PREFACE

Since its enactment in 1965, the Older Americans Act (OAA) (the Act) has been reauthorized on 10 occasions, most recently in 1987. For the last 26 years, the OAA has grown substantially and now authorizes many diverse and important services, including congregate and home-delivered nutrition, employment, legal assistance, the long-term care ombudsman program, homemaker services, transportation, and information and referral systems.

In preparation for the 1991 reauthorization of the OAA, the Special Committee on Aging convened a series of workshops in 1990 to identify policy changes that might be necessary or desirable as part of the reauthorization process. These forums brought together Federal, State, and local government officials, social service providers, volunteer caregivers, academicians, and elderly persons who utilize social services provided under the Act. Workshop participants took a fresh look at the OAA, asked hard questions about its effectiveness, debated tough issues regarding its future, and explored policy options for the reauthorization process. While many significant policy changes were suggested, the central finding of the workshop series was that the OAA has been tremendously successful in serving our Nation's elderly citizens and their caregivers. A record of the workshop proceedings may be obtained from the Committee (Committee Print, Serial #101-I).

The Committee's workshop series focused on a variety of topics within the purview of the OAA including targeting of services to low-income and minority elders, information and referral systems, mandatory and voluntary cost-sharing, legal assistance services, the long-term care ombudsman program, and the role of the Administration on Aging (AoA). As the continuing Federal budget deficit will greatly restrict the availability of significantly greater funding for major new authorized services, these workshops were designed to examine the performance of current OAA programs and how to strengthen them, and, where economically feasible, how to expand them.

The following report presents specific findings from the workshop series and makes policy recommendations for the 1991 reauthorization. It is my hope that this report will prove useful to older Americans, policymakers, and aging advocates as they engage in this year's reauthorization debate.

DAVID PRYOR,
Chairman.

MAJORITY STAFF REPORT: OLDER AMERICANS ACT: 25 YEARS OF ACHIEVEMENT

INTRODUCTION

The Older Americans Act (OAA) (the Act), enacted in 1965, is the major Federal vehicle for the organization and delivery of supportive, nutrition, and other social services to older individuals. To provide these services, the OAA created and subsequently nurtured the development of the Aging Network—a nationwide system of Federal, State, and local agencies dedicated to providing services to senior citizens.

At the Federal level, the Network consists of the Administration on Aging (AoA) within the Department of Health and Human Services, which administers the majority of the OAA programs and is charged with acting as the chief Federal agency advocate for the elderly. AoA, in turn, oversees a network of State and area agencies on aging. The State and area agencies on aging maintain responsibility for funding, coordinating, and managing the broad array of services, programs, and other initiatives for the elderly authorized by the OAA. Except for priority areas specified in the Act (access services, in-home services, and legal assistance), OAA services are designed and funded in response to the needs of the elderly in individual communities.

Under the the OAA structure, State units on aging (SUAs) receive Federal funds for implementation of State plans on aging which the AoA has approved. Area agencies on aging (AAAs) then develop and fund services based upon State-approved area plans on aging. Primarily through subgrants and contracts with local service providers, AAAs deliver social services to the elderly population within their jurisdictions.

The Aging Network has grown dramatically since 1965, and now includes an aging unit in each State, approximately 670 area agencies on aging, 193 Native American grantees, and more than 25,000 local service providers. The OAA also supports the sole federally sponsored job creation program benefitting low-income older persons (Senior Community Service Employment Program) and has served as the vehicle for the education and training of thousands of professionals in the field of aging.

Budget constraints coupled with past Administrations' opposition to expanding or even maintaining funding for OAA programs in the last three reauthorizations have hampered the Act's ability to serve an ever increasing number of elderly persons. As a result, funding for the OAA slowed dramatically during the 1980's and has remained virtually static for the last few years (for current funding see Appendix B). The fact that services were not subject to

severe cuts can be attributed to widespread bipartisan Congressional support, especially for nutrition and senior employment. This broad Congressional support for the Act continued during the 1987 reauthorization and is expected to continue through the 1991 reauthorization.

FINDINGS AND POLICY RECOMMENDATIONS OF THE 1990 WORKSHOPS

FINDINGS

A. *INFORMATION AND REFERRAL (I&R)*: The OAA specifically requires area agencies on aging to provide elderly persons and their caregivers with information about existing social and health services available in their communities and to assure that such persons are referred to appropriate provider agencies. Although designated a priority service under Title III of the Act, many workshop participants stated that State and area agencies on aging fail to devote sufficient resources to I&R, one of the most vital functions of the OAA, i.e., linking older Americans to the services they need.

Finding 1: Despite the priority status afforded information and referral under Title III of the Act, current statutory language provides no clear definition of what I&R should be. As a result, I&R services, in practice, range anywhere from providing an elderly individual with a telephone number to offering extensive case management and assessment. (General Accounting Office, Summary of Major Findings of Study on OAA I&R Programs, June 10, 1991.) Specific concerns include:

- Current provisions of the Act pertaining to I&R fail to provide area agencies on aging with sufficient direction for developing programs which can assist individuals in finding and obtaining the services they need.
- Current provisions of the Act pertaining to I&R fail to emphasize the importance of determining individual needs when linking older Americans to appropriate services.
- I&R systems currently fail to employ effective mechanisms for tracking individuals who enter their systems in order to ensure that these individuals are linked to the services they need, as well as to facilitate the collection of accurate data pertaining to characteristics of program participants.

RECOMMENDATIONS

Recommendation 1: The definition of I&R should be expanded to emphasize the critical importance of linking older individuals and their caregivers to the services they need.

Recommendation 2: The term "information and referral" should be renamed "information and assistance", in order to draw attention to the crucial role that the Aging Network should play in providing "assistance" to elderly persons who need information about available services.

FINDINGS

B. LONG-TERM CARE AND THE PEPPER COMMISSION: According to the U.S. Bureau of the Census, by the year 2050, there will be 67.5 million persons over 65 years of age. The rapid aging of our population will only exacerbate the long-term care dilemma and underscores the importance of planning for the future of our nation's elderly.

In 1990, the U.S. Bipartisan Commission on Comprehensive Health Care (Pepper Commission) released its blueprint for developing a nationwide long-term care system. A major component of the Pepper Commission Report's recommendations was the establishment of a service infrastructure which would assess individuals and manage and coordinate their long-term care services.

For the past 25 years, the Aging Network established by the OAA has served as the focal point for providing services to senior citizens. Many interested persons contend that the Aging Network may be well-suited to serve as the infrastructure for a national long-term care system.

Finding 1: There is no coordinated system of providing long-term care services to America's elderly. (Testimony before the Special Committee on Aging, Workshop #1, January 31, 1990, OAA Reauthorization.)

Finding 2: Coordination and cooperation among public and private service providers would be required in order to reduce unnecessary duplication of services and programs, to increase efficiency and to establish an effective, nationwide long-term care system.

Finding 3: Congress has not fully explored what role the already established Aging Network could play in the development of a long-term care system that begins to meet the many needs of the Nation's chronically ill. (Testimony before the Special Committee on Aging, Workshop #1, January 31, 1990, OAA Reauthorization; Testimony before the Senate Labor and Human Resources Subcommittee on Aging, April 26, 1991, Long-Term Care and the Aging Network.)

RECOMMENDATIONS

Recommendation 1: In order to evaluate the appropriate role of the Aging Network in any future national long-term care system, demonstration projects should be authorized to determine whether the Network can serve as the infrastructure for implementing some of the recommendations for long-term care developed by the Pepper Commission. Any such demonstration projects should:

- Evaluate the ability of area agencies to serve as a central point for older Americans to access a long-term care system, providing assessment, referral, and management of services, as well as coordination with other appropriate public and private entities that fund long-term care services;
- Explore area agencies' ability to serve the disabled and under-60 population; and

- Not preclude AAAs from contracting out to other appropriate public and private agencies to develop and implement a comprehensive and coordinated system of long-term care services.

