## PREFACE

---

This year, 1987, marks the 22d anniversary of the enactment of the Older Americans Act of 1965. For over two decades this legislation has guided our Nation's efforts to respond to the needs and enhance the opportunities of a rapidly growing population of older Americans.

With the passage of the Older Americans Act in 1965, Congress created a new Federal program specifically designed to meet the social service needs of older persons. Although older persons may receive services under many other Federal programs, the Older Americans Act is considered the major vehicle for the organization and delivery of community based services to this group. The Older Americans Act programs enhance the lives and dignity of older Americans, providing for meaningful activity, suitable surroundings, and the opportunity for employment.

The Act was reauthorized during the 100th Congress by Public Law 100-175. The law provides for a 4-year reauthorization through 1991. This report presents a summary of its provisions.

The Committee would like to acknowledge the work of Carol O'Shaughnessy, Specialist in Social Legislation with the Congressional Research Service, in producing this report. It is hoped that this document will provide a ready reference for all individuals involved not only in programs and services under the Act but in all other areas of the aging field.

# OLDER AMERICANS ACT AMENDMENTS OF 1987: A SUMMARY OF PROVISIONS

Public Law 100-175

## I. INTRODUCTION

### A. OVERVIEW

Authorizations of appropriations for the Older Americans Act of 1965, as amended, expired at the end of fiscal year 1987. Public Law 100-175, the Older Americans Act Amendments of 1987, providing a 4-year reauthorization, through 1991, was enacted on November 29, 1987.<sup>1</sup>

The amendments contained no major overhaul of the Act; however, a number of new provisions significantly expanded certain service components of the State and area agency on aging program under title III to address the special needs of certain populations. These include the frail elderly living at home; residents of long-term care facilities; persons at risk of abuse, neglect, or exploitation; and low-income elderly who may be eligible for, but are not receiving, benefits under other Federal programs. Prior to the enactment of Public Law 100-175, the Older Americans Act contained three separate authorizations of appropriations for supportive services, congregate nutrition services, and home-delivered nutrition services. In the new law, Congress authorized six additional distinct authorizations of appropriations for services under title III. These are: In-home services for frail older individuals; long-term care ombudsman services; assistance for special needs; health education and promotion services; services to prevent abuse, neglect, and exploitation of older individuals; and outreach activities for persons who may be eligible for benefits under the Supplemental Security Income [SSI], Medicaid, and Food Stamp programs. Although State and area agencies on aging have had some responsibilities to address these service areas in the past, there were no separate authorization levels under title III to carry out these responsibilities. The authorization of supportive services funds was considered a generic category intended to address a very broad range of social services needs. While the intensity of activities of State and area agencies on aging in these areas is to be enhanced with the creation of the new funding authorizations, Congress also

<sup>1</sup> The House version of the amendments, H.R. 1451, was introduced by Rep. Kildee on March 5, 1987, and was ordered reported to the House by the Committee on Education and Labor on May 12 (House Report No. 100-97). The bill was approved with amendments by the House on May 28. S. 887, the Senate version of the amendments, was introduced by Senator Matsunaga on March 31, and was ordered reported to the Senate by the Committee on Labor and Human Resources on July 22 (Senate Report No. 100-136). The Senate passed S. 887 on August 6. The Conference Report was filed in the House on Nov. 9 (House Report No. 100-427), was approved by the Senate on Nov. 12 and by the House on Nov. 17.

sought to protect the existing Older Americans Act programs through a provision stating that funds for the new authorizations may not be appropriated unless total appropriations for programs in effect in fiscal year 1987 increase by at least 5 percent over the previous year. This so-called funding "trigger" does not, however, apply to the new authorization for in-home services for the frail elderly; the trigger is effective through fiscal year 1990.

In addition to the groups mentioned above, other groups given special attention in various amendments to the Act were Native Americans and the disabled. With respect to Native Americans, the law required the Commissioner on Aging to establish within the Administration on Aging [AoA] a new Office for American Indian, Alaskan Native, and Native Hawaiian Programs to be headed by an Associate Commissioner. The special needs of older Indians are to be addressed by a permanent interagency task force to focus on issues of service coordination and improvement for this group. In addition, other amendments were enacted to liberalize eligibility requirements for Indians to receive assistance under the Act. The law also recognized the special service needs of Native Hawaiians by creating a separate authorization of funds for this group under title VI which formerly provided funding only for Indian tribal organizations. Another provision authorizes funding for employment services under the community service employment program to national Indian aging organizations and national Pacific Island and Asian American aging organizations.

With respect to the disabled, the amendments included provisions to improve coordination of the State and area agency on aging program with other service systems established specifically to serve the disabled. An amendment to the elderly nutrition program allows nutrition project administrators to offer meals to disabled individuals who reside at home with and accompany older persons eligible for nutrition services. Another amendment authorizes the Commissioner to conduct demonstration projects to coordinate the State agency on aging long-term care ombudsman program with the State protection and advocacy systems for the developmentally disabled and the mentally ill.

In addition to amendments addressing the needs of these identified elderly groups, the law also reemphasized prior law requirements to focus the Act's resources on those older persons who are in the greatest economic or social need of assistance, with particular attention on low-income minority older persons. A series of amendments strengthened prior law stipulations by requiring that the needs of these groups be incorporated into planning, outreach, and service delivery activities of State and area agencies.

The law also added new provisions to strengthen, expand, or clarify administration and/or delivery of various service programs under the Act. In this regard, the amendments included provisions to: Protect the confidentiality of clients who receive legal assistance; strengthen the administration of the State long-term care ombudsman program and afford ombudsmen certain protections in the performance of their duties on behalf of long-term care facility residents; increase the access of older persons to information about post-secondary educational opportunities; enhance a variety of volunteer opportunities for older persons; and authorize demonstra-

tion projects to protect consumers of home care services. The law also required State agencies on aging to set minimum dollar amounts to be spent by area agencies on aging for access, in-home, and legal assistance services. These areas have been identified as priority services under the State and area agency on aging program.

The law also addressed the effect that participation in the community service employment program under title V of the Act has on eligibility for certain other Federal programs. Under prior law, wages received under the title V program could be counted as income when determining eligibility for Federal housing and Food Stamp programs. Public Law 100-175 liberalized these eligibility requirements by enacting a provision to exclude title V wages from being considered as income when determining benefits under these programs.

In other areas, a number of amendments addressed issues relating to the administration of Older Americans Act programs, including the organizational status of AoA within the Department of Health and Human Services [DHHS]. This issue has been a recurring one during previous Older Americans Act reauthorizations due to concern by some that AoA because it is located within the Office of Human Development Services [OHDS], does not have the visibility to effectively advocate on behalf of the elderly across a broad range of issues. The 1987 amendments addressed this concern by elevating the status of the Commissioner on Aging within the DHHS structure. The law did this through an amendment requiring that the Commissioner report directly to the Secretary of DHHS rather than, as under prior law, to the Office of the Secretary.

Other amendments relating to the administration of the program by AoA required improved data collection on programs and services funded under the Act and required the Commissioner to publish an annual statement of goals and objectives of AoA. The law also increased the allowable amount of funds to be spent on the administration of area plans on aging and of community service employment projects; required public hearings on activities under State and area plans on aging; and addressed the organizational status of area agencies on aging when they are located within umbrella organizations.

