GPO TEAMS WITH APPLE TO SELL FEDERAL eBooks

WASHINGTON—The U.S. Government Printing Office (GPO) has signed an agreement with Apple, Inc. to sell Federal eBooks. Titles are available in eBook format for the iPad, eReaders, PCs, and Macs when running the iTunes Store app. GPO works with Federal agencies to produce their publications, books, and reports in print and digital formats, including eBook formats. Current eBook titles available include: *Ponzimonium: How Scam Artists are Ripping Off America*, *On Course to Desert Storm*, and the *Appendix, Budget of the United States FY 2013*. GPO will continue to work with Apple to add new titles to the iTunes Store. GPO also makes eBooks available in partnership with Google's eBookstore, Barnes & Noble, OverDrive, Ingram, Zinio, and other online vendors.

“GPO is establishing itself as a source for Government publications in an eBook format through our relationships with multiple vendors,” said Acting Public Printer Davita Vance-Cooks. “I am pleased that GPO provides the public with access to many popular Federal eBook titles. This is another example of the many formats the agency offers the public to access Federal Government information.”

GPO is the Federal Government's primary resource for producing, procuring, cataloging, indexing, authenticating, disseminating, and preserving the official information products of the U.S. Government in both digital and tangible formats. GPO is responsible for the production and distribution of information products and services for all three branches of the Federal Government, including U.S. passports for the Department of State as well as the official publications of Congress, the White House, and other Federal agencies. In addition to publication sales, GPO provides for permanent public access to Federal Government information at no charge through GPO's Federal Digital System (www.fdsys.gov) and through partnerships with approximately 1,220 libraries nationwide participating in the Federal Depository Library Program.