FINDINGS

C. *SENIOR TRANSPORTATION*: Title III authorizes a number of supportive service programs, including transportation. Transportation, however, has often been overshadowed by the many other important and diverse services provided under the Act. Yet it is OAA transportation which has proved critical to seniors in accessing the wide array of services available to them.

In conjunction with its workshop series, the Special Committee on Aging conducted a field hearing in Little Rock, Arkansas, on August 21, 1990, which featured a panel of witnesses who addressed reauthorization of OAA transportation programs. The panel provided extraordinary testimony attesting to the vital importance of transportation services authorized under Title III of the Act.

Finding 1: Transportation is one of the greatest unmet needs of older Americans. (Administration on Aging's 1990 unmet needs study and a 1990 survey by the National Association of Area Agencies on Aging.)

Finding 2: Although transportation is recognized as a priority service under the OAA, Congress has failed to emphasize the critical role it plays in linking individuals to the services they need to live with independence and dignity.

Finding 3: Transportation is of particular concern in rural America where elderly individuals are frequently shut-ins, are unable to drive, and/or are without alternative means of access to health care or other necessary social services. (Testimony before the Senate Special Committee on Aging, August 15, 1990 field hearing, Long-Term Care in the Nineties: A Spotlight on Rural America; National Association of Area Agencies on Aging, Testimony before the House Select Committee on Aging Subcommittee on Human Services, January 29, 1991, Transportation in the Nineties: Keeping America's Elderly Moving.) Specific concerns include:

- Approximately 50 percent of rural counties in the United States do not have a public transit system.
- Nearly 60 percent of the elderly are unlicensed to drive.

Finding 4: For many elderly individuals, transportation is an indispensable lifeline, providing access to hospitals and other health care facilities for needed treatments. (Testimony before the Senate Special Committee on Aging, August 15, 1990 Field Hearing, Long-Term Care in the Nineties: A Spotlight on Rural America) Specific concerns include:

- Lack of adequate transportation, coupled with an increasing rate of hospital closures and relocation of physicians to urban areas, has drastically reduced rural elders' access to health care.
- Elderly persons frequently travel farther to obtain medical care than their urban counterparts.

RECOMMENDATIONS

Recommendation 1: A new subtitle should be established within Title III of the OAA devoted exclusively to senior transportation. A new subtitle could underscore the importance of transportation and serve as a vehicle for funding additional transportation services.

FINDINGS

D. LONG-TERM CARE OMBUDSMAN: The long-term care ombudsman program was developed in the early 1970's for the purpose of investigating and resolving the burgeoning number of complaints made by or on behalf of older residents in nursing homes. In the mid 1970's, the Administration on Aging expanded the program by awarding demonstration grants to several States to support their ombudsman activities. In 1978, the Act was amended to require State aging plans to include a long-term care ombudsman program.

The 1981 reauthorization of the OAA expanded the role of the ombudsman to include complaint resolution on behalf of board and care residents. Comprehensive amendments to the ombudsman program were added in 1987. Among other things, these amendments established a role for sub-state ombudsmen; prohibited conflicts of interest with State agencies; directed States to provide ombudsmen with adequate legal counsel to protect them from liability; and prohibited nursing home operators from interfering with ombudsman activities or retaliating against ombudsmen.

Although ombudsman programs have experienced great successes in many jurisdictions, virtually all ombudsmen report that they receive insufficient funding to assure an adequate "presence" in long-term care facilities within their jurisdictions. As a result of this inadequate funding, ombudsman programs turn to volunteers who comprise approximately 88 percent of all ombudsman program staff. According to full-time ombudsmen, recruiting and retaining volunteers remain constant challenges.

Finding 1: The current capacity of the long-term care ombudsman programs cannot meet the overall level of service that was envisioned by the OAA. (Testimony before the Senate Special Committee on Aging, Workshop #3, July 28, 1990, Barriers to Effective Advocacy: Ombudsman and Legal Services Experiences.) Specific concerns include:

- The current shortage in trained ombudsmen has created a dangerous gap in ombudsman services provided to residents of nursing homes and board and care facilities.
- Sustaining an adequate number of volunteer ombudsmen requires a substantial amount of training and professional support.
- Without regular volunteer ombudsman visits to long-term care facilities, many ombudsman programs would find it very difficult to collect necessary information or engage in effective advocacy.

Finding 2: Strong ties between the long-term care ombudsman program and the legal assistance network have not been established. Consequently, shared priorities between the pro-

grams have not been identified. (Testimony before the Senate Special Committee on Aging, Workshop #3, June 28, 1990, Barriers to Effective Advocacy: Ombudsman and Legal Services Experiences.) Specific concerns include:

- Residents of nursing homes and board and care facilities do not have access to a broad range of elder services, including legal assistance.
- Ombudsmen sued in the performance of their duties frequently need legal representation and are unable to receive it.
- Ombudsmen do not have access to legal counsel on a daily basis.
- Legal counsel is often unavailable to ombudsmen, thereby hindering their ability to effectively represent the concerns of long-term care residents.

Finding 3: In many areas, the long-term care ombudsman program, protection and advocacy systems for the developmentally disabled and mentally ill (P&A), and legal assistance programs do not work cooperatively and collaboratively on behalf of older persons in their communities. (Testimony before the Senate Special Committee on Aging, Workshop #3, June 28, 1990, Barriers to Effective Advocacy: Ombudsman and Legal Services Experiences.) Specific concerns include:

- P&A systems are not maximizing their potential for providing needed legal back-up to ombudsmen.
- By failing to collaborate with P&A systems, ombudsmen have not realized their full capacity to serve developmentally disabled and mentally ill older persons.

Finding 4: Recently funded elder abuse provisions within Title III-G fail to fully protect the confidentiality of victims' records. Currently under Section 371(4) of the OAA, State elder abuse programs must ensure that information gathered with respect to a complaint remain confidential unless the release of this information is made to a public protective service agency or related agency. Receiving agencies, however, are not similarly required to keep that information confidential. It is in this respect that the provisions could be strengthened in order to more fully protect the confidentiality of victims' records.

RECOMMENDATIONS

Recommendation 1: A national program for recruiting, training, and retaining volunteer ombudsmen should be established in order to augment the efforts of current State long-term care ombudsman programs.

Recommendation 2: Title III should be amended to enable ombudsman programs to coordinate their efforts with legal assistance and protection and advocacy programs.

Recommendation 3: Title III-G should be modified to better protect the confidentiality of victims of elder abuse.

FINDINGS

E. LEGAL ASSISTANCE SERVICES: Legal assistance services were authorized under the original OAA legislation in 1965. Current law requires each area agency on aging to spend an "adequate proportion" of Federal Title III dollars on legal assistance. What constitutes an "adequate proportion" is determined by State agencies on aging. If, however, an area agency can demonstrate that adequate legal services are provided in its planning and service area, the State may grant a waiver to that area agency.

Finding 1: Despite its priority status under Title III, many AAAs have failed to treat legal assistance as an integral part of Title III services. (Testimony before the Senate Special Committee on Aging, Workshop #3, June 28, 1990, Barriers to Effective Advocacy: Ombudsman and Legal Services Experiences.) Specific concerns include:

- A general lack of understanding as to what constitutes "adequate" legal services has hampered the development of legal assistance programs which include sufficient outreach, targeting and community education components.
- Too often, legal assistance dollars are used to fund private attorneys who fail to reach older Americans in greatest economic or social need. Anecdotal evidence suggests that such providers tend to focus upon nonessential legal problems (e.g., wills).

Finding 2: In many cases, adequate legal services programs have not been developed because the area agencies do not fully appreciate the nature of legal assistance delivery or the contributions legal assistance can make in the lives of elderly Americans. (Testimony before the Senate Special Committee on Aging, Workshop #3, June 28, 1990, Barriers to Effective Advocacy: Ombudsman and Legal Services Experiences.)