In addition to reauthorizing and amending the Older Americans Act programs, Public Law 100-175 included a number of other provisions affecting the elderly. The law authorized the President to call a White House Conference on Aging in 1991; authorized adult day care centers for the elderly and the chronically impaired disabled to receive funds for meals under the National School Lunch Act; required the Secretary of Labor to develop a consumer price index for older persons; authorized the National Institute on Aging to conduct clinical trials to test the efficacy of certain drugs on treatment of Alzheimer's disease; and authorized the Public Health Service to conduct demonstration projects on home health services for low-income persons in need of skilled medical or related health services, and for victims of Alzheimer's disease and their families.

## B. AUTHORIZATION LEVELS

Table 1 presents authorization levels for the Older Americans Act in fiscal year 1987 and authorization levels for programs which were reauthorized or newly created by Public Law 100-175. The new law increased fiscal year 1988 authorization levels by 5 percent above fiscal year 1987, except for the title VI program of grants to Native Americans (formerly called Grants for Indian Tribes). Fiscal year 1988 authorizations for that program were increased by 56 percent above the fiscal year 1987 level, and the program was expanded to provide funding for a new Native Hawaiian program. The title VII older Americans personal health education and training program was repealed.

Part B will receive the first \$250,000 of any appropriations exceeding the FY 1987 level, and half of any increase above the first \$250,000 up to the authorized amount.<sup>10</sup> This title is repealed.<sup>11</sup> Plus such sums as may be necessary for certain programs.

## II. DESCRIPTION OF SELECTED PROVISIONS OF PUBLIC LAW 100-175

The following describes selected provisions of Public Law 100-175, by title, of the Older Americans Act. In some instances, in order to more fully describe the amendments, reference is made to statements contained in the reports of the Committee on Education and Labor, the Committee on Labor and Human Resources, or the Joint Explanatory Statement of the Committee of Conference on H.R. 1451. While an attempt has been made to describe most amendments, not all provisions are included.

### A. TITLE I—DECLARATION OF OBJECTIVES

Title I of the Act sets out broad social policy objectives oriented toward improving the lives of all older Americans, for example, in areas of income, health, housing, and long-term care. The amendments added to this list of objectives, protection of the elderly from abuse, neglect, and exploitation.

### B. TITLE II—ADMINISTRATION ON AGING

Title II establishes AoA to administer most Older Americans Act programs and to act as the chief Federal agency advocate for older persons. It also establishes the Federal Council on Aging to advise the President and Congress regarding the needs of older persons.

Public Law 100-175 contained a number of amendments to title II which address the organization of AoA and administration of the Act, as follows.

#### 1. ORGANIZATIONAL STATUS OF AOA

The organizational status of AoA has been a subject for review by Congress during successive reauthorizations of the Act. Concerns in the past have in part focused on the ability of AoA to act independently as the chief Federal agency advocate on behalf of the elderly. Public Law 100-175 addressed the issue by including a provision to elevate the status of AoA within the structure of DHHS. It required that the Commissioner on Aging report directly to the Secretary of DHHS, rather than to the Office of the Secretary as provided by prior law. In explaining this provision, the report of the Committee on Labor and Human Resources stated:

In light of the significance of issues related to the field of aging, the fact that the Administration on Aging has responsibilities to coordinate its activities with a multiplicity of other Federal programs, both within and outside the Department, and the apparent inclination within the current structure to usurp both funding and resources intended by Congress to be used to support the Administration on Aging for other pro-

grams within the Office of Human Development Services, the Committee has found it necessary and appropriate to elevate the status of the Commissioner on Aging to report directly to the Secretary. In doing so, the Committee expects the Commissioner on Aging to be included in appropriate departmental decision making, to have independent access to the Secretary, and to function with the same level of authority as assistant secretaries and other commissioners within the Department. By elevating this relationship, the Committee intends that the Commissioner shall have control of all salaries and expenses decisions within the Administration on Aging and that the Department shall allocate adequate funds of salaries and expenses to carry out the intent of the Act.<sup>2</sup>

## 2. OFFICE FOR AMERICAN INDIAN, ALASKAN NATIVE, AND NATIVE HAWAIIAN PROGRAMS

Public Law 100-175 required the Commissioner on Aging to establish within AoA, a new Office for American Indian, Alaskan Native, and Native Hawaiian Programs to be headed by an Associate Commissioner. Functions of the Associate Commissioner include serving as the effective and visible advocate on behalf of older Native Americans within DHHS and with other governmental agencies and coordinating activities of other Federal departments and agencies to assure improved services for this group. The Associate Commissioner is also to evaluate outreach activities on behalf of older Native Americans under the State and area agency on aging and the Indian tribal grant programs, and make recommendations to improve services. In addition, the Associate Commissioner is to administer grants to Indian tribes, collect and disseminate information about the problems of older Native Americans, conduct research on Native American aging, and undertake technical assistance and training activities for title VI grantees.

## 3. TASK FORCE ON OLDER INDIANS AND SPECIAL REPORT ON SERVICES TO OLDER INDIANS<sup>3</sup>

The law requires the Commissioner to establish a permanent interagency Task Force on older Indians. To be chaired by the Associate Commissioner on American Indian, Alaskan Native, and Native Hawaiian Aging, the Task Force is to be representative of Federal agencies and departments with an interest in older Indians. It is to submit its findings and recommendations on the coordination and improvement of services to older Indians to the Commissioner at 6-month intervals beginning after the date of enactment of Public Law 100-175.

In addition to establishing the Task Force, the Commissioner is also required to contract for a study of the availability and quality of services to older Indians under the Act. The study is to include an analysis of the number of Indians participating under the Act

as compared to the number eligible; how grants are made and services delivered; and how services under the tribal grant program compare to those available under the State and area agency on aging programs, among other things. The study, including appropriate legislative recommendations, is to be submitted to Congress by December 31, 1988.

#### 4. DATA COLLECTION AND REPORTS

In response to concern about lack of essential program data on Older Americans Act programs, the law added a number of new provisions requiring increased data collection by AoA. First, the law requires that beginning in fiscal year 1989, the Commissioner collect, directly or by contract, the following data: Aggregate amount of funds expended to provide each type of service under the Act; number of individuals who are recipients of services; number of units of services provided; and number of senior centers which received services under the Act. Data on services and expenditures are to be collected annually. The law also requires that these data as well as the following items be included in the AoA annual report to Congress: The extent to which States have granted waivers of the title III requirement that area agencies expend an "adequate proportion" of funds on priority services (access, in-home, and legal assistance); and data and analysis of the effectiveness of State and area agency targeting of services on those in greatest economic or social need.

In addition to these general requirements, the law sets forth specific requirements as to data collection and reports on the long-term care ombudsman program. AoA is required to include in its annual report the following elements on this program:

- summary and analysis of data on complaints and conditions in long-term care facilities for the most recent fiscal year;
- identification of significant problems and issues, especially relating to quality of care and patients' rights;
- discussion of current issues on State programs; and
- recommendations on legislative and administrative actions to resolve problems.

The report on the ombudsman program is to be submitted by the Commissioner to the Select Committee on Aging and the Committee on Education and Labor in the House, and the Special Committee on Aging and the Committee on Labor and Human Resources in the Senate. Other reporting stipulations on the ombudsman program require the Commissioner to make the national report as well as reports made to the Commissioner by individual States available to the Administrator of the Health Care Financing Administration (HCFA), the Office of the Inspector General of DHHS, the Office of Civil Rights of DHHS, and the Administrator of the Veterans' Administration.

