII, pp. 165-174, CDDH/II/SR.70, paras. 1-62, report of the Technical Sub-Committee, third session; pp. 175-185, CDDH/II/SR.71, paras. 1-87.

- 3897** In May 1976 at the third session, however, Committee II, during its consideration of the Technical Sub-Committee's report, accepted a proposal by the United Kingdom requesting the insertion of the word "recognition" in the title of the English-language version only of the Annex.³ After the adoption of the report, probably as a result of differences in interpretation, the word "recognition" was inserted in the French and Spanish versions also, but not in the Russian and Arabic versions. The title then read: "Regulations concerning the identification, recognition and marking of medical personnel, units and means of transport, and civil defence personnel, equipment and means of transport".⁴
- 3898** This title and the text of the Annex were given further consideration between the third and fourth sessions of the Diplomatic Conference by the Group of Experts appointed by the Conference Secretariat and the ICRC as well as by the technical advisers of the Conference, who met in November 1976 and January 1977 to prepare the work of the Drafting Committee of the Conference.⁵ The word "recognition" was allowed to stand in the above-mentioned language versions; however, the unintentional discrepancy between these and other versions existed only momentarily between the third and the fourth sessions, disappearing when the title was revised by the Drafting Committee.
- 3899** The title, which was long, stood to benefit from being made simpler. The Drafting Committee of the Conference considered that the term "identification", as used in Protocol I and its Annex I, had the same meaning in all the languages concerned and adequately covered the full substance of the Annex, including the new provisions adopted at the fourth session in respect of:
- the international distinctive sign of civil defence;⁶
 - the international special sign for works and installations containing dangerous forces.⁷
- 3900** After the final adoption by Committees II and III of the articles of Protocol I relating to these two new signs, the title was reviewed by the Drafting Committee, which proposed to the Conference the short title "Regulations concerning identification", adopted by consensus at a plenary meeting of the Conference as the definitive title of Annex I. The titles of the articles as they appear in the successive versions of Annex I, together with a list of the amendments relating to the text, are given at the end of Volume III of the Official Records of the Conference.⁸

³ *O.R.* XII, pp. 178-179, CDDH/II/SR.71, paras. 21, 27-30.

⁴ *O.R.* XIII, pp. 266-269, CDDH/235/Rev.1, paras. 50-66.

⁵ *O.R.* II, p. 466, CDDH/SEC/INF.1, Vol.1 (31 January 1977, p. 135); p. 656, CDDH/404/Rev.1, para. 6.

⁶ *O.R.* XIII, pp. 373-375, CDDH/406/Rev.1, paras. 59-62.

⁷ *O.R.* XV, p. 456, CDDH/407/Rev.1, para. 31; pp. 471-473, Annex I.

⁸ *O.R.* VII, pp. 52-57, CDDH/SR.48, paras. 11-19 and Annex. *O.R.* III, pp. 369-402, amendments to the draft Annex, comparative table.

The terms “identification”, “signals”, “recognition”

- 3901** These terms are used in the Geneva Conventions of 12 August 1949 and their Additional Protocols, as well as in Annex I and various texts concerning the safety of medical personnel, units and means of transport.⁹
- 3902** In Article 8 (*Terminology*), sub-paragraph (*m*), of Protocol I, the expression “signal or message” means the distinctive signs or signals intended exclusively for the identification of persons or objects entitled to use those signs or signals under the Conventions and the Additional Protocols.
- 3903** “Identification”, as contemplated in Article 18 (*Identification*) of the Protocol, means recognizing or making it possible to recognize the persons and objects entitled to protection under the Conventions and the Additional Protocols.
- 3904** The term “recognition”, which appeared momentarily in the intermediate draft title of Annex I, is used in Article 5 (*Optional use*), paragraph 2, of the Annex; the word “recognizable” is used in Articles 15 (*International distinctive sign*), paragraph 3, and 16 (*International special sign*), paragraph 4. In the Protocol, the phrase “should be recognizable” is used in Article 18 (*Identification*), paragraph 3. Within the meaning of the Protocol and its Annex I, all these terms are synonymous with identification. In that connection, the delegate of the USSR stated in Committee II that in Russian the idea of recognition was included in that of identification. Similarly, the delegates of France and Spain considered it unnecessary to insert “recognition” after “identification”.¹⁰

Field of application

- 3905** The scope of the Regulations concerning identification is governed by the articles of the Protocol listed below. The corresponding articles of the Regulations are mentioned, together with the resolutions of the Diplomatic Conference having a bearing on the texts concerned.
- 1) Article 18 (*Identification*), relating to the identification of medical and religious personnel and of civilian and military medical units and transports, particularly medical aircraft (Chapters I to IV, Articles 1 to 13; Resolutions 17, 18 and 19).
 - 2) Article 56 (*Protection of works and installations containing dangerous forces*) (Chapter VI, Article 16).
 - 3) Article 66 (*Identification*), relating to the identification of civil defence personnel, buildings and *matériel* (Chapter V, Articles 14 and 15).

⁹ First Convention, Art. 36; Second Convention, Art. 43; Protocol I, Art. 8, sub-para. (*m*), and Art. 18, paras. 5-6; Annex I, Art. 5, para. 2; *CE/7b*, Part II, pp. 39-77, particularly pp. 39, 40, 43, 44; *CE 1971, Report*, p. 36, Annex IV; *CE 1972, Technical Memorandum*.

¹⁰ *O.R. XII*, pp. 178-179, CDDH/II/SR.71, paras. 21-30; pp. 167-168, CDDH/II/SR.70, paras. 14-16, on the meaning of “identification” and “recognition”.

Revision

- 3906 Article 98 (*Revision of Annex I*) of the Protocol provides for Annex I to be revised from time to time in the light of technical developments. In order to remain effective, the methods and means of protective identification and marking must keep abreast of technical advances in the army, navy and air force.
- 3907 It was therefore considered advisable to set out the technical regulations in an Annex to Protocol I, both to simplify the text containing the legal provisions and to allow for the special periodic revision procedure contemplated in Article 98 (*Revision of Annex I*) of the Protocol.

Historical background

- 3908 The task of the Diplomatic Conference which met in Geneva in 1949 was to revise the two international conventions providing for the identification and marking of medical personnel, units and means of transport, namely, the Geneva Convention of 27 July 1929 for the Amelioration of the Condition of the Wounded and Sick in Armed Forces in the Field and the Hague Convention of 18 October 1907 for the Adaptation to Maritime Warfare of the Principles of the Geneva Convention of 6 July 1906 (Hague Convention X of 1907).
- 3909 The progress of work on the marking and identification of air and sea medical transports can be traced by chronological reference to the meetings and other preparatory activities which took place prior to the revision of the two above-mentioned international conventions.

1930 – XIVth International Conference of the Red Cross, Brussels

- 3910 Resolution XVII – Medical aviation in peacetime: development of civil and military medical aviation in peacetime: crossing of frontiers; priority in transmission; simplification of formalities; participation of merchant air fleets.
- 3911 Resolution XXII – Activities of the Red Cross at sea: plan for a meeting of experts to consider various issues, in particular the amendment of Hague Convention X of 1907.
- 3912 Resolution XXIII – Medical aviation in wartime: draft Convention supplementary to the 1929 Geneva Convention. Medical aviation was included in the 1929 Convention (Article 18) and Recommendation III of the 1929 Diplomatic Conference called for more comprehensive regulations governing the use of aircraft for medical purposes. Resolution XXIII goes some way towards fulfilling that recommendation.¹¹

¹¹ Resolution XXII: see *RICR*, October 1930, p. 862 (in French only). Resolution XXIII: see *RICR*, November 1934, p. 896 (in French only).

1934 – XVth International Conference of the Red Cross, Tokyo

- 3913** Resolution XXXIII – Activities of the Red Cross at sea: renewal of the mandate given to the ICRC in 1930 under Resolution XXII; revision of Hague Convention X relating to maritime warfare.¹²

1934 – International Legal Committee on Aviation, Paris

- 3914** New draft Convention additional to the Geneva Convention of 27 July 1929, relating to the use of medical aircraft in time of war.
- 3915** Draft prepared by Mr. Julliot and Mr. Schickelé together with an annex containing an international code of visual and radio signals for medical aircraft.¹³

1936 – ICRC, Red Cross emblem visibility tests

- 3916** Visibility of the protective emblem from the air: results of the tests published in the “Revue internationale de la Croix-Rouge”.¹⁴

1936 – ICRC, Circular No. 328 of 31 July

- 3917** Invitation to National Red Cross Societies to send representatives to attend a meeting of experts with a view to revising the Geneva Convention. The meeting was held from 19 to 23 October 1937.
- 3918** Military aviation played an important part in the Spanish Civil War, which broke out in July 1936.

1937 – ICRC, Circular No. 337 of 5 April

- 3919** Revision of Hague Convention X of 1907: despatch of a questionnaire and a draft revised text of Convention X to National Red Cross Societies.
- 3920** The questionnaire referred to the identification of hospital ships (use of small signal guns) as well as to search and rescue at sea, by both aircraft and vessels. The draft revised Convention mentions the use of wireless telegraphy by hospital ships.¹⁵

¹² Resolution XXXIII: see *RICR*, April 1937, p. 409 (in French only).

¹³ *RICR*, February 1935, pp. 77-79; *ibid.*, March 1936, pp. 177-203 (in French only).

¹⁴ *RICR*, March 1936, pp. 204-207: Tests by the Dutch Air Force. *RICR*, May 1936, pp. 408-412: Tests by the Swiss Air Force (in French only).

¹⁵ *RICR*, April 1937, pp. 409-448 (in French only).

1937 – ICRC, Meeting of experts held from 19 to 23 October to study the revision of the Geneva Convention of 1929

- 3921** A Sub-Committee was asked to examine technical issues relating to the marking and camouflage of medical formations, establishments and aircraft.¹⁶

1937 – ICRC, Conference of naval experts held from 15 to 18 June to study the revision of Hague Convention X of 1907

- 3922** The experts adopted a draft “Maritime Convention” based on the draft submitted by the ICRC, containing the following provisions in respect of hospital ships:

- standardization of the white-painted hull with a horizontal band of red for both categories of hospital ships;
- prohibition of the use of secret codes, either by wireless telegraphy or by visual signals.¹⁷

1946 – ICRC, Preliminary Conference of National Red Cross Societies, Geneva, 26 July – 3 August

- 3923** Technical proposals submitted by the French Red Cross for the future “Maritime Convention”:

- use of the radio by hospital ships to indicate their position every six hours on the wavelength 600 metres (wavelength adopted for the safety of human life);
- signalling by radio of the route followed by the hospital ship, for relay by the maritime authorities on land;
- identification of hospital ships by radar.

- 3924** The prohibition of use of secret codes with the aid of either signals or radio was spelt out by the First Commission, which proposed the following text: “All their communications by signal or by wireless must be in clear”.

- 3925** Doubts were cast on the effectiveness of painting a horizontal band of red or green on the white hull. In 1937 the naval experts had already drawn attention in their report to the inadequacy of purely visual signalling, having regard to the development of modern armaments such as long-range aircraft and artillery.¹⁸

¹⁶ ICRC 1938, Document No. 11 a, XVIth International Conference of the Red Cross, London, June 1938, pp. 1, 2, 22, 23, 25, 26, 27, 56-79.

¹⁷ ICRC, Report submitted to the XVIth International Conference of the Red Cross (London, 1938) (text of the Draft Revised Maritime Convention adopted by the Commission of Naval Experts which met at Geneva on June 15th, 1937), Document No. 2 a, Annex, pp. 65-75 (Articles 15 and 24).

¹⁸ ICRC, January 1947, Report on the Work of the Preliminary Conference of National Red Cross Societies for the study of the Conventions and of various Problems relative to the Red Cross, Geneva, July 26 – August 3, 1946, pp. 57-64.

1947 – ICRC, Conference of Government Experts for the Study of the Conventions for the Protection of War Victims, Geneva, 14 – 26 April

- 3926** Marking of medical aircraft: the experts who met in 1947 did not consider that any change should be made to Article 18 of the 1929 Convention. They thought that “the technical progress made in the field of aerial warfare and anti-aircraft guns rendered illusory any attempt to develop the use of medical aircraft”.¹⁹
- 3927** Marking of hospital ships: a proposal reading “As soon as technically possible, all hospital ships shall be provided with radar apparatus, to allow their identification by the detecting apparatus of belligerents and neutrals” was rejected.²⁰
- 3928** Thus the new detection, identification and radiocommunication techniques used during the Second World War – infrared light, radar transponders, underwater acoustic systems – were not applied at all in 1947 to enhance the safety of medical transports on land, at sea or in the air.
- 3929** However, these modern signalling and identification methods were discussed once again the following year at the XVIIth International Conference of the Red Cross in Stockholm.

1948 – XVIIth International Conference of the Red Cross, Stockholm, 20 – 30 August

- 3930** After considering the draft texts prepared by the ICRC on the basis of the 1947 experts’ report, the XVIIth Conference proposed the following text for the identification and marking of medical aircraft:

“They shall be provided with any other marking or means of identification that may agreed upon between the belligerents upon the outbreak or during the course of hostilities. To facilitate their identification, they shall endeavour to inform the enemy of their route, altitude and time of flight.”

- 3931** No change was made to the requirement that medical aircraft be painted white and bear the distinctive emblem.²¹
- 3932** With regard to hospital ships, Article 40 adopted at Stockholm as part of the revision of Hague Convention X of 1907, supplemented and replaced Article 24 of 1947 by providing for a distinctive light signal and for radar and underwater acoustic identification:

“[...] A luminous red cross of maximum practicable size to be placed as high as possible above the superstructure, in such a manner as to ensure maximum

¹⁹ ICRC, 1947, Report on the Work of the Conference of Government Experts for the Study of the Conventions for the Protection of War Victims (Geneva, April 14 – 26, 1947), pp. 1-11, 44-47.

²⁰ *Ibid.*, pp. 97-99.

²¹ ICRC, Archives. Files of the XVIIth International Conference of the Red Cross, Stockholm, August 1948, summary of the debates of the Legal Commission’s Sub-Commissions, pp. 12-19, 23 (in French only).

visibility from all points of the horizon, both on the surface and from the air. This cross shall consist of three luminous members, of which one is vertical and two horizontal. Of the horizontal members, one shall be placed lengthwise to the ship and the other at right angles. The cross may have an automatic switching mechanism to provide flashing and alternating illumination of the two horizontal members.”

“[...] As soon as technically possible, all hospital ships shall be provided with radar and underwater sound apparatus, to permit their identification by the detecting apparatus of belligerents and neutrals [...]”²²

1949 – Diplomatic Conference, Geneva, 21 April – 12 August

3933 The draft revised Conventions prepared by the ICRC and approved by the XVIIth International Conference of the Red Cross in 1948 were submitted to the Diplomatic Conference of 1949. They were referred to Committee I of the Conference which used them as the basis for its revision of the “Wounded and Sick” and “Maritime” Conventions. Protective marking was discussed at considerable length by Committee I and the Working Group on the conditions of naval warfare. The report of Committee I to the plenary meeting of the 1949 Conference states, in particular:

“As regards marking, the Committee dealt mainly with those on medical aircraft and hospital ships.

There was general agreement that in the present conditions of aerial warfare, the red cross on a white ground no longer constituted an easily recognizable emblem and therefore no longer afforded effective protection. Aircraft at present speeds can be recognized only by their general shape; moreover, the most distinctive signs are quite unrecognizable at night and *a fortiori* by wireless controlled projectiles.

A new conception was therefore embodied in the Conventions; belligerents are required to agree between themselves on the routes to be followed by military aircraft, and also the altitude and times of flight. Aircraft will only be entitled to respect in so far as there has been previous agreement on these points.

The Committee was unable to agree to a condition of a similar kind applicable to hospital ships, as it feared that in notifying the enemy of the course they were to follow, this would give valuable information regarding the safety of navigation in certain maritime zones. Be this as it may, there was unanimous agreement that the best means of ensuring protection is to inform the enemy of the exact position of the formation requiring protection. There is no question, therefore, of camouflage; on the contrary everything will be done to facilitate recognition. Further, the recommendation, in the Maritime Convention, that belligerents shall only employ vessels of over

²² *Final Record of the Diplomatic Conference of Geneva, 1949*, Vol. I, draft Conventions approved by the XVIIth International Conference of the Red Cross, pp. 53, 68.

2 000 tons gross as hospital ships on the high seas is to be interpreted in this sense, since the greater visibility of vessels of that size tends to increase security.”²³

3934 In 1949 the experts’ study of technical methods for marking and identifying medical aircraft and hospital ships produced only suggestions regarding prior agreements to be concluded between the Parties to the conflict, without actually identifying the technical methods to be used.

3935 With regard to the use of radiocommunications, the 1949 Conference adopted Resolutions 6 and 7 annexed to the Geneva Conventions of 12 August 1949.²⁴ The preamble of Resolution 6 explains the limited scope of the Conference’s work in respect of technical matters:

“[...] Whereas the present Conference has not been able to raise the question of the technical study of means of communication between hospital ships, on the one hand, and warships and military aircraft, on the other, since that study went beyond its terms of reference [...]”

3936 The problem of underwater acoustic identification of hospital ships was not solved. It had been raised as early as 1917, in the report on the activities of the Netherlands Red Cross during the First World War submitted to the Xth International Conference of the Red Cross (Geneva, 1921). The report contains the following passage:

“However, on 2 July 1917, thanks to the intervention of the Netherlands Government, an agreement was concluded whereby the British and German Governments gave a reciprocal undertaking to intern a certain number of prisoners of war with us; in addition to the transport of these prisoners, both civilian and military, disabled persons and medical personnel would henceforth be exchanged. As a safeguard against torpedo attacks, the German Government requested that at least two paddle boats should sail in convoy, because only the sound of paddle wheels can be identified at great distances by submarines. The *Zélande* Company’s *Zélande* and *Koningin Regentes* and Rotterdamsche Lloyd’s *Sindoro* were assigned to serve as hospital ships. They were provided with the distinctive marking prescribed for hospital ships under the 1907 Convention and fitted out to transport the sick, the mutilated and the mentally ill. The number of berths was increased to 900. Boston was the English port used, so the crossing could be made in 19 hours, but because of the danger it took longer.” (author’s translation)

Some gaps subsisted after 1949, particularly in respect of the identification of hospital ships and medical aircraft by radar. That method of identification had been used during the Second World War, but only for “friendly” military aircraft and ships equipped with radar transponders. Furthermore, the distinctive light signal for hospital ships which had been mentioned, together with radar and

²³ *Ibid.*, Vol. II, Section A, pp. 187-188.

²⁴ *Ibid.*, Vol. I, p. 362.

underwater sound apparatus, in the draft produced by the XVIIth International Conference of the Red Cross at Stockholm, was omitted from the text adopted in 1949.

- 3937** The use of the technical marking and identification methods proposed in 1949 in Article 40 of the draft “Maritime” Convention was first discussed at length by Committee I of the Diplomatic Conference and again proved to be a highly controversial issue when it was taken up in the plenary meetings of the Conference.²⁵
- 3938** Having failed to draw up regulations governing radiocommunication between hospital ships on the one hand and warships and military aircraft on the other, the Conference adopted Resolution 6 on the subject. Similarly, Resolution 7 relating to the notification by hospital ships of their position by wireless was adopted in a plenary meeting.²⁶

1949-1970

- 3939** After the Diplomatic Conference, as a follow-up to Resolutions 6 and 7, draft radio procedures were drawn up in 1950 by a group of government experts and transmitted to the Swiss Government as the depositary of the 1949 Geneva Conventions. They were revised by experts at ICRC headquarters in 1959 and submitted to the Plenipotentiary Conference of the International Telecommunications Union (ITU) held the same year in Geneva. The draft procedures were found to comply with ITU requirements, after modification of the distress radio frequencies they contained.
- 3940** In 1961 the Swiss Federal Council transmitted the drafts to the States Parties to the Geneva Conventions, some of which accepted them for unilateral application as internal regulations. Others stated that they would rather apply international rules drawn up under the aegis of specialized international organizations (ITU, IMCO, ICAO).²⁷
- 3941** While these endeavours were being made to codify radiocommunications intended to facilitate the identification of hospital ships, the effectiveness of the helicopter as a means of medical transport was being demonstrated in the wars which broke out in Asia from 1950 to 1953 and 1961 to 1975. That type of aircraft, which was new at the time, enabled thousands of wounded to be evacuated directly from the battlefield to field hospitals or hospital ships. In addition, large cargo aircraft converted into “flying hospitals” and operating on an inter-continental basis repatriated the wounded more rapidly than had ever been the case before.
- 3942** The development of such medical transports, which did not always display the protective sign, prompted organizations in a number of countries to call for

²⁶ *Ibid.*, Vol. II, Section A, p. 162; Vol. II, Section B, pp. 489-492; Vol. III, p. 178, draft resolution 390.

²⁷ *CE/7b*, pp. 66-73. *RICR*, August 1959, pp. 375-391 and 426-423 (in French only). *IRRC*, May 1961, p. 103.

enhanced protection for such aircraft in periods of armed conflict, so that they could be put to the fullest possible use. In fact, Article 36 of the First Convention of 1949, and its equivalent in the Second Convention, Article 39, grant immunity to medical aircraft in conditions which are more restrictive than those of Article 18 of the 1929 Convention which they replace. Article 18 laid down three requirements for medical aircraft, namely:

- they must be exclusively employed for the removal of wounded and sick and for the transport of medical personnel and equipment;
- they must bear the distinctive emblem, paintwork and prescribed markings;
- they must not fly over the firing line, the front zone or enemy-occupied territory “in the absence of special and express permission”.

3943 Articles 36 and 39 of 1949 lay down a fourth requirement in addition to the above three: immunity is only granted to medical aircraft “while flying at heights, times and on routes specifically agreed upon between the belligerents concerned”. Furthermore, prior agreement between the belligerents is required to provide medical aircraft with “any other markings or means of identification”.²⁸

3944 The inadequacy of purely visual marking for medical aircraft, together with technological developments in aerial warfare, are briefly mentioned early in 1952 in an article of the “*Revue internationale de la Croix-Rouge*”.²⁹

3945 Moreover, Articles 36 and 39 of 1949 were already regarded in 1954 as somewhat outdated.³⁰

3946 These texts, published shortly after the commentary on Article 36, paragraph 2, suggesting that technical marking and identification methods be studied, show that the absence of supplementary means of identification, for which no specific provision has been made in 1949, continued to cause serious concern. More and more attention started to be paid to this shortcoming, which was contrasted with the unremitting development of detection, location and identification techniques for civil or military application. It should be borne in mind that a radar identification system for military aircraft and ships was used from the very beginning of the Second World War.

3947 A large number of specialists from different countries attended the IIIrd International Congress on Vertical Flight at San Remo from 24 to 26 April 1954 and adopted a resolution requesting the ICRC to study the bases for regulations which would afford better wartime protection to helicopters used for medical purposes.³¹

3948 The International Bulletin of the Army, Navy and Air Force Medical Services (Liège, April 1957) published a communication dated April 1956 and announcing

the destruction of a medical helicopter during the fighting in the Far East. The authors called for the revision of the First Convention, pointing out that Article 36 did not take into account the technical conditions of helicopter use and emphasizing that a new text was needed.³²

- 3949** In 1965 General E. Evrard, Head of the Medical Service of the Belgian Air Force, published a study on the protection of medical aircraft which mentions a number of societies, legal bodies and specialists involved in studying the question since 1949. He too advocates the use of additional means of identification, such as luminous signals, radio and radar transponders.³³
- 3950** In 1965 the Commission médico-juridique de Monaco drew up draft regulations relating to medical transport by air in time of armed conflict. Article 4 contemplated a continuous system of light signals or instantaneous electrical and radio identification, or possibly both, over and above the distinctive emblem on a white ground. These additional means of identification are described in an annex to the draft regulations.³⁴
- 3951** The draft of the Commission médico-juridique de Monaco and General Evrard's study were published in the *International Review of the Red Cross* in October and July 1966.
- 3952** Turning to the maritime aspect, hospital ships – which were still in service during the Asian conflicts following the Second World War – seemed destined to be superseded sooner or later by medical aircraft.³⁵ After 1949 their protection did not give rise to any serious problems; nevertheless, the ICRC consulted the meeting of experts it convened in Geneva in 1970 about the use of additional means of identification for such ships.³⁶
- 3953** Since the Oslo Conference in 1947, the protection of rescue craft in periods of armed conflict has been receiving attention from the International Life-Boat Conference (ILC), which meets every four years. The problem was described in detail by Professor Gilbert Gidel, President of the French Central Society for Rescue of the Shipwrecked, after the VIIth International Life-Boat Conference (ILC) held at Estoril (Portugal) on 16 June 1955, which adopted an important resolution relating to Article 27 of the Second Convention and lifeboat crews.³⁷
- 3954** The ILC has continued its work in this area since the Diplomatic Conference of 1974-1977, to which it was not invited because matters relating to naval warfare did not come within the purview of the Conference.
- 3955** Because of their specific nature, the rules of humanitarian law relating to maritime warfare were not included among the subjects to be studied with a view to the reaffirmation and development of the laws and customs applicable in armed conflicts, which had been placed on the agenda of the XXIst International

³² E. Evrard, "Legal Protection of Aero-Medical Evacuation in War-Time", in *12 Annales de droit international médical*, Monaco, 1965, and *IRRC*, July 1966, p. 343.

³⁵ J.H. Plumridge, *Hospital Ships and Ambulance Trains*, London, 1975, p. 159.

³⁶ The consultation proved extremely valuable, and the experience of the six hospital ships operated by the belligerents in the south Atlantic in 1982 showed that additional methods of identification and marking are essential.

³⁷ G. Gidel, "La protection des embarcations de sauvetage", *RICR*, September 1955, p. 549.

Conference of the Red Cross (Istanbul, 1969). One of the experts consulted by the ICRC in February 1969 nevertheless pointed out that humanitarian law applicable to naval warfare also needed to be reviewed as a matter of some urgency.³⁸

The Diplomatic Conference of 1974-1977

- 3956** The XXIst International Conference of the Red Cross adopted Resolution XIII entitled “Reaffirmation and Development of the Laws and Customs applicable in Armed Conflicts” requesting the ICRC to propose rules which would supplement the existing humanitarian law and to invite governmental experts to meet for consultations with the ICRC on those proposals.
- 3957** With regard to marking and identification, the ICRC deemed it necessary first and foremost to hold consultations on an individual and private basis with qualified experts in technical methods of detection, identification and communication.
- 3958** The outcome of these consultations, which took place in 1970, will be discussed, together with the preparatory work for the Diplomatic Conference and the work of the Technical Sub-Committee, in the introduction to Chapter III (*Distinctive signals*) of Annex I. The study of distinctive signals on the basis of the draft Annex accounted for a very substantial share of the work performed by Committee II’s Sub-Committee at the Diplomatic Conference.
- 3959** The international distinctive sign of civil defence given in Chapter V of the draft Annex – an equilateral blue triangle on an orange ground – was finally adopted at the eighty-ninth meeting of Committee II on 6 May 1977. Chapter V of the draft Annex was finalized when Committee II adopted Article 59 of draft Protocol I.³⁹
- 3960** In Article 49, paragraph 3, of draft Protocol I, the ICRC provided for works and installations containing dangerous forces to be marked by means of a visual sign. At the fourth session of the Conference, Committee III, which was responsible for studying draft Article 49, set up a Sub-Working Group on the international special sign for works and installations containing dangerous forces. The sign proposed by the Sub-Working Group – three bright orange circles placed in a line – was adopted, together with Article 49, by Committee III at its fifty-ninth meeting on 10 May 1977. The Drafting Committee decided to include that article in Annex I to Protocol I.⁴⁰
- 3961** Draft Annex I and the three resolutions, as revised by Committee II at the fourth session, were finally adopted by consensus at the last meeting of Committee II on 20 May 1977.⁴¹

Annex I, Chapter I – Identity cards

Introduction

- 3964** The identity cards described in this Chapter are provided for in Article 18 (*Identification*), paragraph 3, of the Protocol. They are intended for the civilian medical and religious personnel defined in sub-paragraphs (c), (d) and (k) of Article 8 (*Terminology*) of the Protocol. Such personnel may be either permanent or temporary, and provision is made for issuing the latter category with a less detailed identity card.¹
- 3965** To this end, Chapter I is divided into two articles relating, respectively, to the identity cards for permanent and temporary personnel. The relevant provisions of Article 1 (*Identity card for permanent civilian medical and religious personnel*) also apply to the identity card for civil defence personnel referred to in Article 14 (*Identity card*) of Chapter V (*Civil defence*) of the Annex.
- 3966** The identity card, issued by the competent authority enables the holder to prove that he forms part of the civilian medical and religious personnel entitled to respect and protection. For these categories of civilian personnel, particularly in occupied territories and combat areas, the identity card is evidence of the right to wear the distinctive emblem.
- 3967** In the 1974 draft, Chapter I was entitled “Documents” and consisted of four articles. Only the first two of these, relating to identity cards, were retained in the final version of the Chapter. Article 4 of the draft became Article 12 (*Flight plans*), whereas Article 3² was deleted. At the first session, the Technical Sub-Committee considered that draft Article 3 created an administrative burden which did not have the effect of strengthening the protection granted. Furthermore, the last paragraph of Article 20 of the Fourth Convention makes provision for a list of the personnel working in civilian hospitals.

Ph. E.

¹ Cf. commentary Arts. 8 and 18 of the Protocol, *supra*, p. 113 and p. 221.

² Entitled “Lists of personnel”.

Protocol I

Annex I, Article 1 – Identity card for permanent civilian medical and religious personnel

1. The identity card for permanent civilian medical and religious personnel referred to in Article 18, paragraph 3, of the Protocol should:
 - (a) bear the distinctive emblem and be of such size that it can be carried in the pocket;
 - (b) be as durable as practicable;
 - (c) be worded in the national or official language (and may in addition be worded in other languages);
 - (d) mention the name, the date of birth (or, if that date is not available, the age at the time of issue) and the identity number, if any, of the holder;
 - (e) state in what capacity the holder is entitled to the protection of the Conventions and of the Protocol;
 - (f) bear the photograph of the holder as well as his signature or his thumbprint, or both;
 - (g) bear the stamp and signature of the competent authority;
 - (h) state the date of issue and date of expiry of the card.
2. The identity card shall be uniform throughout the territory of each High Contracting Party and, as far as possible, of the same type for all Parties to the conflict. The Parties to the conflict may be guided by the single-language model shown in Figure 1. At the outbreak of hostilities, they shall transmit to each other a specimen of the model they are using, if such model differs from that shown in Figure 1. The identity card shall be made out, if possible, in duplicate, one copy being kept by the issuing authority, which should maintain control of the cards which it has issued.
3. In no circumstances may permanent civilian medical and religious personnel be deprived of their identity cards. In the event of the loss of a card, they shall be entitled to obtain a duplicate copy.

Commentary

General remarks

- 3968** The characteristics of this identity card are similar to those of the card for military medical and religious personnel governed by Article 40 of the First Convention but, following Committee II's discussion of Article 18 (*Identification*) of the Protocol, they are not compulsory.¹ It was considered advisable to avoid any rigid standardization of the items to be included in this document intended for civilians, since each country has its own population registration methods and its own procedures for keeping files on civilians and their identity documents. At present there are no international standards in this sphere. The International Standardization Organization (ISO) would be the competent body to study international standards for identity documents. Some of its Technical Committees have drawn up codes for the representation of country names, as well as systems or documents relating to the romanization of Arabic, Chinese, Cyrillic and Hebrew characters.²
- 3969** Whatever national standards exist for identity documents, the characteristics of the identity card proposed in paragraph 1 enable the civilian and military authorities of the Parties to the conflict to check the holder's identity and entitlement to wear the distinctive emblem. The colour of the identity card is not specified; the Technical Sub-Committee of Committee II suggested that it should be white, this making it easier to represent the red distinctive emblem on a white ground.
- 3970** Current developments in computer information processing systems make it possible to produce very small identity cards for military use ("electronic dog tags"). Neither this type of identity card, nor the type used for bank cards or to

¹ *O.R.* XI, p. 166, CDDH/II/SR.18, para. 8.

² Standards ISO R9-68, ISO 233-1984, ISO 259-1984, ISO R843-1968, ISO 7098-1982, ISO 3166, ISO 216-1975.

restrict access to high-security areas, nor again the type of identity card which is based on biometric techniques, can replace the identity card provided for in the Conventions and the Protocol,³ which can be manufactured without recourse to sophisticated techniques and contains information comprehensible to everybody, everywhere.

- 3971** Article 1 does not provide for an identity disc to be worn by permanent civilian medical and religious personnel. However, it would be advisable to provide such personnel with a disc similar to that intended for military personnel and referred to in Articles 16 and 40 of the First Convention. This precaution should be taken, at least in the areas mentioned in Article 18 (*Identification*), paragraph 3, of the Protocol.

Paragraph 1

- 3972** The manufacture of identity cards and discs should be studied and, if possible, prepared in peacetime; the production of these documents should on no account be improvised once a conflict has started.⁴

Sub-paragraph (a)

- 3973** The distinctive emblem which should appear on the identity card is the red cross or red crescent, models for which are given in Figure 2 of Annex I; the red lion and sun which also appears in Figure 2 is no longer used and has been replaced in Iran since 1980 by the red crescent.⁵
- 3974** The two red crosses appearing at the top of the model identity card in Figure 1 are not compulsory. A single red cross or red crescent would suffice and it could be placed anywhere on the card. The national emblem may also be represented, together with the name of the country. If the identity card is white, the distinctive emblem may be stamped or printed on it in red: the emblem must be red on a white ground.
- 3975** So that the identity card may easily be carried in the pocket, the Technical Sub-Committee suggested that the A7 format be used, so as to produce a rectangular 74 × 105 mm card printed recto-verso. Under ISO international

³ Biometry: “biology from a statistical point of view, especially with reference to problems of variation” (Funk & Wagnalls Dictionary). It enables fingerprint patterns and the shape of faces and hands, etc. to be identified.

⁴ The Conventions and their Additional Protocols do not propose a model identity disc. Some are oval in shape, measuring about 6 cm lengthwise and 4 cm across and are made of 1 mm stainless steel. They are partially perforated along the short axis so that they can be broken into two, each half being engraved with the particulars stipulated in Article 16 of the First Convention. Two holes are pierced at each end of the long axis; the disc may then be hung round the neck on a 60 cm stainless steel chain.

⁵ The delegate of Israel recalled that in his country the red shield of David (six-branched star) was used as a distinctive emblem. Patterns of the emblems may be found in: Ph. Eberlin, *Protective Signs*, Geneva, 1983.

standards, the A7 format is equal to one-eighth of the 297 × 210 mm A4 format; A4 paper is commonly used for writing and typing.⁶

3976 The A7 format identity card may be printed either upright or sideways and is designed to receive a photograph measuring at least 55 × 40 mm.

Sub-paragraph (b)

3977 By the term “as durable as practicable”, the Technical Sub-Committee meant that the card should be crease-resistant, water-resistant and dirt-resistant. These criteria are met by plastified paper or paperboard and by the stiff plastic materials used to make badges and bank credit cards. Finally, the identity card may be placed in a transparent, hermetically sealed holder or, failing that, in any type of protective covering.

Sub-paragraph (c)

3978 In some countries the identity cards issued to civilians are bilingual or trilingual, but in many other countries they are monolingual. The model in Figure 1 provides enough space to print the various items in two languages; in that case, care should be taken to ensure that the text concerning protection is prominently displayed.

3979 To facilitate the translation of the information on the identity card into a language other than the national language, the items could be numbered, starting with 1 for the name of the country and issuing authority.⁷ The list of items numbered from 1 to 16 could then be translated into other languages and exchanged for the corresponding list of the other Party to the conflict, which could be reproduced and distributed as appropriate.

3980 The official language referred to in this sub-paragraph is that recognized as official State language. This official or national language may therefore not be

⁶ For comparison, the model identity cards annexed to the Conventions have the following sizes: First and Second Conventions, 75 × 100 mm model; Third Convention, 130 × 100 mm actual size.

⁷ The items of the model in Figure 1 could be numbered as follows:

- 1 – Name of the country and authority issuing this card
- 2 – Identity card for permanent/temporary civilian medical/religious personnel
- 3 – Name
- 4 – Date of birth (or age)
- 5 – Identity No. (if any)
- 6 – The holder of this card... (text in full)
- 7 – Date of issue
- 8 – No. of card... Signature of issuing authority
- 9 – Date of expiry
- 10 – Height; 11 – Eyes; 12 – Hair;
- 13 – Other distinguishing marks or information
- 14 – Photo of holder
- 15 – Stamp
- 16 – Signature of holder or thumbprint or both.

among those used for the authentic texts referred to in Article 102 of the Protocol (*Authentic texts*). Furthermore, there may be more than one national or official language in a given country.

- 3981** It is advisable for the other languages spoken in the national territory to be used, together with the official language, for drawing up the identity card.⁸ When it is possible to do so, there may be some advantage in also using an international language for the identity card.

Sub-paragraph (d)

- 3982** Usage regarding family and first names or other constituent parts of the name varies from country to country and sometimes even inside the same country. Consequently, after lengthy discussions, Committee II decided that the first name should not appear on the identity card as a separate item. Thus the competent authorities can give the name customarily used in the country to identify a person, together with the first name(s) if appropriate. That customary name should be entered first and perhaps even underlined in order to make it clear that it identifies the person. The habitual first name should be entered immediately after the name.⁹
- 3983** The date of birth, which is an important means of identification, may in some countries not be known for a large number of people. In such cases, the person's age may be established by a medical commission which issues a certificate stating the presumed age, from which the year of birth may be deduced. If the exact date of birth is unknown, the person's age, at least in approximate terms, should be entered on the identity card.
- 3984** One of the delegates in the Technical Sub-Committee observed that complications might arise from the fact that not all countries have the same calendar. In fact, the differences between the various calendars in use are known and, if necessary, the competent services could publish any information required for the conversion of dates.
- 3985** As a general rule, civilians are not given an identity number in peacetime; however, if such a number is assigned to permanent civilian medical and religious personnel in time of armed conflict, it could usefully be entered on the card in order to facilitate identification. In that case, the same number should also appear on the identity disc, if any, issued to such civilian personnel.

Sub-paragraph (e)

- 3986** The card must indicate the holder's medical or religious status. Both categories of personnel are mentioned in the specimen card reproduced in Figure 1, and all that has to be done is to strike out the term which does not apply.

⁸ *O.R.* XII, p. 189, CDDH/II/SR.72, paras. 18-20.

⁹ *Ibid.*, p. 180, CDDH/II/SR.71, paras. 34-36; pp. 183-184, paras. 64-80.

- 3987** It would also be desirable to give a precise indication of the holder's capacity by mentioning his profession: surgeon, anaesthetist, doctor, nurse, ambulance driver etc.
- 3988** In the case of a minister of religion, additional information such as denomination, capacity – for example, hospital chaplain – or possible attachment to a relief organization could be helpful for purposes of identification.
- 3989** In certifying clearly the holder's status, the identity card complies with the provision of Article 18 (*Identification*), paragraph 3, of the Protocol.

Sub-paragraph (f)

- 3990** In the case of permanent civilian personnel, there should be no difficulty in affixing the holder's photograph to the identity card. The photograph is an essential feature of all identity documents and is used in all countries.
- 3991** The holder's signature must appear on the identity card, as evidence that he recognizes the accuracy of the description given therein of his status. The signature is also an aid to identification, as is the thumbprint which may either replace or accompany the signature. In order to avoid confusion, it may be advisable for the holder to sign the back of the photograph as well.

Sub-paragraph (g)

- 3992** The stamp and signature of the competent authority are essential as evidence of the identity card's validity. In the model in Figure 1, the place for "signature of issuing authority" is on the front side whereas the space for the stamp is on the back. This arrangement is not compulsory; the authority's signature and stamp could equally well be in the same place.
- 3993** Article 1 does not state whether the identity card should bear a number; nevertheless, the specimen in Figure 1 has a space for "No. of card". This is a suggestion in keeping with the provisions of Article 40 of the First Convention (*Identification of medical and religious personnel*) and the specimen military identity card annexed to that Convention.

Sub-paragraph (h)

- 3994** The requirement that the identity card for permanent civilian medical and religious personnel should state the date of issue and expiry is consistent with the widespread practice of making civilian identity documents renewable periodically. Compulsory renewal enable changes in the holder's physical appearance, duties etc. to be taken into account.
- 3995** If necessary, the extension of the card's validity may be certified and signed by the competent authority on the card itself, in the space which the specimen in Figure 1 provides for "Other distinguishing marks or information".

Paragraph 2

- 3996** The provisions of this paragraph, like those of the second paragraph of Article 40 of the First Convention, are compulsory. The requirement that the identity card for permanent civilian medical and religious personnel must be uniform throughout the national territory is an essential one, since the card is not necessarily issued in the place where the protected person usually pursues his professional activities in peacetime. Since communications may break down, identity cards which may have been issued anywhere on the national territory can only be controlled effectively if they all follow a standard pattern.
- 3997** The issuing authority which maintains control of the cards issued to protected civilian personnel will be in touch with the professional bodies concerned, the personnel services of medical establishments, civilian and religious administrative bodies and National Red Cross or Red Crescent Societies. Each country, taking into account its special situation, will designate the authority which is to be in charge of keeping the files and duplicate copies of cards issued, replacing lost cards, extending or updating cards etc.¹⁰
- 3998** When the Parties to the Conflict transmit specimen identity cards to each other, they should attach a translation into the adverse Party's national language of the card's particulars.

Paragraph 3

- 3999** The stipulation that permanent civilian medical and religious personnel may in no circumstances be deprived of their identity cards is designed to protect such personnel against arbitrary decisions which might jeopardize their humanitarian activity. This is how the prohibition should be interpreted. Obviously, if the holder of such an identity card were to be found guilty of violating his humanitarian mission or flouting medical ethics, he would lose his entitlement to the card. Nevertheless, he should not be completely deprived of an identity document.
- 4000** Paragraph 3 bears a resemblance to the fourth paragraph of Article 40 of the First Convention, which states that protected personnel may not be deprived of the right to wear the distinctive emblems (armlet). The same applies to civilian personnel issued with identity cards entitling them to respect and protection.

Ph. E.

¹⁰ Cf. *Commentary I*, Art. 40.

Protocol I

Annex I, Article 2 – Identity card for temporary civilian medical and religious personnel

1. The identity card for temporary civilian medical and religious personnel should, whenever possible, be similar to that provided for in Article 1 of these Regulations. The Parties to the conflict may be guided by the model shown in Figure 1.
2. When circumstances preclude the provision to temporary civilian medical and religious personnel of identity card similar to those described in Article 1 of these Regulations, the said personnel may be provided with a certificate signed by the competent authority certifying that the person to whom it is issued is assigned to duty as temporary personnel and stating, if possible, the duration of such assignment and his right to wear the distinctive emblem. The certificate should mention the holder's name and date of birth (or if that date is not available, his age at the time when the certificate was issued), his function and identity number, if any. It shall bear his signature or his thumbprint, or both.

Conf. RC, Report*, pp. 15-16.

Commentary**General remarks**

- 4001** The temporary civilian medical and religious personnel referred to in this article are defined in sub-paragraphs (c), (d) and (k) of Article 8 (*Terminology*) of the Protocol; since they are entitled to respect and protection they should be able, if the need arises, to prove their right to wear the protective distinctive emblem by showing the identity card provided for in Article 18 (*Identification*), paragraph 3, of the Protocol. Since the Protocol does not distinguish between “permanent” and “temporary” status for civilian medical and religious personnel, the identity cards intended respectively for these two categories of personnel are based on one and the same provision.
- 4002** As we have seen, only the first of the two articles of the Annex devoted to these identity cards refers to paragraph 3 of Article 18 (*Identification*) of the Protocol, in which the terms “permanent” and “temporary” do not appear.
- 4003** In cases of emergency, when an identity card based on the national model or on the model in Figure 1 cannot be drawn up for temporary personnel, the competent authority may issue a similar document, namely, the certificate referred to in paragraph 2 of this article. Like the identity card provided for in Article 18 (*Identification*), paragraph 3, of the Protocol, the certificate issued to temporary civilian medical and religious personnel states their right to wear the distinctive emblem as well as their right to respect and protection.

Paragraph 1

- 4004** The model identity card proposed in Figure 1 was designed by the Technical Sub-Committee so that it could also be issued to temporary civilian medical and religious personnel. All that is required is to strike out the word “permanent” which appears in the model. The essential features which serve to identify an individual are the same, irrespective of whether permanent or temporary personnel are involved.
- 4005** Temporary personnel, who are required to meet the conditions laid down in Article 8 (*Terminology*), sub-paragraphs (c), (d) and (k), of the Protocol, may be called upon at short notice.¹ Their mission should not be delayed by the administrative formalities involved in issuing the identity card certifying their right to wear the distinctive emblem. A single model of identity card which can be used for both permanent and temporary personnel facilitates both control and issuance procedures throughout the national territory and at any time; the forms may be printed, left blank and distributed in advance to the authorities responsible for issuing and controlling the identity cards.

¹ Cf. commentary Art. 8 of the Protocol, sub-paras. (c), (d), (k), *supra*, pp. 124, 127 and 132.

Paragraph 2

- 4006** Where circumstances preclude the provision of identity cards based on the national model or the model in Figure 1 to temporary civilian medical and religious personnel in occupied territories or in the areas referred to in paragraph 3 of Article 18 (*Identification*) of the Protocol, the competent authority may issue a certificate as proof of the status of the person to whom it is issued.
- 4007** The certificate should contain the following particulars:

*Certificate for temporary civilian medical and religious personnel**Name:**Date of birth:*

(or age when the certificate was issued).

*Holder's function:**Identity No. (if any):*

The holder has the right to wear the distinctive emblem conferring protection.

His assignment to duty as temporary medical/religious personnel

begins on:

ends on:

(date of issue)

Signature of holder
or thumbprint or both

Signature of the competent
authority issuing the
certificate

- 4008** In exceptional circumstances or emergencies, it is not compulsory for the certificate to bear the distinctive emblem and the competent authority's stamp. Neither do certificates of this kind need to bear the holder's photograph. By analogy with the provisions governing the identity card, temporary personnel provided with this certificate should not have it removed from them and may in no circumstances be deprived of it during their assignment. In the event of loss, they should be provided with a duplicate copy. The issuing authority should, if possible, keep a control of the certificates it issues, for example by keeping a list of names. The material to be used is not specified and could, for example, be ordinary typing paper without an official letterhead.

- 4009** If the holder does not know his date of birth, paragraph 2 recommends that his age at the time of issue should be mentioned. Consequently, the certificate should bear a date of issue.

Fig. 1: Model of identity card (format: 74 mm × 105 mm)

- 4010 The particulars referred to in Article 1 (*Identity card for permanent civilian medical and religious personnel*), paragraph 1, sub-paragraphs (a) to (h), appear on either the front or the reverse side of the model. Enough space was left to include additional particulars as an aid to precise identification of the holder, namely, height, eyes and hair.
- 4011 A person may be described as short, of average height or tall, but it is certainly preferable for the height to be expressed in metric terms. Eyes and hair are characterized by their colour; a bald person may be so described. It is not compulsory for these particulars to be given; they are not mentioned in Article 1 (*Identity card for permanent civilian medical and religious personnel*), paragraph 1, sub-paragraphs (a) to (h).
- 4012 The item “Other distinguishing marks or information” could be used, for example, to list any distinguishing physical marks or provide information about the holder’s profession.
- 4013 The Technical Sub-Committee considered that it was not necessary for the holder’s blood group to be entered on the identity card because, if the need arises, it is preferable to check the blood group rather than to rely on previous information from a source which may be unverifiable.

Ph.E.

Annex I, Chapter II – The distinctive emblem

Introduction

- 4014 The expression “distinctive emblem” is defined, for the purposes of the Conventions and their Protocols, in Article 8 (*Terminology*), sub-paragraph (*l*), of the Protocol. The use of the distinctive emblem for marking and identifying medical personnel, units and transports is governed by Article 18 (*Identification*) of the Protocol.¹
- 4015 The essential rules for the most effective possible implementation of the provisions concerning the use of the distinctive emblem are summed up in Articles 3 (*Shape and nature*) and 4 (*Use*) which make up Chapter II.
- 4016 If it is to be effective, the distinctive emblem – like any visual sign – must be fully visible and identifiable within the visual range for which it is designed. Accordingly, it should make medical personnel, units and transports identifiable to the naked eye in daylight and in clear weather (absence of fog, snow, rain etc.), at the distance which separates combatants when they shoot on sight.
- 4017 This distance will obviously vary significantly according to the nature of the armaments concerned (infantry, armoured tanks, artillery, naval or air weaponry etc.).
- 4018 The visibility of the distinctive emblem from the air was tested in 1936 by the Dutch and Swiss Air Forces. According to the experts, these tests are still valid today notwithstanding the speed of modern aircraft. The detailed results were published by the ICRC in the “Revue internationale de la Croix-Rouge”.²

Dutch tests

- 4019 Size of the red cross: 6 m in diameter with arms 0.80 m wide. White ground: square with sides measuring 6 m. The tests produced the following results:
- from 1,500 m altitude, the red cross is visible to an observer knowing where it is;

¹ Cf. commentary Arts. 8, sub-para. (*l*), and 18 of the Protocol, *supra*, p. 134 and p. 221. Cf. also Arts. 38 and 85, para. 3 (*f*), of the Protocol and the related commentary, *supra*, p. 445 and p. 998.

² Tests by the Dutch Air Force, *RICR*, March 1936, p. 204 (in French only). Test by the Swiss Air Force, *RICR*, May 1936, p. 408 (in French only).

- from 2,500 m, the red cross is scarcely visible even to an observer knowing where it is;
 - from 3,500 m, the red cross is not visible.
- 4020** In poor weather and limited visibility, huge emblems (50 m cross with arms 10 m wide) are essential and should be floodlit.
- 4021** The distinctive emblem also needs to be this size in order to be visible from an altitude of 4,000 m in clear weather.
- 4022** At the altitudes from which the above-mentioned observations were made, a 3 m red cross is not visible.

Swiss tests

- 4023** Size of the red cross: 5 m in diameter, width of arms not specified but – judging by the proportions of the Swiss cross – probably 1.5 m wide and 1.75 m long (length exceeding width by 1/6).³ White ground: 5 × 5 m. The following results were produced:
- from a low-flying (200 to 300 m) aircraft, a cross of this size astride the ridge of a hospital roof is only recognizable from a very short distance because the cross appears distorted by the slope of the roof. Consequently, the red cross must not be placed straddling the top angle of a roof but, rather, on the flat surface of each slope;
 - from 1,000 m, seen perpendicularly from above, the cross is visible to an observer knowing its position;
 - from 2,000 m, seen perpendicularly from above, the cross appears distorted but it is identifiable if its position is already known;
 - from 2,500 to 3,000 m, the distinctive emblem is no longer visible.
- 4024** It will be noted that the Dutch and Swiss tests on the visibility of the protective emblem from the air produced concordant results.
- 4025** On land, the visibility tests carried out by the ICRC on two occasions in 1972 and repeated in 1976 for the experts of the Technical Sub-Committee, showed that the distinctive emblem is no longer identifiable at the following distances:
- 60 m for a red cross 10 cm in diameter on a white armband;
 - 300 m for a red cross 40 cm in diameter on a white ground, on an ambulance;
 - 500 to 600 m for a red cross 80 cm in diameter on a white ground, on an ambulance or flag.
- 4026** At sea, studies have also been carried out on the visibility of the distinctive emblems on the hull and superstructure of ships chartered by the ICRC for its operations, as well as on a number of hospital ships. The results are practically identical to those of the above-mentioned aerial observations. From a distance of

³ Cf. First Convention, Art. 38, first para. Cf. also Ph. Eberlin, *Protective Signs, op. cit.*, pp. 23-26.

two nautical miles, a red cross 3 m high on a white ground painted on the hull of a ship is barely visible and is not identifiable to the naked eye.⁴

- 4027** The use of the distinctive emblem by hospital ships and coastal rescue craft is the subject of Resolution 18 addressed by the Diplomatic Conference to the International Maritime Organization in 1977. The resolution requests that the use of the distinctive emblem be recognized in the appropriate IMO documents such as the International Code of Signals.
- 4028** The visual identification issues raised in Resolution 18 were referred by IMO to its Maritime Safety Committee and its Sub-Committee on Safety of Navigation. As a result of their work, a new Chapter XIV called “Identification of Medical Transports in Armed Conflict and Permanent Identification of Rescue Craft” was added to the International Code of Signals. The new text, which is annexed to this commentary came into force on 1 January 1986.⁵
- 4029** The visibility of the distinctive emblem to infrared observation was also tested by the ICRC, using both the red cross and the red crescent.
- 4030** The Spanish Red Cross transmitted to the ICRC photographs of ambulances which demonstrated that the red distinctive emblem was invisible to infrared film. As a result of these tests, the Technical Sub-Committee recommended that the necessary steps be taken to ensure that the distinctive emblem could be detected by technical means.

INTERNATIONAL CODE OF SIGNALS

(extract)

CHAPTER XIV

Identification of Medical Transports in Armed Conflict and Permanent Identification of Rescue Craft*

1. Shape, colour and positioning of emblems for medical transports

1.1 The following emblems can be used separately or together to show that a vessel is protected as a medical transport under the Geneva Convention.

1.2 The emblem, positioned on the vessel's sides, bow, stern and deck, shall be painted dark red on a white background.

1.3 The emblem shall be as large as possible.

1.3.1 On the vessels's sides the emblem shall extend from the waterline to the top of the ship's hull.

1.3.2 The emblems on the vessel's bow and stern must, if necessary, be painted on a wooden structure so as to be clearly visible to other vessels ahead or astern.

1.3.3 The deck emblem must be as clear of the vessel's equipment as possible to be clearly visible from aircraft.

1.4 In order to provide the desired contrast for infrared film or instruments, the red emblem must be painted on top of a black primer paint.

1.5 Emblems may also be made of materials which make them recognizable by technical means of detecting.

2. Illumination

2.1 At night and in restricted visibility the emblems shall be illuminated or lit.

* In accordance with Article 27 of the Second Geneva Convention of 12 August 1949, this chapter also applies to coastal rescue craft. The expression "rescue craft" was adopted in 1984 by the International Life-Boat Conference to designate the coastal craft referred to in Article 27.

2.2 At night and in restricted visibility all deck and overside lights must be fully lit to indicate that the vessel is engaged in medical operations.

3. *Personal equipment*

3.1 Subject to the instructions of the competent authority, medical and religious personnel carrying out their duties in the battle area shall, as far as possible, wear headgear and clothing bearing the distinctive emblem.

4. *Flashing blue light for medical transports*

4.1 A vessel engaged in medical operations shall exhibit one or more all-round flashing blue lights of the colour prescribed in paragraph 4.4.

4.2 The visibility of the lights shall be as high as possible and not less than 3 nautical miles in accordance with Annex 1 to the International Regulations for Preventing Collisions at Sea, 1972.

4.3 The light or lights shall be exhibited as high above the hull as practical and in such a way that at least one light shall be visible from any direction.

4.4 The recommended blue colour is obtained by using, as trichromatic co-ordinates:

green boundary	$y = 0.065 + 0.805 x$
white boundary	$y = 0.400 - x$
purple boundary	$x = 0.133 + 0.600 y$

4.5 The frequency of the flashing light shall be between 60 and 100 flashes per minute.

5. *Radar transponders*

5.1 It should be possible for medical transports to be identified by other vessels equipped with radar by signals from a radar transponder fitted on the medical transport.

5.2 The signal from the medical transport transponder shall consist of the group YYY, in accordance with article 40 of the Radio Regulations followed by the call sign or other recognized means of identification.

6. *Underwater acoustic signals*

6.1 It should be possible for medical transports to be identified by submarines by appropriate underwater signals transmitted by the medical transports.

6.2 The underwater signal shall consist of the call sign of the ship preceded by the single group YYY transmitted in morse on an appropriate acoustic frequency, e.g. 5 kHz.

7. *Rescue craft carried by medical transports*

7.1 Every rescue craft should be equipped with a mast on which a red cross flag measuring about 2×2 metres can be hoisted.

8. *Flashing blue light for medical aircraft*

8.1 The light signal, consisting of a flashing blue light, is established for the use of medical aircraft to signal their identity. No other aircraft shall use this signal. The recommended flashing rate of the blue light is between sixty and one hundred flashes per minute.

8.2 Medical aircraft should be equipped with such lights as may be necessary to make the light signal visible in as many directions as possible.

Annex I, Article 3 – Shape and nature

1. The distinctive emblem (red on a white ground) shall be as large as appropriate under the circumstances. For the shapes of the cross, the crescent or the lion and sun, the High Contracting Parties may be guided by the models shown in Figure 2.
2. At night or when visibility is reduced, the distinctive emblem may be lighted or illuminated; it may also be made of materials rendering it recognizable by technical means of detection.

Commentary**General remarks**

- 4031** The distinctive emblems reproduced in Figure 2 are those of the 1949 Conventions. As pointed out earlier, the red lion and sun has not been used since 1980.
- 4032** However, this emblem could only be deleted from the Protocol if the amendment procedure were followed.
- 4033** The red cross and the red crescent should always stand out on a white ground. There are no provisions governing the shape and size of the white ground, which may be the hull of a hospital ship, the fuselage of a medical aircraft, or a white wall. It is not mandatory for medical aircraft or ambulances to be painted white. They often are, however, for the colour white is a thermal insulant.
- 4034** There are no mandatory provisions regarding the size or proportions of the distinctive emblem. It is thus possible, in an emergency, to fashion the emblem using whatever materials are available. For the same reasons, the red and white colours are not standardized and may therefore be produced by improvisation if necessary.
- 4035** Article 43 of the Second Convention refers to the colour dark red in respect of the distinctive emblems placed on hospital ships and coastal rescue craft. This is only a recommendation intended to secure a good red and white colour contrast.¹ Under Article 48 of the First Convention, the heraldic emblem of the red cross on a white ground is formed, as a compliment to Switzerland, by reversing the Federal colours. The red colour of the Swiss emblem has been regulated and is quite dark; however, Article 38 contains no stipulations regarding either the shape or the colour of the distinctive sign, which retains its full protective value whatever the shade of the red and the white colours, as explained in a technical note published in the *International Review of the Red Cross*.²
- 4036** When references are made to the size of the distinctive emblem, what is meant is its height and its width together with the area delimited by its contours. The distance at which it is visible depends on all these factors, or, in other words, on its red area. Comparative observations made during visibility tests by night and by day showed quite clearly that both a sign consisting only of lines and the surface of a crescent are less visible than an outspread cross of the same size.

Paragraph 1

- 4037** The expression “shall be as large as appropriate under the circumstances” represents a compromise between the need to ensure that the distinctive emblem is as effective as possible thanks to its size, and military requirements which, in some situations, call for the emblem to be camouflaged or made smaller.

¹ Cf. *Commentary II*, pp. 241-243 (Art. 43, para 1).

² Ph. Eberlin, “Technical Note on the Colours of the Red Cross and Red Crescent Emblem”, *IRRC*, March-April 1983, p. 77.

- 4038 The visibility tests carried out on the distinctive emblem showed that the outline of a vehicle approaching from a distance can be seen before its colours are visible to the naked eye. If the red emblem on a white ground is supposed to be “as large as possible”, it should be displayed over the vehicle’s full height so that it can be identified on the outline as soon as the red and white colour contrast revealing it starts to appear. The same applies for aircraft, ships and small craft marked with the distinctive emblem.
- 4039 Figure 2 gives an idea of the shape and proportions of the distinctive emblems and could be used as the basis for improvising one. More detailed information on the manufacture of distinctive emblems has been published by the ICRC in a trilingual booklet, which describes a method proposed by a National Red Crescent Society for the geometrical construction of the crescent. The Conventions lay down no rules for either the positioning of the red crescent on the white ground or its proportions.³

Paragraph 2

- 4040 The decision to light or illuminate the distinctive emblem is for the competent authority to take if it deems that the emblem should be identifiable at night or when visibility is poor.
- 4041 The emblem is “lighted” by a projector or a lamp; the white light projected onto it brings out its shape and colours.
- 4042 The emblem is “illuminated” when red and white lights are placed on it in order to pick out the red emblem against the white ground. This may be done by placing strings of red electric bulbs along the contour of the emblem and white bulbs round the edge of the white ground.
- 4043 Furthermore, there is no reason why the emblem itself should not be luminous, giving off a red light surrounded by a white halo or glow.⁴ This type of device, which could be based on those used for road signs and neon advertising signs, should be subjected to visibility tests.
- 4044 The technical means of detection referred to in paragraph 2 are essentially those involving infrared (IR) observations, which may be divided into three categories;
- active electro-optic infrared observation, involving the emission of infrared light and the reception of reflected images;
 - infrared photography;
 - passive electro-optic infrared observation, involving the detection of infrared radiation from sources of heat.

³ Ph. Eberlin, *Protective Signs, op. cit.* The crescent is obtained by making the circumferences of two eccentric circles intersect; their centres are two units of measurement apart and their radius measures 6 and 5 units respectively. The crescent may be pointed in various directions in relation to the centre of the circles.

⁴ Cf. *supra*, general introduction to the commentary on Annex I, p. 1144.

At the time of the Conference of Government Experts (1971-1972) such infrared observation methods were in general use in the armed forces, having been introduced during the Second World War. Other technical means of detection which were then starting to become known to the public at large, such as seismic or chemical “sensors” released by aircraft over vast areas and transmitting information by means of automatic radio signals, did not enable medical personnel, units and transports to be identified. The shortage of detailed documentation on this new “generation” of technical means of detection has prevented an accurate assessment from being made of their implications for the respect and protection to which medical services are entitled.

- 4045** The ICRC tests carried out in 1972 and 1976 on the use of infrared observation to detect the distinctive emblem by night were confined to active electro-optic infrared observation using a projector and an image enlarger with screen. The wavelengths used for the infrared radiations ranged from 0.8 to 2.0 μm .⁵ The observational distance was fairly short since it did not exceed 800 metres.
- 4046** Following the communication to the ICRC by the Spanish Red Cross of photographs of ambulances taken with infrared sensitive film, on which the red cross could not be seen at all, infrared photographic tests prepared by the ICRC were also carried out. It will be recalled that infrared photography, both in black and white and in colour, is used under a variety of techniques for the day-time observation and aerial monitoring of combat and supply zones. The wavelength used for these tests ranged from 0.7 to 0.85 μm .
- 4047** The ICRC did not test the visibility of the distinctive emblem by means of calorimetric electro-optic passive sensors, which may be used by both day and night for infrared passive observation of the differences in temperature caused by hot engines, chimneys, human beings, animals etc., in combat and supply zones. This type of passive electro-optical infrared observation using wavelengths from 3 to 5 and from 10 to 14 μm may be carried out from the air at altitudes of up to 3,000 metres.
- 4048** The ICRC tests showed that the distinctive emblem is visible to active electro-optic infrared observation only through the colour contrast produced by the dark against a pale ground. The white ground reflects more than 80% of infrared light whereas the colour red reflects only 0 to 10%. If the colour red itself is placed on a pale ground, the contrast disappears. This holds good for photography too. When black and white infrared film is used with an orange filter, the emblem appears as a dark shape on a pale gray ground, if ordinary paint is used for the red and white colours. The contrast is improved if reflectorized material is used for the white ground and glossy paint for the red emblem.
- 4049** Using a colour infrared film and a yellow filter, the emblem is seen as yellow on a reddish-gray ground.

⁵ μ = Greek letter (mu); under the International System of Units (SI), μ = micron or micrometre, also abbreviated μm . One μm = 10^{-6}m = 0.000001 m. Infrared wavelengths may sometimes be expressed in millimicrons ($\text{m}\mu$), nanometres (nm), or angstroms (\AA); $1\mu = 10^3\text{m}\mu = 10^3\text{ nm} = 10^4\text{ \AA}$.

4050 Various methods of improving the contrast were tested:

- a black band round the perimeter of the sign;
- a strip of reflectorized plastic material round the perimeter of the sign;
- red reflectorized hatching across the sign;
- addition of black pigment to the red paint;
- a black coating beneath the red.

The last method was found to be the most effective in improving the dark-on-pale contrast, whereas the others made the shape of the cross stand out more clearly on its pale ground.

4051 The ICRC was informed that the distinctive emblem's colour contrast was not visible to passive calorimetric infrared detection. In order to be identified by means of this type of sensor, which is used for diurnal and nocturnal aerial observation, the temperature of the emblem needs to be from 10 to 100°C higher than that of its background.

4052 The materials which may be used to make the emblem visible to the above means of infrared detection are therefore those which improve the dark-on-pale contrast or, in other words, enhance the reflective properties of the white ground and diminish the reflected radiation from the red sign. Industry produces reflectorized materials which have been described in the International Review of the Red Cross and have proved most effective in improving the distinctive emblem's contrast under infrared observation.⁶

Ph. E.

⁶ Ph. Eberlin, "Modernization of Protective Markings and Signalling", *IRRC*, March-April 1979, p. 59.

Annex I, Article 4 – Use

1. The distinctive emblem shall, whenever possible, be displayed on a flat surface or on flags visible from as many directions and from as far away as possible.
2. Subject to the instructions of the competent authority, medical and religious personnel carrying out their duties in the battle area shall, as far as possible, wear headgear and clothing bearing the distinctive emblem.

Commentary

General remarks

4053 The whole of the distinctive emblem must be visible from all directions if it is to be identified at a glance, without hesitation. This was demonstrated by the ICRC visibility tests carried out in 1972 and 1976 as well as by the tests of the

emblem's visibility from the air conducted in March and May 1936 by the Dutch and Swiss Air Forces.¹

- 4054 The ICRC's report on its own tests (D.1291) was communicated to the specialists attending the 1972 Conference of Government Experts. The report gives the size of the emblems and the distances, ranging from 100 to 1,000 m, at which they were observed, together with the type of material used to make them. The red cross measured 80 × 80 cm and was displayed on a white 100 × 100 cm panel. The red crescent was 80 cm high. Different types of panel (wood, cardboard and metal), all with plane surfaces, were used. Ordinary paint was used for some of the signs, while others were made out of ordinary or fluorescent self-adhesive coloured plastic. Phosphorescent colours were tested as well as red and white retro-reflective materials, and experiments were carried out with various combinations of the above-mentioned materials.
- 4055 Further details will be given later of these tests, which also included the observation, from distances of less than 80 m, of the small distinctive emblem on flags, armlets, tabards, helmets, stretchers, tents and medical vehicles. The observations, which were made during the day, at twilight and at night (moon in the first quarter), in clear weather, showed that these small signs were inadequate, particularly on the armlet.
- 4056 At night, visible light projectors and pencil beams (pocket torches) were used to view the signs; infrared detection of the sign was tested by means of active electro-optic observation. Under infrared radiation, as in the case of visible light, the judicious use of reflectorized materials may considerably improve colour contrast and visibility range. Retro-reflective material consists of microscopic spherical glass balls embedded in sheets or strips of self-adhesive cloth or plastic and secured by a film of special transparent material. It should be borne in mind that the reflected light ceases to be visible if the observer moves outside the cone of about 4 degrees formed by the angles of incidence. The eyes of a cat, which are natural retro-reflectors, have optical characteristics on which the invention of retro-reflective material was based.² Retro-reflective materials are widely used, particularly for road signs.

Paragraph 1

- 4057 The flag has always been – and still is – an excellent signal since, taken together with its holder and pole, and provided it is large enough (about 100 × 100 cm), its height makes it an ideal stimulus for the naked eye.
- 4058 Flying the white flag struck with the red distinctive emblem is tantamount to sending a visual signal which will be seen more clearly from below by a distant observer than a less conspicuous sign. Thus ICRC vehicles operating in combat areas are not only marked with distinctive signs that are as large as possible and

¹ Cf. general introduction to the commentary on Annex I; *supra*, p. 1141, and introduction to Chapter II, *supra*, p. 1167.

² Cf. Ph. Eberlin, "Modernization of Protective Markings and Signalling", *op. cit.*, pp. 72-73.

are visible from the front, the back and both sides; they also fly a 100 × 100 cm red cross flag from a vertical mast mounted at the rear.

- 4059** If the distinctive emblem is not displayed on a flat surface, it will not be seen in full at a glance, for part of it will be concealed by ridges or broken angles. One example is the sign displayed astride the summit of a roof which, because it is broken, is not identifiable by an approaching aircraft. It has to be seen from directly above in order to be identified. The same applies to a sign straddling the ridge of a medical tent, which is not fully visible to an observer at ground level and therefore cannot be identified beyond any doubt, even at the relatively small distance of about 200 m.
- 4060** In order to be visible from every possible direction, the distinctive emblem should therefore be displayed on flat surfaces facing these directions, such as the side walls and yard of a building, each slope of a roof, the walls of a medical tent, as well as on angled panels placed near the buildings. Such surfaces can generally receive large markings which are visible from afar. The ICRC uses 5 × 5 m and 10 × 10 m red cross flags with no mast for this purpose.
- 4061** The tests conducted by the ICRC on the visibility of the distinctive emblem displayed on moving vehicles showed that emblems measuring 50 × 50 cm or less were quite inadequate when seen from constantly changing angles. Such emblems become difficult to distinguish at about 250 m. Medical vehicles should display red cross emblems which are as large as possible, depending on the type of vehicle; in other words, they should cover the full height of the bodywork, even if a small part of the sign is distorted or broken by the line of the vehicle.
- 4062** White panels measuring 100 × 100 cm with an 80 × 80 cm distinctive emblem, displayed on the front, rear, sides and roof of a medical vehicle, provide an easy means of identification up to 300 m. On a moving vehicle in clear weather, the visibility of the sign becomes fair to poor at more than 300 m and nil at about 500 m.
- 4063** Various colouring matters were tested in order to assess their effect on the visual range of the emblem; the results of these tests are discussed in the articles published in the *International Review of the Red Cross* on the modernization of protective markings and signalling and the colours of the distinctive emblem.³
- 4064** Phosphorescent paint, which accumulates light falling on it, emits only a small quantity of light in obscurity and is therefore not a great deal of use. Fluorescent paint, which is activated by ultra-violet rays, is very effective, especially at dawn or twilight when ultra-violet radiation in the atmosphere increases for a short time and makes fluorescent colours very bright. A fluorescent red cross on a 100 × 100 cm panel remains visible and identifiable at 200 m until night has completely fallen; it is still visible, although not necessarily identifiable, at 500 m.
- 4065** Like retro-reflective material, fluorescent paint must be used judiciously so as to preserve the contrast between the red sign and its white ground. The same applies to cat's eyes, which are used for marking roads because of their reflective properties. Studies and research still need to be conducted in order to identify the red and white substances which best meet all the requirements of the distinctive

³ Cf. *supra*, Art. 3, footnotes 6 and 2, pp. 1177 and 1174.

sign, namely, visibility from as far away as possible, by day and by night, in bad weather, under infrared observation, or using light amplification glasses and increasingly sophisticated military electro-optic systems.

Paragraph 2

4066 Like military medical and religious personnel, permanent or temporary civilian medical and religious personnel are entitled to wear the distinctive emblem. It is worth mentioning in passing that the ICRC tests demonstrated the ineffectiveness of the armband at a distance:

- the armband which medical personnel are required to wear on the left arm (First Convention, Article 40) cannot be identified at less than 80 m, if the person wearing it is either squatting or seen from the right, the front or behind;
- the prescribed armband, marked with a red cross or crescent about 8 cm in diameter, worn on the left arm and seen from the left, is not identifiable at a distance of more than about 80 m;
- if the protected personnel wear an armband on each arm, they are easier to identify, seen in profile, at a distance of less than 80 m; they are far more difficult to identify from the front and the rear and cannot be distinguished at all at more than 80 m.

4067 Paragraph 2 seeks to remedy the shortcomings of the armband as a means of identification by proposing, subject to the authorization of the competent authority, that military and civilian medical and religious personnel should be provided with additional means of identification restricted to personnel carrying out their humanitarian duties in the combat zone.

4068 As far as possible, therefore, protected personnel are to be supplied with headgear and clothing bearing the distinctive emblem, thus according official status to the practice which had already become common during the Second World War of using white-painted helmets with the distinctive emblem marked on the back, front, sides and top.

4069 Tabards, coats and other white clothing bearing the distinctive sign are also authorized under the above-mentioned conditions.

4070 The necessarily small size of the distinctive emblem on headgear, tabards and other items of clothing limits the distance at which personnel are identifiable. According to the ICRC's tests, these distances are as follows:

- 1) For a tabard made of ordinary material and bearing the sign back and front: at 80 m, identification easy from the front and the rear, difficult from the side; from 80 to 150 m, visibility is only fair, becoming poor at more than 150 m because the red cross is too small.
- 2) The above comments apply to white outer clothing marked back and front with red crosses.
- 3) The comments made in connection with the armband apply also to white helmets marked with red crosses; the latter, which measure about 8 cm, become invisible at 80 m. The white helmet is identifiable by its light colour (immaculate surface) up to about 150 m.

- 4071 The tests showed that a red crescent of the same height as the cross is more difficult to identify because it has a smaller red area.
- 4072 The personnel carrying out their humanitarian duties in the combat zone are best protected by the conclusion of truce agreements enabling the Parties to the conflict to care for the wounded and evacuate them together with the dead. Even in these conditions, medical and religious personnel must be provided with the equipment proposed in paragraph 2, in order to avoid any misapprehension.

Ph. E.

Annex I, Chapter III – Distinctive signals

Introduction

4073 For the purposes of the Protocol, the distinctive signals are defined in sub-paragraph (*m*) of its Article 8 (*Terminology*), as follows:

“distinctive signals’ means any signal or message specified for the identification exclusively of medical units or transports in Chapter III of Annex I to this Protocol.”

4074 It is therefore in this Chapter, which contains Articles 5 to 8, that the distinctive signals are specified. Provision is made for three categories, namely, the light signal, the radio signal and electronic identification.