Finding 3: Area agencies have not received the technical assistance necessary to develop legal assistance programs which can effectively identify and resolve legal problems of older individuals.

Finding 4: The OAA has never established a vehicle through which older Americans can voice their dissatisfaction with services provided under the Act.

Finding 5: Providers currently exercise complete discretion regarding the provision of OAA services.

Finding 6: As the number of elderly Americans grows and the population of frail elderly increases, the need for specialized legal expertise in areas of guardianships (defense), living wills, durable powers of attorney, and other areas of life planning, has grown substantially.

RECOMMENDATIONS

Recommendation 1: AoA should, in consultation with various legal assistance resource centers, develop guidelines for area agencies to follow in choosing and evaluating legal services grantees in order to provide area agencies with the necessary technical assistance to develop effective legal services programs.

Recommendation 2: Area agencies should establish some informal administrative grievance procedure through which the rights and interests of all elderly OAA beneficiaries can be adequately safeguarded.

Recommendation 3: The OAA should be amended to authorize demonstration project grants for the establishment of programs which will provide older persons with counseling in areas of life planning.

FINDINGS

F. THE LEGAL SERVICES DEVELOPER POSITION: Under Section 307(a)(150(c)) of the OAA, the State legal services developer position was established to develop a comprehensive, statewide legal services network, to coordinate legal assistance programs throughout a State, and to provide technical assistance to AAAs and legal services providers.

Finding 1: Data collected by the Special Committee on Aging revealed that there are virtually no legal services developers currently employed who have the knowledge, experience, and time sufficient for developing and expanding the capacity of States to maintain effective legal services networks. (OAA, Title III Legal Assistance Survey, Special Committee on Aging, presented at Workshop #3, June 28, 1990, Barriers to Effective Advocacy: Ombudsman and Legal Services Experiences.) Specific concerns include:

- Only 65 percent of legal services developers are employed on a full time basis.
- Only 38 percent of legal services developers hold a law degree.
- 34 States reported that the legal services developers works on issues other than those related to legal assistance.

RECOMMENDATIONS

Recommendation 1: AoA should develop a model job description for the legal services developer position in order to clearly establish the appropriate role of the legal services developer.

FINDINGS

G. ELEVATION OF THE COMMISSIONER ON AGING: The proper administrative placement of the Administration on Aging and the Commissioner on Aging has been a recurring issue in past reauthorizations. Since 1984, the Commissioner has reported directly to the Office of the Secretary of the Department of Health and Human Services. In 1987, the AoA was elevated to the same level of authority as assistant secretaries and other commissioners within the Department. Congress further amended the law to require that the Commissioner report directly to the Secretary rather than to the Office of the Secretary. Despite direct access to the Secretary, the Commissioner still does not exercise control over AoA's budget. This, in turn, has prevented Federal aging programs from receiving adequate administrative resources.

Finding 1: With scarce resources and little control over its budget, AoA has been unable to hire persons with expertise in areas of particular concern to older Americans. (Testimony before the Senate Special Committee on Aging, Workshop #4, October 18, 1991, Administration on Aging: Meeting the Challenge of A Graying America.) Specific concerns include:

- Lack of control over its salary and expense budget makes it difficult for AoA to release travel funds so that regional program directors can visit State agencies to evaluate, monitor, and provide technical assistance.
- Lack of control over its expense budget hinders AoA's ability to provide technical assistance to State agencies, area agencies, and service providers.

RECOMMENDATIONS

Recommendation 1: The status of the Commissioner on Aging should be elevated to Assistant Secretary in order to enhance AoA's ability to ensure that Federal aging programs can be an effective voice for older Americans.

FINDINGS

H. DATA COLLECTION: Advocates and persons working in the Aging Network report that little useful data are collected regarding OAA services and that agencies do not effectively share information among themselves. For example, no national data exist regarding funding levels for services authorized under the Act. In addition, AoA has failed to disseminate throughout the Aging Network information about innovative programs and best practices. Information sharing touches upon all levels of the Aging Network and is vital to the success of particular programs. Moreover it is essential for policymakers who are shaping the future direction of the Act.

Finding 1: There are no current and accurate data available pertaining to the characteristics of program participants.

Finding 2: There are no data available which effectively measure compliance with the various mandates of the OAA.

Finding 3: Analysis of data collected by AoA has not been disseminated to State and local agencies so that this information can be utilized for improving and enhancing services and programs under the Act.

Finding 4: Burdensome reporting requirements which often duplicate those of other Federal and State funded programs interfere with the service providers' ability to provide direct services. (Testimony before the Senate Special Committee on Aging, Workshop #4, October 18, 1990, Administration on Aging: Meeting the Challenge of a Graying America; General Accounting Office Testimony before the House Select Committee on Aging Subcommittee on Human Services, June 4, 1991, The U.S. Administration on Aging: The Mission and The Reality.)

RECOMMENDATIONS

Recommendation 1: AoA should establish a panel that will examine all current reporting requirements under the Act and make legislative and regulatory recommendations which achieve at least the following objectives: (1) collection of national data regarding monetary expenditures for Title III services; (2) collection of data that effectively measure compliance with AoA's regulations and OAA mandates; (3) minimization of duplication with reporting requirements of other Federal, State and private programs; and (4) collection of accurate information concerning characteristics of program participants.

OLDER AMERICANS ACT OF 1965

(Public Law 89-73)

AN ACT To provide assistance in the development of new or improved programs to help older persons through grants to the States for community planning and services and for training, through research, development, or training project grants, and to establish within the Department of Health, Education, and Welfare an operating agency to be designated as the "Administration on Aging".

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Older Americans Act of 1965".

(42 U.S.C. 3001 note) Enacted July 14, 1965, P.L. 89-73, sec. 1, 79 Stat. 219.

TITLE I—DECLARATION OF OBJECTIVES; DEFINITIONS

DECLARATION OF OBJECTIVES FOR OLDER AMERICANS

SEC. 101. The Congress hereby finds and declares that, in keeping with the traditional American concept of the inherent dignity of the individual in our democratic society, the older people of our Nation are entitled to, and it is the joint and several duty and responsibility of the governments of the United States, of the several States and their political subdivisions, and of Indian tribes to assist our older people to secure equal opportunity to the full and free enjoyment of the following objectives:

(1) An adequate income in retirement in accordance with the American standard of living.

(2) The best possible physical and mental health which science can make available and without regard to economic status.

(3) Obtaining and maintaining suitable housing, independently selected, designed and located with reference to special needs and available at costs which older citizens can afford.

(4) Full restorative services for those who require institutional care, and a comprehensive array of community-based, long-term care services adequate to appropriately sustain older people in their communities and in their homes.

(C) develop a formula, in accordance with guidelines issued by the Commissioner, for the distribution within the State of funds received under this title, taking into account, to the maximum extent feasible, the best available statistics on the geographical distribution of individuals aged 60 and older in the State, and publish such formula for review and comment in accordance with subsection (d);

(D) submit its formula developed under subclause (C) to the Commissioner for review and comment;

(E) provide assurance that preference will be given to providing services to older individuals with the greatest economic or social needs, with particular attention to low-income minority individuals, and include proposed methods of carrying out the preference in the State plan; and

(F) assure the use of outreach efforts that will identify individuals eligible for assistance under this Act, with special emphasis on older individuals with the greatest economic or social needs (with particular attention to low-income minority individuals) and inform such individuals of the availability of such assistance.

(b)(1) In carrying out the requirement of clause (1) of subsection (a), the State may designate as a planning and service area any unit of general purpose local government which has a population of 100,000 or more. In any case in which a unit of general purpose local government makes application to the State agency under the preceding sentence to be designated as a planning and service area, the State agency shall, upon request, provide an opportunity for a hearing to such unit of general purpose local government. A State may designate as a planning and service area under clause (1) of subsection (a) any region within the State recognized for purposes of areawide planning which includes one or more such units of general purpose local government when the State determines that the designation of such a regional planning and service area is necessary for, and will enhance, the effective administration of the programs authorized by this title. The State may include in any planning and service area designated under clause (1) of subsection (a) such additional areas adjacent to the unit of general purpose local government or regions so designated as the State determines to be necessary for, and will enhance the effective administration of the programs authorized by this title.

