---

### Application

- High relevance for cell biologists and cell signaling researchers.

---

### Details

- Rabbit anti-mouse carbonic anhydrase-related protein (CARP, UniProtKB/Swiss-Prot entry P28651)
- Tested in Western blotting and immunocytochemistry.
- Recognizes IP3 receptor associated cGMP kinase (IRAG) A and B
- Works in mouse, human, and rat.
- Species raised in: Rabbit
- Species of immunogen: Mouse
