**Re: SAJ-2010-0881-IP-EWG-Vía Verde Gas Pipeline
Final Project Alignment**

Dear (b) (6)

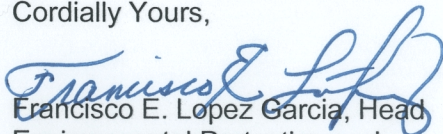

As discussed during the last Interagency Meeting held at the US ARMY Corps of Engineers (USACE) offices on March 2, 2011, attached please find the alignment depicting the Final Pipeline alignment for the Vía Verde Project. A copy of this alignment has been send to (b) (6) Chief, USACE North Permits Branch.

This alignment considers all mitigation efforts as well as realignments needed to avoid and minimize impacts to the environment; incorporates recommendations presented by different federal regulatory agencies part of the Interagency Committee evaluating the Joint Permit Application (JPA) presented back on September 20, 2011; and, considers additional pipeline alignment adjustments required during the State Environmental Impact Statement (EIS) approval process completed back on November 30, 2010.

The attached alignment is provided before the due date agreed upon during the last Interagency Committee meeting, in an effort from the Puerto Rico Energy Power Authority to provide the USACE with the required information needed to supplement the information originally included with the JPA presented.

If additional information related with this important subject is needed, please do not hesitate to contact me at (787) 521-4059 or Eng. Danny Pagan, at (787) 382-7330 at your earliest convenience.

Cordially Yours,

Francisco E. Lopez Garcia, Head
Environmental Protection and
Quality Assurance Division
