IMPLEMENTATION OF CURRENT ROUND OF FORMAT INTEGRATION AT THE LIBRARY OF CONGRESS

During the week of January 23-27, staff in the Cataloging Policy and Support Office (CPSO) provided training to representatives of the cataloging teams. The training was done on the "train the trainer" model. The representatives of the cataloging teams in turn trained staff on their teams. Once a team was trained, it was asked to implement the changes associated with the current round of format integration. Since there were some forty teams to be trained, actual implementation was not uniformly on the same day. The *Brief Guide* below was prepared by CPSO staff as part of the training materials for use in introducing the changes to staff at LC.

BRIEF GUIDE TO CHANGES RELATED TO 246/505/525/538/546/700-730/740 FIELDS—BOOKS

246 Field				
The following table lists the types of varying title most commonly used in cataloging books and the indicator combinations used for them.				
Type of varying title; these were previously given in a 740 field but are now given in a 246 field with a value in ind. 1 that governs notes/added entries and a value in ind. 2 that specifies the type/source of the varying title as appropriate	Ind. 1	Ind. 2	‡i	Introductory phrase to note if note generated; at LC, a bracketed display constant (d.c.) follows the 246 field in PCRD displays as appropriate
Added title page title	1	5		[Added title page title]
Alternate form of word, etc., in title in 245 or in title from source other than 245	3	6		No note; no d.c.
At head of title (title data)	1	6	‡i	"At head of title:" supplied in ‡i subfield at beginning of 246 field
Binder's title	1	6	‡i	Phrase supplied in ‡i subfield at beginning of 246 field
Caption title (not common in books)	1	6		[Caption title]
Colophon title	1	6	‡i	Phrase supplied in ‡i subfield at beginning of 246 field
Corrected form of title when <i>sic</i> or <i>i.e.</i> used in title in 245	3	6		No note; no d.c.
Cover title	1	4		[Cover title]
Half title	1	6	‡i	Phrase supplied in ‡i subfield at beginning of 246 field
Incorrect form of title when [] used in title in 245	3	6		No note; no d.c.
No collective title; access via a character string consisting of all titles immediately adjacent to one another and appearing at the beginning of 245	3	6		No note; no d.c.
No title added entry for varying form of title data given	0	6	‡i	Phrase supplied in ‡i subfield at beginning of 246 field
Other title information from 245	3	0		No note; no d.c.
Other title information that appears in a source other than 245; source supplied by cataloger in subfield ‡i	1	6	‡i	Phrase supplied in ‡i subfield at beginning of 246 field
Parallel title from 245	3	1		No note; no d.c.
Parallel title that appears in title from cover	1	4		[Cover title]

246 Field

The following table lists the types of varying title most commonly used in cataloging books and the indicator combinations used for them.

Type of varying title; these were previously given in a 740 field but are now given in a 246 field with a value in ind. 1 that governs notes/added entries and a value in ind. 2 that specifies the type/source of the varying title as appropriate	Ind. 1	Ind. 2	‡i	Introductory phrase to note if note generated; at LC, a bracketed display constant (d.c.) follows the 246 field in PCRD displays as appropriate
Parallel title that appears in added title page title	1	5		[Added title page title]
Parallel title that appears in title from spine	1	8		[Spine title]
Parallel title that appears in title from source supplied by cataloger in subfield ‡i	1	8	‡i	Phrase supplied in ‡i subfield at beginning of 246 field
Portion of title proper from 245; apply this category for title added entries stemming from the following conditions related to the title proper: portion of title proper exclusive of an alternative title portion of title proper that is an alternative title portion of title proper that is a part title or section title portion of title proper exclusive of any introductory terms, etc. portion of title proper that is emphasized by typography or other similar conditions	3	0		No note; no d.c.
Running title (not common in books)	1	7		[Running title]
Spine title	1	8		[Spine title]
Title on container (not common in books)	1	8	‡i	"Title on container:" supplied in ‡i subfield at beginning of 246 field
Vols. [no.]-<[no.] > have title:	1	8	‡i	"Vols. [no.]-<[no.] > have title:" supplied in ‡i subfield at beginning of 246 field
Any other condition not covered by one of the categories above when an added entry is wanted	1	8	‡i	Phrase supplied in ‡i subfield at beginning of 246 field

*Order of Input**First input*

Those 246 fields relating to the 245 field as identified by second indicator values 0, 1, and sometimes 8 and in the order of these indicator values themselves, which reflects found form followed by any alternate form

Followed by any others in the order judged best.