4075 Article 5 (*Optional use*) supplements the rules relating to the use of distinctive signals set out in paragraphs 2, 5, 6 and 8 of Article 18 (*Identification*) of the Protocol.¹

4076 The problem of the distinctive signals as defined in this Chapter is far from new. With regard to the Geneva Conventions, it arose before and during the Diplomatic Conference of 1949, even though the expression “distinctive signals” was not actually used at that time. Technical signalling and identification systems similar to those recommended in this Chapter were proposed and discussed in 1949, but no specific provisions were produced.

4077 In the military environment which existed at that time, purely visual marking and identification were already proving inadequate in relation to the existing technical means of detecting and locating targets outside the visual range.

Preparations for the Diplomatic Conference

1970-1972

4078 As mentioned earlier, the ICRC called a meeting of experts in 1970 in order to investigate the possibilities of using additional means of identification.²

¹ Cf. commentary Art. 8, sub-para. (*m*), and Art. 18, paras. 2, 5, 6, 8, of the Protocol, *supra*, p. 135 and pp. 226, 230, 232, 234.

² Cf. general introduction to the commentary on Annex I, historical background, *supra*, p. 1149.

- 4079** These consultations were held at ICRC headquarters from 28 to 30 October 1970. Consideration was given to the possibilities of adapting existing technical signalling and identification systems for use by medical aircraft, hospital ships, rescue craft and medical vehicles. The discussions centred round the use of radio, radiocommunications, secondary radar, submarine acoustic signals, light signals and the flashing blue light. It was proposed that the word “Medical” should be used as an international call sign by medical transports as part of their distinctive radio signal and radiocommunications.
- 4080** The views of the experts were submitted to the Conference of Government Experts convened by the ICRC in 1971.³
- 4081** During the general debate held at the beginning of the Conference, several experts stressed how important it was to provide better protection for the wounded, the sick and medical personnel. One expert stated that the Conference should not overlook sea warfare. He advocated regulations for the behaviour of combatants at sea.⁴
- 4082** Participants in the Conference were provided with a detailed list of the issues to be considered, one of which related to protection of the wounded and sick, including matters concerned with the marking and identification of medical transports.⁵ These are set out in Document VII, entitled “Protection of the Wounded and Sick”, of the collection prepared by the ICRC. Document II of the same collection, entitled “Measures Intended to Reinforce the Implementation of the Existing Law”, sets out in Annex XVIII (pp. 040 to 044) a number of measures advocated by the ICRC in connection with the signalling and identification of medical personnel, units and transports, including medical aircraft, hospital ships and rescue craft.
- 4083** As anticipated in the foreword to Document VII, the experts consulted did not draw up any draft rules on signalling and identification:
- “[...] In Part Two, under the heading ‘Safety of Medical Transports’, a field of a highly technical nature, the International Committee of the Red Cross, while not yet prepared to formulate any concrete proposals, presents to the experts the results of its studies to date and the documents it has gathered thanks to the kind co-operation of a number of qualified institutions and persons.”
- 4084** At the close of the Conference, the report of Commission I, set up to examine the protection of wounded and sick, states, in Chapter III and Annex IV, that rules in the field of medical air and sea transport could not yet be formulated. The Commission recommended that a second conference of government experts, which should include qualified technical experts, should cover the whole problem of medical transport and should try to ensure that such transport was equipped with modern means of marking, pinpointing and identification.⁶

³ *CE/1b*, p. 10; pp. 18-19, para. b). *CE/7b*, pp. 39-55.

⁴ *CE 1971, Report*, pp. 22, 26, 28.

⁵ *CE/1b*, pp. 1, 10, 19 (first para.).

⁶ *CE 1971, Report*, pp. 28, 32.

4085 On that basis, the ICRC prepared a technical memorandum containing a questionnaire and commentary on medical marking and identification, which was submitted in January 1972 to the invited governments and international organizations as part of the documentation prepared by the ICRC for the second session of the Conference of Government Experts. The documentation included the draft Additional Protocol to the four Geneva Conventions of 12 August 1949; Article 27, paragraph 2, contained the following reference to Annex I: “2. Apart from the distinctive emblem, medical aircraft may be fitted with a system of signals and identification, in accordance with the Rules attached as an annex to the present Protocol.” Annex I bore the title “Regulations on the Marking and Identification of Medical Aircraft”. It contained no draft rules.

4086 A note indicated that the matter would be studied on the basis of the documentation submitted by the ICRC on the one hand⁷ and a special technical memorandum drawn up by the ICRC on the other.

4087 The leading role played by helicopters in medical evacuation during the conflicts which were taking place while the draft Protocols were being prepared explains the priority accorded to provisions which would provide these new “flying ambulances” with better protection. But other means of medical transport were not neglected either: in its Technical Memorandum, the ICRC considered that the supplementary means of signalling and identification

“should be available for use by all means of medical transport by air, land and water, as well as by medical personnel and units protected according to the terms of the Conventions”.⁸

4088 The Technical Memorandum was used by Commission I as a basis for its work at the second session of the Conference of Government Experts. The Commission set up a Technical Sub-Commission on the marking and identification of medical transports.⁹ The International Telecommunication Union (ITU), the International Maritime Organization (IMO) and the International Electrotechnical Commission (IEC) were represented at the Conference; they had already taken part in the consultation of experts at ICRC headquarters in 1970. The IEC submitted two studies on the following issues:

- *Radar identification*: airborne equipment for generating identification echoes. This study was discussed at the meeting of experts in 1970. Its author, Mr. Karl Emanuelson, engineer at the Research Institute of Swedish National Defence and the Swedish Board of Civil Aviation, and IEC expert, proposed an original solution involving an automatic air-to-ground and air-to-air radar device which did not interfere with anti-aircraft radar surveillance.¹⁰
- *Specific light signals*: after the meeting of experts in 1970, the IEC submitted the questions relating to light signals to both the International Commission on Illumination (CIE) and its own Technical Committee on Lamps, to find out

¹⁰ International Electrotechnical Commission, *IEC, Bulletin*, No. 17, July 1971; CE 1972, *Technical Memorandum*, p. 44, Annex II.

whether those bodies had any comments to make. The commentary prepared by IEC Committee E-1.7, “Fundamentals of Visual Signalling”, was submitted to the Technical Sub-Commission in Annex I to the Technical Memorandum.¹¹

- 4089** In order to assess the visual range of the protective red cross and red crescent sign, the ICRC held tests on the Bière (Switzerland) exercise ground on 25 March 1972. In view of the results obtained, the tests were repeated at Versoix (Geneva) on 6 May 1972 for the experts of the Technical Sub-Commission. The demonstration brought out the limited visual range of the distinctive sign and also showed that it was invisible to infrared observation. This point has already been discussed in connection with Articles 3 (*Shape and nature*) and 4 (*Use*) of this Annex.
- 4090** At the meetings of the Technical Sub-Commission, the replies received by the ICRC to the questionnaire in the Technical Memorandum were transmitted to the experts so that they could be taken into account in the discussions. A number of replies did not reach the ICRC until after the end of the Conference.¹²
- 4091** In its report to Commission I, the Technical Sub-Commission pointed out that it had been asked to concentrate on recommending practical means of improving the signalling and identification of medical aircraft. It had also been required to consider the problem of medical transport on land and at sea. It had no specific proposal to make on the latter two aspects but suggested that additional studies be undertaken, on the one hand by a group having expertise in marine and naval matters and, on the other, by specialists in medical transport on land.¹³
- 4092** An example of the type of additional study to be undertaken is given in Annex III E to the Technical Sub-Commission’s report, which proposes international telecommunication requirements for hospital ships and medical aircraft, and also refers to rescue craft.¹⁴

1973

- 4093** Acting on the Technical Sub-Commission’s suggestion, the ICRC invited thirteen maritime States to send specialists to the meeting of experts on the signalling of sea and land medical transports which it proposed to hold at its headquarters from 5 to 9 February 1973.
- 4094** At both sessions of the Conference, several government experts had recommended that a more thorough study be made of the broad issues involved in expanding the Second Convention so as to improve the situation of the wounded, sick and shipwrecked and provide better protection for medical transports, particularly hospital ships.¹⁵ Accordingly, the ICRC suggested that these matters too should be considered at the proposed meeting, together with

¹⁴ CE 1972, *Report*, Vol. I, pp. 59-60, Annex III E.

¹⁵ See CE 1971, *Report*, p. 22, paras. 31-32; p. 28, para. 90. CE 1972, *Report*, Vol. I, p. 32, para. 1.11; p. 209, para. 5.48.

the possible repercussions of the application of new signalling and identification methods on some of the provisions of the Second Convention.¹⁶

- 4095** This suggestion was well received, but the view was expressed that the vast subject of signalling for sea and land medical transports could not be covered in one week. Nevertheless, the meeting was held as scheduled. The ICRC observed that the experts' views on these matters was required in order to prepare the Additional Protocols and that they would be asked to comment on the broad principles involved, rather than enter into details. Finally, the ICRC suggested that States might wish to send more than one expert to the meeting, so that several groups could work in parallel.
- 4096** Accordingly, the thirty experts present at the opening of the meeting split up into a technical group and a legal-military group. The latter proposed several amendments, most of them editorial, to the texts prepared at the second session of the Conference of Government Experts. The technical group studied draft Annex I to the Protocol and recommended that the States Parties to the Geneva Conventions should conduct the appropriate studies on the use by hospital ships of the following technical methods of identification:
- submarine acoustic signal;
 - light signal (blue light);
 - secondary radar signal;
 - radio signal with call sign "Medical".
- 4097** With regard to land medical transports, the experts recommended:
- that the distinctive emblem should be as large as possible and visible from all directions;
 - that the clothing and headgear worn by medical personnel responsible for evacuations from the combat zone should be marked with the largest possible distinctive emblem;
 - that the light signal (blue light) should be used by medical vehicles;
 - that the radio signal with the call sign "Medical" should be used to indicate the position of medical transports as well as for their radiocommunications.
- 4098** The technical details of these recommendations (proposed frequencies, radio procedures etc.) will be found in the sections of this commentary relating to the articles concerned.
- 4099** At the Plenipotentiary Conference of the International Telecommunication Union (ITU), held at Malaga-Torremolinos (Spain) from 14 September to 26 October 1973, Switzerland as the depositary of the Geneva Conventions submitted a draft recommendation on radiocommunications for hospital ships and medical aircraft, prepared jointly by the ICRC and the Swiss PTT delegation.
- 4100** The text was adopted and incorporated in the new International Telecommunication Convention under the title: "Recommendation No. 2 – Use of Radiocommunications for announcing and identifying Hospital Ships and Medical

¹⁶ In this connection, see the comments in *CE 1972, Report*, Vol. I, pp. 59-60, Annexes III D and III E.

Aircraft protected under the Geneva Conventions of 1949”. It reads as follows:

“The Plenipotentiary Conference of the International Telecommunication Union (Malaga-Torremolinos, 1973),

considering

- a) that it is essential to be able to identify and determine the position of hospital ships and medical aircraft during armed conflict so that they may be spared by the armed forces of the parties to the conflict;
- b) that the use of radiocommunications is necessary, along with other established and recognized methods, for identifying and determining the position of hospital ships at sea and medical aircraft in flight during armed conflict;

recommends that the World Administrative Conferences on Maritime and on Aeronautical Radiocommunications consider the technical aspects of the use of certain international frequencies for the radiocommunications and identification of hospital ships and medical aircraft protected under the Geneva Conventions of 1949.”

Work of the Diplomatic Conference

1974

- 4101** In the draft Protocol submitted by the ICRC to the first session of the Diplomatic Conference, Article 18 (*Identification*) refers to the Annex for the rules relating to distinctive signals besides the distinctive emblem. The fact that the consultations held with government experts had failed to produce suitable technical specifications for medical transports at sea prevented the ICRC from including any specific reference to hospital ships and land-based rescue craft in Chapter III of its draft Annex, which nevertheless was not confined to military aircraft, as the 1972 draft had been, since it contained provisions for the use of the light signal (blue light) by both medical aircraft and vehicles. Provision was also made for the use of radio with the call sign “Medical” by medical transports, secondary radar identification of medical aircraft and the use of international codes by medical transports.¹⁷
- 4102** The Technical Sub-Committee set up by Committee II at the first session of the Diplomatic Conference was open-ended and met eight times between 8 and 21 March 1974. Together with its report, it transmitted a new draft Annex to Committee II, which studied and took note of the text, together with the statements made by the ITU and ICAO representatives.¹⁸ The Chairman of Committee II, introducing his Committee’s report in a plenary meeting of the Conference on 29 March 1974, said that it had not been possible to consider the

¹⁷ O.R. I, Part III, pp. 28-32.

¹⁸ O.R. XIII, pp. 23-51, CDDH/49/Rev.1, paras. 1-73 and Appendices I-III.

new version of the Annex due to lack of time and that governments ought to be consulted on the matter. Accordingly, the adoption of the new draft was deferred until the second session of the Diplomatic Conference.¹⁹

- 4103 Pursuant to Recommendation No. 2 of the International Telecommunication Convention referred to above, the ICRC and the Swiss PTT delegation drew up a draft recommendation which was submitted by the Swiss PTT delegation to the World Maritime Administrative Radio Conference held in Geneva from February to June 1974.
- 4104 The text was adopted and inserted in the Radio Regulations under the title “Recommendation No. Mar2-17 relating to the Use of Radiocommunications for Marking, Identifying, Locating, and Communicating with the Means of Transport protected under the Geneva Conventions of 12 August 1949, concerning the Protection of War Victims and any Additional Instruments of those Conventions, as well as for ensuring the Safety of Ships and Aircraft of States not Parties to an Armed Conflict”.
- 4105 The text of the recommendation is annexed to this commentary (*cf. infra*, p. 1197).

1975

- 4106 The ICRC transmitted the texts of Recommendations Nos. 2 and Mar2-17 to the second session of the Diplomatic Conference.²⁰
- 4107 The Technical Sub-Committee did not meet during the second session of the Diplomatic Conference. On 9 April 1975 Committee II approved the Technical Sub-Committee’s report together with the principles embodied in the new version of Annex I.²¹
- 4108 The Sub-Committee was invited to meet again in 1976, at the third session of the Diplomatic Conference, in order to study the text in detail having regard to the comments made by Committee II at the second session.
- 4109 The statement made by the observer for the ITU at the first session of the Conference, which was annexed to the Technical Sub-Committee’s report and included with it in the report of Committee II, Appendix III, drew attention to the fact that:

“The appropriate means for adopting provisions such as those foreseen in the annex to draft Protocol I concerning a ‘MEDICAL’ call and international designation of frequencies, is by decision of an ITU World Administrative Radio Conference competent to deal with the radio services concerned”.²²

¹⁹ O.R. V, p. 226, CDDH/SR.22, para. 5; see *supra*, footnote 2. O.R. XIII, pp. 49-51, CDDH/49/Rev.1, Appendices II and III.

²⁰ O.R. XI, p. 567, CDDH/II/SR.50, para. 12.

²¹ O.R. XIII, pp. 1, 23-51, CDDH/49/Rev.1, Annex II, Appendices I and III. O.R. XIII, pp. 159-163, CDDH/221/Rev.1, paras. 260-265.

²² O.R. XIII, p. 51, CDDH/49/Rev.1, Appendix III, fourth para.

- 4110** With a view to the resumption of the Technical Sub-Committee's work at the third session in 1976, it was a matter of some urgency that all the delegations to the second session of the Diplomatic Conference be made aware of the competency problem and informed about the applicable rules.
- 4111** Accordingly, in order to avoid any confusion that might be caused by the adoption and implementation of texts that were inconsistent with existing international regulations, the Chairman of the International Frequency Registration Board (IFRB), a permanent organ of the International Telecommunication Union, sent a memorandum to the Diplomatic Conference on 3 April 1975, explaining and justifying the need for national co-ordination of the questions concerning radiocommunications referred to in draft Annex I to Protocol I.²³
- 4112** At the second session of the Diplomatic Conference, the Swiss delegation submitted to Committee II a draft resolution prepared as a follow-up to the IFRB's memorandum. Several delegations co-sponsored the draft, which was adopted by Committee II subject to a few amendments.²⁴
- 4113** In the resolution, Committee II requested the Chairman of the Diplomatic Conference to bring to the attention of the invited governments:
- the need for national co-ordination of the questions concerning radiocommunications raised in Annex I;
 - the need for delegations to include radiocommunication experts, so that the representatives of national telecommunication administrations could participate in the Technical Sub-Committee's work at the third session of the Conference.

In fact, the Technical Sub-Committee was chaired for the entire duration of the Conference by the Swiss PTT representative of the Swiss delegation to the Conference.

1976

- 4114** The Technical Sub-Committee held ten meetings at the third session of the Diplomatic Conference. Its programme of work included:
- revision of the draft Annex it had prepared at the first session of the Conference;²⁵
 - consideration of the new amendments submitted to the Technical Sub-Committee;

- follow-up of the resolution adopted at the second session by Committee II, concerning national co-ordination of the questions relating to radiocommunications raised in the Annex;
 - preparation of draft resolutions relating to Chapter III of the Annex, with a view to the forthcoming World Administrative Radio Conference (WARC) to be held in Geneva in 1979. The agenda of WARC-79 was to be adopted by the Administrative Council of the ITU sometime between 14 June and 2 July 1976, and steps had to be taken to ensure that the radiocommunication questions raised in Annex I were not omitted from it. Accordingly, the resolution adopted by the Diplomatic Conference would have to reach both governments and the ITU in good time.
- 4115 On 11 May 1976, therefore, the Technical Sub-Committee requested the Chairman of Committee II to request the Chairman of the Conference to forward Resolution CDDH/II/363 to the Secretary-General of the ITU for information as soon as it had been adopted by Committee II but before its adoption by the Conference.²⁶ The resolution, entitled “Draft resolution concerning the use of radiocommunications for announcing and identifying medical transports protected by the Geneva Conventions of 1949 or any additional instrument”, was adopted by Committee II by consensus.²⁷
- 4116 On 16 June the Secretary-General of the Diplomatic Conference communicated to governments, the ITU and participants in the Conference the text of the above-mentioned resolution together with Articles 7, 8 and 9 of the Regulations concerning identification approved by Committee II (see Document CDDH/II/389).
- 4117 The Swiss PTT Directorate-General had transmitted the resolution to the IFRB on 28 May, with the request that the text be communicated by circular-letter to all national administrations members of the ITU. This was done on 8 June 1976. Thus, the resolution reached those concerned in time for the ITU discussions concerning the agenda of the 1979 World Administrative Radio Conference (WARC-79).
- 4118 The previous WARC had been held in 1959, the year in which the draft regulations prepared in response to Resolutions 6 and 7 of the Diplomatic Conference of 1949 had been submitted to the ITU.²⁸ In view of the time which had elapsed – ten years from 1949 to 1959 and twenty years from 1959 to 1979 – there was every reason for the Technical Sub-Committee’s impatience to submit the question of medical radiocommunications to the ITU.
- 4119 In his letter of 23 September 1976 to ICAO and IMCO (IMO), the Secretary-General of the Diplomatic Conference explained that the resolutions in question (CDDH/II/392 for ICAO and CDDH/II/390 for IMCO) had been forwarded to those organizations in advance, on 16 June 1976, for study and comment prior to

²⁶ *O.R.* XII, pp. 166-174, CDDH/II/SR.70, paras. 8-62. *O.R.* V, p. 382, CDDH/SR.33, para. 13. *O.R.* XIII, p. 268, CDDH/235/Rev.1, para. 57 (titles of draft Resolutions).

²⁷ *O.R.* XII, pp. 166-167, CDDH/II/SR.70, paras. 8-13. *O.R.* XIII, p. 268, CDDH/235/Rev.1, paras. 57-58; p. 322, Annex III, para. 8.

²⁸ See *supra*, p. 1146.

the last session of the Conference in 1977. The two organizations were informed that the resolutions would be communicated to them officially as soon as they had been adopted by the plenary meeting of the Diplomatic Conference, at the fourth session.

4120 The titles of the two draft resolutions were:

- CDDH/II/392 (CDDH/II/364/Rev.1): “Draft resolution concerning the use of certain electronic and visual means of identification by medical aircraft protected by the Geneva Conventions of 1949 or any additional instrument”;
- CDDH/II/390 (CDDH/II/366/Rev.1): “Draft resolution concerning the use of visual signalling for identification of medical transport protected by the Geneva Conventions of 1949 or any additional instrument”.

4121 The new draft Annex, prepared in 1976 on the basis of the 1974 draft and the amendments submitted, did not yet contain the final version of the regulations concerning the identification and marking of medical personnel, units and transports and of civil defence personnel, *matériel* and transports. In its report to Committee II of 14 May 1976, the Technical Sub-Committee observed that the final adoption of Chapter V (*Civil defence*) would depend on the decisions taken in respect of Article 59 of the draft Protocol. Chapter VI entitled “Periodical revision”, was also being submitted subject to consideration at a later date, since it would have been to be brought in line with other related articles of Protocol I. Together with the new draft Annex, the Technical Sub-Committee submitted the three draft resolutions referred to above and dealing, respectively, with radiocommunications (intended for the ITU), electronic and visual means of identification (intended for ICAO) and visual signals (intended for IMCO (IMO)).²⁹

4122 In the latest version of the Annex, as in its previous versions, the provisions designed to improve signalling and identification of medical aircraft were not accompanied by similar provisions for either medical transports at sea (hospital ships and rescue craft) or medical vehicles. Nevertheless, paragraph 3 of Article 6 (*Light signal*) mentioned the use of the flashing blue light by medical ships and craft, subject to agreement between the Parties to the conflict. The same applied to identification by radar as governed by Article 8 (*Electronic identification*).

4123 Towards the close of the Technical Sub-Committee’s work at the first session of the Conference and during the second session in 1975, several experts had suggested that improvements could be made in the structure of the Annex, for example by dividing Chapter III into three parts relating, respectively, to land, air and sea. The ICRC had rearranged the text along those lines, without making any changes in the substance of the articles discussed at the first session. The “maritime signalling” section contemplated a submarine acoustic identification signal.³⁰

²⁹ O.R. XIII, pp. 245, 247, 266-269, 281, 294-301, 321, CDDH/235/Rev.2, paras. 50-66, Annexes I and III.

³⁰ O.R. XI, p. 569, CDDH/II/SR.50, para. 27.

- 4124 This draft new layout of the Annex was not accepted by the Technical Sub-Committee when the subject was raised early in the 1976 session, for its study would have been time-consuming and subject to deadlines, a course that would have been incompatible with the task assigned to the Technical Sub-Committee.
- 4125 However, medical transports at sea were not excluded from the discussions, particularly in respect of Articles 21 to 25 of the draft Protocol, which were considered at the second session.³¹
- 4126 Attention was drawn to the importance of submarine acoustic signalling and identification when the report of the Technical Sub-Committee was considered.³²
- 4127 It had been suggested by delegates at the second session that further tests should be made during the third session concerning the visibility of the distinctive emblem and the blue light, through observation and infrared photography.³³
- 4128 These tests took place on the evening of 29 April 1976 at Versoix (Geneva), where the ICRC had positioned boards marked with the distinctive emblem and ambulances equipped with their usual blue light. More than 40 experts thus had an opportunity to make observations either with the naked eye or using an infrared device. The results of the tests are commented on under Chapter II (*The distinctive emblem*), Articles 3 (*Shape and nature*) and 4 (*Use*), of Annex I.

1977

- 4129 The Technical Sub-Committee was not scheduled to meet during the fourth and last session of the Diplomatic Conference. As a result of the discussions held by Committee II and its Drafting Committee at that session, some editorial amendments were made to the text of the draft Annex as well as to the resolution addressed to the ITU. Since the latter organization had decided to place the matter on the agenda of WARC-79, an appropriate reference had to be included in the final text of the resolution to be submitted to the plenary meeting of the Diplomatic Conference, together with the texts of the resolutions addressed to ICAO and IMCO (IMO), for adoption and official communication to those organizations.³⁴
- 4130 Through its observer at the fourth session of the Diplomatic Conference, IMCO (IMO) informed Committee II that the resolution on the use of visual signalling had been informally submitted for information to the Sub-Committee on Safety of Navigation of the Maritime Safety Committee of IMCO (IMO). The Secretary-General of IMCO looked forward to formally receiving the resolution upon its adoption by the Diplomatic Conference, so that member States could be invited to take appropriate action.³⁵

RADIO REGULATIONS

Edition of 1976
Volume 2
(extracts)

RECOMMENDATION No. Mar2 – 17

Relating to the Use of Radiocommunications for Marking, Identifying, Locating, and Communicating with the Means of Transport protected under the Geneva Conventions of 12 August 1949, concerning the Protection of War Victims and any Additional Instruments of those Conventions, as well as for ensuring the Safety of Ships and Aircraft of States not Parties to an Armed Conflict

The World Maritime Administrative Radio Conference, Geneva, 1974,

considering

- a)* that it is desirable for the safety of human life to be able to identify and determine the position of the means of transport protected under the Geneva Conventions of 12 August 1949 and any additional instrument of those Conventions;
- b)* that several international Conferences have adopted resolutions on this question, notably the 1949 Geneva Diplomatic Conference for the elaboration of international Conventions for the protection of war victims (Resolution 6) and the International Red Cross Conferences of 1930 (Resolution XVII), 1934 (Resolution XXXII), 1965 (Resolution XXX), 1969 (Resolution XXVII) and 1973 (Resolution XIII);
- c)* that it is desirable to be able to identify and determine the position of neutral ships and aircraft in times of armed conflict;
- d)* that it is for the I.T.U. to fix basic radio regulatory provisions;
- e)* that the Administrative Radio Conference, Geneva, 1959, adopted Recommendation No. 34 relating to the use of radiotelegraph and radiotelephone links by Red Cross organizations;
- f)* that the Plenipotentiary Conference of the International Telecommunication Union, Malaga-Torremolinos, 1973, adopted Recommendation No. 2 relating to the use of radiocommunications for announcing and identifying hospital ships and medical aircraft protected under the Geneva Conventions of 1949, referring technical questions to the competent Administrative Conferences;
- g)* that, to ensure the necessary close coordination, it is desirable to refer the study of problems affecting several services simultaneously to a general World Administrative Radio Conference;

recommends

that the next general World Administrative Radio Conference, planned for 1979, study the technical and administrative aspects of the use of radiocommunications for marking, identifying, locating and communicating with the means of transport protected under the 1949 Geneva Conventions and any additional instruments of those Conventions, and for ensuring the safety of the ships and aircraft of States not parties to an armed conflict.

Protocol I

Annex I, Article 5 – Optional use

1. Subject to the provisions of Article 6 of these Regulations, the signals specified in this Chapter for exclusive use by medical units and transports shall not be used for any other purpose. The use of all signals referred to in this Chapter is optional.
2. Temporary medical aircraft which cannot, either for lack of time or because of their characteristics, be marked with the distinctive emblem, may use the distinctive signals authorized in this Chapter. The best method of effective identification and recognition of medical aircraft is, however, the use of a visual signal, either the distinctive emblem or the light signal specified in Article 6, or both, supplemented by the other signals referred to in articles 7 and 8 of these Regulations.

Commentary**General remarks**

- 4132** The optional use of the distinctive signals described in Articles 6 (*Light signal*), 7 (*Radio signal*) and 8 (*Electronic identification*) of Annex I is established in paragraph 5 of Article 18 (*Identification*) of the Protocol, according to which the Parties to the conflict may authorize the use of such signals, while remaining equally free not to grant such authorization.¹ Furthermore, neither paragraph 5 of Article 18 (*Identification*) of the Protocol nor the present Article 5 calls for reciprocity in the use of distinctive signals. However, paragraphs 1 and 2 of Article 18 (*Identification*) referred to above calls upon the Parties to the conflict to endeavour to ensure that medical units and transports are identifiable by means of the distinctive emblem and distinctive signals.
- 4133** Several hypothetical situations are to be envisaged for the use of the distinctive signals, depending on military requirements, the equipment available to the adversary and other factors:
- 1) The use of distinctive signals is authorized by all the Parties to the conflict. Such authorization may be based on the availability to all the Parties of compatible means of identification for the use of radiocommunications, radar and the flashing blue light. Furthermore, the desire to apply the provisions of the Protocol and the Conventions contributes to the protection of medical units and transports and is therefore a decisive factor.
 - 2) None of the Parties to the conflict authorizes the distinctive signals. Such prohibition may be permanent, temporary, general or confined to a specific region. It will probably be based on military necessity. A permanent or temporary absence or shortage of certain items of radio, radar or light equipment may be one of the reasons for the prohibition; there may be other reasons too.
 - 3) Distinctive signals are authorized by one of the Parties to the conflict whereas the other Party, while recognizing and accepting that fact, decides not to use them itself. The difference in approach may be a question of tactics or expediency.
 - 4) Distinctive signals are authorized by one of the Parties but are not accepted by the other Party as it cannot use or intercept them. There may be different reasons for such opposition, for instance, one of the Parties may not have compatible equipment for receiving or sending distinctive signals.
- 4134** These four hypotheses concerning the optional use of distinctive signals apply to civilian or military, permanent or temporary medical units and transports entitled to use the distinctive emblem and signals. The principal means of transport concerned are medical aircraft, in particular medical helicopters, as well as hospital ships and land-based rescue craft.

¹ Cf. commentary Art. 18 of the Protocol, *supra*, p. 221.

- 4135 Both the Conventions and the Protocol make provision for the notification of flights by medical aircraft,² the use of distinctive signals must be communicated to the adversary at the very latest when such notification is made. Nevertheless, it is highly recommendable that the intention to use such signals be communicated as early as possible to the adverse Party, which should acknowledge such communication and confirm its own intentions with regard to their use. Chapter IV (*Communications*) of the Regulations concerning identification meets communication requirements regarding implementation of the provisions relating to the notification of flights by medical aircraft.
- 4136 The same holds good for the use of distinctive signals by hospital ships and rescue craft. Over and above the related provisions of Articles 6 (*Light signal*) and 8 (*Electronic identification*) of Annex I, the eighth paragraph of Article 43 of the Second Convention authorizes such ships and craft, subject to agreement between the Parties, to use the most modern methods available to facilitate their identification. Such agreements should be concluded at the time of notification under Articles 22 and 27 of the Second Convention.
- 4137 The use of distinctive signals should also be notified to neutral or other States not Parties to the conflict³ whose territory might be overflowed by medical aircraft, in accordance with Article 31 (*Neutral or other States not Parties to the conflict*) of the Protocol.
- 4138 All the above comments apply also to medical helicopters based on board hospital ships, notifications of their flights being transmitted by the latter.
- 4139 The Parties to the conflict may delegate their power to authorize the use of distinctive signals – flashing blue light, radio, radar – to commanding officers on land or at sea, so that these signals may be used by the officers concerned and their personnel to identify medical aircraft, including helicopters, as well as hospital ships and rescue craft. Accordingly, commanding officers should have the means of instructing military personnel affected by distinctive signals and the safety of medical units and transports in the various hypotheses contemplated, so that medical transports enjoy respect and protection in all cases, as required by the Conventions and the Protocol. To this end, Chapter IV (*Communications*) of Annex I contains provisions regarding the communications of medical units and transports – use of international codes, other means of communication, flight plans – which may be particularly valuable in cases where there has not been unanimous consent with regard to the use of distinctive signals.

Paragraph 1

- 4140 The rule in this paragraph which states that, subject to the provisions of Article 6 (*Light signal*), paragraph 3, of Annex I, the distinctive signals are for exclusive

² Cf. commentary Arts. 25, 26, 27 and 29 of the Protocol, *supra*, respectively p. 283, p. 287, p. 293 and p. 307; First Convention, Art. 36, first para.; Second Convention, Art. 39, first para.; introduction to Chapter IV, *infra*, p. 1257.

³ Hereinafter “neutral States”; on the expression “neutral or other States not Parties to the conflict” cf. commentary Art. 2, sub-para. (c), of the Protocol, *supra*, p. 61.

use by medical units and transports, is also set out in Article 18 (*Identification*), paragraph 6, of the Protocol.⁴

- 4141 Since the distinctive signals are means of identification which supplement the visual distinctive emblem, like the latter they are set aside for the exclusive use of medical units and transports. Under Article 38 (*Recognized emblems*) of the Protocol, it is prohibited to make improper use of the distinctive emblem or of distinctive signals.
- 4142 It seems unlikely that improper use would be made of the distinctive signals, for they make it easier to locate and follow the movements of the transports by which they are used. Radiocommunications enable contact to be established with transports transmitting distinctive signals; Article 11 (*Other means of communication*) of Annex I makes provision for other means of communication and Article 13 (*Signals and procedures for the interception of medical aircraft*) sets out the procedure to be followed for intercepting medical aircraft. By removing all incentive to use the distinctive signals improperly, these measures should be conducive to ensuring that they are used exclusively by medical units and transports.
- 4143 The exception constituted by Article 6 (*Light signal*) of Annex I relates only to the use of the flashing blue light. This provision takes into account the widespread use of this light signal as a priority road traffic signal which existed before the adoption of the Protocol, in particular as a means of securing right of way for civilian or military ambulances in peacetime. This point will be further discussed in the commentary on Article 6 (*Light signal*) of Annex I.
- 4144 In making the use of distinctive signals optional, account has been taken of the related material requirements, such as the availability of the technical equipment and skilled operators required for radio and radar systems as well as for the electrical installation of the flashing blue light. The Parties to the conflict may not possess the required material resources or skilled personnel and may therefore be in one of the hypothetical situations described above under the heading “General remarks”.
- 4145 It was in order to cater for such situations that the “standards, practices and procedures” recommended for the signalling and identification of medical aircraft in the report of the Technical Sub-Commission of the 1972 Conference of Government Experts take the form of recommendations rather than compulsory rules.⁵

Paragraph 2

- 4146 Temporary medical aircraft are defined in sub-paragraphs (g), (j) and (k) of Article 8 (*Terminology*) of the Protocol.⁶ Generally speaking, the number of permanent medical aircraft in the armed forces is very small, since they can be

⁴ Cf. commentary Art. 18 of the Protocol, *supra*, p. 232.

⁵ CE 1972, *Report*, Vol. I, pp. 41-42, para. 1.66; pp. 53-54, Annex II; p. 54, para. 5.

⁶ Cf. commentary Art. 8, sub-paras. (g), (j), (k) of the Protocol, *supra*, pp. 130-133.

used for no other purpose and would therefore be grounded for much of the time. When the need arises, therefore, armed or unarmed fighter helicopters may be used to evacuate the wounded, who may also be transported in non-medical aircraft from first-aid centres to hospitals in the rear.⁷ Thus, certain military aircraft used to transport military equipment or parachutists are also fitted out to receive stretchers and to transport wounded in the seated or supine position.

- 4147** Such aircraft are entitled to the protection afforded to medical transports and may therefore display the distinctive emblem and use distinctive signals for the duration of such transport when they transport only wounded and carry no arms other than those allowed under Article 28 (*Restrictions on operations of medical aircraft*), paragraph 3, of the Protocol.
- 4148** Both supplies – paint or self-adhesive materials – and time are required to mark a helicopter or other aircraft with the distinctive emblem.⁸ Some of the members of the Technical Sub-Committee considered that it would be simpler and quicker to replace the red covers of the aircraft's anti-collision lights with blue covers, thus fitting temporary medical aircraft with the distinctive light signal. In the view of these experts, the flashing blue light would entitle the aircraft to use the other distinctive signals, namely, the radar identification code and the radio signal.⁹ We shall revert to this matter under Articles 6 to 8 of Annex I.
- 4149** Paragraph 5 of Article 18 (*Identification*) of the Protocol contains the same rule as the paragraph now under consideration, which authorizes temporary medical aircraft to use only the distinctive signals if, either for lack of time or because of the condition of their fuselage or wing areas, they cannot be marked with the distinctive emblem. There seems to be no reason why the aircraft could not be at least rapidly marked with the emblem, using red and white chalk covered, if necessary, with a waterproof transparent spray, while the anti-collision light covers are being changed or the radar identification code displayed. Red and white spray paint would also make for rapid marking but would be difficult to remove once the temporary medical aircraft had completed its humanitarian mission.
- 4150** The easiest and quickest distinctive signal for a temporary medical aircraft to use is without doubt the radar identification code, in so far as such a code has been allocated to the aeronautical region affected by the conflict; this will probably have been done if permanent medical aircraft are operating in the region concerned. This issue is discussed in the commentary on Article 8 (*Electronic identification*). In addition to the display of a radar identification code, the use of radiocommunications by temporary medical aircraft in accordance with Article 7 (*Radio signal*) of Annex I does not in principle require any special equipment, since all aircraft carrying radio equipment can use one or other of the "urgency" frequencies contemplated in Section II (Medical Transports) of Article 40 of the ITU Radio Regulations. That section was added to the Regulations as a result of Resolution 19 addressed by the Diplomatic Conference to the ITU.

⁷ O.R. XI, p. 168, CDDH/II/SR.18, para. 19.

⁸ Ph. Eberlin, "The Identification of Medical Aircraft in Periods of Armed Conflict", *IRRC*, July-August 1982, p. 202.

⁹ O.R. III, p. 386, CDDH/II/329, para. 2.

- 4151 Medical aircraft are most effectively marked by means of a visual signal within the meaning of this paragraph. However, modern air warfare or anti-aircraft defence methods enable a fighter plane to open fire on another aircraft long before such signs can be distinguished.
- 4152 Accordingly, the practical aspects of using distinctive signals should be studied in advance and the necessary arrangements made in good time, so that all these signals may be brought into use promptly in the event of recourse to temporary medical aircraft.

Ph. E.

Annex I, Article 6 – Light signal

1. The light signal, consisting of a flashing blue light, is established for the use of medical aircraft to signal their identity. No other aircraft shall use this signal. The recommended blue colour is obtained by using, as trichromatic co-ordinates:

green boundary	$y = 0.065 + 0.805x$
white boundary	$y = 0.400 - x$
purple boundary	$x = 0.133 + 0.600y$

The recommended flashing rate of the blue light is between sixty and one hundred flashes per minute.

2. Medical aircraft should be equipped with such lights as may be necessary to make the light signal visible in as many directions as possible.
3. In the absence of a special agreement between the Parties to the conflict reserving the use of flashing blue lights for the identification of medical vehicles and ships and craft, the use of such signals for other vehicles or ships is not prohibited.

Commentary

General remarks

- 4153** Under Article 4, paragraph 2, of the draft regulations relating to medical transport by air in time of armed conflict drawn up in 1965 by the Commission médico-juridique de Monaco, medical aircraft were to be provided “both by day and by night [...] with a fixed system of luminous visual signals”.¹ In this connection, the technical experts consulted by the ICRC late in October 1970 proposed a flashing blue light as the distinctive light signal for medical aircraft. The signal was to be used both by day and by night.
- 4154** As the colour white, red and green were used for navigation lights by all aircraft and vessels, in accordance with international air traffic and maritime navigation regulations, only the colour blue was still available for the distinctive light signal to be used by medical aircraft and other medical transports.
- 4155** The chromatic limits of the blue light, which are set out in a publication of the International Commission on Illumination (CIE)² were communicated to the ICRC in January 1971 by the experts of the International Electrotechnical Commission (IEC) who took part in the 1970 consultation, in a commentary by the competent IEC Committee co-ordinated with the CIE Airborne Lighting Committee.³
- 4156** Flashing or winking light signals are easier to see than fixed lights of equal intensity, as day-to-day experience with road traffic shows. The flashing blue light is a recognized priority signal, set aside under national legislation in many countries as well as in international regulations⁴ for use by ambulances (this term covers both civilian and military ambulances), police vehicles, fire brigade vehicles and possibly other special vehicles.
- 4157** The blue light has also been used for some time by certain harbour, river or lake police craft. However, under the International Code of Signals which entered into force on 1 January 1986, it is allocated to vessels engaged in medical

¹ *CE/7b*, pp. 60-61, Art. 4; pp. 50-52. Cf. E. Evrard, *op. cit.*

³ CIE, Committee E-1.7, Fundamentals of Visual Signalling, in *CE 1972, Technical Memorandum*, p. 41, Annex I.

⁴ United Nations Economic and Social Council, Economic Commission for Europe, Inland Transport Committee, Working Party on Road Transport, consolidated resolution on road traffic (R.E.I.), para. 2.3, Marking of priority vehicles, TRANS/SC 1/294/Rev.3/Amend.1 (1981); *id.*, Group of Experts on the Construction of Vehicles, Regulation “Uniform provisions concerning the approval of warning lamps for motor vehicles”, TRANS/SC 1/WP 29/12, para. 24 and TRANS/SC 1/WP 29/79, para. 82 (entry into force in 1986).

operations, namely, the hospital ships and medical craft protected by the Conventions and the Protocols, as well as rescue craft.⁵

4158 These widespread and long-standing uses of the flashing blue light were not overlooked by the members of the Technical Sub-Commission at the Conference of Government Experts in 1972.⁶ Nevertheless, it was proposed that this light should be used as the distinctive signal of medical aircraft, since it was not already being used for air navigation. The colour blue is used to mark airfield taxiways, but the lights in question are fixed luminous beacons. As far as other means of medical transport are concerned, paragraph 3 of this article leaves the possibility open of reserving the use of this light signal for the identification of such transports in time of armed conflict, by day and by night. Thus Article 6 of Annex I is in line with Article 18 (*Identification*) of the Protocol, which is concerned with medical transports in general.

Paragraph 1

4159 In draft Annex I, Article 8, paragraph 1, the flashing blue light was defined in terms of the frequency of its flashes, namely, between forty and one hundred per minute. Its exclusive use by medical aircraft was not specified.

4160 The ICRC's draft was amended by the Technical Sub-Committee at the first session in 1974; Article 8 became Article 7 and the new text of paragraph 1 referred to the use of the blue light by medical aircraft subject to the provisions of new paragraph 3, which was concerned with the special agreement that might be concluded between the Parties to the conflict regarding the use of the same blue light by other types of medical transport.

4161 Paragraph 1 was recast in its final form by the Technical Sub-Committee at the second session in 1976, when the flashing rate of the blue light was altered and the reference to paragraph 3 deleted.

4162 Under Article 18 (*Identification*), paragraph 8, of the Protocol, the use of distinctive signals is subject to the same supervision as that of the distinctive emblem. Therefore, Article 44 of the First Convention is applicable to distinctive signals, including the flashing blue light used by ambulances or medical helicopters. If authorized by the competent authority, therefore, the flashing blue light could be used by aircraft in peacetime in accordance with Article 44, subject to the relevant ICAO regulations.⁷

4163 The trichromatic co-ordinates given in this paragraph define the boundaries of the blue colour. These boundaries are straight lines separating the blue zone from the other colour zones on the CIE's chromatic diagram, which represents a triangular surface showing the recommended boundaries of the colours used for light signals – red, orange, yellow, green, blue, violet – arranged in contiguous

⁵ IMO, *International Code of Signals*, London, 1985, Chapter XIV.

zones round a white centre (*cf.* document annexed No. 1, p. 1212);⁸ document annexed No. 2 shows the recommended boundaries for the blue and violet signals. For technical reasons, the boundaries on the colour diagram reproduced below as an illustration are only approximate (*cf.* documents annexed Nos. 2 and 3, p. 1213 and p. 1214).

4164 The recommended flashing rate – between sixty and one hundred flashes per minute – is the same as that laid down by ICAO for the anti-collision lights of civilian aircraft. Consequently, luminous signalling by means of the flashing blue light looks very simple in theory. A medical aircraft could seemingly be marked very quickly with a blue light by replacing the red glass covers of the anti-collision lights by blue glass or plastic covers. In practice, however, the operation is more complex, as has been demonstrated by tests conducted using ICRC aircraft. The main difficulties encountered are as follows:

- a) The rotating anti-collision light fittings in civilian and military aircraft are not standardized, varying in size from one plane to another depending on the manufacturer.
- b) The specially manufactured heat-resistant blue glass or plastic domes are not universally available; they have to be ordered and checked for heat-resistance, in view of the large amount of heat energy retained by the colour blue.
- c) The installation on a medical aircraft of blue lights of the same type as those used by road vehicles raises problems of electricity supply and compliance with aeronautical standards. A light of this type fitted under the fuselage of a Piper Cherokee Six aircraft protruded too much and was smashed by stones and lumps of earth when taking off from an improvised runway.
- d) The ICRC has also tested blue lights of the “strobe” type, that is, lights in which electricity is discharged in a gas. Lights of this type fitted to ICRC aircraft were shown to have the following disadvantages:
 - the intensity of the flashes produced may interfere with the piloting of the aircraft or helicopter (reflection on the rotor blades); electromagnetic interference makes it necessary to shield navigational and communication equipment;
 - beyond a few hundred metres, the strobe light loses its blue colour and is seen from the ground as white. Seen from the front, a medical aircraft emitting rapid flashes of blue-white light may look like a military aircraft machine-gunning the ground, the flashing light resembling gunfire. An ICRC Piper Cherokee actually experienced this difficulty; it was fired on by guerrilla fighters who explained later that they had been misled by the flashing strobe light.

4165 A solution therefore has to be worked out with the manufacturers of aeronautical equipment, one of whom has expressed misgivings about the intensity required to distinguish the flashing blue light used by medical aircraft from the flashing blue-white strobe lights more and more commonly used as

⁸ CIE publication No. 2.2 (TC-1.6), 1975, “Colours of Light Signals”, is trilingual (English, French and German); the colours themselves are not reproduced in it, *cf.* documents annexed.

anti-collision lights in addition to the red rotating lights. He claimed that rather more than 1000 watts would be required to produce effective intensity of 100 candelas on a quasi-horizontal plane. Such highly-powered electric flashes raise problems for the aircraft's power supply system.

4166 The ICRC has established regular contacts with both ICAO and manufacturers regarding the technical problems caused by the flashing blue light. ICAO has requested that the following parameters be specified:

- the required intensity of the flashing blue light;
- the required visual range, weather conditions, background;
- the required beamwidth and intensity in the angles of vision above and below the horizontal plane.

4167 The flashing blue light should be tested again using special blue glass covers, and the results communicated to ICAO.

4168 Medical helicopters based on board hospital ships at sea have to be identifiable from greater distances than on land. Experiments at sea have demonstrated that an airborne medical helicopter showing all its navigation and landing lights is visible from a long way off. Here too, studies should continue to be conducted, particularly by the maritime States concerned.⁹ The visual or luminous range of the light, expressed in nautical miles as a function of its intensity in terms of candelas, may be calculated using the formula in Annex I to the Convention on the International Regulations for Preventing Collisions at Sea, 1972 (COLREG 1972).¹⁰

Paragraph 2

4169 According to the type of medical aircraft used, one or more blue lights should be fitted so that the light signal is visible in every direction. If placed on the top of the tail fin, the signal may be omnidirectional but it will not be easily accessible on a large aircraft. In the case of a small aircraft or helicopter, a flashing blue light should be placed both underneath and atop the fuselage. These lights must not interfere with the piloting of the aircraft, either by day or by night.

4170 Additional lights can only be installed on aircraft by firms specializing in aeronautical maintenance (supplies, positioning, power supply, aircraft structure, light casing, wiring, switches).

4171 In the case of permanent military medical aircraft, this operation should be carried out in peacetime unless it is possible to replace the red cover by a blue one in the event of an emergency. In all cases, steps must be taken to ensure that the blue light can be seen at maximum intensity in all directions, a requirement which does not apply to ordinary anti-collision lights meeting ICAO specifi-

⁹ Cf. Ph. Eberlin, "The Identification of Medical Aircraft...", *op. cit.*; *id.*, "Identification of Hospital Ships...", *op. cit.*, pp. 321-323.

¹⁰ IMO, *International Conference on Revision of the International Regulations for Preventing Collisions at Sea, 1972*, London, 1974 ed., reprinted in 1983. In this connection, see also the IEC communication in Annex I to *CE 1972, Technical Memorandum*, p. 41.

cations. Anti-collision lights have to be visible in all directions but their intensity must be variable in relation to the horizontal plane, whereas the intensity of the flashing blue light should be at its highest when seen from all angles, both above and below the horizontal plane.

- 4172 No international regulations concerning the flashing blue light used by civilian medical aircraft have yet been published. When ICAO is in possession of the necessary information on the flashing blue light, it will be able to make proposals to the Air Navigation Commission for the amendment of Annexes 2, 6 and 8 and of the Airworthiness Technical Manual.¹¹ Satisfactory follow-up action will then have been taken in respect of Resolution 17 addressed to ICAO by the Diplomatic Conference.

Paragraph 3

- 4173 The established practice of using the flashing blue light as a priority signal in road traffic and on board certain types of craft prevented the Diplomatic Conference from reserving it for the exclusive use of medical vehicles, hospital ships and coastal rescue craft. For this reason, paragraph 3 provides for a special agreement to be concluded between the Parties to the conflict regarding the use of the flashing blue light by medical vehicles and hospital ships. However, new Chapter XIV of the International Code of Signals which entered into force on 1 January 1986 provides for the use of the flashing blue light by hospital ships, coastal rescue craft and medical aircraft. This provision meets the request addressed by the Diplomatic Conference to the International Maritime Organization in Resolution 18.
- 4174 Paragraph 4.2 of the above-mentioned Chapter XIV stipulates that the visual range of the flashing blue light shall be as high as possible and not less than three nautical miles, in accordance with Annex I to the International Regulations for Preventing Collisions at Sea, 1972.¹² Tests carried out at sea have shown that, ideally, a hospital ship's flashing blue light should be identifiable at a distance of about ten nautical miles. Further research is still required in this connection.¹³
- 4175 The International Life-Boat Conference (ILC) is justifiably concerned about the safety of coastal rescue craft in time of armed conflict. It would like such craft – together with their crews, land-based installations and personnel – to enjoy the same protection as that afforded to hospital ships and their crews. This claim for

¹² Cf. IMO, *International Code of Signals*, Chapter XIV, annexed, *supra*, p. 1170. Cf. footnote 9, *supra*.

¹³ Cf. Ph. Eberlin, "Identification of Hospital Ships...", *op. cit.*, visibility of the blue light at sea, p. 322; blue light similar to those used on police cars, identifiable to the naked eye at a distance of 3 miles and with binoculars at a distance of 7 miles.

protection has been approved by official or officially recognized private maritime rescue organizations; the rescue organizations of the major maritime States belong to the ILC. As far as marking and identification are concerned, new Chapter XIV meets the requirements of the maritime rescue organizations. The flashing blue light is to be used by rescue craft as a distinctive light signal in time of armed conflict; it is also to be used in peacetime so that the shipwrecked and those in distress at sea can see it from afar and know that rescue is at hand.¹⁴

4176 The agreement between the Parties to the conflict reserving the use of the flashing blue light for the identification of medical vehicles, namely, permanent or temporary civilian and military ambulances, should not give rise to any difficulty, since this light signal is already used in peacetime by civilian or military ambulances in many countries.

4177 In periods of armed conflict it is not really in the interest of vehicles which are not protected by the Conventions and their Protocols to attract attention by using any type of coloured light signal at all. Accordingly, any such vehicle using a blue light in peacetime could probably refrain from doing so, in favour of the ambulances.

Documents annexed (*cf. supra*, p. 1208)*CIE chromaticity diagrams*

Document No. 1. Recommended boundaries for light signals

Document No. 2. Recommended boundaries for blue and violet light signals

Document No. 3

Standardized colour table, based on the chromaticity diagram (colour triangle) of the International Commission on Illumination (CIE) and DIN Standard 5033

The colours of luminous sources and surfaces (i.e. paints, colour filters, etc) are arranged clearly on this diagram according to their chromaticity. This arrangement of the colours presupposes a previous measurement of the chromaticity coordinates x and y ; these coordinates in fact determine the colour point of a certain chromaticity. The luminance of light sources or the luminance factor of surface colours are not represented on this diagram. Each point of the chromaticity diagram represents a chromaticity; colours of the same chromaticity differ from each other only through their luminosity.

In the centre of the triangle (exactly at the point $x = 0.333$ and $y = 0.333$) is the achromatic area (white, grey down to black depending on the luminosity). The border is composed of the *spectrum locus* and of the so-called purple boundary; a few wave lengths are indicated along the spectrum locus (in nm). All other colours are situated between the achromatic point and the border line, and all the straight lines originating from the achromatic point have the same hue, with increasing saturation. The chromaticity of an additive mixture of colour stimuli of two components is located, on the colour triangle, always on the straight line connecting the chromaticity of the components; the chromaticity diagram rests on this principle.

Note: This representation of the chromaticity diagram shows only approximately the distribution of the chromaticities. A perfect concordance of the colours of the diagram with the exact chromaticity of definite points cannot be attained because of technical printing reasons (translation from German by M. Dutruit).

Protocol I

Annex I, Article 7 – Radio signal

1. The radio signal shall consist of a radiotelephonic or radiotelegraphic message preceded by a distinctive priority signal to be designated and approved by a World Administrative Radio Conference of the International Telecommunication Union. It shall be transmitted three times before the call sign of the medical transport involved. This message shall be transmitted in English at appropriate intervals on a frequency or frequencies specified pursuant to paragraph 3. The use of the priority signal shall be restricted exclusively to medical units and transports.
2. The radio message preceded by the distinctive priority signal mentioned in paragraph 1 shall convey the following data:
 - (a) call sign of the medical transport;
 - (b) position of the medical transport;
 - (c) number and type of medical transports;
 - (d) intended route;
 - (e) estimated time en route and of departure and arrival, as appropriate;
 - (f) any other information such as flight altitude, radio frequencies guarded, languages and secondary surveillance radar modes and codes.
3. In order to facilitate the communications referred to in paragraphs 1 and 2, as well as the communications referred to in Articles 22, 23, 25, 26, 27, 28, 29, 30 and 31 of the Protocol, the High Contracting Parties, the Parties to a conflict, or one of the Parties to a conflict, acting in agreement or alone, may designate, in accordance with the Table of Frequency Allocations in the Radio Regulations annexed to the International Telecommunication Convention, and publish selected national frequencies to be used by them for such communications. These frequencies shall be notified to the International Telecommunication Union in accordance with procedures to be approved by a World Administrative Radio Conference.

Commentary

General remarks

- 4178** The radio signal provided for in this article is a distinctive signal within the meaning of paragraph (m) of Article 8 (*Terminology*) of the Protocol, and its use is governed by Article 18 (*Identification*) of the Protocol. Furthermore, since the use of radiocommunications is governed by the Radio Regulations of the International Telecommunication Union (ITU), the Diplomatic Conference addressed to the latter organization Resolution 19 requesting that the World Administrative Radio Conference, to be held in Geneva in 1979 (WARC-79), adopt provisions designed to ensure that the vital requirements of communications for protected medical units and transports were adequately provided for in the Radio Regulations.
- 4179** In that connection, it was observed at the third session of the Diplomatic Conference that the text of Chapters III and IV of Annex I were purely tentative and that the ITU, ICAO and IMO had been asked to provide some new practices and procedures for signalling and communications.¹

¹ *O.R. XII*, p. 203, CDDH/II/SR.73, para. 35.

4180 The issue brought to the attention of WARC-79 in Resolution 19 appeared on the agenda of the Conference as item 2.6:

“2.6. to study the technical aspects of the use of radiocommunications for marking, identifying, locating and communicating with the means of medical transport protected under the 1949 Geneva Conventions and any additional instruments of these Conventions.”²

4181 WARC-79 accorded the radiocommunications of medical units and transports the same degree of priority as the urgency and safety transmissions governed by Article 40 of the Radio Regulations. Consideration of item 2.6 of the agenda resulted in the adoption of a new Section II for Article 40, entitled “Medical Transports”, and these transports were also mentioned specifically in the title of the article.

4182 Article 40 as amended was submitted to the World Administrative Radio Conference for the Mobile Services (maritime and aeronautical) convened by the ITU in Geneva in 1983 (WARC Mob-83), which decided to supplement some of the provisions adopted in 1979 in order to facilitate the identification of all the medical transports defined in Section II. The following additions were made:

- No. 3209, paragraph 7 (Mob-83). At the end of the sentence, after “an armed conflict”: “[...] when these ships, craft and aircraft assist the wounded, the sick and the shipwrecked”.
- No. 3219A, paragraph 11A (Mob-83). The identification and location of medical transports at sea may be effected by means of appropriate standard maritime radar transponders.
- No. 3219B, paragraph 11B (Mob-83). The identification and location of aircraft medical transports may be effected by the use of the secondary surveillance radar (SSR) system specified in Annex 10 to the Convention on International Civil Aviation.

4183 Article 40 of the Radio Regulations now comprises three sections, the first two of which meet the essential requirements of the distinctive radio signal set out in this article. It is reproduced in full *infra*, p. 1237.

4184 The optional use of radiocommunications for announcing and identifying medical transports is referred to in No. 3220 of Article 40, which states that, if such radiocommunications are used, the provisions of the Radio Regulations and particularly of Article 40, Section II, and Articles 37 and 38 shall apply. Article 37 contains general provisions relating to distress, safety and urgency communications for stations on board ships or aircraft and for the satellite service. Article 38 contains the rules for using the frequencies available for distress and safety purposes. Both articles are reproduced *infra*, p. 1220 and p. 1223.

4185 In respect of medical aircraft, provisions similar to those of Article 40, Section II, of the Radio Regulations were incorporated by ICAO in Chapter 5,

² O.R. I, Part I, pp. 209-210, Res. 19, para. 1. Cf. Res. 19, *infra*, p. 1519. Prior to its adoption by the Diplomatic Conference in 1977, the text of Resolution 19 had been communicated to the ITU for information at the third session in 1976. See the introduction to Chapter III, “1976”, *supra*, p. 1192.

“Aeronautical Mobile Service”, of Annex 10, Volume II, “Aeronautical Telecommunications”.³ These provisions relating to aeronautical telecommunications are reproduced *infra*, p. 1241.

- 4186** The need to use radiocommunications for announcing and identifying medical transports became apparent during the Second World War. At sea, more than 45 hospital ships and 4 ships chartered by the ICRC were sunk or damaged by acts of war; the absence of effective means of identification was responsible for most of the attacks, both above and under the water. In 1943 a hospital ship attacked by aircraft endeavoured to identify itself by radio. The Malta coast station retransmitted the ship’s message as a general call to all stations (CQ), but the attacking aircraft were unable to receive it. From 1944 onwards, neutral vessels in the Mediterranean signalled their position by transmitting a message every four hours on the distress frequency 500 kHz. In the Atlantic, this message was transmitted once a day. These messages announcing the ship’s position and transmitted on the frequency 500 kHz were prescribed by the belligerents.⁴
- 4187** Section II of Article 40 gives effect to Resolution 19 of the Diplomatic Conference as well as to ITU Recommendations Nos. 2 and Mar2-17.⁵
- 4188** There are other ITU recommendations or resolutions which relate to situations of armed conflict or have a bearing on the work of the International Red Cross, such as:

- *Resolution No. 11*, relating to the use of radiocommunications for ensuring the safety of ships and aircraft of States not parties to an armed conflict – WARC-1979 (this resolution replaces Recommendation No. Mar2-17 of 1974).
- *Resolution No. 18*, relating to the procedure for identifying and announcing the position of ships and aircraft of States not parties to an armed conflict – WARC Mob-83 (this resolution replaces Resolution No. 11 of 1979).
- *Resolution No. 10*, relating to the use of radiotelegraph and radiotelephone links by the Red Cross, Red Crescent and Red Lion and Sun Organizations⁶ – WARC 1979 (this resolution replaces Recommendation No. 34 of 1959).

Resolutions Nos. 10 and 18 are found in Volume 2 of the Radio Regulations; they are annexed to this commentary, *infra*, p. 1243 and p. 1244.

Paragraph 1

- 4189** When the Regulations are brought up to date, all the provisions of this paragraph should be brought into line with Article 40 of the Radio Regulations.

³ ICAO, Annex 10, Vol. II, pp. 66-67, section 5.3.3.4, “Action by an aircraft used for medical transports”.

⁴ Cf. Ph. Eberlin, *Rapport de mer. Navires et marins au service de la Suisse et de la Croix-Rouge pendant la guerre de 1939-1945*, Berne, 1970; *id.*, “La modernisation de la signalisation protectrice et les communications des unités et moyens de transport sanitaires”, in *Studies and Essays in Honour of Jean Pictet, op. cit.*, p. 47, particularly p. 69.

⁵ Cf. introduction to Chapter III, *supra*, p. 1185.

⁶ The red lion and sun emblem has not been used since 1980, cf. commentary Annex I, Art. 1 (a), *supra*, p. 1155.

4190 The radiotelephone or radiotelegraph message is described in Nos. 3212 to 3218 of Section II of Article 40; the priority signal is defined in Nos. 3196 and 3197 of Section I and No. 3210 of Section II. Thus, in radiotelephony, the radio signal transmitted by a medical unit or transport starts with:

PAN PAN PAN PAN PAN PAN MEDICAL

This distinctive priority signal is followed by the message defined in Nos. 3212 to 3218 referred to above.

Paragraph 2

4191 Sub-paragraph (a), which here refers only to the call sign, was supplemented by WARC-79 as follows: “[...] or other recognized means of identification of the medical transport”.

4192 Technological progress in the field of radiocommunications makes it possible to allocate selective call numbers to radio stations on board ships and aircraft. The allocation of individual call numbers is being contemplated, and the radiotelex equipment at some stations already has its own number. Accordingly, the call sign may not be the only internationally recognized distinctive sign of a medical transport.

4193 The text of this paragraph will also have to be brought into line with Article 40 of the Radio Regulations.

Paragraph 3

4194 The frequencies referred to in Section I of this Article 40 are to be used exclusively for urgency and safety transmissions and medical transports. The procedure laid down in Article 40 must be followed for transmission of the radio signal set aside for medical units and transports. Consequently, the entire operative part of this paragraph should be replaced by the procedure set out in Sections I and II of Article 40.

INTERNATIONAL TELECOMMUNICATION UNION

RADIO REGULATIONSEdition of 1982
Revised in 1985
(Extract)**CHAPTER IX****Mob-83****Distress and Safety Communications¹****ARTICLE 37****General Provisions**

- 2930** § 1. The procedure specified in this Chapter is obligatory in the maritime mobile service and for communications between aircraft stations and stations of the maritime mobile service. The provisions of this Chapter are also applicable to the aeronautical mobile service except in the case of special arrangements between the governments concerned.
- 2931** § 2. The procedure specified in this Chapter is obligatory in the maritime mobile-satellite service and for communications between stations on board aircraft and stations of the maritime mobile-satellite service, where this service or stations of this service are specifically mentioned. Nos. **3086, 3090, 3095, 3096, 3097, 3098, 3200, 3203** and **3223** are also applicable.

C.IX
Mob-83

¹ For the purposes of this Chapter, distress and safety communications include distress, urgency and safety calls and messages.

- 2932** § 3. (1) No provision of these Regulations prevents the use by a mobile
Mob-83 station or mobile earth station in distress of any means at its disposal to attract attention, make known its position, and obtain help.
- 2933** (2) No provision of these Regulations prevents the use by stations on
Mob-83 board aircraft or ships engaged in search and rescue operations, in exceptional circumstances, of any means at their disposal to assist a mobile station or mobile earth station in distress.
- 2934** (3) No provision of these Regulations prevents the use by a land
Mob-83 station or coast earth station, in exceptional circumstances, of any means at its disposal to assist a mobile station or mobile earth station in distress (see also No. 959).
- 2934A** § 3A. When special circumstances make it indispensable to do so, an
Mob-83 administration may, as an exception to the methods of working provided for by these Regulations, authorize ship earth stations located at Rescue Coordination Centres² to communicate with other stations of the same category using bands allocated to the maritime mobile-satellite service, for distress and safety purposes only.
- 2935** § 4. In cases of distress, urgency or safety, transmissions;
- 2936** a) by telegraphy, when using Morse, shall not in general exceed
Mob-83 a speed of sixteen words a minute;
- 2937** b) by radiotelephony, shall be made slowly and distinctly, each
word being clearly pronounced to facilitate transcription.
- 2937A** § 4A. Distress, urgency and safety transmissions may also be made,
Mob-83 taking into account Nos. 2944 to 2949, using digital selective calling and satellite techniques in accordance with relevant CCIR Recommendations, and/or direct-printing telegraphy.
- 2938** § 5. The abbreviations and signals of Appendix 14 and the Phonetic
Alphabet and Figure Code in Appendix 24 should be used where applicable and, where language difficulties exist, the use of the International Code of Signals also is recommended.
- 2939** § 6. (1) The International Convention for the Safety of Life at Sea
prescribes which ships and which of their survival craft shall be fitted with radio equipment and which ships shall carry portable radio equipment for use in survival craft. It also prescribes the requirements which shall be complied with by such installations.

2934A.1 ² The term “Rescue Coordination Centre” refers to a facility designated by
Mob-83 a competent national authority to perform rescue coordination functions consistent with the International Convention on Maritime Search and Rescue (1979).

- 2940** (2) The Annexes to the Convention on International Civil Aviation
Mob-83 state which aircraft should be fitted with radio equipment and which aircraft should carry portable survival radio equipment. They state also the requirements which should be complied with by such installations.
- 2941** § 7. The applicable provisions of the present Regulations shall,
however, be observed in the use of all such installations.
- 2942** § 8. Mobile stations³ of the maritime mobile service may communicate,
Mob-83 for safety purposes, with stations of the aeronautical mobile service. Such communications shall be made on the frequencies authorized, and under the conditions specified, in Section I of Article 38 (see also No. 2932).
- 2942A** § 8A. Mobile stations of the aeronautical mobile service may
Mob-83 communicate, for safety purposes, with stations of the maritime mobile service.
- 2943** § 9. Any aircraft required by national or international regulations to
Mob-83 communicate for distress, urgency or safety purposes with stations of the maritime mobile service shall be capable of transmitting preferably class A2A or H2A and receiving preferably class A2A and H2A emissions on the carrier frequency 500 kHz or, on the carrier frequency 2 182 kHz, transmitting class J3E or H3E and receiving class A3E, J3E and H3E emissions⁴, or on the carrier frequency 4 125 kHz, transmitting class J3E and receiving class J3E emissions, or on the frequency 156.8 MHz transmitting and receiving class G3E emissions.
- 2944** § 10. The frequency provisions made in Section I of Article 38 for the
Mob-83 future global maritime distress and safety system (FGMDSS) shall be used in connection with the testing and introduction of this system (see Resolution 321 (Mob-83) and Recommendation 201 (Rev.Mob-83)), and be subject to the provisions of Nos. 2945 to 2949.
- 2945** § 11. Until a future world administrative radio conference has made full
Mob-83 provision for the normal operational use of the future global maritime distress and safety system (FGMDSS):
- 2946** a) all provisions of the Radio Regulations pertaining to the
Mob-83 present distress, urgency and safety communications shall be maintained in force;

2942.1 ³ Mobile stations communicating with the stations of the aeronautical
Mob-83 mobile (R) service in bands allocated to the aeronautical mobile (R) service shall conform to the provisions of the Regulations which relate to that service and, as appropriate, any special arrangements between the governments concerned by which the aeronautical mobile (R) service is regulated.

2943.1 ⁴ As an exception, the requirement to receive class A3E emissions on the
Mob-83 carrier frequency 2 182 kHz may be made optional when permitted by national regulations.

- 2947**
Mob-83 b) particular care shall be taken to ensure that harmful interference is not caused to distress, urgency and safety communications on the established international distress frequencies 500 kHz, 2 182 kHz and 156,8 MHz and on the supplementary distress frequencies 4 125 kHz and 6 215,5 kHz;
- 2948**
Mob-83 c) operators of stations participating in the future global maritime distress and safety system (FGMDSS) for distress, urgency or safety purposes, should recognize that it may be necessary to revert to the other distress, urgency and safety arrangements provided for in these Regulations (see Recommendation **201 (Rev.Mob-83)**);
- 2949**
Mob-83 d) the frequencies identified in Section I of Article **38** for exclusive use for distress and safety calls by digital selective calling may additionally be used for test transmissions only to the extent necessary to facilitate the testing and progressive introduction of that system.
- 2950** NOT allocated.

Document No. 2 (*cf. supra*, p. 1217)

ARTICLE 38

Frequencies for Distress and Safety**Section I. Availability of Frequencies****2967**
Mob-83

A. 490 kHz

2968
Mob-83

§ 0. The frequency 490 kHz is used exclusively for distress and safety calls in the shore-to-ship direction by digital selective calling techniques (see No. **2944**). Additional conditions concerning the use of this frequency are given in Resolution **206 (Mob-83)**.

2969
Mob-83

B. 500 kHz

2970
Mob-83

§ 1. (1) The frequency 500 kHz is the international distress frequency for Morse telegraphy (see also No. **472**); it shall be used for this purpose by ship, aircraft and survival craft stations employing frequencies in the bands between 415 kHz and 535 kHz when requesting assistance from the maritime

services. It shall be used for the distress call and distress traffic, for the urgency signal and urgency messages, for the safety signal and, outside regions of heavy traffic, for short safety messages. When practicable, safety messages shall be transmitted on the working frequency after a preliminary announcement on 500 kHz (see also No. **4236**). For distress and safety purposes, the classes of emission to be used on 500 kHz shall be A2A, A2B, H2A or H2B (see also No. **3042**).

2971 (2) However, ship and aircraft stations which cannot transmit on 500 kHz should use any other available frequency on which attention might be attracted.

2971A *C. 518 kHz*
Mob-83

2971B § 1A. In the maritime mobile service, the frequency 518 kHz is used exclusively for the transmission by coast stations of meteorological and navigational warnings and urgent information to ships, by means of narrow-band direct-printing telegraphy (see No. **2944** and Resolution **318 (Mob-83)**).

2971C *D. 2 174.5 kHz*
Mob-83

2971D § 1B. The frequency 2 174,5 kHz is used exclusively for distress and safety traffic by narrow-band direct-printing telegraphy (see No. **2944**).

2972 *E. 2 182 kHz*
Mob-83

2973 § 2. (1) The carrier frequency 2 182 kHz¹ is an international distress frequency for radiotelephony (see also Nos. **500** and **501**); it shall be used for this purpose by ship, aircraft and survival craft stations and by emergency position-indicating radiobeacons using frequencies in the authorized bands between 1 605 kHz and 4 000 kHz when requesting assistance from the maritime services. It is used for the distress call and distress traffic, for signals of emergency position-indicating radiobeacons, for the urgency signal and urgency messages and for the safety signal. Safety messages shall be transmitted, where practicable, on a working frequency after a preliminary announcement on 2 182 kHz (see No. **2944**). The class of emission to be used for radiotelephony on the frequency 2 182 kHz shall be H3E. Class A3E emission may continue to be used by apparatus provided solely for distress, urgency and safety purposes (see No. **4127**). The class of emission to be used by emergency position-indicating radiobeacons shall be as specified in Appendix **37** (see also No. **3265**). The class of emission J3E may be used for the exchange of distress call using digital selective calling techniques on 2 187.5 kHz taking into account that other shipping in the vicinity may not be able to receive this traffic.

2973.1 ¹ Where administrations provide at their coast stations a watch on 2 182 kHz for receiving class J3E emissions as well as class A3E and H3E emissions, ship stations may communicate with them using class J3E emissions.
Mob-83

2974 (2) If a distress message on the carrier frequency 2 182 kHz has not
Mob-83 been acknowledged, the radiotelephone alarm signal, whenever possible followed by the distress call and message, may be transmitted again on a carrier frequency of 4 125 kHz or 6 215.5 kHz, as appropriate (see Nos. **2982**, **2986** and **3054**).

2975 (3) However, ship and aircraft stations which cannot transmit on the carrier frequency 2 182 kHz or, in accordance with No. **2974**, on the carrier frequencies 4 125 kHz or 6 215.5 kHz, should use any other available frequency on which attention might be attracted.

2976 SUP
Mob-83

2977 (5) Any coast station using the carrier frequency 2 182 kHz for distress purposes shall be able to transmit the radiotelephone alarm signal described in No. **3270** (see also Nos. **3277**, **3278** and **3279**).

2978 (6) Any coast station authorized to send navigational warnings should be able to transmit the navigational warning signal described in Nos. **3284**, **3285** and **3286**.

2978A F. 2 187.5 kHz
Mob-83

2978B § 2A. The frequency 2 187.5 kHz is used exclusively for distress and
Mob-83 safety calls by digital selective calling techniques (see No. **2944**). It may also be used for emergency position-indicating radiobeacons using digital selective calling.

2979 G. 3 023 kHz
Mob-83

2980 § 3. The aeronautical carrier (reference) frequency 3 023 kHz may be
Mob-83 used for intercommunication between mobile stations when they are engaged in coordinated search and rescue operations, and for communication between these stations and participating land stations, in accordance with the provisions of Appendix **27 Aer2** (see Nos. **501** and **505**).

2981 H. 4 125 kHz
Mob-83

2982 § 4. (1) The carrier frequency 4 125 kHz is used to supplement the carrier
Mob-83 frequency 2 182 kHz for distress and safety purposes and for call and reply (see also No. **520**). This frequency is also used for distress and safety traffic by radiotelephony (see No. **2944**).

2982A (2) The carrier frequency 4 125 kHz may be used by aircraft stations
Mob-83 to communicate with stations of the maritime mobile service for distress and safety purposes (see No. **2943**).

2982B
Mob-83

I. 4 177.5 kHz

2982C § 4A. The frequency 4 177.5 kHz is used exclusively for distress and
Mob-83 safety traffic using narrow-band direct-printing telegraphy (see No. **2944**).

2982D
Mob-83

J. 4 188 kHz

2982E § 4B. The frequency 4 188 kHz is used exclusively for distress and safety
Mob-83 calls using digital selective calling techniques (see No. **2944**).

2983
Mob-83

K. 5 680 kHz

2984 § 5. The aeronautical carrier (reference) frequency 5 680 kHz may be
Mob-83 used for intercommunication between mobile stations when they are engaged
in coordinated search and rescue operations, and for communication between
these stations and participating land stations, in accordance with the
provisions of Appendix **27 Aer2** (see also Nos. **501** and **505**).

2985
Mob-83

L. 6 215.5 kHz

2986 § 6. The carrier frequency 6 215.5 kHz is used to supplement the carrier
Mob-83 frequency 2 182 kHz for distress and safety purposes and for call and reply
(see also No. **520**). This frequency is also used for distress and safety traffic
by radiotelephony (see No. **2944**).