#### 5. FEDERAL COUNCIL ON AGING

The membership of the Federal Council on Aging, which acts in an advisory role to the President and the Congress, was changed so that a majority will be older persons. Prior law had required that a total of 6 of the 15 members be older persons (that is, the Presi-

dent, the President pro tempore of the Senate, and the Speaker of the House were each to appoint two older persons). Public Law 100-175 required that a total of 9 of the 15 members be older persons, that is, each appointing authority is required to appoint at least 3 members who are older.

In keeping with greater emphasis given to the needs of older Indians in this reauthorization of the Act, the law also required that the Council have representation from Indian tribes.

#### 6. PROGRAM REGULATIONS AND PUBLICATION OF GOALS FOR THE ADMINISTRATION ON AGING

The law updated a prior law requirement on the timetable for publishing regulations on the administration of the Act. As provided under prior law, proposed regulations are to be published within 120 days after enactment of the law and rules are to be finalized within 90 days after the proposed rules have been promulgated.

A new provision requires the Commissioner to publish an annual statement of goals and objectives to act as a statement of broad annual objectives of AoA. The report of the Committee on Labor and Human Resources indicated that the intent of this provision is to encourage visible national leadership by AoA and to provide an annual framework for AoA activities.<sup>4</sup> The Conference Report on H.R. 1451 stated that these goals should provide a statement of direction and priorities, rather than goals for each State or area agency or goals which would replace the statement of purpose in the Older Americans Act.<sup>5</sup>

#### 7. STUDY ON UNMET NEED FOR SERVICES

The Commissioner is required to undertake a national study to assess the unmet need for supportive and nutrition services, and multipurpose senior centers. The study is to be conducted by summarizing information as to the need for these services contained in State plans on aging, and if such information proves insufficient, the Commissioner is authorized to issue regulations which will produce objective and statistically valid results as to the unmet need. The Report of the conferees on H.R. 1451 indicates that the Conferees expect this assessment to include a geographic and statistical analysis of unsatisfied demand for supportive services nationally, especially at multipurpose senior centers funded under the Act, and similar sites supported by other funds.<sup>6</sup> The report, to be submitted to Congress by September 30, 1989, is to contain recommendations on administrative and legislative action necessary to meet the demand for services at senior centers.

### C. TITLE III—GRANTS FOR STATE AND COMMUNITY PROGRAMS ON AGING

Title III establishes authority for the network of State and area agencies on aging and requires the development of a comprehensive and coordinated services system for older persons.

Under prior law, title III contained three parts authorizing funds to State agencies on aging for supportive services (part B), congregate nutrition services (part C-1), and home-delivered nutrition services (part C-2). While Public Law 100-175 made certain changes relating to the administration of these services by State and area agencies on aging, the major changes created a number of new sections authorizing distinct funding amounts for a number of program areas. These program areas are: Non-medical in-home services for the frail elderly under a new part D; services to meet the special needs of the elderly under a new part E; health education and promotion activities under a new part F; elder abuse prevention activities under a new part G; long-term care ombudsman services; and outreach services to older persons potentially eligible for other Federal benefit programs. While State and area agencies have had responsibilities in these areas under prior law, separate authorizations of title III funds were not specified. Except for in-home services for the frail elderly, the law included a funding "trigger" precluding appropriations for these separate authorizations unless total appropriations for programs funded in fiscal year 1987 exceed the previous year's level by at least 5 percent. The funding restriction applies through fiscal year 1990.

The provisions of Public Law 100-175 relating to these separate authorizations of appropriations are described below, followed by a description of other title III provisions.

#### 1. NON-MEDICAL IN-HOME SERVICES FOR THE FRAIL ELDERLY

In recognition of the projected demand for a range of community-based long-term care services by the elderly, the law included a separate authorization of funds for non-medical in-home services for frail older persons. While in-home services have been authorized under the Act for some time, and have been considered a priority service for which some title III funding was required since 1975, no separate authorization of funds was made under prior law. Public Law 100-175 created a new part D authorizing \$25 million in fiscal year 1988, \$26.3 million in fiscal year 1989, \$27.6 million in fiscal year 1990, and \$28.9 million in fiscal year 1991 for the following services: Homemaker and home health aide; visiting and telephone reassurance; chore maintenance; in-home respite care, and adult day care as a respite for families; and minor modification of homes not to exceed \$150 per client.

Under this new authority, State agencies on aging will receive funds based on the current title III formula (that is, based on the State's share of the population 60 years or over as compared to all States), and will in turn award funds to area agencies on aging. State agencies are required to develop eligibility criteria for the use of in-home services, taking into account factors such as age, and other factors relating to the need for services on the part of the frail elderly. The law defines "frail" elderly as those having a phys-

ical or mental disability, including Alzheimer's disease or a related disorder with neurological or organic brain dysfunction, that restricts their ability to perform daily tasks or threatens their capacity to live independently.

State and area agencies are required to coordinate in-home services authorized under this authority with other agencies providing similar or related services. In addition, the law specifies that funds under part D may not be used to supplant any funds that are or would otherwise be spent under any Federal, State, or local law by a State or unit of general purpose local government. This includes area agencies on aging which have in their planning and service areas existing services which primarily serve older victims of Alzheimer's disease and related disorders with neurological and organic brain dysfunction, and their families.

## 2. ASSISTANCE FOR SPECIAL NEEDS

The law contains a new part E—authorizing funds to enable States to meet special needs of older persons. Activities specified by the law to be supported with special needs funds include transportation, outreach, targeting services to those with the greatest economic or social need, long-term care ombudsman services, and other services where there is unmet need. States are given wide discretion in the use of these funds. In its approval of this amendment, the House Committee on Education and Labor stated:

While the current terms of the Older Americans Act enumerate many specific services and programs which must be conducted for the benefit of senior citizens, the new resources provided through Part E are unearmarked, giving the States maximum flexibility and discretion in their use.<sup>7</sup>

The law authorizes \$25 million for each of fiscal years 1988 and 1989 and such sums as may be necessary for fiscal years 1990 and 1991. As in the other new title III authorizations created by the law (except for in-home services under part D), the funding for assistance for special needs is subject to the appropriations trigger.

## 3. HEALTH EDUCATION AND PROMOTION ACTIVITIES

The law created a separate authorization of funds under title III for health education and promotion activities under a new part F. Under an amendment added by the 1984 reauthorization of the Act, States are required to spend a portion of their title III allotment on health and nutrition education services, but no separate amount was authorized to carry out these activities. Public Law 100-175 specifically authorized \$5 million for fiscal year 1988 and such sums as may be necessary for each of fiscal years 1989-91. Grants are to be made to States under approved plans on aging, and States are to distribute funds to medically underserved areas of the State and areas where there are large concentrations of economically needy older persons.

<sup>7</sup> U.S. Congress. House. Committee on Education and Labor. Older Americans Act Amendments of 1987. House Report No. 100-97, 100th Cong., 1st Sess. p. 10.

The amendment calls for periodic preventive health services primarily in congregate settings. Funds are to be used for routine health screening, group exercise, home injury control services, nutritional counseling and education, programs to prevent depression and activities to coordinate mental health services, and educational programs on the benefits and limitations of Medicare and supplemental insurance coverage. In order to assist State and area agencies to offer effective health promotion programs, the law also includes a provision to assure that discretionary funds under title IV be used to develop prototype health promotion and education programs through institutions of higher education.

Funding for this new authorization is subject to the appropriations trigger.