505 Formatted contents note

Field made repeatable. Repeat field when first 505 reaches about 15-20 lines of text on either a Comterm or a BWS; limit subsequent 505 fields to about 15-20 lines of text; LC's FIND command indexes the first 255 words/1500 bytes; indicator values should relate to contents as a whole and should be the same in each field; end all 505 fields with space hyphen hyphen until item is complete; then end last 505 with ending mark of punctuation (usually a period); do not attempt to indicate that subsequent 505s are "continued" but accept if present in an external source record (EXSR) used for copy cataloging.

Ind 1 Display constant controller (new value added)

8 No display constant generated; do not use for LC original cataloging but accept if present in EXSR

Ind 2 Level of content designation (indicator newly defined)

none No value present in records created before second ind defined

b Basic; LC default value; displays as hyphen in MUMS

0 Enhanced; retain when subfields †g, †r, or †t retained

†g Miscellaneous information

†r Statement of responsibility

†t Title

Do not apply subfields †g, †r, and †t to LC original cataloging; if present in EXSR, retain in cases of single-volume collections; remove in cases of incomplete multipart items to which LC needs to continue to add volumes

525 Supplement note

Assign: continue current practice but now use this field for any notes about materials that meet the AACR2 definition of a supplement; if in doubt, use a 500 field

538 System details note

Assign: use for books with accompanying disks if the information is readily available; indicate that the note applies to accompanying material by beginning the note with "System requirements of accompanying [term that is applicable, e.g., disk]: ..."; AACR2 9.7B1 b) *System requirements* calls for five data elements; supply only the first (the make and model of the computer(s) on which the file is designed to run) and the third (the name of the operating system) in any note applicable to accompanying material; always describe the accompanying material as such in the physical description area (AACR2 2.5E1; 300 field) regardless of whether a note (538 field) applicable to the accompanying material is given or not

546 Language note

Assign: continue current practice but now use this field for any data meeting the specifications of the field; limit use to notes that actually state the names of the languages/scripts of the item in hand, including notes such as "Includes summaries in [name of language or languages]."; use subfield †b to identify script when explicitly stated in note in a simple, readily identifiable manner (e.g., "In Punjabi (Arabic script)"); do not apply in notes in which the statement of the script is embedded in a more complicated statement (e.g., "Hebrew, Akkadian (romanized), and German") that does not lend itself readily to being subfielded (subfield †a is not repeatable, therefore subfield †b can only be applied when the script is given at the end of a note)

700-730 fields. A few subfields have been added; as previously announced, the second indicator values for "Alternative" (0) and "Secondary" (1) have been made obsolete; a new value of blank (No information provided) has been added in the second indicator position; staff working in MUMS accept the system-supplied default value of hyphen, except for analytic entries (value 2), in fields 700, 710, 711, 730.

740 Field

NEW PRACTICE: The 740 field has been redefined to be limited to added entry access for the uncontrolled forms of two kinds of titles:

1) uncontrolled analytical title added entries for independent works contained within the item;

2) uncontrolled added entries for titles of related works external to the item with default indicator values of 0 (Number of non-filing characters) and 2 (Analytical entry). Note that for items without a collective title added entry access for a character string consisting of all titles immediately adjacent to one another and appearing at the beginning of 245 is provided via 246 not 740.

100 1- #aSurname, Forename.
240 10 #aUniform Title 1 (controlled)
245 10 #aTitle 1 ; #bTitle 2 / #cstatement of responsibility.
246 3- #aTitle 1 ; Title 2

700 12 #aSurname, Forename. #tControlled Title 2.
740 02 #aUncontrolled Title 2.