2986A
Mob-83

M. 6 268 kHz

2986B § 6A. The frequency 6 268 kHz is used exclusively for distress and safety
Mob-83 traffic using narrow-band direct-printing telegraphy (see No. **2944**).

2986C
Mob-83

N. 6 282 kHz

2986D § 6B. The frequency 6 282 kHz is used exclusively for distress and safety
Mob-83 calls by digital selective calling techniques (see No. **2944**).

2986E
Mob-83

O. 8 257 kHz

2986F § 6C. The carrier frequency 8 257 kHz is used for distress and safety
Mob-83 traffic by radiotelephony (see No. **2944**).

2986G
Mob-83

P. 8 357.5 kHz

2986H § 6D. The frequency 8 357.5 kHz is used exclusively for distress and
Mob-83 safety traffic using narrow-band direct-printing telegraphy (see No. **2944**).

2987
Mob-83

Q. 8 364 kHz

2988 § 7. The frequency 8 364 kHz is designated for use by survival craft
stations if they are equipped to transmit on frequencies in the bands between
4 000 khz and 27 500 kHz and if they desire to establish communications
relating to search and rescue operations with stations of the maritime and
aeronautical mobile services (see also No. **501**).

2988A
Mob-83

R. 8 375 kHz

2988B § 7A. The frequency 8 375 kHz is used exclusively for distress and safety
Mob-83 calls using digital selective calling techniques (see No. **2944**).

2988C
Mob-83

S. 12 392 kHz

2988D § 7B. The carrier frequency 12 392 kHz is used for distress and safety
Mob-83 traffic by radiotelephony (see No. **2944**).

2988E
Mob-83

T. 12 520 kHz

2988F § 7C. The frequency 12 520 kHz is used exclusively for distress and safety
Mob-83 traffic using narrow-band direct-printing telegraphy (see No. **2944**).

2988G
Mob-83

U. 12 563 kHz

2988H § 7D. The frequency 12 563 kHz is used exclusively for distress and
Mob-83 safety calls using digital selective calling techniques (see No. **2944**).

2988I
Mob-83

V. 16 522 kHz

2988J § 7E. The carrier frequency 16 522 kHz is used for distress and safety
Mob-83 traffic by radiotelephony (see No. **2944**).

2988K
Mob-83

W. 16 695 kHz

2988L § 7F. The frequency 16 695 kHz is used exclusively for distress and safety
Mob-83 traffic using narrow-band direct-printing telegraphy (see No. **2944**).

2988M
Mob-83

X. 16 750 kHz

2988N § 7G. The frequency 16 750 kHz is used exclusively for distress and safety
Mob-83 calls using digital selective calling techniques (see No. **2944**).

2989
Mob-83

Y. 121.5 MHz and 123.1 MHz

2990
Mob-83

SUP

2990A § 8. (1A) The aeronautical emergency frequency 121.5 MHz² is used for
Mob-83 the purposes of distress and urgency for radiotelephony by stations of the aeronautical mobile service using frequencies in the band between 117.975 MHz and 136 MHz (137 MHz after 1 January 1990). This frequency may also be used for these purposes in survival craft stations and emergency position-indicating radiobeacons.

2990B
Mob-83

(1B) The aeronautical auxiliary frequency 123.1 MHz, which is auxiliary to the aeronautical emergency 121.5 MHz, is for use by stations of the aeronautical mobile service and by other mobile and land stations engaged in coordinated search and rescue operations (see also No. **593**).

2991
Mob-83

(2) Mobile stations of the maritime mobile service may communicate with stations of the aeronautical mobile service on the aeronautical emergency frequency 121.5 MHz for the purposes of distress and urgency only, and on the aeronautical auxiliary frequency 123.1 MHz for coordinated search and rescue operations, using class A3E emissions for both frequencies (see also Nos. **501** and **593**). They shall then comply with any special arrangements between the governments concerned by which the aeronautical mobile service is regulated.

2992
Mob-83

Z. 156.3 MHz

2993
Mob-83

§ 9. The frequency 156.3 MHz may be used for communication between ship stations and aircraft stations, using G3E emission, engaged in coordinated search and rescue operations. It may also be used by aircraft stations to communicate with ship stations for other safety purposes (see also note g) of Appendix **18**).

2990A.1
Mob-83

² Normally aircraft stations transmit distress and urgency messages on the working frequency in use at the time of the distress or urgency incident.

2993A
Mob-83

AA. 156.525 MHz

2993B § 9A. The frequency 156.525 MHz is used exclusively in the maritime
Mob-83 mobile service for distress and safety calls by digital selective calling techniques (see Nos. **613A** and **2944** and Resolution **317 (Mob-83)**).

2993C
Mob-83

AB. 156.650 MHz

2993D § 9B. The frequency 156.650 MHz is used for ship-to-ship communi-
Mob-83 cations related to the safety of navigation in accordance with note *n*) of Appendix **18** (see No. **2944**).

2993E
Mob-83

AC. 156.8 MHz

2994 § 10. (1) The frequency 156.8 MHz is the international distress, safety and
Mob-83 calling frequency for radiotelephony for stations of the maritime mobile service when they use frequencies in the authorized bands between 156 MHz and 174 MHz (see also Nos. **501** and **613**). It is used for the distress signal, the distress call and distress traffic, as well as for the urgency signal, urgency traffic and the safety signal (see also No. **2995A**). Safety messages shall be transmitted where practicable on a working frequency after a preliminary announcement on 156.8 MHz. The class of emission to be used for radiotelephony on the frequency 156.8 MHz shall be G3E (see No. **2944** and Appendix **19**).

2995 (2) However, ship stations which cannot transmit on 156.8 MHz
should use any other available frequency on which attention might be attracted.

2995A (3) The frequency 156.8 MHz may be used by aircraft stations for
Mob-83 safety purposes only.

2995B
Mob-83

AD. 156.825 MHz

2995C § 10A. The frequency 156.825 MHz is used exclusively in the maritime
Mob-83 mobile service for distress and safety traffic by direct-printing telegraphy (see Nos. **2944**, **3033** and **4393** and note *k*) of Appendix **18**).

2996
Mob-83

AE. 243 MHz

(See Nos. **501** and **642**)

2997 *AF. 406 - 406.1 MHz Band*
Mob-83

2997A § 10B. The frequency band 406 - 406.1 MHz is used exclusively by satellite
Mob-83 emergency position-indicating radiobeacons in the Earth-to-space direction
 (see No. **649**).

2998 *AG. 1 544 - 1 545 MHz Band*
Mob-83

2998A § 10C. Use of the band 1 544 - 1 545 MHz (space-to-Earth) is limited to
Mob-83 distress and safety operations (see No. **728**) including:

2998B a) feeder links of satellites needed to relay the emissions of
Mob-83 satellite emergency position-indicating radiobeacons to earth
 stations;

2998C b) narrow-band (space-to-Earth) links from space stations to
Mob-83 mobile stations.

2998D *AH. 1 645.5 - 1 646.5 MHz Band*
Mob-83

2998E § 10D. Use of the band 1 645.5 - 1 646.5 MHz (Earth-to-space) is limited
Mob-83 to distress and safety operations (see No. **728**).

2999 *AI. Aircraft in Distress*
Mob-83

3000 § 11. Any aircraft in distress shall transmit the distress call on the
 frequency on which watch is kept by the land or mobile stations capable of
 helping it. When the call is intended for stations in the maritime mobile
 service, the provisions of Nos. **2970** and **2971** or **2973** and **2975** or **2994** and
2995 shall be complied with.

3001 *AJ. Survival Craft Stations*
Mob-83

3002 § 12. Equipment provided for use in survival craft stations shall, if
 capable of operating on any frequency:

3003 a) *in the authorized bands between 415 kHz and 526.5 kHz*, be
Mob-83 able to transmit with a carrier frequency of 500 kHz using either
 class A2A and A2B* or H2A and H2B* emissions. If a receiver
 is provided for any of these bands, it shall be able to receive
 class A2A and H2A emissions on a carrier frequency of
 500 kHz;

* This is to cater for the automatic reception of the radiotelegraph alarm
 signal.

- 3004** *b) in the bands between 1 605 kHz and 2 850 kHz*, be able to transmit with a carrier frequency of 2 182 kHz using class A3E or H3E emissions. If a receiver is provided for any of these bands, it shall be able to receive class A3E and H3E emissions on a carrier frequency of 2 182 kHz;
- 3005** *c) in the bands between 4 000 kHz and 27 500 kHz*, be able to transmit with a carrier frequency of 8 364 kHz using class A2A or H2A emissions. If a receiver is provided for any of these bands, it shall be able to receive class A1A, A2A and H2A emissions throughout the band 8 341.75 - 8 728.5 kHz;
- 3006**
Mob-83 *d) in the bands between 117.975 MHz and 136 MHz* (137 MHz after 1 January 1990), be able to transmit on 121.5 MHz, using amplitude modulated emissions. If a receiver is provided for any of these band, it shall be able to receive class A3E emissions on 121.5 MHz;
- 3007** *e) in the bands between 156 MHz and 174 MHz*, be able to transmit on 156.8 MHz using class G3E emissions. If a receiver is provided for any of these bands it shall be able to receive class G3E emissions on 156.8 MHz;
- 3008** *f) in the bands between 235 MHz and 328.6 MHz*, be able to transmit on the frequency 243 MHz.
- 3008A** § 12A. Equipment with digital selective calling facilities provided for use
Mob-83 in survival craft shall, if capable of operating:
- 3008B**
Mob-83 *a) in the bands between 1 605 kHz and 2 850 kHz*, be able to transmit on 2 187.5 kHz;
- 3008C**
Mob-83 *b) in the bands between 4 000 kHz and 27 500 kHz*, be able to transmit on 8 375 kHz;
- 3008D**
Mob-83 *c) in the bands between 156 MHz and 174 MHz*, be able to transmit on 156.525 MHz.

Mob-83

Section II. Protection of Distress and Safety Frequencies

3009

A. General

- 3010**
Mob-83 § 13. Except as provided for in Nos. **2944**, **2949** and **3011**, any emission capable of causing harmful interference to distress, alarm, urgency or safety communications on the international distress frequencies 500 kHz, 2 182 kHz or 156.8 MHz, or on the distress and safety calling frequencies 490 kHz, 2 187.5 KHz, 4 125 kHz, 4 188 kHz, 6 215.5 kHz, 6 282 kHz, 8 375 kHz, 12 563 kHz, 16 750 kHz or 156.525 MHz is prohibited. Any emission causing harmful interference to distress and safety communications on any of the other frequencies identified in Section I of this Article is prohibited.

3011 § 14. (1) Test transmissions shall be kept to a minimum on the frequencies
Mob-83 identified in Section I of this Article and should, wherever practicable, be carried out on artificial antennas or with reduced power.

3012 to 3015 SUP
Mob-83

3016 (2) It is not permitted to transmit complete alarm signals for testing
Mob-83 purposes on any frequency except for essential tests coordinated with component authorities. As an exception such tests are permitted for radiotelephone equipment which can operate only on the international distress frequency 2 182 kHz, in which case a suitable artificial antenna shall be employed.

3016A § 14A.(1) Before transmitting on any of the frequencies identified in Section
Mob-83 I for distress and safety, a station shall listen on the frequency concerned to make sure that no distress transmission is being sent (see No. **4915**).

3016B (2) The provisions of No. **3016A** do not apply to stations in distress.
Mob-83

3017 *B. 500 kHz*

3018 § 15. (1) Apart from the transmissions authorized on 490 kHz and 500 kHz,
Mob-83 and taking account of No. **4226**, all transmissions on the frequencies included between 490 kHz and 510 kHz are forbidden (see No. **471** and Resolution **206 (Mob-83)**).

3019 (2) In order to facilitate the reception of distress calls, other
transmissions on the frequency 500 kHz shall be reduced to a minimum, and in any case shall not exceed one minute.

3020 and 3021 SUP
Mob-83

3022 *C. 2 182 kHz*

3023 § 16. (1) Except for transmissions authorized on the carrier frequency
Mob-83 2 182 kHz and on the frequencies 2 174.5 kHz and 2 187.5 kHz, all transmissions on the frequencies between 2 173.5 kHz and 2 190.5 kHz are forbidden.

3024 and 3025 SUP
Mob-83

3026 (4) To facilitate the reception of distress calls, all transmissions on
2 182 kHz shall be kept to a minimum.

3027 (5) At sea it is not permitted to radiate test transmissions of the
Mob-83 radiotelephone alarm signal on the carrier frequency 2 182 kHz. The function of the generator of the radiotelephone alarm signal shall be checked by aural monitoring without operating a transmitter. The transmitter shall be checked independently. During tests of the radio installation carried out by an administration or on behalf of an administration the radiotelephone

alarm signal device should be checked with a suitable artificial antenna on frequencies other than 2 182 kHz. If the installation is capable of operating only on the frequency 2 182 kHz a suitable artificial antenna should be employed (see No. **3016**).

3028 (6) Before and after the tests performed using an artificial antenna in
Mob-83 accordance with No. **3027**, a suitable announcement should be made on the test frequency that the signals are or were for testing purposes only. The identification of the station should be included in the announcement.

3029 to 3031 SUP
Mob-83

3031A *DA. 121.5 MHz, 123.1 MHz and 243 MHz*
Mob-83

3031B § 17A. On the frequencies 121.5 MHz, 123.1 MHz and 243 MHz
Mob-83 transmissions other than those authorized are forbidden (see Nos. **501**, **593**, **642**, **2990A** and **2990B**).

3032 *E. 156.8 MHz*

3033 § 18. (1) All emissions in the band 156.7625 - 156.8375 MHz capable of
Mob-83 causing harmful interference to the authorized transmissions of stations of the maritime mobile service on 156.8 MHz are forbidden. The frequency 156.825 MHz may, however, be used for the purposes described in No. **2995C** subject to not causing harmful interference to authorized transmissions on 156.8 MHz (see also note *k*) of Appendix **18**).

3034 and 3035 SUP
Mob-83

3036 (4) To facilitate the reception of distress calls all transmissions on
156.8 MHz shall be kept to a minimum and shall not exceed one minute.

Section III. Watch on Distress Frequencies

3037 *A. 500 kHz*

3038 § 19. (1) In order to increase the safety of life at sea and over the sea, all
Mob-83 stations of the maritime mobile service normally keeping watch on frequencies in the authorized bands between 415 kHz and 526.5 kHz shall, during their hours of service, take the necessary measures to ensure watch on the international distress frequency 500 kHz for three minutes twice an hour beginning at *x* h 15 and *x* h 45, Coordinated Universal Time (UTC) by an operator using headphones or loudspeaker.

3039 (2) During the periods mentioned above, except for the emissions
Mob-83 provided for in this Chapter on the frequency 500 kHz:

- 3040**
Mob-83 a) transmissions shall cease in the bands between 485 kHz and 515 kHz (see also Resolution **206 (Mob-83)**);
- 3041** b) outside these bands, transmissions of stations of the mobile service may continue; stations of the maritime mobile service may listen to these transmissions on the express condition that they first ensure watch on the distress frequency as required by No. **3038**.
- 3042**
Mob-83 § 20. (1) Stations of the maritime mobile service open to public correspondence and using frequencies in the authorized bands between 415 kHz and 526.5 kHz shall, during their hours of service, remain on watch on 500 kHz. This watch is obligatory only for class A2A and H2A emissions.
- 3043** (2) These stations, while observing the requirements of No. **3038**, are authorized to relinquish this watch only when they are engaged in communications on other frequencies.
- 3044** (3) When they are engaged in such communications:
- 3045** a) ship stations may maintain this watch on 500 kHz by means of an operator using headphones or a loudspeaker or by some appropriate means such as an automatic alarm receiver:
- 3046** b) coast stations may maintain this watch on 500 kHz by means of an operator using headphones or a loudspeaker; in the latter case an indication may be inserted in the List of Coast Stations.
- 3046A**
Mob-83 (4) Ship stations, while observing the requirements of No. **3038**, are also authorized to relinquish this watch³ when it is impractical to listen by split headphones or by loudspeaker, and by order of the master in order to repair or carry out maintenance required to prevent imminent malfunction of:
- 3946B**
Mob-83 a) equipment for radiocommunication used for safety;
- 3946C**
Mob-83 b) radionavigational equipment;
- 3946D**
Mob-83 c) other electronic navigational equipment.
- 3046E**
Mob-83 (5) Ship stations fitted with an automatic alarm receiver should ensure the equipment is in operation whenever watch is relinquished under the terms of No. **3046A**.

3047*B. 2 182 kHz*

- 3048**
Mob-83 § 21. (1) Coast stations which are open to public correspondence and which form an essential part of the coverage of the area for distress purposes shall, during their hours of service, maintain a watch on 2 182 kHz.

3046A.1
Mob-83 ³ For additional information see the relevant provisions of the International Convention for the Safety of Life at Sea.

3049 (2) These stations shall maintain this watch by means of an operator using some aural method, such as headphones, split headphones or loudspeaker.

3050 (3) In addition, ship stations should keep the maximum watch practicable on the carrier frequency 2 182 kHz for receiving by any appropriate means the radiotelephone alarm signal described in No. **3270** and the navigational warning signal described in Nos. **3284**, **3285** and **3286**, as well as distress, urgency and safety signals.

3051 § 22. Ship stations open to public correspondence should, as far as possible during their hours of service, keep watch on 2 182 kHz.

3052 § 23. In order to increase the safety of life at sea and over the sea, all stations of the maritime mobile service normally keeping watch on frequencies in the authorized bands between 1 605 kHz and 2 850 kHz shall, during their hours of service, and as far as possible, take steps to keep watch on the international distress carrier frequency 2 182 kHz for three minutes twice each hour beginning at x h 00 et x h 30 Coordinated Universal Time (UTC).

3052A § 23A. During the periods referred to in No. **3052** all transmissions, except
Mob-83 those provided for in this Chapter, shall cease in the band 2 173.5 - 2 190.5 kHz.

3053 *C. 4 125 kHz and 6 215.5 kHz*

3054 § 24. (1) In the zone of Region 1 south of latitude 15° N, in Region 2 (except
Mob-83 Greenland) and in the zone of Region 3 south of latitude 25° N, all coast stations which are open to public correspondence and which form an essential part of the coverage of the area for distress purposes may, during their hours of service, maintain a watch on the carrier frequencies 4 125 kHz and/or 6 215.5 kHz (see Nos. **2982** and **2986**). Such watch should be indicated in the List of Coast Stations.

3055 (2) These stations should maintain this watch by means of an operator using some aural method, such as headphones, split headphones or loudspeaker.

3056 *D. 156.8 MHz*

3057 § 25. (1) A coast station providing an international maritime mobile radiotelephone service in the band 156 - 174 MHz and which forms an essential part of the coverage of the area for distress purposes should, during its working hours in that band, maintain an efficient aural watch on 156.8 MHz (see Recommendation **306**).

3058 (2) Ship stations should, where practicable, maintain watch on 156.8 MHz when within the service area of a coast station providing international maritime mobile radiotelephone service in the band 156 - 174 MHz. Ship stations fitted only with VHF radiotelephone equipment operating in the authorized bands between 156 MHz and 174 MHz, should maintain watch on 156.8 MHz when at sea.

3059 (3) Ship stations, when in communication with a port station, may, on an exceptional basis and subject to the agreement of the administration concerned, continue to maintain watch, on the appropriate port operations frequency only, provided that watch on 156.8 MHz is being maintained by the port station.

3060 (4) Ship stations, when in communication with a coast station in the ship movement service and subject to the agreement of the administrations concerned, may continue to maintain watch on the appropriate ship movement service frequency only, provided the watch on 156.8 MHz is being maintained by that coast station.

Document No. 3 (*cf. supra*, p. 1217)

ARTICLE 40

Urgency and Safety Transmissions, and Medical Transports

Section I. Urgency Signal and Messages

3196 § 1. (1) In radiotelegraphy, the urgency signal consists of three repetitions of the group XXX, sent with the letters of each group and the successive groups clearly separated from each other. It shall be transmitted before the call.

3197 (2) In radiotelephony, the urgency signal consists of three repetitions of the group PAN PAN, each word of the group pronounced as the French word “panne”. The urgency signal shall be transmitted before the call.

3198 § 2. (1) The urgency signal shall be sent only on the authority of the master or the person responsible for the ship, aircraft or other vehicle carrying the mobile station or mobile earth station in the maritime mobile-satellite service.

3199 (2) The urgency signal may be transmitted by a land station or an earth station in the maritime mobile-satellite service at specified fixed points only with the approval of the responsible authority.

3200 § 3. (1) The urgency signal indicates that the calling station has a very urgent message to transmit concerning the safety of a ship, aircraft or other vehicle, or the safety of a person.

3201 (2) The urgency signal and message following it shall be sent on one or more of the international distress frequencies 500 kHz, 2 182 kHz, 156.8 MHz, the supplementary distress frequencies 4 125 kHz and 6 215.5 kHz, the aeronautical emergency frequency 121.5 MHz, the frequency 243 MHz or on any other frequency which may be used in case of distress.

3202 (3) However, in the maritime mobile service, the message shall be transmitted on a working frequency:

a) in the case of a long message or a medical call; *or*

b) in areas of heavy traffic in the case of the repetition of a message transmitted in accordance with the provisions laid down in No. **3201**.

An indication to this effect shall be given at the end of the call.

3203 (4) The urgency signal shall have priority over all other communications, except distress. All stations which hear it shall take care not to interfere with the transmission of the message which follows the urgency signal.

3204 (5) In the maritime mobile service, urgency messages may be addressed either to all stations or to a particular station.

- 3205** § 4. Messages preceded by the urgency signal shall, as a general rule, be drawn up in plain language.
- 3206** § 5. (1) Mobile stations which hear the urgency signal shall continue to listen for at least three minutes. At the end of this period, if no urgency message has been heard, a land station should, if possible, be notified of the receipt of the urgency signal. Thereafter, normal working may be resumed.
- 3207** (2) However, land and mobile stations which are in communication on frequencies other than those used for the transmission of the urgency signal and of the call which follows it may continue their normal work without interruption provided the urgency message is not addressed “to all stations” (CQ).
- 3208** § 6. When the urgency signal has been sent before transmitting a message “to all stations” (CQ) which calls for action by the stations receiving the message, the station responsible for its transmission shall cancel it as soon as it knows that action is no longer necessary. This message of cancellation shall likewise be addressed “to all stations” (CQ).

Section II. Medical Transports

- 3209** § 7. The term “medical transports”, as defined in the 1949 Geneva
Mob-83 Conventions and Additional Protocols, refers to any means of transportation by land, water or air, whether military or civilian, permanent or temporary, assigned exclusively to medical transportation and under the control of a competent authority of a party to a conflict or of neutral States and of other States not parties to an armed conflict, when these ships, craft and aircraft assist the wounded, the sick and the shipwrecked.
- 3210** § 8. For the purpose of announcing and identifying medical transports which are protected under the above-mentioned Conventions, a complete transmission of the urgency signals described in Nos. **3196** and **3197** shall be followed by the addition of the single group YYY in radiotelegraphy and by the addition of the single word MAY-DEE-CAL, pronounced as in French “médical”, in radiotelephony.
- 3211** § 9. The frequencies specified in No. **3201** may be used by medical transports for the purpose of self-identification and to establish communications. As soon as practicable, communications shall be transferred to an appropriate working frequency.
- 3212** § 10. The use of the signals described in No. **3210** indicates that the message which follows concerns a protected medical transport. The message shall convey the following data:
- 3213** a) the call sign or other recognized means of identification of the medical transport;
- 3214** b) position of the medical transport;
- 3215** c) number and type of medical transports;

- 3216** *d)* intended route;
- 3217** *e)* estimated time en route and of departure and arrival, as appropriate;
- 3218** *f)* any other information, such as flight altitude, radio frequencies guarded, languages used and secondary surveillance radar modes and codes.
- 3219** § 11. The provisions of Section I of this Article shall apply as appropriate to the use of the urgency signal by medical transports.
- 3219A** § 11A. The identification and location of medical transports at sea may be effected by means of appropriate standard maritime radar transponders.
Mob-83
- 3219B** § 11B. The identification and location of aircraft medical transports may be effected by the use of the secondary surveillance radar (SSR) system specified in Annex 10 to the Convention on International Civil Aviation.
Mob-83
- 3220** §12. The use of radiocommunications for announcing and identifying medical transports is optional; however, if they are used, the provisions of these Regulations and particularly of this Section and of Articles 37 and 38 shall apply.

Section III. Safety Signal and Messages

- 3221** § 13. (1) In radiotelegraphy, the safety signal consists of three repetitions of the group TTT, the individual letters of each group and the successive groups being clearly separated from each other. It shall be sent before the call.
- 3222** (2) In radiotelephony, the safety signal consists of the word SÉCURITÉ pronounced clearly as in French, spoken three times and transmitted before the call.
- 3223** § 14. (1) The safety signal indicates that the station is about to transmit a message containing an important navigational or an important meteorological warning.
- 3224** (2) The safety signal and call shall be sent on one or more of the international distress frequencies (500 kHz, 2 182 kHz, 156.8 MHz) or on any other frequency which may be used in case of distress.
- 3225** (3) The safety message which follows the call should be sent on a working frequency. A suitable announcement to this effect shall be made at the end of the call.
- 3226** (4) In the maritime mobile service, safety messages shall generally be addressed to all stations. In some cases, however, they may be addressed to a particular station.

- 3227** § 15. (1) With the exception of messages transmitted at fixed times, the safety signal, when used in the maritime mobile service, shall be transmitted towards the end of the first available period of silence (see No. **3038** for radiotelegraphy and No. **3052** for radiotelephony); the message shall be transmitted immediately after the period of silence.
- 3228** (2) In the cases prescribed in Nos. **3328**, **3331** and **3335**, the safety signal and the message which follows it shall be transmitted as soon as possible, and shall be repeated at the end of the first period of silence which follows.
- 3229** § 16. All stations hearing the safety signal shall listen to the safety message until they are satisfied that the message is of no concern to them. They shall not make any transmission likely to interfere with the message.
- 3230**
to
3254 NOT attributed.

RECOMMENDED PRACTICES AND
PROCEDURES FOR AIR NAVIGATION SERVICES**

AERONAUTICAL TELECOMMUNICATIONS

ANNEX 10

**TO THE CONVENTION ON
INTERNATIONAL CIVIL AVIATION**

VOLUME II

**(COMMUNICATION PROCEDURES
including those with PANS status)**

FOURTH EDITION OF VOLUME II – APRIL 1985

CHAPTER 5 – Aeronautical Mobile Service (extract)

5.3.3. – Radiotelephony urgency communications

5.3.3.1 Action by the aircraft reporting an urgency condition except as indicated in 5.3.3.4).

5.3.3.1.1. In addition to being preceded by the radiotelephony urgency PAN, PAN (*see* 5.3.1.2), preferably spoken three times and each word of the group pronounced as the French word “panne”, the urgency message to be sent by an aircraft reporting an urgency condition shall:

- a) be on the air-ground frequency in use at the time;
- b) consist of as many as required of the following elements spoken distinctly and, if possible, in the following order:
 - 1) the name of the station addressed;
 - 2) the identification of the aircraft;
 - 3) the nature of the urgency condition;
 - 4) the intention of the person in command;
 - 5) present position, level (i.e. flight level, altitude, etc., as appropriate) and heading;
 - 6) any other useful information.

Note 1. – The foregoing provisions of 5.3.1.1 are not intended to prevent an aircraft broadcasting an urgency message, if time and circumstances make this course preferable.

Note 2. – The station addressed will normally be that station communicating with the aircraft or in whose area of responsibility the aircraft is operating.

5.3.3.2 *Action by the station addressed or first station acknowledging the urgency message*

5.3.3.2.1 The station addressed by an aircraft reporting an urgency condition, or first station acknowledging the urgency message, shall:

- a) acknowledge the urgency message;
- b) take immediate action to ensure that all necessary information is made available, as soon as possible, to:
 - 1) the ATS unit concerned;
 - 2) the aircraft operating agency concerned, or its representative, in accordance with pre-established arrangements;

Note. – The requirement to inform the aircraft operating agency concerned does not have priority over any other action which involves the safety of the flight in distress, or of any other flight in the area, or which might affect the progress of expected flights in the area.

- c) if necessary, exercise control of communications.

5.3.3.3 *Action by all other stations*

5.3.3.3.1 The urgency communications have priority over all other communications, except distress, and all stations shall take care not to interfere with the transmission of urgency traffic.

5.3.3.4 *Action by an aircraft used for medical transports*

5.3.3.4.1 The use of the signal described in 5.3.3.4.2 shall indicate that the message which follows concerns a protected medical transport pursuant to the 1949 Geneva Conventions and Additional Protocols.

5.3.3.4.2 For the purpose of announcing and identifying aircraft used for medical transports, a transmission of the radiotelephony urgency signal PAN, PAN preferably spoken three times, and each word of the group pronounced as the French word “panne”, shall be followed by the radiotelephony signal for medical transports MAY-DEE-CAL, pronounced as in the French “médical”. The use of the signals described above indicates that the message which follows concerns a protected medical transport. The message shall convey the following data:

- a) the call sign or other recognized means of identification of the medical transports;
- b) position of the medical transports;
- c) number and type of medical transports;

- d) intended route;
- e) estimated time en route and of departure and arrival, as appropriate; and
- f) any other information such as flight altitude, radio frequencies guarded, languages used, and secondary surveillance radar modes and codes.

5.3.3.5 *Action by the station addressed or by other stations receiving a medical transports message.*

5.3.3.5.1 The provisions of 5.3.3.2 and 5.3.3.3 shall apply as appropriate to stations receiving a medical transports message.

Document No. 5 (*cf. supra*, p. 1218)

INTERNATIONAL TELECOMMUNICATIONS UNION

RADIO REGULATIONS

Edition of 1982

Revised in 1985

(Extract)

RESOLUTION No. 10

Relating to the Use of Radiotelegraph and Radiotelephone Links by the Red Cross, Red Crescent, and Red Lion and Sun Organizations

The World Administrative Radio Conference, Geneva, 1979,

considering

- a)* that the worldwide relief work of the Red Cross, Red Crescent, and Red Lion and Sun Organizations is of increasing importance and often indispensable;
- b)* that in such circumstances normal communication facilities are frequently overloaded, damaged, completely interrupted or not available;
- c)* that it is necessary to facilitate by all possible measures the reliable intervention of these national and international organizations;

d) that rapid and independent contact is essential to the intervention of these organizations;

e) that for international relief work of the Red Cross, it is necessary that the national Red Cross, Red Crescent, and Red Lion and Sun Organizations be able to communicate with each other as well as with the International Committee of the Red Cross and the League of Red Cross Societies;

decides to urge administrations

1. to take account of the possible needs of the Red Cross, Red Crescent, and Red Lion and Sun Organizations for communication by radio when normal communication facilities are interrupted or not available;

2. to assign to these organizations the minimum number of necessary working frequencies in accordance with the Table of Frequency Allocations; in the case of fixed circuits between 3 MHz and 30 MHz, the frequencies shall be selected, as far as possible, adjacent to the amateur bands;

3. to take all practicable steps to protect such links from harmful interference.

* * *

Document No. 6 (*cf. supra*, p. 1218)

RESOLUTION No. 18 (Mob-83)

Relating to the Procedure for Identifying and Announcing the Position of Ships and Aircraft of States Not Parties to an Armed Conflict

The World Administrative Radio Conference for the Mobile Services, Geneva, 1983,

considering

a) that ships and aircraft encounter considerable risk in the vicinity of an area of armed conflict;

b) that for the safety of life and property it is desirable for ships and aircraft of States not parties to an armed conflict to be able to identify themselves and announce their position in such circumstances;

c) that radiocommunications offers such ships and aircraft a rapid means of self-identification and providing location information prior to their entering areas of armed conflict and during their passage through the areas;

d) that it is considered desirable to provide a supplementary signal and procedure for use, in accordance with customary practice, in the area of armed conflict by ships and aircraft of States representing themselves as not parties to an armed conflict;

resolves

1. that the frequencies specified in No. **3201** of the Radio Regulations may be used by ships and aircraft of States not parties to an armed conflict for self-identification and establishing communications. The transmission will consist of the urgency or safety signals, as appropriate, described in Article **40** followed by the addition of the single group “NNN” in radiotelegraphy and by the addition of the single word “NEUTRAL” pronounced as in French “neutral” in radiotelephony. As soon as practicable, communications shall be transferred to an appropriate working frequency;
2. that the use of the signal as described in the preceding paragraph indicates that the message which follows concerns a ship or aircraft of a State not party to an armed conflict. The message shall convey at least the following data:
 - a) call sign or other recognized means of identification of such ship or aircraft;
 - b) position of such ship or aircraft;
 - c) number and type of such ships or aircraft;
 - d) intended route;
 - e) estimated time en route and of departure and arrival, as appropriate;
 - f) any other information, such as flight altitude, radio frequencies guarded, languages and secondary surveillance radar modes and codes;
3. that the provisions of Sections I and III of Article **40** shall apply as appropriate to the use of the urgency and safety signals, respectively, by such ship or aircraft;
4. that the identification and location of ships of a State not party to an armed conflict may be effected by means of appropriate standard maritime radar transponders. The identification and location of aircraft of a State not party to an armed conflict may be effected by the use of the secondary surveillance radar (SSR) system in accordance with procedures to be recommended by the International Civil Aviation Organization (ICAO);
5. that the use of the signals described above would not confer or imply recognition of any rights or duties of a State not party to an armed conflict or a party to the conflict, except as may be recognized by common agreement between the parties to the conflict and a non-party;
6. to encourage parties to a conflict to enter into such agreements;

request the Secretary-General

to communicate the contents of this Resolution to the International Maritime Organization (IMO) and the International Civil Aviation Organization (ICAO) for such action as they may consider appropriate;

requests the CCIR

to recommend an appropriate signal in the digital selective calling system for use in the maritime mobile service and other appropriate information as necessary.

Annex I, Article 8 – Electronic identification

1. The Secondary Surveillance Radar (SSR) system, as specified in Annex 10 to the Chicago Convention on International Civil Aviation of 7 December 1944, as amended from time to time, may be used to identify and to follow the course of medical aircraft. The SSR mode and code to be reserved for the exclusive use of medical aircraft shall be established by the High Contracting Parties, the Parties to a conflict, or one of the Parties to a conflict, acting in agreement or alone, in accordance with procedures to be recommended by the International Civil Aviation Organization.
2. Parties to a conflict may, by special agreement between them, establish for their use a similar electronic system for the identification of medical vehicles, and medical ships and craft.

Commentary

General remarks

4195 The use of radar to identify medical aircraft was discussed at the meeting of technical experts held at the ICRC in 1970. Two identification systems were studied:

- the secondary surveillance radar (SSR) system used by international civil aviation;
- the radar identification echo transmission system put forward by the International Electrotechnical Commission (IEC).

4196 The experts recommended the secondary radar system, which is more and more commonly used worldwide and is less costly than the identification echo transmission system, although the latter has a number of other advantages.

4197 The Technical Sub-Commission of the 1972 Conference of Government Experts also proposed the use of the secondary surveillance radar (SSR) system; Annex I, Article 11, of the 1973 ICRC draft is entitled “Secondary surveillance radar (SSR) system signal”.¹

4198 At the first session of the Diplomatic Conference, Article 11 was replaced by Article 9, “Secondary radar identification such as IFF/SIF”, as a result of the work of the Technical Sub-Committee which added the initials IFF/SIF to the title of Article 9 in order to make it more specific. The meaning is:

IFF = Identification Friend or Foe

SIF = Selective Identification Features.

4199 The ICAO representative pointed out that these initials were military and could not be applied to civil aviation.²

4200 After revision by the Technical Sub-Committee in 1976, Article 9 became Article 8, “Electronic identification”, with its present text. Article 9 called for codes set aside for the exclusive use of medical aircraft, a requirement which could not be met in either 1974 or 1976 under the secondary surveillance radar (SSR) system. At the third session of the Conference, the Technical Sub-Committee avoided further lengthy discussion on the matter by dropping the

¹ *CE/7b*, pp. 46, 52-54; *CE 1972, Technical Memorandum*, pp. 12-13, 36-39, 44-52 (Annex II); *CE 1972, Report*, Vol. I, p. 53, para. 2.2.2; *Commentary Drafts*, pp. 123-124 (Art. 11).

² *O.R. XIII*, p. 29, CDDH/49/Rev.1, paras. 36, 38.

requirement for exclusive radar codes, replacing the reference to secondary radar in the title by the word “electronic” and deleting the military initials IFF/SIF.

- 4201** Nonetheless, it is with the SSR system and its modes and codes that Article 8 is concerned stipulating that the procedures for obtaining modes and codes for the exclusive use of medical aircraft are to be recommended by ICAO.
- 4202** To this end, Resolution 17 addressed by the Diplomatic Conference to ICAO invites the latter to “establish appropriate procedures for the designation, in case of an international armed conflict, of an exclusive SSR mode and code to be employed by medical aircraft concerned”.³
- 4203** Secondary surveillance radar was developed from the IFF military system used during the Second World War to locate aircraft and ships. The IFF system consists of a primary, interrogator or surveillance radar and a transponder installed on board the aircraft or ship, enabling the latter to be identified when detected by the primary radar. The transponder is the system’s secondary radar.
- 4204** The primary radar, installed on land or on board ship, sweeps the horizon with an electromagnetic pulse stream. When the pulses encounter a “target” – aircraft or ship – an echo is sent back, producing a luminous dot on the primary radar’s display screen and enabling the detected target to be located. At the same time the primary radar’s pulses trigger the target’s transponder, which automatically starts to transmit the allocated identification code at which it has been set. A decoding device connected to the primary radar display reproduces the identification code alongside the luminous dot representing the target.
- 4205** The mode of an IFF or secondary radar system gives the characteristics of the interrogation pulses: amplitude, duration, interval etc. The identification code consists of four digits. Aircraft are identified by means of military SSR modes numbered from 1 to 4 and civilian modes A, B, C and D defined by ICAO.⁴
- 4206** Modes A and 3 are common to civilian and military operations, as is mode C which is used to determine aircraft altitude. Modes A, 3 and C are used for air traffic control.
- 4207** Like the modes, the identification codes are limited in number, so that a code cannot be set aside for the exclusive use of medical aircraft, of which there are relatively few; nevertheless, the matter is still under study by ICAO, which holds the view that the chances of being able to select an exclusive radar code for medical aircraft probably depend on the development of secondary radar modes with greater data processing capacity than the above-mentioned existing ones. At the present time, ICAO is in charge of the procedure for allocating secondary radar codes (Annex 10, Aeronautical Telecommunications, Vol. I, Part I, para. 2.5.4.1).
- 4208** National administrations responsible for air navigation control, in particular air traffic services (ATS), are invited to draw up procedures for the allocation of

³ Cf. Resolution 17 annexed, together with Resolutions 18 and 19, to this commentary, *infra*, p. 1513.

⁴ Cf. Annex 10 to the Convention on International Civil Aviation (Chicago, 7 December 1944), hereinafter referred to as ICAO, Annex 10, Aeronautical Telecommunications, Vol. I, Sections 2.5 and 3.8, Attachment B.

radar codes on a regional basis, in accordance with ICAO. In allocating the codes, account should be taken of regional air navigation arrangements.

- 4209** Radar codes have on occasion been allocated to medical aircraft by arrangement between the Parties to a conflict. In one case, the codes 5000 and 5100 were allocated, respectively, by each of the Parties to the conflict to its own medical aircraft.
- 4210** Under Chapter XIV of the International Code of Signals, the group YYY is used as the distinctive signal for transponders on board hospital ships. In radiotelegraphy, this group is also used as a prefix in the radiocommunications of medical units and transports, pursuant to Article 40, Section II, of the Radio Regulations.

Paragraph 1

- 4211** In international civil aviation the same frequencies are used worldwide for secondary radar pulses:
- 1030 MHz for interrogation transmissions;
 - 1090 MHz for the reply transmission from the transponder.⁵
- 4212** These frequencies are used by civilian aircraft all over the world and to a large extent by military aircraft as well. Some air forces are said to use other frequencies, probably in the band between 700 MHz and 1040 MHz. Since the frequencies used are known, compatible equipment allowing the radar identification code to be displayed on the interrogator screen can be defined. Radar identification of a medical aircraft should therefore give rise to no difficulty wherever military or civilian SSR facilities exist.
- 4213** At the 1972 Conference of Government Experts, this principle was accepted by the Technical Sub-Commission which recommended, for the secondary radar mode and code:
- Mode 3/A;
 - Code: to be agreed upon or specified by the Parties.⁶
- 4214** This procedure is geared to the existing possibilities described by ICAO and outlined in the introduction to this Chapter.
- 4215** The Parties to the conflict should endeavour to prevail upon their national air traffic services (ATS) to allocate a secondary radar identification code for use by their own medical aircraft in the aeronautical region affected by the conflict. This code, together with mode 3/A and the stated intention to use the distinctive signals, should immediately be notified to the other Party; the States not Parties to the conflict (hereinafter called “neutral States”) should also be informed.

⁵ *Ibid.*, paras. 3.8.1.1, 3.8.2.1.

⁶ *CE 1972, Report*, Vol. I, p. 54, para. 2.2.2.1.

Paragraph 2

- 4216** IFF (friend or foe) identification systems have been designed to meet all the identification requirements of friendly land vehicles operating on the battlefield. The possibilities they offer include the following:
- ground-to-ground identification of friendly vehicles;
 - compatibility with the existing ground-to-air system, enabling helicopters and aircraft operating above the battlefield to be identified;
 - location of friends;
 - search for a specific vehicle by means of its code.
- 4217** These equipments operate on frequencies between 1030 MHz and 1090 MHz, which have already been mentioned in connection with the transponders on board aircraft in the secondary radar systems.
- 4218** If the Parties to the conflict wish to use such radar identification systems for their medical units and transports on land, they should state their intention of doing so and notify each other of the radar codes and modes concerned. The agreement they conclude in this connection should specifically mention the region covered, in which exclusive use will be made of the radar identification code allocated to medical units and transport or in other words, land vehicles, ambulances and medical aircraft. This information should also be communicated to the neutral States.
- 4219** At sea, only warships use IFF systems at the present time. The use of radar to identify hospital ships and other vessels (for example, rescue craft) protected by the Conventions and the Protocol would mean that appropriate frequencies, modes and codes would have to be established. International standards governing the use of electromagnetic frequencies for radar identification and tracking in the maritime mobile service are being studied by both the ITU and IMO. The use of shipborne transponders in a secondary radar system for the identification and tracking of civilian vessels is intended to enhance the safety of navigation at sea. The use of radar systems to monitor congested or dangerous areas and the entry to some harbours has paved the way for the studies which are currently being conducted on the standardization of civilian shipborne transponders. To this end, WARC-79 adopted Resolution No. 600 and Recommendation No. 605, relating respectively to the use of frequency bands by, and the technical characteristics of, shipborne transponders.
- 4220** Resolution No. 600 and Recommendation No. 605, together with Recommendation No. 713 (Mob-83) relating to the use of radar transponders for facilitating research and rescue operations at sea are reproduced *infra*, pp. 1252-1255. The action taken with regard to these three texts will be of crucial importance for the ships and craft protected by the Geneva Conventions and Protocol. These issues are to be discussed at the WARC for the mobile services to be held in 1987.
- 4221** The conclusion of the special agreement regarding the use of radar to identify medical ships and craft for which provision is made in paragraph 2 of this article will be facilitated once the related standards and international rules currently under study in the ITU and IMO have been adopted; the agreement in question should also cover life-saving appliances occupied by shipwrecked persons.

INTERNATIONAL TELECOMMUNICATION UNION

RADIO REGULATIONS

Edition of 1982
Revised in 1985
(Extract)

RESOLUTION No. 600**Relating to the Use for the Radionavigation Service
of the Frequency Bands 2 900 - 3 100 MHz, 5 470 - 5 650 MHz,
9 200 - 9 300 MHz, 9 300 - 9 500 MHz and 9 500 - 9 800 MHz**

The World Administrative Radio Conference, Geneva, 1979,

considering

- a)* that this Conference has adopted provisions relating to the development of shipborne transponders in the maritime radionavigation service in frequency bands 2 930 - 2 950 MHz, 5 470 - 5 480 MHz and 9 280 - 9 300 MHz;
- b)* the growing demands already being made on the frequency allocations for the radionavigation service in the bands utilized for aeronautical and maritime radionavigation arising from:
 - i)* the increasing number of shipborne radars which is reinforced by the demands being made for compulsory installation on an international basis;
 - ii)* the increasing need for navigational aids and transponders working with primary radars;
 - iii)* the need for the increasing utilization of this band by stations in the aeronautical radionavigation service noting that compulsory installation on board aircraft is also demanded on an international basis;
- c)* the increase in harmful interference occurring in the 9 300 - 9 500 MHz band due to these factors;
- d)* that these radar applications have important safety considerations;

noting

- a)* Recommendation **605**;
- b)* the conclusions of the Special Preparatory Meeting of the CCIR;

c) the need for additional operational and technical information in deciding the most effective frequency utilization;

resolves

1. that the next competent world administrative radio conference shall:

1.1. review footnotes to these radionavigation bands and make such changes as deemed appropriate in the light of additional studies;

1.2. prepare regulatory recommendations as appropriate;

2. that the CCIR shall continue to consider the technical factors and make Recommendations;

invites

1. *the Administrative Council* to ensure that radionavigation matters of concern to the mobile services are included in the agenda of the next competent mobile conference;

2. *administrations* to study the use of these bands by the radionavigation services and to submit proposals for their efficient utilization;

requests the Secretary-General

to refer this Resolution to the IMCO and ICAO inviting their urgent consideration of the operational requirements for the maritime and aeronautical radionavigation services using these frequency bands, and to make appropriate recommendations to assist administrations in their preparation for the conference.

Document No. 2 (*cf. supra*, p. 1251)

RECOMMENDATION No. 605

Relating to Technical Characteristics and Frequencies for Shipborne Transponders^{1, 2}

The World Administrative Radio Conference, Geneva, 1979,

considering

a) that merchant ships of the world are increasing in size and speed;

b) that every year a significant number of collisions occur involving merchant vessels with resultant loss of life and property and that collisions have a high potential for endangering the natural environment;

¹ A receiver-transmitter which emits a signal automatically when it receives the proper interrogation.

² Replaces Recommendation No. Mar2 – 14 of the World Maritime Administrative Radio Conference, Geneva, 1974.

- c) that there is a need to correlate radar targets with vessels making VHF radiotelephone transmissions;
- d) that studies and experiments have shown that shipborne transponders can enhance and supplement radar target images as compared with normal radar images;
- e) that current studies and experimentation relating to shipborne transponders indicate that development of equipment can be expected in the near future which will offer adequate radar image enhancement and target identification and, possibly, data transfer capabilities;
- f) that such shipborne transponders may require protection from interference;
- g) that the selection of technical characteristics for these transponders should be coordinated with other users of the radio frequency spectrum whose operations might be affected;

request the CCIR

to recommend, after consultation with appropriate international organizations, the most suitable order of frequencies and bandwidth required for this purpose, and the technical parameters to be met by such devices taking into account electromagnetic compatibility with other services having allocations in the same frequency band;

invites administrations and the Inter-Governmental Maritime Consultative Organization (IMCO)

to continue to evaluate the operational benefits which could result from the widespread use of transponders on ships and to consider whether there would be advantage in adopting an internationally approved system for future implementation;

recommends

that, pending further technical and operational developments and evaluation, administrations be prepared at the next competent world administrative radio conference to make the necessary provisions for the use of such devices.

* * *

Document No. 3 (*cf. supra*, p. 1251)

RECOMMENDATION No. 713 (Mob-83)

**Relating to the Use of Radar Transponders for Facilitating
Search and Rescue Operations at Sea**

The World Administrative Radio Conference for the Mobile Services, Geneva, 1983,

considering

- a) that a search and rescue system, composed of shipborne radars operating in the 9 GHz band in combination with radar transponders which respond to radio signals transmitted by the shipborne radar, could be a practicable means of position-finding for a unit in distress at sea;
- b) that this system would make use of radars operating in the 9 GHz band already installed on board ships and aircraft engaged in search and rescue operations and could contribute greatly to search and rescue operations at sea;
- c) that this system would be more effective, if the small-size, light-weight and low-cost radar transponders were in conformity with internationally agreed technical and operating characteristics;
- d) CCIR Questions 28/8 and 45/8, and in particular the studies on homing on emergency position-indicating radiobeacons;

requests the CCIR

to include in its studies on the future global maritime distress and safety system (FGMDSS) the technical and operating characteristics of radar transponders for facilitating search and rescue operations at sea.

recommends administrations

to study this matter and submit contributions to CCIR,

invites the Secretary-General

to bring this Recommendation to the attention of the International Maritime Organization (IMO), the International Association of Lighthouse Authorities (IALA) and the International Civil Aviation Organization (ICAO).

Annex I, Chapter IV – Communications

Introduction

4222 The communications to be exchanged between the Parties to the conflict with regard to medical units and transports are based in particular on the following provisions of the Protocol:

- Article 12 (*Protection of medical units*), paragraph 3: notification of the location of fixed medical units.
 - Article 18 (*Identification*), paragraphs 1 and 2: notification of the use of distinctive signals.
 - Article 22 (*Hospitals ships and coastal rescue craft*), paragraph 3, second sentence: exchange of information regarding the identification of medical craft.
 - Article 23 (*Other medical ships and craft*), paragraph 2, second sentence: hailing; paragraph 4, first sentence: notification of the characteristics and course of a medical ship.
 - Article 25 (*Medical aircraft in areas not controlled by an adverse Party*), second sentence: notification of medical aircraft to the adverse Party.
 - Article 26 (*Medical aircraft in contact or similar zones*), first sentence: prior agreement regarding the operation of medical aircraft.
 - Article 27 (*Medical aircraft in areas controlled by an adverse Party*), paragraph 2, first sentence: requirement for a medical aircraft carrying out a flight to identify itself and inform the adverse Party of any navigational error or emergency.
 - Article 28 (*Restriction on operations of medical aircraft*), paragraph 4: prior agreement concerning the use of medical aircraft to search for the wounded.
 - Article 29 (*Notifications and agreements concerning medical aircraft*), paragraphs 1-5: notification, prior agreement, immediate acknowledgement of receipt, transmission to the units concerned of information concerning the flight plans of medical aircraft.
 - Article 30 (*Landing and inspection of medical aircraft*), paragraphs 1 and 2: order to a medical aircraft to land, acknowledgement of receipt of such an order by the medical aircraft concerned.
 - Article 31 (*Neutral or other States not Parties to the conflict*), paragraphs 1-3: prior agreement regarding the overflight of neutral territory by medical aircraft belonging to a Party to the conflict; requirement for a medical aircraft to give notification of navigational errors and to identify itself if flying over neutral territory without prior agreement; reception and acknowledgement of receipt of an order to land on neutral territory.
-

- 4223 As stated in the preambular part of Resolution 19¹ addressed by the Diplomatic Conference to the ITU, these provisions of the Protocol call for “distinctive” and reliable means of communication. The ITU met the basic radiocommunication requirements of medical units and transports by incorporating new Section II, “Medical Transports”, in Article 40 of the Radio Regulations, which are drawn up by the ITU so as to enable radio operators all over the world to set up efficient communications.
- 4224 The above list of communications affecting medical units and transports is not comprehensive. The fact that Resolution 19 refers to marking, identifying, locating and communicating suggests that a wide range of communications may be involved, in circumstances which are impossible to predict.
- 4225 Satellite radiocommunications should be considered for use by medical units and transports. Two complementary systems are in operation in this area.
- 4226 Since 1982, the International Maritime Satellite Organization (INMARSAT) has been operating a worldwide satellite radiocommunication system, with satellites positioned over the Atlantic, Pacific and Indian Oceans providing almost total world coverage. These satellites are placed on the geostationary orbit some 36,000 kilometres above the equator and their spin rate is equal to the Earth rate, making them stationary in relation to the Earth, of which they always cover the same area. The INMARSAT system enables ships and drilling platforms at sea to benefit from all the communication services: telephone, telex, facsimile, low-, medium-, high- and very high-speed (up to 1 megabit per second)² data transmission, colour television. It is a co-operative, commercial, non-profit-making operation with 50 member countries, including the world’s major maritime nations. Each country takes part in the organization’s decision-making process and contributes to its financing. The system provides an instantaneous, high-standard mobile communication service which will no doubt be extended in the future to other mobile applications such as satellite telecommunications for aeronautical purposes.
- 4227 The COSPAS/SARSAT system³ is designed for the rapid detection of signals transmitted by ships and aircraft in distress. It is a joint international satellite search and rescue project in which Canada, the United States, France and the Soviet Union have been participating since 1982. It is based on the principle of placing several satellites in low (800 to 1,000 km) quasi-polar orbits to monitor distress signals emitted by the emergency position-indicating radiobeacons installed in ships and aircraft; the satellites serve as relays for the retransmission of these distress signals to terrestrial stations which are thus able to determine the exact position of the ship or aircraft and make the necessary rescue arrangements.

¹ Cf. Resolution 19, *infra*, p. 1519.

² bit = either of the two digits 0 or 1 used in binary notation; a unit of information equivalent to the result of a choice between two equally probable alternatives (Webster). Contracted form of “binary digit” (1 octet = 8 bits, 1 megabit = 10⁶ bits).

³ COSPAS = Cosmos Spacecraft (USSR); SARSAT = Search and Rescue Satellite Aided Tracking (USA).

4228 An integrated system of polar (COSPAS/SARSAT type) and geostationary (INMARSAT) satellites would enable all rescue communication and service requirements on land, at sea and in the air to be met worldwide, even in time of armed conflict, since the satellites concerned do not constitute a military objective.

Ph.E.

Protocol I

Annex I, Article 9 – Radiocommunications

The priority signal provided for in Article 7 of these Regulations may precede appropriate radiocommunications by medical units and transports in the application of the procedures carried out under Articles 22, 23, 25, 26, 27, 28, 29, 30 and 31 of the Protocol.

Commentary

- 4229** This article corresponds to Article 10 of the ICRC's draft of Annex I.
- 4230** The use of radiocommunications within the meaning of this article is governed by Article 40, Section II, No. 3220, of the Radio Regulations. Accordingly, its provisions should be brought into line with those of Article 40 when Annex I is revised.¹
- 4231** No. 3220 of Article 40 of the Radio Regulations makes the use of radiocommunications optional, as is the case for all the distinctive signals. Clearly, a hospital ship sailing behind a fleet of warships will not break radio silence by transmitting any of the radio signals provided for in Section II of Article 40, thus revealing the fleet's course. The radiocommunications contemplated in this article will only be used when necessary, at the order of the competent authority.
- 4232** Satellite links in the frequency bands listed in Article 38 of the Radio Regulations may be used for the radiocommunications referred to in Section II of Article 40. The text of Article 38 is annexed to the commentary on Article 7 (*Radio signal*) above.² In cases where high-speed radio-telex or radiotelephony transmissions in clear are used, this fact should be mentioned when the characteristics of the medical transports are notified, particularly where hospital ships are involved.
- 4233** This transmission mode does not use a secret code; in addition, the satellite radiocommunication earth stations installed on board merchant ships are notified to, and recorded by, the ITU. This procedure should enable a certain degree of supervision to be exercised and should remove any ambiguity as to the requirement for a ship fitted with such equipment to communicate in clear if it is converted into a hospital ship. The same would apply to a rescue craft using satellite links.
- 4234** It has been observed that, under Article 34 of the Second Convention, hospital ships may not possess or use a secret code for their wireless or other means of communication. The words "émissions" and "emisiones" are used in the French and Spanish texts respectively. Can it be deduced that hospital ships must not *transmit*, but may *receive*, messages in secret code? Such an interpretation would enable them to receive secret instructions concerning their movements, course and victualling without revealing the intentions, order of battle and victualling or refuelling points and sources of the war fleet at sea.
- 4235** In all likelihood, the drafters of the 1949 Conventions intended to prohibit only the transmission – and not the reception – of secret codes. During the discussions relating to the revision of Hague Convention X and its replacement by the Second Geneva Convention of 1949, the reception of secret codes was not questioned in the proposals which formed the basis for Article 34. Those proposals sought to prohibit the transmission of messages in secret code in order

¹ Cf. commentary Art. 7, Annex I, general remarks, second paragraph and footnote 1, *supra*, p. 1216.

² Cf. commentary Art. 7, Annex I, *supra*, p. 1223.

to avoid a repetition of incidents which had occurred during the First World War.³ This opinion is shared by a number of naval experts.

4236 With regard to the communications of coastal rescue craft, the International Life-Boat Conference (ILC) intends to prepare a handbook for the commanding officers of rescue craft which would deal with the question of radiocommunications in time of armed conflict. The ILC holds the view that this use of radiocommunications should also be covered in Article 40 and that the issue should therefore be submitted to the forthcoming World Administrative Radio Conference for the mobile services in 1987. It is to be proposed that the prefix “rescue craft” be set aside for the exclusive use of rescue craft both in peacetime and during armed conflicts.

4237 The communications contemplated in this article have already proved to be useful both on land and at sea for the conclusion of agreements concerning the establishment of temporary neutralized zones used to exchange the wounded and arrange for the transport of medical equipment in a situation of armed conflict.⁴

Commentary

- 4238** Provision was made for the use of international codes in Article 13 of the ICRC's draft of Annex I, which was adopted by the Conference subject to editorial amendments. The text does not place the Parties to the conflict under any obligation; they may unilaterally authorize the use of such codes or not, as they wish.

- 4239** The international codes published by the ITU, IMO and ICAO are designed to facilitate the communications in respect of which these three organizations issue international regulations. Their purpose is to provide ways and means of communicating when language difficulties exist, in order to enhance the safety of sea and air navigation as well as of life.
- 4240** The ITU Radio Regulations contain a number of codes, abbreviations and signals for use in radiocommunications alongside the compulsory procedures applied in the maritime and aeronautical mobile services. These provisions apply to sea and air medical transports in peacetime and it is advisable that they should be used also in time of armed conflict, subject to the agreement of the competent authority.¹
- 4241** The Q code, which is used by all three organizations for radiocommunications, consists of groups of three letters, the first of which is always Q. The groups are arranged in series, as follows:
- QAA to QNZ = for use in the aeronautical service,
 - QOA to QQZ = for use in the maritime service,
 - QRA to QUZ = for use in all services.
- 4242** The series QAA to QNZ, allocated to the aeronautical radiocommunication service, are not part of the ITU Radio Regulations; they are found in ICAO document 8400/3 under the heading “The Q Code”.²
- 4243** The series QOA to QQZ to be used for radiocommunications in the maritime mobile service are set out, together with their meaning and procedures, in the ITU Radio Regulations, Vol. II, Appendix 14; they are followed by the abbreviations and signals to be used with the Q code.
- 4244** The series QRA to QUZ, which may be used by all services, are found in the Radio Regulations, Vol. II, Appendix 13, followed by the abbreviations and signals to be used with the Q code.
- 4245** Each of the three parts of the Q code comprises series of groups set aside for urgency, distress and search and rescue radiocommunications.
- 4246** It would be advisable to select Q code groups for use by medical units and transports on land and at sea in time of armed conflict, in order to facilitate their communications with the adverse Party in notifying the information required to ensure the safety of their missions.
- 4247** ICAO document 8400/3 referred to above contains all the abbreviations and codes for use in aircraft operation, with the exception of certain abbreviations published in other documents and listed in the foreword to document 8400/3.
- 4248** There would be some advantage in extracting from document 8400/3 all the material that might facilitate the task of medical aircraft in time of armed conflict, in particular as regards co-ordination with medical units and transports on land and at sea.

¹ ITU, *Radio Regulations*, Vol. I, Arts. 52, 53, 63-65; Vol. II, Appendices 13-14, Q code; Appendix 24, Phonetic alphabet.

² ICAO, Document 8400/3, *Procedures for Air Navigation Services, ICAO Abbreviations and Codes*, Montreal.

- 4249** The IMO International Code of Signals may be used by all existing communication media for the transmission of messages: flags, signalling lamps using the Morse code, sound signalling, signalling by arms (semaphore) and radiocommunications. The document comprises fourteen chapters describing the methods and procedures for the transmission of the groups of letters and digits listed in the General Section, the Medical Section and the Appendices. Chapter XIV is entitled “Identification of Medical Transport in Armed Conflict and Permanent Identification of Rescue Craft”.³
- 4250** The General Section of the Code comprises groups of letters and digits for use in distress and emergency situations as well as in search and rescue operations. Appendices 1 and 3 contain distress signals and signals for use during rescue operations.
- 4251** In principle, the International Code of Signals is carried on board all ships. However, it would be useful for the information and provisions meeting the specific needs of hospital ships, coastal rescue craft and other vessels protected by the Convention and Protocol in time of armed conflict to be extracted from the Code and collated for their use.
- 4252** Any extract from an international code must contain a reminder to the effect that the compulsory transmission procedure is to be observed in all circumstances. The increasingly widespread use of radiotelephony does not make the Q code any less valuable, since its groups may be transmitted in spoken form using the spelling table in the Radio Regulations. This facility enables language difficulties to be overcome.

³ French and Spanish language editions are available. *Cf. supra*, p. 1169, note 5 and p. 1170.

Annex I, Article 11 – Other means of communication

When two-way radiocommunication is not possible, the signals provided for in the International Code of Signals adopted by the Inter-Governmental Maritime Consultative Organization or in the appropriate Annex to the Chicago Convention on International Civil Aviation of 7 December 1944, as amended from time to time, may be used.

Commentary

4253 The draft text on other means of communication submitted by the ICRC – Article 12 of draft Annex I – referred to Annex 12 to the Chicago Convention on International Civil Aviation of 7 December 1944. This Annex is entitled “Search and rescue” and it is applicable to the search and rescue services in the territories of Contracting States and on the high seas, and to the co-ordination of such services between States. Chapter 5.10 and Appendix A of Annex 12 provide for aircraft and ships to exchange visual signals for search and rescue purposes and

also refers to two ground-to-air visual signal codes for use by survivors and search parties.

- 4254** Other visual and light signals for search and rescue are given in the ICAO Search and Rescue Manual, Part 2, Chapter 2, “Communications”. They include paulin signals and body signals in the ground-to-air visual signal codes for use by ground search parties and survivors.¹
- 4255** It may be assumed that crews of medical aircraft are familiar with these visual means of communication, which are described in international search and rescue procedures. However, it would be advisable for the personnel of other medical units and transports to receive some training in this area as well, so that, if necessary, visual signals may be used in time of armed conflict, subject to the approval of the competent authority.
- 4256** In order to avoid any differences of interpretation when these visual signals are used in medical evacuation or search and rescue operations, the Parties to the conflict could notify one another of their intention to use such signals, under the agreements concluded in respect of such operations.
- 4257** The methods to be used for sending the visual signals concerned are described in the Search and Rescue Manual, Part 2, Chapter 2, Section 2.3.3:

“2.3.3. Ground-Air Visual Signal Code for Use by Land Parties

2.3.3.1. When a land party wishes to inform an aircraft of the progress of the search and/or rescue, it should use the appropriate symbols described in Figures 2-1 and 2-2.

2.3.3.2. The symbols shown in Figures 2-1 and 2-2A may be made of any available material, e.g., strips of fabric or parachute material, pieces of wood, stones, snow blocks, etc., or by digging shadow-throwing trenches. The symbols should be at least 8 ft (2.5 m) long and provide as much colour contrast as possible with the background. The symbols shown in Figure 2-2B are the so-called paulin or panel signals and are made by folding a paulin, a type of rubber poncho, provided in a life-raft. They are neon-red on one side and non-specular blue on the other (other models are yellow-orange and sea-blue).”

- 4258** Chapter 4 and Appendix A of ICAO Annex 2, “Rules of the Air”, refer to other visual signals used for giving aircraft clearance to approach, land and taxi on aerodromes.
- 4259** Section 3 of Appendix A describes the visual signals used to warn an unauthorized aircraft flying in, or about to enter a restricted, prohibited or danger area. They consist of a series of projectiles discharged from the ground at intervals of ten seconds, each showing, on bursting, red and green lights or stars. They indicate that the aircraft is to take such action as may be necessary to leave the area. These are not the interception signals referred to in Article 13 (*Signals and procedures for the interception of medical aircraft*) below.

¹ ICAO, Doc. 7333-AN/859, *Search and Rescue Manual*, Parts 1 and 2, ICAO, Montreal, 3rd edition, 1970.

4260 The IMO International Code of Signals contains detailed instructions on visual transmission methods:

- *Flag signalling*: the International Code's set of signal flags consists of 26 alphabetical flags, 10 numeral pendants, 3 substitutes and the answering pendant. Messages are always coded using the Code's letter groups.
- *Flashing light and sound signalling*: international Morse symbols are used; they represent letters and numerals and are expressed by dots (short) and dashes (long). Theoretically, a dash is equivalent to three dots. Luminous Morse signals are sent by showing and covering a light. Sound Morse signals consist of long and short blasts produced by a siren, a whistle, a foghorn or any other sound-producing device.
- *Morse signalling by arms*: this method is described in Chapter IX of the Code by means of a table showing how the arms are lifted or stretched to form a dot or a dash. A flag may be held in each hand. Signals may be sent without a flag or using one arm only; this Morse signalling method has replaced the former system of semaphore signalling by arms. If a time count is kept, the message will necessarily conform to the Code's groups. The use of international codes calls for familiarity with the compulsory procedure to be used for each method of transmission. Practice is also necessary in order to achieve a satisfactory visual signalling rate. For example, the standard rate of Morse signalling by flashing light is eight words per minute.

4261 Visual signalling using international codes is the last means of communication left in situations where there are no wire or radio links and a messenger cannot be sent.

Commentary

- 4262** The main advantage of medical helicopters is that they enable the wounded to be evacuated promptly to medical centres which may be situated some distance away. If that advantage is not to be forfeited, the time required for the notification, prior agreement or flight authorization procedure for medical aircraft must be reduced to a minimum. Article 29 (*Notifications and agreements concerning medical aircraft*), paragraph 4, of the Protocol stipulates that the necessary measures shall be taken to ensure that such notifications and agreements can be made rapidly.
- 4263** The flight plan is in itself a flight notification, acknowledgement of which is tantamount to agreement that the flight may take place. This article proposes that existing international procedures should be followed with a view to ensuring that

flight plans submitted by medical aircraft in time of armed conflict are notified and accepted as promptly as possible.

4264 The flight plans of medical aircraft referred to in paragraph 1 of Article 29 (*Notifications and agreements concerning medical aircraft*) of the Protocol contain detailed information enabling the course, time and, in general, operation of flights by medical aircraft to be monitored in accordance with Article 28 (*Restrictions on operations of medical aircraft*) of the Protocol. It was for this reason that Article 4 (Flight plan) was included in Chapter I (Documents) of the ICRC's draft Annex I.¹

4265 It is because the members of the Technical Sub-Committee considered that, for the purposes of Annex I, the article relating to flight plans should be part of the chapter on communications that Article 4 of the draft text became the present Article 12.

4266 The term “flight plan” as it relates to international civil aviation is defined in ICAO Annex 2 (Rules of the Air), Chapter I (Definitions), as follows: “*Flight plan*. Specified information provided to air traffic services units, relative to an intended flight or portion of a flight of an aircraft”. Sub-section 3.3.1, “Flight plans”, of Chapter III (General Rules) of the same Annex contains the following note:

“The term *flight plan* is used to mean variously, full information on all items comprised in the flight plan description, covering the whole route of a flight, or limited information required when the purpose is to obtain a clearance for a minor portion of a flight such as to cross an airway, to take off from, or to land at a controlled aerodrome.”²

4267 The contents of the flight plan are set out in sub-section 3.3.1.2 with the following note: “Note 3. – The term *aerodrome* where used in the flight plan is intended to cover also sites other than aerodromes which may be used by certain types of aircraft, e.g. helicopters or balloons.”

4268 With regards to the aerodrome of departure, Note 1 reads as follows: “For flight plans submitted during flight, the information provided in respect of this item will be an indication of the location from which supplementary information concerning the flight may be obtained, if required.”

4269 Many of the provisions in ICAO Annex 2 and ICAO document 4444-RAC/501/12 concerning flight information and flight plan procedures for civil aircraft also meet the requirements of medical aircraft in time of armed conflict. In order to comply with the notification and prior agreement provisions of the above-mentioned Article 29 (*Notifications and agreements concerning medical aircraft*) of the Protocol,³ the authorities responsible for military air traffic control should, as far as possible, make use of these international flight information procedures.

¹ *Commentary Drafts*, p. 116 (Art. 4).

² ICAO, Annex 2, “Rules of the Air”, Seventh Edition, Amendments Nos. 1-26 (No. 26 effective 21 November 1985), ICAO, Montreal; ICAO Doc. 9110, Vol. II – ICAO Lexicon, p. 46, F.23; Doc. 4444-RAC/501/12, Rules of the Air and Air Traffic Services, pp. 2-6 to 2-16, Appendix 2 and Attachment B.

³ Cf. commentary Arts. 25-30 and 31, *supra*, p. 283 and p. 325.

Thus flight plan and prior agreement instructions and forms could be drawn up in peacetime for use by medical aircraft operating in time of armed conflict.

- 4270 The contents of the radio signal referred to in Article 7 (*Radio Signal*), paragraph 2, of Annex I correspond to the information contained in a simplified international flight plan for use by medical aircraft. The use of Q code groups could be contemplated for some of the items.
- 4271 ICRC aircraft carrying out medical missions in areas of armed conflict have used the ICAO flight plan to notify their flights to Parties to the conflict. In some cases, the acknowledgement received at the aerodrome of departure has laid down a time and a course, called the “cease fire channel” and valid for 15 minutes at certain points of the route. This channel could be maintained or modified every 15 minutes by the control tower in communication with the aircraft. The simplified flight plan for medical helicopters based on hospital ships should be submitted by the latter unless other arrangements have been made by the competent naval authorities.
- 4272 A specimen simplified flight plan is given below for information (*cf. infra*, p. 1276).
- 4273 All means of radiocommunication referred to above under Articles 7 to 11 may be used to transmit flight plans to the adverse Party’s medical units and transports or to a station designated by the Parties to the conflict. Satellite links may also be used for radiocommunication with hospital ships or other vessels equipped with earth stations.
- 4274 The INMARSAT and COSPAS/SARSAT satellite systems offer reliable and fast long-distance radio links, not only for search and rescue operations which might involve medical aircraft but also for the transmission of other data relating to flights by medical aircraft. Both these international organizations will be affected by the outcome of the work under way in IMO, the ITU and ICAO concerning the future global maritime distress and safety system (FGMDSS),⁴ which will provide enhanced opportunities for search and rescue as well as for the provision of more effective assistance to the shipwrecked.

Annex I, Article 13 – Signals and procedures for the interception of medical aircraft

If an intercepting aircraft is used to verify the identity of a medical aircraft in flight or to require it to land in accordance with Articles 30 and 31 of the Protocol, the standard visual and radio interception procedures prescribed by Annex 2 to the Chicago Convention on International Civil Aviation of 7 December 1944, as amended from time to time, should be used by the intercepting and the medical aircraft.

Other references

Article 13 is a new article which was proposed by the ICRC to the Technical Sub-Committee at the third session of the Conference.

Commentary

- 4275** Following serious incidents in the air involving civil and military aircraft, the International Federation of Air Line Pilots Associations (IFALPA) at its March 1973 meeting in Tokyo noted that the visual signals for the interception of civil aircraft laid down by ICAO in Annex 2, "Rules of the Air", Section 3.4 and Appendix A, were inadequate.
- 4276** The view held by IFALPA was that pilots, who were constantly flying over national frontiers, were not able to keep themselves fully informed about the visual signals and procedures for interception described by ICAO and the modifications which might be adopted by some States in that respect. Those

purely visual interception procedures disregarded the main method of communicating with an aircraft, namely, radiotelephony.

4277 The Federation requested ICAO and national aeronautical authorities to study ways and means of standardizing visual signals and also to consider procedures involving the use of radiotelephony in cases where civil aircraft had to be identified or intercepted. In particular, it proposed the following:

- that flight plans informing the authorities about the operations of aircraft should be closely co-ordinated between military aeronautical units and civil air traffic control;
- that, given the hazardous nature of the operation, civil aircraft should only be intercepted in case of absolute necessity and when other means have failed;
- that a civil aircraft which has to be identified in spite of the information provided in the flight plan should first be contacted by radio. Only if the radio connection cannot be set up should physical air-to-air or ground-to-air interception involving visual methods be attempted;
- that interception should under no circumstances entail opening fire on a civil aircraft.

4278 In June 1973, together with its proposals, the Federation transmitted to ICAO a draft set of interception procedures which were supplemented and improved in October. At that juncture the ICRC approached the Federation with a view to investigating the possibility of using the proposed procedures for the interception of medical aircraft in time of armed conflict. However, it was too late at that stage to include any provisions on that matter in draft Annex I to the Protocol.

4279 The issue was nevertheless discussed at the first session of the Diplomatic Conference by the Technical Sub-Committee, which was given information about the ICRC's contacts with IFALPA and ICAO.¹ The text of Article 13 was adopted by the Technical Sub-Committee and Committee II at the third session of the Diplomatic Conference in 1976.

4280 All the ICAO provisions and special recommendations relating to the interception of civil aircraft were consolidated in a single document, the Manual concerning Interception of Civil Aircraft, published by ICAO in 1984,² the contents of which are drawn from a number of ICAO annexes and procedures. The foreword contains the following request:

“[...] Contracting States are requested to ensure that the material in this manual is brought to the attention of all civil and military administrative or operational personnel who may be concerned with the development and/or application of national practices and procedures relating to the identification and interception of civil aircraft.”

¹ O.R. XIII, p. 31, CDDH/49/Rev.1, para. 52.

² ICAO, Doc. 9433-AN/926, *Manual concerning Interception of Civil Aircraft*, ICAO, Montreal (with Amendment No. 1 of 19.3.1985).