#### 4. ELDER ABUSE PREVENTION SERVICES

The law added a separate authorization of funds for elder abuse prevention services under a new part G. While prior law allowed each State to decide whether to provide such services under a State plan on aging, no specific amount of title III funds was set aside for this purpose. Public Law 100-175 authorized \$5 million in fiscal year 1988 and such sums as may be necessary for each of fiscal years 1989-91. As under the prior law provision, the amendment requires States to undertake a variety of activities, including public education and outreach activities to identify abuse, neglect, or exploitation, procedures for reporting of such cases, and coordination of the State agency on aging program with State and local adult protective service activities. Involuntary or coerced participation by alleged victims, abusers, or their households is prohibited.

The Conference Report on H.R. 1451 recognized that cooperation on elder abuse protection activities is necessary. It stated, as follows:

The Conferees recognize that the laws of some States give authority over elder abuse prevention and protection to agencies outside of the aging network. The Conferees intend that the requirements of this section be carried out strictly within the confines of pertinent State laws. Area agencies on aging are expected to use these funds to complement and supplement, not duplicate, existing elder abuse prevention and protection programs.<sup>8</sup>

Funding for elder abuse prevention activities is subject to the appropriations trigger. If no new appropriations are available, the prior law provision which permits the State agency to establish such a program is to prevail.

#### 5. LONG-TERM CARE OMBUDSMAN SERVICES

In addition to the expanded role for State and area agencies for home care services under part D described above, Public Law 100-175 strengthened various requirements affecting services for institutionalized older persons under the long-term care ombudsman program, and added a separate authorization of appropriations.

<sup>8</sup> U.S. Congress. House. Conference Report, p. 77.

The amendments were intended to respond to recommendations made by a 1986 Institute of Medicine report on improving the quality of care in nursing homes.

Under provisions added to the law in 1978, each State agency on aging is required to establish and operate a long-term ombudsman program to investigate and resolve complaints of long-term care facility residents (skilled nursing facilities, intermediate care facilities, board and care homes, and other adult care homes). Prior law required States to spend a minimum amount of funds to operate the ombudsman program (1 percent of the State allotment for title III supportive services under part B, or \$20,000, whichever is greater); no separate authorization of funds was specified. Public Law 100-175 authorized \$20 million in fiscal year 1988 and such sums as may be necessary for the next 3 years, to carry out the ombudsman program, and modified the State minimum expenditure requirement (as described below). Funding is subject to the appropriations trigger.

Other provisions of Public Law 100-175 relating to the ombudsman program:

- designate as responsible for carrying out the program, an “Office of the State Long-Term Care Ombudsman”;
- require the Office to include local ombudsman entities as subdivisions of the Office. Representatives of the local entity, either employees or unpaid volunteers, are to be treated as representatives of the Office;
- require the Office to prepare an annual report on data and findings regarding the types of problems and complaints of residents of long-term care facilities, and to make policy, regulatory, and legislative recommendations to solve such problems, resolve complaints, and improve quality of care and life in the facilities;
- expand on the prior law provision by requiring the Office to analyze and monitor the development and implementation of Federal, State, and local laws, regulations, and policies with respect to long-term care facilities and services, and to recommend necessary changes;
- expand on the prior law requirement to specify that complaints include action, inaction or decisions of providers, or their representatives, of long-term care services, or public agencies, or of social service agencies, which may adversely affect residents;
- require the Commissioner to provide technical assistance and training to State long-term care ombudsman programs and to representatives of the program; require the Office to provide training of staff and volunteers on Federal, State, and local laws, regulations, and policies regarding facilities and investigative techniques; prohibit an Office representative from investigating a complaint unless he/she has received training and has been determined to be qualified to do the investigation;
- require the State agency on aging to prohibit conflict of interest in designating the ombudsman or the head of any subdivision of the Office. The law also prohibits conflict of interest for officers, employees, or other Office representatives and re-

- quires that procedures be in place to identify conflict of interest;
- require the State agency on aging to assure that legal counsel is available to the Office and that there will be legal representation in the case of legal action against any Office representative. The Office must be able to pursue administrative, legal, and other appropriate remedies on behalf of residents;
  - require the State to protect Office representatives from liability under State law for good faith performance of official duties;
  - require the State to make unlawful, any willful interference with ombudsmen in the performance of official duties. The law also prohibits retaliation and reprisals by long-term care facilities or other entities against residents or employees for having filed a complaint or providing information to the Office. Sanctions are required in the case of interference or retaliation;
  - require the State to assure Office access to facilities, residents and resident medical and social records, with the permission of residents or their legal guardians;
  - require the Office to provide information to public agencies, legislators, and others as deemed necessary, regarding the problems and concerns of residents and to make recommendations to improve their situation; and
  - require the Office to coordinate ombudsman services with protection and advocacy systems for developmentally disabled and mentally ill persons.

The law contained a number of provisions relating to a State's commitment of funds to the ombudsman program. Although a separate amount is authorized for the program under Public Law 100-175, the Conferees noted that States are required to implement the amendments regardless of the appropriations level. The prior law minimum expenditure amount provision was modified to require that States spend, at a minimum, the same total amount on ombudsman services from Federal sources as they spent in fiscal year 1987; they may use funds from new appropriations, if any, or from funds allotted under the part B supportive services category, to meet this minimum amount. In addition, all funds appropriated pursuant to the new authorization for ombudsman programs must be expended for this program.

Another provision of the law requires the Commissioner on Aging to conduct a study of the impact of the ombudsman program on care of residents of board and care facilities and other similar adult care homes, and the effectiveness of recruiting, supervising, and retaining volunteer ombudsmen. A report on this study is to be submitted to Congress by December 31, 1989.

#### 6. OUTREACH TO OLDER PERSONS ELIGIBLE FOR OTHER FEDERAL BENEFIT PROGRAMS

The law authorized a program to expand outreach services to older persons who may be eligible for, but who are not receiving, benefits under the SSI, Medicaid, and Food Stamp programs. It authorized \$10 million for each of fiscal years 1989 and 1990 for grants to States to inform older persons about their potential eligi-

bility for these programs and to assist them in applying for assistance. Funding for this authorization is subject to the appropriations trigger.

Under this authority each State would be assured a minimum of \$50,000. In distributing funds within the State, the State agency is to give priority to area agencies based on an evaluation of the number of older persons in greatest economic need in the planning and service area as well as the inadequacy of existing outreach activities.

During fiscal year 1988 the Commissioner is to compile descriptions of successful outreach programs which may be of assistance to area agencies interested in participating in this program. The law also prescribes requirements for distribution of information on eligibility under the three programs, as well as application, evaluation, and reporting requirements.

#### 7. FLEXIBILITY IN PROVIDING CERTAIN SERVICES UNDER AREA PLANS ON AGING

Under prior law, each area agency on aging was to provide assurances that it would spend an "adequate proportion" of its allotted funds for supportive services on three categories considered as priorities under the area plan. These are access services (transportation, outreach, and information and referral); in-home services (homemaker and home health aide, visiting and telephone reassurance, chore maintenance, and supportive services for families of elderly victims of Alzheimer's and related diseases); and legal assistance. Public Law 100-175 changed this requirement to stipulate that each State agency is to set a minimum percentage of funds to be used for these three service categories by each area agency. The Conference Report on H.R. 1451 further explicated this change, as follows:

If an area agency expends at least the minimum percentage set by the State, the area agency will have fulfilled the requirement to spend an adequate proportion of funds on such services. The minimum percentage is intended to be a floor, not a ceiling. Area agencies on aging are encouraged to devote additional funds to each of these service areas to meet local needs.<sup>9</sup>

While the new law requires the State agency to set a minimum proportion of funds for these services, it leaves intact a prior law stipulation that the State agency waive the "adequate proportion" requirement if the area agency demonstrates that services being furnished in the area are sufficient to meet the need. With respect to consideration of whether the need for legal assistance is being adequately addressed in the planning and service area, the Conferees noted in the Conference Report that they expect State and area agencies to take into account services being provided by the Legal Services Corporation, the private bar, or groups within the private bar furnishing services to older individuals on a pro bono and established reduced fee basis in that planning and service area.<sup>10</sup>

<sup>9</sup> U.S. Congress. House. Conference Report, p. 70-71.

