LIBRARY OF CONGRESS RULE INTERPRETATIONS (LCRI)

Cumulative index of LCRI to the Anglo-American Cataloguing Rules, second edition, 2002 revision, that have appeared in issues of Cataloging Service Bulletin. Any LCRI previously published but not listed below is no longer applicable and has been cancelled. Lines in the margins of revised interpretations indicate where changes have been made.

1.11A. FACSIMILES, PHOTOCOPIES, AND OTHER REPRODUCTIONS.

Non-Microform Reproductions¹

PCC practice: Catalogers should be aware of the BIBCO Provider-Neutral E-Monograph Guide (http://www.loc.gov/catdir/pcc/bibco/PN-Guide.pdf) and the CONSER Aggregator-Neutral policy (see section 31.2.3 at http://www.loc.gov/acq/conser/pdf/Module31.pdf) and apply those policies rather than the guidelines below when appropriate.

LC practice: Follow these guidelines for reproductions of previously existing materials that are made for: preservation purposes in formats other than microforms; non-microform dissertations and other reproductions produced "on demand"; and, electronic reproductions.

These guidelines identify the data elements to be used in the record for the reproduction, separate from the record for the original. For some electronic reproductions, however, LC may delineate details of the reproduction on the record for the original manifestation rather than create a separate record for the reproduction. LC catalogers should consult "Draft Interim Guidelines for Cataloging Electronic Resources" http://lcweb.loc.gov/catdir/cpso/dcmb19_4.html for more information (other cataloging agencies may have developed their own guidelines in this regard).

1) Transcribe the bibliographic data appropriate to the *original* work being reproduced in the following areas:

title and statement of responsibility edition material (or type of publication) specific details publication, distribution, etc.

Cataloger judgment will be required to distinguish electronic reproductions from electronic republications or simultaneous publication in analog and digital form (only reproductions are covered by this LCRI). For example, an electronic reproduction produced using scanning techniques that results in a facsimile reproduction may be easily identified as a reproduction. Other non-facsimile electronic reproductions may also be considered under this LCRI when they purport to be a reproduction of the original and can serve as a surrogate for the original. Other cataloging agencies choosing to follow this LCRI may need to develop their own criteria for distinguishing reproductions from manifestations judged not to be reproductions. In cases of doubt, or in cases where there is inadequate information about the original on which to base a description, do not consider the electronic manifestation to be a reproduction.

¹ A reproduction is a manifestation that replicates an item (or a group of items) or another manifestation (e.g., a reprint with no changes) that is intended to function as a substitute. The reproduction may be in a different physical format from the original. Reproduction is generally a mechanical rather than an intellectual process. The physical characteristics of the reproduction such as color, image resolution, or sound fidelity are influenced by the particular process used to create it, and therefore may differ from those of the original. Reproductions are usually made for such reasons as the original's limited availability, remote location, poor condition, high cost, or restricted utility.

physical description series

- 2) If appropriate, give in the title and statement of responsibility area the general material designation that is applicable to the format of the *reproduction* (cf. LCRI 1.1C).
- 3) Give in a single note (533 field) all other details relating to the *reproduction* and its publication/availability. Include in the note the following bibliographic data in the order listed:

Apply rules 1.4-1.7 for the formulation of the bibliographic data in the 533 field note. Enclose cataloger-supplied data in brackets. Omit the area divider (space-dash-space).

4) Use a physical description fixed field (007) applicable to the reproduction. For electronic reproductions, also supply information about the electronic location and access (856 field).

² Consider the "agency responsible for the reproduction" to be the agency that selected the material to be reproduced, arranged for reproducing the material, exercised control over production formats, has overall responsibility for quality, etc. If the agency is unknown, give "[s.n.]"; if place and agency are unknown, use "[S.l.:s.n.]." Transcribe also the name of the agency from which to secure copies or the agency that made the reproduction if the agency is named in one of the prescribed sources for the publication, distribution, etc., area of the reproduction.

³Other cataloging agencies choosing to follow this LCRI may have compelling local reasons (e.g., data manipulation) for recording notes relating to the reproduction in other than the 533 field (e.g., system requirements (538), restrictions on access (506)).

Examples (do not necessarily include all applicable data elements):

```
007 st#pmndmb||||
 245 10 $a Barcarolle, op. 10, piano solo $h [sound

```

Note: Items that are reproductions of materials prepared or assembled specially for bringing out an original edition (e.g., republished for inclusion in a collection, commemorative editions, published with new introductory material) are cataloged as editions, not as reproductions.

ROMANIZATION

At the end of this issue is the final version of Procedural Guidelines for Proposed New or Revised Romanization Guidelines and the final, approved revision of the romanization table for Greek. They can also be found at http://www.loc.gov/catdir/cpso/romanization/greek.pdf

PROCEDURAL GUIDELINES FOR PROPOSED NEW OR REVISED ROMANIZATION TABLES

These guidelines apply to the creation of new tables and the revision of existing tables when needed and as applicable. Existing tables will not be explicitly revised to conform to these guidelines unless other major changes are warranted.

General Goals:

- Any future ALA/LC Romanization Tables should be transliteration schemes rather than schemes to replicate pronunciation or guides to pronunciation. Pronunciation is variable around the world.
- Any future ALA/LC Romanization Tables should enable machine-transliteration as much as possible and preferably reversible transliteration.
- Any future ALA/LC Romanization Tables should be in line with internationally accepted standards and/or standards officially sanctioned by the home country when possible.
- These goals may not always be met, but they should be applied on a case-by-case basis as best they can.