(2) The State is encouraged in carrying out the requirement of clause (1) of subsection (a) to include the area covered by the appropriate economic development district involved in any planning and service area designated under such clause, and to include all portions of an Indian reservation within a single planning and service area, if feasible.

(3) The chief executive officer of each State in which a planning and service area crosses State boundaries, or in which an interstate Indian reservation is located, may apply to the Commissioner to request redesignation as an interstate planning and service area comprising the entire metropolitan area or Indian reservation. If the Commissioner approves such an application, the Commissioner shall adjust the State allotments of the areas within the planning

and service area in which the interstate planning and service area is established to reflect the number of older individuals within the area who will be served by an interstate planning and service area not within the State.

(4) Whenever a unit of general purpose local government, a region, a metropolitan area or an Indian reservation is denied designation under the provisions of clause (1) of subsection (a), such unit of general purpose local government, region, metropolitan area, or Indian reservation may appeal the decision of the State agency to the Commissioner. The Commissioner shall afford such unit, region, metropolitan area, or Indian reservation an opportunity for a hearing. In carrying out the provisions of this paragraph, the Commissioner may approve the decision of the State agency, disapprove the decision of the State agency and require the State agency to designate the unit, region, area, or Indian reservation appealing the decision as a planning and service area, or take such other action as the Commissioner deems appropriate.

(5)(A) A State which on or before October 1, 1980, had designated, with the approval of the Commissioner, a single planning and service area covering all of the older individuals in the State, in which the State agency was administering the area plan, may after that date designate one or more additional planning and service areas within the State to be administered by public or private nonprofit agencies or organizations as area agencies on aging, after considering the factors specified in subsection (a)(1)(E). The State agency shall continue to perform the functions of an area agency for any area of the State not included in a planning and service area for which an area agency has been designated.

(B) Whenever a State agency designates a new area agency on aging after the date of enactment of the Older Americans Act Amendments of 1984, the State agency shall give the right to first refusal to a unit of general purpose local government if (i) such unit can meet the requirements of subsection (c), and (ii) the boundaries of such a unit and the boundaries of the area are reasonably contiguous.

(c) An area agency on aging designated under subsection (a) shall be—

(1) an established office of aging which is operating within a planning and service area designated under subsection (a);

(2) any office or agency of a unit of general purpose local government, which is designated to function only for the purpose of serving as an area agency by the chief elected official of such unit;

(3) any office or agency designated by the appropriate chief elected officials of any combination of units of general purpose local government to act only on behalf of such combination for such purpose;

(4) any public or nonprofit private agency in a planning and service area, or any separate organizational unit within such agency, which is under the supervision or direction for this purpose of the designated State agency and which can and will engage only in the planning or provision of a broad range of

supportive services, or nutrition services within such planning and service area; or

(5) in the case of a State specified in subsection (b)(5), the State agency;
and shall provide assurance, determined adequate by the State agency, that the area agency will have the ability to develop an area plan and to carry out, directly or through contractual or other arrangements, a program in accordance with the plan within the planning and service area. In designating an area agency on aging within the planning and service area or within any unit of general purpose local government designated as a planning and service area the State shall give preference to an established office on aging, unless the State agency finds that no such office within the planning and service area will have the capacity to carry out the area plan.

(d) The publication for review and comment required by clause (2)(C) of subsection (a) shall include—

(1) a descriptive statement of the formula's assumptions and goals, and the application of the definitions of greatest economic or social need,

(2) a numerical statement of the actual funding formula to be used,

(3) a listing of the population, economic, and social data to be used for each planning and service area in the State, and

(4) a demonstration of the allocation of funds, pursuant to the funding formula, to each planning and service area in the State.

Each such plan shall comply with all of the following requirements:

(1) The plan shall contain assurances that the State plan will be based upon area plans developed by area agencies on aging within the State designated under section 305(a)(2)(A) and that the State will prepare and distribute a uniform format for use by area agencies in developing area plans under section 306.

(4) The plan shall provide for the use of such methods of administration (including methods relating to the establishment and maintenance of personnel standards on a merit basis, except that the Commissioner shall exercise no authority with respect to the selection, tenure of office, or compensation of any individual employed in accordance with such methods) as are necessary for the proper and efficient administration of the plan, and, where necessary, provide for the reorganization and reassignment of functions to assure such efficient administration.

Any representative of an entity designated in accordance with the preceding sentence (whether an employee or an unpaid volunteer) shall be treated as a representative of the Office for purposes of this paragraph.

(A) the plan contains or is supported by reasonable assurances that (i) for not less than 10 years after acquisition, or not less than 20 years after the completion of construction, the facility will be used for the purpose for which it is to be acquired or constructed, unless for unusual circumstances the Commissioner waives the requirement of this division; (ii) sufficient funds will be available to meet the non-Federal share of the cost of acquisition or construction of the facility; (iii) sufficient funds will be available when acquisition or construction is completed, for effective use of the facility for the purpose for which it is being acquired or constructed; and (iv) the facility will not be used and is not intended to be used for sectarian instruction or as a place for religious worship;

(i) the number of older individuals with greatest economic need (as defined in section 302(20)) residing in their respective planning and service areas; and

(ii) the inadequacy in such areas of outreach activities and application assistance of the type specified in section 306(a)(6)(P);

(B) will require, as a condition of eligibility to receive funds under this paragraph, an area agency on aging to submit an application that—

(i) describes the activities for which such funds are sought;

(b)(1) The Commissioner shall approve any State plan which the Commissioner finds fulfills the requirements of subsection (a).

(2) The Commissioner, in approving any State plan under this section, may waive the requirement described in clause (3)(B) of subsection (a) if the State agency demonstrates to the Commissioner that the service needs of older individuals residing in rural areas in the State are being met, or that the number of older individuals residing in such rural areas is not sufficient to require the State agency to comply with the requirement described in clause (3)(B) of subsection (a).

(c) The Commissioner shall not make a final determination disapproving any State plan, or any modification thereof, or make a final determination that a State is ineligible under section 305, without first affording the State reasonable notice and opportunity for a hearing.

(d) Whenever the Commissioner, after reasonable notice and opportunity for a hearing to the State agency, finds that—

(1) the State is not eligible under section 305,

(2) the State plan has been so changed that it no longer complies substantially with the provisions of subsection (a), or

(3) in the administration of the plan there is a failure to comply substantially with any such provision of subsection (a), the Commissioner shall notify such State agency that no further payments from its allotments under section 304 and section 308 will be made to the State (or, in the Commissioner's discretion, that further payments to the State will be limited to projects under or portions of the State plan not affected by such failure), until the Commissioner is satisfied that there will no longer be any failure to comply. Until the Commissioner is so satisfied, no further payments shall be made to such State from its allotments under section 304 and section 308 (or payments shall be limited to projects under or portions of the State plan not affected by such failure). The Commissioner shall, in accordance with regulations the Commissioner shall prescribe, disburse the funds so withheld directly to any public or nonprofit private organization or agency or political subdivision of such State submitting an approved plan in accordance with the provisions of this section. Any such payment shall be matched in the proportions specified in section 304.

(e)(1) A State which is dissatisfied with a final action of the Commissioner under subsection (b), (c), or (d) may appeal to the United States court of appeals for the circuit in which the State is located, by filing a petition with such court within 30 days after such final

action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Commissioner, or any officer designated by the Commissioner for such purpose. The Commissioner thereupon shall file in the court the record of the proceedings on which the Commissioner's action is based, as provided in section 2112 of title 28, United States Code.