<sup>10</sup> *Ibid.*, p. 71.

Public Law 100-175 also expanded upon certain procedural requirements pertaining to the granting of a waiver of the "adequate proportion" provision included in the 1984 reauthorization of the Act. That law specified that before an area agency requests a waiver, it must conduct a public hearing and provide notification to interested parties of an opportunity to testify. The area agency is required to furnish a record of the public hearing with the request for a waiver to the State agency. Public Law 100-175 added certain requirements the State agency must follow in granting a waiver by specifying that when it proposes to grant a waiver, it must publish its intent and justification to do so, at least 30 days prior to the effective date of the waiver. If, during this 30-day period, an individual or a service provider from the area requests a hearing with respect to the waiver, the State agency is to afford these individuals or providers a hearing. The Conference Report further explicated this provision, as follows:

The Conferees also note that they do not intend to require the State agency to hold a separate hearing for each individual or provider who requests such a hearing, but that a single hearing at which each individual or provider may testify is sufficient to meet the intent of this section. Furthermore, the hearing may be conducted as part of other hearings being held by the State agency.<sup>11</sup>

Public Law 100-175 also required that if the State agency grants a waiver, it must provide to the Commissioner a report on the information submitted by the area agency to justify the waiver, and a copy of the public hearings held on the waiver.

#### 8. TARGETING OF SERVICES UNDER STATE AND AREA PLANS ON AGING; DOCUMENTATION OF SERVICES TO LOW-INCOME MINORITIES

In response to some reports during hearings on the Act in 1987 about lack of adequate targeting of services to low-income and minority groups, the law incorporated a number of provisions designed to strengthen prior law requirements with respect to planning and service delivery for these older persons. These provisions include requirements that State and area plans on aging identify the number of low-income and minority older persons in the State or planning and service area, and describe methods used to meet their needs in the previous year. Further, State agencies, in dividing the State into planning and service areas, and area agencies, in developing comprehensive and coordinated services systems, are required to consider the number of older persons with the greatest economic or social need, with particular attention to low-income minority older persons. Provisions were also added to assure effective outreach to such individuals and to require that evaluation of these outreach efforts takes place.

Another new requirement is intended to assure that service providers under the area plan on aging focus on the needs of low-income minority older persons. Service providers are required to specify how they will meet the needs of this group and to attempt

<sup>11</sup> U.S. Congress. House. Conference Report, p. 71.

to provide services to such individuals in at least the same proportion as they represent the total older population in the area.

#### 9. COORDINATION OF TITLE III SERVICES WITH OTHER COMMUNITY SERVICES ON BEHALF OF SPECIFIED GROUPS

In addition to the provisions relating to the targeting of services as described above, Public Law 100-175 contained specific amendments requiring the coordination of title III services on behalf of specific groups of older individuals. Various provisions focus on the needs of persons with mental illness, victims of Alzheimer's disease and their families, the disabled, and persons in need of community-based long-term care services. These provisions are summarized below.

##### A. COORDINATION OF MENTAL HEALTH SERVICES

Public Law 100-175 added new provisions to focus efforts on the coordination of title III services with mental health services. First, it specified that the Commissioner may request the technical assistance and cooperation of the Alcohol, Drug Abuse, and Mental Health Administration in the administration of title III programs. Second, it required area agencies to coordinate mental health services funded with title III-B supportive services funds with mental health services provided by community mental health centers and by other public agencies and nonprofit private organizations.

##### B. COORDINATION OF PRIORITY SERVICES ON BEHALF OF VICTIMS OF ALZHEIMER'S DISEASE AND THEIR FAMILIES

The law also required area agencies to coordinate priority services under the area plan (access, in-home, and legal assistance) with activities of community-based organizations established for the benefit of victims of Alzheimer's disease and their families.

##### C. SERVICES TO INDIVIDUALS WITH DISABILITIES

Various provisions of Public Law 100-175 focus on the special needs of older persons with disabilities. In explaining these provisions, the Committee on Labor and Human Resources stated in its Report:

Like the growing population of elderly in the United States, there is also a growth in the number of elderly persons with disabilities, including those with severe or lifelong disabilities. Although many of their needs are similar to the needs of other older persons, older individuals with disabilities face a number of unique problems which are often compounded by having had a disability over a lifetime. The Committee recognizes that older individuals with disabilities are already included under the Act, but believes that reaffirming their inclusion and focusing services to meet their special needs is appropriate.<sup>12</sup>

The law required State plans on aging to assure that the State agency will coordinate planning, identification, and assessment of needs and services for older individuals with disabilities, particu-

<sup>12</sup> U.S. Congress. Senate. Committee on Labor and Human Resources, p. 51.

larly those with severe disabilities, with State agencies having primary responsibility for these groups. (These may include, for example, agencies having responsibility for habilitation and health services.) In addition, area agencies are required to inform disabled elderly persons of services under the Act.

Another provision allows nutrition service administrators to offer meals to disabled individuals who reside with and accompany older persons who are eligible under the Act.

#### D. COORDINATION OF COMMUNITY-BASED LONG-TERM CARE SERVICES

Public Law 100-175 also added a requirement that the State plan assure that area agencies will conduct efforts to facilitate the coordination of community-based long-term care services for the following groups: Older individuals who reside at home and are at risk of institutionalization because of limitations on their ability to function independently; older individuals who are patients in hospitals and are at risk of prolonged institutionalization; and, older individuals who are patients in long-term care facilities but who could return to their homes if community-based services were provided.

### 10. AREA AGENCY ADMINISTRATION

The law contained two provisions with respect to the administration of the area agency. First, it raised the allowable proportion of title III services funds which may be used for area plan administration. Prior law had allowed up to 8.5 percent of a State's allotment for services to be used for administration. Public Law 100-175 raised the allowable proportion to 10 percent.

Second, the law clarified that when an area agency is located within an umbrella agency it must act only as the area agency on aging. Specifically, the law was amended to require that when an area agency is part of a unit of general purpose local government, part of any combination of general purpose local government, or part of any public or nonprofit private agency, the entity designated to be the area agency must function only as the area agency on aging. The Conference Report on H.R. 1451 indicated that an area agency may continue to be housed within an umbrella agency, as long as it remains an identifiable unit. The Report further stated that an area agency located within an umbrella unit may absorb its equitable share of expenses incurred by the operation of the aging program as allowable under an indirect cost allocation plan, provided such a plan has not been explicitly rejected by a relevant Federal agency.<sup>13</sup>

### 11. PUBLIC HEARINGS REQUIREMENTS

The law contained requirements that State and area agencies will conduct periodic public hearings on activities carried out under State and area plans on aging. Prior law contained no specific requirement for public hearings.

<sup>13</sup> U.S. Congress. House. Conference Report, p. 68.

## 12. CONFIDENTIALITY OF INFORMATION REGARDING LEGAL ASSISTANCE

Public Law 100-175 added new requirements to protect the confidentiality of clients of legal assistance services. It prohibits States, State agencies on aging, and area agencies on aging from requiring any title III legal assistance providers to reveal information protected by the attorney-client privilege.

