Digital Preservation, Digital Curation, Digital Stewardship: What's in (Some) Names?

August 23rd, 2011 by [Butch Lazorchak](#)

"Digital preservation buttons" by wlef70 on Flickr

I admit it: I've been prone to using the terms "digital preservation," "digital curation" and "digital stewardship" interchangeably without thinking too hard about their origins or subtle differences. Where do these different terms come from and what do they imply? Let's briefly explore the slightly different (though often overlapping) approaches of preservationistas, curators and stewards.

The Oxford English Dictionary defines "preserve" as "to keep in its original or existing state." This idea of "preserving" has long been part of the Library of Congress' [mission](#), so it was with little surprise that our

program to address the challenges of digital materials was named the "National Digital Information Infrastructure and **P**reservation Program"; the founding NDIIPP report was called "[Preserving our Digital Heritage](#)" (PDF); and that our website is called "[digitalpreservation.gov](#)." Working to figure out how to "not lose" existing digital information was a significant early driver of NDIIPP.

What is digital curation?

Digital curation involves maintaining, preserving and adding value to digital research data throughout its lifecycle.

The active management of research data reduces threats to their long-term research value and mitigates the risk of digital obsolescence. Meanwhile, curated data in trusted digital repositories may be shared among the wider UK research community.

As well as reducing duplication of effort in research data creation, curation enhances the long-term value of existing data by making it available for further high quality research.

ERIS project

The development of a set of user-led and user-centric solutions to motivate researchers to deposit work in repositories was the goal of the Enhancing Repository Infrastructure in Scotland (ERIS) project. The project ran from April 2009 to

Years ago, in my penurious and somewhat traumatic 20s, I got into the habit of collecting interior-design magazines. My parents were splitting, and my family was scattering, and one day I picked up a copy of Elle Decor at an airport and suddenly felt as though I were teleported to Narnia. I didn't have a house or even the disposable income to purchase nonessentials that cost much more than