Updating of LC Machine Catalog

No attempt is being made to update the existing LC machine catalog either by means of program or staff activity to reflect the content designation conventions being implemented with the current round of changes. There is no policy requirement to change an already completed data element. This includes data elements in the following categories of records:

- 1) an existing completed record, including a record in a CIP state (enc lvl = 8);
- 2) a pipeline record in which an aspect, usually the descriptive aspect, has been completed;
- 3) a record being used for copy cataloging;

Do, however, apply the new conventions if data elements related to the format integration changes are newly added to such records. It is understood that this results in a record that exemplifies a mixture of old and new practice.

Apply the new conventions to any aspect of a pipeline record that has not yet been completed and to newly created LC original cataloging records, including those for which the MUMS COPY feature is used initially to create the record, e.g., a record for an earlier edition used as the basis for creating a record for a later edition.

MUSIC CATALOGING DECISIONS

26.3A3. Different forms of the name.

In addition to the references from personal names in names of corporate bodies prescribed by LCRI 26.3A3, make see also references to the name of a performing group when appropriate according to the instructions in MCD 26.3B.

CANCEL; MCD 26.3B cancelled

26.3B. See also references.

When the name of a performing group contains the name(s) of one or more persons connected with it, make see also references(s) from the heading(s) for the person(s) to the heading for the group (cf. LCRI 26.2C).

Ashbury Stabbins Duo

xx Ashbury, Roy
xx Stabbins, Larry

Crosby, Stills & Nash

xx Crosby, David
xx Nash, Graham
xx Stills, Stephen

CANCEL; under LCRI 26.2C, LC restricts such references to collections of special materials when it is more efficient to use the *see also* technique as a substitute for making an added entry under the heading for the person on a large number of bibliographic records

SUBJECT CATALOGING

SUBDIVISION SIMPLIFICATION PROGRESS

Since the Subject Subdivisions Conference took place at Airlie House, Virginia, in May 1991, progress continues to be made in simplifying subdivisions in the Library of Congress Subject Headings system. On Weekly Lists 94-43 to 94-52, changes were made in the following areas:

Recommendation #1. Toward achieving the recommended standard order of [topic]—[place]—[chronology]—[form] in LC subject heading strings, new topical subdivisions for which geographic orientation is logical are now established with the designation (*May Subd Geog*). On a case-by-case basis, subdivisions not previously divided by place are being authorized for geographic subdivision. Fifteen subdivisions not previously divided by place, including four subdivisions listed below, were authorized for geographic subdivision during this period.

Recommendation #6. During the fourth quarter of 1994, progress in simplifying subdivisions was made in the following areas:

1) *Cancellation of subdivisions that represent the same or similar concepts in different forms.*

The subdivision —**Diseases and defects**, which had been established under the heading **Eye**, was cancelled in favor of the subdivision —**Diseases**, which is free-floating under organs and regions of the body.

2) *Subdivisions replaced by phrase headings.*

Seven subdivisions established under the heading **Bibliography** were cancelled and replaced by direct phrase headings, e.g., **Bibliography—Editions** was changed to **Editions**.

3) *Subdivisions updated to different forms.*

As part of a project to change the heading **Gallegan dialect** to **Galician language**, the free-floating subdivision —**Gallegan influences**, which was used under headings for literatures, was updated to the form —**Galician influences**. The subdivision —**Jewels**, which was established under the heading **Clocks and watches**, was replaced by the subdivision —**Jewel bearings**. The subdivision —**Writing, Cursive**, which was established under the headings **Chinese language**, **Japanese language**, and **Korean language**, was uninverted to the form —**Cursive writing**.

4) *Subdivisions no longer needed.*

The subdivision —**Fat globules**, which was established under the heading **Butterfat**, was cancelled with no replacement when the heading was changed to **Milkfat**. The

subdivision —**Library applications**, which had been established under twenty-seven headings ranging from **Computer conferencing** to **Photography** and **Word processing**, was cancelled with no replacement. The heading **Bibliography—Photomechanical editions** was also cancelled with no replacement.