In explaining this provision, the Report of the House Committee on Education and Labor stated:

The Committee's intent in including the new confidentiality provisions is to clarify that names, addresses, and telephone numbers of clients served with Older Americans Act funds will remain privileged information. The Committee understands that some legal assistance providers may be reluctant to contract with area agencies without this assurance. Many older individuals might be hesitant to ask for the legal advice and counsel they need if they thought others would have access to their identifying information. The assurance of confidentiality makes it easier for older persons to seek the assistance they need to resolve their legal problems, and makes it easier for legal assistance providers to serve them in good faith.<sup>14</sup>

## 13. AREA AGENCY ADVISORY COUNCIL MEMBERSHIP

Prior law required each area agency to establish an advisory council and specified membership composition, including older participants under the Act and their representatives, and local elected officials. Public Law 100-175 added a provision to expand the membership to include providers of veterans' health care, if appropriate.

## 14. OUTREACH REGARDING TUITION-FREE POST-SECONDARY EDUCATION

Under Public Law 100-175 area agencies are required to compile information on the courses available at institutions of higher education in their planning and services areas and those that are available at reduced or no fees. This information is to be made available to older persons at multipurpose senior centers, congregate nutrition sites, and other appropriate sites.

## 15. ADULT DAY CARE AND RESPITE SERVICES PROVIDED BY VOLUNTEERS

Prior law requires area agencies on aging, where possible, to assist older persons to volunteer in child day care programs. Public Law 100-175 added to this provision, a stipulation that area agencies also assist in arranging for older persons to volunteer in adult day care programs and in respite care services for families.

## 16. SERVICES UNDER TITLE III TO OLDER INDIANS

Public Law 100-175 added a number of new provisions requiring State and area agencies to focus on the needs of older Indians, including requirements that the distribution of this group be consid-

<sup>14</sup> U.S. Congress. House. Committee on Education and Labor, p. 12.

ered when planning services within the State and the planning and service area. The law also added a new provision requiring area agencies to conduct outreach activities to identify older Indians and inform them of services under the Act if their population is a significant one within the planning and service area.

Other provisions to clarify the eligibility of Indians to receive services under both title III and the title IV grant program for Indians were added. For a description of these provisions, see section of this report on title VI.

#### 17. TRANSFER OF FUNDS BETWEEN TITLE III FUNDING CATEGORIES

State agencies on aging receive separate allotments of funds for supportive services (title III-B) and nutrition services (title III-C) and in recent years they have been allowed to transfer funds between these service categories. The 1984 amendments to the Act specified that States could transfer up to 30 percent of these separately allotted funds between the two categories in fiscal year 1987 (with lower percentages the prior 2 fiscal years). Public Law 100-175 set the allowable transfer at 30 percent for the period of the reauthorization (through fiscal year 1991). The Conference Report clarified that this transfer authority applies only to the supportive services and nutrition services categories.<sup>15</sup>

#### 18. INFORMATION ON ASSISTIVE TECHNOLOGY

Under the listing of services which may be provided with title III-B supportive services funds, Public Law 100-175 includes reference to "assistive technology." This is defined as technology, engineering methodologies, or scientific principles appropriate to meet the needs of, and address the barriers confronted by, older individuals with functional limitations. In describing the need for assistive technology services, the Report of the Committee on Labor and Human Resources stated:

Technology can have a significant impact on the functional ability and the vitality of older Americans and assist them to maintain their independence, maximize their options, and improve the quality of their lives. . . . [Assistive technology] services constitute a systematic approach for enabling older individuals to obtain the products, services and information they need in order to appropriately use technology to compensate for functional limitations or disabilities.<sup>16</sup>

#### 19. REDUCTIONS IN PAYMENTS TO STATES

Prior law contained a provision which reduced a State's title III allotment if expenditures from State sources decreased from the amount expended the prior year. Public Law 100-175 changed this provision to specify that the reduction will take place if the amount expended by the State is less than the average annual amount expended over the prior 3 years rather than just the previous year.

<sup>15</sup> U.S. Congress. House. Conference Report, p. 83.

<sup>16</sup> U.S. Congress. Senate. Committee on Labor and Human Resources, p. 53.

## D. TITLE IV—TRAINING, RESEARCH, AND DISCRETIONARY PROJECTS AND PROGRAMS

The title IV program authorizes the Commissioner to award funds for a broad array of training, research, and demonstration programs in the field of aging.

Public Law 100-175 added authority under title IV for several new demonstration authorities, including areas related to health education and promotion, volunteerism, coordination of the long-term care ombudsman program with protection and advocacy systems for the disabled, and consumer protection activities in long-term care. For these latter two areas, the law authorized separate funding amounts distinct from the overall title IV funding. The law also made mandatory the funding of long-term care gerontology centers which were previously supported at the discretion of the Commissioner. Various provisions of title IV were modified to emphasize service to low-income and minority older persons.

### 1. PROTOTYPE HEALTH EDUCATION AND PROMOTION PROGRAMS

As discussed in the section on title III above, Public Law 100-175 added new authority enabling State and area agencies to undertake health education and promotion activities. At the same time the law repealed title VII, created by the 1984 amendments to the Act, which required the Secretary of DHHS to establish a personal health education and training program in AoA through institutions of higher education. This program was never funded. To replace the initiative embodied in the title VII program, Public Law 100-175 added a provision giving the Commissioner authority to make title IV funds available to institutions of higher education for the purpose of designing and developing prototype health education and promotion programs for use by State and area agencies which are implementing preventive health service programs.

### 2. VOLUNTEER OPPORTUNITIES

The law added new authority for the conduct of various projects to expand innovative volunteer opportunities for older persons. It requires the Commissioner to give special consideration to projects which will promote intergenerational activities where older persons serve as volunteers in tutorial services in elementary and special schools, after school programs for latch key children, and day care programs. Special consideration is also to be given to volunteer service credit projects permitting elderly volunteers to earn credits for services which they furnish and which may later be redeemed by them for similar volunteer services. The law specifies that these latter projects are to be operated in conjunction with ACTION.

### 3. LONG-TERM CARE OMBUDSMAN AND PROTECTION AND ADVOCACY SYSTEM DEMONSTRATION PROJECTS

A new provision authorizes the Commissioner to conduct projects to demonstrate and evaluate cooperative efforts between the State long-term care ombudsman program and the State protection and advocacy system for the developmentally disabled and mentally ill

established under the Developmental Disabilities Assistance and Bill of Rights Act and under the Protection and Advocacy for Mentally Ill Individuals Act of 1986. The law authorizes \$1 million for fiscal year 1989 to carry out this activity in 3 to 10 States, and specifies that these funds may be used in fiscal year 1990. The Report of the Conferees on H.R. 1451 indicated that examples of the types of joint projects to be funded are structured evaluations of the need for additional mental health services, programs to encourage nursing home residents to take part in their habilitation plan, and the development of programs to prepare individuals to live in nursing homes.<sup>17</sup> Funding for these projects is subject to the appropriations trigger specified in the law, that is, funds may not be appropriated to carry out these projects unless total appropriations for programs funded in fiscal year 1987 increase by at least 5 percent over the previous fiscal year.

In addition to this demonstration authority, the amendments added provisions intended to place more emphasis on the needs of disabled populations in the conduct of Older Americans Act training, research, and demonstration activities.

