A BILL

To combat trade barriers that threaten the maintenance of an open Internet, that mandate unique technology standards as a condition of market access and related measures, and to promote online free expression and the free flow of information.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Global Free Internet
5 Act of 2012”.

1 **SEC. 2. FINDINGS.**

2 Congress finds the following:

3 (1) A single, open, global Internet is a vital tool
4 for facilitating the free and secure flow of informa-
5 tion and products without regard to distances or na-
6 tional boundaries.

7 (2) The goal of a single, open, global Internet
8 is best supported by policies that—

9 (A) encourage utilization on a global basis
10 of technology standards set by international
11 standards-setting organizations, including in-
12 dustry-led and other voluntary bodies, and se-
13 lected by the market;

14 (B) respect the security of information and
15 privacy of Internet users;

16 (C) promote investment in Internet-related
17 innovation;

18 (D) refrain from compelling Internet serv-
19 ice providers and other intermediaries to re-
20 strict the free flow of information on the Inter-
21 net; and

22 (E) allow trade in Internet-related goods,
23 services, information, and content.

24 (3) Certain governments and international bod-
25 ies are adopting or considering policies contrary to
26 the goal of a free, open Internet, including—

7 (B) sponsoring or tolerating the use of
8 Internet-related tools to gain unauthorized ac-
9 cess to public-sector and private-sector net-
10 works in the United States to disrupt their op-
11 eration;

12 (C) blocking, filtering, or otherwise re-
13 stricting Internet communications in a manner
14 that discriminates against Internet-based serv-
15 ices and content originating in other countries;

16 (D) monitoring Internet use and commu-
17 nications in a manner that restricts individual
18 privacy and freedom; and

19 (E) imposing market access requirements
20 or liabilities that discriminate against or other-
21 wise impede Internet-related goods, services and
22 content from other countries.

23 (4) Such actions threaten the interests of the
24 United States by—

(A) facilitating attempts by foreign governments to restrict or disrupt the free flow of information on the Internet;

(B) promoting “national Internets” in conflict with the underlying rationale and architecture of the Internet as originally envisioned and constructed, thereby compromising the Internet’s full functionality and promise;

(C) harming United States workers and businesses, undermining a strong United States industrial base, and putting foreign competitors at an advantage; and

(D) putting at risk the utility of the Internet as a tool of open communication, assembly, and commerce, and the individuals who seek to use it for such purposes.

17 SEC. 3. TASK FORCE ON THE GLOBAL INTERNET.
