## ACTING PUBLIC PRINTER PRESENTS APPROPRIATIONS REQUEST FOR FISCAL YEAR 2013

WASHINGTON—Acting Public Printer Davita Vance-Cooks presented the FY 2013 appropriations request for the U.S. Government Printing Office (GPO) today before the House of Representatives Subcommittee on Legislative Branch Appropriations. GPO is requesting **no increase** over the level of funding the agency is receiving for FY 2012 due to savings garnered from cost-cutting activities last year as well as projected workload changes for FY 2013. GPO's budget request also includes a significant shift in funding away from conventional printing and distribution toward digital systems. The current level of \$126.2 million is a 6.6% reduction from FY 2011 and about a 15% reduction from FY 2010. GPO's funding level for FY 2013 is provided through three separate accounts in the annual Legislative Branch Appropriations bill:

- The Congressional Printing and Binding Appropriation covers the cost of information products in digital and print formats that GPO produces for Congress. About 70% of this cost is for preparing the electronic files used for both digital access and printing. For FY 2013, GPO is requesting \$83.6 million, a decrease of about \$7 million.
- The Salaries and Expenses Appropriation of the Superintendent of Documents primarily covers the cost of the Federal Depository Library Program, which works in partnership with 1,220 libraries nationwide to provide public access to Federal Government information. For FY 2013, GPO is requesting \$34.7 million, a decrease of about \$300,000.
- The GPO Revolving Fund receives appropriated funds for specific technology investment and facility improvements. For FY 2013, GPO is requesting \$7.8 million. The request includes funding for the continued development of GPO's Federal Digital System (FDsys) to support increased online access to congressional and Federal agency information as well as other digital information technology improvements.

GPO achieved significant savings in FY 2011 by reducing unnecessary overhead expenses and conducting a buyout that helped reduce staffing by about 15%. As a result, GPO achieved positive net income of \$5.6 million for the year. The agency, whose information production and dissemination operations have transitioned to digital technologies, is currently operating with its smallest workforce in more than a century.

“GPO is doing more with less in meeting the digital information needs of Congress, Federal agencies, and the public,” said Acting Public Printer Davita Vance-Cooks. “GPO's plan of reducing costs while continuing to expand services to our customers is working and showing real and measurable benefits.”

GPO is the Federal Government's primary resource for producing, procuring, cataloging, indexing, authenticating, disseminating, and preserving the official information products of the U.S. Government in both digital and tangible formats. GPO is responsible for the production and distribution of information products and

services for all three branches of the Federal Government, including U.S. passports for the Department of State as well as the official publications of Congress, the White House, and other Federal agencies. In addition to publication sales, GPO provides for permanent public access to Federal Government information at no charge through GPO's Federal Digital System ([www.fdsys.gov](http://www.fdsys.gov)) and through partnerships with approximately 1,220 libraries nationwide participating in the Federal Depository Library Program.