- 4281 The manual is an excellent source of information for military authorities required to monitor medical aircraft operations in time of armed conflict. The provisions proposed for the interception of civil aircraft should therefore be studied with a view to making advance arrangements for their application in a situation of armed conflict. Full particulars are given about the radio frequencies to be used, radar code display, message transmission, etc. The table of contents of the manual, reproduced *infra*, p. 1282, gives some indication of the scope of the provisions required should it prove essential to intercept medical aircraft.
- 4282 Chapter 2, “Elimination or reduction of the need for interception”, to mention only one example, would need to be studied specifically from the standpoint of medical aircraft missions in time of armed conflict, in the cases contemplated in Articles 25 to 29 and 31 of the Protocol.
- 4283 The recommendations and instructions contained in the manual should also be adapted for use in the case of flights by medical aircraft based on hospital ships. The aircraft concerned are medical helicopters used for medical missions in naval, air and sea or amphibious operations. The bases for co-ordination between the navy and the air traffic services military authorities should be established in peacetime.
- 4284 This article contemplates action by an intercepting aircraft pursuant to Articles 30 (*Landing and inspection of medical aircraft*) and 31 (*Neutral or other States not Parties to the conflict*) of the Protocol. Those two articles, while recognizing that medical aircraft may be ordered to land, give no indication as to how this order should be given. It may be issued either from the ground or by a warship.
- 4285 In such cases too, the interception procedures described in the manual should be used in order to avoid hazardous undertakings such as opening fire in the direction of medical aircraft, which are entitled to respect and protection and should therefore not be threatened by fire when ordered to land.³
- 4286 If for any reason the Parties to the conflict are not able to comply with the procedures set out in the ICAO manual for the elimination or reduction of the need for interception and for application of the ICAO radio and visual interception procedures, they should notify one another of the situation and provide information on the substitute procedures they intend to use.
- 4287 The present Article 13 might usefully be brought up to date when the Annex is revised, by including a reference to both the ICAO manual and ground-to-air interception. The question whether the safety of medical aircraft over both land and sea would be enhanced by more detailed provisions concerning interception during armed conflicts would have to be given very careful thought.

Ph. E.

³ On 10 May 1984 the ICAO Assembly decided unanimously to supplement the Convention by an Article 3*bis* which embodies the principle, already recognized in international law, of non-recourse to the use of arms against civil aircraft.

Annex I, Chapter V – Civil defence

Introduction

- 4288 Paragraph 1 of each of the two articles in the present Chapter mentions Article 66 (*Identification*) of the Protocol, which refers to an identity card for civilian civil defence personnel (paragraph 3) and an international distinctive sign of civil defence (paragraph 4) for the protection of civil defence organizations, their personnel, buildings and *matériel* and for civilian shelters.
- 4289 The same civil defence identity card and international distinctive sign are also to be used for the identification of military personnel assigned to civil defence units, pursuant to paragraph 1 (c) of Article 67 (*Members of the armed forces and military units assigned to civil defence organizations*) of the Protocol.
- 4290 The civil defence identity card and distinctive sign appear in the documents submitted by the ICRC to the 1971 Conference of Government Experts, as part of the proposals for strengthening the guarantees afforded by international humanitarian law to non-military civil defence organizations.¹
- 4291 Those proposals were considered by the Conference's Commission III, which recommended in its report that uniform markings be internationally adopted, laid down in the regulations and used as a protective distinctive sign² reserved for permanent or temporary civil defence personnel.
- 4292 No conclusion was reached concerning the nature of the international sign of civil defence at the second session of the Conference of Government Experts, during which an *ad hoc* working group studied the matter and issued general guidelines.³ The ICRC was requested to carry out the necessary studies with a view to proposing an appropriate distinctive sign for civil defence.⁴ As to the identity card, it was proposed that the permanent personnel of civil defence organizations should be recognizable by an identity card attesting to the capacity of the holder, bearing his photograph, and embossed with the stamp of the responsible authority.⁵ A model identity card was not proposed. In response to the wish expressed at the second session of the Conference of Government Experts, the ICRC arranged for a small group of experts to meet in January 1973

¹ *CE/3b*, pp. 155-156.

² *CE 1972, Report*, p. 89, paras. 503, 505, 506.

³ *CE 1972, Report*, Vol. II, p. 95, CE/COM III/OPC 16.

⁴ *Ibid.*, Vol. I, p. 169, paras. 3.334-3.336; p. 172, Annex, draft Art. 71.

⁵ *Ibid.*, Vol. I, p. 172, para. 1.

to discuss the distinctive sign of civil defence. The experts recommended that an article on the civil defence sign should be included in Annex I to the draft Protocol and suggested the alternative design reproduced in the ICRC's draft together with the model identity card for permanent civil defence personnel.⁶

4293 At the Diplomatic Conference, the Technical Sub-Committee recommended the blue triangle on an orange ground, which was adopted by Committee II at the fourth session together with the model identity card.

4294 The introduction to Part IV, Section I, Chapter VI (*Civil defence*) of the Protocol and, in particular, the commentary on Articles 66 (*Identification*) and 67 (*Members of the armed forces and military units assigned to civil defence organizations*)⁷ provide the necessary information on the use of the international distinctive sign of civil defence by civil defence personnel and organizations, as well as on the right to carry the civil defence identity card.

⁷ *Supra*, pp. 713 and 779.

Annex I, Article 14 – Identity card

1. The identity card of the civil defence personnel provided for in Article 66, paragraph 3, of the Protocol is governed by the relevant provisions of Article 1 of these Regulations.
2. The identity card for civil defence personnel may follow the model shown in Figure 3.
3. If civil defence personnel are permitted to carry light individual weapons, an entry to that effect should be made on the card mentioned.

Commentary

General remarks

- 4295 The identity card for civilian and military civil defence personnel is similar to that for civilian medical personnel described in Article 1 (*Identity card for permanent civilian medical and religious personnel*) of the present Annex I,¹ from which it differs in three respects only:
- the distinctive sign is the equilateral blue triangle on an orange ground;
 - the words “permanent/temporary” do not appear in the heading of the identity card for civil defence personnel;
 - on the reverse side, beneath the heading “other distinguishing marks or information”, there is an item relating to weapons.
- 4296 Consequently, the commentary on Article 1 (*Identity card for permanent civilian medical and religious personnel*) of Annex I applies, *mutatis mutandis*, to the present article. Neither the Protocol nor Annex I provides for an identity disc to be worn by civil defence personnel; the remark concerning the disc in the commentary on Article 1 (*Identity card for permanent civilian medical and religious personnel*) of Annex I also applies here.

Paragraph 1

- 4297 The personnel mentioned in paragraph 3 of Article 66 (*Identification*) of the Protocol, to which reference is made in this paragraph, are civilian civil defence personnel. The personnel referred to in paragraph 1(c) of Article 67 (*Members of the armed forces and military units assigned to civil defence organizations*) of the Protocol are not mentioned, even though that paragraph states that such personnel should be “provided with the identity card referred to in Chapter V of Annex I to this Protocol certifying their status”.
- 4298 It would therefore seem that Article 67 (*Members of the armed forces and military units assigned to civil defence organizations*), paragraph 1(c), should be mentioned in this paragraph together with Article 66 (*Identification*), paragraph 3.
- 4299 The same omission was made in draft Article 14 of Annex I set out in the supplement to the report of Committee II’s Working Group A, which was instructed at the fourth session of the Conference to consider the provisions relating to civil defence.²

¹ Cf. commentary Art. 66, paras. 2-3 and Art. 67, para. 1(c) of the Protocol, *supra*, p. 782 and p. 797, and commentary Article 1, Annex I, *supra*, p. 1153.

² O.R. XII, p. 437, CDDH/II/SR.96, para. 61. O.R. XIII, pp. 355-356, CDDH/406/Rev.1, paras. 8, 9, 13, 14, 20; p. 357 (Arts. 59, 59bis and Annex); pp. 406-408 (Arts. 59, 59bis); p. 431, CDDH/II/439/Rev.1 (Art. 59, para. 3); p. 439, CDDH/II/439/Add.1 (Chapter V, Art. 14, para. 1).

4300 The provisions in the three paragraphs of Article 1 (*Identity card for permanent civilian medical and religious personnel*) of Annex I, as they apply to the identity card for civil defence, are not difficult to interpret.

Paragraph 2

4301 The comments on the model identity card referred to in Articles 1 (*Identity card for permanent civilian medical and religious personnel*) and 2 (*Identity card for temporary civilian medical and religious personnel*) of Annex I apply also to the model identity card for civil defence. The holder's function or rank and his posting to a civil defence unit should indicate whether he has civilian or military status. Information about the holder's profession could be given under "Other distinguishing marks or information", by reference to the civil defence tasks described in Article 61 (*Definitions and scope*) of the Protocol.

Paragraph 3

4302 Civilian civil defence personnel are entitled under Article 65 (*Cessation of protection*), paragraph 3, of the Protocol to bear light individual weapons. The same applies to military personnel, under Article 67 (*Members of the armed forces and military units assigned to civil defence organizations*), paragraph 1(d), of the Protocol.

4303 The right to bear arms should be indicated, together with the type of weapon (pistol, revolver or other light individual weapon) and its number, if any.

Ph.E.

Annex I, Article 15 – International distinctive sign

1. The international distinctive sign of civil defence provided for in Article 66, paragraph 4, of the Protocol is an equilateral blue triangle on an orange ground. A model is shown in Figure 4.

Fig. 4: Blue triangle on an orange ground

2. It is recommended that:
 - (a) if the blue triangle is on a flag or armlet or tabard, the ground to the triangle be the orange flag, armlet or tabard;
 - (b) one of the angles of the triangle be pointed vertically upwards;
 - (c) no angle of the triangle touch the edge of the orange ground.
3. The international distinctive sign shall be as large as appropriate under the circumstances. The distinctive sign shall, whenever possible, be displayed on flat surfaces or on flags visible from as many directions and from as far away as possible. Subject to the instructions of the competent authority, civil defence personnel shall, as far as possible, wear headgear and clothing bearing the international distinctive sign. At night or when visibility is reduced, the sign may be lighted or illuminated; it may also be made of materials rendering it recognizable by technical means of detection.

Commentary**General remarks**

- 4304 The expert meeting convened by the ICRC in January 1973 to study the question of the distinctive sign of civil defence considered the following aspects:
- existing international signs;
 - national civil defence emblems existing in various countries;
 - signs used in the member countries of the International Civil Defence Organization (ICDO);
 - proposals by ICDO;
 - visibility tests carried out by the ICRC on the red cross sign;
 - choice of colours and a simple geometric design.
- 4305 After considering the documentation made available to the group, it was decided that the sign selected should be easily distinguishable from existing signs. Furthermore;

- the sign should be easily recognizable from a fair distance;
- the national and international signs should not be combined or associated;
- the design should be simple and limited to two colours.

4306 On the basis of the above considerations, some fifty suggested designs were examined by the specialists, who selected two proposals for submission to the Diplomatic Conference:

- a light blue equilateral triangle on a light orange ground;
- two or more light blue vertical and parallel stripes on a light orange ground.

4307 The group recommended that:

- no specifications should be laid down concerning the nature of the background, which could be an armet or tabard, the wall of a building etc.;
- one of the angles of the triangle should be pointed vertically upwards;
- no angle of the triangle should touch the edge of the background.

4308 Both the signs proposed by the group of experts are reproduced in Article 15 of the ICRC's draft Annex I. At the first session of the Conference, the Technical Sub-Committee expressed its preference for the triangle. Commenting on the two designs under consideration, the representative of the International Association of Lighthouse Authorities suggested the deletion of the adjective "light" before the words "orange" and "blue".¹

4309 At the third session of the Conference, the observer for ICDO expressed the view that a sign consisting of two red stripes on a yellow ground would be more effective than a blue triangle on an orange ground. After discussion, the Sub-Committee nevertheless decided to adopt the blue triangle on an orange ground, the final adoption of Chapter V (*Civil defence*) of Annex I being dependent upon the conclusions reached by Committee II concerning the civil defence provisions.

4310 As shown in the supplement to its report, Working Group A of Committee II considered the provisions relating to civil defence at the fourth session and also expressed its preference for the blue triangle on an orange ground.²

4311 In addition to the distinctive sign, Article 66 (*Identification*), paragraph 5, authorizes the use of distinctive signals for civil defence identification purposes, subject to agreement between the Parties to the conflict.

4312 The commentary on Article 66 (*Identification*) explains why Annex I contains no rules in respect of such distinctive signals. If the civil defence organization runs a medical service for evacuating the wounded, the sick or the shipwrecked, its medical transports are entitled to the same protection as other medical services; in other words, they can use the distinctive signals set aside for the exclusive use of medical services.³ These signals are described in Chapter III of Annex I.

4313 The other means of transport used by civil defence services may be marked with the visual international distinctive sign, namely, the blue equilateral triangle

¹ *O.R.* XIII, p. 26, CDDH/49/Rev.1, para. 26; p. 47 (Chapter V, Art. 15).

² *Ibid.*, pp. 439-440, CDDH/II/439/Add.1.

³ *Cf.* commentary Art. 66, para. 5, *supra*, p. 784.

on an orange ground. Furthermore, there is nothing to prevent such means of transport – aircraft or ships, for example – from resorting to the recognized international procedures used by civil vessels and aircraft in peacetime to identify themselves by radio and radar. The maritime and aeronautical radiocommunications governed by the Radio Regulations on the one hand and Volumes I and II of Annex 10 to the Convention on International Civil Aviation (Chicago Convention of 7 December 1944) on the other⁴ may be used by the Parties to the conflict for establishing contact with a view to concluding the agreement referred to in paragraph 5 of Article 66 (*Identification*).

4314 Such agreements in respect of any aircraft or ships used by civil defence services, for example to evacuate civilians from a threatened area, could be based on the following texts:

- IMO, International Code of Signals, Chapter XIV;
- ITU, Radio Regulations; Article 40, Section II; Resolution No. 18 of the Radio Regulations;
- ICAO, Annex 10, Volume II, Chapter 5, sections 5.3, 5.3.3.4-5.3.3.5.1.

4315 These provisions contain standard instructions for the use of technical identification and signalling methods which may be adapted to meet the requirements of civil defence services with a view to concluding the required agreement without delay.

4316 Quite apart from evacuation of the civilian population, civil defence organizations may need to use various means of transport for the performance of the tasks listed in Article 61 (*Definitions and scope*):

- ships and other craft for use in the event of floods, tidal waves or rescue at sea;
- aircraft to fight forest fires;
- intervention in the event of natural disaster, all types of pollution, nuclear accidents etc.

4317 Even in time of armed conflict, steps should be taken to ensure a minimum of safety for such operations. Distinctive signals may prove essential for ships and aircraft used by civil defence services for such purposes.

Paragraph 1

4318 Articles 3 (*Shape and nature*) and 4 (*Use*) of Annex I, together with their commentary, apply *mutatis mutandis* to this article. As to the blue and orange colours, the ICRC visibility tests demonstrated that dark colours make the sign easier to identify from a distance. The trichromatic co-ordinates of the blue and orange colours have yet to be specified and this should be done, for information only, when Annex I is revised.

⁴ ITU, Radio Regulations, revised edition of 1985. ICAO, International Standards, Recommended Practices and Procedures for Air Navigation Services: Aeronautical Telecommunications, Annex 10 to the Convention on International Civil Aviation, Volumes I and II.

Paragraph 2

4319 The purpose of the recommendations in sub-paragraphs (b) and (c) is to standardize the sign's aspect. The government experts recommended that, if the orange background is a square or rectangle, the side of the triangle opposite the angle pointing vertically upwards should be parallel to one of the sides of the background.

Paragraph 3

4320 The commentary on Articles 3 (*Shape and nature*) and 4 (*Use*)⁵ of Annex I applies also to the international distinctive sign of civil defence. Infrared visibility tests of the blue sign on an orange ground have shown that these two colours provide the dark-on-pale contrast required to distinguish the form of the sign.

Ph.E.

⁵ *Supra*, p. 1173.

Annex I, Chapter VI – Works and installations containing dangerous forces

Annex I, Article 16 – International special sign

1. The international special sign for works and installations containing dangerous forces, as provided for in Article 56, paragraph 7, of the Protocol, shall be a group of three bright orange circles of equal size, placed on the same axis, the distance between each circle being one radius, in accordance with Figure 5 illustrated below.
2. The sign shall be as large as appropriate under the circumstances. When displayed over an extended surface it may be repeated as often as appropriate under the circumstances. It shall, whenever possible, be displayed on flat surfaces or on flags so as to be visible from as many directions and from as far away as possible.
3. On a flag, the distance between the outer limits of the sign and the adjacent sides of the flag shall be one radius of a circle. The flag shall be rectangular and shall have a white ground.
4. At night or when visibility is reduced, the sign may be lighted or illuminated. It may also be made of materials rendering it recognizable by technical means of detection.

Fig. 5: International special sign for works and installations containing dangerous forces

Commentary

General remarks

- 4321** The works and installations containing dangerous forces described in Article 56 (*Protection of works and installations containing dangerous forces*), paragraph 1, of the Protocol may be marked with the international special sign in order to facilitate their identification.¹
- 4322** The special sign is defined in paragraph 7 of the above-mentioned article. The expression “special sign” is used in that article, whereas Article 16 of Annex I refers to the “international special sign”.
- 4323** At the second session Committee III, which was responsible for studying the ICRC draft text relating to the protection of works and installations containing dangerous forces (Article 49 of the draft), adopted a text which did not describe the special sign. At the fourth session a Sub-Working Group was established by the Working Group of Committee III to make recommendations concerning this sign.²
- 4324** Committee III adopted by consensus the sign proposed in the Sub-Working Group’s report, leaving the Drafting Committee to decide where the article relating to the sign should be placed in Annex I. The final text of the existing Article 16 was prepared by the Drafting Committee, which retained the title proposed by the Sub-Working Group, namely, “International special sign”.³

Paragraph 1

- 4325** In some countries, national signs and notices in the national language are used to mark works and installations containing dangerous forces of all types. International signs have also been devised to mark certain works from which dangerous forces such as, for example, radioactive matter might be released. The International Atomic Energy Agency has established international sign enabling radioactive matter to be identified.

¹ Cf. commentary Art. 56 of the Protocol, *supra*, p. 665.

² *O.R. XV*, p. 456, CDDH/407/Rev.1, para. 31.

³ *Ibid.*, pp. 471-473, CDDH/407/Rev.1, Annex I; p. 486 (Art. 49); p. 497, Annex.

- 4326 It was therefore necessary to have a specific international sign which could be used to mark the works and installations described in Article 56 (*Protection of works and installations containing dangerous forces*), paragraph 1, of the Protocol, since such works and installations enjoy special protection.
- 4327 Geometrically, the sign described in this paragraph is easy to make and calls for no particular comment. It is perhaps less easy to make advance arrangement for adequate supplies of the materials required to mark a nuclear power station or the walls of a dyke or hydroelectric dam with three large circles. The amount of bright orange paint or self-adhesive material required to block out circles several metres in diameter raises a problem of supplies and stocks which will have to be solved at the same time as the difficulties involved in affixing the sign to a rough concrete surface or the causeway of a dyke. It would be simpler to use sheets of bright orange fabric or plastic. In any event, many problems in respect of resistance to bad weather, heat, cold, wind and air pollution will have to be overcome in order to ensure the sign's durability.
- 4328 The trichromatic co-ordinates of the bright orange colour were not defined by the Working Group. Nevertheless, it would be useful for such a definition to be worked out and inserted for information in Annex I when the latter is revised.

Paragraph 2

- 4329 The sign must be clearly visible from an aircraft flying either towards the ground or horizontally. The visibility tests carried out on the red cross as seen from the air and described earlier in the introduction to Chapter II (*The distinctive emblem*) of Annex I provide useful comparative data.⁴ As to the sign's visibility, the commentary on Articles 3 (*Shape and nature*) and 4 (*Use*)⁵ of Annex I also holds good for the international special sign.

Paragraph 3

- 4330 If necessary, flags of different shapes or sizes may be prepared in advance with a view to marking dykes, dams or nuclear power plants. Masts, cables or panels may also be installed in advance so that the flags may be displayed rapidly as and when required. They may be lighted at night or when visibility is poor. It is important to check that a flag is clearly visible against the backdrop of the countryside.
- 4331 As a comparison, the ICRC in some areas of armed conflict uses 10 × 10 m white flags bearing a red cross, displayed either vertically against the wall of a building or horizontally on the roof.

⁴ Cf. introduction to Chapter II, Annex I, *supra*, p. 1167

⁵ *Supra*, pp. 1173 and 1179.

Paragraph 4

- 4332** The remarks made in respect of the lighting or illumination of the distinctive emblem in the commentary on Article 3 (*Shape and nature*), paragraph 2,⁶ of Annex I apply also to the international special sign. The colour contrast of the three bright orange circles under infrared observation could not be checked.
- 4333** Since bright orange and white have very similar rates of reflection under infrared observation, very little colour contrast would be produced by placing the three circles on a pale ground such as, for example, concrete walls.
- 4334** Data obtained by the ICRC on sets of measurements of radiation in the near infrared region (frequency 1,200 nm) showed that the reflectivity of both white and bright orange is about 65%. Steps should therefore be taken to ensure that the reflectivity of the ground against which the three bright orange circles are placed, or at least the area round their circumference, is as low as possible, so that the geometric design of the international special sign stands out by contrast.
- 4335** Further studies and tests should be conducted on the colour contrast produced by bright orange on different grounds under infrared observation, in order to provide the additional data required for the sign to be made visible to infrared detection, particularly in aerial photography.

Commentary on Annex II to Protocol I

Annex II to Protocol I

Annex II to the Protocol Additional
to the Geneva Conventions
of 12 August 1949, and relating to the Protection of Victims
of International Armed Conflicts (Protocol I)

Annex II – Identity card for journalists on dangerous professional missions

Front

<p>NOTICE</p> <p>This identity card is issued to journalists on dangerous professional missions in areas of armed conflicts. The holder is entitled to be treated as a civilian under the Geneva Conventions of 12 August 1949, and their Additional Protocol I. The card must be carried on all times by the bearer. If he is detained, he shall at once hand it to the Detaining Authorities, to assist in his identification.</p> <p>ملحوظة</p> <p>تصرف هذه البطاقة للمصحين الكثرين بمهمات خطيرة في مناطق النزاعات المسلحة ووجوب لاصحابها أن يتحمل مسألة الضمان الذي وثقاً لاتفاقيات جنيف الأربعة، ١٢ أغسطس ١٩٤٩، ولصاحبها (بروتوكولها) الإضافي الأول. ويجب أن يحتفظ صاحب البطاقة بها يوماً إذا اعتقل. يجب أن يسلمها فوراً إلى سلطة الاعتقال لتساعد على تحديد هويته.</p>	<p>(Name of country issuing this card) (اسم القطر الصادر لهذه البطاقة)</p> <p>(Nombre del país que expide esta tarjeta) (Nom du pays qui a délivré cette carte)</p> <p>(Название страны, выдавшей настоящее удостоверение)</p>
<p>NOTA</p> <p>La présente tarjeta de identidad se expide a los periodistas en misión profesional peligrosa en zonas de conflictos armados. Su titular tiene derecho a ser tratado como persona civil conforme a los Convenios de Ginebra del 12 de agosto de 1949 y su Protocolo adicional I. El titular debe llevar la tarjeta consigo, en todo momento. En caso de ser detenido, la entregará inmediatamente a las autoridades que lo detengan a fin de facilitar su identificación.</p> <p>AVIS</p> <p>La présente carte d'identité est délivrée aux journalistes en mission professionnelle périlleuse dans des zones de conflit armé. Le porteur a le droit d'être traité comme une personne civile aux termes des Conventions de Genève du 12 août 1949 et de leur Protocole additionnel I. La carte doit être portée en tout temps par son titulaire. Si, celui-ci est arrêté, la remettre immédiatement aux autorités qui le retiennent afin qu'elles puissent l'identifier.</p> <p>ПРИМЕЧАНИЕ</p> <p>Настоящее удостоверение выдается журналистам, выполняющим в опасных профессиональных зонах миссию в районах вооруженного конфликта. Его обладатель имеет право на обращение с ним как с гражданским лицом в соответствии с Женевскими Конвенциями от 12 августа 1949 г. и Дополнительным Протоколом I к ним. Владелец удостоверения должен постоянно иметь его при себе. В случае задержания он немедленно должен передать его задерживающей властью для содействия установлению его личности.</p>	<p>IDENTITY CARD FOR JOURNALISTS ON DANGEROUS PROFESSIONAL MISSIONS</p> <p>بطاقة الهوية الخاصة بالصحفيين الكثرين بمهمات خطيرة</p> <p>TARJETA DE IDENTIDAD DE PERIODISTA EN MISION PELIGROSA</p> <p>CARTE D'IDENTITÉ DE JOURNALISTE EN MISSION PÉRILLEUSE</p> <p>УДОСТОВЕРЕНИЕ ЖУРНАЛИСТА, НАХОДЯЩЕГОСЯ В ОПАСНОЙ КОМАНДИРОВКЕ</p>

General introduction to the Commentary on Protocol II

4337 Except for Article 3 common to the Geneva Conventions of 1949, which is often rightly called a “mini-convention”, Protocol II constitutes the first real legal instrument for the protection of victims of non-international armed conflicts. Why did it take until 1977 for this instrument to be adopted? On the one hand, this introduction is aimed at briefly recalling the nature of this particular type of conflict; on the other hand, it attempts to trace in broad lines the development of the law which resulted in the drawing up of these still rather modest rules.

The concept of non-international armed conflict

4338 In the absence of a general definition of non-international armed conflict, which may take very different forms, an attempt should be made to describe situations of this type in relation to the objective facts characterizing them.

4339 First, a non-international armed conflict is distinct from an international armed conflict because of the legal status of the entities opposing each other: the parties to the conflict are not sovereign States,¹ but the government of a single State in conflict with one or more armed factions within its territory.²

4340 It is therefore appropriate to raise the question whether all forms of violent opposition to a government, from simple localized rioting to a general confrontation with all the characteristics of a war, can be considered as non-international armed conflicts.

4341 The expression “armed conflict” gives an important indication in this respect since it introduces a material criterion: the existence of open hostilities between armed forces which are organized to a greater or lesser degree. Internal disturbances and tensions,³ characterized by isolated or sporadic acts of violence, do not therefore constitute armed conflict in a legal sense, even if the government

¹ We should mention the exception created by armed conflicts in which peoples fight against colonial domination and alien occupation, and against racist régimes, as these are considered as international armed conflicts. See Art. 1, para. 4, Protocol I, and Art. 1, para. 1, Protocol II, as well as the commentary thereon, *supra*, p. 41 and *infra*, p. 1347.

² A situation of armed conflict may also exist in which armed factions fight against each other without intervention by the armed forces of the established government. See commentary Art. 1, *infra*, p. 1351.

³ See commentary Art. 1, para. 2, *infra*, p. 1354.

is forced to resort to police forces or even to armed units for the purpose of restoring law and order. Within these limits, non-international armed conflict seems to be a situation in which hostilities break out between armed forces or organized armed groups within the territory of a single State.⁴ Insurgents fighting against the established order would normally seek to overthrow the government in power or alternatively to bring about a secession so as to set up a new State.

The legal situation before 1949

4342 Positive law has very largely abstained from laying down rules governing non-international armed conflict. According to traditional doctrine, States were the only sovereign entities considered to be subjects of international law; thus the laws of war, which were conceived to govern international relations, were not applicable in internal conflicts.

4343 Emmer de Vattel was a pioneer in this field. In fact, for the first time he raised the question whether the Sovereign must observe the ordinary laws of war towards rebellious subjects who openly take up arms against him,⁵ and attempted to answer this affirmatively. However, it was only during the nineteenth century that the first attempts were made to make the laws of war applicable to the relations between the established government of a State and insurgents fighting against it. For this purpose, insurgents were put on a par with belligerents, i.e., with a party to an inter-State war, and this was done by means of a legal construction: the recognition of belligerency.

Recognition of belligerency

4344 This concept appears under two aspects:

1. Recognition of belligerency by the legitimate government of the State

4345 This is a juridical act which is both unilateral and discretionary and may take either an explicit⁶ or a tacit form. Tacit recognition of belligerency, which covers

⁴ On this point, see *CE/5b*, pp 36-37.

⁵ E. de Vattel, *Le droit des gens ou principes du droit naturel*, Neuchâtel, 1758, Edition Carnegie, 1916, book III, chapter XVIII, p. 238.

⁶ See J. Siotis, *Le droit de la guerre et les conflits armés d'un caractère non international*, Paris, 1958. According to that author the only examples of express recognition that can be given took place:

a) on the occasion of the American Civil War when a decision of Congress intervened (pp. 78-90);
b) during the American War of Independence, when the British parliament adopted a law governing trade with the insurgent colonies (p. 56);

c) during the Colombian War of Independence when a treaty was signed by Simon Bolivar and the Spanish General Murillo, to legalize the war (p. 68).

the majority of cases, can be deduced from government measures or attitudes towards an internal situation of conflict (for example, a blockade). Such an act creates a new legal situation. The relationship between the established government and the insurgents follows from the state of war which makes the law of armed conflict as a whole applicable between them. Recognition is a manifestation of the competence of a State to wage war, which keeps its national sovereignty.⁷ It grants insurgents merely a sort of legal personality as subjects of rights and duties within the confines of the laws of war.

2. *Recognition of belligerency by a third State*

4346 A third State may also be induced to recognize a situation of belligerency. Such recognition cannot be given tacitly. It has legal consequences only for the relations of that State with the parties to the non-international armed conflict. It prohibits the recognizing State from unilaterally aiding either the government party or the insurgent party to the conflict.⁸ Does not such a declaration constitute interference in the internal affairs of the State in whose territory the conflict is taking place? This would certainly be the case if a third State recognized a situation of belligerency which did not objectively exist. The search for objective criteria led to the legal concept of civil war; thus certain *de facto* elements must all be present for third States to be able to recognize a situation of belligerency without committing the inadmissible act of interfering with the internal affairs of the other State.

The concept of civil war

4347 The Institute of International Law studied this question at length and in 1900 finally established Regulations for civil war; Article 8 of these Regulations lays down three conditions which make it possible to that whether there is a genuine civil war and therefore that it is possible for a third State to recognize the belligerency of the insurgents. This article provides that:

“Third States may not give recognition to the belligerency of the insurgent party:

1. if it has not won for itself a territorial existence by taking possession of a given part of the national territory;
2. it does not fulfil the conditions which must be met to constitute a regular government *de facto* exercising in that part of the territory the ostensible rights belonging to sovereignty; and;

⁷ On this point reference may be made to Ch. Zorgbibe, *La guerre civile*, Paris, 1958, pp. 45-51.

⁸ Such an act of recognition is equivalent to a declaration of neutrality and creates the same obligations for the third State as if it were a neutral State in an international conflict.

3. if the struggle waged in its name is not conducted by organized forces subject to military discipline and complying with the laws and customs of war.”⁹

4348 The work of the Institute is considered as having legal weight in its capacity as representing the meetings of highly qualified publicists. Moreover, according to the article itself, third States are not obliged to recognize belligerency when the conditions listed above are fulfilled. The States remain completely free to act as they see fit in this respect and even to withdraw recognition later if they consider it appropriate to do so.¹⁰

4349 The institution of recognition of belligerency has proved to be extremely difficult to apply in practice and has given rise to many controversies. We will not go into these here.¹¹ Nevertheless, this brief historical summary seems necessary, on the one hand, because recognition of belligerency constituted the first step in the regulation of non-international armed conflicts, and on the other hand, because it is often, though incorrectly, invoked as a consequence of the application of common Article 3 and of Protocol II. Furthermore, confusion also often arises between the legal effects of recognition by an established government and those resulting from recognition by third States.

Role of the Red Cross – A review of Resolutions

4350 The Red Cross Movement as a whole, and the ICRC in particular, were concerned with the fate of victims of non-international armed conflicts well before 1949. In 1912, during the IXth International Conference of the Red Cross (Washington), a first attempt was made to specify its role in civil wars. This was unsuccessful.

4351 It was only in 1921 that the Xth International Conference of the Red Cross (Geneva) adopted a first resolution relating to civil war¹² which established the right of all victims of civil wars, social or revolutionary disturbances to receive aid in accordance with the general principles of the Red Cross, and gave the ICRC a mandate to intervene in a supporting role in relief matters. This Resolution represented an important step forward as it reflected a consciousness of the humanitarian needs engendered in situations of internal conflict. It is relevant to

⁹ Translated by the ICRC. Original French:

“Les tierces puissances ne peuvent reconnaître au parti révolté la qualité de belligérant:

1. s’il n’a pas conquis une existence territoriale distincte par la possession d’une partie déterminée du territoire national;
2. s’il n’a pas réuni les éléments d’un gouvernement régulier exerçant en fait, sur cette partie du territoire, les droits apparents de la souveraineté;
3. si la lutte n’est pas conduite, en son nom, par des troupes organisées, soumises à la discipline militaire et se conformant aux lois et coutumes de la guerre.”

Annuaire IDI, 1897-1904, p. 639.

¹⁰ See Ch. Zorgbibe, *op. cit.*, pp. 71-97.

¹¹ J. Siotis, *op. cit.*, pp. 116-117, details the reasons for these controversies.

¹² Resolution XIV, “Civil War”, *International Red Cross Handbook*, 12th ed., Geneva, 1984, pp. 641-642.

note that it covers both civil wars and internal strifes. In particular it served as a basis for ICRC activities during the Spanish Civil War. For that matter, that conflict had a decisive impact on the development of rules for non-international armed conflicts.

4352 In 1938 the XVIth International Conference of the Red Cross (London) supplemented the 1921 Resolution on civil war with a new resolution¹³ relating to the role and the activities of the Red Cross in time of civil war. For the first time this provided for the, if not of the Conventions themselves, at least of implementation the principles underlying them.

4353 With this encouragement, the ICRC had studied since 1945, how to include provisions relating to non-international armed conflicts in the Conventions in preparation.

Non-international armed conflict and the Charter of the United Nations

4354 The United Nations Charter is basically aimed at ensuring the maintenance of international peace and security; therefore resorting to the threat or the use of force is expressly condemned in the international relations of Member States (Article 2, paragraph 4). This does not mean that States are any less sovereign within their own territory and, to put it differently, civil war is not prohibited as such.

4355 In addition, the same Article 2 which lays down the principle of the sovereign equality of Members States in paragraph 1, lays down the following provisions in paragraph 7:

“Nothing contained in the present Charter shall authorize the United Nations to intervene in matters which are essentially within the domestic jurisdiction of any State or shall require the Members to submit such matters to settlement under the present Charter [...]”

4356 Thus a State may resort to the use of force in order to restore public order in its own territory without incurring the risk of being condemned by the United Nations. The principle of respect for the sovereignty of Member States and of non-interference in their internal affairs is, however, subject to an exception when international peace and security are threatened. In fact, if armed action undertaken by a State in its own territory endangers international peace, it is no longer only an internal matter. That is why the same Article 2, paragraph 7, specifies *in fine* that recognition of national jurisdiction “shall not prejudice the application of enforcement measures under Chapter VII”.

4357 Wars known as “wars of national liberation” form an exception in this respect. Initially they were considered as internal armed conflicts, but it has gradually been accepted that they have an international character. The Charter is based on the principle of the self-determination of peoples (Article 1, paragraph 2). On the basis of this principle the United Nations has been induced to adopt

¹³ Resolution XIV, “Role and Activity of the Red Cross in Time of Civil War”, *International Red Cross Handbook*, *op. cit.*, pp. 642-643.

a supportive position towards peoples fighting in the exercise of their right of self-determination. This point of view, which has repeatedly been confirmed in resolutions and declarations,¹⁴ is now universally recognized.

4358 Recent developments in international humanitarian law have followed this evolution; therefore, armed conflicts in which peoples are fighting in the exercise of their right of self-determination have been included amongst international armed conflicts.¹⁵

Article 3 common to the four Conventions

4359 Common Article 3 of the Conventions constitutes the keystone of humanitarian law applicable in non-international armed conflicts. It is the first major achievement with regard to this law which is still to be developed (we refer the reader to the commentary on the Conventions).¹⁶ Protocol II supplements and develops amplifies Article 3 without changing the conditions of its application,¹⁷ and in this sense the two instruments are indissociable.¹⁸ As the commentary on the Protocol repeatedly refers to common Article 3, it is appropriate to include the text in this general introduction. It reads as follows:

“In the case of armed conflict not of an international character occurring in the territory of one of the High Contracting Parties, each Party to the conflict shall be bound to apply, as a minimum, the following provisions:

1) Persons taking no active part in the hostilities, including members of armed forces who have laid down their arms and those placed *hors de combat* by sickness, wounds, detention, or any other cause, shall in all circumstances be treated humanely, without any adverse distinction founded on race, colour, religion or faith, sex, birth or wealth, or any other similar criteria.

To this end, the following acts are and shall remain prohibited at any time and in any place whatsoever with respect to the above-mentioned persons:

- a) violence to life and person, in particular murder of all kinds, mutilation, cruel treatment and torture;
- b) taking of hostages;
- c) outrages upon personal dignity, in particular, humiliating and degrading treatment;

¹⁴ Resolution 1514 (XV) and the Declaration on Principles of International Law Concerning Friendly Relations and Co-operation among States (Resolution 2625 (XXV)) are the most important of these.

¹⁵ See commentary Arts. 1, para. 4, and 96, para. 3, of Protocol I, *supra*, p. 41 and p. 1088, which deal with this question in detail. Mentioning it in this introduction has the sole object of broadly outlining the development of the rules governing non-international armed conflicts.

¹⁶ *Commentaries I, II, III and IV*, respectively, pp. 37-61, 31-39, 27-43 and 25-44.

¹⁷ See commentary Art. 1, para. 1, Protocol II, *infra*, p. 1350.

¹⁸ The characteristic features of common Article 3 and of Protocol II are referred to in the introduction to Part I, Protocol II, *infra*, p. 1343.

- d) the passing of sentences and the carrying out of executions without previous judgment pronounced by a regularly constituted court affording all the judicial guarantees which are recognized as indispensable by civilized peoples.
- 2) The wounded and sick shall be collected and cared for.
An impartial humanitarian body, such as the International Committee of the Red Cross, may offer its services to the Parties to the conflict.
The Parties to the conflict shall further endeavour to bring into force, by means of special agreements, all or part of the other provisions of the present Convention.
The application of the preceding provisions shall not affect the legal status of the Parties to the conflict.”

Historical background to Protocol II

The reasons for the development of the law applicable in non-international armed conflicts

- 4360** Since the Second World War the majority of armed conflicts – of which there have unfortunately been a deplorably large number – have had a non-international character. Such fratricidal conflicts have caused great suffering and have resulted in numerous victims.
- 4361** Although common Article 3 lays down the fundamental principles of protection, difficulties of application have emerged in practice, and this brief set of rules has not always made it possible to deal adequately with urgent humanitarian needs.
- 4362** It has sometimes been said – quite incorrectly – that this article has never been applied. In fact, it often has, even if his application has been delayed to when hostilities between the parties to the conflict had reached a certain state of equilibrium. Despite the fact that Article 3 is based on the principle that the rules apply automatically whenever a situation is objectively characterized as an armed conflict, the fact remains that the High Contracting Party concerned still has a wide area of discretion and has in some cases abused it.
- 4363** Article 3 merely expresses a minimum of basic rules. The concise wording lays down the principles without developing them, which has sometimes given rise to restrictive interpretations. This particularly applies to the scope of judicial guarantees (paragraph 1(1)(d)) which does not go into details. The precarious position in which insurgent combatants find themselves requires that such guarantees should be clarified and reinforced for their benefit, particularly with regard to matters of judicial procedure. In fact, an insurgent combatant does not enjoy immunity when charged with having taken up arms, as do members of the armed forces in a conflict between States; on the contrary, he may be punished for having violated the national law.
- 4364** The obligation to collect and care for the wounded and sick also remains a very general one; the text of Article 3 is silent on the protection to be given doctors and other members of medical personnel, as well as to medical units and

transports. The protection of the emblem is not provided for. Already in 1957 the XIXth International Conference of the Red Cross (New Delhi) had expressed the wish, in a resolution relating to medical care,¹⁹ that Article 3 should be supplemented on this point, and made an urgent appeal to governments to take all necessary measures to guarantee effective care for the wounded, and to prevent doctors from being hindered in the performance of their task.

- 4365 The rules of Article 3 therefore needed to be confirmed and clarified. Furthermore, this provision contains gaps. Although it expresses the principle that persons who do not or no longer participate in hostilities should be protected, there are, on the other hand, no rules on the conduct of hostilities aimed at sparing the civilian population as such. And yet the civilian population is particularly exposed in such conflicts. Often civilians are even the main victims, particularly because they may be used as a shelter by insurgents.²⁰
- 4366 There is another important point on which Article 3 is silent: namely, relief actions. Great difficulties involved in setting up relief actions have often been experienced in practice, and the question has been raised whether it would not be useful to specify the modalities for such actions in order to ensure that relief will reach its destination without meeting obstacles.
- 4367 Concerned with the need to ensure the efficacy of relief actions as far as possible, the above-mentioned XIXth International Conference of the Red Cross as early as 1957 adopted a resolution establishing some fundamental principles.²¹
- 4368 The preceding considerations may illustrate that the need for developing rules relating to situations of non-international armed conflict did not arise from one day to the next. More than twenty years of practical experience have gradually made it clear that the position gained in 1949 in the form of common Article 3 has, together with its positive points, its imperfections and shortcomings.

Travaux préparatoires

- 4369 This work was spread out over almost ten years.
- 4370 The XXth International Conference of the Red Cross (Vienna) noted in 1965 the inadequacy of the protection of victims of non-international armed conflicts, and adopted two Resolutions which constitute the beginning of the development of rules in this area.²²
- 4371 In 1968 the International Conference on Human Rights, which convened in Teheran under the auspices of the United Nations, marked an important turning

¹⁹ Resolution XIX, "Relief in the Event of Internal Disturbances".

²⁰ Aware of this important omission, in its Draft Rules for the Limitation of the Dangers Incurred by the Civilian Population in Time of War, the ICRC had provided for those Rules to apply in all armed conflicts, both international and internal (Art. 2, para. (b)). See also introduction to Part IV, Protocol II, *infra*, p. 1443.

²¹ Resolution XIX, "Relief in the Event of Internal Disturbances".

²² Resolution XVIII, "Protection of Civilian Population against the Dangers of Indiscriminate Warfare"; Resolution XXXI, "Protection of Victims of Non-International Conflicts", *International Red Cross Handbook*, *op. cit.*, pp. 626-627 and 643-645.

point by establishing the relationship between human rights and international humanitarian law. By adopting a resolution on human rights in armed conflicts,²³ which encouraged the development of new rules, the Conference qualified humanitarian law as an extension of human rights and included it amongst the matters of concern the United Nations. Henceforth, the rules of international law on human rights, and in particular the International Covenant on Civil and Political Rights, would be used as a point of reference to bring into focus the fundamental guarantees given in Protocol II for the way in which human beings should be treated.²⁴

- 4372** In 1969 the ICRC privately invited a group of experts to examine the development of humanitarian law in the context of non-international armed conflict; their conclusions were to serve as a basis for the drawing up of the first documentation for the benefit of the XXIst International Conference of the Red Cross (Istanbul, 1969).²⁵ That Conference requested the ICRC to devote special attention to the problem, and broadly recognized the necessity for supplementing and clarifying common Article 3.²⁶ The question of the specific protection of combatants of an armed opposition was raised for the first time and a resolution was put forward proposing, under certain conditions, to grant them prisoner-of-war treatment.²⁷
- 4373** In 1970 the ICRC arranged further meetings of experts²⁸ in order to draw up, on the basis of the views obtained, concrete proposals to be presented to the Conference of Government Experts which was to take place the following year.²⁹
- 4374** The first session of the Conference of Government Experts took place in 1971. The ICRC did not present the experts with an actual draft, but with a list of the most important problems forming the key to any subsequent development of the law.³⁰
- 4375** We will indicate the main results of this meeting here, which show the evolution of ideas and controversies which arose with regard to the subject of non-international armed conflicts.

²³ This was followed in the same year by Resolution 2444 (XXIII) with the same title, adopted by the United Nations General Assembly. See also *supra*, general introduction to the Commentary on the Protocols.

²⁴ See commentary Preamble and introduction to Part II, *infra*, p. 1337 and 1365.

²⁵ See the XXIst International Conference of the Red Cross, 1969, "Reaffirmation and development of the laws and customs applicable in armed conflict" (Doc. D.S.4), pp. 97 ff. and "Protection of victims of non-international conflicts" (Doc. D.S.5).

²⁶ Resolution XVII, "Protection of Victims of Non-International Armed Conflicts".

²⁷ Resolution XVIII, "Status of Combatants in Non-International Armed Conflicts": "Combatants and members of resistance movements who participate in non-international armed conflicts and who conform to the provisions of Article 4 of the Third Geneva Convention of 12 August 1949 should when captured be protected against any inhumanity and brutality and receive treatment similar to that which that Convention lays down for prisoners of war.

³⁰ CE 1971, *Report*, pp. 33-65, paras. 93-356 and Annexes.

4376 The actual principle that common Article 3 should be developed was almost unanimously agreed. The debates showed that such a development could be envisaged in various ways, and different approaches were put forward, such as:

- an overall approach to the development of humanitarian law which would no longer distinguish international armed conflicts from non-international armed conflicts and which would be characterized by the drafting of a single international instrument. This concept was based on purely humanitarian ideas, i.e., that victims in all situations of armed conflict, whatever their nature, are subject to the same suffering and should be helped in the same way;³¹
- the preparation of model agreements (in the sense of common Article 3) with a view to the application of all or some of the 1949 Conventions, so that the parties to the conflict could implement in any particular case the appropriate agreement, given a situation of large-scale non-international armed conflict;³²
- development of the law based on a clear definition of the concept of non-international armed conflict, drawn up by means of objective criteria.

4377 This last point found favour with the majority of experts, who recommended, on the one hand, a separate régime for non-international armed conflict and, on the other, establishing a definition. In order to reduce States' discretionary power of judgment, the ICRC proposed that the definition should not be exhaustive, but a flexible formula illustrated by examples of situations in which the régime would be applicable.³³ In general this proposal was considered to be a good working basis.

4378 At this stage no conclusion was reached, except on one point, which was supported by a majority, namely, to leave out situations of internal disturbances, as these were considered to be covered by the instruments dealing with human rights.

4379 In the end a number of experts expressed the view that wars of national liberation should be considered as international conflicts, in particular on the basis of the principle of self-determination enshrined in the United Nations Charter, while others, on the contrary, considered that only the existence of objective facts and not the reasons underlying the conflict, could be used to qualify the conflict as international or as non-international.

4380 In 1971 it was not yet clear precisely what form the envisaged development of the law would take; therefore the possibility of supplementing Article 3 by adopting some additional chapters (such as, for example, on the wounded and sick) was not excluded in the event that a comprehensive instrument could not be successfully drafted.

4381 It should be noted that a first draft for a Protocol was submitted during these consultations by the Canadian delegation.³⁴ The proposals contained in this draft provided a valuable basis, particularly concerning the field of application *ratione personae*, as it covered anyone affected by the armed conflict and was present in

³¹ *Ibid.*, p. 61, CE/COM II/1. Norway, which put forward this proposal, maintained this position throughout the work of the Diplomatic Conference.

³² *Ibid.*, p. 62, CE/COM II/5.

³³ CE/5b, p. 43.

³⁴ CE 1971, Report, p. 57, CE/Plen/2 bis.

the territory of the Contracting Party, whether or not he was a combatant. In this way there was no need to assign any particular status to the insurgent party. This solution was subsequently to be maintained in substance.

4382 The second element of this draft to be highlighted is the suggestion to treat all persons deprived of their liberty for reasons related to the conflict in the same way. This was again to avoid having to grant a particular status to an armed opponent when he would be taken prisoner. This solution, too, would prevail.

4383 The second session of the Conference of Government Experts met in 1972. The ICRC submitted to it a draft Protocol additional to common Article 3, taking into account the different opinions expressed in 1971. 1972 was characterized by a change in the way in which Protocol II was conceived, and we comment on this below.

*The main points of the 1972 draft*³⁵

Material field of application

4384 The draft followed the line of common Article 3, i.e., the Protocol would apply in all situations of non-international armed conflict in the sense of Article 3. Thus the ICRC's proposal³⁶ had the same tenor as that which it had put forward in 1971.

Personal field of application

4385 The ICRC largely followed the Canadian draft presented to the Conference of Experts in 1971.³⁷

Proposals relating to members of the armed forces or armed groups who have fallen into the power of the adverse party

4386 In order to guarantee such persons humane treatment in case of capture the ICRC made a proposal in two parts:³⁸

- a) Members of regular armed forces or of insurgent armed groups fulfilling the conditions stipulated in Article 4A(2) of the Third Convention, who fall into the power of the adversary, should receive a treatment similar to that provided for prisoners of war in the same Convention.³⁹ It should be noted that such treatment only applies for the duration of captivity, without necessarily conferring immunity for the fact of having taken up arms.

³⁵ *CE 1972, Basic texts*, pp. 35-45.

³⁶ *Ibid.*, p. 33.

³⁷ See *infra*, p. 1359. *CE 1971, Report*, p. 57, *CE/Plen/2 bis*.

³⁸ *CE 1972, Basic Texts*, pp. 40-42 (Chapters VI and VII); *CE 1972, Commentaries*, Part II, pp. 48-62.

³⁹ This proposal reiterates that of Resolution XVIII of the XXIst International Conference of the Red Cross, quoted *supra*, p. 1327 and note 27.

Those who fulfil the conditions of Article 4 of the Third Convention, or who have at least distinguished themselves from the civilian population and have respected the rules of the Protocol in their operations, should no longer be liable to the death penalty for the sole fact of having taken part in hostilities or of having formed part of armed forces.

- b) Those who do not fulfil these conditions, and in general all persons deprived of their freedom for reasons related to the armed conflict, should be guaranteed decent conditions of detention.

*Protection of the civilian population*⁴⁰

4387 In 1971 the possibility of creating a single protocol relating to the protection of the civilian population in all types of conflict was still envisaged. As the majority of experts expressed a preference for maintaining the distinction between international armed conflict and non-international armed conflict because of the characteristic features of each of these cases, the ICRC abandoned the idea of a single protocol on this point and introduced into the draft of Protocol II a part on the protection of the civilian population, following the example of draft Protocol I. A definition of the civilian population was proposed, together with the general principle of protection and rules of conduct to be applied during hostilities. Finally, it was provided that objects indispensable to survival should be protected and safeguarded.

*Relief*⁴¹

4388 The draft laid down the principle that supplies should be provided for the population, even in case of blockade, and the principle that the ICRC and National Societies of other countries should act for the benefit of the population.

*Special cases*⁴²

4389 In addition, the ICRC proposed regulations to be annexed to the Protocol for special situations which, in its opinion, would justify the application of the entire body of Geneva law in the interests of the victims (conflicts on a large scale; outside aid by another State).⁴³

⁴⁰ *CE 1972, Basic Texts*, pp. 38-39 (Chapter IV); *CE 1972, Commentaries*, Part II, pp. 31-44.

⁴² *CE 1972, Basic Texts*, p. 46.

⁴³ *Ibid.*

*Work of the experts*⁴⁴

- 4390** Without meaning in any way to underrate the importance of other matters, it should be noted that the experts were particularly concerned with two questions, viz., the scope of application and the problem of the treatment of captured combatants.
- 4391** As regards the scope of application, two broad trends emerged from thirteen different proposals:⁴⁵
- to provide for clauses whereby the scope of application would be clearly defined and for substantive rules in great detail; or
 - to opt for a general definition and to provide only some general rules.
- 4392** Objective and subjective criteria (territory, duration, intensity) were advanced, and some experts considered that it was up to governments to decide when the instrument would be applicable.⁴⁶ However, this suggestion was dismissed because a majority considered that the State should not have direct powers of discretion with regard to the qualification of a conflict situation, and they adhered to the principle that the Protocol should automatically apply when a particular situation objectively exists.
- 4293** The experts wanted to establish upper and lower thresholds for conflicts. As regards the upper threshold, the divergent views regarding wars of national liberation, which had been rampant since 1971, were confirmed. Some tended to consider wars of liberation as international armed conflicts, basing their case on the practice of the United Nations, while others rejected the idea of taking the purposes of the struggle into consideration in order to qualify the conflict. As regards the lower threshold, a certain number of experts were in favour of explicitly excluding internal disturbances.
- 4394** These debates, which were very intense, revealed a tendency to move towards a rather restrictive definition of non-international armed conflict which was in danger of no longer being fully in line with common Article 3. In order to avoid the risk of the scope of Article 3 being reduced by an excessively narrow definition, one delegation proposed a separate definition in order that the Protocol should become complete in itself;⁴⁷ in this way, thanks to the autonomy of the respective instruments, Article 3 would retain an independent existence. This proposal is important, for up to then the scope of application of the instrument in preparation had always been envisaged as derived from common Article 3, i.e., a Protocol applicable in all situations covered by Article 3.
- 4395** As regards the treatment of persons who have participated in hostilities and have fallen into the power of the adverse party, and the penal prosecutions to which they may be subject, the ICRC proposals were not always well received, because they granted more extensive guarantees to those who complied with the

⁴⁴ *CE 1972, Report, Vol. I, pp. 53-99, paras. 2.1-2.350.*

⁴⁵ *Ibid.*, pp. 70-72, paras. 2.71-2.106.

⁴⁶ *Ibid.*, Vol. II, pp. 35-36, CE/COM II/14.

⁴⁷ *Ibid.*, p. 33, CE/COM II/1 (United States).

rules of the Protocol.⁴⁸ Some experts favoured specific protection for combatants captured in armed conflicts of a particular degree of severity; thus their position was linked with the definition of conflicts (as contained in Article 1 of the draft). The special case of a combatant in a war of liberation was raised on this occasion, with the same stands taken as for the definition of the scope of application.

4396 In the end some would have wished to broaden the range of persons entitled to prisoner-of-war treatment in case of capture by analogy with Article 4 of the Third Convention with appropriately flexible conditions, following the example of those laid down in draft Protocol I (guerrilla combatants).⁴⁹

4397 In general it seems unrealistic to establish combatant status for persons who have participated in hostilities and have been captured in non-international armed conflicts. In fact, such status would be incompatible, first, with respect for the principle of sovereignty of States, and secondly, with national legislation which makes rebellion a crime. On the other hand, a trend emerged among the experts in favour of granting captured insurgents not so much a treatment *sui generis*, but a treatment in accordance with the requirements of humanitarian law, identical for all persons deprived of their liberty for reasons related to the conflict. Such a solution would make it possible to avoid a reference to Article 4 of the Third Convention or to Protocol I. The same idea had already been advanced by the experts from Canada in 1971.⁵⁰

4398 The same difference of opinion regarding the extent to which guarantees should actually be granted those captured, also arose with regard to penal prosecution, and particularly with regard to the death penalty.⁵¹

4399 The ICRC's proposal that members of armed forces or of armed groups who had acted in accordance with the law of armed conflict should no longer be liable to the death penalty for the sole fact of having taken part in hostilities, led to heated debates. That proposal was modest enough as it applied only to that particular case and did not prejudice the prosecution of criminal offences in any way. However, the experts found it difficult to reconcile the elimination of the death penalty with the imperative needs of internal security; therefore some considered that it would be better to deal with the matter by procedural means and by granting a reprieve.

4400 The experts from the United States advanced a proposal to this effect, recommending:⁵²

- a) the granting of fundamental judicial guarantees;
- b) the right of appeal or petition from any sentence;
- c) a death sentence imposed on any person belonging to armed forces or armed groups, whose guilt arises only by reason of his having taken part in the combat, shall not be carried out until the hostilities have ceased;
- d) endeavouring to grant a general amnesty at the conclusion of the hostilities.

⁴⁸ CE 1972, *Basic Texts*, pp. 40-42 (Arts. 25, 26, 28).

⁴⁹ *Ibid.*, p. 14 (draft Protocol I, Art. 38).

⁵⁰ CE 1971, *Report*, p. 57, CE/Plen/2 bis, Art. 19.

⁵¹ CE 1972, *Report*, Vol. I, pp. 84-87, paras. 2.209-2.235.

⁵² *Ibid.* Vol. II, p. 41, CE/COM II/49.

This compromise proposal was subsequently largely adopted.

- 4401 Other important problems, such as the protection of the civilian population or humanitarian assistance⁵³ were studied. These were matters related to the ICRC draft as a whole. It should be underlined in this respect that, as far as the protection of the civilian population is concerned, the discussion was not about the principle itself, which was universally admitted, but about the substance of the rules to be included in Protocol II. The question was up to what point it should be kept on parallel lines with Protocol I in this field. Finally, it should be noted that the exchange of views on relief foreshadowed serious difficulties in reaching an agreement, and raised many problems, for example, on the question of how to ensure that the principle of non-interference would be observed. An expert went so far as to raise the question of the extent to which the duration of a conflict might even be prolonged by providing relief necessary for the survival of the civilian population, and this in turn brought up the problem of blockades.⁵⁴

The Diplomatic Conference

The 1973 draft

- 4402 This draft, which formed the basis for the work of the Diplomatic Conference, was drawn up by the ICRC, and very largely took into account the views expressed by the experts in 1972; it considerably differs therefore from the preceding draft.
- 4403 It contains forty-nine⁵⁵ provisions, divided into eight parts and has four main features:
- the structure is similar to that of draft Protocol I, due to the fact that the subject matter of the two instruments is closely connected;
 - rules are formulated more simply and succinctly from a concern to adapt them to the special context of non-international armed conflict;
 - co-existence with common Article 3, each remaining autonomous. This is a fundamental change in comparison with the 1972 draft. The ICRC accepted the point of view expressed by numerous experts, that it is desirable that common Article 3 and Protocol II should co-exist autonomously: in fact, to link the Protocol to common Article 3 would have resulted in restricting the latter's scope of application. But it is important that, on the contrary, the scope of common Article 3 remains unchanged, since it confers fundamental guarantees upon the victims of all non-international armed conflicts.⁵⁵ According to this point of view, draft Protocol II is no longer additional only to common Article 3, but to the Geneva Conventions as a whole. Article 3, which has a broad scope of application, will continue to apply in all non-international armed conflicts, while Protocol II would apply to situations specified in the definition given in its Article 1;

⁵³ *Ibid.*, Vol. I, pp. 72-73, paras. 2.107-2.113; pp. 84-87, paras. 2.236-2.278.

⁵⁴ See commentary Art. 14, *infra*, p. 1455.

⁵⁵ O.R. VIII, p. 204, CDDH/I/SR.22, para. 16.

- the draft does not specify special categories of protected persons who would be entitled to particular treatment, but lays down a certain number of fundamental guarantees for the benefit of all persons in the power of parties to the conflict.

4404 These few basic features are intended merely “to place” the draft in context. For the rest, the reader should refer to the text itself.⁵⁶

Negotiations during the Diplomatic Conference

4405 The organization of the Conference and the rules of procedure are outlined in the general introduction.⁵⁷ However, we should mention here a decision which, in this field, had important consequences for the *travaux préparatoires* of Protocol II.

4406 The two draft Protocols submitted to the Conference were based on the same structure; for that matter, the interrelation of the subject matter led the Conference to consider the two drafts in parallel on the President’s proposal.

4407 Opting for this procedure had the advantage of avoiding the risk that Protocol II should be treated as a “poor relation”. In fact, there may have been reason to fear that consideration of Protocol II could have been left or postponed until the last minute. On the other hand, the simultaneous consideration of the two drafts entailed the disadvantage of the text becoming rather more ponderous in comparison with the initial draft. In fact, what might be called a “maximalist tendency” – the opinion of delegates who were in favour of a Protocol with the same tenor for both categories of conflicts, i.e., international and non-international conflicts – in some cases resulted in the adoption of rules which were more detailed than they had been initially.

4408 In the first session it was not really possible to deal with the substance of Protocol II (with the exception of Committee III), but the work was divided amongst the various Committees, each of which was given a certain number of articles to consider. Furthermore, this first session marked an important turning point, because wars known as “wars of liberation” were excluded from Protocol II and were henceforth included among international conflicts by the adoption of Article 1 of draft Protocol I.

4409 Negotiations on Protocol II really got underway during the second session of the Conference. The procedure of parallel consideration of the two drafts was followed up to the end of the work of the Conference.

4410 When the Committees had completed their work, approximately two weeks before the end of the Conference, the draft Protocol II resulting therefrom was more complete and detailed than the ICRC draft. By analogy with draft Protocol I, some provisions had been added, such as the protection of cultural objects and places of worship and the general protection of civilian objects; other articles which were contained in the initial draft in a simplified form, had been transposed from draft Protocol I to draft Protocol II in such a way that the wording was no

⁵⁶ The draft is contained in *O.R. I*, Part III, pp. 33-46.

⁵⁷ See *supra*, general introduction to the Commentary.

longer restricted only to basic rules, but also covered the various ways of implementing them.

- 4411** The more comprehensive character of the draft resulting from the work of the Committees is a consequence of the parallel consideration given to the two instruments, and of the interrelation of their subject matter. However, it can also be explained by the scope of application which is clearly defined in Article 1 of the draft, and which could have allowed for the adoption of more detailed rules.
- 4412** A few days before the beginning of the final plenary meetings it became clear that the draft produced by the Committees would not be acceptable to everyone, and in any case would not be adopted by consensus. A number of delegations revealed their reluctance and again expressed the fears which they had shown since the beginning of the undertaking. These fears were related to two aspects: on the one hand, they did not believe that the draft provided sufficient guarantees for respect due to national sovereignty and for non-interference with internal affairs; on the other hand, some of the rules seemed to be too detailed to be realistic or to be able genuinely to be applied in the specific context of internal armed conflicts.
- 4413** After a number of unofficial consultations, the head of the Pakistani delegation took the initiative of producing a simplified draft of Protocol II, which could meet the concerns which had been expressed.⁵⁸
- 4414** What was the tenor of this draft? Reduced by half (24 articles instead of 48), it retained the same structure as the initial draft and did not include any drafting modifications in the articles that were retained. The new proposal did not intend that the formulae which had slowly come to fruition in the Committees should be renegotiated, but consisted of deletions in the text of the draft in order to remove the obstacles to adopting it.
- 4415** Thus all the elements considered to contain any possibility at all of being interpreted in the sense of a recognition of insurgent parties were deleted. This was the case with regard to the provision on the equality of the rights and duties of the parties to the conflict as, according to some, it could have given rise to beginnings of recognition. Such extreme caution also led to the deletion of the term “parties to the conflict” throughout the draft.⁵⁹
- 4416** The strictly humanitarian rules were retained, with simplified wording: for example, as the protection of children, which was dealt with in very detailed provision, seemed unrealistic, it was retained as a principle only and inserted in the article relating to fundamental guarantees. In the end all the rules dealing with the conduct of hostilities, except for the question of quarter, were left out of the draft, but is nevertheless retained the general principle that the civilian population and works and installations containing dangerous forces should be protected. It should be noted that a simplified set of rules of this type had already been recommended by the Canadian delegation during the second session,

⁵⁸ This project was submitted to the Conference under number CDDH/427. It is included in *O.R.* IV in the form of an amendment to each Article of Protocol II.

⁵⁹ See commentary Preamble, *infra*, p. 1337.

though this had not taken the form of an amendment.⁶⁰ There is little doubt that to some extent the Pakistani delegate followed this Canadian draft. As regards the scope of application, the proposal for the simplified Protocol included Article 1 of the draft as adopted by the Committee; the proposal, with its high threshold of application and greatly simplified rules, left common Article 3 intact.

4417 Numerous unofficial negotiations took place during the following days and meetings of regional groups were held. In record time, about four days, the fate of Protocol II was sealed, with an agreement which may not have satisfied everyone, but which did allow it to be adopted by consensus.

4418 One important procedural point remained for the Conference to settle: what was the status of the new draft in relation to that prepared by the Committees? The President of the Conference suggested that the simplified version of the text adopted in Committee should be considered as an amendment to the latter.⁶¹ That proposal was accepted. The draft prepared by the Committees was therefore retained as a working basis, while the simplified draft was submitted as an amendment, article by article, as each article was dealt with. The prior agreements were instrumental in the plenary meeting to resolve the matter. Protocol II, in the form it was adopted, corresponds to the proposal put forward by Pakistan as supplemented on various points. In fact, some rules which the Pakistani draft wanted to be deleted were nevertheless retained, following a vote. In this respect the protection of objects necessary for the survival of the civilian population can be quoted, as well as the protection of cultural objects and places of worship and a much abbreviated provision on relief. After an article by article examination in plenary meetings, Protocol II was adopted as a whole by consensus on 8 June 1977.⁶² Some delegations were rather disappointed, for the result fell short of their hopes, especially because of the high threshold for applying the instrument. Such regrets should not be disregarded, but nevertheless it should not be forgotten that Protocol II constitutes a body of minimum rules developed and accepted by the international community as a whole. Although it was not possible to go as far as one might have wished, the consensus in this particular case, apart from its intrinsic value, indicates an undeniable moral weight.

Protocol II

Preamble

The High Contracting Parties,

Recalling that the humanitarian principles enshrined in article 3 common to the Geneva Conventions of 12 August 1949, constitute the foundation of respect for the human person in cases of armed conflict not of an international character,

Recalling furthermore that international instruments relating to human rights offer a basic protection to the human person,

Emphasizing the need to ensure a better protection for the victims of those armed conflicts,

Recalling that, in cases not covered by the law in force, the human person remains under the protection of the principles of humanity and the dictates of the public conscience,

Have agreed on the following:

Documentary references

Commentary

General remarks

4419 This very brief preamble expresses several fundamental viewpoints which will serve as guidelines for the interpretation of the rules of the Protocol, explain the reasons which inspired them and help to provide for cases for which there are no provisions.¹ In contrast with the 1949 Conference, which had to abandon the idea of including a preamble for the Conventions because it was unable to come up with a formula which met with agreement,² and contrary to some negative views expressed during the Conference of Government Experts, on the basis of which difficulties in this respect might have been anticipated,³ the ICRC draft was adopted by consensus without any amendment being submitted to the proposed text.⁴

“The High Contracting Parties”

4420 The High Contracting Parties are those States for which the Protocol is in force in the sense of Article 23 (*Entry into force*), either because they have ratified it, because they have acceded to it, or because they have expressed their will to be bound by it by means of a notification of succession.

4421 The term “High Contracting Party” should be understood to mean “Party” in the sense of the Vienna Convention on the Law of Treaties of 23 May 1969, i.e., “a State which has consented to be bound by the treaty and for which the treaty is in force”.⁵

4422 The expression is frequently used throughout the Conventions and the Protocols. It has the same meaning and the same scope whenever used in these various instruments.⁶

4423 The regulation of non-international armed conflicts, i.e., common Article 3 of the Conventions and Protocol II, is based on the existence of two or more parties confronting each other. However, only the legal government, or the government in power, of the State Party to common Article 3, or to Protocol II, is a “High Contracting Party”; in fact, even if the *de facto* authority leading the struggle against the government exercises the same rights and undertakes the same humanitarian obligations⁷ in the context of those instruments, it is not a High Contracting Party in the eyes of the law. Following common Article 3 on

this point,⁸ the ICRC draft used the expression “parties to the conflict” to describe the entities involved in the conflict.⁹ Every mention of parties to the conflict was subsequently deleted from the text from a concern that it might be interpreted as a recognition of the insurgent party.¹⁰ As the Official Records of the Conference refer to “parties to the conflict” with a lower case “p”,¹¹ the Commentary follows the same course if only for the purpose of giving the necessary explanations for a better comprehension of the text.

First paragraph

- 4424 This paragraph reaffirms the great importance of common Article 3, the “parent provision”, thus presenting Protocol II as an extension of it.
- 4425 The humanitarian principles enshrined in that article are recognized as the foundation of the protection of the human person in cases of non-international armed conflict. What are these principles?
- 4426 They can be summarized by stating that they are fundamental guarantees of humane treatment (physical and mental integrity) for all those who do not, or who no longer participate in hostilities, and of the right to a fair trial. Respect for such humanitarian principles implies in particular protection of the civilian population, respect for the enemy *hors de combat*, assistance for the wounded and sick, and humane treatment for those deprived of their liberty. Protocol II reaffirms or develops these principles on the basis of these fundamental tenets which remain unchanged. The conditions under which they are to be applied are laid down in Article 1 (*Material field of application*).

Second paragraph

- 4427 This paragraph establishes the link between Protocol II and the international instruments on human rights. The paragraph is based on a proposal made by the experts which was then included in the ICRC draft.¹²
- 4428 The term “international instruments relating to human rights” means the instruments adopted by the United Nations, i.e., on the one hand, the Universal Declaration of Human Rights and the Covenants derived from it,¹³ in particular the Covenant on Civil and Political Rights, and on the other, the instruments concerning specific aspects of the protection of human rights, such as the

⁸ Common Art. 3, para. 4.

⁹ See in particular draft Art. 5.

¹⁰ *O.R.* IV, p. 16, CDDH//427; *O.R.* VII, p. 61, CDDH/SR.49, para. 11.

¹¹ At the suggestion of one delegation; see *O.R.* VIII, pp. 213-214, CDDH/I/SR.22, paras. 62-64.

¹² *CE 1972, Report*, Vol. I, p. 120, paras. 2.536-2.537 and 2.539.

¹³ The Universal Declaration was adopted by the United Nations in 1948; the International Covenants on Economic, Social and Cultural Rights, and on Civil and Political Rights, were both adopted on 16 December 1966 and entered into force on 3 January 1976 and 23 March 1976, respectively.

Convention on genocide¹⁴ and the Convention on the elimination of racial discrimination,¹⁵ which are often invoked in situations of non-international armed conflict, and also the recent Convention on torture,¹⁶ to mention only a few of the most important ones. Regional instruments relating to human rights also fall under this term.¹⁷ It is the first time that the term is explicitly used in a treaty on humanitarian law.

4429 The Conventions and their additional Protocols have the same purpose as international instruments relating to human rights, i.e., the protection of the human person. However, these are two distinct legal systems, each with its own foundations and mechanisms, and international humanitarian law applies in situations of armed conflict. Human rights continue to apply concurrently in time of armed conflict.¹⁸ The human rights treaties provide that some rights may be suspended “in time of public emergency which threatens the life of the nation”,¹⁹ i.e., when there is serious strife or conflict, and then only insofar as is strictly required by the exigencies of the situation. However, the provisions made in this respect do not allow for derogation from so-called fundamental rights protecting the human person, which guarantee respect for the physical and mental integrity of the person.

4430 This irreducible core of human rights, also known as “non-derogable rights”, corresponds to the lowest level of protection which can be claimed by anyone at any time. Protocol II contains virtually all the irreducible rights of the Covenant on Civil and Political Rights,²⁰ which constitute the basic protection mentioned in the paragraph under consideration here. These rights are based on rules of universal validity to which States can be held, even in the absence of any treaty obligation or any explicit commitment on their part. It may be accepted that they form part of *jus cogens*.²¹ This view may be controversial for some of these rights, but there is no doubt whatsoever as regards, for example, the prohibition of

¹⁴ Convention on the Prevention and Punishment of the Crime of Genocide, adopted on 9 December 1948.

²⁰ See Part II, Protocol II and the introduction thereto, *infra*, p. 1365.

²¹ Vienna Convention on the Law of Treaties, Art. 53 – Treaties conflicting with a peremptory norm of general international law (*jus cogens*): “[...] a peremptory norm of general international law is a norm accepted and recognized by the international community of States as a whole as a norm from which no derogation is permitted and which can be modified only by a subsequent norm of general international law having the same character”.

slavery and torture, even without entering into a discussion whether *jus cogens* exists at all.²²

Third paragraph

4431 This paragraph underlines the *raison d'être* of the Protocol, i.e., the need to ensure a better protection for victims of non-international armed conflict.²³

Fourth paragraph

4432 This is inspired by the so-called Martens clause, named after its author, which is contained in the Preambles of the 1899 and 1907 Conventions respecting the laws and customs of war on land.

4433 In the absence of a preamble, this clause had already been included in the Conventions in the article on denunciation.²⁴ Article 1 (*General principles and scope of application*), paragraph 2, of Protocol I uses a similar formula.²⁵ The wording of the paragraph under consideration here is shorter and takes into account the specific nature of non-international armed conflicts.

4434 If a case is “not covered by the law in force”, whether this is because of a gap in the law or because the parties do not consider themselves to be bound by common Article 3, or are not bound by Protocol II, this does not mean that anything is permitted. “The human person remains under the protection of the principles of humanity and the dictates of the public conscience”: this clarification prevents an *a contrario* interpretation. Since they reflect public conscience, the principles of humanity actually constitute a universal reference point and apply independently of the Protocol.

4435 It should be noted that in contrast to Article 1 (*General principles and scope of application*), paragraph 2, of Protocol I, there is no mention of established custom. This should not be interpreted as a rejection on the part of the Conference, as the ICRC had not made a proposal to that effect in its initial draft. It was apparently felt that the regulation of non-international armed conflicts was too recent a matter for State practice to have sufficiently developed in this field. In our opinion this cautious point of view requires some clarification as there is more to it than that. Even though customary practices are traditionally only recognized as playing a role in international relations, the existence of customary norms in internal armed conflicts should not be totally denied. An example that might be given is the respect for and protection of the wounded. Irrespective of

the qualification of the conflict as an internal or international conflict, the codes of conduct are not fundamentally different.²⁶ This is shown by the Lieber Code,²⁷ as it was developed for a civil war, based on the existing principles of the laws of war. In their turn the negotiators of the 1899 and 1907 Conventions did not hesitate to seek inspiration from it.

Part I – Scope of this Protocol

Commentary

- 4436 At the basis of the Protocol, Part I lays down the conditions of its application (Article 1 – *Material field of application*) and defines the beneficiaries of the rules it contains and those for whom they are intended (Article 2 – *Field of personal application*). As the Protocol is the result of a compromise between humanitarian requirements and those of State security, the negotiators also considered it necessary to include a clause safeguarding the inviolability of the national sovereignty of States (Article 3 – *Non-intervention*).
- 4437 The content and scope of all of these articles will be analysed in the respective comments on them. Before doing this it seems useful to have a closer look at the basic pattern of Part I, which reveals the similarity of the ideas which inspired Protocol II and common Article 3. To understand the scope of the Protocol one should indeed always bear in mind the fact that this instrument supplements and develops common Article 3; it is an extension of it, and is based on the same structure.¹ Their common characteristics find expression, explicitly or implicitly, in Part I. These can be summarized as follows:

1. Protocol II and common Article 3 apply automatically once there is a *de facto* situation of armed conflict²

- 4438 The threshold where Protocol II becomes applicable is determined by the criteria expressed in Article 1 (*Material field of application*),³ which means that it is intended to apply only to conflicts of a certain degree of intensity. The principle that it will automatically apply is based on humanitarian requirements, for the implementation of rules for the protection of victims should not be dependent on the subjective judgment of the parties.⁴ Good faith in the application of these instruments remains a basic element.