(2) Upon the filing of such petition, the court shall have jurisdiction to affirm the action of the Commissioner or to set it aside, in whole or in part, temporarily or permanently, but until the filing of the record, the Commissioner may modify or set aside the Commissioner's order. The findings of the Commissioner as to the facts, if supported by substantial evidence, shall be conclusive, but the court, for good cause shown may remand the case to the Commissioner to take further evidence, and the Commissioner shall, within 30 days, file in the court the record of those further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence. The judgment of the court affirming or setting aside, in whole or in part, any action of the Commissioner shall be final, subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

(3) The commencement of proceedings under this subsection shall not, unless so specifically ordered by the court, operate as a stay of the Commissioner's action.

(f)(1) From amounts made available under section 304(d)(1)(C) after September 30, 1986, each State shall provide for the establishment of at least one demonstration project for health and nutrition education to be conducted by one or more area agencies on aging within the State based on the information and materials disseminated under section 704(d)(2).

(2) Each such project shall—

(A) be administered by the area agency for the purpose of improving the health and nutrition of older individuals served by the agency;

(E) be evaluated and the evaluation shall be submitted prior to October 1, 1987, together with such interim reports as the Commissioner may reasonably require.

(g) Neither a State, nor a State agency, may require any provider of legal assistance under this title to reveal any information that is protected by the attorney-client privilege.

PLANNING, COORDINATION, EVALUATION, AND ADMINISTRATION OF
STATE PLANS

SEC. 308. (a)(1) Amounts available to States under subsection (b)(1) may be used to make grants to States for paying such percentages as each State agency determines, but not more than 75 percent, of the cost of the administration of its State plan, including the preparation of the State plan, the evaluation of activities carried out under such plan, the collection of data and the carrying out of analyses related to the need for supportive services, nutrition services, and multipurpose senior centers within the State, and dissemination of information so obtained, the provision of short-term training to personnel of public or nonprofit private agencies and organizations engaged in the operation of programs authorized by this Act, and the carrying out of demonstration projects of statewide significance relating to the initiation, expansion, or improvement of services assisted under this title.

(2) Any sums available to a State under subsection (b)(1) for part of the cost of the administration of its State plan which the State determines is not needed for such purposes may be used by the State to supplement the amount available under section 304(d)(1)(A) to cover part of the cost of the administration of area plans.

(3) Any State which has designated a single planning and service area under section 305(a)(1)(E) covering all, or substantially all, of the older individuals in such State, as determined by the Commissioner, may elect to pay part of the costs of the administration of State and area plans either out of sums received under this section or out of sums made available for the administration of area plans under section 304(d)(1)(A), but shall not pay such costs out of sums received or allotted under both such sections.

(b)(1) If for any fiscal year the aggregate amount appropriated under section 303 does not exceed \$800,000,000, then—

(A) except as provided in clause (ii), the greater of 5 percent of the allotment to a State under section 304(a)(1) or \$300,000; and

(B) in the case of Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands, the greater of 5 percent of such allotment or \$75,000;

shall be available to such State to carry out the purposes of this section.

(2) If for any fiscal year the aggregate amount appropriated under section 303 exceeds \$800,000,000, then—

(A) except as provided in clause (ii), the greater of 5 percent of the allotment to a State under section 304(a)(1) or \$500,000; and

(B) in the case of Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands, the greater of 5 percent of such allotment or \$100,000;

shall be available to such State to carry out the purposes of this section.

(3)(A) If the aggregate amount appropriated under section 303 for a fiscal year does not exceed \$800,000,000, then any State which desires to receive amounts, in addition to amounts allotted to such State under paragraph (1), to be used in the administration of its State plan in accordance with subsection (a) may transmit an application to the Commissioner in accordance with this paragraph. Any such application shall be transmitted in such form, and according to such procedures, as the Commissioner may require, except that such application may not be made as part of, or as an amendment to, the State plan.

(B) The Commissioner may approve any application transmitted by a State under subparagraph (A) if the Commissioner determines, based upon a particularized showing of need that—

(i) the State will be unable to fully and effectively administer its State plan and to carry out programs and projects authorized by this title unless such additional amounts are made available by the Commissioner;

(ii) the State is making full and effective use of its allotment under paragraph (1) and of the personnel of the State agency and area agencies designated under section 305(a)(2)(A) in the administration of its State plan in accordance with subsection (a); and

(iii) the State agency and area agencies of such State designated under section 305 are carrying out, on a full-time basis, programs and activities which are in furtherance of the purposes of this Act.

(C) The Commissioner may approve that portion of the amount requested by a State in its application under subparagraph (A) which the Commissioner determines has been justified in such application.

(D) Amounts which any State may receive in any fiscal year under this paragraph may not exceed three-fourths of 1 percent of the sum of the amounts allotted under section 304(a) to such State to carry out the State plan for such fiscal year.

(E) No application by a State under subparagraph (A) shall be approved unless it contains assurances that no amounts received by the State under this paragraph will be used to hire any individual to fill a job opening created by the action of the State in laying off or terminating the employment of any regular employee not supported under this Act in anticipation of filling the vacancy so created by hiring an employee to be supported through use of amounts received under this paragraph.

(4) Notwithstanding any other provision of this title, with respect to funds received under section 303(b) (1) and (2), a State may elect in its plan under section 307(a)(13) regarding part C of this title, to transfer a portion of the funds appropriated between subpart 1 and subpart 2 of part C, for use as the State considers appropriate to meet the needs of the area served. The Commissioner shall approve any such transfer unless the Commissioner determines that such transfer is not consistent with the purposes of this Act.

(5)(A) Notwithstanding any other provisions of this title and except as provided in subparagraph (B), with respect to funds received under subsection (a)(1) and subsection (b) of section 303, a State may elect to transfer not more than 20 per centum of the funds allotted for any fiscal year between programs under part B and part C of this title, for use as the State considers appropriate. The State shall notify the Commissioner of any such election.

(B) Of the funds received under subsections (a)(1) and (b) of section 303, a State may elect to transfer under subparagraph (A) not more than 30 percent of the funds allotted for any fiscal year.

(c) The amounts of any State's allotment under subsection (b) for any fiscal year which the Commissioner determines will not be required for that year for the purposes described in subsection (a)(1) shall be available to provide services under part B or part C, or both, in the State.

SEC. 309. (a) Payments of grants or contracts under this title may be made (after necessary adjustments resulting from previously made overpayments or underpayments) in advance or by way of reimbursement, and in such installments, as the Commissioner may determine. From a State's allotment for a fiscal year which is available under section 308 the Commissioner may pay to a State which does not have a State plan approved under section 307 such amounts as the Commissioner deems appropriate for the purpose of assisting such State in developing a State plan.

(2) The Commodities Credit Corporation shall dispose of food commodities under section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431) by donating them to a recipient of a grant or contract to be used for providing nutrition services in accordance with the provisions of this title.

ceive cash payments in lieu of donated foods for all or any portion of its project. (2) When such payments are made, the State agency shall promptly and equitably disburse any cash it receives in lieu of commodities to recipients of grants or contracts. Such disbursements shall only be used by such recipients of grants or contracts to purchase United States agricultural commodities and other foods for their nutrition projects.

(3) Nothing in this subsection shall be construed to authorize the Secretary of Agriculture to require any State to elect to receive cash payments under this subsection.

(c)(1)(A) There are authorized to be appropriated \$151,000,000 for the fiscal year 1988, \$166,000,000 for the fiscal year 1989, \$183,000,000 for the fiscal year 1990, and \$201,000,000 for the fiscal year 1991, to carry out the provisions of this section (other than subsection (a)(1)).

