Project Title	Request	Intended Recipient	Project Location	Description
Wyoming Association of Conservation Districts Accelerated Soil Survey Project in Wyoming	\$300,000	Bureau of Land Management (BLM)	Various Counties in Wyoming	Soil surveys are currently taking place in various counties in Wyoming. Funds would be used to conduct soil surveys on BLM administered lands in the counties where current mapping is taking place.
Produced Water Study and Demonstration Program	\$1,000,000	United States Geological Service (USGS)	No location designated	The project would fund study a U.S. Geological Survey study as authorized in PL 110-229 the “More Water, More Energy, Less Waste Act”. The study would examine technical, legal, administrative, and environmental considerations associated with conveying reclaimed water through the Colorado River system. The focus would be studying how water produced from energy activity can be used for irrigation and other purposes without adversely impacting the environment.