¹ Several delegations stressed what one delegate referred to as the “essential identity” between common Article 3 and Protocol II. See, in particular, *O.R.* VIII, p. 234, CDDH/I/SR.24, para. 27.

² On the concept of armed conflict, *cf. Commentary I*, pp. 51-52 (common Art. 3) and the general introduction to the Commentary on Protocol II, *supra*, p. 1319.

³ See Art. 1 of Protocol II and the commentary thereon, *infra*, p. 1347.

⁴ One delegation proposed that the State should determine whether the conditions of application were fulfilled. This proposal was not supported since it would have constituted a step backwards compared to 1949. See *O.R.* VII, pp. 66-68, CDDH/SR.49, in particular paras. 39, 51-52.

2. The application of Protocol II and common Article 3 does not in any way confer international recognition on the insurgent party⁵

4439 Common Article 3 expressly provides that the application of its provisions will have no effect on the legal status of the parties to the conflict. The ICRC draft contained a reaffirmation of that clause.⁶ As every mention of “parties to the conflict” had been deleted, that article was no longer relevant, and consequently it was dropped. According to some delegations, the mere mention of parties to the conflict in the text of the Protocol could have implied a semblance of recognition of an insurgent party.⁷

4440 Like common Article 3, Protocol II has a purely humanitarian purpose and is aimed at securing fundamental guarantees for individuals in all circumstances. Thus, its implementation does not constitute recognition of belligerency even implicitly⁸ nor does it change the legal nature of the relations between the parties engaged in the conflict. In this respect it is interesting to note that up to now neither common Article 3, nor Protocol II, has ever been used for the purpose of claiming recognition.

3. Protocol II and common Article 3 do not grant a special status to members of the armed forces or armed groups captured by the adversary

4441 Following the example of common Article 3, Protocol II does not establish any special category of protected persons, nor does it create any special legal status. A member of the armed forces in the power of the adverse party and a civilian deprived of his liberty for a reason related to the conflict enjoy the same legal protection (Article 4 – *Fundamental guarantees*, Article 5 – *Persons whose liberty has been restricted*, and Article 6 – *Penal prosecutions*). National law remains in force, i.e., the authorities retain the right to prosecute and, when necessary, to sentence persons who have been found guilty of offences related to the conflict. In particular the Protocol does not prevent bringing to justice a member of an insurgent armed group for the act of taking up arms. It does not confer upon him either combatant or prisoner-of-war status.⁹

⁵ To describe armed opposition to the government we adopt the term “insurgents”, which will be used throughout the Commentary on Protocol II.

⁶ Draft Art. 3 (Legal status of the parties to the conflict).

⁷ *O.R.* VII, p. 85, CDDH/SR.50, para. 3. See also *ibid.*, p. 61, CDDH/SR.49, para. 11.

⁸ See the general introduction to Protocol II, *supra*, p. 1320 (recognition of belligerency).

⁹ It should be recalled that: “the death penalty shall not be pronounced on person who were under the age of eighteen years at the time of the offence and shall not be carried out on pregnant women or mothers of young children” (Art. 6, para. 4), and that the authorities in power shall endeavour to grant the broadest possible amnesty at the end of hostilities (*ibid.*, para. 5). In addition, the ICRC has always attempted in practice to recommend measures of clemency both to protect persons and to prevent the escalation of violence.

4. Protocol II and common Article 3 are based on the principle of the equality of the parties to the conflict

4442 The deletion from the text of all mention of “parties to the conflict” only affects the drafting of the instrument, and does not change its structure from a legal point of view. All the rules are based on the existence of two or more parties confronting each other. These rules grant the same rights and impose the same duties on both the established government and the insurgent party, and all such rights and duties have a purely humanitarian character.

4443 The ICRC draft clarified this point in an article which reads as follows: “The rights and duties of the parties to the conflict under the present Protocol are equally valid for all of them.”¹⁰ The Conference decided not to include it during the final stage of the adoption of the Protocol.¹¹

4444 The question is often raised how the insurgent party can be bound by a treaty to which it is not a High Contracting Party.¹² It may therefore be appropriate to recall here the explanation given in 1949: the commitment made by a State not only applies to the government but also to any established authorities and private individuals within the national territory of that State and certain obligations are therefore imposed upon them. The extent of rights and duties of private individuals is therefore the same as that of the rights and duties of the State. Although this argument has occasionally been questioned in legal literature, the validity of the obligation imposed upon insurgents has never been contested.¹³

5. The offer of services by an impartial humanitarian organization, such as the ICRC, cannot be considered as interference in the conflict or in the internal affairs of the State.

4445 Common Article 3 gave the ICRC the right of initiative in situations of non-international armed conflict.¹⁴ Even in the absence of explicit reaffirmation, it continues to apply, since Protocol II has an “additional” character.¹⁵ The parties to the conflict retain complete freedom to refuse or accept such an offer of services, but it may not in itself be considered as a hostile act or as intervention;

¹⁰ Draft Art. 5 (Rights and duties of the parties to the conflict).

¹¹ *O.R.* VII, p. 86, CDDH/SR.50, para. 9. See also *ibid.*, p. 76, CDDH/SR.49, Annex (Belgium). This explanation of vote reaffirms the philosophy of common Article 3, and in particular “the basic sovereign principle that the obligations of the Protocol are equally binding on both Parties to the conflict”.

¹² For the meaning of “High Contracting Party”, see the commentary on the Preamble to Protocols I and II, *supra*, pp. 25 and 1338.

¹³ See *Commentary I*, pp. 52-53 (common Art. 3). See also *CE 1971, Report*, p. 44, para. 223.

¹⁴ Common Art. 3, para. 4. See Y. Sandoz, “Le droit d’initiative humanitaire”, 22 *GYIL*, 1979, p. 352.

¹⁵ *Cf.* commentary Art. 3, para. 2, *infra*, p. 1363. On the statement by the ICRC: see *O.R.* VII, p. 151, CDDH/SR.53, para. 64.

moreover, the Protocol provides for the possibility of appealing to a humanitarian organization, in particular by mentioning the possibility of undertaking international relief actions.¹⁶

S.J.

¹⁶ See Art. 18, para. 2, Protocol II and the commentary thereon, *infra*, p. 1478.

Protocol II

Article 1 – Material field of application

1. This Protocol, which develops and supplements Article 3 common to the Geneva Conventions of 12 August 1949 without modifying its existing conditions of application, shall apply to all armed conflicts which are not covered by Article 1 of the Protocol Additional to the Geneva Conventions of 12 August 1949, and relating to the Protection of Victims of International Armed Conflicts (Protocol I) and which take place in the territory of a High Contracting Party between its armed forces and dissident armed forces or other organized armed groups which, under responsible command, exercise such control over a part of its territory as to enable them to carry out sustained and concerted military operations and to implement this Protocol.
2. This Protocol shall not apply to situations of internal disturbances and tensions, such as riots, isolated and sporadic acts of violence and other acts of a similar nature, as not being armed conflicts.

Commentary

General remarks

- 4446** As the heading indicates, Article 1 defines the material field of application of the Protocol, i.e., it determines the circumstances in which it applies. This provision constitutes the keystone of the instrument. It is the result of a delicate compromise, the product of lengthy negotiations, and the fate of the Protocol as a whole depended on it until it was finally adopted in the plenary meetings of the Conference.¹
- 4447** At first sight the article seems to be based on complicated concepts. In fact, the Protocol only applies to conflicts of a certain degree of intensity and does not have exactly the same field of application as common Article 3, which applies in all situations of non-international armed conflict. Why there are these different steps in the applicable legal system can be more easily explained in the light of a brief historical survey.
- 4448** Common Article 3 does not contain a definition of armed conflict.² In the absence of clarity of this concept, it gave rise to a great variety of interpretations and in practice its applicability was often denied. To improve the protection of the victims on non-international armed conflicts it proved necessary not only to develop the rules, but also to find more objective criteria to determine whether they are applicable and to reduce the measure of discretion left to each government.
- 4449** Initially two possibilities had been envisaged: either to establish a procedure for determining objectively whether an armed conflict existed, or to clarify the concept of non-international armed conflict, i.e., to select a number of concrete material elements so that, when these elements are present, the authorities concerned could no longer deny the existence of a conflict.
- 4450** It became apparent during the Conference of Government Experts that the first above-mentioned procedure would be too difficult to achieve.³ Therefore this left the second solution, i.e., to formulate a definition, although everyone was fully aware of the risks incurred by such an undertaking. The applicability of common Article 3 was often not recognized because of the absence of a definition, but too rigid or too restrictive a definition would entail the risk of the Protocol not applying either. The work of the Conference of Government Experts showed

¹ See *O.R.* VII, pp. 66-73, CDDH/SR.49, paras. 37-83. Article 1 was adopted as the result of a vote by roll-call (by 58 votes to 5, with 29 abstentions).

² See *Commentary I*, pp. 49-51, and the introduction to this Part, *supra*, p. 1343.

³ See *CE 1971, Report*, p. 37.

how many divergent views and possible solutions existed. Six variants were formulated, based on thirteen proposals. The first was based on the view that a single Protocol should apply to all types of armed conflict without distinguishing between them; the other five, which only applied to non-international armed conflicts, ranged from the broadest conceivable definition, covering all situations, including those where the level of strife was very low, to the narrowest possible definition, covering only very intense conflicts with all the material characteristics of a war.⁴ Taking the views that were expressed into account, the ICRC attempted in its draft to propose a formula defining the characteristics of non-international armed conflicts, while remaining sufficiently general and flexible to be able to apply to all such situations.⁵

4451 The draft endeavoured to meet three concerns:

- 1) to establish the upper and lower thresholds of non-international armed conflict;
- 2) to provide the elements of a definition;
- 3) to ensure that the achievements of common Article 3 would remain intact.

4452 The upper threshold was defined by reference to armed conflicts within the meaning of common Article 2 of the Conventions. This formula was retained, but updated by referring instead to conflicts as covered by Article 1 of Protocol I (*General principles and scope of application*).

4453 The exclusion of situations of internal disturbances and tensions from the Protocol's field of application determined the lower threshold. This proposal, which corresponded with the views of the majority of the experts consulted previously, was also adopted and is now contained in paragraph 2 of the present text. The ICRC proposed a broad definition based on material criteria: the existence of a confrontation between armed forces or other organized armed groups under responsible command, i.e., with a minimum degree of organization. As its representative submitting the draft article in Committee explained, the intention was "to specify the characteristics of a non-international armed conflict by means of objective criteria so that the Protocol could be applied when those criteria were met and not be made subject to other considerations".⁶ Although the basic idea underlying the proposal was approved, it turned out to be very difficult to achieve a consensus as to what criteria should be used in the definition. Apart from amendments, numerous proposals were put forward in the Working Group and Sub-Group. It was in fact necessary to create a Sub-Group of the Working Group and this had to meet six times before reaching an agreement.⁷ The three criteria that were finally adopted on the side of the insurgents i.e. – a responsible command, such control over part of the territory as to enable them to carry out sustained and concerted military operations, and the ability to implement the Protocol – restrict the applicability of the Protocol to conflicts of a certain degree of intensity. This means that not all cases of non-international armed conflict are covered, as is the case in common Article 3.

⁴ See *CE 1972, Report*, Vol. I, p. 71. *O.R. VIII*, p. 203, CDDH/I/SR.22, para. 11.

⁵ Draft Art. 1.

⁶ See *O.R. VIII*, p. 203, CDDH/I/SR.22, para. 12.

⁷ See *O.R. X*, pp. 93-94, CDDH/I/238/Rev.1.

- 4454 Finally, the ICRC draft endeavoured to keep intact the achievements of common Article 3 by providing that the conditions of application of that article would not be modified. Keeping the conditions of application of common Article 3 as they are, and stipulating that the proposed definition will not apply to that article, meant that the Protocol was conceived as a self-contained instrument, additional to the four Conventions and applicable to all armed conflicts which comply with the definition and are not covered by common Article 2. Keeping the Protocol separate from common Article 3 was intended to prevent undercutting the scope of Article 3 itself by laying down precise rules. In this way common Article 3 retains an independent existence.
- 4455 As adopted, Article 1 of the Protocol takes into account most of these proposals, which are explicitly set out in paragraph 1.

Paragraph 1

- 4456 On the one hand, paragraph 1 establishes the link between the Protocol and common Article 3; on the other, it distinguishes international armed conflicts from non-international armed conflicts by means of a negative reference to Article 1 of Protocol I (*General principles and scope of application*). Finally, it lays down the material criteria determining the circumstances in which the Protocol is applicable.

1. *The link with common Article 3*

- 4457 Formally, the Protocol is additional to the four Conventions. In order to reinforce and increase the protection granted to victims of non-international armed conflict – the *raison d'être* of Protocol II – it develops and supplements the brief rules contained in common Article 3 “without modifying its existing conditions of application”. This explicit reference constitutes one of the bases of the compromise which made the adoption of Article 1 possible. In fact, the Conference chose in favour of the solution which makes the scope of protection dependent on intensity of the conflict. Thus, in circumstances where the conditions of application of the Protocol are met, the Protocol and common Article 3 will apply simultaneously, as the Protocol’s field of application is included in the broader one of common Article 3. On the other hand, in a conflict where the level of strife is low, and which does not contain the characteristic features required by the Protocol, only common Article 3 will apply.⁸ In fact, common Article 3 retains an autonomous existence, i.e., its applicability is neither limited nor affected by the material field of application of the Protocol. This formula, though legally rather complicated, has the advantage of furnishing a guarantee against any reduction of the level of protection long since provided by common Article 3.

⁸ Mention should also be made of the possibility that armed factions confront each other without the armed forces of the government being involved; see *infra*, p. 1351.

2. *The distinction between international and non-international conflicts*

4458 Taking into account the link established with common Article 3, the Protocol applies to all armed conflicts which are not covered by Article 1 of Protocol I (*General principles and scope of application*). By excluding situations covered by Protocol I, this definition creates the distinction between international and non-international armed conflicts. The entities confronting each other differ, depending on which category the conflict falls under; in a non-international armed conflict the legal status of the parties involved in the struggle is fundamentally unequal. Insurgents (usually part of the population), fight against the government in power acting in the exercise of the public authority vested in it.⁹ This distinction sets the upper threshold for the applicability of the Protocol.

3. *The objective criteria*

4459 This paragraph lays down a number of objective criteria for determining the field of application of the Protocol. Its application should not depend on the discretionary judgment of the parties. The Protocol applies automatically as soon as the material conditions as defined in the article are fulfilled. The aim of this system is that the protection of the victims of armed conflict should not depend on an arbitrary decision of the authorities concerned – this is one of the cornerstones of international humanitarian law and already applied to Articles 2 and 3 common to the 1949 Conventions.

3.1. *The parties confronting each other*

4460 The Protocol applies on the one hand in a situation where the armed forces of the government confront dissident armed forces, i.e., where there is a rebellion by part of the government army or where the government's armed forces fight against insurgents who are organized in armed groups, which is more often the case. This criterion illustrates the collective character of the confrontation; it can hardly consist of isolated individuals without co-ordination.

4461 In its draft the ICRC had provided that the Protocol would be applicable in the case of several factions confronting each other without involvement of the government's armed forces, for example, if the established government had disappeared or was too weak to intervene.¹⁰ Such a situation, it appeared to the Conference, was merely a theoretical textbook example and the provision was dropped, even though the ICRC had already been confronted with this type of situation. Thus unfortunately the definition does not cover such cases and only common Article 3 will apply to them. Of course, the possibility will always exist

⁹ See *O.R. VIII*, pp. 203-204, CDDH/I/SR.22, paras. 13-14.

¹⁰ *Commentary Drafts*, pp. 132-133.

of putting the Protocol into force by special agreement, as provided by common Article 3.¹¹

4462 The term “armed forces” of the High Contracting Party should be understood in the broadest sense. In fact, this term was chosen in preference to others suggested such as, for example, “regular armed forces”, in order to cover all the armed forces, including those not included in the definition of the army in the national legislation of some countries (national guard, customs, police forces or any other similar force).¹²

3.2. *The responsible command*

4463 The existence of a responsible command implies some degree of organization of the insurgent armed group or dissident armed forces, but this does not necessarily mean that there is a hierarchical system of military organization similar to that of regular armed forces. It means an organization capable, on the one hand, of planning and carrying out sustained and concerted military operations, and on the other, of imposing discipline in the name of a *de facto* authority.

3.3. *Control over a part of the territory*

4464 The article provides that the armed groups of the opposition must be able to exercise “such control over a part of [the High Contracting Party’s] territory as to enable them to carry out sustained and concerted military operations and to implement this Protocol”.

4465 These various criteria are closely related. Control over a part of the territory requires that the insurgent armed groups are organized.¹³ What part of the territory should be controlled is not specified. In fact, several proposals were made with a view to specifying that this should be “a non-negligible part of the territory”¹⁴ or a “substantial part of the territory”,¹⁵ but they were not adopted by the Conference.

4466 The word “such” provides the key to the interpretation. The control must be sufficient to allow sustained and concerted military operations to be carried out¹⁶ and for the Protocol to be applied, i.e., for example, caring for the wounded and the sick, or detaining prisoners and treating them decently, as provided in Articles 4 (*Fundamental guarantees*) and 5 (*Persons whose liberty has been restricted*).

4467 In many conflicts there is considerable movement in the theatre of hostilities; it often happens that territorial control changes hands rapidly. Sometimes domination of a territory will be relative, for example, when urban centres remain

¹¹ Common Art. 3, para. 3.

¹² *O.R. X*, p. 94, CDDH/I/238/Rev.1.

¹³ In this context “control” is synonymous with domination. *Cf.* Shorter Oxford English Dictionary (1978), pp. 416 and 594.

¹⁴ *O.R. IV*, p. 8, CDDH/I/79.

¹⁵ *Ibid.*, p. 7, CDDH/I/32.

¹⁶ See *infra*.

in government hands while rural areas escape their authority. In practical terms, if the insurgent armed groups are organized in accordance with the requirements of the Protocol, the extent of territory they can claim to control will be that which escapes the control of the government armed forces. However, there must be some degree of stability in the control of even a modest area of land for them to be capable of effectively applying the rules of the Protocol.

3.4. *The sustained and concerted character of military operations*

4468 In fact, it is the “sustained and concerted military operations” which effectively determine control of a territory. What does this mean exactly?

4469 “Sustained” (in French the reference is to “*opérations continues*”) means that the operations are kept going or kept up continuously.¹⁷ The emphasis is therefore on continuity and persistence. “Concerted” (in French: “*concertées*”) means agreed upon, planned and contrived, done in agreement according to a plan.¹⁸ Thus we are talking about military operations conceived and planned by organized armed groups. The criteria of duration and intensity¹⁹ were not retained as such in the definition because they would have introduced a subjective element. The applicability of the rules of protection of the Protocol must not in fact depend on the subjective judgment of the parties. On the other hand, the criterion whether military operations are sustained and concerted, while implying the element of continuity and intensity, complies with an objective assessment of the situation. At the beginning of a conflict military operations rarely have such a character; thus it is likely that only common Article 3 will apply to the first stage of hostilities.

3.5. *Ability to implement the Protocol*

4470 This is the fundamental criterion which justifies the other elements of the definition: being under responsible command and in control of a part of the territory concerned, the insurgents must be in a position to implement the Protocol. The threshold for application therefore seems fairly high. Yet, apart from the fact that it reflects the desire of the Diplomatic Conference, it must be admitted that this threshold has a degree of realism. The conditions laid down in this paragraph 1, as analysed above, correspond with actual circumstances in which the parties may reasonably be expected to apply the rules developed in the Protocol, since they have the minimum infrastructure required therefor.

¹⁷ Shorter Oxford English Dictionary (1978), p. 2205.

¹⁸ *Ibid.*, p. 389.

¹⁹ See *O.R.* IV, pp. 6-7, CDDH/I/26, CDDH/I/32, amendments which proposed formulae such as “the hostilities are of some intensity and continue for a reasonable period of time” and “over a prolonged period”.

Paragraph 2

- 4471 This paragraph expressly excludes situations of internal disturbances and tensions from the Protocol's field of application, as these are not considered as armed conflicts.²⁰
- 4472 It should be stressed that the criteria laid down in paragraph 1, taken by themselves, are clearly sufficient to exclude internal disturbances and, *a fortiori*, internal tensions.
- 4473 This paragraph was taken from the ICRC draft²¹ and made sense in the context of the original draft article. Its purpose was to define the lower threshold of the concept of armed conflict, assuming that the field of application of common Article 3 and the Protocol would be identical.²² The paragraph was not questioned and was retained and adopted without lengthy debates.²³
- 4474 No real definitions are given. The concept of internal disturbances and tensions may be illustrated by giving a list of examples of such situations without any attempt to be exhaustive: riots, such as demonstrations without a concerted plan from the outset; isolated and sporadic acts of violence, as opposed to military operations carried out by armed forces or armed groups; other acts of a similar nature, including, in particular, large scale arrests of people for their activities or opinions.²⁴
- 4475 As the ICRC has a legally recognized right of initiative to offer its services with a view to assisting and protecting the victims in such situations,²⁵ it has for a long

²⁰ The English phrase "as not being" is rendered in French as "qui ne sont pas considérés" (which are not considered as). This has no effect on the meaning.

²¹ Draft Art. 1, para. 2.

²² Art. 1, para. 1, of the draft read as follows: "The present Protocol shall apply to all armed conflicts not covered by Article 2 common to the Geneva Conventions of August 12, 1949, taking place between armed forces or other organized armed groups under responsible command"; see commentary para. 1, *supra*, p. 1350.

²³ In this respect the delegation of the Federal Republic of Germany stated: "This article constitutes a compromise solution which was difficult to reach. An essential element of this compromise is the fact that the existing conditions of application of Article 3 common to the Geneva Conventions are not modified. This is clearly expressed in Article 1, paragraph 1, of Protocol II. It also applies to paragraph 2 of the same article. Consequently, the negative definition of the term 'armed conflict' in paragraph 2 applies only to Protocol II, not to Article 3 common to the Geneva Conventions. This is the understanding of the Federal Republic of Germany as to the interpretation of Article 1 of Protocol II. It does not, however, intend to express any view, be it only by implication, on the meaning of the term 'armed conflict' as used in Article 3 common to the Geneva Conventions." See *O.R.* VII, pp. 79-80, CDDH/SR.49, Annex (FRG).

²⁴ See *Commentary Drafts*, p. 133.

²⁵ The Statutes of the International Red Cross, Art. VI, para. 5: "neutral institution whose humanitarian work is carried out particularly in time of war, civil war, or internal strife, it endeavours at all times to ensure the protection of and assistance to military and civilian victims of such conflicts and of their direct results [...]"; para 6: "It takes any humanitarian initiative which comes within its role as a specifically neutral and independent institution and intermediary and considers any question requiring examination by such an institution."

It should be noted that not only the constituent bodies of the Red Cross Movement (ICRC, League, the National Red Cross and Red Crescent Societies), but also States Parties to the Geneva Conventions are members of the International Conference of the Red Cross, the body which adopted the Statutes and which can modify them. *Cf.* also *supra*, Editors' note.

time been attempting to define them in order to better guide its activities. Originally drawn up for internal use, some definitions were submitted in particular to a group of government experts in 1970.²⁶ On the basis of their comments the ICRC gave the following description of internal disturbances during the first session of the Conference of Government Experts in 1971:²⁷

“This involves situations in which there is no non-international armed conflict as such, but there exists a confrontation within the country, which is characterized by a certain seriousness or duration and which involves acts of violence. These latter can assume various forms, all the way from the spontaneous generation of acts of revolt to the struggle between more or less organized groups and the authorities in power. In these situations, which do not necessarily degenerate into open struggle, the authorities in power call upon extensive police forces, or even armed forces, to restore internal order. The high number of victims has made necessary the application of a minimum of humanitarian rules.”

4476 As regards *internal tensions*,²⁸ these could be said to include in particular situations of serious tension (political, religious, racial, social, economic, etc.), but also the sequels of armed conflict or of internal disturbances. Such situations have one or more of the following characteristics, if not all at the same time:

- large scale arrests;
- a large number of “political” prisoners;²⁹
- the probable existence of ill-treatment or inhumane conditions of detention;
- the suspension of fundamental judicial guarantees, either as part of the promulgation of a state of emergency or simply as a matter of fact;
- allegations of disappearances.

4477 In short, as stated above, there are internal disturbances, without being an armed conflict, when the State uses armed force to maintain order; there are internal tensions, without being internal disturbances, when force is used as a preventive measure to maintain respect for law and order.

4478 These definitions are not contained in a convention but form part of ICRC doctrine (*supra* and note 27). While designed for practical use, they may serve to shed some light on these terms, which appear in an international law instrument for the first time.

²⁶ Cf. *Preliminary Report on the Consultation of Experts Concerning Non-International Conflict and Guerrilla Warfare*, ICRC, Geneva, 1970, p. 2.

²⁷ CE/5b, p. 79, reproduced in *The ICRC, the League and the Report on the Re-Appraisal of the Role of the Red Cross*, ICRC, Geneva, 1979, pp. 24-25 (offprint first published in the *IRRC* of July-August 1978, pp. 210-211).

²⁸ *Ibid.*

²⁹ It should be noted that there is no legal definition of so-called “political” prisoners. They may be referred to in very different ways depending on national legislation, for example, “persons detained for security reasons”, “persons detained by order of the executive”, etc.

4479 Internal disturbances and tensions are not at present within the field of application of international humanitarian law; the ICRC has carried out activities in this field on an *ad hoc* basis.³⁰ However, this does not mean that there is no international legal protection applicable to such situations, as they are covered by universal and regional human rights instruments.³¹ It is not within the scope of this commentary, however, to go into that subject.

Protocol II

Article 2 – Personal field of application

1. This Protocol shall be applied without any adverse distinction founded on race, colour, sex, language, religion or belief, political or other opinion, national or social origin, wealth, birth or other status, or on any other similar criteria (hereinafter referred to as “adverse distinction”) to all persons affected by an armed conflict as defined in Article 1.
2. At the end of the armed conflict, all the persons who have been deprived of their liberty or whose liberty has been restricted for reasons related to such conflict, as well as those deprived of their liberty or whose liberty is restricted after the conflict for the same reasons, shall enjoy the protection of Articles 5 and 6 until the end of such deprivation or restriction of liberty.

Commentary**General remarks**

- 4480 The provision defines the field of application *ratione personae* of the rules of the Protocol by indicating who benefits from them and for whom they are intended and how far they apply in place and time. Paragraph 1 affirms the principle of non-discrimination in the application of the Protocol to “all persons affected by an armed conflict”. The meaning to be given to this term will be indicated in the commentary on paragraph 1.
- 4481 Paragraph 2 specifies *ratione temporis* the legal protection of persons deprived of their liberty, who will continue to enjoy the fundamental guarantees of humane treatment and of judicial guarantees after the end of hostilities, not only if they were already detained, but also if they were arrested after the conflict came to an end. This rule reduces the risk of arbitrary behaviour by the victorious party.

Paragraph 1*Principle of non-discrimination*

- 4482 First, paragraph 1 lays down that persons protected by application of the rules of the Protocol must be treated equally. This concept is based on the principle of non-discrimination which is nowadays universally recognized in international law. The list of the various criteria of discrimination is not exhaustive. It is contained in other provisions of the Conventions and of the Protocols in greater or lesser detail.¹ Its scope is always the same.
- 4483 In Article 2 under consideration here, the list of criteria is very similar to that of the Covenant on Civil and Political Rights.² In this respect, it should be noted that a degree of correspondence in the terminology used in international instruments relating to human rights and those on humanitarian law makes for a certain measure of cohesion of the international rules for the protection of the human person, and is of help for their interpretation.
- 4484 “This Protocol shall be applied without any adverse distinction”: this formula is taken from common Article 3 of the Conventions. The adjective “adverse” is used to make an important point. In fact, favourable distinctions may be made quite lawfully, such as differences of treatment which may be made to take into account the suffering or distress or natural weakness of people (such as a child or an old man, for example), which call for special measures related to the urgency and needs of the case in point.³

¹ In particular, Art. 13, Fourth Convention, common Art. 3, Art. 75, Protocol I, and Art. 4, Protocol II.

² Art. 2 of the Covenant.

³ See *Commentary IV*, pp. 127-128 (Art. 13).

Field of application ratione personae

- 4485** Who are the people “affected by an armed conflict”? On the one hand, these are persons who do not, or no longer take part in hostilities and enjoy the rules of protection laid down by the Protocol for their benefit. On the other, they are those who must, within the meaning of the Protocol, conform to certain rules of conduct with respect to the adversary and the civilian population.⁴
- 4486** The ICRC draft was more explicit and clearer. It took up a Canadian proposal submitted during the Conference of Government Experts in 1971,⁵ and read as follows: “The present Protocol shall apply [...] to all persons, whether military or civilian, combatant or non-combatant, affected by an armed conflict.”⁶
- 4487** This proposal was based on two thoughts:
- by providing for a field of application that would cover everybody, combatants as well as non-combatants in the territory of the country where the conflict was taking place, there would be no need for the insurgent party to have a defined status;
 - by extending the field of application of the rules applicable in case of non-international armed conflict to cover combatants, the fact that the Protocol contains provisions on how to behave in combat and on the conduct of hostilities would be properly taken into account.⁷
- 4488** The final version of the article, as it now reads in the Protocol, is also the result of a Canadian amendment.⁸ Although the wording of the text is less explicit, the original approach has been retained and was not contested.
- 4489** The Protocol applies to all residents of the country engaged in a conflict, irrespective of their nationality, including refugees and stateless persons. It may happen that the authorities take special security measures with regard to aliens, and certain offences committed in connection with the conflict situation may be considered of greater or less severity, depending on whether they were committed by foreigners or nationals. These are administrative or judicial measures which, although based on the nationality criterion, are without prejudice to the guarantees on the treatment of individuals.⁹

Field of application ratione loci

- 4490** Persons affected by the conflict within the meaning of this paragraph are covered by the Protocol wherever they are in the territory of the State engaged in conflict. The situation may only affect a small part of the territory; this is why the Diplomatic Conference did not provide that the Protocol should automatically

⁵ *CE 1971, Report*, pp. 57 and 59-60 (Art. 1); *CE 1972, Commentaries*, Part II, p. 7.

⁶ Draft Art. 2, *Commentary Drafts*, p. 134.

⁷ For example, quarter (Art. 4, para. 1 *in fine*), or the protection of the civilian population (Art. 13).

⁸ *O.R. IV*, p. 11, CDDH/I/37; p. 13, CDDH/I/220.

⁹ *O.R. VIII*, p. 210, CDDH/I/SR.22, para. 45.

apply to the territory as a whole. No criterion *ratione loci* was adopted. As we saw above, the applicability of the Protocol follows from a criteria related to persons, and not to places.¹⁰

Field of application ratione temporis

4491 The starting point of the application of the Protocol is determined by Article 1, (*Material field of application*), paragraph 1, and corresponds to the moment when the criteria laid down in that article are objectively fulfilled.

4492 The text does not contain any indication as regards the end of its applicability.¹¹ Logically this means that the rules relating to armed confrontation are no longer applicable after the end of hostilities, while the fundamental guarantees granted persons deprived of their liberty are dealt with in paragraph 2 commented on below.

Paragraph 2

4493 In principle, measures restricting people's liberty, taken for reasons related to the conflict,¹² should cease at the end of active hostilities, i.e., when military operations have ceased, except in cases of penal convictions. Nevertheless, if such measures were maintained with regard to some persons for security reasons, or if the victorious party were making arrests in order to restore public order and secure its authority, legal protection would continue to be necessary for those against whom such actions were taken.

4494 That is the *raison d'être* of this paragraph, which provides that at the end of the armed conflict persons deprived of their liberty for reasons related to the conflict, either because they have not been released, or because they were arrested after the end of hostilities, continue to enjoy protection under the rules relating to detention (Article 5 – *Persons whose liberty has been restricted*) and judicial guarantees (article 6 – *Penal prosecutions*).

4495 These fundamental guarantees remain valid at all times and without any restriction in time, until the deprivation or restriction of the liberty of those concerned has come to an end. In fact, this is an essential protection for the individual.

4496 The article uses the terms “deprived of [...] liberty” and “whose liberty has been restricted” to ensure that there is no gap in protection.¹³ In fact, these terms cover all possible situations, from release subject to police supervision (such as house arrest or assigned residence, for example), to imprisonment.

S.J.

¹⁰ *Ibid.*, p. 211, paras. 47-48.

¹¹ An amendment which was not adopted proposed that the application of the Protocol should cease “upon the general cessation of military operations”; cf. *O.R.* IV, p. 12, CDDH/1/79.

¹² On the meaning of the term “for reasons related to the armed conflict”, cf. commentary Art. 5, para. 1, *infra*, p. 1385.

¹³ Concerning the term “interned or detained” persons, cf. also *ibid.*

Article 3 – Non-intervention

1. Nothing in this Protocol shall be invoked for the purpose of affecting the sovereignty of a State or the responsibility of the government, by all legitimate means, to maintain or re-establish law and order in the State or to defend the national unity and territorial integrity of the State.
2. Nothing in this Protocol shall be invoked as a justification for intervening, directly or indirectly, for any reason whatever, in the armed conflict or in the internal or external affairs of the High Contracting Party in the territory of which that conflict occurs.

Commentary

General remarks

- 4497 Article 3 is a response to the fear that Protocol II might be used as a pretext to violate the sovereignty of States and intervene in their internal or external affairs, i.e., that it might serve as a justification for intervention. Such fear became apparent at the Conference of Government Experts. Some of the experts would even have liked to include a clause in the Preamble to the effect that respect for national sovereignty and for the principle of non-interference in internal affairs was a pre-requisite for applying the Protocol.¹
- 4498 In view of this recurring concern, the ICRC had already included such a provision in the draft submitted to the Diplomatic Conference. Although it had the same tenor, the proposed provision was nevertheless more succinct.²
- 4499 This is a savings clause which brings to mind the two complementary principles of international law enshrined in the United Nations Charter:³ the principle of inviolability of the national sovereignty and that of non-intervention in matters which are essentially within the domestic jurisdiction of a State. In fact, the ICRC draft contained yet another savings clause which recalled that the legal status of the parties to the conflict would not be affected by the application of the Protocol.⁴ That article was deleted by consensus during the final stage of the adoption of the Protocol.⁵ On the one hand, its *raison d'être* had disappeared since all mention of parties to the conflict had been deleted from the text, precisely so as not to give any semblance of recognition to any sort of international status of the insurgent party;⁶ on the other hand, such a clause is already contained in common Article 3, and therefore retains its full validity with regard to Protocol II.⁷ Thus it is perfectly clear that the application of international humanitarian law in situations of non-international armed conflict has no effect whatever on the qualification of relations between the parties.

Paragraph 1

- 4500 Paragraph 1 reaffirms the principle of the inviolability of the national sovereignty of States. The Protocol has a purely humanitarian aim. Consequently it does not affect the right of States to take appropriate measures for maintaining or restoring law and order, defending their national unity and territorial integrity. This is the responsibility of governments and is expressly recognized here.

¹ *CE 1972, Report*, Vol. I, p. 120, paras. 2.534 and 2.539.

² Draft Art. 4.

³ United Nations Charter, Art. 2, paras. 1 and 7.

⁴ Draft Art. 3.

⁵ See *O.R.* VII, p. 86, CDDH/SR.50, para. 9.

⁶ See the introduction to this Part, *supra*, p. 1343.

⁷ Common Art. 3, para. 4.

4501 If the State's authority had been totally reserved, that would have risked depriving the Protocol of its substance and meaning; for this reason it was of paramount importance to specify that only legitimate means may be used. Thus imperative needs of State security may not be invoked to justify breaches of the rules of the Protocol. In ratifying or acceding to the Protocol, a State accepts its terms by the unfettered exercise of its sovereign powers. Consequently, the obligation to respect the rules contained in it cannot later be considered as an infringement of its sovereignty, as the government's freedom of action is limited by the obligations it has itself freely agreed to.⁸

Paragraph 2

4502 Paragraph 2 reserves the principle of non-intervention. The Protocol cannot serve as a pretext or justification for direct or indirect intervention in an armed conflict or in the internal or external affairs of the High Contracting Party concerned.

4503 The ICRC draft was concerned only with prohibiting intervention by third States.⁹ In Committee a proposal was submitted orally to include "any other organization" in addition to States. This proposal was based on the allegation that in the past private organizations had been guilty of abuses in the name of humanitarian activities.¹⁰ It did not meet with the agreement of the delegates. Some expressed the fear, which was unfounded,¹¹ that it could result in the competence of the United Nations being called into question, particularly that of the Security Council, to take appropriate measures in the event that international peace and security were endangered.¹² On the other hand, an amendment to the effect that the reference to States in the text should be deleted, was adopted.¹³ The prohibition is therefore addressed not only to States, but also to other bodies, international or non-governmental organizations, which might use the Protocol as a pretext for interfering in the affairs of the State in whose territory the armed conflict is taking place.

4504 In view of the fear to which we referred above, it seems appropriate to note that this provision does not call into question previously existing procedures of international organizations and particularly the United Nations.

⁸ On this question, see "The SS Wimbledon case", Reports of the Permanent Court of International Justice, Series A, No. 1, 17 August 1923: "The Court declines to see in the conclusion of any treaty by which a State undertakes to perform or refrain from performing a particular act an abandonment of its sovereignty. No doubt any Convention creating an obligation of this kind places a restriction upon the exercise of the sovereign rights of the State, in the sense that it requires them to be exercised in a certain way. But the right to enter into international engagements is an attribute of State sovereignty." See also *O.R.* VIII, pp. 215-218, CDDH/I/SR.23, paras. 1-19.

⁹ Draft Art. 4.

¹⁰ *O.R.* VIII, p. 295, CDDH/I/SR.29, para. 49.

¹¹ See Art. 103 of the Charter.

¹² *O.R.* VIII, p. 295, CDDH/I/SR.29, para. 50.

¹³ *O.R.* IV, p. 16, CDDH/I/239. See also *O.R.* VIII, p. 306, CDDH/I/SR.30, para. 36, and *O.R.* X, p. 43, CDDH/219/Rev.1, para. 108.

- 4505 It should also be recalled here that common Article 3 provides that: “An impartial humanitarian body, such as the International Committee of the Red Cross, may offer its services to the Parties to the conflict.” Such an offer of services, legitimate under common Article 3, cannot be considered as a hostile act.¹⁴ Even in the absence of explicit reaffirmation, the position achieved in 1949 is not adversely affected by Protocol II, which, as specified in article 1 (*Material field of application*) supplements and develops common Article 3 without modifying its conditions of application.¹⁵ Nor does it prohibit the offer by an impartial humanitarian organization such as the ICRC to provide assistance and protection to the victims of the armed conflict, and to contribute to the implementation of the Protocol. This possibility is expressly provided for with regard to assistance for persons who have been deprived of their liberty¹⁶ and with regard to the organization of relief actions for the benefit of the civilian population.¹⁷ However, there is no obligation to accept assistance from such an organization. Parties remain free to accept or refuse assistance offered them, precisely in order to retain their complete freedom of judgment and so as not be exposed to external interventions.
- 4506 Finally, one delegation pointed out that a distinction is nowadays made between “intervention” and “interference”; “intervention” is applied to subversive or terrorist activities, whereas the word “interference” may be used for ordinary *démarches* or protests.¹⁸

¹⁴ See *Commentary I*, pp. 57-59 (Art. 3).

¹⁵ The ICRC recalled this important point in a plenary meeting of the Conference. See *O.R.* VII, p. 151, CDDH/SR.53, para. 64.

¹⁶ See Art. 5, para. 1(c), and the commentary thereon, *infra*, p. 1388.

¹⁷ See Art. 18, para. 2, and the commentary thereon, *infra*, p. 1478.

¹⁸ *O.R.* VIII, p. 300, CDDH/I/SR.30, para. 5. This remark is based on Resolution 2625 (XXV) of the United Nations on Principles of International Law concerning Friendly Relations and Co-operation among States, and Principle VI of the Final Act of Helsinki: *Non-intervention*. See also on this point, R.J. Dupuy and A. Leonetti, “La notion de conflit armé à caractère non international”, in A. Cassese (ed.), *The New Humanitarian Law of Armed Conflicts*, *op. cit.*, pp. 272-274.

Part II – Humane treatment

Introduction

- 4507 This Part is aimed at protecting persons who do not, or no longer, participate in hostilities against abuses of power and against inhuman and cruel treatment which may be inflicted upon them by the military or civilian authorities into whose hands they have fallen.¹ As the Protocol does not provide for different categories of persons who enjoy a special status, such as prisoners of war in international armed conflicts, the rules laid down here apply equally to all persons affected² by the armed conflict who are in the power of the enemy (the wounded and sick, persons deprived of their liberty, or whose liberty has been restricted), whether they are military or civilians.
- 4508 Such rules are already contained, implicitly or explicitly, in common Article 3; they are developed and supplemented in the Protocol. These are inalienable³ and fundamental rights, inherent in the respect due to the human person: guarantees of humane treatment (Article 4 – *Fundamental guarantees*), minimum standards during detention (Article 5 – *Persons whose liberty has been restricted*) and judicial guarantees (Article 6 – *Penal prosecutions*).
- 4509 The above-mentioned articles bear the mark of international human rights law. In fact the ICRC, in drawing up its draft articles, and subsequently the Conference, were inspired by the Covenant on Civil and Political Rights.
- 4510 These fundamental guarantees constitute a minimum standard of protection which anyone can claim at any time, and they underlie the whole system of human rights. As the Protocol has its own field of application, it was important that it should include these guarantees, properly adapted and supplemented to match the circumstances for which the Protocol is intended.
- 4511 This Part contains virtually all the irreducible rights of the Covenant, i.e., those from which there is no possibility of derogation, even in time of public emergency threatening the life of the nation.⁴ It also reiterates the judicial guarantees which are not part of that minimum protection, but which are of particular importance in situations of armed conflict; it was therefore all the more important to include

¹ These may be *de jure* or *de facto* authorities.

² See commentary Art. 2, para. 1, *supra*, p. 1359.

³ The term “inalienable” means not only that the rights cannot be taken away, but also that they cannot be renounced. See *Commentary I*, pp. 77-85 (Art. 7).

⁴ Covenant, Art. 4, para. 1.

these in the Protocol. They include the presumption of innocence, the right of the accused to be present at his trial, and the principle that no one can be compelled to testify against himself (Article 6 – *Penal prosecutions*, paragraph 2(d), (e) and (f)). Thus there is some homogeneity as to both form and substance between these fundamental rules of protection in the Protocol and in the Covenant.

- 4512** During the debates in the Diplomatic Conference a great many delegates systematically referred to the corresponding rules of the Covenant which they wanted to include in the Protocol as they were. This concern met the desire to establish guarantees at least equivalent to those granted by human rights instruments, so as not to be out of line. It played an important part with regard to the form and substance of Part II. It was responsible for bringing about a degree of uniformity between international rules of protection which impose limitations on national legal systems.
- 4513** In addition, human rights and humanitarian law, which are separate legal systems each with its own field of application and mechanisms, exist concurrently.⁵ This uniformity and convergence serve to reinforce the protection of the human person.
- 4514** Finally, it should be noted that the same non-derogable core of rights contained in this Part is also contained in Article 75 of Protocol I (*Fundamental guarantees*). All persons who do not benefit from more favourable treatment under the Conventions or that Protocol enjoy the protection of that article.

S.J.

⁵ See Resolution 2675 (XXV) of the United Nations General Assembly. See also the commentary on the second paragraph of the Preamble, *supra*, p. 1339. Such concurrent application is of course a factor which has to be taken into account to the extent States are bound by the various instruments.

Protocol II

Article 4 – Fundamental guarantees

1. All persons who do not take a direct part in hostilities, whether or not their liberty has been restricted, are entitled to respect for their person, honour and convictions and religious practices. They shall in all circumstances be treated humanely, without any adverse distinction. It is prohibited to order that there shall be no survivors.
2. Without prejudice to the generality of the foregoing, the following acts against the persons referred to in paragraph 1 are and shall remain prohibited at any time and in any place whatsoever:
 - (a) violence to the life, health and physical or mental well-being of persons, in particular murder as well as cruel treatment such as torture, mutilation or any form of corporal punishment;
 - (b) collective punishments;
 - (c) taking of hostages;
 - (d) acts of terrorism;
 - (e) outrages upon personal dignity, in particular humiliating and degrading treatment, rape, enforced prostitution and any form of indecent assault;
 - (f) slavery and the slave trade in all their forms;
 - (g) pillage;
 - (h) threats to commit any of the foregoing acts.
3. Children shall be provided with the care and aid they require, and in particular:
 - (a) they shall receive an education, including religious and moral education in keeping with the wishes of their parents or, in the absence of parents, of those responsible for their care;
 - (b) all appropriate steps shall be taken to facilitate the reunion of families temporarily separated;
 - (c) children who have not attained the age of fifteen years shall neither be recruited in the armed forces or groups nor allowed to take part in hostilities;
 - (d) the special protection provided by this Article to children who have not attained the age of fifteen years shall remain applicable to them if they take a direct part in hostilities despite the provisions of sub-paragraph (c) and are captured;
 - (e) measures shall be taken, if necessary, and whenever possible with the consent of their parents or persons who by law or custom are primarily responsible for their care, to remove children temporarily from the area in which hostilities are taking place to a safer area within the country and ensure that they are accompanied by persons responsible for their safety and well-being.

Commentary

General remarks

4515 Article 4, paragraphs 1 and 2, reiterates the essence of common Article 3, in particular paragraph 1, sub-paragraph (1)(a), (b) and (c) thereof. These rules

were supplemented and reinforced by new provisions inspired by the Conventions and the International Covenant on Civil and Political Rights.¹

4516 The rule on quarter is given at the end of paragraph 1. This provision originates in Hague law and is based on Article 23, paragraph 1(d), of the 1907 Hague Regulations Respecting the Laws and Customs of War on Land.

4517 Paragraph 3 is devoted more particularly to the protection of children and reiterates some principles already contained in the Fourth Convention, especially in Articles 17, 24 and 26.

4518 The diversity of the subject matter dealt with in this article can be explained in the light of a review of the history of the negotiations. The fundamental guarantees as provided in Article 6 of the ICRC draft correspond to paragraphs 1 and 2 of the present article, with the exception of the provision on giving quarter. The rule on quarter was contained in Article 22 of the draft, which also proposed some other rules on conduct in combat;² this was an abbreviated version of Part III, Section I, of Protocol I (*Methods and means of warfare*). These articles, which were adopted in Committee, were not retained when the Protocol was adopted in plenary meetings with the exception of the rule on giving quarter, which the Pakistani delegation had retained in its proposal for a simplified Protocol.³ In the absence of any further rules in the Protocol for the conduct of combatants it seemed logical to include the rule on quarter amongst the fundamental guarantees, and this proposal did not encounter any opposition.

4519 Protection of children was also included in a separate provision of the draft (Article 32). The article as such was not retained when the Protocol was adopted, but the most essential elements of its content were included in Article 4 in the form of the present paragraph 3.⁴

Paragraph 1

First two sentences – General principle of humane treatment

4520 The scope of application as defined here applies not only to Article 4, but also to Part II as a whole. *Ratione personae* it covers all persons affected by armed conflict within the meaning of Article 2 of the Protocol (*Personal field of*

¹ Hereafter referred to as “the Covenant”.

² *Draft*, Part IV: Methods and means of combat (Arts. 20-23).

³ See *O.R.* IV, p. 20, CDDH/427 and CDDH/430. *Cf.* also general introduction to the Protocol, *supra*, p. 1333.

⁴ *O.R.* IV, p. 20, CDDH/427.

application) when they do not, or no longer, participate directly in hostilities. *Ratione temporis* combatants are protected as soon as they are *hors de combat*.⁵

4521 The right of protected persons to respect for their honour, convictions and religious practices is an element of humane treatment confirmed in this paragraph. The formula is taken, with slight modification, from Article 27 of the Fourth Convention.

“The right of respect for the person must be understood in its widest sense: it covers all the rights of the individual, that is, the rights and qualities which are inseparable from the human being by the very fact of his existence and his mental and physical powers.”⁶

4522 It should be noted that Article 27 of the Fourth Convention refers to religious convictions and practices, while Article 4 of Protocol II refers to “convictions and religious practices”. This slight drafting modification is not arbitrary and gave rise to lengthy debate.⁷ It is aimed at making the adjective “religious” qualify only the word “practices”; convictions are not necessarily religious and it is important that philosophical and political convictions, which are not specifically part of a religion, are also ensured respect. This is why it was thought necessary to make this point.⁸

4523 The term “treat humanely” is based on the Hague Regulations.⁹ It was also used in the 1929 and 1949 Conventions. The word “treatment” should be understood in its broadest sense as applying to all the conditions of man’s existence.¹⁰

4524 The words “without any adverse distinction” can be explained in the light of Article 2 (*Personal field of application*), paragraph 1:

“without any adverse distinction founded on race, colour, sex, language, religion or belief, political or other opinion, national or social origin, wealth,

⁵ Common Art. 3, para. 1, sub-para. (1), already provides for protection of “those placed *hors de combat* by sickness, wounds, detention, or any other cause”, but the ICRC considered that it was logical and sensible to specify the time from which a combatant who has ceased to participate in hostilities is entitled to the protection of Part II; it had therefore proposed to include in that Part a rule on protection of enemies *hors de combat*. Such a provision, which led to some discussion because of its position in the Protocol, was not finally retained (adopted in Committee as Article 22 *bis* among the rules on methods and means of combat). See *O.R.* IV, p. 68, CDDH/427; *O.R.* VIII, pp. 332-336, CDDH/I/SR.32, paras. 47-67. A similar rule is contained in Article 41 of Protocol I.

⁶ *Commentary IV*, p. 201 (Art. 27).

⁷ *O.R.* X, pp. 186-187, CDDH/405/Rev.1, paras. 35 and 36; *O.R.* XV, p. 461, CDDH/407/Rev.1, para. 43.

⁸ The Covenant, very often called upon as an instrument of reference, contains in Art. 18, para. 3, the words “freedom to manifest one’s religion or beliefs”. It should be noted that this is a provision from which there can be no derogation, even in time of public emergency. The 1949 commentators naturally interpreted the expression “religious convictions and practices” broadly as evidenced by *Commentary IV*, p. 203, *ad* Art. 27, which reads: “This safeguard relates to any system of philosophical or religious beliefs”.

⁹ See Art. 4 of the above-mentioned Hague Regulations.

¹⁰ *Commentary IV*, p. 204 (Art. 27).

birth or other status, or on any other similar criteria (hereinafter referred to as ‘adverse distinction’).”¹¹

Third sentence – The rule on quarter

4525 This is one of the fundamental rules on the conduct of combatants inspired by Hague law.¹² It is aimed at protecting combatants when they fall into the hands of the adversary by prohibiting a refusal to save their lives if they surrender or are captured, or a decision to exterminate them.¹³ The text of the draft was more explicit and read as follows: “It is forbidden to order that there shall be no survivors, to threaten an adversary therewith and to conduct hostilities on such basis.”¹⁴ The present wording is briefer, but does not alter the essential content of the rule. Clearly respect for this rule is fundamental. It is a precondition governing the application of all the rules of protection laid down in the Protocol, for any guarantees of humane treatment, any rule on care to be given the wounded and sick, and any judicial guarantees would remain a dead letter if the struggle were conducted on the basis of orders to exterminate the enemy.

4526 The inclusion of this provision amongst the fundamental guarantees laid down in Article 4 is of special importance. In fact, it indirectly indicates the moment from which combatants who are no longer able to fight are protected by Part II, a function originally assigned in the draft to the rule on safeguarding enemies *hors de combat*.¹⁵ Protection of enemies *hors de combat* is in a way the final stage of the present rule on quarter, in the sense that the prohibition against ordering that there will be no survivors affects the concept of military operations even before the enemy is *hors de combat*.¹⁶

Paragraph 2

Opening sentence

4527 The general principle on humane treatment laid down in the preceding paragraph is illustrated with a non-exhaustive list of prohibited acts. The term “without prejudice to the generality of the foregoing” means that none of the specific prohibitions can have the effect of reducing the scope of the general principle.

¹¹ See commentary Art. 2, *supra*, p. 1357.

¹² Article 23, paragraph 1(d), of the above-mentioned Hague Regulations reads as follows: “It is especially forbidden to declare that no quarter will be given.” This is why this prohibition is known as the rule on quarter. Originally a quarter (in French: *quartier*) was a place of shelter and safety.

¹³ See *Commentary Drafts*, p. 154 (Art. 22).

¹⁴ Art. 22 of the draft, which corresponds to Art. 40 of Protocol I. Reference can be made to the commentary thereon, *supra*, p. 473.

¹⁵ Draft Art. 7. See general remarks, *supra*, p. 1368.

¹⁶ See Art. 41, Protocol I, and the commentary thereon, *supra*, p. 479.

- 4528 The prohibitions are explicit and do not allow for any exception; they apply “at any time and in any place whatsoever”. They are absolute obligations.¹⁷
- 4529 For reasons of a legal and political nature,¹⁸ there are no provisions prohibiting “reprisals” in Protocol II.
- 4530 The list of prohibited acts is fuller than that of common Article 3. That being so, and because of the absolute character of these prohibitions, which apply at all times and in all places, there is in fact no room left at all for carrying out “reprisals” against protected persons. Such an interpretation was already given in the commentary on common Article 3. In the absence of an express reference to “reprisals”, the ICRC considered that they were implicitly prohibited.

¹⁷ The absolute character of these obligations is the same as that of a large number of rules in the Protocols and in international humanitarian law in general. On considering the nature of absolute obligations, the International Law Commission stated that: “neither juridically, nor from the practical point of view, is the obligation of any party dependent on a corresponding performance by the others. The obligation has an absolute rather than a reciprocal character.” (Cf. *ILC Yearbook*, 1957, Vol. II, p. 54, paras. 125-126). It also means that no derogation is allowed, in line with the rule on derogations in the Covenant, in particular with regard to arbitrary deprivation of life (Art. 6), torture and cruel, inhuman or degrading treatment or punishment (Art. 7) and slavery (Art. 8).

¹⁸ Aware of the fact that the lack of any mention of reprisals in common Article 3 could give rise to a *contrario* interpretations, the ICRC had proposed in its draft specific prohibitions in the different Parts whenever this seemed necessary for the protection of the persons and objects concerned. This question gave rise to discussions in the three Committees concerned of the Conference. Discussion focused on the scope of such prohibitions, the best place to include one or several references to such prohibitions in the text of the Protocol, and the terminology to be used. Several delegations argued that rules on reprisals concerned only relations between States, as subjects of international law possessing *facultas bellandi*. However, it was recognized that analogous measures, such as acts of retortion (this term, which is incorrect in law, was repeatedly used during the debates) or punitive measures, could be taken by parties to a non-international armed conflict, though such acts would always lack the element of enforcing the law which characterizes reprisals in international armed conflict. For its part, the ICRC based its proposals on the following legal arguments: application of common Article 3 has no legal effect on the status of the parties confronting each other, and consequently does not imply in any way recognition of belligerency. The same applies for application of Protocol II. But that does not take away the fact that the parties to the conflict are still subjects of international law in the limited context of humanitarian rights and obligations resting upon them under these instruments. Whenever there is a possibility of rules of international law not being respected, there may be reprisals. A Working Group of Committee I worked at length on drawing up a formula which from the humanitarian point of view would be equivalent to a prohibition of reprisals without using the actual word “reprisals”. Its endeavours resulted in the adoption in Committee of an article on unconditional respect in which it was provided that the provisions of Parts II and III and those of Articles 26, 26 *bis*, 27 and 28 should not in any circumstances be contravened, not even in response to a breach of the provisions of the Protocol (Articles 26, 26 *bis*, 27 and 28 dealt with protection of the civilian population, of civilian objects, of objects indispensable to the survival of the civilian population and of works and installations containing dangerous forces). The proposed simplified version of the Protocol recommended deleting this article. The decision to delete it was not carried out by consensus; the article was the object of a vote and was rejected by 41 votes to 20, with 22 abstentions. See, in particular, *O.R.* IV, p. 37, CDDH/I/302 and CDDH/427. *O.R.* X, pp. 107-109, CDDH/I/287/Rev.1 and Annex; pp. 231-235, CDDH/SR.51, paras. 4-16; pp. 119-123, CDDH/SR.51, Annex (*ad Art. 10 bis*). Draft Articles 8, 19 and 26. *Commentary Drafts*, pp. 139, 151 and 157.

4531 The argument for this view was based on both the spirit and the letter of common Article 3:

“The acts referred to under items (a) to (d) are prohibited absolutely and permanently, no exception or excuse being tolerated. Consequently, any reprisal which entails one of these acts is prohibited, and so, speaking generally, is any reprisal incompatible with the ‘humane treatment’ demanded unconditionally in the first clause of sub-paragraph (1).”¹⁹

The strengthening of fundamental guarantees of humane treatment in Protocol II and, in particular, the inclusion of a prohibition on collective punishments²⁰ confirms this interpretation without calling into question the refusal of the negotiators to introduce the legal concept of reprisals in the context of non-international armed conflict.

Sub-paragraph (a) – Violence to the life, health and physical or mental well-being of persons

4532 This sub-paragraph reiterates paragraph 1, sub-paragraph (1)(a) of common Article 3. The scope of the prohibition was considerably strengthened; “violence to the life, health, and physical or mental well-being” is further-reaching in protection than the sole mention of violence to life and person, as contained in Article 3. The list is of course non-exhaustive, as shown by the words “in particular”. Murder covers not only cases of homicide, but also intentional omissions which may lead to death; the prohibition of torture covers all forms of physical and mental torture.

4533 The practice of torture is prohibited by international law,²¹ and is universally condemned. It is one of the evils which the international community seeks to eradicate. Therefore, for many years torture has been one of the United Nations’ concerns. The General Assembly of the Organization has adopted a number of resolutions which, although they do not create mandatory obligations, do have an important moral force; the Declaration on the Protection of All Persons from being Subjected to Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment, of 9 December 1975 (Resolution 3452 (XXX)) deserves particular mention. Finally, the Convention against Torture or Other Cruel, Inhuman or Degrading Treatment or Punishment was adopted by the General Assembly on 10 December 1984 (Resolution 39/46). The most widespread form of torture is practised by public officials for the purpose of obtaining confessions, but torture is not only condemned as a judicial institution; the act of torture is reprehensible

¹⁹ See *Commentary IV*, pp. 39-40 (Art. 3).

in itself, regardless of its perpetrator, and cannot be justified in any circumstances.²²

- 4534 The mention of corporal punishment is new, as it did not appear in common Article 3;²³ it met the wish of a number of delegations that corporal punishment be explicitly mentioned in the text.²⁴

Sub-paragraph (b) – Collective punishments

- 4535 The ICRC draft prohibited collective penalties in Article 9 relating to the *principles of penal law* as a corollary of individual penal responsibility.²⁵ On this point it was inspired by Article 33 of the Fourth Convention. The ICRC intended to give this prohibition the same significance as the above-mentioned Article 33, i.e., to prohibit “penalties of any kind inflicted on persons or entire groups of persons in defiance of the most elementary principles of humanity, for acts that these persons have not committed”.²⁶
- 4536 In the Working Group of the Committee some delegates considered that this prohibition should not be included amongst penal provisions since, in that context, it would appear to relate only to penalties imposed by the courts. The concept of collective punishment was discussed at great length. It should be understood in its widest sense, and concerns not only penalties imposed in the normal judicial process, but also any other kind of sanction (such as confiscation of property) as the ICRC had originally intended.²⁷ The prohibition of collective punishments was included in the article relating to fundamental guarantees by consensus. That decision was important because it is based on the intention to give the rule the widest possible scope, and to avoid any risk of a restrictive interpretation.²⁸ In fact, to include the prohibition on collective punishments amongst the acts unconditionally prohibited by Article 4 is virtually equivalent to prohibiting “reprisals” against protected persons.

²² The Convention refers to torture or other punishments inflicted by a public official or any other person acting on official orders, but Art. 1, which defines its scope of application, also provides that that article is without prejudice to any other international instrument or any national law which contains or might contain provisions with a broader scope.

²³ The terminology is taken from Art. 32 of the Fourth Convention, which mentions corporal punishment. See *Commentary IV*, p. 221.

²⁴ See *O.R. X*, p. 104, CDDH/I/287, Rev.1.

²⁵ Draft Art. 9, para. 1. See commentary Art. 6, para. 2(b), *infra*, p. 1398.

²⁶ *Commentary IV*, p. 225 (Art. 33).

²⁷ The term “collective punishment” (in French “punitons collectives”, in Spanish “castigos colectivos”) was adopted in preference to the original text of the draft, which referred to “collective penalties”. In fact, the word “penalty” is a term used in penal law, and according to some delegates it could have been interpreted restrictively to cover only judicial sentences. See *O.R. VII*, pp. 87-88, CDDH/SR.50, paras. 18-29.

²⁸ See *O.R. X*, p. 130, CDDH/234/Rev.1, para. 86; p. 201, CDDH/405/Rev.1, paras. 118-119.

Sub-paragraph (c) – The taking of hostages

4537 This sub-paragraph reaffirms a prohibition which is already contained in common Article 3, paragraph 1, sub-paragraph (1)(b).²⁹ It should be noted that hostages are persons who are in the power of a party to the conflict or its agent, willingly or unwillingly, and who answer with their freedom, their physical integrity or their life for the execution of orders given by those in whose hands they have fallen, or for any hostile acts committed against them.³⁰

Sub-paragraph (d) – Acts of terrorism

4538 The prohibition of acts of terrorism is based on Article 33 of the Fourth Convention. The ICRC draft prohibited “acts of terrorism in the form of acts of violence committed against those persons” (i.e., against protected persons).³¹ The formula which was finally adopted is simpler and more general and therefore extends the scope of the prohibition. In fact, the prohibition of acts of terrorism, with no further detail, covers not only acts directed against people, but also acts directed against installations which would cause victims as a side-effect. It should be mentioned that acts or threats of violence which are aimed at terrorizing the civilian population, constitute a special type of terrorism and are the object of a specific prohibition in Article 13 (*Protection of the civilian population*), paragraph 2.

Sub-paragraph (e) – Outrages upon personal dignity

4539 This sub-paragraph reaffirms and supplements common Article 3, paragraph 1, sub-paragraph (1)(c). The ICRC draft contained a separate paragraph relating to the protection of women.³² During the discussions it became clear that it was necessary to strengthen not only the protection of women, but in addition that of children and adolescents who may also be the victims of rape, enforced prostitution or indecent assault. Therefore a reference to such acts was added to sub-paragraph (e). Furthermore, a separate article specifically devoted to protection of women and children was adopted in the Working Group.³³

²⁹ See *Commentary IV*, p. 39 (Art. 3).

³⁰ See *Commentary Drafts*, p. 137.

³¹ Draft Art. 6, para. 2(c).

³² Draft Art. 6, para. 3, which read as follows: “Women shall be the object of special respect and shall be protected in particular against rape, enforced prostitution and any other form of indecent assault.”

³³ Art. 6 bis: “In addition to the protection conferred by Article 6 [present Art. 4], women and children shall be the object of special respect and shall be protected against rape, enforced prostitution, and any other form of indecent assault.” See *O.R. X*, p. 105, CDDH/I/287/Rev.1; *O.R. VIII*, p. 413, CDDH/I/SR.39, paras. 15-18.

4540 When the Protocol was adopted in plenary meetings, that article was deleted by consensus, as the subject matter is already covered by sub-paragraph (e) under consideration here.³⁴ It should be added that this particular aspect of protection gave rise to considerable interest in the Diplomatic Conference.

Sub-paragraph (f) – Slavery and the slave trade

4541 This sub-paragraph reiterates the tenor of Article 8, paragraph 1, of the Covenant. It is one of the “hard-core” fundamental guarantees, now reaffirmed in the Protocol. The prohibition of slavery is now universally accepted; therefore the adoption of this sub-paragraph did not give rise to any discussion. However, the question may arise what is meant by the phrase “slavery and the slave trade in all their forms”. It was taken from the Slavery Convention, the first universal instrument on this subject, adopted in 1926 (Article 1). A Supplementary Convention on the Abolition of Slavery, the Slave Trade and Institutions and Practises Similar to Slavery, was adopted in 1956, and supplements and reinforces the prohibition; certain institutions and practices comparable to slavery, such as servitude for the payment of debts, serfdom, the purchase of wives and the exploitation of child labour are prohibited.³⁵ It may be useful to note these points in order to better understand the scope of the prohibition of slavery in all its forms.

Sub-paragraph (g) – Pillage

4542 The prohibition of pillage is based on Article 33, paragraph 2, of the Fourth Convention. It covers both organized pillage and pillage resulting from isolated acts of indiscipline.³⁶ It is prohibited to issue order whereby pillage is authorized. The prohibition has a general tenor and applies to all categories of property, both State-owned and private.

Sub-paragraph (h) – Threats to commit any of the foregoing acts

4543 This offence concludes the list of prohibited acts and enlarges its scope. In practice threats may in themselves constitute a formidable means of pressure and undercut the other prohibitions. The use of threats will generally constitute violence to mental well-being within the meaning of sub-paragraph (a).

³⁴ O.R. VII, p. 91, CDDH/SR.50, paras. 45-47.

³⁵ See “The United Nations and Human Rights”, New York, 1973, p. 17.

³⁶ *Commentary Drafts*, p. 137.

Paragraph 3*Opening sentence – The principle of aid and protection for children*

- 4544 Children are particularly vulnerable; they require privileged treatment in comparison with the rest of the civilian population. This is why they enjoy specific legal protection.³⁷
- 4545 The general principle of protection laid down at the beginning of the paragraph is illustrated with a list of obligations implied by it (sub-paragraphs (a)-(e)). As indicated by the words “in particular”, this list is illustrative only and does not in any way prejudice other measures which may be taken.
- 4546 In the territory under their control, the authorities, both *de jure* and *de facto*, have the duty to protect children from the consequences of hostilities by providing the care and aid they require, preventing physical injury or mental trauma, and ensuring that they develop as normally as circumstances permit.³⁸
- 4547 This duty is expressed by the use of the word “shall”: “children shall be provided” (the French equivalent is “les enfants recevront”).³⁹
- 4548 The words “they require” were chosen in accordance with a proposal by a delegation. This flexible formula means that all the factors relevant for determining the aid required must be taken into account in each individual case.⁴⁰
- 4549 The Conference intentionally did not give a precise definition of the term “child”.⁴¹ The moment at which a person ceases to be a child and becomes an adult is not judged in the same way everywhere in the world. Depending on the culture, the age may vary between about fifteen and eighteen years. Sub-paragraph (c) determines the lower limit of fifteen years for recruitment into the armed forces. The text refers to “children who have not attained the age of fifteen years”, which suggests that there may be children over fifteen years. This age was chosen as a realistic basis, and because the Conventions had already taken it into account to ensure that children should have the benefit of priority measures.⁴²

³⁷ See in particular the Declaration of the Rights of the Child, United Nations, GA/Res/1386 (XIV), Principle 8: “The child shall in all circumstances be among the first to receive protection and relief”. See also the Declaration on the Protection of Women and Children in Emergency and Armed Conflict, United Nations, GA/Res/3318 (XXIX). Articles relating to the protection of children in Protocol I: Arts. 75, 77 and 78, *supra*, pp. 861, 897, 907.

³⁸ See *O.R.* XV, pp. 63-71, CDDH/III/SR.45, paras. 3-40.

³⁹ It should be noted that in other articles of the Protocols “shall” is sometimes translated in French by the future of the verb “devoir” followed by another verb: “Les enfants devront recevoir”. Example: Art. 12, Protocol I. These are merely questions of drafting and have no effect on the nature of the obligation.

⁴⁰ See *O.R.* IV, p. 101, CDDH/III/28; *O.R.* XV, p. 65, CDDH/III/SR.45, para. 9. In the draft the ICRC proposed “the care and aid their age and situation require” (Art. 32).

⁴¹ See *O.R.* XV, p. 465, CDDH/407/Rev.1, para. 63.

⁴² See Arts. 14, 23, 24, 38 and 50 of the Fourth Convention.

- 4550 However, this is only an indication and should not be seen as a definition.⁴³ Biological and psychological maturity varies, and it is important not to exclude the possibility that aid is required by children over the age of fifteen.
- 4551 Therefore the question immediately arises whether children over the age of fifteen who have been recruited in the armed forces are actually no longer considered as children. The problem rarely arises in concrete terms when they participate in hostilities, but rather when they are deprived of their liberty. The very young may require special attention (such as extra food, for example, because they are growing). It is desirable and normal practice in many countries to hold them in separate quarters.⁴⁴ Thus the fact of having been recruited does not in itself automatically deprive a child of the aid required by his age. As regards judicial proceedings, it must be recalled that the death penalty for an offence related to the conflict cannot be pronounced on a person under the age of eighteen years, in accordance with the provisions of Article 6 (*Penal prosecutions*), paragraph 4, of the Protocol.

Sub-paragraph (a) – Education

- 4552 This sub-paragraph was not contained in the ICRC draft, which was limited to the material aspect of protection,⁴⁵ and it is the result of an amendment.⁴⁶ It answers the concern to ensure continuity of education so that children retain their cultural identity and a link with their roots. This rule is aimed at removing the risk that children separated from their family by the conflict might be uprooted by being initiated into a culture, religion or moral code which may not correspond with the wishes of their parents, and in addition could in this way become political pawns. Religion and morality are an integral part of education, but it was considered preferable to specify “including religious and moral education” so that the word “education” should be understood in its broadest sense, and not be interpreted restrictively.⁴⁷

⁴³ The commentary on Art. 24 of the Fourth Convention gives the following explanations: “An age limit of fifteen was chosen because from that age onwards a child’s faculties have generally reached a stage of development at which there is no longer the same necessity for special measures” (*Commentary IV*, p. 186).

⁴⁴ This measure is stipulated in Art. 77, para. 4, Protocol I. The prohibition on indecent assault laid down in para. 2(e) of the present article should also be called to mind.

⁴⁵ See draft Art. 32.

⁴⁶ *O.R.* IV, p. 162, CDDH/III/309 and Add.1 and 2. This amendment is based in particular on Art. 18, para. 4, of the Covenant on Civil and Political Rights, which provides that: “The States Parties to the present Covenant undertake to have respect for the liberty of parents and, when applicable, legal guardians to ensure the religious and moral education of their children in conformity with their own convictions”. This provision is one of the articles from which no derogation can be made within the meaning of Art. 4, para. 2.

⁴⁷ See *O.R.* XV, p. 79, CDDH/III/SR.46, para. 11.

Sub-paragraph (b) – Reunion of families

- 4553** This sub-paragraph is inspired by article 26 of the Fourth Convention.⁴⁸ Parties to the conflict must do their best to restore family ties, i.e., they should not only permit searches undertaken by members of dispersed families, but they should even facilitate them. The ICRC draft prescribed that children should be identified in the conflict zone whenever possible and necessary, and that information bureaux should be established.⁴⁹ Such measures, which are contained in the Conventions,⁵⁰ were not adopted in the text of Protocol II from a fear that it might not be possible to apply them materially; nevertheless, they continue to be a guideline indicating “appropriate measures”. It should be noted that the Central Tracing Agency (CTA) of the ICRC is an excellent example of a humanitarian organization specialized in the field of bringing about the reunion of dispersed families. In practice its services are often called upon in situations of international or internal conflicts. In fact, ICRC delegations usually include an “Agency” section staffed with delegates who are seconded, if necessary, by the National Red Cross or Red Crescent Society. The function of the Agency consists of keeping families together or bringing them together. Its main tasks are: the transmission of messages between families when means of communication have been broken, the communication to families of information regarding the fate of members of the family (notification of where the wounded and sick have been hospitalized and their state of health; information on places of internment or detention of persons deprived of their liberty, and on their transfer or release; notification of death), registration of the civilian population, particularly children, in case of evacuation.
- 4554** The Agency is an active instrument in this field. Depending on the circumstances, other initiatives may be useful, such as, for example, the transmission of family messages by radio. The most important thing is that the right of families to be informed of the fate of their relatives and to be reunited should be fully recognized, and that steps to this end should be facilitated.

Sub-paragraph (c) – The principle that children should not be recruited into the armed forces

- 4555** The prohibition against using children in military operations is a fundamental element of their protection. Unfortunately this happens frequently, and children are all too often ready to follow adults without weighing up the consequences of their acts.
- 4556** The setting of an age-limit gave rise to lengthy discussion; a number of delegations considered that the age of fifteen was too low, and would have

⁴⁸ See *Commentary IV*, pp. 195-198 (Art. 26). This sub-paragraph corresponds to Art. 74 of Protocol I: Reunion of dispersed families, *supra*, p. 857.

⁴⁹ Draft Art. 32, para. 2(d), and Art. 34: Recording and information.