EQUITABLE DISTRIBUTION OF ASSISTANCE

SEC. 506. (a)(1)(A) Subject to the provisions of paragraph (2), from sums appropriated under this title for each fiscal year, the Secretary shall first reserve such sums as may be necessary for national grants or contracts with public agencies and public or private nonprofit organizations to maintain the level of activities carried on under such grants or contracts at least at the level of such activities supported under this title and under any other provision of Federal law relating to community service employment programs for older Americans in fiscal year 1978. Beginning with the first fiscal year in which the amount appropriated to carry out this title exceeds the amount appropriated for fiscal year 1987 to carry out this title, the Secretary shall next reserve such sums as may be necessary for national grants or contracts with public or nonprofit national Indian aging organizations with the ability to provide employment services to older Indians and with national public or nonprofit Pacific Island and Asian American aging organizations with the ability to provide employment services to older Pacific Island and Asian Americans. Preference in awarding such grants or contracts shall be given to national organizations of proven ability in providing employment services to older persons under this program and similar programs. The Secretary, in awarding grants and contracts under this section, shall, to the extent feasible, assure an equitable distribution of activities under such grants and contracts, in the aggregate, among the States, taking into account the needs of underserved States.

(B) From sums appropriated under this title for each fiscal year after September 30, 1978, the Secretary shall reserve an amount which is equal to at least 1 per centum but not more than 3 per centum of the amount appropriated in excess of the amount appropriated for fiscal year 1978 for the purpose of entering into agreements under section 502(e), relating to improved transition to private employment.

(2) For each fiscal year in which the sums appropriated under this title exceed the amount appropriated for fiscal year 1978, the

Secretary shall reserve not more than 45 per centum of such excess amount for the purpose described in paragraph (1). The Secretary in awarding grants and contracts under such paragraph (1) from such 45 per centum shall, to the extent feasible, assure an equitable distribution of activities under such grants and contracts designed to achieve the allotment among the States described in paragraph (3) of this subsection. The remainder of such excess shall be allotted to the appropriate public agency of each State pursuant to paragraph (3).

(3) The Secretary shall allot to the State agency on aging of each State the remainder of the sums appropriated for any fiscal year under section 508 so that each State will receive an amount which bears the same ratio to such remainder as the product of the number of persons aged fifty-five or over in the State and the allotment percentage of such State bears to the sum of the corresponding product for all States, except that (A) no State shall be allotted less than one-half of 1 per centum of the remainder of the sums appropriated for the fiscal year for which the determination is made, or \$100,000, whichever is greater, and (B) Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Virgin Islands, and the Trust Territory of the Pacific Islands shall each be allotted an amount which is not less than one-fourth of 1 per centum of the remainder of the sums appropriated for the fiscal year for which the determination is made, or \$50,000, whichever is greater. For the purpose of the exception contained in this paragraph the term "State" does not include Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(4) For the purpose of this subsection—

(A) the allotment percentage of each State shall be 100 per centum less that percentage which bears the same ratio to 50 per centum as the per capita income of such State bears to the per capita income of the United States, except that (i) the allotment percentage shall in no case be more than 75 per centum or less than $33\frac{1}{3}$ per centum, and (ii) the allotment percentage for the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands shall be 75 per centum;

(B) the number of persons aged fifty-five or over in any State and in all States, and the per capita income in any State and in all States, shall be determined by the Secretary on the basis of the most satisfactory data available to him; and

(C) for the purpose of determining the allotment percentage, the term "United States" means the fifty States and the District of Columbia.

(b) The amount allotted for projects within any State under subsection (a) for any fiscal year which the Secretary determines will not be required for such year shall be reallocated, from time to time and on such dates during such year as the Secretary may fix, to projects within other States in proportion to the original allotments to projects within such States under subsection (a) for such year, but with such proportionate amount for any of such other

States being reduced to the extent it exceeds the sum the Secretary estimates that projects within such State need and will be able to use for such year; and the total of such reductions shall be similarly reallocated among the States whose proportionate amounts were not so reduced. Any amount reallocated to a State under this subsection during a year shall be deemed part of its allotment under subsection (a) for such year.

(c) The amount apportioned for projects within each State under subsection (a) shall be apportioned among areas within each such State in an equitable manner, taking into consideration (1) the proportion which eligible individuals in each such area bears to the total number of such individuals, respectively, in that State, and (2) the relative distribution of such individuals residing in rural and urban areas within the State.

(d) The Secretary shall require the State agency for each State receiving funds under this title to report at the beginning of each fiscal year on such State's compliance with subsection (c). Such report shall include the names and geographic location of all projects assisted under this title and carried out in the State and the amount allotted to each such project.

APPENDIX D—Aging Advocacy Organizations' 1991 Reauthorization Recommendations

AMERICAN ASSOCIATION OF RETIRED PERSONS

The American Association of Retired Persons (AARP) appreciates this opportunity to outline what we regard as the major issues of the 1991 reauthorization of the Older Americans Act (OAA). The Association strongly supports the OAA programs, which constitute the major vehicle for the provision of social services to older persons in this country. For many years, however, AARP has been concerned about the effectiveness with which these programs are being targeted to the most vulnerable older persons, the accuracy and quality of program data, and the effectiveness of the Administration on Aging (AoA) in providing guidance and technical assistance to the states, as they execute the mission of the Act.

RECOMMENDATIONS

Implement better data collection procedures, in order to monitor the effectiveness of targeting efforts;

include the intrastate funding formula as part of the state plan and make it subject to approval by AoA;

require AoA to monitor each state plan and funding formula for possible discriminatory effects on minorities;

require any intrastate funding formula that does not specifically include the incidence of low-income and minority individuals in the state to explain why inclusion of these factors is unnecessary;

develop a standard definition of "rural", and require the intrastate funding formula to include a rural factor, or explain why this factor is unnecessary;

mandate AoA to provide technical assistance to states on how to improve minority participation and require states to provide technical assistance to minority service providers;

require state and area agencies on aging to (a) establish specific action plans to ensure increased service provision to low-income minority individuals in each planning and service area, and (b) evaluate the effectiveness of service delivery to low-income minority individuals in each planning and service area, including quantitative data on types of services received and intensity of services received;

request the U.S. Commission on Civil Rights to conduct a follow-up study on the adequacy of OAA services to minority individuals;

strengthen requirements for improved coordination between Titles VI and III, and increase funding for both Titles;

direct a portion of Title III services to persons residing in assisted housing; exempt the SSI/Food Stamp/Medicaid Outreach Demonstration from the 105% funding "trigger" and extend the outreach demonstration throughout the next reauthorization period;

require AoA, when awarding national grants, to give priority to projects that target low-income minorities; state units on aging also should emphasize service to low-income minorities, where they are given grant-making authority; and

require competitive awarding of all grants under Title IV of the Act unless special circumstances dictate sole source contracts; require public dissemination of research and demonstration results funded by Title IV; and require periodic evaluation of all Title IV multi-year grantees with public dissemination of evaluation results.

The Association stands ready to work with the Congress during the reauthorization process to achieve the important goals of improving administration of the Act and targeting services to the most vulnerable older Americans.

NATIONAL ASSOCIATION OF STATE UNITS ON AGING,
 WASHINGTON, DC 20006,
 May 15, 1991.

The Honorable David Pryor
 Chairman, Senate Special Committee on Aging
 SD-G31 Dirksen Senate Office Building
 Washington, D.C. 20510-6400

Dear Senator Pryor,

The National Association of State Units on Aging is pleased to have this opportunity to highlight our recommendations for the 1991 reauthorization of the Older Americans Act. At the same time we want to applaud the participatory process you used during the past year to receive ideas and suggestions from all actors in the field of aging.