Guidelines:

- 1. Examine national and international standards before beginning the process of creating a new or revising an existing romanization table.
- 2. *Mapping characters to the Latin script*
 - a. Take the equivalent characters used from the MARC Basic Latin script repertoire as much as possible.
 - b. Choose a Latin script equivalent for a non-Latin letter, not necessarily based on pronunciation of the letter, but so as to maximize clarity and minimize confusion with the transliteration of other letters. The resulting Latin script equivalents should allow for the reversal of romanization as systematically as possible, without the application of special algorithms or contextual tests.
 - c. Avoid special Latin script alphabetic characters as they are not always widely supported in display and printing.
 - d. Include a table for numerals if the non-Latin script uses characters other than Western Arabic numerals.

3. *Modifiers*

- a. Prefer single letter equivalents (e.g., š) to blends (e.g., sh), that is, multiple letter equivalents, unless there is no ambiguity in the use of the blend.
- b. Use modifier characters (diacritical marks) in conjunction with the basic Latin script characters, but take care to avoid modifier characters that are not widely supported (e.g., ligature marks), or whose positioning over or under a Latin script base letter may interfere with the printing and/or display of that letter.

- c. *Above*. Prefer to use the acute (´), grave (`), hacek (`), breve (`), dieresis ("), tilde (~), macron (~), circumflex (^), and dot above ('), if needed.
- d. *Below*. Avoid modifiers below characters, since they often interfere with portions of Latin letters that descend and when underlining is present. If a modifier below is desired, prefer the dot below (.) or the cedilla (.).
- 4. Render marks used as guides to pronunciation as diacritics or punctuation marks when necessary to accommodate pronunciation.
- 5. Non-alphabetic languages
 - a. In dealing with non-alphabetic scripts, e.g., syllabic scripts, ideographs, the above guidelines should be applied to the extent that they can.
 - b. Any provisions for aggregation or word division should be based on such factors as international agreement, convenience of use, promotion of consistent application, and ease of online searching.
- 6. *Other factors*. The impact of file maintenance on legacy records should be considered in revising tables in relation to the ease or difficulty of accomplishing it, the benefits provided by the revisions, and the obligations of and impact on various organizations and institutions.

Procedures:

- 1. Forwarding proposed new or revised Romanization tables.
 - a. Submit all draft tables (new and revised) to the Policy and Standards Division, Library of Congress, as an attachment to an electronic mail message sent to policy@loc.gov
 - b. Submit all draft proposals as complete tables in an electronic format, e.g., Microsoft Word, so that the resultant file may be updated during the review process.
 - c. Clearly note the proposed revisions either 1) within the table itself or 2) as a separate document indicating what the proposed revisions are and the justification for them.
 - d. Provide pertinent justification, e.g., experts consulted, sources consulted, international standards found.
- 2. *Library of Congress review*. The Policy and Standards Division and other Library staff with knowledge of the language or script will review draft tables (both new and revised).
- 3. Review by ALA and other stakeholders. After reaching consensus within the Library of Congress, the Library will seek comments from the appropriate committee within the American Library Association and the stakeholder community at large. This is done in several ways:
 - a. Official notification to the appropriate ALA committee and posting the draft on the Cataloging and Acquisitions Web site (http://www.loc.gov/aba/) with a request for comments usually within 90 days of the posting;
 - b. the draft table will be published in *Cataloging Service Bulletin* with a request for comments within 90 days;
 - c. the draft will be sent to identified stakeholders with the same 90 days request for comments; and
 - d. the availability of the draft will be noted in a posting to various electronic lists according to the language. See list below.

- 4. Receipt of comments. The requests for comments will specify that such comments are to be sent to policy@loc.gov by a specified date. The Policy and Standards Division and other Library of Congress staff will evaluate the comments as they are received. Once the Library reaches consensus, the division will revise the draft table as appropriate. The Policy and Standards Division will acknowledge the receipt of comments.
- 5. Approval process. The Library of Congress will forward draft tables that have been completed to the chair of the appropriate committee as determined by the American Library Association. If the appropriate ALA committee has disagreements with the submitted draft table, it may be necessary to return to one of the steps above.
- 6. The Library of Congress will issue status reports to the stakeholders and electronic lists.
- 7. *Approved tables*. Once the appropriate committee has approved the draft table, the Policy and Standards Division will make any changes to the table as the result of this process, post the approved table to the Cataloging and Acquisitions/ALA-LC Romanization Tables Web page (http://www.loc.gov/catdir/cpso/roman.html), and publish the approved table in *Cataloging Service Bulletin*.

Notes

For the purposes of this table, texts written before 1454 are considered Ancient or Medieval Greek, and texts written after 1453 are considered Modern Greek.

The rough breathing ($\dot{}$) is romanized h. When it appears with a vowel or a diphthong, the h precedes the romanized vowel or diphthong; when it appears with rho (\dot{P} , \dot{p}), the h follows the romanized rho (Rh, rh). The h is supplied as appropriate when the rough breathing does not appear in the Greek text (for example, when the text is in all capitals, or, in Modern Greek, when the text is in monotonic orthography). *Exception:* in Modern Greek, romanize \dot{P}/\dot{p} as Rh/rh only if the rough breathing appears in the Greek text.

Other diacritical marks, such as the smooth breathing, the coronis, acute, circumflex, and grave accents, and the diaeresis, as well as iota subscript and adscript, are omitted in romanization.
