The Oakley SI Ballistics M Frame 2.0 protective spectacle consists of a plastic frame (one size) with interchangeable polycarbonate lenses. The frame and lens assembly weighs just over one ounce. All lenses have been treated with a hard-coat on the exterior surface to reduce scratching and an anti-fog coating on the interior surface to reduce fogging. The Oakley SI Ballistic M-Frame provides ballistic-fragmentation protection, and meets all ANSI Z87.1-2003 optical and safety requirements. The lens material blocks 99.9% of all UVA and UVB light. An optional prescription lens carrier is available for those who require corrective lenses.