⁵⁰ Arts. 26/19/122/24, 136, 137 and 138.

preferred eighteen. The great divergence of national legislations on this question did not make it possible to arrive at a unanimous decision. The age of fifteen proposed on the basis of realistic considerations in the ICRC draft was ultimately adopted.⁵¹ To enhance the chances of this proposal being accepted the ICRC had followed the age limit laid down in the Fourth Convention to ensure that children enjoy privileged treatment.⁵²

- 4557 The principle of non-recruitment also prohibits accepting voluntary enlistment. Not only can a child not be recruited, or enlist himself, but furthermore he will not be “allowed to take part in hostilities”, i.e., to participate in military operations such as gathering information, transmitting orders, transporting ammunition and foodstuffs, or acts of sabotage.⁵³

Sub-paragraph (d) – Continued protection in the case that sub-paragraph (c) is not applied

- 4558 This sub-paragraph is the result of the parallel negotiation of the drafts of both Protocols in Committee, which, in this particular case, ended in an apparent weakening of the text, though this should have no practical consequences. In fact, it should be noted that the preceding sub-paragraph (c) contains an absolute obligation, while Article 77 (*Protection of children*), paragraph 2, of Protocol I, which corresponds to it, is less constraining and reads as follows: “The Parties to the conflict shall take all feasible measures in order that children who have not attained the age of fifteen years do not take a direct part in hostilities”; the term “all feasible measures” leaves the door open to exceptions which justify the provision that if children under fifteen nevertheless participate in hostilities, they still continue to enjoy the special protection laid down for children.⁵⁴ On the other hand, in Protocol II the text is worded in such a way that there is no escape clause: “Children [...] shall neither be recruited in the armed forces or groups, nor allowed to take part in hostilities.”
- 4559 It should be recalled that the aim of this provision is to guarantee children special protection in the turmoil caused by situations of conflict. For this reason it seemed useful to specify in this sub-paragraph that children will continue to enjoy privileged rights in case the age limit of fifteen years laid down in sub-paragraph (c) is not respected. In this case making provision for the consequences of any possible violation tends to strengthen the protection.

⁵¹ See *Commentary Drafts*, p. 163 (Art. 32, para. 2(e)).

⁵² See Arts. 14, 23, 24 and 38 of the Fourth Convention.

⁵³ See, in particular, *O.R.* XV, pp. 65-69, CDDH/III/SR.45, paras. 11-31.

⁵⁴ This solution is a compromise which the Committee adopted for Protocol I on the basis of the fact that sometimes, especially in occupied territories and in wars of national liberation, it would not be realistic to totally prohibit participation of children aged under fifteen. *O.R.* XV, p. 465, CDDH/407/Rev.1, para. 61.

Sub-paragraph (e) – Temporary evacuation

- 4560** The evacuation of children, as provided in this sub-paragraph, must have an exceptional and temporary character. It should be noted that the possibility of evacuation to a foreign country was not retained; the text refers to “a safer area within the country.”⁵⁵
- 4561** The consent of parents or persons primarily responsible is required “whenever possible”. As one delegation argued, it would be unrealistic to make the consent of parents a mandatory requirement as the parents might have disappeared or it may be impossible to contact them.⁵⁶
- 4562** The question may arise what is meant by persons who “are primarily responsible for their care”. It would seem that this term covers not only cases in which the care of the child has been legally entrusted to a guardian (such as in the case of orphans, or of irresponsible parents), but also cases in which a person materially takes care of a child and is responsible for it, whether related or not to the child.
- 4563** A child may also be entrusted to someone on the basis of the local custom. This is why in addition to the reference to the law there is also a reference to custom as regards the responsibility for the children’s care. Custom was included in the text following a proposal in the Working Group which discussed the draft. In fact, in some countries family structure is governed not only by law but also and especially by custom, and it is important to take this into account.⁵⁷

S.J.

⁵⁵ See commentary Art. 78, Protocol I, *supra*, p. 907.

⁵⁶ *O.R.* XV, p. 82, CDDH/III/SR.46, para. 23.

⁵⁷ This proposal was directly integrated in the text submitted by the Rapporteur to the Committee, without an amendment having been submitted. It was accepted by consensus and no special statements were made thereon in the plenary meetings of Committee III.

Protocol II

Article 5 – Persons whose liberty has been restricted

1. In addition to the provisions of Article 4, the following provisions shall be respected as a minimum with regard to persons deprived of their liberty for reasons related to the armed conflict, whether they are interned or detained:
 - (a) the wounded and the sick shall be treated in accordance with Article 7;
 - (b) the persons referred to in this paragraph shall, to the same extent as the local civilian population, be provided with food and drinking water and be afforded safeguards as regards health and hygiene and protection against the rigours of the climate and the dangers of the armed conflict;
 - (c) they shall be allowed to receive individual or collective relief;
 - (d) they shall be allowed to practise their religion and, if requested and appropriate, to receive spiritual assistance from persons, such as chaplains, performing religious functions;
 - (e) they shall, if made to work, have the benefit of working conditions and safeguards similar to those enjoyed by the local civilian population.
2. Those who are responsible for the internment or detention of the persons referred to in paragraph 1 shall also, within the limits of their capabilities, respect the following provisions relating to such persons:
 - (a) except when men and women of a family are accommodated together, women shall be held in quarters separated from those of men and shall be under the immediate supervision of women;
 - (b) they shall be allowed to send and receive letters and cards, the number of which may be limited by competent authority if it deems necessary;
 - (c) places of internment and detention shall not be located close to the combat zone. The persons referred to in paragraph 1 shall be evacuated when the places where they are interned or detained become particularly exposed to danger arising out of the armed conflict, if their evacuation can be carried out under adequate conditions of safety;
 - (d) they shall have the benefit of medical examinations;
 - (e) their physical or mental health and integrity shall not be endangered by any unjustified act or omission. Accordingly, it is prohibited to subject the persons described in this Article to any medical procedure which is not indicated by the state of health of the person concerned, and which is not consistent with the generally accepted medical standards applied to free persons under similar medical circumstances.
3. Persons who are not covered by paragraph 1 but whose liberty has been restricted in any way whatsoever for reasons related to the armed conflict shall be treated humanely in accordance with Article 4 and with paragraphs 1(a), (c) and (d), and 2(b) of this Article.

4. If it is decided to release persons deprived of their liberty, necessary measures to ensure their safety shall be taken by those so deciding.

Commentary

Heading of the article

- 4564 The expression “persons whose liberty has been restricted” was chosen in preference to more specific words such as “prisoners” or “detainees” to take into account the full extent of the article’s scope of application, which covers all detainees and persons whose liberty has been restricted for reasons related to the conflict, without granting them a special status. However, the choice of words in French and Spanish – “personnes privées de liberté” and “personas privadas de libertad”, respectively – is less suitable than the more explicit English version.

General remarks

- 4565 The purpose of this article is to ensure that conditions of detention for persons whose liberty has been restricted for reasons related to the conflict will be reasonable. The obligations laid down are concrete measures which must guarantee them humane treatment in the particular situation they find themselves

in. Thus this provision supplements Article 4 (*Fundamental guarantees*).¹ It should be noted that Article 4 (*Fundamental guarantees*) contains prohibitions, while Article 5 lays down obligations to do certain things, with the exception of paragraph 2(e), which also deals with unjustified omissions. The text largely corresponds to the ICRC draft,² which was drafted on the basis of principles contained in the Third and Fourth Conventions, relating to the conditions of detention for prisoners of war and civilian internees.³ The first two paragraphs of this article have different degrees of force; paragraph 1 lays down absolute obligations, while paragraph 2 lays down rules to be implemented as far as possible. To reconcile realistic considerations and humanitarian ideals, while taking into account the cultural background of different countries in the international community, proved to be a difficult task as regards the classification of obligations, and this gave rise to lengthy discussions. The diversity of views and the complexity of the problem become even clearer when it is recalled that one amendment went so far as to distinguish three categories: minimum obligations, obligations which the parties to the conflict should respect “subject to temporary and exceptional measures” and measures they should take “within the limits of their capabilities”.⁴ The formula which was finally adopted makes a distinction merely between unconditional obligations and those taking into account the available resources.

4566 Paragraphs 3 and 4 were the result of proposals directly put forward in the Working Group of Committee I, charged with considering the draft Article, without first having been submitted as amendments.⁵ Paragraph 3 fills a legal gap by according some guarantees of protection to persons who are not interned or detained in the strict sense of the word, but whose liberty has been restricted in some other way. Finally, paragraph 4 takes into consideration the safety measures for releases.

Paragraph 1

4567 Added to the guarantees laid down in Article 4 (*Fundamental guarantees*), which apply to all persons under the control of one of the parties to the conflict, are the guarantees of Article 5 for persons whose liberty has been restricted. However, only paragraph 1, following the example of Article 4 (*Fundamental guarantees*), contains absolute obligations.⁶ Taken together, these rules – Article 4 (*Fundamental guarantees*) and Article 5, paragraph 1 – express the basic standard to which anyone whose liberty has been restricted for reasons related to

¹ See commentary Art. 4, *supra*, p. 1367.

² Draft Art. 8.

⁴ *O.R.* IV, p. 25, CDDH/I/236.

⁵ *O.R.* X, pp. 105-106, CDDH/I/287/Rev.1.

⁶ For the definition of an absolute obligation, see commentary Art. 4, *supra*, p. 1372.

the conflict is entitled, i.e., combatants who have fallen into the power of the adverse party as well as civilians.⁷

4568 The term “deprived of their liberty for reasons related to the armed conflict” is taken from Article 2 (*Personal field of application*), paragraph 2, of the Protocol.⁸ At this point it is appropriate to recall its far-reaching scope. It covers both persons being penally prosecuted and those deprived of their liberty for security reasons, without being prosecuted under penal law.⁹ However, there must be a link between the situation of conflict and the deprivation of liberty; consequently prisoners held under normal rules of criminal law are not covered by this provision.

4569 Article 5 applies as soon as a person is deprived of his liberty, until he is released, even if hostilities have ceased in the meantime.¹⁰

4570 Protocol II, following the example of common Article 3, does not grant a special status to members of the armed forces or armed groups who have fallen into enemy hands. They are not legally prisoners of war entitled to special protection; this is why it is so important that the rules laid down in this article establish minimum guarantees.

4571 Paragraph 1 deals with persons who have been deprived of their liberty, i.e., who have been interned or detained. Persons whose liberty has merely been restricted are dealt with in paragraph 3.

Sub-paragraph (a)

4572 This is a reminder of the principle that protection and care should be given the wounded and sick. In fact, Article 7 (*Protection and care*) covers all the wounded and sick, including those deprived of their liberty, but it was important to include this fundamental guarantee on how such people should be treated among the rules relating to the conditions of detention.¹¹

Sub-paragraph (b)

4573 The purpose of this sub-paragraph is to make sure that persons deprived of their liberty will be provided with essential minimum requirements: food, drinking water, hygiene and shelter. This is inspired by Articles 22, 26 and 27 of the Third Convention, and by Articles 85, 89 and 90 of the Fourth Convention. The detaining authority is responsible for the detainees or internees. It must provide them with the means necessary for survival. This principle is widely

¹⁰ See Art. 2, para. 2, of Protocol II, *supra*, p. 1360; persons deprived of their liberty at the end of a conflict also have the benefit of these guarantees, throughout the duration of their detention. See also introduction to Part I, *supra*, p. 1343.

¹¹ See commentary Art. 7, *infra*, p. 1407.

recognized but the problem arises from the fact that in situations of internal armed conflict the local population usually lives in very difficult conditions. It would not have been realistic to adopt norms which were too burdensome, and which would turn out to be impossible to apply: “the persons referred to in this paragraph shall, to the same extent as the local civilian population, be provided with food and drinking water”. The obligation of the detaining authority remains an absolute one, but its content varies, depending on the living conditions prevailing in the area. In fact the country may sometimes be so large that completely different conditions exist in different areas. The type of subsistence of the civilian population constitutes a measure to evaluate how much food and drinking water persons deprived of their liberty must receive.¹²

- 4574** Although food and water seem the most essential elements, hygiene, health and protection against the rigours of the climate are also important factors for human survival; the detaining authority must therefore take care of them. A lack of water, defective drainage and damp may cause sickness and epidemics. Inadequate ventilation, lack of sunlight or of light in general may also make a place unhealthy and affect health. Other factors, such as the absence of anti-parasitic disinfectants may be other decisive elements in the field of health and hygiene. This list given is not exhaustive, but gives some examples of factors to be taken into account to ensure hygiene and healthy conditions in places of detention. Protection against the rigours of the climate suggests clothes for the cold, but the sun and any intemperate conditions (such as floods, sandstorms etc.) may also endanger human life if there is no shelter available.
- 4575** Persons deprived of their liberty must be protected against “the dangers of the armed conflict”. In addition, paragraph 2(c) of this Article 5 provides that places of internment and detention must not be located close to the combat zone, and that evacuation may have to be carried out in case of danger. The obligation laid down in paragraph 1 is an absolute one, while the measures prescribed in paragraph 2 are binding only within the limits of the capabilities of the authorities responsible. How should this difference be interpreted in practice?
- 4576** Paragraph 1 lays down a general obligation. It may prove objectively impossible to take prisoners to places located outside the combat zone or to evacuate them, but the obligation to protect them remains in the sense that it is prohibited to knowingly expose detainees to danger. For example, in the case of bombardment, prisoners must be able to seek refuge in shelters like their guards, and should not be kept in a place where they run much greater risks.

¹² The provision of food etc., according to this paragraph is not, of course, a question of relief, but an obligation resting upon the detaining authority to provide detainees with the necessities of life. If the situation deteriorates to the point where the civilian population requires relief to survive, persons deprived of their liberty should of course also have the benefit of such relief actions. Sub-paragraph (c), which will be discussed below, emphasizes that there is a right to relief. It is not a legal entitlement, but strictly a humanitarian provision. Food available for the guards of the detainees should also be a criterion; although detainees cannot claim privileged treatment, they should nevertheless receive as much food as those guarding them.

Sub-paragraph (c)

4577 This sub-paragraph lays down the right to receive relief, both individually and collectively. The term “individual or collective relief” was taken from the Conventions (Article 72, Third Convention; Article 108, Fourth Convention): “Individual relief consists of parcels sent by a donor to a prisoner of war, the latter being designated by name”; “collective relief is sent to prisoners of war either in standard anonymous parcels, or in the form of bulk shipments”.¹³ This general formula allows for all possible forms of relief action. Permission to receive relief does not in any way diminish the obligation laid down in the preceding sub-paragraph to provide detainees with food, drinking water etc. In addition, detainees must be allowed to benefit from relief actions for the civilian population, as provided in Article 18 (*Relief societies and relief actions*), paragraph 2.¹⁴

Sub-paragraph (d)

4578 This sub-paragraph guarantees persons protected by this article two closely related rights: to practise their religion and to receive spiritual assistance. These two rights follow from the principle that respect is due to convictions and religious practices, as laid down in Article 4 (*Fundamental guarantees*).¹⁵ The freedom to practise one’s own religion is clearly confirmed and does not require any explanation. On the other hand, the right to receive spiritual assistance does need some comment. It is worded as follows: “they shall be allowed [...], if requested and appropriate, to receive spiritual assistance”. The term “appropriate” was translated rather inelegantly into French by the formula “si cela est approprié”, which was adopted to preserve uniformity between the two languages. Spiritual assistance must be provided whenever possible, having regard to the circumstances (for example, the development of hostilities and availability of suitable religious personnel). This provision is the result of a compromise. A number of delegations thought in fact that giving spiritual assistance should not become an absolute obligation and they wanted to include it in paragraph 2. Other delegations, however, pointed out that spiritual assistance is a corollary of the right to practise one’s own religion and is inseparable therefrom.¹⁶ The insertion of the word “appropriate” made it possible to reconcile these two points of view: spiritual assistance is indeed considered as an inalienable aspect of freedom to practise one’s own religion, but this formula reduces the binding force of the obligation somewhat and thereby takes into account the difficulty – sometimes even the impossibility – of finding adequate religious assistance. The obligation is thus somewhat relative, but nevertheless contains an element dependent on an objective judgment of the situation; it should not be interpreted

¹³ *Commentary III*, p. 353.

¹⁴ See commentary Art. 18, para. 2, *infra*, p. 1478.

¹⁵ See commentary Art. 4, para. 1, *supra*, p. 1369.

¹⁶ O.R. VIII, p. 337, CDDH/I/SR.32, para. 72; p. 423, CDDH/I/SR.40, para. 10.

in such a way as to arbitrarily restrict the possibilities of receiving religious assistance. On the proposal of one delegation, the term “persons, such as chaplains, performing religious functions”, was taken from Protocol I, Article 15 (*Protection of civilian medical and religious personnel*), paragraph 5.¹⁷

Sub-paragraph (e)

4579 This sub-paragraph seeks to prevent that persons deprived of their liberty should have to work in unacceptable conditions. The ICRC draft did not refer to working conditions. This point was introduced in an amendment.¹⁸ Detainees or internees do not necessarily have to work; in some cases conditions do not lend themselves to this. The rule under consideration here, however, refers to cases in which they are made to work. Working often contributes to improving living conditions, both materially and psychologically, but it should not give rise to ill-treatment. This is why it is provided that persons deprived of their liberty must have the benefit of working conditions and safeguards similar to those enjoyed by the local civilian population. Thus it is prohibited to force detainees to carry out unhealthy, humiliating or dangerous work, bearing in mind the conditions in which the local population works.

Paragraph 2

Opening sentence

4580 Some measures for improving living conditions in detention cannot always be executed because of lack of material possibilities, but they must be respected within the limits of the means available. Such is the aim of paragraph 2, which gives, by way of example, some rules which, although only compulsory as far as the means are available, are nevertheless important. It should be recalled that the delegations encountered great difficulties during the negotiations, on the one hand, to determine the mandatory minimum standard contained in the preceding paragraph, and, on the other hand, the rules which parties are called upon to respect “within the limits of their capabilities”.

4581 Paragraph 2 may be considered as a sort of guideline which may be developed, depending on the circumstances and the goodwill of those responsible; the few rules that are given serve as illustrations and should not be interpreted restrictively or rigidly.

4582 The expression “those who are responsible for the internment or the detention” relates to persons who are responsible *de facto* for camps, prisons, or any other places of detention, independently of any recognized legal authority.

¹⁷ O.R. IV, p. 26, CDDH/I/247. See also *supra*, p. 195.

¹⁸ O.R. IV, p. 24, CDDH/I/94.

Sub-paragraph (a)

- 4583** Women shall be held in quarters separate from those of men, under the immediate supervision of women, except in cases where families are accommodated together. In the ICRC draft this principle was included among the mandatory rules of paragraph 1. It is based on Article 82 of the Fourth Convention. This measure of special protection for women is an essential element of what must be done to comply with the prohibition of “outrages upon personal dignity, in particular humiliating and degrading treatment, rape, enforced prostitution and any form of indecent assault” laid down in Article 4 (*Fundamental guarantees*), paragraph 2(e); it follows automatically, since Article 4 (*Fundamental guarantees*), paragraph 2, forms part of the body of absolute obligations.
- 4584** In cases where it is not possible to provide separate quarters, provision should in any case be made for separate sleeping quarters and separate washing facilities.

Sub-paragraph (b)

- 4585** This sub-paragraph lays down the right to correspond and provides that persons referred to in paragraph 1 are allowed to send and receive letters and cards, though their number may be limited by the competent authority, if it deems necessary. The exchange of news between persons deprived of their liberty and their families is a fundamental element of their mental health. It is also a way of preparing for a return to peace, since it is a means of limiting the number of families permanently separated by events because they are unable to locate their relatives. However, in a situation of conflict, postal services are often paralysed and forwarding letters may incur problems which are difficult to resolve. Censorship may be considered to be necessary, but this requires personnel. It should be noted that the responsible authorities may appeal to the Central Tracing Agency (CTA), as provided in the Conventions.¹⁹ The CTA’s experience and its neutral position enable a number of practical difficulties to be resolved. The form with a maximum of twenty-five words strictly related to family matters which is used by the CTA has proved very useful in non-international armed conflicts during the last thirty years. The facility to correspond is a legal right; it may not therefore, be used as a disciplinary measure or as a means of exerting pressure, even though it may sometimes prove necessary to limit the number of cards and letters.

Sub-paragraph (c)

- 4586** Places of internment and detention should not be located close to the combat zone. They must be evacuated when they become too exposed, provided that the

¹⁹ See also commentary Art. 4, para. 3(b), on the reunion of dispersed families, *supra*, p. 1379.

evacuation can be carried out under adequate conditions of safety. This provision is based on Article 23 of the Third Convention and Article 83 of the Fourth Convention.²⁰ Persons deprived of their liberty do not participate in hostilities and should consequently enjoy protection against the dangers resulting from the conflict. To locate places of internment close to combat zones would render such protection quite illusory. As regards carrying out an evacuation under adequate conditions of safety, it should be recognized that in this context the concept of safety is relative and difficult to establish. In any event, the evacuation should not be more dangerous than staying in the same place. Of course the relevant criterion is the interest of the persons deprived of their liberty. If the general principle under which prisoners should be treated as well as those detaining them is upheld, the evacuation should not be carried out in conditions worse than those during movements of armed forces or members of the civilian population.

Sub-paragraph (d)

4587 This sub-paragraph provides for medical examinations for persons deprived of their liberty. This provision was not contained in the ICRC draft and was adopted on the basis of an amendment.²¹ Its aim is to ensure, generally, good medical attention in places of internment or detention; on the one hand, so that no one remains in a condition of distress without receiving care, and on the other hand, to ensure that contagious diseases are detected in time, in the interests of detainees and guards alike.

Sub-paragraph (e)

4588 This sub-paragraph is aimed at protecting the physical and mental health and integrity of persons deprived of their liberty. The general rule is accompanied by some principles specifically governing medical procedures made available to them, in order to prevent any harmful medical treatment or intervention.²² The text reiterates Article 11 (*Protection of persons*), paragraph 1, of Protocol I, which was drafted with great care in Committee II of the Conference. The interpretation of these two purely humanitarian provisions is identical and consequently reference can also be made to the commentary on Article 11 (*Protection of persons*) of Protocol I.²³

²⁰ *Commentary Drafts*, p. 139 (Art. 8, para. 3(d)).

²¹ *O.R. IV*, p. 24, CDDH/1/94.

²² See draft Art. 12, paras. 3 and 4, and *O.R. IV*, p. 28, CDDH/427.

²³ See commentary Art. 11, para. 1, Protocol I, *supra*, p. 152.

First sentence

- 4589** This rule supplements the absolute obligation contained in Article 4 (*Fundamental guarantees*), paragraph 2(a), which prohibits “violence to the life, health and physical and mental well-being of persons”.²⁴ The protection provided here is more complete; it covers not only health, but also physical and mental integrity, which often, though not necessarily, go together. Thus the removal of an organ or amputation of a limb could endanger the integrity of a person without necessarily impairing his health.
- 4590** The term “endanger” refers to the stage before the actual effect takes place: the mental health of a person may be endangered if he is put into isolation which may be expected to lead to psychological problems. Putting a man into isolation may endanger his health, without knowing in fact whether his health will be damaged.
- 4591** “Any unjustified act or omission”; the justification resides in the interest of the person concerned, his well-being, improvement in his health or alleviation of his suffering. The term “unjustified” was considered at length, for a number of delegations wanted it to be deleted. The adjective was finally retained because it sometimes happens that an act or omission is medically justified, even though it endangers the health or integrity of the patient; for example, a surgical operation during which the anaesthetic causes medical problems. The act is justified, although there is no improvement in the patient’s state of health
- 4592** The term “omissions” refers not only to wilful omissions, but also to failure to act without due diligence.

Second sentence

- 4593** The aim of this sentence is to prohibit medical experiments. The term “medical procedure” means “any procedure which has the purpose of influencing the state of health of the person undergoing it”.²⁵ The reason for carrying out such a procedure must be, medically and morally, based on the expectation that it will be for the patient’s benefit. The reference to generally recognized medical standards, i.e., medical ethics, is the essential element in making this judgment; in addition, the criterion of non-discrimination must be taken into account. A person deprived of his liberty must be cared for in the same way as a free man suffering from the same ailment, i.e., he must receive the same treatment.
- 4594** This provision does not mention the patient’s consent. However, even with such consent, no procedure that is not based on medical grounds can be allowed. Reference may be made to the exceptions laid down in Article 11, paragraph 3, of Protocol I, viz:

“donations of blood for transfusion or of skin for grafting, provided that they are given voluntarily and without any coercion or inducement, and then

²⁴ See commentary Art. 4, *supra*, p. 1365.

²⁵ See commentary Art. 11, Protocol I, *supra*, p. 149.

only for therapeutic purposes, under conditions consistent with generally accepted medical standards and controls designed for the benefit of both the donor and the recipient”.

These exceptions should apply by analogy to situations of non-international armed conflict even though they are not expressly included in the text. They correspond to the spirit if not to the letter of Protocol II. The negotiators of Protocol II wanted the instrument to be simple and the rules not to be too detailed for fear that they might otherwise be incapable of application as being beyond the capabilities of the authorities responsible. Of course, the humanitarian considerations remain the same.

Paragraph 3

4595 Persons who are neither interned nor detained within the meaning of paragraph 1, but whose liberty is restricted in some way for reasons related to the conflict, have the benefit of the fundamental guarantees laid down in Article 4 (*Fundamental guarantees*), as well as that of the provisions of Article 5 which are not concerned with the material conditions of detention, i.e., paragraphs 1(a), (c) and (d), and 2(b), which deal with the treatment of the wounded and sick, the right to receive individual or collective relief, the right to practise their religion, the right to receive spiritual assistance when appropriate, and the right to send and receive mail. This provision is aimed at ensuring reasonable living conditions to persons under house arrest or who live under surveillance in any other way. For example, permission to send and receive mail is important for a person who is forced to live in a district far away from his usual place of residence.

Paragraph 4

4596 This paragraph provides that if it is decided to release persons deprived of their liberty, necessary measures to ensure their safety must be taken by those who decide to release them. There was some controversy about this rule and it was necessary to choose between the two possibilities proposed by the Sub-Group of the Working Group.²⁶ In fact, a distinction should be made between two elements: on the one hand, the decision to release, and on the other hand, the conditions of safety. For some the prime consideration should be the question of decision-making, while others recommended that no release should be possible in the absence of conditions of safety to do so, i.e., that the element of safety should be foremost. The text as adopted takes into account both aspects of the problem, which are in fact interdependent. Release should not take place if it

²⁶ O.R. X, pp. 106-107, CDDH/I/287/Rev.1.

proves impossible to take the necessary measures to ensure the safety of the persons concerned. It is not indicated for how long such conditions of safety should be envisaged. It seems reasonable to suppose that this should be until the released persons have reached an area where they are no longer considered as enemies, or otherwise until they are back home, as the case may be.

S.J.

Protocol II

Article 6 – Penal prosecutions

1. This Article applies to the prosecution and punishment of criminal offences related to the armed conflict.
2. No sentence shall be passed and no penalty shall be executed on a person found guilty of an offence except pursuant to a conviction pronounced by a court offering the essential guarantees of independence and impartiality. In particular:
 - (a) the procedure shall provide for an accused to be informed without delay of the particulars of the offence alleged against him and shall afford the accused before and during his trial all necessary rights and means of defence;
 - (b) no one shall be convicted of an offence except on the basis of individual penal responsibility;
 - (c) no one shall be held guilty of any criminal offence on account of any act or omission which did not constitute a criminal offence, under the law, at the time when it was committed; nor shall a heavier penalty be imposed than that which was applicable at the time when the criminal offence was committed; if, after the commission of the offence, provision is made by law for the imposition of a lighter penalty, the offender shall benefit thereby;
 - (d) anyone charged with an offence is presumed innocent until proven guilty according to law;
 - (e) anyone charged with an offence shall have the right to be tried in his presence;
 - (f) no one shall be compelled to testify against himself or to confess guilt.
3. A convicted person shall be advised on conviction of his judicial and other remedies and of the time-limits within which they may be exercised.
4. The death penalty shall not be pronounced on persons who were under the age of eighteen years at the time of the offence and shall not be carried out on pregnant women or mothers of young children.
5. At the end of hostilities, the authorities in power shall endeavour to grant the broadest possible amnesty to persons who have participated in the armed conflict, or those deprived of their liberty for reasons related to the armed conflict, whether they are interned or detained.

Commentary

General remarks

4597 The whole of Part II (*Humane treatment*) is aimed at ensuring respect for the elementary rights of the human person in non-international armed conflicts. Judicial guarantees play a particularly important role, since every human being is entitled to a fair and regular trial, whatever the circumstances;¹ the guarantees defined in this article refer to the two stages of the procedure: preliminary investigation and trial.² Just like common Article 3, Protocol II leaves intact the right of the established authorities to prosecute, try and convict members of the armed forces and civilians who may have committed an offence related to the

¹ See *O.R.* VIII, pp. 346-355, CDDH/I/SR.33, paras. 22-71; pp. 357-365, CDDH/I/SR.34.

² The execution of penalties is not dealt with in this article – with the exception of the execution of the death penalty on pregnant women and mothers of young children, which is prohibited by para. 4.

armed conflict; however, such a situation often entails the suspension of constitutional guarantees, the promulgation of special laws and the creation of special jurisdictions. Article 6 lays down some principles of universal application which every responsibly organized body must, and can, respect.³ It supplements and develops common Article 3, paragraph 1, sub-paragraph (1)(d), which prohibits “the passing of sentences and the carrying out of executions without previous judgment pronounced by a regularly constituted court, affording all the judicial guarantees which are recognized as indispensable by civilized peoples”. This very general rule required clarification to strengthen the prohibition of summary justice and of convictions without trial, which it already covers. Article 6 reiterates the principles contained in the Third and Fourth Conventions,⁴ and for the rest is largely based on the International Covenant on Civil and Political Rights,⁵ particularly Article 15, from which no derogation is permitted, even in the case of a public emergency threatening the life of the nation. In Protocol I, Article 75 (*Fundamental guarantees*) contains rules with the same tenor.

Historical background

4598 The ICRC draft originally contained two articles: *Principles of penal law and Penal prosecutions*.⁶ During the preliminary examination of those articles numerous amendments were submitted; a proposal to combine the two provisions in a single article was put forward,⁷ and adopted as a starting point; this was the origin of the present Article 6.

Analysis of the article

Paragraph 1 – The scope of application

4599 This paragraph lays down the scope of application of the article by confining it to offences related to the armed conflict; these must be criminal offences and not merely administrative or disciplinary offences or procedures. *Ratione personae*, Article 6 is quite open and applies equally to civilians and combatants who have fallen in the power of the adverse party and who may be subject to penal prosecutions.

³ Dissident armed forces and organized armed groups within the meaning of Article 1 of the Protocol, which are opposed to the government in power, must be able to apply the Protocol. See *supra*, p. 1353.

⁴ See Arts. 86, 89-108 of the Third Convention and Arts. 64-78 of the Fourth Convention.

⁵ Hereinafter referred to as the Covenant.

⁶ Draft Arts. 9 and 10. It should be noted that the present heading of the article is incomplete, since it mentions only penal prosecutions, while the provision also lays down principles of penal law.

⁷ *O.R.* IV, pp. 35-36, CDDH/I/262.

Paragraph 2 – The right to be tried by an independent and impartial court*Opening sentence*

- 4600** The text repeats paragraph 1, sub-paragraph (1)(d) of common Article 3, with a slight modification. The term “regularly constituted court” is replaced by “a court offering the essential guarantees of independence and impartiality”. In fact, some experts argued that it was unlikely that a court could be “regularly constituted” under national law by an insurgent party. Bearing these remarks in mind, the ICRC proposed an equivalent formula taken from Article 84 of the Third Convention,⁸ which was accepted without opposition.
- 4601** This sentence reaffirms the principle that anyone accused of having committed an offence related to the conflict is entitled to a fair trial. This right can only be effective if the judgment is given by “a court offering the essential guarantees of independence and impartiality”. Sub-paragraphs (a)-(f) provide a list of such essential guarantees; as indicated by the expression “in particular” at the head of the list, it is illustrative, only enumerating universally recognized standards.

Sub-paragraph (a) – Right to information and defence

- 4602** The ICRC draft simply provided for “a procedure affording the accused the necessary rights and means of defence”.⁹ That formula was clarified and developed following the proposal by a delegation, on which the present text is based.¹⁰ The rules laid down here are very clear and do not give rise to any difficulties of interpretation: the accused must be informed as quickly as possible of the particulars of the offence alleged against him, and of his rights, and he must be in a position to exercise them and be afforded the rights and means of defence “before and during his trial”, i.e., at every stage of the procedure. The right to be heard, and, if necessary, the right to call on the services of an interpreter, the right to call witnesses for the defence and produce evidence; these constitute the essential rights and means of defence.¹¹

Sub-paragraph (b) – The principle of individual responsibility

- 4603** This sub-paragraph lays down the fundamental principle of individual responsibility; a corollary of this principle is that there can be no collective penal responsibility for acts committed by one or several members of a group. This principle is contained in every national legislation. It is already expressed in

⁸ See *Commentary III*, pp. 411-412 (Art. 84); pp. 484-492 (Art. 105).

⁹ See draft Art. 10, para. 1.

¹⁰ See *O.R. X*, p. 145, CDDH/I/317/Rev.1. The amendment submitted during these deliberations is mentioned, but the text is not published in the Official Records as it was a working document.

¹¹ See *Commentary Drafts*, p. 142.

Article 33 of the Fourth Convention, where it is more elegantly worded as follows: “No protected person may be punished for an offence he or she has not personally committed”.¹² The wording was modified to meet the requirement of uniformity between the texts in the different languages and, in this particular case, with the English terminology (“individual penal responsibility”). Article 75, paragraph 4(b), of Protocol I, lays down the same principle.

Sub-paragraph (c) – The principle of non-retroactivity

- 4604** This sub-paragraph sets out two aspects of the principle that penal law¹³ should not be retroactively applied: *nullum crimen sine lege* and *nulla poena sine lege*. The ICRC draft was inspired by Articles 99 of the Third Convention, 67 of the Fourth Convention and 15, paragraph 1, of the Covenant.¹⁴ The proposal to adopt this wording was put forward in an amendment which served as a basis for discussion.¹⁵ There was a long debate, followed by a vote in Committee resulting in a large majority.¹⁶ The wording of the Covenant was retained despite some problems of interpretation owing to the specific context of non-international armed conflict. This solution was adopted out of a concern to establish in Protocol II fundamental guarantees for the protection of human beings, which would be equivalent to those granted by the Covenant in the provisions from which no derogation may be made, even in time of public emergency threatening the life of the nation.¹⁷ Article 15 of the Covenant is one of those articles. In fact, the relevance of including the principle on non-retroactivity was never contested, but the first sentence of the sub-paragraph, and in particular the words “under national or international law”, were not considered by everyone to be very clear.
- 4605** The possible co-existence of two sorts of national legislation, namely, that of the State and that of the insurgents, makes the concept of national law rather complicated in this context.
- 4606** The Conference followed the Covenant, though there was no real explanation given as regards the meaning to be attributed to the term “national law”, which appears in the French text though not in the English text of this sub-paragraph (as the reference to “le droit national ou international” in French has been abbreviated to “the law” in English, the following comments apply more particularly to the French text, although clearly “the law” referred to in the English text does include national law). The interests of the accused and good faith require that this should be interpreted in the light of the initial ICRC proposal, i.e., that no one can be convicted for an act, or for failing to act contrary to a duty to act, when such an act or omission was not an offence at the time when it was committed.

¹² *Commentary IV*, p. 224 (Art. 33).

¹³ The term “law” is used here in a broad sense, as *lex* encompasses custom.

¹⁴ See draft Art. 9, para. 2.

¹⁵ *O.R. IV*, pp. 35-36, CDDH/I/262.

¹⁶ *O.R. X*, p. 130, CDDH/234/Rev.1, para. 87.

¹⁷ Covenant, Art. 4, paras. 1-2.

4607 The reference to international law is mainly intended to cover crimes against humanity. A breach of international law should not go unpunished on the basis of the fact that the act or omission (failure to act) concerned was not an offence under the national law at the time it was committed. Some delegations suggested replacing the term “under national or international law” by “under the applicable law” or even by “under applicable domestic or international law”,¹⁸ but the majority finally considered that it was best to retain the wording of the Covenant “in order to avoid being out of line”.

Sub-paragraph (d) - The principle of the presumption of innocence

4608 This sub-paragraph sets out the principle of the presumption of innocence, which is implicitly contained in Article 67 of the Fourth Convention. This refers to the “general principles of law”. It is also contained in Article 14, paragraph 2, of the Covenant. In addition, it is laid down in Article 75 (*Fundamental guarantees*), paragraph 4(d), of Protocol I.

Sub-paragraph (e) - The right of the accused to be present at his own trial

4609 This sub-paragraph reiterates the principle laid down in Article 14, paragraph 3(d), of the Covenant. It is the result of a proposal in the Working Group which recommended “everyone charged with an offence shall have the right to be tried in his presence”.¹⁹ The proposal was not adopted in this form because a number of delegations argued that sentences *in absentia* are allowed. The right of the accused to be present at his trial, which is established here, should be understood as a right which the accused is free to exercise or not.

Sub-paragraph (f) - The right not to be compelled to testify against oneself or to confess guilt

4610 This sub-paragraph repeats Article 14, paragraph 3(g), of the Covenant. It was included as the result of a proposal made by the Working Group.²⁰

Paragraph 3 - The right to be informed of judicial remedies and of the time-limits in which they must be exercised

4611 It was not considered realistic in view of the present state of national legislation in various countries to lay down a principle to the effect that everyone has a right

¹⁸ See *O.R.* X, p. 144, CDDH/I/317/Rev.2.

¹⁹ *Ibid.*

²⁰ *Ibid.*

of appeal against sentence pronounced upon him, i.e., to guarantee the availability of such a right, as provided in the ICRC draft.²¹ However, it is clear that if such remedies do exist, not only should everyone have the right to information about them and about the time-limits within which they must be exercised, as explicitly provided in the text, but in addition, no one should be denied the right to use such remedies.²²

4612 The term “judicial and other remedies” was originally adopted in English and, in order to maintain uniformity between the languages, was translated into French as “droits de recours judiciaires et autres”. The word “autres” is superfluous in the French text since the words “droit de recours” cover all the possible remedies. However, in English the word “judicial” was not considered sufficient to include all the different types of remedies existing in various legal systems.

Paragraph 4 - The prohibition on pronouncing the death sentence upon persons under eighteen years and on carrying it out on pregnant women and mothers of young children

4613 The authorities retain the right to pronounce the death sentence in accordance with national legislation with one exception: adolescents under the age of eighteen years at the time they committed the offence; the death sentence may be pronounced but may not be carried out on pregnant women or mothers of young children. According to the experts who were consulted it would not have been possible to impose a general prohibition on the death sentence as such a decision would not have taken into account all the penal systems in force.²³ Nevertheless, the ICRC expressed the wish that the penalty should not be executed before the end of hostilities.²⁴ This proposal, which was included in the draft, reflected the experience that executions result in an escalation of violence on both sides. Moreover, when hostilities have ceased, passions die down and there is a possibility of amnesty. Unfortunately, however modest the proposal, it did not gain a consensus. On the other hand, the limitation laid down in this paragraph was easily accepted in principle; it was inspired by Article 68, paragraph 4, of the Fourth Convention,²⁵ and by Article 6, paragraph 5, of the Covenant. The discussions were essentially about two points; fixing the age limit, and extending the rule in favour of pregnant women to cover also mothers of young children.

4614 The age limit of eighteen years was adopted in order to harmonize with the Conventions and the Covenant, which also contain this age limit. The proposal concerning mothers of young children was put forward by a delegation.²⁶ The concept of “young children” as a legal term remained vague. For this reason a

²¹ Draft Art. 10, para. 2.

²² This clarification was proposed in an amendment. It was not adopted apparently to avoid making the text too complicated. See *O.R.* IV, p. 33, CDDH/I/259.

²³ See *O.R.* VIII, pp. 357-365, CDDH/I/SR.34, paras. 2 ff.

²⁴ Draft Art. 10, para. 3.

²⁵ See *Commentary IV*, pp. 346-347 (Art. 68).

²⁶ *O.R.* IV, p. 33, CDDH/I/259.

vote was requested on this point, and it was adopted by 37 votes to 2, with 9 abstentions.²⁷ In any event, the concept is wider than “new-born babies” in the sense of Article 8 (*Terminology*), sub-paragraph (a), of Protocol I. It is up to the responsible authorities to reach a judgment in good faith on what is meant by “young children”.²⁸

4615 The results of the vote suggest that the concept will be broadly interpreted, and that in such special cases the death penalty will not be pronounced.

4616 In any case, Article 76 (*Protection of women*), paragraph 3, of Protocol I, which has the same tenor, contains the recommendation not to pronounce the death penalty on pregnant women and on mothers having dependent infants and this recommendation should be considered here.

Paragraph 5 – Amnesty

4617 Amnesty is a matter within the competence of the authorities. It is an act by the legislative power which eliminates the consequences of certain punishable offences, stops prosecutions and quashes convictions.²⁹ Legally, a distinction is made between amnesty and a free pardon. The latter is granted by the Head of State and puts an end to the execution of the penalty, though in other respects the effects of the conviction remain in being. This paragraph deals only with amnesty, though this does not mean that free pardon is deliberately excluded. The draft adopted in Committee provided, on the one hand, that anyone convicted should have the right to seek a free pardon or commutation of sentence, and on the other hand, that amnesty, pardon or reprieve of a death sentence may be granted in all cases.³⁰ That paragraph was not adopted in the end, in order to keep the text simple. Some delegations considered that it was unnecessary to include it because national legislation in all countries provides for the possibility of a free pardon.³¹

4618 The object of this sub-paragraph is to encourage gestures of reconciliation which can contribute to reestablishing normal relations in the life of a nation which has been divided.

S.J.

²⁷ O.R. X, p. 131, CDDH/234/Rev.1, para. 90.

²⁸ The Conventions provide some sort of guide in this respect by mentioning mothers of children under seven years old (Art. 14, para. 1, Fourth Convention).

²⁹ “Amnesty” is described as an act of oblivion, a general pardon of past offences by the ruling authority (*Shorter Oxford English Dictionary*, 1978, p. 60). Its mode of operation and effect may obviously differ from country to country. The French definition (“Amnistie: acte du législateur qui a pour effet d’éteindre l’action publique ou d’effacer une peine prévue pour une infraction et, en conséquence, soit d’empêcher ou d’arrêter les poursuites, soit d’effacer les condamnations.”), as given in the *Grand Dictionnaire encyclopédique Larousse*, Vol. I, 1982, p. 414, indicates that it is an act of the legislative whereby the public prosecution of certain offences is ended and the penalty thereon is cancelled, so that no more prosecutions will be instituted, and those already instituted will be discontinued and any convictions for such offences will be quashed.

³¹ O.R. VII, pp. 94 and 96, CDDH/SR.50, para. 79 and 99.

Part III – Wounded, sick and shipwrecked

Introduction

- 4619** This Part is aimed at developing the fundamental principle that the wounded and sick should be respected and protected, as contained, very succinctly, in common Article 3, paragraph 1, sub-paragraph (2), of the Conventions: “The wounded and sick shall be collected and cared for”. It also applies to the shipwrecked, who are put on the same footing as the wounded and sick under the Geneva Conventions.
- 4620** After 1949, the ICRC became concerned with the situation of civilian medical personnel who were only partially protected under the Fourth Convention. As a first step the problem was studied from a general point of view, both for international and non-international conflicts.
- 4621** For this purpose, the ICRC acted together with the two large international associations representing the medical profession, the World Medical Association and the International Committee of Military Medicine and Pharmacy, in which the medical corps of more than eighty countries participate. They jointly formed a working group which held a great many “Entretiens consacrés au droit international médical” in the presence of an observer representing the WHO. Draft Rules for the Protection of the Wounded and Sick and of Civilian Medical and Nursing Personnel in Time of Conflict were presented at the XXth International Conference of the Red Cross (Vienna, 1965).¹
- 4622** The draft was favourably received, but the Conference wanted a thorough study to be carried out on an extension of the use of the red cross and red crescent emblem.
- 4623** The XXIst International Conference of the Red Cross (Istanbul, 1969) required concrete proposals to be put forward this time by the ICRC and by governments. At that time a Protocol additional to the Fourth Convention was envisaged.
- 4624** The Working Group was extended by a number of observers, in particular experts from the League of Red Cross and Red Crescent Societies, the International Law Association, the Commission Médico-juridique de Monaco, and the International Committee for the Neutrality of Medicine. On reflection, it appeared that it would be preferable to provide separate rules for situations of non-international armed conflicts, and two drafts, one for international conflicts and the other for internal conflicts, were submitted to the Conference of

¹ CE/7b, pp. 1-3.

Government Experts in 1971. The draft relating to non-international armed conflicts was aimed at developing common Article 3 by introducing therein some basic concepts concerning not only civilian medical personnel, but also on the protection of the wounded and sick, and of medical personnel, units and materials for their care, irrespective of whether these are military or civilian.²

4625 This 1971 draft forms the basis of this Part.

4626 It should also be recalled that the XIXth International Conference of the Red Cross (New Delhi, 1957) had expressed

“the wish that a new provision be added to the existing Geneva Conventions of 1949, extending the provisions of Article 3 thereof so that:

a) the wounded may be cared for without discrimination and doctors in no way hindered when giving the care which they are called upon to provide in these circumstances,

b) the inviolable principle of medical professional secrecy may be respected,

c) there may be no restrictions, other than those provided by international legislation, on the sale and free circulation of medicines, it being understood that these will be used exclusively for therapeutic purposes.”³

4627 These concerted efforts undertaken more than twenty years previously resulted in the adoption of this Part, whose object and purpose was clearly defined by a delegate of Committee II of the Diplomatic Conference:

“The Committee’s essential task was to make explicit what was implicit in the very simple general statement in Article 3 common to the Geneva Conventions [...] by formulating a number of derivative rules specifying the protection to be given to medical personnel, units and installations, the standard of care, and so forth.”⁴

4628 This Part reiterates the essential substance of Part II (*Wounded, sick and shipwrecked*) of Protocol I, which corresponds to it. The rules were negotiated on parallel lines, taking into account the particular context of each category of conflict.

4629 In the drafts the ICRC proposed that each of these two Parts on the “Wounded, sick and shipwrecked”, one in each Protocol, would open with definitions.⁵ The question of these definitions was discussed at great length.

4630 In fact, from the beginning there was no unanimous view about the whole question of having definitions; some delegations considered that definitions did not belong in an instrument relating to non-international armed conflicts and would merely complicate an understanding of the text. It was even considered to place these definitions in an annex to the Protocol. Despite such initial doubts, definitions were nevertheless scrupulously established and adopted by Committee

² *Ibid.*, pp. 30-38.

³ Resolution XVII of the XIXth International Conference of the Red Cross, New Delhi, 1957.

⁴ *O.R.* XI, p. 209, CDDH/II/SR.21, para. 43.

⁵ See draft Art. 8, Protocol I, and Art. 11, Protocol II.

II and the delegates endeavoured to achieve a degree of uniformity in the terminology used in the two Protocols.⁶

4631 In the end the definitions were omitted from the final version of Protocol II as part of the proposal to simplify the text, put forward by the Pakistani delegation.⁷ This was not because of controversies about matters of substance, but in a genuine attempt to simplify the text. The Part as a whole was not called into question, even though it was negotiated on the basis of definitions which were not adopted. The terminology used is identical to that of Protocol I and the definitions given there in Article 8 (*Terminology*), though of course they have no binding force in Protocol II, nevertheless constitute a guide for the interpretation of the terms. For this reason we will, in our commentary on the articles, often refer to those definitions.

4632 Part III supplements Part II (*Humane treatment*). The right of the wounded, sick and shipwrecked to receive aid is a fundamental guarantee of humane treatment in a specific situation. As is the case in Part II (*Humane treatment*), Part III sets forth individual rights which are directly applicable to those entitled to them, without being dependent on bilateral arrangements being made between the two opposing parties.

S.J.

⁶ This is evidenced by the explanatory notes given by the Rapporteur of Committee II on the report of the Drafting Committee, which read: "A number of the terms defined in draft Protocol II, article 11, were also defined in draft Protocol I, article 8, concerning which he had made a number of interpretative statements; those statements applied equally to the definitions in draft Protocol II, article 11, where the same words were used. The same words had, in fact, been used in the two sets of definitions wherever that was appropriate." *O.R.* XII, p. 260, CDDH/II/SR.79, para. 19.

⁷ *O.R.* IV, p. 43, CDDH/427.

Article 7 – Protection and care

1. All the wounded, sick and shipwrecked, whether or not they have taken part in the armed conflict, shall be respected and protected.
2. In all circumstances they shall be treated humanely and shall receive, to the fullest extent practicable and with the least possible delay, the medical care and attention required by their condition. There shall be no distinction among them founded on any grounds other than medical ones.

Commentary

General remarks

4633 This article corresponds to the ICRC draft, reduced to expressing the fundamental principles of protection and care; it reiterates the four paramount

principles which have defined the inviolability of the wounded ever since 1929: respect, protection, humane treatment and medical care.¹ In addition, the draft contained provisions prohibiting unjustified acts or omissions harmful to health and to the physical and mental integrity of people, in particular, mutilation and medical or scientific experiments. These points were not retained, but Article 4 (*Fundamental guarantees*), paragraph 2(a), Article 5 (*Persons whose liberty has been restricted*), paragraph 2(e), and Article 10 (*General protection of medical duties*), paragraph 2, provide all necessary guarantees in this respect.

4634 Article 7 follows the wording of Article 10 of Protocol I (*Protection and care*). Common Article 3 merely provides in paragraph 1, sub-paragraph (2), that “the wounded and sick shall be collected and cared for”. Article 7 reaffirms and develops this fundamental rule and provides the keystone to the whole of this Part. In fact, the rights and obligations laid down in Articles 8-12 follow from the principle that the wounded and the sick are entitled to immunity. They serve in effect to implement that principle.

Paragraph 1

4635 This paragraph recalls the principle of the respect and protection due to the wounded, sick and shipwrecked. The concepts of respect and protection are taken from the Conventions, the first concept having been introduced in the 1906 revision and the second concept in 1929. The verb “to respect” means “to spare, not to attack”; it is an obligation to abstain from any hostile act, to which is added the duty to protect. “To protect” means “to come to someone’s defence, to lend help and support”.² This implies taking measures to remove the wounded, sick and shipwrecked, if possible, from the scene of combat and shelter them, and to ensure that they are effectively respected, i.e., that no one takes advantage of their weakness in order to mistreat them, steal their belongings, or harm them in any other way. The duty to respect and protect is incumbent on everyone, both on the members of armed forces or armed groups and on the civilian population.

4636 What is meant by the phrase “wounded, sick and shipwrecked”? Protection of the wounded, sick and shipwrecked responds to a fundamental humanitarian requirement and was not cast into doubt in the context of drawing up rules to govern non-international armed conflicts; this is why it is possible to use the same definition of the wounded, sick and shipwrecked as the point of departure in the two Protocols. In the light of the negotiations it can be noted that the basic terminology is uniform.³

4637 In the absence of a provision of definitions, which was finally not adopted for Protocol II,⁴ we refer to Article 8 (*Terminology*), sub-paragraph (a), of Protocol I, which defines the wounded and sick as follows:

¹ Cf. *Commentary I*, p. 135 (Art. 12).

² Cf. *ibid.*

³ Cf. introduction to this Part, *supra*, p. 1403.

⁴ *Ibid.*, p. 1403.

“‘Wounded’ and ‘sick’ mean persons, whether military or civilian, who, because of trauma, disease or other physical or mental disorder or disability, are in need of medical assistance or care and who refrain from any act of hostility. These terms also cover maternity cases, new-born babies and other persons who may be in need of immediate medical assistance or care, such as the infirm or expectant mothers, and who refrain from any act of hostility.”⁵

4638 The definition of the wounded and sick protected by this Part is based on two criteria:

- 1) requiring medical care;
- 2) refraining from any act of hostility.

4639 Any person, military or civilian, fulfilling these two conditions is included amongst the wounded or sick; maternity cases, new-born babies, the infirm and expectant mothers are examples thereof, but this is not an exhaustive list. Thus this definition differs from the usual meaning of the terms “wounded” and “sick”.⁶ In fact, a wounded or sick person who continued to fight would not be considered as such under the terms of the Protocol, and would consequently not be entitled to protection under this article.

4640 In the absence of a definition here, Article 8 (*Terminology*), sub-paragraph (b), of Protocol I, provides a guideline also for the interpretation of the concept of “shipwrecked”:

“‘Shipwrecked’ means persons, whether military or civilian, who are in peril at sea or in other waters as a result of misfortune affecting them or the vessel or aircraft carrying them, and who refrain from any act of hostility.”⁷

4641 It is quite logical to consider that, as in the case of the wounded or sick, the shipwrecked in order to be entitled to protection must refrain from any act of hostility. In fact, it is difficult to imagine that a shipwrecked person who continued to fire from a rescue craft would be respected as such. A study of the deliberations of the Committee reveals that the concept of “shipwrecked” covers not only those shipwrecked from a ship in distress, i.e., shipwrecked in the strict sense, but also for example, anyone in distress in the water who has come down from an aircraft or who has accidentally fallen overboard. The situation of danger must be the result of an accident. Persons who have voluntarily placed themselves in such a situation (such as a group of commandos consisting of frogmen, for example) are excluded from the definition. The Conference did not retain a proposal put forward during the deliberations aimed at including among the shipwrecked persons who are lost on land, in particular in deserts, and as a result get into a dangerous situation. The provision covers those shipwrecked at sea and “in other waters”, i.e., lakes or rivers. The shipwrecked person is considered as such until

⁵ Cf. commentary Art. 8, sub-para. (a), Protocol I, *supra*, p. 116, and draft Art. 11, Protocol II, as drafted by the Committees (O.R. XIII, p. 275, CDDH/235/Rev.1).

⁶ See commentary Art. 8, sub-para. (a), Protocol I, *supra*, p. 116.

⁷ Cf. commentary Art. 8, sub-para. (b), Protocol I, *supra*, p. 118, and draft Art. 11, Protocol II, as drafted by the Committees (O.R. XIII, p. 275, CDDH/235/Rev.1).

the end of rescue operations. The Rapporteur of Committee II illustrated the reasons therefor very clearly by stating:

“It must be made clear that a shipwrecked person who was flown by helicopter, for instance, still had shipwrecked status during the flight: otherwise the flight would not be covered by the definition of medical transportation.”⁸

4642 In a situation of non-international armed conflict people cannot acquire a different status to the same extent as in an international conflict, since there are not, strictly speaking, different categories of protected persons: “all persons who do not take a direct part or who have ceased to take part in hostilities”⁹ are protected. Nevertheless, after the end of the rescue operation the shipwrecked are no longer considered as such, and, depending on the circumstances, will be protected under one or other of the rules of the Protocol. As the case may be, they will be wounded or sick within the meaning of this article, if their state of health requires care;¹⁰ they will fall in the category of those detained or interned, if they have been captured by the adverse party,¹¹ or they may simply be civilians.¹² Protection is due to all the wounded, sick and shipwrecked, “whether or not they have taken part in the armed conflict”. No distinction is made between members of the armed forces and civilians or according to whether they belong to the one party or the other concerned; the obligation to respect and protect is general and absolute.

Paragraph 2

4643 The wounded, sick and shipwrecked shall “in all circumstances [...] be treated humanely and shall receive, to the fullest extent practicable and with the least possible delay, the medical care and attention required by their condition”.

4644 Humane treatment is a general principle which applies at all times and in all places; it follows from respect and protection. This is a reaffirmation in this particular context of the principle already contained in Article 4 (*Fundamental guarantees*), paragraph 1.¹³

4645 As regards medical care and attention, the expression “to the fullest extent practicable” was incorporated as a matter of realism, in order to take into account the means and personnel available. It is sometimes materially impossible to immediately provide the care and attention required. The obligation remains to provide it and to do so as well and as quickly as possible, given the circumstances.

⁸ Cf. O.R. XII, p. 264, CDDH/II/SR.79, para. 45.

⁹ Art. 4, para. 1, and the commentary thereon, *supra*, p. 1369.

¹⁰ Protected under the whole of Part III and in particular by the present Article 7.

¹¹ Protected by Arts. 5 and 6; cf. the commentary thereon, *supra*, p. 1383 and p. 1395.

¹² Protected by Arts. 4 and 13. See the commentary thereon, *supra*, p. 1367 and *infra*, p. 1447. In addition, for a detailed analysis of the situation of the shipwrecked in international conflicts, see commentary Art. 8, sub-para. (b), Protocol I, *supra*, p. 118.

¹³ Cf. commentary Art. 4, *supra*, p. 1367.

4646 No distinction founded on any ground other than medical ones may be made between patients, i.e., no distinction founded on:

“race, colour, sex, language, religion or belief, political or other opinion, national or social origin, wealth, birth or other status, or on any other similar criteria (hereinafter referred to as ‘adverse distinction’) [...]”¹⁴

4647 The only factors allowed for giving priority in medical care and attention are matters of urgency and medical ethics.

S.J.

¹⁴ Art. 2, para. 1, and the commentary thereon, *supra*, p. 1358.

Article 8 – Search

Whenever circumstances permit, and particularly after an engagement, all possible measures shall be taken, without delay, to search for and collect the wounded, sick and shipwrecked, to protect them against pillage and ill-treatment, to ensure their adequate care, and to search for the dead, prevent their being despoiled, and decently dispose of them.

Commentary

General remarks

4648 Article 8 develops and reaffirms the obligation to collect for the wounded and sick, which is already contained in common Article 3, paragraph 1, sub-paragraph 2, and which reads as follows: “The wounded and sick shall be collected and cared

for”. There is no corresponding provision in Protocol I, as this question is already dealt with by the Conventions (Article 15, First Convention; Article 18, Second Convention; Article 16, Fourth Convention). The text reflects Article 15 of the First Convention with slight differences in the wording and with the addition of the shipwrecked.

- 4649** Following the example of the Conventions, the ICRC draft¹ provided for the possibility of concluding local arrangements for the removal of the wounded and sick, elderly persons and children from the combat zone and from besieged or encircled areas. This provision, which was retained by Committee II,² was eliminated in the final version of the Protocol as some considered it to be rather unrealistic in the context of a non-international armed conflict. Nevertheless, this does not detract from the fact that evacuation measures should be encouraged whenever they are feasible.
- 4650** To search for and collect the wounded, sick and shipwrecked constitutes the implementation of the fundamental principle of protection and care set out in Article 7 (*Protection and care*). There is a duty to do so. All possible measures must be taken to fulfil this duty, “whenever circumstances permit, and particularly after an engagement”. It is particularly after an engagement that it is necessary to search for victims, but the obligation goes further: it applies whenever circumstances permit. Article 15 of the First Convention provides that the Parties to the conflict must take all possible measures “at all times, and particularly after an engagement”; Article 18 of the Second Convention contains the same obligation, though it is limited by the words “after each engagement”.
- 4651** These words were already contained in the corresponding provision of Hague Convention X of 1907 and in the Geneva Convention of 1906. The 1949 Conference substituted them in the First Convention by the words “at all times”, but left the original expression in the Second Convention unchanged, in accordance with the views expressed by the experts in 1947. They considered that the expression “after each engagement” corresponded more closely to the specific conditions at sea.³
- 4652** Article 8 of the Protocol covers search for the wounded and sick, as well as the shipwrecked and the formula “whenever circumstances permit”, which was adopted, takes into account the above-mentioned provisions of the First and Second Conventions;⁴ it reflects the concrete possibilities of taking action.
- 4653** In 1949 the First Convention therefore extended the obligation in time, as the 1929 Convention, of which the formula was retained in the Second Convention, only laid down the duty to search for the wounded and sick “after each engagement”, and only for those on the battlefield. In modern armed conflicts hostilities are more continuous, flaring up in varying degrees and moving from place to place; it would often be difficult to determine where exactly the battlefield is in place and in time. Therefore the obligation to respect the

¹ Cf. *Commentary Drafts*, pp. 146-147 (Art. 13).

² O.R. XIII, p. 228, CDDH/II/287.

³ See *Commentary II*, p. 133 (Art. 18).

⁴ O.R. XI, p. 268, CDDH/II/SR.26, paras. 70-73, and pp. 269-271, CDDH/II/SR.27, paras. 5-18.

wounded and sick has a general scope. It applies to civilians, taking into account Article 18 (*Relief societies and relief actions*), paragraph 1, of the Protocol.⁵ The obligation includes search operations as far as the authorities are concerned, and also for medical and religious personnel and for armed units present in the area of military operations after an engagement.

4654 Victims must be protected against pillage and ill-treatment and they must receive adequate care. Such protection measures are particularly important during the period before the victims are able to be evacuated, when they are especially vulnerable. They reinforce the prohibition on pillage and violence to the life, health and physical or mental well-being which is already contained in Article 4 (*Fundamental guarantees*), paragraph 2(g) and (a), respectively.⁶

4655 “Adequate care” is first aid given on the spot, which may be of the utmost importance to avoid wounded, sick or shipwrecked succumbing during evacuation, which must take place as quickly as possible. Obviously such care includes ensuring the transport of the wounded to a place where they can be adequately cared for.

4656 It is prohibited to despoil the dead. They must be searched for, and they are entitled to be paid their last respects, i.e., they must be decently buried (apart from cases of disposal of the body at sea and cremation) after a religious service, if required.

4657 Protocol I contains a section on missing and dead persons,⁷ which contains, in particular, the obligation to search for persons reported missing by the adverse Party. In addition, the latter must transmit all relevant information in order to facilitate such searches (Article 33 – *Missing persons*, paragraph 1, Protocol I). Article 34 (*Remains of deceased*) provides, in particular, that gravesites must be marked. It would not have been realistic to lay down such detailed rules for the specific circumstances resulting from non-international armed conflicts. However, it is worth noting how important it is for families to be informed of the fate of their missing relatives and, when appropriate, the location of their graves, particularly in an internal fratricidal conflict. It may also be a factor facilitating a return to peace at the end of the confrontation. Experience shows the importance of such information about missing persons; in fact, in countries engaged in conflict where an ICRC delegation is carrying out activities of assistance and protection in accordance with the humanitarian mandate entrusted to it, the number or requests for searches received from families is always extremely high. The responsible authorities should, as far as possible, inform families about the fate of their relatives, or when appropriate facilitate the task of the ICRC in this field, which is a fundamental humanitarian activity for the benefit of the victims of armed conflicts of any kind.

S.J.

⁵ Unfortunately Art. 18, para. 1, merely authorizes the civilian population to *offer* to collect the wounded and sick. Cf. the commentary on this article, *infra*, p. 1477.

⁶ Cf. commentary Art. 4, *supra*, p. 1367.

⁷ Cf. Part II, Section III, Protocol I, and the commentary thereon, *supra*, p. 339.

Protocol II

Article 9 – Protection of medical and religious personnel

1. Medical and religious personnel shall be respected and protected and shall be granted all available help for the performance of their duties. They shall not be compelled to carry out tasks which are not compatible with their humanitarian mission.
2. In the performance of their duties medical personnel may not be required to give priority to any person except on medical grounds.

Commentary**General remarks**

- 4658 The Conventions provide for protection of military medical and religious personnel,¹ and some members of civilian medical personnel.² Protocol I extended such protection to all civilian medical and religious personnel.³ On the other hand, common Article 3 is silent on this point and merely lays down the principle that the wounded and sick should be protected. Although the implementation of this principle implied that respect and protection was due to medical personnel, it was necessary to make good this omission in order to strengthen the protection and improve the means of safeguarding the wounded and sick. This is the aim of Article 9.
- 4659 Article 9 reflects the tenor of Article 15 of the ICRC draft.⁴ Like the other provisions of this Part, Article 9 was negotiated and drafted on the basis of definitions developed for the two Protocols together.

Paragraph 1

- 4660 The first sentence lays down the principle that respect and protection is due to religious and medical personnel which shall display the distinctive emblem, as prescribed in article 12 (*The distinctive emblem*). It therefore seems essential to define such personnel who are entitled to display the red cross or red crescent emblem under the authorization and recognition of the authorities in power. If this were not the case, abuses would be inevitable.
- 4661 Who fall under the definition of medical and religious personnel? The Working Group which studied questions relating to Articles 15, 16 and 18,⁵ to be dealt with by Committee II, considered in its report that the term “medical personnel”, as used in Protocol II, should include all the categories of persons listed in Article 8 (*Terminology*), sub-paragraph (d), of Protocol I.⁶
- 4662 As regards religious personnel, the Working Group formally raised the question whether the term “religious personnel” should have a wider scope than it had at that stage of the negotiations in article 15 of Protocol I (*Protection of*

¹ See *Commentary I*, pp. 217-229 (Arts. 24-26). It should be recalled that Article 26 treats, under certain conditions, personnel of Red Cross Societies and of other recognized relief societies in the same way as military medical personnel.

² Art. 20, Fourth Convention: “Persons regularly and solely engaged in the operation and administration of civilian hospitals, including the personnel engaged in the search for, removal and transporting of and caring for wounded and sick civilians, the infirm and maternity cases shall be respected and protected.” See *Commentary IV*, pp. 156 ff.

³ Cf. commentary Art. 15, and Art. 8, sub-para. (c) and (d) of Protocol I, *supra*, pp. 189 and 124.

⁴ See *Commentary Drafts*, pp. 147-148 (Art. 15).

⁵ See present Arts. 9, 10 and 12.

⁶ O.R. XIII, p. 217, CDDH/II/269.

civilian medical and religious personnel), and wider than was envisaged by Article 24 of the First Convention, and in Articles 36 and 37 of the Second Convention.⁷ On the basis of an analysis of this question it was decided that religious personnel should be defined in the same way in the two Protocols.

4663 We should therefore refer, both for medical personnel and for religious personnel, to the definitions of these terms given in Article 8 (*Terminology*) of Protocol I.

4664 Medical personnel covers “those persons assigned, by a Party to the conflict, exclusively to the medical purposes enumerated under sub-paragraph (e)”, i.e., “the search for, collection, transportation, diagnosis or treatment – including first-aid treatment –⁸ of the wounded, sick and shipwrecked, or for the prevention of disease”, and

“to the administration of medical units or to the operation or administration of medical transports.⁹ Such assignments may be either permanent or temporary. The term includes:

- (i) medical personnel of a Party to the conflict, whether military or civilian, including those described in the First and Second Conventions, and those assigned to civil defence organizations;
- (ii) medical personnel of national Red Cross (Red Crescent, Red Lion and Sun) Societies¹⁰ and other national voluntary aid societies duly recognized and authorized by a Party to the conflict;
- (iii) medical personnel of medical units or medical transports described in Article 9, paragraph 2”.

4665 At this point it is also appropriate to refer to the definition developed for Protocol II, which took into account the specific aspects of internal conflicts. This read as follows:¹¹

“The term [medical personnel] shall include:

- (i) medical personnel of a party to the conflict, whether military or civilian [including those assigned to medical tasks of civil defence];
- (ii) medical personnel of Red Cross (Red Crescent, Red Lion and Sun) organizations recognized and authorized by parties to the conflict;
- (iii) medical personnel of other aid societies recognized and authorized by a party to the conflict and located within the territory the conflict is taking place.”

⁷ *O.R.* XI, p. 318, CDDH/II/SR.31, para. 6.

⁸ Rehabilitation centres providing medical treatment and dental treatment are explicitly included under medical purposes; *cf.* *O.R.* XIII, p. 253, CDDH/235/Rev.1, para. 20. This explanation was given for Art. 8 of Protocol I, but also applies for Protocol II. *Cf.* statement by the Rapporteur, *O.R.* XII, p. 260, CDDH/II/SR.79, para. 19.

⁹ See commentary Art. 11, *infra*, p. 1431.

¹⁰ Iran renounced the use of the red lion and sun emblem in favour of the red crescent. *Cf.* also *supra*, Editors' note.

¹¹ *O.R.* XIII, p. 304, CDDH/235/Rev.1.

- 4666** The term “Red Cross organizations” was used in order to cover not only the assistance available on the government side, but also groups or sections of the Red Cross on the other side which already existed, and even improvised organizations which might be set up during the conflict.¹²
- 4667** Such was the intention of the negotiators, and this interpretation remains in the absence of definitions in the Protocol. It is supported not only by the above-mentioned work of the Conference, but also by Article 18 (*Relief societies and relief actions*), paragraph 1, which uses the term “Red Cross organizations” in this sense.¹³ As regards relief societies, it was considered necessary to specify that relief societies other than Red Cross organizations should be located within the territory of the Contracting Party where the armed conflict was taking place, to avoid private groups from outside the country establishing themselves by claiming the status of a relief society and then being recognized by the insurgents.¹⁴
- 4668** In the absence of a precise definition, the term “medical personnel” covers both permanent and temporary categories. The term “permanent medical personnel” means medical personnel exclusively assigned to medical purposes for an unspecified length of time, while “temporary medical personnel” are personnel exclusively assigned to medical purposes for limited periods.
- 4669** In both cases such assignment must be exclusive. It should be noted that such status is based on the functions carried out, and not on qualifications. The Working Group which examined this article shed some light on this point in its report to Committee II, stating that:

“The categories cover all supporting personnel, i.e., medical personnel who have not completed their medical studies together with personnel with no medical qualifications or working as auxiliaries or assistants. This category might have increased significance under the circumstances of an internal conflict.”¹⁵

- 4670** Article 8 (*Terminology*), sub-paragraph (*d*), of Protocol I, defines religious personnel as follows:

“‘religious personnel’ means military or civilian persons, such as chaplains, who are exclusively engaged in the work of their ministry and attached:

- (i) to the armed forces of a Party to the conflict;
- (ii) to medical units or medical transports of a Party to the conflict;
- (iii) to medical units or medical transports described in Article 9, paragraph 2; or
- (iv) to civil defence organizations of a Party to the conflict.”

¹² O.R. XI, pp. 430-431, CDDH/II/SR.40, para. 9.

¹³ Cf. commentary Art. 18, para. 1, and Art. 12, *infra*, pp. 1477 and 1437.

¹⁴ O.R. XII, p. 270, CDDH/II/SR.80, para. 16.

¹⁵ O.R. XIII, p. 218, CDDH/II/269.

- 4671 The definition formulated for Protocol II mentioned, in addition, religious personnel attached to medical units of relief societies authorized by a party to the conflict.¹⁶
- 4672 The term “religious personnel” is a generic term and covers all religions; the word “chaplain” is used by way of example, but it was specified that this does not mean that only Christian religious personnel are referred to.¹⁷
- 4673 Naturally, respect and protection imply that personnel in enjoyment thereof must refrain from all acts of hostility and will not themselves be made the object of attacks. Article 11 (*Protection of medical units and transports*) specifies that the units and transports in question must be “respected and protected at all times and shall not be the object of attack”.¹⁸ This point is not contained in Article 9, which merely mentions respect and protection, and this omission could give rise to different interpretations.
- 4674 The concept of respect implies a duty not to attack, so that it is not necessary from a legal point of view to mention attacks.¹⁹ However, this term was retained in Article 11 of the Protocol (*Protection of medical units and transports*) because it was taken from Article 19 of the First Convention. The scope of the protection granted by Articles 9 and 11 (*Protection of medical units and transports*) is in fact the same. Thus the reference to attacks in the latter article, and not in the former, is an error of methodology which is regrettable. It would have been better to be consistent.
- 4675 Protection of medical and religious personnel applies throughout the duration of their mission, including times when such personnel do not carry out their duties temporarily. It should be noted that this specific protection of medical and religious personnel, visibly reflected in the emblem of the red cross, does not in any way prejudice any assistance and support that may come from the population when they spontaneously offer their services, as provided in Article 18 (*Relief societies and relief actions*), paragraph 1. Indeed, the authorities may very well incorporate voluntary workers among medical personnel; if this is not done, in particular because voluntary civilians may not devote themselves exclusively to medical tasks, they continue to be protected as civilians. Civilian doctors and paramedical personnel who care for the wounded and sick without being members of medical personnel within the meaning of this article, enjoy the protection of Article 10 (*General protection of medical duties*).
- 4676 The first sentence of paragraph 1 also provides that medical and religious personnel must be granted all available help for the performance of their duties, and the second sentence provides that they may not be compelled to carry out

¹⁶ O.R. XIII, p. 347, CDDH/II/386:

“h) ‘religious personnel’ means persons such as chaplains, whether military or civilian, exclusively engaged in the work of their ministry and attached either to:

(i) the armed forces or other armed groups of a party to the conflict, or to

(ii) medical units of a party to the conflict, or to

(iii) medical units of the aid societies referred to in sub-paragraph (f).”

¹⁷ See O.R. XII, p. 220, CDDH/II/SR.75, para. 20, and commentary Art. 8, sub-para. (d), Protocol I, *supra*, p. 127.

¹⁸ See commentary Art. 11, *infra*, p. 1431.

¹⁹ *Commentary I*, p. 195 (Art. 19).

tasks which are not compatible with their humanitarian mission. In the draft the ICRC had provided that they “shall not be compelled to carry out tasks unrelated to their mission”.²⁰ The Conference considered that it should suffice to provide that medical personnel should not be employed on tasks which are not compatible with their humanitarian mission.²¹ The use of the verb “to compel”, taken from Article 33 of the Third Convention, refers to cases where medical and religious personnel have fallen into the hands of the adversary.²² In addition to being protected by Article 5 (*Persons whose liberty has been restricted*), like any other persons deprived of their liberty for reasons related to the conflict, they are also granted the guarantee of not being compelled to carry out tasks which are incompatible with their mission. This could refer to medical experiments, but also, for example, to camouflaging military operations under cover of medical tasks. The second possibility may materialize not only when medical or religious personnel have fallen into the hands of the adversary: the parties to the conflict may in no case compel the personnel in question to carry out military tasks as these are, by their very nature, incompatible with any humanitarian mission; medical assignment must be exclusive.

Paragraph 2

4677 This paragraph reaffirms the principle that there may be no discrimination between the wounded, sick and shipwrecked, a principle already contained in Article 7 (*Protection and care*), and now expressed by providing that “in the performance of their duties medical personnel may not be required to give priority to any person except on medical grounds”. For example, it would be prohibited to *compel* medical personnel to give priority to lightly wounded soldiers, to the detriment of others who were more seriously injured, regardless of the party to the conflict to which they belong. On the other hand, neither the Conventions nor the Protocols determine what medical criteria should be used. Should a doctor choose to perform a long surgical operation on a seriously wounded person, or should he sacrifice such a case for the benefit of other wounded people whose chances of survival are better?²³ Medical personnel must remain the judges on where to give priority, a matter which should only be decided on medical grounds,²⁴ in accordance with medical ethics and professional conscience. In fact, such a case by definition belongs to medical ethics and to the professional conscience.

