VOTING RECORD -- 1ST SESSION, 102ND CONGRESS  
JANUARY 3, 1991 - JANUARY 3, 1992

Dear Friend:

This report includes the votes I cast for the 1st Session of the 102nd Congress, continuing my practice of making my complete voting record available to the people of the 10th District of Virginia. Because of changes in the law and rules of the House of Representatives affecting the use of the franking privilege by members of Congress, my voting record report cannot be mass mailed to 10th District residents as in past years, but can be mailed in this report format upon request. I appreciate your interest in this report.

There were 444 roll call votes during the 1st Session of the 102nd Congress which convened on January 3, 1991, and officially adjourned on January 3, 1992, although all voting business was concluded on November 26, 1991. Of those 444 roll calls, I missed only three votes, for a voting attendance record of 99 percent. The 444 roll calls included 42 procedural votes such as approving the Speaker's journal, quorum calls and motions to adjourn. Those procedural votes are not included in this report. To assist you in understanding the terminology used in the legislative process, a glossary of terms used in this report to describe the votes may be found on the reverse side.

This report is arranged by general subject areas as follows: each vote begins with the roll call number in parentheses, followed by the number of the bill or resolution being considered and short description of the question on which the vote was taken, including amendments, motions and passage. Next my own vote on the measure is listed by a "yes" or "no." The vote of the entire House is next indicated by "passed" or "failed" with the vote total, followed by the date on which the vote occurred. Votes taken under suspension of the rules are so indicated and an explanation of that procedure may be found in the glossary.

I hope you find this voting record information helpful.

Sincerely,

Frank R. Wolf  
Member of Congress

# GLOSSARY OF TERMS USED IN VOTING RECORD REPORT

**Amendment** - A proposal of a member of Congress to alter the language, provisions or stipulations in a bill or in another amendment. It is usually printed, debated and voted upon in the same way as a bill.

**Appropriations** - Legislation which provides the actual funds approved by authorization bills, but not necessarily the full amount authorized. There are 13 regular appropriations bills which must be approved on an annual basis effective for the fiscal year which begins on Oct. 1 (Also see Continuing Resolution.)

**Authorization** - Basic, substantive legislation that establishes or continues (reauthorizes) the legal operation of a federal program or agency, either indefinitely or for a specific period, or which sanctions a particular type of obligation or expenditure.

**Bill** - A legislative proposal, designated as H.R. in the House of Representatives and S. in the Senate, followed by a number assigned in the order in which it is introduced during the two-year period in which a Congress is convened. If approved by both houses of Congress in the same form and signed by the President, a bill becomes a law.

**Committee of the Whole** - A procedural device designed to expedite the legislative work of the House in which slightly less formal rules for conduct of debate and voting on amendments apply.

**Concurrent Resolution** - A resolution, designated as House Concurrent Resolution (H.Con.Res.) or Senate Concurrent Resolution (S.Con.Res.), often used to express the "sense of Congress" on various domestic or foreign policy issues. Concurrent resolutions do not require and are not intended for approval by the President and therefore do not have the force of law.

**Conference** - A meeting between the representatives of the House and Senate to reconcile differences between the two houses over provisions of a bill or joint resolution passed by both chambers. A majority of the members of the conference from each chamber must agree on the provisions of a measure before it can be considered by either chamber in the form of a "conference report." Conference reports cannot be amended and if not approved, the legislation may go back to conference or a new conference must be convened. Legislation passed by both houses with only minor differences need not be sent to conference; either chamber may "concur" in the other's amendments, completing action on the legislation.

**Continuing Resolution** - A joint resolution which continues in effect appropriations legislation for specific ongoing activities of federal departments or agencies when a fiscal year begins and Congress has not yet enacted all of the 13 regular appropriations bills for that fiscal year.

**House** - The House of Representatives, as distinct from the Senate, although each body is a "house" of Congress.

**Joint Resolution** - A resolution designated House Joint Resolution (H.J.Res.) or Senate Joint Resolution (S.J.Res.), followed by a number assigned in the order in which it is introduced during the two-year period in which a Congress is convened. If approved by both houses in the same form and signed by the President, it becomes a law just as a bill does. A joint resolution is generally limited to special circumstances and is also used to propose amendments to the Constitution. Under that purpose, it does not require a presidential signature and becomes part of the Constitution when three-fourths of the states ratify or approve it.

**Previous Question** - A request of the previous question, or a motion to order the previous question in the House brings to a vote the question of whether debate and possibility of amending the question should end and the merits of the pending issue should be voted upon. For example, the previous question is voted upon during consideration of a rule, which sets the time limits for debate and allows certain amendments to be considered on a bill. If a member wanted an additional amendment to be considered which was not made in order by the rule, he or she could work to defeat the previous question and if successful, the rule could be amended to include the member's request. If the motion to order the previous question is approved, debate on the issue and the possibility of amendment end.

**Resolution** - A simple resolution, designated House Resolution (H.Res.) or Senate Resolution (S.Res.), deals with matters entirely within the prerogatives of one house or the other. It requires neither passage by the other chamber nor approval by the President, does not have the force of law and is commonly used for internal business of that house or for expressing views of that house.

**Rule** - A resolution from the House Rules Committee which, if adopted by the House, sets the procedures and time limits for debate and voting on a pending bill or resolution. A rule can be open, which would allow any member to offer an amendment to the pending legislation; modified closed, which would allow only certain amendments approved by the Rules Committee to be offered; or closed, which would not allow any amendments to be offered.

**Suspension of Rules** - A procedure used in the House intended to speed the consideration of non-controversial legislation. Under suspension of rules, debate is limited to 40 minutes, no amendments from the floor are permitted, and a two-thirds vote of those members voting is required for passage.
