

community should work to increase awareness and prevention of heat stroke; and

(2) Congress urges national and community organizations, businesses in the private sector, and the media, through National Heat Stroke Awareness Month to promote the awareness of heat stroke.

Agreed to September 22, 2008.

NATIONAL DYSPHAGIA AWARENESS MONTH—
SUPPORT

Sept. 27, 2008
[H. Con. Res. 195]

Whereas dysphagia, or difficulty with swallowing, is a medical dysfunction that affects as many as 15,000,000 Americans;

Whereas the Centers for Disease Control and Prevention has estimated that 1,000,000 people in the United States annually are diagnosed with dysphagia;

Whereas the Agency for Healthcare Research and Quality has estimated that 60,000 Americans die annually from complications associated with dysphagia;

Whereas based on Centers for Disease Control and Prevention mortality data, this is more than the total number of Americans dying from all forms of liver disease, kidney disease, and HIV/AIDS combined—and nearly as many as those dying from diabetes, the number 6 killer of Americans;

Whereas the most common complication arising from dysphagia is aspiration pneumonia—caused by food or saliva entering the windpipe and into the lungs;

Whereas one in 17 people will develop some form of dysphagia in their lifetime, including 50 to 75 percent of stroke patients and 60 to 75 percent of patients who undergo radiation therapy for head and neck cancer;

Whereas as many as half of all Americans over 60 will experience dysphagia at some point;

Whereas complications due to dysphagia increase health care costs by resultant hospital readmissions, emergency room visits, extended hospital stays, the necessity for long-term institutional care, and the need for expensive respiratory and nutritional support;

Whereas the cost of managing a patient with a feeding tube, which for many has been the primary treatment option for this condition, is reported to average over \$31,000 per patient per year;

Whereas the total annual cost to Medicare just for enteral feeding supplies for outpatients was more than \$670,000,000 in 2003, nearly 6 percent of the total Medicare budget for that year;

Whereas including the monies spent in hospitals, the total cost of dysphagia to the health care system is well over \$1,000,000,000 annually;

Whereas the condition of dysphagia is a vastly underreported condition and not widely understood by the general public; and

Whereas observing June 2008 as National Dysphagia Awareness Month would raise public awareness about dysphagia and the need for early detection and treatment: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that a National Dysphagia Awareness Month should be established.

Agreed to September 27, 2008.

Sept. 27, 2008
[S. Con. Res. 84]

ROBERT MONDAVI—HONORING

Whereas Robert Mondavi, a much-loved and admired man of many talents, passed away on May 16, 2008, at the age of 94;

Whereas Robert Mondavi will be fondly and most famously remembered for his work in producing and promoting California wines on an international scale;

Whereas Robert Gerald Mondavi was born to Italian immigrant parents, Cesare and Rosa, on June 18, 1913, in Virginia, Minnesota, and his family later moved to Lodi, California, where he attended Lodi High School;

Whereas after graduating from Stanford University in 1937 with a degree in economics and business administration, Robert Mondavi joined his father and younger brother Peter in running the Charles Krug Winery in the Napa Valley of California;

Whereas Robert Mondavi left Krug Winery in 1965 to establish his own winery in the Napa Valley, and, in 1966, motivated by his vision that California could produce world-class wines, he founded the first major winery built in Napa Valley since Prohibition: the Robert Mondavi Winery;

Whereas in the late 1960s, the release of the Robert Mondavi Winery's Cabernet Sauvignon opened the eyes of the world to the potential of the Napa Valley region;

Whereas Robert Mondavi introduced new and innovative techniques of wine production, such as the use of stainless steel tanks to produce wines like his now-legendary Fumé Blanc;

Whereas as a tireless advocate for California wine and food, and the Napa Valley, Robert Mondavi was convinced that California wines could compete with established European brands, and his confidence in the potential of Napa Valley wines was confirmed in 1976 when California wines defeated some well-known French vintages at the historic Paris Wine Tasting, or "Judgment of Paris", wine competition;

Whereas in the late 1970s, Robert Mondavi created the first French-American wine venture when he joined with Baron Philippe de Rothschild in creating the Opus One Winery in Oakville, which produced its first vintage in 1979;

Whereas the success of the Robert Mondavi Winery, and the many international ventures Robert Mondavi pursued, allowed him to donate generously to various charitable causes, including the Robert Mondavi Institute for Wine and Food Science and Robert
