

thank Chairman Grassley and Senator Baucus and commend them for their leadership.

Proclamation—American Heart Month, 2003

January 30, 2003

By the President of the United States of America

A Proclamation

Advances in medical research have significantly improved our capacity to fight heart disease by providing greater knowledge about its causes, more innovative diagnostic tools to detect and counter it, and new and improved treatments that help people survive and recover from it. Despite these advances, heart disease continues to be America's number one killer. During American Heart Month, we renew our commitment to fighting cardiovascular disease by encouraging our citizens to learn more about its risk factors, its various warning signs, and life-saving emergency response techniques.

Heart attacks result when the blood supply to part of the heart muscle is severely reduced or stopped. Because many heart attack victims do not recognize the warning signs until it is too late, only one in five is able to reach a hospital quickly enough to benefit fully from treatments. To help Americans survive heart attacks, the National Heart, Lung, and Blood Institute (NHLBI), which is part of the National Institutes of Health, has joined with the American Heart Association (AHA) and other national organizations to create a major educational campaign, called "Act in Time to Heart Attack Signs." This campaign encourages Americans to learn the warning signs of a heart attack and to call 911 within minutes—five at most—of the start of symptoms. The campaign also offers educational materials for both the general public and healthcare professionals to encourage communication among doctors, other healthcare providers, and their patients about the importance of recognizing heart attack signs and getting treatment quickly.

Far too many Americans are also unaware of the dangers of cardiac arrest, in which the heart suddenly loses its ability to function.

Most cases of cardiac arrest that result in sudden death occur when the diseased heart's electrical impulses become rapid and then chaotic. About 95 percent of sudden cardiac arrest victims die before reaching the hospital. However, if treated within a few minutes, cardiac arrest can be reversed through defibrillation, an electric shock that allows the heart to resume a normal beat.

Research has shown that early cardio-pulmonary resuscitation (CPR) and rapid defibrillation, combined with early advanced care, can produce long-term survival rates of 40 percent where a cardiac arrest has been witnessed by a bystander. The AHA has developed a nationwide educational campaign called "Operation Heartbeat," to increase public awareness about cardiac arrest. "Operation Heartbeat" is educating the public about the warning signs of cardiac arrest, the importance of calling 911 immediately, and the benefits of administering CPR until defibrillation can be given.

When Americans take personal steps to improve their health, our whole society benefits. By developing good eating habits, being physically active, taking advantage of preventive screenings, and avoiding drugs, tobacco, and excessive use of alcohol, individuals and families can significantly reduce the onset and burden of heart disease. In promoting new education programs, supporting research, expanding access to life-saving tools, and encouraging our citizens to learn more about cardiovascular disease and lead healthy lifestyles, we can save lives.

In recognition of the important ongoing fight against cardiovascular disease, the Congress, by Joint Resolution approved December 30, 1963, as amended (77 Stat. 843; 36 U.S.C. 101), has requested that the President issue an annual proclamation designating February as "American Heart Month."

Now, Therefore, I, George W. Bush, President of the United States of America, do hereby proclaim February 2003 as American Heart Month. I invite the Governors of the States, the Commonwealth of Puerto Rico, officials of other areas subject to the jurisdiction of the United States, and the American people to join me in reaffirming our commitment to combating cardiovascular disease.

In Witness Whereof, I have hereunto set my hand this thirtieth day of January, in the year of our Lord two thousand three, and of the Independence of the United States of America the two hundred and twenty-seventh.

George W. Bush

NOTE: At the time of publication, this proclamation had not been received by the Office of the Federal Register for assignment of a proclamation number.

**Letter to Congressional Leaders
Transmitting the Reorganization
Plan Modification for the
Department of Homeland Security**

January 30, 2003

Dear Mr. Speaker: (Dear Mr. President:)

Pursuant to section 1502 of the Homeland Security Act of 2002 (Public Law 107-296) (the "Act"), I submit herewith the enclosed Reorganization Plan Modification for the Department of Homeland Security (DHS), which represents a modification of certain aspects of the DHS Reorganization Plan I submitted to you on November 25, 2002. The modification involves organizational units within the DHS Border and Transportation Security Directorate. The enclosed Reorganization Plan Modification provides information concerning the elements identified in section 1502(b), and is itself subject to modification pursuant to section 1502(d) of the Act. In accordance with section 1502(a) of the Act, please transmit this Reorganization Plan Modification to the appropriate congressional committees.

Sincerely,

George W. Bush

NOTE: Identical letters were sent to J. Dennis Hastert, Speaker of the House of Representatives, and Richard B. Cheney, President of the Senate.

**Memorandum on Major Drug
Transit or Major Illicit Drug
Producing Countries for 2003**

January 30, 2003

Presidential Determination No. 2003-14

Memorandum for the Secretary of State

*Subject: Presidential Determination on
Major Drug Transit or Major Illicit Drug
Producing Countries for 2003*

Pursuant to section 706(1) of the Foreign Relations Authorization Act, Fiscal Year 2003 (Public Law 107-228) (FRAA), which was enacted on September 30, 2002, I hereby identify the following countries as major drug transit or major illicit drug producing countries: Afghanistan, The Bahamas, Bolivia, Brazil, Burma, China, Colombia, Dominican Republic, Ecuador, Guatemala, Haiti, India, Jamaica, Laos, Mexico, Nigeria, Pakistan, Panama, Paraguay, Peru, Thailand, Venezuela, and Vietnam.

The Majors List applies by its terms to countries. The United States Government interprets the term broadly to include entities that exercise autonomy over actions or omissions that could lead to a decision to place them on the list and, subsequently, to determine their eligibility for certification. A country's presence on the Majors List is not necessarily an adverse reflection of its government's counternarcotics efforts or level of cooperation with the United States. Consistent with the statutory definition of a major drug transit or drug producing country set forth in section 481(e)(5) of the Foreign Assistance Act of 1961, as amended (FAA), one of the reasons that major drug transit or drug producing countries are placed on the list is the combination of geographical, commercial, and economic factors that allow drugs to transit or be produced despite the concerned government's most assiduous enforcement measures.

Pursuant to section 706(2)(A) of the FRAA, I hereby designate Burma, Guatemala, and Haiti as countries that have failed demonstrably during the previous 12 months to adhere to their obligations under international counternarcotics agreements and take the measures set forth in section