#### 4. CONSUMER PROTECTION DEMONSTRATION PROJECTS FOR SERVICES PROVIDED IN THE HOME

The Commissioner is authorized to award title IV funds to demonstrate and evaluate the effectiveness of consumer protection for older persons who receive publicly funded services (exclusive of medical services) at home. These projects may provide consumer protection through State and local ombudsmen, legal assistance agencies, and other agencies and may include consumer education, the use of hotlines, receipt and resolution of consumer complaints, and advocacy. Grants are authorized in 6 to 10 States.

The Commissioner is required to report to Congress on the results of these demonstration projects and to make recommendations as to the desirability and feasibility of carrying out a home care consumer protection program on a nationwide basis.

To carry out this program, the law authorizes \$2 million in each of fiscal years 1989 and 1990. Funding is subject to the appropriations trigger.

#### 5. SPECIAL PROJECTS IN COMPREHENSIVE LONG-TERM CARE

The law makes mandatory the prior law discretionary authority of the Commissioner to support special projects in comprehensive long-term care. In explaining the rationale for making this a required title IV activity, the Report of the Committee on Education and Labor states:

In requiring under Title IV (section 423(a)(1)) that the Commissioner make grants for special projects in comprehensive long-term care, it is the Committee's expectation that such grants be made to fund centers, and not simply individual projects, specializing in long-term care research, education, and training. The Committee further expects: That such grants be

<sup>17</sup> U.S. Congress. House. Conference Report, p. 80.

awarded on a competitive basis; that center activities place particular emphasis on research, education, and training that support providers and services funded under the Older Americans Act; that center activities focus on areas of speciality within long-term care and not be duplicative or limited to a particular geographical region; and the Commissioner will formally evaluate center performance annually and factor results into renewal decisions.<sup>18</sup>

## 6. EMPHASIS ON SERVING OLDER MINORITY GROUPS UNDER TITLE IV

In various sections of title IV, the law added provisions intended to place more emphasis on serving the needs of older minority group members. For example, the law was amended to assure that title IV grants and contracts are equitably awarded to agencies, organizations, and institutions representing minorities, and that training activities and multidisciplinary centers of gerontology focus on minorities.

## E. TITLE V—COMMUNITY SERVICE EMPLOYMENT FOR OLDER AMERICANS

The Community Service Employment program authorizes funds to subsidize part-time community service jobs for unemployed, low-income persons 55 years of age or older. Funds are awarded to eight national organizations and to State agencies. Enrollees are paid at the Federal or State minimum wage or the local prevailing rate of pay for similar employment. The amendments in Public Law 100-175, among other things, changed the allowable administrative cost cap for the program, and liberalized eligibility requirements under other Federal programs for persons who may be receiving wages under the title V program.

### 1. ADMINISTRATIVE COST CAP

The 1984 amendments to the Act for the first time set a legislatively imposed cap on the amount of title V funds allowable for administration. That legislation set the maximum amount for administration at 13.5 percent for fiscal year 1986, to be lowered to 12 percent in fiscal year 1987 and succeeding years; however, it allowed the Secretary of Labor to waive these requirements and raise the cap to 15 percent if necessary. Public Law 100-175 modified the prior law by setting the administrative cap at 13.5 percent, but retained the provision allowing the Secretary to raise the cap to 15 percent. It further stipulated that the Secretary allow a higher proportion of title V funds for administration, up to 15 percent, under the following circumstances: When major administrative cost increases are incurred in necessary program components, including liability insurance, workers' compensation, costs associated with achieving unsubsidized placement goals, and other required activities; when the number of employment positions in the project or minority eligible participants will decline if the cap is not in-

creased; or, when the project size is so small that the costs of administration necessarily exceed 13.5 percent.

## 2. CONSIDERATION OF POVERTY AND UNEMPLOYMENT RATES IN PROVIDING EMPLOYMENT SERVICES

Prior law required that each title V project provide assurances that to the extent feasible, it will serve the needs of minority, Indian, and limited-English speaking eligible individuals in proportion to their numbers in the State. Public Law 100-175 added to this provision a stipulation that projects take into consideration the rates of poverty and unemployment when serving eligible persons in the State.

## 3. AWARD OF FUNDS TO NATIONAL INDIAN AGING ORGANIZATIONS AND NATIONAL PACIFIC ISLAND AND ASIAN AMERICAN AGING ORGANIZATIONS

Public Law 100-175 added a new provision requiring the Secretary of Labor to award title V funds to assist older Indians and Pacific Islanders and Asian Americans in obtaining employment services. It added a requirement that some title V funds be reserved for national grants or contracts with public or nonprofit national Indian aging organizations and national public or nonprofit Pacific Island and Asian American aging organizations. This provision is to become effective in the first fiscal year in which title V appropriations exceed the fiscal year 1987 level.

The law defines Pacific Island and Asian Americans as Americans having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands.

## 4. DISTRIBUTION OF INFORMATION UNDER THE AGE DISCRIMINATION IN EMPLOYMENT ACT

The law requires the Secretary of Labor and title V grantees to distribute to program participants information to help them identify age discrimination and to understand their rights under the Age Discrimination in Employment Act. (This Act prohibits discrimination in employment on the basis of age, including mandatory retirement, for most workers over the age of 40.) These informational materials are to be supplied to title V grantees and enrollees at no cost.

## 5. EFFECT OF TITLE V INCOME ON PARTICIPATION IN FEDERAL HOUSING AND FOOD STAMP PROGRAMS

Under prior law, wages received by title V enrollees were counted when determining eligibility for Federal housing and Food Stamp programs. The effect of this requirement was that title V enrollees could be determined ineligible or have benefits under these programs reduced to some extent. Public Law 100-175 added a new provision to exclude title V wages received by enrollees from consideration when determining eligibility for Federal housing and Food Stamp programs. (Eligibility for other benefit programs was not affected.) The Conference Report on H.R. 1451 clarified that this provision is intended to apply to determination of eligibility as

well as to the determination of the level of subsidy for which an individual qualifies.<sup>19</sup>

## F. TITLE VI—GRANTS FOR NATIVE AMERICANS

Prior to the enactment of the Older Americans Act Amendments of 1987, title VI of the Act authorized funds for grants to Indian tribes for supportive and nutrition services that are comparable to those provided under title III. Public Law 100-175 expanded the title to include a new Part B authorizing funds for Native Hawaiians. It also added a statement expressing the sense of Congress that older Indians, Alaskan Natives, and Native Hawaiians are a vital resource entitled to all benefits and services available and that services should be provided to them in a manner that preserves and restores their dignity, self-respect, and cultural identities.

### 1. PROVISIONS RELATING TO OLDER INDIANS: CONGRESSIONAL STATEMENT OF FINDINGS AND ELIGIBILITY FOR ASSISTANCE

Public Law 100-175 added a new section setting out 10 findings of Congress regarding the status of older Indians. These findings state the following: Older Indians are a rapidly increasing population in the United States; suffer from high unemployment; have a poverty rate estimated at 61 percent; have a life expectancy between 3 and 4 years less than the general population; lack sufficient nursing homes, other long-term care facilities, and other health care facilities; lack sufficient Indian area agencies on aging; frequently live in substandard and over-crowded housing; and receive less than adequate health care. In addition, Congress stated that less than 19 percent of the total national Indian elderly population is served by the title VI program, and that less than 1 percent of the participants under the State and area agency on aging program (title III of the Act) are older Indians.