NASUA has developed a comprehensive set of specific recommendation for changes in the OAA. We believe that these changes I would continue to strengthen the capacity of the OAA network to be responsive to the changing circumstances, needs and preferences of the nation's elderly. These policy recommendations include:

- elevating the rank and status of the Administration on Aging and the U.S. Commissioner on Aging

- a new set of targeting requirements for state plans, area plans and service provider contracts

- a cost sharing proposal for certain services provided under the Act to enhance coordination, ensure equity, encourage targeting and generate new resources

- a new Title VII—Grants to States for Elder Rights Programs—to consolidate and underscore the advocacy responsibilities of the aging network—ombudsman, elder abuse, legal services development and benefits counseling

- new provisions to underscore the “public purpose” mission of network agencies while encouraging appropriate public/private partnerships

- maintaining state leadership and flexibility in the administration of the Act

- a set of new provisions to enhance coordination between Titles VI and III, and to underscore the responsibilities of the aging network to older native Americans

Thank you for this opportunity to present NASUA's views on the OAA reauthorization and thank you for your continued advocacy and concern for older Americans.

Sincerely,

DANIEL A. QUIRK,
Executive Director.

NATIONAL ASSOCIATION OF AREA AGENCIES ON AGING

RECOMMENDATIONS FOR THE 1991 OLDER AMERICANS ACT REAUTHORIZATION

I. Increasing Access to Services

Enhancing targeting efforts to low-income minority, frail, and rural elders through changes in intrastate funding formulas, having state formulas reviewed and approved/disapproved by the Commissioner on Aging, having Area Plans contain specific targeting objectives, and by other means.

Improving the data collection system so that it is consistent across states and allows an accurate assessment of service utilization, minority participation, and unmet needs.

- Strengthening transportation funding, services, and coordination.

- Increasing the link between Area Agencies and public/low income housing.

II. Elder Protection

- Strengthening the Long-Term Care Ombudsman program.

- Enhancing health promotion and prevention efforts.

III. Strengthening the Aging Network

Elevating the position of the U.S. Commissioner on Aging to the rank and status of the head of an operating division within the Department of Health and Human Services.

Utilize the existing network of Area Agencies on Aging to coordinate federal programs for older persons at the local level, including SSI outreach, Medicaid, housing, and food stamps.

Promoting a lead role for State and Area Agencies in a national community-based long-term care system.

IV. Enhancing Resources/Resource Allocation for the Aging Network

Increasing the authorization/appropriations levels for Older Americans Act programs.

Supporting Public-Private partnerships, while insuring that the public mission of Area Agencies is maintained.

Voluntary cost-sharing to defray the expense of costly in-home services.

Maintain current transferability between Title III-B and III-C programs.

New responsibilities or special mandates must be accompanied by additional funding.

As new tribes are added to Title VI, current grantees should be held harmless.

V. Operational Issues of Concern to Area Agencies on Aging

Area Agencies on Aging having the authority to directly provide outreach and information and referral services and care/case management.

Establishing "due process" procedures for states to follow in the redesignation/redesignation processes of Area Agencies and planning and service areas.

Restore the provision that prohibits State Units from requiring prior approval of grants and/or contracts entered into by Area Agencies

Area Agencies are not agents or employees of the state.

THE NATIONAL COUNCIL ON THE AGING, INC.

POSITION STATEMENT SUMMARY ON THE OLDER AMERICANS ACT 1991 REAUTHORIZATION

Long-term care and the OAA

The National Council on the Aging (NCOA) believes that the major focus of the Older Americans Act (OAA) is to promote and maintain health and foster independence through the delineated social and nutrition services of Title III of the Act.

NCOA holds that long-term care services addressing chronic health problems should not be provided under the Older Americans Act. While standards for in-home, case management, and other long-term care services may appropriately be developed under the OAA, implementation of such standards and provision of such services must be part of a national health or long-term care program much a program based on health care needs, not age, should have adequate appropriations and be located in agencies that can effectively carry out the administration of such services.

Cost sharing

NCOA rejects the concepts of means-testing and mandatory cost-sharing for OAA services. The real issue hidden behind cost sharing is the fact that federal funding has not kept pace with need. Congress must authorize and appropriate an adequate budget for an adequate budget for an Act that enhances the quality of life of millions of older people.

Title V

NCOA recommends funding for the Senior Community Service Employment Program (SCSEP) be increased by at least 11.3 percent. NCOA also recommends dual eligibility for the Title V and Job Training Partnership Act programs.

Changes in OAA titles

NCOA believes that transportation services provided under the OAA could best be improved by transferring administration of those services to the Department of Transportation.

NCOA recommends moving the legal assistance, ombudsman, and elder abuse prevention services under a new "legal and protective services" title. These services are to ensure access. They do not include enforcement of laws protecting rights; that function belongs to other agencies.

Public-private partnerships

NCOA believes that public-private partnerships may present a potential for conflict of interest and abuse on the part of State and area agencies on aging and their stated mission of serving those with the greatest social and economic need, and therefore recommends close scrutiny of such arrangements.

AoA and Federal Council on the Aging

NCOA recommends that Congress elevate the Commissioner on Aging to the level of Assistant Secretary within DHHS and transfer the Federal Council on the Aging to a new capacity as an advisory council to AoA.

NATIONAL ASSOCIATION OF NUTRITION & AGING SERVICES PROGRAMS
RECOMMENDATIONS FOR REAUTHORIZATION OF THE OLDER AMERICANS ACT—EXECUTIVE SUMMARY

The National Association of Nutrition and Aging Services Programs (NANASP) strongly recommends that the following recommendations be implemented as part of the reauthorization of the Older Americans Act:

1. Authorization and appropriation levels for the OAA should be immediately increased by a minimum of 10%.
 2. A annual factor to cover increases in the cost-of-living and growth of the senior population should be included in the OAA. Six percent is suggested.
 3. Appropriations for Subparts D, E, and F should be funded independently of other subparts, at authorized levels.
 4. Priority for services under Subpart F should be given to established nutrition providers and senior centers.
 5. A moratorium should be placed on transfers between subparts. Each subpart should be funded adequately based on need. Since transfers have never exceeded 17%, the necessity for transfer authority is not significant. Transfers between C1 and C2 should be allowed, determined by local programs as part of the area plan process.
 6. U.S.D.A. Cash-in-lieu should be indexed to a cost-of-living factor to prevent erosion of purchasing ability over time. The current rate should be increased to \$0.6566 per meal to make up for past inflation.
 7. No change should be made to voluntary contributions under the Act.
 8. Increase funding for targeting/outreach activities through established senior centers and nutrition programs.
 9. Define the minimum data set to be collected by the network, permitting states to design their own collection system in response. Assist Minority Representative providers with automated data software, and a uniform reporting taxonomy.
 10. Include the the School-based Meals and Intergenerational Programs Act as an addition to Title IIIC services.
 11. Elevate the status of Commissioner of Aging to Assistant Secretary for Aging with DHHS.
 12. Increase funding under Title IV and target funds for states to develop training for network components, particularly service providers.
 13. Include a requirement that all state formulas include a low-income and minority factors.
 14. Restore funding to Title VI grantees who have lost funds due to the addition of new grantees. Include a hold-harmless clause to prevent future losses.
- Additionally, NANASP fully supports the adoption and inclusion of the Minimum Nutrition Standards developed in conjunction with the American Dietetic Association and the National Association of Meal Programs (copy attached).

NATIONAL ASSOCIATION OF MEAL PROGRAMS
REAUTHORIZATION OF THE OLDER AMERICANS ACT—EXECUTIVE SUMMARY

The National Association of Meal Programs (NAMP), representing providers of both congregate and home delivered meals, makes the following recommendations regarding the reauthorization of the Older Americans Act slated for Congressional action in 1991

1. Establish as an entitlement for each meal provider a minimum floor of assistance per meal (\$1.75 is suggested initially with annual adjustments based on the Bureau of Labor statistics index of cost of food away from home) and then establish criteria through which the state and area agencies on aging can augment with Title III funds this minimum assistance level in view of legitimate operation cost differentials.
2. In conjunction with a guaranteed entitlement for any senior to participate in a meal program, either congregate or home delivered, establish a cost sharing model.