S.J.

²⁰ *Commentary Drafts*, p. 147 (Art. 15, para. 2).

²¹ *O.R. XIII*, p. 218, CDDH/II/269. “The Working Group feels that the ICRC text is unnecessarily restrictive on this point, and that it should be sufficient to provide that medical personnel shall not be employed on tasks which are not compatible with their humanitarian role.”

²² See *Commentary III*, pp. 216 ff. (Art. 33).

²³ See commentary Art. 10, para. 2, of Protocol I, *supra*, p. 147.

²⁴ “Urgent medical reasons” is the criterion used in Art. 12, para. 3, of the First Convention.

Article 10 – General protection of medical duties

1. Under no circumstances shall any person be punished for having carried out medical activities compatible with medical ethics, regardless of the person benefiting therefrom.
2. Persons engaged in medical activities shall neither be compelled to perform acts or to carry out work contrary to, nor be compelled to refrain from acts required by, the rules of medical ethics or other rules designed for the benefit of the wounded and sick, or this Protocol.
3. The professional obligations of persons engaged in medical activities regarding information which they may acquire concerning the wounded and sick under their care shall, subject to national law, be respected.
4. Subject to national law, no person engaged in medical activities may be penalized in any way for refusing or failing to give information concerning the wounded and sick who are, or who have been, under his care.

Commentary

Heading of the article: General protection of medical duties

- 4678** It will be recalled that the Diplomatic Conference attached legal significance to the headings of the articles of the Protocols. In most cases the heading of the provision merely indicates the subject matter, without posing particular difficulties of interpretation. In this case the term “medical duties” requires some elucidation, since it does not occur in the text, but only in the heading of the article.
- 4679** Article 10 provides that medical activities in a broad sense may be freely exercised and performed. It thereby protects not only doctors, but also any other persons engaged in such activities professionally. Therefore the term “medical duties” refers to medical activities, i.e., to the tasks which personnel perform in accordance with their professional obligations when they give care or treatment. In the French text this concept is rendered by the expression “la mission médicale”, which is perhaps not quite as precise as “medical duties” in English.

General remarks

- 4680** This provision is aimed at strengthening the basic principle that the wounded and sick shall be protected.¹ To that end it establishes a general protection of medical and paramedical personnel. In particular, it is a matter of ensuring immunity for civilian doctors who care for patients without forming part of medical personnel assigned to medical units within the meaning of Articles 9 (*Protection of medical and religious personnel*) and 11 (*Protection of medical units and transports*), of the Protocol. The problem may arise in different ways, depending on the organization of medical services in each of the countries concerned, but this article was adopted in the spirit of making available all medical assistance, whether civilian or military, to the wounded and sick; it does not cover the case of civilians without medical training who spontaneously lend aid to the wounded and sick. The supportive role of the civilian population is dealt with in Article 18 (*Relief societies and relief actions*), paragraph 1.
- 4681** The Conventions do not provide for such protection specifically. Common Article 3 is, *a fortiori*, silent on this point. However, it should be noted that

¹ General principle of protection laid down in Art. 7 of the Protocol.

protection of medical duties follows from the principle of protecting the wounded and sick and is inspired by Article 18, paragraph 3, of the First Convention, which states that “no one may ever be molested or convicted for having nursed the wounded or sick”.² Paragraphs 1 and 2 establish the neutrality of medical activities and guarantee that they may be freely carried out in accordance with medical ethics. These rules have been taken from the ICRC draft (Article 16)³ and are also contained in Article 16 of Protocol I (*General protection of medical duties*).⁴ The major problem underlying the protection of medical duties lies in the preservation of “professional confidentiality” of medical practitioners, a question which is closely related to the still controversial principle that it is wrong to inform on patients to the authorities.

4682 The ICRC endeavoured to find a flexible solution, leaving the decision to the doctor and placing in him the confidence he deserved.⁵ To this end the draft provided that:

“no person engaged in medical activities may be compelled to give to any authority information concerning the sick and the wounded under his care should such information be likely to prove harmful to the persons concerned or to their families”.

4683 It should be noted that this was a moderate proposal, for medical circles had repeatedly expressed views against reporting patients to the authorities, particularly at the conferences of the International Law Association, on the basis of the idea that the wounded and sick would not seek medical attention if they feared being denounced.⁶

4684 During the Conference the proposal came up against the fear that, if such a rule were introduced in the Protocol, it would prejudice the national sovereignty of States and violate the principle of non-interference with the internal affairs of States, reaffirmed by Article 3 (*Non-Intervention*), paragraph 2, of the same Protocol. The problem proved to be particularly delicate in the context of non-international armed conflict. Committee II discussed this at length; as it was impossible to achieve a solution acceptable to all in a first Working Group, a second had to be called, following the submission of a very large number of oral amendments in plenary meetings of the Committee.⁷ Paragraphs 3 and 4 are the result of all this work, which resulted in a laborious and rather unsatisfactory compromise; they guarantee that the professional obligation of medical personnel to maintain confidentiality will be respected and they prohibit punishing doctors who refuse to give information. In fact, these two paragraphs form a single clause which was separated into two for reasons of brevity and clarity.⁸ These guarantees

⁶ Cf. *Commentary Drafts*, pp. 148-149. Cf. also introduction to this Part, *supra*, p. 107.

⁷ Cf. O.R. XIII, pp. 82-87 and 126-129, CDDH/221/Rev.1, and O.R. XI, pp. 447-456, CDDH/II/SR.41, paras. 1-50, and pp. 457-463, CDDH/II/SR.42, paras. 1-45.

⁸ *Ibid.*, p. 494, CDDH/II/SR.44, para. 53.

are useful and even essential, but by making them “subject to national law” their scope could be greatly reduced.

Paragraph 1

- 4685** This paragraph guarantees the principle of the neutrality of medical activities by stating that “under no circumstances shall any person be punished for having carried out medical activities compatible with medical ethics, regardless of the person benefiting therefrom”.
- 4686** This rule refers not only to doctors, but also to any other persons professionally carrying out medical activities, such as nurses, midwives, pharmacists and medical students who have not yet qualified.
- 4687** The term “medical activities” should be interpreted very broadly. The concept is broader than that of medical care and treatment. A doctor not only treats patients, he may also be called upon to issue death certificates, vaccinate people, make diagnoses, give advice etc.⁹ Medical assistance should always be neutral; it should not be considered as taking a stand on the conflict because of those benefitting from this assistance. The criterion of when to undertake medical activities is based on purely humanitarian considerations, regardless of any other factors. To perform medical activities for the benefit of any person, including persons belonging to the adverse party, is not only lawful, but even a duty for those who are professionally bound.
- 4688** Ethics (or deontology) means the science of duty or moral obligation.¹⁰ The term is not only used in connection with the medical profession, but reference is usually made to medical ethics, and this is what is meant here. It consists of moral duties incumbent on the medical profession. Such duties are defined by the national and international corps of the medical profession.¹¹
- 4689** Those who have sworn the Hippocratic Oath to protect human life in all circumstances are allowed a wide margin of appreciation under medical ethics. Thus someone carrying out medical activities could not be punished for the mere fact of carrying out the duties incumbent upon him, irrespective of whether he acted spontaneously or whether he was asked to do so.
- 4690** The obligation to refrain from punishment is addressed to all authorities capable of meting out punishment, including both the government in power and the authority controlling part of the territory in accordance with Article 1 of the Protocol (*Material field of application*).
- 4691** The reference to punishing is meant to cover all forms of sanction, including both penal and administrative measures; all these are prohibited.

⁹ Cf. CE/7b, paras. 21-23.

¹⁰ As defined in the Shorter Oxford Dictionary (1978), p. 520.

¹¹ The World Medical Association has adopted a code of ethics, as well as “rules of medical ethics in time of war”. Though they have no binding force under international law, they serve as a point of reference (cf. commentary Art. 16, Protocol I, *supra*, p. 197).

Paragraph 2

- 4692 Paragraph 2 establishes the principle of the free exercise of medical activities, i.e., medical personnel should be able to work without compulsion, guided only by professional ethics. Thus it is specifically prohibited to compel those carrying out medical activities to commit any act or to refrain from acting in a way which would be contrary to “the rules of medical ethics or other rules designed for the benefit of the wounded and sick, or this Protocol”.
- 4693 It should be noted that in addition to the mention of medical ethics reference is made to “other rules”. This is, in particular, because of the fact that in some countries medical ethics prohibit doctors from co-operating in medical procedures undertaken by personnel which are not officially qualified.¹² This would apply for example to a medical student. The article refers to the rules of medical ethics which protect the wounded and sick, as opposed to those which are concerned only with the interests of the medical profession; it also refers to other rules designed for the same purpose, and applicable in specific cases.¹³
- 4694 The reference to the provisions of the Protocol endorses the rules of protection already contained in it, for instance, the rule prohibiting “cruel treatment such as torture, mutilation or any form of corporal punishment” (Article 4 – *Fundamental guarantees*, paragraph 2(a)). Compelling a doctor to refrain from acting, for example, would be tantamount to prohibiting him from caring for the wounded or sick, and this would in any case constitute a breach of the principle that protection and care are due to the wounded and sick as laid down in Article 7 (*Protection and care*).
- 4695 Amongst the cases of being compelled to perform acts which were most often raised during the discussions in Committee, mention should be made of administering drugs to prisoners in order to modify their behaviour and obtain information; one delegation even wanted this to be explicitly prohibited and submitted an amendment to that effect.¹⁴ Medical experiments are another example.

Paragraph 3

- 4696 Medical ethics impose an obligation of confidentiality on doctors; a doctor is obliged to be discreet regarding the nature of the complaint of his patient, and in general not to divulge any information that might be harmful to his patient or the latter’s relatives. Moreover, the question whether doctors are ever allowed to report on their patients to the authorities, i.e., to denounce them, is added to the principle of medical confidentiality. In the eyes of many representatives of the medical profession, this question is also an integral part of medical ethics.

¹² Cf. O.R. XI, p. 150, CDDH/II/SR.16, para. 46.

¹³ *Ibid.*, p. 183, CDDH/II/SR.19, para. 59 (Statement by the Rapporteur of the Committee).

¹⁴ *Ibid.*, p. 149, CDDH/II/SR.16, para. 43.

- 4697 In ethical terms, the rule against denunciation does not mean that information may never be given; the doctor has a certain measure of freedom of action to follow his own conscience and judgment.
- 4698 The aim of this paragraph is to establish protection and respect for medical activities while preserving the obligation of professional confidentiality. For this purpose it provides that the professional obligations of those engaged in medical activities regarding information, which they may acquire concerning the wounded and sick under their care, must be respected, but always subject to national law. Being subject to national law was the price paid for this rule. This formula was finally retained following lengthy discussions in the Working Group.
- 4699 What is meant by national law? It refers here not only to the law in force at the start of the conflict, but also to any new legislation introduced and brought into force by a State after the start of the conflict.¹⁵ This legal situation, the result of a compromise, has its shortcomings in that it might endanger the special protection to which the wounded and sick should be entitled.
- 4700 In fact, national law, in a situation of conflict fulfilling the criteria of Article 1 of Protocol II (*Material field of application*), will not always be known to the adverse party if it has changed during hostilities. If there is any doubt regarding a doctor's obligations towards the authorities, many of the wounded would risk suffering and dying, rather than risk being denounced. An obligation to systematically reveal the identity of the wounded and sick would divest the principle of the neutrality of medical activities of all meaning.
- 4701 Finally, it is clear that in practice, when hostilities have reached an advanced stage, two separate sets of rules may exist concurrently. It is up to each authority to reach a judgment on what attitude it intends to take with regard to military requirements and with regard to its humanitarian obligations. If humanitarian principles and the aim of the Protocol, i.e., safeguarding the lives of the wounded, are taken into account, the laws should allow medical personnel a sufficient measure of freedom and responsibility to perform their duties.
- 4702 The obligation to give notification of communicable diseases laid down in the ICRC draft and included in Article 16 of Protocol I (*General protection of medical duties*) is not mentioned here, since such a measure is included in the national legislations of virtually all countries.

Paragraph 4

- 4703 Paragraph 4 is the corollary of paragraph 3. As indicated above, they appear as two separate paragraphs for the sake of clarity. Respect for medical activities and professional obligations as implied therein would be of no practical significance if those carrying out such activities could be penalized for respecting the principle of confidentiality, by refusing or failing to give information concerning patients, as such confidentiality is itself a professional obligation.

¹⁵ Cf. *ibid.*, pp. 495-496, CDDH/II/SR.44, paras. 54-63.

- 4704 The conclusion was reached that it would be necessary for the text to provide explicitly that it is prohibited to penalize people engaged in medical activities for no other reason than that they had failed to give information on the wounded and sick in their care. Such conduct should not be considered as a criminal offence.¹⁶
- 4705 The prohibition on such penalization concerns all types of punishment, penal as well as administrative sanctions, such as, for example, closing down a medical practice. Again, making the rule subject to national law reduces the value of the principle that is established and it has the same effect as in the preceding paragraph. Three points deserve mention in this respect:
- This provision lays down that the confidentiality that may be kept by anyone engaged in medical activities regarding the wounded and sick under his care, is legitimate, but subject to national law. Thus, in accordance with the principle of penal law, *nullum crimen sine lege*, if there is no national law on the subject, a doctor cannot be penalized in any way for maintaining silence. This stand cannot be interpreted as taking sides in the conflict.
 - Promulgation of new rules during the conflict implies an obligation for the authorities to inform those to whom those rules are addressed.
 - The principle that the law may not be applied retroactively should be respected in accordance with Article 6 (*Penal prosecutions*), paragraph 2(c).
- 4706 In general it should be noted that if anyone engaged in medical activities were to be prosecuted for failing to comply with the law, he would in any case enjoy the legal guarantees provided in Article 6 of the Protocol (*Penal prosecutions*).

S.J.

¹⁶ This principle was set out in paragraph 5 of the *Rules to ensure and care for the wounded and sick, particularly in time of armed conflict*, as drawn up by the World Medical Association, the International Committee of Military Medicine and Pharmacy and the ICRC and as amended in 1983. Cf. Introduction to this Part, *supra*, p. 1403. The reservation made regarding national legislation therefore concerns the question of denunciation, and not professional confidentiality in accordance with medical ethics within the meaning of paragraph 1 of this article.

Protocol II

Article 11 – Protection of medical units and transports

1. Medical units and transports shall be respected and protected at all times and shall not be the object of attack.
2. The protection to which medical units and transports are entitled shall not cease unless they are used to commit hostile acts, outside their humanitarian function. Protection may, however, cease only after a warning has been given setting, whenever appropriate, a reasonable time-limit, and after such warning has remained unheeded.

Commentary

General remarks

- 4707 To implement the principle that the wounded and sick be protected and respected, as laid down in common Article 3 and reaffirmed in Article 7 (*Protection and care*) of this Protocol, the protection of medical units and transports¹ is just as essential as the protection of medical and religious personnel (Article 9 – *Protection of medical and religious personnel*) and protection of medical duties (Article 10 – *General protection of medical duties*). Article 11 is basically inspired by Articles 19 and 21 of the First Convention, but it is clearly also related to Articles 20, 35 and 36 of the First Convention, Articles 22, 23 and 24 of the Second Convention, and Articles 18, 21 and 22 of the Fourth Convention. In fact, this provision seeks to secure protection and respect for all military or civilian medical transports, on land, in the air, at sea or on lakes or rivers.
- 4708 In situations of international armed conflicts the protection granted by the Conventions in the articles mentioned above is developed in Article 12 (*Protection of medical units*) and 13 (*Discontinuance of protection of civilian medical units*), as well as in Section II (*Medical transportation*) of Part II of Protocol I.
- 4709 As regards Protocol II, the ICRC draft merely laid down the principle that medical units and transports must be protected, without explicitly providing when such protection may cease, i.e., without fixing the limitations of this right.² The parallel negotiation of the two instruments in Committee led the delegates to adopt a paragraph 2 on the discontinuance of protection based on Article 13 of Protocol I (*Discontinuance of protection of civilian medical units*). The text produced by the Committee also included a paragraph 3 regarding acts which should not be considered to be hostile acts, in this respect following the example of Article 13 of Protocol I (*Discontinuance of protection of civilian medical units*).³ This paragraph was not included in the version which was finally adopted.⁴ This simplification means the text is less clear, for it is less explicit, but it does not restrict the scope of the principle, and should not give rise to subjective and far-reaching interpretations of the concept of hostile acts.⁵

Paragraph 1

- 4710 Paragraph 1 lays down the principle that protection and respect are due to medical units and transports.

¹ For the definitions of the terms “medical units”, “medical transports” and “medical transportation”, *cf. infra*, commentary para. 1 and note 7.

² *Cf. draft Art. 17.*

³ *O.R. XIII*, p. 229, CDDH/II/287.

⁴ *O.R. IV*, p. 58, CDDH/427.

⁵ See *infra*, commentary para. 2, p. 1435.

4711 The term “medical unit” is a generic term covering both permanent units, which stay where they are (hospitals, laboratories, equipment depots etc.), and mobile medical units, which may be moved as required (field hospitals, first aid posts, ambulances etc.).⁶

4712 The term “medical transports” means any land vehicle (cars, trucks, trains etc.), ship, craft or aircraft assigned to transporting the wounded, sick and shipwrecked, medical and religious personnel, and medical equipment. Protection applies for military and civilian medical units and transports, whether they are permanent or temporary, provided that they are exclusively assigned to medical purposes; while they are so assigned, whether or not for an indefinite period, depending on whether they are permanent or temporary, medical units and transports may not be used for any purposes other than medical ones.⁷ The concept “medical purposes” should be understood in a broad sense. It covers not only the care given the wounded, sick and shipwrecked, but also any activities for the prevention of disease, blood transfusion centres, rehabilitation centres for medical treatment and dental treatment.⁸

4713 Medical units and transports must at all times:

- 1) be respected,
- 2) be protected,
- 3) not be the object of attack.

4714 The words “respect and protection” are part of the classical vocabulary of international humanitarian law. They already appear in Articles 7 (*Protection and care*) and 9 (*Protection of medical and religious personnel*) in this Part of the Protocol.⁹ It should be recalled that respect and protection imply not only the obligation to spare the people and objects concerned, but also to actively take measures to ensure that medical units and transports are able to perform their functions and to give them assistance where necessary. “To respect such units means, not to attack them or harm them in any way”, according to the

⁶ See *Commentary I*, pp. 194-195 (Art. 19).

⁷ The definitions given in Art. 11 of the draft produced by Committee II, which was not adopted, read as follows:

“(c) ‘Medical units’ means establishments and other units, whether military or civilian, organized for medical purposes, namely the search for, collection, transportation, diagnosis or treatment – including first aid treatment – of the wounded, sick and shipwrecked, and for the prevention of disease, which belong to or are recognized and authorized by a party to the conflict. Medical units may be fixed or mobile, permanent or temporary.

(d) ‘Medical transportation’ means the conveyance by land, water or air of the wounded, sick and shipwrecked, medical and religious personnel and medical equipment and supplies protected by this Protocol.

(e) ‘Medical transport’ is a means of transportation, be it military or civilian, permanent or temporary, assigned exclusively to medical transportation and under the control of a party to the conflict.”

Cf. O.R. XIII, pp. 303-304, CDDH/235/Rev.1.

⁸ Rehabilitation centres providing medical treatment and dental treatment were explicitly included under medical purposes: *cf. ibid.*, p. 253, para. 20. This clarification was given on Art. 8, Protocol I, but also applies for Protocol II; *cf. O.R. XII*, p. 260, CDDH/II/SR.79, para. 19.

⁹ See commentary Art. 7, *supra*, p. 1407.

commentary on Article 19 of the First Convention. Thus it was not necessary to mention that medical units and transports may not be the object of attack. The formula dates back to 1949; it endorses the expression “respect and protect”. The commentary points out that “this strengthening of the general form of wording may not, however, be superfluous in view of the increasing scale of aerial bombardment”.¹⁰

- 4715** This remark is undoubtedly still just as valid today, but, as we have indicated before, it is unfortunate that the reference to attacks is not also included in Article 9 (*Protection of medical and religious personnel*), even though this omission does not affect the substance of the provision.¹¹
- 4716** The obligation to respect and protect medical units and transports applies “at all times”,¹² i.e., even when they are not used to accommodate any wounded or other patients, or not for the time being, though of course, only provided that they remain assigned exclusively to medical purposes.¹³
- 4717** By making it possible to identify medical units or transports, the distinctive emblem renders that protection visible (Article 12 – *Distinctive emblem*). The use of the distinctive emblem of the red cross or the red crescent, and in general the conditions of use of medical units and transports should be governed by the rules issued by the competent authority to which they belong. Such control is essential to prevent abuse and ensure the application of the rules of protection.
- 4718** Finally, it should be noted that before definitively adopting Article 11 in Committee, the Conference waited for Section II (*Medical transportation*) of Part II of Protocol I to be adopted, so as to make sure that Protocol II would not in any way clash with Protocol I.¹⁴ Article 11 covers indeed all medical transports on land, in the air, and on water, but its succinct wording does not go beyond expressing a general principle, while Protocol I is far more detailed in this respect. In case of specific difficulties, in particular to make sure that a given medical craft or aircraft is properly protected, Protocol I may serve as a very useful guide and provide practical solutions which may be relevant, by analogy, for the implementation of the principle.¹⁵

¹⁰ Cf. *Commentary I*, p. 196.

¹¹ Cf. commentary Art. 9, *supra*, p. 1417. We should call to mind the definition of attacks given in Art. 49, para. 1, of Protocol I: “‘Attacks’ means acts of violence against the adversary, whether in offence or defence.” See *supra*, p. 602.

¹² See commentary Art. 4, para. 2(b), on the prohibition of collective punishments and “reprisals” in Protocol II, *supra*, p. 1374.

¹³ See *supra*, p. 1432.

¹⁴ Cf. *O.R.* XI, p. 603, CDDH/II/SR.53, para. 37.

¹⁵ Cf. the articles of Part II, Section II, “Medical transportation”, of Protocol I, and the commentary thereon, *supra*, p. 245.

Paragraph 2*First sentence*

- 4719** Protection and respect for medical units and transports are permanent obligations: “at all times”. However, there are some exceptional cases in which protection for them may cease, namely, if “they are used to commit hostile acts, outside their humanitarian function”.
- 4720** This paragraph reiterates Article 21 of the First Convention, with slight changes in the wording. In particular, Article 21 does not refer to “hostile acts”, but to “acts harmful to the enemy”. There is no difference of substance between these two terms. The draft article provided by the Committee used the term “acts harmful to the adverse Party”.¹⁶ As all references to “parties to the conflict” had been deleted from the text on the proposal of the Pakistani delegation,¹⁷ in order to eliminate any possibility of an interpretation which would give any sort of recognition to the insurgent party, the term “hostile acts” was finally adopted.
- 4721** The meaning is the same as in Article 21 of the First Convention: the acts concerned are those which are harmful to the adversary. Whether an act is harmful or hostile must be judged objectively.
- 4722** Medical units and transports are under an obligation to remain strictly neutral, that is to say, that they should not in any way interfere in military situations. However, it may happen that a medical unit or transport, while strictly adhering to its duties, unwittingly becomes a hindrance or a tactical obstacle.¹⁸ Its presence might incorrectly be interpreted as a hostile act, but this does not mean that protection should cease. It only ceases if the units or transports are used *outside their humanitarian function*.
- 4723** Such examples can also be found in Article 13 (*Discontinuance of protection of civilian medical units*), paragraph 2, of Protocol I. Although they have no binding force in the context of Protocol II, they may nevertheless help the interpretation thereof:¹⁹

“The following shall not be considered as acts harmful to the enemy:

- (a) that the personnel of the unit are equipped with light individual weapons for their own defence or for that of the wounded and sick in their charge;
- (b) that the unit is guarded by a picket or by sentries or by an escort;
- (c) that small arms and ammunition taken from the wounded and sick, and not yet handed to the proper service, are found in the units;
- (d) that members of the armed forces or other combatants are in the unit for medical reasons.”²⁰

¹⁶ O.R. XIII, p. 229, CDDH/II/287.

¹⁷ An oral proposal in plenary meeting, cf. O.R. VII, p. 113, CDDH/SR.51, paras. 43-46.

¹⁸ Cf. *Commentary I*, pp. 200-201 (Art. 21).

¹⁹ Para. 3, which was deleted during the final stage of the adoption of Protocol II, provided an *contrario* explanation of the nature of hostile acts by giving a list of acts which should not be considered to be hostile. See *supra*, p. 176.

²⁰ See also O.R. XIII, p. 229, CDDH/II/287, *ad* Art. 17, para. 3.

4724 As regards terminology, it should also be noted that the term “humanitarian duties”, used in Article 21 of the First Convention, was replaced in this article by the words “humanitarian function”. This change is a matter of drafting. The word “function” was found to be more satisfactory, as this term applies not only to personnel, but also to transports and buildings. Moreover, the term “tareas humanitarias”, used in the Spanish version, contains simultaneously the concepts of duty and function.

*Second sentence*²¹

4725 When medical units or transports commit a hostile act, they lose their right to protection, but in most cases they are entitled to be given notice first: “Protection may, however, cease only after a warning has been given, setting, whenever appropriate, a reasonable time-limit, and after such warning has remained unheeded.”

4726 Patients, wounded or sick, are not responsible for unlawful acts committed by personnel caring for them; therefore it is appropriate to accord them guarantees of humane treatment. Moreover, the adverse party may have made an error of judgment and the time-limit provides the opportunity for correcting this; it also allows those responsible to put an end to the acts which are considered as hostile acts, i.e., to correct them, or alternatively to take the wounded and sick to a safe place. The adverse party must therefore order the unit or transport to cease the hostile act and inform them how much time they have before they may be attacked, if the warning has not been heeded.

4727 A “reasonable time-limit”, is not defined: it is the time they need, depending on the circumstances, to change their approach, to explain themselves if a mistake has been made, or to evacuate the wounded and sick.

4728 The time-limit will be set “whenever appropriate”. Article 21 of the First Convention refers to “all appropriate cases”. In fact, this mainly applies to situations in which there is some doubt regarding the hostile character of a medical unit or transport. In some cases it is not appropriate to allow a time-limit. The commentary on Article 21 of the First Convention illustrates this possibility very clearly by imagining a body of troops approaching a hospital and being met by heavy fire from every window.²²

S.J.

²¹ The commentary on this second sentence is based on the commentary on Art. 21 of the First Convention, *Commentary I*, p. 201.

²² Cf. *ibid.*, p. 202.

Article 12 – The distinctive emblem

Under the direction of the competent authority concerned, the distinctive emblem of the red cross, red crescent or red lion and sun on a white ground shall be displayed by medical and religious personnel and medical units, and on medical transports. It shall be respected in all circumstances. It shall not be used improperly.

Commentary

General remarks

4729 For the protection of the wounded, sick and shipwrecked to be effective, the personnel assisting them, the places sheltering them and the transport used

to transport them, all of which also enjoy protection under the Protocol (Articles 9 – *Protection of medical and religious personnel*, and 11 – *Protection of medical units and transports*), must be identifiable. If they could not be identified, the protection accorded them would be illusory.

- 4730** Such identification is possible by the use of the distinctive emblem of the red cross or red crescent.¹ Such use must be regulated and supervised so as to avoid abuse. This is the aim of the present article, which constitutes the latest stage in the development of the principle that respect and protection are due to the wounded, sick and shipwrecked, a principle already contained in common Article 3 of the Conventions, and reaffirmed in Article 7 of Protocol II (*Protection and care*).
- 4731** This provision is based on the relevant articles of the Conventions, viz., Chapter VII of the First Convention and Chapter VI of the Second Convention, both entitled “The distinctive emblem”, as well as on Articles 18, 20 and 22 of the Fourth Convention: these rules were supplemented in Protocol I by Article 18 (*Identification*) and Annex I to that Protocol (*Regulations concerning identification*).
- 4732** The basic content of the draft presented by the ICRC was retained, although the version that was finally adopted was worded more concisely.²

The distinctive emblem

- 4733** The red cross and red crescent emblems may have two very different functions: a protective function in time of armed conflict, and an indicatory function which applies, even in time of peace, to designate persons or objects attached to a red cross or red crescent institution, without entitling them to protection.
- 4734** The term “distinctive emblem”, as used in both Protocols, refers only to the emblem used for the purpose of protection. Article 8 (*Terminology*), subparagraph (*l*), of Protocol I reads:

“‘Distinctive emblem’ means the distinctive emblem of the red cross, red crescent or red lion and sun on a white ground, when used for the protection of medical units and transports, or medical and religious personnel, equipment or supplies.”³

Article 12 was adopted on the basis of almost exactly the same definition, which had been drafted for Protocol II.⁴

- 4735** The distinctive emblem concerned here protects those persons and objects which are mentioned in the provision, to the exclusion of all others, i.e. “medical and religious personnel and medical units, and [...] medical transports”. Therefore the definition is of paramount importance and we should here recall the main elements of the negotiations which took place regarding Article 12.

¹ On the emblem of the red lion and sun, *cf. supra*, commentary Art. 9, note 10, p. 1419.

² Draft Art. 18.

³ See commentary Art. 8, sub-para. (*l*), of Protocol I, *supra*, p. 134.

⁴ The term “*matériel*” was replaced by the term “medical equipment and supplies”; *cf. O.R. XIII*, p. 347, CDDH/III/386.

The extended use of the distinctive emblem

4736 The ICRC draft proposed enlarging the use of the distinctive emblem by extending it to red cross or red crescent organizations:

“The emblem of the red cross (red crescent, red lion and sun) on a white ground, which is the distinctive emblem of the medical personnel, medical units and means of medical transport of the parties to the conflict and of Red Cross (Red Crescent, Red Lion and Sun) organizations, shall be respected in all circumstances.”⁵

4737 Under the Conventions, the National Red Cross or Red Crescent Societies are only entitled to the indicatory sign, of a somewhat smaller size, and the protective emblem was reserved for military medical services.⁶ To lend force to its proposal, the ICRC stressed the key role played by the Red Cross in situations of non-international armed conflict, particularly for the non-governmental party; in the absence of organized medical services, the services of the National Red Cross Society would have an even greater importance, as it is the only humanitarian organization which would continue to function for both parties.⁷

4738 The Working Group which examined the article studied this proposal thoroughly. It came to the following conclusions:

“When the question of the need for an extended use of the distinctive emblem had been discussed in the Working Group, the Group had heard of a number of cases in non-international armed conflicts in recent times in which the need for local branches of the Red Cross, or even groups authorized to care for the wounded and the sick in such circumstances, to use the distinctive emblem had been clearly brought out.”⁸

“The Working Group had discussed the most appropriate place in draft Protocol II for a rule meeting the requirement for an extended use of the distinctive emblem. Either a specific rule could be inserted in Article 18 [12] or the problem could be solved by a suitable definition of medical personnel in Article 11(f) [Definitions].”⁹

At first the second possibility was favoured. Thus a draft definition of medical personnel had been drawn up which included the following categories: “medical personnel of Red Cross (Red Crescent, Red Lion and Sun) organizations [...] who are recognized and authorized by one of the parties to the conflict”, and “medical personnel of [...] other aid societies located within the territory of the High Contracting Party in whose territory an armed conflict is taking place, who are recognized and authorized by one of the parties to the conflict”.¹⁰

⁵ *Commentary Drafts*, p. 150.

⁶ *Cf.* Arts. 38 and 44, First Convention; *cf.* also Art. 18, Fourth Convention.

⁷ *O.R.* XI, p. 289, CDDH/II/SR.28, para. 50.

⁸ *Ibid.*, p. 430, CDDH/II/SR.40, para. 6.

⁹ *Ibid.*, para. 8.

¹⁰ *Cf.* also *O.R.* XIII, p. 346, CDDH/II/386.

4739 Failing a definition in the Protocol itself, the tenor of the discussions seems to indicate that the Conference pronounced itself in favour of extending the use of the emblem. Retaining the reference to “Red Cross organizations” in Article 18 of Protocol II (*Relief societies and relief actions*), argues in favour of this interpretation. The term “Red Cross organizations” had been used in the definition to:

“cover not only assistance provided on the Government side, but also already existing Red Cross groups or branches on the side opposing the Government and even improvised organizations which had come into existence only during the conflict.”¹¹

4740 Thus it is clear that in such cases the right to use the emblem is extended as regards medical personnel, units or transports for pragmatic reasons, without recognizing as such a new Red Cross or Red Crescent Society.

4741 For the rest, National Red Cross or Red Crescent Societies in time of armed conflict often carry on with their everyday social activities as in peacetime. For activities other than rendering assistance to civilian and military medical services, the indicatory sign may continue to be used; it should be smaller than the protective emblem.¹²

Is the distinctive emblem a compulsory condition for the right to protection?

4742 The use of the emblem is optional; medical personnel and medical units and transports are protected in any event: such protection is expressly granted in Articles 9 (*Protection of medical and religious personnel*) and 11 (*Protection of medical units and transports*). However, it is the direct interest of those enjoying protection to ensure that they can be identified, not only by the adverse party, but also by the armed forces or armed groups of their own side, particularly in a non-international armed conflict where, in most cases, the area of confrontation is not well-defined, or shifts frequently.

4743 Article 18 (*Identification*), paragraph 1, of Protocol I, provides that “each Party to the conflict shall endeavour to ensure that medical and religious personnel, and medical units and transports, are identifiable”.¹³

4744 According to Article 12 of Protocol II, “the distinctive emblem [...] shall be displayed”. In French the future tense is used, rather than the imperative: “le signe distinctif [...] sera arboré”. This formula shall be taken to express a right and invites use to be made thereof.

¹¹ Cf. O.R. XI, p. 430, CDDH/II/SR.40, para. 9.

¹² See *Commentary Drafts*, p. 150.

¹³ Cf. commentary Art. 18, Protocol I, *supra*, p. 221.

The size of the emblem

4745 The distinctive emblem must be as clearly visible as possible: “the need to make the emblem as large as possible was a matter of common sense and logic; it was not necessary for it to be mentioned explicitly [...]”¹⁴ This was the view expressed by the Committee. Annex I to Protocol I deals with the size of the emblem in the same way, by stating in Article 3 (*Shape and nature*), paragraph 1, “The distinctive emblem [...] shall be as large as appropriate under the circumstances.”¹⁵

Direction of the “competent authority concerned”

4746 If the emblem is to be effectively respected, it is essential that its use should be subject to supervision. Otherwise anyone might be tempted to use it. The protection conferred by the distinctive emblem requires that its use be subject to the authorization and supervision of the competent authority concerned. It is up to each responsible authority to take the measures necessary to ensure that such control be effective. The competent authority may be civilian or military. For those who are fighting against the legal government this will be the *de facto* authority in charge. It should be recalled that the threshold for application of the Protocol requires a certain degree of organization in general, and in particular the ability of the insurgents to apply the rules of the Protocol.¹⁶

The distinctive emblem “shall be respected in all circumstances”

4747 The obligation is absolute and applies at all times and in all places, barring such exceptional cases as referred to in Article 11 (*Protection of medical units and transports*), paragraph 2.¹⁷

¹⁴ O.R. XI, p. 437, CDDH/II/SR.40, para. 49.

¹⁵ Cf. commentary Annex I, Protocol I, *supra*, p. 1167.

¹⁶ See Article 1 and the commentary thereon, *supra*, p. 1347.

¹⁷ Cf. commentary Art. 11, para. 2, *supra*, p. 1435.

“It shall not be used improperly”

4748 The emblem may only be used to protect the persons and objects mentioned in this article, i.e., medical and religious personnel and medical units and transports. Any other use constitutes improper use and is consequently prohibited.¹⁸

S.J.

¹⁸ Cf. *Commentary Drafts*, p. 150; *O.R.* XI, pp. 433 and 438, CDDH/II/SR.40, paras. 21, 27 and 57. N.B. also the provisions relating to the use of the emblem and the repression of the misuse thereof (Arts. 44 and 53, First Convention; 44 and 45, Second Convention; Art. 18, para. 4, Arts. 38 and 85, para. 3 (f), of Protocol I). Furthermore, the International Conferences of the Red Cross have repeatedly encouraged States Parties to the Conventions to reinforce their national legislation to repress the misuse of the emblem. See, for example, Resolution XI, adopted by the XXIIIrd International Conference of the Red Cross in Bucharest in 1977.

Introduction

- 4749 This Part is aimed at developing the legal protection to which the civilian population is entitled. It is based on the principles of the law of war: in an armed conflict the object is to damage the military potential of the adverse Party in order to obtain a decisive advantage, and civilians who do not participate in hostilities should be spared. In this Part we have a confirmation of treaty and customary law on this subject.
- 4750 The principle of the immunity of those who do not participate directly in hostilities has in fact been recognized for a long time, in situations of both national and international armed conflict. Thus, in 1863, the Lieber Code already provided that “an unarmed citizen is to be spared in person, property, and honor, as much as the exigencies of war will permit”.¹ Although it was subject to reservation on

¹ F. Lieber, *op. cit.*, Art. 22.

military necessity, the fact remains that the principle as such was nevertheless already recognized.²

- 4751** As regards situations of non-international armed conflict, the law of Geneva had only until now provided protection under common Article 3 of the 1949 Conventions, which provides that: “persons taking no active part in the hostilities [...] shall in all circumstances be treated humanely”.
- 4752** Since the Second World War the type of weapons developed and the widespread use of guerrilla warfare as a method of combat have resulted in growing numbers of victims amongst the civilian population, particularly in internal armed conflicts, which are becoming increasingly common.
- 4753** This problem has been a continuous matter of concern to the ICRC, which submitted Draft Rules for the Limitation of the Dangers incurred by the Civilian Population in Time of War at the International Conference of the Red Cross in 1957 (New Delhi).³ Based on the idea that the civilian population required the same protection, regardless of the legal qualification of the conflict, the Draft provided a set of rules applicable both to international and non-international armed conflicts.⁴ Although this initiative was generally well-received in Red Cross circles, it was unfortunately not followed up by governments.⁵ The fundamental principles of protection which the draft laid down were subsequently reaffirmed, first in a number of resolutions of the International Conference of the Red Cross, and later by those of the United Nations. To mention the most important in chronological order, these include: Resolution XXVIII of the XXth International Conference of the Red Cross, and Resolutions 2444 (XXIII) and 2675 (XXV) of the United Nations General Assembly, adopted respectively in 1965, 1968 and 1970.
- 4754** Ever since the United Nations began to encourage the development of international humanitarian law from 1968 onwards, it focused attention in particular on the problem of protecting the civilian population. The above-mentioned Resolution 2675 (XXV) reiterates and summarizes the “basic principles for the protection of civilian populations in armed conflicts”.⁶

² For the definition of military necessity, see commentary on Part IV of Protocol I, and in particular, Art. 54, para. 5, *supra*, pp. 583 and 658.

³ Draft Rules for the Limitation of the Dangers incurred by the Civilian Population in Time of War, ICRC, Geneva, 1956.

⁴ *Ibid.*, Art. 2(b): the present rules apply in case of non-international armed conflict.

⁵ See the General introduction to the Protocol, *supra*.

⁶ “The General Assembly [...]

Affirms the following basic principles for the protection of civilian populations in armed conflicts, without prejudice to their future elaboration within the framework of progressive development of the international law of armed conflict:

1. Fundamental human rights, as accepted in international law and laid down in international instruments, continue to apply fully in situations of armed conflict.
2. In the conduct of military operations during armed conflicts, a distinction must be made at all times between persons actively taking part in the hostilities and civilian populations.
3. In the conduct of military operations, every effort should be made to spare civilian populations from the ravages of war, and all necessary precautions should be taken to avoid injury, loss or damage to civilian populations.
4. Civilian populations as such should not be the object of military operations.

(continued on next page)

- 4755 Even after the adoption of the Protocols this resolution continues to be an important point of reference. These basic principles were adopted unanimously and can in fact be of help in interpreting the rules summarily expressed in Protocol II.⁷
- 4756 The problem of how to protect the civilian population was dealt with in a general way in both the United Nations and International Red Cross resolutions, without a distinction being made between the various types of conflict.
- 4757 In its first studies on a new development of humanitarian law, the ICRC retained the same approach.⁸ It became clear that unduly detailed rules for non-international armed conflicts would undoubtedly be more difficult for governments to accept and for the parties in such special circumstances to apply; for this reason the principle was adopted in 1972 that two separate régimes were needed.⁹ The proposals put forward for Protocol II, though based on those for Protocol I, were simplified. In its draft the ICRC had taken care to make a distinction between basic rules and rules of application so as not to jeopardize the acceptance of the former.¹⁰
- 4758 A number of acts specifically prohibited by Protocol I are not mentioned in Protocol II; nevertheless, they may not be considered to be legitimate. Despite its brevity, this Part significantly reinforces the protection of the civilian population because of the fundamental nature of the rules it lays down.¹¹

5. Dwellings or other installations that are used only by civilian populations should not be the object of military operations.

6. Places or areas designated for the sole protection of civilians, such as hospital zones or similar refuges, should not be the object of military operations.

7. Civilian populations, or individual members thereof, should not be the object of reprisals, forcible transfers or other assault on their integrity.

8. The provision of international relief to civilian populations is in conformity with the humanitarian principles of the Charter of the United Nations, the Universal Declaration of Human Rights and other international instruments in the field of human rights. The Declaration of Principles for International Humanitarian Relief to the Civilian Population in Disaster Situations, as laid down in resolution XXVI adopted by the twenty-first International Conference of the Red Cross, shall apply in situations of armed conflict, and all parties to a conflict should make every effort to facilitate this application.”

⁷ The work of the Institute of International Law may also serve as a source of information on legal writings, since although it has no binding legal force, it constitutes a subsidiary source of guidance that is widely recognized internationally. It is appropriate to refer here to the resolution adopted in Edinburgh entitled “The distinction between military objectives and non-military objects in general, and particularly the problems associated with weapons of mass destruction”, which lists a number of rules for the conduct of hostilities applicable in all situations of conflict. *53 Annuaire IDI 2*, September 1969, pp. 48-126 and pp. 375-377.

⁸ See “Questionnaire aux experts” in 1970 and the 1971 draft.

⁹ Cf. the General introduction to the Protocol, *supra*, p. 1329.

¹⁰ *CE 1971, Report*, para. 146.

¹¹ The negotiation of the articles of the two Protocols was carried out simultaneously on parallel lines. This working method, which was followed by the Committees of the Conference, has made it possible to use identical terminology in the two instruments which should avoid divergent interpretations. During the first stage this simultaneous negotiation led to the adoption in Committee of more detailed rules than those initially envisaged in the draft for Protocol II. The final version adopted in plenary meeting had been simplified, to be even shorter than the initial draft.

- 4759** Article 13 (*Protection of the civilian population*) sets out first of all the general principle of protection, i.e. the immunity to which the population is entitled under the law. This, in particular, implies an absolute prohibition of certain methods of combat: direct attacks against the civilian population and intimidation (Article 13 – *Protection of the civilian population*, paragraph 2), starvation (Article 14 – *Protection of objects indispensable to the survival of the civilian population*) and forced movements (Article 17 – *Prohibition of forced movements of civilians*). Civilian objects do not enjoy a general protection, but some are protected because of their nature and function, in order to ensure that the civilian population will be safeguarded. These are objects indispensable to their survival (Article 14 – *Protection of objects indispensable to the civilian population*), works and installations containing dangerous forces (Article 15 – *Protection of works and installations containing dangerous forces*), and cultural objects and places of worship (Article 16 – *Protection of cultural objects and places of worship*). Finally, Article 18 (*Relief societies and relief actions*) provides for the organization of relief actions nationally, (paragraph 1) and internationally (paragraph 2).
- 4760** This simple text has the advantage of not raising the threshold for application of the Protocol; the ability of the armed opposition to respect these provisions would undoubtedly be more readily contested if unduly elaborate precautionary measures had been prescribed. The disadvantage is that there is a lack of precision on practical points, which leads to a need for interpretation.¹²

S.J.

¹² In this respect the rules of Protocol I serve as a point of reference for those who will have to assume responsibility for military operations. See Arts. 50-58 of Protocol I, and in particular, Art. 51, paras. 4-8, and Arts. 57 and 58, concerning precautions in attack, *supra*, p. 609.

Article 13 – Protection of the civilian population

1. The civilian population and individual civilians shall enjoy general protection against the dangers arising from military operations. To give effect to this protection, the following rules shall be observed in all circumstances.
2. The civilian population as such, as well as individual civilians, shall not be the object of attack. Acts or threats of violence the primary purpose of which is to spread terror among the civilian population are prohibited.
3. Civilian shall enjoy the protection afforded by this Part, unless and for such time as they take a direct part in hostilities.

Commentary

General remarks

- 4761** Article 13 codifies the general principle that protection is due to the civilian population against the dangers of hostilities, already recognized by customary international law and by the laws of war as a whole. This principle is translated into a specific rule in paragraph 2, with the absolute prohibition of direct attacks and of acts or threats of violence committed with a view to spreading terror. Paragraph 3 defines the field of application of the general principle *ratione personae*: civilians lose their right to protection under the whole of Part IV if they take part in hostilities, and throughout the duration of such participation.
- 4762** Both as regards substance and structure, this article corresponds to the first three paragraphs of Article 51 of Protocol I (*Protection of the civilian population*), and reference may also be made to the commentary thereon.¹ Unlike Protocol I, which contains detailed rules, only the fundamental principles on protection for the civilian population are formulated in Protocol II and it is done in a very rudimentary form in this article, even though it constitutes the basis of Part IV.
- 4763** The draft submitted by the ICRC, and adopted in Committee, had three provisions: Article 24: Basic rules; Article 25: Definitions; Article 26: Protection of the civilian population.² In accordance with the amendment submitted by the Pakistani delegation when the instrument was finally adopted in the plenary meetings, only the first paragraphs of Article 26 of the draft were retained.³ These constitute Article 13 in its present form.
- 4764** This radical simplification does not reduce the degree of protection which was initially envisaged, for despite its brevity, Article 13 reflects the most fundamental rules. How to implement them is the responsibility of the parties, and this means that the safety measures they are obliged to take under the rule on protection will have to be developed so as to best suit each situation, the infrastructure available and the means at their disposal.

Paragraph 1

- 4765** This paragraph lays down the general principle that protection is due to the civilian population, which forms the cornerstone of Part IV.

¹ See commentary Art. 51, Protocol I, *supra*, p. 613.

² ICRC draft Arts. 24, 25 and 26; see also *O.R.* XV, pp. 319-321, CDDH/215/Rev.1.

³ See *O.R.* IV, pp. 72, 74 and 81, CDDH/427.

First sentence

- 4766** The term “civilian population” is the usual term for referring to civilians as a group. The text refers simultaneously to the civilian population and to individual civilians to indicate that the civilian population is protected as a whole in the same way as the individuals which constitute it.
- 4767** The general protection covers all civilians, without any distinction. The term “general protection” is used in contrast to the special protection designed to give additional protection to certain categories of individuals belonging to the civilian population (the wounded and sick, children, medical personnel etc.).⁴ Special protection does not replace the general protection but adds to it.
- 4768** What is meant by the phrase “general protection against the dangers arising from military operations”? In other words, what is the scope of the general principle of protection?
- 4769** “Military operations” refers to movements of attack or defence by the armed forces in action.⁵ They present the civilian population with two types of danger; on the one hand, that of attacks as such and, on the other, the incidental effects of attacks.
- 4770** Protection covers “the dangers arising from military operations”. This means that the obligation does not consist only in abstaining from attacks, but also in avoiding, or in any case reducing to a minimum, incidental losses, and in taking safety measures.
- 4771** To ensure general protection for the civilian population consequently implies:
- 1) an absolute prohibition of direct attack against the civilian population as such, or against civilians; this prohibition is specifically mentioned in paragraph 2 discussed below;
 - 2) reducing the effects of military operations which could affect protected persons.
- 4772** The implementation of such protection requires that precautions are taken both by the party launching the attack during the planning, decision and action stages of the attack, and by the party that is attacked. For example; military installations should not be intentionally placed in the midst of a concentration of civilians with a view to using the latter as a shield or for the purpose of making the adverse party abandon an attack, without forgetting any other safety measures which are not explicitly laid down in Protocol II.⁶ Each party should, in good faith, design such measures and adapt them to the specific circumstances, bearing in mind the means available to it, and based on the general principles relating to the protection of the civilian population which apply irrespective of whether the conflict is an international or an internal one. It is appropriate to recall here the most important of these principles, i.e., the principle to use the minimum force

⁴ CE 1971, Report, pp. 77-78, paras. 441-445.

⁵ O.R. XIV, p. 14, CDDH/III/SR.2, para. 8.

⁶ On the other hand, in Protocol I conditions of attack and precautionary measures are dealt with in specific rules which develop the general principle of protection (see Arts. 48-58 of Protocol I and the commentary thereon, *supra*, pp. 597-695).

required to harm the enemy, the principle of distinction and the principle of proportionality which only intervenes when it is not possible to ensure the total immunity of the population:

- parties engaged in a conflict do not have an unlimited right as regards the means of injuring the enemy;⁷
- a distinction should be made at all times between persons participating in hostilities and the civilian population, so that the latter may be spared as far as possible;⁸
- the relation between the direct advantage anticipated from an attack and the harmful effects which could result on the persons and objects protected⁹ should be considered in advance.

Second sentence

4773 “To give effect to this protection”: the use of this phrase does not imply that protection is only considered in case of military operations.¹⁰ In fact, the Protocol contains other rules to be observed in all circumstances by armed forces or armed groups, and these also help to make the protection of the civilian population effective.¹¹

4774 This paragraph is worded in the same way as Article 51 (*Protection of the civilian population*), paragraph 1, of Protocol I, though without including a reference to other applicable rules of international law.¹²

4775 Applicable international law includes customary international law, whether or not it has been codified, in addition to treaty law.¹³ That follows from the general theory of international law and from the very nature of customary international law. The question may well be asked whether the reference to international law was intentionally omitted in order to suggest that customary law is deemed not to apply to situations of non-international armed conflict.

⁷ This principle was formulated in Art. 22 of the Hague Regulations Respecting the Laws and Customs of War on Land and reaffirmed in the resolutions of the Red Cross, particularly Resolution XXVIII of the XXth International Conference, Vienna, 1965.

⁸ This principle was expressed in particular in Resolution XXVIII of the XXth International Conference of the Red Cross and Resolution 2575 (XXV) of the United Nations General Assembly.

⁹ The principle of proportionality is expressly set out in Art. 57, para. 2(b), of Protocol I, which reads as follows: “an attack shall be cancelled or suspended if it becomes apparent [...] that the attack may be expected to cause incidental loss of civilian life, injury to civilians, damage to civilian objects, or a combination thereof, which would be excessive in relation to the concrete and direct military advantage anticipated”; see *supra*, p. 686. It should be noted that civilian objects do not enjoy general protection under Protocol II. Only those objects which must be protected as being essential for the needs of the civilian population are taken into consideration.

¹⁰ See *O.R.* XV, p. 329, CDDH/III/224.

¹¹ For example, Art. 4, para. 2(b), (c) and (d).

¹² Art. 51, para. 1, of Protocol I: “To give effect to this protection, the following rules, which are additional to the other applicable rules of international law, shall be observed in all circumstances”; see *supra*, p. 617.

¹³ This view also emerged from the discussions in Committee; see *O.R.* XIV, p. 15, CDDH/III/SR.2, para. 13, for example.

4776 It would seem that this is not the case. The discussions in the Conference do not indicate that any doubt was cast on the applicability of customary law. The reference to other rules of international law was probably omitted because it was not considered necessary, given that the only rule explicitly laid down for non-international armed conflicts is common Article 3 of the 1949 Conventions, which does not contain provisions relating to the protection of the civilian population as such.¹⁴

Paragraph 2

First sentence

4777 This sentence lays down an absolute obligation applicable at all times: “The civilian population as such, as well as individual civilians, shall not be the object of attack.”

Scope of the rule

4778 Civilians, whether in groups or individually, may not be made the object of an attack.

4779 This rule prohibits launching direct attacks against the civilian population. On the other hand, secondary effects of military operations directed against military objectives,¹⁵ which might incidentally affect the civilian population, are not specifically referred to here.¹⁶

4780 The prohibition of direct attack is further corroborated by the use of the expression “the civilian population as such”, taken from the United Nations resolutions on this question.¹⁷

Individuals within the civilian population

4781 Article 25, paragraph 3, of the draft adopted in Committee provided that: “The presence, within the civilian population, of individuals who do not fall within the definition of civilians does not deprive the population of its civilian

¹⁴ See *O.R.* XV, p. 363, CDDH/III/275.

¹⁵ As regards military objectives, these are defined as follows in Art. 52, para. 2, of Protocol I: “objects which by their nature, location, purpose or use make an effective contribution to military action, and whose total or partial destruction, capture or neutralization, in the circumstances ruling at the time, offers a definite military advantage”. See the commentary on this provision, *supra*, p. 635.

¹⁶ Secondary effects are taken into consideration in the concept of “general protection against the dangers arising from military operations”; see, *supra*, p. 1449.

¹⁷ See Resolution 2444 (XXIII), para. 1(b), and Resolution 2675 (XXV), para. 4; see also *Commentary Drafts*, p. 56 (Art. 26).

character.”¹⁸ This rule, which is contained in Article 50 (*Definition of civilians and civilian population*), paragraph 3, of Protocol I, was not included in Protocol II.

- 4782 It cannot be denied that in situations of non-international armed conflict in particular, the civilian population sometimes shelters certain combatants, and it may be difficult to ascertain the status of individuals making up the population. However, we must point out that if the mere presence of some individuals not protected under paragraph 3 of this article were to permit an attack against a whole group of civilians, the protection enjoyed by the civilian population would become totally illusory. Thus the fact that the Protocol is silent on this point, as on other points, should not be considered to be a licence to attack.

Definition of attack

- 4783 Protocol I defines attacks. This term has the same meaning in Protocol II.¹⁹ Article 49 (*Definitions of attacks and scope of application*), paragraph 1, of Protocol I, reads as follows: ‘Attacks’ means acts of violence against the adversary, whether in offence or defence.” The fact that both attacks in offence or in defence are covered is because the term “attacks” does not cover only acts by those who have initiated the offensive; it is a technical term relating to a specific military operation limited in time and place.²⁰
- 4784 It should be noted that the prohibition of attacks against the civilian population as such, and against individual civilians, remains valid, even if the adversary has committed breaches.²¹ Acts of terrorism, collective punishment and pillage are expressly forbidden in Article 4 (*Fundamental guarantees*) of the Protocol.²² Even unlawful acts on the part of the adverse party cannot justify such measures. Furthermore, a denunciation of the Protocol would not take effect until the end of the armed conflict and could not serve as a justification for failing to fulfil obligations incurred under it.²³

¹⁸ O.R. XV, p. 320, CDDH/215/Rev.1.

¹⁹ From the beginning of the work of the Conference it was agreed that the same meaning should be given this term in both Protocols. See *Commentary Drafts*, p. 157; this definition is based on Art. 3 of the Draft Rules of 1956. See also, *supra*, p. 602.

²⁰ It is important not to confuse the concept of attack in the sense of the Protocol, with that of aggression; see *Commentary Drafts*, pp. 54-55.

²¹ Humanitarian law applies without conditions of reciprocity. Cf. on this point, J. de Preux, “The Geneva Conventions and Reciprocity”, *op. cit.*, pp. 25-29.

²² Art. 4, para. 2(b), (d) and (g): it was thought that “reprisals” were a precise legal concept applicable only to situations of international armed conflict. This problem was discussed at length during the Conference. See commentary Art. 4, para. 2(b), for more detailed discussion, *supra*, p. 1372, note 18, and p. 1374.

²³ Art. 25 of the Protocol (Denunciation) and the commentary thereon, *infra*, p. 1501.

Second sentence

- 4785** “Acts or threats of violence the primary purpose of which is to spread terror among the civilian population are prohibited.” Attacks aimed at terrorizing are just one type of attack, but they are particularly reprehensible. Attempts have been made for a long time to prohibit such attacks, for they are frequent and inflict particularly cruel suffering upon the civilian population. Thus the Draft Rules of Aerial Warfare, prepared in The Hague in 1922, already prohibited such attacks.²⁴ Air raids have often been used as a means of terrorizing the population, but these are not the only methods. For this reason the text contains a much broader expression, namely “acts or threats of violence” so as to cover all possible circumstances.
- 4786** Any attack is likely to intimidate the civilian population. The attacks or threats concerned here are therefore those, the primary purpose of which is to spread terror, as one delegate stated during the debates at the Conference.²⁵

Paragraph 3

- 4787** This paragraph defines when civilians are protected: civilians lose their right to protection under this Part if they take a direct part in hostilities and throughout the duration of such participation. The term “direct part in hostilities” is taken from common Article 3, where it was used for the first time. It implies that there is a sufficient causal relationship between the act of participation and its immediate consequences.
- 4788** Hostilities have been defined as “acts of war that by their nature or purpose struck at the personnel and *matériel* of enemy armed forces”.²⁶ However, several delegations considered that the term “hostilities” also covers preparations for combat and returning from combat.²⁷
- 4789** Those who belong to armed forces or armed groups may be attacked at any time. If a civilian participates directly in hostilities, it is clear that he will not enjoy any protection against attacks for as long as his participation lasts. Thereafter, as he no longer presents any danger for the adversary, he may not be attacked; moreover, in case of doubt regarding the status of an individual, he is presumed to be a civilian. Anyone suspected of having taken part in hostilities and deprived of his liberty for this reason will have the benefit of the provisions laid down in Articles 4 (*Fundamental guarantees*), 5 (*Persons whose liberty has been restricted*), and 6 (*Penal prosecutions*).²⁸

Article 14 – Protection of objects indispensable to the survival of the civilian population

Starvation of civilians as a method of combat is prohibited. It is therefore prohibited to attack, destroy, remove or render useless, for that purpose, objects indispensable to the survival of the civilian population, such as foodstuffs, agricultural areas for the production of foodstuffs, crops, livestock, drinking water installations and supplies and irrigation works.

Commentary

General remarks

4790 Article 14 implements the general principle of protection laid down in Article 13 (*Protection of the civilian population*).

- 4791 The term “starvation” means the action of subjecting people to famine, i.e., extreme and general scarcity of food.¹ The object of this provision is to prohibit the deliberate provocation of such a situation and to preserve the means of subsistence of the civilian population, in order to give effect to the protection to which it is entitled. It is suitable to interpret the aim of this article in the light of Article 17 (*Prohibition of forced movement of civilians*) and Article 18 (*Relief societies and relief actions*), which may facilitate the determination of its scope as they, too, are a means of applying the general principle.
- 4792 This article is a simplified version of Article 54 (*Protection of objects indispensable to the survival of the civilian population*), paragraph 1, and the first half of paragraph 2, of Protocol I, worded in similar terms.
- 4793 The prohibition on using starvation against civilians, and the specific protection given to objects indispensable to the survival of the population, are new rules supplementing and developing existing law. Nevertheless, the problem had already been broached in the Conventions. In fact, Article 23 of the Fourth Convention already provided for assistance to be given to the most vulnerable categories of the civilian population, particularly in the form of foodstuffs.² Mention should also be made of Article 53 of the same Convention, which is aimed at safeguarding property necessary for the existence of civilians under occupation.³
- 4794 As regards the law applicable to non-international armed conflicts, this is a new rule, though it is really only a specific application of common Article 3, which imposes on parties to the conflict the obligation to guarantee humane treatment for all persons not participating in hostilities, and in particular prohibits violence to life.⁴ Such specific legal protection for objects indispensable to the survival of the civilian population is all the more important as Protocol II,⁵ unlike Protocol I,⁶ does not protect civilian objects in general.

First sentence

- 4795 The prohibition on using starvation against civilians is a rule from which no derogation may be made. A form of words whereby it would have been possible to make an exception in case of imperative military necessity was not adopted.⁷

¹ The Shorter Oxford English Dictionary (1978), pp. 724 and 2111.

² Supplemented by Art. 70 of Protocol I (Relief actions); *cf. supra*, p. 815.

³ Supplemented by Art. 69 of Protocol I (Basic needs in occupied territories); *cf. supra*, p. 811.

⁴ Common Article 3, paragraph 1, sub-para (1)(a) *in fine*. It should also be noted that starvation may entail the total or partial disappearance of whole groups of people, which could amount to genocide, if brought about intentionally. Genocide is a crime against humanity, prohibited and punishable under the Convention on the Prevention and Punishment of the Crime of Genocide of 9 December 1948, which applies to any form of genocide, including that perpetrated by a government in its own territory against its own nationals. See *The United Nations and Human Rights*, New York, 1973, p. 16.

⁵ An intervention by the delegation of the Holy See made it possible for this article to be adopted by consensus in a plenary meeting of the Conference. See *O.R.* VII, pp. 135-138, CDDH/SR.52, paras. 79-94.

⁶ Art. 52, Protocol I, and the commentary thereon, *supra*, p. 629.

⁷ *CE 1972, Commentaries*, p. 40.

- 4796 This rule was laid down for the benefit of civilians. Consequently the use of blockade and siege as methods of warfare remain legitimate, provided they are directed exclusively against combatants.⁸
- 4797 It will be recalled that a blockade consists of disrupting the maritime trade of a country or one of its coastal provinces. A siege consists of encircling an enemy location, cutting off those inside from any communication in order to bring about their surrender. A blockade is basically aimed at preventing supplies required for the fighting, i.e., military *matériel*, from reaching the enemy forces and is not directed specifically against civilians. However, the latter are in fact often the first to be affected, particularly children. The same is true of siege, from which civilians are the first to suffer. In some cases they may be evacuated for humanitarian reasons, but up to now there has been no express rule of law forbidding besieging forces to let civilians die of starvation.
- 4798 Thus the prohibition on starving civilians might seem unrealistic to some, but this is by no means the case. Protocol II is conceived in such a way that this humanitarian rule can be respected whatever the circumstances. Article 18 (*Relief societies and relief actions*), paragraph 2, actually provides for the organization of international relief actions in favour of the civilian population when the latter is suffering undue hardship owing to a lack of supplies essential for its survival. Between them these two provisions, which are closely linked, do not allow the argument of military necessity to be used to justify starving the civilian population. As soon as there is a lack of indispensable objects, the international relief actions provided for in Article 18 (*Relief societies and relief actions*) should be authorized to enable the obligation following from Article 14 to be respected.
- 4799 The text refers to methods of combat, while Protocol I, Part III, is entitled “Methods and Means of Warfare”. The ICRC draft proposed to use the same expression “Methods and Means of Combat” in both instruments.⁹ In Protocol I the Conference, however, preferred the term “Methods and Means of Warfare” because the term “combat” can be given a narrower interpretation than the word “warfare”.¹⁰ On the other hand, it was considered inappropriate to refer to warfare in an instrument concerning non-international armed conflicts.¹¹ Yet the Working Group did not attempt to define either of the words used in this first sentence.¹² It was merely a matter of adapting the terminology and warfare was

⁸ According to the Rapporteur of Committee III, the prohibition on starving civilians does not change the law applicable to naval blockade (*O.R.* XV, p. 279, CDDH/215/Rev.1). That law is laid down in the London Declaration Concerning the Laws of Naval War of 24 February 1909, which sets out the conditions for applying a blockade. That Declaration was signed by ten countries and is taken to represent customary law, although it was never ratified. See also commentary Art. 54, Protocol I, *supra*, p. 651. We should point out that in traditional international law, the declaration of a blockade in an internal armed conflict is equivalent to the recognition of belligerency, *supra*, p. 1321. However, “blockade” is a concept of public international law applicable in international armed conflict. That concept is only referred to in the context of Protocol II by analogy with certain factual circumstances.

⁹ *Commentary Drafts*, p. 41 (Protocol I, Part III) and p. 152 (Protocol II, Part IV).

¹⁰ *O.R.* XV, p. 267, CDDH/215/Rev.1, para. 20.

¹¹ *Ibid.*, p. 394, CDDH/236/Rev.1, para. 57.

¹² *Ibid.*, p. 267, CDDH/215/Rev.1, para. 20.

considered to be a more appropriate term in the context of an armed conflict between States.¹³ Starvation is prohibited as a method of combat, i.e., when it is used as a weapon to destroy the civilian population. It should be noted that even if starvation were not subject to an official legal prohibition, it is nowadays no longer an acceptable phenomenon, irrespective of how it arises (natural disaster or induced by man). Increasingly public opinion and public conscience have forced governments to face their responsibilities and prompted the international community to organize relief actions, which are never sufficient in view of the scale of the problem worldwide.

Second sentence

- 4800** This sentence develops the principle prohibiting starvation from being used against civilians by pointing out the most usual ways in which starvation is brought about. By using the word “therefore” certain acts are emphasized, but the list is not exhaustive. Starvation can also result from an omission. To deliberately decide not to take measures to supply the population with objects indispensable for its survival in a way would become a method of combat by default, and would be prohibited under this article.
- 4801** The verbs “attack”, “destroy”, “remove” and “render useless” are used to cover all eventualities, including pollution of water supplies by chemical agents or the destruction of a harvest by defoliants.¹⁴
- 4802** As indicated by the words “such as”, the list of protected objects is illustrative only. In fact, an exhaustive list might well have resulted in omissions or in making a somewhat arbitrary choice of objects.¹⁵
- 4803** “Objects indispensable to the survival of the civilian population” means objects which are of basic importance for the population from the point of view of providing the means of existence.
- 4804** Article 18 (*Relief societies and relief actions*), paragraph 2, mentions “supplies essential for [...] survival”. It may be appropriate to point out that these two expressions are synonymous each in its own context.
- 4805** The terms “foodstuffs” and “agricultural areas for the production of foodstuffs” must be understood in the broadest sense to cover the infinite variety of needs of the populations of different geographical areas throughout the world.
- 4806** The text does not distinguish between objects intended for the armed forces and those intended for civilians. Except for the case where supplies are specifically intended as provisions for combatants, it is prohibited to destroy or attack objects indispensable for survival, even if the adversary may benefit from them. The prohibition would be meaningless if one could invoke the argument that members of the government’s armed forces or armed opposition might make use of the

¹³ See commentary Art. 35, para. 3, Protocol I, *supra*, p. 410, which specifies that the term “methods of warfare” also covers combat, a term which is, for that matter, used several times in that Protocol (Art. 18, para. 3; Art. 65, para. 3).

¹⁴ *O.R.* XIV, p. 136, CDDH/III/SR.16, para. 41.

¹⁵ *Ibid.*, p. 137, para. 46.

objects in question. Of course, the possibility cannot be excluded that, for example, a source of drinking water might at some point be used by soldiers.

- 4807** What is the position if such objects hinder the enemy in observation or attack? This might be the case if crops were very tall and were suitable for concealment in a combat zone. It is prohibited to attack or destroy objects with the aim of starving out civilians. However, if the objects are used for military purposes by the adversary, they may become a military objective and it cannot be ruled out that they may have to be destroyed in exceptional cases, though always provided that such action does not risk reducing the civilian population to a state of starvation.¹⁶
- 4808** Is there a general obligation to respect such objects in the whole of the territory, i.e., not only those situated in the part of the territory controlled by the adversary, but also those in one's own territory?
- 4809** When the ICRC's expert submitted the article to the Committee, this question was answered affirmatively.¹⁷ During the discussions, this interpretation, which was the object of lengthy discussion in connection with the corresponding article of Protocol I, was neither confirmed nor dismissed with regard to Protocol II. It was argued that in an international armed conflict a State retained freedom of action in the territory under its own control, and that consequently it could not entirely be ruled out that the State would destroy everything on its own side under a "scorched earth" policy in case of imperative military necessity, for example, to halt the advance of enemy troops.
- 4810** As regards Protocol II, two points deserve a mention: one of a legal and one of a practical nature. In becoming a Contracting Party to the Conventions and to Protocol II, a State anyway accepts for purely humanitarian purposes that certain rules will be applicable to its own nationals within the confines of its own territory. If the characteristics of this sort of situation are taken into consideration, it is clear that objects in the possession of one of the parties may change hands rapidly, several times back and forth, depending on what part of the territory it controls.
- 4811** Further, it is not admissible that one of the parties could destroy or render useless objects indispensable to the survival of part of the population living in the part of the territory under its control because it suspected that the latter supported or sympathized with the adversary. It should also be recalled that collective punishments and pillage are prohibited by the Protocol.¹⁸
- 4812** To deprive the civilian population of objects indispensable to its survival usually results in such a population moving elsewhere as it has no other recourse than to flee. Such movements are provoked by the use of starvation, which is in such cases equivalent to the use of force. However, enforced movement is prohibited, except for the cases provided for in Article 17 (*Prohibition of forced movement of civilians*).

¹⁶ See Art. 54, para. 3(b), Protocol I and the commentary thereon, *supra*, p. 650.

¹⁷ O.R. XIV, p. 136, CDDH/III/SR.16, para. 43.

¹⁸ Art. 4, para. 2(b) and (g), *supra*, pp. 1374 and 1376.

4813 In cases where forced displacements are allowed under that article, “all possible measures shall be taken in order that the civilian population may be received under satisfactory conditions of shelter, hygiene, health, safety and nutrition”. If there are shortages, or if the means to organize relief are lacking, the responsible authorities should have recourse to international relief actions, as provided in Article 18 (*Relief societies and relief actions*), paragraph 2.

S.J.

Protocol II

Article 15 – Protection of works and installations containing dangerous forces

Works or installations containing dangerous forces, namely dams, dykes and nuclear electrical generating stations, shall not be made the object of attack, even where these objects are military objectives, if such attack may cause the release of dangerous forces and consequent severe losses among the civilian population.

Commentary

General remarks

4814 During the conflicts which have characterized the last forty years, works and installations containing dangerous forces, particularly dykes and dams, have often

been the object of attacks and destruction resulting in serious consequences and leading to heavy losses among the civilian population.¹

4815 In order to safeguard the civilian population from this sort of catastrophe, the ICRC had already proposed immunity for such works and installations in its Draft Rules of 1956 for the Limitation of the Dangers incurred by the Civilian Population in Time of War.² It will be recalled that those Rules were drawn up for all kinds of armed conflict, irrespective of whether they are internal or international.³

4816 Article 15 has the same tenor as the first sentence of paragraph 1 of Article 56 of Protocol I (*Protection of works and installations containing dangerous forces*).⁴ The simultaneous negotiation of these two provisions in Committee led to some additions being made to the draft presented by the ICRC.⁵ These consisted of the ways in which the protection of such works and installations could be applied.⁶ The text as finally adopted was reduced to the simplest essentials; unlike Article 56 of Protocol I (*Protection of works and installations containing dangerous forces*), it expresses the general principle without providing for any exceptions, which means that the rule is stated more categorically.

4817 Protocol II does not set out to protect civilian objects generally.⁷ Works and installations containing dangerous forces are the object of special protection because of the serious consequences that may ensue if they are destroyed.

Text of the article

4818 This provision is aimed at protecting the civilian population against the effects which might result from the release of dangerous forces such as large quantities of water or radioactivity. For this purpose it prohibits attacks on dams, dykes and nuclear electrical generating stations if such attacks could release dangerous forces causing severe losses among the civilian population, even assuming such works and installations to be military objectives.⁸ The list is exhaustive, which does not mean that there are not other kinds of works or installations whose destruction is likely to entail heavy losses among the civilian population. Thus, for example, the problem of storage facilities for crude oil and oil products and the risks of oil rigs were raised during the Diplomatic Conference.⁹ In the end it was only possible to arrive at a consensus on the items listed above, though this does not exclude the protection of other types of installations under different international legal régimes.

² Art. 17.

³ *Ibid.*, Art. 2.

⁴ Apart from some slight differences in the wording of the French text of the article.

⁵ Draft Art. 28. See commentary, *infra*, p. 1463.

⁶ O.R. XV, p. 323, CDDH/215/Rev.1.

⁷ See introduction to this Part, *in fine, supra*, p. 1446.

⁸ The concept of military objectives is defined in Art. 52, para. 2, Protocol I. Reference may be made to the commentary thereon, *supra*, p. 635.

⁹ O.R. XV, p. 352, CDDH/III/264/Rev.1.

- 4819** The extent of the protection of works and installations covered in this article is limited to cases in which an attack may cause severe losses among the civilian population. Thus such objects are not protected in themselves, but only to the extent that their destruction would release forces dangerous for the civilian population.
- 4820** This means that, assuming such a work or installation were a military objective, it could be attacked as long as the civilian population were not seriously endangered thereby. On the other hand, protection is automatic, irrespective of the civilian, military or combined use made of the installation or works, whenever an attack could cause the release of dangerous forces resulting in severe losses among the civilian population.
- 4821** The term “severe losses” is taken from military terminology, and clearly this must be judged in good faith on the basis of objective elements, such as the existence of densely populated areas of civilians (villages or towns) in the area which would be affected by the release of dangerous forces.
- 4822** The ICRC draft provided that the parties to the conflict would endeavour not to locate military objectives in the vicinity of such objects, in order to prevent the danger of indirect attacks, i.e., the incidental effects of an attack directed against a nearby military objective.¹⁰ In the absence of this special provision, which was not retained,¹¹ it is appropriate to recall that the civilian population is entitled to general protection against the effects of hostilities.¹² In any case, the prohibition laid down in this article covers attacks on military objectives in the direct vicinity of works or installations which might very well have the incidental effect of releasing dangerous forces and seriously injuring the civilian population. On the other hand, consciously locating military objectives in the vicinity of such works or installations would constitute a violation of the principle laid down in Article 13 (*Protection of the civilian population*), paragraph 1.
- 4823** Article 56 (*Protection of works and installations containing dangerous forces*), paragraph 7, of Protocol I, provides for the optional identification of works and installations containing dangerous forces by means of three bright orange circles. A precise description is given in Annex I to Protocol I (Article 16 - *International special sign*).¹³
- 4824** This special optional identification is not specified in Protocol II. If a country were to decide to adopt it in time of peace for Protocol I, the identification would of course retain the same function and the same purpose in case of non-international armed conflict. However, such identification, which has an optional character, does not have the same importance in a situation covered by Protocol II. In fact, the forces engaged in a confrontation could be expected to be familiar with the location of dams, dykes and nuclear electrical generating stations, since

they are situated in their own country, in the territory of which the hostilities are taking place. Moreover, this element might play a favourable role in their protection as it is the interests of both of the parties to the conflict not to destroy such works and installations.