Below is a list of the changes to free-floating subdivisions that took place during the fourth quarter.

CHANGED OR CANCELLED FREE-FLOATING SUBDIVISIONS **WL94-43 - 94-52**

Subdivision	List in SCM	Change or replacement
-Clergy-Installation	H 1187	ADD: (<i>May Subd Geog</i>)
-Diagnosis	H 1150	ADD: (<i>May Subd Geog</i>)
-Diseases-Diagnosis	H 1147	ADD: (<i>May Subd Geog</i>)
-Flammability	H 1158	ADD: (<i>May Subd Geog</i>)
-Gallegan influences	H 1156	-Galician influences

SUBJECT AUTHORITY RECORDS

Because of requests from subscribers who wish to combine name and subject authority records in a single file, subject authority records that are more accurately name authority records will not be created after December 31, 1994. In the past, these records were necessary to provide a complete hierarchy. This change in practice will result in a clearer delineation between the two files.

In addition, the Library will initiate special projects as time permits to delete those subject authority records already created for which name authority records exist. The control number for the deleted subject authority record will be entered in field 010 \$z of the name authority record.

Heading-subdivision records properly belong in the subject authority file. These entries will remain and continue to be established.

Questions about this change in practice may be addressed to Cataloging Policy and Support Office, Library of Congress, Washington, D.C. 20540-4305; voice: (202) 707-4380; fax: (202) 707-6629; Internet: cpso@loc.gov

LCSH IN BRITISH LIBRARY BNB MARC RECORDS

The British Library has announced reinstatement of the use of Library of Congress Subject Headings in BNB MARC records beginning January 1995. The British Library has also joined the Subject Authority Cooperative Program (SACO) to propose new headings and changes to LCSH. Recent British Library contributions to LCSH are headings for **Luminescent probes**, which are newly developed research tools in biotechnology and genetic engineering; **Ring ouzel**, a bird native to the British Isles; and **Rave culture**, a phenomenon of the late 1980s and 1990s on the British youth scene.

Andrew MacEwan, Manager of the LCSH Project at the British Library, visited the Library of Congress the week of January 30 to discuss the project and meet with staff responsible for LCSH, as well as staff involved in SACO. During his visit, Mr. MacEwan attended an editorial meeting at which British Library proposals for geographic headings designating regions of England were among the headings under consideration on the Weekly List of LC Subject Headings.

The British Library is now assigning subject headings from LCSH to all monographic BNB MARC records with the exclusion of fiction, juvenile literature, works with no specific topical focus, such as general encyclopedias, and individual works of literature of single authorship with no topical focus. Extension of the assignment of LCSH to serial records is planned for 1995.

The British Library began assigning headings from LCSH to BNB/MARC records in 1971 and added them to all records created for the *British National Bibliography* until 1987, when they were withdrawn as part of a service review. In 1993, the British Library's National Bibliographic Service undertook a survey on subject access in BNB/MARC records and found that 25 percent of responding library systems, including large research libraries, used LCSH. Based on those findings, the British Library Board subsequently endorsed the recommendation to reintroduce LCSH.

Planning for the LCSH reinstatement project took place during 1994 along with modifications to cataloging systems in the British Library's Acquisitions Processing and Cataloguing Directorate to accommodate the loading of LC Subject Authorities tapes. Consultation between the British Library and the Library of Congress was facilitated by visits of British Library officials to Washington during 1994. Lynn El-Hoshy, Senior Cataloging Policy Specialist, Cataloging Policy and Support Office (CPSO), served as Library of Congress liaison to the project. She travelled to the British Library in Boston Spa, England, to provide training on the application of LCSH during September 1994.

SUBJECT HEADINGS OF CURRENT INTEREST

Weekly Lists 43-52, 1994, and 1-5, 1995

Abused husbands (*May Subd Geog*)