3. In light of the national average waiting list of seventy people per program for a home delivered meal and the fact of limited service in rural areas, NAMP recommends that congress eliminate completely transfers between Title IIIB and Title IIIC and limit transfer authority of Title IIIC funding from C-1 to C-2 or vice versa only In 1989, transfer of funds from III-C resulted in a decrease of \$92 million dollars in funds available for meals.

4. Increase the United States Department of Agriculture level of assistance from .5676 per meal to .6533 per meal, make this assistance an entitlement, and index the level based on the change in the food away from home consumer price index.

5. In order to promote and maintain good quality Title III C-1 and C-2 programs throughout the country, federal standards should be developed and promulgated to ensure at least a minimum level of program performance. Current operational standards, practices and procedures need to be reviewed and measured against such standards. Therefore, NAMP recommends that:

A set of minimum standards be developed for Title III C-1 and C-2 programs that address issues including but not limited to menu planning, staffing, food service code conformance, staff training and development, and client assessment and nutrition education.

NATIONAL ASSOCIATION OF STATE LONG-TERM CARE OMBUDSMAN PROGRAMS

Long Term Care Ombudsman Programs are mandated by the Older Americans Act to provide advocacy services, complaint investigation and educational services to residents of long term care facilities and their families. The reauthorization of this Act is of major importance to these programs.

The following is a general listing of items which we consider are some of the most important issues to be addressed in this reauthorization effort.

- expand the authority of the ombudsman to pursue advocacy, including administrative, legal, and other remedies;

- strengthen the role of the local ombudsman to ensure resident access to empowerment services and more timely response to complaints;

- strengthen the federal role to support the ombudsman programs, to oversee their effectiveness and to make proper use of data available from state ombudsmen;

- continue to make technical resources available to the programs through maintenance of the National Resource Center;

- increase the accountability of the program by setting explicit mandates for state and local program responsibilities and requiring anyone who acts as a representative of the Office to do so only through designation by the state ombudsman;

- prohibit conflicts of interest in state and local programs which could interfere with the performance of ombudsman duties;

- require annual reports to the public on the extent of the problems seen by ombudsmen, the barriers faced in redressing these problems, and recommendations for changes in laws, regulations or government policies to address them; and

- a recommendation that AoA commission or conduct a study of the ombudsman program which analyzes costs and availability of ombudsman services, and effectiveness of the program in each state.

NCBA 1991 REAUTHORIZATION OAA PRIORITY LISTING

I. Targeting of Title III Services to Elderly Minorities:

A. State plans should emphasize that one of its primary objectives is to serve low-income elderly minority individuals, other persons with the greatest economic or social needs, and individuals residing in rural areas according to their need for service.

B. AAA's should include within its agreement with service providers a requirement; that service providers, should attempt to deliver services to low-income minority individuals in accordance with their need for services.

C. The U.S. Commissioner of Aging should approve or disapprove the state intrastate funding formula, as well as overall state plan.

D. The 1991 Older Americans Equity and Service Improvement Amendments (HR 597) which would require: (1) That AAA plan have specific objectives for providing services to low-income minorities; and (2) the state plan provide assurances, that

special efforts will be made to offer technical assistance to minority services providers, be enacted into law.

E. AAA's should make greater efforts to obtain more diversity in retaining private law firms to deliver services to Older Americans by utilizing more law firms with minority legal and paralegal personnel.

II. NCBA is Unalterably Opposed to a Fee-for-Service System (Cost Sharing):

We are deeply concerned that a negotiated fee for service would encourage service providers under OAA to cater to elderly persons who can pay the highest percentage of the cost of service. In NCBA's view, the existing voluntary arrangement has worked reasonably well and should be retained, rather than replaced by an inferior fee-for-service system which can undermine minority participation.

III. Title IV Should Stimulate Greater Minority Involvement:

A. AOA should fund institutions, organizations, and agencies which either serve economically or socially disadvantaged older individuals, or have a sizeable percentage of older members who are economically disadvantaged.

B. AOA should promote career preparation training and education for minorities especially at historical Black colleges and universities and other institutions serving the needs of minority students.

IV. Clarification of Title V SCSEP Enrollee Status:

The 1991 OAA amendments should clarify that SCSEP participants are enrollees and are only entitled to those benefits which are specifically enumerated in Title V of OAA. This would include IIII wages, Social Security coverage, worker's compensation coverage, and other fringe benefits which can be provided without displacing existing enrollees. At the outset NCBA does not object to pension coverage or health insurance coverage for Title V enrollees, provided there is ample funding to cover this major additional cost. However, if there is no commensurate funding increase to cover this additional cost, approximately 25 percent to 50 percent of all authorized Title V positions would be eliminated. Also, the basic underpinning of Title V as an employment training program would be substantially changed by removing the incentive for Title V enrollees to transition into unsubsidized employment, if pension and health coverage are mandated under other statutes.

NATIONAL COUNCIL OF LA RAZA,
WASHINGTON, DC 20002,
May 15, 1991.

The Honorable David Pryor, Chairman
United States Senate
Special Committee on Aging
G-31 Senate Dirksen Office Building
Washington, D.C. 20510-6400

Dear Senator Pryor:

On behalf of the National Council of La Raza (NCLR) we thank you for your invitation to provide input regarding NCLR's concerns about the reauthorization of the Older Americans Act (OAA). We will specifically address issues affecting Hispanics and other low-income minorities.

First, we believe that the targeting language of the OAA needs to be strengthened and clarified to provide greater assurance that low-income minority elderly will be served more suitably. While the law recognizes that low-income older minorities have a greater need for services, and encourages targeting those in greatest economic and social need, minority elderly are not served in proportion to their needs. Local providers are required to serve minority individuals in at least the same proportion as the population of minority elderly bears to the total elderly population in the area served by such provider. This standard ignores the fact that minority elderly are disproportionately poor.

We consider that a better standard—for example, one that would require that low-income minority elderly be served by OAA programs in at least the same proportion as the population of minority elderly bears to the low-income elderly population—is important. At minimum, the language of the Act should be modified to require that State and Area Agencies provide specific objectives for serving low-income minority elderly in their plan, and that if minorities are being underserved, the area plan should specify corrective actions. To further guide state units in their targeting efforts, states should be required to include a minority factor in their Intrastate Funding Formula (IFF), and these formulas should be standardized and regulated by AoA.

Second, NCLR believes that effective targeting of minorities requires special outreach activities. Thus, an increase in funding for Title III to support more aggressive outreach efforts should be included in the Act. In times of budgetary constraint, the promise of additional funds can be a strong incentive for Area Agencies on Aging to intensify their targeting efforts. Rather than sanctioning those who do not fully comply with AoA's targeting mandate, AoA should first try rewarding those who excel.

Third, we believe the states' authority to transfer funds within Title III should be limited. While it is important that states have flexibility in administering OAA funds, transfers have not been "two-way" between the meal programs or the social services; rather, they all have been in one direction: from congregate nutrition to the other programs. As a result, the congregate meal program is being slowly eroded. The congregate meal program is one of the most popular programs among Hispanic elderly. It not only affords the opportunity to provide participants other needed services, but, most important, for many Hispanic elderly, the meal they receive at a congregate site is their only full, nutritionally-balanced daily meal. We would therefore oppose any effort to increase the states' transfer authority and support measures to limit transfers.

Finally, some states or areas where Hispanics, many of them low-income elderly, are concentrated—South Texas, California, Florida, Arizona and New Mexico—receive a substantial number of “winter tourists” or “snow birds” each year, placing a strain on resources and services originally targeted for local elderly. NCLR believes the problem is serious enough to merit a study of the impact these “winter elderly” have on local resources and on services to the resident elderly population. Such a study could provide information needed to take action against any negative effects this phenomenon may cause.

Again thank you for the opportunity to present our views regarding the Older Americans Act. We look forward to your leadership in this reauthorization process, and hope to continue to work with you and your staff towards an Act that more suitably addresses the needs of low-income minority elderly.

Sincerely,

CRISTINA LOPEZ,
Director, Ancianos Network Project.