S.J.

Protocol II

Article 16 – Protection of cultural objects and of places of worship

Without prejudice to the provisions of the Hague Convention for the Protection of Cultural Property in the Event of Armed Conflict of 14 May 1954, it is prohibited to commit any acts of hostility directed against historic monuments, works of art or places of worship which constitute the cultural or spiritual heritage of peoples, and to use them in support of the military effort.

Commentary

General remarks

- 4825** This article corresponds to Article 53 (*Protection of cultural objects and places of worship*), sub-paragraphs (a) and (b), of Protocol I.¹ It includes cultural objects and places of worship amongst the small number of objects protected under Protocol II.
- 4826** As protection of cultural objects in the event of armed conflict was already dealt with by the Hague Convention of 1954,² adopted under the auspices of UNESCO, the ICRC had not proposed any rules relating to this matter in the draft Protocols. The basis for this provision was an amendment submitted to Committee III during the third session of the Diplomatic Conference.³
- 4827** The inclusion of the protection of cultural objects in the Protocols is aimed at highlighting the importance of safeguarding the heritage of mankind. The sponsors of the proposal also justified it on the ground that not all States are yet bound by the above-mentioned Hague Convention.⁴
- 4828** This article was the object of heated controversy, in particular concerning the question whether places of worship should be mentioned and whether there should be an express provision that it is without prejudice to the application of the Hague Convention. Thus, the reference to places of worship and the spiritual heritage of peoples, which was included in the initial text, was deleted in Committee and later reintroduced by an amendment submitted in the plenary meetings.⁵ These two points will be developed below.
- 4829** It should be noted that two delegations, while supporting the principle that cultural objects should be protected, considered that such a rule should not be included in a simplified instrument, when many other humanitarian norms, particularly those relating to the conduct of hostilities, were not retained.⁶

¹ Reference may be made to the commentary on Art. 53, Protocol I, *supra*, p. 639.

² The Hague Convention for the Protection of Cultural Property in the Event of Armed Conflict of 14 May 1954, hereafter referred to as “the Hague Convention”, Regulations for the Execution of the Convention for the Protection of Cultural Property in the Event of Armed Conflict of 14 May 1954, and the Hague Protocol for the Protection of Cultural Property in the Event of Armed Conflict of 14 May 1954.

³ *O.R.* IV, p. 65, CDDH/III/GT/95. During the second session of the Conference a similar proposal was submitted for Protocol I (*O.R.* III, p. 213, CDDH/III/17), and this was later taken up for Protocol II, without the reference to the prohibition of reprisals.

⁴ Moreover, the Conference adopted Resolution 20 on the protection of cultural property, inviting States to become Parties. For the list of States Parties, *cf. infra*, p. 1549.

⁵ See *O.R.* XV, p. 501, CDDH/407/Rev.1, Annex II; *O.R.* IV, pp. 65-66, CDDH/436 and CDDH/436/Rev.1 and Corr.1; *O.R.* VII, p. 115, CDDH/SR.51, para. 64; p. 141, CDDH/SR.53, para. 1.

⁶ *O.R.* VII, pp. 156-157, 162-163, CDDH/SR.53, Annex (Finland, United Kingdom); for other reasons for a negative vote or an abstention, *cf. ibid.*, pp. 159-162 (India, Indonesia, Netherlands). When it was finally put to the vote, the article was adopted by 35 votes to 15 with 32 abstentions (*ibid.*, p. 142, CDDH/SR.53, para. 6).

Reference to the Hague Convention

- 4830** This clarifies the relationship between the two instruments so as to avoid divergent interpretations.
- 4831** The Hague Convention is explicitly applicable in the event of non-international armed conflicts.⁷
- 4832** The expression “without prejudice to” means that the conditions of application of the Convention are not modified by the Protocol,⁸ only of course as far as a Contracting Party is bound by the Convention. If it is not, only Article 16 applies.
- 4833** The protection granted by the Convention is more extensive in one sense. In fact, it prescribes, on the one hand, that cultural property should be safeguarded against the foreseeable effects of armed conflict, which implies that measures must already be taken in peacetime;⁹ on the other hand, it prescribes respect for such property by refraining from any use of the property and its immediate surroundings, as well as appliances used for its protection, for purposes which are likely to expose it to destruction or damage in the event of armed conflict; and also by refraining from any act of hostility directed against them.¹⁰
- 4834** Moreover, the High Contracting Parties undertake to prohibit, prevent and, if necessary, put an end to any form of theft, pillage, or misappropriation of, and any acts of vandalism directed against, cultural property. It should be noted that the Convention allows for the possibility of derogation in the case of imperative military necessity,¹¹ while Article 16 of the Protocol prohibits any act of hostility without exception.
- 4835** Finally, the Hague Convention provides for special protection to be granted to a limited number of refuges, centres containing monuments, and other immovable cultural property of very great importance, provided that they:
- are situated at an adequate distance from any important military objective;
 - are not used for military purposes;

⁷ Art. 19 of the Convention:

“Conflicts not of an International Character

1. In the event of an armed conflict not of an international character occurring within the territory of one of the High Contracting Parties, each Party to the conflict shall be bound to apply, as a minimum, the provisions of the present Convention which relate to respect for cultural property.

2. The Parties to the conflict shall endeavour to bring into force, by means of special agreements, all or part of the other provisions of the present Convention.

3. The United Nations Educational, Scientific and Cultural Organization may offer its services to the Parties to the conflict.

4. The application of the preceding provisions shall not affect the legal status of the Parties to the conflict.”

⁸ In the French version the term “sans préjudice” used in Article 53, Protocol I, is replaced by “sous réserve” in this article without any change in meaning, as shown by the fact that the same term “without prejudice” is used in the English text of both articles. See *O.R.* VII, p. 143, CDDH/SR.53, para. 12.

⁹ See Arts. 3 and 19 of the Hague Convention.

¹⁰ See Arts. 4, para. 1, of the Hague Convention.

¹¹ *Ibid.*, Art. 4, para. 2.

– are entered in the “International Register of Cultural Property under Special Protection” drawn up by UNESCO.¹²

4836 The rule providing general protection as laid down in Article 4, paragraph 1, of the Convention may be waived in case of imperative military necessity. However, the rule providing immunity to property under special protection can be set aside only in case of unavoidable military necessity and this can be established only by the officer commanding a force the equivalent of a division in size or larger; moreover, the opposing party must be notified (Article 11, paragraph 2, of the Convention).

4837 It should be noted that, unlike Article 53 (*Protection of cultural objects and of places of worship*) of Protocol I, the article under consideration here does not make reference to other applicable international instruments. In the absence of an explanation on this point in the Official Records, it may be recalled that the Hague Conventions of 1907¹³ are not specifically applicable to non-international armed conflicts. As regards the Roerich Pact,¹⁴ this was intended to apply in times of peace as well as war, so that it is applicable at all times. On the other hand, it seems that the Conference did omit a reference to the Convention on the Means of Prohibiting and Preventing the Illicit Import, Export, and Transfer of Ownership of Cultural Property as well as the Convention concerning the Protection of World Cultural and Natural Heritage, adopted by UNESCO in 1970 and 1972 respectively.¹⁵ These omissions have no material consequences on protection.

Historic monuments and works of art

4838 The present article contains a generic reference to historic monuments and works of art, which should be understood in the generally accepted sense of these words. In this respect, Article 1 of the Hague Convention serves as a useful point of reference; it gives the following definition:

“Definition of Cultural Property

For the purposes of the present Convention, the term ‘cultural property’ shall cover, irrespective of origin or ownership:

a) movable or immovable property of great importance to the cultural heritage of every people, such as monuments of architecture, art or history, whether religious or secular; archaeological sites; groups of buildings which, as a whole, are of historical or artistic interest; works of art; manuscripts, books and other objects of artistic, historical or archaeological interest; as

¹² See Art. 8 of the Hague Convention: “Granting of special protection”. It should be noted that so far with one exception, special protection has only been granted to refugees.

¹³ Arts. 27 and 56 of the Hague Regulations of 1907. Also *cf.* Art. 5 of the Hague Convention IX of 1907 concerning Bombardment by Naval Forces in Time of War, and commentary Art. 53, Protocol I, *supra*, p. 639.

¹⁴ Treaty on the Protection of Artistic and Scientific Institutions and Historic Monuments, known as the “Roerich Pact”, after its originator, Professor Nicolas Roerich, adopted on 15 April 1935.

¹⁵ *Official records of the General Conference of UNESCO*, 16th and 17th sessions.

well as scientific collections and important collections of books or archives or of reproductions of the property defined above;

b) buildings whose main and effective purpose is to preserve or exhibit the movable cultural property defined in sub-paragraph a) such as museums, large libraries and depositories of archives, and refuges intended to shelter, in the event of armed conflict, the movable cultural property defined in sub-paragraph a);

c) centres containing a large amount of cultural property as defined in sub-paragraphs a) and b), to be known as ‘centres containing monuments’.”

Places of worship

4839 The article includes a reference to places of worship. Although some delegations wished all places of worship to be covered,¹⁶ only the most important “which constitute the cultural or spiritual heritage of peoples” are actually included. These are places which have a spiritual importance independently of their cultural significance, and express the belief of a people.¹⁷

Cultural and spiritual heritage

4840 The “cultural and spiritual heritage of peoples” means those objects of which the importance transcends national borders and which are unique due to their relation to the history and culture of a people.¹⁸

4841 The original proposal referred to the heritage of a country, but it was considered better to use the term heritage “of peoples”, since problems of intolerance could arise with respect to religions which do not belong to the country concerned, and with respect to places where such religions are practised.

4842 The clause “which constitute the cultural or spiritual heritage of peoples” is intended to clarify the expressions “historic monuments, works of art or places of worship”, and refers to all three.¹⁹

4843 In general the adjective “spiritual” applies to places of worship, but it may be that a historic monument or work of art is attributed spiritual importance in the sense that it contributes to spiritual life. Similarly, a religious building may be of cultural value.

4844 The above-mentioned Article 1 of the Hague Convention refers to property which is “of great importance to the cultural heritage of every people”, while the Protocol refers to objects “which constitute the cultural or spiritual heritage of peoples”. It does not seem that these expressions have a different meaning. However, the reference to places of worship and to the spiritual heritage makes

¹⁶ See *O.R. XV*, p. 395, CDDH/236/Rev.1, para. 62.

¹⁷ In this context the term “people” refers to a cultural concept. For the legal concept of “people”, see commentary Art. 1, para. 4, Protocol I, *supra*, p. 41.

¹⁸ *O.R. XV*, p. 220, CDDH/III/SR.59, para. 68.

¹⁹ *Ibid.*, p. 111, CDDH/III/SR.49, para. 17.

the definition of protected objects more precise by introducing the criterion of spirituality. Furthermore, it follows from the text and the debates that the Conference intended to protect in particular the most important objects, a category akin to property granted special protection as provided in Article 8 of the Hague Convention. The fact that the text does not allow for any possibility of derogation also seems to suggest this.

The scope of the rule of protection

4845 Protection of cultural objects and places of worship is achieved by means of two complementary rules, each involving a prohibition:

- 1) it is prohibited to commit “any acts of hostility directed against”. An act of hostility means any act related to the conflict which prejudices or may prejudice the physical integrity of protected objects. In fact, the article does not only prohibit the bringing about of deleterious effects as such, but any acts *directed* against protected objects. Thus it is not necessary for there to be any damage for this provision to be violated;²⁰
- 2) it is prohibited to use protected objects in support of the military effort.

4846 “Military effort” means any military activities undertaken for the conduct of hostilities. The second prohibition is the counterpart of the first, indispensable to ensure respect for this rule. If such objects were used in support of the military effort, they could become military objectives, assuming that their total or partial destruction offered the adversary a specific military advantage, and as a result their protection would become illusory. In such a situation the question is if and exactly at what moment there is a right to attack such protected objects in the event that the second prohibition is not respected. Such a possibility should not be accepted without duly taking into account the fact that the objects concerned are of exceptional interest and universal value. All possible measures should be taken to endeavour putting a stop to any use in support of the military effort (by giving due warnings, for example) in order to prevent the objects from being destroyed or damaged. In any case this is the spirit of the provision: it is an invitation to safeguard the heritage of mankind.

S.J.

²⁰ On this point see also commentary Art. 53, sub-para. (a), Protocol I, *supra*, p. 647.

Article 17 – Prohibition of forced movement of civilians

1. The displacement of the civilian population shall not be ordered for reasons related to the conflict unless the security of the civilians involved or imperative military reasons so demand. Should such displacements have to be carried out, all possible measures shall be taken in order that the civilian population may be received under satisfactory conditions of shelter, hygiene, health, safety and nutrition.
2. Civilians shall not be compelled to leave their own territory for reasons connected with the conflict.

Commentary

General remarks

- 4847 The prohibition of forced movement is an important element in the protection of the civilian population. In fact, such displacements are all too often considered as measures falling within the range of military operations, and all too often

civilians are uprooted from their homes and forced to live in difficult or even quite unacceptable conditions.

4848 The problem was raised in 1949. In fact, Article 49 of the Fourth Convention already laid down some norms as protection against deportations, transfers and evacuations in or from occupied territories, and it was not considered necessary to supplement these rules in Protocol I.

4849 However common Article 3 is silent on this matter.¹ And yet the problem is particularly acute in situations of non-international armed conflict in which there have been cases, for example, of the forced movement of ethnic groups and national groups opposed to the central government.

4850 Article 17 serves to fill this gap in the protection. The ICRC introduced this provision in its draft; it was based on a proposal put forward by experts in 1972 and inspired by the wording of Article 49 of the Fourth Convention.² The text which was adopted, with a few additions, has the same tenor as the original draft.³

4851 It should be noted that the present article only covers forced movement and does not, of course, restrict the right of civilians to move about freely within the country, subject to any restrictions that may be imposed by the circumstances, or to go abroad.⁴

Paragraph 1

4852 This paragraph covers displacements of the civilian population as individuals or in groups within the territory of a Contracting Party where a conflict, within the meaning of Article 1 (*Material field of application*), is taking place. Forced movement beyond the national boundaries is dealt with in paragraph 2.

First sentence

4853 This sentence prohibits the forced displacement of the civilian population, except in exceptional circumstances of two kinds:

- 1) The security of the civilian population. It is self-evident that a displacement designed to prevent the population from being exposed to grave danger cannot be expressly prohibited.
- 2) Imperative military reasons. Military necessity as a ground for derogation from a rule always requires the most meticulous assessment of the circumstances. In this case, military necessity is qualified by referring to

¹ Although common Art. 3 is silent on the question of transfers as such, it does prohibit inhumane and degrading treatment.

² See *CE 1972, Report*, Vol. II, p. 50, CE/COM II/85, and Art. 49, paras. 1-3, Fourth Convention. See also Resolution 2675 (XXV) of the United Nations General Assembly, Principle 7.

³ Draft Art. 29.

⁴ *O.R. XIV*, p. 224, CDDH/III/SR.24, para. 46.

“imperative military reasons”; Article 49 of the Fourth Convention also refers to “imperative military reasons”. The French text uses a slightly different expression: “impérieuses raisons” while the Spanish text uses here the expression “razones imperiosas”. All these terms mean the same thing. The situation should be scrutinized most carefully as the adjective “imperative” reduces to a minimum cases in which displacement may be ordered.

4854 Clearly, imperative military reasons cannot be justified by political motives. For example, it would be prohibited to move a population in order to exercise more effective control over a dissident ethnic group.

4855 The article prohibits forced movements “for reasons related to the conflict”. In fact, displacement may prove to be necessary in certain cases of epidemics or natural disasters such as floods or earthquakes. Such circumstances are not covered by Article 17, and this clarification was included in the text for that reason.⁵

Second sentence

4856 In accordance with this paragraph, forced movements must remain exceptional and be limited to cases where it is required by the security of the civilian population or imperative military reasons. In such cases “all possible measures shall be taken in order that the civilian population may be received under satisfactory conditions of shelter, hygiene, health, safety and nutrition”. Obviously the same conditions should apply to the movement itself. These practical points are aimed at guaranteeing the displaced population with decent living conditions. They are based on Article 49, paragraph 3, of the Fourth Convention. Security conditions are related to the location of camps intended for accommodating the population; they should not be situated in the vicinity of military operations and military objectives.⁶

4857 Like Article 49 of the Fourth Convention, Article 17 emphasizes that all possible measures must be taken. The reference to “all possible measures” takes into account the fact that there might be practical difficulties, but even so it should not serve to reduce the effect of the obligation in any way. It is essentially concerned with cases where evacuation may have to be improvised on short notice and where urgency is essential in order to protect the population against imminent and unforeseen dangers.⁷

Paragraph 2

4858 This paragraph prohibits compelling civilians to leave their own country for reasons connected with the conflict.

⁵ O.R. XV, p. 295, CDDH/215/Rev.1, paras. 149-150.

⁶ O.R. XIV, p. 224, CDDH/III/SR.24, paras. 44-47. On the concept of military objectives, see Art. 52, para. 2, of Protocol I, and the commentary thereon, *supra*, p. 635.

⁷ See *Commentary IV*, p. 281 (Art. 49).

- 4859** First, there is a question whether, within the meaning of this provision, the term “territory” is equivalent to country. The ICRC draft referred to “national territory”.⁸ Some amendments proposed substituting the formula “across the frontiers of the country of origin”.⁹ It is clear that there was never any doubt in anyone’s mind that the phrase was intended to refer to the whole of the territory of a country. However, the text states that it is prohibited to compel civilians to leave “their own territory”. In fact, this formula appears to be better suited to all the possible cases which might arise in a situation covered by Protocol II, and to take into account, in particular, situations where the insurgent party is in control of an extensive part of the territory. In this case the insurgents, too, should respect the obligation laid down here, and not compel civilians to leave the area under their authority.¹⁰
- 4860** The prohibition covers measures taken against civilians, either individually or in groups.
- 4861** An example would be expulsion of groups of civilians across the boundaries by armed forces or armed groups because of military operations. Basically these are the kind of cases that the Conference intended to cover.
- 4862** The problem may prove to be more complex in individual cases. In our view, to get one or more people to leave the country by means of threats should also be considered as forced movement.
- 4863** What is the position as regards deportation measures obliging an individual to leave his country?
- 4864** If such a measure arises from the situation of conflict, it constitutes forced movement within the meaning of this article; however, this conclusion is not without possible exceptions as, for example, a sentence following conviction giving the option to leave the territory, might not be considered as such.
- 4865** If the conviction is not related to the conflict, it is clear that that measure is not covered by the article under consideration here.
- 4866** Some delegations preferred to include explicit exceptions, but these were not adopted for the sake of simplification of the text.¹¹
- 4867** In specific cases each Contracting Party will probably seek an interpretation related to already existing national legislation on this subject, without losing sight of the humanitarian aim of the obligation imposed upon it by this article.
- 4868** Finally, it should be noted that national legislation concerning aliens is not affected by this provision.¹²

Protocol II

Article 18 – Relief societies and relief actions

1. Relief societies located in the territory of the High Contracting Party, such as Red Cross (Red Crescent, Red Lion and Sun) organizations, may offer their services for the performance of their traditional functions in relation to the victims of the armed conflict. The civilian population may, even on its own initiative, offer to collect and care for the wounded, sick and shipwrecked.
2. If the civilian population is suffering undue hardship owing to a lack of the supplies essential for its survival, such as foodstuffs and medical supplies, relief actions for the civilian population which are of an exclusively humanitarian and impartial nature and which are conducted without any adverse distinction shall be undertaken subject to the consent of the High Contracting Party concerned.

Commentary

Historical background and general remarks

4869 Article 18 is aimed at permitting and facilitating humanitarian activities in non-international armed conflicts for the purpose of assisting victims wherever they are and assuring them the protection to which they are entitled. Common Article 3 does not mention relief actions, and this gap has often been apparent in practice: for this reason the ICRC and the Red Cross Movement as a whole have wished to remedy it for a long time.¹ In 1957 the XIXth International Conference of the Red Cross had already adopted a resolution aimed at supplementing common Article 3 in the field of medical assistance.²

4870 In 1969 the XXIst International Conference of the Red Cross adopted a resolution entitled “Declaration of Principles for International Humanitarian Relief the Civilian Populations in Disaster Situations”.³ No distinction was made between international and non-international armed conflicts, and States were

“requested to exercise their sovereign and other legal rights so as to facilitate the transit, admission and distribution of relief supplies provided by impartial international humanitarian organizations for the benefit of civilian populations in disaster areas when disaster situations imperil the life and welfare of such populations”.⁴

Subsequently the United Nations General Assembly indicated that this statement was also applicable in situations of armed conflict.⁵ Although the suffering and the needs of civilian populations are much the same, irrespective of the type of conflict, the legal framework for organizing relief actions is much more difficult to set up in case of internal armed conflict. During the Diplomatic Conference, States in many cases showed themselves to be more concerned with preserving their national sovereignty than with undertaking to facilitate relief actions in all circumstances. This concern resulted in the adoption of a single provision with regard to assistance and relief: Article 18, which merely sets out the fundamental principles on which relief actions are based, without elaborating in any detail how they are to be implemented. The article lays down the conditions under which

¹ *CE 1972, Report*, Vol. I, p. 57, para. 2.23.

³ Resolution XXVI, XXIst International Conference of the Red Cross, Istanbul, 1969, *International Red Cross Handbook*, *op. cit.*, 12th ed., p. 661. See also introduction to Part IV, Section II, Protocol I.

⁴ Resolution XXVI, sub-para. (5), XXIst Conference, Istanbul, 1969.

⁵ Resolution 2675 (XXV) of the United Nations, Principle 8: “The provision of international relief to civilian populations is in conformity with the humanitarian principles of the Charter of the United Nations, the Universal Declaration of Human Rights and other international instruments in the field of human rights. The Declaration of Principles for International Humanitarian Relief to the Civilian Population in Disaster Situations, as laid down in Resolution XXVI adopted by the twenty-first International Conference of the Red Cross, shall apply in situations of armed conflict, and all parties to a conflict should make every effort to facilitate this application.”

victims of conflicts may be assisted and protected while giving States every guarantee of non-intervention; it consists of two paragraphs which each have a separate scope and purpose though they complement each other. Paragraph 1 deals with humanitarian assistance within the frontiers of the State in whose territory the armed conflict is taking place, while paragraph 2 provides for the possibility of organizing international relief actions there.⁶

Paragraph 1 – Activities of relief societies

4871 The whole of this provision is based on the principle that States are primarily responsible for organizing relief. Relief societies such as the Red Cross and Red Crescent organizations⁷ are called upon to play an auxiliary role by assisting the authorities in their task.

4872 The term “relief society” should be understood in its traditional broad sense.⁸ The Red Cross Movement, while playing a role of prime importance, does not have a monopoly on humanitarian activities, and there are other organizations capable of providing effective assistance.⁹

4873 As regards the activities of the Red Cross, it has proved particularly important to ensure the continuity of activities during a conflict so that assistance may be available to victims wherever they are. Article 63 of the Fourth Convention already met this concern in occupied territories.¹⁰ In a non-international armed conflict the central organization may be paralysed as a result of hostilities and local sections must be able to act independently when necessary. It was for this reason that the term “Red Cross organizations” was chosen, as it covers not only National Society in a narrow sense, but also its divisions, which may be located in part of the territory under the control of the adverse party. The same term also covers the case of a “Red Cross Society” set up during the hostilities which, while not recognized as such, nevertheless acts in accordance with the fundamental principles of the Red Cross as laid down by the International Conferences of the Red Cross.¹¹

⁶ In Protocol I, these rules are developed in the following Articles: Art. 17: Role of the civilian population and of aid societies, Art. 70: Relief actions and Art. 81: Activities of the Red Cross and other humanitarian organizations, *supra*, pp. 209, 815 and 935.

⁷ On the name and the emblem of the red lion and sun, *cf. supra*, commentary Art. 9, note 10, p. 1419.

⁸ The term “relief societies” originated in the Hague Regulations of 1899 Respecting the Laws and Customs of War on Land (Art. 15). It was used in the 1907 Regulations, and again in all the Geneva Conventions (1906: Art. 10; 1929: Art. 10; 1949: Arts. 18 and 26 of the First Convention, for example).

⁹ See *Commentary I*, p. 225 (Art. 26).

¹⁰ See *Commentary IV*, p. 330 (Art. 63).

¹¹ See *O.R.* pp. 348-354, CDDH/II/SR.88, paras. 24-50.

Role of the civilian population

4874 This paragraph provides *in fine* for the role which may be played by the civilian population by collecting and caring for the wounded, sick and shipwrecked.¹² This idea, which is new in the regulation of non-international armed conflict, actually follows from the original tenets of humanitarian law; the original Convention of 1864 already provided that “inhabitants of the country who bring help to the wounded shall be respected and shall remain free”.¹³

4875 Article 18, paragraph 2, of the First Convention of 1949, provides that:

“The military authorities shall permit the inhabitants and relief societies, even in invaded or occupied areas, spontaneously to collect and care for wounded or sick of whatever nationality.”

The phrase “collect and care for” was retained in Protocol II, and has kept the same meaning.¹⁴

4876 However, this article does not go as far as the Conventions, as it merely authorizes the civilian population to offer its services on its own initiative, and allows the authorities the possibility of declining such an offer. As drafted, the same restriction applies to the first sentence as regards activities of relief societies. This was a last minute reticence, as the draft put forward by the Committees of the Conference provided that the civilian population and relief societies “shall be permitted [...] to care for”.¹⁵ However, this wording should have no detrimental effect if the parties to the conflict fulfil their obligations. In fact, all possible measures must be taken to search, collect and care for the wounded, sick and shipwrecked;¹⁶ it is clear therefore that the authorities cannot arbitrarily refuse offers of assistance from relief societies and the civilian population in the face of urgent needs. It is also clear – though perhaps a reminder is in order – that the civilian population, whether or not directly participating in helping victims, must in all circumstances respect the wounded, sick and shipwrecked of either party.¹⁷

Paragraph 2 – International relief actions

4877 This paragraph lays down the principle that international relief actions should be undertaken in cases where “the civilian population is suffering undue hardship owing to a lack of the supplies essential for its survival”.

¹² Originally the role of the civilian population was dealt with in a separate article in the draft (Art. 14); it was subsequently incorporated into Art. 18 of Protocol II; see *O.R.* XIII, p. 194, CDDH/221/Rev.1, and *O.R.* IV, p. 51, CDDH/427.

¹³ Geneva Convention of 22 August 1864 for the Amelioration of the Condition of the Wounded in Armies in the Field, Art. 5, para. 1.

¹⁴ The words “care for” implies “leaving the inhabitants completely free to undertake the entire treatment of a wounded or sick person until the time of his final recovery, if they wish to do so and possess the necessary means”. “To ‘collect’ a wounded man is to receive him into one’s house. But it may also mean to bring him in from where he is lying wounded.” *Commentary I*, p. 187 (Art. 18).

¹⁵ *O.R.* XIII, p. 194, CDDH/221/Rev.1.

¹⁶ Art. 7: Protection and care, and Art. 8: Search, see *supra*, pp. 1407 and 1413.

¹⁷ Art. 7, para. 1.

- 4878 Such external aid is complementary; it is only provided when the responsible authorities can no longer meet the basic necessities of the civilian population whose survival is in jeopardy.
- 4879 What is meant in particular is relief actions which may be undertaken by the ICRC or any other impartial humanitarian organization.
- 4880 The beneficiaries of such actions are civilians. The civilian population means all persons who do not or no longer participate in hostilities, including those deprived of their liberty for having committed an act related to the conflict. For that matter, Protocol II expressly recognizes the right of persons deprived of their liberty to receive relief.¹⁸
- 4881 Clearly it is not possible to draw up an exhaustive list of criteria to determine at what point the population is suffering “undue hardship”, but it is appropriate to take into account the usual standard of living of the population concerned and the needs provoked by hostilities,¹⁹ particularly medical requirements which are covered by the very general term “medical supplies”. In such circumstances consignments of relief are essential.
- 4882 International relief actions are based on fundamental conditions which provide every guarantee of non-intervention: i.e., that they are “of an exclusively humanitarian and impartial nature and [...] are conducted without any adverse distinction”.²⁰
- 4883 When these two conditions are fulfilled, relief actions “shall be undertaken subject to the consent of the High Contracting Party concerned”.
- 4884 In principle the “High Contracting Party concerned” means the government in power. In exceptional cases when it is not possible to determine which are the authorities concerned, consent is to be presumed in view of the fact that assistance for the victims is of paramount importance and should not suffer any delay.
- 4885 The fact that consent is required does not mean that the decision is left to the discretion of the parties. If the survival of the population is threatened and a humanitarian organization fulfilling the required conditions of impartiality and non-discrimination is able to remedy this situation, relief actions must take place. In fact, they are the only way of combating starvation when local resources have been exhausted. The authorities responsible for safeguarding the population in the whole of the territory of the State cannot refuse such relief without good grounds. Such a refusal would be equivalent to a violation of the rule prohibiting the use of starvation as a method of combat as the population would be left deliberately to die of hunger without any measures being taken. Consequently this would be a violation of Article 14 of the Protocol (*Protection of objects indispensable to the survival of the civilian population*).²¹

¹⁸ Art. 5, para. 1(c), *supra*, p. 1388.

¹⁹ See *Commentary Drafts*, p. 166.

²⁰ For the interpretation of this term see commentary Art. 70, Protocol I, *supra*, p. 815. It should be noted that a general guarantee of non-interference is explicitly laid down in Art. 3, para. 2, of Protocol II, which reads as follows: “Nothing in this Protocol shall be invoked as a justification for intervening, directly or indirectly, for any reason whatever, in the armed conflict or in the internal or external affairs of the High Contracting Party in the territory of which that conflict occurs.”; see *supra*, p. 1363.

²¹ See the commentary on the article, *supra*, p. 1455.

- 4886** Moreover, it should be noted that this provision requires that relief actions “shall be undertaken”. The use of the future tense implies an obligation which appears also in other versions of the text, for example, the French one: “seront entreprises”.
- 4887** If relief actions were carried out with great care and precision as to technical detail, it may be possible to overcome political or security objections which might be raised. The actions would have to strictly comply with any conditions that might be imposed (examples: arrangement of transits in accordance with a precise timetable and itinerary, checking on convoys).
- 4888** Implementation in such a way would serve to clearly establish responsibilities. Once relief actions are accepted in principle, the authorities are under an obligation to co-operate, in particular by facilitating the rapid transit of relief consignments and by ensuring the safety of convoys.
- 4889** In return, assistance by a humanitarian organization provides some important guarantees, for such organizations are run in such a way as to undertake and share responsibilities with the authorities at various levels:
- 1) *Vis-à-vis the victims*:
The humanitarian organization ensures that the assistance goes only to the beneficiaries, giving priority to the most vulnerable among them (women, children etc.). Professional methods and experience are valuable aids (for example, supervision of the distribution by means of marking recipients’ hands with indelible ink).
 - 2) *Vis-à-vis the authorities themselves*:
The humanitarian organization guarantees that there will be no illegal traffic and the authorities control its activities.
 - 3) *Vis-à-vis the donors*:
The humanitarian organization is in a position to give guarantees to those providing the relief that consignments will not serve any other purposes than those for which they are intended; its presence and its action, for which it must render accounts, will vouch for that.
- 4890** Such a guarantee of the proper use of relief is likely to enable the authorities to get more support from the international community.
- 4891** Article 18, paragraph 2, does not in any way reduce the ICRC’s right of initiative, as laid down in common Article 3²² since the conditions of application of the latter remain unchanged.²³
- 4892** Consequently the ICRC continues to be entitled to offer its services to each party without such a step being considered as interference in the internal affairs of the State or as infringing its sovereignty, whether or not the offer is accepted.
- 4893** In a case where the Protocol were no longer applied, the ICRC, by the very nature of the mandate entrusted to it by the international community, would have

²² “An impartial humanitarian body, such as the International Committee of the Red Cross, may offer its services to the Parties to the conflict.” (para. 2).

²³ Art. 1, para. 1; see commentary Art. 1, *supra*, p. 1347.

to do all it could to ensure that the general principles of humanitarian law were safeguarded.

4894 With a view to the interests of victims it could undertake a relief action to assist them, wherever they are, while fully meeting its responsibilities, in particular as regards impartiality and non-discrimination.

Introduction

Purpose and content

4895 The purpose of this Part is to lay down rules on the way in which States may express their will to be bound by the Protocol (Article 20 – *Signature*, Article 21 – *Ratification*, Article 22 – *Accession*), and on the way in which they are bound by this instrument (Article 23 – *Entry into force*, Article 24 – *Amendment*, Article 25 – *Denunciation*), on formalities of notification and registration (Articles 26 – *Notifications* and 27 – *Registration*) and on authentic texts (Article 28 – *Authentic texts*).¹ In addition, it lays down the principle that the Protocol has to be disseminated, in Article 19 (*Dissemination*). With the exception of the two provisions relating to dissemination and denunciation,² these are formal matters which are resolved and formulated in the same way as in Protocol I, and the ICRC draft was adopted without modifications.

* However, the commentary on Art. 19 includes some references to the relevant documents.

¹ *O.R.* IX, p. 356, CDDH/I/SR.67, para. 8.

² See *infra*, pp. 1487 and 1501.

A brief historical note

4896 To a large extent the drawing up of the draft took into account the Vienna Convention on the Law of Treaties. The ICRC was guided, in particular, by the work of the International Law Commission of the United Nations in the field of the codification and progressive development of the law of treaties.³

Adoption

4897 During the Diplomatic Conference the final clauses of the two Protocols were entrusted to Working Group C of Committee I. In view of the fact that the wording of the provisions is identical, the articles of Protocol II were adopted by consensus without any discussion, after the corresponding articles of Protocol I had been discussed, and these had not given rise to any great controversy either.⁴

4898 As these articles are identical as regards their substance and structure, no separate commentary is necessary for Protocol II; therefore the reader is referred to the commentary on Articles 92 (*Signature*), 93 (*Ratification*), 94 (*Accession*), 95 (*Entry into force*), 97 (*Amendment*), 100 (*Notifications*), 101 (*Registration*) and 102 (*Authentic texts*) of Protocol I, which also applies for the corresponding final provisions of Protocol II.

4899 On the other hand, Article 19 (*Dissemination*) and Article 25 (*Denunciation*) are different, and therefore require a separate commentary.

Dissemination

4900 Strictly speaking, Article 19 (*Dissemination*) is not a final provision, but rather a measure of implementation. The draft contained a part specifically devoted to execution.⁵ Only the article concerning dissemination was retained in the final version of the Protocol. Therefore the Part, having lost its purpose, disappeared, and the one provision retained was included in Part V, “Final Provisions”. This simplification did not have any effect on the substance. In fact, it was provided, first of all, that parties to the conflict should take measures to ensure observance of the Protocol;⁶ that obligation follows in any case from Article 1 (*Material field of application*), paragraph 1, of the Protocol. Next, this Part contained two reminders: on the one hand, the possibility parties had to conclude special agreements,⁷ and on the other, the possibility of inviting an impartial

³ See United Nations, *United Nations Conference on the Law of Treaties, Official Records*, 1st and 2nd sessions, New York, 1971. This work also contains draft articles on the law of treaties with comments adopted by the International Law Commission at its 18th session. Cf. also *Commentary Drafts*, p. 171 and note 20 (Part VIII).

⁴ *O.R.* IX, p. 475, CDDH/I/SR.76, para. 8; *O.R.* X, pp. 202-205, CDDH/405/Rev.1, paras. 131-157.

⁵ Part VII of the draft (Execution of the present Protocol), Arts. 36-39.

⁶ Draft Art. 36 (Measures for execution).

⁷ *Ibid.*, Art. 38 (Special agreements).

humanitarian organization such as the ICRC to co-operate in the observance of the provisions of the Protocol.⁸ These two rules are already contained in common Article 3, and consequently also apply for Protocol II.⁹

Denunciation provision

4901 The ICRC did not consider it necessary to include a denunciation provision in the draft of Protocol II. Working Group C of Committee I submitted a proposal¹⁰ from a concern to maintain symmetry with Protocol I. This was adopted by consensus and constitutes the present Article 25 (*Denunciation*).¹¹ In this respect it should be noted that there is an omission in Articles 26 (*Notifications*) and 27 (*Registration*), as these do not mention notification of denunciation to Parties to the Conventions and to the Secretariat of the United Nations. As that article was adopted in Committee before the proposal to include a provision on denunciation was submitted, this was probably merely a technical error.

Reservations

4902 As in Protocol I, Protocol II does not contain a special provision concerning the possibility of making reservations. This consequently remains subject to the law of treaties. On this point, reference may also be made to the commentary on Protocol I.¹²

Commentary

- 4903 Dissemination is a legal obligation under the Conventions,¹ reaffirmed and developed in the Protocols. It is based on the obligation undertaken by States when ratifying or acceding to the Conventions to “respect and to ensure respect [...] in all circumstances”, which also applies to common Article 3.²
- 4904 However, we are concerned here with the first express mention of this obligation in the regulation of non-international armed conflicts. Protocol II develops and supplements common Article 3,³ so that dissemination of the one is inextricably bound up with dissemination of the other.

¹ Art. 47/48/127/144 of the Conventions.

² Common Article 1 of the Conventions.

³ See Art. 1, para. 1, Protocol II, and the commentary thereon, *supra*, p. 1350.

- 4905 The ICRC draft⁴ laid down more detailed measures by making a distinction between dissemination which should be implemented in time of peace and that required in time of armed conflict, and also according to whether it was intended for the armed forces or for civilians. Similar indications are given in the corresponding Article 83 of Protocol I (*Dissemination*). Only the brief wording of the article under consideration here was retained. It merely lays down an obligation in general, without specifying what it entails.
- 4906 Dissemination should be carried out as widely as possible. The choice of means is left to the Contracting Party or to the parties to the conflict. Some delegations argued that an unduly detailed provision could produce difficulties for States,⁵ particularly as regards implementation in time of armed conflict.
- 4907 Dissemination plays two important roles which are emphasized in Resolution 21 relating to this subject, adopted at the end of the Diplomatic Conference; on the one hand, knowledge of the law is a factor for the effective application of the law, on the other, it is a factor for engendering a spirit of peace.
- 4908 There is no mechanism in Protocol II designed to guarantee its application such as that of Protecting Powers or their substitute.⁶ Therefore dissemination is *a fortiori* an essential measure of application.⁷ In fact, the ICRC had included it in Part VII of its draft on measures for execution of the Protocol.⁸
- 4909 It is self-evident that in time of peace the obligation falls on the Contracting Party. In case of an armed conflict which meets the criteria of Article 1 of the Protocol (*Material field of application*), it will be up to both the government authorities and those responsible in the insurgent party, to take all necessary measures for disseminating the contents of the instrument to those carrying responsibility under their authority, military personnel as well as civilians.
- 4910 A law that is not known cannot be applied, but a knowledge of the law should not be restricted to situations of conflict, for over and above rules of law, it is a matter of inculcating moral principles with a view to limiting violence and preserving peace. Thus dissemination should properly be seen in its context; it is fully recognized by the United Nations as an integral part of education aimed at preserving world peace by promoting “understanding, tolerance and friendship among all nations”, in accordance with the Universal Declaration of Human Rights.⁹
- 4911 At a practical level, it may at first sight seem difficult for a State to disseminate rules applicable in a potential situation of non-international armed conflict. However, hope of getting protection under Protocol II cannot in itself prompt a Party to initiate such a conflict; the deep-rooted reasons that could give rise to such conflicts are of quite a different nature.¹⁰

⁴ Draft Art. 37.

⁵ *O.R. IX*, p. 243, CDDH/I/SR.59, para. 39.

⁶ However, it should be recalled that an impartial humanitarian organization such as the ICRC may assist in supervising the application of common Article 3 (under the terms of its paragraph 2) and of the Protocol. See introduction to Part I, *supra*, p. 1343.

⁷ See *O.R. IX*, p. 241, CDDH/I/SR.59, para. 30.

⁸ In the end the Part “Execution of the present Protocol” (Arts. 36-39 of the draft) was not adopted as such. On this point, see introduction to Part V, *supra*, p. 1483.

⁹ Universal Declaration of Human Rights, Art. 26, para. 2.

¹⁰ *O.R. IX*, p. 242, CDDH/I/SR.59, para. 33.

- 4912 However, it should especially be recalled that the philosophy and principles of humanitarian law remain the same whatever the nature of the conflict. The same is true for instruction. For example, in military training programmes the behaviour which soldiers should be taught such as respect for and protection of enemies *hors de combat*, the wounded and civilians, are exactly the same. In academic fields, instruction in the law of armed conflict, as urged by the United Nations,¹¹ follows naturally from the teaching of human rights, both being systems of law protecting human beings in specific circumstances. These two bodies of law are already being taught in certain institutions under a single integrated programme.¹²
- 4913 Brief though Article 19 is, its adoption represents a significant development. It intimates that the purely humanitarian quality of the rules governing non-international armed conflicts is recognized, and that disseminating them contributes to creating a spirit of peace without in any way acting as an incitement to rebellion.¹³

S.J.

¹³ See also commentary Art. 83, Protocol I, *supra*, p. 959.

Protocol II

Article 20 – Signature

This Protocol shall be open for signature by the Parties to the Conventions six months after the signing of the Final Act and will remain open for a period of twelve months.

4914 Cf. references and introduction to this Part, *supra*, p. 1483 and the commentary on Article 92 of Protocol I, *supra*, p. 1067.

Protocol II

Article 21 – Ratification

This Protocol shall be ratified as soon as possible. The instruments of ratification shall be deposited with the Swiss Federal Council, depositary of the Conventions.

4915 *Cf.* references and introduction to this Part, *supra*, p. 1483 and the commentary on Article 93 of Protocol I, *supra*, p. 1071.

Protocol II

Article 22 – Accession

This Protocol shall be open for accession by any Party to the Conventions which has not signed it. The instruments of accession shall be deposited with the depositary.

4916 *Cf.* references and introduction to this Part, *supra*, p. 1483 and the commentary on Article 94 of Protocol I, *supra*, p. 1075.

Protocol II

Article 23 – Entry into force

1. This Protocol shall enter into force six months after two instruments of ratification or accession have been deposited.
2. For each Party to the Conventions thereafter ratifying or acceding to this Protocol, it shall enter into force six months after the deposit by such Party of its instrument of ratification or accession.

4917 *Cf.* references and introduction to this Part, *supra*, p. 1483 and the commentary on Article 95 of Protocol I, *supra*, p. 1079.

Protocol II

Article 24 – Amendment

1. Any High Contracting Party may propose amendments to this Protocol. The text of any proposed amendment shall be communicated to the depositary which shall decide, after consultation with all the High Contracting Parties and the International Committee of the Red Cross, whether a conference should be convened to consider the proposed amendment.
2. The depositary shall invite to that conference all the High Contracting Parties as well as the Parties to the Conventions, whether or not they are signatories of this Protocol.

4918 Cf. references and introduction to this Part, *supra*, p. 1483 and the commentary on Article 97 of Protocol I, *supra*, p. 1093.

Article 25 – Denunciation

1. In case a High Contracting Party should denounce this Protocol, the denunciation shall only take effect six months after receipt of the instrument of denunciation. If, however, on the expiry of six months, the denouncing Party is engaged in the situation referred to in Article 1, the denunciation shall not take effect before the end of the armed conflict. Persons who have been deprived of liberty, or whose liberty has been restricted, for reasons related to the conflict shall nevertheless continue to benefit from the provisions of this Protocol until their final release.
2. The denunciation shall be notified in writing to the depositary, which shall transmit it to all the High Contracting Parties.

Commentary

General remarks

- 4919 This provision is based on a proposal of Working Group C of Committee I. It was not contained in the ICRC draft.¹ It was adopted by consensus and became the present Article 25.²
- 4920 This is a simplified version of Article 99 of Protocol I (*Denunciation*) adapted for the special context of situations of non-international armed conflicts. The Conventions all have a provision on denunciation³ and therefore it was considered logical for Protocol I, which supplements and develops them, to also contain such a right.⁴ On the other hand, the ICRC draft did not contain a denunciation provision for Protocol II. This approach was based on the fact that the instrument would only be applied in the territory of one High Contracting Party and would not concern relations between States. It seemed to the ICRC that a State which has undertaken to respect the fundamental humanitarian guarantees vis-à-vis its own nationals in the circumstances referred to in Article

¹ O.R. IV, p. 118, CDDH/I/350/Rev.1 (Art. 44 *bis*).

² O.R. IX, p. 475, CDDH/I/SR.76, para. 10.

³ Arts. 63/62/142/158 common to the Conventions.

⁴ *Commentary Drafts*, p. 108 (Art. 87).

1 of the Protocol (*Material field of application*) would have no reason at all to denounce such an instrument.

4921 In fact, it was from a concern to maintain uniformity with Protocol I that such a provision was incorporated in the final provisions of Protocol II. It is to note that up to now there has been no case of denunciation of the Conventions, which leads one to hope that the right to take such step will remain theoretical.

Paragraph 1

4922 This paragraph constitutes a recognition of the right to denounce the Protocol, while limiting the effects of such denunciation. It is a unilateral right of the High Contracting Party. The denunciation takes effect six months after notification in writing to the depositary in accordance with paragraph 2. This period is shorter than that of one year, adopted for the Conventions and for Protocol I. The Official Records do not give a reason for this difference. No doubt it should be seen as a reflection of the intention of the Conference to reserve a broad prerogative for States in their internal sphere.

4923 The effect of the denunciation is suspended when a Contracting Party is engaged in a situation referred to in Article 1 of the Protocol (*Material field of application*) at the time that it notifies its intent to denounce the Protocol or during the following six months.⁵ In such a case, despite the denunciation by the State concerned, the Protocol will continue to be applicable until “the end of the armed conflict”. This term should be understood in the same way as in Article 2 (*Personal field of application*), paragraph 2, i.e., the end of active hostilities, the point at which military operations on both sides cease.

4924 Moreover, those who are still deprived of their liberty or whose liberty is still restricted for reasons related to the armed conflict, continue to enjoy the protection of the Protocol until their final release. This measure is virtually the same as that laid down in Article 2 of the Protocol (*Personal field of application*).

4925 The reference to persons deprived of their liberty, or whose liberty has been restricted, covers everyone whose liberty is restricted in any way.⁶ Although the text does not specifically say so, the group of persons protected in this way includes those who are detained for reasons related to the conflict only at the end of hostilities, and not only those who had already been deprived of their liberty before and had not yet been released.⁷

4926 The provisions of the Protocol which such persons continue to enjoy are those of Part II (*Humane treatment*), viz., Article 4 (*Fundamental guarantees*), Article 5 (*Persons whose liberty has been restricted*) and Article 6 (*Penal prosecutions*).

⁵ Similarly, any denunciation of the Conventions would be kept in abeyance if the denouncing Party were in a situation as described in the common Articles 2 or 3 on the date when it denounces the Conventions, or at any time during the twelve months following that date (Arts. 63/62/142/158 common to the Conventions).

⁶ See Art. 2, para. 2, and Art. 5, para. 3, and the commentary thereon, *supra*, pp. 1360 and 1393.

⁷ See commentary Art. 2, para. 2, *supra*, p. 1360.

Paragraph 2

- 4927 Any denunciation, like ratification and accession, should be made by a notification in writing to the depositary, which shall transmit it to all the High Contracting Parties.
- 4928 Notification of a denunciation to the Parties to the Conventions and to the Secretariat of the United Nations is not provided for in Articles 26 (*Notifications*) and 27 (*Registration*).⁸ This omission should be considered as a technical error resulting from the fact that the denunciation provision under consideration here was adopted only after the above-mentioned articles.⁹
- 4929 Should the case ever arise, this omission should obviously be rectified and a notification made.

S.J.

⁸ Unlike the corresponding Articles 100 and 101 of Protocol I, *cf. supra*, p. 1113 and 1117.

⁹ See introduction to this Part, *supra*, p. 1483.

Protocol II

Article 26 – Notifications

The depositary shall inform the High Contracting Parties as well as the Parties to the Conventions, whether or not they are signatories of this Protocol, of:

- (a) signatures affixed to this Protocol and the deposit of instruments of ratification and accession under Articles 21 and 22;
- (b) the date of entry into force of this Protocol under Article 23; and
- (c) communications and declarations received under Article 24.

4930 *Cf.* references and introduction to this Part, *supra*, p. 1483 (in particular the paragraph under the heading of “denunciation provision”) and the commentary on Article 100 of Protocol I, *supra*, p. 1113.

Protocol II

Article 27 – Registration

1. After its entry into force, this Protocol shall be transmitted by the depositary to the Secretariat of the United Nations for registration and publication, in accordance with Article 102 of the Charter of the United Nations.
2. The depositary shall also inform the Secretariat of the United Nations of all ratifications and accessions received by it with respect to this Protocol.

4931 *Cf.* references and introduction to this Part, *supra*, p. 1483 (in particular the paragraph under the heading of “denunciation provision”) and the commentary on Article 101 of Protocol I, *supra*, p. 1117.

Protocol II

Article 28 – Authentic texts

The original of this Protocol, of which the Arabic, Chinese, English, French, Russian and Spanish texts are equally authentic shall be deposited with the depositary, which shall transmit certified true copies thereof to all the Parties to the Conventions.

4932 *Cf.* references and introduction to this Part, *supra*, p. 1483 and the commentary on Article 102 of Protocol I, *supra*, p. 1119.

Resolutions Adopted at the Fourth Session of the Diplomatic Conference (CDDH)* and Extracts from the Final Act

* Only Resolutions 17, 18, 19, 20, 21, 22 and 24 of the fourth session of the Conference are reproduced here. Those adopted during the first three sessions, and Resolution 23 adopted at the fourth, concern the work of the Conference and are not general in scope. For the text of all the Resolutions see *O.R.* I, Part I, p. 201 (4th session); Part II, p. 1 (for the 4 sessions).

RESOLUTION 17**Use of certain electronic and visual means of identification by medical aircraft protected under the Geneva Conventions of 1949 and under the Protocol Additional to the Geneva Conventions of 12 August 1949, and relating to the Protection of Victims of International Armed Conflicts (Protocol I)**

The Diplomatic Conference on the Reaffirmation and Development of International Humanitarian Law Applicable in Armed Conflicts, Geneva, 1974-1977,

Considering that:

- (a) in order to avoid their engagement by combatant forces there is an urgent need for both electronic and visual identification of medical aircraft in flight,
- (b) the Secondary Surveillance Radar (SSR) systems has the capability of providing unique identification of aircraft and of *en route* flight details,
- (c) the International Civil Aviation Organization is the most appropriate international body to designate SSR modes and codes in the range of circumstances envisaged,
- (d) this Conference has agreed to the use of a flashing blue light as a means of visual identification to be employed only by aircraft exclusively engaged in medical transport,¹

Recognizing that the designation in advance of an exclusive, world-wide SSR mode and code for the identification of medical aircraft may not be possible owing to the extensive deployment of the SSR system,

1. *Requests* the President of the Conference to transmit to the International Civil Aviation Organization this document, together with the attached documents of this Conference, inviting that Organization to:
 - (a) establish appropriate procedures for the designation, in case of an international armed conflict, of an exclusive SSR mode and code to be employed by medical aircraft concerned; and,
 - (b) note the agreement of this Conference to recognize the flashing blue light as a means of identification of medical aircraft, and provide for that use in the appropriate International Civil Aviation Organization documents;
2. *Urges* the Governments invited to the present Conference to lend their full co-operation to this endeavour in the consultative processes of the International Civil Aviation Organization.

*Fifty-fourth plenary meeting
7 June 1977*

¹ See Annex to this Resolution.

Annex**Articles 6 and 8 of the Regulations contained in Annex I to Protocol I***Article 6 – Light signal*

1. The light signal, consisting of a flashing blue light, is established for the use of medical aircraft to signal their identity. No other aircraft shall use this signal. The recommended blue colour is obtained by using, as trichromatic co-ordinates:

green boundary	$y = 0.065 + 0.805x$
white boundary	$y = 0.400 - x$
purple boundary	$x = 0.133 + 0.600y$

The recommended flashing rate of the blue light is between sixty and one hundred flashes per minute.
2. Medical aircraft should be equipped with such lights as may be necessary to make the light signal visible in as many directions as possible.
3. In the absence of a special agreement between the Parties to the conflict reserving the use of flashing blue lights for the identification of medical vehicles and medical ships and craft, the use of such signals for other vehicles or ships is not prohibited.

Article 8 – Electronic identification

1. The Secondary Surveillance Radar (SSR) system as specified in Annex 10 to the Chicago Convention on International Civil Aviation of 7 December 1944, as amended from time to time, may be used to identify and to follow the course of medical aircraft. The SSR mode and code to be reserved for the exclusive use of medical aircraft shall be established by the High Contracting Parties, the Parties to a conflict, or one of the Parties to a conflict, acting in agreement or alone, in accordance with procedures to be recommended by the International Civil Aviation Organization.
2. Parties to a conflict may, by special agreement between them, establish for their use a similar electronic system for the identification of medical vehicles and medical ships and craft.

RESOLUTION 18**Use of visual signalling for identification of medical transports protected under the Geneva Conventions of 1949 and under the Protocol Additional to the Geneva Conventions of 12 August 1949, and relating to the Protection of Victims of International Armed Conflicts (Protocol I)**

The Diplomatic Conference on the Reaffirmation and Development of International Humanitarian Law Applicable in Armed Conflicts, Geneva, 1974-1977,

Considering that:

- (a) in order to avoid attacks upon them there is a need for the improved visual identification of medical transports,
- (b) this Conference has agreed to the use of a flashing blue light as a means of visual identification to be employed only by aircraft exclusively engaged in medical transport,¹
- (c) by special agreement, Parties to a conflict may reserve the use of a flashing blue light for the identification of medical vehicles and medical ships and craft, but, in the absence of such agreement, the use of such signals for other vehicles or ships is not prohibited;
- (d) in addition to the distinctive emblem and the flashing blue light, other means of visual identification, such as signal flags and combinations of flares, may be used eventually to identify medical transports,
- (e) the Inter-Governmental Maritime Consultative Organization is the most appropriate international body to designate and promulgate visual signals to be employed within the maritime environment,

Having noted that, though the Geneva Conventions of 12 August 1949 recognize the use of the distinctive emblem to be flown by hospital ships and medical craft, this use is not reflected in relevant documents of the Inter-Governmental Maritime Consultative Organization,

1. *Request* the President of the Conference to transmit to the Inter-Governmental Maritime Consultative Organization this resolution, together with the documents of this Conference, inviting that Organization to:
 - (a) consider introduction into the appropriate documents, such as the International Code of Signals, the flashing blue light as described in Article 6 of Chapter III of the Regulations contained in Annex I to Protocol I;
 - (b) provide for recognition of the distinctive emblem in the appropriate documents (see Article 3 of Chapter II of the said Regulations);

¹ See Annex to this Resolution.

- (c) consider the establishment both of unique flag signals and of a flare combination, such as white-red-white, which might be used for additional or alternative visual identification of medical transports;
2. *Urges* the Governments invited to this Conference to lend their full cooperation to this endeavour in the consultative processes of the Inter-Governmental Maritime Consultative Organization.

*Fifty-fourth plenary meeting
7 June 1977*

Annex

Articles 3, 6, 10 and 11 of the Regulations contained in Annex I to Protocol I

Article 3 – Shape and nature

1. The distinctive emblem (red on a white ground) shall be as large as appropriate under the circumstances. For the shapes of the cross, the crescent or the lion and sun, the High Contracting Parties may be guided by the models shown in Figure 2.
2. At night or when visibility is reduced, the distinctive emblem may be lighted or illuminated; it may also be made of materials rendering it recognizable by technical means of detection.

Fig. 2: Distinctive emblems in red on a white ground

Article 6 – Light signal

1. The light signal, consisting of a flashing blue light, is established for the use of medical aircraft to signal their identity. No other aircraft shall use this signal. The recommended blue colour is obtained by using, as trichromatic co-ordinates:

green boundary $y = 0.065 + 0.805x$

white boundary $y = 0.400 - x$

purple boundary $x = 0.133 + 0.600y$

The recommended flashing rate of the blue light is between sixty and one hundred flashes per minute.

2. Medical aircraft should be equipped with such lights as may be necessary to make the light signal visible in as many directions as possible.
3. In the absence of a special agreement between the Parties to the conflict reserving the use of flashing blue lights for the identification of medical vehicles and ships and craft, the use of such signals for other vehicles or ships is not prohibited.

Article 10 – Use of international codes

Medical units and transports may also use the codes and signals laid down by the International Telecommunication Union, the International Civil Aviation Organization and the Inter-Governmental Maritime Consultative Organization. These codes and signals shall be used in accordance with the standards, practices and procedures established by these Organizations.

Article 11 – Other means of communication

When two-way radiocommunication is not possible, the signals provided for in the International Code of Signals adopted by the Inter-Governmental Maritime Consultative Organization or in the appropriate Annex to the Chicago Convention on International Civil Aviation of 7 December 1944, as amended from time to time, may be used.

RESOLUTION 19**Use of radiocommunications for announcing and identifying medical transports protected under the Geneva Conventions of 1949 and under the Protocol Additional to the Geneva Conventions of 12 August 1949, and relating to the Protection of Victims of International Armed Conflicts (Protocol I)**

The Diplomatic Conference on the Reaffirmation and Development of International Humanitarian Law Applicable in Armed Conflicts, Geneva, 1974-1977,

Considering that:

- (a) it is vital that distinctive and reliable communications be used for identifying, and announcing the movement of, medical transports,
- (b) adequate and appropriate consideration will be given to communications related to the movement of a medical transport only if it is identified by an internationally recognized priority signal such as "Red Cross", "Humanity", "Mercy" or other technically and phonetically recognizable term,
- (c) the wide range of circumstances under which a conflict may occur makes it impossible to select in advance suitable radio frequencies for communications,
- (d) the radio frequencies to be employed for communicating information relative to the identification and movement of medical transport must be made known to all parties who may use medical transports,

Having noted:

- (a) Recommendation No. 2 of the International Telecommunication Union (ITU) Plenipotentiary Conference, 1973, relating to the use of radiocommunications for announcing and identifying hospital ships and medical aircraft protected under the Geneva Conventions of 1949,
- (b) Recommendation No. Mar2-17 of the International Telecommunication Union World Maritime Administrative Radio Conference, Geneva, 1974, relating to the use of radiocommunications for marking, identifying, locating, and communicating with the means of transport protected under the Geneva Conventions of 12 August 1949, concerning the protection of war victims and any additional instruments of those conventions, as well as for ensuring the safety of ships and aircraft of States not Parties to an armed conflict;
- (c) the memorandum by the International Frequency Registration Board (IFRB), a permanent organ of the International Telecommunication Union (ITU), relating to the need for national co-ordination on radiocommunication matters;

Recognizing that:

- (a) – the designation and use of frequencies, including the use of distress frequencies,
 - operating procedures in the Mobile Service,

- the distress, alarm, urgency and safety signals, and
 - the order of priority of communications in the Mobile service
- are governed by the Radio Regulations annexed to the International Telecommunication Convention;
- (b) these Regulations may be revised only by a competent ITU World Administrative Radio Conference;
 - (c) the next competent World Administrative Radio Conference is planned for 1979 and that written proposals for the revision of the Radio Regulations should be submitted by Governments about one year before the opening of the Conference,
1. *Takes note with appreciation* that a specific item has been included on the agenda of the World Administrative Radio Conference, Geneva, 1979, which reads:
 - “2.6 to study the technical aspects of the use of radiocommunications for marking, identifying, locating and communicating with the means of medical transport protected under the 1949 Geneva Conventions and any additional instruments of these Conventions”;
 2. *Requests* the President of the Conference to transmit this document to all Governments and organizations invited to the present Conference, together with the attachments representing the requirements, both for radio frequencies and for international recognition of an appropriate priority signal, which must be satisfied in the proceedings of a competent World Administrative Radio Conference;¹
 3. *Urges* the Governments invited to the present Conference to make, as a matter of urgency, the appropriate preparations for the World Administrative Radio Conference to be held in 1979 so that the vital requirements of communications for protected medical transports in armed conflicts may be adequately provided for in the Radio Regulations.

Fifty-fourth plenary meeting
7 June 1977

¹ See Annex to this Resolution.

Annex**Articles 7, 8 and 9 of the Regulations contained in Annex I to Protocol I***Article 7 – Radio Signal*

1. The radio signal shall consist of a radiotelephonic or radiotelegraphic message preceded by a distinctive priority signal to be designated and approved by a World Administrative Radio Conference of the International Telecommunication Union. It shall be transmitted three times before the call sign of the medical transport involved. This message shall be transmitted in English at appropriate intervals on a frequency or frequencies specified pursuant to paragraph 3. The use of the priority signal shall be restricted exclusively to medical units and transports.
2. The radio message preceded by the distinctive priority signal mentioned in paragraph 1 shall convey the following data:
 - (a) call sign of the medical transport;
 - (b) position of the medical transport;
 - (c) number and type of medical transports;
 - (d) intended route;
 - (e) estimated time *en route* and of departure and arrival, as appropriate;
 - (f) any other information such as flight altitude, radio frequencies guarded, languages and secondary surveillance radar modes and codes.
3. In order to facilitate the communications referred to in paragraphs 1 and 2, as well as the communications referred to in Articles 22, 23, 25, 26, 27, 28, 29, 30 and 31 of the Protocol, the High Contracting Parties, the Parties to a conflict, or one of the Parties to a conflict, acting in agreement or alone, may designate, in accordance with the Table of Frequency Allocations in the Radio Regulations annexed to the International Telecommunication Convention, and publish selected national frequencies to be used by them for such communications. These frequencies shall be notified to the International Telecommunication Union in accordance with procedures to be approved by a World Administrative Radio Conference.

Article 8 – Electronic identification

1. The Secondary Surveillance Radar (SSR) system, as specified in Annex 10 to the Chicago Convention on International Civil Aviation of 7 December 1944, as amended from time to time, may be used to identify and to follow the course of medical aircraft. The SSR mode and code to be reserved for the exclusive use of medical aircraft shall be established by the High Contracting Parties, the Parties to a conflict, or one of the Parties to a conflict, acting in agreement or alone, in accordance with procedures to be recommended by the International Civil Aviation Organization.
2. Parties to a conflict may, by special agreement between them, establish for their use a similar electronic system for the identification of medical vehicles, and medical ships and craft.

Article 9 – Radiocommunications

The priority signal provided for in Article 7 of these Regulations may precede appropriate radiocommunications by medical units and transports in the application of the procedures carried out under Articles 22, 23, 25, 26, 27, 28, 29, 30 and 31 of the Protocol.

RESOLUTION 20**Protection of cultural property**

The Diplomatic Conference on the Reaffirmation and Development of International Humanitarian Law Applicable in Armed Conflicts, Geneva, 1974-1977,

Welcoming the adoption of Article 53 relating to the protection of cultural objects and places of worship as defined in the said Article, contained in the Protocol Additional to the Geneva Conventions of 12 August 1949, and relating to the Protection of Victims of International Armed Conflicts (Protocol I),

Acknowledging that the Convention for the Protection of Cultural Property in the Event of Armed Conflict and its Additional Protocol, signed at The Hague on 14 May 1954, constitutes an instrument of paramount importance for the international protection of the cultural heritage of all mankind against the effects of armed conflict and that the application of this Convention will in no way be prejudiced by the adoption of the Article referred to in the preceding paragraph,

Urges States which have not yet done so to become Parties to the aforementioned Convention.

*Fifty-fifth plenary meeting
7 June 1977*

RESOLUTION 21**Dissemination of knowledge of international humanitarian law
applicable in armed conflicts**

The Diplomatic Conference on the Reaffirmation and Development of International Humanitarian Law Applicable in Armed Conflicts, Geneva, 1974-1977,

Convinced that a sound knowledge of international humanitarian law is an essential factor for its effective application,

Confident that widespread knowledge of that law will contribute to the promotion of humanitarian ideals and a spirit of peace among nations,

1. *Reminds* the High Contracting Parties that under the four Geneva Conventions of 1949 they have undertaken to disseminate knowledge of those Conventions as widely as possible, and that the Protocols adopted by the Conference reaffirm and extend that obligation;
2. *Invites* the signatory States to take all appropriate measures to ensure that knowledge of international humanitarian law applicable in armed conflicts, and of the fundamental principles on which that law is based, is effectively disseminated, particularly by:
 - (a) encouraging the authorities concerned to plan and give effect, if necessary with the assistance and advice of the International Committee of the Red Cross, to arrangements to teach international humanitarian law, particularly to the armed forces and to appropriate administrative authorities, in a manner suited to national circumstances;
 - (b) undertaking in peacetime the training of suitable persons to teach international humanitarian law and to facilitate the application thereof, in accordance with Articles 6 and 82 of the Protocol Additional to the Geneva Conventions of 12 August 1949, and relating to the Protection of Victims of International Armed Conflicts (Protocol I);
 - (c) recommending that the appropriate authorities intensify the teaching of international humanitarian law in universities (faculties of law, political science, medicine, etc.);
 - (d) recommending to educational authorities the introduction of courses on the principles of international humanitarian law in secondary and similar schools;
3. *Urges* National Red Cross, Red Crescent and Red Lion and Sun Societies to offer their services to the authorities in their own countries with a view to the effective dissemination of knowledge of international humanitarian law;
4. *Invites* the International Committee of the Red Cross to participate actively in the effort to disseminate knowledge of international humanitarian law by, *inter alia*:
 - (a) publishing material that will assist in teaching international humanitarian law, and circulating appropriate information for the dissemination of the Geneva Conventions and the Protocols.

- (b) organizing, on its own initiative or when requested by Governments or National Societies, seminars and courses on international humanitarian law, and co-operating for that purpose with States and appropriate institutions.

Fifty-fifth plenary meeting
7 June 1977

RESOLUTION 22**Follow-up regarding prohibition or restriction of use
of certain conventional weapons**

The Diplomatic Conference on the Reaffirmation and Development of International Humanitarian Law Applicable in Armed Conflicts, Geneva, 1974-1977,

Having met at Geneva for four sessions, in 1974, 1975, 1976 and 1977, and having adopted new humanitarian rules relating to armed conflicts and methods and means of warfare,

Convinced that the suffering of the civilian population and combatants could be significantly reduced if agreements can be attained on the prohibition or restriction for humanitarian reasons of the use of specific conventional weapons, including any which may be deemed to be excessively injurious or to have indiscriminate effects,

Recalling that the issue of prohibitions or restrictions for humanitarian reasons of the use of specific conventional weapons has been the subject of substantive discussion in the *Ad Hoc* Committee on Conventional Weapons of the Conference at all its four sessions, and at the Conferences of Government Experts held under the auspices of the international Committee of the Red Cross in 1974 at Lucerne and in 1976 at Lugano,

Recalling, in this connexion, discussions and relevant resolutions of the General Assembly of the United Nations and appeals made by several Heads of State and Government,

Having concluded, from these discussions, that agreement exists on the desirability of prohibiting the use of conventional weapons, the primary effect of which is to injure by fragments not detectable by X-ray, and that there is a wide area of agreement with regard to landmines and booby-traps,

Having also devoted efforts to the further narrowing down of divergent views on the desirability of prohibiting or restricting the use of incendiary weapons, including napalm,

Having also considered the effects of the use of other conventional weapons, such as small calibre projectiles and certain blast and fragmentation weapons, and having begun the consideration of the possibility of prohibiting or restricting the use of such weapons,

Recognizing that it is important that this work continue and be pursued with the urgency required by evident humanitarian considerations,

Believing that further work should both build upon the areas of agreement thus far identified and include the search for further areas of agreement and should, in each case, seek the broadest possible agreement,

1. *Resolves* to send the report of the *Ad Hoc* Committee and the proposals presented in that Committee to the Governments of States represented at the Conference and to the Secretary-General of the United Nations;
2. *Request* that serious and early consideration be given to these documents and to the reports of the Conferences of Government Experts of Lucerne and Lugano;
3. *Recommends* that a Conference of Governments should be convened not later than 1979 with a view to reaching:
 - (a) agreements on prohibitions or restrictions on the use of specific conventional weapons including those which may be deemed to be excessively injurious or have indiscriminate effects, taking into account humanitarian and military considerations; and
 - (b) agreement on a mechanism for the review of any such agreements and for the consideration of proposals for further such agreements;
4. *Urges* that consultations be undertaken prior to the consideration of this question at the thirty-second session of the United Nations General Assembly for the purpose of reaching agreement on the steps to be taken in preparation for the Conference;
5. *Recommends* that a consultative meeting of all interested Governments be convened during September/October 1977 for this purpose;
6. *Recommends further* that the States participating in these consultations should consider *inter alia* the establishment of a Preparatory Committee which would seek to establish the best possible basis for the achievement at the Conference of agreements as envisaged in this resolution;
7. *Invites* the General Assembly of the United Nations at its thirty-second session, in the light of the results of the consultations undertaken pursuant to paragraph 4 of this resolution, to take any further action that may be necessary for the holding of the Conference in 1979.

Fifty-seventh plenary meeting
9 June 1977

RESOLUTION 24**Expression of gratitude to the host country**

The Diplomatic Conference on the Reaffirmation and Development of International Humanitarian Law Applicable in Armed Conflicts, Geneva, 1974-1977,

Having been convened at Geneva at the invitation of the Swiss Government,

Having held four sessions, in 1974, 1975, 1976 and 1977, during which it considered two draft Protocols additional to the Geneva Conventions of 12 August 1949, which had been prepared by the International Committee of the Red Cross,

Having benefited throughout its four sessions from the facilities placed at its disposal by the Government of Switzerland and by the authorities of the Republic and Canton and of the City of Geneva,

Profoundly appreciative of the hospitality and courtesy accorded to the participants of the Conference by the Government of Switzerland and by the authorities and the people of the Republic and Canton of Geneva and of the City of Geneva,

Having concluded its work by the adoption of two Protocols additional to the Geneva Conventions of 12 August 1949 and of various resolutions,

1. *Expresses* its sincere gratitude to the Government of Switzerland for its unfailing support for the work of the Conference and in particular to Mr. Pierre Graber, President of the Conference, Federal Councillor, Head of the Federal Political Department of the Swiss Confederation, whose wise and firm guidance has contributed so much to the Conference's success;
2. *Expresses* its sincere gratitude to the authorities and the people of the Republic and Canton of Geneva and of the City of Geneva for the generous hospitality and courtesy which they showed to the Conference and those participating in it;
3. *Pays a tribute* to the International Committee of the Red Cross and to its representatives and experts who devotedly and patiently advised the Conference on all matters arising in connexion with the draft Protocols and whose attachment to the principles of the Red Cross has served as an inspiration to the Conference;
4. *Expresses* its appreciation to Ambassador Jean Humbert, Secretary-General of the Conference, and to the entire staff of the Conference for the provision of efficient services at all times throughout the four years' duration of the Conference.

Fifty-eighth plenary meeting
9 June 1977

EXTRACTS FROM THE FINAL ACT

The Diplomatic Conference on the Reaffirmation and Development of International Humanitarian Law Applicable in Armed Conflicts, convened by the Swiss Federal Council, held four sessions in Geneva (from 20 February to 29 March 1974, from 3 February to 18 April 1975, from 21 April to 11 June 1976 and from 17 March to 10 June 1977). The object of the Conference was to study two draft Additional Protocols prepared, after official and private consultations, by the International Committee of the Red Cross and intended to supplement the four Geneva Conventions of 12 August 1949.

One hundred and twenty-four States were represented at the first session of the Conference, 120 States at the second session, 107 States at the third session and 109 States at the fourth session.

In view of the paramount importance of ensuring broad participation in the work of the Conference, which was of a fundamentally humanitarian nature, and because the progressive development and codification of international humanitarian law applicable in armed conflicts is a universal task in which the national liberation movements can contribute positively, the Conference by its resolution 3 (I) decided to invite also the national liberation movements recognized by the regional intergovernmental organizations concerned to participate fully in the deliberations of the Conference and its Main Committees, it being understood that only delegations representing States were entitled to vote.

The International Committee of the Red Cross, which had prepared the two draft Additional Protocols, participated in the work of the Conference in an expert capacity.

The Conference drew up the following instruments:

Protocol Additional to the Geneva Conventions of 12 August 1949, and relating to the Protection of Victims of International Armed Conflicts (Protocol I) and Annexes I and II;

Protocol Additional to the Geneva Conventions of 12 August 1949, and relating to the Protection of Victims of Non-International Armed Conflicts (Protocol II).

These Additional Protocols were adopted by the Conference on 8 June 1977. They will be submitted to Governments for consideration and will be open for signature on 12 December 1977, at Berne, for a period of twelve months, in accordance with their provisions. These instruments will also be open for accession, in accordance with their provisions.

Done at Geneva, on 10 June 1977, in Arabic, English, French, Russian and Spanish, the original and the accompanying documents to be deposited in the Archives of the Swiss Confederation.

In witness whereof, the representatives have signed this Final Act.

Instruments*

* This list comprises all international instruments (treaties, declarations and other instruments), whether in force or not, which are cited in the text of the Commentary. They are listed in chronological order according to their date of adoption.

10 December

Convention against Torture and other Cruel, Inhuman or Degrading Treatment or Punishment.

Adopted by the General Assembly of the United Nations (Resolution 39/46).

**Signatures, Ratifications, Accessions
and Successions
to the major relevant Treaties
as of 31st December 1984**

Name and Alphabetical Order of States

For reasons of practicality, the alphabetical order of States as well as their names may be different in the table to the official ones.

Explanation of Information given in the Table

Date and Means by which States have expressed their consent to be bound by a Treaty:

- R = Ratification;
- A = Accession or Acceptance;
- S = Succession;
- the dates indicate, in order, the day, the month and the year.

Reservations and Declarations indicated by the sign *, with the exception of Declarations under Article 90 of Protocol I, for which there is a separate column (information only given for the Geneva Conventions and their Additional Protocols).

Signature (s), relevant date and indication of any Declaration (*) subject to the same proviso mentioned above (information only given for the Additional Protocols).

Abbreviations of Titles of Instruments