The amendments changed prior law provisions on eligibility for title VI services. The first provision amended the law to make a tribal organization eligible for title VI funds if it has at least 50 older Indians, as compared to the prior law provision which specified that the tribal organization must have at least 60 older Indians in order to receive funds. Second, Public Law 100-175 eliminated prior law provisions prohibiting individuals or tribal organizations receiving services or funds under title VI from also benefiting from the title III program. As amended, the law now allows older Indians to receive assistance under both the title VI and title III programs. The Report of the Committee on Education and Labor explained that this change corrects an "unintended effect of existing law which can result in making ineligible for Title III services older Indians who could be served by a Title VI grant but are not, or in making the older Indians who receive only one type of service under Title VI ineligible for any other services under Title III." The Report also indicated that the change was intended to

---

assist tribal organizations and area agencies to broaden the scope of cooperative efforts.<sup>20</sup>

## 2. PROVISIONS RELATING TO NATIVE HAWAIIANS: CONGRESSIONAL STATEMENT OF FINDINGS AND ELIGIBILITY FOR ASSISTANCE

The law added a new part B, Native Hawaiian Program, and specified separate authorizations of appropriations for it within the overall authorization amount for title VI. (See table 1 for amounts authorized.) Part B is prefaced by a statement of congressional findings on the status of older Native Hawaiians. These findings state that this group has a life expectancy 10 years less than any other ethnic group in the State of Hawaii; ranks lowest on 9 of 11 standard health indices for all ethnic groups in the State; is often unaware of social services; and has a poverty rate of 34 percent.

The new part B defines organizations eligible for funds and grant requirements. It specifies that a public or nonprofit organization which has the capacity to provide services to Hawaiian Natives is eligible if the organization will serve at least 50 persons aged 60 or older, and the organization can deliver supportive services, including nutrition services. Applications for part B funds must provide that the organization will: Evaluate the need for services among those to be represented by the organization; coordinate activities with the State agency on aging; adhere to reporting requirements to be specified by the Commissioner; periodically evaluate its activities; establish objectives and indicate how they will be achieved; establish and maintain information and referral services for older Hawaiians; establish a preference for hiring older Hawaiians for full- or part-time positions, where feasible; make any legal or ombudsman services to be provided under the grant meet the requirements established for such services under title III of the Act; and use proper and efficient methods of administration and fiscal and accounting procedures.

The Commissioner is required to approve any application which meets the grant requirements for at least a 12-month period. If an application is not approved, the Commissioner is required to provide written objections within 60 days after the decision not to fund; provide technical assistance to the applicant to overcome the objections; and afford the organization a hearing.

## G. TITLE VII—OLDER AMERICANS PERSONAL HEALTH EDUCATION AND TRAINING PROGRAM

This title, added by the 1984 amendments to the Act, never received an appropriation and was repealed by Public Law 100-175. However, an amendment added by the new law to title IV of the Act was intended to preserve its intent. As described earlier, this title IV provision authorizes the Commissioner to commit funds to institutions of higher education to develop prototype health education and promotion programs to be used by the network on aging.

<sup>20</sup> U.S. Congress. House. Committee on Education and Labor, p. 16. The report of the Committee on Labor and Human Resources on S. 557 contained almost identical language.

## H. OTHER PROVISIONS

This section summarizes other provisions of Public Law 100-175 which affect the elderly.

### 1. CONSUMER PRICE INDEX FOR OLDER AMERICANS

Public Law 100-175 requires the Secretary of Labor to develop an index of consumer prices to reflect the consumption expenditures for persons 62 years or older. The Secretary is to provide this index to Congress within 180 days after the enactment of Public Law 100-175, including a report on the research necessary to develop and accurately measure the rate of inflation for older persons. The Conference Report on the law indicates that this is to be a one-time report, not an ongoing expectation, intended for use by Congress in considering the advisability of continuing such an index.<sup>21</sup>

### 2. WHITE HOUSE CONFERENCE ON AGING

Public Law 100-175 authorizes the President to call a White House Conference on Aging in 1991. The conference is to be planned and conducted under the direction of the Secretary of DHHS in cooperation with the Commissioner on Aging, the Director of the National Institute on Aging, and heads of other appropriate Federal departments and agencies.

As set forth by the law, the purpose of the conference is: To increase awareness of the contributions of older individuals to society; to identify problems as well as the well-being of older individuals; to develop recommendations for the coordination of Federal policy with State and local needs; to develop specific and comprehensive recommendations for both executive and legislative action to maintain and improve the well-being of older individuals; and, to review the status of recommendations adopted at previous White House conferences. The law specifies that conference recommendations are not to be influenced by any appointing authority or by any special interest, but be the result of independent judgment of the conference.

The conference is to bring together representatives of Federal, State, and local governments, persons working in the field of aging, and the general public, particularly older persons. Delegates are to be selected without regard to political affiliation or past partisan activity and are to represent the spectrum of thought in the field of aging. Conference committees are to be composed of professional and public members, and are to include low-income and minority group representation. A majority of the public members of committees are to be 55 years or older.

The law also sets forth requirements as to the conference agenda and reporting requirements.

### 3. AMENDMENTS TO THE NATIONAL SCHOOL LUNCH ACT

The law amends the National School Lunch Act to permit adult day care centers to receive reimbursement under the Child Care Food program for meals or meal supplements (snacks) to persons 60

<sup>21</sup> U.S. Congress. House. Conference Report, p. 84.

years or older or to chronically impaired disabled persons. (Previously the Child Care Food program provided funds for food service only to children in child care centers and family and group day care homes.) Program sponsorship for adult day care centers is limited to public and private nonprofit sponsors, and for-profit sponsors if they receive compensation for adult day care under the Medicaid or Social Services Block Grant (SSBG) programs for at least 25 percent of their enrollees. In order to participate, day care centers must be licensed or approved by Federal, State, or local authorities to provide care in a group setting on a less than 24-hour basis and maintain professional management responsibility for all services. Centers determined eligible to receive funds under this provision may also receive funds under the Older Americans Act nutrition programs, but may not receive benefits or reimbursement from both programs for the same meal served.

#### 4. ALZHEIMER'S DISEASE TRIALS

The Director of the National Institute on Aging is authorized to conduct clinical trials on the efficacy of using therapeutic agents to treat Alzheimer's disease, to retard the progression of symptoms of the disease, or to improve the functioning of Alzheimer's patients.

#### 5. DEMONSTRATION PROJECTS FOR HEALTH CARE SERVICES IN THE HOME UNDER THE PUBLIC HEALTH SERVICE ACT

The Public Health Service Act was amended to authorize 3-year demonstration projects to expand health care services in the home. The amendment consists of two parts. The first authorizes the Secretary of DHHS to award funds to at least three, but no more than five States to seek ways to expand health care services in the home for low-income persons who might otherwise require lengthy hospital stays or institutionalization. Funds would support projects to identify the need for, to finance, and to coordinate skilled medical and/or related health services, but are not to be used to pay for currently financed public or private health care services. At least 25 percent of individuals to receive services must be 65 years or older.

The second part of this amendment authorizes the Secretary to award funds for demonstration projects in at least three, but no more than five, States to assist individuals with Alzheimer's disease and their families. The projects are to be designed to coordinate activities in the State relating to diagnosis, treatment, care management, respite care, legal counseling, and education services on behalf of Alzheimer's patients and their families, to provide home health care and other services, and to develop information programs on Alzheimer's disease.

For each of these parts, the law authorizes \$5 million for each of fiscal years 1988, 1989, and 1990.

#### I. EFFECTIVE DATES

The Older Americans Act Amendments were effective October 1, 1987. However, the amendments do not apply to any State or area plan on aging approved for any fiscal year which began before the enactment of Public Law 100-175 (November 29, 1987).
