Re: Endorsement of S. 2122

Dear Senator Paul:

As a 22 year land-use professional and small business owner of Quiet Warrior Racing, a recreation consulting company, I would like to endorse Senate Bill 2122, *the Defense of Environment and Property Act of 2012*.

QWR wants to commend your legislation to stop EPA from imposing overregulations on the American People. It appears the agency often substitutes "political science" in the place of real science to forward their own "government-knows-best" agenda on private property owners and public land users.

Be assured, QWR will be encouraging local, state, and national recreation organizations and businesses to support your efforts. Thank you for taking a stand on this all too important issue.

Sincerely,

Don Amador
